Contra Costa County

OFFICE OF THE SHERIFF

2019

Policy and Procedures Manual

Revised November 12, 2019
MISSION STATEMENT

The Office of the Sheriff works in partnership with our diverse community to safeguard the lives, rights and property of the people we serve. With unwavering dedication we provide innovative professional law enforcement services to our community. We accomplish this mission by maintaining our Core Values while always conducting ourselves with the highest ethical standards.

Chapter One:
Office of the Sheriff Manual
I. POLICY.

A. The Office of the Sheriff maintains a Policy and Procedures Manual to provide employees with policies expressing the Office of the Sheriff’s philosophy, goals, and operational procedures. The Policy and Procedures Manual shall be made available to all employees. Except with respect to those policies that are specifically directed at specialized functions within the Office of the Sheriff, our policies are applicable to all employees of this agency, whether sworn, general or volunteer.

1. This policy relates to the department-wide Policy and Procedures Manual and is not applicable to policies which are issued and maintained by Bureaus, Divisions, and Units.

II. DEFINITIONS.

A. E-Team: Executive staff of the Sheriff’s Office, including Sheriff, Undersheriff and Assistant Sheriffs.

B. Manual: A compilation of policies and other reference materials detailing the goals, operations and procedures, and defining the expectations of the Office of the Sheriff.

C. Red Stripe Policy: Those policies that are critical knowledge for proper conduct during high-risk events that do not occur frequently. Personnel to whom a particular “Red Stripe” Policy applies must know the policy in total so that effective and correct action may be taken when there is no discretionary time available to reference the manual or other resources. (See Section III. D. 2.)

D. Yellow Stripe Policy: Those policies that are critical knowledge for proper conduct during high risk events that occur frequently, or occur infrequently, but in circumstances which allow the employee time and opportunity to make a proper decision. Personnel to whom that particular “Yellow Stripe” Policy applies must have a good working knowledge of the policy and know how to access and properly interpret the policy at the time needed so that effective and correct action may be taken. (See Section III. D. 3.)
III. GENERAL

A. POLICY AND PROCEDURES DEVELOPMENT

1. The Administrative Services Bureau through the Professional Standards Division’s Research and Planning Unit is responsible for the Office of the Sheriff Manual development, review and maintenance. Continuous review of the Policies and Procedures Manual will be conducted by the Research and Planning Unit and by all Division Commanders with respect to those policies which directly relate to their respective divisions to ensure that policies express the Office of the Sheriff's current goals and objectives.

2. The Research and Planning Unit will seek and obtain input from the appropriate Bureau and Division Commanders for actual or potential problem areas. All employees of the Office of the Sheriff are encouraged to actively participate in policy and procedure development. The Research and Planning Unit may choose to solicit input on new or revised policies and procedures from personnel of other agencies including external agencies and subject matter experts such as specialized legal counsel, the Commission on Law Enforcement Accreditation, the National Institute of Corrections, and others as deemed beneficial.

3. Employees may contact the Sheriff in writing via the chain of command with suggestions or concerns about policies or procedures. Suggestions may also be sent via the chain of command directly to the Research and Planning Unit.

B. POLICIES AND PROCEDURES APPROVAL

1. The Research and Planning Unit is responsible for the final draft development of recommended policy and procedures. Following the final review by the Professional Standards Unit, the proposed document will be sent to the Sheriff via the E-Team for comment and review.

2. The Sheriff may approve, disapprove or defer action on the proposal.

3. When a policy or procedure is approved, the Sheriff or a designee will sign the original document and return it to the Research and Planning Unit, which will post the new or modified policy electronically on SPARKS (see below).

C. DISTRIBUTION AND MAINTENANCE

1. The Office of the Sheriff Manual will be available to all Office of the Sheriff employees as an electronic file. All staff will be advised of revisions and additions in a policy memo via E-mail. An up-to-date Manual (including all revisions) is available on the Sheriff’s Personnel Administrative Record Keeping System (“SPARKS”) under the button “Documents, Policies and Procedures.” Each policy number and name hyperlinks to the respective policy.

a. Once a year, the Research and Planning Unit will require all Sheriff’s Office employees to acknowledge their understanding of, and compliance with, all policies.
2. The Research and Planning Unit will maintain a historical reference manual which contains all policies and procedures that have been revised for a period of ten years.

D. REVIEW OF POLICIES AND PROCEDURES

1. All Office of the Sheriff employees shall be familiar with and comply with the Office of the Sheriff Policies and Procedures and shall familiarize themselves in the use of the Manual for reference.

2. Those policies that are critical knowledge for proper conduct during high-risk events that do not occur frequently will be delineated as “Red Stripe” Policies. Personnel to whom a particular “Red Stripe” Policy applies must know the policy in total so that effective and correct action may be taken when there is no discretionary time available to reference the manual or other resources. Periodic training at the Division level will be scheduled to determine that Office of the Sheriff personnel to whom a particular “Red Stripe” Policy applies have a clear understanding of the applicable “Red Stripe” Policies and are able to articulate and apply those policies without reference to written materials or other resources. Employees who are unable to demonstrate a clear understanding of and the ability to articulate and apply those “Red Stripe” Policies that apply to their assigned positions will be provided reasonable remedial training. Any employee who is unable to demonstrate a clear understanding, and the ability to articulate and apply those “Red Stripe” Policies after reasonable remedial training, will be subject to counseling or discipline.

3. Those policies that are critical knowledge for proper conduct during high-risk events that occur frequently, or occur infrequently, but in circumstances which allow the employee time and opportunity to make a proper decision will be delineated as “Yellow Stripe” Policies. Office of the Sheriff personnel to whom a particular “Yellow Stripe” Policy applies must have a good working knowledge of the policy and know how to access and properly interpret the policy at the time needed so that effective and correct action may be taken. Periodic training at the Division level will be scheduled to determine that Office of the Sheriff personnel to whom a particular “Yellow Stripe” Policy applies have a clear understanding of it. Employees should be able to articulate and apply those policies with reference to written materials or resources in a reasonable manner and time. Employees unable to demonstrate a clear understanding of those “Yellow Stripe” Policies that apply to their assigned positions will be provided reasonable remedial training. Employees unable to demonstrate a clear understanding, articulation, and application of those “Yellow Stripe” Policies after reasonable remedial training may be subject to counseling or discipline.
I. POLICY.
   A. The Office of the Sheriff’s Manuals are organized into a standardized, multi-volume format to provide information and direction in a clear useful form. All manuals produced within the Office of the Sheriff shall follow the format of the Policies and Procedures Manual.

II. DEFINITIONS
   A. MANUAL: A collection of policies that explains the goals, operations and procedures and defines expectations of the Office of the Sheriff.
   C. APPENDICES: Additional information implementing policies.

III. GENERAL
   A. POLICY SUBJECT FORMAT. The subjects addressed as policies are presented in a specific format to make the information presented more useful to the reader. The format is:
      1. Subject. The name of the topic of the policy.
      2. Policy. A definitive statement of the position of the Office of the Sheriff on an issue of significance to the Office. The policy will normally state why a topic is addressed and provide a concise statement of the position of the Office of the Sheriff. All personnel shall comport their actions to the Policies of this Office.
      3. Definitions. Words or phrases used in the policy may be defined to aid the reader in better understanding the information presented. Inclusion of the definitions section is optional in each policy.
      4. General Information. This section has a dual purpose. The first purpose is to present specific information. The second purpose is to provide direction of a general nature.
a. Specific information is given to further explain the stance of the Office of the Sheriff. This is done so the reader will know the need for the policy and the reasons for the position of the Sheriff’s Office.

b. The general direction is provided to establish standards for Office of the Sheriff employees to follow. Directive statements in this section may include guidelines for meeting the goals and objectives of the policy being addressed. In some cases this general direction is all that is needed to meet the policy's objectives.

5. Procedures. This section provides a detailed description of the sequence of activities necessary to achieve the goals of the specific policy. Procedures shall be followed as closely as circumstances permit. Inclusion of the procedures section is optional in each policy.

6. References. Sources of information and requirements are listed here. Inclusion of the references section is optional in each policy.

B. APPENDIX. Appendices are included to give the reader additional necessary information.

C. BASIC STRUCTURE. The Office of the Sheriff’s Policies and Procedures Manual structure is designed to aid the user in locating and using the information it contains. The Manual’s major components are:

1. Table of Contents.
2. Subject Policies.
3. Appendix.

D. The Office of the Sheriff’s Manuals shall consist of the following:

1. Volume 1: Office of the Sheriff Policies and Procedures. All policies shall be numbered beginning with “1.”

2. Volume 2: Custody Services Bureau Policies and Procedures. All policies shall be numbered beginning with “2.”
   a. Detention Division
   b. Court Security Division
   c. Custody Alternative Division

3. Volume 3: Field Operations Bureau Policies and Procedures. All policies shall be numbered beginning with “3.”
   a. Patrol Division
   b. Investigations Division
   c. Special Operations Division

4. Volume 4: Support Services Policies and Procedures. All policies shall be numbered beginning with “4.”
   a. Crime Lab Policies and Procedures
   b. Field Operations Guide (FOG)
5. Volume 5: Administrative Services. All policies shall be numbered beginning with “5.”
   a. Professional Standards Division
   b. Training Division
   c. Personnel and Fiscal Division

6. Each Bureau shall designate a second number for each of its Divisions, Units and Details that maintain manuals. For example, a policy in the Patrol Division Manual will be numbered 3.1.xxx.

E. Each policy shall have a header utilizing a template in accordance with the following format.

Chapter Two:
Law Enforcement Role and Authority
I. POLICY.
   A. The Office of the Sheriff shall establish annual goals and objectives designed to enhance and improve the quality of service provided to the public. The Sheriff shall be responsible for the overall direction of the Office of the Sheriff while focusing on the mission of the Contra Costa County Office of the Sheriff as set forth in the Mission Statement.

II. GENERAL.
   A. SHERIFF-CORONER: The Sheriff-Coroner is an elected position in Contra Costa County. The duties of the Coroner are set forth separately in the Coroner’s Division Manual.
   B. SHERIFF: The duties of the Sheriff as defined in the various sections of the California Government Code include:
      1. The arrest of law violators.
      2. The prevention and suppression of riots, insurrections, and breaches of the peace.
      3. Investigation of public offenses.
      4. Attendance at all sessions of the County Superior Courts by representative bailiffs.
      5. Maintaining a County Detention Facility and furnishing proper custodial care for persons incarcerated.
   C. DEPUTIES: The Government Code authorizes the Sheriff to appoint as many peace officers as necessary for the prompt and faithful discharge of the duties of the Office. Those persons who are regularly employed and paid by the County as Peace Officers may include the Sheriff, Undersheriff, Assistant Sheriffs, Captains, Chief of Forensic Services, Lieutenants, Deputy Sheriff Forensic Managers, Sergeants, Deputy Sheriff Forensic Supervisors, Deputy Sheriffs, Deputy Sheriff Criminalists and State certified Reserve Deputy Sheriffs, and they are defined by the California Penal Code as peace officers. The term Deputy...
includes all individuals appointed as peace officers by the Sheriff of Contra Costa County.

1. The scope of authority for all duly appointed peace officers, enumerated in Sections 830.1 and 830.6 of the Penal Code, extends throughout the State:
   a. When the crime was committed in the agencies’ jurisdiction;
   b. Exigent circumstances exist; or arrest occurred.

D. ADDITIONAL EMPLOYEES: The Sheriff may also appoint additional employees to assist in the above duties, functions and responsibilities. Any additional employees who are not peace officers are agents of the Sheriff and are subject to the same statutory limitations.

III. PROCEDURE 1.

A. As a Chief Executive Officer of a public service agency, the Sheriff encourages free-flowing communication between the public and the Office of the Sheriff to enhance the agency’s ability to respond to the needs and concerns of the community and thereby enhance the support and cooperation of the Office of the Sheriff in the community it serves. Programs will be established by the Sheriff to facilitate and enhance communications by encouraging community interaction and communication through daily contact with employees including programs such as crime prevention and the Deputy in the classroom program. The Sheriff encourages all employees to be responsive to the public and likewise encourages all members of the public to convey their needs and/or concerns to the Office of the Sheriff.

B. The Sheriff will utilize the authority granted the position by the citizens of California to perform the duties, functions and responsibilities set forth in applicable state law. The Sheriff will establish and enforce policies and procedures to guide the Office of the Sheriff personnel in the performance of their duties, functions and responsibilities to achieve the overall goals and objectives of the Office of the Sheriff.
### I. POLICY.

A. The Office of the Sheriff has countywide jurisdiction by virtue of the Sheriff serving as the Chief Law Enforcement Officer of the County. The Office of the Sheriff has primary responsibility for the enforcement of both state law and county ordinances in unincorporated territory and in cities contracting with the Office of the Sheriff for full police services including the enforcement of traffic regulations. Additionally, the Office of the Sheriff has authority and responsibility for attendance at all Superior Courts and service of legal and civil processes countywide.

B. While the Office of the Sheriff also has parallel jurisdiction within incorporated areas in Contra Costa County, the Sheriff is not required to duplicate city police services in enforcing state law within non-contract cities and may presume that proper police protection is being provided therein. If it comes to the Sheriff’s attention from reliable sources that such duty is being neglected or that the forces available to such cities are inadequate to handle an emergency situation, the Sheriff must take immediate remedial action. The evaluation of circumstances to ascertain if the Sheriff must exercise police powers within incorporated areas is the responsibility of the Sheriff.

C. The enforcement of the California Vehicle Code in unincorporated areas of the County is the responsibility of the California Highway Patrol. Furthermore, the Sheriff is not empowered to expend funds to enforce Vehicle Code regulations. The safety of the community and protection of property may necessitate the enforcement of Vehicle Code regulations by the Sheriff in unincorporated areas.

### II. DEFINITIONS.

A. CONTRACT CITIES: Cities contracting with the Office of the Sheriff for full police services including the enforcement of traffic regulations.

B. JURISDICTION: The limits of territory within which the Sheriff has the authority and responsibility to interpret and apply the law.

### III. GENERAL.

A. JURISDICTION DISPUTES.
1. To minimize confusion and to efficiently execute the basic responsibilities of the peace officer function, jurisdictional disputes with other law enforcement agencies should be clarified at the administrative level.

IV. PROCEDURE 1.

A. JOINT JURISDICTION INCIDENTS.

1. Office of the Sheriff employees shall accept and handle incidents wherein a jurisdictional dispute has arisen with other law enforcement agencies.

2. Office of the Sheriff employees involved in a jurisdictional dispute shall promptly notify their Supervisor. The Supervisor shall prepare and forward a written memo via the chain of command describing the incident. This process will allow resolution at the administrative levels of the Office of the Sheriff and the other agency involved.
I. POLICY.
   A. To better achieve effective law enforcement within and outside of Contra Costa County, the Sheriff’s Office may actively participate in national, regional and statewide service systems designed to share law enforcement records, information communications functions and equipment on a regional or statewide level.

II. DEFINITIONS.
   A. SERVICE SYSTEMS. Refers to those systems designed to share law enforcement records, information communications functions and equipment on a national, regional and statewide level.

III. GENERAL.
   A. The systems that the Sheriff’s Office actively participates in include:
      1. California Law Enforcement Mutual Aid Radio System (CLEMARS). CLEMARS is a radio communications network that permits law enforcement agencies within the state to communicate with each other directly or through another agency or by means of a relay system.
      2. Automatic Fingerprint Identification System (AFIS). AFIS is a centralized filing of fingerprints that provides greater opportunity for swifter identification and apprehension of criminal suspects.
      4. Automated Regional Information Exchange System (ARIES). ARIES is a computer interface that allows members to securely share and analyze data. The ARIES System is owned and maintained by the Office of the Sheriff.
      5. California Department of Justice (DOJ), Bureau of Criminal Statistics (BCS). The BCS is a statewide crime reporting system that provides information on trends in crime and arrest rates.
California Department of Justice (DOJ) Special Services Bureau (SSB). The SSB has several automated (Criminal Justice Information System: CJIS) and manual information files for use by criminal justice agencies including:

a. Stolen Vehicle System (SVS): SVS is a file of records of stolen/felony/stored/impounded/lost/repossessed/pawned vehicles; stolen/lost/found/evidence/felony plates; stolen vehicle parts; and vehicles associated with wanted or missing persons.

b. Automated Boat System (ABS): ABS is a file of records of boats that are stolen, lost, repossessed and stored, and boat parts that are stolen.

c. Automated Firearms System (AFS): AFS is a file of records pertaining to the law enforcement status of serialized weapons stolen, lost, found; historical records with names of persons associated with serialized firearms - licenses to carry concealed weapons, dealer's record of sale, pawns and voluntary registration.

d. Automated Property System (APS): APS is a file of records of serialized property stolen, lost, found, held for evidence, under observation or pawned, and bearing manufacturer's and/or owner-applied numbers.

e. Wanted Persons System (WPS): WPS is a pointer system which pertains to arrest warrants maintained by state, local and federal criminal justice agencies in California.

f. California Restraining and Protective order System (CARPOS) is a file of records of domestic violence restraining orders.

g. Supervised Release File (SuRF): SuRF is a file of records of subjects on active parole or probation, required to register as sex offenders or arsonists, considered career criminals.

h. Missing/Unidentified Persons Files (MUPS): MUPS is a file of reports containing information on missing persons from California agencies and unidentified persons (living and deceased) and body parts from California and surrounding states.

i. Mental Health Firearms Prohibition System (MHFPS): MHFPS is a database containing mental health firearms eligibility information on persons prohibited from owning or possessing firearms.

j. Criminal History System (CHS): CHS is a database containing criminal history information provided to agencies on a right-to-know and need-to-know basis.

k. The following files are not automated and requests for information may be made by telephone or teletype:

- Child Abuse Central Registry: The Child Abuse Central Registry is a statewide file of known and suspected child abuse cases reported to DOJ by investigating child
protective agencies (law enforcement, welfare, and probation agencies).

- Narcotic Registration: The Narcotic Registration Program maintains a statewide file on convicted persons required to register as narcotic offenders pursuant to Health and Safety Code Section 11590.
Former Policy Deleted
I. POLICY.
   A. The law enforcement effort is enhanced by the cooperative efforts of all public service agencies. To facilitate the law enforcement function, guidelines for cooperation with other agencies and/or jurisdictions are established. All employees will strive to cooperate with other public service agencies in furtherance of common goals and objectives.

II. GENERAL.
   A. COOPERATION WITH OTHER AGENCIES. Employees shall cooperate with all law enforcement agencies, other County departments and public service organizations, and shall give aid and information that those organizations are entitled to receive consistent with Office of the Sheriff policy.

   B. ARREST FOR CRIMES IN ANOTHER JURISDICTION. A Deputy making an arrest within or adjacent to the jurisdiction of the Office of the Sheriff for a crime that just occurred in another jurisdiction, will immediately give the agency with jurisdiction custody of the suspect(s).

   C. HOT PURSUIT.
      1. When a crime occurs in the unincorporated area or in a Contract City of the County and Deputies pursue the suspect(s) into another agency's jurisdiction, the Deputies may take the suspect(s) into immediate custody. The arresting Deputy will notify the Patrol Sergeant and the outside agency of the incident. If requested by the outside agency, the scene will be secured until units from that agency arrive to assess the situation.

      2. In those instances where a suspect(s) is pursued into another jurisdiction and becomes barricaded, is at large in the area, or otherwise is not under the control of a Deputy, the Deputy will notify the Patrol Sergeant and the outside agency of the incident.
         a. The outside agency will be afforded the opportunity to respond and assume command of the situation until the scene is under control and the suspect(s) is taken into custody or has escaped.
b. With concurrence of the outside agency, the Office of the Sheriff may retain overall responsibility and authority for all or part of the situation. All reports and evidence in the Deputy's control will be processed and retained by the Office of the Sheriff in the routine manner.

D. PLANNED OPERATIONS. When a planned operation such as a stakeout, undercover buy, surveillance, or service of a search warrant is to take place in an outside agency's jurisdiction, the responsible Supervisor shall insure that appropriate outside agencies are notified in advance. Agencies with jurisdictional authority will first be afforded first right of refusal in tactical operations such as high-risk search warrants or S.W.A.T. operations.

E. REFERRAL TO PROPER JURISDICTION.

1. In those situations where the legal remedy of a complainant lies outside the jurisdiction of the Office of the Sheriff, employees will politely advise the complainant of the fact and refer them to the proper agency.

2. When jurisdictional disputes arise between the Office of the Sheriff and another law enforcement agency, the Office of the Sheriff will accept and handle the case. Deputies handling the case will report the incident on an interoffice memo to the Sheriff via the chain of command. The jurisdictional issue will be settled at the administrative level of both the Office of the Sheriff and the other law enforcement agency.
I. POLICY.
   A. The ultimate goal of any governmental agency is to provide the highest level of service within the available resources. For some agencies intergovernmental contracts offer the most practicable means of accomplishing this goal. The Office of the Sheriff may provide a full spectrum of law enforcement services to those agencies at the request of a City Manager or Chief Executive Officer and upon the execution of a contract for such services.

II. GENERAL.
   A. CONTRACTS FOR POLICE SERVICES.
      1. The Office of the Sheriff provides contract police services to several cities and special districts within the County. A list of the cities with contracts with the Office of the Sheriff for full police services including the enforcement of traffic regulations is available from the Administrative Services Bureau.
      2. Contract documents are administered through the Contracts Unit.
      3. All contracts for police services shall contain the following provisions:
         a. Clear lines of responsibility.
         b. A statement that the Sheriff shall maintain authority over personnel.
         c. Specific services to be provided including payment provisions, level of service plan and duration of the contract.
         d. Clear documentation of any general and special conditions.

III. PROCEDURE 1.
   A. Requests for contract police service proposals must comply with the following guidelines:
      1. All requests for proposals should be in writing and directed to the Sheriff.
2. Requests for proposals should come from the City Manager or the equivalent or the Chief of Police.

3. Requests for proposals must be endorsed by a majority of the City Council or the equivalent.

4. Requests for proposals must be made public, at the time of request, by the requester.

5. A fee of $1,250.00 will be charged for proposals absent the signing of a contract.
I. POLICY.
   A. The Office of the Sheriff may form cooperative agreements with neighboring agencies and counties to allow for augmentation of resources in emergency situations. The purpose of these agreements is to properly handle critical incidents which may be beyond the resources and expertise of a single agency.

II. DEFINITIONS.
   A. EMERGENCY SITUATION. Circumstances which pose an actual or potentially imminent threat to life or property.
   B. MUTUAL AID. A systematic plan for furnishing personnel and equipment facilitating the handling of an emergency situation beyond the capabilities of the affected agency.

III. GENERAL.
   A. STATEWIDE MUTUAL AID PLAN. In 1980 the Office of the Sheriff adopted a multi-organizational plan for mutual aid. The plan is coordinated at a regional level and its implementation is part of a statewide system. Contra Costa County is part of Region II. Alameda County is the Regional Coordinator of Region II which includes the following counties: Alameda, Napa, Contra Costa, San Benito, Del Norte, San Francisco, Humboldt, San Mateo, Lake, Santa Clara, Marin, Santa Cruz, Mendocino, Solano, Monterey, and Sonoma.
   B. COUNTYWIDE MUTUAL AID AGREEMENT. The law enforcement agencies of Contra Costa County have adopted a countywide Mutual Aid Agreement. The agreement describes the cooperative mobilization of these County agencies when necessary to control major problems in any of the concerned jurisdictions.
   C. COUNTYWIDE MUTUAL AID FOR SPECIALIZED TEAMS. The use of specially trained personnel in Mutual Aid situations is specifically dealt with in Office of the Sheriff Policy Section 1.02.27, County Mutual Aid for Specialized Teams.
   D. REQUEST FOR MUTUAL AID. Mutual Aid requests are made via the Mutual Aid Coordinator, Emergency Services Division.
I. POLICY.
   A. To ensure an adequate countywide response to critical incidents, the Sheriff’s Office and other Contra Costa County law enforcement agencies have agreed to assist each other when specially trained personnel from another jurisdiction are needed to properly handle critical incidents.

II. DEFINITIONS.
   A. CRITICAL INCIDENT. A hostage situation, barricaded subject posing immediate threat to life, or any other unusual life-threatening circumstance in which the utilization of specially trained personnel is required.
   B. HOSTAGE NEGOTIATION TEAM. Personnel trained to deal with the release of hostages and the surrender of suspects through the negotiation process.
   C. K-9 UNIT. Teams of Deputies/Officers and dogs used for tracking, searching, apprehending, crowd control, officer protection, drug detection or locating persons or property.
   D. S.W.A.T. (Special Weapons and Tactics) Team. Teams trained and equipped to deal primarily with armed persons. The definition includes acronyms utilized by various agencies for similarly trained and equipped units.
   E. M.A.M.F.F. (Mutual Aid Mobile Field Force) Team trained and equipped to deal primarily with crowd control and other activities requiring a mutual aid response.
   F. S.A.R. (Search and Rescue) Team trained and equipped to handle missing persons in wilderness and urban environments.
   G. Air Squadron. Volunteer unit comprised of pilots and observers trained to assist with search and rescue, and provide general support missions for the Office of the Sheriff.

III. GENERAL.
   A. AGREEMENT INTENT. The purpose of this countywide agreement is to properly handle critical incidents which may be beyond the resources and expertise of a single agency. It specifically pertains to those specially trained
personnel who are most capable of handling such incidents. Each participating agency has agreed to provide any requested assistance and accept the direction and orders of the requesting agency. However, a Command Officer or a designated Supervisor from the agency supplying the specialized personnel will make the final determination of whether or not the specialized personnel will carry out the directions of the Incident Commander. This determination will be based on tactical, political, legal, and safety considerations within their expertise. Due to the specialized nature of S.W.A.T. and hostage negotiation teams, participating agencies shall take the necessary steps to insure that their command and supervisory personnel are familiar with the capabilities and limitations of these specially trained teams.

B. AGREEMENT GUIDELINES. The Office of the Sheriff has agreed to coordinate all requests for outside assistance between the County's law enforcement agencies. The following guidelines have been accepted by the participating agencies.

C. REQUEST FOR OUTSIDE ASSISTANCE.

1. The requesting agency shall contact the Office of the Sheriff, designating the type and amount of assistance required. It is then the duty of the Sheriff’s Office to contact the necessary participating agency or agencies.

2. It shall be the responsibility of the requesting agency to determine the type and amount of assistance needed based upon the totality of the situation.

3. Requests for S.W.A.T. assistance shall be for entire teams and not for individual officers.

4. Requests for K-9 assistance shall be for an Officer/dog team.

D. REPORTING PROCEDURES FOR RESPONDING AGENCIES.

1. Each responding agency will have its Officers report to a designated staging area.

2. Each responding agency shall also have a Command Officer or designated Supervisor accompany its personnel. This officer shall be in addition to any supervisory personnel assigned to the responding S.W.A.T. team(s), hostage negotiations team(s) or K-9 Unit. Their presence is to ensure the proper utilization of the agency's personnel and to assist the Incident Commander if needed. If a Command Officer or designated Supervisor does not respond, the team leader(s) of the special team(s) will ensure that their personnel are properly utilized.

E. COMMAND OF OPERATION.

1. The agency in whose jurisdiction the incident is occurring will be in charge of the operation unless it relinquishes that authority.

2. It will be the Incident Commander's responsibility to determine the tasks to be performed by the assisting personnel. It will be expected that the requesting agency will assign primary responsibilities to its own specialized personnel.
3. When assignments are made to outside agency personnel, the Incident Commander will make them in cooperation with the assisting agency's on-scene Command Officer or Supervisor.

4. The operation of the respective team is at the direction of the team commander or team leader.

IV. PROCEDURE 1.
A. PATROL DIVISION COMMANDER'S RESPONSIBILITY. The Patrol Division Commander or designee shall coordinate all requests for assistance of specially trained personnel from participating County agencies.

| ISSUE DATE: | 12-3-2013 |
| REVISION DATE: | 12/20/2017[b] |

| CLEARANCE: |
| Office of the Sheriff |

| SUBJECT: |
| IMMIGRATION STATUS |

I. POLICY.
A. No person shall be contacted, detained, or arrested solely on the basis of his or her immigration status.
B. The Contra Costa County Office of the Sheriff will equally enforce the laws and serve the public without regard to immigration status. Except as specifically set forth in this Policy, the immigration status of a person, and the lack of immigration documentation, should have no bearing on the manner in which Deputies execute their duties.
C. No Departmental funds nor personnel may be used to investigate, interrogate, detain, detect, or arrest persons for immigration enforcement purposes. Nevertheless, Office of the Sheriff personnel may send to, or receive from, immigration authorities (including ICE), information regarding the immigration status, lawful or unlawful, of any individual (8 USC §1373) (see IV.C.).

II. DEFINITIONS.
A. IMMIGRATION DETAINER.
An Immigration Detainer is a request by the U.S. Department of Homeland Security’s Immigration and Customs Enforcement Agency (ICE) that law enforcement agencies advise ICE, prior to releasing an individual, in order for ICE to arrange to assume custody for the purpose of deportation. The ICE Detainer Request is presented on ICE Form I-247A. These requests are processed in accordance with IV.E. below.

III. GENERAL.
A. IMMIGRATION ENFORCEMENT JURISDICTION. ICE has primary responsibility to investigate and enforce federal immigration laws. Office of the Sheriff personnel shall not assist ICE in the enforcement of federal immigration laws except as set forth below. Assistance to ICE personnel
in personal distress will be provided. Notwithstanding “A” above:

1. Sheriff’s Personnel may investigate, enforce, or detain upon reasonable suspicion of, or arrest for a violation of 8 USC 1326(a) [illegal reentry by a previously deported or removed alien] that is detected during an unrelated law enforcement activity.

2. Sheriff’s Personnel may respond to a request from immigration authorities for information about a specific person’s criminal history.

3. Sheriff’s Personnel may conduct enforcement or investigative duties associated with a joint law enforcement task force, including the sharing of confidential information with other law enforcement agencies for purposes of task force investigations, but only if the specific provisions set forth in Gov. Code §7284.6 (b)(3)(A) and (B) and (C) are met.

4. Sheriff’s Personnel may grant immigration authorities access to interview an individual in our custody. All interview access shall comply with IV.H (“TRUTH Act Notifications”).

5. Sheriff’s Personnel may send to ICE, and receive from ICE information regarding the immigration status of any individual (see IV.C.). (Do not confuse information regarding immigration status with information regarding the anticipated release date of individuals with immigration status, which information may not be released except as set forth in this policy at IV.G. and IV.K.)

B. LAW ENFORCEMENT CONTACTS. Non-consensual contacts, detentions, and arrests shall be based on reasonable suspicion or probable cause. A Deputy shall not initiate any law enforcement action based on observations relating to immigration status (such as lack of documentation), but such issues may, as part of several factors, be relevant to the direction and analysis of an investigation.

C. THE CALIFORNIA VALUES ACT.

1. California law enforcement agencies shall not:
   a. Use agency moneys or personnel to investigate, interrogate, detain, detect, or arrest persons for immigration law enforcement purposes, including any of the following:
      1. Inquiring into an individual’s immigration status (but see III.B. above, and IV.C. below);
      2. Detaining an individual on the basis of a hold request;
      3. Providing information regarding a person’s release date or responding to requests for notification by providing release dates or other information unless that information is available to the public, or is in response to a Notification Request from ICE that satisfies the conditions set forth in IV.G. and IV.K.;
      4. Providing personal information about an individual, including, but not limited to, the individual’s home address or work address unless that information is available to the public;
      5. Making or intentionally participating in arrests based on civil immigration warrants;
6. Performing the functions of an immigration officer, whether pursuant to 8 USC 1357(g) or any other law, regulation, or policy, whether formal or informal;

b. Place peace officers under the supervision of federal agencies for the purposes of immigration enforcement.

c. Use Immigration Authorities as interpreters for law enforcement matters relating to individuals in custody.

d. Transfer an individual to immigration authorities unless authorized by a judicial warrant.

e. Provide office space exclusively dedicated for immigration authorities for use within a law enforcement facility.

2. Deputies retain discretion to cooperate with immigration authorities if doing so does not violate any Federal, state, or local law or policy, and only where permitted by the California Values Act. The California Values Act permits communications between Office of the Sheriff personnel and immigration authorities “regarding the citizenship or immigration status …of an individual” (see IV.C.).

D. FEDERAL DETAINEES. Wherever this policy refers to, or relates to, persons in Sheriff’s Office custody, such policy provisions do not apply to individuals in the custody of the Department of Homeland Security who are detained in a county detention facility pursuant to a contract with the Federal government (Gov. Code §7310(b)).

IV. PROCEDURES.

A. IMMIGRATION VIOLATION COMPLAINTS.

1. If members of the public contact the Office of the Sheriff to report suspected immigration violations, such persons should be directed to ICE.

B. IMMIGRATION STATUS.

1. A Deputy’s suspicion about any person’s immigration status shall not be used as a sole basis to initiate contact, detain, or arrest that person unless such status is reasonably relevant to the investigation of a crime, such as trafficking, smuggling, harboring, and terrorism.

2. Sweeps intended solely to locate and detain undocumented immigrants are not permitted. Deputies will not participate in ICE-organized sweeps to locate and detain undocumented aliens. Office of the Sheriff personnel shall not provide support services, such as traffic control, during an ICE operation.

C. COMMUNICATIONS WITH ICE.

Office of the Sheriff personnel may send to, or receive from, immigration authorities (including ICE), information regarding the immigration status, lawful or unlawful, of any individual (8 USC §1373), including specifically any alien in the United States (8 USC §1644). Such information as is permitted to be sent or received pursuant to
this subsection may be maintained and may be exchanged with any other Federal, State, or local government entity (8 USC §1373). (Compliance with 8 USC §1373 and 8 USC §1644 is specifically permitted pursuant to Gov. Code 7284.6(e)).

D. WITNESSES AND VICTIMS.

1. The immigration status of crime victims or witnesses should not be probed unless it is reasonably relevant to the investigation of a crime.

2. U-Visa Nonimmigrant Status. Federal law grants immigration benefits to victims of qualifying crimes who have been helpful to the investigation and/or prosecution of the case. A law enforcement certification is prepared and issued by specifically designated administrative personnel.

E. ICE DETAINER REQUESTS.

The Office of the Sheriff occasionally receives Immigration Detainer requests on ICE Form I-247A. A detainer serves to advise that ICE seeks both notification of the anticipated release of a removeable alien from custody and his or her continued detention in order for ICE to arrange to assume custody. The request to detain will not be honored (see IV.F.). The request to Notify will be honored only under the circumstances set forth in IV.G. and IV.K. below.

F. IMMIGRATION DETAINERS. Inmates who are eligible for release from custody shall not be held, pursuant to an immigration hold, beyond the time he or she would otherwise be released.

G. IMMIGRATION NOTIFICATION. The Office of the Sheriff will provide release information in response to individual-specific ICE requests for notification (ICE Form I-247A), but only in compliance with the conditions set forth in IV.K. Individuals meeting the conditions set forth in IV.K. will be released to ICE custody (but shall not be detained to do so), if immigration authorities are present at a detention facility’s Release Window at the time of an individual’s release.

1. Individuals meeting the conditions set forth in IV.K. and released to ICE custody at the time of their release, may not be converted into ICE Detainees. Immigration authorities desiring to house such persons as ICE Detainees at WCDF must escort such persons outside of our facility, and then return them, via Intake, to be newly booked as ICE Detainees for transport to WCDF.

H. TRUTH ACT NOTIFICATION (Gov. Code 7283.1; AB-2792). Upon receiving any ICE notification request on Form I-247A, the named inmate shall be provided a copy of the respective form. If ICE is to be notified of the proposed release of an inmate, he or she shall be notified as well. Additionally, efforts will be made to notify the inmate’s attorney or an additional person of the inmate’s choosing.

1. Immigration authorities shall be granted access to interview inmates following compliance with the Truth Act notification provision: In advance of any interview between ICE and an inmate, the inmate shall be provided with a written consent form either consenting or declining to participate in the interview. Standardized copies of this form are available (under the heading AB 2792 Forms) at http://www.bscc.ca.gov/m_divisions.php
I. EQUALITY OF ACCESS. All persons arrested for a criminal offense and held in our custody will have equal access to custody programs if otherwise program-eligible.

J. COURT ORDERS. Court Orders and warrants are entirely separate and should not be confused with Form I-247A requests. Duly issued warrants will be honored.

K. CONDITIONS FOR ICE NOTIFICATION. ICE requests for notification of the anticipated release date of an inmate will be honored only with respect to inmates who are being held for certain charges or who have specific prior convictions.

1. These conditions include (but are not limited to) inmates who have been convicted of (i) of a serious felony [PC 1192.7(c)] or a violent felony, [PC 667.5(c)] (see listing below).

   a. As used in PC 1192.7(c), “serious felony” means any of the following:

   (1) murder or voluntary manslaughter
   (2) mayhem
   (3) rape
   (4) sodomy by force, violence, duress, menace, threat of great bodily injury, or fear of immediate and unlawful bodily injury on the victim or another person
   (5) oral copulation by force, violence, duress, menace, threat of great bodily injury, or fear of immediate and unlawful bodily injury on the victim or another person
   (6) lewd or lascivious act on a child under 14 years of age
   (7) any felony punishable by death or imprisonment in the state prison for life
   (8) any felony in which the defendant personally inflicts great bodily injury on any person, other than an accomplice, or any felony in which the defendant personally uses a firearm
   (9) attempted murder
   (10) assault with intent to commit rape or robbery
   (11) assault with a deadly weapon or instrument on a peace officer
   (12) assault by a life prisoner on a non-inmate
   (13) assault with a deadly weapon by an inmate
   (14) arson
   (15) exploding a destructive device or any explosive with intent to injure
   (16) exploding a destructive device or any explosive causing bodily injury, great bodily injury, or mayhem
   (17) exploding a destructive device or any explosive with intent to murder
   (18) any burglary of the first degree
   (19) robbery or bank robbery
   (20) kidnapping
   (21) holding of a hostage by a person confined in a state prison
   (22) attempt to commit a felony punishable by death or imprisonment in the state prison for life
(23) any felony in which the defendant personally used a dangerous or deadly weapon
(24) selling, furnishing, administering, giving, or offering to sell, furnish, administer, or give to a minor any heroin, cocaine, phencyclidine (PCP), or any methamphetamine-related drug, or any of the precursors of methamphetamines
(25) any violation of PC 289(a) where the act is accomplished against the victim’s will by force, violence, duress, menace, or fear of immediate and unlawful bodily injury on the victim or another person
(26) grand theft involving a firearm
(27) carjacking
(28) any felony offense, which would also constitute a felony violation of PC 186.22
(29) assault with the intent to commit mayhem, rape, sodomy, or oral copulation
(30) throwing acid or flammable substances
(31) assault with a deadly weapon, firearm, machinegun, assault weapon, or semiautomatic firearm or assault on a peace officer or firefighter
(32) assault with a deadly weapon against a public transit employee, custodial officer, or school employee
(33) discharge of a firearm at an inhabited dwelling, vehicle, or aircraft
(34) commission of rape or sexual penetration in concert with another person
(35) continuous sexual abuse of a child
(36) shooting from a vehicle
(37) intimidation of victims or witnesses
(38) criminal threats
(39) any attempt to commit a crime listed in this subdivision other than an assault
(40) any violation of PC 12022.53 [Enhancements for use of a firearm in 18 specified felonies]
(41) a violation of subdivision (b) or (c) of Section 11418
(42) any conspiracy to commit an offense described in this subdivision
(43) And any offense committed in another state, which if committed in California, would be punishable as a listed serious felony

b. As used in PC 667.5(c), “violent felony” means any of the following:

(1) Murder or voluntary manslaughter
(2) Mayhem
(3) Rape
(4) Sodomy
(5) Oral copulation
(6) Lewd or lascivious act
(7) Any felony punishable by death or imprisonment in the state prison for life
(8) Any felony in which the defendant inflicts great bodily injury on any person other than an accomplice which has been charged and proved, or any felony in which the defendant uses a firearm which use has been charged and proved
(9) Any robbery
(10) Arson
(11) Sexual penetration
(12) Attempted murder
(13) A violation of PC 18745, 18750, or 18755 (explosives)
(14) Kidnapping
(15) Assault with the intent to commit a specified felony, in violation of Section 220
(16) Continuous sexual abuse of a child
(17) Carjacking
(18) Rape, spousal rape, or sexual penetration
(19) Extortion, which would constitute a felony violation of PC 186.22
(20) Threats to victims or witnesses, which would constitute a felony violation of PC 186.22
(21) Any burglary of the first degree, wherein it is charged and proved that another person, other than an accomplice, was present in the residence during the commission of the burglary
(22) Any violation of PC 12022.53 [Enhancements for use of a firearm in 18 specified felonies]
(23) A violation of PC 11418(b) or (c)(weapon of mass destruction)
(24) And any offense committed in another state, which if committed in California, would be punishable as a listed violent felony

2. Notification requests will be honored for any conviction or prior conviction for a felony punishable by imprisonment in the state prison.

3. Notification requests will be honored for any person who is a current registrant on the California Sex and Arson Registry (CSAR) as a sex offender pursuant to PC 290 or as an arson offender pursuant to PC 457.1

4. Notification requests will be honored for (i) any felony conviction within the last 15 years, or (ii) any misdemeanor conviction within the past five years, that is punishable as either a misdemeanor or a felony (i.e.: “wobbler”) involving the following specified crimes:
   (A) Assault
   (B) Battery
   (C) Use of threats
   (D) Sexual abuse, sexual exploitation, or crimes endangering children
   (E) Child abuse or endangerment
   (F) Burglary, robbery, theft, fraud, forgery, or embezzlement
(G) Driving under the influence of alcohol or drugs, but only for a felony conviction
(H) Obstruction of justice
(I) Bribery
(J) Escape
(K) Unlawful possession or use of a weapon, firearm, explosive device, or weapon of mass destruction
(L) Possession of an unlawful deadly weapon, under the Deadly Weapons Recodification Act of 2010 (PC 16000)
(M) An offense involving the felony possession, sale, distribution, manufacture, or trafficking of controlled substances
(N) Vandalism with prior convictions
(O) Gang-related offenses
(P) An attempt, or any conspiracy, to commit an offense specified in this section
(Q) A crime resulting in death, or involving the personal infliction of great bodily injury
(R) Possession or use of a firearm in the commission of an offense
(S) An offense that would require the individual to register as a sex offender
(T) False imprisonment, slavery, and human trafficking
(U) Criminal profiteering and money laundering
(V) Torture and mayhem
(W) A crime threatening the public safety
(X) Elder and dependent adult abuse
(Y) A hate crime
(Z) Stalking
(AA) Soliciting the commission of a crime
(AB) An offense committed while on bail or released on his or her own recognizance
(AC) Rape, sodomy, oral copulation, or sexual penetration (AD) Kidnapping
(AE) A violation of CVC 20001(c)

5. Notification requests should also be honored for any federal conviction of any crime that meets the definition of an aggravated felony as set forth in the Immigration and Nationality Act (8 U.S.C. Sec. 1101 at Section 1101(a)(43)(A) to (P). The full listing of specified crimes follows:

The term "aggravated felony" means—
(A) murder, rape, or sexual abuse of a minor
(B) illicit trafficking in a controlled substance
(C) illicit trafficking in firearms or destructive devices
(D) laundering of monetary instruments if the amount of the funds exceeded $10,000
(E) an offense relating to explosive materials
(F) a crime of violence, but not including a purely political offense for which the term of imprisonment is at least one year
(G) a theft offense or burglary offense for which the term of imprisonment is at least one year
(H) the demand for or receipt of ransom
(I) child pornography
(J) racketeer influenced corrupt organizations or gambling offenses, for which a sentence of one year imprisonment or more may be imposed
(K) owning, controlling, managing, or supervising of a prostitution business; peonage, slavery, involuntary servitude, and trafficking in persons
(L) gathering or transmitting national defense information relating to disclosure of classified information relating to sabotage, relating to treason, relating to protecting the identity of undercover intelligence agents or relating to protecting the identity of undercover agents
(M) fraud or deceit in which the loss to the victim or victims exceeds $10,000; tax evasion in which the revenue loss to the Government exceeds $10,000
(N) alien smuggling (except in the case of a first offense for which the alien has affirmatively shown that the alien committed the offense for the purpose of assisting, abetting, or aiding only the alien's spouse, child, or parent)
(O) an offense described in section 1325(a) or 1326 of this title committed by an alien who was previously deported on the basis of a conviction for an offense described in another subparagraph of this paragraph
(P) falsely making, forging, counterfeiting, mutilating, or altering a passport or instrument and for which the term of imprisonment is at least 12 months (except in the case of a first offense for which the alien has affirmatively shown that the alien committed the offense for the purpose of assisting, abetting, or aiding only the alien's spouse, child, or parent (and no other individual.)
Chapter Three:
Division Organization and Function
I. POLICY.
   A. The organizational structure of the Office of the Sheriff is designed to facilitate the fulfillment of the major responsibilities and functions of the agency and its objectives. The organizational structure provides effective direction and control which enhances communication both up and down the chain of command.

II. GENERAL.
   A. OFFICE OF THE SHERIFF ORGANIZATION.
      1. The Office of the Sheriff is organized into Bureaus, Divisions, Units and Details, each having responsibility for specific functions. The coordinated efforts of each allow the Office of the Sheriff as a whole to meet its law enforcement objectives.

III. ORGANIZATION CHART. (SEE ATTACHED)
ORGANIZATIONAL CHART DIVISION LEVEL: Effective February 15, 2018

(Please see individual Division policies for unit level organization charts.)
I. POLICY.
   A. Each organizational component of the Sheriff’s Office will be under the direct command of only one Supervisor. To achieve effective direction, and coordination, the number of employees under the immediate control of a Supervisor shall not be excessive. This will promote efficient handling of responsibility and accountability and to ensure employees are aware of what is expected of them.

II. DEFINITIONS.
   A. CHAIN OF COMMAND: Lines of control permitting the delegation of authority, the placing of responsibility, the supervision of operations, and the coordination of effort established in conformity with the Sheriff’s Office Organization Chart.
   B. SPAN OF CONTROL: The principle that an appropriate number of employees under the immediate direction of a single Supervisor increases the efficiency of both the employees and the Supervisor.
   C. SUPERVISOR: Includes employees of the Sheriff’s Office designated as Managers, Sergeants or above, Supervisors, or employees designated as “officers-in-charge” or assigned temporarily as acting in any of those positions.
   D. UNITY OF COMMAND: The principle that each individual in the organization has one, and only one, immediate Supervisor.

III. GENERAL.
   A. AUTHORITY AND RESPONSIBILITY.
      1. Each employee of the Sheriff’s Office shall be aware of the responsibilities of their position. Employees shall be given necessary authority to effectively execute the responsibilities of their assignments.
      2. Employees shall keep in mind the best interests of the Sheriff’s Office when exercising their authority. Employees who are directed to act in capacities above their ordinary rank will, for the necessary time, possess the authority of their temporary rank. Authority shall be exercised by all members of the Sheriff’s Office with firmness and impartiality. Under no circumstances shall personal attitudes be allowed to influence decisions.
Each employee will be held fully accountable for the reasonable use of delegated authority, as well as for the unreasonable failure to use it.

3. A Supervisor's span of control has an effect on their interpersonal relations with the work group and thus on the nature of the group's communications. A larger span of control requires a more formal communications link between the immediate Supervisor and the group. A narrow span of control does not in itself result in the development of a more cohesive work group. It does, however, afford Supervisors the opportunity to earn and maintain the leadership and respect required to fully discharge their supervisory responsibilities.

4. The principle of span of control implicitly assumes that a limited span of control enables Supervisors to control operations more effectively. This is based on the concept that if the Supervisor's span is sufficiently narrow, it will allow adequate time for the development and expression of meaningful personal interactions with employees in the group. These interactions should lead to closer communication and allow for closer attention to any tasks assigned to Sheriff’s Office personnel. Supervisors shall not unnecessarily countermand orders of employees below their rank or position or needlessly interfere with the specific duties of employees ranking below them.

B. THE CHAIN OF COMMAND.

1. The chain of command is a series of positions, each of which is directly commanded by the one above it. Generally, official communications of the Sheriff’s Office such as orders, requests, information, suggestions or complaints, moving upward or downward, shall be confined to official channels. Each link in the chain of command shall be respected in this regard. It shall be the responsibility of each echelon to forward communications to the next higher or lower echelon, with approval, disapproval and/or recommendations.

2. In circumstances where the matter cannot be handled by immediate Supervisors, due to their absence, the employee shall notify the next available higher ranking officer or Supervisor in the chain of command for direction.
   a. There may also be times when a Supervisor has to give direction to an employee outside their chain of command.

3. An employee has the privilege of going outside the chain of command to contact a Supervisor including the Sheriff or Undersheriff only on matters of a strictly personal nature or as allowed specifically by policies and procedures such as matters regarding job-based discrimination or harassment.

4. The chain of command for the Sworn employees of Contra Costa County Office of the Sheriff shall be as follows:
   a. Sheriff
   b. Undersheriff
   c. Bureau Assistant Sheriff
d. Captain/Chief of Forensic Services

e. Lieutenant/Deputy Sheriff Forensic Manager

f. Sergeant/Deputy Sheriff Forensic Supervisor

g. Deputy Sheriff/Criminalist

h. General employees and/or auxiliaries

5. The establishment of chain of command protocol for planned operations involving personnel of different organizational components (Joint Operations) will occur prior to the planning stage of the operation. Selection of the Operations Commander will be made by a Supervisor at least one command level higher than the designated Operations Commander. If the operation involves more than one Division, the selection will be made by the Sheriff, the Undersheriff or the appropriate Bureau Assistant Sheriff.

6. Established command protocols are already in place for dealing with certain specific concerns which are covered in the following Sheriff’s Office policies. Additionally, the Division Manuals may contain established command protocols with which employees should be familiar. Refer to References Section at the end of this Policy.

C. DESCRIPTIONS OF COMMAND AND SUPERVISORY POSITIONS.

D. The following brief descriptions of the Sheriff’s Office's Command and Supervisory positions provide clarification of the responsibilities of the major positions in the Sheriff’s Office chain of command. This listing includes both sworn and non-sworn management.

1. Sheriff. The Sheriff is the Chief Executive Officer and the final authority in all matters of policy, operations and discipline. The Sheriff may exercise all lawful powers of that Office and issue such lawful orders as necessary to assure the effective performance of the Sheriff’s Office. Through the direction of the Sheriff, the Sheriff’s Office is responsible for the enforcement of all laws and ordinances within its legal jurisdiction. The Sheriff is the final authority in the Sheriff’s Office with regard to all policies and procedures; the continued and efficient operation of the Sheriff’s Office; and the enforcement of rules and regulations.

2. Undersheriff. The Undersheriff acts in the capacity of Chief Administrator and Executive to the Sheriff. Under general direction of the Sheriff, exercises administrative authority over all Sheriff’s Office Bureaus and may be given other administrative and executive duties at the discretion of the Sheriff. During the Sheriff's temporary absence from duty, the Undersheriff automatically assumes all duties and responsibilities of the Sheriff.

3. Bureau Assistant Sheriff. A Bureau Assistant Sheriff performs both executive and administrative functions for the Sheriff. Under general direction, a Bureau Assistant Sheriff exercises administrative authority over a Bureau and its Divisions.
a. During the temporary absence from duty of both the Sheriff and Undersheriff, the Sheriff may select one or more Bureau Assistant Sheriffs to assume their duties and responsibilities.

4. Division Commander. A Division Commander commands the activities of a Division in accordance with the policies and procedures prescribed by the Sheriff. All Division Commanders will hold one of the following ranks: Captain, Chief of Forensic Services, Chief of Management Services and/or Lieutenant.

a. Under general direction, a Division Commander administers and develops programs for the operation of a Division of the Sheriff’s Office. Duties include: organizing and assigning work details within the particular Division, reviewing performance of subordinates, and other related work as required.

b. A Captain is an executive of the Sheriff’s Office and may act as an Assistant to the Bureau Assistant Sheriff when so directed.

c. The Chief of Forensic Services is an executive of the Sheriff’s Office, commanding the activities of the Forensic Services Division within the policies and procedures prescribed by the Sheriff.

d. The Chief of Management Services is an executive of the Sheriff’s Office, commanding the activities of Personnel and Finance within the policies and procedures prescribed by the Sheriff.

5. The Chief of Police-Contract Agency-Exempt. A Chief of Police commands all sworn and civilian personnel assigned to a Contract City and manages all municipal personnel assigned to the Police Department. He or she reports to the Special Operations Division Commander and to the respective City (or Town or Agency) Manager and/or City (or Town or Agency) Council/Board.

a. If the Chief of Police holds the rank of Captain with the Sheriff’s Office, then he or she will report to the Field Operations Assistant Sheriff. The Contract City will remain under the Special Operations Division.

6. Lieutenant/Forensic Manager/Civilian Director. Under general direction, administers a Division or major activity within a Division of the Sheriff’s Office.

a. A Lieutenant may serve as the responsible official in charge of Sheriff’s Office operations during non-duty hours of the Sheriff, Undersheriff, and Bureau Assistant Sheriff. The following Lieutenant/Supervising Criminalist assignments are noted because of their responsibility and position in the chain of command:

- Assistant Division Commanders are assigned as second in command of a Division and are in charge during the Division Commander's temporary absence. Assistant
Division Commanders carry out the policies of the Office of the Sheriff and administer and supervise the work of various subdivisions.

- Watch Commander acts as highest authority in absence of Command Staff. The Watch Commander relinquishes authority to Captains and above. This authority and responsibility is not limited nor confined to Patrol Division, but shall include supervision over and responsibility for all personnel in the Office of the Sheriff.

- Station House Commanders and Facility Commanders may become the authority in absence of the Watch Commander.

b. Forensic Managers manage a Section composed of multiple technical units of the Forensics Services Division.

c. Civilian Directors manage support Units within the Sheriff’s Office such as Inmate Services.

7. Sergeant/Civilian Supervisor. Supervisors are normally in charge of one or more employees. Additionally, a Supervisor with the rank of Sergeant may perform a variety of law enforcement responsibilities and activities, to include supervision of Deputy Sheriffs and/or other employees; the investigation of felony and misdemeanor crimes; or other specialized law enforcement assignments such as training, internal affairs, crime prevention, or related work as required.

a. Supervisors shall have a working knowledge of the duties and responsibilities of employees within their span of control. In addition, Sergeants assigned to work in the field shall respond to calls of serious emergencies, felonies in progress, assaults and others, unless actively engaged in a police incident. Supervisors shall observe the conduct of the assigned personnel and take charge when such action appears necessary under the circumstances known to the Supervisor at the time.

b. All Supervisors must exercise direct command in a reasonable manner that assures the good order, proper discipline and efficiency of Sheriff’s Office employees. Exercise of command will extend to employees outside the usual sphere of supervision if the law enforcement objectives or best interests of the Sheriff’s Office so require, or if no other provision is made for temporarily unsupervised personnel. This authority shall not be exercised unreasonably.

c. When a Supervisor requires an employee outside their span of control to leave a regular assignment or deviate from an established policy or procedure, that Supervisor will inform the
employee's immediate Supervisor as soon as possible of same and the reason therefore.

d. All Supervisors shall enforce the Sheriff’s Office policies and procedures with the goal of achieving compliance. Supervisors are responsible for inspection of activities, personnel, and equipment under their supervision and initiation of appropriate action in the event of a failure, error, violation, misconduct or neglect of duty by an employee.

e. In the absence of a Supervisor for a particular employee, a Supervisor who becomes aware of matters involving compliance with Office of the Sheriff policies or procedures by an employee outside that Supervisor’s span of control, shall take prompt action as warranted by the seriousness of the circumstances. Thereafter, that Supervisor shall promptly advise the immediate Supervisor of the involved employee. Additionally, the Supervisor shall promptly notify their own immediate Supervisor of the circumstances that warranted the notification. Such notification may be in writing or orally, pursuant to policy.

8. Deputy Sheriffs/Criminalists/all others. The duties and efforts of all other employees are of major importance to the fulfillment of the goals and objectives of the Sheriff’s Office. Under supervision, employees will perform their duties as established and regulated by the Office of the Sheriff policies and procedures and Division Manuals, as well as those set forth by statute and/or ordinances.
I. **POLICY.**
   A. The Office of the Sheriff is organized to enable Internal Affairs to report directly to the Undersheriff.

II. **GENERAL.**
   A. Internal Affairs reports directly to the Undersheriff. This Unit is commanded by a Lieutenant and is responsible for conducting internal investigations in an effort to ensure adherence to and compliance with Federal and State laws and departmental policies and procedures. This unit is also responsible for concealed weapons licensing.

III. **ORGANIZATION CHART. (SEE ATTACHED)**
I. **POLICY.**

A. The Personnel and Finance Division of the Administrative Services Bureau is responsible for personnel and fiscal management within the Office of the Sheriff and contract and grant administration.

II. **GENERAL.**

A. This Division is overseen by the Administrative Services Bureau Assistant Sheriff. Its daily operations are managed by the Chief of Management Services who is responsible for the following:

1. **Personnel Services Unit.** This Unit administers the Sheriff’s Office personnel system, including processing hiring, promotion/demotion and separation actions, employee relations (including workers’ compensation, temporary/modified duty assignments, and leaves; issuing employee identification cards).

2. **Fiscal Services Unit.** This Unit prepares and monitors the Sheriff’s Office budget. This Unit also conducts internal audits; provides oversight for all accounting activity; oversees all purchasing transactions; and acts as primary liaison with the County Administrator’s Office and the Auditor’s Office. The Unit also provides training, support and oversight for all employee payroll and acts as primary liaison with the Auditor’s Office Payroll Division for all payroll issues.

3. **Contracts and Grants Unit.** This Unit prepares, administers and monitors all grants and contracts; conducts claiming functions and fiscal reporting; acts as primary liaison with County Counsel, the County Administrator’s Office, and the Auditor’s Office for grants and contracts.

III. **ORGANIZATION CHART. (SEE ATTACHED)**
I. POLICY.
   A. PROFESSIONAL STANDARDS DIVISION. The Professional Standards Division shall be responsible for the following functions within the Office of the Sheriff: hiring and recruiting processes, background investigations, public affairs/photography, planning and research tasks.

II. GENERAL.
   A. DIVISION FUNCTIONS. The functions and responsibilities of the Professional Standards Division are commanded by a Captain.
      1. Professional Standards. This Division is comprised of three units. The functions of the Professional Standards Division are carried out through the Employment Services Unit, Planning and Research Unit, and Public Affairs Unit.
         a. Employment Services. This Unit is commanded by the Professional Standards Division Captain and is comprised of the Recruiting Detail, the Backgrounds Detail, and the Hiring Detail.
            • Recruiting. This Detail is responsible for organizing and/or attending special events with the purpose of introducing potential employees to available opportunities in the Office of the Sheriff. Recruiting also administers the entrance examination and tracks recruits as they continue through the hiring process.
            • Background. This Detail is responsible for conducting background investigations on Sheriff’s Office candidates.
            • Hiring. This Detail is responsible for the overall hiring process including documentation and scheduling of events, tracking of candidates, and the coordination of events between individual Units and Details relating to hiring.
         b. Planning and Research. Commanded by the Professional Standards Division Captain, this unit is comprised of a Sheriff’s Specialist and a Special Assistant to the Sheriff. The functions of the Unit include special projects, strategic planning, and various administrative tasks, projects and functions, as assigned. This Unit maintains the Policy and Procedures Manual. This position is the Sheriff’s Office liaison for juvenile justice, the Department of Motor Vehicles, the State Legislature and the California State Sheriffs’ Association, as well as the County’s
District Attorney, Public Defender, and County Counsel’s Offices. The unit also handles Public Record Requests not handled at the Division level, U-Visa applications, and diverse administrative functions relating to claims and lawsuits, bloodborne pathogen exposure cases, Injury and Illness Prevention Program, and weapons confiscations.

III. ORGANIZATION CHART. (SEE ATTACHED)
I. POLICY.
   A. The Training Division is housed in the Law Enforcement Training Center (L.E.T.C.) and is responsible for the coordination of the training of personnel for the Sheriff’s Basic Law Enforcement Academy operations, and for in-service training.

II. GENERAL.
   A. DIVISION FUNCTIONS. The functions and responsibilities of the Training Division are administered under the direction of the Training Division Captain.

   1. Training. This Division is comprised of two Units. The functions of the Training Division are carried out through the Academy and Training Units.

      a. Academy. This Unit is responsible for the operations of the Sheriff’s Basic Law Enforcement Academy in accordance with P.O.S.T. regulations.

      b. Training. This Unit is responsible for coordination of the Office of the Sheriff’s training and mandated peace officer and corrections training, associated record keeping, coordination of Incentive Pay and Service Award Programs, coordination of Office of the Sheriff ceremonies, management of the range, law enforcement courses for outside agencies, and issuance of law enforcement safety equipment. This unit is commanded by the Training Lieutenant. For P.O.S.T. purposes, the Training Lieutenant is the “Training Manager”.

III. ORGANIZATION CHART. (SEE ATTACHED)
TRAINING DIVISION
ORGANIZATIONAL CHART

TRAINING DIVISION CAPTAIN

ACADEMY LIEUTENANT

TRAINING LIEUTENANT
I. POLICY.

A. Custody Services Bureau is comprised of two Detention Divisions, the Martinez Detention Division and the West County Detention Division. The Detention Divisions’ primary function shall be to constitutionally, humanely and professionally provide housing and custody for all sentenced and unsentenced inmates arrested and/or remanded to the Office of the Sheriff by law enforcement agencies and courts within the County.

II. GENERAL.

A. DIVISION FUNCTIONS. The functions and responsibilities of the Detention Division are commanded by a Captain.

1. Detention. The Detention Division is comprised of Administrative Services, Court Services, Martinez Detention Facility, and Marsh Creek Detention Facility.

   a. Administrative Services. This Unit is responsible for Bureau administrative duties, Classification Detail and Transportation Detail.

      • Classification Detail. This Detail is responsible for determining the custodial classification of inmates.

      • Transportation Detail. This Detail is responsible for the safe movement of inmates between County Detention Facilities, to the State Department of Corrections, and between Contra Costa County and other counties throughout the state.

   b. Court Services. Court Services primary function is to constitutionally provide humane and professional security to court staff, inmates and the public during court proceedings.

   c. Martinez Detention Facility. This facility is a Type II "new generation" maximum security facility built to house pre-sentenced inmates and sentenced inmates not qualifying for less restrictive environments. The Martinez Detention Facility houses the Division's Administration.
d. Marsh Creek Detention Facility. This facility is a type III facility, responsible for the care, custody and control of minimum security sentenced male inmates.

III. ORGANIZATION CHART. (SEE ATTACHED)
I. POLICY.

A. Custody Services Bureau is comprised of two Detention Divisions, the Martinez Detention Division and the West County Detention Division. The Detention Divisions’ primary function shall be to constitutionally, humanely and professionally provide housing and custody for all sentenced and unsentenced inmates arrested and/or remanded to the Office of the Sheriff by law enforcement agencies and courts within the County.

II. GENERAL.

A. DIVISION FUNCTIONS. The functions and responsibilities of the Detention Division are commanded by a Captain.

1. Detention. The Detention Division is comprised of the Custody Alternative Facility, Food Services Unit, Inmate Services Unit, Health Services Security Unit, and West County Detention Facility.

   a. Custody Alternative Facility. The Custody Alternative Facility is responsible for administering the various programs for which selected inmates may qualify as an alternative to incarceration.

   b. Food Services. The Food Services Unit manages meal services for inmates.

   c. Inmate Services. The Inmate Services Unit provides various services for inmates.

   d. Health Services Security Unit. The Health Services Security Unit is responsible for the security of both Contra Costa Health Services and Contra Costa Employment and Human Services Divisions.

   e. West County Detention Facility. The West County Detention Facility is a Type II direct supervision, medium security, new generation jail designed to operate as a program-oriented facility.

III. ORGANIZATION CHART. (SEE ATTACHED)
I. POLICY.

A. Field Operations Bureau shall be comprised of the Investigation Division, Special Operations Division, and Patrol Division. The responsibility of the Investigation Division is to conduct follow-up investigations of all reported felony offenses and certain misdemeanor offenses which occur in the unincorporated area of Contra Costa County, and the cities and districts that contract for law enforcement services with the Office of the Sheriff. The Division also provides extraditions and civil functions.

II. GENERAL.

A. DIVISION FUNCTIONS. The functions and responsibilities of the Investigation Division are commanded by a Captain.

1. Investigations. The objectives of investigations are the protection of lives, the identification and prosecution of criminals, and the protection and recovery of stolen property. The Investigation Division is comprised of three units.

   a. Investigations. This Unit is responsible for the investigation and preparation of evidence for the prosecution of adult and juvenile offenders involved in both felony and misdemeanor crimes. The investigative process is accomplished through five teams:

      • General Investigations, Homicide, Special Victims, Narcotics/Special Investigations and Vice.

   b. Contracts/Task Forces. This Unit includes a Detective assigned to specialized county task forces.

2. Civil Unit. The Civil Unit performs complex and varied functions concerning civil law, as well as special details directed by the courts. The Civil Unit handles money judgments, attachments of wages, levies on bank accounts, and seizures and subsequent sales of personal and business property, serves civil bench warrants and civil subpoenas. This Unit is also responsible for extraditions, rendering of persons in custody.
locally who are wanted by another state, and arrest of persons with outstanding local and out-of-state warrants.

- Warrant Service Detail. The Warrant Service Detail is a collaboration between the Contra Cost County Office of the Sheriff and the United States Marshals Service. This Unit is responsible for the service of warrants within Contra Costa County, and the service of Contra Costa County warrants outside of the county. The Warrant Service Detail also assists the United States Marshal’s regional Fugitive Task Force on operations within and outside of Contra Costa County.

III. ORGANIZATION CHART. (SEE ATTACHED)
I. POLICY.
   A. Field Operations Bureau is comprised of the Patrol Division, Special Operations Division, and the Investigation Division. The Patrol Division shall provide 24-hour law enforcement services to the unincorporated areas of the County, Special Police Districts, and other law enforcement contracts.

II. DEFINITIONS.
   A. RESIDENT DEPUTY. The Resident Deputy Program is one aspect of community-based law enforcement. The Resident Deputy works in specified areas of responsibility. The Deputy assists with local issues by acting as a problem-solving conduit to the Sheriff’s Office, county government, and other agencies. The Resident Deputy is also expected to provide public protection and take direct police action as circumstances dictate.

   B. SPECIAL POLICE DISTRICT. A specific geographical tract within the unincorporated area of the County which receives extended police protection. Such a District is formed by resolution of the County governing body and popular vote of the District. A special tax is levied upon residents of the District to cover costs of the extended service.

III. GENERAL.
   A. DIVISION FUNCTIONS. The functions and responsibilities of the Patrol Division are commanded by a Captain.

      1. Patrol. This Division is comprised of the Administration and Patrol Units.

         a. Administration. The administrative functions of the Division are carried out through the following Details.

            • Clerical Support. This Detail is responsible for clerical support for the Patrol Division.

            • CSOs (Community Service Officers) and Student Workers provide non-sworn Patrol services that support the Field Operations Bureau.
• Parking Enforcement. This Detail is responsible for parking enforcement in specified areas of the County.

• Special Enforcement. These teams include the K-9 Unit, the J-Team, and the SWAT Team, which provide directed enforcement and are assigned duties as deemed necessary to support Patrol functions.

• Training. This Detail conducts and/or coordinates Division training, with emphasis on the Field Training Program for new Patrol Deputies.

b. Patrol - Station Houses. The Patrol Division’s responsibility is carried out through four geographically situated station houses. Each station house is commanded by a Lieutenant. The station house concept places police services geographically closer to the communities the Office of the Sheriff serves.

• Bay Station. Bay Station is located in Richmond and serves the unincorporated areas of the western portion of the County, which includes the unincorporated areas of El Sobrante, Rodeo, North Richmond, Crockett and San Pablo.

• Delta Station. Delta Station is located in Oakley and serves the unincorporated areas in the eastern portion of the County which includes the unincorporated areas of Oakley, Knightsen, Bethel Island, Byron and Discovery Bay.

• Muir Station. Muir Station is located in Martinez and serves the unincorporated areas of the northern central portion of the County, which includes unincorporated areas of Pacheco, Bay Point, Martinez, Concord, Clyde and Lafayette.

• Valley Station. Valley Station is located in Alamo and serves the unincorporated areas of the southern central portion of the County, which includes the unincorporated areas of Alamo, Diablo and Blackhawk, Walnut Creek, Pleasant Hill, Concord and Canyon.

c. Patrol - Contract Police Services. In addition to providing law enforcement services in the unincorporated areas, Patrol Division provides police services of Special Districts through contract agreements.

• Special Police Districts in which the Office of the Sheriff provides Patrol functions are:
  o P-1 Crockett
  o P-2A Blackhawk
  o P-2B Alamo
  o P-3 Diablo
  o P-5 Roundhill
d. Patrol – Watch Commander. To ensure command continuity, Watch Commanders are assigned to shifts during non-business hours to respond in the event of critical incidents or major crimes and to provide direction at the command level as needed.

IV. ORGANIZATION CHART. (SEE ATTACHED)
I. POLICY.

A. The Field Operations Bureau is comprised of the Patrol Division, Investigation Division, and the Special Operations Division. The Special Operations Division shall provide 24-hour law enforcement services to the incorporated cities and Special Districts through contract agreements and other law enforcement contracts. Additionally, the Special Operations Division encompasses the Marine Services Unit and the Air Support Unit.

II. DEFINITIONS.

A. SPECIAL POLICE DISTRICT. A specific geographical tract within the unincorporated area of the County which receives extended police protection. Such a District is formed by resolution of the County governing body and popular vote of the District. A special tax is levied upon residents of the District to cover costs of the extended service.

III. GENERAL.

A. DIVISION FUNCTIONS. The functions and responsibilities of the Special Operations Division are commanded by a Captain.

B. CONTRACT CITIES. Contract Police Services. In addition to providing law enforcement services via the Marine Services Unit and the Air Support Unit, the Special Operations Division provides the overall police management of incorporated cities and the AC Transit District through contract agreements.

1. Incorporated cities, as an alternative to establishing their own police agencies, may contract for law enforcement services from the Office of the Sheriff.

2. Cities to which the Office of the Sheriff provides police services, pursuant to a police services contract, are:

   a. Danville
   b. Lafayette
   c. Orinda
3. Air Support Unit. The Air Support Unit is located at Buchanan Field in Concord. The Air Support Unit operates two STARR helicopters capable of performing a variety of missions to assist Sheriff’s Patrol and Marine Patrol deputies in their efforts to protect the lives and property of the citizens of Contra Costa County.

4. The Marine Services Unit. The Marine Services Unit is comprised of the Marine Patrol and the Infrastructure Protection Team. The Marine Patrol is located in Oakley and patrols over 200 miles of linear coastline from Richmond to Discovery Bay. The Infrastructure Protection Team is located at the Military Ocean Terminal Concord (MOTCO) and provides a sustained security presence in and around the critical infrastructure and key resources located within the county. The Marine Services Unit is also responsible for providing contractual law enforcement services to the Contra Costa Water District at the Los Vaqueros Reservoir.

5. Other Special Operations functions include:
   a. A.C. Transit

IV. ORGANIZATION CHART. (SEE ATTACHED)
I. POLICY.
   A. Emergency Services Division provides assistance to emergency response agencies and the general public in preparing for and coping with the aftermath of natural and man-made disasters.

II. GENERAL.
   A. DIVISION FUNCTIONS. The responsibilities and functions of the Emergency Services Division are commanded by a captain, with individual components managed by a lieutenant or professional manager.
      1. The Emergency Services Division consists of the following major components:
         a. Office of Emergency Services (OES)
            • Planning
            • Homeland Security
            • Northern California Regional Intelligence Center (NCRIC)
            • Mutual Aid
         b. Emergency Services Support Unit (ESSU)
            • Volunteer Services
         c. Community Warning System (CWS)
         d. Grants
B. Office of Emergency Services (OES):

1. **Planning**: Is responsible for emergency preparedness, disaster management, and response and recovery planning for the county. Planning coordinates information and resources among county agencies, local governments and special districts. Planning serves as a link between the California Office of Emergency Services (CALOES) and the counties, cities, and special districts. Planning conducts technical studies, analyzes the potential for emergencies/disasters, and develops plans. Additionally, Planning performs community outreach, holds planning meetings and conducts training. Lastly, Planning maintains the Operational Area Emergency Operations Center (EOC) and the Emergency Management Team for activation during emergencies.

2. **Homeland Security**: Is responsible for developing and maintaining positive partnerships between the Office of the Sheriff, its infrastructure partners, and other local, state and federal agencies in order to share critical information to safeguard persons and property. Homeland Security reviews tips and leads to ensure appropriate agencies and resources are notified.

3. **Northern California Regional Intelligence Center (NCRIC)**: This position is assigned to the Northern California Regional Intelligence Center (NCRIC or Fusion Center) and serves within the Terrorism Liaison Officer Outreach Program (TLOOP). This position also has direct links to the FBI’s Joint Terrorism Task Force (JTTF) and other state and federal agencies, which facilitate information dissemination.

4. **Mutual Aid**: Primary liaison between the Law Enforcement Region II (Alameda County Sheriff’s Office), the California Office of Emergency Services (formerly the California Emergency Management Agency – CALEMA), and the agencies within Contra Costa County. The Law Enforcement Mutual Aid Coordinator receives requests for law enforcement mutual aid, identifies the appropriate resources and dispatches those resources to the requesting agency, while tracking costs for reimbursement. The Law Enforcement Mutual Aid Coordinator serves as the administrative coordinator of the county’s Mutual Aid Mobile Field Force (MAMFF). The Law Enforcement Mutual Aid Coordinator schedules training, maintains the active roster and team statistics, as well as member certifications, and maintains an updated, county-wide Mutual Aid Agreement, which is signed/approved by the Sheriff and each Law Enforcement Agency Chief.

C. Emergency Services Support Unit (ESSU):

1. **Volunteer Services**: Provides equipment, personnel and other logistical support, 24/7, to support planned and unplanned Sheriff’s Office operations, as well as other agencies throughout the operational area. The Emergency Services Support Unit coordinates activities for the following volunteer branches:

   a. **Air Squadron** – Pilots and observers provide air operations support to the Office of the Sheriff. Pilots provide their own
aircraft and pay for all maintenance to their aircraft. Services include transportation, surveillance, logistics and disaster response.

b. Cadets – The program offers our youth and young adults experience and training regarding law enforcement. Cadets participate in public events, search and rescue, traffic enforcement, and annual tactical competitions.

c. Chaplains – The Chaplaincy Program provides support and comfort to the law enforcement community and the public. Chaplains are available to provide guidance and counseling in times of crisis.

d. Communications Unit – The Unit provides alternate communication to the operational area via licensed amateur radio operators in the event of an emergency or disaster. Members also support Search and Rescue, the County Fair Contract, and other ESSU public outreach events.

e. Dive Team – Members are accomplished and certified rescue divers available to assist the Office of the Sheriff with events that necessitate the need to dive into bodies of water. Services include evidence collection, victim recovery, hazardous object removal, inspections, and disaster response.

f. Food Service Unit – The unit provides food service to support field operations of the Office of the Sheriff during training or actual events.

g. Mutual Aid Mobile Support Team (MAMST) – This unit provides support in the form of deployment and equipment supply and maintenance for the Mutual Aid Mobile Field Force, Search and Rescue, and the Special Weapons and Tactics Team.

h. Reserve Deputy Sheriffs – Members have varied levels of training and experience. Reserve Deputy Sheriff’s volunteer time in a capacity set by California Commission on Peace Officer Standards and Training (P.O.S.T) and Sheriff’s Policy guidelines. Reserves assist with in-custody transportation, patrol and detention augmentation, and special patrol programs (DUI checkpoints, off road patrol, etc.), and other special events.
i. Search and Rescue – Members are trained volunteers who can be summoned to assist the Sheriff’s Office during events such as missing or at-risk persons, evidence collection, public events, and disaster response.

j. Sheriff’s All Volunteer Extended Services (SAVES) – Members with different skill sets who assist our office with delivery of logistical and clerical support, mostly in field operations and administrative assignments.

D. Community Warning System (CWS): Is a comprehensive, integrated system for alerting the public in Contra Costa County of *imminent threats to life or health*. The CWS is available to any incident commander, 24/7, and may use alerting devices such as the Telephone Notification System (TENS), social media and messaging systems, 49 Safety Sirens, the Emergency Alert System (EAS) over broadcast radio and television, the California Emergency Digital Alert System (EDIS), and the CWS website.

E. Grants: Supports the Operational Area through the project management of several grants. These grants assist the Contra Costa Operational Area prepare for natural and man-made disasters. Grant proposals focus on programs that enhance first-responder and emergency management capabilities.

III. ORGANIZATION CHART. (SEE ATTACHED)
I. POLICY.

A. The Forensic Services Division is composed of three major sections: Criminalistics, Drug, Alcohol and Toxicology, and Property and Evidence Services.

II. GENERAL.

A. DIVISION FUNCTIONS. The functions and responsibilities of the Forensic Services Division are commanded by a Chief.

1. Forensic Services. The Division is subdivided into the Criminalistics Section, Drug, Alcohol and Toxicology Section, and Property and Evidence Services.

   a. Criminalistics Section. The Criminalistics Section is managed by a Forensic Manager and is comprised of four technical units: Forensic Biology, Comparative Evidence, Latent Prints, and Crime Scene Investigation

      • Forensic Biology examines evidence for the presence of physiological fluids and tissues and generates DNA profiles. Unknown DNA profiles are uploaded into CODIS to search the State and National database of convicted offenders and felony arrestees.

      • Comparative Evidence handles firearms and tool mark related examinations, shoe and tire impression comparisons, along with any type of physical match analysis.

      • Latent Prints processes physical evidence using a variety of chemical methods for fingerprints and other areas of friction ridge detail, and identifies the individual who left the print. Unknown prints are uploaded and searched in a variety of AFIS databases: local, regional, national and international.

      • Crime Scene Investigation supports the Office of the Sheriff and all local law enforcement agencies with
major crimes scenes, such as homicides and officer-involved shootings.

b. Drug, Alcohol and Toxicology Section. This Section is managed by a Forensic Manager and has three major Units: Alcohol Analysis, Drug Analysis, and Toxicology. This Section’s principle tasks include the analysis of controlled substances, analysis of blood and breath samples for alcohol content, analysis of blood and urine samples for drugs and the analysis of chemicals seized from clandestine drug manufacturing sites.

c. Property Services. This Unit is responsible for the storage, tracking, disposition, and record keeping of seized, confiscated and found property and evidence for the Office of the Sheriff, Contract Cites.

III. ORGANIZATION CHART. (SEE ATTACHED)
I. POLICY.

A. The Technical Services Division provides an essential communications link for the public and operational Units of the Office of the Sheriff. This includes radio dispatching and the processing of computer information requests. The Division also provides fleet management, maintenance of crime reports, criminal history information, warrant files, and maintenance.

II. GENERAL.

A. DIVISION FUNCTIONS. The functions and responsibilities of the Technical Services Division are commanded by a Captain.

1. Technical Services. This Division is comprised of three units, the Information Technology Unit, Fleet Services Unit, and Administrative/Clerical Unit. All three units are commanded by the Assistant Division Commander (Lieutenant).

   a. Information Technology. This Unit is comprised of three Details and falls under the supervision of the Information Systems Project Manager.

      - CAD/RMS/JMS System Support Detail. This Detail is responsible for managing the Computer Aided Dispatch System (CAD), Management Information System (MIS), Jail Management System (JMS), Records Management System (RMS) and Automated Report Writing System (ARS), including coordinating changes and upgrading the system and geofile updates.

      - Network System Support Detail. This Detail provides direction for system development within the Sheriff's Office, and coordinates data processing with other law enforcement agencies. This Detail maintains PC’s and networks.

      - Telecommunications Detail. This Detail identifies ways to adopt technological advances for varied Sheriff’s
Office functions and acts as the liaison to General Services.

b. Fleet Services. This Unit manages the Sheriff’s Office fleet vehicles and equipment including vehicle repair and maintenance, removing vehicles from the fleet, processing maintenance records, and acquisition of new vehicles and related equipment.

c. Administrative/Clerical. This Unit provides clerical support to the Division. Additionally, this Unit is responsible for ordering, updating, and maintaining all cellular phone and tablet devices.

2. Records and Identification. Records and Identification consists of three 24 hour Details.

- Identification Detail. The primary responsibility of Identification Detail is to verify AFIS identification of Livescanned prints from Custody and other local agencies. The Identification Detail also collects electronic fingerprints from individuals required to register for certain offenses, applicants for certain types of employment, and for CCW permits.

- Records Detail. This Records Detail is responsible for receiving, filing, retrieving, maintaining, and the release of information of all Sheriff’s Office reports and supplements. The Detail also compiles crime statistics, criminal histories, maintains booking records, issues permits and licenses in accordance with County Ordinances, and enters all County issued Restraining Orders.

- Warrants Detail. The Warrants Detail is responsible for receiving, updating, and modifying arrest warrants from the courts, maintaining necessary files and responds to warrant inquiries for public safety personnel. The Warrant Detail also makes entries and inquiries into various automated data bases at local, State and Federal levels, including Restraining Orders.

3. Communication Center. The Communication Center consists of two Details:

- Central Dispatch Detail. This Detail is responsible for dissemination of information to operational units on numerous radio channels and between the citizen and public safety services. The dispatch center provides communications to Sheriff’s Office units and other specified agencies throughout the county. The center is managed by a Communications Center Director who has 24 hour responsibility for the operation of the center.

- Recruiting/Training Detail. This Detail is responsible for active recruiting of dispatch candidates. This Detail is
also responsible for coordination of training, development of new programs, and maintenance of policies and procedures for the Technical Services Division.

III. ORGANIZATION CHART. (SEE ATTACHED)
I. POLICY.

A. The Support Services Bureau is comprised of the Emergency Services Division, Technical Services Division, Forensic Services Division, and the Coroner’s Division. The primary function of the Coroner’s Division is to inquire into and determine the circumstances, manner and cause of all sudden, violent, unusual and unattended deaths that occur in the county. Additionally, the Coroner’s Division will determine the extent of inquiry to be made into any death occurring under natural circumstances and falling within the provisions of the Government Code. Coroner’s Division staff shall strive to serve the community in the most responsive, compassionate and professional manner possible.

II. GENERAL.

A. DIVISION FUNCTIONS. The functions and responsibilities of the Coroner’s Division are commanded by a Captain. The Assistant Division Commander is a Sergeant.

1. The Coroner’s Division is comprised of a Clerical Support Unit and an Investigation Unit. The Division contracts with Forensic Pathologists and other specialists as needed. The Coroner’s Division operates from a central morgue facility 24 hours a day, 365 days a year.

   a. Clerical Support. This Unit’s primary function is to transcribe autopsy protocols, prepare and amend death certificates, and collate and compile mandated statistical information relating to the cases handled by the Division. The Clerical Support Unit also handles general clerical duties associated with the Division.

   b. Coroner’s Investigation. This Unit’s primary function is to determine the extent of inquiry to be made into all reported deaths and investigate and determine the manner of all sudden, violent, unusual and unattended deaths that occur in the county. The Coroner’s Investigator will make removal of the deceased from the place of death and transport them to the Central Morgue in cases which require examination by a pathologist. The Coroner’s Investigator will determine the manner of death through examination of evidence, scene investigation,
interviewing witnesses and doctors, researching the decedent’s medical history, autopsies and/or conducting Coroner Inquests. The information developed by the Coroner’s Investigators, Crime Scene Investigators, Investigators from law enforcement agencies having jurisdiction over the death, Criminalists and Fingerprint Examiners is used by the Coroner’s Investigator to develop the cases.

c. Medical Contractors. The Forensic Pathologists primary function is to determine the Cause of Death regarding all sudden, violent, unusual or unattended deaths that occur in the county.

INVESTIGATIONS UNIT
SECTION 2
I. POLICY.
   A. The Office of the Sheriff will follow specified processes in recruiting and hiring Deputy Sheriffs in order to assure fairness to applicants and quality candidates for the Office of the Sheriff. The Administrative Services Bureau Assistant Sheriff has the primary responsibility for hiring both Deputy Sheriffs and general employees for the Office of the Sheriff and will work closely with the County Human Resources Department to ensure all Federal and State laws and all county policies and procedures are followed.

II. DEFINITIONS.
   A. DEPUTY SHERIFF - LATERAL ENTRY. Those candidates who have satisfactorily completed a POST-approved California Peace Officer Academy or have successfully completed the Basic Course Equivalency Examination administered by the California Commission on Peace Officers Standards and Training.

   B. DEPUTY SHERIFF RECRUIT. Those candidates who do not possess a valid California Peace Officer Academy graduation certificate or equivalent. Upon employment with the Sheriff’s Office, recruits are assigned to the Office of the Sheriff’s Law Enforcement Training Center for completion of the P.O.S.T. basic academy.

   C. DEPUTY SHERIFF - PER DIEM. A limited term or limited function Deputy who is employed on a non-permanent basis to address a particular staffing issue.

III. GENERAL.
   A. APPLICATION AND TESTING. Deputy Sheriff Recruit testing will be conducted on an on-going basis, as needed. Applicants who successfully complete the recruit testing process will be placed on a Deputy Sheriff Recruit employment list. The following steps are included in the recruit testing process:
      1. Submit an application to the County Human Resources Department;
      2. Pass a written examination;
      3. Pass a physical agility test;
      4. Pass an oral interview with an appraisal board;
5. Pass a polygraph examination;
6. Pass a background investigation;
7. Executive interview upon passing background investigation. If selected, applicant will receive a conditional job offer;
8. Once the applicant has received a letter from the Office of the Sheriff stating its intention to hire, the applicant will be required to successfully pass an oral and written psychological examination and a medical examination.

B. DEPUTY SHERIFF - LATERAL ENTRIES. Deputy Sheriff Lateral recruiting will be conducted periodically, as needed. Candidates for Lateral Entry must submit an application through the County Human Resources Department. Lateral candidates must successfully complete the Office of the Sheriff’s standard physical agility test prior to being hired as a permanent employee. When lateral hiring is open, qualified applicants must successfully complete an interview with Office of the Sheriff personnel, a psychological test, a polygraph examination, a medical examination and a background investigation and, if successful, are then placed on an employment list.

C. NON-PERMANENT DEPUTY SHERIFF PERSONNEL. The Sheriff has the authority to hire Deputy Sheriff personnel on a non-permanent basis as needed by the Sheriff to supplement Office of the Sheriff operations. The two categories of non-permanent Deputy Sheriffs are as follows:

1. Per Diem Deputy Sheriffs are former Deputy Sheriffs, former peace officers from other agencies, those that otherwise meet the criteria for Deputy Sheriff-Lateral or Reserve Deputy Sheriffs.
   a. Per Diem Retired Deputies. The Sheriff may re-employ its former Deputies who have retired from the Office of the Sheriff with a service retirement with the approval of the Human Resources Director. Retired Deputies may, under the applicable Government Code provisions, work a maximum of 120 days or a total of 960 hours per fiscal year, whichever is greater. All such Deputies from this agency may require a full background investigation.
   b. Per Diem Deputies hired from outside agencies. Former sworn law enforcement personnel from other agencies may also be hired as Per Diem Deputy Sheriffs provided they meet all of the requirements for lateral candidates (see General B, above). All who are hired from outside agencies will require full background investigations in all cases, whether or not there is a break in service.
   c. Per Diem Reserve Deputies. Personnel who have previously qualified as a Reserve Deputy Sheriff for Contra Costa County and who are currently in the Reserve Program may be "activated" into a paid "per diem" assignment through the procedure described herein. Appointments by the Sheriff are exempt from the Merit System regulations and are normally
approved for a specific project or contract, such as the County Fair. Reserve personnel who are activated into a paid "per diem" assignment will be compensated at the first step of the Deputy Sheriff pay range.

D. AUTHORIZATION FOR EMPLOYMENT OF NON-PERMANENT DEPUTIES. The Sheriff may authorize the employment of non-permanent Deputy Sheriffs under the following conditions:

1. Under terms of a reimbursable or revenue producing contract or agreement which would be difficult to staff with permanent personnel. Examples of this type of agreement are the hiring of Per Diem Deputy Sheriffs to operate under the Marine Patrol grant or the hiring of Reserves for the annual County Fair.

2. To keep overtime expenditures at or below budgeted levels, non-permanent Deputy Sheriffs may be hired by the Sheriff if the hours they are assigned will reduce the number of overtime hours expended. The reduction of overtime hours must be a cost benefit; i.e., the pay and benefits received by the non-permanent Deputy Sheriff must cost less than the overtime expenditure required without the employment of the non-permanent Deputy Sheriffs.

3. As an operational or emergency measure required by the Sheriff for the more efficient operation of the Office of the Sheriff, the use of non-permanent Deputy Sheriffs may be authorized directly by the Sheriff or the Undersheriff. This will normally involve a special project or assignment which benefits from the utilization of non-permanent Deputy Sheriffs.

E. SEPARATION OF NON-PERMANENT DEPUTY SHERIFFS.

1. Non-permanent Deputy Sheriffs may be separated from service at will. This may occur, as an example, when the service is no longer a priority for the Office of the Sheriff or when the costs are no longer beneficial in reducing overtime or generating revenue. A Per Diem Deputy Sheriff who is not performing satisfactorily will be separated from service. Retired Deputy Sheriffs who have been rehired will not be permitted to exceed the 120-day/960-hour limitation per fiscal year.

2. Division Commander Responsibility. The Division Commander is responsible for notifying the non-permanent Deputy Sheriff and the Sheriff’s Chief of Management Services when the non-permanent Deputy Sheriff’s services are no longer required. However, when a non-permanent Deputy Sheriff is to be separated due to misconduct, the non-permanent Deputy Sheriff is entitled to an administrative hearing and the Administrative Services Bureau Assistant Sheriff shall be contacted by the Division Commander prior to separation.

IV. PROCEDURE 1.

A. DEPUTY SHERIFF BACKGROUND PROCESS.

1. Determination of Need.
   a. A decision will be made by management regarding the number of persons to hire during a given period based upon the needs of
the Office of the Sheriff. The Chief of Management Services will then seek certification of an appropriate number of names from the Human Resources Department, utilizing either or both the recruit and lateral lists.

2. Processing Candidates.
   a. Recruit candidates who have successfully completed the written examination and the physical agility test, and lateral candidates of interest will be interviewed by a qualifications appraisal board consisting of at least two sworn members at the rank of Deputy Sheriff or higher.
   b. The interviewers will evaluate the candidates and rate them on a standard form. Formal interview scores for candidates ranking on the employment list will be delivered to the Human Resources Department by the Director of Personnel Services.
   c. If a candidate receives a qualifying score in the qualifications appraisal interview, a Professional Standards Division POST Personal History Statement will be obtained from the candidate. If disqualifying information is not disclosed by the candidate in the PHS, the candidate will be invited to a pre-background interview. Those most qualified applicants that do not provide disqualifying information in the pre-background interview will be scheduled for a polygraph examination. Unsuccessful applicants will be so notified by the Captain or designated representative.
   d. Eligibility of candidates for selection (see section 3, below) depends on the successful completion of all tests administered and the suitability of the candidate’s background investigation results.

3. Selection.
   a. When all preliminary reports and testing results have been completed, the Professional Standards Division Commander and the Administrative Services Bureau Assistant Sheriff will review all data relative to the candidates. The Sheriff has the ultimate decision-making authority for hiring purposes. His authority in this regard is commonly designated to the Undersheriff or the Administrative Services Bureau Assistant Sheriff.
   b. A candidate completing all phases of the examination without disqualification will not necessarily be recommended for hiring. County certification rules allow persons to be qualified, and yet be "passed over" in favor of a more qualified candidate. Persons "qualified, but passed over" will remain as candidates to be considered against future candidates from the same eligibility list.
   c. The Backgrounds Office will maintain records placing all non-hired candidates into one of the following categories:
      - Unsuccessful (Inactive) - Unavailable for hire at this time;
• Removed for Cause - Memo submitted to the Human Resources Department recommending removal from the employment list for cause per Merit Regulations;

• Hold - Placed on temporary medical exam hold by the County Health Department or placed on Sheriff’s Office medical exam hold pending further background investigation;

• Qualified, pending - Is qualified for hire but must be evaluated against other qualified candidates.

• Unsuccessful (Not Qualified) - Recommendation against hire, but no cause for removal from list.

V. PROCEDURE 2.

A. PROCESSING NON-PERMANENT DEPUTY SHERIFFS.

1. Division Request.
   a. The Division Commander or designee shall request employment of a non-permanent Deputy Sheriff based on the criteria outlined in "Authorization for Employment of Non-Permanent Deputies" herein.
   b. The request for employment of a non-permanent Deputy Sheriff will be made via the Bureau Assistant Sheriff to the Chief of Management Services. The Division may indicate a need for a particular skill, ability, or bonafide occupational qualification (male-female). The Division may also request a particular former employee or Reserve Deputy. A mutual decision will be made regarding the type of temporary employee to hire.

2. Examination Requirements.
   a. Once a non-permanent candidate has been identified, the Chief of Management Services will process the candidate through the testing process. Note that former employees returning for temporary service are not exempt from such testing.

3. Limitations of Newly-Hired Per Diem Deputies.
   a. Per Diem Deputies, including Sheriff's Reserves hired as Per Diem Deputies, possess peace officer powers only when on duty and when performing the function for which they were employed.
   b. The Chief of Management Services shall ensure that each newly-hired temporary Deputy is aware of the limits of his or her authority by use of the following:
      • A statement signed by the Per Diem Deputy acknowledging the limits of his or her authority.
      • An identification card issued to the Per Diem Deputy which clearly identifies the Deputy as a “Deputy Sheriff-Reserve” or “Deputy Sheriff - Per Diem”.
VI. PROCEDURE 3.
A.HIRING OF PERMANENT OR NON-PERMANENT DEPUTY SHERIFFS
1. Once it is determined that an applicant is a viable candidate upon selection as set forth in Procedure 1, 3. (“Selection”), the applicant will be sent a conditional hire letter. This letter will state the intention of the Office of the Sheriff to hire that individual upon successful completion of the following:
   a. A written and oral psychological examination.
   b. A P.O.S.T. approved medical examination will be conducted to determine compliance with the basic health requirements for appointment as a permanent Deputy Sheriff. A candidate with a recent P.O.S.T. approved examination may not be required to test again.

VII. PROCEDURE 4.
A. BACKGROUND INVESTIGATION.
1. Government Code section 1031(d) requires that peace officers must be “of good moral character, as determined by a thorough background investigation.” The Background Investigations Detail in the Professional Standards Division shall conduct a complete background investigation of every candidate to assure that he or she meets this requirement as well as all other lawful requirements for employment as a peace officer.
2. Pursuant to law, certain information, such as a personal medical history, cannot be requested until a “conditional job offer” has been extended to the candidate. Other issues pertaining to the candidate may not be practical to resolve prior to the “conditional job offer.” Still other issues may arise subsequent to the “conditional job offer.” Investigation into all such matters will be made during the background investigation.

B. HIRING.
1. A candidate who has received a “conditional job offer,” must successfully complete all conditions to be hired. Successful completion includes:
   a. A thorough review and consideration of the candidate’s Background Investigation and a positive determination by the Sheriff or his designee that the candidate is legally qualified and otherwise suited and appropriate to be hired by this Office; and
   b. Successful resolution of all other matters set forth in the “conditional job offer.”
2. A candidate who has received a “conditional job offer” and who has successfully completed or resolved all conditions, and for whom no disqualifying issue or potentially disqualifying issue has arisen, will be extended an offer of employment.
I. POLICY.
   A. The Office of the Sheriff personnel process shall be conducted in accordance with established County policy, applicable State codes and current Memoranda of Understanding. Personnel assignments and promotions will be administered according to standards set forth by the Office of the Sheriff to ensure efficiency and effectiveness.

II. DEFINITIONS.
   A. CLASSIFICATION. A description of the different kinds of work performed in an agency and consolidation of similar positions into classes based upon similarity of duties and responsibilities.

   B. JOB ANALYSIS. A systematic examination of the duties and responsibilities of each job class as it relates to the knowledge, training and skills required to perform the task or duties of the job.

III. GENERAL.
   A. APPOINTMENT AND SELECTIONS. The Sheriff is the appointing authority and will make selections based on the County Human Resources Department rules and regulations.

   B. JOB CLASSIFICATIONS. The County Human Resources Office provides classification, pay, recruitment, and selection assistance for all County Departments. The Office of the Sheriff through its Personnel and Finance Division, works closely with the County Human Resources Department in those areas. Job analysis and classification for each Office of the Sheriff position are done by the County Human Resources Department, with assistance and input from the Chief of Management Services.

   C. SCREENING FOR VACANT CLERICAL, DEPUTY (SPECIALIZED POSITIONS), SHERIFF’S AIDES, SHERIFF’S RANGERS, AND SHERIFF’S SPECIALISTS POSITIONS. The Office of the Sheriff Division Commander where a vacancy exists, will screen applicants for vacant positions at the Deputy Sheriff level and for clerical staff, Sheriff’s Aides, Sheriff’s Rangers, and Sheriff’s Specialists. This is done for inter-divisional vacancies and intra-divisional vacancies.
D. **PROMOTIONS.** Promotion procedures in the Office of the Sheriff are governed by and done at the discretion of the Sheriff except as limited by County Personnel Management Regulations and Memoranda of Understanding.

E. **MINIMUM QUALIFICATIONS FOR SPECIALIZED POSITIONS.** Minimum qualifications have been established which employees must meet in order to qualify for various specialized positions within the Office of the Sheriff. Those minimum qualifications are designed to provide job-related realistic standards and to provide maximum flexibility for movement within the Office of the Sheriff.

F. **DEPUTY ROTATIONS BETWEEN DIVISIONS.** The Sheriff has authority and discretion to transfer all classes and all Divisions, except as limited by MOU’s. Deputy Sheriffs will be rotated into and out of Patrol and Detention Divisions based on an agreement between the Office of the Sheriff and the Deputy Sheriffs' Association, as stated in the Memorandum of Understanding.

G. **SPECIAL ASSIGNMENTS DURATION.** The special assignments listed below are for the durations shown, subject to the needs of the Sheriff’s Office.

1. For the assignments listed below, the assignment duration is generally:
   a. M Module Deputy: 18 months
   b. HSSU Deputy and Sergeant: 3 years
   c. AC Transit Deputy and Sergeant: 18 months

2. For the assignments listed below, the assignment duration is generally two years:
   a. CAF Deputy and Sergeant
   b. Coroner Deputy and Sergeant
   c. Marine Patrol Deputy and Sergeant
   d. ASU Deputy and Sergeant
   e. Recruit Training Deputy
   f. Volunteer Services Deputy and Emergency Services Sergeant
   g. Investigation Deputy and Sergeant
   h. IA Sergeant
   i. K-9 Deputy

3. For all assignments for which the assignment duration is set in the DSA Memorandum of Understanding, the term set in the MOU shall control.

4. In the event a vacancy in a position listed in this section is filed by “forcing,” the assignment duration will end at the next shift change. Should the “forced” employee desire to remain in the assignment after shift change, and should his or her performance in the position and the needs of the Sheriff’s Office warrant an extension, then the assignment will be extended so that the
“forced” term and the extended term together equal the assignment duration shown above for the assignment.

IV. PROCEDURE 1.
A. SELECTION PROCESS.

1. When an opening occurs for Clerical, Deputy (specialized position), Sheriff’s Aide, Sheriff’s Ranger, or Sheriff’s Specialist in any Division, a notification will be made to all employees at that rank by the Chief of Management Services who is responsible for preparing the vacancy announcement and distributing copies to all Divisions.

2. Qualified and interested individuals must submit to the Chief of Management Services a letter of interest detailing previous experience, specific qualifications, training and education and any pertinent information they wish to be considered.

3. The Division Commander where the vacancy exists will convene an in-person meeting with the following people to review the applicants:
   a. The Deputy Sheriffs' Association President or designee (non-voting) for positions represented by the DSA.
   b. A Shop Steward (non-voting) for clerical positions.
   c. The Unit Manager where the vacancy exists

4. The Division Commander will consider the following criteria in determining a ranking of qualified candidates and those deemed unqualified:
   a. Whether the applicant meets the minimum qualifications for the position
   b. Job performance, skills and abilities relevant to the new position
   c. Training and education
   d. Sick leave usage
   e. Seniority
   f. Current assignment

5. Upon review of each applicant, the Assistant Sheriff where the vacancy exists, will provide the Sheriff/Undersheriff with a memo ranking the applicants, along with a list of applicants not ranked for the position. The memo should minimally include criteria a-f. This process is advisory only to the Sheriff/Undersheriff and is in place to furnish quality input.

6. The Sheriff/Undersheriff will then select an individual from among the applicants.

7. All applicants will be notified by the Division Commander when the Sheriff/Undersheriff has made a decision. Applicants interested in comments regarding their non-selection should make a request through their Division Commander or through the DSA or Union Representative who participated in the meeting.
B. ELIGIBILITY LIST

1. The Eligibility List for special assignments shall expire after 90 days from being promulgated unless the Assistant Sheriff where the vacancy exists approves an extension.
I. POLICY
   A. Transfers and Shift Sign-Ups are governed by the Memorandum of Understanding. It is used to determine transfers, select assignment, work location, shifts and/or days off. The Sheriff’s Office Field Operation Bureau and Custody Services Bureau shall use the following procedure to determine transfers and assign personnel to work locations and shift preference.

II. DEFINITIONS
   A. SHIFT: A regularly assigned tour of duty with an established starting and ending time for each work day.
   B. TRANSFER: The process of an employee moving from one Bureau or Division to another.

III. PROCEDURE
   A. TRANSFERS FROM/TO BUREAU OR DIVISION
      1. Prior to the bidding process taking place, the appropriate designee from each Division will ask for notification from any Sergeant or Deputy requesting to be transferred from/to a different Division than the one they are currently assigned to.
      2. Requests from Deputies will be evaluated in accordance with County Employee MOU.
      3. Requests from Sergeants will also be evaluated in accordance with the County Employee MOU and CCCSO Policy 1.06.04 “Sergeant Development / Mentoring Philosophy.”
      4. If a request is granted, the Sergeant or Deputy who made the request will be notified prior to the bidding process.
      5. The Sergeant or Deputy will be placed in the appropriate bidding location in the Division they will be assigned to at the start of the new shift based on their seniority prior to the bidding process.
6. Sergeants and Deputies not assigned to the Patrol, Special Operations, and Detention Divisions should submit their request to transfer to their chain of command at least 70 days prior to the start of the new shift.

7. The Sheriff will have final approval in granting the transfer requests.

B. SHIFT BIDDING PROCESS AND TRANSFERS

1. Sergeants and Deputies are eligible to transfer from their assigned shift, days off, and respective station house or detention facility at shift change. Personnel must indicate the station house or detention facility and shift preference during the shift bidding process occurring at the semi-annual sign-up.

2. Situations may arise where a vacancy is required to be filled and no transfer requests have been submitted. In instances where vacancies cannot be filled, these positions will be filled, as needed based upon the needs of the Office of the Sheriff.

C. ELIGIBILITY TO BID

1. Personnel assigned to the Patrol Division, Special Operations Division, and Custody Services Bureau prior to the completion of the sign-up will be allowed to bid as outlined in their union M.O.U. Shift bidding for Sergeants and Deputies will be based on seniority, with any combination of station house and available shift if in the Patrol Division and any combination of facility and available shift if assigned to the Custody Services Bureau.

2. Personnel assigned to the Patrol Division, Special Operations Division, or Custody Services Bureau after the completion of the sign-up will be assigned as needed by the Division Commander.

3. A Sergeant or Deputy who is on a leave of absence more than thirty (30) days, or scheduled to be on a leave of absence of more than thirty (30) days at the time of a sign-up, shall not be allowed to bid on a shift. Upon return, the Sergeant or Deputy shall be placed in an available shift, at the Office of the Sheriff’s discretion.

D. BID PROCESS

1. Sergeants and Deputies will be allowed to bid for shifts, days off, and station house or detention facility semi-annually.

2. The appropriate designee from each Division will make available, a list of all available shifts and days off for bid. Personnel eligible for bidding will be requested to submit multiple shift preferences; failing to do so prior to the published deadline or failing to provide enough station house/facility and shift preferences will result in the employee losing their seniority ranking for the current shift bidding process.

3. Sergeants and Deputies in the Special Operations Division will have their shift bidding process handled by the appropriate designee for the area in which they work.
E. FEMALE DESIGNATED POSITIONS IN THE CUSTODY SERVICES BUREAU

1. Within the Custody Services Bureau, a specified number of female position must be staffed for proper facility operations and to comply with state and/or federal Minimum Jail Standards. All female positions to be filled will be posted during each bid process.
   a. During each bid group, the number of female designated positions to be filled will be posted, along with a list of female employees available to fill those positions based on seniority.
   b. At the conclusion of the bid, designated female vacancies will be filled by the least senior female employee of the required job classification who did not bid for a female designated vacancy.

F. TIMELINE

1. In an effort to ensure that both the requests for transfers and the shift bidding process is done in a manner to allow a sufficient amount of time for a Sergeant or Deputy to make transfer or bid requests, the following timeline will be used during the transfer and bid process:
   a. Seventy-five (75) days prior to the start of the new shift, Sergeants and Deputies desiring to transfer to/from a Division will be asked to submit a memo requesting the transfer to the appropriate Division designee. Five (5) days will be given to respond to request for transfers.
   b. Sixty (60) days prior to the start of the new shift, the Sergeants and Deputies whose request for a transfer has been approved will be notified of the approval.
   c. Forty-five (45) days prior to the start of the new shift, the Sergeant bidding process will begin. Sergeants will have five (5) days to submit their request for which station house/facility, and shift they wish to sign-up for. Sergeants eligible for bidding will be requested to submit multiple shift preferences; failing to do so prior to the published deadline or failing to provide enough station house/facility and shift preferences will result in the Sergeant losing their seniority ranking for the current shift bidding process.
   d. Thirty-nine (39) days prior to the start of the new shift, the finalized list showing the station house/facility and shift each Sergeant has been assigned to will be made available.
   e. Thirty-eight (38) days prior to the start of the new shift, the Deputy bidding process will begin. Deputies will have five (5) days to submit their request for which station house/facility, and shift they wish to sign-up for. Deputies eligible for bidding will be requested to submit multiple shift preferences; failing to do so prior to the published deadline or failing to provide enough station house/facility and shift preferences will result in the
Deputy losing their seniority ranking for the current shift bidding process.

f. The finalized list showing the station house/facility and shift to which each Deputy has been assigned will be made available no later than thirty (30) days prior to start of the new shift.

### General Policy and Procedure

<table>
<thead>
<tr>
<th>CHAPTER:</th>
<th>Employee Benefits and Assistance</th>
</tr>
</thead>
<tbody>
<tr>
<td>SUBJECT:</td>
<td>County Service Employee Award Program</td>
</tr>
</tbody>
</table>

### ISSUE DATE: 2-1-2006  
### REVISION DATE: 12-19-2013  
### CLEARANCE: Office of the Sheriff

### RELATED ORDERS:
- County Ordinance 36-10.202, 36-10.204, 36-10.206;  
- Administrative Bulletin 310.2.

### I. POLICY.

#### A. Office of the Sheriff employees shall receive official recognition for specified lengths of service in the employment of the County.

### II. GENERAL.

#### A. ELIGIBLE EMPLOYEES. The Human Resources Department will notify the Office of the Sheriff when an employee has qualified to receive a County Service Award.

#### B. FREQUENCY OF AWARDS. The first service award shall be awarded after ten years of service. A new and distinguishable award shall be awarded after each additional five years of service.

1. **Ten Year Service Award.** The Office of the Sheriff will be responsible for the ordering and purchase of lapel pins for employees with 10 years of service. The Division Commander or designee will make the presentation of the lapel pin for 10 years of service.

2. **Fifteen or More Years of Service Awards.** Employees eligible for 15 or more years of service awards will receive a personalized packet containing a service award brochure and an order form direct from a private vendor under contract to Contra Costa County. It is the responsibility of the employee to complete the order form and return it as directed.

   a. The Sheriff's Office will receive, on a quarterly basis, the selected awards and a status report showing the date packets were sent, the order form returned, what the employee ordered and the shipping date.

   b. Employees receiving 15 year service award as defined above and each 5 year increment thereafter, are entitled to a day off with pay within 30 days of their anniversary date. The date of the day off with pay is subject to approval by Division Commander.

#### C. PRESENTATION OF AWARDS. The Sheriff or designee will present the service awards at the quarterly award ceremony for those employees with 15 years or more service.
1. Employees with 20 or more years of service may voluntarily elect to go before the Board of Supervisors to accept their award. The award ceremony will be held the last Tuesday of every month. The Sheriff’s Service Award Coordinator will notify the Human Resources Department Labor Relations, at least two weeks prior to the selected Board date the employee has requested. The Service Award Coordinator will notify the Sheriff as to the date and time of the ceremony of the employee(s) scheduled to have their award presented before the Board of Supervisors.

2. Those eligible employees not desiring to appear before the Board of Supervisors may elect to voluntarily have their award presented by the Sheriff or designee at the quarterly award ceremony; or may receive their award without a ceremony.

D. CALCULATING SERVICE. Length of service shall date from the beginning of the last period of continuous County employment including temporary, provisional, permanent status and during approved leaves of absence. Employees who have separated from a permanent position in good standing and within two years are re-employed in a permanent County position shall be credited with all service accumulated at time of separation not including the period of separation.

E. SERVICE AWARD COORDINATOR. The position of Sheriff's Service Award Coordinator shall consist of civilian volunteers selected by Administrative Services. The responsibilities of the Service Award Coordinator include:

1. Upon notice of an employee's eligibility for a service award from the Human Resources Department, the Service Award Coordinator will verify the date of hire and length of service.

2. Upon receipt of the awards from the vendor, determine in what manner the employee wishes the award to be presented.

3. Notify the respective Division Commander of employees eligible for ten-year service lapel pins and provide them.

4. Contact the Training Deputy to arrange date and time of the quarterly award ceremony for awards of 15 years or more and request the Training Deputy arrange for photographs to be taken.

5. Notify the Service Award Administrator for the Human Resources Department of those employees eligible who have requested award presentation before the Board of Supervisors at least two weeks prior to the selected board date. The award ceremony will be held the last Tuesday of every month.

6. Solicit and secure biographical information about each employee receiving an award before the Board of Supervisors or at the quarterly ceremony and provide it to the Training Deputy.

7. Notify the Sheriff as to the date and time of the ceremony and the names and biographies of employees who have been chosen to receive the Service Award before the Board of Supervisors or at the quarterly awards ceremony.
8. Prepare all awards for presentation by the Sheriff, beginning with employees who have the longest time in service and supply a photograph to the employee.

F. FORM OF AWARDS.

1. The service award for ten years of service shall be a lapel pin.

2. Service awards for fifteen years and over shall be selected from the service award brochure which will be sent by the vendor in the personalized packet containing an order form directly to the eligible employee at the last known address as provided by the employee.
I. POLICY.
   A. The Office of the Sheriff will strive to officially recognize and honor Deputy Sheriffs and Deputy Sheriff Reserves who distinguish themselves by conspicuous bravery or heroism above and beyond the normal demands of police service. To be awarded the Medal of Valor, a Deputy would have performed a heroic act displaying extreme courage while facing imminent danger.

II. GENERAL.
   A. Simply performing an expected task in an exceptional manner is not justification for receiving a Medal of Valor. The Medal of Valor award may also be bestowed upon a peace officer of another law enforcement agency who, while assisting a member of the Office of the Sheriff, performs in the following meritorious manner:

   1. MEDAL OF VALOR AWARDS.
      a. Gold Medal of Valor. The Office of the Sheriff’s highest award for valor. It is awarded in recognition of acts involving extreme personal risk that are clearly above and beyond the call of duty, and is merited when the following elements exist:

         • Outstanding bravery above and beyond that expected in the line of duty.
         • Where failure to take such action would not justify censure.
         • Where risk of life actually existed and the nominee had sufficient time to evaluate that risk.
         • Where the objective is of sufficient importance to justify the risk.
         • Where the nominee accomplished the objective or was prevented from accomplishing the objective by incurring a disabling injury or death.
b. Silver Medal of Valor. The Office of the Sheriff’s second highest award for valor. It is awarded in recognition of acts involving great personal risk, and is merited when the following elements exist:

- Where the nominee manifests outstanding bravery in the performance of duty under circumstances not within the provisions required for a Gold Medal of Valor.
- Where the nominee risks his or her life with full and unquestionable knowledge of the danger involved, or where a reasonable person would assume his or her life was in great danger.
- Where the objective is of sufficient importance to justify the risk.
- Where the nominee accomplished the objective, or was prevented from accomplishing the objective by circumstances beyond his or her control.
- Where the necessity for the act of bravery was not created by the nominee’s use of poor judgment or procedure.

c. Bronze Medal of Valor. The Office of the Sheriff’s third highest award for valor. It is rewarded in recognition of acts involving laudatory (as opposed to foolhardy) unusual personal risk. Acts of heroism warranting this award must meet all the standards of the Silver Medal, but to a lesser degree. The element of an admirable act displaying intentional bravery, coupled with knowledge of personal risk in the face of potential imminent danger must be prominent.

2. SHERIFF’S COMMENDATION.

a. This Commendation is granted in accordance with Office of the Sheriff’s Policy Section 1.04.31 The Sheriff or Undersheriff awards this “Official Commendation” to employees for service which has been rendered in a manner which is a credit to the employee’s personal integrity and dedication and has reflected professional pride in every employee of the Office of the Sheriff. The Awards Committee may also grant this Commendation for noteworthy acts which, in their judgment, do not fall within the criteria of the Medal of Valor. After approval by the Sheriff/Undersheriff, the Commendation will become a part of the employee’s permanent personnel record.
3. BUREAU ASSISTANT SHERIFF’S COMPLIMENTARY REPORT.
   a. This Commendation or letter of appreciation is granted in accordance with Office of the Sheriff Policy Section 1.04.31. The Bureau Assistant Sheriff or Division Commander awards this letter of appreciation to an employee who performs his/her duty in a manner showing dedication and service above that normally demanded by the Office of the Sheriff, but not meeting the qualifications necessary for a Medal of Valor or Sheriff’s Commendation. The Awards Committee may also grant this Commendation for noteworthy acts which, in their judgment, do not fall within the criteria of the Medal of Valor or Sheriff’s Commendation but which are deserving of a complimentary report of the incident to the Sheriff. After approval by the Sheriff/Undersheriff, the report will become a part of the employee’s permanent personnel record.

4. NOMINATING GUIDELINES.
   a. Time Limits. Except when specifically exempted by the Sheriff, nominations for a Medal of Valor must be submitted no later than 60 days after the occurrence of the action for which the application has been made.
   b. Nominator. Nominations can be made by sworn supervisors or Deputy Sheriffs may nominate themselves.

5. SUCCESSIVE AWARDS.
   a. Successive awards for Medals of Valor will be accompanied by bronze stars placed on the ribbon. A silver star will signify five awards of the same type, and a gold star 10 or more.

6. AWARDS COMMITTEE.
   a. Composition. The Awards Committee will be appointed by the Sheriff and may consist of the following:
      • Undersheriff (Acting as the Chairperson);
      • One Bureau Assistant Sheriff;
      • One Division Commander;
      • Professional Standards Lieutenant;
      • The senior Lieutenant in the Office of the Sheriff; and
      • The Sergeant Major.
   b. Rules. The Awards Committee will be governed by the following rules:
      • Four members will constitute a quorum.
      • Applications will be heard and voted upon separately. However, if two or more members are nominated for awards resulting from joint actions, their applications may be heard and voted upon at the same time.
• Two-thirds of the members must agree upon a specific grade of award.
• All applications endorsed by the Awards Committee will be forwarded to the Sheriff for approval.

7. PROCEDURES.
      • Nomination/Memorandum. The nomination must be submitted on a memorandum forwarded to the member’s Division Commander or Contract Police Manager. The memorandum must describe in detail the actions of the nominee, showing how those actions fall within the criteria established by this Policy.
      • Review. The member’s Division Commander or Contract Police Manager will review the nomination and conduct an investigation to determine if the award is warranted. If not, it shall be returned to the nominating member with the reasons for rejection.
      • Division Commander’s Memorandum. If the Division Commander or Contract Police Manager endorses the nomination, they shall prepare a memorandum to the Sheriff requesting the type of award.
      • Forwarding. The Division Commander or Contract Police Manager making the recommendation must send the completed nomination package (nomination, memoranda and any supporting documents) to the Awards Committee Chairperson via the chain of command.
   
   b. Awards Committee Meeting.
      • Package. After receipt of the recommended applications, the Undersheriff will send a copy of each nomination package to the members of the Award Committee at least 14 days before the meeting.
      • Summary. At the Awards Meeting, the Division Commander or Contract Police Manager will present to the Awards Committee a summary of the application.
      • The Awards Committee may call witnesses who can provide relevant information.
   
   c. Presentation.
      • Presentation of awards will be made in whatever manner is deemed appropriate by the Sheriff or designee.
      • When circumstances dictate that a Medal of Valor has been granted and the medal award presentation cannot be made, the Sheriff/Undersheriff may grant the
receiving member the authority to wear the appropriate ribbon. In such case, the medal will be presented at a later appropriate time.

- The Training Unit will be responsible for preparation of certificates and citations, will arrange for engraving of medals and will maintain a file of all awards presented.

- Each medal will be accompanied by an appropriate certificate, as well as a citation recounting the circumstances or incident upon which the recognition is awarded. Each medal will be accompanied by a matching ribbon for uniform wear.

d. Display.

- The Medal of Valor shall be displayed in the following manner:

  - Medal for personal mounting: Gold, Silver or Bronze Star bordered by a wreath and topped with an eagle over a ribbon displaying four stars. The word “VALOR” will be raised at the top center of the star. Below that will be the title “Sheriff” and under that will be “Contra Costa County.” All engraved lettering will be in black enamel. The four stars on the Gold Medal of Valor will be represented by four diamonds. The four stars on the Silver and Bronze Medal of Valor will be in black enamel.

  - A Valor Ribbon, as issued by the Office of the Sheriff, will be worn on the uniform immediately above the left breast pocket on the outermost uniform garment, centered under the Sheriff’s Badge. When appropriate, the Silver or Bronze Valor Award Ribbon will be worn second to the Gold. The Bronze Valor Award Ribbon will be worn second to the Silver. When all three Valor Award Ribbons have been earned, the Gold Valor Award Ribbon will be centered with the Silver Ribbon on its right and the Bronze Ribbon on its left. It shall be mandatory to wear the ribbon on the Dress Uniform and optional on the Duty Uniform.

  - A suitable device or lapel pin as issued by the Office of the Sheriff is optional on non-uniform attire.
I. **POLICY.**

A. Each year selected employees of the Sheriff’s Office shall be officially recognized for outstanding job performance. This program rewards meritorious service and defines goals for Sheriff’s Office employees.

II. **DEFINITIONS.**

A. **ELIGIBLE EMPLOYEES.** Deputy-level peace officers and general, non-management employees.

B. **OFFICER OF THE YEAR.** For the purpose of this section “Officer of the Year” shall mean a Deputy-level peace officer.

C. **PROFESSIONAL EMPLOYEE OF THE YEAR.** For the purpose of this section, “Professional Employee of the Year” shall mean a professional employee in the following job categories: All clerical classifications, to include supervisors, administrative assistants, administrative aides, and secretary classifications.

D. **TECHNICAL EMPLOYEE OF THE YEAR.** For the purpose of this section, “Technical Employee of the Year” shall mean an employee in the following job categories: All non-sworn Sheriff employees not listed in Section C.

III. **GENERAL.**

A. **DIVISION SELECTION PROCESS.** Each Division Commander will select a "Professional Employee of the Year," a “Technical Employee of the Year,” and a "Peace Officer of the Year" for their Division. Small Divisions with few Deputies, or professional and technical employees may elect not to choose an Employee or Officer of the Year. The Division Commanders shall advise the Sheriff’s Office Selection Committee Chair, the Undersheriff, of their division nominees by the third Monday in January. The Division Commanders may employ any fair and impartial selection process which meets the following criteria:

1. The process must consider the nine behavioral traits accepted for performance evaluation.

   a. Performance
2. Nominations should be solicited from first-line supervisors and employees of the eligible rank. Division Commanders must select individuals who have provided direct or indirect benefit to the Office of the Sheriff and the community. The employee’s efforts should be meritorious and recognizable and the selection should not be made solely on popularity among peers or supervisors.

B. SELECTION OF THE OFFICE OF THE SHERIFF’S PROFESSIONAL, TECHNICAL EMPLOYEE AND PEACE OFFICER OF THE YEAR. The Sheriff shall appoint an Office of the Sheriff’s Selection Committee to evaluate Division selections.

1. The Selection Committee will normally consist of the following:
   a. Undersheriff
   b. One Lieutenant
   c. One Sergeant
   d. One Professional or Technical Manager
   e. One Professional employee
   f. One Technical employee
   g. The previous year’s “Professional Employee of the Year”
   h. The previous year’s “Technical Employee of the Year”
   i. The previous year’s “Peace Officer of the Year”
   j. The President of the Deputy Sheriff’s Association

As written, there are five sworn members and five non-sworn members. The Undersheriff would be the tie breaker, if needed.
2. The Selection Committee will only consider those nominees whose performance has been properly documented as superior and deserving of specific recognition. Both written and oral presentations will be considered for the purpose of determining the Office of the Sheriff "Professional Employee of the Year," "Technical Employee of the Year," and "Peace Officer of the Year." Responsibility for articulation of specific examples of meritorious service rests within the employee's Division Commander. The Committee will solicit oral presentations from the Bureau Assistant Sheriff or designee.

3. The same basic criteria used for the Division selection will be used for selection of the “Professional Employee of the Year,” “Technical Employee of the Year,” and “Peace Officer of the Year.” Time constraints usually do not allow additional input from nominees' peers and in the absence of other expedient means, length of service may be considered to break a deadlock.

4. The Committee will make a recommendation to the Sheriff by February and will arrange for the award presentations. The Sheriff will make a final selection from the nominees, and subsequently make the award presentations to the selected employees.
I. POLICY.
A. A commendation or letter of appreciation is a recognition of the worth for a particular effort. This recognition shall be made part of the employee's department personnel file.

II. DEFINITIONS.
A. OFFICIAL COMMENDATION. A letter of commendation from the Sheriff/Undersheriff which displays the seal of the Office of the Sheriff.

III. GENERAL.
A. A commendation or letter of appreciation is an expression of praise which applauds the manner and extent of services rendered. Such letters may be generated by and/or received by any employee of the Contra Costa County Office of the Sheriff.

1. The Office of the Sheriff does not draw a distinction between a letter of appreciation and a commendation.

2. Copies of all letters of appreciation and commendations received from the Office of the Sheriff, the public and other agencies shall be placed in the employee's personnel file. This makes the letters available to:
   a. The Sheriff/Undersheriff
   b. Transfer and selection committees
   c. Other agencies (if a waiver is signed)

3. The original letter shall be given to the employee to whom it is directed. Such letters will be accompanied by a brief recognition in writing from the employee's Division Commander. This may be a short handwritten note. A copy of the letter may be posted as well.

4. The Sheriff/Undersheriff has the option of awarding an "Official Commendation" in cases where service has been rendered in a manner which is a credit to the employee's personal integrity and dedication and has reflected professional pride in every employee of the Office of the Sheriff.
a. An Official Commendation will be on the Office of the Sheriff letterhead, signed by the Sheriff/Undersheriff and will display the seal of the Office of the Sheriff.

b. The Official Commendation will be reported fully in the Office of the Sheriff newsletter.

5. Letters of appreciation and commendation or praise will be reported in the Office of the Sheriff newsletter by listing the names of recipients. If the number received is small, each may be accompanied by a brief description of the surrounding circumstances.

B. Intra-office commendations or letters of appreciation shall:

1. Be written on an inter-office memo directed to the employee via the Sheriff/Undersheriff;

2. Outline the circumstances surrounding the employee's actions and specifically describe the exemplary employee performance being praised.

C. Employees wishing to initiate a letter of appreciation or commendation for a person outside the Office of the Sheriff will follow the procedures in accordance with Office of the Sheriff Policy Section 1.05.92, Official Correspondence/Communication.

<td>Contra Costa County Personnel Regulations, Part 10.</td>
</tr>
</tbody>
</table>

**ISSUE DATE:** 2-1-2006  
**REVISION DATE:**  
**CLEARANCE:** Office of the Sheriff  
**CHAPTER:** Employee Benefits and Assistance  
**SUBJECT:** Promotional Ceremony

## I. POLICY.

A. Office of the Sheriff employees receiving a promotion shall be recognized during a promotional ceremony to officially honor the promoted employee's achievement.

## II. DEFINITIONS.

A. PROMOTION. The act of being raised in position or rank as defined by the County Personnel Regulations.

## III. GENERAL.

A. PROMOTIONAL ACHIEVEMENT. The Sheriff recognizes the importance of an employee promotion which may be a once in a lifetime occurrence of great personal significance to the employee. The promotional ceremony allows the Sheriff the opportunity to personally congratulate the promoted employee on their achievement and officially notify the rest of the Office of the Sheriff and the public of the event.

1. Promotion. Promotions are important, not only to those receiving the honor, but to all who share in the activities of their division. Circumstances do not always allow lengthy notification of a promotional process. Therefore, the Sheriff will normally make the promotion as soon as the decision to promote is made. The employee will receive as much advance notice as circumstances allow and may have family and friends attend. Available administrative personnel will also be present to witness the event.

2. Promotional Ceremony. At the time of a promotion, a future date and place will be set for the promotional ceremony. Normally, such dates will be set quarterly and will be announced well in advance. The location will be in the Board of Supervisors' Chambers. Family, friends and off-duty employees are encouraged to attend. Available on duty Command Staff and other employees with approval of their Supervisor may attend. Photographs will be taken and a copy provided to the promoted employees.
I. POLICY.
   A. The purchase at Office of the Sheriff expense of plaques, trophies or awards
      associated with Office of the Sheriff activities other than for recognition of
      Deputy, Dispatcher or General Employee of the month must be authorized by the
      Sheriff or Undersheriff.

II. GENERAL.
   A. A request must be forwarded via the chain of command to the Sheriff or
      Undersheriff to receive authorization for the purchase at Office of the Sheriff
      expense of plaques, trophies or awards associated with department activities
      other than for recognition of Deputy, Dispatcher or General Employee of the
      month. The following information should be included in the request:

      1. The employee's name;
      2. A brief statement regarding purpose of recognition, as well as date of
         anticipated presentation; and
      3. A description and cost of plaque.
I. POLICY.
   A. The Office of the Sheriff shall designate and recognize the Sergeant who has the most seniority at the rank of Sergeant. This individual shall wear the rank, and hold the honorary title of “Sheriff’s Sergeant Major.”

II. GENERAL.
   A. It has long been recognized that a Sheriff’s Sergeant is an integral part of this Organization and is key to the overall success of the daily operations in law enforcement. The Sergeant’s professionalism, dedication to duty, and ability to elicit the support and respect of superiors, peers and subordinates is paramount in the completion of any assignment or task. These abilities are essential in shaping the future of the Office of the Sheriff. The recognition of the individual who has been able to diligently conduct these duties for a career, serves as a reminder to us all of the effectiveness and importance of the Sheriff’s Sergeant.

III. PROCEDURE 1.
   A. OFFICE OF THE SHERIFF RESPONSIBILITIES.
      1. The Sheriff’s administrative clerical staff shall determine which active Sergeant has the most Office of the Sheriff’s seniority at the rank of Sergeant and provide this information to the Sheriff and Undersheriff on an annual basis.
      2. The Sheriff or designee shall schedule a date with the Training Unit for an official ceremony recognizing this individual as the Sheriff’s Sergeant Major. The designated Sergeant will be advised of this date via memo.
      3. The designated Sergeant will be authorized to use this honorary title and wear the rank of Sheriff’s Sergeant Major, until such time as the Sheriff designates another person as Sergeant Major, the Sergeant retires or is promoted to the next rank.
      4. The Sergeant Major designation is an honor that does not include any additional pay or benefits.
IV. PROCEDURE 2.

A. SERGEANT MAJOR’S UNIFORM.

1. The Office of the Sheriff Sergeant Major insignia is characterized as three gold chevrons over three gold rockers, and with a gold star in the center on a black background. Gold Sergeant Major insignia may be worn on the collar in lieu of the cloth. The Sergeant Major insignia shall be the rank commonly recognized as the U.S. Army insignia of “Sergeant Major.” This insignia shall be worn in the same location as the standard Sergeant insignia described in Office of the Sheriff Policy Section 1.07.22, Rank and Service Insignia.

2. The Office of the Sheriff Sergeant Major insignia is characterized as three gold chevrons over three gold rockers, and with a gold star in the center on a black background. Gold Sergeant Major insignia may be worn on collar in lieu of the cloth insignia worn on the short sleeve uniform shirt.
I. POLICY.
   A. The Office of the Sheriff recognizes the extraordinary value of a Deputy Sheriff who is an exceptional employee. These individuals may choose not to promote but serve most or even their entire career at the Deputy level. Their displayed skills and experience often make them deserving of special recognition. Whenever possible the Office of the Sheriff seeks to identify this kind of invaluable employee.

II. GENERAL.
   A. DISTINGUISHING CHARACTERISTICS. Under direction, a Corporal working in any of the four Bureaus, or within the Executive Office, will perform assignments primarily oriented to specialized law enforcement activities which may include, but are not limited to, the following:
      1. Performing as a Field Training Officer;
      2. Providing a “unique” skill or ability with a high degree of complexity and independence;
      3. Providing specialized training for other employees;
      4. Displaying extraordinary professional passion and commitment;
      5. Being frequently viewed by either peers or supervisors as performing above the norm.
   B. SELECTION AND TENURE. Candidates for the rank of Corporal must possess strong leadership traits; a high degree of maturity, integrity and good judgment; and the ability to keenly observe and provide detailed, accurate descriptions. Candidates must demonstrate effective oral and written communication skills and work effectively under pressure or stress.
      1. Incumbents performing specialized law enforcement assignments in the position of Corporal do so exclusively at the discretion of the Sheriff.
      2. Permanent status in this position is not obtainable.
3. Designated Corporal positions will normally not exceed 5% of authorized Deputy Sheriff strength, both department wide and at the division/work unit level, such as contract cities and the like.

4. All Corporal positions will be selected annually to determine those employees that should obtain the Corporal rank.
   a. A Corporal differs from a Sheriff’s Sergeant, the next higher level, in that a Sergeant will have full, first-line supervisory responsibility and is a permanent status, not requiring annual re-selection.

5. The Corporal designation is not a supervisory position, and Corporals will not be routinely assigned as acting Supervisors. However, a Corporal may on occasion be assigned as an Acting Sergeant in the same manner that another Deputy may be so designated. Corporals may be assigned lead responsibilities to include, but not limited to, providing technical and professional direction to less experienced Deputies. The Corporal may frequently be called upon to adapt quickly and efficiently in emergency situations to control a situation until the arrival of a Supervisor.

C. EXAMPLES OF DUTIES. The information listed below is meant to serve as a guideline for potential job duties or responsibilities which may be completed by a Corporal. This list is neither inclusive nor exclusive, but indicative of several types of duties performed. Consequently, the following duties do not reflect essential job functions for any given assignment as a Corporal.

1. Performs work in specialized law enforcement activities such as:
   a. Crime Analysis
   b. Special Investigations
   c. Administration
   d. Training
   e. School Resource
   f. Community Relations
   g. Intelligence
   h. Planning and Research
   i. Warrant / Fugitive
   j. Civil
   k. Detention
   l. Patrol

2. May be assigned as a Field or Facility Training Officer to train new employees in various assignments.

3. May share specific skills or provide unique and special training.
4. May be utilized in the role of “Mentor” for employees who have
completed initial training and are now ready to develop career lasting,
positive work habits and ethics.

5. Organize a crime scene to ensure the identification, preservation, and
collection of evidence. He/she may conduct interviews, ascertain facts or
interrogate suspects involved in criminal activity.

6. Develop expertise and stay informed regarding the operations or
whereabouts of known violent criminals or their associates, hang-outs,
modus operandi, and other pertinent information.

7. Coordinate the exchange of crime related or general information.
Develop and maintain unique relationships with the general public.

8. May possess unique or unusual experience which would qualify him/her
as an “expert witness” for criminal prosecution(s).

9. May organize various groups of people involved in community policing,
civil demonstrations, labor disputes or recreational community
gatherings.

10. May be responsible for writing search warrants and preparing briefings
for the service of search warrants or press release(s) regarding unusual
events.

D. MINIMUM QUALIFICATIONS.

1. Experience: Should have at least four (4) years of full-time, paid
professional law enforcement experience, which should include
experience in both the Custody and Field Operations Bureaus.

2. Certification: Should have possession of a valid Intermediate Certificate
issued by the State of California, Department of Justice, the Commission
of Peace Officer Standards and Training.

3. Education: Should have continuing job-related qualification training
through P.O.S.T. or PORAC - approved advanced officer seminars or
accredited college, working toward a professional expertise. Job related
training must be attained during the course of employment with the
Sheriff’s Office.

4. Character: Should have a commendable history of above-average
employee performance, with a satisfactory record of reliability in the
fields of attendance and Office contributions.

5. Physical Fitness: Should maintain a professional uniformed appearance
and an excellent level of physical fitness.

6. Sick Leave: Should have a minimum of 60% of sick leave accruals.

E. AUTHORIZED INSIGNIA. Following authorization for assignment as a
Corporal, Training Division will issue the employee the following insignia:

1. Black and gold two-stripe chevrons to be worn on the sleeve of each arm
of the uniform shirt, centered under the Sheriff’s Office patch.

   a. Alternate insignia, (gold two-stripe metal collar devices) may be
      authorized at the discretion of the Division Commander,
however, the employee may not wear both the sleeve and collar insignias on the same uniform shirt.

2. Immediately upon official notification that the employee is no longer required as a Corporal, the employee must remove the insignia and will no longer be entitled to wear such insignia unless re-selected via official notification.

F. INTER-DIVISION TRANSFERS. Transfers from one Division to another, whether voluntary or otherwise, may cancel the employee’s status of Corporal and the authorization to wear the insignia if specialized skills are no longer needed in the new assignment, as determined by the Division Commander of the Division into which the employee is transferred. Employees who have not retained the Corporal rank due to a transfer may appeal the decision to the Bureau Assistant Sheriff within which the newly assigned Division exists.

G. PROFICIENCY PAY. Incentive pay will be authorized for employees who are designated a Corporal.

1. The position and accompanying proficiency pay must be recommended by the employee’s Bureau Assistant Sheriff and approved by the Sheriff or his/her designee.

2. All proficiency pay for Corporal duties will cease upon notification in writing from the employee’s Bureau Assistant Sheriff that service as a Corporal is no longer required or that he/she was not re-selected to the position.

3. The amount of proficiency pay will be determined by the current DSA MOU agreement. (An employee cannot receive incentive pay for both Training Officer and Corporal at the same time.)

H. SENIORITY ISSUES. The rank of Corporal is a non-promotional position and is authorized at the discretion of the Sheriff. A Corporal will retain the same seniority as his/her seniority as a Deputy Sheriff.

1. This rank will in no way alter or change the manner in which the Corporal uses his/her existing seniority rights or benefits.

2. Corporal shift sign-ups and vacation sign-ups shall remain inclusive in the Deputy Sheriff’s shift and vacation sign-ups. Separate sign-up for either shifts or vacations will not be authorized under any circumstances.

I. TRAINING. Upon assignment to the rank of Corporal, the employee may be scheduled to attend the following schools:

1. P.O.S.T. certified Field or Facility Training Officer School; and/or

2. P.O.S.T. certified Supervisor School.

J. SELECTION PROCESS.

1. The Sheriff’s Executive Team shall meet once annually to review the number of authorized Corporal positions department-wide, and select candidates for recommendation to the rank of Corporal.

   a. The Sheriff or his/her designee must approve the final selection.
b. The Deputy Sheriff’s Association may have a non-voting representative present during the E-Team selection process.

2. Bureau Assistant Sheriffs shall nominate the candidates from their Divisions to be considered by the E-Team.
   a. Assistant Sheriffs shall consider qualified candidates based upon the minimum requirements prescribed and after a thorough review of the candidates’ evaluations, report writing skills, Supervisor recommendations, special recognitions (Employee of the Year, letters of commendation, etc).

3. Deputies may also nominate themselves or peers. Nominations are to be forwarded via chain of command to the Bureau Assistant Sheriff for consideration.

4. Nominations shall be submitted in writing, on Sheriff’s memoranda, and will include specific information pertaining to the candidate’s minimum qualifications.

5. A physical fitness assessment may be required as part of the selection process.

III. PROCEDURE 1.

A. SHERIFF’S OFFICE RESPONSIBILITY.

1. The Sheriff or his/her designee will authorize the appointment to the rank of Corporal via a memorandum. A copy of the selection memo will be routed to the Payroll Unit.

2. The Division may develop a written examination covering the specific unique skills required for the “Technical Specialist” position. The candidate for Corporal must attain a passing score of at least 70%.

3. Each November, Bureau Assistant Sheriffs will review the number and status of each Corporal in his/her command. Bureau Assistant Sheriffs must nominate those Corporals to be recommended for re-selection for the subsequent year.
   a. Incumbents serve at the discretion of the Sheriff and will not be automatically re-selected as a Corporal.

4. Verification of minimum requirements shall be the sole responsibility of the Bureau Assistant Sheriff.

5. Upon conclusion of his/her review to verify the minimum requirements, the Bureau Assistant Sheriff will provide the Undersheriff a memorandum identifying the employee(s) he/she recommends for the rank of Corporal.

6. The Undersheriff will be responsible for scheduling the meeting of the E-Team for the selection process and will ensure all background information is available.

7. The Sheriff or his/her designee retains final approval of all appointments to the rank of Corporal.
8. Employees will be notified in writing when their services as a Corporal are no longer needed.
   a. The letter should be on standard Office of the Sheriff letterhead and signed in accordance with Office of the Sheriff Policies and Procedures.
   b. The content of the letter shall inform the employee that his/her services as a Corporal are no longer required or that the employee has not been re-selected as a Corporal.
      • This will normally be automatic upon transfer or reassignment unless the Corporal status is continued by Office of the Sheriff letter authorizing the rank in the new assignment.
      • Delivery of the letter(s) to the employee will normally be the responsibility of the Division or Unit Commander.
I. POLICY.
   A. Medical screening is available to employees, upon request, following exposure to
      blood or other bodily fluids in order to provide early detection of infectious
diseases.

II. GENERAL.
   A. BIOLOGICAL AGENT SCREENING.
      1. Employees are trained in a number of techniques to reduce the chance of
         exposure to infectious disease through contact with physiological
         specimens. However, accidents such as needle sticks, cuts by bloody
         glass or blood contact on an open wound do occur in the course of duty.
         Of primary concern for Office of the Sheriff employees are Hepatitis and
         the AIDS virus. In addition, there are other potential infectious agents
         which may be of concern.

      2. Any employee who experiences a work related body fluid to body fluid
         exposure (through needle sticks, cuts by infected material, spilling blood
         on a wound, etc.) shall report the exposure to their Supervisor to ensure
         proper documentation and follow-up.

      3. The Supervisor will complete the Supervisor's Report of Occupational
         Injury or Illness (Form AK30) and forward it through the appropriate
         channels.

      4. A copy of the report will be reviewed by a County Health Services
         physician. Employees should be referred immediately for health
         evaluation and not wait for paperwork to reach a County Health Services
         physician. The physician, after review of the incident, may request the
         employee to submit to baseline tests and/or screen test for Hepatitis,
         AIDS or another infectious disease.

      5. Testing is strictly voluntary and is offered for the protection and peace of
         mind of the employee.
B. NOTIFICATION OF EXPOSURE.

1. In addition to the above, there are other potential types of exposures to infectious disease. They include:
   a. Blood from a subject on skin, eyes or mouth.
   b. Contact of skin with another's feces or urine.
   c. Unprotected mouth to mouth breathing (CPR).
   d. Contact with a subject's seminal, vaginal or other body fluids.
   e. Bites.
   f. Punctures.

2. The Supervisors of employees who are exposed to one of the above situations are required to report the possible exposure. A Notification of Possible Disease Exposure Form (Contra Costa Health Services - Public Health Form No. EMS-6) is available for this purpose in all County Emergency Departments.

3. The receiving hospital will forward the completed form to the County Health Officer. The Health Officer will then notify the employee if the person with whom the contact was made was found to have a reportable communicable disease.

4. The employee may contact the Health Department for recommendations regarding prevention or treatment.
I. POLICY.
   A. The Contra Costa County Office of the Sheriff is concerned about the welfare of employees. The Employee Assistance Program is provided to ensure employees and their families of confidential assistance available when needed for personal problems.

II. GENERAL.
   A. EMPLOYEE ASSISTANCE AND COUNSELING PROGRAM.
      1. The Office of the Sheriff has contracted with Managed Health Network for the Employee Assistance Program (EAP).
      2. Types of Assistance. The program offers assistance to employees and their families on a range of human problems: marriage, substance abuse, alcoholism and problem drinking, financial management, family/child difficulties, child care, elder care, emotional stress and other personal problems.
         a. Scope of Assistance.
            • The program includes brief counseling, problem identification, discussion of options to resolve the problem, resource information and referral to outside resources if further assistance is needed.
            • The contract provides for up to twelve visits per fiscal year for a total family unit, at the discretion of the EAP provider. The visits can be for individual counseling, information or referral. If there is a need for continued specialized professional help, the cost paid by the employee depends on the specific referral resource chosen by the employee.
         b. Participation.
            • Employees and/or their families may call the Employee Assistance Program for an appointment.
• Supervisors or Managers may refer employees to the Employee Assistance Program through the Director of Personnel Services who has been designated the Employee Assistance Coordinator. Such referrals are to be made only when it is determined an employee's work performance fails to meet minimum standards and only for personal or medical/behavioral problems affecting job performance, or when a Supervisor believes that an employee's personal problems may be interfering with work performance.

• Supervisors and Managers shall require referrals as outlined in Office of the Sheriff Policy Section 1.06.62, Police Involved Fatal or Serious Injury Incidents Policy.

c. Voluntary Referrals.
• Employees may make appointments for off-duty time. The County will not be advised of such appointments.
• Employees may schedule appointments using accrued vacation, accrued compensatory time, or if necessary, sick leave. If sick leave is used, the employee must authorize the program to release attendance verification as required by sick leave procedures. Use of sick leave will be denied if the employee refuses to authorize attendance verification.
• Except as authorized for attendance verification, strict confidentiality will be maintained about employee problems, sources, treatment and/or disposition.

d. Management Referrals.
• If employee appointments conflict with regularly scheduled work hours, counseling may be attended on work time.
• The EAP will report the employee's attendance to the Sheriff's Office Personnel Officer. No details of the employee's personal life or medical/behavioral problem diagnosis will be revealed.
• The employee may sign a release allowing general information about their progress and their work performance improvement plan to be reported to the Office of the Sheriff.

e. Management Encouraged Voluntary Referral.
• Supervisors/Managers may urge employees to attend counseling:
  ➢ Should negative changes in the employee's work habits be noted; or
Should the employee mention a problem that is apparently beginning to affect work performance.

- Attendance may be accomplished off-duty or with use of vacation, accrued compensatory time or sick leave.
- At the Division Commander's discretion, employees may attend counseling on work time.
I. POLICY.

A. PURPOSE AND SCOPE. The Contra Costa County Office of the Sheriff recognizes that many of its employees may be exposed to stressful and/or traumatic events. These incidents may result in stress-related symptoms that can adversely affect their personal well-being and ability to perform their assigned duties. The Office of the Sheriff has established standard procedures related to critical incidents and other traumatic events to provide employees with professional assistance in dealing with the potential consequences of those events.

B. The purpose of the Critical Incident Stress Management (CISM) program is to provide a peer support system for employees, enabling them to more effectively manage symptoms of stress resulting from personal or professional critical incidents or traumatic events. The Office of the Sheriff will follow the model developed by the International Critical Incident Stress Foundation.

II. OBJECTIVE.

A. We are dedicated to providing employees with continued training and support in the area of stress management, so that such incidents do not adversely impact a career. This philosophy is kept vital through our commitment to provide intervention and structured support activities, which educate personnel and their families about stress and stress management. Such activities can occur prior to an incident in the form of training; during an incident to identify early warning signs of stress-related symptoms; or after an incident in the form of debriefings and follow-up referrals.

B. One of our goals is to keep the mental health and personal well-being of our employees as strong as possible by providing peer assistance through difficult times. The objective is to mitigate the likelihood, or the length, of stress reactions that may arise out of exposure to a single critical or traumatic incident, or cumulative stressful incidents.
C. The CISM program is an adjunct to professional medical, psychological, spiritual or referral services. It is not intended to replace the counseling or any mental health benefit provided by the employees’ health plan.

D. It shall be the policy of the Contra Costa County Office of the Sheriff to provide departmental employees with voluntary and confidential resources of support and assistance relating to personal, work, and/or critical incident stress.

III. CORE COMPONENTS.

A. Pre-incident preparation and education. This includes stress management education, stress resistance, and crisis mitigation training for both individuals and organizations.

B. Strategic planning, psychological triage and organizational consultation for purposes of assessment of needs of operational personnel, their work units and members of their families.

C. Large Group Crisis Intervention and Consultation including:
   - Demobilizations for large group rescue or recovery response
   - Respite/Rehab Sectors for disaster first responders
   - Crisis Management Briefings (CMB)

D. Small Group Crisis Intervention and Consultation including:
   - Defusing (small group crisis intervention with immediate working unit)
   - Critical Incident Stress Debriefing (CISD) refers to the "Mitchell model" (Mitchell and Everly, 1996) 7-phase, structured group discussion, usually provided 1 to 10 days post crisis, and designed to mitigate acute symptoms, assess the need for follow-up, and if possible provide a sense of post-crisis psychological closure.
   - Small group Crisis Management Briefing (CMB).

E. One-on-one crisis intervention or psychological support throughout the full range of the crisis spectrum.

F. Family critical incident stress management (CISM).

G. Pastoral crisis intervention and chaplaincy.

H. Follow-up and referral mechanisms for assessment and treatment, as necessary.

IV. CONFIDENTIALITY.

A. One of the most important responsibilities of the Peer Support Team is the promotion of trust, anonymity and confidentiality for employees who seek assistance from the Peer Support Team. Communication between a Peer Support Team member and an employee is considered “privileged” by the department except for matters that involve violations of the law or misconduct. Members of the Peer Support Team shall operate under the following guidelines:
(a) It shall be mandatory that Peer Support Team members maintain strict confidentiality in matters discussed in debriefings, defusings, one-on-one meetings, and training, except as provided in subparagraph (1), below.

(1) Types of information that are not protected by confidentiality include:
   (a) Information about child, spouse, or elder abuse per Penal Code section 11165.
   (b) Threats of suicide or homicide.
   (c) Admission of criminal conduct.
   (d) Threats to harm another person.
   (e) Witness to a crime.
   (f) Policy and statutory violations, other misconduct.

(2) Such matters shall be referred up the chain of command where appropriate. Confidentiality of communications shall be expected with other members of this Office and members of the public.

(b) Peer Support Team members shall not discuss debriefings, whom has been debriefed, or provide any information about the team’s activities except in the instances listed above or incidents of serious misconduct after consultation with the Peer Support Team coordinator, liaison and/or mental health professional.

(c) The Peer Support Team is not an investigative unit of the Sheriff’s Office; therefore, it will not be the policy of this agency to question Peer Support Team members, or any other participant involved in a CISM debriefing or defusing of a critical incident, concerning the content of such discussion, except as required by law, and except as to the matters set forth in subparagraph (1) a-f, above.

V. DEFINITIONS.

A. TRAUMATIC EVENT: Any event that may temporarily overwhelm an individual’s usual methods of coping or produce unusually strong reactions. It is important to note an individual’s reaction to a traumatic event is individual-specific based on the totality of circumstances in that individual’s life (i.e., the degree of involvement, cumulative events, personal likeness, children, etc.).

B. INTERNATIONAL CRITICAL INCIDENT STRESS FOUNDATION (ICISF): ICISF is a worldwide organization dedicated to the prevention and mitigation of disabling stress through education, training, and support services for all emergency services professions.

C. PEER SUPPORT TEAM (PST): PST is a partnership between mental health professionals, clergy and Sheriff’s Office employees, who are interested in preventing and mitigating the negative impact of acute stress on them and their peers.

D. CISM: Critical Incident Stress Management.

E. DEBRIEFING, DEFUSINGS AND/OR DEMOBILIZATIONS: Different types of meetings designed to mitigate the psychological impact of a traumatic event, prevent the subsequent development of a post-traumatic stress disorder, and serve
as an early identification mechanism for individuals who may require additional support or mental health follow-up. Debriefings, Defusings, and Demobilizations are structured group meetings or discussions during which personnel are given an opportunity to discuss their thoughts and reactions concerning a traumatic event in a controlled environment under the direction of a mental health professional and peer support personnel.

F. **DEBRIEFING:** A debriefing is a mental health guided, peer driven, group discussion of a traumatic event for directly involved first responders. It is a process that should generally be conducted within 72 hours of the traumatic event. The debriefing usually lasts two to three hours depending on the number of participants. It is not an investigative inquiry.

G. **DEFUSING:** A defusing is a shortened version of the debriefing generally lasting less than one hour. A defusing is a peer guided discussion that should take place as soon as possible after the traumatic event and before involved personnel are released (within 8 hours).

H. **DEMOBILIZATION:** Demobilization is a brief informational session applied when operational units have been released from service at a major incident/disaster that requires unusually large numbers of personnel or lengthy periods of deployment.

I. **FOLLOW-UP:** Phone calls and/or home visits, when appropriate, to monitor the progress and well-being of the employee(s) and family members. Referrals to the appropriate resources can be initiated during a follow-up.

J. **PEER ASSISTANCE:** Peer assistance is a process by which trained personnel provide emotional support and referrals for a colleague during a crisis or when they are under stress. Generally, peer assistance is sought by the employee in need, or suggested by the employee’s peer(s) or supervisor. Peer assistance does not replace the need for structured group intervention following trauma. Peer assistance or support is a necessary adjunct to professional mental health guidance and leadership in trauma support services. Peer assistance should not replace the department’s contracted Employee Assistance Program (EAP).

K. **EMPLOYEE ASSISTANCE PROGRAM (EAP):** The Contra Costa County Office of the Sheriff Employee Assistance Program is a consulting/counseling service for a variety of personal and/or work related issues.

VI. **CALL-OUT PROTOCOL FOR PEER SUPPORT TEAM.**

A. Trauma takes a variety of forms and cannot be accurately or exhaustively quantified in description. However, certain events are of such magnitude that they should be considered disruptive to nearly anyone involved. For purposes of the Office of the Sheriff response criteria, those incidents include, but are not limited to:

- Line of duty death.
- Officer involved shootings.
- Serious line of duty injury.
- Suicide of an employee.
- In custody death
- Employee death.
- Disaster/multi-casualty incidents.
- Injury or death to civilian as a result of operational procedures.
- Unusual or violent death of a child.
- Any other incident determined by the program liaison and/or mental health professional to warrant a call-out.

B. When the above listed incidents occur, the supervisor/Watch Commander will see that the Peer Support Team liaison is notified. The mental health professional and clergy shall be contacted immediately following any of the above-defined incidents. The need for group intervention or immediate peer support will be accessed at that time.

VII. PROGRAM PROCESS.

A. REQUEST FOR PEER ASSISTANCE: Lists of the names of Peer Support Team members will be available on the Office of the Sheriff’s Personnel Administrative Record Keeping System (“SPARKS”). Any Sheriff’s Office employee in need of peer assistance may select a Peer Support Team member of their choice.

B. CISM ACTIVATION: In the event that a critical incident occurs, the supervisor of the employee should notify Dispatch, who in turn will contact the peer support liaison. If the peer support liaison is not available, a call will be placed to a team coordinator(s) or the designated mental health professional, as soon as possible, until notification is made. The peer support liaison and the mental health professional will then confer with the supervisor and assess whether or not the incident warrants the need for a formal on-scene response or group crisis intervention. The final decision as to whether a debriefing or defusing is warranted will be made by the mental health professional in collaboration with the Peer Support Team liaison.

(a) When making the notification, the supervisor or manager should attempt to utilize an on-duty Peer Support Team member in the absence of the Peer Support Team coordinator or liaison.

(b) In the unlikely event that the supervisor and Peer Support Team liaison disagree as to whether or not a debriefing or defusing is warranted, the peer support liaison and/or mental health professional will make the determination. In any event, when an employee requests intervention, that request will be granted.

1. This program is dependent upon the identification of all critical incidents, large and small, to help reduce the emotional impact and to avoid the effects of post traumatic stress.

2. The critical incident stress debriefing should include any sworn and/or non-sworn personnel directly involved in the incident. If the debriefing to be conducted is for an incident described in this order, attendance will be encouraged, but not required, for those involved. Active participation
in the discussion is not a requirement. Anyone not directly involved in the incident, may not attend the critical incident stress debriefing. Peer support personnel will be in attendance.

3. Critical incident stress defusing may be used to determine the need for debriefing and/or other services, and are typically conducted by a Peer Support Team member. Defusing will be offered to all employees to assist in identifying any stress or trauma experienced during the incident and should be held as soon as practical after the incident.

C. REFERRALS TO MENTAL HEALTH PROFESSIONALS: Members of the Peer Support Team are trained to be effective listeners and to provide feedback, clarify issues, and assist employees in identifying options for problem resolution; however, they are not therapists. When problems are acute or appear to require specialized assistance, information on referral resources will be made available to employees.

D. A list of available professionals shall be available to the team coordinator and liaison to assist employees in making a choice if a referral is made. This list should include EAP providers as well as private practice professionals.

VIII. TEAM COMPONENTS: DESCRIPTION AND RESPONSIBILITIES.

A. The Peer Support Team will be comprised of Office of the Sheriff employees who have been selected by their peers. The team members will receive specialized training in assisting peers and their families in dealing with the adverse psychological effects of a traumatic incident.

B. MENTAL HEALTH PROFESSIONAL
   (a) A licensed mental health professional(s) under County contract with specific expertise, experience, education, and training in the field of trauma services with special emphasis on Office of the Sheriff personnel.
   (b) The role of the contract mental health professional (MHP) is to provide team leadership and training and to consult as requested with command and supervisory staff regarding the psychological well-being of employees and responders. In addition, the mental health professional will conduct all group crisis intervention services and assess the need for follow-up referrals. The contracted MHP shall provide psychological oversight and leadership for the Peer Support Team and provide initial and on-going peer support training. In partnership with members of the Peer Support Team the MHP will prepare and provide training for other members of the department as requested.

C. TEAM LIAISON
   (a) A Lieutenant, appointed by the Sheriff will act as the primary liaison between the team, the mental health professional and management staff.
(b) The liaison will be responsible for the team budget, authorizing overtime as necessary, approving team deployment in extraordinary circumstances, and maintaining team training standards.

   i. Overtime will be approved by the team liaison or on-duty Watch Commander.
   ii. Overtime will be charged to respective team member’s bureau of assignment.

(c) Supervise and coordinate Peer Support Team applicants.

D. TEAM COORDINATORS
   (a) The role of the team coordinator is to manage, maintain and coordinate the program. They will act as liaison between Peer Support Team personnel, outside resource persons and the organization.

   (b) Team Coordinators will be selected by the Team Liaison and approved by the Sheriff.

   (c) Coordinate training of Peer Support Team personnel.

   (d) Will assist in arranging and conducting all group crisis interventions, assess the need for follow-up referrals, and assist in teaching stress management.

   (e) Create a list of qualified referral sources for the use of the Peer Support Team personnel. Referral sources will be researched fully by the team liaison prior to being included on the list.

   (f) Will be responsible for determining the continued training needs of the Peer Support Team and for the scheduling of initial and continuing training.

   (g) Will be responsible for applying for certification through ICISF once the Peer Support Team membership has met the required level of training.

E. TEAM MEMBERS
   (a) Will participate as requested in group crisis interventions, assist in assessing the need for follow-up referrals

   (b) Will provide one-on-one peer assistance to affected employees at the request of either the individual employee, or as referred by a supervisor or the team coordinator.

F. CHAPLAIN
   (a) The Chaplains will be trained in Critical Incident Stress Management and Pastoral Crisis Intervention and attend quarterly update team meetings along with their peer counterparts.
(b) Chaplains will assist, when requested by the team coordinator and/or liaison, in group crisis interventions, follow-up referrals, and to assist in teaching stress management.

IX. RECORD KEEPING.
A. Record keeping will be for the utilization of statistical information only. Names or identification numbers of employees will not be used. Peer Support Team members shall keep a monthly tally of the number of contacts and hours involved in peer assistance. No identifying information regarding peer contact or group debriefing services will be collected.

B. The Peer Support Team activity summary shall be submitted to the team coordinator by the tenth day of the following month and then forwarded to the team liaison.

X. TEAM MEMBER SELECTION.
A. When an opening occurs for team membership, a notification will be made to all sworn and non-sworn employees by the Chief of Management Services who is responsible for preparing the vacancy announcement and distributing copies to all Divisions.

B. Qualified and interested employees must submit to the Chief of Management Services a letter of interest detailing previous experience, specific qualifications, training and education, and express a voluntary desire to be a team member for a minimum commitment of three years.

C. Qualified and interested employees must additionally have their immediate supervisor submit a letter of recommendation to the Chief of Management Services.

D. During the selection process for team membership, selections will be made utilizing the following criteria:
   a. Must be a full-time non-probationary paid employee of the Office of the Sheriff or an Emergency Services Support Unit Volunteer Chaplain.
   b. Not currently the subject of a serious or major investigation or suffering from serious personal or psychological stress.
   c. Must have consistently displayed solid judgment and strong interpersonal communication skills throughout their careers.

E. The current team members, team coordinators and team liaison will conduct a selection process meeting in conjunction with a quarterly training day to make final selection recommendations to the executive team. The selection(s) will be made by the executive team and approved by the Sheriff. The need for new team members will be evaluated annually, with a program goal of maintaining 25 certified peer support team members.

F. A peer support team member may be removed for cause by the peer support team liaison and/or at the discretion of the Sheriff and/or his designee. A breach of
confidentiality by any peer support team member shall be cause for immediate removal from the Peer Support Team.

XI. TRAINING.
A. The Peer Support Team coordinator is responsible for monitoring the training status of peer support personnel to insure appropriate preparedness of team members. The team coordinator will be responsible for the scheduling of initial team training and as well, updated training for team members.

B. Peer Support Team members should receive the following training within the first 6 months of appointment:

- ICISF-Individual Crisis Intervention and Peer Support
- ICISF-Group Crisis Intervention

C. Peer Support Team members should receive the following training within the first 60 months of appointment:

- ICISF-Suicide Prevention, Intervention, and Postvention
- ICISF-Advanced Critical Incident Stress Management
- ICISF-Strategic Response to Crisis

D. Peer support counselors are encouraged to become members of the International Critical Incident Stress Foundation (ICISF) where volumes of resource materials and recommended readings, etc. may be located (www.icisf.org).

E. This agency will be following the Critical Incident Stress Management (CISM) protocol endorsed by the International Critical Incident Stress Foundation.

(a) The initial training shall be a minimum of a three-day (27 hour) Basic Group Crisis Intervention and Peer Support Course

(b) Initial training is intended to provide a basic understanding of and the skills using the Critical Incident Stress Management protocol endorsed by the International Critical Incident Stress Foundation, which include, but are not limited to the following areas:

1. Developing rapport with person being assisted.
2. Facilitating and supportive listening skills.
3. Grief and Bereavement.
5. Crisis identification.
6. Assessment Skills.
7. Crisis Intervention techniques.
8. Relationship problems.
10. Depression and Suicide.
11. Post critical incident syndrome.
12. Knowledge of abnormal behavior.
14. Group Crisis Intervention Techniques (CMB, CISD, Defusing)

(c) Required Annual Update Training:

1. Quarterly training which shall include 4-hour sessions covering a variety of CISM subjects with emphasis on increasing peer support knowledge and skills.

2. Continuing education may take place on an on-going basis and may include intermediate and advanced CISM courses and workshops, as well as in-house training by appropriate guest speakers/trainers. All team members are required to attend a minimum of three quarterly trainings to maintain their status on the team.

XII. COMPENSATION.

A. Peer Support Team members must understand that being a member is voluntary and must be prepared to answer calls for help on a twenty-four hour basis.

B. In most cases, peer assistance should take on a form of an on-duty meeting of a relatively short duration. Prolonged peer assistance, such as debriefings and defusings, should be scheduled on-duty whenever possible.

C. In the event off-duty overtime is required, the Peer Support Team member shall secure prior approval from the peer support liaison, Peer Support Team coordinator, or Watch Commander. Any unscheduled overtime authorization that may be necessary will be subject to approval by the team member’s supervisor or the Watch Commander.

D. Peer Support Team members will be compensated for their off-duty time, as provided in the employee’s MOU, and in accordance with the Office of the Sheriff and County policies and procedures.
Former Policy Deleted
I. POLICY.
   A. Qualified employees shall be compensated for authorized service time in excess of their normal work week hours.

II. DEFINITIONS.
   A. CALL BACK TIME. One hour of overtime pay as compensation for the time needed to respond to unscheduled overtime duty. The employee called back is paid for actual time worked plus the "call back hour", but not less than two hours for each call back.
   B. NORMAL WORK WEEK. The normal work week is 40 hours between 12:01 a.m., Monday to 12:00 midnight, Sunday. The actual work schedules are defined in the various County Employee Memoranda of Understanding (MOU). The Coroner’s Office has a 24 hour shift assignment that creates a normal work week of more than 40 hours. Other work weeks may be defined depending on type of schedule.
   C. ON-CALL TIME. Any period of time an employee is not actually on duty and the employee must be available to their superior on a 10 to 20 minute notice.
   D. OVERTIME. Any authorized service time performed in excess of the normal work week.
   E. OVERTIME PAY RATE. Increased pay rate for overtime service. This rate is one and one half times the employee's basic hourly salary.

III. GENERAL.
   A. OVERTIME. Overtime may be scheduled in advance to fill known vacancies or ordered to fill unexpected vacancies, or to meet immediate operational needs. All overtime must be authorized by a Supervisor prior to the employee working the extra hours. Supervisors are accountable to their Division Commander for any overtime authorized by them.
   B. ON-CALL TIME. There are different on-call time compensation methods established by the various Memoranda of Understanding. Employees will be compensated according to the terms of their MOU.
C. CALL BACK. The employee called back is paid for actual time worked plus the "call back hour" but not less than two hours total for each call back.

D. MINIMUM COURT TIME.
   1. Employees attending court on their day off or off-duty time on a work day are paid at least the established minimum or they are paid for the actual time worked, whichever is more.
   2. Employees attending court while on vacation or sick leave do not receive overtime pay. Instead, the actual court time is deducted from the vacation or sick leave for that day. The deduction is based on the regular pay rate and not the overtime rate.
   3. Refer to the various Memoranda of Understanding for minimum court overtime hours.

E. MAXIMUM OVERTIME. With the exception of emergency staff shortages or Division Commander's approval, no employee shall work more than 18 consecutive hours or more than 100 hours of overtime in a calendar month.

F. QUALIFIED EMPLOYEES. Employees qualified to receive overtime pay include:
   1. Permanent Status Employees who are paid on both a monthly and hourly basis.
   2. Permanent-Intermittent and Limited Term Status Permanent part-time and hourly employees qualified for overtime pay by working in excess of 40 hours per week.
   3. County Approved Status: Employees authorized to schedule work time for themselves or others shall not receive overtime pay. Exceptions for some specific situations may be made with prior approval of the County Administrator.

G. SERGEANT OVERTIME AT DEPUTY SHERIFF LEVEL RESPONSIBILITIES. Sergeants may volunteer for overtime at Deputy Sheriff level assignments. This procedure shall only be authorized when efforts to assign overtime to Deputy Sheriffs have been exhausted.
   1. Sergeants will not self assign overtime without prior approval from their Supervisor.
   2. Sergeants will be compensated at the next Deputy Sheriff salary step below that of the volunteering Sergeant.

IV. PROCEDURE 1.
A. EMPLOYEES.
   1. Employees who volunteer to work overtime have the responsibility of ensuring that they are sufficiently rested and are fit for duty.
   2. Employees working overtime will complete an overtime card. The card shall list the actual hours worked; the minimum call back or minimum court time, if applicable; and justification for the overtime.
   3. The employees shall promptly route the completed overtime card to their Division Commander via the chain of command.
4. Any overtime situation that will cause the employee to exceed the 100 hour monthly limit or the 18 hour consecutive limit must be brought to the attention of the Supervisor authorizing the overtime prior to final authorization.

V. PROCEDURE 2.

A. SUPERVISORS’ RESPONSIBILITIES.

1. Prior to authorizing overtime, the Supervisor should consider:
   a. Relative needs of filling a position on overtime as opposed to leaving it vacant.
   b. Minimum number of hours necessary to cover need, i.e., less than a full shift.
   c. Appropriate option for selecting employee to fill overtime need.
      • Call in off-duty employee;
      • Hold on-duty employee over;
      • Or call next shift in early.

2. Supervisors should be alert to obvious signs of fatigue associated with working too many consecutive hours or not having received enough sleep between shifts.

3. Absent exigent circumstances, an employee will not be allowed to work more than 18 consecutive hours, nor more than 100 hours of overtime per month.

4. Should an employee be required to work extended overtime, against their will, consideration should be given to providing transportation to the employee's home if the situation warrants it.

5. Supervisors will review and initial their employee's overtime cards to ensure the overtime was pre-authorized.

6. Supervisors will promptly forward approved overtime cards to the Division Commander.

VI. PROCEDURE 3.

A. DIVISION COMMANDERS’ RESPONSIBILITIES.

1. The Division Commander will approve valid overtime cards.

2. The Division Commander will route overtime cards to the Division Payroll Clerk.

VII. PROCEDURE 4.

A. SERGEANTS’ RESPONSIBILITIES.

1. Sergeants working overtime at Deputy Sheriff’s level responsibilities will complete an overtime card. This card will list the actual hours worked followed by "D.S." and will name the employee being replaced.

2. The Sergeant shall route the completed overtime card to the Division Commander via the chain of command.
VIII. PROCEDURE 5.

A. DIVISIONAL PAYROLL CLERK RESPONSIBILITIES.

1. Payroll Clerks enter the approved overtime hours in black on the Divisional Time Sheet.

2. Overtime worked by a Sergeant at the Deputy level will be indicated by "D.S." following the number of hours worked.
### Contra Costa County

Office of the Sheriff

**CHAPTER:**  
Employee Benefits and Assistance

**SUBJECT:**  
Pay for Work in a Higher Classification

---

### I. POLICY.

A. With approval of the Sheriff, employees who on an interim basis assume full responsibility for a higher paid classification shall be paid at the higher classification rate after the designated time. Acting employees as defined will not receive higher compensation.

---

### II. DEFINITIONS.

A. **ACTING ASSIGNMENT.** An employee performing limited duties of a higher paid classification for a brief period of time without compensation.

B. **INTERIM ASSIGNMENT.** An interim assignment is an individual selected and assigned by the Sheriff or designee, to assume the full duties of a higher paid classification for which he/she is compensated at the higher level after the required period of time.

---

### III. GENERAL.

A. **DESIGNATION OF EMPLOYEES IN AN ACTING CAPACITY.**

1. When Supervisors or Managers are not available to perform certain duties, they may designate with approval of the Division Commander, another qualified employee to perform certain limited duties. Examples of an acting assignment would include assignment of work or approval of reports when the Supervisor or Manager is away from the office.

2. Acting employees are not entitled to higher pay due to the length of assignment, or because they are not assuming the full duties of the higher paid assignment.

B. **DESIGNATION OF EMPLOYEES IN AN INTERIM CAPACITY.**

Circumstances allowing pay for work in higher classification:

1. Interim assignments may be authorized as a short-term remedy to temporarily replace an incumbent of a position who is not available to perform the duties of the position for a period exceeding 10 days, or as otherwise indicated in the Employee Memoranda of Understanding.
2. Assignment must be in a program, service or activity established by the Board of Supervisors, the duties of which are assigned to the incumbent of a permanent position classified to the basic salary schedule.

3. The interim employee assigned must become fully responsible for the duties assigned to the higher classification.

4. The employee selected is expected to meet the minimum qualifications of the higher classification.

5. This procedure shall not be used as a substitute for regular Merit System appointment or promotional procedures.

C. CRITERIA FOR SELECTION.

1. In selecting an employee to fill an interim assignment the following criteria should be considered:
   a. Assignment to the same Division, facility or work location as the higher classification.
   b. Assignment to the same shift as the higher classification.
   c. Familiarity with the job duties of the higher classification.
   d. The employee's name appears on the current promotional list for the higher classification.

2. Interim assignment of an employee to a position is not an indication that the employee will be selected for promotion to the higher classification.

D. REQUIREMENTS FOR AN INTERIM ASSIGNMENT.

1. Follow the language in the appropriate MOU for employees working in a higher paid classification.

2. If an assignment in a higher classification is terminated and re-approved, follow the language in the appropriate MOU.

3. The Sheriff/Undersheriff or a designee shall submit to the County Administrator a written request for any employee who will be assigned to a higher classification. This request shall cite the nature of the operational exigency, the effects of ignoring the exigency, the specific time period needed (not to exceed six months), and why the exigency cannot be handled by the present authorized staff.

4. Requests for higher classification pay should be completed and forwarded to the Human Resources Department at least 15 days before the expiration of the waiting period (County Form AK13).

E. PAY RATE.

1. The employee shall be paid at the next higher pay level that is at least 5% above the employee's usual pay, except that the new pay shall not exceed the maximum step for the higher class.
   a. Allowable overtime pay, shift differentials and/or work location differentials will be computed from the higher classification pay rate.
b. Any incentive accruing to the employee in the permanent position shall continue unless the employee is no longer performing duties that warrant the differentials.

IV. PROCEDURE 1.
A. DIVISION COMMANDER RESPONSIBILITIES.
   1. Approve or deny use of an acting employee to fulfill the limited duties of a higher classification for a limited period of time.
   2. Evaluate any position expected to be vacant more than ten working days and decide if it is necessary to have a lower paid classification assume the full duties of the higher classification for a period as an interim assignment.
   3. If it is necessary to designate an employee for an interim assignment, determine which employees are qualified and available for the interim assignment to the higher classification.
   4. Make a recommendation via the chain of command to the Sheriff/Undersheriff for assignment to the interim position. The recommendation must include a justification for the interim assignment and the expected length of the assignment.

V. PROCEDURE 2.
A. SHERIFF/UNDERSHERIFF RESPONSIBILITIES. Receive and review recommendations for interim assignments.
   1. If an interim assignment is deemed necessary, select the employee for the higher classification.
   2. The Chief of Management Services will process the interim assignment as appropriate.
I. POLICY.

A. The Career Incentive Program has been developed to attract highly qualified peace officers and encourage the professional development of the Office of the Sheriff's current peace officers.

II. DEFINITIONS.

A. CAREER INCENTIVE ALLOWANCE REFERENCE CHART. A chart showing the available incentive payments. The chart is attached to this Policy.

B. CAREER INCENTIVE ALLOWANCE REQUALIFICATION FORM. Sheriff’s Office form used to document requalification efforts of Sheriff’s Office management peace officers.

C. CERTIFICATE APPLICATION. Commission on Peace Officer Standards and Training Form No. 2-116.

D. INTERMEDIATE/ADVANCED/MANAGEMENT/EXECUTIVE CERTIFICATES. Certificates as defined in the regulations of the Commission on Peace Officer Standards and Training.

III. GENERAL.

A. GENERAL SPECIFICATIONS.

1. Allowance. No incentive allowance will be paid for possessing a P.O.S.T. certificate required by the minimum qualifications of the position in which the peace officer has permanent status. Incentive allowances shall be in addition to regular compensation and not be part of the base pay compensation.

   a. Office of the Sheriff Management peace officers will initially be allowed that percentage amount of allowance for which their combined P.O.S.T. certificate and education qualifies them for, as specified below:

2. Eligibility. Office of the Sheriff peace officers who are permanent full-time paid peace officers are eligible.
B. INTERMEDIATE CERTIFICATE - (Deputies, Deputy Sheriff Criminalists, Deputy Sheriff Forensic Supervisors, and Sergeants). Every officer below the rank of Lieutenant shall receive a Career Incentive Allowance of two and one-half percent of base pay per month for the possession of a valid Intermediate P.O.S.T. Certificate. Initial eligibility for the Career Incentive Allowance entitles the peace officer to receive the monthly allowance commencing the first day of the month following the date of the certificate as issued by P.O.S.T.

C. ADVANCED CERTIFICATE - (Deputies, Deputy Sheriff Criminalists, Deputy Sheriff Forensic Supervisors, and Sergeants). Every officer below the rank of Lieutenant shall receive a Career Incentive Allowance of two and one-half percent of base pay per month for the possession of a valid Advanced P.O.S.T. Certificate. This is in addition to the two and one-half percent allowance for the Intermediate Certificate. Those establishing a first time eligibility for Career Incentive Allowance are entitled to receive the monthly allowance commencing the first day of the month following the date of the certificate as issued by P.O.S.T.

D. ADVANCED CERTIFICATE - (Lieutenants and Deputy Sheriff Forensic Managers).

1. Every peace officer at the rank of Lieutenant or Deputy Sheriff Forensic Manager possessing a valid P.O.S.T. Advanced Certificate and a Bachelor's Degree shall receive a permanent Career Incentive Allowance of two and one-half percent of their monthly base pay.

2. Every peace officer at the rank of Lieutenant or Deputy Sheriff Forensic Manager possessing a valid P.O.S.T. Advanced Certificate and a Master's Degree shall receive a permanent Career Incentive Allowance of five percent of their monthly base pay. This is in lieu of any other permanent Career Incentive Allowance.

E. MANAGEMENT/EXECUTIVE CERTIFICATE. (Captains and above).

1. Every peace officer above the rank of Lieutenant or Deputy Sheriff Forensic Manager, including the Sheriff, shall receive a Career Incentive Allowance of two and one-half percent of their base pay per month for the possession of a valid Management/Executive P.O.S.T. Certificate and by successfully completing the continuing eligibility requirements. This allowance is separate from and in addition to any permanent allowance described in 2 and 3 below.

2. Every peace officer above the rank of Lieutenant or Deputy Sheriff Forensic Manager possessing a valid Management/ Executive P.O.S.T. Certificate and a Bachelor's Degree shall receive a permanent Career Incentive Allowance of two and one-half percent of their monthly base pay.

3. Every peace officer above the rank of Lieutenant or Deputy Sheriff Forensic Manager possessing a valid Management/ Executive P.O.S.T. Certificate and a Master's Degree shall receive a permanent Career Incentive Allowance of five percent of their monthly base pay. This is in lieu of any other permanent Career Incentive Allowance.

CHAPTER: Employee Benefits and Assistance

I. POLICY.
   A. Contra Costa County maintains a plan in which employees may defer a portion of their salary into a long term savings account administered by the County Office of the Sheriff employees have the option of enrolling in this plan.

II. GENERAL.
   A. ADMINISTRATION AND PARTICIPATION.
      1. The Deferred Compensation plan is administered by the County Human Resources Department.
      2. Participation is voluntary.
      3. All County employees are eligible to participate in the program, except temporary and permanent intermittent employees.
I. POLICY.
   A. When considering a request for a leave of absence, the Sheriff will make a concerted effort to balance the needs of the Office and the needs of the employee.

II. GENERAL.
A. LEAVES OF ABSENCE WITH PAY.
   1. Leaves of absence with pay may be granted for the following in accordance with specific policies and laws pertaining thereto:
      a. Workers' Compensation injuries. Employees will generally receive either disability benefits or 4850 compensation. Under Workers' Compensation Labor Code 4850, safety members are entitled to a leave of absence without loss of salary in lieu of temporary disability payments. This leave of absence is limited to a period of one year.
      b. Vacation and sick leaves.
      c. Floating holidays and compensation time.
      d. Administrative leave.
      e. The Family Medical and Leave Act (FMLA). A leave of absence for permanent employees and for those temporary employees employed for at least 12 months and employed for at least 1250 hours of service during the 12-month period preceding the commencement of the leave. Below are some of the types of conditions covered by this type of leave of absence.
         • Birth of an employee's child.
         • Placement of child in an adoptive or foster care home with an employee.
         • A serious health condition of employee’s relatives (includes child, parent or spouse);
         • A serious health condition of the employee where they are unable to perform their job.
B. LEAVES OF ABSENCE WITHOUT PAY.

1. The Sheriff will grant leaves in an unpaid status for the following reasons:
   a. Pregnancy disability based upon medical documentation as required by State law;
   b. Military duty orders that exceed 30 calendar days of leave per fiscal year. Employees may use accrued vacation time then accrued compensation time, in that order.
   c. An employee pending retirement who has filed, or for whom the Sheriff’s Office has filed retirement papers with the County Retirement Office.
   d. FMLA - as set forth above.

2. The Sheriff may, at the Sheriff’s discretion, grant leaves without pay for the following reasons:
   a. To undertake a course of study or for other personal reasons acceptable to the Sheriff. This category is designed to provide the Sheriff maximum flexibility in managing the Office of the Sheriff. Each case will be evaluated individually by the Sheriff, who may consider leaves for personal or family emergencies.
   b. An employee may be placed on a leave of absence voluntarily or involuntarily if the Sheriff believes that employee to be temporarily or permanently physically or mentally incapacitated for the performance of their duties. The employee shall be given notice of the proposed leave of absence by letter or memorandum delivered in person or by certified mail as outlined in the Memoranda of Understanding. This leave will continue in effect until the Sheriff has determined that the employee is fit for duty. The employee may use accumulated sick leave during an imposed leave of absence.
      • Duration. The Sheriff will not grant leaves of absence in excess of three (3) months except in unusual circumstances such as pregnancy disability and FMLA.
      • Vacation and Sick Leave Accruals. An employee who is on leave without pay, or who is otherwise absent without pay, shall not accrue vacation or sick leave during such time.
      • Absence. Leave of absence decisions of the Sheriff may be appealed to the Director of Human Resources, Contra Costa County.

III. PROCEDURE 1.

A. EMPLOYEE RESPONSIBILITY REGARDING LEAVES OF ABSENCE WITH PAY.

1. Submit an Absent Report Form (AF-23) in accordance with Sheriff’s Office Policy.
2. Upon return from an approved paid leave period, the employee must notify Personnel.

B. EMPLOYEE RESPONSIBILITY REGARDING LEAVES OF ABSENCE WITHOUT PAY.

1. Submit a Request for Leave of Absence Form (AK14) via the chain of command to their Bureau Assistant Sheriff at least thirty days prior to the commencement of the leave of absence. If an emergency situation should arise, a verbal approval may be obtained from the appropriate Division Commander for leaves of 15 days or less. Verbal approval does not negate the requirement to submit a Request for Leave of Absence Form (AK14) to cover the period of the emergency leave. All Request for Leave of Absence Forms will include:
   a. Dates and duration of the requested leave.
   b. Reason for the leave. If the leave is for a medical reason, a doctor’s statement must be attached. If the leave is for military reasons, orders must be attached.

2. Upon return from any approved Leave of Absence, the employee must notify Personnel. Upon return from a medically related leave, the employee must also provide their Division Commander with a return to duty medical authorization.

3. If an employee wishes to return to work before the expiration date of an approved Leave of Absence, the employees must conform to County policy and submit a written request to their Division Commander fifteen (15) days prior to the date of the proposed return date. Due to extenuating circumstances, an employee may be allowed a shorter notification period.

4. If an extension to a Leave of Absence is requested, the employee must submit a written request to their respective Bureau Assistant Sheriff via the chain of command at least thirty (30) days in advance of the desired extension date. Extension notifications of less than thirty (30) days will be considered based upon the emergency situation which caused the shortened notification.

C. DIVISION COMMANDERS’ RESPONSIBILITY REGARDING LEAVES OF ABSENCE WITH PAY.

1. Division Commanders will review all Absent Report Forms (AF-23) and make a recommendation before forwarding it to the Bureau Assistant Sheriff for action. This review will include verifying whether or not the absence qualifies for Family and Medical Leave status. If FMLA applies, Division Commanders will check the qualifying condition.

D. DIVISION COMMANDERS’ RESPONSIBILITY REGARDING LEAVES OF ABSENCE WITHOUT PAY.

1. Division Commanders will review all Requests for Leave of Absence and make a recommendation before forwarding it to the Bureau Commander for action.
2. Upon the return of an employee from any absence without pay, Division Commanders or their designated representative will ensure that Personnel is notified via their respective Bureau Assistant Sheriff. Personnel will complete a Notice of Return to Work form (AK24).

E. BUREAU ASSISTANT SHERIFFS’ RESPONSIBILITY REGARDING LEAVES OF ABSENCE WITH PAY.

1. Bureau Assistant Sheriffs will review all Absence Report Forms (AF-23) and indicate approval or disapproval. The Administration (white) copy of the Absence Report Form must be sent to the Office of the Sheriff Payroll Clerk. For approved/pending FMLA leave, the Payroll Clerk will email the ARF to the Personnel Unit.

F. BUREAU ASSISTANT SHERIFFS’ RESPONSIBILITY REGARDING LEAVES OF ABSENCE WITHOUT PAY.

1. Bureau Assistant Sheriffs will review all Request for Leave of Absence Forms (AK14) from their operational areas.
   a. Leave Requests or Extension Requests of fifteen (15) days or less may be approved/denied by the Bureau Assistant Sheriff. Approved Leave Requests will be forwarded via the chain of command to the Chief of Management Services, and the Office of the Sheriff Payroll Clerk.
   b. Leave Requests or Extension Requests of sixteen (16) days or more will be forwarded, along with a recommendation for approval/denial by the Bureau Assistant Sheriff, to the Undersheriff via the Chief of Management Services.

2. Division Commanders will notify the employee of the result of the request.

3. Upon the return of an employee from any absence without pay, Division Commanders of their designated representative will ensure a Notice of Return to Work Form (AK24) is completed and forwarded via their respective Bureau Assistant Sheriff to the Chief of Management Services.

G. SHERIFF’S RESPONSIBILITY REGARDING LEAVES OF ABSENCE WITHOUT PAY.

1. The Sheriff or designee will approve/deny all Request for Leave of Absence Forms (AK14) or Extension Requests of sixteen (16) days or greater. Approvals/denials will be based upon the guidelines listed within the General Information of this Policy.

2. When a request or extension is approved, the Sheriff or their designee will notify:
   a. The employee's Bureau Assistant Sheriff;
   b. Chief of Management Services;
   c. The Human Resource Department;
   d. The Division Timekeeper; and
e. The Office of the Sheriff Payroll Clerk.

3. When a request or extension is denied, the Sheriff or the Sheriff’s designee will notify the appropriate Bureau Assistant Sheriff.

H. SHERIFF’S OFFICE PAYROLL CLERK’S RESPONSIBILITY. When notified of an approved leave of absence without pay or leave of absence extension without pay, the Sheriff’s Office Payroll Clerk will list the employee as “Absent Without Pay” during the approved leave period.
I. POLICY.

A. Employees in permanent positions are entitled to vacations with pay. Vacation accrual and use of vacation time is established for the mutual benefit of the employee and the Sheriff’s Office.

II. GENERAL.

A. ACCRUAL. Accrual is by hours of working time per calendar month of service and begins on the date of appointment to a permanent position.

1. Increased accruals granted in recognition of years of service begin on the first of the month following the month in which the employee qualifies for the corresponding service award.

2. Accrual for a portion of a month shall be in minimum amounts of one hour calculated on the same basis as for partial month compensation.

3. Vacation credits may be used only after completion of six months service in a permanent position. However, credits may be used to supplement exhausted sick leave accrual in cases of absence during the first six months.

4. No credits will be allowed in excess of actual accrual at the time vacation is taken.

5. On separation from service, an employee shall be paid for any unused vacation credits at their current pay rate.

6. Employees in permanent part-time and permanent-intermittent positions shall accrue vacation benefits on a prorated basis.

7. Employees on leave without pay or unpaid military leave shall not accrue vacation credit during the time of such leave, nor shall an employee who is absent without pay accrue vacation credit during the absence.

8. Vacation accrual rates for employees are established by the various County Employee Memoranda of Understanding.
B. VACATION SCHEDULING.

1. Division Commanders will be responsible for all vacation scheduling and the proper relief within their commands.

2. In Divisions with established annual vacation sign-up consistent with this Policy and Memoranda of Understanding, the deadline for sign up shall be December 15. Employees will be allowed to sign up in week blocks up to their annual vacation accruals. Additional weekly and one day vacation requests are granted at the discretion of the Division Commander.

3. It is the responsibility of the employee to bring to the attention of their Supervisor any vacation related problems associated with an inter-division transfer.

4. The Division Commander shall make every effort to accommodate previously scheduled vacations. Transferee’s do not have the absolute right to exercise their seniority for a previously approved vacation.
   a. In some instances, the employee has the option of waiving the transfer pursuant to Memoranda of Understanding and/or Sheriff’s Office Policy if it creates a temporary hardship.
   b. When transfers occur due to Sheriff’s Office needs, the employee shall, in writing, notify the new Division Commander of the scheduled vacation period. Notification shall be prior to the transfer if possible, but never later than seven days.
      • If the vacation is scheduled 60 days or longer after the transfer, honoring the vacation shall not result in the expenditure of overtime funds.

C. VACATION - MANAGEMENT REIMBURSEMENT.

1. Some employees in management classifications designated by Board Resolution may choose reimbursement for up to one-third of the annual vacation accrual.
   a. See the MOU/Resolution for frequency details.
   b. Payment shall be made on an hourly rate determined by dividing the employee’s monthly salary by 173.33.
   c. See table in County Ordinance 36-6.603 for maximum number of hours which may be reimbursed as dictated by date of hire and years of service.

D. VACATION REQUEST FORMS.

1. An Absent Report Form (AF-23) will be used for the purpose of reporting and requesting vacation leave.
   a. The lower section of the form will be used to record vacation requests.
   b. Upon approval by the Division Commander, the vacation approval section will be completed and a copy of the ARF given to the employee. Division Commanders shall respond to
vacation requests of Local 2700 AFSCME employees within ten work days of receipt.

c. The remaining section will be routed to the Sheriff’s Office Payroll Clerk.
I. POLICY.
   A. To insure against loss of pay for temporary absences due to illness, injury or other approved reasons, permanent employees accrue sick leave credits.

II. DEFINITIONS.
   A. IMMEDIATE FAMILY. The immediate family shall be restricted to the spouse, son, stepson, daughter, stepdaughter, father, stepfather, mother, stepmother, brother, sister, grandchild, father-in-law, mother-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law of an employee, depending on the employee’s MOU. For purposes of this policy, “immediate family” shall include an employee’s “domestic partner” as such term is defined in Family Code Section 297.
   B. SICK LEAVE FORM. Refers to Office of the Sheriff Form (AF-23), Absence Report Form.
   C. SICK LEAVE ABUSE. The use of sick leave when no illness, injury or authorized condition exists. Authorized sick leave is limited to those situations covered in this Policy.
   D. WORKER COMPENSATION "4850 TIME". Paid leave of absence for full-time safety employees, who are members of the Contra Costa County Employees’ Retirement Association or subject to the County Employees Retirement Law of 1937, and disabled, whether temporarily or permanently, by injury or illness arising out of and in the course of an on-duty incident.

III. GENERAL.
   A. SICK LEAVE OVERVIEW.
      1. The primary purpose of paid sick leave is to insure employees against loss of pay during temporary absences from work due to illness or injury. This payment is not granted automatically. Use of sick leave credits is a privilege extended by the County and may be used only as authorized.
      2. As an employer, the Office of the Sheriff has a reasonable expectation that employees will be at work when scheduled. This expected attendance is necessary to the effective and efficient operation of the
Office of the Sheriff. Abuse or excessive use of the sick leave privilege can have a major impact on employee attendance. Therefore, Office of the Sheriff management will closely monitor sick leave use. Employees shall be aware of the following:

a. Sick leave is not paid time off which may be used for personal activities.

b. Abuse or excessive use of sick leave by an employee may be cause for Corrective Counseling, or utilization of the Personnel Management Regulations.

3. Employees are encouraged to utilize their sick leave only when necessary and for valid reasons. It benefits the employee to save sick leave credits whenever possible because:

a. A serious, unexpected illness or injury can sometimes extend beyond the employee's accumulated sick leave credits, leaving the employee without any income.

b. Accumulated sick leave credits are applied as additional time to the employee's service time for the purpose of retirement benefits.

B. VALID REASONS FOR USE OF SICK LEAVE.

1. Temporary Illness or Injury. Absences longer than three days shall require a physician's statement. Any frequent or habitual absences may also require a physician's statement.

2. Communicable Disease. When the employee's presence would endanger the health of others, a physician's statement may be required.

3. Medical and Dental Appointments.
   a. To keep personal medical and dental appointments.
   b. To attend medical and dental appointments for immediate family members.
   c. Employees are responsible for obtaining advance approval from their Supervisor for the scheduled time of pre-arranged medical and dental appointments.

4. Medical Care of Family. Accrued sick leave may be used in cases of illness or injury to immediate family members. Alternative arrangements for the family member's care are encouraged.

5. Death of Immediate Family Member. Sick leave use shall not exceed three working days, plus two working days for necessary travel.

6. Pregnancy Disability. Employees whose disability is caused or contributed to by pregnancy, miscarriage, abortion, childbirth, or recovery there from, may use sick leave credits the same as for any temporary illness or injury. In situations involving extended sick leave and/or leave without pay, the following conditions apply:
   a. Application is made, supported by a physician's statement, addressing the employee's physical condition relative to the
employee's work. The statement must indicate the date sick leave is to start and the anticipated date of return to work.

b. If the employee does not apply for leave and the Sheriff or designee believes the employee is unable to perform the employee’s duties or the employee’s general health is impaired, the employee shall be required to undergo a physical examination by a County selected physician. The cost of such examination will be borne by the County. Should such examination report recommend it, a mandatory leave shall be imposed on the employee for the duration of the disability.

c. If after application for leave and thereafter, all accrued credits are exhausted, the employee shall be considered to be on an approved leave without pay. The courts have recognized that 16 weeks leave is standard; however, in other than "routine pregnancies" with a doctor's statement, this time may be extended.

7. Disability. Leave due to temporary or permanent disability shall not limit the employee's right to use sick leave, vacation or any other benefit the employee is entitled to other than regular salary.

a. Employees who are unable to perform their duties due to physical or mental incapacity are subject to dismissal, suspension or demotion. Sick leave credits may be used by permanently disabled employees until all credits are exhausted, or until the employee is officially retired by the Retirement Board, subject to the following conditions:

• An application for retirement has been filed with the Retirement Board by the date that the accrued credits expire or Workers' Compensation "4850 Time" lapses.

• Satisfactory medical evidence of such disability is received by the Sheriff or designee within 30 days of the start of sick leave usage.

• Such medical evidence is subject to review by the Sheriff or designee, who may terminate such sick leave if it is demonstrated the employee is not disabled, or when the medical evidence is insufficient, or where the above conditions are not met.

b. The Sheriff or designee may require the employee to undergo a physical, medical and/or psychiatric examination by a County selected physician. The cost of the examination will be borne by the County. If the examining physician recommends that treatment and/or leave are in the best interest of the County or the employee to overcome any disability, the Sheriff may direct the employee to take such leave and/or undergo such treatment. The Sheriff or designee may require the employee to undergo a physical, medical and/or psychiatric examination by a County
selected physician if there is reason to believe that an employee has physical or mental health conditions which endangers the health or safety of the employee, other employees, the public, or impairs the employee’s performance of duty.

c. Before an employee returns to work from any absence for illness, injury, disability leave or other leave of absence, exceeding two weeks in duration, the Sheriff may order the employee to undergo at County expense a physical, medical and/or psychiatric examination by a licensed physician. If the report shows that such employee is physically or mentally incapacitated for duty, the Sheriff may take the necessary action in accordance with the applicable Memorandum of Understanding.

8. Baby Bonding. Up to 12 weeks of unpaid, job protected leave to be used within the first year, to bond with a newborn, or child placed with employee for adoption or foster care.

9. Sick Leave Use While on Vacation. Use of sick leave while on vacation will not be allowed except under extenuating circumstances and with the approval of the County Administrator and the Sheriff or designee. Request for such approval must be submitted and approved through appropriate supervisory channels.

C. INVALID REASONS FOR SICK LEAVE USAGE.

1. Tiredness, restlessness, muscular fatigue, etc., are not valid reasons.

2. Self-caused illness such as intemperance (hangover), self-inflicted injuries, or illness or injury resulting from willful misconduct are not valid reasons unless special approval is granted by the Bureau Assistant Sheriff, Undersheriff or Sheriff.

D. ACCRUAL OF SICK LEAVE.

1. Sick leave credits accrue at the rate of eight working hours credit for each completed month of service. Employees who work a portion of a month are entitled to a pro-rata share of the monthly sick leave credit computed on the same basis as partial month compensation.

   a. Employees with permanent status and employed on a regular part-time basis receive sick leave credits in the same ratio as full-time employees based on the number of hours worked.

   b. Permanent part-time employees employed periodically and irregularly at hourly pay are not entitled to sick leave.

2. Unused sick leave credits accumulate from year to year.

3. Upon retirement, an employee's accrual is converted to service time on the basis of one day of service credit for each day of accrual.

4. Upon separation, other than through retirement or lay-off, an employee's sick leave shall be canceled. Sick leave credits will be restored if the employee is reemployed from a layoff in a permanent position within their eligibility period.
E. ADMINISTRATION OF SICK LEAVE.

1. The Office of the Sheriff is entitled to the assurance that the sick leave privilege is being properly used. To ascertain the propriety of claims, the Office of the Sheriff management may use one or more of the following procedures:
   a. Call the employee, the employee's family or attending physician to verify employee’s medical visit;
   b. Obtain the employee's signature on the Absence/Overtime Record to legitimize the claim;
   c. Obtain a physician's certificate covering the absence(s) indicating the employee was incapacitated;
   d. Obtain a periodic statement of progress and medical certification in absences of an extended period;
   e. Write a letter of inquiry to the absent employee, enclosing a form to be completed, signed, and returned; and/or
   f. Require an employee to have a physical examination performed by a County doctor.
      g. A Division Commander may require any employee to provide a medical verification of illness for use of sick leave.

2. A medical certificate may be required for any duration if an employee is absent from duty frequently or habitually or there is reason for suspecting the privilege is being excessively used.

3. The Office of the Sheriff is entitled to notification of an employee's whereabouts while on sick leave.

4. A holiday occurring while an employee is on sick leave will be counted as a holiday and not sick leave.

IV. PROCEDURE 1.

A. EMPLOYEE RESPONSIBILITIES.

1. Employees of a 24-hour Division or Unit shall notify their Supervisor as soon as it is apparent they will not be able to report for their shift. By Division:
   a. Patrol Division: Station Commander/Station Sergeant
   b. Detention Division:
      • Martinez Detention Facility - Operations Sergeant or Shift Supervisor.
      • Marsh Creek Detention Facility - Shift Supervisor, Deputy on duty.
      • West County Detention Facility - Operations Sergeant or Processing/Custody Sergeant.
   c. Technical Services Division: Unit Manager, Shift Supervisor, Dispatcher on duty.
d. Coroner's Division: Deputy on duty.
e. Forensic Services Division: Unit Manager, Lead on duty.

2. Employees in Divisions or Units not staffed 24 hours shall call their respective Manager or Supervisor as soon after the opening time as possible. If the Supervisor is unavailable, employees will leave a phone number where they may be reached.

3. Employees who are not able to reach their respective Supervisor/Manager will call the Sheriff’s Central Communications Center, leaving a phone number for contact or a reason why they cannot be contacted when the Supervisor/Manager is able to call back. It will be the responsibility of the Dispatcher receiving a sick call from an employee to notify the appropriate Supervisor/Manager as soon as possible.

4. Employees are expected to keep their Division Commander informed of the current status of their injury, illness or disability, and to provide an estimated return to duty date so replacement scheduling can be accomplished.

5. Text messages, emails and other such electronic notifications are not acceptable means of notification, Employees must speak to a supervisor or manager when calling in sick.

V. PROCEDURE 2.

A. SUPERVISOR RESPONSIBILITIES.

1. Recording Sick Leave.
   a. Supervisors receiving notification from an employee reporting an absence for proper sick leave usage shall:
      • Ensure a sick leave form (AF-23) is completed.
      • Forward the completed form to the Division Commander.
      • Obtain employees’ signature upon their return.
   b. Call Back Procedure:
      • Upon notification from another source that an employee called in sick, the Supervisor will call the employee to ascertain the length of illness.

VI. PROCEDURE 3.

A. DIVISION COMMANDER RESPONSIBILITIES. The Division Commander will monitor sick leave usage and take appropriate action to correct and prevent any excessive use of the sick leave privilege.

1. The payroll clerk will be directed to record approved sick leave.
I. POLICY.
   A. The Sheriff provides Temporary Modified Duty (TMD) to facilitate the return of employees unable to perform their job to full duty. The specific purpose of this Policy is to efficiently coordinate the placement of these employees into assignments by establishing a protocol. All employees who have suffered industrial injuries or illness are governed by Contra Costa County’s “Return To Work Policy for Industrial Injury or Illness.”

II. DEFINITIONS.
   A. GENERAL EMPLOYEE. Refers to permanent employees who are not safety personnel.
   B. PHYSICIAN'S STATEMENT OF ABILITY TO WORK. County Form AK142.
   C. SAFETY EMPLOYEE/PERSONNEL. Refers to a Deputy Sheriff or Deputy Sheriff Sergeant.
   D. TEMPORARY MODIFIED DUTY. Temporary Modified Duty (TMD) is a temporary work assignment provided to employees who cannot perform their regular job duties. The assignment will be for a maximum of nine months, and is provided while an employee is pregnant with a serious health condition, or recuperating from an injury, major illness, or medical impairment. TMD shall be for those employees with a specific return to work date.
   E. TEMPORARY MODIFIED DUTY ASSIGNMENT AND EXTENSION FORM. County Form AK143 (Modified)
   F. TEMPORARY MODIFIED DUTY COORDINATOR. Director of Personnel Services as designated by the Sheriff.
   G. TEMPORARY STATEMENT OF ABILITY TO WORK. Refers to a physician's or hospital's form stating an employee can work on a limited basis. This statement may be used temporarily until an AK142 can be completed.

III. GENERAL.
   A. The Temporary Modified Duty Policy of the Sheriff's Office has been established in conjunction with and conforms to the County Light-Duty Policy.
1. The general purpose of the TMD policy is to facilitate the return of employees who are unable to perform their jobs to full duty by providing safety personnel meaningful work assignments which have been identified as a high priority by the Sheriff/Undersheriff and providing general employees with temporary modification of tasks within their position.

   a. Safety personnel who are injured on the job under the provisions of Labor Code Section 4850, general employees with industrial injuries, and employees with non-industrial injuries or medical impairments shall be eligible for TMD.

2. In addition to efficiency, the Sheriff believes that an effective TMD policy can benefit morale. Most employees want to remain useful and return to productive employment as soon as possible. There is a physical and psychological advantage to the employee being assigned to useful, productive work. This Policy will provide opportunities for the employee to contribute to the Sheriff’s Office.

3. The Office of the Sheriff may temporarily modify the duties or location of an injured or medically impaired general employee, to allow that employee to work in his/her same position for the duration of the injury or medical impairment, if it is mutually beneficial. The modification or moving of work assignment for a general employee must be reported to the TMD Coordinator and approved by the Sheriff/Undersheriff. The same time frames for review and duration will apply. TMD may be denied if the employee cannot perform an essential task or job function. The AK142 and AK143 Forms are to be submitted as required by this Policy.

   B. Medically impaired employees will be entitled to consideration for a TMD Assignment when released by a physician. It will require completion of an AK142 Form by the attending physician with a projected return-to-work date.

   C. An employee will be assigned to TMD according to the Sheriff’s Office needs as determined by the TMD Coordinator and approved by the Sheriff/Undersheriff. Sworn personnel on TMD will not have their time counted as patrol or detention time.

   D. TMD assignment records will be available to Supervisors and involved employees at any time.

   E. If TMD within the prescribed medical limitations is offered but refused by the employee, the Sheriff may restrict sick leave, continuing pay, disability benefits, or take other action in accordance with County policy.

   F. If a conflict in medical opinion exists regarding the employee’s capacity for TMD, the Sheriff or Undersheriff shall determine if the employee will be offered TMD, or if a third medical opinion will be solicited.

   1. If an employee is disabled due to psychological factors, the employee will not be assigned to TMD until evaluated to determine his/her ability to perform the function of the TMD position.

   G. There are no permanent TMD assignments in the Sheriff's Office. TMD is a temporary duty provided to employees whose medical prognosis contains a
specific return to work date. TMD may be provided on a part-time as well as full-time basis. Part-time duty will not be less than two (2) hours per day.

H. Injuries or disabilities two weeks or less are inappropriate for a TMD assignment. Division Commanders are responsible for modified duty assignments of less than two weeks. However, all modified duty assignments are to be reported to the TMD Coordinator on the AK143 Form.

I. APPLICATION FOR TEMPORARY MODIFIED DUTY.

1. Any time an employee is injured, or otherwise unable to perform a full duty assignment, the Division Commander will report this information to the TMD Coordinator using the Form AK143.

2. A designated TMD pool is established for safety employees who are expected to be medically impaired for more than a two week period.

3. It is the responsibility of the employee to obtain medical/work status reports describing the medical restrictions and prognosis of the injury, and complete all forms defined in this Policy.

4. Employees shall obtain and submit a Physician's Statement of Ability to Work Form or Work Status Report after each medical appointment. In non-industrial cases, any fee charged for completion of these forms will be paid for by the employee. The Physician's Statement of Ability to Work Form/Work Status Report must be submitted by the employee to the Division Commander and the TMD Coordinator immediately after each medical appointment. The form/report must be delivered to the TMD Coordinator before TMD can be authorized. A TMD assignment may be started based on a physician's preliminary statement of ability to work when completion of the Physician's Statement of Ability to Work Form is delayed.

5. Deputies with an industrial injury or medical impairment less than two weeks will not be placed in the TMD pool, but may be assigned as needed within their Division. These short duration injuries and assignments must be reported to the TMD Coordinator at the time of assignment via email. Should the injury or medical impairment extend beyond the two weeks, the Deputy shall be placed in the designated TMD pool.

6. The TMD Coordinator is responsible for updating the condition of the employee at appropriate intervals through contact with Risk Management and/or recommending the scheduling of medical examinations to the Sheriff's Chief of Management Services.

J. TEMPORARY MODIFIED DUTY ASSIGNMENTS.

1. Upon receipt of both the AK142 and AK143 Forms, and prior to assignment, the TMD Coordinator will evaluate and determine if the employee meets TMD requirements. The TMD Coordinator’s decision will be final.

2. The employee may be assigned to any shift or schedule to meet the needs of the position and the Office of the Sheriff.
3. The TMD Coordinator will make TMD assignments for Deputies on the following criteria:
   a. Qualifications of Deputy to handle a particular assignment (skill and experience);
   b. Matching those Deputies with longer term medical conditions with assignments where continuity of personnel is important.

4. TMD assignments will be made in 90 day blocks by the TMD Coordinator after final approval is given by the appropriate Commander. Review will occur after each successive ninety (90) days. In no event will any TMD period exceed a combined total of nine months in any 18 month period.

IV. PROCEDURE 1.

   A. EMPLOYEE’S RESPONSIBILITY. Employees shall inform their Division Commander and TMD Coordinator when they are not capable of fully performing assigned duties.
      1. The employee will obtain and have his/her physician complete a Physician's Statement of Ability to Work Form or Work Status Report.
      2. The employee will submit the completed form/report to his/her Division Commander and TMD Coordinator immediately after being released for limited duty.

V. PROCEDURE 2.

   A. DIVISION COMMANDER RESPONSIBILITIES.
      1. The Division Commander or designee will ensure the employee submits the Physician's Statement of Ability to Work/Work Status Report and determines the employee’s eligibility for TMD.
      2. Once a medical determination is made that an employee is capable and eligible for TMD, the information and documentation must be reported to the TMD Coordinator.
         a. For employees, if the injury or impairment is for two weeks or less, the Division Commander will make a Division assignment. A Temporary Modified Duty and Extension Form will be completed and submitted with the Physician's Statement of Ability to Work Form to the TMD Coordinator via the Bureau Assistant Sheriff.
         b. For employees, if TMD is for more than two weeks, the Division Commander will submit the Physician's Statement of Ability to Work Form/Work Status Report via the Bureau Assistant Sheriff to the TMD Coordinator.
         c. When any Division Commander has an employee in need of a TMD assignment of more than two weeks, he/she will complete a Temporary Modified Duty Assignment and Extension Form, and forward it, via the Bureau Assistant Sheriff to the TMD Coordinator.
d. Extensions of TMD assignments require a new Physician's Statement of Ability to Work Form/Work Status Report. The extension must be approved by the appropriate Bureau Assistant Sheriff.

VI. PROCEDURE 3.

A. TEMPORARY MODIFIED DUTY COORDINATOR’S RESPONSIBILITIES.

1. The TMD Coordinator will maintain a log and coordinate all TMD assignments of more than two weeks for general members and safety employees.

2. For assignments of more than two weeks, the TMD Coordinator will determine if an identified position is available and if the employee possesses the training and skills for the temporary assignment or will be able to acquire the skills in a short period of time.

3. If more than one position is available for an employee, priority will be given to a position which will reduce overall expenditures. Final approval of the assignment is the responsibility of the Undersheriff.

4. Once an assignment has been selected, the TMD Coordinator will have the appropriate Division Commander notified and a signed copy of the Temporary Modified Duty Assignment and Extension Form sent to the employee and the Supervisor of the TMD assignment.

5. The TMD Coordinator will provide copies of all forms and report all issues of conflicting medical opinions, employee refusals, and pay restrictions to County Risk Management.

   a. The TMD Coordinator will monitor each TMD assignment on a monthly basis to determine the appropriateness of continuing the assignment.

   b. The TMD Coordinator is responsible for monitoring the employee’s condition at appropriate intervals and reporting any changes to the Bureau Assistant Sheriff/Division Commanders involved.

   c. When the employee has recovered and is cleared for full duty, the TMD Coordinator will direct a reassignment memo to the employee and route copies to the involved Division Commanders, via the Bureau Assistant Sheriff, and to Risk Management.

   d. The TMD Coordinator must review and approve modification of job assignments for employees.
## I. POLICY.

A. Permanent and certain temporary employees are entitled to up to a total of 12 weeks of unpaid leave per “rolling” 12-month period for qualifying events as defined in the Federal Family and Medical Leave Act of 1993 (FMLA). It is the employee’s responsibility to request FMLA. Certain bargaining units allow for up to 18 weeks in a “rolling” 12-month period. It is the Office of the Sheriff’s responsibility to determine when a leave request qualifies as FMLA and to inform the employee, in writing, of that designation, even if the leave is not specifically requested as FMLA leave by the employee.

## II. DEFINITIONS.

A. **CHILD.** A biological, adopted or foster child, stepchild, legal ward, conservatee or a child who is under eighteen (18) years of age for whom an employee stands in loco parentis or for whom the employee is the guardian or conservator, or an adult dependent child of the employee who is incapable of self-care due to a mental or physical disability.

B. **COMPARABLE POSITIONS.** A position with the same or similar duties and pay which can be performed at the same or similar geographic location as the position held prior to the leave.

C. **DOMESTIC PARTNER.** An unmarried person, eighteen (18) years or older, to whom the employee is not related and with whom the employee resides and shares the common necessities of life.

D. **FMLA MEDICAL CERTIFICATION.** Refers to Sheriff’s Office Form FMLA Certification of Health Care Provider/FMLA Verification of Illness of Employee.

E. **PARENT.** A biological, foster or adoptive parent, a step-parent, legal guardian, conservator, or other person standing in loco parentis to a child.

F. **SERIOUS HEALTH CONDITION.** An illness, injury, impairment, or physical or mental condition that involves one of the following:
1. Hospital Care - Inpatient care (i.e., an overnight stay) in a hospital, hospice or residential medical facility, including any period of incapacity or treatment in connection with or consequent to the inpatient care.

2. Absence Plus Treatment - A period of incapacity of more than three consecutive calendar days that also requires treatment two or more times by a health care provider or treatment plus a regimen of continuing care under the supervision of the health care provider.

3. Pregnancy - Disability due to pregnancy and prenatal care.

4. Chronic Conditions Requiring Treatment - Requires periodic visits for treatment by a health care provider, continues over an extended period of time and may cause episodic rather than continuing periods of incapacity (e.g., asthma, diabetes, epilepsy).

5. Permanent/Long-Term Conditions Requiring Supervision - Incapacity which is permanent or long-term due to a condition for which treatment may not be effective (e.g., Alzheimer’s, a severe stroke, or the terminal stages of disease).

6. Multiple Treatments (non-chronic conditions) - Includes treatment and period of recovery from treatment for restorative purposes after an injury, or for prevention of a condition that would likely result in a period of incapacity of more than three consecutive days without intervention or treatment (e.g., chemotherapy, physical therapy, dialysis).

7. Unless complications arise, a common cold, flu, earaches, upset stomach, minor ulcers, non-migraine headaches, routine dental or orthodontia problems, and periodontal disease are not ordinarily considered “serious health conditions.”

G. SPOUSE. A partner in marriage as defined in California Civil Code Section 4100.

III. GENERAL.

A. FAMILY AND MEDICAL LEAVE ACT (FMLA) OVERVIEW.

1. County permanent or temporary employees may be eligible if they have been employed with the County for at least 12 months and have worked 1250 hours within the 12 months immediately preceding the commencement of leave.

2. Qualifying reasons for FMLA leave are:
   a. Employee’s own serious health condition which renders the employee unable to perform the essential functions of the position.
   b. To care for employee’s seriously ill child, parent, spouse or domestic partner.
   c. To care for employee’s newborn within one year of birth.
   d. To care for employee’s adopted or foster child within one year of placement.
3. FMLA Medical Certification will be required for leaves involving the serious health condition of the employee or employee’s family member.

4. Maximum FMLA leave available for an eligible employee is 12 or 18 weeks in a “rolling” 12-month period, depending on the employee’s M.O.U. Leave may be taken on an intermittent regular or irregular basis, or may include reduced work schedules depending on the specific circumstances and situations surrounding the request for leave.

5. Leave designated as Pregnancy Disability Leave is not considered part of the 12 or 18 week FMLA leave.

6. Employees receiving Workers’ Compensation Disability benefits under Labor Code 4850 will not have their leave considered part of the 12 week FMLA leave.

7. When both mother and father work for the County, leave based on the birth, adoption or foster care of a child is limited to a total of 12 or 18 weeks. Employees covered under DSA are entitled to 12 weeks each in any “rolling” 12-month period.

8. The employee is entitled to unpaid leave. It is the employee’s decision to use accruals. Accruals may be used as follows and will count toward the 12 or 18 week entitlement:
   a. Sick leave accruals can only be used as allowed under Office of the Sheriff Policy Section 1.04.63, Sick Leave.
   b. Sick leave accruals must be used first for an employee’s own serious health condition and may be used for family care if allowed under Office of the Sheriff Policy Section 1.04.63, Sick Leave.

9. If FMLA leave is unpaid, the County will continue its contribution for the employee’s health care coverage, provided that the employee was a member of one of the group health plans prior to the commencement of FMLA leave and that the employee makes timely payments of his or her health care contribution. A Request for Leave of Absence Form (AK14) must be submitted by the employee.

10. The employee will be reinstated to the same or comparable position if return to full duty is after no more than 90 work days or 720 hours if on a reduced or intermittent work schedule, including accruals.

11. Employees are entitled to 12 or 18 weeks of FMLA leave in a “rolling” 12-month period looking back from the first day of the new leave period being requested. In other words, any time an employee requests FMLA leave, his or her entitlements should be any remaining balance of the 12 or 18 weeks which had not been used during the immediately preceding 12 months.

12. Additional Information regarding leave for active duty of a family member and leave to care for an injured or ill service member may be obtained from the Personnel Unit.
IV. PROCEDURE 1.

A. EMPLOYEE RESPONSIBILITIES.

1. To request FMLA leave, or when determined by the Office of the Sheriff that a Leave qualifies as FMLA, an Absence Report Form (AF-23) must be submitted with the FMLA section completed. When foreseeable, the form must be submitted 30 days in advance of the leave, or as soon as practical when leave is not foreseeable.

2. If all or a portion of the FMLA leave is unpaid and the unpaid leave exceeds two weeks in duration, the employee is responsible for submitting a Request for Leave of Absence Form (AK14) to his or her Supervisor.

3. FMLA Medical Certification from a health care provider for leave taken for the serious health condition of the employee or a family member must be submitted in advance if foreseeable. If Sheriff’s Office FMLA form is not used, a medical certification signed by an acceptable health practitioner must include the following:
   a. For employee’s own serious health condition, certification must include the serious health condition that applies to the employee, date of commencement of health condition, and probable duration of employee’s incapacity. The Sheriff’s Office may require an employee to obtain a second and third opinion by a County doctor regarding the need for medical leave.
   b. For a family member’s serious health condition, certification must include beginning and probable duration of condition, estimated time employee is needed to render care or supervision, and statement that a family member is needed to provide care during this period of treatment or supervision.
   c. FMLA medical certification must be submitted within 15 days of the request for such leave. If certification is not received, leave can be delayed or denied.

4. When submitting for FMLA leave due to the birth, adoption or placement of a child into foster care, employee must advise his or her Supervisor if both mother and father (wife or husband) work for the County.

5. If leave is taken for an FMLA reason but the Sheriff’s Office was not aware of the reason, and the employee desires that the leave be counted as FMLA leave, the employee must notify the Sheriff’s Office within two business days of returning to work of the reason for the leave.

6. Employees are responsible for keeping their Supervisor apprised of their status during their leave.

7. Supervisors shall afford any individual identified in an employee’s communications with the Office of the Sheriff regarding that employee’s FMLA leave or benefits under other programs permitting an employee to take time off from work for the care of another, including but not limited to family members, domestic partners, or others, the same manner, type
and level of privacy protection as is afforded by law to employees with respect to their own medical information.

V. PROCEDURE 2.

A. DIVISION COMMANDER’S RESPONSIBILITIES.

1. Immediately forward all FMLA leave requests to the Personnel Unit’s Director of Support Services.

2. If an employee requests FMLA leave, but is unable to sign the FMLA section of the Absence Report Form, the Division Commander will note that on the FMLA employee signature line.

3. If the Division Commander knows the reason for the leave, but is waiting for confirmation that the leave qualifies under FMLA, or for a requested FMLA Medical Certification, that information shall be forwarded to the Personnel Unit’s Director of Support Services.

4. The Division Commander will inform the Director of Support Services of all pertinent information regarding an employee’s continued eligibility for FMLA leave.

5. The Division Commander shall afford to any individual identified in an employee’s communications with the Office of the Sheriff regarding that employee’s FMLA leave or benefits under other programs permitting an employee to take time off from work for the care of another, including but not limited to family members, domestic partners, or others, the same manner, type and level of privacy protection as is afforded by law to employees with respect to their own medical information.

B. PERSONNEL UNIT RESPONSIBILITIES.

1. The Personnel Unit’s Director of Support Services shall give written approval or denial of FMLA leave within two business days of receipt of the request.

2. If the reason for the leave is known, but the Division is awaiting confirmation that the leave qualifies under FMLA, or for a requested FMLA Medical Certification, a “preliminary designation” of FMLA leave should be made which becomes final when the requisite information is received. If the requisite information is not received, the FMLA designation will be withdrawn with written notice to the employee.

3. If an employee is already on paid leave for an FMLA qualifying event when the Personnel Unit learns the reason for the leave, the Personnel Unit will notify the employee that the paid leave is designated and will be counted as FMLA leave.

4. The Personnel Unit may designate leave as FMLA leave after the employee has returned to work only if the employee was absent for an FMLA reason and the Personnel Unit did not learn the reason for the absence until the employee returned. Within two business days of the employee’s return to work, the Personnel Unit must designate the leave
retroactive to the first day of the leave with appropriate notice to the employee.

5. A copy of all approved, preliminarily approved, and disapproved FMLA leave requests will be maintained by the Personnel Unit.

6. FMLA leave shall not be considered as a negative factor in employment, promotions or disciplinary decisions.

7. The Personnel Unit shall afford to any individual identified in an employee’s communications with the Office of the Sheriff regarding that employee’s FMLA leave or benefits under other programs permitting an employee to take time off from work for the care of another, including but not limited to family members, domestic partners, or others, the same manner, type and level of privacy protection as is afforded by law to employees with respect to their own medical information.
I. POLICY.
   A. The Sheriff supports the rights and requirements of Veterans and Military Reserve employees.

II. GENERAL.
   A. MILITARY RESERVIST OBLIGATIONS. To fulfill the obligations of active duty training, a Military Reservist or National Guardsman must perform a minimum of two weeks annual active duty and is expected to attend one drill weekend each month (I.D.T.: Inactive Duty Training).

   B. DEPARTMENT RESPONSIBILITIES.
      1. The Sheriff’s Office provides up to 171 hours (for 40 hour/week employees) and up to 240 hours (for 56 hours/week employees) of paid military leave each fiscal year. Active duty military leave must be supported by appropriate orders placing the employee on active duty. If additional military leave is required, the employee, upon request, may use his/her vacation or similar accruals in lieu of being absent without pay (A.W.O.P.). Sick leave accruals cannot be used.

      2. Drill weekends are not routinely supported by orders placing the employee on active duty. An employee may request the use of accrued leave or shift trades to attend drill weekends. Organizational impacts (replacement by overtime, workload, etc.) must be assessed before approval of the request.

      3. If the organizational impact is replacement by overtime then the employee may be released absent without pay (A.W.O.P.) or accrued leave.

   C. MILITARY RESERVE LIAISON COORDINATORS. The Sheriff strongly supports the National Committee for Employer Support of the Guard and Reserve (NCESGE), and therefore has established a collateral duty position within the Sheriff’s Office organization. This position is designed to assist all employees in matters relating to Military Reserve and Guard. Should there be a
problem in this area; contact should be made with the Military Reserve Liaison Coordinator. Problems should be addressed through the employee's chain of command. The Chief of Management Services will maintain a list of those currently designated as Military Reserve Liaison Coordinators.

III. PROCEDURE 1.
A. EMPLOYEE/RESERVIST RESPONSIBILITIES. Employees will provide their Division Commander via the chain of command with:
   1. A DD214 or written documentation of military reservist affiliation (i.e., branch of service, unit, etc.);
   2. A Schedule of Annual Active Leave, as well as, Weekend Drills;
   3. Complete and submit a Request for Leave of Absence Form (AK14) for all active duty periods; and
   4. Provide the Division Commander via the chain of command with military orders for active duty as soon as they are available.

B. EMPLOYEE RESPONSIBILITY. All attempts should be made to provide as much prior notification regarding your leave as possible. Lack of prior reasonable notice could result in a forfeiture of military leave benefits.

IV. PROCEDURE 2.
A. SERVICE VERIFICATION. Employees will provide to the Personnel Services Unit, Administrative Services Bureau, a copy of their military "Leave and Earnings Statement" ("LES") showing payment for Reserve duty on the dates of their approved military leave.

B. PAYROLL DEDUCTION. No deduction shall be made from an employee's otherwise due and payable payroll for non-receipt of the LES until such form is still outstanding for 45 days from the earliest approved military leave date. Upon the submission of the LES, showing appropriate Reserve service, any amounts deducted from the employee's pay will be reinstated in the next scheduled payroll.
I. POLICY.
   A. Employees shall only engage in secondary employment or business activities that are not prohibited, with approval of the employee’s Division Commander and Bureau Assistant Sheriff.

II. GENERAL.
   A. Working secondary employment is a privilege, not a right, and will require approval from an employee’s Division Commander, Bureau Assistant Sheriff, and the Undersheriff. Approval will be contingent upon the employees carrying out their duties to the satisfaction of the Bureau Assistant Sheriff.

   B. Employees engaging in secondary employment must recognize that their primary obligation is to the Office of the Sheriff. Employees are subject to call at any time for emergencies, special assignments or overtime duty. Secondary employment must not infringe on these obligations.

III. PROCEDURE 1.
   A. EMPLOYEE’S RESPONSIBILITIES.

      1. Application. Employees seeking approval for outside employment or private business enterprises must submit an Outside Employment Application.

         a. The Form will contain the following information:

            • The employee’s name, employee number and Division assigned.
            • The name, address and telephone number of the prospective employer/private business/independent contractor.
            • The number of hours per day and per week dedicated to the outside employment/business.
            • A brief resume of the type of work to be performed or, in the case of private business, the type of products and services provided.
• Space for approval of the application.

2. Written Permission. Employees will not engage in secondary employment or any other business or calling without prior written permission from their Division Commander and Bureau Assistant Sheriff.

3. Changes. Permission to engage in secondary employment will be solely for the specific employment for which the request is submitted and approved. Permission remains valid for one year or until revoked by the Bureau Assistant Sheriff, or the employment has ended. If there is a change of an employer or a substantial or material change in the duties of the employment, the employee will immediately submit a new request.

4. Routing. The Application for Outside Employment/Private Business Form shall be routed to the employee's Division Commander and Bureau Assistant Sheriff via the chain of command.

5. Application Renewals. Applicants shall be responsible for seeking renewal by submitting a new request prior to December 31st of each calendar year.

6. Appeals. If the employee’s request for secondary employment is denied, the employee may appeal the decision in writing to the Undersheriff. The decision of the Undersheriff will be final.

7. Attention to Duty. During normal work hours, employees will devote their entire time and attention to the efficient performance of Sheriff’s Office business and not engage in any other business or calling. Sheriff’s Office phone numbers are not to be used as a referral number concerning secondary employment.

8. Labor Disputes. Employees will not accept secondary employment in a business or occupation where the employees are on strike or are “locked out” by their employer. Employees presently working as security guards or in positions requiring security responsibilities are advised that during a strike or labor disturbance at their place of secondary employment, they will neither continue to work nor will they engage in any picketing.

IV. PROCEDURE 2.

A. APPROVAL OR DENIAL.

1. The request requires the approval of the employee's Division Commander, Assistant Sheriff and the Undersheriff. The request may be denied for any of the reasons set forth in Procedure 4.

   a. The original request will be placed in the employee's personnel file.

2. Requests indicating a possible conflict of interest will be reviewed by County Counsel for approval or denial.

3. Bureau Assistant Sheriffs will continuously review the performance of their employees who engage in secondary employment. If any employee does not fulfill their responsibility to the Office of the Sheriff satisfactorily, the Bureau Assistant Sheriff will recommend cancellation of secondary employment.
V. PROCEDURE 3.
A. ADMINISTRATIVE SERVICES RESPONSIBILITIES.
   1. A complete list of employees engaged in outside employment/private business will be maintained by the Personnel Unit.
   2. The list will be reviewed on a regular basis.

VI. PROCEDURE 4.
A. BASIS FOR DENIAL OR REVOCATION. A request for secondary employment will be disapproved or an approved request revoked for any of the following reasons:
   1. Disclosure of Records/Documents/Files. The employment causes or is likely to cause the employee to use or disclose official Sheriff’s records, documents or files.
   2. Legal Process. The employment involves service of legal process.
   3. Obligations. There is evidence that the employment would impair or interfere with the employee’s ability to efficiently discharge their Sheriff’s Office obligations, including the ability to work reasonably anticipated overtime assignments.
   4. Conflicts. The employment would create a conflict of interest regarding the employee’s performance in the Sheriff’s Office or would violate policies and procedures of the Sheriff’s Office.
   5. Private Investigations. The employment is of a private investigative nature or connected with a private investigation agency.
   7. Debt Collection. The employment involves the collection of debt.
   8. Taverns/Sale of Intoxicating Beverages. The employment is directly or indirectly connected with the operation of a tavern or sale of intoxicating beverages. For this paragraph, “indirectly” will mean any on-site activity relating to the operation of a tavern or sale of intoxicating beverages.
   9. Hours. The employment is for more than twenty (20) hours in any week. Normally, total secondary employment and Sheriff’s Office overtime cannot exceed 100 hours in any single month, unless there are extenuating circumstances and the Division Commander authorizes the exception.

B. SECURITY GUARD. Requests to engage in secondary employment as a security guard will be reviewed by the Bureau Assistant Sheriffs on an individual basis. Should a request be granted, the employee will be required to comply with Business & Professions Code Section 7582 et seq. (Senate Bill 1375, Chapter 710 (1996)), if applicable. This section of the Bill requires the following:
   1. Active Duty Peace Officer as ARMED Security Guard or Bodyguard must possess a private investigator’s license and a firearm permit or a security guard registration and a firearm permit from the Bureau of
Security and Investigative Services. The officer must have a Private Patrol Operator license to contract directly with consumers.

2. Active Duty Peace Officer as UNARMED Security Guard is exempt from licensing and registration. The employee should contact the Bureau of Security and Investigative Services directly for an application and current information and requirements:

Bureau of Security and Investigative Services

P.O. Box 989002
West Sacramento, CA 95798-9002 (916) 322-4000
www.dca.ca.gov/bsis

VII. PROCEDURE 5.
A. EMPLOYEE RESTRICTIONS.
   1. Display and Use of Office of the Sheriff Issued Equipment.
      a. Equipment. Office of the Sheriff issued equipment will not be used when an employee is engaged in secondary employment.
      b. Office of the Sheriff Uniform. Employees engaged in secondary employment will not wear an Office of the Sheriff uniform or article that would readily identify them as an employee of the Office of the Sheriff without prior approval of the Undersheriff.
      c. Badge and Identification Card. Employees will not display their badge or identification card while engaged in secondary employment, except when necessary to perform an arrest that is not directly related to the secondary employment.
   2. Access to Information. While engaged in secondary employment, employees will not call Warrants, Dispatch or Records, or use Office of the Sheriff computers to obtain information concerning those under arrest or those who might be placed under arrest.
   3. Conflict of Interest.
      a. An employee will not engage in any employment, activity or enterprise for compensation that is inconsistent, incompatible, in conflict with or contrary to their duties and responsibilities of employment with the Office of the Sheriff.
      b. An employee is prohibited from engaging in the use of County time, facilities, equipment, supplies, badge, uniform, prestige or influence for private gain.
   4. Sick, Disability or Temporary Modified Duty.
      a. Sick or Disability Leaves. Employees will not engage in any business or calling while on sick leave with pay or disability leave with pay, unless prior written permission has been received and approved by a Bureau Assistant Sheriff prior to the leave.
      b. Temporary Modified Duty. Employees on TMD may engage in secondary employment. However, the employment will be
carefully reviewed to ensure that it does not interfere with an employee’s recovery and return to full duty.
I. POLICY.
A. Shift trades are at the prerogative of the Office of the Sheriff and are provided for qualified employees as a means to meet the unexpected personal needs of the employee. These transactions are to be considered a privilege and not a right.

II. DEFINITIONS.
A. PAYBACK PERIOD. The allowable time between the first and second half of a shift trade.
B. QUALIFIED EMPLOYEES. Employees involved in a shift trade who are determined by the Supervisor/Manager to be competent and trained to work in a specified work assignment. Factors for consideration include classification of position, and disqualification due to prior identified performance or behavior problems dealing with trades.
C. SHIFT TRADE. An agreement between two employees assigned to the same Division/Facility and qualified to perform each other's duties. Each employee agrees to work one scheduled shift of the other on an agreed upon date.
D. THREE-WAY SHIFT TRADES. A shift trade involving more than two employees.

III. GENERAL.
A. Shift trades are limited to transactions between employees in the same classification and assigned to the same Division/Facility. Each of the two participating employees must be qualified to perform the other's duties.
B. Three-way shift trades are prohibited.
C. The Supervisor will approve or deny shift trade requests within seventy-two (72) hours of receipt.
D. The shift trade must be completed by both employees within 60 days.

IV. PROCEDURE 1.
A. EMPLOYEE RESPONSIBILITY. An employee wishing to initiate a shift trade is responsible for identifying and securing an agreement from a qualified, participating employee. The employee requesting the trade will complete the
necessary document according to instructions and submit it to his/her immediate Supervisor for approval. In the event the requested shift trade involves two shifts that overlap, the participating employees shall also submit Absence Report Forms to account for the overlap period.

V. PROCEDURE 2.

A. SUPERVISOR RESPONSIBILITY. Upon receipt of a shift trade request, the Supervisor, after consulting the other involved Supervisor, will either approve or deny it. Denial may be based upon the operational needs of the Office of the Sheriff. If approved, the Supervisor shall forward a copy of the shift trade agreement to the employees, the appropriate Division Payroll Clerk, and to the second employee's Supervisor.

1. Reasons for denial may include:
   a. Failure to comply with a previous shift trade agreement;
   b. If more than twelve shift trades have been approved during a shift period;
   c. Supervisor's assessment that the shift trade subjects one or both employees to working long hours without a break (i.e. triples, etc.);
   d. Supervisor's assessment that the employees are circumventing the regular sign up system; and
   e. Needs of the Office of the Sheriff.

VI. PROCEDURE 3.

A. FAILURE TO MEET TRADE COMMITMENT. Any employee agreeing to an approved shift trade and failing to meet the commitment may:

1. Be charged for sick leave, if the employee called in sick, or
2. Be A.W.O.P. for the actual shift hours if the failure to report resulted in overtime; and
3. Be subject to Corrective Counseling placement and any further consideration for shift trades shall be subject to review during the course of the phase.
I. POLICY.
   A. Employee seniority records are maintained to provide a basis for seniority credits on promotional examinations, the order of layoffs should they occur, and vacations and shift schedules.

II. DEFINITIONS.
   A. COUNTY SENIORITY. Promotional examination seniority credits are determined by the total County service time. Layoff and displacement seniority is determined by adding the employee's length of service in the class in question to the employee's service time in other classes at the same or higher salary level. The actual ranking of personnel is determined by county regulations and the employees’ Memoranda of Understanding.

   B. LATERALS. Lateral entry Deputies' seniority begins from date of hire. For lateral candidates hired the same day, their respective positions on the lateral hiring list will determine seniority. If the laterals are hired and recruits sworn in on the first day of a month, the recruits shall have seniority over the laterals.

   C. RECRUITS. Recruits are normally sworn in as Deputy Sheriffs upon graduation from the Basic Academy. For seniority purposes, their seniority status does not begin until the first day of the next calendar month, unless they were sworn in on the first day of the month. Sheriff’s Office seniority among graduated recruits is determined by their final overall standing in the Basic Academy.

   D. SENIORITY. Seniority is a ranking of personnel based on the length of continuous service with the County by which certain rights and privileges are attained.

   E. SHERIFF’S OFFICE SENIORITY. Office of the Sheriff seniority is determined by the time in rank or job classification. Office of the Sheriff seniority is the primary consideration for vacation schedules. When governed by Memoranda of Understanding, it is used to select assignments, work location, shifts and/or days off.

III. GENERAL.
   A. COMPUTING SENIORITY.
1. County Seniority.
   a. County seniority is the basis for the computation of layoff lists should they occur and seniority credits for promotional examinations.
   b. Seniority credits are computed at .05% percent for each completed month of continuous service as a permanent County employee preceding the final application filing date for the promotional examination, up to 5% percent total.

2. Office of the Sheriff Seniority. When governed by Memoranda of Understanding, Office of the Sheriff seniority is used to select assignments, work location, shift and/or days off. Sheriff’s Office seniority is also the primary consideration for vacation scheduling within Divisions. Refer to Division manuals for vacation scheduling procedures.
   a. Vacations are scheduled by each Division, after considering Office of the Sheriff needs.
   b. In the event employees are transferred from one Division to another, their rank seniority from date of employment or promotion will remain the determining factor for vacation scheduling.
   c. The Division Commander receiving a transferred employee will try to accommodate vacations previously scheduled for the transferred employee.

3. Bridged Service Seniority Credits. Employees who have separated from a permanent position in good standing and are reemployed in a permanent position within two years are allowed to bridge County service time for purposes of calculating vacation accruals and service awards, but not for County seniority.
   a. The reemployed employee will receive credit for the total years of permanent County service, not including the period of separation.
   b. Office of the Sheriff seniority is utilized under certain Memoranda of Understanding for vacation and shift bidding and is not necessarily equivalent to County seniority. An employee who separates in good standing from the Office of the Sheriff and is subsequently hired again by the Sheriff, within two years, will be allowed to bridge their seniority for shift and vacation bidding.

4. Anniversary Dates. Each permanent employee has an anniversary date for pay purposes.
   a. New Employees.
      • Six month probation: The anniversary date is the first day of the next calendar month after successful completion of the probation period. If work began on the first scheduled workday of the month, the anniversary
date is the first calendar day of the month probation is successfully completed.

- Probation over six months: The anniversary day is the first day of the next calendar month after successful completion of six months service. If work began on the first scheduled workday of the month, the anniversary date is the first day of the sixth calendar month when the employee successfully completes six months service.

b. Promotion. The anniversary of a promoted employee is determined in the same manner as for a new employee.

c. Demotions. The anniversary date of a demoted employee is the first day of the calendar month after the demotion is effective.

d. Transfers and Reclassifications. The anniversary date of a transferred employee or one whose position has been reclassified in the same salary range remains unchanged.
I. POLICY.
   A. The Retirement Program is a major employment benefit. Qualified employees automatically become members of the County Retirement Association (1937 County Retirement Act).

II. DEFINITIONS.
   A. DEPUTY SHERIFF. Shall refer to all safety employee classifications to include: Deputy Sheriff, Sergeant, Lieutenant, Captain, Criminalist, Supervising Criminalist, Chief Criminalist, Assistant Sheriff, Undersheriff.
   B. HONORABLY RETIRED. Includes all peace officers who have qualified for, and have accepted, a service or disability retirement. Honorably Retired does not include an officer who has agreed to a service or disability retirement in lieu of termination.

III. GENERAL.
   A. COUNTY RETIREMENT.
      1. Civilian employees as general members in the retirement system are covered by the Federal Social Security Program.
      2. Deputy Sheriffs, as safety members in the retirement system, are not covered by the Federal Social Security Program.
      3. General members and safety members are governed by separate deductions and retirement qualifications, based on membership and retirement age.
      4. The Retirement Program is administered by the Retirement Association. The County Treasurer’s Office is a trustee with specific statutory obligations.
   B. DEPUTY SHERIFF RETIREE EQUIPMENT.
      1. Badges and firearms shall be returned to the Training Unit.
         a. At no cost to the employee, the badge will be refurbished, and a ribbon installed at the bottom of the badge that states “retired”.

RELATED ORDERS:
CCCSO 1.07.33; California Government Code Section 31581.1; PC 12027 et. seq.; PC 26300(c)(2); PC 26305; County Employee MOU; Employees Retirement Association.
b. Deputy Sheriffs retiring with a Corporal designation, shall receive a retiree badge indicating “Corporal”.

2. Retiring Deputy Sheriffs shall turn in all Sheriff’s Office issued equipment to the Issuing Division.
   a. To Training:
      • Handgun
      • Three Magazines
      • Trigger Lock
      • Gun Case
      • Flashlight/Battery/Chargers
      • Two Sets of Handcuffs
      • O.C. (Pepper) Spray
      • Leather Duty Belt
      • Holster
      • Magazine Pouch
      • Two Handcuff Cases or One Double Handcuff Case
      • OC Pouch
      • Key Holder
      • Radio Holder
      • Four Keepers
      • Baton/ASP
      • Baton Holder (brass or plastic)/ASP Holder
      • Respirator Mask
      • Ballistic Vest
      • Rain Gear
      • Locked Container (Hornady Lockbox)
      • Taser/Cartridge/Battery/Taser Holster
      • Gas Mask/Filters/Holder
   
   b. To FOB:
      • FOB Card
      • Report Writing Manual
c. To Your Duty Station:

- Department Keys
- Patrol Rifle/Magazine Holder/Three 30 Round Magazines (Patrol Division)
- Active Shooter Kit (Patrol Division)

Any Additional Duty Station Equipment Assigned

3. Department employee identification cards shall be returned to Sheriff’s Administration.

4. The Office of the Sheriff may sell assigned firearms to an honorably retiring Deputy Sheriff, pursuant to the procedure set forth in Policy 1.07.33 (“Purchase of Office of the Sheriff Firearms.”) The Training Unit will process the transfer transaction.

C. RETIREES IDENTIFICATION CARD AND CCW ENDORSEMENT.

1. Sheriff’s Administration will issue the Honorably Retired Deputy Sheriff a new identification card that shall have an endorsement stating “CCW Approved.” The identification card authorizing the retired Deputy to carry a concealed and loaded firearm or an endorsement on the identification card may be revoked or denied by the issuing agency only upon showing of good cause. Good cause shall be determined at a hearing by procedures as set forth by Penal Code Section 12027.1.

2. A Retired Deputy Sheriff may have his or her endorsement to carry a concealed and loaded firearm revoked or denied by violating any departmental rule, or state or federal law that, if violated by an officer on active duty, would result in that officer’s arrest, suspension, or removal from the agency.

3. A Retired Deputy Sheriff may have his or her endorsement to carry a concealed and loaded firearm immediately and temporarily revoked when his or her conduct compromises public safety.

4. A Deputy Sheriff who has retired in lieu of termination will not be issued an identification card or CCW endorsement. A Deputy Sheriff will be considered to have retired in lieu of termination if, at the time of retirement, he/she:

   a. Has been served with a Skelly Notice proposing termination;

   b. Is aware that he/she is the subject of an Internal Affairs Investigation based on conduct likely to lead to termination; or has started a course of events likely to lead to termination.

5. Deputy Sheriffs retired prior to January 1, 1981 are authorized to carry a concealed and loaded firearm unless the identification card states otherwise.

6. Retirees’ identification card renewal dates shall be determined by Sheriff’s Administration.
7. Retiree identification cards are not issued to Deputies who have resigned, nor to those who have deferred retirement, nor those who have activated retirement after deferral.

8. A Retiree identification card will be issued to a Retired Level 1 Reserve Deputy Sheriff who, after 10 or more years of aggregate service, leaves the Office of the Sheriff on or after January 3, 2011. Pursuant to PC §26300(c)(2), the retiree identification card shall include “CCW approved.” The retiree identification card for Level 2 and 3 Reserve Deputy Sheriffs shall not include “CCW approved” unless the retiree has applied for, and been issued, a current CCW Permit by the Sheriff. The Sheriff shall have the ultimate discretion to revoke or deny any CCW endorsement issued under this subdivision pursuant to PC §26305.

D. IDENTIFICATION CARD AND CCW ENDORSEMENT RENEWAL.

1. It is the responsibility of the Retiree to ensure their identification card and CCW endorsement is renewed upon expiration.
   a. Retirees must complete the Retired Peace Officer’s Worksheet when renewing their CCW endorsement with Sheriff’s Administration.
   b. Retirees are required to complete the CCW Firearms Qualification course every three years and present proof of their qualification to Sheriff’s Administration. This qualification course is determined by the Training Unit. However, the retiree can qualify with an Official Range Master at a location of their choice.
   c. Ammunition costs will be the responsibility of the retiree.
   d. Special retiree shoots will be scheduled two times each year by the Training Unit. One of those qualification shoots will correspond with the DSA “Old Timers Night”.
   e. A CCW endorsement will not be issued without the completed Worksheet or Firearm Qualification Form.
   f. Documentation of the above items will be maintained by Sheriff’s Administration in an Identification card/CCW File until notification of the Retiree’s death.

E. RETIREMENT MEMO TO DIVISION.

1. It is suggested that each employee submit a memo to his/her Division Commander not less than 30 days prior to retirement advising of the employee’s intention to retire, in order that retirement paychecks not be delayed.

2. It shall then be contingent upon the Division Commander to ensure that the Undersheriff, the Administrative Services Bureau Assistant Sheriff, the Training Division Captain, the Professional Standards Captain, and the Chief of Management Services receive a copy of the memo immediately.
F. INTERNAL AFFAIRS LIEUTENANT’S RESPONSIBILITIES.

1. Review and approve or deny the completed Retired Peace Officer Worksheet.

2. Ensure a completed qualification form was submitted by the Retiree and verify the qualification shoot if necessary.

3. Provide above documentation to clerical staff for renewal of identification card and CCW endorsement.
I. POLICY.

A. The Sheriff is honored to recognize the dedicated employees of the Office of the Sheriff who have served this Office and Contra Costa County with dedication and enthusiasm. The employees to be recognized have served nobly for a significant portion of their lives, providing valuable services to the community they serve. An Employee Recognition Program is a way for the Sheriff to express his sincere thanks for the contributions of these outstanding employees. Therefore, the Office of the Sheriff has established this program to honor these remarkable people from all job classifications upon their well-deserved retirements.

II. DEFINITIONS.

A. ALL JOB CLASSIFICATIONS. All employees in the Office of the Sheriff to include all sworn and general personnel.

B. HONORABLY RETIRED. All employees who have qualified for, and have accepted, a service or disability retirement. This does not include an employee who has agreed to a service or disability retirement in lieu of termination.

C. RETIREMENT RECOGNITION COMMITTEE. The Committee will be made up of: The Sheriff’s Executive Assistant, the Deputy Sheriffs’ Association Executive Assistant, and other committee members as designated by the Sheriff or his designee.

III. GENERAL.

A. RETIREMENT RECOGNITION.

1. Sworn employees must have a minimum of ten years law enforcement experience with five of those years being with the Office of the Sheriff.

2. General employees must have ten years with Contra Costa County with five of those years in the Office of the Sheriff.

3. The employee must be honorably retired.

4. The decision to recognize any honorably retired Office of the Sheriff employee shall be at the sole discretion of the Sheriff.
5. All employees being recognized will receive the same recognition regardless of job classification or rank.

B. RECOGNITION CEREMONY.
   1. An annual recognition ceremony will be held.
   2. Each employee will be recognized by an introduction and a brief synopsis of his/her career and given a plaque of recognition.

C. RETIREES RESPONSIBILITIES.
   1. The retiree shall notify the Chairman of the Retirement Recognition Committee within two weeks of receiving the invitation if they choose to participate in the dinner/award ceremony.
Chapter Five:

Personnel Management and Employee Relations
I. POLICY.

A. The Sheriff is committed to providing and encouraging Office of the Sheriff employees to participate in training and advanced education on a continuing basis, regardless of position, within the boundaries and dictates of deployment requirements, budgeting restraints and legal mandates. Such training shall provide the knowledge and skills necessary to the successful operation of the Office of the Sheriff, as well as enhance employee development.

II. DEFINITIONS.

A. COMMISSION ON PEACE OFFICER STANDARDS AND TRAINING (POST). POST was established for the purpose of improving the level and quality of law enforcement and professionalism by raising the level of competence among peace officers and improving the administration, management and operation of law enforcement agencies.

B. DESIRABLE TRAINING. Training that advances career development and benefits the overall service to the public by the Office of the Sheriff.

C. DIVISION TRAINING COORDINATOR. One employee from each Division, designated by the Division Commander, responsible for coordinating and scheduling the training requirements of the Division to include acting as the liaison to the Training Lieutenant.

E. ESSENTIAL TRAINING. Training which is necessary to improve the Office of the Sheriff.

F. MANDATED TRAINING. Training which is prescribed by POST, STC., Office of the Sheriff Policies and Procedures, and other governmental agencies.

G. OFFICE OF THE SHERIFF INSTRUCTORS. Those instructors selected, trained and certified by the Training Unit.

H. SPECIALIZED TRAINING. Training which is necessary for the performance of specialized tasks or positions.

I. STANDARDS AND TRAINING FOR CORRECTIONS (S.T.C.). The mission of the S.T.C. program is to raise the level of competence of state correction and
probation personnel and assist local agencies in ensuring that highly qualified selected employees maintain proficiency through training.

J. TRAINING LIEUTENANT. The Lieutenant commanding the Training Unit of the Training Division

III. GENERAL.

A. The training of Office of the Sheriff personnel is decentralized, with the functions shared between Division Training Coordinators and the Training Unit. Each employee is expected to maintain a working knowledge of legal and procedural updates within law enforcement in order to optimize job performance. This will be completed by participating in Office of the Sheriff-sponsored or self-initiated training programs, as well as by training bulletins, posted notices and current publications.

1. Training Unit. Under the direct supervision of the Training Lieutenant, this Unit is responsible for the coordination of all of the mandated, essential, desirable and specialized training for employees. The Unit will advise Division Training Coordinators on scheduled mandated training to ensure compliance. The Unit will maintain required training materials and training records pertaining to training provided through the Training Unit as well as other training certified by the Training Unit as meeting Office of the Sheriff course and content requirements.

B. TRAINING LIEUTENANT’S RESPONSIBILITIES. The Training Lieutenant for the Office of the Sheriff will oversee and administer training programs in a manner designed to meet training needs. He/she will chair the Training Advisory Committee for the Office of the Sheriff. All training involving Office of the Sheriff personnel will be coordinated with the Division Commanders through the various Division Training Coordinators and the Training Lieutenant will advise on matters related to training.

C. TRAINING RESPONSIBILITIES OF DIVISION COMMANDERS. Division Commanders will appoint a Division Training Coordinator to actively participate in the Office of the Sheriff training program. The Division Commanders will notify the Bureau Assistant Sheriffs regarding major conflicts in release time for instructors. The Bureau Assistant Sheriffs will make the final determination pertaining to the resolution of the conflict in release time for any instructor. Division Commanders will ensure that all Office of the Sheriff instructors within their command honor their training assignments regardless of promotion or transfer. Division Commanders will also ensure the completion of mandated training for all Division employees, as well as the completion of Office of the Sheriff Orientation within one year of their date of hire. (See section F.)

D. TRAINING RESPONSIBILITIES OF DIVISION TRAINING COORDINATORS. The Division Training Coordinators shall be members of the Training Advisory Committee. Division Training Coordinators will coordinate essential training for all employees in each of their respective Divisions and ensure that Division training is being completed in a timely and efficient manner. For example, the Detention Training Coordinator will ensure that all employees in the Detention Division receive training to conform to STC standards and other applicable standards, including POST and Office of the Sheriff requirements. Each Division Training Coordinator will act as a liaison to the Training
Lieutenant to ensure mandated training is scheduled and completed for each Division in a timely manner. Specialized training or training which the Division determines to be reasonably necessary to accomplish the job function or as required by law will be scheduled by the Division Training Coordinators and coordinated with the Training Lieutenant.

E. LAW ENFORCEMENT TRAINING CENTER INSTRUCTORS. The Office of the Sheriff is committed to ensuring the highest quality of instruction at the Law Enforcement Training Center. To this end, the Office of the Sheriff shall make every effort to locate and utilize the very best available instructors from this Office and other agencies. Instructors will be trained and certified by the Training Unit to meet the high degree of excellence required by this Office. Instructors will maintain required qualifications in their field of expertise through continual training. Requests to become an instructor are to be directed to the Training Lieutenant via the chain of command.

F. SHERIFF’S OFFICE TRAINING ADVISORY COMMITTEE (T.A.C.). The Training Advisory Committee is composed of one Division Training Coordinator from each Division, the Training Lieutenant or designee from the Training Unit and a Deputy Sheriffs’ Association representative. The Committee will meet on a quarterly basis to identify Sheriff’s Office training requirements, keep abreast of current legal mandates and teaching techniques affecting training, and exchange recent information regarding available training programs. Minutes of the T.A.C. meetings will be distributed to all committee members, Division and Bureau Assistant Sheriff, the Undersheriff and the Sheriff.

G. RESPONSIBILITIES FOR SHERIFF’S OFFICE ORIENTATION TRAINING. All newly appointed employees will receive orientation to the role, purpose, goals, policies and procedures of the Office of the Sheriff. In addition, working conditions, regulations, responsibilities and rights of employees will be included in orientation. The responsibilities for completion of employee orientation will be as follows:

1. The Chief of Management Services or designee will provide information pertaining to benefits, payroll procedures and associated forms.

2. The Training Unit will provide familiarization with Office of the Sheriff policies and procedures and the various operations and locations of Sheriff’s Office facilities.

3. The applicable Division Training Coordinator will provide familiarization with Division policies and procedures and will ensure that all employees are sent to or provided with the complete Office of the Sheriff Orientation and Training Program.
I. POLICY.

A. The Office of the Sheriff must be able to depend upon satisfactory work performance from its employees to achieve Office of the Sheriff objectives. Performance evaluations are the supervisory measurement of the employee’s performance. The primary purpose of performance evaluations is to identify strengths and deficiencies of personnel and establish realistic goals and objectives. Performance evaluations will be completed on all non-probationary employees below the rank of Assistant Sheriff on an annual basis.

II. DEFINITIONS.

A. PROBATIONARY EMPLOYEE. A probationary employee is one who is hired as a permanent employee, or one who has been promoted into a classification above their previous classification, but must complete a specified period of satisfactory performance. The probation period is the final phase of the examination process and is used by the Office of the Sheriff for the observation and evaluation of the employee. The probation period may also be utilized for the rejection of an employee whose performance is unsatisfactory. All probationary employees will receive monthly evaluations for the duration of their probationary period.

III. GENERAL.

A. Performance evaluations provide a vehicle for communication within the organization relative to employee performance concerns and allow for recognition of special skills and training possessed by various personnel. Information generated through performance evaluations may also be useful to encourage an employee to enter into a self-improvement program.

B. STANDARDIZED EVALUATION GUIDELINES.

1. Evaluation standards for Deputy, Sergeant, and non-management general employees are divided into specific areas designed to measure performance in their respective positions. Performance ratings shall be based on, and measured against, the objective guidelines set forth in the performance standards. Ratings in each performance area will be ranked and supplemented by written comments when appropriate. Procedures and instructions for evaluating Deputies, Sergeants, and non-
management general employees will be set forth in the evaluation packages for each respective position. Evaluation forms are located and accessible in SPARKS.

2. In the course of evaluating a subordinate, Supervisors will conduct an evaluation interview with each employee that will include a discussion of identified strengths and weaknesses and establish goals to be met during the next evaluation cycle.

C. TIMELINESS OF EVALUATIONS.

1. Annual evaluations for all employees will be completed each January. Division Commanders will ensure evaluations are properly completed by the end of January.

2. Probationary employees will receive evaluations monthly for the duration of their probationary period.

3. Division Commanders shall be responsible for scheduling evaluations for probationary personnel and will ensure original evaluations are forwarded to Administrative Services for placement in personnel files.

4. An exit evaluation is required at the time of inter-division transfer if four months have passed since the last evaluation.

5. At the discretion of the Division Commander, a more frequent evaluation schedule can be implemented.

6. A performance evaluation may be requested by the Sheriff in conjunction with an employee’s consideration for a promotional opportunity.

D. MAINTENANCE AND UTILIZATION OF PERFORMANCE EVALUATIONS.

1. Evaluation Forms will be maintained in the Office of the Sheriff personnel file for the individual employee. Performance evaluations may be used to review an employee’s performance in conjunction with any or all of the following:
   a. The promotional process;
   b. Transfers;
   c. Disciplinary action; and
   d. Probationary assessment.

E. REQUEST FOR REVIEW OF EVALUATION

1. An employee who is not satisfied with their evaluation may request a review through their chain of command.
I. POLICY.
   A. The Office of the Sheriff uniform is symbolic of the reputation and authority of the Office of the Sheriff. If properly maintained and displayed, it serves to promote the good name and professional image of both the Office of the Sheriff and its personnel. To celebrate this symbol of professional pride, the Sheriff will conduct an annual inspection ceremony. This special day will honor the Office of the Sheriff uniform, various ranks, history and the esprit de corps associated with being a member of the Contra Costa County Office of the Sheriff.

II. GENERAL
   A. ANNUAL INSPECTION CEREMONY.
      1. The Sheriff's Annual Inspection Ceremony is an occasion on which the Sheriff will review uniformed personnel. Sworn personnel will wear the Class “A” Inspection Uniform. General uniformed employees will wear their uniform as described in the Office of the Sheriff Manual. The ceremony will be organized by the Sheriff’s Office Uniform Committee and will be held annually on the third Friday in May. A social gathering for employees, families and friends will be held in conjunction with the ceremony.

   B. DIVISION REPRESENTATIVES.
      1. Each Division will be represented at the ceremony. Division Commanders will represent their respective Divisions, accompanied by at least 10% of their uniformed employees.
I. POLICY.
   A. Employees have the duty to maintain the integrity of constitutional rights established for the public and individuals alike. The preservation of these rights is at the very heart of maintaining and improving the criminal justice system.

II. DEFINITIONS.
   A. CONSTITUTIONAL RIGHTS. Rights guaranteed by the Constitutions of the State of California and the United States of America.
   B. DUTY. The moral obligation to respect the rights of another.
   C. RIGHT. The moral power to demand the action or inaction of another.

III. GENERAL.
   A. Employees shall respect and protect the constitutional rights of the public and individuals alike. Employees shall respect and protect the rights of all members of the public and fellow employees, except when such action would violate the constitutional rights of another. Employees will not knowingly and willfully violate the constitutional rights of any member of the public or fellow employees.
I. POLICY.
   A. To earn the public’s trust, confidence and support, and to effectively meet Office of the Sheriff responsibilities, law enforcement and other Office of the Sheriff services will be provided without prejudice.

II. GENERAL.
   A. EQUALITY OF ENFORCEMENT.
      1. As a public service agency, the Office of the Sheriff has a basic obligation to provide services in a consistent and equitable manner to all members of the public. The Office of the Sheriff also has the duty to protect the public from any misuse of law enforcement authority and to provide equality of law enforcement.
      2. Employees will conduct themselves in a fair, impartial manner while conducting Office of the Sheriff business. All Office of the Sheriff services will be delivered without discrimination as to race, color, national origin, ancestry, physical handicap, medical condition, marital status, sex, gender, gender identity, gender expression, sexual orientation or age.
I. POLICY.
   A. During all Office of the Sheriff law enforcement operations, offenders shall be treated fairly, with impartiality and respect due a member of the public. It shall be prohibited for any member of the Office of the Sheriff to knowingly fraternize with persons under criminal investigation, charged with a crime, in custody, on probation or parole, or recently released from custody.

II. DEFINITIONS.
   A. ARRESTEE. A person in custody by authority of law.
   B. FRATERNIZATION. Association on intimate terms with persons or a group of persons. To become involved in a friendly sympathetic relationship.
   C. IN CUSTODY. Persons being legally housed in any penal facility, legally under arrest or sentence for any crime.
   D. INMATE. A person in custody.
   E. OFFENDER. A person detained or imprisoned for any law violation. The term is inclusive of arrestee and inmate.
   F. SEXUAL RELATIONSHIP. This term encompasses all behavior and activity defined as “sexual activity” in California Penal Code Section 289.6(d).

III. GENERAL.
   A. TREATMENT OF OFFENDERS.
      1. Professional. Employees shall treat all offenders professionally. Employees shall be fair, impartial and consistent and comply with Office of the Sheriff Policies and Procedures when dealing with offenders and enforcing the law.
      2. Medical. Individuals who are under arrest by the Office of the Sheriff who are suspected of ingesting a harmful substance or of being under the influence of a controlled substance and displaying gross, outward symptoms will be taken to the nearest hospital for medical treatment. Any individual identified as having a medical problem, including
ingestion of a harmful substance, who is presented for booking by any agency will be evaluated by the Detention Division medical staff prior to the booking process.

3. Safeguarding Offender/Property. Any employee who has any person(s) in custody, under arrest or detention shall be responsible for the proper safeguarding of that person(s) and any personal property that is in their possession at the time of taking custody.

B. PROHIBITED CONTACTS AND INTERACTION WITH PERSONS IN CUSTODY.

1. Persons in custody may be highly manipulative and constantly looking for ways to compromise the integrity of any person who has access to them from the outside. They may attempt to gain information from staff that could threaten the safety and/or security of all. Consequently, interaction with persons in custody is subject to various restrictions.

2. No employee of the Office of the Sheriff, except with the written approval of the Custody Services Assistant Sheriff, unless acting within the scope of his or her official duties, shall become involved in a business transaction, partnership, romantic, or sexual relationship with any inmate in the custody of the Office of the Sheriff.

3. Employees will not hold unnecessary conversations with any inmate. In answering questions, the employees will be brief, courteous and to the point. All employees shall refrain from discussing an inmate’s case with an inmate except to direct the inmate to appropriate assistance when requested. Under no circumstances is an employee to offer legal advice or assistance in completing legal paperwork. This includes inmate workers.

4. Employees will not discuss with inmates, nor within the presence of inmates, the actions of any peace officer or law enforcement agency unless required as part of a duty requirement and never in a derogatory manner.

5. No employee shall be permitted to have any personal financial dealings with any inmate. There shall not be buying, selling or exchanging of any article of value between them, nor shall any employee be permitted to collect a fee, commission, or gratuity for disposing of any inmate’s property or for any other reason.

6. No employee shall bring into or carry out of any Detention Facility letters, notes, books, packages, notions, cosmetics, tobacco, or any other thing for prisoners confined in the Facility.

C. PROHIBITED FRATERNIZATION.

1. Employees shall not knowingly maintain a personal association with any person(s) who:
   a. Is under criminal investigation, charge, or indictment;
   b. Has an open and notorious reputation in the community for criminal activity;
   c. Is on probation or parole, or;
d. Has recently been released from the custody of any law enforcement facility or other custodial program where such association would bring discredit upon the employee and/or the Office.

D. EXCEPTIONS. Immediate family or relationship by marriage to an employee of the Office of the Sheriff can be considered exceptions to this Policy with respect to fraternization. An employee shall notify his or her Division Commander if the employee is assigned to a custody facility and a relative is an inmate of the facility.
I. POLICY.

A. Employees are entitled to, and will be provided with, a workplace environment that is free from harassment and discrimination. To promote a positive work atmosphere, harassment and/or discrimination against an applicant or employee by any employee will not be tolerated.

II. DEFINITIONS.

A. HARASSMENT. Includes, but is not limited to the following examples:

1. Verbal Harassment: Epithets, derogatory comments or slurs on the basis of race, religion, gender, gender identity, gender expression, national origin, ancestry, disability, medical condition, marital status, sexual orientation, sex or age.

2. Physical Harassment: Assault, impeding or blocking movement, or any physical interference with normal work or movement when directed at an employee on the basis of race, religion, gender, gender identity, gender expression, national origin, ancestry, disability, medical condition, marital status, sexual orientation, sex or age.

3. Visual Forms of Harassment: Derogatory posters, notices, bulletins, cartoons, or drawings on the basis of race, religion, gender, gender identity, gender expression, national origin, ancestry, disability, medical condition, marital status, sexual orientation, sex or age.

4. Sexual Harassment: Any deliberate, repeated or unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature will constitute unlawful sexual harassment when:

   a. Submission to such conduct is made either implicitly or explicitly a term or condition of employment;
b. Submission to or rejection of such conduct by an individual is the basis for an employment decision affecting such individual; or

c. Such conduct has the purpose or effect of substantially interfering with an employee's work performance or creating an intimidating, hostile or offensive working environment.

III. GENERAL.

A. HARASSMENT AND DISCRIMINATION PROHIBITED.

1. The Office of the Sheriff strongly disapproves of any form of harassment and/or discrimination at the workplace. This includes harassment of employees by members of the public or employees from other agencies. Supervisors and Managers will take immediate and appropriate steps to eliminate any harassment coming to their attention and to prevent future harassment from occurring.

2. Employees should be aware that many recent court decisions have awarded personal punitive damages for substantiated cases of harassment and discrimination. Additionally, some courts have concluded that harassment need not be intentional nor directed at the offended person to uphold a complainant's case. Therefore, any employee's conduct that creates an intimidating, hostile or offensive working environment, or has the effect of unreasonably interfering with another employee's work performance is prohibited.

B. DEALING WITH HARASSMENT AND DISCRIMINATION.

1. In the interest of preventing harassment and discrimination and developing a positive, productive work environment, employees are encouraged to keep their workplace and their conduct at work on a professional level. All employees shall respect the rights of their fellow employees and shall discontinue actions or comments at work that are pointed out as offensive to someone else.

2. All employees are encouraged to handle situations involving harassment and/or discrimination at the lowest possible level. Employees may often put a minor offensive situation to rest by making their feelings known to those involved.

3. It is suggested, in any offensive situation, that the employee keep a diary of the occurrences. Likewise, an employee accused of harassment and discrimination should keep notes that reflect their version of the incident.

4. Employees should report any harassing and discriminating incident to their Supervisor, Division Commander, Assistant Sheriff, Undersheriff, Sheriff or to the Sheriff’s Office Personnel Officer. Supervisory and Management personnel who personally observe incidents of harassment and discrimination will investigate and take immediate and appropriate action.

C. SUPERVISORS AND MANAGERS RESPONSIBILITIES.

1. Supervisors and Managers need to be alert to employee harassment and/or discrimination. Prompt, appropriate action shall be taken.
whenever a Supervisor or Manager learns of a situation involving harassment and/or discrimination. Employees making a report will be taken seriously, informed of their rights and of the availability of outside assistance, such as the State Office of Equal Employment Opportunity should it be required.

2. Supervisors and Managers shall keep complete notes on incidents they investigate and will encourage others to keep notes. They shall also keep all involved persons and the Division Commander informed of the action being taken.

3. Supervisors and Managers should be sensitive to harassment and discrimination and affirmatively raise the issue to employees by:
   a. Expressing strong disapproval;
   b. Informing employees of their right to raise the issue;
   c. Following the administrative disciplinary procedures; and
   d. Reporting incidents of a criminal nature to their chain of command.

IV. PROCEDURE 1.
A. EMPLOYEE RESPONSIBILITIES.
   1. Any employee who is the subject of harassment or any employee who knows of the harassment of other employees which is creating an offensive work environment, should report the harassment to their Supervisor, Division Commander, Assistant Sheriff, Undersheriff, Sheriff or the Sheriff’s Office Personnel Officer.
      a. If the harassment originated from the employee's Supervisor, the employee may contact the Supervisor's Manager regarding the harassment.
      b. Notification may be verbal or written. If verbal notification is used, the employee may be requested to write a memo at a later time should the Supervisor determine the necessity for such documentation.

V. PROCEDURE 2.
A. SUPERVISOR/MANAGEMENT EMPLOYEE RESPONSIBILITIES.
   1. A Supervisor or Manager who personally observes, or is notified of harassment and/or discrimination taking place, will conduct a thorough investigation.
   2. Substantiated instances of harassment will be handled within the Corrective Counseling System or the Personnel Management Regulations and immediately reported to the Division Commander.
   3. Unsubstantiated incidents that claim a loss of an employee benefit and incidents where the responsible is not identified will be reported to the Sheriff/Undersheriff via the chain of command by inter-office memo
with a copy to the Assistant Sheriff of Administrative Services. The memo shall include:

a. A description of the reported harassment;
b. A complete description of the incident investigation; and
c. A disposition of the investigation.

4. Misunderstandings and minor employee conflicts that are determined not to be harassment and/or discrimination shall be handled appropriately by the Supervisor or Manager.

5. If the employee is not satisfied with the Supervisor's or Manager’s disposition of the incident, the employee shall request it be reported to the Sheriff/Undersheriff via the chain of command.

6. The report will be on an inter-office memo and include the same information as required in #3 above. A copy of the report shall be sent to the Assistant Sheriff of Administrative Services.

7. An employee may circumvent the chain of command in reporting incidents of harassment and discrimination by reporting their concern to successively higher levels until the matter has been addressed to the employee’s satisfaction or has been notified in writing of an administrative resolution of the matter.
I. POLICY.
   A. Contra Costa County Office of the Sheriff is committed to preventing fraud. All Sheriff's Office employees must share in this commitment. All Sheriff's Office employees must be aware of the circumstances, or "red flags", which lead to fraud.

II. GENERAL.
   A. PURPOSE. This policy defines what constitutes fraud, and outlines rules and procedures all employees must follow when fraud is suspected.

III. EXAMPLES.
   A. Examples of fraud, which are neither exclusive nor exhaustive, include the following:
      1. Theft. This may include the removal or misuse of funds, assets or cash.
      2. False accounting. Dishonestly destroying, defacing, concealing or falsifying any account, record or document required for any accounting purpose, with a view to personal gain or gain for another, or with the intent to cause loss to the County or furnishing information which is or may be misleading, false or deceptive.
      3. Abuse of position. Abusing authorities and misusing County resources or information for personal gain or causing loss to the County.
      4. Any dishonest or fraudulent act.
      5. Misappropriation of funds, securities, supplies or other assets.
      6. Impropriety in the handling of money or financial transactions.
      7. Profiteering as a result of insider knowledge of your organization's activities.
      8. Disclosing confidential or proprietary information to outside parties.
      9. Accepting or soliciting anything of material value from contractors, vendors, or persons providing services to the company.
      10. Destruction, removal, or inappropriate use of business assets.
IV. RESPONSIBILITIES.

A. Any employee who has knowledge of an occurrence of fraud, or has reason to suspect that a fraud has occurred, shall immediately notify his/her supervisor.

B. Every employee shall cooperate with administrative investigations pursuant to this policy. The employee shall not discuss the matter with any one other than his/her supervisor and chain of command, the Internal Affairs Unit, the County Auditor and the District Attorney. Failure to report suspected fraud could result in disciplinary action or possibly termination.

C. Personnel Actions. If a suspicion of fraud is substantiated by the audit investigation, disciplinary action shall be taken in conformance with the County's Personnel Policies and Procedures. A false and vindictive allegation of fraud is a violation of this policy. All violations of this policy, including violations of the confidentiality provisions, shall result in disciplinary actions up to and including termination.

D. Retaliation. It is a violation of this policy for any individual to be discriminated against for reporting fraud or for cooperating, giving testimony, or participating in an audit investigation, proceeding, or hearing. Such individual falls under the protection of the Whistle Blower Act.

E. After an initial review and a determination that the suspected fraud warrants additional investigation, the Undersheriff shall direct further handling and/or investigation pursuant to the Citizens’ Complaints/Internal Investigations Policy, Policy 1.06.80, and/or the Personnel Management Regulations Policy, Policy 1.05.70, as appropriate. Any matters to be investigated at the criminal level shall be referred to the Sheriff’s Investigation Division or the applicable jurisdiction.
I. POLICY.
   A. The Office of the Sheriff has an obligation to provide efficient, productive and professional service to the public. How employees conduct business and utilize their on duty time is a major factor in meeting this obligation. Therefore, guidelines are established regarding on duty time and conduct.

II. GENERAL.
   A. REPORTING FOR DUTY.
      1. Employees shall be properly attired pursuant to policy and have any required equipment available when reporting for duty.
      2. Employees shall be punctual in reporting for duty at the time and place designated by their Supervisor(s).
   B. HOURS OF DUTY.
      1. Employees of the Office of the Sheriff shall have regular hours assigned to them for active duty. When not assigned or ordered to duty, employees are considered off-duty.
      2. Deputies shall be familiar with Office of the Sheriff Policy Section 1.05.56, Off-Duty Arrest/Enforcement.
      3. On duty time, for purposes of Worker’s Compensation, is discussed in Office of the Sheriff Policy Section 1.05.74, Notification and Reporting On Duty Injuries, Accidents or Death; Workers’ Compensation.
   C. ABSENCE WITHOUT PROPER LEAVE.
      1. Employees are expected to be on duty as assigned. Employees shall not:
         a. Be absent from duty without proper leave;
         b. Leave duty without proper relief; and/or
      2. Employees unable to report for duty at the prescribed time because of sickness or injury to themselves or their immediate family shall notify the Office of the Sheriff as soon as practical, consistent with the Office of the Sheriff sick leave policy.
D. LOITERING.
   1. On duty and in-service employees shall not linger in restaurants, cafes, bars, or other public places.
   2. Unless specifically assigned, uniformed employees shall not linger in Office of the Sheriff facilities or other buildings.

E. SLEEPING ON DUTY.
   1. An employee shall not sleep while on duty.
   2. Employees working a 24-hour shift shall follow the guidelines established for their assignment.

F. PROHIBITED ACTIVITY DURING PUBLIC/BUSINESS CONTACTS.
   1. An employee shall refrain from certain conduct while transacting business with the public, or in a business meeting, including:
      a. Chewing gum;
      b. Chewing or dipping snuff or tobacco;
      c. Eating (unless food is served with the meeting); and
      d. Smoking.
   2. Any conduct that is offensive or brings disrepute or otherwise reflects negatively upon the employee of the Office of the Sheriff.
I. POLICY.
   A. Appropriate business attire and good personal appearance serve three basic functions: First, rapport with the public is enhanced when served by well-groomed, well-dressed employees. This demonstrates to the public that the Office of the Sheriff and its employees are professional and serious about its functions. Secondly, the well-groomed and well-dressed employee will generally be treated with more respect by the public and fellow employees. This improves the work environment and builds employee morale. Third, some jewelry is restricted to promote the safety of the employee while in the office or around inmates. For these reasons, the Office of the Sheriff has established standards of personal appearance for employees.

II. GENERAL.
   A. DEPUTIES.
      1. When reporting for duty, Deputies shall be clean and neat in their personal appearance.
      2. Clothing will be appropriate for duty assignment, per the standards described in Office of the Sheriff Policy Section 1.07.21, Dress Code/Uniforms. The Division Commanders may authorize exceptions to these standards to meet temporary special assignments. Permanent assignments that require a different mode of dress must be approved by the appropriate Bureau Assistant Sheriff.
      3. All Deputies must come to work smelling clean and must avoid the excessive use of perfume or cologne.
      4. Hair shall be kept clean, trimmed and present a well-groomed appearance.
         a. For male and female Deputies in uniform:
            • Hair shall not be worn in an exaggerated style nor extend more than one inch below the top of the shirt collar.
• Hair may cover the ears. However, it shall not extend below the bottom of the ears nor more than two inches in front of the ears. This includes sideburns.

• Hair extending over the forehead shall not be worn below the highest point of the eyebrows.

• Hair styles that prevent the uniform hat's sweat band from resting on the forehead while being worn are not permitted.

• No decoration(s) shall be worn in the hair except hair clips or pins that match the hair color.

• Moustaches, if worn, will be neatly trimmed and extend neither below, nor more than one-half inch beyond the corners of the mouth. Handlebar moustaches are not allowed.

• Beards are not allowed. Exception: Medical necessity. Deputies with appropriate medical verification may obtain written authorization from the Office of the Sheriff to wear beards. Deputies will submit medical verification of the continuing need for a beard in January and July of each year for as long as the beard is worn for medical reasons. Assistant Sheriffs shall forward all involved documents to the Director of Support Services, Personnel Unit, who shall review the documents for completeness and then forward to the Chief of Management Services for approval. The Director of Support Services, Personnel Unit, shall also make all necessary notifications as required by this policy and maintain a current listing and status of those employees authorized to wear beards. This information will also be forwarded to the Sheriff’s Safety Manager for purposes of oversight of the Respiratory Protection Equipment Program as described in Office of the Sheriff Policy 1.07.25.

• Beards and other facial hair shall be well groomed, neat in appearance and shall not be in an exaggerated style. Beards shall be trimmed as short as possible and in no event exceed ¼ inch in length.

• The above hair standards are not necessarily applicable to the narcotics and vice details.

5. Jewelry restrictions are established to promote the safety of the Deputy and to maintain an appearance consistent with the professional appearance expected of Deputies.

   a. Deputies may wear the following items of jewelry. All other items of jewelry are not allowed unless specifically authorized by the Deputy's Division Commander on a temporary basis only
or by the appropriate Bureau Assistant Sheriff, if a long term need exists.

- Medical or identification bracelets.
- Finger rings without large protruding settings or ornate design.
- Thumb rings shall not be worn.
- Females with pierced ears may wear a single post, no wider than one-quarter of an inch, in each ear when on duty. Females wearing business attire may wear earrings which are not exaggerated in style.
- Employees may not wear any item of jewelry that requires the piercing of facial skin other than the lower ear lobe. Such items would be nose-rings, pins or posts or lip-rings, tongue studs; etc.
- Males shall not wear earrings.
- Conservative necklaces may be worn by Deputies who are not in uniform or wearing a dress shirt and tie. If Deputies in uniform or wearing a dress shirt and tie choose to wear a necklace, it must not be visible.
- Conservative tie tacks/bars and cufflinks.

b. Authorized pins and insignia are listed in Sheriff’s Office Policy Section 1.07.22, Rank and Service Insignia.

6. Cosmetics.
   a. Cosmetics worn by uniformed personnel shall be subdued and blended to coordinate with the natural skin color of the individual.
   b. False eyelashes of the exaggerated type are prohibited.

7. Fingernails.
   a. Fingernails shall be clean and trimmed. Nails shall not extend beyond the tips of the fingers. Female Deputies working non-uniform positions may have fingernails that extend not more than one-half inch from the fingertip.
   b. If worn, fingernail polish should be of muted shades and in good taste.

8. Visible Tattoos and Brandings.
   a. On-Duty Uniformed Deputies – Deputies, while on duty in uniform, shall not display any visible tattoos or brandings. Sworn uniformed employees shall cover any visible tattoos and/or brandings by wearing an approved uniform or by wearing a skin patch or fabric sleeve that covers the tattoos and/or brandings.
      - A skin patch is any patch or bandage that is of a neutral tone.
• A fabric sleeve may be of a neutral tone or black.

b. On-Duty Non-Uniformed Deputies – Deputies, while on duty but not in uniform, shall cover any visible tattoos or brandings by wearing business attire as approved by the Office of the Sheriff Policy Section 1.07.21, Dress Code and Uniforms.

• Sworn Officers working in an undercover assignment are exempt from this policy while working in that capacity.

B. NON-UNIFORMED GENERAL EMPLOYEES.

1. When reporting for duty employees shall be clean and neat in their personal appearance.

2. Clothing will be appropriate for the duty assignment per Sheriff’s Policy Section 1.07.21, Dress Code and Uniforms, and whenever possible conform to the following standards.

3. Female employees shall wear:
   a. A dress, dress suit or pantsuit.
   b. A blouse and/or a sweater and skirt or slacks.

4. Females shall not wear:
   a. Tank tops, T-Shirts, midriff or ultra sheer blouses, dresses or blouses that have plunging necklines, cutoffs, shorts, hot pants, and jean-type pants, except that jean-type pants may be worn in assignments requiring significant physical activity, such as maintenance of evidence in the Property Room.

5. Male employees shall wear:
   a. A dress shirt with tie and slacks.
   b. Sports jackets are optional.

6. Males shall not wear:
   a. Shorts, T-shirts, cutoffs, and jean-type pants, except that jean-type pants may be worn in assignments requiring significant physical activity, such as maintenance of evidence in the Property Room.

7. Exceptions to these standards may be made by the Division Commander to accommodate temporary special assignments. Permanent assignments requiring work clothing other than the dress codes described above must be approved by the Undersheriff.

8. Hair shall be kept clean and well groomed.
   a. Females shall not wear exaggerated hair styles. Those wearing long hair should keep in mind the hazard it presents while working around office equipment such as paper shredders, printers, etc.
   b. Male hair styles shall present a well groomed appearance and shall neither reach the shoulders nor be worn in a ponytail.
Beards and other facial hair shall be well groomed, neat and shall neither be in exaggerated style nor be longer than two inches.

9. Jewelry restrictions are established to promote the safety of the employee and to maintain a business-like appearance. Some items of jewelry are restricted because of their potential hazard while working around office equipment, machinery and/or inmates. Other items are restricted because they are outside the norms of acceptable business attire and detract from the Office of the Sheriff professional and public service decorum. The following jewelry items are restricted for the reasons noted for each. Division Commanders may authorize temporary exceptions depending on the specific duty assignments of the employees.

a. Items creating a potential hazard around office equipment and machinery are:
   - Excessive long fingernails that hamper the employee's ability to use office equipment;
   - Dangling earrings more than three inches long;
   - Long necklaces that hang below the breast line; and
   - Large ornate rings

b. Items of potential hazard around inmates are:
   - Dangling earrings;
   - Heavy necklaces;
   - Large ornate rings; and
   - Dangling bracelets.

10. All employees must come to work smelling clean and must avoid the excessive use of perfume or cologne.

11. Visible Tattoos and Brandings: Non-uniformed employees shall cover any visible tattoos or brandings by wearing business attire as approved by the Office of the Sheriff Policy Section 1.07.21, Dress Code and Uniforms.

C. DISPATCHERS, AIDES, RANGERS AND SPECIALISTS.

1. When reporting for duty, employees shall be clean and neat in their personal appearance.

2. Clothing will be appropriate for duty assignment, per Office of the Sheriff Policy Section 1.07.21, Dress Code/Uniforms and Section 1.07.22, Rank and Service Insignia. Dispatchers, Aides, Rangers and Specialists, when on duty but not in uniform, are subject to the requirements of Section B of this policy, Non-Uniformed General Employees.

3. All employees must come to work smelling clean and must avoid the excessive use of perfume or cologne.
4. Hair shall be kept clean, trimmed and present a well-groomed appearance.
   a. Hair shall not be worn in exaggerated styles or colors.
   b. Dispatchers, Aides, Rangers and Specialists in uniform:
      • Hair will not be worn below the high point of the eyebrows.
      • Hair will not be worn in such a length as to interfere with regular duties.
      • Moustaches, if worn, will be neatly trimmed.
      • Beards, if worn, will be neatly trimmed and must meet with the Division Commander's approval. Any disputes will be decided by the Division Commander.

5. Jewelry restrictions are established to promote the safety of the employee and to maintain an appearance consistent with the professional appearance expected of Office of the Sheriff employees.
   a. The following jewelry items are restricted to prevent a potential hazard around equipment:
      • Dangling earrings and bracelets shall not be excessive, overstated or such that it presents a safety hazard.
      • Thumb rings shall not be worn.
      • Large ornate rings shall not be worn.
      • Any item of jewelry that requires the piercing of facial skin, other than the lower ear lobe. Such items would be nose-rings, pins or posts or lip-rings, tongue studs; etc.
      • Males shall not wear earrings.
   b. Items that are outside the norm of acceptable business attire.
   c. The Division Commander may authorize exceptions depending on specific duty assignments.

6. Cosmetics.
   a. Cosmetics worn by employees shall be subdued and blended to coordinate with the natural skin.
   b. False eyelashes of the exaggerated type are prohibited.

7. Fingernails.
   a. Fingernails shall be clean and trimmed. Long nails make it difficult to use the keyboard; therefore, no one shall have nails so long as to interfere with their work.
   b. If worn, fingernail polish shall be of muted shades and in good taste.
8. Visible Tattoos and Brandings:
   a. On-Duty Uniformed Dispatchers, Aides, Rangers and Specialists – shall not display any visible tattoos or brandings. Uniformed employees shall cover any visible tattoos and/or brandings by wearing an approved uniform or by wearing a skin patch or fabric sleeve that covers the tattoos and/or brandings.
      • A skin patch is any patch or bandage that is of a neutral tone.
      • A fabric sleeve may be of a neutral tone or black.
   b. On-Duty Non-Uniformed Dispatchers, Aides, Rangers and Specialists – Non-uniformed employees shall cover any visible tattoos or brandings by wearing business attire as approved by the Office of the Sheriff Policy Section 1.07.21, Dress Code and Uniforms.
I. POLICY.

A. Social mores and current business customs direct the acceptable conduct of employees in connection with their work. The Office of the Sheriff, as a public service agency, subscribes to this practice and has established guidelines of acceptable conduct for employees.

II. GENERAL.

A. ADDRESSING SHERIFF’S OFFICE EMPLOYEES. When in the presence of persons from outside the Office of the Sheriff employees shall address fellow employees by their rank or the title of Mr., Mrs., or Ms. as the circumstances warrant.

B. HARMONY AND COOPERATION. Employees shall conduct themselves in a manner that will foster the greatest harmony and cooperation between one another and other Units of the Office of the Sheriff.

C. TRUTHFULNESS. Employees shall be truthful with fellow employees and in all their work related activities.

D. CRITICISM OF OFFICIAL ACTS.

1. Employees shall not publicly criticize any official act of an employee of this County nor an employee of any city, county, state or federal government wherein they are identified as an employee of this Office of the Sheriff, unless authorized by the Sheriff.

2. An employee shall not speak critically or derogatorily to other employees or to any other person in a manner which could reasonably be expected to bring discredit to the Office of the Sheriff regarding the orders, instructions or policy of any Supervisor or Manager of the Office of the Sheriff. In any case, where there is sound reason to believe that an order, instruction or policy is inconsistent or unjust, the involved employee(s) has the right to respectfully call it to the attention of their Division Commander through proper channels.
E. STATEMENTS CONCERNING THE SHERIFF’S OFFICE.

1. Employees shall not address any public gathering, join any organization, appear on radio or television programs, or write articles or manuscripts for publication wherein they are identified as a representative of the Office of the Sheriff, unless authorized by the appropriate Bureau Assistant Sheriff.

   a. Employees seeking authorization shall submit an inter-office memo to the Bureau Assistant Sheriff via the chain of command.

   b. Nothing in this section is meant to restrict an employee from joining an employee union or association.

F. LANGUAGE. An employee shall not use threatening, intimidating or insulting language or behave in an insolent or insubordinate manner toward any other employee of the Office of the Sheriff.

G. LOITERING. Off-duty employees shall not loiter in any public place, nor engage in any shopping or leisure activity while in uniform.

H. OFF-DUTY DEMEANOR. Off-duty employees, in or out of uniform, shall not act in public in any manner that brings disrepute or otherwise reflects negatively upon them or on the Office of the Sheriff.
I. POLICY.
   A. Courtesy encourages cooperation and builds respect for those who use it. Employees shall practice commonly accepted courtesies and maintain a professional bearing while on duty or representing the Office of the Sheriff.

II. DEFINITIONS.
   A. BEARING. The comprehension of one's position and the manner in which one carries oneself in relation to that position.

III. GENERAL.
   A. PUBLIC CONTACT.
      1. The proper attitude of each employee shall be one of service and courtesy, but not servility or softness. In non-restrictive situations, the employee should be pleasant and personable. On occasions calling for regulation and control, the attitude shall be firm and impersonal, but shall avoid an appearance of rudeness.

      2. When a Deputy’s badge number is requested, the Deputy should politely:
         a. Explain that the Office of the Sheriff does not issue badge numbers;
         b. Give the person the Deputy’s full name and offer to write it down. If available, a business card may be given to the person; and
         c. If the person insists there must be a number, provide the person their employee number and offer to write it down.

      3. This example is presented as a guideline of an appropriate response to a stressful situation. All employees shall adopt a like attitude when handling similar situations.

   B. FELLOW EMPLOYEE CONTACT. The attitude of each employee contributes to the work atmosphere. All employees shall be courteous and cooperative with their fellow employees.
1. All employees will refrain from creating a hostile work environment. A hostile work environment does not reach the court standard of harassment in employment.
   
   a. Conduct that would be construed by a reasonable person to be mean, inflammatory or rude could constitute a hostile work environment.

C. BEARING. Personnel shall maintain a professional bearing when on duty or representing the Office of the Sheriff.
I. POLICY.
   A. As peace officers sworn to enforce the laws of the State of California and the United States of America, Deputies shall display proper respect for the symbols of this nation.

II. GENERAL.
   A. PATRIOTIC COURTESY.
      1. To the Flag.
         a. On approach of the flag, a Deputy in uniform will face the flag and render a military salute and remain in the saluting position until the flag passes.
         b. On duty Deputies in civilian dress shall stand while the flag passes and the National Anthem is being played. Headgear shall be removed.
      2. To the National Anthem.
         a. When the National Anthem is played, Deputies in uniform shall stand at attention and render a military salute for the duration of the anthem.
I. POLICY.
   A. Office of the Sheriff employees must maintain a neutral position free of gratuities, rewards and bribes to ensure fair, impartial law enforcement.

II. GENERAL.
   A. ACCEPTANCE OF BRIBES. No employee shall accept a bribe, nor engage in any act of extortion, nor engage in any other unlawful means of obtaining money or property through their position with the Office of the Sheriff.
   B. SOLICITING REWARDS.
      1. Employees shall not solicit any reward for performance of their duties nor seek or ask for a gratuity of any kind.
      2. Employees shall not solicit free admission into theaters or other places of amusement for themselves or others, except in the line of duty.
      3. Employees shall not solicit nor accept free rides from transit systems, except in the line of duty.
I. POLICY.
   A. The Office of the Sheriff requires and expects all employees to regularly attend work. The efficient operation of the Office of the Sheriff requires employee absences be held to a minimum. The Office of the Sheriff will identify those employees whose absenteeism is excessive and attempt to modify their behavior.

II. DEFINITIONS.
   A. EXCESSIVE ABSENTEEISM. Frequent or habitual absence from work.

III. GENERAL.
   A. MONITORING ATTENDANCE.
      1. Managers and Supervisors should always be alert to absenteeism problems. Any action taken should comply with the requirements of this Policy.
      2. An employee's excessive absenteeism is reason for review. The Sheriff will make every effort to identify and correct those employees having attendance problems.
      3. Absenteeism for an employee will be recorded by Division payroll staff.
      4. Review of absenteeism will be conducted at the Division level.
      5. Division Commanders will review the records of all employees so identified. Contributing factors and extenuating circumstances will be considered in each case before any action is taken.
I. POLICY.
   A. Procedures are established to allow employees to attend meetings held by County agencies during regular working hours on County time.

II. GENERAL.
   A. CIRCUMSTANCES DICTATING ATTENDANCE OF AN EMPLOYEE.
      1. Employees may be allowed to attend meetings held by County agencies during regular working hours on County time in the following situations:
         a. The County agency calling the meeting is responsible for determining if attendance is required.
         b. If attendance is sought by the Hearing Officer for testimony or other information.
         c. If attendance is required to settle a grievance filed pursuant to the County grievance policy.
         d. If attendance is required as an employee representative to settle a grievance filed pursuant to the County grievance policy.
         e. If attendance is required as a spokesperson or representative of a recognized organization for meetings or hearings regarding wages, salaries and working conditions.
         f. If attendance is required as an official representative of a recognized employee organization, meeting and conferring in good faith or consulting with management representative(s) on matters within the scope of representation. The number of such representatives shall not exceed two without prior approval of the management representative(s).
         g. As a general rule, Supervisors should not schedule relatively short meetings that require the attendance of off-duty personnel, it being understood that, in all cases, operational necessity shall prevail.
2. Except situations where attendance is legally required (subpoena, jury duty), attendance shall be contingent upon advance arrangements having been made via the chain of command for time away from a work assignment.
I. POLICY.
A. Employees shall strictly obey and properly execute any lawful order emanating from any Supervisor or Manager to ensure safe and efficient Office of the Sheriff operations.

II. DEFINITIONS.
A. LAWFUL ORDER. A lawful order is construed as an order in keeping with the performance of any duty prescribed by law, Office of the Sheriff policy or procedure or for the preservation of order, efficiency and proper discipline.

III. GENERAL.
A. Obedience to and proper execution of lawful orders requires a clear understanding of the orders. Therefore, if time permits, employees should:
   1. Ask for clarification of orders they don't fully understand;
   2. Bring conflicting orders to the attention of the Supervisor issuing the conflicting orders. If the Supervisor does not change the order, it shall be obeyed. The employee will not be held responsible for disobedience of any order or violation of procedure when obeying the last lawful order issued by a superior; and
   3. The employee and the Supervisor shall report an incident related to conflicting orders to their Manager without unnecessary delay.

| ISSUE DATE: | 2-1-2006 |
| REVISION DATE: | |
| CLEARANCE: | Office of the Sheriff |

| CHAPTER: |
| Personnel Management and Employment Relations |

| SUBJECT: | Employee Job Action |

| I. POLICY. |
| A. In the event of a job action/work stoppage, the Office of the Sheriff will take reasonable steps to provide an adequate level of service to the community. At the same time, positive attempts will be made to assist in resolving issues in dispute. |

| II. DEFINITIONS. |
| A. JOB ACTION. A deliberate and concerted action by employees to remain away from the workplace, or reduce work production to bring pressure upon the employer. |

| III. GENERAL. |
| A. FUNDAMENTAL OBLIGATION. |
| 1. The fundamental obligation of the Office of the Sheriff to the public is to provide police protection and Office of the Sheriff services. The Sheriff cannot condone or permit employee actions that interfere with this obligation. |
| 2. Deputy Sheriffs have an obligation to serve the public as defined in the Law Enforcement Code of Ethics. A job action is in direct violation of this code. |
| 3. In order to facilitate communications between labor and management, the Sheriff is committed to developing an on-going dialogue with County officials, community leaders and Office of the Sheriff employees. The Sheriff is committed to resolving all disputes, in a reasonable manner, between Office of the Sheriff employees and management. |

| IV. PROCEDURE 1. |
| A. SHERIFF’S PHILOSOPHY. |
| 1. The Sheriff has adopted the philosophy that negotiations are a year-round process. |
| 2. The Office of the Sheriff will provide training to all supervisory and management employees on Memoranda of Understanding content, intent and meaning, as well as basic employee/employer relation practices, i.e., |
grievances, etc. Training will be conducted, as needed, by the Chief of Management Services or his/her designee.

3. The Sheriff will attempt to resolve issues of dispute as they arise, to the mutual satisfaction of the Office of the Sheriff and the employee(s).

4. The Sheriff will meet periodically, or as necessary, with employees and the leadership of employee organizations in order to identify areas of concern.

5. Association and union leadership will not be made to feel intimidated at any level of the organization.

6. The Sheriff encourages open and free-flowing communications between all persons inside and outside of the Office of the Sheriff.

V. PROCEDURE 2.

A. CONTINGENCY PLAN.

1. The Office of the Sheriff will have a contingency plan available to ensure continuation of services to the community in the event of a job action.

2. All employees involved in, or affected by, a job action/work stoppage will be advised of the consequences of their actions and that job actions/work stoppages cannot be condoned.

3. Depending on the nature and extent of the job action, the Sheriff may implement any or all of the following:
   a. All vacations are subject to cancellation, and requests for time off shall normally be denied;
   b. All management and non-striking employees shall be assigned to work locations deemed necessary to maintain services;
   c. Schedules for all management and non-striking employees will be modified only to the extent necessary to ensure vital services;
   d. Use of Reserve Deputies will be minimal and only as necessary to ensure vital or emergency/life-saving services;
   e. Requests for outside assistance from neighboring agencies will only be to the extent necessary to provide vital or emergency/life-saving services and as provided for by their own policies;
   f. The Sheriff will request the Board of Supervisors to invoke County Resolution No. 77-680, General Policies in the Event of a Strike Emergency;
   g. In order to provide current and factual information to the media, public and Office of the Sheriff employees during the job action, a Public Information Officer (P.I.O.) will be assigned; and
   h. At least one employee will be designated as a Management Liaison Officer (M.L.O.) in order to keep in constant communications with the employee group.
4. The Sheriff will maintain constant contact with the Board of Supervisors and will attempt to assist in any way possible to bring the dispute to a speedy and positive resolution.

5. Acts of a criminal nature will not be tolerated.

6. The Sheriff will review the Return-to-Work Agreement and will make decisions based on the factors included therein regarding:
   a. Discipline and/or termination of striking employees;
   b. Amnesty;
   c. Return-to-work scheduling; and
   d. Any new rules or regulations promulgated or in need of promulgation.

7. To ease transition back to work and to facilitate implementation of any new Memorandum of Understanding, meetings will be held between key management personnel, union or association representatives, and employees to review the spirit, meaning, and intent of new Memoranda of Understanding provisions.
I. POLICY.
   A. The Office of the Sheriff recognizes the irritation and threat to employee health caused by smoking. To minimize these factors, while not unreasonably restricting the right of employees to smoke, the Office of the Sheriff has established guidelines.

II. DEFINITIONS.
   A. SMOKING. Possessing a lit pipe, cigar or cigarette of any kind, or any other ignited smoking devices, or the lighting, or emitting or exhaling the smoke of a pipe, cigar or cigarette of any kind.

III. GENERAL.
   A. RESTRICTIONS.
      1. Smoking is prohibited in all buildings, vehicles and other enclosed areas occupied by County employees, owned or leased by the County or otherwise operated by the County.
      2. Specific Divisions may establish smoking areas outside the confines of County buildings, vehicles or enclosed areas. These designated smoking areas must comply with County Administration Bulletin 23.4 and have the appropriate "Smoking" signs conspicuously posted.

IV. PROCEDURE 1.
   A. DIVISION COMMANDERS RESPONSIBILITIES.
      1. Division Commanders will ensure that employees adhere to the contents of this Policy.
      2. Division Commanders will ensure that "No Smoking" signs are posted in compliance with County Administrative Bulletin 23.4.
I. POLICY.
   A. Employees are expected to be fit for duty during work hours and shall not be under the influence of alcohol, marijuana, nor of any illegal or prescription drug while on duty.

II. DEFINITIONS.
   A. DRUG. The term drug includes:
      1. All illegal drugs, hallucinogenic and narcotic substances.
      2. Unless and until federal law changes, marijuana is a Schedule l drug under federal law (Controlled Substances Act (Title 21 U.S.C. § 811). Therefore, it is unlawful to use, possess, transport, cultivate, etc.
      3. Drugs that are legal to possess with a physician's prescription.
   B. ALCOHOL. The term alcohol includes:
      1. All alcoholic beverages.
   C. UNDER THE INFLUENCE. For use in this section the term "Under the Influence" means the use of any substance which impairs or alters the mental or physical ability of the employee to perform assigned duties.

III. GENERAL.
   A. ALL EMPLOYEES.
      1. The following rules apply to all employees:
         a. No employee will use marijuana or any illegal drug, hallucinogenic or narcotic, ON or OFF DUTY.
            • Employees are reminded the possession, use, purchase, transport, sale and cultivation of marijuana is unlawful under federal law.
b. Employees shall not be at work under the influence of alcohol, marijuana, and/or any illegal or prescription drugs.

- An employee under the influence of alcohol, marijuana or any illegal or prescription drug will be relieved from duty.
- Special consumer behavior training or equipment tests conducted by the Sheriff’s Office are exempt from this rule.

c. Employees shall not manufacture, distribute, dispense, possess or use alcohol, marijuana, or illegal drugs on County premises, unless used for an authorized police purpose or confiscated as evidence during the course and scope of employment.

- Drugs prescribed by a physician for illness or injury and non-prescription drugs are exempt from this rule (except medicinal marijuana).
- Special consumer behavior training or equipment tests conducted by the Office of the Sheriff are exempt from this rule.
- Any violation of the above may result in requiring the employee to participate satisfactorily in drug abuse assistance or rehabilitation program, or result in disciplinary action up to and including termination.
- Employees must notify the Sheriff via the chain of command of any criminal drug statute conviction for a violation occurring in the workplace within five days after such conviction (Federal Drug Free Workplace Act of 1988).
- Employees will not be disciplined because they request assistance for an alcohol or other drug problem. However, seeking assistance or raising any claim related to substance abuse does not relieve an employee of the responsibility to adhere to this Policy, and does not insulate the employee from discipline for reasons other than seeking assistance for an alcohol or other drug problem.

B. DEPUTIES/UNIFORMED PERSONNEL.

1. Employees in uniform shall not drink any alcoholic beverage.
2. Deputies in plain clothes shall not drink any alcoholic beverage while on duty, except when necessary in the performance of their duty.

C. PREVENTION AND EDUCATION.

1. The Office of the Sheriff is committed to the protection, health, well-being and safety of employees and the public from hazards relating to alcohol and other drug abuse by employees by:
I. POLICY.
   A. Employees should receive their meal period(s) without hampering the Office of the Sheriff function or services. Therefore, employee meal periods will be coordinated to accomplish this goal.

II. GENERAL.
   A. MEAL PERIOD DURATION.

   1. The length of the meal period will be either half an hour or one hour. The meal period must be taken within the first 5 hours of the shift. Employees assigned to uniformed shift work will normally take a half hour meal period while on duty. Most other employees will normally take a half hour or one hour meal period on their own time. The meal period cannot be taken at the end of the shift in order to go home early.

   2. Employees assigned to uniformed shift work may suspend their duties for a meal period to be taken within their assigned area, subject to instructions from their Supervisor and the following guidelines:
      a. These employees are required to be available to immediately return to duty should the need arise.
      b. Meals shall be eaten with reasonable dispatch.
      c. Uniformed employees eating in a restaurant with both eating and bar facilities will have their meal at a table in the restaurant portion of the premises.

   3. Most employees in non-uniform positions will take their meal period on their own time. The length of the meal period will be either half an hour or one hour depending on their employee Memorandum of Understanding and hours of assignment. Many employees have the option to select the length of their meal period. This will be coordinated with their Supervisors.
B. CONTINUITY OF SERVICES.

1. Employees shall coordinate their meal periods to ensure that the Office of the Sheriff function and required services are continued through their meal period.

2. Supervisors shall ensure that employees receive their meal periods and that the Office of the Sheriff functions and required services are uninterrupted.

3. Meal periods will be scheduled in compliance with state regulations, barring exigent circumstances.
I. POLICY.
   A. Telephone calls will be handled in a professional manner to ensure the caller receives timely efficient service.

II. GENERAL.
   A. ANSWERING SHERIFF’S OFFICE TELEPHONE. Employees shall answer the telephone with:
      1. Proper greeting (hello, good morning, afternoon, etc.).
      2. The name of their Division or Unit.
      3. Their name.

   B. HOLD PROCEDURE. Employees will place someone on hold only after they have answered the phone as stated in the above paragraph. Unless they wish to hold longer, a caller should not be left on hold for more than one minute. If the employee can not assist the caller within that time frame, the employee will ask the caller if the employee may return the call, take a message or transfer the call.

   C. TELEPHONE MESSAGES. When an employee takes a telephone message, the employee shall ensure that the following information is included on the message sheet:
      1. Date and time of the message;
      2. Name of the caller;
      3. A return telephone number of the caller and the best time to return the call;
      4. Any message left by the caller or the nature of the call; and
      5. The name or initials of the employee taking the message.

   D. TRANSFERRING TELEPHONE CALLS. Absent unusual circumstances, a caller should be transferred no more than one time. If the employee receiving the transferred call cannot provide assistance, that employee should arrange to get back to the caller. The caller should be advised of the public number and Division or Unit to which the caller is being transferred.
I. POLICY.
   A. Political activities shall not be allowed to interfere with Office of the Sheriff operations nor reflect on the Office of the Sheriff professional image.

II. GENERAL.
   A. POLITICAL ACTIVITY RESTRICTIONS. Political activity is restricted only as provided by statute or for conduct that may reflect on the Office of the Sheriff. The following restrictions apply to all employees:
       1. Employees shall not directly or indirectly engage in the solicitation of political contributions from fellow employees while on duty or on County property
       2. Employees shall not use their official influence to compel political action or non-action
       3. Employees shall not engage in the pursuit of political purposes during those hours the employees should be discharging their official duties
       4. Employees shall not engage in political activities while wearing the uniform of the Office of the Sheriff.
       5. Contact with Board of Supervisors. Employees who are not representatives of recognized employee relations groups shall not approach the Board of Supervisors or its employees concerning legislative, policy or operational matters pertaining to the Office of the Sheriff without the permission of the Sheriff. Nothing in this Policy shall be construed to deny the right of access to any County board or commission by representatives of recognized employee organizations.
       6. Contact with the County Administrators Office. Employees are prohibited against contact with the County Administrators Office or its employees in matters pertaining to the Office of the Sheriff without the permission of the Sheriff.
## I. POLICY.

A. Deputies shall not become physically involved in off-duty arrests, traffic enforcement or other incidents unless an immediate threat of loss of life, gross bodily injury or major loss of property exists and other options are unavailable.

## II. GENERAL.

A. CRIMES IN PROGRESS WHILE OFF DUTY. The seriousness of the crime will influence the Deputy’s course of action. The appropriateness of the off-duty Deputy’s action will be judged by the facts known to the Deputy at the time of the incident. Deputies must recognize the potential for escalation of violence or presence of accomplices, and that the Deputy is acting without immediate assistance. In deciding whether off-duty enforcement action will be taken, the following rules shall be followed:

1. Where there is no urgent or immediate need for law enforcement action, the Deputy shall contact the responsible law enforcement agency, observe the incident and await the responding unit’s arrival to give a witness statement and/or suspect identification.

2. Traffic. Off-duty Deputies shall not make misdemeanor traffic arrests or become involved in the enforcement of traffic infractions. Also, pursuit of another vehicle by an off-duty Deputy in a private vehicle is prohibited.

3. Fights. Attempts to intercede or make arrests in misdemeanor fights or assemblies shall not be undertaken by off-duty Deputies, except when there is an immediate threat of loss of life, gross bodily injury or major loss of property, and other options are unavailable.

4. Neighborhood Disturbances. Due to the delicate nature of neighborhood disturbances, off-duty Deputies shall refrain from making misdemeanor arrests or otherwise attempting to settle such actions. Complaints should be referred to the responsible law enforcement agency.
B. ARRESTS.

1. An off-duty Deputy who makes an arrest or who participates in any arrest shall immediately report the details of the arrest to the Watch Commander and/or the Patrol Division Captain. Deputies are also required to notify their Division Commander not later than the following work day.

2. When an off-duty arrest occurs in another jurisdiction, the Deputy shall immediately notify the law enforcement agency with jurisdiction.
I. POLICY.

A. The public has placed its trust in the Office of the Sheriff to administer an honest effective law enforcement agency. The Office of the Sheriff embraces the public trust and recognizes that effective law enforcement would be severely hampered if such trust were lost. The Office of the Sheriff also recognizes that this public trust can only be retained through the efforts of all employees. Therefore, employees shall conduct themselves in a manner both on duty and off duty that will not discredit or reflect poorly on the Office of the Sheriff.

II. GENERAL.

A. UNACCEPTABLE CONDUCT.

1. By accepting employment with the Office of the Sheriff, safety and general employees alike are accepting a higher standard of conduct than is found in other government service. We must be aware that our actions on and off duty are subject to scrutiny and reflect on the entire Office of the Sheriff. An employee's behavior may be considered unbecoming conduct if it would normally be viewed with disfavor by the community we serve.

2. The following is a list of unacceptable conduct. Each item may be sufficient grounds for utilization of the Corrective Counseling System or the Personnel Management Regulations. The list is not all inclusive and other unspecified conduct may also result in action by the Office of the Sheriff:

   a. Unlawful Conduct: Employees will strictly observe all provisions of the law in both their public and private affairs and will at all times conduct themselves in accordance with all legal mandates.

   b. Abuse of Authority: Employees will not abuse the authority granted them by virtue of their employment, nor take improper actions through "color of authority."
c. Rule Violations: Employees will not violate any County or Office of the Sheriff policies, procedures, orders, directives or regulations.

d. Treatment of Public: Employees will treat all members of the public with respect and courtesy and will refrain from abusive and derogatory conduct and/or profane or inflammatory language.

e. Insubordination: Failure or deliberate refusal of an employee to obey a lawful order given by a Supervisor or Manager shall be insubordination. Ridiculing a Supervisor or Manager or his/her orders, whether in or out of their presence, is also insubordination.

f. Disruption of Operations: Acts or omissions contrary to good order.

g. Misuse of Equipment: Negligent or willful damage to public property or waste of public supplies or equipment.

h. Incompetence or Inefficiency: Failure or inability to adequately complete properly assigned tasks or failure to undertake required obligations.

i. Cowardice: Deputies of the Office of the Sheriff shall not display cowardice or fail to support other peace officers in the performance of duty.

j. Misuse of Sick Leave: Abuse or excessive use of sick leave.

k. Subversive Organizations: No employee shall knowingly become a member of or become connected with any subversive organization. The Sheriff may authorize exceptions, when necessary, for a law enforcement function.

l. Outside Associations: No employee shall knowingly maintain outside associations that jeopardize the security or integrity of the Office of the Sheriff or bring discredit to the law enforcement profession.

m. Personal Relationships: Employees will not allow their personal relationships to interfere with Office of the Sheriff business or the performance of their assigned duties. Additionally, fraternization with persons in custody, arrestees, detainees, criminal defendants or other persons the employee has had an enforcement contact with, is prohibited.

n. Indebtedness: Employees shall manage their debts in a manner that will not reflect poorly on their position with the Office of the Sheriff. They shall avoid situations where creditors are seeking legal judgments or garnishment of their salaries.

o. Other: Any conduct which tends to bring the County or the Office of the Sheriff into disrepute.
I. POLICY.
   A. The effective and efficient operation of the Sheriff’s Office requires employees to conform to Office of the Sheriff standards. The Sheriff believes that positive correction is often more effective than punishment. Therefore, a system of corrective counseling will be used to assist employees in modifying unacceptable behavior to comply with Office of the Sheriff standards.

II. DEFINITIONS.
   A. BUSINESS DAY. Monday through Friday, excluding holidays.
   B. HEARING OFFICER. In cases involving an appeal, the Hearing Officer will be the Undersheriff or Bureau Assistant Sheriff not in the employee's direct chain of command.

III. GENERAL.
   A. ADMINISTRATION OF CORRECTIVE COUNSELING PHILOSOPHY. The Office of the Sheriff has adopted the philosophy that improvements in employee behavior occur only when:
      1. The problem area is clearly identified; and
      2. The employee chooses to work with the Sheriff’s Office to correct the problem.
   B. CORRECTIVE COUNSELING.
      1. The Corrective Counseling System consists of three phases which are designed to give the employee an opportunity to correct behavior problems. The Office of the Sheriff will assist an employee in improving behavior through corrective action that is appropriate to the circumstance. The phases and their duration are:
         a. Phase I – Three months
         b. Phase II – Four months
         c. Phase III – Six months
2. Supervisor's notes reflecting an employee's work habits and/or behavior during an evaluation period may be maintained without entering the employee into the system.

C. SUPERVISORS’ AUTHORITY.

1. Each Supervisor, Middle Manager, Captain, Assistant Sheriff or above has the authority to place an employee in the Corrective Counseling System. The authority limits are:
   a. Phase I - Supervisor
   b. Phase I & II - Middle Manager
   c. Phase I, II, & III - Captain, Chief, Assistant Sheriff, Undersheriff, Sheriff.

D. INTERVIEW AND ENROLLMENT. Each step of the system is initiated with a meeting between the employee and his or her Supervisor or Manager. The meeting is a very important element in the system because it allows the employee an opportunity to present an explanation of the incident or behavior. It also provides the Supervisor or Manager an opportunity to remind the employee of any rules, policies or procedures that are appropriate or required.

1. The Supervisor or Manager should review available information and conduct any necessary investigation prior to the meeting.

2. When a meeting is scheduled, the Supervisor or Manager shall inform the employee that corrective counseling may result, to give the employee an opportunity to obtain representation.

3. At the conclusion of the interview, the Supervisor or Manager may indicate the need for corrective action, training or increased supervision, or the Supervisor or Manager may require further investigation into the behavior. This investigation may be performed within the Division or, at the request of an Assistant Sheriff via the Undersheriff, by Internal Affairs.

4. If the Supervisor or Manager recommends placement into a phase level beyond the Supervisor's authority, another meeting will be required by the appropriate level of supervision. The originating Supervisor or Manager may attend the additional meetings.

E. CORRECTIVE ACTION. Each incident requires timely corrective action which directly addresses the employee's behavior problem. Appropriate corrective action can be as simple as the counseling which is provided during the meeting with an employee. Other circumstances may require more stringent monitoring of employee behavior, a more structured work environment, increased supervision, specific training, counseling programs, and medical or psychological evaluation and intervention. Resources may include but are not limited to the Sheriff’s Office Chief of Management Services and Occupational Health Services, as well as other County Departments and services.

F. EXEMPT EMPLOYEES. The following employees are exempt from this system:
1. Members of the United Clerical, Technical and Specialized Employees, Local 2700; and
2. Members of the Professional and Technical Employees, Local 512; and
3. Members of the Professional and Technical Engineers IFPTE, Local 21; and
4. Members of the Public Employees’ Union, Local One.

G. PHASE PLACEMENT CRITERIA.

1. An employee may be placed in the system when behavior is unacceptable. The employee need not be placed in Phase I to begin the Corrective Counseling System. Phase II or Phase III may be used should any or all of the following factors justify placement at a higher phase:
   a. The nature of the behavior;
   b. The seriousness of the behavior;
   c. Repetitive behavior; and
   d. Previous behavior including information in the Office of the Sheriff Corrective Counseling file.

2. Once an employee is placed in a phase, each higher level of authority will review the appropriateness of the placement or recommendation. Each can modify the phase level consistent with their authority or recommend alternate actions. Assistant Sheriffs and above may reject a phase placement and direct the issue to be handled as outlined in the Personnel Management Regulations.

3. Related Incidents. Progression from one phase to another may result from a repetition of the original problem or may result from different but related behavior. Progression need not be sequential. An employee may, for example, be in Phase I and due to the seriousness or complexity of the subsequent behavior be placed in Phase III. A summary of the related Phase will be discussed during the interview and included in the Corrective Counseling document.

4. Unrelated Incidents. An employee may be placed in more than one phase over a specific time frame for different, unrelated incidents. Should this occur, the duration of the first phase is not affected by the subsequent phase placements.

H. COMPLETION OF A PHASE. A phase is completed when the employee's behavior has been corrected during the time requirement of the phase.

1. Any phase that has been replaced due to the employee progressing to another phase for related behavior is not considered a successful completion of that phase.

2. An employee entered into more than one phase at the same time for unrelated behavior may complete one phase while remaining in the Corrective Counseling System for the duration of the other phases.
I. SYSTEM RECORDS. The following files will be maintained within the Sheriff's Office: one copy will be filed with Internal Affairs. All Corrective Counseling documents that relate to an employee will be purged from these files upon successful completion of the phase – 1 year.

1. Internal Affairs records and criminal records will be maintained as required by law.

J. DOCUMENTATION.

1. Once the appropriate Supervisor has talked to the employee and determined a course of action, the Supervisor will document the meeting in a memo. The memo will place the employee in a phase, subject to review. The memo addressed to the employee will reiterate the content of the phase meeting and state the action to be taken in the phase memo format which is set forth in “Procedure 5” of this Policy.

2. The employee will have the opportunity to read and sign the phase memo prior to its placement in the personnel file. The signing of the document by the employee is not an admission of culpability. If the employee refuses to sign the memo, the Supervisor will note the refusal on the memo. The employee will not be ordered to sign the memo.

3. The phase period begins at the time of the meeting with the Manager and/or Supervisor placing the employee into the Corrective Counseling System.

4. If the phase is modified at a higher level, that phase period begins at the time of the meeting with the Manager or Supervisor placing the employee into the increased or decreased phase.

5. The original phase memo shall be given to the employee. One copy shall be forwarded to Internal Affairs through Blue Team via the chain of command. One hard copy will be filed in Internal Affairs.

6. An employee placed in any phase of the system has the right to prepare a memo setting forth the employee's position on the situation. This written memo shall be submitted no later than 30 business days after the interview and forwarded through the same chain of command as the phase documents. It shall remain with the phase documents in the employee's personnel file.

K. TIME LIMIT.

1. Time limits for specific actions within the system are established to ensure the employee of a timely resolution. The time limits are maximums. Generally, implementation of the system should begin as soon as a thorough investigation can be completed. The investigation time starts when the employee’s Supervisor, Middle Manager, Captain, Commander or the Internal Affairs Detail becomes aware of the incident or alleged infraction.

2. Time Limits – Investigation Conducted by Division, not as part of an official IA investigation.
a. Phase III – Within 15 business days. An employee may not be placed in Phase III if the investigation exceeds 15 business days.

b. Phase II – Within 25 business days. An employee may not be placed in Phase II if the investigation exceeds 25 business days.

c. Phase I – 26 or more business days. An employee may be placed in Phase I if the investigation exceeds 25 business days.

3. Time Limits – Investigation Conducted by Internal Affairs, or as a result of a completed IA investigation done at Division level.

a. Phase III – No Time Limit

b. Phase II – No Time Limit

c. Phase I – No Time Limit

4. Extension of Time Limits. The established time limits may be extended by mutual agreement between the employee and the Office of the Sheriff or if the employee is unavailable for an interview. There also may be instances when an employee is recommended for the Personnel Management System (County Disciplinary System), and the Sheriff, upon review of the recommendation, chooses instead to place the employee into the Corrective Counseling System. In such cases, the above time limits may be extended.

L. APPEALS PROCESS.

1. An employee placed into a phase may appeal the placement through a formal hearing process. An appeal hearing of Phase I and II placements is discretionary on the part of the Hearing Officer. Phase III placement appeals require a hearing. The phase placement appeal will be heard by a Bureau Assistant Sheriff, selected by the Undersheriff, who is not in the employee's direct chain of command, hereafter referred to as the Hearing Officer. The Hearing Officer has the authority to uphold the phase placement, set aside the phase placement completely, or decrease the phase to any lower level. The Hearing Officer shall review Phase I and II appeals to determine if there is a basis for granting a formal hearing, and within five business days, notify the employee and the Undersheriff of the decision. The hearing will be scheduled in accordance with the time table listed herein.

2. The Hearing Officer will determine the parties to be present at the hearing. The employee and a maximum of two representatives of the employee's choice may also be present.

3. In general, witnesses will not be called nor allowed at the appeals hearing. The employee may however submit written statements no later than the scheduled starting time of the hearing.

4. The entire appeal hearing will be recorded. The recording will be kept and available in Internal Affairs and will be deleted when the phase period is no longer in effect. Upon the employee's request and at the employee’s expense, the employee may obtain a copy of the recording.

5. The following time table has been established for the appeal process:
a. Appeal Notification - 5 Business Days. Upon receipt of the phase memo, the employee has five business days to deliver written documentation to appeal the phase placement. The appeal memo is to be addressed to the Undersheriff with a copy to the employee's Bureau Assistant Sheriff. The appeal process defers the starting date of the phase period. When submitting an appeal memo the employee should include in the memo all facts supporting the need for granting the appeal hearing.

b. Hearing Date - 15 Business Days. Upon granting a formal hearing, the Hearing Officer has 15 business days within which to schedule the hearing. The employee must be notified of the hearing date at least five business days before the hearing. If one of the parties in the appeal has an extended absence, the hearing will be scheduled as soon as practical upon the return to work of the parties.

c. Hearing Results - 5 Business Days. The Hearing Officer will report the final decision in a brief memo to the employee within five business days of completion of the hearing.

6. The Hearing Officer will weigh all testimony and attempt to determine facts surrounding the phase placement.

   a. If the decision upholds the original phase level or decreases it, the phase period begins on the date of the Hearing Officer's decision.

   b. If the Hearing Officer does not uphold the original phase, all reference to the phase incident and hearing will be immediately purged from the personnel file. Existing Internal Affairs investigation records will be updated and maintained as required by law.

7. The Hearing Officer will report the hearing decision in a brief memo to the employee within five business days of the hearing with a copy to the Chief of Management Services, the Bureau Assistant Sheriff and the Undersheriff.

IV. PROCEDURE 1.
   A. SUPERVISORS AND MIDDLE MANAGEMENT RESPONSIBILITIES.

   1. The Supervisor should review available information and conduct any necessary investigation prior to the meeting. When a meeting is scheduled, the Supervisor shall inform the employee that Corrective Counseling may result. At the conclusion of the meeting, the Supervisor may indicate the need for corrective action, training, or increased supervision. The Supervisor's options are:

      a. Resolve the issue based on information gained during the interview
      
      b. Conduct further investigation;
      
      c. Request investigation by Internal Affairs. Such requests must be made by the Bureau Assistant Sheriff via the Undersheriff; or
Place the employee in a phase. The Supervisor will do the following:

Provide the employee the opportunity to read and sign the phase memo. If the employee refuses to sign the memo, the Supervisor will note the refusal on the memo. The Supervisor will not order the employee to sign the memo;

Give the employee the original phase memo; and

Forward a copy of the memo endorsed and dated at each Supervisory level, via the chain of command, for review.

V. PROCEDURE 2.

A. BUREAU ASSISTANT SHERIFF/CAPTAIN RESPONSIBILITIES.

1. System Monitoring. The Bureau Assistant Sheriff/Captain shall ensure that actions taken under this system are adequately monitored. Immediate Supervisor and Managers must be informed of the status of the employees they supervise, the corrective action that is being taken, and the need for evaluating the effectiveness of this action. Such monitoring will assure that an employee will successfully modify behavior within the phase period or will suggest the possibility that additional corrective action is necessary.

2. Special Circumstances. When an employee is the subject of an Internal Affairs investigation and is transferred to another Division, the Bureau Assistant Sheriff/Captain for whom the employee worked when the incident occurred will place the employee in the phase and inform the Bureau Assistant Sheriff/Captain of the Bureau or Division to which the employee is being transferred of this action. The Bureau Assistant Sheriff/Captain of the Bureau or Division to which the employee has been transferred will act as an observer and be responsible for monitoring the training of the employee.

VI. PROCEDURE 3.

A. UNDERSHERIFF RESPONSIBILITIES. The Undersheriff will review the phase documents and:

1. Approve the action as is and direct the phase documents to be placed in the appropriate file.

2. Modify the action to either a higher or lower phase, or reject the action as unsubstantiated; and

   a. Return the Phase documents to the Bureau Assistant Sheriff/Captain for modification and notification to the employee; or

   b. Return the issue to the Bureau Assistant Sheriff/Captain to be handled under the guidelines of the Personnel Management Regulations.

3. Direct additional investigation or request additional information from Internal Affairs or the employee's Division prior to making a decision.

VII. PROCEDURE 4.
A. **PURGING.**

1. Internal Affairs will purge all phase documents 1 year after the successful completion of the phase.

**VIII. PROCEDURE 5.**

A. **PHASE MEMO FORMAT.** (See chart next page.)
DATE:  (today's date)

EMPLOYEE RIGHTS

SIGNATURE OF PHASE MEMO

I am aware this memo will be placed in my personnel file. I further understand that signing this document is not an admission of guilt.

_________________________  __________________________
(Date)  (Employee’s Signature)

cc: Undersheriff via Chain of Command
I. POLICY.
   A. The grievance process is provided as a system of employee recourse should a 
dispute arise over the employee's rights in the workplace.

II. DEFINITIONS.
   A. BUSINESS DAY. Monday through Friday, excluding holidays.
   B. GRIEVANCE. Any dispute which involves the interpretation or application of 
any provision of the employee’s Memorandum of Understanding.

III. GENERAL.
   A. The goal of the Sheriff is to resolve all potential grievances at the lowest possible 
level. All Management and Supervisory employees should work toward this goal 
by becoming familiar with this Policy.
      1. Points to Note.
         a. An employee cannot grieve a decision by any County Official if 
the Memorandum of Understanding says the official's decision is 
final.
         b. A grievance must be filed within 30 calendar days of occurrence 
of incident.
         c. A union or association may represent the employee at any stage 
of the process.
         d. The grievance procedure is similar for all unions/associations.
         e. The "clock" runs on all steps of the process. If the County fails to 
meet time frames, the grievance automatically moves up to the 
next step. If the employee fails to meet time frames, the 
grievance is deemed to be withdrawn.
         f. Time limits may be waived by mutual consent.
         g. Corrective Counseling is not grievable.
         h. An association or union cannot file a grievance without listing 
the employee(s) for whom the grievance is filed.
2. Past Practice. Past practice may be grounds for a grievance (through June 1985). The association/union must demonstrate that such past practice exists and has been acknowledged and agreed to by Management and representatives of the union/association. Only those past practices agreed to by Management and approved by the Sheriff (prior to February 17, 1985 for DSA, January 23, 1985 for Local 1, and February 14, 1985 for Clerical) may be considered a past practice.

3. Informal Grievance.
   a. A grievance begins when an employee objects to the application or interpretation of the Memorandum of Understanding and makes an official complaint to his/her immediate Supervisor. The employee will do either of the following:
      - Meet informally with the immediate Supervisor in an attempt to resolve the issue; or
      - Request, in writing to the Supervisor, a formal meeting with the Supervisor. Within five business days of receipt of the written request, the Supervisor must meet with the employee in a real attempt at resolution. If the Supervisor is represented by the same union/association, the Supervisor must provide a copy of the written request to the union/association. A copy will also be given to the Division Commander at this time.
   b. The goal of the Office of the Sheriff is to resolve all grievances at the informal level by encouraging communication and open dialogue between Supervisor and employee.
   c. If resolution occurs, no formal paperwork is required; the grievance is automatically terminated by the resolution at this informal level. The Supervisor will notify the Division Commander of the resolution.

   a. If no resolution occurs after the meeting with the immediate Supervisor, employee may submit the formal grievance in writing, within ten work days of the informal meeting, to his/her Division Commander.
   b. A formal written grievance to the Division Commander must state the following:
      - Which provision of the Memorandum of Understanding has been misinterpreted or misapplied;
      - How the misinterpretation has affected the employee; and
      - The redress being sought.
   c. The Office of the Sheriff has ten business days to resolve or respond to the grievance. Note that this time frame does not allow for grievances to "work their way up" the chain of
command. The Division Commander is the focal point of the Office of the Sheriff response. He/she receives the formal grievance and either resolves the issue or forwards the unresolved grievance to the Sheriff/Undersheriff via the Chief of Management Services. The Sheriff or his designee then has the Office of the Sheriff formal response prepared.

d. If the grievance is unresolved at the Office of the Sheriff level, the employee may appeal in writing to the County Human Resources Director within ten business days (seven business days for DSA) of the denial by the Sheriff/Undersheriff. The County Personnel Director then has 20 business days to investigate and respond to the grievance.

- Grievances of disciplinary actions as defined in Sheriff’s Office Policy Section 1.05.70, Personnel Management Regulations begin at this level.

e. If the grievance is unresolved by the County Human Resources Director, the employee may, within seven days of the Director’s response, file a request to the County Human Resources Director for an Adjustment Board to review the issue. The Adjustment Board will be composed of three union/association representatives and three County (Management) representatives. The Board must meet within 20 business days of the request. If a majority of the Board agrees, the decision of the Board is binding.

f. If the grievance is unresolved by the Adjustment Board, the employee may request formal arbitration within 20 business days of the Board decision. The arbitrator is selected through mutual agreement between the County Human Resources Director and the employee. Fees and expenses are split evenly between the County and the employee.

5. Management Grievances. Non-represented Managers have a grievance procedure. It is essentially similar to the above procedure without formal arbitration. At the initial step, an Adjustment Board of Management employee hears evidence and makes a recommendation to the Sheriff/Undersheriff regarding the complaint. The Sheriff/Undersheriff makes the final decision.

IV. PROCEDURE 1.

A. SUPERVISOR. The immediate Supervisor will receive all informal grievances and work toward a resolution at that level.

1. If a verbal grievance is resolved no formal documentation is needed.

2. When a Supervisor receives a written request for a formal grievance meeting he/she will:

a. Forward a copy to the Division Commander and if the Supervisor belongs to the same union/association as the employee, forward a copy to the union/association; and
b. Notify the Division Commander of the results of efforts to resolve the grievance.

V. PROCEDURE 2.

A. DIVISION COMMANDER.

1. Upon receipt of a grievance, the Division Commander will:
   a. Ensure that the grievance:
      • Addresses a section of the Memorandum of Understanding;
      • States how the misinterpretation affects the employee;
      • States the redress being sought;
      • Has been presented to the immediate Supervisor; and
      • If the grievance fails to address these issues, the grievance will be returned to the employee with a brief explanation of its deficiency and not the subject of the grievance. No action will be taken until the proper form and content is received.
   b. Record the date the grievance is received on the top of the memo. Immediately send a copy to the Chief of Management Services, and to the affected Bureau’s Assistant Sheriff as information only.
   c. Evaluate the possibility of a resolution by the Division Commander. Division Commanders should not reach an agreement which would affect other Divisions without input from them.

2. If there is a possibility of resolution at the Division level, the Division Commander will:
   a. Immediately work towards that resolution.
   b. If successful, summarize the resolution in a memo to the employee with a copy to the Personnel Officer and appropriate Command levels for information.
   c. If unsuccessful, notify the Bureau Assistant Sheriff and forward the grievance to Administrative Services, attention Chief of Management Services, with a brief summary of the attempted resolution allowing sufficient time for the Sheriff to provide the formal response.

3. If the issue is clearly not resolvable at the Division level, the Division Commander will note the fact across the top of the grievance and send it and a brief summary of the Division's position to Administrative Services, attention Chief of Management Services, with a copy to the affected Bureau’s Assistant Sheriff, (as information only).
VI. PROCEDURE 3.

A. SHERIFF’S OFFICE PERSONNEL OFFICER. Upon receiving an unresolved formal grievance from a Division Commander, the Chief of Management Services will:

1. Notify the Sheriff/Undersheriff;

2. Prepare the Office of the Sheriff response in a timely manner. Send a copy to the Division Commander, Bureau Assistant Sheriff, and Undersheriff;

3. Provide proper notification to the County Employee Relations Officer;

4. Immediately notify the Bureau Assistant Sheriff of the eventual resolution of the grievance; and

5. Notify all Management personnel of grievance resolutions which result in an interpretation of a Memorandum of Understanding. This will allow such an interpretation to be uniformly applied.
I. POLICY.

A. Sworn employees who have a personal involvement in an on-duty or off-duty arrest or criminal investigation shall immediately advise their Division Commander and discontinue any official role in the investigation or arrest; except in exigent circumstances.

B. General (non-sworn) employees who have a personal involvement in an on-duty or off-duty arrest shall immediately notify their Division Commander if such an arrest results in charges being filed against them, and/or a conviction.

C. All employees have a duty to ascertain and report to their Division Commander when and if charges have been filed, and when and if such charges result in a conviction.

II. GENERAL.

A. CRIMINAL INVESTIGATIONS/PERSONAL INVOLVEMENT. A Deputy has personal involvement in a criminal investigation if the Deputy, a relative or friend, is the victim or suspect of the criminal activity being investigated.

1. A Deputy having such personal involvement shall not become involved in a criminal investigation that does not arise out of the Deputy’s normal duty assignment unless directed or authorized to do so by the Deputy’s Supervisor upon full disclosure of the Deputy’s personal involvement.

2. Nothing in this Policy is intended to prevent any Deputy from investigating a crime in which the Deputy is personally involved, on duty or off duty, when exigent circumstances threaten the loss of evidence, the loss of witnesses, or the escape of the suspect, or when there is a possibility of serious injury to the Deputy or others. When such exigent circumstances cease, so shall the Deputy’s efforts to further investigate the crime.

3. Any employee observing suspected criminal conduct by another...
employee of the Office of the Sheriff, whether it occurs on duty or off duty, shall immediately report the incident to his or her immediate supervisor.

4. Any employee receiving or developing information that any employee of the Office of the Sheriff is a suspect in any criminal activity shall immediately notify his or her immediate supervisor.

5. Any sworn employee who is arrested for any offense, on duty or off duty, other than a traffic infraction, or who becomes aware that he or she is the focus of a criminal investigation, other than as a victim or witness, shall immediately notify his or her Division Commander. Sworn employees shall also notify their respective Division Commander when they become aware of charges being filed against them or when such an arrest results in a conviction.

6. Any general employee who is arrested for any offense, on duty or off duty, other than a traffic infraction, and where charges have been filed, shall notify his or her Division Commander. General employees shall also notify their respective Division Commander when they become aware of such charges resulting in a conviction.

7. Any communication with outside agencies relating to an employee of the Office of the Sheriff, who is the subject of that agency’s investigation, shall be conducted at the Lieutenant level or above.

8. If an Office of the Sheriff employee who is traveling on official business is the subject of a criminal investigation or is seriously injured or incapacitated, the supervising Lieutenant shall discontinue the employee’s involvement in the training or meeting, and arrange for the employee to return as soon as practical, giving consideration to the needs of the investigating agency and the health status of the employee.

B. EMPLOYEE PERSONAL RESTRAINING ORDER OR OTHER LEGAL IMPEDIMENT.

1. Any sworn employee who is served with a restraining order that restricts him or her from possessing a firearm, or who is the subject of any other restriction that would impede his or her ability to function as an armed peace officer shall immediately notify his or her Division Commander.
I. POLICY.
   A. The County has established procedures to ensure employees are properly
      compensated for jury duty.

II. GENERAL.
   A. If called for jury duty in a Superior, or Federal Court, or for a Coroner's Jury,
      Office of the Sheriff employees will observe the following guidelines:

       1. Employees may remain in their regular pay status, or they may take
          vacation leave or leave without pay and retain all fees and expenses paid
          to them.

       2. If an employee is summoned for jury duty and elects to remain in regular
          pay status and waive all fees (except mileage allowances), the employee
          shall obtain from the Clerk or Jury Commissioner a certificate indicating
          dates attended and the waiver of fees. The employee shall furnish the
          certificate to his/her Supervisor as a Sheriff’s Office record. No Absence
          Report Form or Overtime Card is required.

       3. If an employee elects to retain all fees, they must take vacation leave or
          leave without pay. No court certificate is required. An Absence Report
          Form (AF-23) must be completed.

   B. In accordance with legal mandates, any employee serving on a jury will not be
      permitted to work before or after daily jury service. This does not apply to those
      employees who are on jury duty and have not yet been chosen to serve on a jury.

   C. Employees shall advise their Supervisors of scheduled jury duty immediately
      after being informed of their jury assignment.
I. POLICY.
   A. The County has established procedures to ensure employees are properly
      compensated for witness duty arising from their employment.

II. GENERAL.
   A. Employees called upon to act as a court witness in a case arising in the course of
      their work or the work of another County Department may remain in their regular
      County pay status.
      1. Employees may take vacation leave or leave without pay and retain all
         witness fees paid them. Employees are not allowed to take vacation and
         collect expert witness fees for work done while on duty.
   B. An Absence Report Form (AF-23) must be submitted by employees taking
      vacation leave or leave without pay.
   C. Employees electing to retain their regular pay status shall forfeit all fees and
      expenses to the Office of the Sheriff.
      1. Witness fees for peace officers are collected by the court and paid
         directly to the County.
      2. Employees called to serve as witnesses in private cases or personal
         matters (e.g., accident suits and family relations) shall take vacation
         leave or leave without pay and may retain all witness fees paid to them.
   D. Employees shall advise their Supervisor in advance of scheduled court
      appearances for witness duty.
I. POLICY.
   A. Specific guidelines are established to ensure the Office of the Sheriff is
      compensated for employees testifying in civil matters arising from on-duty
      related incidents or investigations.

II. DEFINITIONS.
   A. CIVIL MATTER. Any non-criminal hearing, including arbitration hearings,
      before any court or tribunal to include D.M.V. hearings regarding Driver's
      License status.

   B. INFORMATION/DISPOSITION FORM. Refers to Office of the Sheriff form
      made on an inter-office memo, sample attached, no form number.

III. GENERAL.
   A. The information in this Policy only applies to those cases in which an employee
      is subpoenaed to appear and testify and in which the Office of the Sheriff is not a
      defendant or plaintiff in the action. For information concerning those cases, see
      Sheriff’s Office Policy Section 1.05.64, “Lawsuits Against the Office of the
      Sheriff and/or Employee.” For information concerning Subpoenas Duces Tecum
      (SDTs), see Sheriff’s Office Policy 1.05.68, “Subpoena Duces Tecum.”

   B. Employees shall take vacation time to testify in civil matters that arise from
      personal, non-duty related incidents.

IV. PROCEDURE 1.
   A. SUBPOENA ACCEPTANCE.
      1. A civil subpoena will be received ONLY IF IT IS STAMPED OR
         ENDORSED BY THE CIVIL UNIT INDICATING THAT THE
         APPROPRIATE FEE HAS BEEN DEPOSITED for each day attendance
         is required. If service is attempted without endorsement, the server will
         be directed to the Civil Unit, except:
            a. When the subpoena is a Federal subpoena; or
            b. When the subpoena is issued by a county public agency
               concerning a work-related situation or if the County is the
               plaintiff or defendant.
2. Subpoena fees for specified county employees require a $275 deposit. The party at whose request the subpoena is issued shall reimburse the public entity for the full cost to the public entity incurred in paying the specified county employee his or her salary or other compensation and traveling expenses as provided for in the California Government Code, for each day that the specified county employee is required to remain in attendance pursuant to the subpoena. The amount of two hundred seventy-five dollars ($275), together with the subpoena, shall be tendered to the Civil Unit for each day the specified county employee is required to remain in attendance pursuant to the subpoena. (CGC 68097.2(b))

3. If the actual expenses should later prove to be less than the amount tendered, the excess amount shall be refunded to the depositor. (CGC 68097.2(c))

4. If the actual expenses should later prove to be more than the amount deposited, the difference shall be paid to the public entity by the party at whose request the subpoena is issued. (CGC 68097.2(d))

5. Once the subpoena has been endorsed by the Civil Unit, the server will deliver the endorsed copy to the Field Operations Bureau located at 1980 Muir Rd., Martinez, CA 94553 for service. The designated employee or Supervisor will deliver a copy of the subpoena to the employee, as soon as possible, ensuring compliance with the subpoena.

6. Employees will accept all stamped or endorsed subpoenas when legally served on them personally or served on the immediate Supervisor when the employee is absent.

7. An immediate Supervisor may accept service for an employee under the following conditions:
   a. There is enough time for the Supervisor to serve the employee, and there is enough time for the employee to comply with the subpoena.
   b. If the Supervisor knows that he/she will be unable to deliver the subpoena, or less than five (5) days remain before the appearance, refusal to accept service is permitted. If the subpoena is accepted and the Supervisor later learns that delivery is impossible, notification will be given to the process server or his/her office, not less than 48 hours prior to the appearance date and time. The Supervisor is then excused from any duty or liability.

8. When an employee is served a civil subpoena, he/she will immediately notify his/her Supervisor so proper scheduling can be done.

9. An employee shall not volunteer to testify and shall not testify unless legally subpoenaed in civil actions arising out of Office of the Sheriff employment.

V. PROCEDURE 2.

A. RECORDATION/BILLING.

1. To ensure proper billing, the subpoenaed employee will keep a record of:
a. Date of court appearance;
b. Travel time to court;
c. Time spent in court;
d. Means of travel;
e. Any overtime involved;
f. Round trip mileage; and
g. Any other expenses.

2. This information will be provided to the Civil Unit on an INFORMATION/DISPOSITION SHEET.
   a. If this Form is not attached to the subpoena, request a copy from the Division’s Administration or the Civil Unit.
   b. More than one appearance on the same case can be listed on the same form.

3. Forward the completed Information/Disposition Form with the civil subpoena attached to the Civil Unit.

4. If appearance was canceled, return Form to Civil Unit indicating subpoena was canceled.

5. Employees shall not accept any fees or expenses from the litigants. All recovered fees will be revenue of the Office of the Sheriff to reimburse for salary and expenses incurred by the Office of the Sheriff. It is a misdemeanor to take any personal type of consideration or ask for or receive any payments.

6. Employees will also file any appropriate overtime card and/or Travel Demand Form (for personal mileage) required by Office of the Sheriff Policy Section 1.04.52, Overtime- Pay and Regulations or Office of the Sheriff Policy Section 1.05.72, Reimbursement Demands. Overtime cards will not be approved in civil matters unless the Information/Disposition Form is attached for proper routing.

B. CIVIL UNIT. The Civil Unit will ensure proper billing for reimbursement to the Office of the Sheriff. Any questions regarding civil subpoenas should be referred to the Civil Unit for clarification.
I. POLICY.
   A. Legal papers served on an employee concerning lawsuits arising from their employment must be properly handled to ensure the County and the employee receive adequate representation. Employees are cautioned not to advise process servers that they “accept service”; rather employees only receive documents. Whether such receipt constitutes good service is a determination for County Counsel.

II. DEFINITIONS.
   A. LEGAL PAPERS. Used in this section to describe all claims, small claims actions, summonses, complaints, writs and other court orders served on employees that relate to claims of any type against the Office of the Sheriff and/or the employee. The term does not apply to subpoenas, discovery request, etc., unless they are related to an action against the Sheriff’s Office and/or employee arising out of employment with the Office of the Sheriff.

III. GENERAL.
   A. HANDLING LEGAL PAPERS.
      1. The following guidelines apply when legal papers are served on an employee. With regard to the service of a civil case subpoena on an employee, see Sheriff’s Office Policy Section 1.05.63, Civil Subpoena for Sheriff’s Office Employees.
         a. Upon receipt of any legal papers, either by personal service or by a Supervisor, the individual accepting service will record the date, time, manner (i.e., by mail, by hand, etc.), and place of service and legibly sign their name on the first page. The Supervisor shall deliver a copy to the employee by handing it to the employee.

            • The employee or Supervisor shall make their own copy of the legal papers and deliver the original legal papers immediately to the affected Assistant Sheriff for immediate transmittal to the Sheriff / Undersheriff.
• If available, the envelope in which the legal papers were received shall be forwarded with the legal papers.

b. The Sheriff or Undersheriff may choose to direct the Planning and Research Unit to process these papers.

2. In small claims actions, generally, Risk Management appears at Small Claims Court along with a designated Sheriff’s employee.

a. Any small claims judgment against the Sheriff’s Office will be forwarded to the Planning and Research Unit, who will make the necessary arrangements for payment if deemed appropriate by Risk Management.

3. To facilitate the service of process and to reduce inconvenience to employees, an Office of the Sheriff employee who has been named in a lawsuit in connection with his or her official duties, may authorize in writing the Planning and Research Unit, the Undersheriff, and/or County Counsel to accept service of civil process on his or her behalf in either Federal or State legal actions arising from their employment with the Office of the Sheriff of Contra Costa County.

a. This specific authorization to accept service of civil process shall extend only to legal actions arising from their employment. The individual authorized to accept service does not have authority to accept service of process in any legal action which does not arise from the authorizing employee’s employment with Contra Costa County.

b. Such authorizations must be made in writing on the Authorization to Accept Service of Process Form (a form which is generally prepared by County Counsel) and is effective when the subject employee signs and delivers the form until it is revoked in writing. The completed form will be delivered to the Planning and Research Unit, who will forward it to County Counsel.

4. If an employee is personally served by mail or by a process server, and he or she request County representation, a written request shall be submitted by the employee to the Planning and Research Unit via the chain of command for appointment of counsel. The employee’s request will be reviewed by County Counsel, and a formal request will be completed by County Counsel and forwarded to the employee for signature.

a. The employee is not required to surrender individual defense to the County. However, if an employee elects to retain separate counsel, the County is not required to pay for the defense of the action or to pay any judgment rendered in the case.

5. The Planning and Research Unit will ensure that records and documentation for claims against the Office of the Sheriff or its employees are maintained for as long as the respective cases are active or subject to appeal. Case files may be retained indefinitely if they are of archival nature.
6. The County provides insurance coverage for employees against public liability which may arise from their County employment. Employees are cautioned they may be held individually liable for punitive and exemplary damages assessed against them for willful, wanton and malicious acts. No insurance can be obtained to provide coverage for such damages.

7. In cases where an employee receives a summons and complaint by mail, the employee shall not sign nor return the Acknowledgment of Service or the Waiver of Service by mail. It is County policy not to return the Notice of Acknowledgment. The employee is to forward the legal papers to the Planning & Research Unit who will forward it to County Counsel. A copy will remain in the Professional Standards Division.
I. POLICY.

A. To moderate requests for formal written legal opinions made to the District Attorney’s Office, Office of County Counsel, Attorney General’s Office, or inquiries to the Human Resources Department or County Administrator’s Office, such requests shall be made through the chain of command to the Sheriff or Undersheriff. All such requests shall be signed by the Sheriff or the Undersheriff or their designee, or by the Administrative Lieutenant. The Civil Unit is an exception and may communicate directly with the Office of County Counsel in discussing legal issues pertaining to civil process.
I. POLICY.
   A. Criminal subpoenas shall be processed and served on Office of the Sheriff employees in an expeditious manner. Office of the Sheriff employees shall regard themselves as officers of the court when called to testify, and will treat the court and court officers with respect.

II. GENERAL.
   A. Criminal Subpoenas. Criminal subpoenas for employees are generally received from the County District Attorney’s Office, however some courts provide computer printout subpoenas.
   B. Courthouse Access. The Contra Costa County Superior Court has adopted a policy regarding courthouse access by sworn peace officers. All employees of the Office of the Sheriff will comply with that Superior Court policy.
   C. COURT ATTENDANCE.
      1. All employees subpoenaed in cases before the court shall be punctual in attendance.
      2. Court attire is specified in Policy 1.07.21 (Dress Code/Uniform) at procedure 5.
      3. When giving testimony, employees will speak calmly and explicitly in a clear, distinct and audible tone, so as to be easily heard by the court and jury. The employees shall testify accurately and will neither suppress nor overstate circumstances with the objective of favoring or discrediting anyone.
   D. REFUSAL TO TESTIFY.
      1. Any employee appearing before any of the below listed bodies who invokes his/her constitutional privilege and refuses to testify or provide requested information may be subject to the Corrective Counseling System or Personnel Management Regulations.
         a. Any competent investigative body.
b. A judicial tribunal.
c. A hearing board.
d. A person authorized to take testimony.

III. PROCEDURE 1.
A. CRIMINAL SUBPOENA PROCESS – RECEIVING SUBPOENAS.
   1. All criminal subpoenas for employees are received by the Division Subpoena Clerk.
   2. Division Subpoena Clerks log these subpoenas and distribute them for service.
B. CRIMINAL SUBPOENAS PROCESS – SERVING SUBPOENAS.
   1. The service of a subpoena to an employee shall normally be done by the employee's immediate Supervisor. However, the Division Commander may designate additional employees to serve subpoenas.
   2. At time of service, a copy of the subpoena, or a notice of subpoena, will be given to the employee named on the subpoena. The person serving will sign and date the proof of service on the original.
   3. Signed original subpoenas are logged by Division Subpoena Clerks and returned to the originating District Attorney's Office. An exception to this procedure is the computer printout subpoena issued by some courts. These are logged and discarded.
   4. In the event of changes or cancellations, the Division Subpoena Clerk shall ensure that the subpoenaed employee is notified, either by written notice or by telephone.

IV. PROCEDURE 2.
A. COURT ATTENDANCE PROBLEMS.
   1. It shall be the responsibility of each employee to notify the District Attorney’s Office or appropriate court if the employee is unable to make a scheduled court appearance.
   2. If an employee receives a subpoena for a court appearance date which conflicts with his/her scheduled vacation, scheduled training out of county, or military or emergency personal leave, the employee must notify the District Attorney's Office directly or notify his/her Divisional Subpoena Clerk, who will make the notification.
   3. The employee shall ensure that alternative arrangements (i.e., continuance or cancellation) have been made prior to missing a court date for the above reasons.
   4. In the event the case has started, the employee must call the court directly to report his/her absence.
   5. In the event the court or District Attorney does not rescind the subpoena, the employee must attend court.
6. In the event of conflicting court dates, when an employee receives two or more subpoenas requiring a court appearance on the same day and time, the employee shall be responsible for notifying the District Attorney's Office of the conflict.

V. PROCEDURE 3.

A. GENERAL ACCESS – PERIMETER SCREENING OF PEACE OFFICERS AND GENERAL EMPLOYEES.

1. Deputies in complete uniform are authorized to carry their sidearm in Contra Costa courthouses. Such uniformed Deputies will be allowed through any entrance or screening without any requirement of producing their ID card or explaining their business.

2. Plain clothes Deputies who are armed and produce their ID card, and state their business shall be allowed through any entrance or screening.

3. All Office of the Sheriff General employees not assigned to Court Services shall use public access doors to enter Contra Costa courthouses.

4. No employee, including Deputies, appearing on a personal matter, such as his/her own family law case, shall be permitted to carry a weapon into a courthouse. Employees are not authorized to appear on personal matters while in uniform.
I. POLICY.
   A. When allegations of misconduct surface through claims or lawsuits filed against the County, they must be thoroughly reviewed. The Professional Standards Unit shall forward copies of such documents to the affected Bureau Assistant Sheriff for review and action if warranted.

II. DEFINITIONS.
   A. CLAIM. A third party demand against the County for money or property perceived by the claimant as his/her rightful due to recover damages for an accident or injury.
   B. LAWSUIT. A case brought before a court by which an individual pursues a remedy that the law affords.

III. GENERAL.
   A. TYPES OF CLAIMS.
      1. Auto Liability. Auto accidents which involve County employees driving County vehicles.
      2. Property Claims. Claims for destroyed, damaged, or lost property above $200.
      3. General Liability. Claims arising out of any act of the County or a County employee that constitutes unreasonable conduct.
      4. Civil Rights. Violations of public rights which fall outside the California Tort Claims Act of 1963 which provides substantive liabilities and immunities for public entities and their employees.
      5. Medical. Allegations that the County failed to provide adequate medical care while that person was in any type of County facility.
B. NOTIFICATION OF CLAIMS AND LAWSUITS.

1. County Counsel and/or Risk Management provides notification to the Office of the Sheriff Professional Standards Unit of all claims/lawsuits involving the Office of the Sheriff.

2. The Professional Standards Unit will notify and/or forward copies of claim/lawsuit documents to the appropriate Bureau Assistant Sheriff when:
   a. The amount of the claim/lawsuit is for $5,000.00 or more;
   b. When a pattern of employee conduct or specific activity causes multiple claims/lawsuits;
   c. When an individual has a history of contrived claims/lawsuits;
   d. When a change in policy or procedure may eliminate or reduce future claims;
   e. When the Professional Standards Unit Commander believes the claim/lawsuit should be reviewed by the Bureau Assistant Sheriff/Division Command staff.

IV. PROCEDURE 1.

A. CLAIM REQUIRING ADMINISTRATIVE INQUIRY REVIEW.

1. After review by the Bureau Assistant Sheriff of a claim/lawsuit and with the Undersheriff’s approval, an administrative review may be turned over to the Internal Affairs Detail for investigation.

2. Administrative reviews shall be conducted in all cases of alleged:
   a. Force
   b. Sexual harassment; or
   c. Criminal/unlawful conduct.

3. Administrative Inquiries will cover previously undiscovered violations of Office of the Sheriff Policies and Procedures that have taken place within six months of the date of occurrence. The Professional Standards Unit will forward copies of investigative reports to the affected Bureau Assistant Sheriff.

4. Any allegations of criminal/unlawful conduct will be investigated within the normal Statute of limitations for the crimes(s) involved.
I. POLICY.
   A. The Office of the Sheriff has established guidelines for the acceptance of Subpoenas Duces Tecum to ensure complete compliance in providing the documents and court appearances they require.

II. DEFINITIONS.
   A. SUBPOENA DUCES TECUM. A legal process requiring the production of designated books, tapes, documents or other evidence.
   B. SUBPOENA DUCES TECUM RE: DEPOSITION. A legal process requiring the attendance of a witness out of court to give evidence before a judge, commissioner, notary public, or other authorized officer of the court or to produce certain evidentiary records for deposition and requiring the witness to be prepared to authenticate the documents.
   C. TNG ORDER. The legal requirement that a juvenile court judge must review juvenile records to determine what information, if any, may be released to a requesting party.

III. GENERAL.
   A. This Policy addresses subpoenas requiring testimony, the production of documents, or the attendance of the Custodian of Records or other qualified witnesses to deliver records or documents to the clerk of the court, a deposition officer, or to appear before a judge, deposition officer, or other authorized officer of the court to give testimony.

IV. PROCEDURE 1.
   A. SUBPOENA ACCEPTANCE.
      1. The Technical Services Division, Records Unit Manager is the designated person to accept, review, track and disseminate to the appropriate division or unit subpoenas for Office of the Sheriff business records.
      2. Any Office of the Sheriff employee may accept Subpoenas Duces Tecum or Subpoenas Duces Tecum re: Depositions. Employees shall notify the server that the Technical Services Records Unit is the main repository.
and designated as the appropriate service location and provide location and business hours for service.

3. Subpoenas are date sensitive requiring timely production of documents and notifications for appearances. The date and time received and by whom shall be written in the upper right hand corner of the subpoena.

4. Office of the Sheriff employees shall first telephone the Technical Services Records Unit and advise them of Subpoenas Duces Tecum upon receipt, after completing step 3 (above), forward them by fax to the Technical Services Division, Records Unit Manager for review, tracking, and dissemination.

B. TECHNICAL SERVICES RECORDS UNIT RESPONSIBILITIES.

1. The Records Unit Manager or designee shall review each Subpoena Duces Tecum for the following:
   a. Is it addressed to the proper Custodian of Record?
   b. Is the affidavit/declaration attached?
   c. Is the name of the law firm, attorney’s name and telephone number affixed?
   d. Are the compliance date and court date appropriate for appearance (5 days appearance or 15 days production of documents)?
   e. Confirm that the original Subpoena Duces Tecum was shown at time of service and that a copy of both the Subpoena and affidavit/declaration were provided.
   f. If documents requested regard a subject not directly represented by the serving attorney confirm that the required “Notice to Consumer” has been received.

2. The Records Unit Manager shall maintain an audit/tracking log of all Subpoenas Duces Tecum received. Affix a Notification and Compliance Form and disseminate the Subpoena Duces Tecum to the appropriate division or unit for action.

C. COMPLIANCE.

1. After review of the Subpoena Duces Tecum, should questions arise regarding its validity, forward it by fax to County Counsel for consultation and response for any of the following reasons:
   a. Improperly drawn, served or lacks date of production;
   b. Information is available through the discovery process;
   c. Lacks affidavit or declaration;
   d. Lacks sufficient specificity, overbroad in scope or excessively burdensome;
   e. No case number indicated;
   f. Witness fees not paid;
g. Disclosure would interfere with a pending or related investigation or is not in the best interest of the agency;

h. Conflicts with TNG order; and/or

i. The request is for documents in a legal proceeding in which the Office of the Sheriff is already a participant.

2. Certified copies are acceptable and have the same evidentiary value as originals. Do not provide originals. Certified copies require a stamp in red ink indicating they are a true copy of the original records.

3. Do not allow a copy service to handle the originals or personally make copies with Office of the Sheriff equipment. (Note: The Civil Code of Procedure authorizes this practice only when the attorney and the court are from another county.)

4. Response times depend on the type of subpoena. Criminal subpoenas require five (5) days for agency personnel and fifteen days for business records or the time agreed upon between the Custodian of Record and the party who served the subpoena. If an agreement of a different time is made, follow-up the agreement with a letter indicating the agreed time on Office of the Sheriff letterhead and signed by the Custodian of Records.

5. Provide a copy of the records and the completed affidavit or declaration as follows:

   a. Place the records, affidavit/declaration in a sealed, separately enclosed inner envelope, and write the time, number of the action, name of witnesses, and date of the subpoena, or affix a copy of the subpoena face page to it.

   b. Enclose it in an envelope, seal it and address it as follows:

      • If directs attendance/documents in court, address it to the clerk of the court.

      • If directs attendance/documents at a deposition, address it to the deposition officer taking the deposition and the place of the deposition or the deposition officer’s place of business.

      • For mutually agreed upon location or other circumstances, follow Evidence Code Section 1560(c)(3) and (d) for direction.

D. SUBPOENA FEES.

1. Reasonable costs associated with locating, copying, reviewing, etc. shall be at the maximum rate of $24.00 per hour per person, computed at $6.00 per quarter hour or fraction thereof, actual postage charges, and the actual cost, if any, charged to the witness by a third party for the retrieval and return of records held by that third party. Ten cents ($0.10) per page for standard documents 8 ½ x 14 inches or less; twenty cents ($0.20) per page for copying from microfilm and actual costs for reproduction of oversize documents or documents requiring special processing.
2. Fees for records delivered to the attorney, the attorney’s representative, or the deposition office for inspection or photocopying at the witness’ place of business shall not exceed $15.00. Apply appropriate costs should the records need to be retrieved from microfilm. (See number 1.)

3. When a personal appearance of the Custodian of Records is required pursuant to Evidence Code Section 1564, the witness is entitled to the same witness fees and mileage permitted in a case requiring testimony in court and any additional costs provided by Evidence Code Section 1563(b).

4. No documents shall be delivered without receipt of fees for such services.

5. Complete the Notification and Compliance Form and return to the Technical Services Records Unit Manager for recordation and audit/tracking.
# Contra Costa County
## Office of the Sheriff
### General Policy and Procedure

**CCCSO NUMBER: 1.05.70**

**RELATED ORDERS:**
- County Employee MOU California Civil Code 1094.6;
- County Employee Retirement Law of 1937;
- County Personnel Management Regulations;
- County Merit System Ordinance; CCCSO 1.04.64.

**ISSUE DATE:** 2-1-2006  
**REVISION DATE:** 4-5-2016  
**CLEARANCE:**  
Office of the Sheriff  
**CHAPTER:** Personnel Management and Employment Relations  
**SUBJECT:** Personnel Management Regulations

---

## I. POLICY.

**A.** The effective and efficient operation of the Office of the Sheriff requires that employee behavior conform to Office of the Sheriff standards. Occasionally, positive actions to correct unacceptable behavior fail or the unacceptable behavior is such that use of the Corrective Counseling System is inappropriate. The Office of the Sheriff uses the County Personnel Management Regulations in these cases to modify unacceptable behavior.

## II. DEFINITIONS.

**A.** ADMINISTRATIVE APPEAL. An administrative appeal allows the employee to meet with the Sheriff for the purpose of discussing an administrative decision affecting the employee.

**B.** CAUSE OF ACTION REPORT. A report from supervisory personnel that identifies specific causes for disciplinary action against an employee.

**C.** COUNTY. The County of Contra Costa.

**D.** DEMOTION. The reclassification of an employee to another position in a class having a lower salary allocation at the top step than the class previously occupied by the employee.

**E.** DIRECTOR OF PERSONNEL. The person designated by the County Administrator to serve as the Assistant County Administrator-Director of Personnel.

**F.** EMERGENCY PERSONNEL ACTION. An emergency personnel action is warranted when the Sheriff or designee has reliable information regarding an employee's recent or potential behavior which would cause the Manager to have a reasonable concern for the welfare or safety of the public, the employee, or other employees. An emergency personnel action may involve assignment to a Temporary Modified Duty, Leave of Absence with Pay, or assignment to a specific work station.

**G.** MERIT BOARD. The Merit Board of Contra Costa County.

**H.** PERMANENT STATUS. Appointment to a position which must be confirmed by successful completion of the probationary period specified for the class.
I. REDUCTION. The lowering of an employee's compensation level within their current salary range.

J. REPRIMAND. A formal written notice to the employee informing him/her that his/her performance and/or behavior must improve.

1. Used when counseling or other non-disciplinary methods have not worked.
   a. Tells the employee what future disciplinary action will occur if there is no improvement.
   b. Defines the area where improvement is needed.
   c. Is placed in the employee's personnel file.

2. Letters of Reprimand are subject to the Grievance Procedure as outlined in the Memoranda of Understanding.

K. REVOCATION OF POLICE POWERS. It may be necessary for the Sheriff or designee to temporarily suspend the police powers of a sworn employee. The employee is served with a document indicating that the officer's police powers (per Section 830 P.C., et. seq.) have been suspended, and revoking authorization for Office of the Sheriff issued weapons, ID card and badge.

III. GENERAL.

A. PERSONNEL MANAGEMENT. The County Merit System Ordinance and Personnel Management Regulations provide that tenure of employees shall be awarded for good behavior and the rendering of efficient service. The regulations also provide that the Sheriff may dismiss, suspend, demote or reduce in compensation any employee for cause. When the use of the Corrective Counseling System is inappropriate, or the employee has failed to correct unacceptable behavior while in the system, the Personnel Management Regulations will be utilized.

1. Cause. The following list of causes are sufficient for the utilization of the Personnel Management Regulations. The list is indicative of causes that may result in dismissal, suspension, demotion or reduction in compensation. However, it is not all inclusive and other unspecified causes may result in such action.

   a. Absence without leave.
   b. Excessive or unexcused absenteeism and/or tardiness.
   c. Neglect of duty.
   d. Incompetence or inefficiency.
   e. Disorderly or immoral conduct.
   f. Being at work under the influence of liquor or drugs, carrying liquor or drugs during work hours and/or on County premises.
   g. Conduct tending to bring the Merit System into disrepute.
   h. Conviction of any criminal act involving moral turpitude.
   i. Negligent or willful damage to public property or waste of public supplies or equipment.
j. Misappropriation of County funds or property.

k. Dishonesty or theft.

l. Violation of any reasonable policy or procedure or lawful order given by a Supervisor.

m. Insubordination.

n. Unreasonable failure or refusal to undergo any physical, medical and/or psychiatric examination and/or treatment authorized by County regulations.

o. Material and intentional misrepresentation or concealment of any fact in connection with obtaining employment.

p. Willful violation of any of the provisions of the Merit System Ordinance or Personnel Management Regulations.

q. Sexual Harassment.

2. Skelly Requirements.

a. Before taking action to dismiss, demote, reduce compensation, or suspend an employee for more than 40 work hours (48 hours for 24 hour shift employees), the Sheriff shall direct the service of a Notice of Proposed Action, either personally or by certified mail with a return receipt requested. The notice shall contain the following:

- A statement of the action proposed to be taken;
- A copy of the charges including the acts or omissions and grounds upon which the action is based;
- If it is claimed that the employee has violated a rule or regulation of the County, Office of the Sheriff or district, a copy of said rule shall be included with the notice;
- A statement that the employee may review and request copies of materials upon which the proposed action is based; and
- A statement that the employee has seven (7) calendar days to respond to the Sheriff, either orally or in writing.

b. The employee who has been served with a Notice of Proposed Action has seven (7) calendar days to respond to the Sheriff, either orally or in writing, before the proposed disciplinary action may be taken. Upon application and for good cause, the Sheriff may extend in writing the period to respond. If the employee's response is not filed within seven (7) days or any extension granted, the right to respond is lost. Pending employee response to a Notice of Proposed Action, the Sheriff may place the employee on temporary leave of absence with pay, for cause specified in writing.
3. Dismissal, Suspension, Demotion or Reduction in Compensation. After complying with applicable Skelly requirements, the Sheriff shall issue an order in writing stating specifically the causes for the action.
   a. The order shall be filed with the County Human Resources Director after service on the employee. The filed order shall list the date served, by whom served, and whether it was served personally or by the U.S. Postal Service via certified mail with a return receipt requested.
   b. The employee may, within ten (10) calendar days after personal service or receipt of the order, appeal in writing through the County Director of Human Resources to the Merit Board, or the employee may waive in writing to the County Director of Human Resources his/her right of appeal to the Merit Board in favor of appeal rights under a specific grievance procedure.

4. Suspension Without Pay Due to Pending Criminal Charges.
   a. The Sheriff, upon giving notice as provided in 3a. above, may immediately suspend an employee against whom there is a pending criminal charge which adversely affects the County service or conflicts with continued employment. Such suspension lasts until the Sheriff has knowledge of a disposition on the charges. Pending criminal charges exist when an employee has been arrested or has been named a defendant in a criminal complaint or indictment filed in any court.
   b. To suspend an employee due to pending criminal charges, the Sheriff shall serve on the employee, either personally or by certified mail with a return receipt requested, a Notice of Suspension Due to Pending Criminal Charges. The notice shall contain:
      • A statement that the employee is suspended due to pending criminal charges;
      • A statement of the charges upon which the suspension is based and of the facts by which such charges adversely affect the county service or conflict with continued employment;
      • A statement that the employee may respond to the Sheriff either orally or in writing within seven (7) calendar days; and
      • A statement that disciplinary action may be taken after disposition of the charges.
   c. The Notice of Suspension Due to Pending Criminal Charges may include a Notice of Proposed Action (Skelly Notice).
   d. The Merit Board may order lost pay restored for good cause, subject to the employee's duty to demonstrate damages, but not if the employee:
• Is given a Notice of Proposed Action (Skelly Notice); and
• Is dismissed or otherwise disciplined for cause directly related to the charges within 14 calendar days after the Sheriff has knowledge of a disposition of the criminal charges.
• A criminal conviction expunged by the court under Penal Code Section 1203.4 may be used during an administrative hearing (Adams v. County of Sacramento).

e. A criminal conviction based upon a plea of ‘nolo contendere’ (no contest) may not be used during an administrative hearing (County of Los Angeles v. Civil Service Commission [Craig Calzada], 39 Cal.App.4th, 256).

5. County Merit Board Hearing/Rehearing. The following is a brief summary of some of the provisions in the County Personnel Management Regulations for an employee appeal of a dismissal, suspension, demotion or pay reduction.

a. The Merit Board shall, within 20 days from the filing of an appeal, determine whether to take jurisdiction of the matter for a hearing. If a hearing is granted, the appellant is entitled to appear personally, produce evidence and to have counsel and a public hearing.

b. Within 30 calendar days after the Merit Board certifies its decision to the Sheriff and at the request of a party or on its own motion, the Merit Board may order a rehearing to:
   • Hear new evidence not known or available with reasonable diligence at the time of the hearing; and
   • Rectify any obvious mistake of law or obvious injustice not known at the time of the hearing.

6. Separation of Probationary Employee. A probationary employee may be rejected from the service at any time during the probation period without regard to the Skelly provision of these rules. The following administrative guidelines apply to the rejection of probationary employees.

a. Written notice of rejection must be given not later than the last day of the probationary period. The notice must be served on or before its effective date, otherwise the employee is entitled to the same due process afforded a permanent employee.

b. Probationary employees are entitled to an administrative appeal to the Undersheriff.

B. EMERGENCY PERSONNEL ACTIONS. On occasion, unusual or inappropriate behavior on the part of Office of the Sheriff employees may require Office of the Sheriff Managers to take immediate personnel action to provide for the safety of individuals or security of Office of the Sheriff facilities. The guiding principle of
this section is to provide employees with a safe, secure working environment and
to minimize disruption of service to the public.

1. Recognizing the Need for Action.
   a. Emergency action under this section is warranted under the
      following general circumstances.
      • An overt act by an employee which may be illegal or
        may represent such a serious breach of Office of the
        Sheriff Policy that the Sheriff or his designee has a
        reasonable concern for the safety of individuals or
        security of Office of the Sheriff facilities.
      • Unusual behavior or statements attributed to the
        employee which tend to indicate instability, or present a
        potential danger to the safety of self or others. This may
        include threatening statements attributed to the
        employee, or statements indicating severe depression or
        illogical thought processes. This unusual behavior may
        or may not require taking the employee into protective
        custody under Welfare & Institutions Code Section
        5150. In either case, it is imperative that a supervisor or
        fellow employee remain with the agitated employee until
        he/she receives medical attention at a designated facility,
        or until the arrival of someone else in the employee’s
        trust to care for him/her (i.e. family member, friend,
        clergy, etc.).
   b. The emergency action should be taken by the highest available
      command level Manager depending on the time of occurrence.
      Ideally the employee’s Bureau Assistant Sheriff should be
      involved; if unavailable, the Station, Facility, or Division
      Commander shall be contacted.

IV. PROCEDURE 1.
   A. INSTITUTING THE PERSONNEL MANAGEMENT REGULATIONS. When
      a Supervisory, Command, or Management person believes cause exists to
      institute the use of the Personnel Management Regulations above a Letter of
      Reprimand, a Cause of Action Report shall be prepared. Letters of Reprimand
      only require a Cause of Action Report if there is no investigative report such as
      an I.A. report prepared to support the Letter of Reprimand.
         a. The Cause of Action Report will be prepared on official memo
            stationery by the Supervisory, Command or Management
            personnel concerned. The report will be directed to the Sheriff
            via the Undersheriff.
         b. The subject line of the memo shall include the following:
            • Cause of Action Report;
            • Specific causes of action; i.e., violation of rules, failure
              to modify unacceptable behavior, etc.; and
• Identity and position/title of the employee involved.

c. The body of the report shall include an objective, thorough description of specific details of violations alleged and/or failure to modify unacceptable behavior. The report must be complete, concise and sufficiently in depth to establish a Cause of Action. It should include personal observations but not judgments, witness statements and interviews with the person(s) who is the subject of the report. Other additional statements from individuals having knowledge of incidents or events contributing to the Cause of Action should also be included.

d. Documentary information supporting the Cause of Action shall be attached and become part of the Cause of Action Report.

e. Following the body of the report the following acknowledgment is to be inserted. "I acknowledge I have read, or have been given the opportunity to read, the contents of this report."

______________________________  _______________________
Signature                                           Date

f. Employees subject to action shall be given a copy of the Cause of Action Report and the opportunity to respond in writing within five working days if such response is not already included in the report. Within this time period the employee may also request to meet with the Division Commander in person to review the facts of the Cause of Action Report.

g. Upon completion of the report and attachments, employees subject to the action shall be requested to read the report and sign the acknowledgment.

h. If the employee refuses to sign the acknowledgment and/or refuses an opportunity to read the report, the Supervisory, Command or Management person instituting the action will note the refusal immediately below the acknowledgment.

a. The completed Cause of Action Report shall be forwarded immediately to the supervisor of the Supervisory, Command, or Management person instituting the action.

b. The immediate Supervisor shall, upon receipt of the report:

• Review the Cause of Action Report and may:

• Direct any necessary additional investigation at his/her command/management level.

• Recommend the Internal Affairs Detail conduct an investigation. The Sheriff or the Undersheriff may direct an Internal Affairs Detail investigation.

• Report immediately below those previously submitted.
• Forward the Cause of Action Report to the next immediate Supervisor in the chain of command.

• Step (b) above shall be repeated as necessary to ensure the Cause of Action Report is received by the Sheriff within five (5) business days of initiation.

• For proposed action above a Letter of Reprimand, the Bureau Assistant Sheriff shall schedule a Cause of Action conference (Round Table) after consulting with the Undersheriff.

V. PROCEDURE 2.

A. EMERGENCY PERSONNEL ACTION. When during times other than regular business hours, (weekdays, Monday - Friday, 8am - 5pm) it becomes apparent that emergency personnel action may be necessary, the Bureau Assistant Sheriff or designee shall ensure the steps below are followed. During regular business hours, except for good cause, the Undersheriff will be fully briefed before taking actions set forth in “ACTION”, Sections 2, 3, or 4 below.

B. VERIFICATION.

1. Prior to taking action, the Bureau Assistant Sheriff should take immediate steps to verify that emergency action is warranted.

2. In certain instances, a verbal or written report by a medical or psychological consultant will be sufficient cause for emergency action. In other cases, the Bureau Assistant Sheriff or designee should interview the employee to be impacted by the emergency action.

3. In no event should an unconfirmed rumor or hearsay be the sole cause for an emergency personnel action.

C. ACTION. Depending on the information available and the seriousness of the employee's actions or behavior, the following actions should be taken by the Division Commander or designee:

1. Immediately ordering the employee to be seen by an on-call therapist from the Department’s Employee Assistance Program provider, and having the employee observed or monitored until he/she can be seen by the psychologist.

2. Placing the employee on "Temporary Leave of Absence with Pay" by completing an AK 183 and having the employee sign the document; or

3. Having the employee report to a work location where supervision can be provided. This could involve an emergency change in shift schedule of the employee.

4. Revoking the police powers of the employee and collecting duty weapon, other safety equipment, badge and I.D. The Division Commander shall maintain temporary possession of the equipment. The Division Commander will return the equipment to the Training Unit in the event the employee is terminated.

   a. The seriousness of placing an employee on Leave of Absence, revoking police power and/or taking the employee’s weapon
should not be underestimated. Good judgment and timely consultation with Command Staff is imperative.

D. DOCUMENTATION AND FOLLOW-UP. The procedures described in this Policy are for a short term, immediate response to an emergency personnel issue. The Bureau Assistant Sheriff will be responsible for follow-up, notification and documentation.

1. The Bureau Assistant Sheriff will report the emergency action taken to the Undersheriff as soon as practical, including all documentation and copies shall be sent to the Chief of Management Services.

2. The Division Commander will continue to monitor the employee's status on a day-to-day basis until a decision is made regarding any permanent action or return to duty.

VI. PROCEDURE 3.

A. DISABILITY DUE TO PSYCHOLOGICAL FACTORS.

1. Upon submission of medical verification indicating that the employee is unable to perform the job due to psychological factors and must take leave from work, the employee’s peace officer powers will be revoked and his/her duty weapon, other safety equipment, badge and ID card, will be collected and held by his/her Division Commander until the employee is cleared to return to full duty.

2. The Division Commander will return the equipment to the Training Unit in the event the employee resigns, retires or is terminated.

VII. PROCEDURE 4.

A. CAUSE OF ACTION CONFERENCE (ROUND TABLE). All Cause of Action memo’s will be reviewed by the Undersheriff, who will determine on a case-by-case basis if a Cause of Action conference is necessary. The Cause of Action conference will be comprised of the Sheriff, Undersheriff, appropriate Bureau Assistant Sheriff, appropriate Division Commander, Internal Affairs representatives, and such other persons as the Sheriff shall determine on a case-by-case basis. This Cause of Action conference will review the Cause of Action Report and any other supporting documents such as I.A. Investigative reports to ensure the discipline is timely, proper and fair. This Cause of Action conference will be held prior to a final recommendation or endorsement by the Undersheriff to the Sheriff, except letters of reprimand, which are the responsibility of the Undersheriff to review.

VIII. PROCEDURE 5.

A. SHERIFF. The Sheriff upon receipt of a Cause of Action Report for merit system placement above a Letter of Reprimand will:

1. Review the Cause of Action Report;

2. Fully discuss the matter with the appropriate Bureau Assistant Sheriff and the Undersheriff; and

a. Based on the recommendations, during the Cause of Action conference determine the proper course of action which could include:
• Closing the issue based on available information;
• Return the matter to the Bureau Assistant Sheriff via the Undersheriff to be handled in the Corrective Counseling System;
• Return the matter to the Bureau Assistant Sheriff via the Undersheriff to issue a Letter of Reprimand to the employee and place it in the employee's file; or
• Dismiss, suspend, demote or reduce compensation to the employee.
I. POLICY.
   A. Divisions may maintain a Petty Cash Fund for minor operating expenses. The need as well as the amount of a Division's Petty Cash Fund will be determined by the Division Commander and the Chief of Management Services. The Petty Cash Fund will be established to provide monies for daily nominal expenses required to maintain efficient Division operations.

II. GENERAL.
   A. DIVISIONAL PETTY CASH FUND.
      1. Individual purchases will be $25.00 or less.
      2. The Petty Cash Fund is not to be used in advance of purchase. Purchases will be reimbursed after a receipt is presented.

   B. PETTY CASH CUSTODIAN. The Division Commander will appoint a Division Petty Cash Custodian and an Alternate Custodian. The Petty Cash Custodian will be solely responsible for the maintenance of the Division's Petty Cash Fund. The Alternate Custodian will maintain the Petty Cash Fund in the absence of the Petty Cash Custodian and for not less than two (2) consecutive weeks each year.

III. PROCEDURE 1.
   A. PETTY CASH CUSTODIAN RESPONSIBILITIES. The Petty Cash Custodian will:
      1. Have on hand cash and/or receipts totaling the amount of the fund at all times.
      2. Routinely submit demands for reimbursement. Demands should be submitted monthly unless activity of the fund requires more submissions to maintain a substantial amount of cash.
      3. Promptly cash reimbursement checks.
      4. Obtain an employee's signature on the reimbursement demand when a receipt is presented.
      5. Reconcile the Petty Cash Fund at least monthly to ensure accuracy, or when transferring the fund to and from the Alternate Custodian.
6. Promptly report any fund discrepancies to both the Division Commander and the Departmental Fiscal Officer.

IV. PROCEDURE 2.
A. DIVISION COMMANDER RESPONSIBILITIES. The Division Commander will perform periodic audits of the Petty Cash Fund.
I. POLICY.
   A. Employees may be reimbursed for actual, reasonable and necessary expenses arising from the discharge of their official duties in accordance with this policy and within the policy limitations.

II. DEFINITIONS.
   A. Employee Travel Demand. Refers to County Form No. M8154, Revised 9/82.
   B. D-15 Demand Form. Refers to County Form No. D-15, Revised 10/77.

III. GENERAL.
   A. EMPLOYEE TRAVEL DEMAND. Demands are primarily used to reimburse employees for overtime/out-of-county meals and all authorized travel expenses. Demands are not intended to substitute for the normal requisition system, nor for the ordinary purchase of equipment. Only actual expenses up to certain amounts are reimbursable. The Employee Travel Demand Form is used:
      1. To reimburse employees for money spent in performance of their duties;
      2. To reimburse employees for education and training that has been previously approved for reimbursement.
   B. REIMBURSEMENT GUIDELINES.
      1. Ineligible Expenses:
         a. Alcoholic beverages, except when purchased for a police duty or experiment authorized by a Division Commander.
         b. Liability coverage for automobile rentals, as coverage is already provided by the County while the rental car is used for business.
         c. Otherwise eligible expenses that were not incurred. For example, if two people travel together in one car, only one would be eligible for mileage reimbursement.
         d. Unapproved expenses, i.e., expenses incurred by the traveler in anticipation of approval of a Travel Request that subsequently was not approved.
2. When attending an approved seminar or class and the fee for the lunch is included in the seminar price, (i.e., seminar and lunch - $20), the employee will be reimbursed the full amount if the seminar or class fees were not prepaid by the Office of the Sheriff.

3. All lodging, meals, mileage, bridge fares and parking associated with authorized travel are reimbursable. Receipts must be attached for all expenses. Meal receipts for overtime meals or out-of-county meals must identify the restaurant, the date and the amount of the bill, including tax and gratuity. Mileage is reimbursed for use of personal cars at the rate specified by the IRS.

4. Reimbursement for education and training is subject to prior approval by the employee’s Bureau Assistant Sheriff.

5. Purchases made on behalf of the Office of the Sheriff shall be claimed on a D-15 Demand Form, not on an Employee Travel Demand.

6. The Sheriff and management employees specified in the County Resolution for Compensation of County Officers and Management may be reimbursed professional development. Professional development includes membership in professional organizations, subscriptions to professional publications and attendance fees at job-related professional development activities. Specific reimbursement limits are established by the current County resolution or MOU.

7. Expenses incurred in connection with travel subject to pre-approval on a Travel Request Form will not be reimbursed in the absence of an approved Travel Request Form. Prior to incurring any travel-related expenses for which reimbursement will be sought, employees are encouraged to review Policies and Procedures 1.05.73, Travel Requests.

8. Costs of required training additional to registration fees, such as mileage and meals, may be allowed if such costs would not otherwise have been incurred. Reimbursement is limited to employees who travel for training to a location other than their assigned work location. Reimbursement is not available to staff for in-County mileage and meals if their work location is County-wide.
   a. Mileage is only reimbursed when it exceeds the employee’s normal daily mileage. Example: The employee lives in Davis and attends a class in Sacramento. There is no reimbursement in this example as the employee's normal commute is greater than the commute to class.

9. Hosting official guests of the County, such as members of examining boards, official visitors, public speakers or honored guests, at banquets or other official functions, may be reimbursed if approved by the Division Commander.

10. The purchase of meals may be authorized when the employee(s) is required to conduct business with County officials or employees and it is inappropriate or impractical to conduct such business at the work place or during work hours.
C. OVERTIME/OUT-OF-COUNTY MEALS.

1. Reimbursement for meals: Actual expenses, including tax and gratuity, for individual meals, and snacks, will be reimbursed up to $65.00 per day, if the individual is eligible for three meals on that day. If eligible for two or fewer meals, the following individual maximums shall apply:
   
   a. Breakfast          $10.00  
   b. Lunch               $20.00  
   c. Dinner              $35.00  
      
   • Receipts of actual expenses required.

2. The following circumstances entitle an employee to reimbursement for actual meal expenditures, up to the maximum allowed:

   a. When working three or more unscheduled hours in addition to the regular work shift, or three or more unscheduled hours on a regularly scheduled day off. Overtime hours that are scheduled in advance do not qualify for meal reimbursement.

   b. When out-of-County because of a particular work assignment.

D. REIMBURSEMENTS WITH APPROVED TRAVEL REQUEST.

1. For authorized overnight or air travel, an approved Travel Request Form must accompany the Employee Travel Demand Form signed by the appropriate Bureau Assistant Sheriff. Actual expenditures for each meal must be listed on the demand form including the tax and gratuity and reimbursement will not exceed current maximum amounts.

2. Bridge tolls, parking, checking fees, telephone and FAX charges (relative to County business), BART or bus fares, along with tips and porterage (baggage handling) in accordance with local custom, may be submitted for reimbursement.

3. For portions of an authorized travel day, the amount reimbursed will be in accordance with the departure and return times (example: a person leaving on authorized travel at 11:00 a.m. Monday and returning at 3:00 p.m. Tuesday will not be reimbursed for breakfast Monday or dinner Tuesday.)

4. When traveling on grant funds, the repayment rate will be governed by the grant requirement.

E. REPLACING SAFETY EQUIPMENT. Deputies who are required to purchase specified safety equipment will be reimbursed for the purchase price or authorized percentage of the purchase price described in Policy Section 1.07.23, Personal Protection Equipment. Replacement safety equipment may be available from the Training Unit. Contact the Training Unit prior to purchasing safety equipment. Receipts for the equipment must be attached to the demand form.

F. CAREER DEVELOPMENT TRAINING/EDUCATION. Reimbursement for education and training is subject to Office of the Sheriff approval to a maximum of $650 per fiscal year.
1. Employees desiring reimbursement for training or education courses must submit a memo through the chain of command, prior to commencing the course of instruction to the Undersheriff to obtain approval. All members throughout the chain of command will indicate on the memo their approval or disapproval in order to ensure the class does not conflict with the employee’s work schedule.

2. The Undersheriff will return the memo to the employee back down the chain of command indicating approval or disapproval. If approved, the employee shall prepare a TR1 and submit the TR1 to the Undersheriff via the chain of command.

3. Once the Undersheriff has signed and approved the TR1, all documents will be forwarded to the Fiscal Services Unit.

4. Upon completion of the course, the employee shall submit the following to the Fiscal Services Unit:
   a. Employee Travel Demand (M8154)
   b. Receipts for classes and books; and
   c. Grade report or transcript.

G. LOST OR DAMAGED PERSONAL PROPERTY. Refer to Policy 1.07.14, Personal Property, Lost or Damaged.

IV. PROCEDURE 1.

A. EMPLOYEE RESPONSIBILITY.

1. Combine all overtime/out-of-county meal and travel demands into one monthly demand. List individual instances on the demand. Do not combine multiple months into one demand.

2. Attach a note explaining any demands which may be difficult for auditing staff to evaluate.

3. All dates, case numbers including overtime investigations, and amounts must clearly be shown for each instance.

4. Attach receipts for all expenses, including meals. Meal receipt must indicate the date, the name or restaurant and the amount.

5. Sign demand and include employee number; and submit to Division Commander via chain of command.

6. Demands are to be submitted in a timely manner, generally within 30 days of completion of travel. Any demand submitted outside that time frame must include a memo from the employee to the Division Commander with an explanation of the late submittal. The County has no obligation to pay travel expense reimbursement requests submitted more than one year following completion of travel.
V. PROCEDURE 2.
A. DIVISION COMMANDER RESPONSIBILITY.
   1. Ensure that the demand is complete as to name, address, signature, employee number and dates.
   2. Review actual claim against Division records as to travel, overtime worked, date, and review amounts in conformity with County and Office of the Sheriff policy.
   3. Confirm that all receipts are attached and submit, via the Division Commander to the Fiscal Services Unit.

VI. PROCEDURE 3.
A. FISCAL SERVICES UNIT RESPONSIBILITY.
   1. For all demands (except lost or damaged property: see Policy 1.07.14), the Fiscal Services Unit will:
      a. Enter the correct reimbursement costs and check the form for compliance and accuracy;
      b. Attach authorized travel form or Training Reimbursement Form to the Demand Form; and
      c. Ensure timely submission to the Auditor's office. Normally, all Demand Forms received in the Fiscal Services Unit will be processed semi-monthly.
   2. Demands requiring further explanation will be returned to the Division Commander via the chain of command.
I. POLICY.
   A. Training and Travel Requests shall be properly processed to ensure the employee is authorized to travel and is properly reimbursed pursuant to Office of the Sheriff and County policy. All travel requests involving the Office of the Sheriff shall follow these guidelines.

II. DEFINITIONS.
   A. TRAVEL REQUESTS. Refers to County Travel Request form effective 7/07.
   B. REIMBURSEMENT. Refers to County form M-8154 Employee Travel Demand, D-15 Non-Employee Demand.
   C. WARRANT REQUESTS. Contra Costa County Form No. M-383.

III. GENERAL.
   A. TRAVEL AUTHORIZATION.
      1. All overnight trips, regardless of cost, and all day-trips costing more than $100 per trip, are authorized only when prior approval has been granted pursuant to this Policy. No travel reimbursement will be paid without prior approval for the travel expense.
         a. All travel subject to this Policy shall be requested on a Travel Request form, which shall be completed by Division Purchasing Clerks upon request by Division Commanders.
         b. Travel costing less than $1,000, and involving fewer than five travelers on the same trip, and with the travel destination within the continental United States, requires the approval of the traveler’s Bureau Assistant Sheriff.
         c. Travel costing $1,000 or more per person, or involving five travelers or more on the same trip, or with a travel destination outside of the continental United States, requires the approval of the traveler’s Bureau Assistant Sheriff and the County Administrator’s Office.
d. All Travel Requests should be fully approved at least two weeks prior to the commencement of travel. If the travel requires approval by the County Administrator’s Office, allow an additional week for processing.

e. Travel Requests submitted late will not be granted except in unusual, urgent, or exigent circumstances. Travel undertaken in the absence of an approved Travel Request will not be reimbursed.

f. Exceptions to this Policy may apply for certain “operational” travel such as the transport of prisoners. The County Administrator’s Office may approve exceptions upon the request of the Sheriff.

2. Authorization for travel may be granted subject to the following criteria:

   a. Priority of request in relation to available funds and other travel requirements.

   b. Overnight travel authorization should be limited to the period of the approved meeting plus reasonable travel time to and from the meeting.

   c. The “Travel Justification” section of the Travel Request must explain why the travel is necessary and beneficial to the County. The explanation must include the importance of the trip to the employee’s responsibilities. A copy of the conference schedule and/or itinerary should also be attached.

   d. Mandated training requirements are given priority.

   e. All overnight trips involving persons who are not employees of the Office of the Sheriff, including co-educational field trips and trips involving minors, shall require the prior approval of the Sheriff’s Executive Team.

3. Travel Requests are not required for:

   a. Out-of-County meals when there is no overnight travel.

   b. Training reimbursement for career development courses taken on the employee’s own time; and

   c. Travel and/or meals incurred by Transportation staff while transporting inmates.

   d. Extradition travel by the Civil Unit.

B. TRAVEL REQUESTS FOR TRAINING.

   1. Travel Requests relative to state mandated programs (P.O.S.T. and S.T.C.) will be prepared by the Training Unit.

   2. Non-mandated training Travel Requests that involve employees from more than one Division may be prepared by the Training Unit.

   3. All other non-mandated training Travel Requests shall be originated within the employee's Division.
4. Travel Arrangements:
   a. Once a course, seminar, or meeting has been reviewed and is either mandated or approved on a Travel Request, reservations must be made.
      • If the institution offers lodging and meals, use them; or
      • If the host institution does not offer lodging but has lodging recommendations, follow the recommendations if the price is reasonable. If the institution does not make the room reservation, it should be made immediately. Rates must include tax on the Travel Request.
   b. The options for transportation are:
      • County vehicle - if the Division has sufficient vehicles to allow use by an employee attending school.
      • Personal vehicle – the employee collects mileage reimbursement at current rate. The reimbursement rate for mileage is changed periodically to conform with IRS-approved rates. County policy permits an employee to drive a personal vehicle rather than travel by airplane, as long as mileage cost is not more than the airfare.
      • Airline – reservations may be made at the time the Travel Request is completed. Tickets will be purchased by a Purchasing Clerk (see Procedure 4).
      • Rental Car - If a rental car is needed, it should be noted on the Travel Request. (Vouchers are provided by the General Services Department’s Purchasing Division.)
   c. Travel Request Form must be completed and signed by the employee’s Bureau Commander. (See instructions in Appendix 3).
   d. Warrant Request form (M-383) must be completed and attached to the Travel Request or attach a copy of the Travel Request to Procurement Card log.
      • A separate Warrant Request or Procurement Card transaction is required for each expense that will not be claimed on an Employee Travel Demand (meals and mileage).

• The disposition of the check should be noted on each Warrant Request; i.e., “hand carried” or “mailed”.
• Warrant Requests must contain complete information about the travel and to whom the payment is to be made.
• Travel Requests require at least three weeks for processing.

IV. PROCEDURE 1.
A. DIVISION RESPONSIBILITY FOR NON-MANDATED TRAINING TRAVEL AND ALL OTHER TRAVEL.
   1. Division Commanders shall establish Divisional procedures for the completion of travel arrangements, Travel Requests, Warrant Requests and procurement card transactions for all non-mandated training travel.
   2. The Division Commander receiving a completed Travel Request may:
      a. Approve the request based on the required criteria noted in the General Information portion of this policy.
      b. Require additional information from the originator of the request; or
      c. Disapprove the request and return it to the originator.
   3. Travel Requests that are approved and initialed by the Division Commander will be forwarded to the Bureau Assistant Sheriff for approval and signature.
   4. Upon receipt of a completed Travel Request, the Bureau Assistant Sheriff will have copies forwarded as follows:
      a. A copy of the Travel Request shall be routed to the Training Unit. Any available class description should also be forwarded.
      b. A copy of the Travel Request shall be maintained in the Division.
      c. The Fiscal Unit must be notified of any changes.

V. PROCEDURE 2.
A. TRAINING UNIT.
   1. The Training Unit’s Clerical Detail shall complete the travel arrangements, Travel Requests, Requisitions and Warrant Requests or Procurement Card transactions for all mandated training travel initiated by the Unit.
   2. Travel Requests received by the Unit, including those that originate in the Unit, shall be:
      a. Checked for accuracy and completeness.
      b. Checked to ensure that any applicable source of reimbursable training funds are noted on the form.
      c. Initialed by the employee making the review.
3. Reviewed Travel Requests requiring approval by the County Administrator (See General 1 (c) above)(original and one copy) shall be routed to the Chief of Management Services.

4. A copy of each Travel Request shall be kept by the Unit. An additional copy shall be forwarded to the Fiscal Unit.

VI. PROCEDURE 3.
A. CHIEF OF MANAGEMENT SERVICES RESPONSIBILITIES.
   1. Upon receipt from the Bureau of completed Travel Requests requiring approval by the County Administrator’s Office (see General 1 (c) above), the Chief of Management Services may:
      a. Forward the request, based on the required criteria noted in the “General Section” portion of this Policy, to the County Administrator’s Office; or
      b. Require additional information from the originating Division.

     2. The Chief of Management Services will forward a copy of the approved Travel Request to both the originating Bureau and the Fiscal Unit.

VII. PROCEDURE 4.
A. PURCHASING CLERK RESPONSIBILITIES. The Purchasing Clerk shall:
   1. Review all travel request information for completeness and for compliance with submission deadlines.
      a. Any late-submitted travel requests will not be processed in the absence of a signature from the applicable Bureau Assistant Sheriff.
   2. Prepare all proper travel requests on a Travel Request form in a timely manner in order to allow sufficient time for approvals.
   3. Submit completed Travel Requests to the appropriate Bureau Assistant Sheriff for approval, noting thereon those Travel Requests which additionally require approval of the County Administrator.
   4. Forward those Travel Requests requiring the approval of the County Administrator’s Office to the Chief of Management Services.
   5. Notify the originating Division when the Travel Request has been fully approved.
   6. Arrange and provide payment for all approved travel using a procurement card.
   7. Forward a copy of the approved Travel Request to the Fiscal Unit.
   8. Records of all processed Travel Requests shall be maintained by the Administrative Services Purchasing Clerk.
   9. After completion of travel, all employee Travel Demands shall be processed by the Administrative Services Purchasing Clerk.
I. POLICY.
   A. In the event of an on-duty injury or death, notification of the employee’s selected representative shall be made in a timely manner. To facilitate notification, the Office of the Sheriff will maintain a current file of Personnel Emergency Notification Forms for all employees. To ensure employees receive workers’ compensation benefits, and that the Office of the Sheriff meets mandated reporting requirements, all on-duty injuries or illnesses must be properly and immediately reported.

II. DEFINITIONS.
   A. EMPLOYEE REPRESENTATIVE. Those persons who an employee wants notified first in case of his/her injury or death of the employee. The representative may be a relative, friend or fellow employee.

   B. INJURY AND ILLNESS PREVENTION PROGRAM MANUAL. Identification, reporting, and remediation of workplace hazards.

   C. INJURY REPORT FORM. County Form AK30.

   D. LAW ENFORCEMENT OFFICER KILLED OR ASSAULTED FORM. Office of the Sheriff Form SD1.

   E. PERSONNEL EMERGENCY NOTIFICATION FORM. Designates employee’s selected representative.

   F. WORKERS' COMPENSATION FORM. Employees Claim for Workers' Compensation Benefits Form DWC1).

   G. ON DUTY. Working hours when an employee is performing assigned tasks. In cases of approved training or meetings, whether within the Office of the Sheriff or elsewhere, this refers only to the duration of the actual training classes or meetings and not after-hours activities unrelated to the training or meeting. For purposes of Workers Compensation, traveling to and from the location of the training or meeting may, under certain circumstances, be considered on duty as shall be predetermined on a case-by-case basis.
III. GENERAL.

A. NOTIFICATION FILE.

1. A file of employees' representatives will be maintained in order to ensure prompt notification in the event of the death or injury of the employee. The file will contain the following information:
   a. Employee's name.
   b. Representative's name, relationship, home address, home phone number and cell phone number, business address and business phone number with a maximum of two representatives per employee.

2. The file will be maintained by the Personnel Unit and will be used only in the event of an emergency. The information shall be considered confidential and will be used only when authorized by a Sergeant or above. The Communications Center will have twenty-four hour computer access to the file.

B. FACTS ABOUT WORKERS' COMPENSATION.

1. Workers' Compensation. Workers' Compensation is a no-fault insurance plan, paid for by the County and supervised by the State. Fault need not be present to recover specified medical expenses and lost wages. The only requirement is that the illness or injury be job incurred. In cases of injuries incurred while traveling or away on official business, the employee must be on duty for Workers' Compensation to apply. California Workers’ Compensation Law, and the applicable MOU shall be the overriding authority in determining the County’s obligations.
   a. All County employees are covered by workers' compensation.
   b. Any injury or illness is covered if it is incurred in connection with the employee's job while on duty. For example, common colds and flu are not covered, but exposure to tuberculosis on the job is covered.

2. Benefits. Workers' compensation provides two kinds of benefits:
   a. Medical care to cure or relieve the injury.
   b. Compensation for lost wages. These payments are tax-free. The amount and duration of compensation will depend upon the Labor Code, medical verification, and the applicable MOU.
      \[\begin{itemize}
      \item Safety personnel generally receive this benefit for any work time loss of greater than eight hours.
      \item General employees start receiving compensation payments when the injury or illness results in over three calendar days of work loss.
      \end{itemize}\]

3. Special Benefits - Safety Personnel. Special benefits, by statute or administrative law, have been established for safety personnel.
a. Under California Labor Code 4850, sick leave and vacation credits continue to accrue during the period that full salary is being received.

b. If an injured safety employee remains eligible for workers' compensation temporary disability benefits beyond one year, full salary will continue by integrating sick leave and/or vacation accruals with workers' compensation benefits (use of vacation accruals must be approved by the Office of the Sheriff and the employee). If salary integration is no longer available because accruals are exhausted, workers' compensation benefits will be paid directly to the safety employee as required by workers' compensation laws.

c. Hernia, heart trouble, pneumonia, cancer, meningitis, hepatitis, lower back injury, and tuberculosis may be compensable for any safety employee if an industrial cause is established. However, active or safety personnel with five years or more service have a disputable presumption that such injuries developing during their employment arose out of and in the course of that employment. Some of these presumptions are in effect following termination of employment for a period of three calendar months for each full year of service not to exceed 60 months.

4. Statute of Limitations. Timely reporting of a job-related illness or injury is important. Failure to report an illness or injury within a year may bar the employee from workers' compensation benefits.

5. Organization Numbers. The AK30 Form, block “6a” requires an organization number which allows capture of necessary information by Risk Management. The organization numbers which an employee is assigned for payroll purposes shall be indicated on the AK30.

6. Outside Employment. California Workers' Compensation Appeals Board has upheld the legality of employers crediting Labor Code Section 4850 benefits of public safety workers (safety employees) with earnings received from a secondary source (i.e., outside job, self employment, etc.). Concurrent (outside) employment earnings from general employees also offset workers' compensation disability benefits although its application is more complex. Accordingly, all employees, while receiving workers' compensation disability payments for an on-the-job-injury, are responsible for advising the Administration Division via their Division Commanders when they are receiving any simultaneous secondary earnings. This notification must be in writing and include the duration and amount of outside earnings. Outside employment is covered by Office of the Sheriff Policy 1.04.67 Outside Employment and requires prior Office of the Sheriff approval.

IV. PROCEDURE 1.

A. EMPLOYEE RESPONSIBILITIES.

1. Employees may provide the Office of the Sheriff with the names of up to two representatives that will be maintained in order to ensure prompt
notification in the event of the death or injury of the employee. The file will contain the following information:

a. Employee's name.

b. Representative's name, relationship, home address, home phone number and cell phone number, business address and business phone number with a maximum of two representatives per employee. Employees are responsible for notifying the Office of the Sheriff when their representatives' status changes, or for changes in telephone numbers or addresses of representatives. Changes will be submitted by completing a new Personnel Emergency Notification Form and forwarding it to the Sheriff's Communications Center.

2. Employees shall immediately notify their Supervisor of the injury or illness. If an employee is unable to make the notification, the first fellow employee or family member aware of the problem must make the notification. Necessary first aid or medical treatment for the injured or ill employee is always the first priority.

3. Employees shall keep their Division Commanders informed of their medical status and estimated date of return to work.

4. Employees with medical documentation placing physical limitations on their ability to perform tasks shall abide by those limitations both on and off duty.

5. Employees shall submit medical verification for all lost time resulting from a work-related injury or illness. Employees returning to work after an absence resulting from an on-the-job injury must bring a doctor's clearance. The clearance will be submitted to the Division Commander.

a. Temporary Modified Duty: A doctor's clearance for temporary modified duty will be handled as outlined in the Office of the Sheriff Policy Section 1.04.22, Temporary Modified Duty Assignments.

V. PROCEDURE 2.

A. SUPERVISOR'S RESPONSIBILITIES.

1. Initial Reporting. After the Supervisor has ensured that necessary first aid or medical treatment has been given, the following steps will be taken:

a. Immediately notify their immediate Supervisor of any illness or injury resulting in the employee leaving work.

b. Complete the first page of the AK30 Form Section titled, Supervisor's Occupational Injury or Illness Report. Fax a copy to the Administration Division immediately. Complete the second page of the AK30 Form. Forward AK30 Form to the Personnel Services Unit, Administrative Services Bureau via the chain of command as soon as possible.

c. Provide the employee with an Employee's Claim for Workers' Compensation Benefits Form (DWC1). After receiving the completed form from the employee, the employer's portion
should be completed and forwarded to the Personnel Services Unit, Administrative Services Bureau via the chain of command. If the employee declines to return the DWC-1 Form, note such action on the AK-30 Form under section 19 b.

2. Additional Reporting for Serious Injury/Illness or Death.
   a. The Supervisor will ensure a notification is made to Office of the County Administrator, Risk Management Division, Assistant Risk Manager, [redacted], or by sending copies of all relevant reports by mail or transmittal to: 2530 Arnold Dr., Suite 140, Martinez, CA 94533 as soon as possible during normal business hours for any of the following circumstances.
      • Death of an employee.
      • Injury requiring in-patient hospitalization of more than 24 hours for other than medical observation.
      • Dismemberment.
      • Injury producing any serious degree of permanent disfigurement.
   b. The Sheriff's Communication Center will confer with the on-scene Sheriff’s Manager, or in the absence of the Manager, the Watch Commander, regarding the circumstances surrounding the death or injury of the employee. The Center will then, at the direction of the Manager or Watch Commander, within 8 hours of the incident, notify the Sheriff’s Safety Manager and CAL-OSHA/Occupational Safety & Health for any of the above circumstances, unless the incident is an auto accident without any mechanical malfunctions, the result of a criminal act (i.e., police shooting or an injury directly caused by a police function), or a heart attack.
      • Local Cal-OSHA Offices:
        ➢ Concord
          1465 Enea Circle, Bldg E, Suite 900
          Concord, CA 94520

          (Fax) 415-703-5231 / 415-557-0123
INFORMATION required to report includes:

- Time and date of accident
- Employer’s name, address, and phone number
- Name and job title, or badge number of person reporting the accident
- Address of site of accident or event
- Name of person to contact at site of accident
- Name and address of injured employee(s)
- Nature of injury
- Location where injured employee(s) was (were) moved to
- List and identity of other law enforcement agencies present at the site of accident.
- Description of accident and whether the accident scene or instrumentality has been altered.

c. The Supervisor will also immediately notify the Division Commander, via the chain of command, of any serious on-duty injury, illness or death of an employee and generate an Unusual Incident Report Form.

3. Supervisors of Safety Personnel. All deaths of, or assaults on, Sheriff's safety personnel in the line of duty shall be reported to Technical Services Division on the Sheriff's Office Law Enforcement Officer Killed or Assaulted Form. The use of this form is fully covered in the Office of the Sheriff Policy 1.06.62 Police Involved Fatal or Serious Injury Incidents Policy.

4. Off-Duty Injury, Serious Illness or Death. Any Supervisor learning of an employee having a serious injury, illness or death while on or off duty shall immediately complete and forward an Unusual Incident Report Form to the Sheriff via the chain of command.

VI. PROCEDURE 3.

A. MANAGERS RESPONSIBILITIES. The employee's Manager shall ensure that all the required reports and notifications are made. In the absence of a Manager, the Division Commander shall assume those responsibilities.

VII. PROCEDURE 4.

A. DIVISION COMMANDER RESPONSIBILITIES.

1. The employee's Division Commander shall ensure all provisions of this section are completed. In cases of serious injuries, illness or death of an employee while on duty, the Division Commander shall initiate the following:
a. Dispatch a unit to the employee's residence to provide notification, assistance and transportation. If possible, the person dispatched should be an acquaintance of the family;

b. If time is of the essence and the family resides at a distant location, a phone call to the family or local law enforcement agency may suffice;

c. Notify the Bureau Assistant Sheriff and Undersheriff; and

d. Notify the current President of the Deputy Sheriffs' Association and the Contra Costa County Peace Officers Alliance.

2. The Division Commander shall direct the Division Payroll Clerk to properly record any employee absence due to an employee on-duty injury or illness.

3. All completed forms and documentation will be routed to the Personnel Services Unit, Administrative Services Bureau.
I. POLICY.
   A. The Sheriff is concerned and will be actively involved in communicating with the family when an employee or volunteer dies, whether on or off duty. In such an event, prompt notification will be made and a Sheriff's representative will be assigned to assist the decedent's family, as appropriate considering the circumstances.

II. GENERAL.
   A. NOTIFICATION OF SHERIFF.
      1. When the death of an employee or volunteer occurs, the Sheriff shall be notified through the chain of command provided in Office of the Sheriff Policy Section 1.06.21, Unusual Incident Notification Procedure.
         a. The name of the deceased should not be used when transmitting by radio.

   B. NOTIFICATION OF NEXT OF KIN WHEN DEATH OCCURS ON DUTY.
      1. Next of kin notification is the responsibility of the Bureau Assistant Sheriff.
         a. The Division Commander may designate others to make the notification.
      2. Next of kin notification shall be made in person.
         a. When impractical due to distance or time delays, the Division Commander may request another police department to make immediate notification.
      3. In all cases, the person making notification must be provided with adequate information about how the death occurred.
      4. Notification must be expedited to ensure that information is not revealed prematurely through media releases or other sources.
5. Once notification has been made, and while still with the family member, the person(s) who made notification may find it necessary or appropriate to:
   a. Contact other family members, as requested by first member notified.
   b. Assist in getting children in the home help, care and, if necessary, alternate lodging.
   c. Arrange for someone to stay with notified family member after the notification person leaves.
   d. Inform family members of employee to contact if any needs or question develop.
   e. The decedent's Division Commander will select a representative to assist the decedent’s family.

6. The selection will be based on the desires and assessments of the following individuals:
   a. Members of the deceased's family;
   b. Co-workers; and
   c. Immediate Supervisor.

III. PROCEDURE 1.

A. DUTIES OF THE SHERIFF'S REPRESENTATIVE’S RESPONSIBILITIES.

1. The representative appointed in B (6) shall attempt to provide the deceased employee's family with assistance in any problems or concerns that may arise.

2. The following are areas which may be addressed by the Sheriff's representative in assisting the deceased employee's family.
   a. Assist in selecting pallbearers.
   b. Assist in selecting honor guard, if requested.
   c. Have the Office of the Sheriff Funeral Coordinator arrange for the participation of the Color Guard and the Sheriff’s Pipes and Drums in accordance with the wishes of the family of the decedent.
   d. Assist in completing or obtaining any documents/instruments necessary to the decedent's family, such as:
      - County personnel documents;
      - County Insurance policies; and
      - County retirement/benefits papers.

3. The representative will remain in regular contact with their Division and will provide appropriate funeral arrangement information to the Office of the Sheriff.
B. SHERIFF’S RETIRED SAFETY OR RESERVE MEMBER FUNERAL. This Section “B” relates only to the funeral or memorial services for retired safety employees and retired Reserve Deputies. The tribute accorded upon the death of an active safety employee or an active Reserve Deputy, whether on or off duty, shall be determined on an individual basis by the Sheriff. (A Reserve Deputy Sheriff is considered retired when he or she leaves the Office of the Sheriff after 20 years of honorable service if under the age of 50, or five years if the Reserve is 50 or older.)

1. The Division Commander or designee of the decedent’s last assignment will be the Office of the Sheriff contact person and act as a representative for the family.

2. The representative will notify the Sheriff’s Office’s Funeral Coordinator and advise the family of the memorial services procedure.

3. The memorial tribute includes:
   b. The Sheriff may authorize further participants for the tribute at discretion.

4. The Funeral Coordinator will make arrangements for the Color Guard.

5. Honor Guard selection will be made by Bureau Assistant Sheriffs on a rotational basis.

6. Pipes and Drum member selection will be made by the Bureau Assistant Sheriffs assisted by the band leader.

7. Bureau Assistant Sheriffs will make the final decision regarding funeral or memorial service attendance of on-duty personnel and the temporary reassignment of personnel to maintain appropriate staffing levels.

8. Generally, memorial tributes, when authorized by the Sheriff, will be limited geographically to Contra Costa County and adjoining Counties.

9. The decision to provide the memorial entitlement plan shall be at the sole discretion of the Sheriff.

C. OFFICE OF THE SHERIFF FUNERAL COORDINATOR.

1. The Patrol Division, Muir Station Commander shall be the Funeral Coordinator.

2. The Funeral Coordinator will coordinate Office of the Sheriff funerals and official responses to other agency funerals.

3. The Funeral Coordinator will work closely with the Sheriffs representative in such areas as establishing funeral assembly points, providing escorts, arranging an Honor Guard, a Color Guard and Pipes and Drums participation.

4. The Funeral Coordinator will ensure that a CHP 162A (Peace Officer Funeral Worksheet) form is completed and sent to the California Highway Patrol. This form can be accessed on the Sheriff’s Office G: Drive, and will be part of the Muir Station Commander’s desk manual.
D. BADGE MOURNING RIBBON.

1. This policy will also allow for the public to identify the reason why the mourning ribbon is worn.

2. Black mourning ribbons worn "in memoriam" of the death of an active duty Office of the Sheriff sworn employee, Reserve Deputy or fellow peace officer shall be worn on the badge as follows (see graphic below):
   a. Ribbons shall go from the top right (1:30) to lower left (8:00) on the badge (viewed from the front), as if an extension of the right hand placed over the heart.
   b. Ribbons shall be worn through the day of the funeral.
   c. Ribbons should be 1/4" wide.
   d. Ribbons shall only be worn if authorized in writing by the Funeral Coordinator, Undersheriff or Sheriff. If authorized, all staff wearing metal badges shall affix the mourning ribbon for the authorized period.
   e. The Funeral Coordinator’s authority under “d,” above, is limited to authorizing the ribbon for a death of a fellow peace officer in the nine Bay Area counties, which comprise Contra Costa, Alameda, Sonoma, Napa, Marin, Solano, San Francisco, San Mateo and Santa Clara.
I. POLICY.
   A. In the event of the resignation, termination or extended leave of an employee, the appropriate Divisions shall be notified. Prompt communications are necessary to ensure the return of equipment, facilitate scheduling and verify the completion of all necessary paperwork.

II. DEFINITIONS.
   A. EXTENDED LEAVES. For purposes of this section, leaves of over one month are considered extended leaves.
   B. NOTICE OF SEPARATION. County Form AK16.
   C. NOTICE OF VOLUNTARY TERMINATION OF EMPLOYMENT. County Form AK219.

III. PROCEDURE 1.
   A. RESPONSIBILITIES FOR INFORMATION FLOW. Upon receiving notification regarding the resignation, termination or extended leave of an employee, the following will occur:
      1. Each employee is encouraged to submit a memo to his/her Division Commander not less than 30 days prior to resignation advising of the employee’s intention to resign.
      2. It shall then be contingent upon the Division Commander to ensure that the Undersheriff, the Administrative Services Bureau Assistant Sheriff, the affected Bureau Assistant Sheriff, the Training Division Commander, the Professional Standards Division Commander, and the Chief of Management Services receive a copy of the memo immediately.
      3. In the absence of the Bureau Assistant Sheriff, the next in command shall assume the notification responsibilities.
      4. The memorandum shall contain the employee's name, employee number, Division and effective date of the transaction. An extended leave memorandum should contain estimated return dates, if possible.
5. Prior to termination date, the resigning employee and Sheriff’s Office employee conducting the exit interview will complete the Notice of Voluntary Termination of Employment Form. The completed form will be submitted to Administrative Services. Administrative Services will complete the Notice of Separation Form. Both completed forms will be forwarded to Human Resources.

6. In the event of voluntary resignation, the affected personnel shall return:
   a. To Training:
      - Handgun
      - Three Magazines
      - Trigger Lock
      - Gun Case
      - Flashlight/Battery/Chargers
      - Two Sets of Handcuffs
      - O.C. (Pepper) Spray
      - Leather Duty Belt
      - Holster
      - Magazine Pouch
      - Two Handcuff Cases or One Double Handcuff Case
      - OC Pouch
      - Key Holder
      - Radio Holder
      - Four Keepers
      - Baton/ASP
      - Baton Holder (brass or plastic)/ASP Holder
      - Respirator Mask
      - Ballistic Vest
      - Locked Container (Hornady Lockbox)
      - Rain Gear
      - Taser/Cartridge/Battery/Taser Holster
      - Gas Mask/Filters/Holder
b. To FOB:
   • FOB Card
   • Report Writing Manual

c. To Your Duty Station:
   • Department Keys
   • Patrol Rifle/Magazine Holder/Three 30 Round Magazines (Patrol Division)
   • Active Shooter Kit (Patrol Division)
   • Any Additional Duty Station Equipment Assigned

7. In the event of termination, the aforementioned items shall be taken by the employee's Division Commander or Bureau Assistant Sheriff or designee and later returned to Administrative Services and the other above designated locations.
I. POLICY.
   A. The Office of the Sheriff maintains a policy of equity and fairness in its hiring, operational and promotional practices. No employee shall use personal power, influence or their personal relationships to aid or hinder other employees.

II. DEFINITIONS.
   A. NEPOTISM. Favoritism displayed to a relative or acquaintance on the basis of an inter-personal relationship.
   B. RELATIVE. Persons related by blood, marriage, adoption, or cohabitation. For example: husband, wife, significant other, father, mother, son, daughter, brother, sister, half-brother, half-sister, grandparent, grandchild, stepfather, stepmother, stepson, stepdaughter, stepbrother, stepsister, father-in-law, mother-in-law, son-in-law, daughter-in-law, brother-in-law, sister-in-law, uncle, aunt, nephew, niece and cousin.

III. GENERAL.
   A. HIRING RELATIVES.
      1. If a relative of an Office of the Sheriff employee is certified for a permanent position, the Office of the Sheriff Manager responsible for conducting the hiring interview will be responsible for ensuring that nepotism is not a factor. In all respects, the candidate will be treated and evaluated in an equal manner with other candidates certified from the list. Under no circumstances will a Manager conduct the hiring interview if doing so would create a conflict. This would preclude a Manager from interviewing or influencing the interview of a close friend or relative.
      2. The Office of the Sheriff employee whose relative has been certified as a potential employee will make no efforts to influence the selection.
      3. If no eligible list exists for temporary appointments, the Director of Employment Services will develop a pool of candidates through general recruitment and refer available candidates to the Division Commander for temporary appointment.
B. **NOTIFICATION.**

1. In the event the relative of an employee is successful, following a competitive recruitment and examination, the Sheriff will be informed of the familial relationship by the Office of the Sheriff Manager responsible for conducting the hiring interview prior to the offering of any job to that relative.

2. Questions regarding the implementation of this Policy shall be addressed to the Assistant Sheriff of the Administrative Services Bureau.

C. **COMMANDS.** The Office of the Sheriff seeks to avoid situations where a supervisory or command relationship exists between relatives assigned to the same command. Relatives will not be assigned to the same command when either is the Supervisor or Commander.

1. Employees who become relatives after assignment to the same command shall notify by memorandum the Undersheriff via the chain of command. Approval of the Undersheriff is required for continuance of the assignment.

IV. **PROCEDURE 1.**

A. Employees offered promotional opportunities or employees requesting transfers or reinstatement shall be required to indicate by memorandum via the chain of command to the Undersheriff any relative within the command in which a position is being sought.

B. The Commander of the Division in which the position is being sought shall determine the following:

1. If the relative is a Supervisor or Manager, or

2. If the applicant will supervise or manage a relative assigned to the same command.

C. The Undersheriff will consider the reporting relationship and the possible effects of the assignment prior to approval or disapproval of the assignment.
I. **POLICY.**
   
   A. The Sheriff recognizes the importance of establishing and supporting an active pipe and drum corps to perform at official ceremonies and other designated events in an honored law enforcement tradition.

II. **GENERAL**

   A. The Office of the Sheriff Pipe and Drum Corps is a volunteer organization primarily staffed by current, retired, reserve, or auxiliary law enforcement personnel. It exists under the auspices of the Contra Costa Deputy Sheriff’s Association.

   1. Funding for Pipes and Drums is derived from private fundraising activities, charitable donations and performance donations.

   2. Members shall conform to the uniform policies adopted by the Office of the Sheriff.

   B. Pipes and Drums shall endeavor to provide an authentic traditional law enforcement musical background to police funerals, memorial ceremonies, inspections, parades and other law enforcement related events.

   1. When Pipes and Drums has been asked to activate for an event, the Sheriff’s Funeral Coordinator will act as director. (See CCCSO Policy 1.05.75 Death of an Office of the Sheriff Employee.)

   2. When an event takes place, efforts shall be made to release Pipes and Drums members from their normal assignments to participate. Schedule adjustments may be employed as appropriate.

   3. Wearing of the Office of the Sheriff uniform for each event shall be at the discretion of the Sheriff or his designee.

   4. When wearing the uniform or any garment bearing a graphic image indicating the Office of the Sheriff, Pipes and Drums members shall abide by all Office of the Sheriff Polices and Procedures regarding conduct.
C. PARTICIPATION IN NON OFFICE OF THE SHERIFF EVENTS

1. Pipes and Drums members may participate in events during off-duty hours. All participating members shall be informed if the event is considered off-duty and is therefore not subject to FSLA or Workers Compensation. No member shall be required to attend an event that is considered off-duty and participation will be completely voluntary.

2. Office of the Sheriff uniforms, side arms, and garments bearing any graphic images indicating the Office of the Sheriff shall not be worn during non Office of the Sheriff events.

3. Non Office of the Sheriff events shall be coordinated outside official channels and such business will be conducted off duty.

4. As long as the above requirements are met, no official approval will be required prior to participation in non Office of the Sheriff events.
I. POLICY.
   A. The Office of the Sheriff requires certain specific personal information from employees for administrative needs. Such employee information is confidential and shall be handled accordingly.

II. DEFINITIONS.
   A. SPARKS. Refers to Sheriff’s Personnel Administrative Record Keeping System.

III. GENERAL.
   A. PERSONAL CONTACT INFORMATION.
      1. Office of the Sheriff employees shall report any changes in names, addresses, telephone numbers and whom to inform in case of emergency. The actual residence address is required. A post office box is not acceptable.
      2. All changes will be reported to the employee's Division and Administrative Services within 48 hours of the change.
      3. Changes will be reported in the Personnel database (SPARKS).
   B. RELEASE OF PERSONAL CONTACT INFORMATION.
      1. The home address and phone number of any employee of the Office of the Sheriff or any other law enforcement agency shall not be released to the public.
      2. If the home address or phone number of an employee of the Office of the Sheriff or any other law enforcement agency is included in a crime report, the Records & ID Unit shall delete the information prior to releasing the crime report to the public.
      3. If a request is received for an employee's home address and phone numbers, the requestor will be invited to leave a message which will be sent to the employee. If the requestor claims the matter is an emergency, assistance in contacting the employee may be provided. If the situation involves Office of the Sheriff business and immediate contact is
necessary, assistance will be provided. However, if the caller is recognized as any of the following, information may be released.

a. An Office of the Sheriff employee through their employee number.

b. A recognized employee of a law enforcement agency.

c. A recognized employee of the District Attorney's Office.

d. A known official with valid reason for wishing to contact the employee.
I. POLICY.

The Office of the Sheriff is committed to the protection of employee personnel files and their retention as provided by law. The Sheriff will maintain personnel files for all employees. The contents of these files are confidential and are accessible only as specified in this Policy.

II. DEFINITIONS.

PERSONNEL FILE. A personnel file is any file maintained under an employee's name by the employer that contains records relating to personal data, medical history, evaluations, promotions, discipline, complaints, internal investigations relating to the employee’s conduct, general employment information about assignments, transfers, or other personnel actions, and any other information the disclosure of which would constitute an unwarranted invasion of personal privacy, unless disclosure is specifically required by law in specified circumstances.

SUPERVISOR’S NOTES. Supervisor's notes, kept informally and not indexed or filed by employee name, do not constitute a personnel file. The purpose of such notes would be to assist the Supervisor in the performance evaluation process, or provide the Supervisor with personal recollection regarding a meeting or encounter.

III. GENERAL.

AUTHORIZED PERSONNEL FILE.

1. Employee personnel files are considered confidential, and the right to access is strictly limited to Supervisors and/or Managers who have a legitimate need to review the file. Pre-employment background files have even more severe restrictions, being accessible only by the Sheriff, Undersheriff, and immediate administrative staff.

2. The legal justification for protecting peace officer personnel files is contained in both the Penal Code and the Peace Officer Bill of Rights. Regardless of legal mandates, the Sheriff maintains that all personnel files shall be treated in a confidential manner and shall only be released at the direction of County Counsel or as required by law.
3. Office of the Sheriff Policy and Procedures Manual Appendix 8 contains a list of all authorized and recognized personnel files, as well as their location and the persons authorized to access the files.

EMPLOYEE NOTICE.

4. The goal of documenting job performance and behavior is to improve employee performance. Good management practice requires that the employee be made aware of any job related work discrepancies, as well as any documented reports of superior or positive performance.

5. No memoranda, reports or any written material which contain negative or derogatory information about an employee shall be placed in the employee's personnel file unless the employee has been provided with a copy of the material.

6. The employee shall have 30 days from the date of receipt of the negative written information to deliver a written response. The employee's written response will be attached to the material in the personnel file.

EMPLOYEE ACCESS TO PERSONNEL FILE.

7. An employee shall have the right to inspect and review his/her personnel file at reasonable intervals during the regular business hours of the County.

8. If a Deputy Sheriff believes that any items in his/her personnel file is mistakenly or unlawfully in the file, the Deputy may request in writing to their Division Commander that such items be corrected or deleted. The written request must describe the corrections or deletions requested and state the reason for the request. The written request will be retained in the personnel file for the same duration of time as the questioned items.

OUTSIDE ENTITIES' ACCESS TO PERSONNEL FILE.

9. When cities and other legal entities contract for police services with the Office of the Sheriff, a special relationship exists which allows for the review of certain limited items in the personnel files of officers assigned, or proposed to be assigned, to that entity. This limited access is based upon the city or entity having a responsibility and right to review the activities and work product of its contracted (and proposed) officers.

10. Agents of cities/entities which contract with the Office of the Sheriff may review the following information in the employee's personnel file:

   • Information regarding attendance, absences, sick leave usage records, and records of tardiness;

   • Information regarding regular quarterly/annual performance evaluations; and

   • Information regarding disciplinary actions or corrective counseling which is based on acts or omissions alleged to have occurred within the boundaries of the jurisdiction or while on duty within the jurisdiction.
11. Information related to the above items will be conveyed only by an authorized Office of the Sheriff representative and only to those persons who constitute the governing body of the contracting entity. For contract cities, this will include the City Manager. In “P” Districts, this will be limited to the Board of Directors. The information will be presented in a briefing format.

12. Written documentation will not be placed in any file maintained by the District or entity. Any information shared with the governing body will be held in strictest confidence.

PERSONNEL RECORD PURGING.

13. Records contained in personnel files of employees are subject to the following retention schedule and will be purged after the below listed term.

14. As items are purged, they will be forwarded to the employee from whose file the items have been purged.

### PURGE LIST

(Items marked as “Do Not Purge” shall be retained in the subject Personnel File in perpetuity.)

(*) Letters of Reprimand generated by an arbitrator for Rank & File DSA Members may be purged at the discretion of the Sheriff pursuant to DSA MOU (Rank & File) section 24-8.
RELEASE OF PERSONNEL INFORMATION FOR SAFETY PERSONNEL. Except as provided in “G” below, peace officer personnel files are confidential and information within shall only be released in accordance with the California Penal Code and the Peace Officers' Bill of Rights.

15. Outside agency request for personnel file review:
   a. Requires a signed waiver of authorization by the employee; and
   b. Specific documents must be addressed in the waiver.

G. PUBLIC RECORDS ACT REQUESTS. Personnel Files are generally exempt from release under the Public Records Act (Gov. Code § 6254(c)).

1. As stated in Appendix 8 “Personnel Files” at I.A., Internal Affairs files, generally records of internal and administrative investigations pertaining to the conduct of one or several employees, are a part of the subject employee’s Personnel File. These IA files are exempt from release under the Public Records Act (Gov. Code 6254(f)), except that,

   a. Records of officer-involved shootings;
   b. Records of officer uses-of-force that result in death or great bodily injury;
   c. Records of sustained incidents involving sexual assault against a member of the public;
   d. Records of sustained incidents of dishonesty;
   e. All video or audio recordings involving “critical incidents,” as defined that are contained within an employee’s personnel file (including his or her IA file) shall be released pursuant to a Public Records Act request in compliance with the provisions in Policy 1.06.77 “Release of Information (Public Records Act)” Procedure 10.
I. POLICY.
   A. Personal use of the Office of the Sheriff address and telephone decreases operational efficiency and adds unnecessary cost to the Office of the Sheriff. Therefore, guidelines are established to control such use.

II. GENERAL.
   A. OFFICE OF THE SHERIFF ADDRESS. Employees shall not use the Sheriff’s Office address for personal business.

   B. OFFICE OF THE SHERIFF TELEPHONES.
      1. Office of the Sheriff telephones are provided for Office of the Sheriff business. Employees shall follow these guidelines when using Sheriff’s Office telephones.
         a. Personal multi-message unit or long distance calls will not be made from Office of the Sheriff telephones unless the call is placed collect or billed to the caller's home telephone or personal credit card.
         b. Employees are to minimize the use of the telephones for personal business to reduce lost employee productivity time and unavailability of the telephone line while the call is being made.
      2. Employees should be aware that they are obligated to repay the County for charges incurred for personal telephone calls made on a Sheriff’s Office telephone. Additionally, employees are obligated to make up lost work time.
      3. Facsimile (FAX) machines will only be utilized for County business. Use for personal or union business is not permitted.
      4. Facsimile (FAX) machines may be used to receive documents from or transmit documents to the local union office when necessary, as long as it does not disrupt Office of the Sheriff operations.
Contra Costa County
Office of the Sheriff

General Policy and Procedure

ISSUE DATE: 2-1-2006
REVISION DATE: 
CLEARANCE: Office of the Sheriff

CHAPTER: Personnel Management and Employment Relations
SUBJECT: Posted Notices

I. POLICY.
   A. Employee organizations have access to bulletin boards to display employee representation information.

II. GENERAL.
   A. Employees shall not mark, alter, deface or remove posted notices of the Office of the Sheriff, nor shall they post notices or announcements on bulletin boards without permission of the Supervisor having control of the area where the bulletin board is located.
   B. Recognized employee organizations shall have access to:
      1. Designated portions of bulletin boards or display areas in public portions of County buildings; and
      2. Public portions of offices in which the employee organization has employees, provided the information posted is within the scope of representation and that the employee organization appropriately posts and removes the information.
   C. The Sheriff reserves the right to remove objectionable material. The employee organization which posted the material will be notified of any such removal.
I. POLICY.
   A. Official correspondence and/or communications by the Sheriff’s Office shall conform to established business protocol.

II. GENERAL.
   A. OFFICIAL LETTERS.
      1. Official letters shall be written on the standard Sheriff’s Office letterhead and all such letters, except those signed by the Sheriff personally, shall be signed as follows:

         Sincerely,

         (Two single spaces)

         David O. Livingston, Sheriff

         (Four single spaces for signature)

         First and Last Name, Rank
         Title (example; Assistant Sheriff, Division/Bureau)

      2. The use of official letterhead shall be restricted to official business and a copy of all official letters will be filed in the office of origin. All official letters shall be retained as required for business needs, or as required by law. However, all official letters will be kept at least one full year.

      3. All letterheads will include "David O. Livingston, Sheriff, Contra Costa County".

   B. OFFICIAL MEMOS.
      1. Official memos shall be written on the standard Sheriff’s Office memo template located on the Office of the Sheriff Intranet under the “Forms” tab.

      2. The memo shall be generally only in black type. Red may be used to designate changed or suggested language or for urgent emphasis. It will
contain margins no greater or less than 1” left / right, and .5” top / bottom. The approved memo font is Times Roman 12 point.

C. **TELETYPES.**

1. Telegrams, radiograms and teletypes shall be signed "David O. Livingston, Sheriff" - name, title and Division of origin.
I. POLICY.
   A. Fund-raising activities shall not interfere with Office of the Sheriff operations nor reflect negatively on the public image of the Sheriff or members of his Office. Soliciting or accepting gifts or donations may, in some cases, project an appearance of impropriety on the part of this Office or its employees. By conscientiously avoiding any impression of favoritism, this office will be avoiding any resentment that might result from law enforcement situations involving contributors. It is also the intent of this policy to caution employees of this Office against overburdening benevolent contributors with excessive requests for donations.

II. GENERAL.
   A. Any conduct that is undignified or may otherwise reflect negatively on the Office of the Sheriff or its employees shall not be authorized.
   B. Employees shall not use their official influence to solicit contributors, nor shall they imply in any way that a contribution may be rewarded, since expectations of favoritism may lead to resentment if a Deputy is required to arrest, cite, ticket or otherwise enforce the law in a situation involving a contributor.
   C. Employees shall not engage in political fund-raising in uniform or in any other way that clearly defines them as employees of the Office of the Sheriff as set forth in Office of the Sheriff policy section 1.05.55.
   D. Nothing in this policy is intended to prohibit any employee’s personal charitable donations or efforts where no Office of the Sheriff endorsement or involvement could reasonably be inferred.
   E. Office of the Sheriff employees shall exercise caution that magnanimous contributors are not excessively burdened with requests for contributions.

III. PROCEDURE.
   A. Any fund-raising activity by an employee of the Office of the Sheriff that may reasonably be thought by the public to be endorsed by this Office or any of its contract units, whether in uniform or otherwise, requires advance approval by the Sheriff or his designee.
B. Any gifts to the Office of the Sheriff of $10,000 or more in value must be approved by the County Board of Supervisors. Such gifts will not be approved if they are prejudicial, discriminatory, burdensome or illegal.

C. Any gifts to the Office of the Sheriff that are between $1000 to $10,000 in value may be accepted by the Sheriff or his designee upon notification to and review of the County Administrator.

D. Gifts of less than $1,000 may be accepted by the Sheriff or his designee without approval of the County Administrator.

E. Noteworthy gifts, regardless of value, shall be called to the attention of the County Administrator and of any consequential conditions or stipulations regarding the gift or donation. A donor may designate the purpose of the gift, but the purpose must relate to, and the gift must be used for, official County business, or a public purpose of the County. A donor may not designate an employee who may use the gift.

F. No gift or contribution shall be solicited or accepted from firms or individuals which are intended, or could be reasonably construed as tending to influence business or applications pending before the Board of Supervisors.

G. All gifts will be documented in a memorandum forwarded through the chain of command to the Personnel and Finance Division ("Fiscal").

1) Fiscal will prepare orders for the Board of Supervisors’ consideration and approval as required.

2) Fiscal will track all donations for notification and review by the County Administrator.
Contra Costa County

Office of the Sheriff

Policies and Procedures Manual

SECTION 3
Chapter Six:
Office of the Sheriff Operations
I. **POLICY.**
   A. To ensure unity of command, the Office of the Sheriff strives to maintain management oversight 24 hours a day. Watch Commanders respond to critical incidents, major crimes or other significant events and provide direction at the command level as needed. On those occasions when a Watch Commander is not on duty or on call, an appropriate Manager of the affected Division will be notified.

II. **DEFINITIONS.**
   A. **WATCH COMMANDER.** A safety employee at the rank of Lieutenant or higher. The Watch Commander is the in-field, law enforcement liaison to the County’s Emergency Operations Center (EOC).

III. **GENERAL.**
   A. For purposes of this Policy, the Watch Commander and the Facility or Station House Commanders have the same authority in the event of a call out. The Watch Commander will work a modified schedule so as to be available during off-business hours, weekends and holidays. In the absence of a Facility or Station House Commander or City Police Manager, the Watch Commander will respond to specified incidents and handle calls as required by policy. Depending on the incident, the Watch Commander may be relieved of responsibility once the Facility/Station House Commander arrives on the scene.

   B. **RESPONSIBILITIES OF THE WATCH COMMANDER.**
      1. The Watch Commander will ensure all Office of the Sheriff rules, regulations, policies and procedures are followed. The Watch Commander will authorize and direct investigations of all procedural violations on his/her watch, and make corrective or disciplinary recommendations when appropriate. All violations coming to the attention of the Watch Commander will be reported to the involved employee’s chain of command by the end of the watch. Violations of a serious or criminal nature will be immediately communicated to the appropriate command staff.
2. The Watch Commander will respond to any significant hazardous materials incident, disaster or other significant event within our jurisdiction, which may require the activation of the Emergency Operations Center or notification of the Office of Emergency Services Alert Duty Officer. The Watch Commander will act as the on-scene Incident Commander, coordinating efforts and resources through the Office of the Sheriff Command Post and the Office of the Sheriff Operations Center, until relieved by the appropriate Facility/Station Commander.

3. The Watch Commander is responsible for ensuring that all requests for information from the public and news media are handled in a timely and appropriate manner. See “Procedure 2.” News Media Liaison.

4. The Watch Commander will visit all 24-hour facility work sites as the schedule allows.

5. The Watch Commander has the discretion and authorization to invoke the Officer-Involved Protocol as necessary.

6. A Watch Commander schedule will be maintained. The schedule will be distributed to the Communications Unit, Patrol Division Administration, Emergency Services Division, Station Houses, Investigation Division, Contract Cities and Detention Facilities.

C. NOTIFICATIONS.

1. When notified of a major crime or critical incident, the Watch Commander will ensure that call-out procedures are initiated in accordance with existing notification policies. The Watch Commander will also ensure that proper notification is made up the chain of command as necessary. Office of the Sheriff Policy Sections 1.06.21, Unusual Incident Notification Procedure and 1.06.62, Police-Involved Fatal or Serious Injury Incidents Policy specifies notification procedures.

2. Notification to the on-duty Watch Commander, Facility/Station House Commanders or appropriate Manager will normally be made by the on-duty Sergeant or the Communications Center.

3. In the event of specified incidents or major crimes and citizens complaints where a Manager has been requested, first notification during normal business hours will be made to the affected Facility/Station House Commander. During the Facility/Station House Commander’s off hours, first notification will be made to the Watch Commander. If, during these hours, the on-duty or on-call Watch Commander is not available, then the appropriate Facility/Station Commander or an appropriate Manager in the affected Division will be notified.

4. In addition to the procedures outlined in Section A, the Watch Commander must notify the Office of Emergency Services Alert Duty Officer of high-profile events that meet the below listed criteria. This provides an emergency method of informing the relevant persons of serious incidents which should be brought to the attention of the County Administrator or designee:
a. Threats to citizens’ health or safety such as refinery or other industrial explosions, fire or chemical release.

b. Community disasters such as an airplane crash, bus or train wreck in which lives are threatened or lost, or earthquake or other natural disasters resulting in emergency response and evacuations.

IV. PROCEDURE 1.

A. RESPONDING TO CALLS.

1. The Watch Commander shall respond to the following incidents:
   a. Officer-involved fatal incidents, including off-duty fatal incidents;
   b. Officer-involved shooting, other than accidental discharge with no injury, or the shooting of an animal;
   c. Any riot or major disturbance in a Office of the Sheriff Detention Facility;
   d. Deaths of persons while in police custody or under police control, excluding deaths which occur while an inmate is under a doctor's care for a disease, or other natural condition which is the cause of death;
   e. Child abduction by stranger;
   f. Incidents involving a hostage situation;
   g. Significant hazardous material releases or spills within the County; and
   h. Any incident as directed by higher authority.

2. The Watch Commander shall be notified and, at their discretion, respond to the following incidents:
   a. Escapes from the MDF or the WCDF where security has been breached;
   b. Mutual aid requests through the Sheriff’s Office Mutual Aid Coordinator;
   c. Non-fatal injury to a Deputy;
   d. Multi-agency request for assistance made by the Office of the Sheriff;
   e. High-profile incidents of a serious nature;
   f. Incidents that may involve activation of the County Emergency Operations Center;
   g. Child stealing cases; and
   h. All cases where a command level officer’s presence is appropriate.
3. In addition to the above incidents, the Watch Commander will be available for telephone consultations with Facility Station House Sergeants.

V. PROCEDURE 2.
A. NEWS MEDIA LIAISON.
   1. The Watch Commander shall act directly as a news liaison, when possible. If circumstances prevent this, the Watch Commander will assign an appropriate designee to this task.
   2. The Watch Commander shall be responsible for assuring that all press and public information is obtained at the scene. If there is a media liaison officer going off duty, the Watch Commander will ensure continuity as to what has been, can be and will be released.
   3. The initial release shall be designated “First Release”. The information for this release shall be accumulated and disseminated in a timely manner, in keeping with existing News Media Relations Policy.
      a. All subsequent releases will be handled by the affected Division or the Division responsible for the ongoing investigation.
   4. First Releases and Unusual Incident Reports are not identical. Unusual Incident Reports are for internal use and may contain some sensitive information and are not to be released to the press or public.
   5. The Watch Commander or designee will ensure that the First Release is sent to the Sheriff, Undersheriff, appropriate Bureau Assistant Sheriff and Division Commander, Technical Services Division, and the Office of the Sheriff Public Information Officer.
   6. Information authorized for release is delineated in Sheriff’s Office Policy Sections 1.06.39, Dissemination of Law Enforcement Information and 1.06.36, Police Involved Fatal or Serious Injury Incidents Policy.
      a. The Watch Commander, when possible, will personally handle all media inquiries while on scene.
      b. The Watch Commander will consult with the on-scene investigator to determine the appropriateness of information released.
      c. Release of information regarding internal investigations of alleged misconduct by members of the Office of the Sheriff or disciplinary action taken as a result of any such investigation shall be made only by the Sheriff, Undersheriff or their designee.
      d. First Release information will be general in nature to avoid compromising the investigation. Any updates to the First Release, during the tour of duty, will be approved by the Watch Commander.
      e. When it is determined that an incident and its results were caused by actions of another agency, the media will be referred to the appropriate agency.
I. POLICY.

A. The Office of the Sheriff is augmented by a Sheriff's Reserve Unit in addition to a variety of specialized volunteer units.

B. Members of these units donate their time to aid and assist the Office of the Sheriff in achieving and accomplishing its mission. In order to utilize these resources, the following guidelines and procedures have been established.

II. POLICY

RESERVE LEVELS AND AUTHORITY.

1. Reserve Deputy Sheriffs: Reserve Deputy Sheriffs shall have the powers of a peace officer, as provided below, when on duty:

   a. Level I Reserve Officers are defined in Penal Code Section 832.6(a)(1) which states in part that a Level I Reserve Officer may be "assigned to the prevention and detection of crime and the general enforcement of the laws of this state whether or not working alone."

      - Level I Reserves are not authorized to have citizen ride-a-longs.

   b. Level II Reserve Officers are defined in Penal Code Section 832.6(a)(2) which states in part that a Level II Reserve Officer "may be assigned to the prevention and detection of crime and the general enforcement of the laws of this state while under the immediate supervision of a peace officer who has completed the basic training course for deputy sheriff's and police officers prescribed by the Commission on Peace Officer Standards and Training."

      - The Basic Training Bureau of POST further defines the Reserve Level II position as a "second officer/deputy in a patrol car/vessel" with an officer/deputy who has attended a basic academy. POST states a Level II Reserve was not meant to be deployed alone in a car to act as a cover officer in a patrol environment.
A Reserve may be deployed alone as long as he or she is assigned duties within his or her Reserve Level.

Level II Reserves may be assigned without immediate supervision if they are working those limited duties that are authorized for Level III Reserves (listed in c. below).

Level II Reserves can not have ride-a-longs.

**c.** Level III Reserve Officers are defined in Penal Code Section 832.6(a)(3) which states in part that a Level III Reserve Officer "may be deployed and are only authorized to carry out limited support duties not requiring general law enforcement powers in their routine performance. Those limited duties shall include traffic control, security at parades and sporting events, report taking, evidence transportation, parking enforcement, and other duties that are not likely to result in physical arrests. Level III Reserve Officers, while assigned those limited duties, shall be supervised in the accessible vicinity by a Level I Reserve Officer or a full-time officer.

- Level III Reserves are not authorized to have citizen ride-a-longs, but they may be paired with other Level III Reserves working Level III assignments.
- Level III Reserves are not authorized to ride along in a patrol environment (including Marine Patrol) based on the fact that Level III Reserves are not to be assigned duties likely to result in physical arrests.

2. **Reserve Rank: The Reserve Unit uses the Office of the Sheriff ranking model to organize and identify roles/positions. Reserve Deputies shall not wear or display insignia designating such appointed rank.**

**B. VOLUNTEER UNITS.**

1. Volunteers are assigned to the following areas based on their interest and specialized skills:

   **a. Search and Rescue**

   - Members are dedicated volunteers who can be summoned to assist the Sheriff's Office during the following events:
     - Missing persons
     - Despondent subjects (case by case basis with approval from Volunteer Services Manager, Watch Commander, or Division Captain).
     - Area searches for evidence
     - Public relations events
     - Disaster response
b. Air Squadron

- Pilots and observers provide air operations support to the Office of the Sheriff. The unit participates in the following events:
  - Personnel transportation
  - Aerial surveillance/cataloging of critical infrastructure
  - Logistical support
  - Public relations events
  - Disaster response

c. Dive Team

- Members are accomplished and certified divers available to assist the Office of the Sheriff with events that necessitate the need to dive into bodies of water. The following are examples of typical events that divers are called to:
  - Drowning victim recoveries
  - Evidence collection/property recovery
  - Location/removal of hazardous objects (hindering boat traffic)
  - Inspection of equipment/structures (county waterway infrastructure)
  - Public relations events
  - Disaster response

d. Communications Unit

- Licensed Ham Radio operators provide alternate communications to the operational area in the event of an emergency or major disaster.

- The Communications Unit regularly trains by handling communications during volunteer events such as:
  - ESSU missions/training
  - Communications support
  - Public relations events
  - Operational Area communication exercises
  - Disaster response

e. Chaplains

- The Chaplaincy program provides support and comfort to the Law Enforcement community and the public. Chaplains are available to provide guidance and
counseling in times of crisis. The Chaplains assist the Office of the Sheriff in events such as:

- Death notifications
- Line-of-Duty Deaths
- Public relations events
- Educational programs
- Disaster response

f. Cadets

- The program offers our youth and young adults experience and training regarding law enforcement. Some common events our Cadets participate in:
  - Parades and Fairs
  - Search and Rescue missions/training
  - Tactical Competitions
  - Traffic enforcement
  - Public relations events

g. Food Service Unit

- The unit provides food service to support field operations to the Office of the Sheriff during training or emergency events. Some examples of deployment are:
  - EOC activations
  - Search and Rescue missions/training
  - MAMFF missions/trainings
  - SWAT missions/trainings
  - Volunteer recognition events
  - Public relations events
  - Disaster response

h. Sheriff's All Volunteer Extended Services (SAVES)

- This is a very diverse unit comprised of community members with different skill sets who assist our Office with delivery of logistical and clerical support. These members are assigned to nearly every area of the Office of the Sheriff.

i. Mutual Aid Mobile Support Team (MAMST)

- This unit provides support in the form of deployment and equipment supply and maintenance for the Mobile Field Force, Search and Rescue, and the Special Weapons and Tactics Team. The unit also provides medical support in high-risk cases where it would be
beneficial to have immediate medical care with the
deployment team.

III. PROCEDURE.

A. ASSIGNMENT OF RESERVES/VOLUNTEERS.

1. Reserves/Volunteers will be assigned by the Volunteer Services
   Coordinator and report directly to a station house commander, facility
   commander, contract city chief, or other authority/assignment.
   a. The Station Commander or Patrol Sergeant may assign Reserves
      or Volunteers as needed within the parameters of this policy.
      Final approval rests with the Emergency Services Division
      Commander.

2. Reserves shall be assigned to duties consistent with their Reserve Level
dictated by the Penal Code, but may augment Patrol as needed.
   a. Level III Reserves may not be the second deputy or conduct
      uniformed ride-a-longs in Patrol as that duty is likely to result in
      physical arrest. Level III Reserves may be paired up during a
      Level III detail/assignment.

B. PATROL DEPUTY RESPONSIBILITIES TO THE RESERVE PROGRAM.

1. The following guidelines are to be adhered to by Patrol members who
   may have Reserve personnel assigned to them:
   a. Training the Reserve in Patrol functions and duties.
   b. Evaluation of a Reserve's performance, in writing using the
      Reserve evaluation form provided by Volunteer Services.
   c. Reporting incidents of misconduct of Reserve personnel, via
      memorandum, to the Volunteer Services Sergeant and the shift
      supervisor.
   d. When working as a second deputy in a patrol environment, Level
      II Reserves may only operate the Patrol Vehicle if they have
      completed the 24-hour Emergency Vehicle Operations Learning
      Domain consistent with PC 13519.8 (High-speed vehicle pursuit
      training guidelines) and CVC 17004.7 (immunity qualifications).
   e. Reserves may be assigned details that generally require no
      follow-up investigation and there is no suspect information such
      as parking citations, alarms, petty thefts, found property reports,
      etc.
   f. The Patrol Area Supervisor shall make every attempt to
      minimize inconvenience to the volunteer's schedule prior to
      considering any extended tour of duty.

C. PATROL DEPUTY RESPONSIBILITIES TO THE CADET PROGRAM

1. Patrol members who may have Cadets assigned to them shall train them
   in non-dangerous Patrol functions and duties. Cadets may be assigned to
   assist in details such as the County Fair, parades, or other community
   events. Cadets may not assist in arrests or other dangerous incidents.
e. Reserves may be assigned details that generally require no follow-up investigation and there is no suspect information such as parking citations, alarms, petty thefts, found property reports, etc.

f. The Patrol Area Supervisor shall make every attempt to minimize inconvenience to the volunteer's schedule prior to considering any extended tour of duty.

C. PATROL DEPUTY RESPONSIBILITIES TO THE EXPLORER PROGRAM

1. Patrol members who may have Explorers assigned to them shall train the Explorer in non-dangerous Patrol functions and duties. Explorers may be assigned to assist in details such as the County Fair, parades, or other community events. Explorers may not assist in arrests or other dangerous incidents.

### I. POLICY.

A. This policy describes proper evidence collection, packaging, and submission information, as well as providing guidelines for a major incident scene pending the arrival of Forensic Services Division staff. The appropriate handling of evidence to ensure its preservation and control is a critical law enforcement function.

B. This policy contains Addendum A - Guidance Document for Evidence Packaging. The goal of this guidance document is to provide awareness of the standard packaging options that are available for use, along with their purpose, to ensure the best decision is made for the collection, documentation and preservation of evidence and items for safekeeping.

C. Due to the potential for serious injury or death, safety must be of paramount concern for all personnel handling and packaging firearms. Safeguards including use of green “UNLOADED” labels, standardized documentation, and packaging must be followed. Compliance will ensure the safety of all personnel handling and transporting firearms.

### II. DEFINITIONS.

A. ASPERGILLUS. A mold that grows on marijuana plants.

B. BLOOD WITHDRAWAL. Medically approved method utilizing trained medical staff for the drawing of a blood sample.

C. CONTROLLED SUBSTANCE. Drugs and certain other chemicals that come under the jurisdiction of federal and state laws regulating their manufacture, sale, distribution, use and disposal.

D. CONTROLLED SUBSTANCES ENVELOPE (CSE). Evidence envelope for drugs and narcotics evidence.

E. CRIME SCENE. Location where criminal activity has occurred or where evidence related to criminal activity may be present.

F. FCN NUMBER. DOJ File Control Number.
G. GSR. Gunshot Residue consists of both burnt and unburnt primer and powder components, as well as components from the bullet, cartridge case and lubricants used on the firearm.

H. IBIS/NIBIN. Integrated Ballistics Identification System/National Intergrated Ballistic Information Network. A system that digitizes the unique marks firearms leave on cartridge cases and bullets and searches a database to connect firearms-related crimes.

I. IMPLIED CONSENT FORM DS 360. DMV Administrative Per Se Order of Suspension/Revocation Temporary License Endorsement.

J. IMPLIED CONSENT FORM DS 367. DMV Officer’s Statement Form.

K. ITEM. An object that has been assigned a unique item number. Several objects that have been collected from the same location, grouped together, and assigned a unique item number.

L. LEVEL A PPE. The highest level of personal protective equipment that includes the use of a SCBA and a fully enclosed chemical-protective suit.

M. LEVEL B PPE. The second highest level of personal protective equipment requiring the use of a SCBA and chemical-resistant clothing.

N. LEVEL C PPE. The third highest level of personal protective equipment requiring the use of an air-purifying respirator and chemical resistant clothing.

O. MDF. Martinez Detention Facility.

P. MGO. Marijuana Grow Operations.

Q. N95 Mask. High efficiency particulate mask that filters out at least 95% of 0.3 micron particles.

R. NIBIN ENVELOPE. Dedicated evidence envelope for fired cartridge cases.

S. OZONE. A colorless gas that is a form of oxygen.

T. SEXUAL ASSAULT EVIDENCE KIT (SAEK). A kit containing specialized components for the collection of sexual assault evidence.

U. SCBA. Self Contained Breathing Apparatus.

V. SIU. Special Investigations Unit.

W. TRACE EVIDENCE. Minute quantities of material, such as hair, fiber, glass or soil that may be transferred between people, objects, or the environment during a crime.

X. UNLOADED FIREARM LABEL. Refers to a green adhesive label placed on a gun box with initials and date of the individual verifying the firearm therein is unloaded.

Y. VOID SAMPLE. Urine specimen collected when the subject first voids bladder.

Z. VOLATILE SUBSTANCE. A liquid or substance that quickly changes into a gas.
III. COLLECTION-GENERAL

A. The employee collecting evidence should keep in mind that the court will require the identification of each piece of evidence. The identification of evidence includes the case number, date collected, description of evidence, where found, from whom, time collected, and an accurate chain of custody.

B. Officers receiving or seizing any property that contains a serial number shall complete a CLETS query on those items.
   1. The crime report in which the property was seized shall indicate if the property was clear or stolen.
      a. If the property is stolen, a crime report shall be written and the agency of jurisdiction, per CLETS, shall be notified.
   2. The model/serial number and description along with the FCN number shall be recorded in the crime report. The FCN printout shall be attached, if available.
   3. All firearms with obliterated serial numbers shall be submitted to the Crime Lab for Serial Number Restoration.

IV. MAJOR SCENE GUIDELINES

A. Patrol deputies must take the following steps to secure the integrity and evidence at major crime scenes:
   1. Secure the scene
      a. Once the scene is rendered safe, it shall be immediately secured. Access should be limited to only those officials who must enter.
      b. Entry by fire, ambulance, or any other personnel should also be limited to those who are needed inside the scene.
   2. Set a perimeter
      a. A perimeter using crime scene tape shall be established for each scene.
      b. The perimeter must be large enough to safeguard any evidence.
   3. Begin a log
      a. A log should be started as soon as possible and record all persons entering the scene, the time of entry and exit, and the reason for their entry.
      b. Removal of any item from a scene must be witnessed and logged, unless it was collected by the assigned Deputy or Forensic Services Division personnel.
      c. The log shall state the person removing the object, the witness, time of removal, and the reason for removal.
   4. Secure/collection any weapons
      a. The Deputy in charge at the scene will promptly see to the security and collection of any weapons.
b. If the area is secure, loose weapons or instruments should be left in place and undisturbed. If the area is not secure, the Deputy in charge at the scene shall promptly collect and safeguard such items.

c. Any Deputy collecting a firearm shall note its serial number (if any) and maintain the chain of custody.

d. Loose weapons or instruments should be photographed in place prior to collection, unless security considerations prevent this.

5. **Collect physical evidence in danger of being contaminated**

   a. Physical evidence at the scene which is in danger of being contaminated, destroyed, or removed must be promptly and effectively observed, recorded, and collected.

   b. Examples: evidence adhering to live participants (such as blood stains), footprints and fingerprints in adverse weather, volatile substances, various types of trace evidence, and gunshot residue (GSR) evidence.

B. **Forensic Services Division (FSD)** personnel will assume responsibility for evidence work upon their arrival.

   1. The responsible Division will be requested to provide support for FSD by furnishing Deputies for scene security, crowd control, traffic direction, etc.

   2. Assistance with evidence collection and preservation may be requested. Deputies involved with evidence collection and preservation shall work under the Laboratory's direction.

C. In shooting cases involving Sheriff's Office employees, the Deputy in charge will check the firearms of all employees who were present at the time of the incident to ensure all discharged firearms are identified and collected.

   1. In most cases, the firearm should be left in its original condition and given to FSD personnel as is upon their arrival.

   2. The Deputy must minimize any manipulation of the firearm that could cause a change to its original condition otherwise loss of evidence or inadvertent changes could occur. Document the following conditions with photographs and notes:

      a. Appearance and location of any adhering trace evidence.

      b. If the firearm is cocked. The safety may be put on by the receiving Deputy, who must make note of that fact.

      c. Safety on or off.

      d. Hammer back. The hammer may be lowered, but a note must be made of that fact.

      e. Any apparent jamming of either fired or unfired ammunition. No attempt shall be made to unload the weapon or clear the jam.
f. Location and position of the weapon's magazine (e.g., fully or partially inserted, completely separate from the firearm, missing, etc.)

3. Collected firearms shall be given to FSD staff upon their arrival.

4. If the Deputy in charge at the scene was involved in the incident, the responsibility for security and collection of weapons and instruments shall rest with a non-involved Supervisor or the next-in-line non-involved Deputy at the scene.

5. If a handgun is collected from an on-duty Deputy, reasonable attempts will be made to immediately provide that Deputy with a substitute weapon, unless circumstances dictate otherwise.

6. All rounds of the same type of ammunition fired will be collected from each shooting Deputy.

7. Firearms that are not retained in evidence, as determined by the incident investigators, will be returned promptly by FSD staff after being inspected and tested.

V. EVIDENCE COLLECTION GUIDELINES

A. Deputies may be responsible for evidence collection and documentation at crime scenes.

B. The evidence and property collected by Deputies will be submitted to the Forensic Services Division.

C. Always wear Personal Protective Equipment (PPE) when collecting evidence.

D. Evidence must be properly documented, collected, packaged, stored and transferred. Packages containing evidence must be appropriately labeled and contain a chain of custody. See Addendum A - Guidance Document for Evidence Packaging.

1. Take photographs prior to moving the evidence. Take as many photographs as needed to accurately portray the location of the item for court. Evidence photographs generally described below:

   a. Overall – photographs that show a large area of the scene and area where the evidence is located. Examples: Intersections, street signs, a street with houses, the entire living room in a house. Small evidence and cones may not be visible.

   b. Medium – photographs that show where evidence is located relative to other objects in the scene. Examples: evidence cones next to a car, the area in front of a bedroom door, the back seat of a car. Medium photographs may not show evidence in detail, or the location of the photograph in relation to the entire crime scene.

   c. Close-up – photographs that show detail of an item. Examples: close-up of a firearm showing a cocked hammer, fired cartridge cases next to an evidence cone, pry marks on a window. Close-up photos may not show the location of an item in a crime scene.
2. Identify the items through sketching and taking notes regarding their appearance and location.

3. Your report must accurately describe the evidence and evidence collection procedures. This includes a description, the location it was found or collected from, the date collected, packaging used, and where the evidence was dropped off.

VI. COLLECTION OF BLOOD AND URINE SAMPLES FOR ALCOHOL AND/OR DRUG ANALYSIS

A. Kits for the collection of blood and urine samples for alcohol and drug analysis are provided by the Forensic Services Division and must be used to ensure proper preservation of the samples. Two types of kits are provided by the Forensic Services Division for the submission of blood and urine samples for alcohol and/or drug testing:

2. Urine Sample for Alcohol/Drug Analysis.

B. Delaying the sample collection may result in a negative chemical test due to the drug getting metabolized in the body, especially drugs like Cocaine and THC. When a specific substance is suspected, the appropriate specimen will be obtained as close as possible to the time of incident.

1. Driving Under the Influence of Alcohol ONLY: Blood or Breath
   a. Urine should be collected only if the individual has a medical condition that prevents blood sample collection.

2. Driving Under the Influence of Alcohol and/or Drugs: Blood
   a. Urine should be collected only if the individual has a medical condition that prevents blood sample collection.

3. Drug Facilitated Sexual Assault: BOTH Blood and Urine
4. Under the Influence of Drugs (i.e. 11550): Blood or Urine

C. Urine kits are available and the blood kits are carried by the Blood Withdrawal Technicians.

D. All kits are sealed when distributed to ensure that the contents are intact. Any kit not sealed should be returned to the Forensic Services Division.

E. Instructions for the use of the kits can be found on the back of each envelope. The instructions are self-explanatory and should be carefully followed to ensure proper collection of the sample and proper handling of the paperwork.

F. Blood and Urine Kits will be placed in the refrigerator marked blood and urine for alcohol and toxicology testing. Do not place the evidence for the lab in the refrigerator marked for bloodborne pathogens.

G. Additional information on packaging and delivery of blood and urine kits can be found in Addendum A - Guidance Document for Evidence Packaging.
VII. BLOOD WITHDRAWAL

A. An on-call Blood Withdrawal Technician (phlebotomist) will be used to draw blood in all cases.
   1. Contracted blood withdrawal services are requested via Dispatch.
   2. For cases involving possible communicable disease exposure, refer to Office of the Sheriff Policy Section 1.06.19, Communicable Disease - Prevention and Control.

B. Prior to subjecting a suspect or arrestee to a blood withdrawal, Deputies will:
   1. Make a reasonable effort to determine if the suspect is a hemophiliac or using anticoagulants under the direction of a physician.
      a. If it is determined that a suspect is a hemophiliac or using anticoagulants, Deputies shall not conduct a blood draw per CVC 23157.
      b. A statement by the arrestee that he/she is subject to one of these medical conditions is sufficient for the Deputy to assume that the subject qualifies for the exemption.
      c. It is recommended that the Deputy make this determination early in the investigative procedure (i.e., preliminary questions).

C. When a blood draw can not be conducted, Deputies should document in their report the reason along with the name of the suspect's physician and the date of his or her last visit to the physician, as stated by the suspect.
   1. In cases involving drunk drivers or boat operators who are exempt from a blood draw, the suspect must complete either the breath or urine test.
   2. Get approval from the Deputy’s supervisor prior to calling for the Blood Withdrawal Technician.
   3. Witness the blood withdrawal.
      a. The Deputy must watch the withdrawal process carefully to be able to testify in court regarding the procedures used.
      b. The Blood Withdrawal Technician may refuse to perform the withdrawal if it is not witnessed by the Deputy.

D. A blood draw may be administered when the person is unconscious if a court order is obtained.

E. The Blood Withdrawal Technician will:
   1. Complete the information required on the labels for the vials. The Blood Withdrawal Technician attaches the labels to the vial and gives the vials to the Deputy.
   2. Complete the declaration. The Blood Withdrawal Technician retains his/her copy of the Declaration and gives the other copies to the requesting Deputy

F. The Deputy must:
1. Complete the information on the front of the kit envelope completely and legibly.

2. Place the seals over the tops of the vials and initial the vial labels.

3. Place the tape seal over the entire length of the envelope flap and initial.

VIII. NON-CONSENSUAL BLOOD WITHDRAWAL - MISDEMEANOR CASES

A. Blood samples shall not be forcibly taken from an uncooperative suspect, unless a court order is obtained or the suspect was arrested/detained for CVC 23152 or H&N 655 (Boating Under the Influence).

B. Non-consensual testing of a person arrested or detained for CVC 23152 or H&N 655 is allowed only with the supervisor's permission and within the following guidelines for Deputies:

1. Any suspect arrested/detained for CVC 23152 or H&N 655, including juveniles, shall be given the opportunity to provide a chemical test of his/her choice as directed by law.

2. A non-consensual blood draw will be obtained if the Deputy has sufficient probable cause to believe the subject was driving a vehicle or operating a boat under the influence and can articulate those circumstances in the police report.

3. The detained person refuses to cooperate during field observations/field sobriety tests or refuses to provide a chemical test at the testing site.

C. Before administering a non-consensual draw, the Deputy will try to obtain consent for the blood sample before implementing this policy. The Deputy will advise the suspect of the following:

1. A blood sample shall be taken without consent and over his/her objection.

2. A non-consensual blood draw is a refusal and all applicable administrative sanctions will be taken against his/her driving privilege by DMV.

3. The refusal admonition shall be read verbatim from the backside of DMV form 367 (Officer Statement).

4. The suspect's answers will be recorded on the DMV 367 form and in the body of the report.

D. Supervisory approval shall be obtained.

E. The blood draw shall be performed at a contract city police station or Sheriff’s substation. It shall not be done at MDF or Juvenile Hall.

F. Should a non-consensual blood draw be necessary from a hospitalized suspect, concurrence shall be obtained from the medical staff to allow the procedure.

G. The Blood Withdrawal Technicians shall be notified at the time of their callout that the blood draw is non-consensual.

H. The Blood Withdrawal Technicians will complete the withdrawal of the sample.
I. The amount of force used, if any, to overcome resistance shall be limited to that force which is necessary to collect the blood sample. Care should be taken to guard against injuries to the suspect or the Deputies involved.

J. Office of the Sheriff policy prohibits the following in order to obtain a blood sample:
   1. Excessive bending, twisting and hyper-extension of arms
   2. Use of any weapon
   3. Striking blows
   4. Neck restraint, i.e. carotid

K. The non-consensual removal of the blood sample will be documented in the arrest report. Documentation should include:
   1. The amount and type of resistance, if any.
   2. The method used to secure the suspect.
   3. The names of the persons who witnessed the blood draw.
   4. The location of the blood draw.
   5. Any other pertinent information.

L. The Implied Consent forms (DS 360 and DS 367) shall be completed. A non-consensual blood draw is a refusal and all license suspension procedures will apply.

M. The Non-Consensual Chemical Testing Checklist will be initialed, signed and dated. The checklist will be included in the arrest report.

N. The withdrawal of the sample shall be videotaped whenever possible. The tape will be placed into evidence.

O. Supervisor Responsibilities:
   1. The supervisor shall respond to the test location and monitor the blood draw.
   2. The supervisor shall ensure that the following conditions have been met:
      a. The driver has been lawfully arrested/detained for CVC 23152 or H&N 655.
      b. The Deputy has read verbatim the formal admonishment from the DS 367 form and the driver has refused all available tests.
      c. The detained/arrested person has been advised that a refusal to voluntarily submit to or complete a test of his/her choice will result in the administering of a non-consensual blood draw and that all provisions of CVC 13353 will be invoked.
      d. That the suspect refuses to provide a chemical test.
      e. The suspect is not a hemophiliac, does not have a heart condition and is not using prescribed anticoagulants.
      f. The medical technician consents to participate in a non-consensual draw.
g. Sufficient assistance is available to safely obtain a blood sample.

h. The NON-CONSENSUAL CHEMICAL TESTING CHECKLIST has been initialed, signed and dated by the arresting Deputy. The supervisor will also sign the checklist.

i. The supervisor will monitor the blood draw and continually assess if the danger of injury to the suspect outweighs the need to collect the blood sample.

IX. URINE COLLECTION

A. The Deputy will take the following actions when collecting a urine sample:
   1. Use an alcohol/drug urine testing kit.
   2. Ensure a Deputy of the same sex as the suspect witnesses the giving of a urine sample. The collection should be witnessed to ensure that tap or toilet water is not substituted for the sample.
   3. Provide reasonable privacy to respect the dignity of the suspect without jeopardizing officer safety or test accuracy.
   4. Follow the procedures on the kits and will properly document the chain of custody.

B. For alcohol analysis, the subject must empty (void) his/her bladder prior to taking a urine sample.
   1. The sample shall be taken twenty (20) to thirty (30) minutes later, or as soon thereafter as a sample may be obtained.
   2. The Deputy will note the time of voiding and the time the sample was taken in his/her report and on the specimen container.

C. For drug analysis, preliminary voiding is not necessary.

D. If it is necessary to obtain a urine sample at a location that does not have urine kits, the kits can be obtained at MDF or at police departments.

E. The Urine Kit should be tape sealed and the officer sealing the kit should place his or her initials on the seal.

F. Additional information on packaging and delivery of urine kits can be found in Addendum A - Guidance Document for Evidence Packaging.

X. BREATH SAMPLE COLLECTION

A. Only Deputies that have been certified as Operators by the Contra Costa County Crime Lab should use the breath instrument to conduct breath tests. Certification can be achieved by taking the Operator Course offered by FSD.

B. When instrument malfunctions occur, the instrument will be taken out of service. The Operator experiencing the problem should contact the FSD, Drug, Alcohol and Toxicology Section by calling [redacted] between 8:00 am and 5:00 pm. After hours support for instrument malfunctions is not available. A message needs to be left on the voice mail at the phone number above. FSD staff will respond on the next working day.
XI. DRUG EVIDENCE COLLECTION

A. The Drug, Alcohol, and Toxicology Section provides Controlled Substances Envelopes (CSE) for the submission of drug evidence for examination.

B. Deputies will adhere to the following guidelines related to the packaging of drug evidence in the CSE:
   1. Dissimilar items or items from different sources must be given unique item numbers.
   2. Numerous similar units (e.g., multiple bindles, tablets or balloons) from a single source should be packaged together and submitted as a single item.
   3. The assigned item numbers must be the same on the evidence, in the police report, and on the CSE.
   4. The source or location of each item must be included on the CSE.
   5. Do not place items such as rocks, powder, or plant material loose inside the CSE. Each item should be placed inside a container, such as a plastic bag, and marked with the item number then placed inside the CSE.
   6. Items such as money, roach clips, coin purses, coke spoons, cigarette packages, empty packaging materials, etc., must be packaged separately from the drug items to be analyzed and sent to Property Services.
   7. The laboratory will not accept syringes with needles. For drug analysis, the contents of syringes must be transferred to glass vials prior to submission. For latent print or DNA analysis, the syringe needle must be removed prior to submitting the tube.
   8. Items too large for the CSE should be placed in larger containers, such as a paper bag. Attach the CSE to the outer container.
   9. Package any evidence for fingerprint analysis appropriately (any excessive rubbing can negatively affect the recovery of prints).
      a. Do not write on the evidence packaging where latent print processing is needed – the writing will obliterate any latent prints present.
   10. All the information on the CSE envelope should be filled out completely.
   11. The chain of custody on the front of the CSE must be completed starting with the individual who placed the items into the envelope.
   12. The CSE must be tape sealed and initialed with the tape running across the length of the opening.
   13. All drug evidence must be taken to Property Intake.
   14. Additional information on packaging and delivery of a CSE can be found in Addendum A - Guidance Document for Evidence Packaging.

C. Requests for drug analysis on drug-related offenses will come from the Investigation Division.
   1. For drug evidence requiring analysis, as determined by the SIU Supervisor, the Investigation Division will send a list of the cases and
corresponding items needed for lab analysis to Property Services for retrieval and transport to the Alcohol, Drug, and Toxicology Section by FSD staff

D. Drug evidence from other felony cases such as robberies, assaults and homicides, can be analyzed when requested by the Detective handling the case.

E. Drug evidence not analyzed will be stored at Property Services for three years before destruction.

1. The SIU Supervisor can make a request for analysis at any point prior to destruction.

XII. ILLICIT MARIJUANA GROW OPERATIONS

A. Processing Plants and Equipment

1. Medical Marijuana Grow Operations are covered under CCCSO Policy 1.06.50.
2. Once secure, photographs must be taken to document the illicit grow operation as found.
3. The number of plants (mature and immature) should be determined.
4. If an indoor operation, the number of plants found in each room should be determined.

5. [Redacted]

6. Photographs documenting the locations of those plants chosen to account for the ten-pound sample should be taken.

7. [Redacted]

8. [Redacted]

   a. A small cutting of several leaves and/or bud material is sufficient as a sample.

9. Each sample is to be packaged in a paper envelope or small paper bag and labeled (i.e. “Sample of plant A from suspect’s bedroom.”).

10. Photographs documenting each sampled plant (in its original location) with the labeled sample should be taken.

11. Technique:

   a. Randomly place plants throughout the operation.

   b. Take the cutting, package it, and label it as “Sample from Plant A at Number Stand A.”

   c. Place the sample next to the plant.
d. Take an overall photograph of Plant A indicating its location in the operation, then do a medium range photograph showing the plant, the sample, and the labeled stand as one image.

e. Repeat

f. The five individually packaged and labeled random plant samples are placed into a Controlled Substance Envelope for submission to the Drug, Alcohol, and Toxicology Section for examination.

12. The gross weight of the plant material must be determined. The gross weight can be determined several ways:

a. Weighing the plant material present.

b. Estimating the gross weight based on a dimensional measurement of the total amount of plant material present.

c. Determining an average weight for a plant present within the grow operation and multiplying that average by the number of plants present.

13. The remaining bulk plant material can be destroyed per 11479 H&S.

14. Juvenile bulk plant material (vegetative or pre-flowering state) may be destroyed on site and left.

15. Plants should be uprooted with the roots cut or the central stalk snapped to prevent replanting.

16. If the location is an easily accessed public area or there is a potential that the offenders could come back shortly after law enforcement has left the scene, consideration should be given to bring the juvenile plants back to Property Services for destruction.

17. Flowering plants or plants with buds need to be transported to Property Services for destruction.

18. The number of lights, ballasts, and other grow related equipment should be determined.

19. If an indoor operation, the number of each type of grow equipment found in each room should be determined.

20. Serial numbers for equipment such as lights and ballasts should be recorded. This can be done either with notes or by taking photographs of the serial numbers.

21. One light and one ballast is collected as evidence from the grow operation. The remaining bulk lights and ballasts can be transported to Property for destruction.

22. Very large equipment may be taken to Property Services for proper disposition but will not be stored as evidence.

23. A Court Order pursuant to 11474 H&S will be obtained within 60 days to destroy the bulk equipment. Obtaining the court order for destruction is the responsibility of the Special Investigations Unit (S.I.U.) Sergeant.
24. Samples of foodstuff derived from marijuana are to be taken with the remaining bulk material transported to Property for destruction.

B. Other Considerations

1. Structural modification may have been done for indoor MGOs.
   a. Alterations may have occurred to maximize the growing environment or to disguise the growing location.
   b. Document the modifications with photographs when possible.
   c. Call the local building inspection entity to evaluate structural safety and potential code violations prior to release of the home or other type of building to the owner.

2. Electrical modifications may have been done to bypass the normal distribution of power to the structure.
   a. Document any electrical modifications with photographs.
   b. Photograph the power meter prior to turning power off or unplugging any equipment.
   c. Call the local building inspection entity and PG&E to evaluate electrical safety and potential code violations prior to release of the home or other type of building to the owner.

C. Federal Cases

1. Some cases may be investigated in cooperation with a Federal agency and prosecuted at the Federal level. The same plant and grow equipment sampling and destruction policies listed above will apply.

2. If the Federal agent requests to have more plants or grow equipment collected than required by this policy, the Federal agency will be responsible for the storage of these additional items.

D. Safety

1. The CCCSO Injury and Illness Prevention Program (IIPP) dictates safe work practices to address the various safety hazards present at an MGO.

2. During the processing of an MGO, the local fire department should be on scene to identify potential fire hazards, since hazardous situations may exist.

E. Fire

1. Fire hazards from electrical modification may be present on site from uncovered breaker boxes, exposed live wires, excessive wiring, wire bundles, and wires exposed to water.

2. Numerous high intensity light bulbs are often used indoors which are extremely hot.

3. Many operations will use flammable and volatile solvents such as acetones, camp fuel, and isopropyl alcohol. These can ignite when exposed to a flame, electrical arc, or other heat source such as the lights.
4. Solvents can also produce explosions when the right fuel/air mixture is reached.

F. Electrical
1. The electrical modifications at grow operations are generally not done by competent or licensed electricians and are very hazardous.
2. Exposed live wires, improper grounding, inadequate circuits and moist environments all pose electrocution hazards.
3. Light ballasts can hold their electrical charge for up to 15 minutes after being unplugged and pose an electrocution risk.
4. Processing should cease in the area of the grow operation effected by a potential electrical hazard.
5. A licensed electrician or a representative from PG&E should be requested to render any electrical hazards safe prior to commencing processing.

G. Atmospheric
1. Volatile liquids such as solvents can create an unsafe atmospheric condition.
2. The Hazardous Materials Specialists should be requested to evaluate and monitor the atmosphere during the course of the grow operation processing when poor ventilation exists and an atmospheric hazard might be present.
3. Sheriff’s employees shall not enter an enclosed space with a potential atmospheric hazard before the atmosphere has been properly evaluated and any hazards mitigated.

H. Mold
1. Molds are a standard byproduct growing in the same area as the plants.
2. Without respiratory protection, mold may produce allergic reactions, sinus and respiratory distress, and even death in extreme cases.
3. Aspergillus is a group of pathogenic molds that grow on decaying marijuana that can lead to acute infections, chronic diseases, and even death in some individuals.
4. Proper respiratory protection and other protective barriers should be employed when handling marijuana.
5. A properly fitted N95 mask will prevent exposure to aspergillus and other molds.
6. Long sleeves, gloves, protective suit and eye goggles are also effective at limiting exposure to the mold spores.

I. Hazardous Materials
1. Large volumes of hazardous materials are often present at MGOs.
2. Large volumes of fungicides, pesticides, acids, and bases are used and are generally stored improperly, including being poured down drains and sewers.
3. Flammable organic solvents may be present for hash oil extractions.
4. Large quantities of fertilizer are also present.
5. Hazardous Materials Specialists may need to respond to the scene to dispose of these materials to ensure Sheriff’s Office employees and the public are properly protected from these hazards.

J. Confined Spaces
1. Some grow operations may be in underground rooms or tunnels. These locations are considered confined spaces and OSHA guidelines must be followed.
2. Only those trained as an entrant, attendant, or confined space supervisor can make entry into this type of environment.
3. Untrained Sheriff’s Office employees shall not enter confined spaces; these grow operations must be processed by those trained for confined spaces and trained with Level B or Level A protective equipment with SCBA.

XIII. EVIDENCE PACKAGING GUIDELINES
1. Evidence must be packaged to preserve the integrity of the evidence for laboratory analysis and court presentation.
2. Generally, items should be placed in separate packages.
3. Seal and initial the container with evidence tape or clear box tape.
   a. Cardboard boxes must have the bottom, top, and sides taped sealed and initialed.
   b. Do not use Scotch tape, masking tape, or duct tape.
4. Evidence Barcode Labels must be generated for all evidence.
   a. Envelopes with a preprinted Chain of Custody
      1. Enter case and evidence information into EvidenceOnQ
      2. Print an Evidence Barcode Label without a Chain of Custody and affix to the back of each evidence envelope
3. Fill out first line of the preprinted Chain of Custody (From, To, and Date)

b. Packages with no preprinted Chain of Custody
   1. Enter case and evidence information into EvidenceOnQ
   2. Print an Evidence Barcode Label with a Chain of Custody and affix to front of each package
   3. Fill out first line of the Chain of Custody (From, To, and Date) on the label.

5. Use appropriate packaging, see Addendum A - Guidance Document for Evidence Packaging for packaging guidelines.

6. When handling evidence containing possible latent fingerprints, use care not to destroy the prints or contaminate the item with your own fingerprints or DNA. Handle the item with gloves, minimize your contact, and avoid smooth surfaces and regions likely to have prints.

7. When handling evidence pertaining to fraudulent documents, i.e. checks, counterfeit bills, etc., the item should be handled by its edges or areas not likely to have prints. To avoid transferring writing indentions onto the evidence, the package must be written on prior to placing evidence inside.

8. Large items such as doors or car fenders may not be able to be packaged.
   a. Suspected bullet holes, tool marks, blood spatters or other areas of interest should be covered using a suitable packaging material and secured with tape, whenever possible.

B. Firearms will be rendered safe to ensure employee safety while preserving potential evidence.
   1. The general steps used to render a firearm safe are to point the gun in a safe direction, remove the ammunition source (magazine), and then carefully manipulate the firearm to clear the chamber.
   2. When handing revolvers, mark the cylinder under the hammer using a felt tip pen. Remove cartridges from the cylinder and note the chamber position.
   3. If a loaded firearm cannot be rendered safe, contact the __________________________. A staff member will assist you to render the weapon safe. If after business hours, contact Sheriff’s Dispatch.

C. Firearms will be packaged in a manner to preserve potential evidence.
   1. Package each firearm in a separate cardboard gun box.
   2. Ammunition and magazines found with a firearm shall be separately packaged and placed within the same cardboard gun box with the firearm.
   3. A green “UNLOADED” label must be affixed to packaging. The initials of the individual rendering the gun safe along with the date this action was performed must be reflected on the label.
4. If no firearm is submitted, place ammunition and magazine in an envelope.

5. Additional information on firearm evidence packaging can be found in Addendum A - Guidance Document for Evidence Packaging.

XIV. TEMPORARY STORAGE AT STATION HOUSES

A. The Patrol Division maintains temporary evidence lockers at [redacted]. Such temporary evidence lockers will be used only for the temporary storage of evidence and property.

1. The following items will not be stored at Station Houses:
   a. Items too large to be secured in lockers at the station house but can be transported in a patrol unit (bicycles excepted).
   b. All controlled substances evidence.
      i. [redacted]
   c. [redacted]

B. The Patrol Division Commander shall maintain procedures to ensure property from Station Houses and Contract City Police Departments is transported to Property and Evidence Services in a timely manner.

XV. SUBMISSION TO PROPERTY AND EVIDENCE SERVICES

A. [redacted]

B. [redacted]

1. Staff are available after hours via Sheriff’s Dispatch for emergency evidence needs for the following purposes:
   a. Very large items that cannot be temporarily stored anywhere else.
   b. Large quantities of controlled substances.
   c. Large sums of money or items of unusually high value.

2. The request for after-hours Property staff callback must come from the Watch Commander.

C. [redacted]

1. Packaging supplies and drying cabinets are available.

2. Evidence and Property must be packaged and sealed per guidelines and placed in an evidence locker at Intake.
4. Bloody clothing is to be hung in the drying cabinets for Property staff to package once dry.

5. The Evidence Log must be filled out completely.

6. Deputies must clean up after themselves prior to leaving the intake area.

D. Muir Station utilizes Property Intake as its primary evidence locker.
   1. Deputies from other station houses may bring items to Property Intake.

E. Property will not accept the following items:
   1. Body parts or bones:
      a. Contact the Coroner’s Office for further instructions. DO NOT deliver to Property Service or Crime Lab
   2. Explosives
   3. Foods (perishable)
      a. Take photographs for the case report.

XVI. EVIDENCE SUBMISSION TO FORENSIC SERVICES DIVISION FOR ANALYSIS

A. The Forensic Services Division Crime Lab operates across two facilities.
   1. Criminalistics Section (Summit Crime Lab)
      (Crime Scenes, Biology/DNA, Digital Evidence, Firearms, Latent Prints)
      2530 Arnold Drive, Suite 200, Martinez
   2. Drug, Alcohol, and Toxicology Section (Muir Crime Lab)
      1960 Muir Road, Suite 201, Martinez

B. The Forensic Service Division receives requests for service using the following:
   1. A Criminalistics Request Form. Fill out the form with all applicable information. The request form is designed to ensure that crime laboratory staff have the information necessary to accept the request and conduct the appropriate examinations. The Criminalistics Request Form may be found on ARIES.
   2. Specialized evidence envelopes DO NOT require a Criminalistics Request Form. Fill out all applicable information on the front of the preprinted envelope instead of a request form.
      a. Fired Cartridge Cases for NIBIN Entry Only Envelope
      b. Fingerprint Evidence Envelope
      c. Suspected Control Substance Envelope (CSE)
      d. Blood Sample for Alcohol/Drug Analysis Envelope
      e. Urine Sample for Alcohol/Drug Analysis Envelope

C. Evidence shall be packaged according to section XIII Evidence Packaging Guidelines.
1. Additional information on evidence packaging and delivery can be found in **Addendum A - Guidance Document for Evidence Packaging**.

2. Large items such as doors or car fenders may not be able to be packaged.
   a. Suspected bullet holes, tool marks, blood spatters or other areas of interest should be covered using a suitable packaging material and secured with tape, whenever possible.
   b. Contact the lab prior to any large item submission.

3. If direct evidence submissions do not meet the laboratory’s requirements, FSD staff will ask the submitter to:
   a. Correct the problem with materials supplied by the laboratory, or
   b. Resubmit once the evidence is properly packaged, sealed and/or documented.

**XVII. OBTAINING EVIDENCE FOR COURT**

A. Evidence may be obtained from the Property Services staff between 8:30 am and 4:30 pm, Monday through Friday. The Deputy should call in advance to ensure the evidence is ready for pickup.

B. It is the responsibility of the Deputy obtaining such evidence to properly document the chain of custody, ensure the security of the evidence while in their custody, and ensure its return to the original container after it is used in court.
ADDENDUM A

GUIDANCE DOCUMENT FOR EVIDENCE PACKAGING

This Guidance Document is intended to supplement Physical Evidence Policy 1.06.03.

The goal of this guidance document is to provide awareness of the standard packaging options and their purpose, and to ensure the best decision is made for the collection, documentation, and preservation of evidence.

Evidence Barcode Labels must be generated for all evidence.

Envelopes with a preprinted Chain of Custody
- Enter case and evidence information into
- Print an Evidence Barcode Label without a Chain of Custody and affix to the back of each evidence envelope
- Fill out first line of the preprinted Chain of Custody (From, To, and Date)

Packages with no preprinted Chain of Custody
- Enter case and evidence information into
- Print an Evidence Barcode Label with a Chain of Custody and affix to front of each package
- Fill out first line of the Chain of Custody (From, To, and Date) on the label
I. POLICY.
   A. Sergeant development and mentoring will be accomplished within a framework of a standardized assignment process that insures organizational efficiency with a basic level of predictability. It is in the best interest of the Sergeants, the Office of the Sheriff and the community to have well-trained Sergeants with a broad base of experience. Sergeants are encouraged to seek personal and professional improvement through education and a variety of assignments.

II. GENERAL.
   A. All Sergeants will have an initial-assignment either to Patrol or Detention for a period of 1-2 years. The Sheriff or his designee may determine an alternate assignment is in the best interests of operational efficiency. After the alternate assignment is complete, the Sergeant will be required to complete his or her initial-assignment in Patrol or Detention.
   B. After approximately 1-2 years of initial-assignment, Sergeants will be re-assigned to either Patrol or Detention depending on their initial-assignment.
   C. Sergeants are eligible to apply for special assignments at any time. Special Assignments will normally be for a maximum of 3 to 4 years.
   D. Sergeants may request a different assignment at any time. Requested moves between Custody, Patrol and Special Assignments prior to completion of a minimum of one year in Patrol and one year in Detention are disfavored, but will be evaluated case by case for approval. Such early movements do not relieve the Sergeant from the responsibility to complete a minimum of one year in Patrol and one year in Detention.
   E. Sergeants who have completed initial assignments to Patrol and Detention will be rotated based on time assigned to Patrol, and Detention. This method will be used for routine balancing of staff, when no other criteria exist.
   F. All Sergeants will be trained via the Sergeant Training Matrix.
   G. Sergeants can be reassigned at any time due to inadequate performance.
I. POLICY.

A. The Department Operations Center (DOC) will serve to manage and coordinate law enforcement resources within the Office of the Sheriff jurisdiction and the operational area during major incidents and/or emergencies.

   1. Tactical control remains the responsibility of the Field Incident Commander (IC) at all times.

B. All incidents requiring the activation of the DOC will be managed in accordance with the National Incident Management System (NIMS) and the California Standardized Emergency Management System (SEMS).

II. DEFINITIONS.

A. Activation: At a minimum, a designated official of the Office of the Sheriff implementing SEMS as appropriate to the scope of the emergency and the agency’s role in the response.

B. Emergency: A condition of disaster or of extreme peril to the safety of persons and property from natural or human causes.

C. Incident: An occurrence or event, either human caused or by natural phenomena, that requires action by emergency personnel to prevent or minimize loss of life or damage to property.

III. GENERAL.

A. PURPOSE: The purpose of the Department Operations Center (DOC) is to support field level Incident Commanders within the Office of the Sheriff jurisdiction and throughout the Operational Area by:
1. Coordinating the flow of information, resources, and priorities within the law enforcement function, amongst the local governments within the Operational area and the Emergency Operations Center (EOC).

2. Coordinating the flow of information between the Incident Command Post(s) and the Emergency Operations Center (EOC).

3. Establishing Office of the Sheriff Incident Action Plan priorities for each operational period.

4. Arranging for and allocating resources from field level requests.

5. Developing, maintaining, and documenting response efforts and situational reports.

6. Coordinating the Mutual Aid function.

7. Coordinating the recall of Office of the Sheriff personnel.

B. LOCATION: The Department Operations Center (DOC) is located on the lower floor of the Field Operations Building, 1980 Muir Road, Martinez, in room number 104, commonly referred to as the Training Room.

1. If needed, the selection of an alternate DOC location will be made in conjunction with the staging/deployment of the Mobile Command Vehicle.

IV. PROCEDURE 1.

A. ACTIVATION: The DOC should be activated at any time a single incident or multiple concurrent incidents, require the coordination of personnel and equipment beyond the capacity of the Incident Command Post to manage.

1. The decision to activate the DOC will rest with the Division Commander of the affected division (or his/her designee). If multiple divisions or jurisdictions are affected, the Patrol Division Commander (or his/her designee) will initiate the activation and assume the role of DOC Director.

2. In the absence of the Division Commander, the next highest ranking manager or Watch Commander may activate the DOC.
   a. The manager activating the DOC should immediately notify their chain of command.

3. Unless otherwise directed by the Sheriff or Undersheriff, the DOC shall be activated for the coordination of Operational Area law enforcement resources any time the County EOC is activated.

4. When activated, Operational Area Mutual Aid shall be coordinated from the DOC under the direction of the DOC Director.

5. The DOC Director will assign staff to organize the DOC in accordance with the DOC startup checklist located in the Field Operations Guide.
   a. A copy of this checklist is located on the inside of the Video Room door (room 105) within the DOC.

6. During normal business hours, activation shall be initiated by contacting the Field Operations Bureau Assistant Sheriff or his/her designee.
7. During non-business hours and holidays, requests for activation should be made to the on-duty Watch Commander or to the on-call Watch Commander or affected Lieutenant (e.g., Station House Commander, Custody Facility Lieutenant, etc.) via dispatch.
   a. The person making the request shall minimally advise the following:
      • Affected area (station house, custody facility, etc.)
      • Synopsis of the incident including extent of casualties and ongoing hazards
      • Resources being requested.

V. PROCEDURE 2.
   A. NOTIFICATIONS: Upon receiving a request to activate the DOC, the communications supervisor will ensure the following notifications are made:
      1. The Division Commander for the affected division
      2. The Assistant Sheriff for the affected bureau
      3. The Division Commander for the Office of Emergency Services (OES)
      4. The OES on call Duty Officer
      5. The Law Enforcement Mutual Aid Coordinator.

VI. PROCEDURE 3.
   A. STAFFING AND ORGANIZATION: The Incident Command System is designed to be a flexible framework for managing incidents of various sizes and complexities. Therefore, specific staffing of the DOC is dependent upon the size and complexity of the incident at hand.
      1. The responsibilities of any position that remain unstaffed rest with the next higher level of the organization to carry out or assign.
      2. A sample DOC organization chart is available for reference in the Field Operations Guide.
      3. The primary sections and functions the DOC Director must consider regarding staffing include but are not limited to:
         a. Public Information Officer (PIO) (Command): Responsible for coordinating the formulation and release of information to the media and may work with other PIOs in a Joint Information Center for interagency coordination during more complex events.
         b. Safety Officer (Command): Legally required for HAZMAT incidents, the Safety Officer is responsible for ensuring personnel safety and well-being, including the coordination of Critical Incident Stress Management.
         c. Scribe (Command, if Planning is not staffed): Responsible for the detailed documentation of the response effort and all incident
message forms with reference to time, message, and actions taken.

d. Liaison Officer (Command): Responsible for coordinating the flow of information between command staff and points of contact and representatives of an assisting agency.

e. Operations Chief: A member of the General Staff responsible for coordinating support of field level operations directly applicable to the primary mission.

f. Planning and Intelligence Chief: A member of the General Staff responsible for the collection, evaluation, dissemination and use of information about the development of the incident and the status of resources.

g. Logistics Chief: A member of the General Staff responsible for providing facilities, services, and material in support of the incident.

h. Finance Chief: A member of the General Staff responsible for all financial, administrative, and cost analysis aspects of the incident and for supervising members of the Finance/Administration Section.

VII.  PROCEDURE 4.

A. INCIDENT MANAGEMENT GUIDELINES: Operational Area Emergency Operations Center not activated:

1. The DOC staff, at the direction of the DOC Director, is responsible for coordinating the resources, strategies, and policy for any event in the Office of the Sheriff jurisdiction that exceeds the capabilities of the field level resources to manage.

2. The DOC is responsible for developing and maintaining the Incident Action Plan. When establishing priorities for the response to an incident(s), the DOC Director will prioritize goals based on the following criteria:

   a. Saving lives
   b. Protecting property
   c. Preserving the environment
   d. Restoring interrupted essential services.

3. The DOC will coordinate resource requests from field Incident Command Posts to ensure appropriate assets are acquired, tracked, assigned, and funded.

4. In the event of a personnel recall, the DOC is responsible for the coordination of the recall of personnel in accordance with CCCSO Policy 1.06.22, Emergency Activation of Personnel.

5. The DOC Director will ensure the information collected, decisions made, and actions taken within the DOC are thoroughly documented as a chronological log.
a. Event log keeping and resource tracking should be accomplished using the Web EOC program.

B. Operational Area Emergency Operations Center is activated:

1. In addition to managing events and law enforcement resources within the jurisdiction, the DOC is responsible for coordinating Law Enforcement Branch information from local jurisdictions and communicating that information to the Law Branch Director of the Operations Section with the Emergency Operations Center.
I. POLICY.
   A. This policy provides guidance for addressing bomb related incidents at Sheriff’s Office facilities. For incidents involving properties not owned or operated by the Office of the Sheriff, refer to Patrol Division Policy 3.01.33 Bombings, Bomb Threats, Explosives, and Explosive Devices.

II. GENERAL.
   A. The safety of Office of the Sheriff employees, as well as the general public, is the primary concern in addressing potential bombs or bomb threats at Office of the Sheriff Facilities.

III. PROCEDURE 1.
   A. BOMB THREAT: Employees receiving a bomb threat should do the following:
I. POLICY

A. The Office of the Sheriff recognizes that violent extremism and terrorism represent an ongoing threat to public safety. Deputies will ensure that all information and any incidents potentially pertaining to violent extremism or terrorism are thoroughly documented and forwarded to the Homeland Security Unit in a timely manner.

B. Deputies will respond to and document suspicious activity that represent a potential terrorist threat or may involve any Critical Infrastructure or Key Resources within the County.

II. DEFINITIONS

A. Critical Infrastructure: Assets, systems, and networks, whether physical or virtual, so vital to the United States that the incapacity or destruction of such assets, systems, or networks would have a debilitating impact on security, national economic security, public health or safety, or any combination of those matters.

B. Key Resources: Publicly or privately controlled resources essential to the minimal operations of the economy and government.

C. Homeland Security Unit (HSU): Serves as the Information Sharing Center between Contra Costa County Office of the Sheriff and local, regional, state, federal and private partners relating directly to infrastructure and potential terrorist activity. HSU collects and disseminates information to identify trends in order to deter threats, mitigate vulnerabilities and minimize consequences for any man made intentional acts.

D. Terrorism: A violent act, in violation of state or federal laws, targeting a non-combatant population, critical infrastructure, or key resources, which is intended to coerce or intimidate a population or its government regarding a political or social objective.
III. GENERAL INFORMATION

A. In order to facilitate information sharing between the local, regional, state, and federal levels, it is imperative that all members of the Office of the Sheriff report information that may help identify individuals and/or groups that may be involved in potential terrorist activity.

B. When dealing with incidents involving potential extremists, deputies will remain mindful of the difference between those persons who are potentially planning some violent action and those who are exercising their constitutionally protected rights.

IV. PROCEDURE
I. POLICY.
   A. The Office of the Sheriff shall deploy the Community Warning System (CWS) for delivering timely alerts and warnings about imminent hazards to human life or health in Contra Costa County.

II. DEFINITIONS.
   A. COMMUNITY WARNING SYSTEM (CWS). An integrated, multi-mode, all-hazard public warning system constructed to alert the public in the event of a chemical accident or other public safety incident.
   B. EMERGENCY ALERT SYSTEM (EAS). A federal system for overriding broadcast radio and television, as well as cable and satellite services. The primary purpose of EAS is to enable the President of the United States to communicate with the nation in times of crisis. EAS may also be used for local alerting; however, participation in local alerts is voluntary on the part of the individual broadcasters.
   C. EMERGENCY DIGITAL INFORMATION SYSTEM (EDIS). A statewide emergency public information service operated by the Governor’s Office of Emergency Services.
   D. STAFF AUTOMATED NOTIFICATION DEVICE (SAND). A computerized telephone calling system using pre-defined phone lists to make notifications to public safety and health personnel.
   E. TELEPHONE EMERGENCY NOTIFICATION SYSTEM (TENS). A computerized telephone calling system that allows geographic mapping of the area to be notified.
   F. WIRELESS EMERGENCY ALERTS (WEA). A federal system that provides an interface to participating cellular mobile service providers for delivery of critical alert information to cellular phones in a danger zone. The primary purpose of WEA is to enable the President of the United States to communicate with the nation in times of crisis. Not all cell phone carriers participate in this program and not all cell phones are WEA compatible. Individuals may opt out of local alerts on their cellular device, but may not opt out of presidential alerts.
III. GENERAL INFORMATION.

A. FUNCTION.

1. The Community Warning System automatically coordinates the transmission of alerts and warnings over a variety of delivery systems, including:
   
a. Sirens in the vicinity of major industrial facilities;
b. Telephone notification (TENS) to residential telephones in the 9-1-1 database;
c. Cell phone calls, text messages and email messages in the voluntary registration database;
d. Alerting NOAA weather radios;
e. The Emergency Alert System (EAS) over broadcast radio, television and cable;
f. Wireless Emergency Alerts (WEA) to mobile phones over mobile telephone broadcast towers;
g. The State of California’s “Emergency Digital Information Service” (EDIS);
h. Pagers, emails and Internet notifications;
i. The County’s cable television channel; and,
j. Low-power AM Travelers Information Radio broadcasts.

B. APPROPRIATE USE

1. The Community Warning System (CWS) may be used to provide time-sensitive alerts and warnings to affected members of the public about imminent hazards to human life or health for which specific protective action is recommended.

2. The CWS may also be used to advise affected members of the public when follow-on action is required; e.g., a message advising the public to air out their houses following a hazardous materials incident.

3. The CWS will NOT be used for public communications that:
   
a. Are commercial or political in nature;
b. Are not authorized by a responsible public safety official;
c. Do not request specific and immediate protective action by the public; or,
d. Could be effectively delivered by other means.

C. 

   

I. POLICY.
   A. In specified events falling within the parameters of the Unusual Incident Report, special care shall be taken to ensure notification of the Sheriff is made in a timely manner.

II. DEFINITIONS.
   A. Unusual Incident Report. An Office of the Sheriff form titled, Unusual Incident Report. It is routed via email to the UIR receiver list which is comprised of: Administration (Sheriff/Undersheriff), Bureau Assistant Sheriffs, Captains, Lieutenants, Sergeants, Professional Managers, and Professional Supervisors.

III. GENERAL.
   A. INCIDENTS REQUIRING NOTIFICATION.

   1. All incidents meeting any of the following criteria will require a UIR to be generated:
      a. Office of the Sheriff involvement in any incident that has attracted or has the potential to attract extensive media or public attention;
      b. Any incident that has adversely affected, or has the potential to adversely affect, Office of the Sheriff operations; and
      c. Any incident that is unusual in nature, wherein the Sheriff/Undersheriff would need the information to properly respond to questions from the media, the public or other interested parties.

   2. In addition to the required written notification noted above, the following specific incidents require that verbal notification be made to the Sheriff/Undersheriff and affected Bureau Assistant Sheriff:
      a. Any serious injury or death of an employee;
      b. Any homicide wherein an employee's action or inaction caused the death;
c. The death of an inmate or arrestee in the custody of the Office of the Sheriff;
d. Any incident involving an employee as a hostage or as a hostage taker;
e. Any incident involving major damage to a Office of the Sheriff Facility or equipment;
f. Any major riot/disturbance in any Office of the Sheriff Detention Facility;
g. Any disaster requiring involvement of Office of the Sheriff resources that is of major media or public interest;
h. Any request for Mutual Aid; and
i. Any incident wherein an employee is exposed to a life-threatening situation and/or suffers severe physical or emotional trauma, and a Supervisor at the scene determines that immediate support from the Administration level would be of help to the employee.

3. Other incidents may occur which do not fit any of the above criteria and the on-scene Supervisor may feel the notification steps should be taken.
   a. The Supervisor shall verbally notify his or her Manager and complete an Unusual Incident Report; and
   b. The Manager receiving the verbal notification will decide whether or not to continue the verbal notification to the next level of command. The Unusual Incident Report will be forwarded in all cases.

IV. PROCEDURE 1.
   A. UNUSUAL INCIDENT REPORT.
      1. The Unusual Incident Report shall be completed and routed in a timely manner by supervisory/management personnel. The employee responsible for the report shall not go off duty prior to its completion.
      2. Unusual Incident Reports shall be immediately disseminated via email to the UIR receiver list.

V. PROCEDURE 2.
   A. VERBAL REPORT OF UNUSUAL INCIDENTS.
      1. Verbal reporting will be accomplished via the chain of command. The Supervisor receiving the verbal report will either:
         a. Personally relay the report to their Supervisor; or
         b. Direct the employee making the notification to report to the next higher ranking Supervisor in the chain of command.
      2. If a Supervisor in the chain of command is not available, the notification process will bypass that position.
3. When verbal reporting is initiated for any incident not specifically described in this Policy, each Supervisor receiving the report will decide whether or not to continue the verbal reporting process.

4. The Undersheriff may decide to stop or delay verbal notification to the Sheriff for any incident including those specifically listed in this Policy.
I. POLICY.
   A. To establish mobilization procedures for the Office of the Sheriff’s resources during a National emergency, major disaster or unusual occurrence, all members of this agency, sworn, non-sworn and volunteer, shall serve as disaster service workers subject to the assignment of disaster response activities by their superior or by law.

II. GENERAL.
   A. During periods of major disaster, the Office of the Sheriff may take on additional responsibilities as the lead agency for emergency management in the Operational Area. These responsibilities may place a greater burden on the department than can be managed with existing on-duty personnel.

   B. In the event of a major disaster or unusual occurrence requiring a full commitment of the agency’s resources and personnel, all sworn and non-sworn members of the Office of the Sheriff and all emergency services volunteers shall immediately make themselves available for mobilization to help carry out this agency’s responsibilities. The mobilization plan for the Office of the Sheriff is described on the following pages.
I. POLICY.

A. The County Emergency Operations Center (E.O.C.) shall notify the Sheriff and provide disaster support, and resource coordination. In response to a major disaster, the Office of the Sheriff shall focus its personnel, resources and energy on mitigating the effects of the disaster. The goal of the Office of the Sheriff is to safeguard lives and property, while minimizing the impact of the disaster and restoring order to the community. Every effort will be made to resume normal service and effectively handle the public needs.

II. DEFINITIONS.

A. BUILDING WARDEN. A designated County employee responsible for the exigency plan for a building.

B. EXIGENCY. A situation requiring immediate aid or action.

C. FLOOR WARDEN. A designated County employee responsible for the exigency plan for a floor, and who works closely with the Building Warden.

D. MAJOR DISASTER. Fire, earthquake, explosion, national emergency, riot or other potentially life-threatening situations requiring the mobilization of the Sheriff’s Office.

E. WATCH COMMANDER. The Watch Commander is responsible for necessary decision making during non-business hours.

F. Primary Work Location. Work site or location to which an employee is assigned.

III. GENERAL.

A. ADMINISTRATIVE SERVICES.

1. The Sheriff is the Administrator of Emergency Services, and in such capacity, has certain powers and duties when an emergency exists under Government Code Section 8558(a) or pursuant to County Ordinance Code Chapter 42-2 or Government Section 8558, 8625, or 8630.
2. In the Sheriff’s absence, the Undersheriff, Support Services Bureau Assistant Sheriff or senior Manager will direct and coordinate the efforts of the County’s emergency operations in the event of a major emergency which threatens the safety of persons and property and which may require the assistance of other political subdivisions.

3. The following persons are available resources and are qualified to assume the powers and duties of the Administrator of Emergency Services when the Sheriff or designee is unavailable to serve in such capacity:
   a. County Administrator;
   b. Chief Assistant County Administrator;
   c. Assistant County Administrator
   d. Deputy County Administrator
   e. Chief, Contra Costa County Fire Protection District;
   f. County Director of Health Services;
   g. County Public Works Director; and
   h. County Welfare Director.

B. In the event of a major disaster, Office of the Sheriff resources will be focused on the medical needs, security and safety of the community, staff and inmates. Office of the Sheriff employees are expected to make reasonable efforts to contact their primary work locations as soon as possible to ascertain the status of the disaster and the need for them to report to work either on an emergency basis or as part of their normal work cycles.

C. In accordance with Federal and State laws and this Policy, those Divisions involved in coordinating responses to major disasters shall establish necessary procedures to ensure that the intent of this Policy is carried out. Specifically, the O.E.S. Division Commander shall develop and maintain procedures and coordinate the operations of other Divisions to ensure that the intent of this Policy is enforced.

IV. PROCEDURE 1.

A. EARTHQUAKE EXIGENCY PLANS. In the event of a life-threatening earthquake, Office of the Sheriff resources will be focused on medical needs, safety of employees and public, and security of inmates.

   1. Safety Rules.

   a. Stay where you are.
      • If inside a building, take cover under tables, desks or doorways; duck and cover; crouch on knees with face down and cover back of neck; and avoid glass windows, tall cabinets, falling plaster.
      • If outside, avoid buildings, trees, walls and power lines.
b. Do not use matches or open flame.
c. Expect power outages, activation of alarms and sprinklers, and stoppage of elevators.
d. Expect aftershocks that may cause as much or more damage than has already taken place due to the weakening of structure.

B. AFTER AN EARTHQUAKE.

1. After a life-threatening earthquake, all employees will:
   a. Administer first aid and request medical aid if needed; and
   b. Determine damage to facilities.

2. Should an evacuation be necessary, the below evacuation guidelines will apply.

3. Every effort will be made to resume normal service and effectively handle the needs of the public.

V. PROCEDURE 2.

A. FIRE EXIGENCE PLANS. In order to minimize the dangers to employees and the public, all employees will know, understand and follow the fire exigency plans of their workplace.

1. The specific plan of action addressed in this section is for the County Administration Building located at 651 Pine Street, Martinez. Exigency plans for all other Office of the Sheriff facilities are the responsibility of the Bureau Assistant Sheriff in charge of those facilities. Such exigency plans will be included in the Division Manuals.

B. AUTHORITY AND RESPONSIBILITY DURING A FIRE.

1. Building Warden. The Building Warden, during an exigent situation, will have authority for decisions affecting the County Administration Building, the emergency and security of the premises. Upon notification of a fire alarm in the County Administration Building, the Building Warden will:
   a. Proceed to the location and ensure the Fire Department is on the scene.
   b. Determine if it is necessary to evacuate all or part of the building. The Building Warden will post a County employee at each entrance of the building to ensure that no unauthorized persons are allowed to enter the building.
   c. The Building Warden will complete the evacuation. Any missing persons will be immediately reported to the Fire Officer In Charge.

2. Floor Wardens. Floor Wardens for each floor of the County Administration Building are designated by the County Department in control of that floor(s). Refer to County Administrative Bulletin 15.6. Floor Wardens must ensure that the employees who report to them understand procedures to be followed in case of an exigent situation.
This includes being familiar with the alarm systems, evacuation routes, location of fire exits and use of fire extinguishers. In addition, all Floor Wardens are directly responsible for the protection of their employees, County assets and continuity of operations within their area. In case of an exigency situation, the Floor Wardens or their designated alternates must:

a. Ensure that all employees are properly notified of the exigent situation;
b. Initiate action for first aid, rescue, fire or damage control activities, shutdown equipment as required, and protect classified materials and other assets;
c. Evacuate their portion of the building when instructed to do so by the Building Warden, a fire officer at the scene or a voice announcement on the building speaker system;
d. Account for all employees and visitors after evacuation and report this to the Building Warden; and
e. Ensure that essential functions and operations are continued when possible.

3. Upon arrival of the Consolidated Fire Department, the Fire Officer In Charge will direct the control and extinguishing of the fire.

C. BASIC GUIDELINES FOR PERSONNEL.

1. Reporting a Fire:
   a. Locate and activate a fire alarm.
   b. Telephone 9-1-1 and give the building location or room number. From inside County buildings dial 9-9-1-1.
      • Describe the type and size of the fire.
      • Advise if there are any injured people.
      • Give your name and phone number.

2. Evacuation. Evacuate all people from the area of the fire and close off the fire area. Fire extinguishers may be used, but if the smoke or heat presents a danger to your safety, evacuate the area and let emergency personnel handle the situation.
   a. If possible, have someone stand by at the nearest entrance to direct emergency personnel to the affected area.
   b. Elevators shall not be used for evacuation. The elevators automatically return to the first floor and lock open when a fire alarm is activated.
   c. Emergency evacuation routes are posted on each floor of the building to facilitate evacuation of employees of the Sheriff's Office, other County employees and the public. The evacuation routes and exits from the building are as follows:
I. POLICY.
   A. A Special Weapons and Tactics (SWAT) team will be utilized in critical situations to minimize dangers to the public, employees and suspects.

1. **Policy Statement:**

   - Mobile Command Vehicle (MCV) shall be used for command and control during major incidents.
   - The MCV shall be staffed by a Sheriff's Deputy Commander and a team of deputies.
   - The MCV shall be equipped with a generator for power supply.
   - The MCV shall be equipped with communication devices for internal and external communication.

2. **Procedures:**

   - Prior to deployment, the MCV shall be inspected for functionality and maintenance.
   - During deployment, the MCV shall follow a pre-determined route and schedule.
   - Upon return, the MCV shall be disassembled and stored in a designated location.

3. **Responsibilities:**

   - The Sheriff's Deputy Commander shall be responsible for the overall operation of the MCV.
   - Deputies assigned to the MCV shall follow the instructions of the Deputy Commander.

4. **Standards:**

   - The MCV shall be maintained in accordance with the standards set by the Sheriff's Office.
   - Deputies assigned to the MCV shall undergo comprehensive training on the use of the MCV.

5. **Security:**

   - The MCV shall be secured when not in use to prevent unauthorized access.
   - The MCV shall be equipped with security features such as locks and alarms.

6. **Emergency Situations:**

   - In the event of an emergency, the MCV shall be deployed immediately.
   - The MCV shall be used as a command center and a deployment hub.

7. **Reporting:**

   - The Sheriff's Office shall maintain records of all MCV deployments.
   - Deputies assigned to the MCV shall submit reports on the operation of the MCV.

8. **Conclusion:**

   - The MCV is an essential tool for the Sheriff's Office to effectively manage major incidents.
   - Deputies assigned to the MCV shall ensure the efficient operation of the MCV.

I. POLICY.

A. A formal debriefing and critique of every major incident will occur within thirty calendar days of a major incident, unless an exception is authorized at the Office of the Sheriff Executive Level.

II. DEFINITIONS.

MAJOR INCIDENT. Major Incidents include, but are not limited to, SWAT Team utilization, serious hazardous material spills, significant mutual aid responses, demonstrations requiring special preparation or staffing, riots, hostage situations, prisoner escapes, in-custody deaths, officer involved shootings, and fatal or life-threatening accidents or similar incidents involving Office of the Sheriff personnel. Command Staff and Division Commanders may determine incidents other than those enumerated, to be Major Incidents based on an overall judgment as to the significance of the incident such as the level and quality of response by Office of the Sheriff personnel, public interest in the incident and any other pertinent factors.

DEBRIEF. A debriefing shall be conducted of the Major Incident. Department Supervisors and personnel familiar with all aspects of the Major Incident shall attend. At the conclusion of the debriefing, an evaluation and analysis of the role, function, and performance of the Office of the Sheriff personnel in connection with the Major Incident will be conducted, to include the applicability of previous training, planning, tactics, execution and overall handling of the detail.

III. PROCEDURE 1.

A. The debrief may include physical assets such as audio recordings, video recordings and police reports.

B. The Incident Commander will chair the debriefing and make all arrangements, including the determination of appropriate personnel who should attend. The debrief will include an evaluation of the Office of the Sheriff response, scene management and tactics. The Bureau Assistant Sheriff will attend the debriefing.

C. At the time the debrief meeting is scheduled, the Bureau Assistant Sheriff will consult with County Counsel or a private attorney and determine if they should attend the debrief meeting.
D. The Incident Commander, shall determine whether or not to arrange for the participation at the meeting of any non-departmental personnel, such as experts, medical and fire personnel, and members of other agencies, where such participation is necessary to the debrief.

IV. PROCEDURE 2.

A. DEBRIEF DOCUMENT. At the conclusion of the debriefing a written summary will be prepared by the Incident Commander. The summary should include the following sections, when applicable, and any detail as will be useful for future response to similar Major Incidents:

1. Major Incident;
2. Date/time of Incident;
3. Date/time of debrief;
4. Participating Personnel;
5. Sequential Outline of Incident;
6. Involved Persons, Divisions, Agencies;
7. Procedures that Worked Well;
8. Procedures that Did Not Work Well;
9. Solution;
10. Person Assigned to Correct;
11. Time Frame to Correct;
12. Report Correction to Whom; and

B. MEMO DRAFT. A cover memo shall be generated and addressed to County Counsel, via the Bureau Assistant Sheriff, notifying them the Incident Debrief has been conducted and that a Debrief Document has been prepared. The memorandum and all relevant documentation related to the debrief will be marked “Confidential: Attorney / Client Privilege.”

1. The complete packet shall be forwarded through the affected bureau chain of command including the Sheriff and the Undersheriff.

C. RELEASE OF DOCUMENTS/INFORMATION. All personnel involved in a Major Incident, as well as those involved in the debriefing of the Major Incident, are reminded to comply with Sheriff’s Office Policies 1.06.71 Dissemination of Law Enforcement Information, 1.06.74 Control of Sheriff’s Office Information, 1.06.78 News Media Relations, and other policies applicable to the Major Incident. In no case shall a Debrief Document be released except upon appropriate legal process.
I. POLICY.
   A. In order to provide a coordinated effort in the County area toward the apprehension of suspects fleeing by vehicle from major crimes, the Sheriff has adopted an intersection observation plan with other law enforcement agencies.

II. DEFINITIONS.
   A. CLERS Radio. The California Law Enforcement Radio System, which is a statewide station-to-station radio communication system.
   B. BOLO. Acronym used for "be on the lookout for".
   C. CLETS Message or APB Mask. Used to process All Points Bulletin information in the Communication Center.

III. GENERAL.
Those units not specifically assigned to participate in the Code 666 shall remain in the proximity of their assigned beats or areas. They shall be cognizant of the wanted vehicle and watch the major traffic arteries in their beats.

IV. PROCEDURE 1.

A. SHERIFF'S TECHNICAL SERVICES DIVISION RESPONSIBILITIES.

1. Central Communications Center personnel, upon receiving a Code 666 request from a Station House Commander, Police Commander, or Area Supervisor will:
   a. Broadcast the information as soon as possible on CLERS radio;
   b. Broadcast the information as soon as possible to all Sheriff's units and Contract Cities; and
   c. Broadcast any additional information, on both systems, as it is received.

2. Dispatchers will ensure that designated observation points are covered by the assigned Deputies.

V. PROCEDURE 2.

A. PATROL DIVISION RESPONSIBILITIES.

1. When a Code 666 is broadcast, Deputies who have an assigned intersection in their beat will:
   a. Immediately drive to their assigned intersection;
   b. Take a position of observation that will allow them to readily pursue the suspect vehicle if observed; and
   c. Advise Dispatch that they are in position.

2. When a Deputy with an assigned intersection in his/her beat cannot cover that intersection in a reasonable time he/she will:
   a. Have Dispatch check for a closer unit to cover the location; and
   b. Notify their Sergeant of the inability to cover the location.

3. Deputies unable to respond to an assigned intersection may request that Dispatch call CHP for assistance in covering that location.

4. Area Sergeants will verify that assigned Deputies are providing cover for designated observation points.
I. POLICY.
   A. The Office of the Sheriff shall assume reporting and investigation responsibilities for all escapes by persons for whom the Office of the Sheriff has taken physical custody.

II. GENERAL.
   A. REPORTING RESPONSIBILITY.
      1. The Deputy from whom the escape occurred is responsible for notifying the appropriate personnel and initiating the original escape report.
      2. If the escape occurs from a Reserve or Temporary Deputy, a permanent Division Deputy will be assigned to assist in the preparation of the report.

III. PROCEDURE 1.
   A. NOTIFICATION OF ESCAPE.
      1. The Deputy from whom the escape occurred is responsible for notifying the following:
         a. Dispatch, supplying all available information regarding the escape and escapee; and
         b. Shift Supervisor.
      2. The Shift Supervisor is responsible for notification of the following:
         a. Detention Division - the Facility Commander;
         b. Patrol Division - the Station House Commander responsible for the escapee, or the Watch Commander if after hours; and
         c. Court Security Division - the Court Security Services Lieutenant.
      3. The Facility Commander, Court Security Services Lieutenant or Station House Commander will ensure the following are notified via the chain of command:
a. Appropriate Division Commander;
b. Appropriate Bureau Assistant Sheriff;
c. Undersheriff;
d. Sheriff, and
e. Risk Management

- During non-business hours, the above personnel will be notified via the Unusual Incident Report Form. In the case of Risk Management, the Unusual Incident Report shall be [REDACTED]. A follow-up copy of the report shall be sent by transmittal or mail to: Office of the County Administrator, Risk Management Division, Assistant Risk Manager, 2530 Arnold Dr., Ste. 140, Martinez, CA 94553.

IV. PROCEDURE 2.

A. INVESTIGATION ASSISTANCE FOR ESCAPES INVOLVING VIOLENCE OR VIOLENCE POTENTIAL. The appropriate Facility, Division or Station House Commander will contact the Investigation Division Commander, Assistant Division Commander or on-call Investigator for assistance when:

1. A Deputy is injured during an escape;
2. The escapee has displayed propensities toward committing violent crimes; or
3. There is a need for immediate follow-up investigation.

V. PROCEDURE 3.

A. ESCAPE REVIEW.

1. The concerned Bureau Assistant Sheriff shall initiate an investigation of the escape incident. The occurrence of an escape indicates an area of concern in one or more of the following areas:
   a. Transportation/custodial procedures;
   b. Deputy mental/physical error; and/or
   c. Structural weaknesses/deficiencies.

2. The concerned Bureau Assistant Sheriff shall obtain and review all reports relative to the incident and, if necessary, interview all Deputies and witnesses. Upon completion, the Bureau Assistant Sheriff shall forward the results of the investigation via the chain of command to the Sheriff/Undersheriff with recommended policy, procedural or structural changes, and/or corrective personnel action(s) if necessary.
I. POLICY.

A. All Extradition and Rendition proceedings shall be the responsibility of the arresting agency. The Office of the Sheriff will process all Office of the Sheriff, Contract Cities and CHP arrests, with timely notification of the fugitive’s availability to other agencies. Other arresting agencies may contract with the Office of the Sheriff for rendition services.

II. DEFINITIONS.

A. APPLICATION FOR REQUISITION. The formal written request from the Prosecutor for requisition upon the Governor of the asylum state.

B. ASYLUM STATE. The state where the fugitive or defendant has taken refuge or is found.

C. DEMANDING STATE. The state which seeks to extradite the fugitive.

D. EXTRADITABLE OFFENSE. Refers to any criminal offense, felony or misdemeanor, regardless of whether the offense is a crime in the asylum state.

E. EXTRADITION. The surrender, by one nation or state to another, of an individual accused or convicted of an offense outside its own territory and within the territorial jurisdiction of the other, which being competent to try and punish him, demands the surrender.

F. FUGITIVE. One who is accused or convicted of a crime in one state and is later found in another state, regardless of the manner or reason for his/her departure from the first state.

G. FUGITIVE COMPLAINT. The document filed in the asylum state prior to receipt of the Governor's warrant charging the person arrested with being a fugitive from justice.

H. FUGITIVE WARRANT. The arrest warrant issued by the local court prior to receipt of the Governor's warrant authorizing the arrest and detention of the fugitive pending receipt of the Governor's warrant.

I. GOVERNOR OR EXECUTIVE AUTHORITY. Any person performing the functions of Governor under State law.
J. GOVERNOR'S WARRANT. The warrant issued by the Governor of the asylum state commanding that the fugitive be arrested and delivered over to designated agents of the demanding state.

K. MAGISTRATE. Any judge in the State of California (PC 808) or any person certified to be a magistrate under the laws of the demanding state.

L. REQUISITION. Refers to the formal demand made by the Governor of the demanding state upon the Governor of the asylum state and upon which the Governor's warrant is based.

M. WAIVER OF EXTRADITION. Waiver by the fugitive of the issuance and service of a Governor's rendition warrant, and consent to be transported to the demanding state.

III. GENERAL.

A. RENDITION. This Policy deals specifically with the rendition procedures required to surrender a fugitive to another state. This portion of the process requires coordination between Divisions. The extradition of a fugitive from another state is the responsibility of the Investigation Division, Civil Unit.

B. ON VIEW ARREST. A fugitive from another state may be arrested without a California warrant, upon reasonable information that the accused stands convicted or charged in the courts of any other state with a crime punishable by death or imprisonment for a term exceeding one year under Penal Code Section 1551.1. Reasonable information forms the basis for a probable cause arrest and means:

1. In most cases, receipt of a telephone call, teletype or telegram from the demanding agency is sufficient. The information received must verify that the demanding agency has a complaint or indictment stating that the crime is punishable by more than one year or by death.

2. Other acceptable documentation is a certified copy of the complaint, indictment or warrant stating that the crime is punishable by more than one year or by death.

IV. PROCEDURE 1.

A. ARREST PROCEDURES.

1. Based on the above probable cause a fugitive may be arrested under Penal Code Section 1551.1 and may be booked into the County Detention Facility.

2. The arresting Deputy shall make every effort to ensure that the person named in the warrant and the person arrested is one and the same. Identification can be accomplished in a number of ways, such as:

   a. Admission by arrestee;
   b. Witness Statements;
   c. Driver's License;
   d. Birth certificate;
   e. Social Security card, and/or
f. Bail slips.

3. Verification must be made by telephone or teletype to the responsible agency in the demanding state with a demand that a teletype warrant be forwarded immediately.
   a. This verification shall be the responsibility of the arresting Deputy and may be accomplished by the Records Unit or the Communication Center.

V. PROCEDURE 2.
A. INTERROGATION OF SUBJECT. The arresting Deputy should attempt to complete the interrogation of the subject. Further follow-up investigation will be handled by the Civil Unit staff.
   1. The interrogation must be preceded by a Miranda warning and waiver of rights.
   2. Establishing that the arrestee is the person named on the warrant from the other state is the major necessary element of the rendition/extradition process.
   3. The Civil Unit will conduct a follow-up investigation to determine if the subject will sign a Waiver of Extradition Form.
   4. In the event that the interrogation cannot be completed by the arresting Deputy, the designated Civil Unit staff will complete this process prior to the arraignment/initial appearance hearing.

VI. PROCEDURE 3.
A. PREPARATION OF ARREST REPORTS.
   1. An arrest report must be completed indicating the probable cause leading to the arrest. The report should include:
      a. All information pertaining to the arrest, identification and extradition of the fugitive;
      b. All information regarding the out-of-state warrant and the term of sentence, indicating a term of more than one year or death; and
      c. If the arrestee intends to waive extradition.
   2. The report and supporting documents shall be turned in, and approved by, the conclusion of the arresting Deputy's shift.

VII. PROCEDURE 4.
A. BOOKING AND DETENTION.
   1. A Penal Code Section 1551.1 arrest on an out-of-state warrant is based on probable cause and is booked as an on-view arrest. The arrest type is an "Out of State Warrant," but it is handled as an "on view." A Booking Authority Form is required. All Penal Code Section 1551.1 arrests are no bail. Disregard any bail listed on the out-of-state warrant. Note: A Magistrate may only set bail prior to the service of a Governor's Warrant.
2. In order for Fugitive Detail to process fugitive complaints in a timely manner for both the Office of the Sheriff and the County agencies that contract with the Sheriff’s Office for these services, Civil Unit staff will monitor the “Civil 1551” report provided by Tech Report Services.

3. All Office of the Sheriff arrests for Penal Code Section 1551.1 will be scheduled for the Mt. Diablo Arraignment Calendar Department. Arrests for Penal Code Section 1551.1 by other agencies will be scheduled for a court in the arresting agency’s jurisdiction.

4. The subject must be taken to court for the arraignment/initial appearance within the two court day time constraints of the Penal Code Section 825 time limit. A Probable Cause Declaration Form is necessary for a Penal Code Section 1551.1 arrest.

VIII. PROCEDURE 5.

A. ARRAINMENT/INITIAL APPEARANCE HEARING.

1. The Civil Unit staff will seek a fugitive complaint from the District Attorney's Office under Penal Code Section 1551 for Sheriff's Office, Contract Cities and CHP cases only.
   a. Appropriate documentation is required to obtain a complaint. This may be documents, fingerprints and booking photographs. Faxed certified copies of these items are acceptable.
   b. A statement from the demanding state that they intend to extradite is necessary.

2. Once the complaint is issued by the District Attorney’s Office, it will be filed along with five copies of the Waiver of Extradition Form in the Mt. Diablo Arraignment Calendar Department.

3. The arrestee must be taken before a Magistrate for the formal admonishment.
   a. If the subject agrees to waive extradition, the waivers shall be signed before the Magistrate. The waiver negates all other formality, including the filing of a complaint. Waivers are prepared by the Civil Unit and distributed to the court, arresting agency, Governor's Office, and Office of the Sheriff for booking file; and two are kept by the court.
   b. If the subject refuses to waive extradition he/she can be ordered held in custody or released on bail pending extradition. The first remand may be for 30 days. A second remand may be issued for 60 days if needed.
      • If the accused denies that he/she is the same person charged with or convicted of a crime in the other state, a hearing is held within 10 days to determine if there is probable cause to believe he/she is the person charged or convicted.

4. The Supervising Clerk or designee at the Sheriff’s Detention Facility will notify the Civil Unit of any disposition changes, e.g. bail set, awaiting Identity Hearing, local charges, etc.
B. IDENTITY HEARING.

1. The Civil Unit may request additional documentation to prove the subject's identity. Upon verification of identity, the subject will be remanded to custody or allowed to bail.

2. If the subject is remanded to custody after the Identity Hearing, the first remand is for 30 days. A second remand may be issued for an additional 60 days. This allows 90 days to obtain a Governor's Warrant.

IX. PROCEDURE 6.

A. GOVERNOR'S WARRANT.

1. The Civil Unit staff will request a Governor's Warrant from the demanding state agency. The 90-day time restrictions are stayed pending the resolution of local charges or holds within our State.
   
a. If there are no holds outside our County, we will immediately request the Governor's Warrant.

b. If there are holds for another California agency outside our County, no Governor's Warrant will be requested. All information concerning the out-of-state-warrant will be forwarded with the subject to the agency with the hold.

2. The Supervising Clerk or designee at the Sheriff’s Detention Facility will notify the Civil Unit of any change in disposition of the prisoner (i.e., bailed, awaiting issuance of a Governor's Warrant, other local charges, etc.)

3. Once obtained, the Governor's Warrant must be served on the subject.
   
a. If the subject is in or out of custody, this service will be completed by the Civil Unit.

b. If the subject is free on bail, the Civil Unit will arrange for the subject's arrest.

c. The subject must be arraigned on the Governor's Warrant within two court days. The subject will be given a reasonable time, (10 days) to file a Writ of Habeas Corpus. After the ten days, if a Writ of Habeas Corpus is not filed, the demanding state will be allowed to extradite the fugitive.

d. Bail or any other conditional release is expressly precluded following service of the Governor's Warrant unless any of the four issues are raised to challenge extradition (Writ of Habeas Corpus). Michigan v. Doran 438 US 282,289.

X. PROCEDURE 7.

A. RELEASE. All Fugitives, regardless of arresting agency, will need approval from the Investigation Division, Civil Unit prior to release.

1. Detention Division staff will notify the Civil Unit of the anticipated release.
2. The Civil Unit will ensure a release is permissible. Once that is determined, the authorization will be in written form (i.e. FAX, teletype or memorandum) to the Detention Division staff.

3. The Civil Unit will make notification to the demanding state when the fugitive is available to be released to their custody. A reasonable time, usually 10 days, is given to the demanding state to make arrangements for the extradition.

XI. PROCEDURE 8.

A. OBTAINING A LOCAL FUGITIVE WARRANT FOR A PERSON WANTED IN ANOTHER STATE WITHOUT PRIOR ARREST.

1. Occasionally there may not be sufficient probable cause to justify an arrest. In these cases, the involved Deputy should choose not to make an on-view probable cause arrest. The information concerning the case should be documented and routed to the Civil Unit. The demanding state will be requested to mail certified copies of the warrant and complaint and necessary identification documents. A local fugitive complaint can then be sought from the District Attorney's Office. The magistrate shall then issue a local fugitive warrant directing the arrest of the subject.

2. A subject arrested on a local fugitive warrant is processed like other local warrant arrests. The subject must be scheduled for court the next court day and will be given the opportunity to sign a waiver of extradition.

3. From this point on, the procedures are the same as those outlined above.

XII. PROCEDURE 9.

A. EXTRADITION. The process of extradition of fugitives from other states is the responsibility of the Investigation Division, Civil Unit.
I. POLICY.

A. The Office of the Sheriff values the diversity of the community it serves.

B. The Office of the Sheriff will investigate all bias-motivated incidents on a priority basis.

C. The Office of the Sheriff will respond and react to all bias-motivated incidents in a supportive, sensitive and empathetic manner to the victims, family and the community that may have witnessed or suffered from such incidents.

II. DEFINITIONS.

A. BIAS. A preconceived negative opinion or attitude toward a group of persons based on their race, religion, national origin, sexual orientation, gender, gender identity, gender expression, or mental or physical disability. For purposes of hate crimes policy, “bias” is interpreted as “hate”.

B. BIAS-MOTIVATED INCIDENT. An incident motivated by bias or prejudice may be criminal or non-criminal depending upon circumstances, context, and accompanying acts. Bias-motivated incidents, which are prohibited by law, are known as “Hate Crimes”.

C. HATE-BASED CRIMES. Hate-based crimes are not distinct crimes, but are rather traditional offenses motivated by the offender’s bias. California Penal Code section 422.55 defines a hate crime as a “criminal act committed, in whole or in part, because of one or more of the following actual or perceived characteristics of the victim: (1) disability, (2) gender, (3) nationality, (4) race or ethnicity, (5) religion, (6) sexual orientation, (7) association with a person or group with one or more of these actual or perceived characteristics.

D. NON-CRIMINAL BIAS. Bias-motivated incidents also include non-criminal conduct that is motivated by prejudice, hatred or bigotry and is directed against any individual or group of people, residence, or house of worship, institution or business expressly because of the victim’s (person’s or institution’s) real or perceived race, nationality, religion, sexual orientation, gender, or mental or physical disability. Non-criminal bias-motivated incidents include, but are not limited to: epithets (verbal name calling), which while offensive, do not
constitute criminal conduct unless accompanied by a verbal threat of violence and the ability to carry out the threat; distribution of bias-motivated material in public places; posting of bias-motivated material that does not result in property damage; and the display of offensive, biased materials on one’s own property.

E. CALIFORNIA’S CIVIL RIGHTS LAWS. The State of California has two civil rights statutes protecting individuals against hate crimes. It is against the law in California to threaten or commit acts of violence against persons or their property based on the biases listed above.

1. The Ralph Civil Rights Act. (California Civil Code Section 51.7) This Act assures the right to be free from any violence, or intimidation by threat of violence, committed against persons or property because of (or because of the perception of) their race, color, religion, ancestry, national origin, political affiliation, sex, sexual orientation, age, disability, or position in a labor dispute.

2. The Bane Civil Rights Act. (California Civil Code Section 52.1). This act forbids interference (or attempts to interfere) by threats, intimidation, or coercion with Constitutional rights or Federal or State laws. In the event of such illegal interference, California’s Attorney General, or the County’s District Attorney, may bring a civil action for an injunction, and may also seek a civil penalty of twenty-five thousand dollars ($25,000).

III. PROCEDURE

A. REPORTING DEPUTY.

1. Deputies will notify their Station House Shift Supervisor when a potentially bias-motivated incident has been identified.

2. Deputies responding to potentially bias-motivated incidents shall take all necessary steps to relieve fears and concerns of the victim(s). Reasonable attempts must be made to:

   a. Approach victims in an empathetic and supportive manner.
   
   b. Calm and reassure the victim to reduce potential feelings of alienation.
   
   c. Reassure the victim(s) that the Office of the Sheriff is dedicated to finding and prosecuting any and all persons responsible for hate crimes.

3. Deputies will complete a thorough investigation and report regarding the incident prior to the completion of their assigned shift.

B. SHIFT SUPERVISOR.

1. When becoming aware of a potentially bias-motivated incident, the Shift Supervisor for the respective Station House will assist the responding officer in determining the nature of the crime and its proper classification.

2. If the incident meets the criteria of a bias-motivated incident, the Shift Supervisor will ensure that the following has occurred:
a. The appropriate Station House Manager or Watch Commander has been advised.
b. All evidence has been properly collected.
c. The report detailing the incident has been completed, reviewed and routed prior to the completion of the Deputy’s assigned shift.
d. An Unusual Incident Report is completed as soon as possible.

C. DAYSHIFT STATION HOUSE SUPERVISOR.

1. Upon being notified that a bias-motivated incident has occurred, the designated Dayshift Station House Supervisor will:
   a. Ensure the Investigations Lieutenant is aware of the incident and has received a copy of the report.
   b. Request the Crime Analysis Unit conduct an analysis of crimes or events within the designated area to determine if similar bias-motivated incidents may have occurred within the past year.
   c. Serve as the Station House Liaison to assure a consistent point of contact between the Office of the Sheriff and the community over the course of the investigation. These duties may include, but are not limited to the following:
      • Conducting neighborhood canvasses to inform the residents of the incident, control rumors and gather appropriate information regarding the general climate of the community.
      • Providing calm and reassurance to the community to prevent further bias-motivated incidents.
      • Enlisting the aid of religious, community, business or educational groups to help reduce the fear in the involved neighborhood and possibly assist in identification of the responsible parties.
   d. Provide lineup briefing information regarding bias-motivated incidents.

2. The Dayshift Station House Supervisor will ensure the Station House Manager is kept apprised of the incident details and developments in a timely manner.

D. INVESTIGATION DIVISION

1. The Investigation Division will conduct a follow-up investigation of felony crimes involving a bias-motivated incident.

2. The appropriate Investigation Team Leader will:
   a. Ensure proper assignment and investigation of all bias-motivated incidents in a timely manner.
   b. Act as the liaison with the appropriate Station House Commander.
c. Ensure that the Homeland Security Unit has been advised of any bias-motivated incidents that may require increased situational awareness.

d. In cases involving juveniles, the Investigation Division will ensure that juveniles cited by the Patrol Division, as well as juveniles involved in aggravated cases and cases in which the offense will probably continue, are referred to the Probation Department for the filing of a petition.

e. The Investigation Team Leader will ensure that the Investigation Division Lieutenant is kept apprised of efforts and progress being made related to the investigation, up to and through its completion and final classification.

E. CRIME ANALYSIS UNIT

1. Upon becoming aware of a potentially bias-motivated incident, the Crime Analysis Unit will conduct a thorough analysis of the incident, to include but not limited to the following:
   a. A link analysis or similar charting
   b. Mug shots of responsible(s)
   c. Rap Sheets
   d. Gang/Group involvement
   e. Crime Reports
   f. Pin map of incidents

2. The Crime Analysis Unit will conduct a review of reports and incidents up to one year prior to the reported incident(s) to identify any similar events that may not have been previously classified as a bias-motivated incident, identify other trends, and establish leads to assist in the investigation.

3. The Crime Analysis Unit will provide their report and findings to the Station House Manager, the Investigation Division Lieutenant and their designee(s).

4. The Crime Analysis Unit will ensure that the Records Division is aware of all incidents that have been closed and identified as bias-motivated incidents.

5. The Crime Analysis Unit will provide the FOB Assistant Sheriff, Undersheriff and Sheriff with an annual report of all bias-motivated incidents upon request.

F. CRIME SCENE

1. Any scene involving cross burning or other bias-motivated destruction or defacement of property shall be handled with evidence collection as a priority.

2. The responding Deputy shall ensure that the following steps are taken:
   a. Obtain a sample of the cross, paint, or other material used;
b. Properly collect and package all evidence;

c. Photograph and process the scene;

3. Extensive crime scenes should be referred to the Crime Scene Investigators or the Criminalistics Laboratory for processing.
### I. POLICY.

A. The official response to incidents of domestic violence shall stress the enforcement of the law to protect the victim and shall communicate the attitude that violent behavior in the home is criminal behavior and will not be tolerated. Arrests of domestic violence offenders are encouraged if there is probable cause that an offense has been committed. Arrests are required, absent exigent circumstances, if there is probable cause that a domestic violence protective order has been violated (Refer to Patrol Policy 3.01.28 (“Domestic Violence, Gun Violence, Harassment and Restraining Orders”)). A “request for assistance in a situation involving domestic violence is the same as any other request for assistance where violence has occurred” (PC §13701(a) & (b)).

### II. DEFINITIONS.

A. **ABUSE.** Penal Code Section 13700(a). Intentionally or recklessly causing or attempting to cause bodily injury, or placing another person in reasonable apprehension of imminent serious bodily injury to himself or herself, or another.

B. **COHABITANT.** Penal Code Section 13700(b). Two unrelated adult persons living together for a substantial period of time, resulting in some permanency of relationship. Factors that may determine whether persons are cohabiting include, but are not limited to:

   1. Sexual relations between parties while sharing the same living quarters;
   2. Sharing of income or expenses;
   3. Joint use of ownership of property;
   4. Whether the parties hold themselves out as husband and wife;
   5. The continuity of the relationship; and
   6. The length of the relationship.

C. **DOMESTIC VIOLENCE.** Penal Code Section 13700(b). Abuse committed against an adult or a fully emancipated minor who is a spouse, former spouse,
cohabitant, former cohabitant, or person with whom the suspect has had a child or is having or has had a dating or engagement relationship.

D. DOMESTIC VIOLENCE REPORT. Supplemental 13700 P.C. Form. Accompanies the domestic violence police report.

III. GENERAL.

A. Contra Costa County has adopted a “Zero Tolerance Against Domestic Violence” initiative. The Office of the Sheriff supports “Zero Tolerance” through its efforts to reduce repeat offenses and identify aggressors. Penal Code Section 13730(a) states: “All domestic violence-related calls for assistance shall be supported with a written incident report.” This Section also mandates specific information to be documented within the report. The specific information required within the report can be addressed by utilizing the Domestic Violence Report - Supplemental Report Form, which categorizes all statistical data necessary pursuant to this Section. With this in mind, the supplemental report form is not intended to replace a well-written narrative of the incident.

1. Monthly, the total number of domestic violence calls received and the numbers of those cases involving weapons or strangulation or suffocation shall be compiled by the Records Unit and submitted to the Attorney General.

B. It is not only the letter of the law but also the spirit of the law that directs Office of the Sheriff responses. Most serious violent incidents of domestic violence are not solitary in nature. These incidents are most often preceded by a series of numerous other less serious non-violence acts that eventually lead up to a violent incident. Diligence and quality work protects the community the Office of the Sheriff serves.

IV. PROCEDURE 1.

A. DIVISION COMMANDER. In accordance with state law and this Policy, those Divisions handling a domestic violence case or portions of a domestic violence case shall establish procedures to ensure that this Policy is carried out. Specifically, the Patrol Division Captain shall maintain procedures that ensure the intent of this Policy is enforced during our initial contact in such cases. Refer to the Office of the Sheriff Patrol Division Manual, Policy 3.01.28 (“Domestic Violence, Gun Violence, Harrassment, and Restraining Orders”).
Contra Costa County
Office of the Sheriff

General Policy and Procedure

I. POLICY.
A. Special Investigations for vice, narcotics and organized crime will be actively conducted to effectively meet the law enforcement objectives of the Office of the Sheriff.

II. GENERAL.
A. SPECIAL UNITS. The Office of the Sheriff maintains and funds specialized enforcement Units for vice and narcotics violations. These Units conduct special investigations and develop cases for arrest and prosecution. The Divisions in which these Units operate shall maintain procedures for their effective and efficient operations.

B. OFFICE OF THE SHERIFF RESPONSE.
1. Deputies shall make arrests in all instances wherein the Deputy has sufficient legal evidence of a violation of any law or ordinance pertaining to vice or narcotics.

2. Deputies having information of vice, narcotics or organized crime activities occurring behind closed doors are generally in no position to secure the type of evidence necessary for a conviction. In such cases, Deputies shall do the following:
   a. Gather as much information and/or evidence as possible without making themselves obvious to the suspects and make a full report to their immediate Supervisor; and
   b. In cases requiring immediate attention, such as when timely information is received from a complainant, witness or informant, the Deputy's Supervisor should be contacted immediately, with a written report to follow. If the Supervisor is unavailable, the Deputy should contact the Watch Commander.
III.  PROCEDURE 1.

A.  SUPERVISOR/STATION HOUSE COMMANDER/WATCH COMMANDER.

1.  The Supervisor/Station House Commander/Watch Commander will take immediate action if the circumstances are such that any time delay would clearly jeopardize a warranted arrest. Otherwise, he/she will notify the Supervisor of the special Unit(s) involved and provide available assistance to that Unit(s).
I. POLICY.

A. The Office of the Sheriff bears the responsibility to the public and its employees to increase awareness about risks, methods of transmission, and procedures for handling communicable diseases.

II. DEFINITIONS.

A. A.I.D.S. Acquired Immune Deficiency Syndrome, caused by H.I.V., is a disease that results in the body’s inability to fight infections which results in illness and death.

B. A.R.C. A.I.D.S. related complex is a condition caused by the A.I.D.S. virus and has a specific set of symptoms.

C. BODY FLUIDS. Blood, semen, drainage, pus, saliva, sputum, mucus, vomit, urine, feces, vaginal secretions, cerebrospinal fluid, synovial fluid, pleural fluid and amniotic fluid.

D. CHICKEN POX. A highly infectious disease caused by the varicella-zoster virus that spreads from person to person by direct contact or through the air from an infected person’s coughing or sneezing. The disease results in blister-like rash, itching, tiredness and fever.

E. CHIEF MEDICAL OFFICER. As used in this Policy, the County Health Officer via Communicable Disease Control/AIDS program, 597 Center Avenue, Suite 200, Martinez.

F. COMMUNICABLE DISEASE. An infectious disease capable of being passed to another by contact with an infected person or their body fluids.

G. C.P.R. Cardiopulmonary Resuscitation is a life-saving technique whereby the rescuer temporarily maintains the function of an individual's respiratory and circulatory systems.

H. EXCRETA. Waste matter eliminated or separated from an organism.
I. H.B.V. Hepatitis B virus causes an infectious disease of the liver; transmitted by body fluids.

J. H.C.V. Hepatitis C virus causes an infectious disease of the liver; transmitted by body fluids.

K. HERPES. Inflammatory viral diseases of the skin and nerve endings characterized by clusters of blisters; transmitted by direct contact with blisters.

L. H.I.V. Human Immunodeficiency Virus is the virus that causes A.I.D.S.

M. MENINGITIS. A disease in which inflammation of the meninges (membranes that envelope the brain and spinal cord) occurs; caused by several kinds of virus or bacteria and may be transmitted by respiratory contact such as mouth to mouth resuscitation.

N. SYPHILIS. A contagious venereal disease caused by bacteria transmitted by blood or direct contact with open lesions.

O. TUBERCULOSIS. A bacterial disease that can be transmitted through sputum and is spread by inhaling airborne droplets from infected people.

P. WHOOPING COUGH. The Brodetella Pertussis virus resulting in a cough illness lasting at least two weeks with one of the following: paroxysms of coughing, inspiratory “whoop,” or post-tussive vomiting - and without other apparent cause.

III. GENERAL.

A. This Policy applies to the following communicable diseases: A.I.D.S., A.R.C., H.B.V., H.B.C., H.I.V., Herpes, Syphilis, Meningitis, Tuberculosis, and other communicable diseases not listed.

B. The communicable disease policy shall be followed when on-duty employees contact another individual's body fluids or excreta in the following means:

1. Blood, semen, drainage, pus, saliva, sputum, mucus, vomit, feces, vaginal secretions, cerebrospinal fluid, synovial fluid, pleural fluid, and/or amniotic fluid in an employee’s eyes, mouth, or broken skin;

2. Needle stick from used needle;

3. Unprotected mouth-to-mouth breathing (CPR); or

4. Human bites.

C. TRAINING.

1. Continual essential training on the implementation of this Policy shall be given to all employees.

2. All new employees shall receive training during Division orientation in accordance with the Injury and Illness Prevention Program (I.I.P.P).

3. Divisions will maintain records of employees who have completed communicable disease training in accordance with the I.I.P.P. record keeping standards.
D. TESTING.

1. Legal Authority.
   a. Health and Safety Code Sections 121050, 121055 and 121060: Authorize testing if the District Attorney has filed a valid criminal charge against an individual. Deputies and victims of crimes may petition the court to request authorization for testing of an individual who has been accused of specified crimes (including assault on a police officer, resisting or interfering) for the H.I.V. virus and other communicable diseases.
   b. Penal Code Sections 7500-7540: Allows and authorizes testing of individuals in certain circumstances, whether or not a criminal charge has been filed. These statutes also allow inmates to request testing of other inmates in certain situations. This legislation also permits revoking the bail, probation or parole of individuals who refuse to comply with ordered testing. Prior to forced testing under these statutes:
      • The County Health Officer must make a finding that there is a reasonable belief that a significant risk of exposure occurred. The County Health Officer may interview witnesses and receive testimony from involved parties prior to making a decision; and
      • The County Health Officer may require the person requesting the test to undergo a baseline test prior to forced testing.

2. An appeals process, for anyone disagreeing with the findings of the County Health Officer, allows either the petitioning employee, or the subject from whom testing is sought to petition to a Hearing Panel and to Superior Court for an ultimate finding.

3. Test results are forwarded to each requesting victim and the accused.

4. Confidentiality. Physicians are not subject to civil or criminal liability for performing an H.I.V. test, or for disclosing the H.I.V. status of a source patient to a physician certifying the exposure, the exposed individual, or any attending physician of the exposed individual, if the physician acted in good faith in compliance with the law. The exposed individual MUST keep the H.I.V. test results and any H.I.V. related information about the source patient confidential and may not further disclose the information.

IV. PROCEDURE 1.

A. UNIVERSAL PRECAUTIONARY MEASURES. When Office of the Sheriff employees come in contact with or by another individual’s body secretions or excreta, preventive measures should be taken to avoid possible disease contamination.

1. Employees should always assume that all body secretions are potentially infectious, regardless of the source.
2. The best practice is to wear disposable gloves and protective eye wear to protect and keep the hands and eyes clean.
   a. Replace gloves that are heavily stained or torn during the course of routine tasks.
   b. Upon task completion wash hands thoroughly with soap and water.
   c. Use a 1:10 solution of chlorine bleach and water or at least 70% alcohol to thoroughly disinfect hands, when available.

3. Keep hands away from the eyes, nose, and mouth.
   a. If eyes, nose, and mouth become contaminated rinse thoroughly with water.

4. Always maintain a clearly marked red bio-hazard plastic bag for no other purpose than to collect contaminated items.

5. Constantly be alert for sharp objects, such as hypodermic needles, knives, razors, nails, etc. Use utmost care to prevent cuts and punctures.
   a. Do not use hands to search areas out of view.

6. All clothing articles contaminated with body fluids should be removed and placed in a marked plastic bag for cleaning.
   a. Refer to Appendix 10, Bloodborne Pathogens Exposure Control Plan for proper uniform cleaning procedures.

7. All contaminated equipment, from automobiles to ink pens, and work surfaces should be disinfected.

V. PROCEDURE 2.

A. EMPLOYEE RESPONSIBILITIES.

1. When an exposure occurs, an employee will immediately notify their immediate Supervisor. The employee will not request voluntary testing from the involved subject, but will ensure that their immediate Supervisor makes this request.

2. If the criteria for voluntary testing is not met, the employee in conjunction with the supervisor will complete:
   a. Notification of Possible Communicable Disease Exposure (Form EMS 6);
   b. Petition for Order to Test Accused's Blood Form to request authorization for testing;
   c. Report of Request and Decisions for HIV Testing (Form DHS 8459); and
   d. Sharps Injury Log, if appropriate.

3. All employees are encouraged to contact the County Health Department or personal physician to be serially tested and receive counseling. Follow-up testing is highly recommended.
VI. PROCEDURE 3.

A. SUPERVISOR'S RESPONSIBILITIES.

1. The Supervisor on duty at the time of the incident will request voluntary testing from an arrestee/inmate via written consent, or obtain samples incident to the arrest, if possible. The Supervisor will not have the involved employee request voluntary testing.

2. The Supervisor will ensure the completion and signing of the following and submit all through the chain of command immediately to the Division Commanders:
   a. Supervisor's Report of Occupational Injury or Illness Form (AK30);
   b. Employees Claim for Workers' Compensation Benefits Form (DWC1);
   c. Notification of Possible Communicable Disease Exposure (to be completed by the employee);
   d. Consent for the HIV Antibody Blood Test, if applicable;
   e. Petition for Order to Test Accused's Blood, if applicable (to be completed by the employee);
   f. Authorization for Disclosure of the Results of Blood Test(s) to Detect the Presence of HIV Antibodies; and
   g. Sharps Injury Log, if appropriate.

3. If blood is drawn voluntarily, or incident to the arrest, the Supervisor will ensure delivery of the two labeled blood samples along with the completed forms below to the Public Health Laboratory (Monday through Friday) for testing as soon as possible. The Public Health Lab is located at 2500 Alhambra Blvd., 2nd Floor, Room #209, in the building adjacent to the emergency room. If the Public Health Lab is closed, samples should be placed in the sally port refrigerator at the Martinez Detention Facility or the Field Operations Bureau evidence refrigerator. The Supervisor must ensure the samples are delivered to the Public Health Lab when opened.
   a. Whole blood samples must be placed in red top vacutainer vials (i.e., clean uncontaminated vials with no preservatives. Blood and urine alcohol vacutainer (gray top) or blood typing vacutainers (purple top) cannot be used for H.I.V. testing.

4. Fax copies of the Forms listed below to the Professional Standards Unit.
   a. Consent for the HIV antibody Blood Test;
   b. Notification of Possible Communicable Disease Exposure;
   c. Authorization for Disclosure of the Results of Blood Test(s) to Detect the Presence of H.I.V. Antibodies; and
   d. Petition for Order to Test Accused's Blood.
5. Original forms are to be forwarded to Administrative Services via the Division Commander.

6. Supervisors should encourage employees to contact the County Health Department or their personal physicians for personal testing and counseling.

VII. PROCEDURE 4.
A. DIVISION COMMANDER'S RESPONSIBILITIES.

1. In all cases where voluntary testing has been refused, the Division Commander will:
   a. Ensure that all documents have been completed for processing the victim's request to the court within twenty-four hours of possible exposure; and
   b. Forward all documents (including support documentation, crime report, etc.) to the Professional Standards Unit within twenty-four hours of the exposure.

2. Assign an employee to sit on an Appeal Board, when requested by the County Health Officer.

3. Ensure that all employees receive Division training on the implementation of this Policy.

VIII. PROCEDURE 5.
A. PROFESSIONAL STANDARDS UNIT'S RESPONSIBILITY.

1. Criminal Actions.
   a. Review all forms received from the concerned Division and ensure the documents listed below are completed.
      - Consent for the H.I.V. antibody Blood Test
      - Notification of Possible Communicable Disease Exposure
      - Authorization for Disclosure of the Results of Blood Test(s) to Detect the Presence of H.I.V. Antibodies
      - Petition for Order to Test Accused's Blood
      - Proposition 96 Order to Test Accused Blood
   b. Take all completed documents to the District Attorney's Office accompanied by the investigator seeking a Criminal Complaint.
      - Once the Criminal Complaint has been issued it shall be hand carried to the appropriate court along with the Petition for Order and Order to Test.
      - When the Complaint is filed with the Clerk of the Court, the Professional Standards Unit will request an In Camera Hearing to review the Petition and grant the Order.
c. Certified copies of the Petition and Order will be sent to:
   • The Martinez Detention Facility, "M" Module, if blood is to be drawn;
   • The Public Health Laboratory along with blood samples to allow testing (Do not send samples to the Forensic Services Division); and
   • The Office of the Sheriff files

d. If there will be a delay in issuing a complaint, the Professional Standards Unit will hand carry the Petition for Order, and Order to Test, along with supporting documents to the appropriate court for review by a judge and request the issuance of the Order.

e. Notify Risk Management via AK30.

f. Notify the County Communicable Disease Control Unit via the Notification of Possible Communicable Disease Exposure Form.

g. Refer victim to the County A.I.D.S. program for pre-test counseling.

2. Non-Criminal Actions.

a. Penal Code Section 7500 et seq., addresses the requirements and procedures for communicable disease testing where no criminal charge has been filed, or is anticipated. This would apply where incidental contact occurs, or as is sometimes the case at Detention Facilities, the incident will be handled through inmate disciplinary procedures.

b. The process under this section requires the completion of the forms indicated under Procedure 3, 2 a - g. The Supervisor must also ensure that the Report of Request and Decision for HIV Testing (Form #DHS8459) is completed and forwarded through the chain of command.

c. Review and ensure all appropriate documents received from the concerned Divisions are completed properly.

d. Notify the County Health Officer via Communicable Disease Control/AIDS Program, 597 Center Ave., Martinez to request a formal decision to have a non-consenting individual serially tested for communicable diseases.
   • Deliver appropriate documents to the County Health Officer within forty-eight hours of the exposure.

e. When the County Health Officer issues a decision to order testing (and the appeal process has been completed);
   • The Professional Standards Unit will receive the Report of Request and Decision for H.I.V. Testing signed by the County Health Officer.
• The Professional Standards Unit will ensure that blood is drawn and delivered to the Public Health Laboratory.

• Complete steps listed in Procedure 3, 2 a - g.

f. If the County Health Officer issues a decision to deny testing:

• The Professional Standards Unit will ensure that the Deputy is notified and aware of his/her appeal rights.

• If the employee chooses to appeal a negative decision by the County Health Officer, the Professional Standards Unit will ensure the employee completes the Report of Request for Appeal for HIV Testing (Form DHS 8457) within three days.

• The Professional Standards Unit will notify County Health Officer immediately of an appeal, when requested.

• If the Appeal Board also issues a negative finding, the Professional Standards Unit will, at the request of the involved employee, carry the appeal to Superior Court for review by a judge.

• If testing does not occur, complete steps listed in Procedure 3, 2 a - g.

• If at any time during the process listed in this Section, the Office of the Sheriff determines to proceed with a criminal complaint and testing as authorized in Health and Safety Code Sections 121050, 121055 and 121060, the Professional Standards Unit will immediately notify the County Health Officer to suspend his investigation. The Professional Standards Unit will follow the procedures outlined under Procedure 5, Criminal Actions.

IX. PROCEDURE 6.

A. INMATES REQUESTING TESTING.

1. Inmates requesting testing of another inmate should be immediately referred to the medical staff of the Detention Facility.

   a. Deputies should not question or comment on the inmate’s request.
I. POLICY.

A. Office of the Sheriff Sworn personnel shall be trained to administer Naloxone in accordance with the training guidelines established by Contra Costa County Health Services and State Law. Trained personnel will use Naloxone to prevent opioid-related deaths amongst members of the public and staff members who have been exposed.

B. There is no legal requirement to administer Naloxone.

II. DEFINITIONS

A. Naloxone (Narcan): an opioid receptor antagonist and antidote for opioid overdose produced in intramuscular, intranasal and intravenous forms. Narcan is the brand name for Naloxone.

B. Opiates: Naturally derived from the poppy plant, such as heroin and opium.

C. Opioids: Synthetic opiate drugs such as fentanyl, morphine, buprenorphine, codeine, hydromorphone, hydrocodone, oxymorphone, methadone and oxycodone.

D. Opioid Overdose: An acute condition including but not limited to extreme physical illness, decreased level of consciousness, respiratory depression coma, or death resulting from the consumption or use of an opioid, or another substance with which an opioid was combined, or that a layperson would reasonably believe to be an opioid-related drug overdose that requires medical assistance.

E. Naloxone Quality Improvement Program Usage Report: Mandatory reporting form which is to be completed by law enforcement personnel who have administered Naloxone to a subject. A data collection protocol established by Contra Costa Health Services used to evaluate the impact of the Naloxone Program.

F. Universal Precautions: Universal precautions refers to the practice, in medicine, of assuming that all body secretions are potentially infectious, regardless of the source and avoiding contact with subjects' bodily fluids, by means of the wearing of nonporous articles such as medical gloves, goggles, and face shields.
III. PROCEDURE

A. Program Coordination/Maintenance

1. Training

   a. Naloxone training will be coordinated through the Sheriff's Law Enforcement Training Center (LETC) in compliance with state law and following the guidelines of County Health Services.

   b. Naloxone training will only be performed by trained/authorized instructors.

   c. Training rosters will be completed and maintained for all Naloxone Training Courses. Completed rosters will be forwarded to the LETC for storage.

   d. Training will include the assembly of a Nasal Naloxone Device and the simulated delivery of the medication to a patient.

   e. All trainees will complete and pass a written test that shows their knowledge of the course materials. Completed tests will be forwarded to the LETC for storage.

   f. Initial training will consist of a thirty-minute, instructor-led course. Re-training will be conducted in accordance with standards established by P.O.S.T.

2. Equipment

   a. **Field Overdose Kit.** A Field Overdose Kit will consist of a Pelican-style case, two (2ml) doses of Naloxone HCL, two nasal atomizers, one set of protective gloves, one N95 respirator, one CPR face shield, and a County Health Services Naloxone Report Form.

   b. **Station Facility Emergency Overdose Kit.** A Facility Overdose Kit will consist of a wall-mounted container, two (2ml) doses of Naloxone HCL, two nasal atomizers, one set of protective gloves, one N95 respirator, one CPR face shield, and a County Health Services Naloxone Report Form.

   c. Kits will be marked on their exterior with the expiration date of the Naloxone contained within. Naloxone has a two-year shelf life. Shift supervisors will ensure that all doses are within their effective shelf life.

   d. Naloxone is a prescription medication and will be safeguarded from loss or theft. An inspection of the naloxone kit shall be the responsibility of the personnel assigned the equipment and will be done at each shift. Missing or damaged naloxone kits will be reported to the shift supervisor.

   e. Replacement atomizers and other supplies will be coordinated through the FOB Patrol Division Administrative Lieutenant by the shift supervisors.
3. **Storage**
   
a. Field Overdose Kits will be deployed with Patrol Division deputies in the beat bags. Sworn personnel should take a Field Overdose Kit when conducting operations outside Sheriff’s Office buildings.

b. Field Overdose Kits will be kept out of direct sunlight and away from extreme heat or cold.

B. **Deployment**

1. Deputies will utilize Universal Precautions whenever providing first aid to a subject.

2. Upon arrival at an emergency situation, deputies will perform an initial assessment of the subject’s airway, breathing, and circulation. If necessary, Emergency Medical Services (EMS) should be requested to respond.

3. If the subject is not breathing but has a pulse, the deputy should begin rescue breathing. If the deputy believes the subject is suffering from an opioid-related overdose, the deputy should administer Naloxone after providing several rescue breaths to the subject.

4. After administering Naloxone, the deputy should continue rescue breathing until the subject begins to breathe on their own. If the subject fails to breathe on their own after three minutes, the deputy should consider administering a second dose of Naloxone.

   **Note:** The administration of Naloxone may lead to a violent/combative reaction of the subject. Deputies should be prepared for this to occur. If Naloxone is administered by a deputy, the subject will be assessed by fire, ambulance, and/or medical personnel.

5. Expended Naloxone containers will be disposed of in a sharps box or other hazardous materials container.

6. The Naloxone Kit that was used will be taken out of service until it is re-stocked with necessary supplies.

7. Only Naxolone issued by the Office of the Sheriff or the Contract City of assignment will be administered to subjects.

C. **Deputy Reporting**

1. When Naloxone has been administered to a subject, the deputy will notify arriving medical personnel. The deputy will identify the number of doses provided and the amount provided as a part of each dose.

2. A medical/hospitalization police report will be prepared on the incident, detailing the actions of the deputy and the subject.

3. The deputy will complete the Naloxone Quality Improvement Program Usage Report and affix a copy of the report to the police report.
D. Supervisor Duties

1. When Naloxone has been administered, the shift supervisor will transmit the Naloxone Quality Improvement Program Usage Report to County Health Services following the instructions on the report form.

2. A copy of the report will be routed to the FOB Patrol Division Administrative Lieutenant.
I. POLICY.

A. The Sheriff has established requirements for the production and submission of digital photographs of crime scenes and traffic accidents that apply to all Divisions except the Forensic Services Division.

II. DEFINITIONS.

A. CD (Compact Disc). A small optical disk on which data such as music, text or graphic images is digitally encoded.

C. DIMS. DISC IMAGE. A web query data base for the storage of agency crime reports.

D. J-PEG. (Joint Photographic Expert Group) A Common format used mostly for color images. Not recommended for simple graphics, letters or line drawings because of lack of sharpness and clarity.

E. PIXEL. Short for a single point in a graphic image. Pixels are so close together that they appear connected. A computer monitor displays images by dividing the screen into thousands or millions of pixels.

F. TIFF. (Tag Image File Format) A widely used format for storing image data, compatible with a wide range of scanners and image processing applications.

III. GENERAL.

A. DIGITAL EQUIPMENT REQUIREMENTS. A digital camera must have the following elements in order to be authorized for use by Sheriff’s Office employees:

1. The camera used must produce images with a resolution of at least 800x600 pixels with color information of at least 15 and no more than 24 megapixels.
2. Cameras must create files in either the J-PEG or TIFF format; and

3. Cameras will not be programmed to record the date or other information in the image. This is to avoid time/day stamp errors.

IV. PROCEDURE 1.

A. EMPLOYEE RESPONSIBILITIES AND SUBMISSION OF PHOTOS.

1. Employees shall refrain from the use of personal cell phones for the purpose of taking digital photographs as evidence, as the phone’s contents could be subpoenaed for court purposes even if the photograph has been deleted off of the phone.

   a. Only in cases of extreme exigency should personal cell phones be considered, and it must be thoroughly documented in your report.

2. Digital Images associated with the Sheriff’s Office crime reports will be handled in the following manner:

   a. Department issued digital cameras shall be used to take photographs for evidentiary purposes.

   b. The Deputy taking digital photographs will upload photos directly into our report writing system. Users must ensure that they only attach the appropriate photo to the appropriate report in our report writing system.

   c. The Deputy will label all photos attached to their report in our report writing system.

   d. Once the photos have been uploaded from the camera into our report writing system, the user must then delete all photos.

3. No digital photos may be attached to any report unless they have a law enforcement and/or business application.

4. Photos or videos displaying the following are not to be downloaded and attached to the report writing system:

   a. Genitalia of a person (any age)

   b. Female breasts (any age)

   c. Children who are part of child pornography investigations

5. Photos and videos listed in #4 above will be copied onto a CD or digital storage device, placed into evidence, and thoroughly documented in the body of the report.

6. Evidentiary photographs taken during the course of an employee’s on duty time are considered property of the Office of the Sheriff, regardless if the photograph was taken with a personal or county device.

7. If an employee is assigned a work smart phone as a requirement of their position, it may be utilized to take evidence photographs.
a. Photos should be downloaded into our report writing system and deleted as soon as practical to do so. This should also be thoroughly documented in their report.

b. Employees should be cautioned that work cell phones are issued for the sole purpose of work related business. The contents of work phones also have the potential to be subpoenaed, even if the photograph has been deleted from the phone.

V. PROCEDURE 2.

A. SUBMISSION OF NON SOLID-STATE MEMORY MEDIA.

1. When necessary, digital images may be submitted on a CD or digital storage device if the Records Unit Manager has ascertained that they can be properly processed. The Records Unit Manager must approve any other electronic media ahead of time.

2. The Digital Photo Submission Envelope must be completely filled out with a CD or digital storage device.

3. The non-solid-state media must be clearly marked with the D.R. number, date, and the submitter’s employee number.

4. CDs or digital storage device shall not contain digital images from more than one case.

5. Other electronic media may contain digital images from multiple cases as long as each case has a directory folder with the case D.R. number as the directory name. A separate Declaration Form and supplemental report must be submitted for each case.

6. The records Unit will retain the CDs or digital storage device until the images are imported in the Image Management System. Then the digital storage device or CDs will be destroyed.

VI. PROCEDURE 3.

A. SUPERVISORY RESPONSIBILITIES

1. Supervisors should monitor deputies to ensure they are not using their personal cell phones for the purpose of taking digital photographs for evidence.

   a. Supervisors should ensure the digital cameras provided to their work locations are in good working order. If a Supervisor locates a camera that is either broken or not working properly, they should issue a memo to their Manager to have the equipment replaced.
I. POLICY.

A. Property collected, packaged and stored when no longer necessary shall be returned to the rightful owner or appropriately disposed of. It is mandatory that the property be returned, released or disposed of when the legal necessity for its retention no longer exists, the statute of limitation expires, or the property is not necessary for prosecution.

II. DEFINITIONS.

A. CERTIFICATE OF RETENTION. A form requesting firearms transfer from Property Services to the Office of the Sheriff firearms inventory.
B. 8715 DISPOSITION REPORT. Refers to Law Enforcement Prosecution/Court Information Form, JU 8715.
C. PROPERTY ACTION REPORT (RGEX). A computer-generated report that indicates the final disposition of property as entered by the Investigation Division.
D. PROPERTY DISPOSITION REQUEST (P.D.R.). An Office of the Sheriff form that Detectives utilize to notify Property Services of the final disposition of property.
E. RECEIPT FOR THE SAFEKEEPING OF PROPERTY. A three-part form indicating who the owner of the property is.

III. GENERAL.

A. RETENTION AND/OR RELEASE OF PROPERTY/EVIDENCE.

1. Property or evidence held by the Office of the Sheriff will be retained for the period of time required by statute or legal necessity. All property or evidence held in cases that have resulted in claims and/or lawsuits against the Office of the Sheriff, any of its police units, or Contra Costa County must be retained for the duration of the legal action. Property submitted as found property, safekeeping, or for destruction will be retained as required by law and released or disposed of by Property Services staff without additional approvals.
2. The release of evidence requiring approval of the Field Operations Bureau, or a court order are:
   a. Homicide cases;
   b. Sexual Assault cases.

B. RELEASE OF DRUG EVIDENCE FROM PROPERTY.

1. Release of drug evidence for any reason from Property Services to Sheriff or contract city personnel shall require two individuals: the person receiving the drug evidence and a witness.
   a. A call to Property Services must be made to schedule a date/time for the drug evidence pick up.
   b. The primary individual seeking release of the drug evidence must inform his or her supervisor of this upcoming transaction.
   c. The reason for the release of the drug evidence must be provided to Property Services:
      • If the release is for court purposes, the subpoena for the individual picking up the drug evidence must be shown to Property Services.
      • If the release is for investigative purposes, such as a reverse buy, a memo articulating the need for the drug evidence must be provided to Property Services. The memo must be from a lieutenant or above.
   d. The primary individual picking up the drug evidence will sign the chain of custody on the evidence package and the Property Card.
   e. The witnessing individual will cosign the Property Card.
   f. Property Services will record the following in the property management system and in the comments field on the evidence bar code:
      • Who signed for the evidence
      • Who witnessed the evidence transaction
      • The reason for the evidence release and the documentation shown justifying the evidence release
   g. The deputy picking up the drug evidence will write a report supplement detailing:
      • What evidence was picked up
      • The date and time the evidence was picked up
      • The reason for the evidence release
      • Who witnessed the transaction
      • To whom and when the deputy released the evidence to, such as the District Attorney’s name, court personnel’s
name and title, or law enforcement agent’s name, agency, and title, or returned to Property.

- If the evidence was released and is not being returned to Property Services, the deputy will call Property Services with that information.

- The subpoena or court order shall be scanned and attached to the supplement in the report writing system.

h. The supervisor may verify with the witness that the transaction occurred as written in the primary’s report supplement prior to approving the report.

2. Release of drug evidence for any reason from Property Services to an external agency will also require two individuals from that agency or task force to be present.

a. Only individuals employed by law enforcement (local, state, or federal) or prosecution agencies (District Attorney’s Office, Attorney General’s Office, Court personnel, etc.) will be permitted to receive drug evidence.

b. Drugs for release to a third party agency must be approved by the original submitting agency.

c. Property Services will photocopy or verify the law enforcement photo ID from each individual and file.

d. Property Services’ documentation of the drug evidence release transaction to an external agency will be the same as for release to Sheriff’s employees.

C. DISPOSITION OF PROPERTY/EVIDENCE.

1. Homicide and sexual assault cases require an authorization for the disposition of property, the Field Operations Bureau shall authorize such releases when:

a. The case is closed with future prosecution not possible for any reason.

b. An 8715 Disposition Report shows the case has been adjudicated - refer to “D. 8715 DISPOSITION REPORTS” below; or

c. The statute of limitations expires - refer to “F. STATUTE OF LIMITATIONS” below.

2. The Investigation Division has the responsibility of obtaining a Court Order Release pursuant to Penal Code Section 1536 when property being released was seized pursuant to a search warrant.

3. Property Services will ensure, prior to any scheduled destruction of property held as evidence, that no claim or lawsuit against the Office of the Sheriff, any of its police units, or the County has been filed. Such evidence in a claim or lawsuit proceeding will continue to be held until Property Services is informed by the Planning and Research Unit, upon advice from the County Counsel, that the case has been closed.
D. 8715 DISPOSITION REPORTS.

1. All 8715 Disposition Reports shall be received by Property Services. Property Services will determine if property is being held and forward those reports with a P.D.R. to the Field Operations Bureau which must authorize release of the property or evidence unless:
   a. There is an appeal of a guilty conviction;
      • Misdemeanor conviction - judgment is final if not appealed within 30 days.
      • Felony conviction - judgment is final if not appealed within 60 days.
   b. The case is a homicide conviction resulting in a death or life sentence;
   c. A co-defendant is awaiting trial; or
   d. A Division Commander approves retention due to extraordinary circumstances.
   e. A claim or lawsuit has been filed involving property or evidence from a criminal case.

2. In guilty pleas, evidence may be released or destroyed, as there is no formal appeal period. Prior to destroying evidence, ensure there is no co-defendant awaiting trial requiring use of the same evidence.

E. RMS/CASE MANAGEMENT PROPERTY DISPOSITION SYSTEM.

1. The Field Operations Bureau will adopt policies requiring Detectives and Misdemeanor Complaint Deputies, including those assigned to Contract Cities, to utilize the RMS/Case Management System to release property. The property action field “PROP-ACT” and the “REMARKS” portion of the “DACT” screen shall be used to provide release or destroy instruction to Property Services. Release instructions shall be given when a case is closed with no prosecution or determined the evidence or property is no longer required. Directions must be clear and include the name and addresses of owners, if applicable.

2. Property Services will, on a regular basis, retrieve a Property Action Report (RGEX) and comply with the property disposition instructions. Property Services will notify property owners, by letter, with dates calendared for disposal if the property is unclaimed. The term “release” includes destruction, auction, recycling or conversion to Sheriff’s Office use, as determined by Property Services.

F. STATUTE OF LIMITATIONS.

1. Property will be held no longer than six months after the statute of limitations has expired unless prosecution or legal necessity requires retention. At the expiration of the statute of limitations, when no criminal charges are pending and no claim or lawsuit against the Office of the Sheriff, any of its police units, or Contra Costa County has been filed. In the case of homicides and sexual assaults, a P.D.R. or e-mail will be sent by Property Services to the investigating or assigned officer indicating
the property should be disposed of. A Division Commander may require that the evidence be retained beyond the statute of limitations.

2. Evidence collected in homicide cases will be retained until disposition is directed by the Court or District Attorney’s Office. However, if all court actions involving suspects are final and the sentence does not result in a life or death sentence, the property has no evidentiary value, or the District Attorney approves of it, the Division may release the property. Evidence accepted as a Court Exhibit is usually retained by the Courts and thereafter may be destroyed only by Order of the Court, which must accompany the evidence upon return to Property Services.

3. Statutes of limitations for property retention is as follows:
   a. One Year: All misdemeanors, P.C. 802;
   b. Two Years: Violation of P.C. 647.6 committed upon a minor under 14 years of age;
   c. Three Years: All felonies not listed below, P.C. 801;
   d. Four Years: Those crimes listed in P.C. 803;
   e. Ten Years: Those crimes labeled in P.C. 800; and
      • Any crime punishable by a prison sentence of 8 years or more
      • Forcible rape, P.C. 261
      • Child molestation, P.C. 288
      • Forcible acts of sexual penetration and all such crimes with a child under 14 years of age, P.C. 289
      • Indefinitely: Any offense punishable by death or life imprisonment or the embezzlement of public money, P.C. 799.

G. STOLEN OR EMBEZZLED PROPERTY. Personnel returning stolen or embezzled property to the lawful owner must comply with Penal Code Section 1413.

H. SAFEKEEPING. Property held for safekeeping shall be stored by Property Services. The submitting officer shall indicate “Safekeeping” on the property card and complete a Receipt for Safekeeping of Property and provide a copy to the owner of the property. The property will be stored for 60 days for the owner to claim or make other arrangements. If neither is done, the property shall be disposed of according to Code of Civil Procedure Section 2080.10.

I. FIREARMS. With the exception of firearms submitted for destruction, all firearms to be released require approval of the Director of Property and Evidence. Any firearm that becomes a nuisance as defined by Penal Code Sections 12028 or 12029, or is unclaimed or abandoned, shall be destroyed. If a firearm is converted to official use, a Certificate of Retention shall be obtained and the firearm placed into the Office of the Sheriff firearms inventory.
I. POLICY.
   A. Employees will cooperate with state and county agricultural agencies to ensure a safe timely eradication of designated pests, while preserving the public peace.

II. GENERAL.
   A. STATE AND COUNTY AGRICULTURAL AGENCIES.
      1. State and county agricultural agencies are responsible for the eradication of designated pests. After the state and county announces that a pest problem exists, the County Agricultural Commissioner is responsible for educating the public (newspapers, radio, mailers, etc.) of the problem and what procedures are needed.
      2. The county's agricultural department personnel will be responsible for the following:
         a. Advise law enforcement agencies when they will be in their jurisdiction. A two day notice is requested;
         b. Eradicate infested areas as fast as possible by obtaining the property owner's permission;
         c. Obtain an inspection warrant prior to any forcible entry when permission to enter is denied by the property owner;
         d. Request animal control officers at scenes where their assistance is needed to restrain animals; and
         e. Call the police as a last resort to keep the peace.
   B. OFFICE OF THE SHERIFF GUIDELINES. When notified of a pest problem and the intended action of County Agricultural Department personnel, the Office of the Sheriff will do the following:
      1. Inform the beat Deputies of the procedure before the eradication begins.
      2. Dispatch Deputies as soon as possible to life-threatening problems.
      3. Take no action when there are locked gates, etc., and no peace-keeping measures are needed.
4. A Deputy will forcibly enter private property only under the following circumstances:
   a. Lawful court order; or
   b. Immediate life-threatening circumstances exist.

5. Court orders will be shown to the owner or person in legal control of the property. Refusal by the owner or any other party to abide by the order will result in enforcement of Penal Code section 148 and/or other applicable codes.

6. Deputies will not be involved in pest eradication at roadblocks unless directed by court order.

7. Provide Sheriff's Dispatch with information on pest eradication procedures and existing circumstances, so proper direction may be given to inquiries from the public.
I. POLICY.
   A. Criminal Intelligence Files are developed to provide the Office of the Sheriff with a sound database that meets the lawful need of suppressing criminal operations and protecting the public.

II. DEFINITIONS.
   A. GANG. A group of criminals often wearing symbolic identifying attire, characterized by violence and illegal activity, who band together for mutual protection, power and unlawful profit.
   
   B. ORGANIZED CRIME. Criminal profiteers who operate in a functional, structured organization that frequently employs violence to obtain its objectives.
   
   C. SCHI. An acronym for Summary Criminal History Information which is the master record of information compiled by a criminal justice agency pertaining to the identification and criminal history of any person, such as a name, date of birth, physical description, date(s) of arrest, arresting agencies and booking numbers, charge(s), dispositions, and similar data about such persons.
   
   D. HOMELAND SECURITY. Any endeavor integral to national security, including the collection and maintenance of criminal information, that is done at the request of the Federal Government’s Department of Homeland Security (DHS).

III. GENERAL.
   A. CATEGORIES OF STORED INFORMATION.
      1. Persons who are currently involved or suspected of being involved in the planning, organizing, financing, or committing of criminal activities; or who are suspected of having threatened, attempted, planned, or performed criminal acts.
2. Persons who have an established association with known or suspected crime figures.

3. Organizations and businesses which are currently involved in or suspected of being involved in the planning, organizing, financing or committing of criminal activities; or which have threatened, attempted, planned or performed criminal acts.

4. Organizations that are operated, controlled, financed, infiltrated or illegally used by crime figures.

5. People or organizations suspected of being a threat to national security. This criminal intelligence will be obtained in response to a request by the Department of Homeland Security.

6. Learning with whom suspects associate will help Deputies locate and keep track of suspects. It is important to note that mere association with a person suspected of criminal activity does not create a criminal link between the parties.

IV. DEVELOPMENT AND MAINTENANCE OF CRIMINAL INTELLIGENCE FILES.

A. The development and maintenance of Criminal Intelligence Files must follow specific guidelines. The development and storage of information linking persons and/or organizations together for the purpose of criminal activity must be carefully controlled and kept secure. Due to the sensitive nature of such data and the potential for violating a person’s civil rights should such data become public, the following guidelines will be strictly followed:

1. Deputies will not retain personal criminal intelligence files beyond such time as they have a valid reason related to the Office of the Sheriff.

2. Deputies developing information linking persons and/or organizations together for the purpose of criminal activity will forward such information to the Emergency Services Division, Homeland Security Unit, Crime Analyst. Examples Are:
   - Organized crime;
   - Gangs;
   - Explosives;
   - Automatic weapons;
   - Civil unrest; and
   - Threats to national security.

3. The Emergency Services Division, Homeland Security Unit, will correlate, verify and distribute the information if it is warranted. All such information, distributed by H.S.U. in the form of Criminal Information Bulletins, shall be handled as confidential and will not be disclosed to the news media or the public except through the Investigation Division.
a. The Support Services Bureau will route copies of reports and pass on information to other persons and agencies on a need-to-know basis.

4. Deputies Records – Nothing in this Policy is meant to restrict or discourage Deputies from developing investigative data or field interview information during the routine course of their duties. In fact, it is the collection and routing of such data from Deputies that makes it possible for the Support Services Bureau to develop useful current Criminal Intelligence Files. It is the collection and storage of data from reports and arrests that make up the SCHI. In a broad sense, the records kept by the Deputies in their field duties are the Sheriff’s raw data for the development of Criminal Intelligence Files and SCHI.

   a. All such data is confidential unless it is specifically listed as “Public information” or “Designated Information for Release to Specified Persons”.

   b. Once information, which may be withheld, is given to any member of the public, it can no longer be withheld from other members of the public on the basis of confidentiality. Therefore, Deputies will adhere to the following:

   - Deputies will safeguard their field information records, i.e. field interviews, suspect photographs, investigative notes, Criminal Information Bulletins, etc., from becoming public.

   - Deputies will not keep field information records in their private vehicles, residences or any other place that the records are not secure.

V. PROCEDURE 1.

A. DIVISION COMMANDER RESPONSIBILITIES.

   1. Each Division Commander will follow Office of the Sheriff Policies with regard to the control and dissemination of law enforcement information. Additional policies developed by Division Commanders regarding dissemination of law enforcement information shall be in compliance with the Office of the Sheriff Policy Section 1.06.71, Dissemination of Law Enforcement Information.

B. EMPLOYEE RESPONSIBILITIES.

   1. All employees shall be aware of the confidential and sensitive nature of the information with which they work. Employees will not disseminate information unless in compliance with Office of the Sheriff Policies and in compliance with current law.
I. POLICY.

A. The Office of the Sheriff, pursuant to the Health and Safety Code, will not arrest any public entity, its agents or employees for criminal prosecution for the distribution of hypodermic needles or syringes during authorized clean needle exchanges. However, officers should use discretion concerning other violations of the law relating to illegal drug use regardless of where the paraphernalia was acquired.

II. DEFINITIONS.

A. DRUG PARAPHERNALIA. Includes, but is not limited to, hypodermic syringes, needles, and any other objects designed for use in the injection of controlled substances into the human body.

B. IMMUNITY. Freedom from arrest as guaranteed by legislation for a public entity and its agents or employees who are in the process of facilitating an officially authorized needle exchange.

C. NEEDLE EXCHANGE. A program initiated and authorized by an officially recognized health or benevolent organization to exchange used or otherwise contaminated syringes or needles for sterile new ones.

III. GENERAL.

A. APPLICATION OF IMMUNITY.

1. Health and Safety Code Section 11364.7(a) guarantees freedom from criminal prosecution for public entities and their agents or employees who distribute needles or syringes during a lawfully authorized clean needle and syringe exchange project.

2. The pre-existing statutory provisions of Business and Professional Code Section 4140 prohibiting unauthorized possession of a hypodermic needle have not been repealed. Any person who has in their possession or under their control a hypodermic needle or syringe or any drug paraphernalia that wasn’t prescribed by a physician in accordance with Pharmacy Law is subject to arrest.
a. Incident to such an arrest or warrant search, property may be subject to seizure without process.

b. The fact that the needle or syringe was obtained at a needle exchange provides no immunity from seizure, arrest, or prosecution.

B. DEPUTIES SHOULD NOT FOCUS ON NEEDLE EXCHANGE PROGRAMS.

1. The needle exchange workers should not be arrested in the performance of their duties. Such an arrest would frustrate legislative intent, as they are immune from criminal prosecution.

2. Deputies should not seize hypodermic syringes from the needle exchange workers for the same reason.
I. POLICY.
   A. Crime reports are the primary instruments used for recording and disseminating crime information. Crime reports shall be completed and routed in an expeditious manner to ensure the necessary information is received by the appropriate people.

II. GENERAL.
   A. CRIME REPORTS. Crime reports shall be written as set forth in the Report Writing Manual, Patrol Division.
      1. The following is a list of circumstances or crimes which require a written crime report:
         a. Felonies;
         b. All vandalism;
         c. All petty thefts;
         d. All misdemeanors where follow-up is required;
         e. All battery reports;
         f. Suspicious circumstances where information may be of value to other Divisions or agencies;
         g. All found or lost property;
         h. Civil matters where property or people change custody while a Deputy is present;
         i. Any crime where a suspect is identified;
         j. Missing persons;
         k. Racial, religious, or ethnic harassment and/or violence;
         l. When directed by a Supervisor;
         m. All deaths to which a Deputy responds or is sent;
         n. All report numbers issued in error shall have a written explanation as to the reason why; and
III. PROCEDURE 1.

A. SUPERVISOR’S RESPONSIBILITY.

1. Report Review. After a crime report is written, it shall be submitted to the reporting Deputy's immediate Supervisor for review.
   a. The Supervisor shall review the report for proper content, correct spelling and necessary elements of the crime. If the report is not satisfactory, it will be returned to the reporting Deputy for necessary changes.
   b. If the crime report is satisfactory, the Supervisor will sign it and route it to the appropriate locations.
   c. Reports written for report numbers drawn in error will be reviewed to determine the reason for the error. Supervisors will ensure that the incident history for the detail is attached to the report.
   d. Reports written by Supervisors shall be approved by another Supervisor or Manager.
   e. Supervisors will ensure reports documenting allegations of child abuse or neglect include the notification to Child and Family Services (Penal Code 11166(a)) whether founded, unfounded, or unknown. The written notification shall occur within 36 hours. The Suspected Child Abuse Report form is available on ARIES under documents.

2. Report Routing. To ensure a complete investigation and the proper dissemination of information, crime reports must be properly routed by Supervisors.
   a. Reports will be routed by writing the number of copies desired in the distribution box at the bottom of Form A. In the case of a supplement report, the routing box at the bottom of Form B, C or D will be used, as applicable.
   b. After review and routing is completed, crime reports are delivered to Technical Services Division, Records Unit for distribution to the locations designated in the “Routing Section”.
   c. Routing Felony Reports:
      - In all felony reports requiring follow-up, two copies shall be routed to the Investigation Division, using the appropriate "Investigation" box in the distribution box.
      - All felony cases involving narcotics, drugs and/or paraphernalia shall be routed to the Narcotics Detail using the "Narcotics" box (2 copies). The Narcotics Detail also requires two copies of all information reports regarding narcotics.
• All reports involving vice and/or gambling will be routed to the Vice Detail using the "Vice" box.

d. Routing Misdemeanor Reports.
• Patrol Division. Reports shall be routed in accordance with Chapter 1, Section 9, of the Patrol Division Manual.
• Detention Division.
• Detention Division Supervisors will review and sign misdemeanor reports. The signed/approved original crime reports will be forwarded to the Technical Services Division, Records Unit for proper distribution.
• Three (3) copies of the crime report will be routed to the Misdemeanor Complaint Officer for the following:
  ➢ All misdemeanor arrest and citation reports;
  ➢ All misdemeanor reports indicating a complaint will be sought through;
  ➢ All misdemeanor reports which identify a suspect.
• The Misdemeanor Complaint Officer will ensure that copies of the report are delivered to the appropriate District Attorney's Office.

e. All reports written for report numbers drawn in error will be routed to the respective Station House Commander or Police Manager.

f. All reports documenting founded or suspected child abuse or neglect will be forwarded to Child and Family Services under additional routing. Reports documenting unfounded allegations may but are not required to be forwarded to CFS.
I. POLICY.
   A. The Ride-Along Program is intended to be an educational program that affords official visitors, visiting police, other government officials, and the public an opportunity to observe the field activities of the Office of the Sheriff. It also provides a good educational forum for our Explorer/Cadet Program and gives greater understanding of the law enforcement profession to candidates who apply for a position within the Office of the Sheriff.

II. DEFINITIONS.
   A. RIDE-ALONG WAIVER. (Form PF-52) - A printed form signed by participants in the Ride-Along Program which releases the Office of the Sheriff from liability for injury to, or death of, the participant while engaged in a ride-along.

III. GENERAL.
   A. This Policy governs all ride-alongs in all Divisions, including water craft, aircraft, and any vehicle.
   1. PROGRAM PARTICIPATION.
      a. All program participation requests are to be processed through the Patrol Division Administration Office. Sheriff’s employees are to follow the same guidelines as the public when requesting to participate in the Patrol Ride-Along Program.
      b. Requests to participate in the program must be received two weeks in advance of the requested ride-along date.
      c. Deputies may participate in the Ride-Along Program ONLY under the following conditions:
         • The ride-along is used as a training day; or
         • The ride-along is done on paid overtime previously approved by the Deputy’s Division Commander. Such approval will only be granted upon the basis of a compelling organizational need; or
• The ride-along is done on “Release Time”, during which the Deputy remains on paid duty, but has been released from his or her usual duties to do the ride-along.

• Deputies riding along pursuant to this section shall be in full uniform with full patrol equipment and vest.

d. Any arrangements for a special ride-along, a ride-along without advance notice or accommodation of official visitors shall be made through the Patrol Division Assistant Sheriff, or by any Bureau Assistant Sheriff.

e. Requests for program participation shall preferably be in letter form and shall contain the full name, address, phone number, date of birth and a short statement as to reason for the request.

f. Written requests shall be addressed as follows:

• Office of the Sheriff
  Attention: Patrol Ride-Along Program
  P. O. Box 391
  Martinez, CA 94553-0039

g. For official participants, new media members, visiting police or other government officials, the Office of the Sheriff member arranging the ride-along will receive participant background information. Participants must provide all the information on the request form, have a background check completed and sign a waiver form.

• Official visitors may have the background check waived upon recommendation of the Patrol Division Commander or any Bureau Assistant Sheriff.

h. Participants (other than Office of the Sheriff Explorers) must be 18 years of age or older to participate in the Program. Recruits and Student Workers are not to ride-along in uniform. Any other exceptions to this Policy must be with the express approval of the Patrol Division Commander or any Bureau Assistant Sheriff.

i. The Patrol Division Commander or designee will designate the Station where the participant will ride. This will be on a rotation system among all Station Houses. Each Station House will be notified weekly of the Program participants and given the cleared ride-along requests with waivers attached. Every effort will be made to accommodate requests to participate in the Program. The importance of this program in the hiring process cannot be overemphasized. Cooperation between Divisions is essential in promoting this valuable program. However, when requests outnumber the positions available, ride-alongs will be scheduled in the following priority:

• Approved participants will be notified of the scheduled date and time to ride, by the Station House Commander or designee.
• The FOB Administrative Senior Clerk shall notify persons in writing who do not qualify to participate in the program.
• Participants will be permitted to ride only one time during any six month period.
• Participants shall not ride with spouses or relatives. Deputies shall excuse themselves from riding with any person with whom they have a personal relationship.

2. PROGRAM RULES.
   a. Participants shall be appropriately attired and well groomed when participating in the program. A ride-along participant in an Office of the Sheriff vehicle is viewed by the public as a representative of this Office. Therefore, the participant’s attire, appearance, and personal conduct shall reflect the standards of the Office of the Sheriff.
   b. Participants will report to the Station House that they are assigned to ride. The participant shall sign the waiver form in the presence of the Deputy. The Deputy shall return the signed waiver to the FOB Administrative Senior Clerk.
   c. Participants may ride full shifts on day shift; they may not ride on swing shift past 2200 hours.
   d. Participants shall follow all directions given by the Deputy.
      • At no time will they interfere with Deputies in the performance of their duties.
      • They will remain in the patrol vehicle or other conveyance unless directed otherwise by the Deputy.
      • They will not accompany a Deputy into a home or crime scene while the Deputy is conducting official business.
   e. Cameras and recording devices are prohibited. Prior arrangements must be made with the Patrol Division Commander if news media members want to record or photograph any activities during a ride-along.
   f. The Division Commander/Bureau Assistant Sheriff or his/her representative will select the area and beat where a participant will ride.

3. DEPUTY SHERIFF RESPONSIBILITIES.
   a. All non-sworn ride-along participants including Office of the Sheriff general members shall sign a Release and Waiver of Liability Form prior to a ride-along. The time and duration of the ride-along shall be entered on the waiver. The Deputy shall ensure the waiver form is signed in his presence and the completed waiver shall be returned to the FOB Administrative Senior Clerk.
b. The ride-along participant’s name should be written in the appropriate box on the shift log prior to leaving the station. The Deputy shall log-on and note in his/her incident history that he/she has a ride-along.

c. The role of the ride-along participant should be that of an observer only. The participant’s involvement in any situation shall be at the direction of the Deputy and shall be limited to the actions essential to officer safety. Ride-along participants should be briefed on the routine tasks and duties of a field Deputy.

d. Deputies shall exercise due care when determining the location or position of a ride-along participant during a routine traffic stop or other incident. A Deputy who is assigned a ride-along participant is directed or required to respond to an extremely hazardous situation, he/she shall ensure that the immediate Supervisor is aware that a ride-along participant is present. In extremely hazardous situations, it may be advisable to notify Central Communications that they are leaving the ride-along participant at a safe location and return for the individual after the incident has been concluded. Ride-along participants shall follow the directions of the Deputy at all times.

e. A participant shall be returned immediately to the Station House for any violations of the ride-along policy. The Deputy shall write a memo indicating why the ride-along was discontinued and send it to the Station House with a copy routed to the Patrol Division Commander.

4. EXPLORER/CADET RIDE-ALONG PROGRAM.

a. The Ride-Along Program is designed to provide an Explorer/Cadet with an educational forum concerning the duties and responsibilities of a Patrol Deputy.

b. Explorers/Cadets will request, by Explorer Ride-Along Application Form, a ride-along at the Station House they desire, a minimum of 48 hours prior to the requested ride-along.

c. The Explorer/Cadet must have on file with the Explorer Advisor a Ride-Along Waiver signed by the Parent(s) or legal guardian.

d. Station House Commanders or their designee will assign the Explorer/Cadet to a Deputy for a ride-along if the schedule permits. Every effort will be made to schedule the Explorer with different Deputies for the ride-alongs. A copy of the WIDSI, with the scheduled date, time and name of assigned Deputy will be given to the Explorer/Cadet and the original will be routed to Patrol Administration.

e. Explorers/Cadets may ride a maximum of two times per month.

f. Explorers age 14 to 15 years may ride on day shift only, and in no case later than 1800 hours.

g. Explorers age 16 to 21 years may ride on swing shift, but no later than 2300 hours.
h. Explorers will ride in uniform.

i. An Explorer/Cadet who does not meet the requirements of the program, i.e. grade point average, will not be allowed to participate in the Ride-Along Program.

j. The Deputy assigned an Explorer/Cadet ride-along will provide insight and training in the functions and responsibilities of operating law enforcement conveyances. Patrol Deputies should remember that an Explorer/Cadet’s status is similar to that of a citizen ride-along.
   - If an Explorer/Cadet is certified in First Level - Less than Full access CLETS, they may operate a MDC.
   - If they have received training, they may operate a radio.
   - If trained, they may assist in traffic control for special events.
   - They may assist the Deputy in completing routine forms that have no evidentiary value.

k. At the completion of their ride-along, the Explorer/Cadet will complete the Ride-Along Detail Form and submit it to their post advisor.

l. Explorers/Cadets will adhere to the Volunteer Services Unit Program and Patrol Division ride-along rules and regulations. Any conduct violations shall be documented and reported to the Volunteer Services Coordinator with a copy routed to the Patrol Division Commander.
I. POLICY.
   A. Members of the Office of the Sheriff shall use only Office of the Sheriff’s approved business cards for official purposes.

II. GENERAL.
   A. Bureau Assistant Sheriffs will ensure employees follow the Office’s approved format for business cards. Issuing cards that deviate from the format is prohibited.
   B. The approved style includes Howard Linen, bright white, cover stock paper, Black ink, type font is Kennedy GD Small Caps.
   C. TYPES OF CARDS.
      1. Specific Business Cards. Employees may request a business card via the chain of command to the Bureau Assistant Sheriff if it is required for their particular duties.
         a. The card will include the member’s rank, name, work location and phone number.
         b. The specific business card for ranks above Captain will have a raised gold Sheriff’s star.
         c. Business e-mail address and fax number located with the address section.
         d. An example of the specific business card is as follows:
2. **Unit Business Cards.** For general use by all personnel.
   
a. This card can be used by typing, writing or stamping an employee’s name in the designated space.
   
b. An example of this business card is as follows:

   ![Business Card Example](image)

   **Front**

   - [ ] Bay Station, 555 Giant Hwy, Richmond, CA 94806
   - Business (510) 262-2023 Fax (510) 262-4209
   - Sheriff’s Dispatch (510) 215-0540

   - Fax (925) 335-4633
   - HTTP://WWW.COCOSHERIFF.ORG

   - DAVID O. LIVINGSTON
   - SHERIFF-CORONER
D. **USE OF BUSINESS CARDS.**
   1. Business cards shall only be distributed when necessary and in the course of official business.
   2. Business cards shall not bear notations or endorsements other than those pertaining to official functions of the Office of the Sheriff.
   3. Business cards shall not be issued for obtaining any special privilege or benefit or to request that the bearer receive any type of favorable consideration.

E. **OFFICIAL MESSAGES.** Divisions may have a specific need for information to be included on the back of business cards. Division Commanders shall provide the draft text for the printer.

F. **REQUISITION OF BUSINESS CARDS.**
   1. Requests shall be submitted in memo format via the chain of command to the Bureau Assistant Sheriff.
   2. The Bureau Assistant Sheriff will process all requests for business cards in his/her Bureau and forward the request to Sheriff’s Fiscal Unit for purchase through an approved vendor.
   3. Employees receiving business cards purchased by the Office of the Sheriff may, at their own expense, pay the difference in costs and obtain a specific card or raised gold star version.
   4. If an employee wishes to purchase business cards at his/her own expense, it must be from a vendor approved by Sheriff’s Fiscal. The employees Bureau Assistant Sheriff will provide the Office of the Sheriff approved specifications.

G. **HONORABLY RETIRED PERSONNEL.**
   1. Captains, Lieutenants, Forensic Managers, and Civilian Chiefs and Directors may be issued business cards identifying them as retired.
      a. Cards ordered prior to the retirees final day of service shall be purchased, one time only, at Office of the Sheriff expense.
      b. Honorably retired personnel may order cards at their own expense.
      c. The card will list their home address, phone number, and e-mail address in lieu of a business address.
d. Honorably retiring personnel above the rank of Captain may be issued business cards with a raised gold Sheriff’s star.

e. Orders will be placed through the employees/retirees Bureau Assistant Sheriff.

2. An example of an “honorably retired” business card is as follows:

![Business Card Example]
I. POLICY.
   A. The Office of the Sheriff will develop and maintain committees that serve the purpose of advising, informing, and facilitating operations.

II. DEFINITIONS.
   A. COMMITTEE. A group of Sheriff’s employees delegated to consider, investigate, take action on or report about matters affecting the Office of the Sheriff.
   B. STANDING COMMITTEE. An ongoing Committee for the purpose of facilitating the Sheriff’s business or initiating changes.
   C. AD HOC COMMITTEE. A Committee formed for a specific purpose, case, or situation as needed.

III. GENERAL.
   A. STANDING COMMITTEES.
      1. Awards Committee. The Committee evaluates nominations for Medals of Valor and makes recommendations to the Sheriff. This Committee is described in Office of the Sheriff Policy Section 1.04.22 Office of the Sheriff Medal of Valor Award Program.
         a. The Committee’s composition is stated in Policy Section 1.04.22, General, F.
         b. All nominees must be approved by the Sheriff or his designee.
         a. The Committee consists of the Custody Services Bureau Assistant Sheriff or his designee and five public at large members appointed by the Sheriff.
      3. Employee/Officer of the Year Committee. The Committee evaluates nominations for Employee and Officer of the Year and makes recommendations to the Sheriff. The Committee is described in Office of
the Sheriff Policy Section 1.04.23 Employee of the Year/Officer of the Year.

a. The Committee’s composition is stated in Policy Section 1.04.23, General B.

4. Safety Committee. The Committee reviews health and safety related issues and makes recommendations to Executive Management. The committee is described, and its composition is stated, in Office of the Sheriff Policy and Procedure Appendix 10, Bloodborne Pathogens Exposure Control Plan.

a. The Office of the Sheriff Safety Manager chairs the Committee. Each Division selects a representative from each facility. Each employee association also selects a representative to the Committee.

5. Uniform Committee. The Committee reviews requests for modifications to the uniform policy and proposals for specialized uniforms, and makes recommendations to the Sheriff.

a. The Sheriff or his designee appoints members to the Committee. The Committee will be chaired by a Lieutenant and will include Sergeants, Deputies, and non-sworn personnel from all Divisions.

6. Sheriff’s Training Advisory Committee (TAC). This committee reviews Office of the Sheriff Training Requirements, current legal mandates and training techniques.

a. This committee’s composition is stated in Office of the Sheriff Policy Section 1.05.01 Training – Organization and Administration.

B. AD HOC COMMITTEES.

1. Interest Based Problem Solving Committees. These committees can be formed by members of a Bureau, Division, or work group at the direction of their Assistant Sheriff or Division Commander to consider issues of mutual interest and make recommendations at various levels of management.

2. Labor/Management Committee. The Committee considers a variety of issues of mutual interest to Management and employees. A Committee is formed by mutual agreement between the Sheriff and the relevant employee association. Recommendations may be binding or advisory, depending on the circumstances which caused formation of the Committee.

a. The Sheriff or his designee appoints representatives for Management and the relevant employee association appoints representatives for employees.
IV. PROCEDURE 1.

A. ESTABLISHMENT OF COMMITTEES.

   1. All new Committees, whether standing or ad hoc, will be established by a memorandum from any Assistant Sheriff or Captain. Committees dealing with Office of the Sheriff operations will require approval of the Undersheriff. Those dealing with Bureau operations will only require approval of that Bureau’s Assistant Sheriff, subject to Policy and Procedure of the Office of the Sheriff. The memorandum will provide the name of the Committee, its mission, its projected longevity, and how it will be chaired and staffed. The authority of the proposed committee is limited to processes within the represented Bureau or Division and subject to Policy and Procedure. A copy of the memorandum will be provided to the Professional Standards Division for tracking purposes.

V. PROCEDURE 2.

A. MONITORING OF COMMITTEES.

   1. The Professional Standards Division will maintain an updated roster of all Committees, standing and ad hoc, and their membership. Any change in the status or membership of a Committee should be noted in a memorandum to the Undersheriff with a copy to Professional Standards.

      a. Updated membership rosters will be posted on SPARKS.
I. POLICY.
   A. The Office of the Sheriff’s provides for the handling of individuals who are injured and detained by the Office of the Sheriff for the safety of the public and in accordance with government mandates.

II. DEFINITIONS.
   A. CONSCIOUS. Being aware of surroundings while lacking in faintness, lethargy, sleep or stupor.
   B. PRISONER. An individual who has either been arrested or detained and is in the custody of the Office of the Sheriff.

III. GENERAL.
   A. Under no circumstances will an injured or unconscious prisoner be received at any Office of the Sheriff facility. The care and custody of the prisoner will be the responsibility of the arresting/transporting officer. Sheriff’s Deputies will observe prisoners presented to them to determine whether the prisoner’s physical or emotional behavior is acceptable for booking or housing either temporarily or permanently. Deputies will follow the guidelines listed herein with regard to refusing to accept a prisoner. The policies and procedures with regard to the care and handling of inmates will be set forth in the Detention Division policy manual.

1. GUIDELINES FOR REFUSAL TO ACCEPT PRISONERS.
   a. Emotional Behavior Observations:
      • State of consciousness;
      • Mental status; and
      • Conduct.
   b. Physical Observations:
      • Lacerations;
      • Broken bones;
• Bruises;
• Body deformities;
• Trauma markings;
• Ease of movement;
• Pupil dilation;
• Symptoms of shock;
• Suffering from tremors; or unusual bleeding.

2. SICK/INJURED ARRESTEES/PRISONERS. Sick and injured arrestees will be transported to and medical treatment obtained. An ambulance or patrol vehicle may be used depending on the prisoner's condition. In life threatening emergencies, the arrestee/prisoner will be transported to or upon receipt of medical treatment, and release.

I. POLICY.
   A. All Points Bulletins are effective police communications tools. To ensure their effectiveness, specific guidelines are established for their use.

II. DEFINITIONS.
   A. ALL POINTS BULLETIN/BE ON LOOK OUT (B.O.L.O.). The All Points Bulletin (A.P.B.) is a general information broadcast to all listening cars and stations in a geographical area that may be affected by the information. For example, information about a suspect on foot in West County need not be broadcast in East County. The term "Be On Look Out" (BOLO) is synonymous with All Points Bulletin (A.P.B.) and both are currently used to announce a general information broadcast.

III. GENERAL.
   A. ALL POINTS BULLETIN USAGE.
      1. General radio broadcasts shall be limited to only the most timely and important information. One of the most misused and extraneous types of channel use are the general information broadcasts initiated at the request of a field unit.
         a. Any criminal incident where an A.P.B. broadcast is within a time frame and includes sufficient description to aid in the apprehension of a suspect.
         b. Any officer safety information.
         c. Any other incident with the approval of the Station House Commander or Watch Commander.
      3. Unacceptable Broadcast.
         a. Generally, information that is not timely and/or useful in the apprehension of a suspect or disseminated for officer safety is unacceptable for a general information broadcast.
         b. Some examples of unacceptable broadcasts are:
• Runaway juveniles;
• Civil details at the request of the citizen;
• "Cold" auto thefts; and
• Missing adults with no indication of foul play or unusual circumstances.

B. RESPONSIBILITIES.

1. Field Deputy.
   a. Obtain the necessary information to be broadcast.
   b. Contact the Communication Center and request the broadcast.

2. Dispatcher.
   a. Format the information given by the field Deputy.
   b. Broadcast the information in the appropriate area(s).
I. **POLICY.**
   
   A. The Office of the Sheriff Administration areas on the seventh floor shall be equipped with alarm buttons that may be used to summon assistance in the event of an emergency.

II. **GENERAL.**

   A. The location of the seventh floor Administration offices and their relative availability to the public make them vulnerable to potential hazardous contact with irate or unstable citizens. Alarm buttons have been installed in the Clerks' desks in the reception area and the Administration inner office and, when activated, sound an alarm at the alarm company.

III. **PROCEDURE 1.**

   A. **ALARM ACTIVATION.**
      
      1. In the event of any situation of apparent danger that cannot reasonably be controlled by personnel in the reception area or Administration offices, the respective alarm button will be pushed.
      
      2. Sheriff’s Communications Center employees, upon receipt of an alarm notification from the alarm company, will do the following:
         a. Telephone the seventh floor Executive offices to alert those personnel to the emergency (in the event the emergency may be occurring in the reception area or out of view of the offices).
         b. Telephone 9-1-1 and provide the building location, floor number, room number, and nature of emergency if known.

IV. **PROCEDURE 2.**

   A. **ALARM TESTING.** The emergency alarm will be tested on a quarterly basis (January, April, July, and October), using the following procedure:
      
      1. The Executive Secretary, or designee, will notify the alarm company prior to activating the alarm; and
      
      2. The alarm buttons at each station will be activated separately to ensure both are working properly.
I. POLICY.
   A. Off-duty Deputies desiring to ride along with outside agencies shall conform to the guidelines outlined in this policy.

II. GENERAL.
   A. This policy governs all ride-alongs with all outside agencies in any vehicles, and encompasses all other aspects or modes of being in the presence of another agency during the course of that agency’s duties.

   1. STANDARDS.
      a. Deputies are to comply with the rules and policies of the outside agency concerning its ride-along program.
      b. Employees who ride-along with outside agencies shall be appropriately attired and well groomed when participating in that program. The Office of the Sheriff employee’s attire, appearance, and personal conduct shall reflect the standards of the Office of the Sheriff.
      c. All off-duty ride-alongs with Outside Agencies shall be in civilian clothes. No part of the Office of the Sheriff uniform shall be worn. Nothing readily identifying the Deputy as a peace officer shall be displayed or worn during the ride-along.
      d. Office of the Sheriff employees shall at all times abide by Policy 1.05.56 Off-Duty Arrest/Enforcement while riding off duty.
         • At no time shall our Deputies interfere with the host law enforcement personnel in the performance of their duties.
         • Our Deputies shall remain in the patrol vehicle or other conveyance unless their involvement is required on an emergency basis consistent with Policy 1.05.56 Off-Duty Arrest/Enforcement. Deputies shall not contact any suspects, victims, or witnesses unless an exigency exists necessitating such contact.
e. Cameras and recording devices will not be used unless prior arrangements have been made with the supervisor of the law enforcement personnel involved.

f. In ride-alongs with out-of-state agencies, Deputies are reminded that they have no law enforcement powers outside the State of California.

g. No ride-along with an outside agency shall be made without the written authorization (email acceptable) of the subject Deputy’s Lieutenant.
I. POLICY.

A. The California Health and Safety Code permits the possession and cultivation of marijuana for medical purposes under certain circumstances. Possession and/or cultivation of marijuana for non-medical purposes is illegal; however, possession of not more than 28.5 grams (approximately one ounce) of marijuana, other than concentrated cannabis, is an infraction punishable by a fine of not more than $100.00. This policy provides guidance and procedure in the investigation of subjects possessing marijuana and claiming medical marijuana status.

II. DEFINITIONS.

A. PERSON WITH AN IDENTIFICATION CARD – As defined in Health and Safety Code section 11362.7(c), this means an individual who is a qualified patient who has applied for and received a valid identification card pursuant to this article. Note: Since December 1, 2005, Contra Costa County Health Services Department has issued identification cards to qualified patients.

B. PRIMARY CAREGIVER – As defined in Health and Safety Code section 11362.7(d), this means the individual, designated by a qualified patient or by a person with an identification card, who has consistently assumed responsibility for the housing, health or safety of that patient. A Primary Caregiver is someone who regularly provides care (i.e., someone who is at the patient’s bedside). A person whose care-giving consists principally of supplying marijuana and instructing on its use, does not qualify as a primary Caregiver. (People v. Mcentch).

C. QUALIFIED PATIENT – As defined in Health and Safety Code section 11362.7(f) means a person who is entitled to the protections of sections 11362.5, whether or not he or she has an identification card issued pursuant to this article.

III. GENERAL.

A. PROPOSITION 215 (“THE COMPASSIONATE USE ACT”). Health and Safety Code (“H&S”) section 11362.5 provides “that seriously ill Californians have the right to obtain and use marijuana for medical purposes where that medical use is deemed appropriate and has been recommended by a physician who has determined that the person's health would benefit from the use of marijuana.” Individuals who are within the scope of the Compassionate Use Act are not
subject to criminal liability under H&S Sections 11357, 11358, 11359, 11360, 11366, 11366.5, or 11570. In any situation where the provisions relating to “medical marijuana” do not apply, all criminal provisions of the H&S Code relating to marijuana remain in effect.

B. OPERATION OF A VEHICLE. Operating a vehicle under the influence of marijuana, even if medical marijuana, remains unlawful under CVC 23152(a). If articulable, objective signs of marijuana influence are observed in an individual operating a motor vehicle, field tests should be conducted and an arrest made, if appropriate. Smoking Marijuana while “in a motor vehicle that is being operated” is not authorized under medical marijuana provisions and remains unlawful under CVC 23222(b).

C. APPLICATION OF MARIJUANA PATIENTS’ RIGHTS.

1. A Qualified Patient or his or her designated Primary Caregiver, in compliance with quantity and use restrictions, shall not be subject, on the sole basis of possession, cultivation or transportation of marijuana, to criminal liability.

2. Deputies encountering a subject with marijuana must ascertain whether the subject is declaring any rights under the Compassionate Use Act. Once a suspect has made such an assertion, the officer shall investigate the validity of the claim.

3. The previous limitations on the amount of marijuana a qualified patient may possess (no more than six mature marijuana plants or twelve immature plants per Qualified Patient and eight ounces of dried marijuana per Qualified Patient) have been eliminated (People v. Kelly). The only “limit” on how much Marijuana a person may possess under the Compassionate Use Act is that it must be “reasonably related to the patient’s current medical needs.” A Primary Caregiver may possess an equal amount to the total aggregate amount that all of his or her Qualified Patients may lawfully possess. There is no limit on the number of Qualified Patients for whom a Primary Caregiver may be responsible, but no more than one Qualified Patient may live outside the county of residence of the Primary Caregiver. A Deputy questioning a subject claiming Primary Caregiver status may ask for the names, addresses and telephone numbers of the subject’s Qualified Patients for the purpose of investigating the legitimacy of the claim. The subject’s failure to provide such information may be considered in determining whether or not an arrest should be made.

4. Contra Costa Health Services issues Identification Cards identifying the named individual as an authorized medical marijuana user or Primary Caregiver. However, an individual need not possess this card in order to claim protected status under the Compassionate Use Act. If a card is displayed, Deputies may make reasonable inquiries into the validity of the card.

5. Deputies investigating medical marijuana status or the legitimacy of a medical marijuana Identification Card may inquire into a patient’s particular diagnosis if such a line of questioning is pertinent to the investigation.
6. Unless a Deputy has probable cause to believe an H&S violation has occurred, i.e., to believe the subject is not protected under the Compassionate Use Act or that the Act’s quantity restrictions have been exceeded, the investigating Deputies shall not confiscate the marijuana. No subject shall be detained longer than the time necessary for a reasonable investigation based on the individual situation and factors presented.

   a. If the subject has more than the amount of marijuana reasonably related to the patient’s current medical needs, the investigating Deputies may seize all marijuana above the maximum legal amount. Obviously, a Deputy may not be able to immediately ascertain the amount of marijuana that is reasonably related to the patient’s current medical needs. But in the event of a large or major cultivation, if the amount so clearly exceeds what a single qualified patient could possibly require, or in the case of a caregiver, the amount clearly exceeds the aggregate amount possibly required by the caregiver’s patients, the Deputy will have probable cause to believe that the quantity limitations permitted under the Compassionate Use Act have been exceeded, and may continue a criminal investigation for possession, possession for sales, transportation and/or cultivation of marijuana.

   b. Should a Deputy have a reasonable suspicion to believe that an H&S violation may have occurred, but less than probable cause to support an arrest, the investigating Deputy may seize only a testable sample (approximately one gram) of the subject’s marijuana pending further investigation. Whenever possible, the Deputy should weigh and photograph the total quantity prior to removing the sample.

7. In any investigation for possession, possession for sales, transportation and/or cultivation of marijuana in which the subject does not claim medical marijuana status, the case shall proceed as a normal criminal investigation, keeping in mind that possession of 28.5 grams or less of marijuana is an infraction punishable by a fine of not more than $100.00. Possession of any amount of concentrated cannabis is punishable by not more than one year in the County Jail or by a fine of not more than $500.00, or both. Possession of more than 28.5 ounces of marijuana, not concentrated cannabis, is punishable by not more than six months in County Jail or a fine of up to $500.00, or both. Exceptions apply on school grounds (see PC 11357).

8. The Sheriff will not allow use of medical marijuana in any custody facility or at any time or place a suspect is in custody.

9. In all cases in which marijuana is confiscated, including only a testable sample, a report shall be written and a sample should be sent to the Crime Lab for analysis.
D. USE RESTRICTIONS.

1. Nothing in Health and Safety Code Sections 11362.5 et. seq. authorizes a Qualified Patient to engage in smoking marijuana under any of the following circumstances:
   a. In any place where smoking is prohibited.
   b. In or within 1,000 feet of the grounds of a school, recreation center, or youth center, unless the medical use occurs within a residence of an authorized user.
   c. On a school bus.
   d. While in a motor vehicle that is being operated.
   e. While operating a boat.

2. Proposition 215 provides a defense to the crimes of possession and cultivation of marijuana. It does not provide a right to use marijuana. Proposition 215 accordingly does not provide any right to use marijuana at work in violation of an employer’s rules (Ross v. Raging Wire Telecommunications) nor does it restrict a city’s or county’s power to enact zoning laws prohibiting marijuana dispensaries (City of Claremont v. Krauss).

E. RETURN OF MARIJUANA. Whenever a determination is made under the medical marijuana provisions that confiscated marijuana should be returned to a subject, or whenever a subject requests the return of confiscated marijuana, the subject should be advised to obtain a court order under PC 1538.5 and to provide a certified copy of the court order. No confiscated marijuana will be returned in the absence of a court order.
I. POLICY.

A. All Office of the Sheriff vehicles shall be driven and parked in accordance with State and Municipal codes to ensure the safety of both the employee and the public. The use of Office of the Sheriff vehicles is permitted for Office of the Sheriff business only.

II. GENERAL.

A. GENERAL OPERATIONS.

1. Employees whose duties include the driving of Office of the Sheriff vehicles shall possess a valid driver's license issued by the State of California, of a class applicable to the type of vehicle being driven. The license shall be carried at all times when operating a motor vehicle.

2. Employees shall observe courtesies of the road and practice defensive driving procedures and fuel conservation measures.

4. All personnel driving or riding in County vehicles shall wear safety lap/shoulder seat belts. Cars with broken seat belts will not be used. The driver shall ensure that a work order for repair of the seat belt is submitted.

   a. Prisoners, upon request, may be restrained in the rear of the vehicle using lap belts provided, with the following exceptions:

      • Should the prisoner behave in such a manner as to create a potential injury to the Deputy or prisoner, the belt need not be used until the prisoner can be restrained safely.

      • Prisoners riding in Transportation van and buses shall be exempt from wearing safety lap and shoulder seat belts.

5. No Office of the Sheriff employee shall drive a County vehicle while using a cell phone unless it is designed to allow hands-free listening and talking and is used in that manner while driving.
a. This section applies to all employees including sworn employees using a cell phone while operating an authorized emergency vehicle.

b. This section applies to the use of a digital two-way radio that utilizes a wireless cell phone with a push-to-talk feature, such as Nextel “Direct Connect”, except that “push-to-talk” may be used by non-uniformed personnel to support an under-cover investigation.
   - Exception: Cell phones may be used by sworn personnel while driving an emergency vehicle in exigent circumstances.
   - No “texting” or reading e-mail from hand held devices while driving.

B. VEHICLE PARKING. The intent of this information is to reduce the chance of a runaway vehicle and the corresponding injuries that often occur as the result of negligence.

1. Every parked and unattended vehicle shall be in a safe position and in compliance with California Vehicle Code regulations.

2. Vehicles with automatic transmissions shall have the shift selector in the "Park" position. Vehicles with manual transmissions shall have the shift selector in "Reverse."

3. The front wheels shall be turned against the curb, when a curb exists. When chock blocks are furnished, they shall be placed as needed.

4. The vehicle's engine shall be stopped, the parking brake set and the ignition keys removed.

5. Vehicles shall be secured by locking doors and closing windows. The driver is responsible for safeguarding the vehicle and property therein.

6. All parked and unattended vehicles will be locked, including those parked in the County lots. Emergency situations are exempt.

7. All Sheriff’s Office trucks, vans and recreational vehicles upon parking in a non-emergency response situation, shall have one 18” orange traffic cone at the front and back of the parked vehicle. Prior to moving the parked vehicle, check for obstructions and secure doors, gates and transported items.

8. No vehicle (except K-9 units) shall be left standing with the engine running.
I. POLICY.

A. Vehicle pursuit guidelines are established to comply with the California Vehicle Code, current case law, and to assist Deputies in determining whether to initiate, continue or terminate a pursuit. Deputies involved in a vehicle pursuit shall use good judgment with due regard for public safety and follow the below established guidelines.

B. On an annual basis, all peace officers will certify in writing that they have received, read, and understand the policy. (Vehicle Code Section 17004 et seq.)

II. DEFINITIONS.

A. BARRICADE. Blocking the roadway with police or other vehicles or other types of obstructions.

B. CONCLUDE. A vehicle pursuit “concludes” when the fleeing vehicle voluntarily or involuntarily comes to a stop.

C. DISCONTINUE/TERMINATE. The decision and actions of the Deputy to stop pursuing the fleeing vehicle. Actions to discontinue and/or terminate a vehicle pursuit may include turning off the lights and sirens, reducing speed, observing the applicable rules of the road, intentionally allowing the distance between the law enforcement vehicle and the fleeing vehicle to increase, changing direction away from the fleeing vehicle, and notifying the Dispatcher of the decision to discontinue and/or terminate the pursuit. Additionally, a pursuit should be discontinued when the Deputy is directed by a Supervisor to terminate the pursuit. Once a pursuit is terminated, Deputies should not follow the suspect vehicle.

D. FAILURE TO YIELD. The actions of a driver who fails to stop his/her vehicle in response to the activation of the emergency lights and sirens of a law enforcement vehicle, but continues to travel forward at or below the speed limit, observing traffic control devices and other applicable rules of the road, and does not change the direction of travel in an evasive manner.
E. FOLLOW/FOLLOWING/TRAIL/TRAILING. A Deputy staying behind and attempting to keep a vehicle in sight, while complying with applicable laws and rules of the road without activating emergency equipment. If the pursuit is at a slow rate of speed, the trailing unit will maintain sufficient distance from the pursuit units so as to clearly indicate an absence of participation in the pursuit. An area check is not considered follow/following/trail/trailing.

F. LEGAL INTERVENTION. Refers to pursuit intervention techniques and other forcible techniques used to stop a suspect vehicle.

G. SUSPECT/OFFENDER. Refers to the driver and occupant(s) of a pursued vehicle.

H. VEHICLE PURSUIT. An active attempt to stop a moving motor vehicle when the driver is aware and is ignoring the Deputy's attempt to stop the vehicle, or is resisting apprehension by maintaining or increasing speed, and failing to comply with applicable rules of the road.

I. STARCHASE PURSUIT MANAGEMENT SYSTEM The StarChase system allows an officer to remotely affix a GPS tracking device to a pursued (or about to be pursued) vehicle using an air pressure system to discharge the tracker from the front of the StarChase equipped patrol car to the vehicle in front of it. Once the tracker is affixed, its location can be tracked by an employee (StarChase Monitor) using a computer with an internet connection.

III. GENERAL.
A. LEGALITY OF DEPUTIES' ACTIONS.
   1. A peace officer driving a vehicle must comply with normal "rules of the road" governing driving. The officer is only exempt from following these rules while driving in response to an emergency call, or immediately pursuing an actual or suspected violator of the law. The vehicle must sound a siren and display a lighted red lamp visible from the front. (Vehicle Code Section 21055.) The exemption from following normal "rules of the road" does not relieve the driver of a vehicle from the duty to drive with due regard for the safety of persons using the highway or protect a peace officer from the consequences of an arbitrary exercise of the privileges exempting the officer from normal driving rules. (Vehicle Code Sections 21056, 21807.)
   2. A peace officer operating an authorized emergency vehicle in the line of duty in response to an emergency call or in immediate pursuit of an actual or suspected violator of the law, will not be personally liable for civil damages due to the personal injury or death of any person or damage to property resulting from the operation of the vehicle. (Vehicle Code Section 17004 et seq.)

B. OBJECTIVES. The objective of a pursuit is to apprehend a violator who refuses to voluntarily comply with the law, requiring the violator to stop. Pursuits should be initiated when, in the Deputy's judgment, the individual(s) exhibits an intent to avoid arrest by using a vehicle to flee. In addition to apprehension, the objectives of this Policy are to:
   1. Prevent injury or death to the public;
2. Prevent injury or death to law enforcement personnel;
3. Minimize the possibility of injury or death to the occupants of the vehicle being pursued; and
4. Reduce the potential for sustaining damage to the vehicles involved or other property.

C. GUIDELINE FOR THE INITIATION, CONTINUATION, OR TERMINATION OF A PURSUIT. The following factors are a guideline to be considered when a Deputy initiates, continues or terminates a pursuit. They include, but are not limited to:

1. The seriousness of the originating violation or suspected violation and its relationship to community safety;
2. Safety of the public in the area of the pursuit;
3. Safety of the pursuing Deputy(ies);
4. Volume of vehicular traffic;
5. Volume of pedestrian traffic;
6. Location of pursuit;
7. Speeds involved;
8. Time of day;
9. Weather conditions;
10. Road conditions;
11. Familiarity of the Deputy, Supervisor or Division Commander with the area in which the pursuit is occurring;
12. Quality of radio communications between pursuing unit(s) and the Dispatcher and Supervisor;
13. The capability of the police vehicles involved;
14. The likelihood of identification and apprehension of the suspect(s) at a later time, or if the identity of the driver is known;
15. The availability of resources from other law enforcement agencies;
16. The Deputies’ knowledge of factors that may affect the driving skill of the suspect, such as age, driving experience, or mental impairment;
17. Whether there are any persons in the Deputies’ vehicle(s) other than sworn members of the Office of the Sheriff;
18. Whether there are other persons in or on the pursued vehicle, including children, passengers, co-offenders, and/or hostages;
19. The distance and duration of the pursuit;
20. The Deputies’ experience and training;
21. The distance between the Deputies’ and the suspect’s vehicles; and
22. The availability of supervision.
D. PURSUIT RULES TO FOLLOW.

1. When practical, Deputies intending to stop a vehicle should have visual contact and be in close proximity to the violator's vehicle before activating their emergency lights and sirens.

2. Lights and sirens shall be used continuously throughout the pursuit. Deputies should not initiate or continue a pursuit if their lights or sirens are or become non-functional.

3. Normally, pursuits should be limited to two (2) units, a primary and a secondary unit, unless, in the Supervisor's judgment, additional units are necessary.

4. Pursuit units should attempt to keep near the center of the roadway so the red lights are visible to oncoming traffic.

5. Pursuing units should avoid passing vehicles on the right unless no other option is available.

6. Units shall not pass or attempt to pass any other unit engaged in the pursuit except at the request of the Deputies in the unit to be passed or upon direction of a Supervisor.

7. When the pursuit is initiated by a motorcycle unit or unmarked unit, the motorcycle/unmarked unit shall abandon the pursuit when a four-wheel, marked unit joins the pursuit. The initiating unit shall proceed to the termination point of the pursuit.

8. Deputies shall terminate a vehicle pursuit whenever directed to do so by a Supervisor.

9. All other units should remain alert to the pursuit progress and location, and stay off the air and away from the pursuit.

10. Pursuing units shall keep vehicles at speeds that will enable them to keep the vehicles under control at all times.

11. Units shall drive with due regard for the safety of all persons using the highway.

12. If involved in an accident, notify the Patrol Supervisor at once. Do not make statements pending the Patrol Supervisor's arrival. The accident investigation should be handled by the law enforcement agency having jurisdiction of the area in which the accident occurred. Deputies involved in such accidents will adhere to procedures contained in this Manual.

E. PRIMARY UNIT RESPONSIBILITIES.

1. The unit initiating the pursuit shall be considered the primary pursuit vehicle unless otherwise directed by the Supervisor. The primary unit shall immediately notify Dispatch of the following:

   a. A pursuit is underway;
   b. Location and direction of travel;
   c. Known law violation or reason for the pursuit;
   d. Description of the vehicle, including license number, if possible;
e. Speed of the fleeing vehicle; and
f. Number of occupants in the vehicle.

2. The primary unit shall be held accountable for the following:
   a. Conduct of the pursuit until relinquished to another unit or a Supervisor;
   b. Judicious operation of the vehicle during the pursuit;
   c. The decision to continue or discontinue the pursuit; and,
   d. Termination point scene command until the arrival of a Supervisor.

F. SECONDARY UNITS. The secondary unit joining the pursuit shall immediately notify Dispatch if it is joining the pursuit and identify the unit. This unit may take over the communication duties, if in a position to do so, at the discretion of the initiating unit. The secondary unit is to be in a position to provide cover, if needed.

G. AERIAL PATROL. The utilization of available air support should be strongly considered in every vehicle pursuit.
   1. Aerial patrol can provide visual contact with pursued vehicles and provide valuable information to pursuing units such as upcoming traffic congestion, hazards, or other factors that might endanger the safety of the Deputy or the public.
   2. An aerial patrol unit can maintain surveillance of a suspect vehicle if the pursuit is discontinued and direct ground units to the suspect’s ultimate location.
   3. An aerial unit shall never be designated as a primary or secondary pursuit unit.
      a. If the suspect(s) is believed to have committed a serious violent felony crime and poses a significant, ongoing threat to public safety, the patrol units should stay in active pursuit rather than risk the suspect(s) escaping apprehension.
      b. Unless the conditions listed above in 3.a. are present, once an aerial unit is overhead and has the pursued vehicle under surveillance, the pursuit should be terminated. The patrol units should then, with the Supervisor’s approval, begin trailing the pursued vehicle. The aerial unit should then be used to direct the trailing units to the pursued vehicle’s location and the location of the suspect(s) related to the pursued vehicle.
   4. The aerial unit shall advise the patrol units if the helicopter’s amount of fuel left is at a point that the helicopter can no longer follow the suspect vehicle.

H. PURSUIT INTO OTHER JURISDICTIONS. When a pursuit extends into another area or jurisdiction, Deputies shall notify Dispatch and Dispatch shall notify the affected agency and include all relevant information.
   1. Request for another agency to supply assist units for pursuit and arrest.
a. Supervisors are encouraged to request that the affected agency provide a unit with knowledge of the area to assume the calling of the pursuit and to provide advice and assistance to the primary unit as the pursuit travels though the jurisdiction of the affected agency.

b. If the affected agency is unable or refuses to provide the assistance requested, the Supervisor shall consider the factors and make a determination relating to continuing or terminating the pursuit.

2. Request for another agency to assume control of the pursuit.

a. The Patrol Supervisor or primary unit (if a Supervisor is not available) in the pursuit should determine if the other law enforcement agency should assume the pursuit. The following should be considered:

   • The distance involved;
   • Pursuing Deputy's familiarity/unfamiliarity with the new area; and
   • Other known pertinent facts.

3. Sheriff’s Dispatch shall advise the outside agency of the specific level of assistance requested. The Sheriff’s primary unit shall relinquish the primary role to the outside agency and shall become the secondary unit until relieved. The original Sheriff’s secondary unit shall cease to participate in the pursuit.

4. In the event the Office of the Sheriff relinquishes control of the pursuit to an outside agency, the primary unit may, with permission of the Supervisor, trail the pursuit to its termination point in order to provide information and/or assistance during the arrest of the suspects(s).

5. If the Office of the Sheriff has retained arrest authority over the suspect(s), the initiating Deputy should proceed to the termination point.

I. PURSUITS FROM OTHER JURISDICTIONS INTO SHERIFF’S OFFICE JURISDICTION. When a pursuit extends into Office of the Sheriff jurisdiction, Dispatch shall relay all relevant information to affected field units and field Supervisor(s).

J. Requests for the Office of the Sheriff to supply assist units for pursuit or arrest.

1. Notification by an outside agency of a pursuit in progress shall not be construed as a request to join in the pursuit.

2. Office of the Sheriff units shall not become involved in another agency’s pursuit unless specifically requested or when such assistance is included in established interagency agreements such as the Contra Costa County Police Chiefs’ Protocol.

3. When involved, Office of the Sheriff units will provide support and cover to the outside agency without taking over the pursuit. Once the pursuit leaves Office of the Sheriff jurisdiction, Deputies shall terminate
their involvement in and assistance with the pursuit unless a Supervisor authorizes continuation to further public safety.

K. Request for Sheriff’s Office to assume control of the pursuit.

1. When a request is made for the Office of the Sheriff to assume control of a pursuit, the Patrol Supervisor should consider the following:
   a. The original reason for the pursuit;
   b. The behavior of the suspect(s) during the pursuit, including any information known or suspected that would increase or lessen the need to continue the pursuit.
   c. Information relevant to the safety of pursuing Deputies, the suspect(s) and any passengers in the suspect vehicle, and the public, including the pursuing Deputies’ familiarity, or lack of familiarity, with the area into which the pursuit is heading.

2. The initiating agency will be responsible for filing the case for prosecution of the violation that caused the pursuit. The initiating agency generally should take custody of the violator. However, if non-traffic violations have occurred subsequent to the pursuit being taken over by the Sheriff’s Office, the Sheriff’s Office will be responsible for the filing of the case for prosecution. The law enforcement agency having or witnessing the most serious crimes should retain custody of the violator unless mutually agreed upon otherwise.

L. COMMUNICATIONS CENTER (DISPATCH) RESPONSIBILITY.

1. Advise the Patrol Supervisor and all field units immediately when a pursuit is initiated.
2. Initiate a Code 33.
3. Maintain communications with pursuing unit(s), update the progress by broadcasting locations and information from the involved Deputies, along with ascertaining and broadcasting the suspect(s) description, violation, and direction/mode of travel.
4. Notify affected allied agencies and specify if assistance is or is not requested by the pursuing unit(s), and give details as needed.
5. Coordinate back-up units and provide stolen/registration information.

M. SUPERVISOR’S CONTROL AND RESPONSIBILITY. It is the Patrol Supervisor’s responsibility to ensure that all pursuits are conducted within the guidelines contained in this Policy. If necessary, a Field Supervisor may drive Code Three in order to effectively discharge these responsibilities.

1. Upon being notified of the pursuit, the Supervisor shall:
   a. Monitor the pursuit until it is concluded.
   b. Constantly evaluate the necessity of continuing the pursuit. In making this decision, Supervisors should apply the guidelines set out in this Policy. If a Supervisor lacks sufficient information to
make an informed decision under these guidelines whether to continue or terminate a pursuit and is unable to obtain the necessary information in a timely manner, he/she is authorized to terminate the pursuit on that basis alone.

c. Ensure that no more than the required or necessary units are involved in the pursuit.

d. Ensure that the affected allied agencies are notified.

2. The Supervisor shall proceed to the termination point if at all practical to provide guidance and the necessary supervision.

3. The Supervisor overseeing the pursuit shall complete all necessary documentation regarding the incident and forward up the chain of command for review by the Division Commander. This documentation will include the following:
   a. Completed CHP Form No. 187.
   b. Copy of the Unusual Incident Report
   c. Copy of associated crime report(s) documenting the pursuit.
   d. Copy of Dispatch log and audio recording of the incident.

N. LEGAL INTERVENTION. Legal Intervention in this context refers to when a pursuing patrol car is purposefully brought into contact with a fleeing vehicle in a maneuver designed to end a pursuit safely. Deputies should avoid such intervention maneuvers except when an overriding public safety issue requires that the fleeing vehicle be immediately stopped and the Patrol Supervisor monitoring and supervising the pursuit gives consent. In determining whether to execute such Legal Intervention, the requesting Deputy and the Supervisor shall be mindful of Office of the Sheriff Policy Section 1.06.61, Use of Force, and its definition of “Deadly Force.” (“Any use of force that creates a substantial risk of causing death or serious bodily injury.”) Accordingly, intervention maneuvers should not generally be undertaken unless the situation warrants the immediate use of deadly force.

1. Ramming fleeing vehicles should likewise generally be avoided, and a similar Deadly Force analysis must be made by the pursuing Deputy and Patrol Supervisor prior to undertaking such action.

2. In all circumstances, such techniques shall not be undertaken unless the condition and nature of the roadway, speeds involved, and hazards to other persons are considered and the circumstances justify and require such action.

3. This Policy shall not limit the right of a Deputy to use a Patrol vehicle as a weapon when necessary to stop an imminent threat of death or grave bodily harm to the Deputy or others.

4. Barricading a roadway should be avoided unless necessary to safely end a pursuit and shall not be undertaken unless authorized by the Patrol Supervisor.
   a. A roadway barricade must be constructed in a manner to allow the fleeing vehicle sufficient time and distance to bring his/her
vehicle to a complete stop prior to the barricade, should he/she decide to do so.

b. Pursuing units and outside agencies must be notified of the barricade and given sufficient prior warning as to its location.

5. The blocking of freeway exits or on-ramps is acceptable to preclude citizens from inadvertently driving into the path of a pursuit or to keep the pursued vehicle from returning to congested surface streets.

N. STARCHASE PURSUIT MANAGEMENT SYSTEM GUIDELINES FOR USE

1. For clarity of communications, radio traffic should identify the device as "StarChase".

2. StarChase equipment in the patrol vehicle will only be operated by deputies who have been trained in its use. StarChase equipped vehicles will not be assigned to deputies who are not trained on its use unless required by exigent circumstances.

3. Except as specified below, deputies shall use their own judgment regarding affixing a StarChase tag upon a pursued vehicle and do not need prior approval from a supervisor.

4. All safety decisions related to the discharge of a StarChase tag shall be evaluated by the operator prior to deployment. While supervisors may direct or approve the deployment of a StarChase equipped patrol car in a pursuit and/or the discharge of a tag, safety decisions related to passing other involved vehicles and the actual discharge of the device will be evaluated by the deputy prior to deployment. In accordance with this pursuit policy, the safety of deputies, uninvolved persons and persons inside the pursued vehicle shall be considered. The following decisions are specifically included:

   a. Whether the officer can safely maneuver close enough to the suspect vehicle to come within targeting range.

   b. Whether the officer can safely pass any other vehicle involved in the pursuit.

   c. Whether any circumstance would indicate the device would not work (i.e., weather conditions, suspect vehicle weaving, etc.).

5. StarChase equipped patrol cars, with approval from a supervisor, are authorized to respond Code 3 to join a pursuit for potential use of the device. Code 3 response will be done in accordance with existing Sheriff’s Office General Policy and Procedures.

   a. Unless directed otherwise, the StarChase equipped vehicle will join the pursuit at the rear of authorized pursuing vehicles until cleared to pass.

   b. Once a StarChase equipped vehicle joins a pursuit, it becomes an authorized unit as it relates to the number of authorized pursuing vehicles.

   c. StarChase equipped vehicles may pass other pursuing vehicles only when deemed safe and only with specific permission from
the unit to be passed. Permission is to be sought and acknowledged one passing at a time. Deputies driving the StarChase equipped vehicle will identify which side of the overtaken vehicle they will pass.

6. StarChase tags will be deployed in accordance with training.
   a. Once the StarChase tag has been successfully deployed, if the suspect(s) is believed to have committed a serious violent felony crime and poses a significant, ongoing threat to public safety, the patrol units should stay in active pursuit rather than risk the suspect(s) escaping apprehension.
   b. If the conditions listed above in section 6.a. are not present, the pursuit should be terminated. The patrol units should then, with the Supervisor’s approval, begin trailing the pursued vehicle in an effort to deescalate the actions of the pursued driver.
   c. Deputies will maintain constant communication with the StarChase Monitor (Sheriff’s Office Communications) for speed/direction/location updates of the suspect vehicle.
   d. The Supervisor will coordinate with the StarChase Monitor (Sheriff’s Office Communications) to direct resources and officers to appropriate locations to apprehend the suspect. This response shall be in a non-emergency response unless authorized by a supervisor.
   e. Deputies will not monitor the StarChase Monitor data while operating a motor vehicle.

7. The StarChase tag will not normally be deployed in the following situations unless the suspect poses a substantial risk to the public:
   a. During heavy rain.
   b. While driving on exceptionally rough terrain.
   c. On a motorcycle.
   d. When pedestrians are between or very near the suspect vehicle and the StarChase equipped vehicle.

8. In addition to the normal pursuit reporting procedures required by policy, deputies who use the StarChase system will report all tag deployments to their supervisor so that proper notifications can be made.
   a. Supervisors will report StarChase deployments to the Technical Services Division Lieutenant, as well as their respective Station House/Contract City manager.
   b. StarChase Monitor data will be provided by the Technical Services Division to the reporting deputy. This data will be attached in the report writing system as a supplemental report by the reporting deputy.
   c. The reporting deputy will also include the following information in their pursuit report:
• Location of StarChase tag deployment.
• Speed at the time of StarChase tag deployment.
• Serial number of StarChase tag.
• Photograph of the StarChase tag on the suspect vehicle.

d. The Technical Services Division Lieutenant will notify the Fleet Coordinator of the StarChase deployment so that GPS Launcher can be reloaded with a StarChase tag.
I. POLICY.
   A. To promote the safety of the public and employees, emergency vehicle operation will be in accordance with all applicable laws. Emergency lights and siren will always be utilized when driving Code Three.

II. GENERAL.
   A. JUSTIFICATION FOR EMERGENCY OPERATION.
      1. An incident requiring a response to prevent further injury and/or death to any person.
      2. Any incident requiring the immediate presence of a law enforcement officer to prevent a dangerous situation from escalating.
      3. Apprehension of a fleeing felon or other serious law violator. Refer to Sheriff’s Office Policy Section 1.06.52
   B. EMERGENCY VEHICLE OPERATION.
      1. Authorization for operating an emergency vehicle in an emergency situation may be made by the Deputy driving the vehicle, a Patrol Supervisor, or a Patrol Manager.
      2. Emergency lights and siren on emergency vehicles will be used to clear traffic for emergency vehicle and/or signal a suspect to stop. Neither the siren nor the emergency lights alone are sufficient.
         a. Except when in immediate pursuit or when affecting a traffic stop, the speed traveled should normally not exceed 20 mph over the posted speed limit in an emergency response.
         b. Blind intersections should not be entered at a speed greater than 15 mph.
         c. Emergency vehicles may proceed through traffic control devices and intersections only when it is safe to do so.
3. A safe distance shall be maintained between emergency vehicles on the same road.

4. The first unit arriving at the scene of an emergency shall evaluate the situation and advise the Communications Center as soon as possible of the number of different units required.

C. CODE THREE TRANSPORTS.

1. When providing emergency transports of persons or whole blood, the driver will consider the following:
   a. The nature of the emergency;
   b. The dangers and hazards involved; and
   c. The emotional condition of the person being transported.

2. The Code Three escort of another vehicle that is not equipped with emergency lights and siren will only be authorized by the Patrol Sergeant when no other alternative is available to save human life.

D. DISCONTINUANCE OF EMERGENCY OPERATION. Deputies should not feel compelled to continue a Code Three response when conditions escalate to a degree that places the safety of the Deputy or others in extreme jeopardy. Conditions that must be evaluated continuously are:

1. Capabilities of the Deputy to control the situation;
2. Speed in relationship to traffic and other road conditions;
3. Degree of emergency, urgency, or threat to others; and
4. Deputies will evaluate the conditions and circumstances in order to arrive at a proper decision.

III. PROCEDURE 1.

A. DEPUTY’S RESPONSIBILITIES.

1. A Deputy initiating the use of emergency lights and siren will notify the Communications Center as soon as possible of the following:
   a. That the unit is responding Code Three;
   b. A brief description of the situation;
   c. The direction of travel; and
   d. The location of the incident.

2. A Deputy operating a vehicle Code Three will ensure that the Patrol Sergeant is notified, either via the Communications Center or by the vehicle’s radio. Such notification will include the purpose for the Code Three and the need for any additional assistance. Exception: Temporary use of emergency lights and siren for the purpose of affecting a vehicle traffic stop in a non-pursuit situation requires no notification.
IV. PROCEDURE 2.
   A. PATROL SERGEANT. The Patrol Sergeant will monitor and evaluate any Code Three response. If the Sergeant determines that the potential danger outweighs the need for the Code Three response, discontinue the Code Three response.
I. POLICY.
   A. The Office of the Sheriff strives to develop driving techniques which minimize the frequency of vehicle accidents. To develop such techniques, the cause and circumstances surrounding an accident must be determined. Therefore, all accidents involving on-duty Office of the Sheriff employees or off-duty employees driving County-owned vehicles shall be fully and fairly investigated.

II. DEFINITIONS.
   A. ACCIDENT REPORT FORM. Refers to County Vehicle Accident Report form.
   B. TRAFFIC COLLISION REPORT. Refers to an official traffic collision report completed by a law enforcement agency.

III. GENERAL.
   A. REPORTABLE ACCIDENTS.
      1. All vehicle accidents involving on-duty employees, either in a County vehicle or a private vehicle, and off-duty employees in a County vehicle shall be reported and subject to this policy. Additionally, off-duty employees involved in a vehicle accident causing fatal or serious injuries may be subject to the procedures in Section 1.06.62 of this manual, "Police Involved Fatal or Serious Injury Incidents."
      2. On-duty vehicle accidents are listed in two categories: those requiring a "Traffic Collision Report" and those requiring only "County Reporting".
      3. Traffic Collision Report Required. Accidents requiring an official outside traffic investigation and Traffic Collision Report include, but are not limited to:
         a. Accidents resulting in death or bodily injury
         b. Accidents resulting in major damage and/or towing of any vehicle
         c. Accidents involving any violation or possible violation of the California Vehicle Code.
d. Accidents involving other than minor damage to the County vehicle. Example: a small dent or paint transfer does not require a Traffic Collision Report.

e. Accidents resulting in any damage to private property.

4. The Department is responsible for the investigation of boating accidents. There is no requirement for an outside investigation into an Office of the Sheriff boat accident.

5. County Reporting Required.

a. The following vehicle accidents require "County" and Department reporting.

   - All accidents that require the "Traffic Collision Report"
   - Accidents in which there is no damage to property, other than minor damage to the County vehicle involved, and the accident doesn't meet any of the other criteria listed in "B"
   - Malicious damage to County vehicles.

b. Vehicle accidents involving bodily injury or where the County vehicle has collided with the rear of another vehicle shall be reported immediately by telephone to the Office of the County Administrator Risk Management Division, Assistant Risk Manager.

c. The completed County Vehicle Accident Report will be routed to the County Administrator's Office, Risk Management Division at: 2530 Arnold Dr. Ste 140, Martinez, CA 94553.

B. INVESTIGATIVE AND REPORTING RESPONSIBILITY.

1. Official Traffic Collision Report. An official traffic collision report will be taken and investigated by an outside agency, dictated by the location of the accident as follows:

   a. An accident in the unincorporated area of the County or in contract cities shall initially be investigated by the Patrol Sergeant responsible for that area. The Patrol Sergeant will determine the need to involve the California Highway Patrol based upon the following criteria: potential civil action, extensive property damage, or an irate citizen. If the California Highway Patrol is needed, the affected Patrol Sergeant should contact the California Highway Patrol Supervisor and request their response. Contract cities shall not utilize adjacent contract cities as reporting and investigating agencies. Contract cities shall adhere to the aforementioned procedures.

   b. An accident in incorporated cities without a contract with the Department for police services shall be investigated by the local police department. In any event, Department employees involved in a vehicle accident will not investigate their own accident; but will cooperate with the investigating agency.

2. County Accident Report and Employee Inter-office Memo.
3. Department Photographs and Reports. A Patrol Division Sergeant will be dispatched to the scene of all accidents that occur within Contra Costa County involving Office of the Sheriff employees. The Patrol Sergeant will do the following:

a. Take photographs of the vehicles involved; as well as the roadway and any other elements that may have contributed to the accident.

b. If there are employee injuries involved, ensure that the procedures in Policy Section 1.05.74, “Notification and Reporting on Duty Injuries, Accidents or Death” are utilized.

c. Ensure that the County Accident Report Form and an inter-office memo from the involved employee are completed and turned in to the employee’s Division Commander prior to the end of shift if the accident occurred on-duty, if it occurred off-duty this must be completed upon their return to work. If the employee is unable to complete the County Accident Report Form and inter-office memo, the Sergeant will complete the County Accident Report Form and note this in the inter-office memo to the employee’s Division Commander.

d. Complete an inter-office memo to the employee’s Division Commander outlining the following:
   - Circumstances surrounding the accident
   - Number of photographs attached to the report
   - Traffic Collision Report number and the agency taking the report, if any
   - Whether or not all the involved employees and witnesses were interviewed and what they said.

e. Initial and date the damaged areas on the County vehicle with a waterproof marking pen.

4. If the accident occurred outside of Contra Costa County and/or a Patrol Sergeant is not able to respond the involved employee will be responsible for the following:

a. Contacting the appropriate law enforcement jurisdiction and requesting that they take an accident report.

b. Take photographs of all involved vehicles.

c. Report the accident to their immediate supervisor as soon as practical.
C. PRIVATE INVESTIGATIONS OF COUNTY-INVOLVED TRAFFIC ACCIDENTS.

1. Occasionally, an employee will be contacted directly by a private investigator or similar person requesting information regarding a contract city or County-involved traffic accident. When this occurs, the following steps should be taken.

   a. Refer the person to the Technical Services Division Records Unit to obtain a copy of the traffic accident report.

   b. Refer the person to the Office of the County Administrator, Risk Management Division. Risk Management will do the following:

      • Provide the appropriate information to the requesting person.

      • Determine if any potential County liability exists.

      • Advise this Department on how to proceed, and provide legal counsel, if required.

D. MALICIOUS MISCHIEF/UNREPORTED DAMAGE.

1. Malicious Mischief. In cases involving damage to County vehicles resulting from malicious mischief, a County Vehicle Accident Report will be completed by the employee responsible for the County vehicle at the time the damage occurred. A crime report will be completed. If the damage occurs within the county, a Patrol Sergeant will respond to obtain photographs and to inspect the crime scene. The Sergeant will submit a supplement to the original crime report, and route a copy of the report to the employee's Division Commander.

2. Unreported Damage.

   a. In cases of unreported damage to County vehicles, the employee discovering the damage will immediately call his/her Supervisor. The Supervisor will initiate a complete investigation to determine who was driving the vehicle and the cause of damage.

   b. If the Supervisor identifies the employee who drove the vehicle when the damage occurred, the employee will be directed to complete the County Accident Report Form and an inter-office memo as described in the preceding "Investigative and Reporting Responsibility" section.
c. If the Supervisor is unable to identify the employee who drove the vehicle when the damage occurred, he/she will direct the employee reporting the damage to complete the County Accident Report Form and an inter-office memo as described in the "Investigative and Reporting Responsibility" section. The Supervisor will complete an inter-office memo noting that the reporting employee is not to be considered responsible for the damage.

IV. PROCEDURE.

A. DRIVER’S RESPONSIBILITIES.

1. Employees who are involved in a vehicle accident, unless circumstances prevent compliance (i.e., injuries), shall:
   a. Ensure that first aid is provided and medical assistance is requested when needed.
   b. Notify the Patrol Sergeant responsible for the area of occurrence if the accident occurred within Contra Costa County and request any additional assistance required.
   c. If the accident occurred outside of Contra Costa County call the appropriate Law Enforcement agency having jurisdiction to take an accident report.
      1. Report the accident to your immediate supervisor as soon as practical.
   d. Do not make any admissions or sign any statements as to negligence, fault, or liability.
   e. Identify all witnesses and record their names and addresses.
   f. Complete an inter-office memo, as previously outlined, and the County Vehicle Accident Report Form, both of which are to be turned in prior to the end of shift, or upon return to work if off-duty.

2. Employees who are passengers in a County vehicle involved in an accident will adhere to the basic steps covered in "A" when applicable.

B. PATROL SERGEANT RESPONSIBILITIES. The Patrol Sergeant in the area of the accident shall:

1. Respond to the scene and ensure that a proper investigation is being conducted.

2. Sergeants will refrain from making any judgements or comments about fault, negligence or liability to anyone involved in the accident, including the employee.

3. Ensure the basic steps in Procedure 1 are being implemented.

4. Ensure notification of the Office of the County Administrator, 646-4155, in the event of bodily injury or if the County Vehicle has collided with the rear of another vehicle.
5. Ensure any employee injuries are properly reported to the employee’s manager or Watch Commander.

6. Photograph the accident scene and involved vehicles.

7. Complete an inter-office memo to the employee’s Division Commander, as previously outlined, and have it submitted within 24 hours after the accident.

C. ROUTING OF DOCUMENTATION.

1. Division Commanders, upon receipt of a County Accident Report Form, photographs, and memos from the drivers and Supervisors, shall route the documents as follows:
   a. Submit the documents to the Internal Affairs Lieutenant via Blue Team.
   b. Send one copy of each document to the Technical Services Division, Fleet Manager.

2. The Internal Affairs Lieutenant shall:
   a. Retain and file one copy of each document; and
   b. Add the information to the Internal Affairs Vehicle Accident database.
I. POLICY.
   A. All on-duty vehicle accidents shall be reviewed to determine if the involved driver is in need of driver training and monitoring.

II. DEFINITIONS.
   A. ACCIDENT REPORT FORM. Refers to the County Vehicle Accident Report form.
   B. TRAFFIC COLLISION REPORT. Refers to an official traffic collision report completed by a law enforcement agency.
   C. PREVENTABLE ACCIDENT. Any in which the County driver could have reasonably taken evasive action to avoid the collision.

II. GENERAL.
   A. ACCIDENT REVIEW.
      1. The accident review process will normally occur after the completion of the Vehicle Accident Reporting procedures covered in Sheriff’s Office Policy Section 1.06.54.
      2. The review process is conducted by the responding Patrol Sergeant. In cases where a Patrol Sergeant did not respond this will be done by the employee’s immediate supervisor. The Supervisor or Sergeant will review all available and relevant documentation on the accident, to include:
         a. The County Accident Report Form and driver's memo;
            1. Sergeants and Supervisors are not required to complete the Accident Review Finding box if a more thorough investigation is needed. If further investigation is needed to determine fault write, “Investigation Pending”, in the Supervisor Investigation box. If no further investigation is needed the Accident Review box shall be completed.
b. Patrol Sergeant's or Supervisor’s investigation;
c. Photographs;
d. Official Traffic Collision Report;
e. Available witness statements;
f. Related Sheriff’s Office policies and procedures;
g. Applicable Vehicle Code and Penal Code sections; and
h. Any other investigation deemed necessary by the Sergeant or Supervisor;

3. Once the review is complete, the Patrol Sergeant or Supervisor will document their findings in a memo to the involved employee’s Captain or Division Commander. The memo will include:
   a. A summary of the incident;
   b. Cost of repairs, if available;
   c. Assessment of the damage;
   d. Identified violations of policy and procedure;
   e. Identified California Penal Code or Vehicle Code violations.

4. Should the Sergeant or Supervisor determine the driver violated any policies, procedures, California Penal and/or Vehicle code sections, corrective action and training will be initiated for the driver. This process may include the use of the Corrective Counseling System or the Personnel Management Regulations. The Sergeant or Supervisor will review the employee's personnel file, and discuss the facts with the employee’s chain of command, before determining what corrective action and training are appropriate.
The Office of the Sheriff’s Crowd Control and Management policy is established to provide direction for Deputies to distinguish between lawful assemblies, civil disobedience, and unlawful behavior in order to maintain public peace and order while upholding constitutional rights of free speech and assembly.

II. CONSTITUTIONAL ADHERENCE

A. The rights all people have to march, demonstrate, protest, rally, or perform other First Amendment activities comes with the responsibility to not abuse or violate the civil and property rights of others. Law enforcement should not be biased by the opinions being expressed, nor by race, gender, sexual orientation, physical disabilities, appearances, or affiliation of anyone exercising his or her lawful First Amendment rights. Law enforcement personnel must have the integrity to keep personal, political or religious views from affecting their actions.

B. When it becomes necessary to control the actions of a crowd that constitutes an unlawful assembly, the commitment and responsibility of law enforcement is to control lawfully, efficiently, and with minimal impact upon the community. A variety of techniques and tactics may be necessary
to resolve an unlawful assembly or to disperse an unruly crowd. Only that force which is objectively reasonable may be used to arrest violators and restore order.

III. USE OF FORCE

Nothing in this policy overrides or in any manner modifies the Use of Force policy (Policy 1.06.61), and such policy shall be applicable in all instances to any actions taken pursuant to this policy.

IV. DEFINITIONS

A. CROWD MANAGEMENT. Crowd management is defined as techniques used to manage lawful public assemblies before, during, and after an event for the purpose of maintaining the event's lawful status. Crowd management can be accomplished in part through coordination with event planners and group leaders, permit monitoring, and past event critiques.

B. CROWD CONTROL. Crowd control is defined as those techniques used to address unlawful public assemblies, including a display of formidable numbers of Deputies and Officers, crowd containment, dispersal tactics, and arrest procedures.

C. FIRST AMENDMENT ACTIVITIES. First Amendment activities include speech and expressive conduct (non-verbal expression) used to convey ideas and/or information, express grievances, or otherwise communicate with others.

1. Common First Amendment activities include, but are not limited to, speeches, demonstrations, vigils, picketing, distribution of literature, displaying banners or signs, street theater, and other artistic forms of expression. All these activities involve the freedom of speech, association, and assembly and the right to petition the government, as guaranteed by the United States Constitution (First Amendment) and the California Constitution (Article I, Sections 2 & 3).

2. The government may impose reasonable restrictions on the time, place, or manner of protected speech, provided the restrictions are
justified and without reference to the content of the speech, and that they are narrowly tailored to preserve order and keep the peace.

D. DEMONSTRATION. Demonstration includes a wide range of First Amendment activities which require, or which may require traffic control, crowd management, crowd control, crowd dispersal, or enforcement actions.

1. Demonstration means a public display of sentiment, typically displayed in marches, protests, student walk-outs, assemblies, and sit-ins. Such events and activities usually attract a crowd of persons including participants, onlookers, observers, media, and other persons who may agree or may disagree with the sentiment being expressed by the demonstrators.

E. CROWD EVENT OR CROWD SITUATION. This policy covers all crowd events or crowd situations, including sporting events, festivals, concerts, celebratory crowds, and demonstrations as defined above.

V. GENERAL

A. PLANNING.

1. Command staff shall be notified immediately of large or potentially disruptive demonstrations and/or crowd events.

2. The Incident Command System shall be used for managing crowds and acts of civil disobedience.

3. The Incident Commander shall be responsible for the development of a written operations plan.

4. The Incident Commander shall contact the on-call Duty Officer at the regional Fusion center, the Northern California Regional Intelligence Center (NCRIC), for support in the pre-event assessment. The 24-hour Duty Officer for the NCRIC can be reached at [REDACTED]. A pre-event assessment from the Fusion center is required for all protest events, whether spontaneous or planned. When appropriate and possible, the Office of the Sheriff’s designated Terrorism Liaison Officer (TLO) shall
assist the Incident Commander in maintaining coordination with the
NCRIC.

5. The Incident Commander shall make every effort to establish contact and
communication with the event or demonstration planners.

a. Stakeholder involvement is critical to the overall success of
managing crowd events and/or civil disobedience during
demonstrations. If knowledge exists that a demonstration or crowd
event may happen or will happen, the Incident Commander shall
proactively and repeatedly make every reasonable attempt to
establish and to maintain communication and cooperation with
representatives or leaders of the demonstration or crowd event,
without regard to whether a permit has been applied for or issued.

b. When planning for and responding to demonstrations, crowd
events, and civil disobedience situations, Incident Commanders
assigned to these incidents shall facilitate the involvement of
stakeholders. If and when communication is established, personnel
shall make every effort to identify representatives or leaders of the
event and identify a primary law enforcement liaison. The primary
law enforcement liaison should be requested to be in continuous
contact with an assigned law enforcement representative, preferably
the Incident Commander or designee with continuous access to the
Incident Commander.

c. A group's failure to respond to the Office of the Sheriff’s attempts to
establish communication and cooperation prior to a demonstration
shall not mitigate this Office’s efforts to establish liaison and
positive communication with the group as early as possible at the
scene of the demonstration or crowd event.

6. Spontaneous demonstrations or crowd events, which occur without
prior planning and/or without prior notice to the Office of the Sheriff
present less opportunity for planning and prevention efforts.
Nonetheless, the same policies and procedures concerning crowd
management, crowd control, crowd dispersal, and law enforcement
responses to violence and disorder apply to a spontaneous
demonstration or crowd event situation as to a planned demonstration
or crowd event. Incident Commanders shall involve representatives
of demonstrators or crowd events when planning and responding to both planned and spontaneous events.

7. The Incident Commander shall, as appropriate, coordinate with and use the Mutual Aid Mobile Field Force (MAMFF), the Special Weapons and Tactics Team (SWAT), and such other Office of the Sheriff and other law enforcement special teams as may be necessary to preserve or restore order and keep the peace.

B. DEPLOYMENT.

1. Crowd dispersal and general strategies about crowd containment or crowd redirection, multiple simultaneous arrests, planned individual arrests, or planned use of force shall be determined at the level of the Incident Commander or higher.

   a. If such decisions are made by higher ranking off-site Office of the Sheriff Commanders, every effort should be made to first consult the Incident Commander concerning the state of affairs in the field and the potential consequences of the decision.

   b. All such decisions shall be documented in writing with regard to time, the identity of the person making the decision, and the precise decision and directions given. Such documentation shall be made at the time of the decision or as soon thereafter as possible and included in an After Action Report.

   c. This directive shall not preclude individual commanders, supervisors, and Deputies from defending themselves or others from imminent danger when the delay in requesting permission to take action would increase the risk of injury.

2. Communication with the identified law enforcement liaison shall continue even if enforcement actions commence.

3. As staffing permits, Deputies should be deployed to the best available vantage points to observe and report crowd actions. Observation may be assisted by the use of video cameras focused on public areas.
4. Lines of control should be established, especially in events that involve protesters with opposing views. Whenever possible, hostile factions should be separated.

5. Considering the nature of the subject crowd is an important factor in responding properly to its behavior.

   a. Crowds may vary from cooperative or celebratory to non-compliant, hostile, and combative. Organized demonstrations in which some engage in coordinated, nonviolent civil disobedience should be distinguished, to the extent possible, from crowds in which substantial numbers of people are engaged in more serious unlawful acts.

C. POLICING A CROWD

1. Sufficient resources to make multiple simultaneous arrests should be available at demonstrations where such arrests are a reasonable possibility.

   a. Where additional resources are needed, the Incident Commander shall determine whether it is appropriate for such additional resources to be deployed so they are not readily visible to the demonstrators, as a large and visible law enforcement presence may impact the exercise of free speech rights.

2. When possible, Deputies should be at their posts well in advance of arriving participants.

3. Each Deputy shall wear a badge, nameplate, or other device on the outside of his or her uniform or on his or her helmet which bears the name of the Deputy, as required by Penal Code§ 830.10.

   a. The Deputy’s name shall be clearly visible at all times. The letters or numerals on helmets, jackets, and vests shall be clearly legible. No Deputy shall conceal his or her identity.

4. Crowd control and crowd dispersal, as well as a show of force in crowd control situations, should be accomplished whenever possible
using the Office of the Sheriff’s specialized units rather than on-duty Patrol Deputies.

5. It is essential to distinguish between the lawful and unlawful conduct of separate demonstrators. The Incident Commander shall seek to minimize the risk that force and arrests may be directed at innocent persons.

6. Deputies shall avoid negative verbal engagement with members of the crowd. Generally, the sole basis for verbal contact with a crowd is to provide clear instructions.

   a. Verbal abuse, unless unlawful, against Deputies shall not constitute a reason for an arrest or for any use of force against such individuals.

7. No action shall be taken solely on the content of the opinions being expressed nor by the race, gender, sexual orientation, physical disabilities, appearances, or affiliation of persons exercising their lawful rights.

8. Deputies must maintain professional demeanor despite behavior of demonstrators.

9. Deputies in non-violent crowd situations shall not deploy weapons before a dispersal order is given or other enforcement action is implemented.

10. Deputies shall not be sent into an obviously hostile crowd solely for the purpose of communication. Deputies shall not penetrate a crowd for an individual arrest unless the targeted individual is involved in serious criminal conduct and the decision to move into the crowd is made by a supervisor or commander.

11. The Incident Commander and supervisors ensure that the law enforcement mission is accomplished as efficiently and unobtrusively as possible.

   a. The use of force shall be restricted to circumstances authorized by law and to the degree reasonably necessary in light of the
circumstances facing law enforcement personnel. This directive does not preclude Deputies from taking appropriate action to direct crowd and vehicular movement; enforce ordinances and statutes; and employ the physical force necessary to maintain the safety of the crowd, the general public, law enforcement personnel, and emergency personnel.

VI. RESPONSES TO CROWD SITUATIONS.

A. EVENT OR INCIDENT (WHETHER SPONTANEOUS OR PLANNED)

1. The applicable Station House Commander, or during evening hours the Watch Commander, shall respond to the scene of spontaneous events, when practical, and take command of the incident as the Incident Commander until relieved by a ranking officer.

   a. The Incident Commander shall declare over the Sheriff’s radio that he or she has assumed command of the incident. When practical, a command post shall be established as soon as possible.

2. An immediate assessment of the situation is essential for effective law enforcement response. The Incident Commander must ascertain the following information at the earliest possible time:

   a. Determining the time, location, and type of activities planned.

   b. Estimating the number of persons expected to participate or observe.

   c. Analyzing the expected means and routes of travel for participants and expected times of arrival and departure.

   d. Partnering with the state and or the NCRIC to conduct a public safety assessment of the event and its organizers to determine what public safety concerns might be associated with the event and whether violence or other criminal conduct is anticipated or might reasonably occur at the event.

B. PLANNED EVENT INVOLVING POTENTIALLY LARGE CROWDS.
1. Upon notification, the Incident Commander shall develop a written operations plan.
   a. The Incident Commander shall be responsible for the overall coordination of the event as well as for crowd control and management.
   b. Operations plans for large events requiring the redeployment of personnel from regular assignments shall be approved by the Undersheriff.
   c. The Incident Commander shall designate an Event Coordinator, who shall gather and analyze intelligence, meet in advance with event sponsors and group leaders to exchange information and to present the Office of the Sheriff’s philosophy and intent, prepare operations plans as requested, assure coordination with the NCRIC, and perform such other duties as assigned by the Incident Commander.

2. Personnel creating an operations plan to address a large crowd event should anticipate a variety of scenarios and devise a law enforcement response for each. Such scenarios and responses should be made part of the final plan and communicated to the affected personnel.

3. Personnel shall be briefed on the operations plan and their particular assignments before deployment.

VII. PERMISSIBLE CROWD CONTROL AND CROWD DISPERSAL TECHNIQUES

A. In the event of a declared unlawful assembly, the Incident Commander shall generally order Deputies to make multiple simultaneous arrests to deal with a non-violent demonstration that fails to disperse and voluntarily submits to arrest as a form of political protest.

B. The Incident Commander shall determine what control action, if any, will be taken to address a given crowd situation.

C. The Incident Commander shall constantly reassess and adjust tactics, as necessary, as the crowd's actions change.
D. The Incident Commander shall consider and take reasonable and appropriate steps to ensure the safety of bystanders.

E. When Deputies take action to move or disperse a crowd, steps should be taken to ensure that the crowd is not moved into a position or place that could be dangerous to persons in the crowd or bystanders, such as pushing them up against glass windows.

F. WHEN AN UNLAWFUL ASSEMBLY MAY BE DECLARED

1. The definition of an unlawful assembly has been set forth in Penal Code Section 407 and interpreted by court decisions. The terms, "boisterous" and "tumultuous," as written in Penal Code Section 407, have been interpreted as "conduct that poses a clear and present danger of imminent violence" or when the demonstration or crowd event is for the purpose of committing a criminal act.

   a. Deputies may not disperse a demonstration or crowd event before demonstrators have acted illegally or before the demonstrators pose a clear and present danger of imminent violence.

2. The mere failure to obtain a permit, such as a parade permit or sound permit, is not a sufficient basis to declare an unlawful assembly. There must be criminal activity or a clear and present danger of imminent violence.

3. The fact that some of the demonstrators or organizing groups have engaged in violent or unlawful acts on prior occasions or demonstrations is not grounds, standing alone, for declaring an assembly unlawful.

4. Unless emergency or dangerous circumstances prevent negotiation, crowd dispersal techniques shall not be initiated until after attempts have been made through contacts with the law enforcement liaisons and demonstration or crowd event leaders to negotiate a resolution of the situation so that the unlawful activity will cease and the First Amendment activity can continue.
G. DECLARATION OF UNLAWFUL ASSEMBLY

1. When the only violation present is unlawful assembly, the crowd should be given an opportunity to disperse rather than face arrest.

   a. Crowd dispersal techniques shall not be initiated until the Incident Commander or designee has (or designees have) made repeated announcements to the crowd, asking members of the crowd to voluntarily disperse and informing them that, if they do not disperse, they will be subject to arrest.

   b. These announcements must be made using adequate sound amplification equipment in a manner that will ensure that they are audible over a sufficient area. The dispersal orders should be repeated after commencement of the dispersal operation so that persons not present at the original broadcast will understand that they must leave the area. The announcements shall also specify adequate egress or escape routes.

   c. The Incident Commander will ensure that all such announcements are made in such a way that they are clearly audible to the crowd and to deputies.

      i. The Long Range Acoustic Device (LRAD) may be used to ensure that public announcements are heard when appropriate considering crowd size, distance, and ambient volume. Only LRAD devises purchased by the Office of the Sheriff may be used as such devises are not equipped with sonic weapon capability. The Incident Command shall assure, prior to the use of the LRAD, that the volume output is set at a level that is appropriate for the delivery of the announcement without unduly causing harm to those persons (demonstrators and others) in the sound path.

2. Unless an immediate risk to public safety exists or significant property damage is occurring, sufficient time will be allowed for a crowd to comply with dispersal commands before action is taken.
3. The Incident Commander should ensure that the name of the individual making the dispersal order and the date/time each order was given is documented.

4. Dispersal orders should not be given until Deputies are in position to support/direct crowd movement.

5. Personnel shall use the following dispersal order:

“I am (rank/name), a peace officer in the Contra Costa County Office of the Sheriff. I hereby declare this to be an unlawful assembly, and in the name of the people of the State of California, command all those assembled at (state location) to immediately leave. If you do not do so, you may be arrested or subject to other law enforcement action, including the use of force which may result in serious injury. Section 409 of the Penal Code prohibits remaining present at an unlawful assembly. If you remain in the area just described, regardless of your purpose, you will be in violation of Section 409. The following routes of dispersal are available (state routes). You have _____ minutes to leave. If you refuse to move, you will be arrested.”

Note: Add the following chemical warning only if use is anticipated: “If you refuse to move, chemical agents may be used.” The dispersal order must be given in English. It may, however, also be given in such other languages as are appropriate in the judgment of the Incident Commander.

6. When a command decision is made to employ crowd dispersal techniques, attempts to obtain voluntary compliance through announcements and attempts to obtain cooperation through negotiation shall both be continued. At any point at which a crowd is dispersing, whether as a reaction to law enforcement dispersal techniques, through voluntary compliance, or as a result of discussion or negotiation with crowd leaders, dispersal techniques shall be suspended and the crowd shall be allowed to disperse voluntarily. This directive does not preclude a command decision to reinstate dispersal techniques if crowd compliance ceases.
H. APPROVED TACTICS AND WEAPONS TO DISPERSE OR CONTROL A NON-COMPLIANT CROWD

1. If negotiation and verbal announcements to disperse do not result in voluntary movement of the crowd, Deputies may employ additional crowd dispersal tactics, but only after orders from the Incident Commander or the designated supervisory officials.

a. The use of these crowd dispersal tactics on a non-compliant crowd shall be consistent with the Office of the Sheriff’s policy of using the minimal law enforcement intervention needed to address a crowd management or control issue.

b. Law Enforcement Formations and Use of Batons.

   i. If a crowd refuses to disperse after the required announcements, squad or platoon formations (skirmish line, wedge, echelons, etc.) may be used to move the crowd along.

   ii. Batons shall not be used for crowd control, crowd containment, or crowd dispersal except as specified below.

      (1) Batons may be visibly displayed and held in a ready position during squad or platoon formations.

c. Chemical Agents.

   i. Except in exigent circumstances, chemical agents will never be used against passive protestors.

   ii. The use or discharge of a chemical agent shall not be used in demonstrations or other crowd events without the approval of the Incident Commander.

   iii. Chemical agents can produce serious injuries or even death. An elderly person or an infant in the crowd, or an individual with asthma or other breathing disorder, may
have a fatal reaction to chemical agents even when those chemical agents are used in accordance with the manufacturer's recommendations and training. Thus, crowd control chemical agents shall be used only if other techniques, such as encirclement and multiple simultaneous arrest or law enforcement formations, have failed or will not accomplish the policing goal as determined by the Incident Commander.

iv. When chemical agents are appropriate, Deputies shall use the minimum amount of chemical agent necessary to obtain compliance.

v. Chemical agents shall not be used for crowd control or dispersal without first giving an appropriate and meaningful audible warning of their imminent use and giving reasonable time to the crowd, media, and observers to disperse unless such announcement is tactically inappropriate.

vi. If chemical agents are contemplated in crowd situations, the Incident Commander or designee shall, if possible, request medical personnel to be available prior to their use. If circumstances require the use of chemical agents in crowd situations without prior notification of medical personnel, they shall be called in as soon as possible following the use of chemical agents.

H. MUTUAL AID MOBILE FIELD FORCE (MAMFF).

1. In recognition that MAMFF is a multi-agency force, nothing in this policy shall prohibit MAMFF members from other agencies from operating according to the policies of their respective agencies. MAMFF membership is comprised of 25 agencies within Contra Costa County. The Mutual Aid program (Policy 1.02.26 “Mutual Aid”) mandates the implementation of cooperative law enforcement agreements with neighboring agencies and counties, and provides for the quick and efficient augmentation of resources in the event of an emergency situation requiring capabilities beyond those of the affected agency.
VIII. THE FOLLOWING ARE PROHIBITED DURING CROWD CONTROL EVENTS

A. **FIRE HOSES**

   1. Fire hoses (i.e., water under pressure) shall not be used for crowd control, crowd containment, or crowd dispersal.

B. **LAW ENFORCEMENT VEHICLES**

   1. Law Enforcement vehicles (including Motorcycles) may not be used for crowd dispersal but may be used for purposes of observation, visible deterrence, traffic control, transportation, and area control during a crowd event, except by Deputies who have received specific training in the use of such techniques, i.e. MAMFF training.

C. **SPECIALTY IMPACT LESS-LETHAL WEAPONS**

   1. Skip Fired Specialty Impact Less-Lethal Munitions (Wooden Dowels) are prohibited. Stinger Grenades shall not be used against persons who are protesting civilly and passively and who are not directly involved in a criminal act. Stinger ball grenades will not be used against individuals engaged in unlawful conduct where such use might result in passive resisters being hit. When deemed appropriate by the Incident Commander, the soft blue tip 40mm rounds may be used to target a specific individual engaged in unlawful conduct.

D. **ELECTRONIC WEAPONS (EW'S)**

   1. EW's such as tasers, stun guns, and stun shields shall not be used for crowd management, crowd control, or crowd dispersal during demonstrations or crowd events.

E. **AEROSOL HAND-HELD CHEMICAL AGENTS**

   1. Aerosol, hand-held, pressurized, containerized chemical agents that emit a stream shall not be used for crowd management, crowd control, or crowd dispersal during demonstrations or
crowd events. Aerosol hand-held chemical agents may not be used indiscriminately against a crowd or group of persons, but only against specific individuals who are engaged in specific acts of serious unlawful conduct or who are actively resisting arrest.

2. Members shall use the minimum amount of the chemical agent necessary to overcome the subject's resistance.

3. Aerosol chemical agents shall not be used in a demonstration or crowd situation or other civil disorders without the approval of a supervisor or command officer.

IX. ARRESTS

A. MULTIPLE SIMULTANEOUS ARRESTS

1. The Incident Commander shall make the decisions to engage in selective individual arrests or multiple simultaneous arrests as a crowd control technique with consideration given to the following factors:

   a. The likelihood that law enforcement action will improve the situation relative to taking no action.

      i. Such consideration shall include the seriousness of the offense(s) as opposed to the potential for the arrest to escalate violence or unlawful activity by crowd members.

   b. Whether individual or mass arrests will be more effective in ending the criminal activity at issue.

   c. Whether clear and secure escape routes have been established for the crowd and law enforcement.

   d. Whether communication has been established with crowd representatives.

   e. What contingency plans are available.
f. What types of force can be used in effecting the arrests, if necessary.

2. The Incident Commander shall ensure that evidentiary items are recovered and preserved, when possible, to corroborate unlawful acts observed by personnel.

B. ARRESTS OF NON-COMPLIANT PASSIVE DEMONSTRATORS

1. The proper response to such actions is to verbally advise the demonstrators that they will be subject to arrest if they choose to remain, allow time for some or all the demonstrators to cease the unlawful activity, and to arrest those who deliberately remain in violation of the law.

2. In some situations, demonstrators may lock arms or use locking devices to impede the arrest process.

   a. The Deputy shall continue to give verbal directions to give the arrestee a chance to comply before force is used to unlock arms or implements used to remove locking devices.

C. ARREST OF JUVENILES

1. Juveniles arrested in demonstrations shall be handled consistent with Office of the Sheriff policy on arrest, transportation, and detention of juveniles.

X. DOCUMENTATION

A. VIDEO AND PHOTOGRAPHIC RECORDING

1. Deputies will not videotape or photograph lawful First Amendment protest events, gatherings, or assemblies solely for intelligence gathering purposes. This policy is not meant to preclude the photography of criminal activities for law enforcement purposes.
2. Videotaping and photographing of First Amendment activities shall take place only when authorized by the Incident Commander or other supervisory officer.

3. Each camera operator shall provide information to be included in a crime report.

4. Unless they provide evidence of criminal activity, videos or photographs of demonstrations shall not be disseminated to other government agencies, including federal, state, and local law enforcement agencies. Where evidence of criminal activity is recorded, should such videos or photographs be disseminated or shared with another law enforcement agency, a record should be created and maintained noting the date and recipient of the recording.

XI. PUBLIC INFORMATION AND THE MEDIA

A. The media have a right to cover demonstrations, including the right to record the event on video, film, or in photographs.

B. Deputies shall accommodate the media in accordance with the News Media Relations Policy (Policy 1.06.78).

C. The media shall be permitted to observe and to videotape the demonstration and the law enforcement response. Even after a dispersal order has been given, clearly identified media shall be permitted to carry out their professional duties in any area where arrests are being made unless their presence would unduly interfere with the enforcement action.

D. Self-identified legal observers and crowd monitors do not have the same legal status as the professional media and are, therefore subject to all laws and orders similar to any other person or citizen.

1. Such persons must comply with all dispersal orders similar to any other person or citizen.

   a. A supervisor or commander may, at his or her discretion, permit a person who self-identifies as a legal observer or
crowd monitor to remain in an area after a dispersal order if circumstances permit and if the person's presence would not unduly interfere with the enforcement action.

b. The media, legal observers, crowd monitors, law enforcement liaison, and/or organizers shall never be targeted for dispersal or enforcement action because of their status.

E. On request, the Incident Commander or a supervisor may inform the media, legal observers, crowd monitors, law enforcement liaison, and/or organizers about the nature of any criminal charges to be filed against arrestees, the location where arrestees are being taken, and the Office of the Sheriff’s intent for arrestees to be cited out or booked at a detention facility.

XII. POST EVENT MANAGEMENT

A. At the conclusion of the event, the Post Event Stage should be initiated. The After Action Review (AAR) should be according to NIMS (National Incident Management System) guidelines in order to assess and evaluate organizational performance.

B. Information collected as part of the pre-event assessment or during the event should be evaluated to determine whether certain pieces of information should be retained to facilitate planning and preparation for future events or whether there is a criminal predicate that may necessitate the need to retain the information. Information regarding First Amendment activities should not be retained to facilitate planning and preparation for events that are unlikely to recur or for other administrative purposes, unless needed for criminal prosecution or if the information reaches the threshold for inclusion into a 28 CFR Part 23 criminal intelligence database.

C. The Incident Commander will coordinate with Command Staff personnel to ensure the following steps and procedures are met:

1. Operational:
   a. Account for all personnel engaged in the incident and assess for personal injuries.
b. Identify and interview witnesses, suspects and victims as appropriate.

c. Debrief with all supervisors involved in the event.

d. Debrief with all personnel involved in the event, including support personnel if practical.

e. Identify and appropriately document any use of force and/or injuries.

f. Ensure all crime and administrative reports are completed in a timely manner.

g. Brief the Public Information Officer on the results of the event, such as the number of arrests, charges, number of injured (Deputy/civilian), so press inquires can be resolved expeditiously and appropriately.

h. Identify staffing/logistics issues for future operational periods or deployments.

i. Hold a Command Staff meeting to debrief the event and critique the actions conducted during the event.

j. The Incident Commander will ensure an after action report is completed in a timely manner.

2. Administrative:

a. Evaluation of Information. Information collected as part of the Pre-Event Assessment or during the event should be evaluated to determine whether certain pieces of information should be retained to facilitate planning and preparation for future events or whether there is a criminal predicate that may necessitate the need to retain the information. All information retained should meet the criteria established for inclusion into a 28 CFR Part 23 criminal intelligence database and the U.S. Department of Justice law Enforcement Guidelines for First Amendment-Protected Events.

b. Video and Photographic Images. Upon the conclusion of the event, all video or photographic images taken at the event shall be evaluated for legal and training purposes. The video or images captured will be stored as evidence at the Property Unit.
c. Retention of Information. The retention of information will be in accordance with 28 CFR Part 23. The Office of the Sheriff will limit its retention of information as much as possible to avoid the perception of maintaining files on groups or persons who engage in protected First Amendment activities. If deemed appropriate to retain, contact information of event organizers and event logistical information, along with the response summary and any press releases, should be placed only in an administrative file in order to provide law enforcement with historical perspective on the activity, in the event that event organizers or other organizations seek to hold additional demonstrations or other law enforcement agencies request information on the event.

d. Reporting. In addition to such reports as are required pursuant to this Policy and Policy 1.06.41 “Report Writing,” the “Major Incident Critique” provided in Policy 1.06.27, if applicable to a Crowd Control and Management event, and the “Unusual Incident Notification Procedure” provided in Policy 1.06.21, shall be followed.

e. Evaluation and Feedback. At the conclusion of the event, the Support Services Bureau Assistant Sheriff or designee shall initiate a review of the full process that was undertaken for the event, including the Pre-Event Stage, Operational Stage, and Post-Event Stage. The purpose of this review is to ensure that law enforcement conducted an appropriate public safety assessment and properly responded to the event. Further, the review should evaluate the execution of the Operations Plan and identify any deficiencies or lessons learned.
I. **POLICY.**

A. Deputies shall use only that degree of force that is objectively reasonable to protect themselves and others, or to overcome resistance to their lawful authority.

II. **DEFINITIONS.**

A. **CHEMICAL AGENT:** A substance in either liquid or solid form, intended to produce temporary irritation and physical discomfort in a person, containing formulations of chloroacetophenone (CN), chlorobenzylidene malononitrile (CS), or oleoresin capsicum (OC).

B. **DEADLY FORCE:** Any use of force that creates a substantial risk of causing death or serious bodily injury.

C. **DISTRACTION DEVICE:** A device that produces a loud report, brilliant flash, smoke and may disperse a quantity of small rubber balls in a circular pattern that is intended to temporarily distract and disorient a person.

D. **DEPLOY:** Making a force option ready for use by taking it out of a vehicle, holster or other mode of carry.

E. **DISCHARGE:** Firing or activating a weapon.

F. **POLICE INVOLVED DISCHARGE OF A FIREARM:** Any police investigation directly involving two or more people in which an on-duty or off-duty police employee has fired his or her weapon as an intentional use of force that does not result in serious injury.

G. **DISPLAY:** Showing a weapon for effect without discharging it.

H. **ELECTRONIC WEAPON:** A device that uses propelled probes or direct contact and is designed to subdue a person by inducing involuntary muscle contractions that cause temporary incapacitation.

I. **CYCLE:** Single trigger pull and release resulting in an electrical charge for a duration of 5-seconds.
J. FORCE: Any physical effort, use or discharge of a weapon used to control, restrain, or overcome the resistance of another.

K. IMPACT PROJECTILE WEAPON: Any device that is designed to, or that has been converted to expel or propel a projectile by any action, mechanism, or process for the purpose of incapacitating, immobilizing, or stunning a human being through the infliction of any less than lethal impairment of physical condition, function, or senses, including physical pain or discomfort.

L. AUTHORIZED PERSONNEL: All sworn personnel and other personnel specifically authorized and fully trained and certified, as necessary, to carry and use an Electronic Weapon (EW) as specified in this policy.

M. NON-DEADLY FORCE: Any use of force other than that which is deadly force. This includes any physical efforts used to control or restrain another, or to overcome the resistance of another, other than the mere application of temporary restraining devices on a compliant person.

III. GENERAL.

A. DECISION TO USE FORCE. A Deputy’s decision to use force shall take into consideration the facts and circumstances of each individual situation. Factors a Deputy should consider when deciding to use force in a given situation include but are not limited to:

1. Severity of the crime at issue;
2. Whether the suspects pose an immediate threat to the safety of Deputies or others;
3. Whether the suspects are actively resisting arrest or attempting to evade arrest by flight;
4. The time available to make decisions;
5. Number of Deputies versus number of suspects;
6. Proximity to potential weapons (the Deputy’s or others);
7. Age, size and relative strength of Deputy versus suspect;
8. Suspect’s special knowledge or skill level;
9. Deputy’s injury or exhaustion;
10. Suspect’s mental illness, emotional disturbance, or drug usage and impact on pain tolerance or rationality of response;
11. Knowledge of/or prior contacts with suspect;
12. The opportunity when feasible to give a warning in cases where force may result in serious injury, unless such a warning would increase the risk of greater injury to Deputies, citizens, or the suspect;
13. Potential for and risk of escape;
14. Environmental factors, i.e. lighting, terrain, etc.
B. USE OF FORCE. The amount of force used shall only be the amount that is objectively reasonable to control the resistance encountered in light of all the relevant circumstances. The force used should not be escalated unless it’s reasonably determined that a lower level of force would not be adequate, or such a level of force is attempted and found to be inadequate. When deciding to use force, Deputies should consider the following specific factors for evaluating their use of force:

1. The need for the use of force;
2. The relationship between the need and the amount of force to be used;
3. The extent of potential injuries that could result;
4. The threat reasonably perceived by the Deputy;
5. Other available force options that could temper the severity of a forceful response.

C. AUTHORIZED WEAPONS AND FORCE TECHNIQUES. Deputy Sheriffs shall only carry and should only use approved weapons and force techniques for which they have received and completed P.O.S.T. certified and/or Sheriff’s Office authorized training. However, it is recognized that deputies are expected to make split-second decisions in circumstances that are tense, uncertain and rapidly evolving, regarding the amount and type of force option(s) necessary in a particular situation. It may become necessary for Deputies to improvise a response to a rapidly evolving set of circumstances, wherein the use of standard weapons and/or force option techniques would be impractical or ineffective. In such circumstances, the improvised weapon or force option technique must be objectively reasonable and used only to that degree reasonably necessary to accomplish a legitimate law enforcement purpose. The need to use such force option will be clearly stated in the required reports.

D. FORCE OPTIONS. The Office of the Sheriff recognizes a Deputy’s need for a degree of flexibility in making use of force assessments given the fluid dynamics of a confrontation. The standard for evaluating a Deputy’s use of force is “reasonableness under the facts and circumstances known to the Deputy at the time.” Therefore, a Deputy may choose any of the following force options, including no use of force, provided the force option selected is objectively reasonable.

1. Professional Presence Non-Verbal and Verbal (no force). Includes display of authority as a peace officer and such non-verbal means of communication as body language, demeanor, and manner of approaching. Verbalization involves the directions and commands given to the subject.
2. Control, Search and Handcuff. Includes restraining and detaining by a Deputy laying hands on a subject with the intention of gaining control of the subject. Examples include the use of a firm grip, escort position or grappling types of techniques designed to hold a subject down by using the weight of a Deputy’s body. Also included in this level would be the application of temporary restraining devices such as handcuffs and leg restraints (hobble devices).
3. Defensive Tactics. Includes techniques such as control holds, joint
manipulations, pressure point applications, takedowns, and ground grappling.

4. **Chemical Agents.** Includes substances in either liquid or solid form, including chloroacetophenone (CN), chlorobenzylidene malononitrile (CS), or oleoresin capsicum (OC).
   a. **Pepper Spray.** Oleoresin Capsicum (10% by volume.)
   b. **First Defense MK-9 Magnum "Pepper Fogger".** This Oleoresin Capsicum fogging device is employed primarily, though not exclusively, in situations where potentially vicious animals are an obstacle to a law enforcement operation. Use of this device is to reduce the necessity of having to dispatch a family pet in order to gain access to the targeted property.

- Whenever possible, a prearranged contingency briefing for taking care of potentially vicious animals shall take place prior to taking action. When appropriate, Animal Control should be called to ascertain availability.

5. **Electronic Weapon (EW).** A department authorized hand held device or shield, which imparts an electrical charge.

6. **Personal Weapons.** Includes parts of the human body such as hands, feet, elbows and knees to strike a suspect.

7. **Intermediate Weapons.** Includes impact weapons such as straight batons, side handle batons, and collapsible batons of either variety used in the application of a control technique or in an impact mode.

8. **K-9.** The deployment of a specially trained dog by a certified handler. The function of the dog is to conduct building searches, assist in arrest or prevention of escape of serious or violent offenders, protect Deputy or others from death or serious injury, or other assignments with approval of K-9 Unit Supervisor.

9. **Specialized Weapons.** Includes items such as impact projectiles or ammunition which is designed to immobilize, incapacitate or stun a human being through the infliction of any less lethal impairment of physical condition, function, or senses, including physical pain or discomfort.

10. **Carotid Restraint.** Includes upper body control holds such as the Lateral Vascular Neck Restraint (LVNR).

11. **Firearms.** Includes handguns, rifles, shotguns, and automatic weapons authorized for use by the Office of the Sheriff.

12. **Deadly Force.** The use of deadly force is not limited to the use of firearms. Deadly force options may include the intentional use of legal intervention techniques and any physical means which creates a substantial risk of causing death or serious bodily injury. Note that any force option listed above may be categorized as “deadly force” when used intentionally in a manner that falls within the definition of deadly force. For example, intentionally directing a baton strike to the head of a suspect would be a use of deadly force. A Deputy may use deadly force
only where he or she has probable cause to believe that a suspect poses a significant threat of death or serious physical injury to the Deputy or others.

IV.  PROCEDURE 1.

A.  USE OF CHEMICAL AGENTS. Chemical agents (CN Mace or aerosol OC) will only be used as a defensive or control weapon in those instances that threaten the safety of the Deputy or other persons, to overcome resistance, to prevent escape and to effect an arrest. Chemical agents will not be used against compliant persons. Application:

1. The primary target area for application of chemical agents is the facial area with coverage of the forehead, and brow. A secondary target area is the nose and mouth.

2. Use short, multiple one-half second bursts, spraying into the facial area (bursts of longer duration seldom increase effectiveness but do increase the possibility of injury).

3. CN Mace is most effective at a distance of approximately five to seven feet, although it can be used up to ten to twelve feet in calm air. Aerosol OC is most effective at a distance of approximately five to ten feet, although it can be used up to fifteen feet in calm air. If it is necessary to use CN Mace or aerosol OC at less than five feet, Deputies should avoid aiming directly at eyes.

4. Deployment sequence
   a. Spray the person.
   b. Command the person to get on the ground.
   c. Evaluate the person’s response. If necessary, repeat the first two steps.
   d. Control the person. Handcuff if necessary. Avoid pressing down on the person’s back.
   e. Care for the person. Provide medical treatment and decontamination as soon as possible.

5. Aerosol OC is effective against persons and animals, i.e. angry or attacking dogs. CN Mace is only effective against persons and will not incapacitate animals.
   - The MK-9 Magnum "Pepper Fogger" is an effective use of OC against angry or attacking dogs due to the area it covers and the amount that is released. Its purpose is to disable the animal in question so that Animal Control or Deputies can safely contain it before there is a necessity to dispatch it.

6. Once deployed, the use of chemical agents must be reported to the immediate Supervisor and recorded in a crime or incident report.

7. In any facility where ICE Detainees are permanently housed, (1) No chemical agent other than OC may be used on ICE Detainees, and (2) No chemical agent other than OC may be stored.
B. USE OF ELECTRONIC WEAPONS (EW). Electronic Weapons can be used safely and effectively to temporarily incapacitate a subject. A subject who receives a discharge from an EW through a probe or a drive stun discharge should experience considerable discomfort for the duration of the application. The subject will normally recover and be physically functional after the application is terminated.

1. Electronic Weapons will only be used by authorized personnel who are trained and certified in their use and authorized by his/her Division Commander.
   a. The Electronic Weapon will be maintained in an authorized holster on the authorized personnel’s non-dominant side and drawn with the non-dominant hand to avoid possible confusion with their firearm. Cross draw of the Electronic Weapon is not authorized, except under exigent circumstances. Personnel who are authorized to use and carry EWs may carry a second cartridge.
   b. Only Office of the Sheriff authorized EWs will be used by authorized personnel.
   c. An EW which has been discharged will be taken out of service until it has been checked by qualified personnel and approved for redeployment, except in a continuing incident or exigent circumstances.

2. The EW, with proper probe placement, may incapacitate the following:
   a. Humans
   b. Domesticated animals
   c. Wild animals

3. Electronic Weapons will not routinely be used against the following subjects except under exigent circumstances:
   a. Subjects who are demonstrating passive resistance or are unresponsive.
   b. Women who are known to be pregnant
   c. Subjects who appear to be elderly
   d. Subjects who appear frail
   e. Young children
   f. Subjects who are handcuffed or restrained unless they are actively resisting or attempting to harm themselves or others.
   g. Subjects who are in a location where they could fall from a substantial height or into a pool, river, or other body of water where it is likely they would suffer serious injury or death due to the fall.

4. Electronic Weapons shall not be used:
   a. In a punitive manner, or to extract contraband or evidence.
b. In an environment where potentially flammable, volatile, or explosive materials are known to be stored (such as a clandestine lab).

c. If it is known the subject has been exposed to flammable liquids. (Some oleoresin capsicum sprays carried by allied agencies contain flammable carriers)

d. Against a person in control of a motor vehicle if it is reasonable to believe the vehicle could be put into motion or is in motion.

e. On ICE Detainees housed within the detention facilities.

5. Electronic Weapons may be used to:

a. Control, detain or arrest a person who is actively resisting and/or poses an immediate threat to the Deputy or others.

b. Protect a person from serious self-injury or suicide.

c. Prevent escape.

d. Conduct an extraction of an aggressive or resistant person from a jail cell when other methods pose greater risk to individuals involved.

6. Authorized personnel may display the EW and the EW's electrical arc if he/she reasonably believes it will avert a potentially dangerous situation or physical confrontation and the authorized personnel has ensured the cartridge has been removed from the EW.

7. When feasible, prior to discharging the EW, the authorized personnel should announce their intent to discharge the EW unless:

a. The announcement would place the authorized personnel at risk

b. The circumstances do not allow time for the announcement

8. The authorized personnel shall avoid intentionally targeting the:

a. Head

b. Face

c. Neck

d. Throat

e. Groin

f. Spine
9. While targeting the upper chest is not prohibited, the upper chest is not the preferred target area and should be avoided when possible. The preferred target area is to “split the belt line,” one probe above and one probe below the waist.

10. After the initial EW cycle, the subject should be evaluated for compliance. Only the necessary number of cycles to affect an arrest shall be used.

11. If the subject refuses to comply after the initial or multiple EW cycles, the authorized personnel should consider whether additional cycles are making sufficient progress toward compliance/restraint or if transition to a different force option is warranted.

12. Multiple EWs should not normally be used on the same subject at the same time, but based on sound judgment and based on the needs of the tactical situation and/or officer safety, multiple EWs may be deployed (subject armed with a weapon).

13. Prolonged exposure without evaluation could have adverse effects on a subject’s health. Repeated exposure or exposure to multiple EWs electrical discharge may cause strong muscle contractions which may impair breathing and respiration, particularly when the probes are placed across the chest.

14. Use of the EW should be combined with physical restraint techniques to minimize the duration of the struggle and EW use. Additional authorized personnel on scene of an EW deployment can attempt to restrain and handcuff a subject during an active EW cycle.

15. Touching the subject between the probes or contacting the wires while the EW is activated may cause the authorized personnel to experience the effects of the EW. If the user attempting to handcuff the subject experiences the effects of the EW, the user should reposition his/her body and then re-approach to handcuff the subject.

16. After the subject is taken into custody in a patrol setting, which includes incidents related to Custody Alternative Facility (CAF), Health Services
Security (HSS), and Satellite Court Houses (Courts outside of Martinez), the subject’s medical condition will be assessed prior to transport. Factors to consider when determining proper transport/medical treatment:

a. Behavior of the individual prior to the discharge of the Electronic Weapon
b. Additional known/pre-existing medical conditions
c. Probe location
d. Secondary Injuries suffered by the individual during the application of the EW.
e. Signs of medical distress (excessive sweating, rapid or labored breathing, level of consciousness, etc.)

17. If there are any signs of medical distress or complications, the authorized personnel will request EMS personnel to evaluate and treat the subject prior to transport.

18. Upon exposure to an EW in a Detention Facility, or any Martinez Court House, the individual who was exposed will be examined by medical personnel (Jail Nurse, Paramedic, etc.). Medical evaluation will be verified by the on-duty supervisor.

a. On-duty medical staff will evaluate the condition of the individual with emphasis on any injuries that may have been sustained because of the use of an EW.

b. If the EW probes have penetrated the skin, the puncture sites shall be located and brought to the attention of medical staff for the treatment and removal if necessary.

19. If any of the probes are embedded in the following areas, the subject shall be transported to Contra Costa Regional Medical Center (CCRMC) for probe removal:

- Head
- Face
- Neck
- Throat
- Groin
- Spine

20. If the probes are still imbedded in the subject, avoid transporting the subject in a position that could further embed the probes in the subject. If this is not possible in a Patrol vehicle, an ambulance will be requested to transport.

21. When handling probes which have been used in a deployment or a
subject who was exposed to a probe deployment, the authorized personnel will take precautions for Bloodborne Pathogens and use proper evidence handling guidelines when logging the probes into evidence.

22. Whether by Patrol vehicle or ambulance, the subject will be transported to Contra Costa Regional Medical Center (CCRMC) where the probes will be removed and the subject will be medically cleared prior to booking at the Martinez Detention Facility.

23. Activations of an Electronic Weapon against an individual will be reported to a Supervisor as soon as practical.

24. The Training Division will implement annual proficiency training which shall be required for all personnel who are authorized to carry and use EWs.

C. USE OF DISTRACTION DEVICES. Distraction devices will only be used as a defensive or control device in those instances that threaten the safety of the Deputy or other persons. When properly deployed as part of an overall tactical plan, the distraction device can afford an enhanced margin of officer safety.

1. The primary target area for deployment of a distraction device is the floor area immediately inside a primary entry point, i.e. a door or other available means of ingress into a room or structure. A secondary deployment area may be any area where activation of the device will provide an enhanced margin of officer safety by attracting a suspect’s attention to the area of activation.

   a. Prior to deploying a distraction device, the Deputy deploying the device will visually check the immediate area where the device is to be deployed in order to ensure that no persons are in that immediate area. Extreme caution should be used upon deployment of a distraction device in areas where there is potential for fire hazard due to flammable vapors, gases, substances or other flame hazard.

D. USE OF IMPACT PROJECTILE WEAPONS.

1. Impact projectile weapons are intended primarily for use against persons who engage in conduct that is likely to result in serious harm to themselves or other person(s).

2. Such conduct includes but is not limited to, violent, combative, assaultive, and/or resistive behavior; when the person is either armed or unarmed.

3. Upon assessing and determining the need for the impact projectile weapon, the Deputy will request a Supervisor to respond. Additionally, the Deputy will advise the Supervisor of the circumstances. The Supervisor, if available, should make an assessment of the circumstances and situation. In determining whether or not the impact projectile weapon system should be used, the Supervisor, or Deputy when no Supervisor is available, will consider among other factors, the following:

   a. The individual is violently attacking, resisting, combative, and/or armed;
b. Tactical considerations indicate that the use of impact projectile system would provide greater officer safety and reduce the likelihood of serious or lethal injury to the suspect(s).

4. If the circumstances permit, the Supervisor or Deputy should make an attempt to have the subject submit to lawful authority without the use of the impact projectile weapon, and if feasible, should warn the subject of the intended use of the weapon should the subject not submit to lawful authority.

5. If the circumstances permit the Supervisor or Deputy to authorize the use of the impact projectile weapon, it shall be deployed as prescribed and in accordance with Sheriff’s Office approved training. Prior to deployment:
   a. A cover Deputy or Supervisor shall be assigned to the Deputy deploying the impact Projectile weapon;
   b. Deputies shall be prepared and ready to take the suspect into custody following deployment;
   c. Deputies on the scene should be advised prior to the deployment of the impact projectile weapon.

6. Impact projectile weapons shall be treated the same as firearms for safety practices. Refer to Office of the Sheriff Policy Section 1.07.12, Firearms Safety and Qualification for firearm safety practices.

E. USE OF BATON. When properly used, the baton can frustrate attacks on Deputies and aid in overcoming a hostile arrest situation.

1. The baton may be used as a defensive or control weapon in those instances that threaten the safety of Deputies or other persons, or to subdue and arrest combative persons. Deputies will not use the baton against non-combative persons. However, Deputies may use the baton as a control device when directing, controlling, or escorting uncooperative persons.

2. The Detention Division maintains specific restrictions regarding the use and carrying of batons. Absent authorization from the Facility Commander, batons shall not be carried into the security area of any Detention Facility.

F. USE OF CAROTID HOLD. The use of the Carotid hold is only authorized in life-threatening situations where other methods of restraint or less lethal or non-lethal weapons are not accessible or have been determined to be ineffective.

1. Chokeholds are not authorized restraint techniques.

G. USE OF FIREARM/DEADLY FORCE.

1. A firearm may be discharged only for one or more of the following circumstances:
   a. At an approved target range, or for evidence examination purposes;
   b. When killing a seriously wounded animal when other disposal is impractical or when killing an animal that poses an immediate threat of physical harm. Attempts should be made to:
• Wait for Animal Control, if possible;
• Confine or contain the animal, if possible;
• Consider deployment of pepper (OC) spray or other less lethal force;
• Use lethal force as a last resort, if other options are not reasonable.

c. When necessary in the defense of one's own life or to prevent serious physical harm;
d. When necessary in the defense of any person in immediate danger of death or serious physical injury;
e. To capture or prevent the escape of a person when ALL the conditions below are met:
   • There is reasonable belief the person is committing or has committed a violent felony which involves the use of deadly force;
   • The person's use of deadly force threatens or results in the death or serious bodily injury of another person; and
   • All other available means of apprehending the person have failed.

2. WHEN FIREARMS WILL NOT BE DISCHARGED. Firearms will not be discharged:
   a. As a warning;
   b. To effect the capture or prevent the escape of a person who is reasonably believed to be committing, or have committed, a felony which DOES NOT involve the use or threat to use deadly force;
   c. In any misdemeanor case;
   d. From or at a moving vehicle except in the defense of one's own life or the life of another person.

V. PROCEDURE 2.

A. PROVIDING MEDICAL AID AFTER USE OF FORCE. When use of force causes injury, which would reasonably require medical attention, the Deputies using such force will ensure the injured person receives proper medical attention as soon as possible.

1. Deputies will normally transport or arrange for transport of injured persons to the Contra Costa Regional Medical Center, unless the nature and/or extent of the injuries necessitate transport to a closer facility, or as directed by a Supervisor.

2. Medical Refusal
   a. Individuals who have had an EW exposure must make all refusals for medical treatment directly to medical personnel.
b The reporting deputy will ensure the refusal, and the staff member’s name receiving the refusal, are documented in their report.

VI. PROCEDURE 3.
A. REPORTING USE OF FORCE. Any member of the Office of the Sheriff who either uses force or witnesses the use of force by another member of this Office shall, as soon as possible, make an oral report to their immediate Supervisor. All such reports shall be made no later than the end of duty shift on which the force was used. In all cases where there is a use of force, as defined in this policy, a DR will be drawn and details of the use of force will be reported by the Deputy who used the force on either a Crime Report, or Detention Incident Report as applicable. All such reports will include:

1. Type of force used;
2. Reason for the use of force;
3. Extent of injury;
4. Other pertinent information the Deputy wishes to include;
5. If an animal shooting, conditions set forth in G, 1, b of this policy shall be observed.
6. If the incident preceding the use of force would normally be reported on a Crime Report, the details of the use shall be included in that report
7. Use of force reports where impact projectile weapons or distraction devices are used will also include:
   a. Name of the Deputy deploying the munition;
   b. Supervisor’s name authorizing deployment;
   c. Number of munitions deployed;
   d. Distance between the suspect and the Deputy deploying the munition;
   e. Area of suspect’s body struck by the munition(s); and
   f. Suspect’s reaction to the munition.
   g. If the subject is admitted to the hospital, send a copy of the report to: Office of the County Administrator, Risk Management Division, Assistant Risk Manager, 2530 Arnold Dr., Ste 140, Martinez, CA. 94553, Attn: Liability Claims or fax to number 335-1421 within 24 hours of the incident. An emergency room visit does not constitute a hospital admission.
8. Use of force against animals shall be documented in a separate memo to the Patrol Commander. A copy of the police report shall be attached to the memo. (The police report alone is not a substitute for this memo.) All such memos shall be cataloged by the Patrol Division for annual review by the Sheriff's Executive Team.
VII. PROCEDURE 4.

A. REPORTING USE OF AN EW.

1. The discharge of an EW during training does not require a report. The display of an EW does not require a report.

2. When an EW is discharged in the performance of law enforcement duties, the Deputy will thoroughly document the incident, including the details that led to its use, all pertinent aspects of the use, and all significant results and effects in a crime report. Custody Services Bureau incidents shall also be documented in a JMS incident report. In connection with the required crime report, the Supervisor will download the EW firing data to a computer workstation, and will associate the firing data with the report.

3. The discharge of an EW to control an animal normally requires prior permission from the Supervisor. Should exigent circumstances prevent prior authorization; the Supervisor will be advised as soon as possible. A memorandum to the Division Commander via the chain of command outlining the need for the action shall follow the incident.

4. When any other discharge of an EW occurs, such as an unintentional discharge and there are no injuries or death, the following shall be done:
   a. The Deputy who discharged the EW shall notify his/her Supervisor or the senior Deputy on duty as soon as time and circumstances permit.
   b. The Deputy will document the circumstances which led to the discharge of the EW in a memo to their Division Commander.

5. When any other discharge of an EW occurs, such as in an unintentional discharge and there are injuries or death, the following shall be done:
   a. The Deputy who discharged the EW shall notify his/her Supervisor or the senior Deputy on duty as soon as time and circumstances permit.
   b. The senior Deputy or the Deputy's Supervisor is responsible for securing the scene and advising their Area/Facility Commander or the Watch Commander of the details of the incident.
   c. If the circumstances meet the requirements of Office of the Sheriff Policy and Procedure Section 1.06.62, Police Involved Fatal or Serious Injury Incidents, the provisions of that policy will be followed.
   d. If the injury is minor, the Area/Facility Commander will conduct an investigation into the incident and report their findings to their Division Commander.

6. Should a thorough investigation of the incident indicate the need for corrective action the Division Commander will initiate appropriate procedures as covered in Office of the Sheriff Policy Section 1.05.58, Corrective Counseling System and Section 1.05.70, Personnel Management Regulations.
VIII. PROCEDURE 5.

A. REPORTING USE OF FIREARMS.

1. The discharge of a firearm at a target range or for evidence collection does not require a report.

2. The discharge of a firearm to dispatch an animal normally requires prior permission from the Supervisor. Should exigent circumstances prevent prior authorization, the Supervisor will be advised as soon as possible. A memorandum to the employee’s Division Commander via the chain of command outlining the need for the action shall follow the incident.

3. Accidental discharges that result in no serious injuries or deaths, the following shall be done:
   a. The Deputy who discharged the firearm shall notify his/her Supervisor or the senior Deputy on duty as soon as time and circumstances permit.
   b. The Deputy's Supervisor will notify the Division Commander and shall protect the scene and identify witnesses pending further instructions from the Division Commander.
   c. The Deputy’s Division Commander shall conduct an investigation.

      • If the incident occurs when the Division Commander is either off duty or unavailable, the Patrol Station House Commander shall be notified and will immediately and personally conduct the investigation when notified.

      • The Station House Commander will submit an inter-office memo to the Deputy's Division Commander detailing the incident and the investigation.

      • If the area Station House Commander is unavailable, the Watch Commander will conduct the investigation.

      • Should a thorough investigation of the incident indicate the need for corrective action, the Division Commander will initiate appropriate procedures as covered in Office of the Sheriff Policy Section 1.05.58, Corrective Counseling System and Section 1.05.70, Personnel Management Regulations.

   d. Following the investigation of the incident, a detailed written report shall be submitted via the chain of command to the Sheriff. This report shall include the observations and conclusions of the Division Commander.

4. When any on-duty or off-duty discharge of a firearm by an Office of the Sheriff employee results in death or serious injury, Office of the Sheriff Policy Section 1.06.62, Police Involved Fatal or Serious Injury Incidents Policy shall apply.
a. The Division Commander will receive a detailed written report concerning the incident completed by the Internal Affairs Detail, after review by the Undersheriff. This report shall be reviewed in conjunction with any other documents and/or information available and the Division Commander will submit a recommendation via the chain of command to the Sheriff/Undersheriff.

5. When a Police Involved Discharge of a Firearm On Duty occurs, the following shall apply.

a. The Deputy who discharged the firearm shall immediately notify his/her Supervisor.

b. The Deputy’s Supervisor will ensure that the Deputy Sheriff’s Association is contacted and notified of the event.

c. The Deputy’s Unit Manager or Watch Commander shall investigate. If the Unit Manager or Watch Commander is unavailable, the Division Commander will respond and investigate.
I. POLICY.

A. Investigations of police involved fatal or serious injury incidents are often complex and demanding. Such cases often attract considerable public and news media interest. The consequences of the incident can be profound and affect many people. Because of these factors, incidents of this nature shall be fully and fairly investigated. Proper disposition of such cases will be based on all the legally available relevant evidence.

II. DEFINITIONS.

A. STATION HOUSE COMMANDER/WATCH COMMANDER. The Station House Commander/Watch Commander is the on-call Manager responsible for necessary decision making during non-business hours.

B. POLICE INVOLVED FATAL OR SERIOUS INJURY INCIDENT. Any police investigation directly involving two or more people in which an on-duty or off-duty police employee is involved and death or serious injury results. Such incidents include but are not limited to:

1. Intentional and accidental shootings involving any serious injury, including police tactical incidents involving specialized response teams.
2. Intentional and accidental use of any other deadly or dangerous weapon.
3. Assaults upon police employees who are performing a law enforcement function.
4. Attempts to affect an arrest or otherwise gain physical control over a person for a law enforcement purpose.
5. Deaths of persons while in police custody or under police control, but excluding fatal injuries of prisoners which occur while the inmate is under physician's treatment for a disease or other natural condition which has been diagnosed prior to death and which does not involve custodial trauma, custodial suicide or custodial ingestion of toxic substance.
6. Any fatal injury to a person who is a passenger in a police vehicle (i.e., ride-alongs, emergency transports, etc.).
7. Physical altercations, such as mutual combat, in which the police employee is acting in a private capacity for other than a law enforcement purpose.

8. Vehicular Collisions:
   a. Vehicular collisions under this Policy include:
      • Collisions in which law enforcement vehicles or personnel are involved.
      • Collisions by a pursued vehicle with a third party or stationary object.
        ➢ Such a collision, if it results in a fatality, very soon after a pursuit is terminated, where it appears (based on the manner of driving and close time and distance proximity) that the subject was unaware the pursuit had been terminated and continued his attempt to evade.
   b. Vehicular collisions under this Policy do not include:
      • Off-duty, non-police employees.
      • Solo vehicular collisions where only the police employee is fatally injured.

C. SERIOUS PHYSICAL INJURY. Any injury which creates a substantial risk of death, causes serious permanent disfigurement, or long-term loss, or impairment of the function of any bodily member or organ.

III. GENERAL.
A. INVESTIGATION GOALS.
   1. The investigation goals in a police-involved fatal or serious injury incident are as follows:
      a. Determine the existence or non-existence of criminal conduct.
      b. If criminal conduct does exist, determine the identity of the person(s) responsible for the conduct and determine:
         • The degree of the crime;
         • Any legal or factual defenses to the crime; and
         • The existence of any factors which would mitigate or aggravate punishment for the conduct. The investigation will be performed to develop all relevant information. It will be professional, thorough and free of conflicts.
   2. The distinction between sworn peace officers and general employees is necessary to ensure proper protection of their statutory rights and the integrity of the investigation.
      a. If a Reserve Deputy is involved in an incident while on duty or while performing a law enforcement purpose, the investigation will be handled the same as for any on-duty peace officer.
b. If any other temporary, or part-time general employee or volunteer is involved while on duty, the investigation will be handled as if that person was a full-time regular general employee. If such a person is not on duty or acting for a law enforcement purpose, the investigation will be handled the same as for general employees not affiliated with the Sheriff’s Office.

B. INVESTIGATIVE RESPONSIBILITY.

1. The Office of the Sheriff Internal Affairs will investigate all fatal and serious injury incidents involving Office of the Sheriff personnel. This investigation will focus on administrative and non-criminal matters and will parallel but not supplant any criminal investigation. Immediately following the event, the Sheriff and Undersheriff will receive an Executive Summary of the incident. A detailed written report of the Administrative Investigation, with related attachments, shall be submitted to the appropriate Bureau Assistant Sheriff for review and appropriate action. This report prepared by Internal Affairs, shall include a review of policy and procedures related to the incident.

2. The Office of the Sheriff Investigation Division will generally handle the entire criminal investigation for fatal and serious injury incidents involving Office of the Sheriff personnel in the unincorporated County areas and Contract Cities. These investigations will be handled in the same fashion as criminal inquiries that do not involve Office of the Sheriff employees. Depending on the individual circumstances, the Sheriff may assist or accept full investigative responsibility for incidents occurring in non-contract incorporated cities or in County areas involving other agencies whether or not Office of the Sheriff personnel are involved. The following guidelines for establishing jurisdiction have been adopted in this County:

   a. The District Attorney has independent investigatory powers and responsibilities and may also investigate the incident.

   b. Vehicular collision incidents shall be investigated by accident investigation specialists, who will also have responsibility for the collection of physical evidence, and shall investigate vehicular collision incidents. On-scene collaboration with the Sheriff's Criminalistics Laboratory is encouraged. In incidents where a vehicular collision or other vehicular movement is involved but is not the direct cause of the fatality, the California Highway Patrol may be called for investigatory assistance in that phase of the incident investigation.

3. Usually, the responsibility for investigating incidents rests with the agency with territorial jurisdiction.

   a. That agency will normally conduct the investigation using its own resources. However, the agency may seek investigative assistance from the Sheriff, the District Attorney, or from other agencies.

   b. If investigative assistance is obtained, the agency may elect to maintain control of the investigation or may elect to relinquish
the primary responsibility for the investigation to the other agency from which it obtained the assistance.

4. An agency having territorial jurisdiction of an incident may elect to defer its investigative authority to another agency when the following occur:
   a. An on-duty officer from the other agency is involved but is not the victim.
   b. The officer is performing a police duty concerning a crime that originated in his/her own jurisdiction.
   c. Incidents within the joint geographical jurisdiction of more than one agency shall be jointly investigated until responsibility and authority for the investigation is clearly and promptly defined between command personnel of the involved agencies. Until agreement is reached between the agencies in a specific case, immediate investigative responsibility is determined in this order:
      • The agency with territorial jurisdiction, if readily and definitely ascertainable;
      • The agency whose on-duty employee, acting apparently for a law enforcement purpose, was involved; and
      • The agency within whose jurisdiction the victim's body was first discovered after infliction of the injury.
   d. The agency with territorial jurisdiction has the initial responsibility for the preservation and security of the scene(s). These responsibilities include but are not limited to the following:
      • Emergency life-saving measures have first priority. Should a person with serious or imminently fatal injuries be transported, an officer should accompany that person in order to:
         ➢ Preserve, safeguard and maintain the chain of evidence;
         ➢ Obtain a dying declaration if needed;
         ➢ Maintain custody if the person is arrested;
         ➢ Provide information to and from medical personnel;
         ➢ Identify relevant people (i.e., witnesses, medical personnel); and
         ➢ Maintain availability for contact with victim's family, if appropriate.
      • Scene(s) security to include:
         ➢ Security perimeter; and
➢ Access to officials who must enter will be limited to the assigned criminal investigators, D.S.A. representatives, Internal Affairs, District Attorney personnel and assigned Forensic Services Division personnel.

- A log of those who enter or leave the scene(s) and of evidence removed or moved in any way. If items must be moved, they should be photographed first if possible.
- Security and evidence preservation of involved weapons and maintenance of the chain of evidence.
- Identification, separation and security of all witnesses and involved persons.

e. The collection of physical evidence shall normally (except as provided above for vehicular collisions) be the responsibility of the Sheriff's Criminalistics Laboratory, acting on a request from the agency with investigative responsibility.

- In unusual cases, for example where there is no physical evidence present, the involved agencies (territorial, employing and District Attorney) may all agree that the Crime Lab need not be called. However, the Crime Lab shall be called if any of those agencies desire.
- Analysis of physical evidence shall normally be done by or through the Sheriff's Crime Lab.
- If an employee of the Forensic Services Division is involved in the incident, another laboratory shall be used. The Sheriff’s Crime Lab has established a standby list.

C. INTERVIEWS WITH POLICE EMPLOYEES.

1. Interviews with police employees will normally be conducted by investigator(s) from the agency having established territorial jurisdiction and a member of the District Attorney's staff. If the employing agency is not the agency with territorial jurisdiction, it will not normally have a representative present during the interview.

2. Established interview techniques will be used. The employee's constitutional and statutory rights shall be fully explained and respected when they are applicable.

D. INTOXICANT TESTING.

1. If the sobriety of a police employee is determined to be relevant to the investigation, the investigator(s) shall proceed as with any member of the public in a similar situation. The options are:

a. Obtain the employee's valid consent for the sample;

b. Obtain a sample pursuant to a valid arrest; or
c. Utilization of CVC Section 13353 Implied Consent Law, if applicable.

2. The preferred sample for testing is blood. A urine sample should also be obtained whenever possible.

3. The Office of the Sheriff requires its involved employee(s) to provide both a blood and urine sample for administrative use; if the incident investigators do not already collect such samples. The Office of the Sheriff Internal Affairs is responsible for this task.
   a. When the Internal Affairs Investigator(s) learn that the incident investigators are not taking blood and urine samples, they will arrange for the samples to be taken at the first opportunity.
   b. The Internal Affairs Investigator(s) will safeguard any sample taken for administrative use to ensure it is used only for the administrative investigation.

4. If another involved employing agency wants a sample for employee related purposes, its options, for its employee(s), are:
   a. Obtain the employee's valid consent for the sample; or
   b. Order the employee to provide the sample based on the employee-employer relationship. This sample may not be subsequently used against the employee for criminal prosecution. The employing agency's efforts to obtain a sample should not interfere with the incident investigation.

E. AUTOPSY.

1. At least one of the primary incident investigators shall attend the autopsy. A member of the District Attorney's staff will also be present. In vehicular collision cases, the accident investigation specialist will be primarily responsible for the collection and documentation of physical evidence at the autopsy with assistance from the Criminalistics Laboratory, if appropriate. In other cases, the Crime Lab has that responsibility. If the employing agency is not the agency with territorial jurisdiction, a representative may be present as an observer, subject to the discretion of the Coroner's Office.

2. The pathologist will receive a full and complete briefing prior to the post-mortem examination. The incident investigator, a member of the District Attorney's staff and an employee of the Crime Lab, or the accident investigation specialist, when applicable, will be present at the briefing and will conduct it.

F. RELEASE OF INFORMATION TO THE PUBLIC. Concurrent with the information and procedures contained in Sheriff's Office Policies 1.06.77 ‘Crime and Incident Records – Release of Information (Public Records Act),” 1.06.78 “News Media Relations,” 1.06.79 Press Releases and Media Inquiries,” the following shall apply:

1. Employee's Name.
   a. In all police involved fatal or serious injury incidents over which the Sheriff’s Office has enforcement responsibilities, the name(s)
of the involved employee(s) will be withheld from the news media for a minimum of 16 hours and a maximum of 24 hours.

b. In incidents involving employees from other police agencies, the news media will be referred to that agency for details concerning employee identification.

c. This action is provided for the following reasons:
   - To allow employee(s) involved in an incident time to make their family and friends aware of their involvement prior to their being identified publicly via the news media;
   - To allow the Office of the Sheriff an opportunity to possess the most accurate and complete information available prior to making a news release identifying involved employees; and
   - To give another police agency an opportunity to make decisions relative to the public identification of its employee who may be involved in an incident over which the Sheriff’s Office has primary jurisdiction.

2. Initial Press Release. In reports relating to a serious incident in which a Sheriff’s Office employee or an employee from another agency is involved; i.e., a shooting or an incident which would generate considerable media interest, the Crime Report will be withheld from the press basket. A press release will be completed giving the general information concerning the incident. The names of involved employees will be withheld in accordance with “F.” above.

   a. In cases involving an employee of the Office of the Sheriff, a second press release will be completed between 16 and 24 hours following the incident.
   b. The second press release will contain the following information relative to the incident:
      - The employee's name;
      - The employee's age;
      - The employee's length of service;
      - The employee's present duty assignment; and
      - The most current information available, which is considered acceptable for media release.

4. Incidents Involving Other Agencies. In reports or incidents which involve employees from other police agencies, the original press release described in “2.” above will be completed and all subsequent media inquiries relative to the identity of the involved employee(s) will be referred to the agency with whom the employee is employed.
G. INQUESTS. In each police involved fatal incident where a member of the public dies and where no criminal charges have been filed, a Coroner's Inquest will normally be held.

   a. The purpose of the inquest is to develop any further evidence and to inform the public of the facts of the incident. A few cases may occur where the police actions are very clearly justified and media interest is low. In such cases the Sheriff, Police Chief of the involved agency and the District Attorney may all decide that an inquest is not needed.

H. ACCESS TO REPORTS AND EVIDENCE.

   a. Any report or evidence created or collected by the investigating agency, the Forensic Services Division, and other assisting agencies will be made available in a timely manner to those agencies which have an interest in the investigation.

   b. No other access to documents or reports will be permitted until the conclusion of the investigation and any subsequent prosecution.

2. Internal Affairs Reports. Reports of Internal Affairs investigations will be handled as any other such records.

I. ADMINISTRATIVE PROVISIONS FOR INVOLVED EMPLOYEES.

1. The incident investigations may make the involved employee feel like he/she is on the defensive and being regarded as an informational source. This is not the intent of the Office of the Sheriff. While the integrity of the investigation will be maintained, the physical and mental well being of the employee is a primary concern to this Office.

2. Prior knowledge of required procedures will normally make the employee feel less intimidated. Therefore, employees should know that the following guidelines apply to employees of the Office of the Sheriff whose actions, in a police involved fatal or serious injury incident, are the principal cause of a fatality or serious injury to another.

3. In an officer involved shooting, Internal Affairs, as well as the agency, which established territorial jurisdiction, will check and document the firearms and equipment of all Deputies present at the time of the incident.

   a. The Internal Affairs Investigator will also ensure that all discharged firearms are identified and collected, and specifically identify those weapons which were not fired.

   b. Collected weapons will be transported to the Crime Lab, along with all rounds of extra ammunition, while preserving the chain of evidence.

   c. Internal Affairs Investigators, via authorization from the Internal Affairs Lieutenant will replace firearms as soon as possible unless reasons indicate otherwise.
4. The employee will be given the opportunity to obtain legal counsel prior to investigation interviews taking place.

5. The employee will have the Office of the Sheriff policy on intoxicants testing explained to him/her.

6. Transportation to interviewing locations will be provided for investigative interviews.

7. The employee will be provided transportation home.

8. The employee will be placed on Administrative leave (with pay), by his/her Division Commander, for the 48 hours immediately following the incident.

9. The employee will be required to have a counseling session with an Occupational Health Services (OHS) professional, or a professional counselor assigned by the Office of the Sheriff.

10. A employee's duty assignment will be changed to an office placement until the counseling session and other necessary investigation interviews are completed.

11. The employee will have an interview with the Division Commander prior to being reassigned to normal duty.

12. Employees present at the scene of an incident whose actions are not the principal cause of a fatality or serious injury are subject to the following guidelines:
   a. Interviews with incident and Internal Affairs Investigators;
   b. Interview with the Division Commander; and
   c. Counseling session with an OHS professional, or a professional counselor assigned by the Office of the Sheriff.

IV. PROCEDURE 1.
   A. INITIAL RESPONSIBILITIES. Deputies initially assigned to a detail that develops into a police-involved fatal or serious injury incident are responsible for the following:
      1. Ensuring that first aid is provided and medical assistance requested when necessary and possible;
      2. Providing protection and security of the scene;
      3. Maintaining a log of all persons entering and leaving the scene;
      4. Notifying their Supervisor and requesting any additional assistance and resources needed at the incident scene(s); and
      5. Identifying and separating witnesses.

V. PROCEDURE 2.
   A. SUPERVISOR’S RESPONSIBILITIES. The Supervisor who responds to an incident is responsible for the following:
1. Notify the Station House Commander or Watch Commander and request the response of Investigators, Deputy Coroner Investigators, District Attorney, etc., depending on the needs of the situation.

2. Ensure the basic steps listed in “Procedure 1” are implemented.

3. In cases where the deceased or wounded person has to be moved prior to the arrival of an Investigator and Crime Scene Technician or Criminalist, the initially assigned Deputy and/or Supervisor will ensure that photographs are obtained and the body position is marked prior to disturbing the area, and then preserve the remaining scene.

4. Ensure that the evidence processing steps outlined in Sheriff’s Office Policy Section 1.06.03, Physical Evidence are carried out.

5. Determine if any of the involved Deputies discharged their firearm.

6. If a Deputy's weapon is involved, it will be obtained as evidence as soon as the scene is stabilized and it is safe to do so. When possible, a replacement firearm will be provided at the scene.
   a. If the weapon is a handgun, all spare ammunition will also be collected.
   b. An involved firearm(s) will not be opened, unloaded or tampered with in any manner except to render it safe for transportation. Do not store a weapon in the trunk near flares.
   c. Personally deliver all packaged items to the Office of the Sheriff Crime Lab personnel.

7. Ensure the employee(s) involved is/are aware of the necessity of the actions taking place, understand their rights and offer to assist in obtaining legal counsel if the employee(s) desires.

8. Obtain a public safety briefing from the involved Deputies as soon as the scene is rendered safe.

9. Police employees who were present at the scene when the incident occurred will be relieved of their duties at the scene as promptly as possible and will be dispatched to their own police station or office, unless other arrangements are made for them. A Deputy who was NOT present at the incident shall be assigned to accompany these employees either in a group or individually, and an uninvolved Deputy shall remain with the employees until they are interviewed.
   a. The employees will not discuss the incident among themselves or with uninvolved persons but are encouraged to carefully reflect upon what occurred and to make notes for their own future use.
   b. If circumstances prohibit removal of all witnesses and involved employees from the scene at once, those employees who were directly involved will be relieved first.

10. Provide transportation to any designated interview site.
VI. PROCEDURE 3.
A. STATION HOUSE COMMANDER/WATCH COMMANDER RESPONSIBILITIES.

1. The Station House Commander/Watch Commander shall ensure that the initial steps at the scene(s) are being taken and immediately notify the following as appropriate:
   a. Investigation Division;
   b. Forensic Services Division;
   c. Internal Affairs (all cases). Should a situation arise where no one from Internal Affairs, including the Internal Affairs Lieutenant can be reached, the Station House Commander/Watch Commander will respond as an administrative observer;
   d. Coroner's Office;
   e. California Highway Patrol;
   f. Other involved agencies;
   g. District Attorney's Office (all cases);
   h. Occupational Health Services (all cases) or a professional counselor assigned by the Office of the Sheriff; and
   i. On-call DSA representative (all cases). The DSA will provide an updated list of its on-call representatives.
   j. Contact Office of the County Administrator, Risk Management Division, Assistant Risk Manager, by phone. Copies of relevant reports shall be routed to Risk Management Division, 2530 Arnold Dr. Ste. 140, Martinez, CA 94553, Attn: Liability Claims.

2. If the injured person is an employee of the Office of the Sheriff, the Station House Commander/Watch Commander will:
   a. Notify the employee's Division Commander, Bureau Assistant Sheriff, and the Undersheriff/Sheriff via the chain of command; and
   b. Ensure that all the procedures in Office of the Sheriff Policy Section 1.05.74, Notification and Reporting On-Duty Injuries, Accidents or Death are carried out. In the absence of the Division Commander, the Station House Commander/Watch Commander will handle the notification of the employee's family.
   c. If the involved police employee is not injured, the Station House Commander/Watch Commander will:
   d. Arrange for the employee to be accompanied home and provide transportation if necessary; and
e. Arrange for assistance to be given to the employee in notifying his/her family of the situation. Provide any other assistance that may be needed at the time.

VII. PROCEDURE 4.
A. REPORTS BY SHERIFF’S DEPUTIES. Any Sheriff’s Deputy involved in or performing any function pertaining to an incident investigation, will submit written reports detailing such involvement. Reports will be completed and submitted prior to end of tour of duty during which the incident occurred.
   a. To avoid conflicting reports, if an involved or witness Deputy has been formally interviewed by the Investigation team, that Deputy shall not submit a written report unless specifically instructed to do so.

VIII. PROCEDURE 5.
A. DIVISION'S RESPONSIBILITY. Inclusive of the general information and directives contained in this section of the Manual, employees performing any function pertaining to an incident investigation will follow the policies and procedures of their Divisions.
I. POLICY.
   A. The Office of the Sheriff shall report all incidents of Deputies killed or assaulted in the line of duty to the Federal Bureau of Investigation. This report is necessary to enable the F.B.I. to compile accurate nationwide statistics on officers killed or injured.

II. DEFINITIONS.
   A. LAW ENFORCEMENT OFFICERS KILLED OR ASSAULTED. The F.B.I./DOJ DO-71 Form. This Form is used to report the number of Deputies who were killed or assaulted in the line of duty. The Form is submitted to the Federal Bureau of Investigation monthly.

   B. LAW ENFORCEMENT OFFICERS KILLED OR ASSAULTED. The Sheriff’s Office Form (SDI). This Form is a modification of the above F.B.I./DOJ Form and is used in-house at the Division level.

III. PROCEDURE 1.
   A. REPORTING ASSAULTS OR DEATHS.
      1. In the event a Deputy is assaulted or killed in the line of duty, the respective Division Commander will ensure that a Sheriff’s Office Law Enforcement Officers Killed or Assaulted report is completed and forwarded to Technical Services Division, Records Unit.

      2. Upon receipt of the above Form, Technical Services Division will complete the monthly, F.B.I. Law Enforcement Officers Killed or Assaulted report, with figures for the entire month. The report will be sent to the Federal Bureau of Investigation each month.
I. POLICY.
   A. Booking photographs will generally not be released to the public except as authorized by this Policy. The Office of the Sheriff has established a procedure for processing requests for the release of booking photographs and a system for tracking them. Booking photographs will be released or withheld pursuant to this Policy.

II. DEFINITIONS.
   A. BOOKING PHOTOGRAPH. (Also known as a “mug shot”.) A photograph of an individual taken during the process of being booked into a detention facility.
   B. BUSINESS RECORD. A public record that includes any writing containing information relating to conducting business that is prepared, owned, used, or retained by any state or local agency.
   C. CRIME/INCIDENT REPORTS. Reports that are written in the daily course of business of a law enforcement agency are public records and subject to release under the Public Records Act, with certain exemptions.

III. GENERAL.
   A. In accordance with the California Attorney General’s Opinion 03-205, the Technical Services Division, Records Unit, shall be the designated location for the release of information, including booking photographs. Employees shall provide to requestors the location and business hours of the Technical Services Division, Records Unit.

   1. PERSONNEL AUTHORIZED TO RELEASE BOOKING PHOTOGRAPHS.
      a. The Technical Services Division, Records Unit Manager and all Office of the Sheriff Lieutenants and above or his/her designee(s) are authorized to release booking photographs.
      b. Booking photographs may be released to the public, news media, Public Defender, District Attorney’s Office, bail bond agents, or other law enforcement agencies for the following reasons:
• For the apprehension of criminals wanted in connection with an investigation, or wanted on an outstanding warrant;
• Public defenders and bail bond agents are authorized to obtain a booking photograph upon verification of his/her identity (picture ID) and by providing documentation that the subject in question is their client;
• When the release would be in the best interest of the public and clearly outweighs the public interest in withholding the booking photograph.

c. Once an agency discloses an exempt record, such as an arrest record, to a person who is not authorized to receive it on a confidential basis, it must then disclose that record to all who request it. The information disclosure requirement is limited to contemporaneous information relating to persons currently within the judicial system, and excludes the booking photograph.

IV. PROCEDURE 1.
A. ACCEPTING AND RECORDING BOOKING PHOTOGRAPH REQUESTS.
   1. Requests for information can be accepted in person, mail, telephone, fax or through the Office of the Sheriff website located on the Technical Services Division, Records Unit, web pages. To properly track such requests, employees should complete, or assist the requestor to complete, an Office of the Sheriff Application for Release of Information form.
   2. Requests received in writing, by email or fax do not by law necessitate the completion of the Office of the Sheriff Application for Release of Information form and are acceptable documentation alone for request purposes, but use of the form should be encouraged for audit purposes.
   3. Requests for a certified copy of a booking photograph shall be referred to the Custody Services Bureau, which is the authorized body to attest to the photograph(s) authenticity. Such requests require the completion of an Office of the Sheriff Application for Release of Information form.

V. PROCEDURE 2.
A. REQUEST PROCESSING.
   1. Office of the Sheriff employees should refer requesting parties to the Technical Services Division, Records Unit, for all general public releases:
      a. Technical Services Division, Records Unit staff shall review and research the request to determine if the request meets the release criteria or if the photograph has been previously released.
      b. Release the photograph, when applicable, and forward the written request, faxed request, email or completed Application for Release of Information to the appropriate staff member for tracking purposes.
2. Should circumstances warrant a booking photograph be released from field locations, such as station houses or Office of the Sheriff contract cities, an Office of the Sheriff Application for Release of Information form should be completed prior to the release of the photograph, and the completed form, written request, or faxed request forwarded to the Technical Services Division, Records Unit for tracking purposes.

VI. PROCEDURE 3.

A. TRACKING RELEASES. The Technical Services Division, Records Unit Manager shall maintain a tracking system of all booking photograph releases:

   1. Completed Office of the Sheriff Application for Release of Information forms shall become a part of the associated booking/case file and be kept in an automated database for future release decisions.

   2. Booking Photographs from outside agencies shall be stored, indexed and maintained; and

   3. Booking photographs taken by law enforcement agencies outside the jurisdiction of the Office of the Sheriff (in-county and out-of-county) require a written authorization from those agencies permitting use by the Office of the Sheriff. Any Division or Unit utilizing booking photographs from outside agencies shall maintain a file of all written authorizations.
I. POLICY.
   A. To provide Sheriff’s Office personnel a guideline for disposition reporting for all arrest events mandated by the Department of Justice (DOJ).
   B. In all cases where a person has been arrested, but no accusatory pleading is filed with the court, a disposition must be filed within 30 days of release or transfer to another agency (PC § 11115). In cases where charges are filed, the courts will update the arrest record electronically through their own procedures.
   C. To ensure positive identification, The Contra Costa County Office of the Sheriff will submit electronic fingerprint transactions or fingerprint cards to the California Department of Justice (DOJ) for a felony or misdemeanor arrest. For each arrest reported to DOJ, it is essential that the Contra Costa County Office of the Sheriff report the final disposition, or outcome, to allow for a complete accounting of events on the criminal history record.

II. DEFINITIONS AND GENERAL PROVISIONS
   A. Arrest – The seizure of a person(s) by legal authority and taking into custody.
   B. Disposition – Information about events, actions and decisions taken or made by the law enforcement agencies, prosecutors, probation departments, courts and the California Department of Corrections, subsequent to an arrest. Dispositions are the outcome of arrests and contribute to the accuracy and completeness of a subject’s master criminal history record maintained in the California State’s Automated Criminal History System.
   C. Extradition – The action of extraditing a person accused or convicted of a crime from one jurisdiction to another or from a foreign jurisdiction.
   D. Final Disposition – This occurs at the arrest level when all charges have been released and there are no further proceedings. Final disposition must be reported to DOJ within 30 days from the date of disposition (Penal Code §§ 11115 & 13151).

III. FORMS
   A. ADULT DISPOSITION OF ARREST AND COURT ACTION
      1. California Department of Justice form (JUS 8715) used to report the final
disposition of arrests (see attachment).

B. DETENTION CERTIFICATE
1. CCCSO form (DET 016) form used to release suspects per PC 849 (see attachment).

C. DISPOSITION SHEET
1. The Disposition Form will be completed by Investigation Division personnel to relay disposition codes to the FOB clerk who will complete the JUS 8715 form (see attachment).

IV. PROCEDURE 1 – ARRESTING DEPUTY
A. ON-VIEW ARREST(S)
1. When a suspect is released per PC 849(b) prior to booking:
   a. The arresting officer is responsible for preparing a Detention Certificate for the detainee upon release.
      • Give the suspect the original
      • Attach a copy to the report
      • Forward a copy to Sheriff’s Records

V. PROCEDURE 2 - CUSTODY SERVICES BUREAU
A. ON-VIEW ARREST(S)
1. When a suspect is released per PC 849(b) after booking:
   a. The Custody Services Bureau Clerk will prepare a Detention Certificate for the detainee upon release. The custody sergeant will sign the certificate.
      • Give the suspect the original
      • Forward a copy to Sheriff’s Records
      • Attach a copy to the booking
   b. The Custody Service Bureau Clerk will update information in the Jail Management System from ARR to DET.

B. OUT-OF-COUNTY WARRANT ARRESTS
1. The Custody Service Bureau Clerk will update the status in Jail Management System.
2. The Custody Service Bureau Clerk will complete the DOJ JUS 8715 form and forward directly to Records.

VI. PROCEDURE 3 - INVESTIGATIONS
A. FELONY CASES
1. INVESTIGATIONS (COUNTY and CONTRACT CITIES DETECTIVES) – Detective will review all felony arrests to determine if they are ready for presentation to the District Attorney’s Office.
2. Cases returned by the District Attorney’s Office with no charges filed
(NCF), will be documented in a supplemental report.

a. If a Detention Certificate was not already completed by the arresting deputy/officer or CSB, the detective will prepare the Detention Certificate and attach a copy to the supplemental report.

b. The detective will deliver the NCF sheet and Detention Certificate (if required under section (a) above) to the Field Operations Bureau clerk.

c. The detective will update Case Management to show the status of the case.

3. In situations when an arrest occurred and the case will not be presented to the District Attorney’s Office (i.e. factual innocence, etc.), the circumstances will be documented in a supplemental report by the assigned detective.

a. If a Detention Certificate was not already completed by the arresting deputy/officer or CSB, the detective will prepare the Detention Certificate and attach a copy to the supplemental report.

b. The detective will also prepare a Disposition Sheet (attached) and deliver it and the Detention Certificate (if required under section (a) above) to the Field Operations Bureau clerk.

c. The detective will update Case Management to show the status of the case.

B. MISDEMEANOR CASES

1. Misdemeanor Complaints will prepare misdemeanor cases involving arrests for filing with the District Attorney’s Office.

a. Exception - Contract City Detective Sergeants may assign misdemeanor cases to the Contract City after advising Misdemeanor Complaints at their discretion. All subsequent procedures for misdemeanor cases will then be followed by the Contract City.

2. Cases returned by the District Attorney’s Office with no charges filed (NCF), will be documented in Case Management by Misdemeanor Complaints.

a. If a Detention Certificate was not already completed by the arresting deputy/officer or CSB, Misdemeanor Complaints will prepare the Detention Certificate and deliver it to the Field Operations Bureau clerk.

b. Misdemeanor Complaints will deliver the NCF sheet to the Field Operations Bureau clerk.

3. In the unusual situation when a misdemeanor arrest occurred and the case will not be presented to the District Attorney’s Office (i.e. factual innocence, etc.), the circumstances will be documented in a supplemental report by Misdemeanor Complaints.
a. If a Detention Certificate was not already completed by the arresting deputy/officer or CSB, Misdemeanor Complaints will prepare the Detention Certificate and attach a copy to the supplemental report.

b. Misdemeanor Complaints will also prepare a Disposition Sheet (attached) and deliver it and the Detention Certificate (if required under section (a) above) to the Field Operations Bureau clerk.

c. Misdemeanor Complaints will update Case management to show the status of the case.

VII. PROCEDURE 4 – FIELD OPERATIONS BUREAU CLERK
A. The Field Operations Bureau clerk will complete the JUS 8715 disposition report for all arrests where the disposition is final at the law enforcement or District Attorney level. Source documents the clerk will use to complete this task will come from detectives, Misdemeanor Complaints, and CSB clerks. The FOB clerk will also have access to JMS to obtain any needed additional information to complete the form. The California Department of Justice Disposition Reporting Guide provides detailed instructions for completing the form.

1. After completing the JUS 8715 disposition report, the clerk will send the packet to Sheriff’s Records.
   a. The packet will include the JUS 8715 and any Disposition Sheet, NCF form, and/or Detention Certificate given to the clerk.

VIII. PROCEDURE 5 - SHERIFF’S RECORDS
A. Sheriff’s Records will review the JUS 8715 for accuracy.

1. All documents received will be scanned to Disk Image.
2. The arrest in RMS will be updated to reflect a detention only.
3. The original Detention Certificate will be mailed to the last known address of the suspect(s). If the Detention Certificate was already provided to the suspect at the jail or by the arresting deputy the copy will not be mailed.
4. The JUS 8715 will be electronically delivered or mailed to the Department of Justice per DOJ’s instructions at:

   California Department of Justice
   Bureau of Criminal Information and Analysis
   Criminal Record Update Section
   P.O. Box 903417
   Sacramento, CA 94203-4170
I. POLICY.

A. The Contra Costa County Office of the Sheriff is a participant in the Victim Information and Notification Everyday (VINE) program. VINE is a free and anonymous service through which members of the public can obtain information about an offender’s custody status, and crime victims, their next-of-kin, and witnesses can register to receive notifications when an offender’s custody status changes.

II. GENERAL.

A. WHEN TO PROVIDE VINE INFORMATION. Office of the Sheriff personnel are encouraged to provide information about VINE, and how to access it, in the following situations:

1. When a request is received for information about the VINE system or an offender’s custody status.

2. When a Deputy Sheriff involved in the investigation of a crime determines that it is appropriate to provide such information to a crime victim, witness, or any other interested person.

B. INSTRUCTIONS FOR USE OF VINE.

1. Accessing VINE. VINE is a 24-hour system accessible by telephone or Internet, and available in both English and Spanish.

   a. Information Required. To search for information about an offender’s custody status, or to register to receive notifications when an offender’s custody status changes, VINE requires that the requesting individual provide only the offender’s name.

   b. Telephone Access. VINE can be accessed telephonically using the toll-free California VINE Service Number: (877) 411-5588.

   c. Internet Access. VINE can be accessed on the Internet at www.vinelink.com (VINELink). VINELink can also be accessed through the Office of the Sheriff webpage.
2. Searching for Custody Information.
   a. Availability. Anyone can use VINE to search for the custody status of an offender.
   b. Information Provided. VINE will provide the following information about an offender, if in custody:
      - Name
      - Identification Number
      - Custody Location
      - Current Custody Status

3. Registering for Custody Status Change Notifications.
   a. Availability. Only crime victims, their next-of-kin, and witnesses may register through VINE to receive custody status change notifications.
   b. Custody Status Changes. VINE includes an offender’s release, death, or escape as custody status changes for which notification is provided to registrants.
   c. Registration Process. After locating the offender, a qualifying registrant will need to provide VINE with the following information to register for notification:
      - A telephone number or email address where they can be reached for notification;
      - A 4-digit Personal Identification Number (PIN); and,
      - Registrant Contact Details (for registration confirmation purposes).
I. POLICY.
   A. The Office of the Sheriff shall conduct its activities in an atmosphere of openness in its relationship with the public. The dissemination of law enforcement information shall be limited only by legal constraints, by the need to preserve evidence, to prevent interference with criminal investigations, to prevent unreasonable interference with the operations of the Office of the Sheriff and to protect the constitutional and statutory rights of any person.

II. DEFINITIONS.
   A. AUTHORIZED PERSON OR AGENCY. Any Person or Agency authorized by court order, statute, or case law to receive specified information.

   B. CAL-PHOTO. Network and application are maintained by the California Department of Justice and California’s law enforcement agencies to provide access to mug shot images entered by many California agencies as well as photographs and data from the Department of Motor Vehicles (DMV).

   C. CRIMINAL JUSTICE AGENCY. Any agency or component thereof, which performs a Criminal Justice activity as its principle function.

   D. NEED TO KNOW. The necessity to obtain information in order to execute official responsibilities.

   E. RIGHT TO KNOW. The right to obtain information pursuant to court order, statute or case law.

   F. SUMMARY CRIMINAL HISTORY INFORMATION (SCHI): (PC 11105(2)(l), 13300(a)(1) The master record of information compiled by a criminal justice agency pertaining to the identification and criminal history of any person, such as name, date of birth, physical description, date(s) of arrest, arresting agencies and booking numbers, charge(s), dispositions, and similar data about such persons.
G. CRIMINAL OFFENDER RECORD INFORMATION (CORI): (PC 11075(a), 13102) Records and data compiled for the purposes of identifying criminal offenders and maintaining as to each a summary of arrests, pretrial proceedings, the nature and disposition of criminal charges, sentencing, incarceration, rehabilitation and release.

H. CONFIDENTIAL INFORMATION. Information, which may or must be withheld from persons or agencies in accordance with statute or court decision.

I. CONTEMPORANEOUS. Arrest Information available to the public for a period of seven days.

J. PUBLIC RECORD. Information relating to the conduct of the public’s business prepared, owned, used, or retained by any state or local agency (to include law enforcement).

K. PUBLIC RECORDS ACT. The California Public Records Act is found at Gov. Code §6250 et seq. CCCSO policy implementing the Public Records Act is stated in Policy 1.06.77 “Crime and Incident Records – Release of Information (Public Records Act).”

III. GENERAL.

A. DISSEMINATION OF INFORMATION.

1. The dissemination of information relative to the Office of the Sheriff law enforcement activities strictly regulated by local, State and Federal statutes. It is the responsibility of every employee to handle such information in a professional manner and in compliance with existing statutes.

2. The release of any law enforcement information shall be in conformance with the guidelines in this policy and in compliance with all applicable statutes. Records and information contained in or derived from law enforcement information generally falls within one of three categories:

   a. That which must be held confidential;
   b. That which may be held confidential; or
   c. That which must be disclosed.

3. Confidential information may generally be disseminated to criminal justice and law enforcement agencies and personnel for official purposes.

4. All records prepared, maintained, filed or preserved by the Office of the Sheriff are public records and are generally subject to disclosure pursuant to the California Public Records Act. Information contained in a public record or the record in its entirety may be withheld from disclosure only if nondisclosure is permitted or required by statute, court decision or court order. Review Policy 1.06.77 “Crime and Incident Records – Release of Information (Public Records Act)” for instructions relating to the release of Public Records. Note that certain records must be released pursuant to SB 1421 and AB 748, as stated in Policy 1.06.77 at Procedure 10.

5. Personnel files are confidential and shall not be released to the public or the media.
6. Sheriff’s Bulletins are for law enforcement personnel only.

7. Cal-Photo information shall not be released to the media. Only the owner of the image/information may release it to the media if it meets the agency’s policy. Images owned by the Office of the Sheriff shall only be released in accordance with Office of the Sheriff Policy 1.06.64, Release of Booking Photographs. DMV image/information may only be released by the DMV.

8. Criminal Justice Agency documents not authored by Office of the Sheriff personnel shall not be released to the public or the media. Such requests shall be referred to the agency of origin.

B. CRIMINAL OFFENDER RECORD INFORMATION (CORI)

1. CORI information is confidential and may be released only to criminal justice or law enforcement agencies or personnel for official purposes. Improper disclosure of CORI is a misdemeanor and may violate the subject’s right to privacy. The only exceptions are as follows:

   a. The following contemporaneous information pertaining to arrested persons shall be made available to a member of the public upon request (GC 6254(f) (1)):

   - Full name (adults only);
   - Occupation (adults only);
   - Physical description including date of birth, color of eyes and hair, sex, height and weight;
   - Time, date and location of arrest;
   - Refer requestor to the Division or Agency that made the arrest for factual circumstances surrounding the arrest;
   - Time and date of booking;
   - The location where the person is currently being held;
   - Amount of bail set; and
   - All charges on which the person is being held, including any outstanding warrants from other jurisdictions and parole or probation holds.
   - Time and manner of release.

   b. Exception: Some or all of the above items of information will not be released if the release of that information might reasonably:

   - Endanger the safety of a person involved in the investigation; or
   - Endanger the successful completion of the investigation or a related investigation.

   c. All requests for arrest information pertaining to out-of-custody matters shall be referred to the Technical Services Division,
Records Unit. Information shall be released in accordance with the laws governing the release of information and this Policy.

d. All requests for information pertaining to in-custody matters shall be referred to the Custody Services Bureau. Information released to the public and the media shall be in accordance with the laws governing the release of information and this Policy.

e. Information regarding juveniles arrested or cited shall be released through the Technical Service Division, Records Unit in accordance with the current policies of the Juvenile Court regarding juvenile record information (TNG Order).

f. Requests for the release of booking photographs shall be processed pursuant to Office of the Sheriff Policy 1.06.64.3

2. The Sheriff and the Command Staff at the rank of Lieutenant or above may exercise discretion to override any policy stated herein otherwise prohibiting the release of certain information to the public when a dominating public interest favors disclosure.

C. SUMMARY CRIMINAL HISTORY INFORMATION (SCHI) “Rap Sheets”: (PC 11105-11105.3, 1140-11144; 13300-13305).

1. There are two types of Summary Criminal History Information (SCHI) and local SCHI. SCHI is confidential information and may be disclosed only to criminal justice or law enforcement agencies or personnel for official purposes or to other persons or agencies as authorized by statute, court decision or court order. The list of persons and circumstances for which this information may be released is extensive and specific.

   a. In order to maintain adequate control, the release of all State and Local SCHI shall be through the Technical Services Division, Records Unit. Persons requesting SCHI shall be referred to the Technical Services Division, Records Unit. To authorize disclosure of either type of information to unauthorized persons is a misdemeanor and may be a violation of the privacy rights of the subject of the information.

2. As peace officers, Deputies have a right-to-know Summary Criminal History Information. However, they must also have a need-to-know to have legal access to SCHI. The collection of criminal information about local persons by a Deputy for use as an investigative tool is a valid use of SCHI. Due to the sensitive nature of SCHI the following guidelines will be strictly followed:

   a. Deputies will only disclose SCHI to other peace officers that have a need to know.

   b. Deputies will safeguard SCHI in their possession.

   c. SCHI will not be kept in private vehicles or private residences.

   d. Hard copies of SCHI (Rap Sheets) will not be retained in a Deputy's personnel file.

   e. Once the copy of SCHI is not needed, the document will be destroyed by shredding.
3. Only authorized law enforcement or criminal justice personnel may access Cal-Photo.
   a. Any information or image accessed by Cal-Photo is confidential and for official use only by authorized personnel on a need-to-know and right-to-know basis.
   b. Authorized personnel shall not inquire into their own record nor have anyone else inquire for them.
   c. All Cal-Photo information retained must be stored in a secure and confidential file. When that Division or Bureau no longer requires that image or information it shall be destroyed by shredding.

IV. PROCEDURE 1.
A. DIVISION COMMANDER RESPONSIBILITIES.
   1. Each Division Commander will develop and maintain adequate policies for the control and dissemination of law enforcement information within his/her division. Division policies shall be in compliance with the manual and all applicable statutes. Specifically, the following Divisions' policies and procedures will address the informational items listed for their responsibility. Other Divisions will not disseminate information designated as the specific responsibility of another Division, unless it is also listed as their responsibility.
   a. Technical Services Division – Records Unit.
      • The Records Unit will collect all necessary and appropriate fees for copies of reports, records, etc.
      • Criminal Offender Record Information;
      • Summary Criminal History Information (SCHI), both State and local;
      • Traffic reports;
      • Incident and Crime (case file) reports, photographs of scenes and evidence (considered part of the crime report for record keeping purposes);
      • Dispatch log information; and
      • Out-of-custody arrest information.
   b. Patrol Division. The Patrol Division may release information that is defined as public when the need is immediate. The release may be verbal or in the form of a press release. Requests for copies of reports will be referred to the Technical Services Division, Records Unit.
   c. Custody Services Bureau. The Custody Services Bureau is responsible for the dissemination of information defined as public upon request.
• Persons requesting information regarding the factual circumstances surrounding the arrest will be referred to the Division or other agency making the arrest.

• In-custody arrest information.

d. Investigation Division. The Investigation Division may release information that is defined as public when the need is immediate. The release may be verbal or in a press release. Requests will be referred to Technical Services Division-Records Unit.

e. Forensic Services Division.

• The Forensic Services Division shall release the following when presented with a proper motion for legal discovery or a Subpoena Duces Tecum:
  ➢ Laboratory reports
  ➢ Examiners’ notes
  ➢ Evidence
  ➢ Scene Photographs

• The Coroner's Office is responsible for the dissemination of all Coroners’ records.

2. Each Division Commander may release statistical data regarding the operations of their division.

V. PROCEDURE 2.

A. EMPLOYEE RESPONSIBILITIES. All employees shall be aware of the confidential and sensitive nature of information with which they work. Employees will not routinely disseminate information, unless in compliance with their Division's policies and their assigned duties.
I. POLICY.
   A. Pursuant to State law, the Contra Costa County Office of the Sheriff will disseminate information regarding sex offenders for the purpose of allowing members of the public to protect themselves and their children from sex offenders.

II. DEFINITIONS.
   A. MEGAN’S LAW WEB SITE. This site provides access to information on more than 53,000 registered sex offenders in the State of California. Home addresses are provided on many offenders and many others are listed by zip code, city and county. This site can be accessed by going directly to www.meganslaw.ca.gov or through the Megan’s Law link on the Sheriff’s web site.
   
   B. DISCLOSURE LEVELS. Differing levels of offenses require different degrees of disclosure as to the offender’s information.
      1. Full Disclosure. A sex offender who is identified on the Megan’s Law Internet Web Site with his or her full address.
      2. Zip Code Only Disclosure. A sex offender who is identified on the Megan’s Law Internet Web Site by only the zip code where he or she resides.
      3. Non-Disclosure. A sex offender who is not identified on the Megan’s Law Internet Web Site.
   
   C. SARATSO. Acronym for the State-Authorized Risk Assessment Tool for Sex Offenders.
   
   D. RISK ASSESSMENT. Assessment of any individual sex offender by means of the SARATSO by trained law enforcement or other professionals. In the absence of a scored actuarial assessment of an offender’s risk for recidivism (such as “high,” “moderate,” or “low risk”), Office of the Sheriff personnel must rely upon information known to them about a specific offender when determining whether public notice is necessary to ensure the public safety. No assessment of risk by the SARATSO (such as “moderate risk” or “low risk”) precludes law enforcement from making a public notice or disclosure of
information about a specific sex offender if information about that offender
gives reasonable cause to believe notification was necessary to ensure the public
safety.

III. GENERAL.
A. The California Legislature has found there are compelling interests justifying the
disclosure of certain information about specified sex registrants “to allow
members of the public to adequately protect themselves and their children from
these persons.” The Office of the Sheriff will take a proactive role to ensure
members of the public are notified of sex offenders who move into their
communities and those sex offenders who pose a specific threat to public safety
based on information available to law enforcement. There are two primary
statutes:

1. Penal Code Section 290.45:
   a. Permits law enforcement entities to provide information to the
      public about any person required to register as a sex offender
      pursuant to Section 290 by “whatever means the entity deems
      appropriate, when necessary to ensure the public safety based on
      information available to the entity concerning that specific
      person.” (See 290.45(a)(3) for specific limitations on the
      disclosure of this information by Internet Web site.)
   b. Permits law enforcement entities to authorize “persons and
      entities who receive the information” about a registered sex
      offender to “disclose information to additional persons only if
      the entity determines that disclosure to the additional persons
      will enhance the public safety and identifies the appropriate
      scope of further disclosure.”
   c. Provides that “A designated law enforcement entity and its
      employees shall be immune from liability for good faith conduct
      under this section.”

2. Penal Code Section 290.46:
   a. Mandates that the California Department of Justice make
      available to the public via an Internet Web site (Megan’s Law
      Internet Web Site) information concerning persons who are
      required to register pursuant to Section 290.
   b. States criteria for the California Department of Justice to identify
      a sex offender by his or her full address or zip code and identifies
      those sex offenders who may apply for exclusion from the
      Megan’s Law Internet Web Site.
   c. Permits law enforcement entities to disclose specified
      information about an offender “by way of an Internet Web site”
      when necessary to ensure the public safety based upon available
      information.
   d. Sets additional penalties of no less than $10,000 and no more
      than $50,000 for any person who uses disclosure information to
      commit a misdemeanor; and a penalty of a five-year term of
imprisonment, to run consecutively with any other punishment, for anyone who uses disclosure information to commit a felony.

e. Sets a fine of $1,000 and/or imprisonment up to six months for any person who enters an Internet Web site established pursuant to this section if that person is required to register as a sex offender.

IV. PROCEDURE 1.

A. DISCLOSURE OF INFORMATION ABOUT SEX OFFENDERS.

1. Limitations on the Disclosure of Information About Sex Offenders.

   a. Under Penal Code Section 290.45(a)(1), the Office of the Sheriff may disclose certain information about a person required to register as a sex offender by whatever means appropriate, when necessary to ensure the public safety based upon available information concerning that person.

   b. Any and all disclosures shall include a statement that the purpose of the release of information is to allow members of the public to protect themselves and their children from sex offenders. The information may be provided by one or more of the following methods: personal contacts, telephone contacts, Internet Web site postings, and/or distribution of written notices or flyers by law enforcement or authorized citizens (including mail service). Community notification by way of an Internet Web site shall be governed by PC 290.46, and no posting on an Internet Web site may be made of any information identifying an individual as a person required to register as a sex offender except as provided in that section unless there is a warrant outstanding for that person’s arrest. Information about a sex offender will not be initially disclosed by means of a press release unless the Investigation Division Commander determines that such a release is necessary for public safety.

   c. The Investigation Division Commander or his designee shall decide whether to provide information about a sex offender. In determining whether to provide information, the following shall be considered: the awareness of a community where a sex offender has relocated or been released from confinement, the nature of the sex offender’s suspicious behavior or activity; the nature of the sex offender’s convictions; whether children or other persons at risk are located within approximately one-quarter mile (or more if circumstances warrant) of the sex offender; and other factors deemed relevant under the particular circumstances.

   d. If information about a sex offender is to be provided, only the following information about the sex offender may be disclosed:

      • Full name;
      • Known aliases;
      • Gender;
      • Race;
      • Physical description;
• Photograph
• Date of birth;
• Crimes (and dates of those crimes) resulting in registration under Penal Code Section 290;
• The address of the sex offender only if the sex offender is listed on the Megan’s Law Internet Web Site as a full address disclosure or if the Investigations Division Commander determines that disclosure is necessary for the safety of children or other persons at risk. No address of any sex offender may be disclosed until the address is verified;
• Descriptions and license numbers of vehicles in which the offender is known to drive;
• A victim profile (but excluding information that would identify the victim).
• Relevant conditions of probation or parole (such as one prohibiting contact with children); and
• The date of release from confinement.
• Any additional information as allowed per Penal Code 290.45/46.

e. The information disclosed will be limited to that information deemed relevant and necessary to allow members of the public to protect themselves and their children from the sex offender. Disclosure of information that would not enhance the public protection is not to be released.

f. The following statement must accompany every notification concerning a sex offender: “The purpose of this notification is to allow members of the public to protect themselves and their children from sex offenders. Any use of this information except as authorized by law is subject to criminal and/or civil penalties.”

• If the disclosure is in written form, this statement must be included in the written form.
• If the disclosure is verbal, the making of the statement must be fully reported in writing.

g. Disclosure will be made to public and private educational institutions, day care establishments and organizations that primarily serve individuals likely to be victimized or community members who may be at risk. Disclosure will not be made to employers, unless the nature of the employment places the offender in contact with persons likely to be victimized.

h. The Dispatch Supervisor and the appropriate Station House Commander will also be notified of all public disclosures.
B. DESIGNATION OF DISCLOSURE RESPONSIBILITY.

1. The Investigation Division Commander, or Watch Commander during non-business hours, will be responsible for:
   a. The approval of disclosure of information under this Policy;
   b. Notifying the Sheriff of each disclosure via the chain of command; and
   c. Ensuring the proper maintenance of all required records.

2. Field Officer Responsibility.
   a. Patrol Deputies will not provide legal advice to the public or the media on any issue related to this Policy, but will refer citizens to the Megan’s Law Internet Web Site.
   b. The Investigation Division may request Patrol Deputies to make personal notification to institutions, establishments, and organizations/individuals when necessary to ensure the public safety. Each instance of notification will be documented in a supplemental report and/or by notation in the Supervised Release File Record.
   c. When disseminating information, Patrol Deputies must state the information is being provided to allow members of the public to protect themselves and their children from sex offenders.
   d. Patrol Deputies who encounter sex offenders, and determine that prompt notification to a third party is necessary for public safety, will notify the appropriate Sergeant. The Sergeant, if possible, will respond to the scene and determine if notification to a third party is necessary, lawful, and within this Policy. If the Sergeant determines that notification is necessary, he/she shall notify the Investigation Division Commander, or Watch Commander during non-business hours, report the situation and seek his/her approval for notification. The Patrol Deputy will make an entry in the Supervised Release File Record and write a report, which will be forwarded to the Special Victims Unit.

C. REQUIRED RECORDS

1. A request for authorization to disclose information pursuant to this Policy will be submitted in written memo form, via the chain of command, to the Investigation Division Commander. The memo and any accompanying documentation will include:
   a. Identification of the sex offender and general background information describing his/her history of offenses;
   b. A description of the person or persons who are believed to be at risk;
   c. A description of his/her current activities that give rise to the reasonable

2. Those registrants classified by the Department of Justice as zip code only disclosures will have their full address listed as a secondary address (seen only by Sheriff’s Office employees who access the database through a Sheriff’s Office terminal) and the zip code where they live listed as their
primary address. Automated e-mail notifications will not be authorized for these registrants except in the event that specific circumstances give cause to believe that the registrant poses a threat to public safety.

3. Those registrants classified as non-disclosures will have their full address listed as their secondary address (seen only by Sheriff’s Office employees who access the database through a Sheriff’s Office terminal) and no address listed as their primary address. Automated e-mail notifications will not be authorized for these registrants except in the event that specific circumstances give cause to believe that the registrant poses a threat to public safety.

4. The detective assigned to sex offender registration and enforcement in the Sexual Assault Detail will be responsible for verifying the registrant’s status (full address disclosure, zip code only disclosure or non disclosure) at each registration event and updating the registrant’s file accordingly.

D. LAW ENFORCEMENT APPLICATION

1. The sex offender database will be available at every station house. Full read-only access passwords will be provided by the supervisor of the Sexual Assault Unit or the detective assigned to sex offender registration and enforcement.

2. The database will be used by each station house to account for every registrant in Sheriff’s Office jurisdiction and to assist the Sexual Assault Unit in conducting regular scheduled address verifications.

3. The database can also be used to conduct refined searches of all sex offenders registered in Sheriff’s Office jurisdiction by criteria such as: physical description; proximity to crime locations; types of vehicles associated with offenders; and crimes for which offenders are required to register. This function is vital in active investigations in the field.

4. Patrol personnel can provide updated information of additional addresses, vehicles, and the whereabouts of registered sex offenders by completing FI cards. This information will be added to the Sheriff’s Office database and could trigger a notification or investigation of the registrant’s compliance with registration laws or involvement in possible criminal activity.

5. The Investigation Division Commander will be responsible for:
   a. Ensuring the security of the database, monitoring its use, and the use of information obtained from it within the operations of the Sexual Assault Detail.

6. The Patrol Division Commander will be responsible for:
   a. Ensuring the security of the database, monitoring its use, and the use of information obtained from it within the operations of the Patrol Division.

V. PROCEDURE 2.

A. DISCLOSURE OF INFORMATION ABOUT SEX OFFENDERS
1. Limitations on the Disclosure of Information About Sex Offenders.

a. Under Penal Code Section 290.45(a)(1), the Office of the Sheriff may disclose certain information about registered sex offenders by whatever means the entity deems appropriate, when necessary to ensure the public safety based upon available information concerning the specific registrant.

b. The provision of information by any appropriate means shall be deemed necessary to allow members of the public to protect themselves and their children from sex offenders. The information may be provided by one or more of the following methods: personal contacts, telephone contacts, Internet Web site postings, e-mail notices, and/or distribution of written notices or flyers by law enforcement or authorized citizens (including mail service). Information about a sex offender will not be initially disclosed by means of a press release unless the Investigation Division Commander determines that such a release is necessary for public safety.

c. The Investigation Division Commander or his designee shall decide whether to provide information about a sex offender. In determining whether to provide information, the following shall be considered: the awareness of a community where a sex offender has relocated or been released from confinement, the nature of the sex offender’s suspicious behavior or activity; the nature of the sex offender’s convictions; whether children or other persons at risk are located within approximately one-quarter mile (or more if circumstances warrant) of the sex offender; and other factors deemed relevant under the particular circumstances.

d. If information about a sex offender is to be provided, only the following information about the sex offender may be disclosed:

- Full name;
- Known aliases;
- Gender;
- Race;
- Physical description;
- Photograph;
- Date of birth;
- Crimes (and dates of those crimes) resulting in registration under Penal Code Section 290;
- The address of the sex offender only if the sex offender is listed on the Megan’s Law Internet Web Site as a full address disclosure or if the Investigations Division
Commander determines that disclosure is indispensable for the safety of children or other persons at risk. No address of any sex offender may be disclosed until the address is verified;

- Descriptions and license numbers of vehicles in which the offender is known to drive;
- A victim profile;
- Relevant conditions of probation or parole (such as one prohibiting contact with children); and
- The date of release from confinement.

e. The information disclosed will be limited to that information deemed relevant and necessary to allow members of the public to protect themselves and their children from the sex offender. Disclosure of information that would not enhance the public protection is not to be released.

f. The following statement must accompany every notification concerning a sex offender: “The purpose of this notification is to allow members of the public to protect themselves and their children from sex offenders. Any use of this information except as authorized by law is subject to criminal and/or civil penalties.”

- If the disclosure is in written form, this statement must be included in the written form.
- If the disclosure is verbal, the making of the statement must be fully reported in writing.

g. Disclosure will be made to public and private educational institutions, day care establishments and organizations that primarily serve individuals likely to be victimized or community members who may be at risk. They will not notify employers, unless the nature of the employment places the offender in contact with persons likely to be victimized.

h. The Dispatch Supervisor and the appropriate Station House Commander will also be notified of all public disclosures.

B. DESIGNATION OF DISCLOSURE RESPONSIBILITY.

1. The Investigation Division Commander, or Watch Commander during non-business hours, will be responsible for:
   a. The approval of disclosure of information under this Policy;
   b. Notify the Sheriff of each disclosure via the chain of command; and,
   c. Ensuring the proper maintenance of all required records.

2. Field Officer Responsibility.
   a. Patrol Deputies will not provide legal advice to the public or the media on any issue related to this Policy, but will refer citizens to
either the Office of the Sheriff’s Internet Web Site, or to the Megan’s Law Internet Web Site.

b. The Investigation Division may request Patrol Deputies to make personal notification to institutions, establishments, and organizations/individuals when necessary to ensure the public safety. Each instance of notification will be documented in a supplemental report and/or by notation in the Supervised Release File Record.

c. When disseminating information, Patrol Deputies must state the information is being provided to allow members of the public to protect themselves and their children from sex offenders.

d. Patrol Deputies who encounter sex offenders, and determine that prompt notification to a third party is necessary for public safety, will notify the appropriate Sergeant. The Sergeant, if possible, will respond to the scene and determine if notification to a third party is necessary, lawful, and within this Policy. If the Sergeant determines that notification is necessary, he/she shall notify the Investigation Division Commander, or Watch Commander during non-business hours, report the situation and seek his/her approval for notification. The Patrol Deputy will make an entry in the Supervised Release File Record and write a report, which will be forwarded to the Sexual Assault Detail.

C. REQUIRED RECORDS

1. A request for authorization to disclose information pursuant to this Policy will be submitted in written memo form, via the chain of command, to the Investigation Division Commander. The memo and any accompanying documentation will include:
   a. Identification of the sex offender and general background information describing his/her history of offenses;
   b. A description of the person or persons who are believed to be at risk;
   c. A description of his/her current activities that give rise to the reasonable suspicion that a person is at risk and the nature and frequency of the contact or interaction that does or is likely to occur between the offender and the person at risk. Attach any reports that document the observed or suspected behavior or activities;
   d. A description of the proposed mechanism of disclosure (press release, flyers distributed to schools, etc.); and,
   e. A listing of the information to be disclosed.

2. Authorization for disclosure must be in writing, noted on the original request, by the Investigation Division Commander. The authorization will include any additions or amendments to the contents of the request.

3. Written disclosure of sex offender information, if necessary, may be in the form of a form letter, flyer, e-mail, postal mailing or other document.
Such information in the form of a press release requires approval of the Investigation Division Commander. Any verbal disclosure of sex offender information by a field officer shall be fully reported in the comments section of the Supervised Release File Record.

4. Written documentation of any disclosure will be noted either in a Uniform Crime Report and/or the registrants file kept in the office of the Special Victims Unit. The report or documentation will include the dates and times of the disclosure and the scope of the disclosure.

5. All Office of the Sheriff Disclosure documentation shall be maintained by the Investigation Division for at least five years.
I. POLICY.

A. In order to earn and preserve the public's trust, confidence and support, information to citizens will be limited only by imposed legal restraints, the need to preserve evidence, to prevent interference with criminal investigations, to prevent unreasonable interference with Office of the Sheriff operations, and to protect the constitutional rights of persons accused of a crime.

II. GENERAL.

A. OFFICE OF THE SHERIFF INFORMATION. Information of a general nature about the Sheriff’s Office organization, operations, goals and objectives are published in the Sheriff's Annual Report, Office of the Sheriff Newsletter, County Website, Social Media, and other publications. This type of information is routinely made available to all members of the public (except in-custody inmates). Employees are encouraged to assist citizens in obtaining information of this nature.

B. LAW ENFORCEMENT INFORMATION.

1. Employees shall be aware of legal restraints, the need to preserve evidence, to prevent interference with criminal investigations, to prevent unreasonable interference with Office of the Sheriff operations, and the obligation to protect the constitutional rights of persons accused of a crime, when dealing with law enforcement information.

2. The specifics of what law enforcement information may be released to the public is included in numerous Office of the Sheriff Policies, most notably 1.06.62 “Police Involved Fatal or Serious Injury Incidents Policy,” 1.06.71 “Dissemination of Law Enforcement Information,” 1.06.77 “Crime and Incident Records—Release of Information (Public Records Act),” and 1.06.80 “Citizens’ Complaints / Internal Investigations.” Employees will strictly comply with these policies when dealing with law enforcement information.
I. POLICY.
   A. To ensure the confidentiality, accuracy and security of Office of the Sheriff information, specific guidelines for the control of information are established.

II. DEFINITIONS.
   A. Office of the Sheriff Information. This term is inclusive of all official business of the Office of the Sheriff, both law enforcement and business operations.

III. GENERAL.
   A. SHERIFF’S OFFICE INFORMATION.
      1. The law enforcement functions of the Office of the Sheriff create a situation in which most information handled by Office of the Sheriff employees is legally confidential and the rest can be considered sensitive to public disclosure. Because of this situation, employees have a public trust and legal obligation to handle all Office of the Sheriff information in a professional manner.
      2. Employees shall treat Office of the Sheriff information as confidential. They shall not discuss nor impart Office of the Sheriff information to anyone except those for whom it is intended.
      3. The contents of any criminal record or record of a complaint or investigation conducted by the Office of the Sheriff shall be disclosed only in compliance with Office of the Sheriff Policy Section 1.06.71, Dissemination of Law Enforcement Information.

   B. ACCESS TO AND USE OF RECORDS AND FILES.
      1. Information contained in the records and files of the Office of the Sheriff or records and files available to the Office of the Sheriff because of its status as a law enforcement agency, are for the official use of law enforcement/criminal justice agencies only.
      2. "Official use" shall be broadly construed to mean that an inquiry into a record or file or the use of any information obtained from such records...
and files is either required or is helpful in accomplishing the objectives or mission of this or another law enforcement or criminal justice agency.

3. Inquiring into such records or files or using any information from them for personal reasons is prohibited. An example of unauthorized use would be requesting vehicle registration information in order to be able to contact the owner to inquire about purchasing the vehicle. Another example would be accessing the name index to determine if an acquaintance has a criminal record.

IV. DUTY TO REPORT INFORMATION.
A. Employees shall accurately report any situation observed by them or any information given in good faith by any member of the public regarding the need for action by the Office of the Sheriff.

V. FALSE INFORMATION.
A. Employees shall not knowingly or willfully enter or cause to be entered any inaccurate, false, or improper information or material matter into any Office of the Sheriff books, records or reports.

VI. REMOVAL OF OFFICIAL RECORDS.
A. Employees shall not remove any official record of the Office of the Sheriff and/or copies thereof, unless directed by their Supervisor or under due process of law.
I. POLICY.
   A. The Office of the Sheriff shall ensure compliance with statutes and State and Federal regulations pertaining to rap sheet security. Access to local, State and Federal Automated Criminal History Systems (ACHS) is controlled by statutes and regulations issued by agencies responsible for those systems. The Office of the Sheriff is subject to periodic mandatory audits of our compliance. Failure to comply with requirements imposed by statute or regulation could cause the Office of the Sheriff to lose its access to this very important information. The purpose of this Policy is to set forth the means by which the Office of the Sheriff will ensure compliance with all statutory and regulatory requirements pertaining to Automated Criminal History Systems.

II. GENERAL.
   A. PHYSICAL SECURITY OF TERMINALS.
      1. Terminals with access to State or Federal Automated Criminal History Systems shall be located in areas not open to Non-Office of the Sheriff personnel without escort and must not be visible to an unauthorized observer.
      2. Strict sign-on/sign-off security will be observed. The individual accessing the system(s) will ensure that he/she is signed-on and will sign-off when ceasing work at the terminal.
   B. TRAINING REQUIREMENTS.
      1. Any person accessing the California Law Enforcement Telecommunications System (CLETS) or National Crime Information Center (NCIC) communications networks shall have received training required by the California Department of Justice for persons using the CLETS and NCIC networks.
      2. All personnel having access to local, State or Federal criminal history information shall have in their personnel file a signed statement indicating understanding of the penalties for misuse of such information.
C. AUDIT LOG REQUIREMENTS.

1. All sites with terminal access to State or Federal criminal history will use the Rap Sheet Control Log in compliance with CLETS regulations.

2. Every receipt of criminal history information whether or not printed, will be entered on the Rap Sheet Control Log.

3. Division Commanders will ensure that Rap Sheet Control Logs for each month will be sent to Technical Services, Division Records Unit by the 10th of the following month, where they will be kept for a minimum of two years. Name inquiries or receipt of Personal Data Record (PDR) information only does not require an entry on the Rap Sheet Control Log.

D. SYSTEMS USAGE REQUIREMENTS.

1. CLETS Policy prohibits access to or use of CLETS/NCIC Automated Criminal History Systems for employment, licensing or certification purposes. Unauthorized use of CLETS, National Law Enforcement Telecommunications System (NLETS) or information obtained from automated systems may constitute a crime under any of several applicable statutes and will be a violation of Office of the Sheriff Policy.

2. Use of the RTE (route) field in either free-format or in formatted screens is mandatory. The operator will include in the field as a minimum requirement the name or employee number of the person for whom the record is requested. A case number, booking number, citation number or other specific reference to the purpose for the inquiry must also be included. Example: RTE/28699 90-12345 or: RTE/JJones 90-34567.

E. RETENTION, DESTRUCTION OF RAP SHEETS.

1. Rap sheets will not be appended to a report nor retained in a booking record after release of the subject.

2. When no longer needed, rap sheets will be destroyed by shredding.

F. OBTAINING ACCESS TO ACHS. The responsible Division Commander must make requests for ACHS access for any terminal in writing to the Technical Services Division Commander. Upon verification of need and determination that security requirements will be met, the Technical Services Division Commander will request such access and a new CLETS mnemonic if necessary from CLETS. Such requests must be in writing and several weeks should be allowed for the request to be acted upon by the State.

G. ENFORCEMENT. The Technical Services Division Commander shall be responsible for enforcement of the provisions of this Policy by ensuring that all personnel are advised of changes to CLETS and NCIC security regulations and their operating policies and procedures. If necessary due to changes in CLETS, NCIC requirements or Office of the Sheriff needs, immediate changes to this Policy may be placed in effect by verbal or written order of the Technical Services Division Commander pending approval by the Sheriff.
I. POLICY.
   A. The Office of the Sheriff will ensure that its use of State and Federal automated systems databases is in compliance with all published policies and required procedures of those systems.

II. DEFINITIONS.
   A. CRIMINAL JUSTICE INFORMATION SYSTEM (CJIS). This is the collection of databases maintained by the California Department of Justice and includes the Stolen Vehicle System, Missing and Unidentified Persons System, Wanted Persons System, etc.
   B. NATIONAL CRIME INFORMATION CENTER (NCIC). This is the FBI’s version of CJIS. It is a collection of databases to which we have access, such as the Automated Property System, Automated Warrant System, Missing Person System, etc.
   C. AGENCY CLETS COORDINATOR (ACC). The California Department of Justice is the Control Terminal Agency (CTA) for the National Law Enforcement Telecommunication System (NLETS) as designated by the FBI. The CTA is responsible for ensuring system security as well as accuracy of entries in databases on a statewide basis. DOJ designates one Agency Head in each County as the Agency CLETS Coordinator. The ACC is responsible for ensuring system security in the County and the accuracy of entries by the Office of the Sheriff. The Sheriff is the designated ACC for Contra Costa County and has delegated the responsibility of ACC to the Records Unit Manager.
   D. ACHS: Automated Criminal History System
   E. AFS: Automated Firearms System
   F. AWS: Automated Warrant System
   G. DOJ: California Department of Justice
   H. DROS: Dealer’s Record of Sale (firearms sales records)
   I. MPS: Missing Persons System
   J. MUPS: Missing and Unidentified Persons System
K. SBS: Stolen Boat System
L. SVS: Stolen Vehicle System
M. WPS: Wanted Person System

III. GENERAL.
A. The Criminal Justice Information Systems and National Crime Information Center provide automated systems, which allow, and in some cases require, law enforcement agencies to make entries, which are accessible to other law enforcement agencies. These systems have files for warrants (WPS/AWS), missing persons (MUPS/MPS), stolen vehicles (SVS), stolen boats (SBS), and stolen (and lost and found) firearms (AFS).

1. Our use of these systems is subject to policies and procedures promulgated by the governing bodies of CJIS and NCIC. Among the most important of the policy requirements is that the Office of the Sheriff must periodically "validate" every active entry in the systems to ensure that the entries are currently valid and contain all available information.

IV. PROCEDURE 1.
A. DESIGNATED RESPONSIBILITIES.

1. As the designated Agency Terminal Coordinator, the Technical Services Division Captain is responsible for ensuring the compliance of the Sheriff’s Office with validation requirements and for coordinating the activities of involved Divisions.

2. The Validation Coordinator shall be the Records Unit Manager of Technical Services Division. The Validation Coordinator shall:
   a. Receive the validation materials from DOJ;
   b. Notify DOJ of receipt of the validation checklists;
   c. Distribute the validation lists to the appropriate Divisions or Police Service Contracts with copies of the reports;
   d. Provide assistance as necessary to involved Divisions and Police Service Contracts; and
   e. Certify completion of the validation to DOJ.

V. PROCEDURE 2.
A. GENERAL VALIDATION PROCEDURES. The Investigation Division Commander will ensure validation procedures are completed for the following systems: Vehicles, Boats, Missing or Unidentified Persons, and Firearms.

1. Check the report for any supplemental information and compare against the entry in the system. Update or cancel the entry as appropriate.
   a. For example, if a supplement to a Missing Person report indicates the person has been located or returned, but there is no cancellation of the original entry, the report is no longer in "active status" and the entry must be removed immediately. Keep a copy of the cancellation message with the supplemental report.
2. Ensure that the report includes appropriate available source record documents such as the DMV vehicle registration or DROS printout.

3. If the report reflects active status, contact the reporting party as indicated on the report. Also, determine if the reporting party has any new information to add to the report. Often victims will report an item stolen only to discover later that they have misplaced it. If they then fail to notify us, the information is left in the computer unnecessarily.

4. After reviewing the report and verifying the property or person’s status, check the computer entry against the report to make sure correct information has been entered.
   a. For example, a stolen gun entry shows a caliber of .357. However, the report shows .22. The entry should be modified to reflect the correct information.

5. Once the accuracy has been confirmed, check to make sure all the information available on the report has been included in the entry.
   a. For example, the report shows a gun having a category of “semi-automatic,” but the entry does not contain this information. This entry should be modified to reflect the data. Remember, NCIC does not accept a gun entry without a category. Chances of making a positive identification are greater when the item can be fully described.

6. Document action taken and results in a supplement to the report.

7. Return the “Validation Check List” to the Records Unit Manager.

VI. PROCEDURE 3.

A. REMOVAL OF ENTRIES WITHOUT RECOVERY. Entries in the various systems may be canceled even if the item or person has not been recovered or has not returned. The following criteria shall be applied. However, if in the judgment of the assigned Investigator the entry should be retained, it need not be canceled.

1. Vehicle/Boats (SVS, ABS).
   a. After 3 years, if the estimated value of the item is less than $1000, the entry may be canceled.

2. Firearms (AFS).
   a. All firearms entries are indefinite until they have been recovered.
   b. Entries for firearms, which are not assault weapons as defined in Penal Code Section 12276, will be canceled after 10 years.

   a. If the missing person is an adult, the entry will be removed if the person is determined to be voluntarily missing.*
   b. Upon reaching the age of emancipation, persons reported missing as juveniles will be removed from the system (MUPS) if the person is determined to be voluntarily missing.*
c. Retaining an adult, or "emancipated juvenile" or voluntarily missing person in MUPS will require a statement signed by a legal guardian, physician, psychiatrist or psychologist that the person is not competent to make decisions regarding where or how they live, giving the reasons for that determination.

d. When an adult or "emancipated juvenile" is determined to be voluntarily missing, the reporting persons will be so notified. The reporting person will not be informed of the location or living arrangements of the missing person. If the reporting person(s) requests it, the missing person may be informed of the address and/or telephone number of the reporting person for the purpose of initiating contact if the "missing person" wishes to do so.

4. "Voluntarily Missing" shall be construed to mean that:
   a. The person is an adult.
   b. The person is not at risk (see MUPS Training Manual, P.6.) or
   c. The person is "at risk" due to medical problems or mental impairment but is aware of the problem or impairment and is competent to make decisions regarding his/her own care and treatment.

VII. PROCEDURE 4.

A. SECOND CHECK REQUIREMENT. A second check is required for all entries into the CLETS or NCIC systems. A second check is a review of the entry by a second person who did not make the original entry.

1. Dispatch Responsibilities: Dispatchers have the second check responsibility for entries made by Dispatch and by field Deputies.

2. Patrol Responsibilities: Attach CLETS entry for stolen vehicles and guns to the original report and confirm that the information matches that provided in the report.

3. Investigation Responsibilities: Investigators are responsible for confirming the information on the entry and attaching the entry to the original report.

4. Records Unit staff are responsible for restraining order, warrant, and gun entries.

VIII. PROCEDURE 5.

A. GENERAL VALIDATION PROCEDURE FOR WARRANTS.

1. Because of the volume of warrants handled by the Office of the Sheriff and because the greatest majority of those warrants relate to cases filed by other agencies, it is not feasible to consult with other agencies or departments to determine the "validity" of each warrant at this time. Staff will, however, ensure that:
   a. Each warrant entry is compared to the automated warrant and/or the physical warrant when applicable and the Master Case Record. Incomplete or inaccurate information will be corrected;
b. Entries which do not meet current requirements for entry into NCIC-AWS are canceled; and

c. All warrants over 3 years old are researched to attempt to locate additional information on the subject. The warrant entry will be updated as appropriate.

d. All check lists, DOJ entry printout responses, shall be scanned and indexed into Disc Image by Records Unit staff for audit purposes.
## I. POLICY.

A. The public release of records will be handled in accordance with applicable statutes. In the processing of requests for records under the Public Records Act, every attempt will be made, consistent with law, to balance the public’s right to certain information with the privacy rights of individuals and the Office of the Sheriff interest in ensuring the successful completion of investigations and prosecutions.

B. The Office of the Sheriff must determine, within 10 days from the receipt of a request for public records, “whether the request, in whole or in part, seeks copies of disclosable public records” that are in the possession of the Office of the Sheriff, and “promptly notify the person making the request of the determination and the reasons therefore.” Under certain defined circumstances, the deadline may be extended by written notice to specify a date that would result in an extension of no more than 14 days (Gov. Code §6253 (c)).

## II. DEFINITIONS AND GENERAL PROVISIONS.

B. Confidential Personal Information - Any information regarding crimes and other incidents that identifies or describes an individual, including but not limited to, his or her name, social security number, physical description, home address, home and cellular telephone numbers, education, financial matters, and medical or employment history. It includes statements made by, or attributed to the individual. It also includes identification of confidential informants and information relating to juveniles except per statute or decisional law (Refer §6251, §1798.1 Civil Code, and Article, Section 1, CA Constitution).

C. Public Records – Any non-exempt writing containing information relating to the conduct of the public’s business prepared, owned,
used or retained by the Sheriff’s Office. “Writing” includes documents, including emails, audio and video recordings, regardless of the manner in which the record has been stored. (Refer to Gov. Code §6252 (g)).

D. Arrest/Booking Logs – Records of all public data about a person arrested by the Contra Costa County Office of the Sheriff, to include Contract Cites, and those persons booked into the Martinez Detention Facility. This contemporaneous booking information is released by the Records Unit on a continuous basis to the public in accordance with the California Public Records Act.

III. GENERAL.

A. The purpose of this policy is to provide guidance on the release of information in accordance with the law, while safeguarding the privacy rights of community members and ensuring that Office of the Sheriff investigations and security procedures are not compromised.

B. Public Records Act requests, depending on the record sought, are handled and fulfilled by (a) the Records Unit, (b) the Communications Center Director, (c) the Planning & Research Unit, (d) the Public Affairs Director, (f) the appropriate Division Commander, (g) a Contract City Police Manager, and (h) the Sheriff, Undersheriff, or their designee. All Public Records Act requests shall be forwarded without delay to the appropriate handling unit. No Member of this Office, other than those listed above, shall respond to, or fulfill, a Public Records Act request.

C. See Procedure 10 for mandatory document release requirements involving:

1. Records of officer-involved shootings;
2. Records of officer uses-of-force that result in death or great bodily injury;
3. Records of sustained incidents involving sexual assault against a member of the public;
4. Records of sustained incidents of dishonesty;
5. All video or audio recordings involving “critical incidents,” as defined.

D. Nothing in this policy requires the disclosure of a video or audio recording that was created during the commission or investigation of the crime of rape, incest, sexual assault, domestic violence, or child abuse that depicts the face, intimate body part, or voice of a victim of the incident depicted in the recording (Gov. Code § 6254.4.5). Such records may be withheld pursuant to Gov. Code § 6255 with the denial demonstrating that on the facts of the particular case, the
public interest served by not disclosing the recording clearly outweighs the public interest served by disclosure of the recording.

E. Responses to Public Records Act requests will be sent on Sheriff’s Office letterhead via US Mail along with any disclosable records unless specifically requested in another format, such as electronic.

IV. PROCEDURE 1.

A. PUBLIC INFORMATION – The Office of the Sheriff shall maintain a daily log of arrests that shall be made available to the public and/or media representatives. Release of information on daily arrests shall not constitute a waiver of any exemptions from disclosure provided under the Government Code.

B. Contemporaneous Arrest Reporting. To the extent it is recorded, the following information pertaining to persons arrested by this agency (to include contract cities) shall be made available to the public on the Office of the Sheriff’s website for ten (10) days at: www.cocosheriff.org (Gov. Code § 6254 (f) (1)). This information will also be made available at the public counter of the Records Unit for a period of ten (10) days. This ten (10) day period is known as the “Contemporaneous Period” (See, Kusar (1993) 18 Cal.App.4th 588, interpreting § 6254 (f)(1)). This information may not be available for public release after the Contemporaneous Period and will be subject thereafter to the same processing and analysis as all other Public Record Act requests.

1. Name and occupation.
2. Physical description including sex, date of birth, height, weight, hair color, eye color.
3. The time, date, location of the arrest.
4. Charges, including outstanding warrants from other jurisdictions, parole or probation holds, bail amount, location where the person is held or time and manner of release.
5. The circumstances of the arrest.

C. Contemporaneous Calls for Service Logs. To the extent it is recorded, contemporaneous information regarding crimes and other incidents shall be made available to the public and the press. Calls for service information shall be made available to the public on the Office of the Sheriff website for ten (10) Days at: www.cocosheriff.org (Gov. Code §6254(f)(2)). This information will also be made available at the public counter of the Records Unit for a period of 10 days. After the Contemporaneous Period, this information will need to be requested under the Public Record Act.

1. The time and date, of all complaints or requests for assistance.
2. The location of the incident
3. A brief description of the incident type.
Additional information, including the following, is available under the Public Records Act upon request:

4. Time and date of the report.
5. The nature of the response.
6. Name, and age of the victim, unless withheld at the victim’s request.
7. Factual circumstances surrounding the crime or incident.
8. A general description of any injuries, property, or weapons involved.

Crime Reports containing the information described above shall be edited to remove other information and made available at the public counter of the Records Unit for a period of 10 days.

D. The Daily Booking Log from the Jail Management System will be made available at the public front counter for 10 days and will list information of all individuals booked into Contra Costa County jails.

E. Members of the public seeking information not available at the public counter may be encouraged to make their requests in writing in order for the staff processing the request to understand the scope of the request with clarity. Note, however, that Public Records Act requests need not be made in writing and are valid as verbal request.

F. Releasable information about contemporaneously arrested persons not included in the above contemporaneous listings may be acquired from the Jail Management System and provided to the requestor verbally.

G. Exceptions to the Required Release:

1. The name of the victim of any of the following crimes shall not be disclosed without the consent of the victim (Gov. Code §6254 (f) (2)): Penal Code sections 220, 236.1, 261, 261.5, 262, 264, 264.1, 265, 266, 266a, 266b, 266c, 266e, 266f, 266j, 267, 269, 273a, 273d, 273.5, 285, 286, 288, 288a, 288.2, 288.3, 288.5, 288.7 or 289, 422.6, 422.7 and 422.75.

2. Juvenile police records, defined in W&I 827.9(m) as records or information relating to the taking of a minor not custody, temporary custody or detention, will not be released without a court order, per “Notice to Contra Costa County Law Enforcement Agencies” issued by Hon. Rebecca C. Hardie dated Nov. 7, 2018 Requests for juvenile information must be made in writing, completing a Release of Juvenile Information Form (§827 W&I and TNG v. Superior Court).

3. The address and telephone number of a victim or witness will not be disclosed to an arrested person or a person who may be a defendant in the alleged offense (§841.5 PC).

4. Information which would identify a particular person as having received services, whether voluntary or involuntary, pursuant to Welfare and Institution Code
sections pertaining to protective custody, mental health or similar activities, shall not be disclosed (Refer Gov. Code §6254 (c)).

V. PROCEDURE 2. DESIGNATED INFORMATION FOR RELEASE TO SPECIFIED PERSONS.

A. Records of complaints or investigations conducted by criminal justice agencies are generally exempt from disclosure requirements for public records (Gov. Code § 6254 (f)). Also exempt from release are intelligence and security files of a criminal justice agency. However, certain information must be released to specific persons in the following specified incidents unless the disclosure would endanger the successful completion of an investigation or a related investigation. The analysis of conclusions of an investigating deputy may also be redacted from a report or not disclosed (Gov. Code § 6254 (f):

1. Specified Incidents:
   a. Arson;
   b. Burglary;
   c. Fire;
   d. Explosion;
   e. Larceny;
   f. Robbery;
   g. Vandalism;
   h. Vehicle theft;
   i. Carjacking;
   j. A crime as defined in § 13951(b) California Government Code.

2. Specified Persons:
   a. The victim;
   b. An authorized representative of the victim (e.g., attorney, insurance company, parent or legal guardian of juvenile victim, etc.); and
   c. An insurance carrier against which a claim has been or may be filed.
   d. Any person suffering bodily injury or property damage or loss.

3. Specified Information:
   a. The names and addresses of all persons involved in the incident, and witnesses to the incident, except for confidential informants. For this section, the following definitions shall apply:
      i. “Persons involved” means persons listed in the report other than the requester
who suffered bodily injury or property damage as a result of the incident.

ii. “Witness” means a person who has direct knowledge of the events leading up to or the occurrence of the incident for which the requester is characterized as a victim.

b. A description of any property loss involved.

c. The date, time, and location of the incident.

d. Statements of all witnesses, other than confidential informants, and other involved persons.

e. Any diagrams.

4. Manner of Release:

a. If necessary, a report may be edited or redacted, prior to release, to remove information which does not fall into the above categories or which must be withheld by statute.

b. Suspects statements and information identifying them will be redacted.

c. Supplemental reports will be released only as necessary to satisfy the above requirements for release. (Generally, the required information will be found in the Original Report, and no Supplemental Report will generally need to be released; if however, some required information is only found in the Supplemental Report, then an edited or redacted copy of the Supplemental Report, removing all non-required and redundant information, shall be released.)

VI. PROCEDURE 3. DISCLOSURE OF ADDRESS INFORMATION.

A. Addresses of Arrested Persons. Addresses of arrested person shall be disclosed as provided above.

B. Addresses of Victims. Addresses of victims of crimes and incidents are not to be disclosed except in accordance with the following procedures (Gov. Code §6254 (f) (3), § 841.5 PC):

1. The address of the victim of any of the following crimes shall not be disclosed without the consent of the victim (Gov. Code § 6254 (f) (2); Penal Code §§ 220, 236.1, 261, 261.5, 262, 264, 264.1, 265, 266, 266a, 266b, 266c, 266e, 266f, 266j, 267, 269, 273a, 273.5, 285, 286, 288, 288a, 288.2, 288.3, 288.7, 289, 422.6, 422.7, 722.75, 646.9, and 647.6.

2. The addresses of juvenile victims, including victims of the above crimes will not be released without a Juvenile Court Order (§ 827 WI and TNG v. Superior Court).

3. Address and telephone number of a victim or witness will not be disclosed to an arrested person or person who may be a defendant in alleged offense (§ 841.5 PC).
C. Addresses of both Suspects and Victims. Notwithstanding 1 and 2, above, the current address of every individual arrested, and of a victim of a crime, not otherwise disclosable, will be disclosed to persons who state under the penalty of perjury, that their interest in receiving the information is:
   1. Journalistic;
   2. Scholarly;
   3. Political;
   4. Governmental Purpose;
   5. Is made by a licensed private investigator for investigation purposes.

D. Information released pursuant to 3, above, may be released electronically. However, this information will not be made available on the website. Requestors shall make each request for address information in writing, preferably on an Office of the Sheriff form. The form will require the requester to:
   1. Identify the individual requester and/or the publication, institution, party or person they represent;
   2. State under penalty of perjury that address information provided will not be used directly or indirectly to sell any product or service; and
   3. Specifically identify the record that contains the address requested.

E. If, in the best judgment of the Technical Services Division Commander or his/her designee, the requester is deemed to have a commercial purpose, he/she will be denied access to address information and will be so notified in writing (Gov. Code § 6254(f)(3), § 6255 (b)).

VII. PROCEDURE 4. DISCLOSURE OF INFORMATION TO VICTIMS.

A. Adult Records. Records which are otherwise exempt from release pursuant to § 6254(f), must be made available to victims in a limited or redacted manner. Upon the request of a victim (or the victims authorized representative, or an insurance company, the Office of the Sheriff will disclose “the names and addresses of persons involved in, or witnesses other than confidential informants to, the incident, the description of any property involved, the date, time, and location of the incident, all diagrams, statements of the parties involved in the incident, [and] the statements of all witnesses, other than confidential informants.”

   1. This requirement will generally be fulfilled by providing a copy of the applicable report, redacted to leave visible the categories of information required to be released. Note that if all the required information is available in the Original Report, Supplemental Reports will not be provided. If, however, the required information is not present in the Original Report, but is provided in a Supplemental Report, then the Supplemental Report will
also be provided, also redacted to leave visible only the
required information.

B. Juvenile Records. Records or information relating to the taking of a
minor into custody, temporary custody, or detention require different
processing per W&I Code § 827, the “TNG” Order issued by Judge
Lois Haight on December 12, 2001, and the Notice to Contra Cosa
County Law Enforcement Agencies” issued by Judge Rebecca
Hardie on November 7, 2018. Such records may be provided,
without a court order and without notice or consent from the person
who is the subject of the juvenile police records, to the following
persons or entities:

1. The person who is the subject of the juvenile police
record;
2. The parent or guardian of the person who is the subject
of the juvenile police record; or
3. The attorney for the parent or guardian.

If the request is from someone other than those individuals specified
above, the records shall not be released without an order from the
Juvenile Court. Refer to Judge Hardie’s Notice for compliance
procedures in connection with such a request.

VIII. PROCEDURE 5.

A. DETERMINING THE RELATIONSHIP OF A PERSON TO AN
INCIDENT. Due to the nature of Office of the Sheriff reports, it is
not always possible to determine whether a particular person is
entitled to receive information based solely on how that person is
classified in the report. It is often necessary to read the report and
“look beyond” the classification of a person as a “witness,” “lead,”
or “other.” For example:

1. A person classified as a “witness” may have suffered
property damage as the result of a criminal act. In this
situation it would be appropriate to disclose or release
information to the person because he/she is the “victim”
of vandalism.

2. In a case of “mutual combat” each party is the victim of
an assault as well as the suspect in an assault. In such a
case, it may be reasonable to release to each person the
information he/she would receive if he/she were only
classified as a victim.

3. Parents of juvenile victims can exercise the right of the
juvenile to receive information. The Personal
Representatives (Executors, Administrators, etc.) of
deceased victims are entitled to the rights of the
deceased. The request of an attorney representing a
victim will be treated as if the request came directly
from the victim.
B. WITHHOLDING INFORMATION.

1. Information normally required to be released may be withheld per statutory authority or decisional law. Authorization from the Commander of the Division handling an active case or his/her designee, is required prior to the release of that information (§ 6254 (f), §6254 (k), and Gov. Code §6255 (a)(b)) if:

   a. Release would reveal the identity of a confidential informant.

   b. Release would place any person in jeopardy.

   c. Release would be detrimental to the completion of the investigation or a related investigation.

   d. Release would expose confidential Office of the Sheriff operations or procedures, including security procedures.

   e. Release would cause harm to the reputation of, or cause an unreasonable embarrassment to, or constitute an unreasonable invasion of the privacy of, a citizen (Civil Code § 1798.1 and Article 1, Section 1 CA Constitution).

All reports, or information contained therein, not required to be released to the public, will not be released without specific authorization.

C. Privacy Concerns. Any person’s driver’s license number, social security number, home telephone number, work telephone number, and residential address shall not be released unless disclosure is specifically required by law or upon specific authorization. Additionally, a person’s employer’s name and address will not be released unless the person’s involvement pertains to the employment.

IX. PROCEDURE 6.

A. TRAFFIC AND BOATING ACCIDENT REPORTS. Traffic and Boating Accident Reports shall be disclosed only to persons who have a proper interest in the report. This includes, but is not limited to, the following persons (§ 20012 Vehicle Code (VC), § 656 (f) Harbors and Navigation (HN):

1. The involved driver(s) or operator(s).

2. Injured persons.

3. The legal guardian or parent of a minor driver or operator.

4. The authorized representative of an involved driver or person injured in the accident.

5. The owner of involved vehicles or vessels or damaged property.
6. For traffic collisions: Persons who may incur civil liability, including liability based on a breach of warranty.

7. For traffic collisions: Any attorney who declares under penalty of perjury that he/she represents any of the above persons.

8. Traffic collision reports involving a juvenile driver or juvenile information may be released in conformity with Procedure 4, Item 2.

9. The information disclosed will, to the extent possible, be limited to information directly related to the occurrence of the collision or accident. This will typically be recorded on Forms CHP 555, Traffic Collision Report and CHP 556, Narrative/Supplemental or DBW Form VAR-1. This will also include photographs of the collision.

10. Photographs of persons receiving medical attention or which otherwise do not contribute to an understanding of the collision should not be disclosed to anyone other than the person so depicted. (Gov. Code § 6253 (c), Civil Code §1798.7, Article 1, Section 1 CA Constitution). Photographs of deceased persons or body parts shall not be released pursuant to a Public Records Act request, without a court order (Code of Civil Procedure § 129).

X. PROCEDURE 7.

A. NON-CRIMINAL REPORTS. Application of this procedure requires that a clear distinction be made between criminal and non-criminal incidents. Many incidents that begin as criminal complaints or investigations are determined to be non-criminal in nature. This final determination does not change the purpose of the response or the nature of the investigation. Non-criminal reports are reports of incidents that begin and end as inherently public assistance activities. Examples of such incidents would be the search for a missing child, assistance to an injured motorist, and response to a hazmat incident (but only if it is clear that the hazmat incident was not caused by a criminal act).

1. Except for that information which will be released pursuant to “Procedure 1 and 2” above, in the interest of privacy rights of the involved persons, personal information contained in these reports will be withheld from all but those with a statute-based proper interest. The following persons are considered to have a proper interest (1798.1 CC and Article 1, Section 1 CA Constitution):

a. The involved parties.

b. The legal guardian(s) of involved parties.
c. Parents who have legal custody of juveniles who are involved parties.
d. The authorized representative of involved parties.
e. Persons who may have suffered property damage or incurred civil liability.
f. An attorney representing any of the above parties.

XI. PROCEDURE 8.

A. OTHER REPORTS AND INFORMATION THAT MUST BE WITHHELD. The following reports shall not be released pursuant to a Public Records Act request except to the persons specified therein or upon specific approval by a Captain or above:

1. Reports relating to incidents pertaining to Welfare and Institution Code Sections 5000 et seq. (hospitalization, mentally ill commitment, etc.) may not be released, except to the subject, guardian or conservator and treatment provider. Release to any other person shall be only with the written consent of one of the foregoing persons (§ 5328 W&I, § 6253 (c) and Gov. Code § 6254 (k).

2. Reports of child abuse made pursuant to Penal Code Sections 11166 and 11166.2 (reports of child abuse by "child care provider" or "child care custodian", etc.) are confidential and may be released only to child protective agencies, the District Attorney, or to agencies responsible for licensing childcare facilities.

3. Elder abuse reports are confidential and not releasable per § 15633 WI.

4. Juvenile information is generally not releasable (§ 827 WI and TNG v. Superior Court).

XII. PROCEDURE 9.

A. CORONER'S REPORTS. Coroner's Reports are public records and are made available when completed. These records include the toxicology report, autopsy report, and finalized death certificate. However, if the decedent was the victim of a crime all documents, including the toxicology report and autopsy report, are exempt from disclosure (Gov. Code § 6254 (f) and Katheryn J. Dixon v. Superior Court of El Dorado Co.). Other medical records, or law enforcement agency records, including crime reports obtained by Coroner's staff, are not releasable as part of the Coroner's Report. Photographs taken by the Coroner's staff, including autopsy photographs, are not to be disclosed ( § 129 Code of Civil Procedure).
XIII. PROCEDURE 10.

A. MANDATORY PRA RELEASES PER SB 1421 (Amending Penal Code §832.7).

1. GENERAL. Notwithstanding that “the personnel records of peace officers and custodial officers and records maintained by any state or local agency pursuant to Section 832.5, or information obtained from these records, are confidential and shall not be disclosed in any criminal or civil proceeding except by discovery pursuant to Sections 1043 and 1046 of the Evidence Code,” and notwithstanding the Investigatory Exception found in Gov. Code 6254(f), peace officer personnel records relating to the following incidents shall not be confidential and shall be made available for public inspection pursuant to the California Public Records Act:

   a. An incident involving the discharge of a firearm at a person by a peace officer;

   b. An incident in which the use of force by a peace officer against a person resulted in death, or in “great bodily injury”;

      i. For purposes of this policy, “great bodily injury” shall be defined to mean a serious impairment of physical condition, including, but not limited to, the following: loss of consciousness; concussion; bone fracture; protracted loss or impairment of function of any bodily member or organ; a wound requiring extensive suturing; and serious disfigurement.

   c. an incident in which a sustained finding was made that a peace officer engaged in sexual assault involving a member of the public; and

      i. “Sexual assault” is defined under Penal Code § 832.7 as “the commission or attempted initiation of a sexual act with a member of the public by means of force, threat coercion, extortion, offer of leniency or other official favor, or under the color of authority. For purposes of this definition, the propositioning for or commission of any sexual act while on duty is considered a sexual assault.

      ii. “Member of the public” is defined under Penal Code § 832.7 as “any person not employed by the officer’s employing agency and includes any participant in a cadet, explorer, or other youth program affiliated with the agency.”
d. an incident in which a sustained finding was made of dishonesty by a peace officer directly relating to the reporting, investigation, or prosecution of a crime, or directly relating to the reporting of, or investigation of misconduct by, another peace officer, including, but not limited to, any sustained finding of perjury, false statements, filing false reports, destruction, falsifying, or concealing of evidence.

2. CLASSES OF INFORMATION TO BE RELEASED.

a. With respect to 1.a-d above, the records that shall be released include all investigative reports; photographic, audio, and video evidence; transcripts or recordings of interviews; autopsy reports; all materials compiled and presented for review to the district attorney, or whether the officer’s action was consistent with law and agency policy for purposes of discipline or administrative action, or what discipline to impose or corrective action to take; documents setting forth findings or recommended findings; and copies of disciplinary records relating to the incident, including any letters of intent to impose discipline, any documents reflecting modifications of discipline due to the Skelly or grievance process, and letters indicating final imposition of discipline or other documentation reflecting implementation of corrective action. (Any fees that are statutorily allowed may be collected prior to the release of these records.)

b. Any record relating to an incident in which a sustained finding was made by any law enforcement agency or oversight agency of dishonesty by a peace officer or custodial officer directly relating to the reporting, investigation, or prosecution of a crime, or directly relating to the reporting of, or investigation of misconduct by, another peace officer or custodial officer, including, but not limited to, any sustained finding of perjury, false statements, filing false reports, destruction, falsifying, or concealing of evidence.

c. A record from a separate and prior investigation or assessment of a separate incident shall not be released unless it is independently subject to disclosure.
d. If an investigation or incident involves multiple officers, information about allegations of misconduct by, or the analysis or disposition of an investigation of, an officer, shall not be released unless it relates to a sustained finding against that officer. However, factual information about that action of an officer during an incident, or the statements of an officer about an incident, shall be released if they are relevant to a sustained finding against another officer that is subject to release.

3. REDACTIONS. With respect to 1. a-d, the only allowed redactions are for any of the following purposes:

a. To remove personal data or information, such as a home address, telephone number, or identities of family members, other than the names and work-related information of peace and custodial officers.

b. To preserve the anonymity of complainants and witnesses.

c. To protect confidential medical, financial, or other information of which disclosure is specifically prohibited by federal law or would cause an unwarranted invasion of personal privacy that clearly outweighs the strong public interest in records about misconduct and serious use of force by peace officers and custodial officers.

d. Where there is a specific, articulable, and particularized reason to believe that disclosure of the record would pose a significant danger to the physical safety of the peace officer, custodial officer, or another person.

e. Notwithstanding paragraph 3.a-d, a record disclosed pursuant to this section, including personal identifying information, may be redacted if, on the facts of the particular case, the public interest served by not disclosing the information clearly outweighs the public interest served by disclosure of the information.

4. WITHHOLDING RELEASE DURING ACTIVE INVESTIGATION. The release of information relating to the incident enumerated in 1a-b may be withheld, for a limited time period, during an active criminal or
administrative investigation, in accordance with any of the following:

a. During an active criminal investigation, disclosure may be delayed for up to 60 days from the date the use of force occurred or until the district attorney determines whether to file criminal charges related to the use of force, whichever occurs sooner. If disclosure is delayed pursuant to this clause, the specific basis for the determination that the interest in delaying disclosure clearly outweighs the public interest in disclosure, must be provided to the Public Records Act requester in writing. This writing shall include the estimated date for disclosure of the withheld information.

b. After 60 days from the use of force, the disclosure of records or information may be further delayed if the disclosure could reasonably be expected to interfere with a criminal enforcement proceeding against an officer who used the force. If disclosure is further delayed pursuant to this clause, at 180-day intervals as necessary, the specific basis for the determination that disclosure could reasonably be expected to interfere with a criminal enforcement proceeding shall be provided in writing. The writing shall include the estimated date for the disclosure of the withheld information. Information withheld shall be disclosed when the specific basis for withholding is resolved, when the investigation or proceeding is no longer active, or by no later than 18 months after the date of the incident, whichever occurs sooner.

c. After 60 days from the use of force, disclosure may continue to be delayed if the disclosure of records or information could reasonably be expected to interfere with a criminal enforcement proceeding against someone other than the officer who used the force. If disclosure is delayed under this clause, at 180-day intervals, the specific basis why disclosure could reasonably be expected to interfere with a criminal enforcement proceeding shall be provided in writing and shall include an estimated date for the disclosure of the withheld information. Information withheld shall be disclosed when the specific basis for
withholding is resolved, when the investigation or proceeding is no longer active, or by no later than 18 months after the date of the incident, whichever occurs sooner, unless extraordinary circumstances warrant continued delay due to the ongoing criminal investigation or proceeding. Such extraordinary circumstances must demonstrate by clear and convincing evidence that the interest in preventing prejudice to the active and ongoing criminal investigation or proceeding outweighs the public interest in prompt disclosure of records about use of serious force by peace officers. All information subject to disclosure that does not cause substantial prejudice, including any documents that have otherwise become available, shall be released.

5. WITHHOLDING RELEASE DURING PROSECUTION. If criminal charges are filed related to the incident in which force was used, disclosure of records or information may be delayed until a verdict on those charges is returned at trial or, if a plea of guilty or no contest is entered, the time to withdraw the plea pursuant to Penal Code § 1018.

6. WITHHOLDING RELEASE DURING ADMINISTRATIVE INVESTIGATION. During an Internal Affairs or a Divisional administrative investigation into (a) an incident involving the discharge of a firearm at a person by a peace officer; or (b) an incident in which the use of force by a peace officer against a person resulted in death, or in great bodily injury, the disclosure of records or information may be delayed until it is determined whether the use of force violated a law or agency policy, but no longer than (a) 180 days after the date a manager or supervisor authorized to initiate an investigation learned of the use of force, or allegation of use of force, or (b) 30 days after the close of any criminal investigation related to the peace officer’s use of force, whichever is later.

7. NO RELEASE OF FRIVOLOUS AND UNFOUNDED COMPLAINT. A record of a civilian complaint, or the investigations, findings, or dispositions of that complaint, shall not be released if the complaint is frivolous or if the complaint is determined to be unfounded.

8. RELEASE OF A COPY OF THE COMPLAINT TO THE COMPLAINING PARTY. In every case, and
without regard to any of the delays allowed by law, a copy of the Complaining Party’s own statements shall be released to the Complaining Party at the time the complaint is filed.

9. PUBLIC COMMENT. The Sheriff or his specific designee may release factual information concerning a disciplinary investigation if the officer who is the subject of the disciplinary investigation, or the officer’s agent or representative, publicly makes a statement he or she knows to be false concerning the investigation or the imposition of disciplinary action. Corrective information may not be disclosed unless the false statement was published by an established medium of communication, such as television, radio, or a newspaper. Disclosure of factual information is limited to facts contained in the officer’s personnel file concerning the disciplinary investigation or imposition of disciplinary action that specifically refute the false statements made public by the peace officer or his or her agent or representative.

10. PITCHESS MOTIONS. Prior to these changes, the only method for obtaining peace officer personnel files was through a Pitchess motion, at which the person seeking those files (or certain records therein, usually Internal Affairs documentation) would have to make a proper showing in court that the public interest in making those files available, usually to a defendant in a criminal trial, outweighed the officer’s interests in the privacy of his or her personnel files. This requirement was based on PC § 832.7 as previously formulated. Per SB 1421, when peace officer personnel files are sought in connection with any of the four incident types listed in this Procedure 10 at A.1.a-d, those disclosures must be made under the Public Records Act without the need for a Pitchess motion. There remains a difference, however, as to the documentation received under the Pitchess process and that received under the Public Records Act:

a. The successful Pitchess motion would previously result in the release of only a witness list from an Internal Investigation (though additional documents would occasionally be ordered to be released), while SB 1421 mandates the release of all personnel records relating to the four incident types.

b. Any materials that the Court previously ordered released under Pitchess would generally be released unacted, but with a Protective Order prohibiting further use or distribution, while
personnel records now released pursuant to SB 1421 relating to the four incident types may be redacted and withheld for certain periods of time as stated above, but are not protected against further use or distribution.

11. NOTIFICATION. The Professional Standards Division will notify an employee when a Public Records Act request is received, and it is believed there may be responsive records that are required to be disclosed. Subsequently, the involved employee will receive a copy of any disclosures made simultaneous to the release of such records.

B. MANDATORY PRA RELEASES PER AB 748 (Adding subsection (4) to Gov. Code § 6254(f)).

1. GENERAL. Notwithstanding the Investigatory Exception found in Gov. Code 6254(f), commencing July 1, 2019, a video or audio recording that relates to a “critical incident,” as defined below, may be withheld from release only as follows:

   a. During an active criminal or administrative investigation, disclosure of a recording related to a critical incident may be delayed for no longer than 45 calendar days after the date a Manager or Supervisor knew or reasonably should have known about the incident, if, based on the facts and circumstances depicted in the recording, disclosure would substantially interfere with the investigation, such as by endangering the safety of a witness or a confidential source. If disclosure is delayed pursuant to this paragraph, the requester will be informed in writing of the specific basis for the determination that disclosure would substantially interfere with the investigation and the estimated date for disclosure.

   b. After 45 days from the date a manager or Supervisor knew or reasonably should have known about the incident, and up to one year from that date, disclosure of a recording may be further delayed upon a showing that disclosure would substantially interfere with the investigation. After one year from the date the Office of the Sheriff knew or reasonably should have known about the incident, disclosure of a recording may be further delayed only if it can
be shown, by clear and convincing evidence, that disclosure would substantially interfere with the investigation.

If disclosure is delayed pursuant to (a) or (b), The requester must be promptly provided in writing with the specific basis for the determination that the interest in preventing interference with an active investigation outweighs the public interest in disclosure and provide the estimated date for the disclosure. Withholding must be reassessed, and the requester notified every 30 days. A recording that has been withheld shall be disclosed promptly when the specific basis for withholding is resolved.

2. §6255 EXEMPTION. If on the facts of the particular case, the public interest in withholding a video or audio recording clearly outweighs the public interest in disclosure because the release of the recording would, based on the facts and circumstances depicted in the recording, violate the reasonable expectation of privacy of a subject depicted in the recording, the requester must be provided in writing with the specific basis for the expectation of privacy and the public interest served by withholding the recording; however redaction technology, including blurring or distorting images or audio, may be used to obscure those specific portions of the recording that protect that interest. In all cases, the redaction shall not interfere with the viewer’s ability to fully, completely, and accurately comprehend the events captured in the recording and the recording shall not otherwise be edited or altered.

a. Except as provided in clause (b), below, if the reasonable expectation of privacy of a subject depicted in the recording cannot adequately be protected through redaction and that interest outweighs the public interest in disclosure, the recording may be withheld from the public, except that the recording, either redacted or unredacted, shall be disclosed promptly, upon request, to any of the following:

   i. The subject of the recording whose privacy is to be protected, or his or her authorized representative.

   ii. If the subject is a minor, the parent or legal guardian of the subject whose privacy is to be protected.
iii. If the subject whose privacy is to be protected is deceased, an heir, beneficiary, designated immediate family member, or authorized legal representative of the deceased subject whose privacy is to be protected.

b. If disclosure pursuant to clause (a) (relating to privacy expectations) would substantially interfere with an active criminal or administrative investigation, the requester must be provided in writing with the specific basis for the determination that disclosure would substantially interfere with the investigation. Thereafter, the recording may be withheld for 45 calendar days, subject to extensions as set forth in B.1.(b), above.

3. “CRITICAL INCIDENTS.” A video or audio recording relates to a “critical incident” if it depicts any of the following incidents:

a. An incident involving the discharge of a firearm at a person by a peace officer or custodial officer.

b. An incident in which the use of force by a peace officer or custodial officer against a person resulted in death or in great bodily injury.

4. NON-CRITICAL INCIDENTS. All Public Records Act requests seeking audio or video not related to “Critical Incidents,” as defined above, shall be handled in accordance with the other provisions of this policy and with Policy 1.06.82 “Mobile Audio Video & Body-Worn Camera.”

5. CONTEXT. Releases under this section shall consist of relevant video imagery that depicts the actions and events leading up to and including the critical incident. The release of video shall be accompanied by additional information to provide context based on the evidence available at the time of release.

6. NOTIFICATIONS. The Professional Standards Division will make reasonable attempts to notify the following individuals or entities prior to the release of video under this section:

a. Deputies depicted in the video and/or significantly
involved in the use of force;

b. Subject(s) upon whom force was used.
   i. If the subject is deceased, the next of kin, if known, will be notified;
   ii. If the subject is a juvenile, the subject’s parents, if known, or the subject’s legal guardian, if known, will be notified;
   iii. If the subject is represented by legal counsel, that counsel will be notified.

c. District Attorney’s Office and County Counsel

d. Other individuals or entities as deemed appropriate

7. LIMITATIONS. The Public Records Act defines records that must be released upon a proper PRA request and defines exceptions to those requirements. An agency may choose to withhold records based on these exceptions and exclusions, or it may choose to provide greater public access to the requested records than is required under the Act. Nothing in this subsection B (MANDATORY PRA RELEASES PER AB 748) alters, limits, or negates any other rights, remedies, or obligations with respect to public records regarding an incident other than a “critical incident” as defined above.

8. OVERLAP WITH SB 1421. The statutory requirement in AB 748 to release an audio or video recording that relates to a “critical incident,” as defined in ¶3, may overlap the disclosure requirements in SB 1421, in which case the operative date is January 1, 2019 (SB 1421), and not July 1, 2019 (AB 748). Note, however, that SB 1421 requires only the release of certain “Peace Officer personnel records,” while AB 748 relates to audio or video recordings without regard to whether they are contained within Peace Officer personnel records.
I. POLICY.
A. In order to create and maintain a positive working relationship with the news media, employees will cooperate with all accredited members of the news media in their efforts to gather information of public interest.

II. GENERAL.
A. GENERAL RELATIONSHIP.
   1. Generally, the news media are entitled to the same information that is available to any other member of the public. The specifics of what information may be released is included in numerous Office of the Sheriff Policies, notably 1.06.71 “Dissemination of Law Enforcement Information,” 1.06.62 “Police Involved Fatal or Serious Injury Incidents Policy,” 1.06.64 “Release of Booking Photographs,” 1.06.72 “Dissemination of Information on Registered Sex Offenders,” 1.06.73, “Information to Citizens,” 1.06.74 “Control of Sheriff’s Office Information,” 1.06.77 “Crime and Incident Records – Release of Information (Public Records Act),” 1.06.79 “Press Releases and Media Inquiries,” and 1.06.80 “Citizens’ Complaints / Internal Investigations.” However, the timeliness and method of releasing information have an impact on the news media's efforts to gather information of public interest.
   2. Therefore, response to the requests from the press for details of criminal activity or services rendered to the community shall be limited only by (a) the time required to analyze the request, consult with the appropriate Divisions, with the Chain of Command, and with others, such as counsel, when deemed appropriate, and to gather, review, collate, redact, and respond, as well as (b) the legal restraints imposed or permitted, the need to preserve evidence, to prevent interference with criminal investigations, to prevent unreasonable interference with operations of the Office of the Sheriff, and to protect the constitutional rights of all citizens.

B. RELEASE OF INFORMATION. The law requires the release of certain law enforcement information to the public. See Office of the Sheriff Policy 1.06.77
“Crime and Incident Records – Release of Information (Public Records Act),” and 1.06.79 “Press Releases and Media Inquiries.”

C. RESTRICTED INFORMATION. Normally, statements of policy expressing official positions of the Office of the Sheriff, official responses to criticism of the Office of the Sheriff, or statements pertaining to pending or ongoing civil litigation involving the Office of the Sheriff shall be made only by the Sheriff, Undersheriff, Assistant Sheriffs or designee. Likewise, statements about internal investigations, disciplinary matters, and officer-involved fatal incidents shall only be made by the Sheriff, Undersheriff, Assistant Sheriffs or designee.

D. WITHHOLDING INFORMATION. The California Public Records Act provides for the release of certain information to the public and for the exclusion of other information on specific grounds. See Policy 1.06.77 “Crime and Incident Records – Release of Information (Public Records Act).”

E. GUIDELINES FOR RELEASE OF INFORMATION.

1. The following information may be released to the media:
   a. Adult arrestee's name, age, occupation, and residence;
   b. The substance of the crime;
   c. Facts and circumstances of the arrest;
   d. Time, date, and place;
   e. Resistance offered by the suspect;
   f. Pursuit, if necessary, to apprehend the suspect;
   g. Use of weapons or force by officers or suspect;
   h. Identification of investigating and arresting officers; and
   i. Length of the investigation.

2. The following information shall not be released (due to either its prejudicial nature or legal prohibitions on its release):
   a. Juvenile suspect or victim's name and residence;
   b. Information that would identify the victim of any sex crimes per Penal Code Sections 261, 264, 264.1, 286, 288, 288a, and 289; or child abuse reports per 273a and 273d; or domestic violence per 273.5; or bias crimes per 422.6, 422.7, and 422.75;
   c. Prior to arrest, do not release the identity of a suspect unless the disclosure will aid in the investigation, assist in the apprehension of the suspect, or will warn the public of danger;
   d. Prior criminal record of any individual;
   e. Observation about character or reputation;
   f. Existence or contents of any confession or statement given by a suspect, or information regarding the refusal to make a statement;
g. Reference to investigative procedures, such as fingerprints, polygraph examinations, ballistics tests, or laboratory tests, or to the refusal by the suspect to submit to such tests or examinations;

h. Statements concerning the identity, testimony, or credibility of prospective witnesses;

i. Any personal opinion as to the suspect's guilt, innocence, or merits of the case;

j. Statements concerning evidence in the case, whether or not it is anticipated such evidence will be used at trial; and

k. Any photographs or mug shots, unless the release will aid in the arrest of the suspect, aid in the investigation, or warn the public of danger.

F. CRIME SCENE INFORMATION AND ACCESS. The news media will be allowed reasonable access at crime scenes, accidents and other news scenes for photographic and news gathering activities, as long as it does not interfere with any Office of the Sheriff investigation.

1. Should an employee deny access to a crime scene to a media representative, they will refer the media representative to a Supervisor or Public Information Officer for additional information.

2. Suspects will not be moved or posed solely for the purpose of allowing photographs or news film to be taken; however, news photographers will not be prevented from taking pictures in public places.

3. Crime scenes that are located in areas of public access may be opened for media inspection after any search, preservation and processing of evidence has been completed and the scene has been secured.

4. News media personnel will be directed to the concerned Division Commander, Assistant Sheriff, Public Information Officer or designee for the release of any information developed during subsequent investigation of a crime, accident or newsworthy incident.

5. When employees of the Office of the Sheriff are assisting other law enforcement agencies, news inquiries will be referred to the respective agencies involved.

G. POLICE INVOLVED FATAL OR SERIOUS INJURY INCIDENTS. All police involved fatal or serious injury incidents will be handled as outlined in Office of the Sheriff Policy Section 1.06.62.

H. DISASTER SCENES. While the Office of the Sheriff may exclude members of the general public from a disaster area for safety reasons, the media is exempt from this exclusion and must be allowed into the disaster area, Penal Code 409.5.

1. The media, however, may be restricted from specific areas within a disaster scene when police personnel at the scene reasonably determine that unrestricted media presence will interfere with emergency operations. Restriction on media access may be imposed only for so long and only to the extent necessary to prevent actual interference.
2. Disaster scenes, such as airplane crash sites, shall not be designated crime scenes unless the Commanding Officer at the scene determines from facts then available that there is reasonable cause to believe the disaster may have been the result of criminal activity.

3. The Office of the Sheriff has the authority to close a disaster area to all but authorized personnel or “duly authorized representative of any news service, newspaper, radio, or television station or network”. To avoid confusion, the Office of the Sheriff recognizes media-issued identification or business cards to identify members of the news media. These credentials will identify the bearers as accredited press members.

I. MAJOR INCIDENTS. At the scene of major pre-scheduled demonstrations, the incident Commander will designate a Press Liaison Officer. The designated Officer shall be assigned to the incident command post, and will be responsible for all news releases relevant to the incident. At spontaneous events at which large numbers of media personnel show up, the Watch Commander should notify the Public Information Officer or designate a Press Liaison Officer.

J. INTERNAL AFFAIRS INVESTIGATIONS. Comments to the media regarding any investigation being conducted by the Internal Affairs Investigations Detail, litigation involving Office of the Sheriff employees, and investigations conducted by other agencies regarding Office of the Sheriff employees is prohibited. Only the Sheriff, Undersheriff or a designated representative may provide such information to the media.

K. OFFICE OF THE SHERIFF PERSONNEL ACTIONS. Each Division Commander or manager shall notify the Public Information Officer of newsworthy events occurring within their respective Divisions. The Public Information Officer shall be responsible for the preparation of press releases announcing significant personnel transactions, such as promotion, reassignment of management staff and professional recognition, such as F.B.I. Academy attendance, or any other noteworthy department events.
I. POLICY.
   A. The Office of the Sheriff shall provide accurate information to the public in a professional and transparent manner. Fostering relationships with the public, government officials, news media and allied law enforcement shall be the primary objective. As with any dissemination of law enforcement information, it shall be limited only by legal constraints, the need to preserve evidence, and to prevent interference with criminal or administrative investigations. A formalized process on writing, reviewing and disseminating a Press Release will ensure proper, accurate and prompt release of information.

II. DEFINITIONS.
   A. AUTHORIZED PERSON. An Assistant Sheriff must review and authorize a Press Release before dissemination and responses to media inquiries related to a press release.
   
   B. Press Release refers to information provided to members of the media on the Press Release template or during a press conference. A press release is not a notification to the public or press by any Division in the field during rapidly involving incidents that jeopardize public safety and require prompt notification.

   C. Media Inquiries are calls from any media outlet about ongoing events, operations, or follow up generated from a Press Release.

   D. Public Information Officer (PIO) is the staff member designated as the person whose primary responsibility is to liaise with the media and who is responsible for drafting Press Releases. This is normally the Director of Public Affairs unless otherwise designated or unavailable.

III. GENERAL.
   A. All staff must be aware that incidents or activities that necessitate a Press Release are reported very quickly to the press by persons outside of the Sheriff’s Office, often with an inaccurate account of events or information. This situation necessitates that the Press Release be issued and that it is prompt, accurate and does not jeopardize public safety or ongoing investigations. The Press Release...
must provide enough facts for the public to be informed and confident in our law enforcement actions.

B. On an active incident in the field that may generate a Press Release, the Incident Commander and the affected Division Commander must make the gathering and dissemination of information needed to facilitate responses to media inquiries the utmost priority.

C. Media inquiries received by field, line, or office staff will be directed to the PIO for proper handling in accordance with this policy (See Procedure 3). If the PIO is not available the media inquiries will be directed to the appropriate Facility or Station House Commander. In situations when the Facility or Station House commander is unavailable the Watch Commander will be routed the media inquiry for proper handling (See procedure 3).

IV. PROCEDURE 1.

A. BUREAU ASSISTANT SHERIFF RESPONSIBILITIES.
   1. Assistant Sheriffs will be responsible for the final approval of all Press Releases and media inquiries stemming from Press Releases.
      a. The Assistant Sheriff of the Bureau responsible for the incident or activity in the Press Release will have approval authority.
      b. If the Assistant Sheriff responsible for the command producing the Press Release is not available, another Assistant Sheriff or the Undersheriff may approve.

V. PROCEDURE 2.

A. DIVISION COMMANDER RESPONSIBILITIES.
   1. The Division Commander shall ensure the Public Information Officer (PIO) is told of the need for a Press Release.
   2. The Division Commander will review and provide the final draft of the Press Release to the Assistant Sheriff in a timely manner for approval.
   3. In instances in which the PIO is not available, the Division Commander will designate a staff member to draft the Press Release.
   4. If the information involves an incident or activities involving criminal investigations, other divisions, or an administrative investigation, the Division Commander shall ensure that all involved parties have reviewed the Press Release.

VI. PROCEDURE 3.

A. PUBLIC INFORMATION OFFICER RESPONSIBILITIES (to be completed in the following order).
   1. The Public Information Officer will draft the Press Releases.
   2. The Press Release will always be written on the Press Release Template.
   3. The PIO will provide the draft Press Release to the Division Commander for review before final approval by the Assistant Sheriff.
4. Once approved by the Assistant Sheriff, the PIO will e-mail or otherwise distribute the Press Release to the Sheriff, Office of the Sheriff Command Staff, County Administrator and Contra Costa County Board of Supervisors members before release (Normally waiting 10 minutes before release to media is sufficient).

5. After the Press Release has been disseminated, the PIO is to post the Press Release on the official Office of the Sheriff Facebook page. All other social media postings will refer the reader to the Facebook posting.

6. The Director of Media Relations is responsible for maintaining a contact list for Press Releases to minimally include current email addresses in A(4) above, as well as all media outlets and provide that list quarterly to all Division Commanders with the current Press Release Template in Microsoft Word (Figure 1).

7. The PIO will forward all media inquiries to the responsible Division Commander to obtain information for an accurate response.

8. The PIO is responsible for immediately notifying the responsible Assistant Sheriff of a need for a Press Release.

9. Community outreach type postings not associated with a Press Release or media inquiry may be posted on Social Media by the PIO without prior approval.

VII. PROCEDURE 4.

A. CONTRACT CITY POLICE SERVICE MANAGERS

1. The Contract City Police Service Managers may approve and disseminate Press Releases on behalf of the City.

2. The Contract City Police Services Manager shall notify his/her chain of command of all Press Releases with a nexus to the Office of the Sheriff before release.

For more information, please call:
Jenny Lee, Public Information Officer, (925) 313-3643

The Contra Costa County Sheriff’s Office offers a full range of law enforcement services to over 1,000,000 residents in the 715 square mile county. Besides patrolling the unincorporated areas, Deputy Sheriffs provide comprehensive police services to a number of contracts with and special districts. Additionally, the Sheriff’s Office operates county detention facilities, provides security for the courts and runs the Office of Emergency Services. Log on www.concosheriff.org for more information.
I. POLICY.
   A. The Office of the Sheriff is dedicated to providing the highest quality law enforcement to County residents. To achieve this, the Office of the Sheriff welcomes public comment, constructive criticism, suggestions and complaints regarding the action or inaction of its employees or issues regarding Office of the Sheriff policy. The Office of the Sheriff shall accept, record and promptly initiate an investigation into all complaints of misconduct concerning its employees.

II. DEFINITIONS.
   A. Available Findings.
      1. Sustained. The investigation disclosed sufficient evidence to clearly prove the allegation.
      2. Not sustained. The investigation failed to disclose sufficient evidence to clearly prove or disprove the allegation.
      3. Unfounded. The investigation has clearly established that the allegation is not true.
      4. Exonerated. The actions of the peace officer which formed the basis for the complaint are not violations of law or Office of the Sheriff policy.
      5. Frivolous. The investigation established that the complaint is totally and completely without merit or for the sole purpose of harassing the named employee.
         a. In the event the Internal Affairs Lieutenant or the applicable Division Commander, at the preliminary stages of an investigation, view a complaint as Frivolous, a recommendation to this effect shall be made to the Undersheriff. The Undersheriff may, upon review, make a determination that the matter represents a Frivolous complaint prior to the completion of that investigation.
         b. In the event such a determination is made, Internal Affairs will notify the complainant and further investigation will be suspended.
6. General Personnel File. As used in this Policy, “General Personnel File” means the file maintained by the Office of the Sheriff containing the primary records specific to each employee including evaluations, assignments, status changes, and imposed discipline.

   a. All complaints, investigatory materials and other documents related to Internal Investigations, conclusions and recommendations, other than those recording imposed discipline, shall be maintained in a file or files other than, and separate from, the subject employee’s General Personnel File.

B. CITIZEN REPORT PROCEDURE FORM. This refers to the Form made available to the public by the Office of the Sheriff and its Contract Police Units for complaints, constructive criticism, suggestions, and information.

C. CRIMINAL COMPLAINT INVESTIGATION. This refers to any criminal investigation of an employee conducted by the Investigation Division of the Office of the Sheriff or any other outside agency having jurisdiction of the case.

D. CITIZEN’S COMPLAINT. A Citizen’s Complaint is an allegation of a violation of the law, Office of the Sheriff Policies and Procedures, or County regulations. If sustained, such an allegation could result in formal discipline as covered in Office of the Sheriff Policy Sections 1.05.70, Personnel Management Regulations or correctional action, training, or counseling, as covered in Office of the Sheriff Policy 1.05.58, Corrective Counseling System.

E. COMPLAINANT. Any person making a Citizen’s Complaint including private persons, employees of this Office, and any inmate of the Office of the Sheriff Detention Facilities where the issue is not one properly handled as an inmate grievance, pursuant to Custody Services Bureau Policies and Procedures. Inmate grievances include any questions relating to an inmate’s conditions of confinement including: medical care; general classification procedures; general discipline procedures; inmate programs participation; telephone, mail, and visiting procedures; food, clothing, bedding; and/or religious preference.

F. ADMINISTRATIVE INQUIRY. Any inquiry into allegations of employee misconduct initiated by the chain of command, or initiated upon the invocation of the “Law Enforcement Involved Fatal Incidents” protocol (Appendix 2).

G. INTERNAL INVESTIGATION. Any investigation by Internal Affairs, Bureau Assistant Sheriff or Contract Police Manager regarding employee misconduct or a complaint about procedures.

H. MISCONDUCT. Violation of any law, Office of the Sheriff Policies and Procedures, or County regulation.

    1. Punitive Action. Any action which may lead to dismissal, demotion, suspension, reduction in salary, written reprimand or transfer for purposes of punishment.

III. GENERAL.

A. ALL COMPLAINTS.

    1. Complaints of employee misconduct, whether received by letter, telephone or in person, shall be accepted by any employee of this Office. Verbal complainants should be encouraged to submit the complaint in writing. To facilitate public participation, a Citizen Report Procedure Form shall be made available.
2. Complainants do have the option of remaining anonymous. However, they should be informed of the problem associated with conducting an investigation under those circumstances. All complaints alleging misconduct by an employee will be treated with serious consideration, investigated, and appropriate notifications and action will be taken.

3. Complaints involving violations of Office of the Sheriff Policies or Procedures will normally only be investigated if received within six months from the date of occurrence. Exceptions may be made as the Sheriff deems necessary. Complaints alleging violations of law shall be investigated if received within the normal statute of limitation for the crime(s) involved.
   a. All complaints will continue to be accepted, even when they appear to exceed the time limits. The allegations will be reviewed by the Undersheriff or his/her designee and if a determination is made to not investigate due to time factors, Internal Affairs will notify the complainant.

4. All information, data, and investigation procedures pertaining to Citizens’ Complaints shall be treated as confidential by all employees.
   a. Should Investigator(s) obtain reliable information that an employee of this Office has withheld information and/or supplied false information in the course of an Internal Investigation, it shall be considered a new and separate act of misconduct.
   b. During an Internal Investigation, the Investigator(s) shall administratively order an employee to refrain from discussing his or her interview with other employees or involved parties. Any violation of such an order will be considered a new and separate act of misconduct.
   c. During either a criminal or administrative investigation, no employee will surreptitiously audio or video record any other person or employee, except as authorized by law. Internal Affairs and Division Investigator(s) may record interviews with the full knowledge of the person being interviewed.

5. Discussions of cases will be contained to the smallest number of people possible and only on a need-to-know basis.

6. Before interrogation of a sworn or non-sworn employee who may be subject to discipline, a standardized form letter advising the employee of his/her rights will be given to the employee. A copy of this advisement will be reviewed at the time of the interview and will be signed by all parties present. This standardized advisement form(s) may be obtained from the Internal Affairs Unit office.

7. All interviews will be audio recorded in Division cases where the misconduct may lead to Punitive Action.
   a. Each recording will be placed on media that can be stored with the case file (i.e. tape or CD) and clearly marked with the I.A. case number, date of interview, person interviewed and name of
interviewer. Recordings shall be forwarded to I.A. for storage as part of the final package.

8. Should the Internal Affairs Investigator(s), or the employee's Bureau Assistant Sheriff, determine a need to reassign an employee under investigation, he/she will notify the Internal Affairs Unit Lieutenant as soon as practical. The Internal Affairs Unit Lieutenant will provide the subject employee’s Bureau Assistant Sheriff with the information that may be provided to the employee concerning the investigation.

9. The Internal Affairs Investigator(s) will keep the Division Commander of the affected employee informed of any Internal Affairs interviews (employee, inmate, etc.) being planned/conducted within that Commander's area of responsibility. If that Division Commander is unavailable, a message will be left and the Assistant Division Commander will be informed.

B. ANNUAL REVIEW.

1. Internal Affairs will submit a report every calendar year listing all completed cases. The report shall provide sufficient information on issues, findings, and action taken to determine consistency and uniformity of treatment.

2. The Internal Affairs Unit will assist in the preparation of a POBOR Claim Form for reimbursement of SB-90 funds from the State.

IV. PROCEDURE 1.

A. VERBAL COMPLAINTS. An employee receiving a verbal complaint shall immediately refer the complainant to a Supervisor of the affected Division or Contract Police Unit. During hours when no Supervisor is on duty in that Division or Contract Police Unit, the Watch Commander or Patrol Sergeant shall act in this capacity.

1. The Supervisor will interview the Complainant and determine the facts.
   a. The Supervisor should attempt to reach a resolution to the Complainant's satisfaction.
      • Within a Division, such a successful resolution does not require official documentation unless specified by Divisional procedures. Supervisors are encouraged to keep personal notes on such public contacts.
   b. If the Watch Commander or Patrol Sergeant is handling the complaint for another Division or Contract Police Unit, he/she will report the incident to the affected Division Commander or Contract Police Manager via the Patrol Division Commander on an inter-office memo.

2. If the seriousness of the allegation warrants a formal investigation by Internal Affairs or the affected Division, but the circumstances do not demand an immediate investigation, the Supervisor handling the case initial inquiry will fully document the incident.
   a. The Supervisor will prepare an inter-office memo and fully document the incident then forward it to his/her Division
Commander or Contract Police Manager. The Division Commander or Contract Police Manager will forward all available documentation concerning the complaint to Internal Affairs via his/her Bureau Assistant Sheriff.

b. The Undersheriff will determine if an internal investigation is warranted after consulting with the affected Bureau Assistant Sheriff.

c. If an internal investigation is warranted, the Undersheriff will determine if the investigation will be conducted by Internal Affairs or by a Division Staff member after consulting with the affected Bureau Assistant Sheriff.

3. If it is determined that Internal Affairs should conduct an immediate investigation, the following guidelines apply:

a. The Supervisor will contact the Division Commander or the Contract Police Manager via the chain of command and advise him/her of the complaint. This notification will be followed up with an interoffice memo.

b. During normal business hours the Undersheriff and/or appropriate Bureau Assistant Sheriff shall be fully informed of the complaint by the affected Division Commander, Contract Police Manager or his/her designee and a determination will be made as to who will conduct the investigation.

c. After business hours and/or on weekends, Internal Affairs Investigator(s) or the Internal Affairs Unit Lieutenant shall be contacted at his/her residence(s) by the Supervisor handling the complaint, following the notification of the Watch Commander.

4. Internal investigations may also be initiated at the discretion of the Sheriff or the Undersheriff.

5. Once a determination has been made to conduct an internal investigation, Internal Affairs will open a case file to include an IA number and all originating documents.

a. In cases being investigated at the Division level, Internal Affairs will prepare a case file folder with all necessary paperwork and forward that to the effected Bureau Assistant Sheriff. This case file will be used by the assigned Division investigator to complete the case.

B. ADMINISTRATIVE INQUIRIES. When anyone in the chain of command becomes aware of an incident in which there is alleged employee misconduct that could lead to discipline, they shall document the incident. Unless the circumstances dictate otherwise, this documentation will be forwarded via the Chain of Command to the Undersheriff no later than the next business day.

1. Follow procedures 2-5, outlined in section A above.
V. PROCEDURE 2.
   A. CRIMINAL CONDUCT COMPLAINT. Criminal conduct complaints against an employee where the Complainant wishes to pursue the incident criminally will be handled as follows:

   1. The complaint will be documented by the employee receiving the complaint on an inter-office memo. The memo will include a synopsis of the incident and the contact information of the complainant. It will be forwarded to the Undersheriff via the Chain of Command no later than the first business day following receipt of the complaint.

   2. The Complainant shall be informed that he/she will be contacted later for necessary criminal investigative interviews.

   3. The Sheriff or Undersheriff will direct the affected Bureau Assistant Sheriff to coordinate any necessary criminal investigation by this Office and/or another law enforcement agency having jurisdiction in the case to be undertaken.

      a. A separate and parallel administrative internal investigation may be conducted by the Internal Affairs Detail. The timing of the administrative investigation will be predicated on the activities of the criminal investigation. Under no circumstances will the administrative investigation compromise the criminal investigation.

      b. If during an administrative investigation, Internal Affairs Unit or a Divisional Investigator identifies that criminal conduct has occurred, the appropriate criminal investigation will be initiated. Division and/or Internal Affairs Unit Investigators will follow the Public Safety Officers’ Procedural Bill of Rights Act and current case law governing criminal and administrative investigations.

      c. In most circumstances where criminal conduct surfaces prior to the administrative review, it is better to interview the subject employee after the criminal interview.

      d. If during the interview process criminal conduct is identified, the interview should be stopped and the affected Bureau Assistant Sheriff will be contacted and will coordinate any necessary criminal investigation.

VI. PROCEDURE 3.
   A. ROUTING CITIZEN'S COMPLAINTS AND ADMINISTRATIVE INQUIRIES.

   1. All Citizen's Complaints not resolved by the initial Supervisor will be routed to Internal Affairs via the chain of command. The Complaint will be reviewed and the final decision as to who will handle the investigation will be made. Internal Affairs will mail a letter of receipt to the Complainant with a copy of the complaint received, per Penal Code Section 832.7(b).

   2. All administrative inquiries that could lead to discipline will immediately be routed to Internal Affairs via the chain of command. The allegations
will be reviewed and the final decision as to who will handle the investigation will be made.

3. Internal Affairs will assign a number and either investigate the complaint and/or allegations or forward a copy to the affected Bureau Assistant Sheriff for investigation as directed by the Undersheriff.

4. Whenever a case has been assigned to Division for investigation:
   a. Internal Affairs will prepare the case folder, which includes the Case Log, Management Review and POBOR Forms. This folder will be forwarded to the investigating Supervisor’s Manager via the chain of command.
   b. The Case Log, Management Review and POBOR Forms will become part of the permanent investigative package that is submitted by the investigating Supervisor and shall accompany that package through all review levels until finally archived by Internal Affairs. The POBOR Form shall be removed and filed separately from the Internal Affairs case after being entered into the POBOR database.
   c. Internal Affairs will maintain a Complaint Log and a cross-referencing system indicating names of Office of the Sheriff employees, the allegations and conclusive findings.

5. All internal investigations based on complaints of misconduct by employees should be completed within 45 days, absent any special circumstances.
   a. Internal Affairs is responsible for maintaining a weekly status log and ensuring that the Undersheriff, Bureau Assistant Sheriffs, Division Commanders and Contract Police Managers are cognizant of the time frame associated with each active internal investigation.

VII. PROCEDURE 4.
   A. COMPLETED INTERNAL INVESTIGATIONS.
      1. Regardless of the level of investigation (Division or Internal Affairs), the affected Bureau Assistant Sheriff shall act as the case manager, ensuring the investigation is conducted in a professional, thorough and timely manner; that the report is free of spelling and grammatical errors and that each allegation has been adequately addressed.
      2. All management levels within the chain of command are required to review the report, sign the management review sheet and make appropriate comments. Any Manager who orders changes in the investigative Officer’s conclusions, or requires additional work, should outline his/her directives on the Management Review Sheet.
      3. Internal Affairs shall assume responsibility for all correspondence or other forms of contact with complainants to include notification of results.
      4. Upon completion of the Internal Affairs Investigation, the Investigator(s) will submit a complete type-written report.
5. Internal investigations will be thoroughly documented in a standardized format provided by I.A. as outlined below.

   a. The I.A. report format shall contain the following: (The left side of the file shall include an attached summary of previous investigations generated from the Internal Affairs database.)

      • Face Sheet. The face sheet shall contain the name(s) of the investigating officer(s) who prepared the document, Internal Affairs number, date of complaint, and complainant’s name.
      • Final Disposition Sheet. Lists the allegation(s) and short description for each involved employee.
      • Table of Contents.
      • Recommended Finding. Lists employee’s name(s), allegation(s) and recommended finding.
      • Witness Page. Includes name(s), address(es), and phone number(s). List of attached documents, tape recordings, photographs or other evidence submitted. This shall include an attached summary of previous investigations within the past five years generated from the Internal Affairs database
      • Synopsis of the Complaint. Include how the complaint was reported and a short summary of the incident and alleged violations.
      • Investigative Summary. Shall contain a thorough, chronological, first person account of the events to include a summary of all witness statements.
      • Recommended Findings/Conclusions. Shall list policies/procedures violated, not violated, supported by facts and/or statements obtained during the investigation, along with a proposed finding of “Sustained”, “Not Sustained”, “Unfounded”, “Exonerated”, or “Frivolous”, with respect to each separate allegation investigated. Also include peripheral issues discovered as a result of the investigation if warranted.

6. Should the Investigator find sufficient information to sustain a separate act of withholding information and/or making false statements, an additional recommendation of untruthfulness will be included with the findings.

7. Should the Investigator find sufficient information to sustain a separate act of violating Office of the Sheriff Policy or an Administrative Admonishment Order to refrain from discussing an interview with other employees or involved parties, an additional recommendation of insubordination will be included with the findings. This will be reviewed at each step of the chain of command.

8. Investigations completed by Division investigators will be forwarded through the appropriate chain of command, starting with the Lieutenant or Manager of the subject officer/employee’s unit.
9. Investigations completed by Internal Affairs shall be forwarded, via the Internal Affairs Unit Lieutenant to the Undersheriff for review.

10. The Undersheriff may assign the completed case to the appropriate Bureau Assistant Sheriff for review.

   a. Bureau Assistant Sheriffs receiving the completed investigation from the Undersheriff or from within their Division shall review the completed case and shall complete the following steps:
      - On the Management Review form either concur or not concur with the recommend findings, and make notations for recommendations about the final disposition of the officer/employee (i.e. corrective counseling, roundtable, etc.)
      - If the person reviewing the case does not agree with the recommended findings they must document this in a memorandum with the supporting arguments and new recommended findings. This memorandum will be placed into the case folder and forwarded with the case file.
      - The Undersheriff may concur with the recommended finding, change the finding or return it for more information.
      - All documents and evidence not associated with a separate criminal investigation, but associated with a complaint, shall be forwarded to Internal Affairs for record maintenance. Thereafter, possession of either an original or copy of an Internal Affairs document by any unauthorized personnel is a violation of policy.
      - The Internal Affairs Unit Lieutenant shall prepare and forward a written response to the Complainant indicating the disposition of the complaint.

   b. The written response shall be provided to the Complainant within 30 days of the disposition of the complaint. The date of disposition is defined as the date the Undersheriff approves the recommended findings.

11. Internal Affairs shall be responsible for delivery of appropriate copies of all relevant material to involved employees. A receipt and acknowledgment form shall become part of the record.

   a. The receipt will include a notice to the employee that the Internal Affairs documents are considered confidential and any failure by the employee to maintain the confidentiality of the documents could result in disciplinary action as a violation of Sheriff’s Office Policy Sections 1.05.57, Unbecoming Conduct, and/or 1.06.74, Control of Sheriff’s Office Information.

12. An internal investigation case shall be considered closed when Internal Affairs receives all signed data relative to the case, including a copy of the signed response to the complainant and the Sheriff’s or Undersheriff’s final finding.
a. Internal Affairs will be responsible for entering the Sheriff's or Undersheriff’s final finding on Internal Affairs’ final disposition sheet prior to sending copies to the affected personnel.

b. Possession of either an original or a copy of an I.A. document by any unauthorized personnel is a violation of this Policy. The subject employee/officer shall not make public his/her copy of the document.

c. Should any civil litigation or claim be imminent or filed concerning any matter under investigation, the results will be considered confidential and will not be released to the complainant. Release will be made pursuant to appropriate legal mandate.

VIII. PROCEDURE 5.

A. SECURITY OF RECORDS.

1. All records in the control of the Internal Affairs Unit shall be carefully monitored to protect this sensitive information.

   a. Original records will never leave the control of the Internal Affairs Unit for any reason without the authorization of the Internal Affairs Lieutenant or his/her designee.

   b. The Internal Affairs Unit employee releasing the original record shall complete the entry on the I.A. File Check-Out Log.

2. Requests for copies of Internal Affairs Investigations, Corrective Counseling Memos and/or Letters of Reprimand shall only be accepted from Office of the Sheriff Managers, Contra Costa County Counsel, outside counsel representing the Office of the Sheriff (pending positive verification), or a representative of Contra Costa County Risk Management.

   a. The requesting Manager or his/her designee must show that he/she has a need-to-know and a right-to-know the information requested.

B. COPIES OF RECORDS.

1. INTERNAL REVIEW. Internal Affairs records shall not be copied or released without the prior approval of the Internal Affairs Unit Lieutenant. The copying of Internal Affairs records, Corrective Counseling memos and/or Letters of Reprimand shall be done by the Internal Affairs Unit staff.

   a. All copies circulated for internal use must be stamped in red ink with “CONFIDENTIAL” and “DO NOT DUPLICATE” on all pages.

   b. A control number will be stamped in red ink on the cover of the document. This number shall indicate the day, month, year and sequence.

   c. The Internal Affairs Unit employee circulating the documents for internal use will complete the entry on the. Internal Affairs
Unit’s “Copy Out Log” with the stamped control number. Return date will be filled in upon return of the document.

d. The documents will be sealed in a manila envelope and marked “CONFIDENTIAL” in red ink on the outside of the package.
e. Documents will be hand-delivered to the requestor who will be instructed to return the copy to the Internal Affairs Unit when the copy is no longer required.

2. PUBLIC DISTRIBUTION. Internal Affairs records will be made publicly available only in response to a valid subpoena or valid Public Records Act request.

a. Subpoenas. We will honor all valid subpoenas, but we may contest their validity in court. Subpoenas for Internal Affairs records will be reviewed by the Internal Affairs Unit Lieutenant and by the Professional Standards Division’s Planning and Research Unit, and will be referred to County Counsel for the filing of a Motion to Quash if the records sought in the subpoena are, or should be, protected from release. Subpoenas made in an effort to bypass the discovery process for records in an ongoing criminal case will not be honored.

b. Public Records Act requests for Internal Affairs records will not be honored, except as stated below. In all cases where investigatory or personnel records are requested, except with respect to those matters stated below, the request will generally be denied by the Professional Standards Division’s Planning and Research Unit pursuant to exclusions permitted by the Public Records Act.

However, in the case of records sought under the Public Records Act with respect to --

- An incident involving the discharge of a firearm at a person by a peace officer;
- An incident in which the use of force by a peace officer against a person resulted in death, or in great bodily injury;
- An incident in which a sustained finding was made that a peace officer engaged in sexual assault involving a member of the public; and
- An incident in which a sustained finding was made of dishonesty (including any sustained finding of perjury, false statements, filing false reports, destruction, falsifying, or concealing of evidence) by a peace officer directly relating to the reporting, investigation, or prosecution of a crime.

-- such records will be released. See Policy 1.06.77 “Crime and Incident Records – Release of Information (Public Records Act)” (at Procedure 10) for appropriate procedures.
I. POLICY.
   A. In the interest of more efficient crime reporting through communication with the citizenry, the Office of the Sheriff shall provide the ability for citizens to report crime on line through CopLogic Online Citizen Reporting.

II. DEFINITIONS
   A. ONLINE REPORT. An online police self-reporting system that is designed to eliminate the cost of having deputies physically respond to document no-suspect reports while still recording the incident and collecting reportable data for additional investigation, statistical analysis and state reporting requirements.
   B. TEMPORARY CASE NUMBER. A case number issued by the online reporting system that is provided to the citizen upon completion of the report and is also sent by e-mail if an e-mail address is provided. This number is replaced by a permanent case number once the report is reviewed and approved.
   C. PERMANENT CASE NUMBER. A Contra Costa County Office of the Sheriff’s case number that is issued once an Online Report has been reviewed and approved.

III. GENERAL INFORMATION
   A. The Office of the Sheriff will respond to in-progress incidents and all crimes with evidence or information, which may lead to the identity of a suspect and his/her apprehension, or if the incident just occurred and there is a likelihood the suspect may still be in the area.

IV. PROCEDURE
   A. The following crimes and reports may be referred to the Online Reporting System as long as the reporter is at least 18 years old and there is no suspect information available:
      1. Abandoned Vehicle (11-24 & CVC 22651 & 22669)
      2. Civil Dispute
      3. Public Nuisance (PC 370)
      4. Littering (PC 374)
5. Barking Dog (PC 415BD)
6. Theft of Access Card
7. Stolen Credit Card
8. Petty Theft Bicycle
9. Petty Theft from Building
10. Petty Theft from Coin-Op
11. Petty Theft from Vehicle
12. Petty Theft Other
13. Fraudulent Access of Computer
14. Defrauding an Innkeeper
15. Vandalism Misdemeanor
16. Harassing Phone Call
17. Crime Tip
18. Lost Property
19. Patrol Requests
20. Vacation House Check

B. COMMUNICATIONS PERSONNEL RESPONSIBILITIES

1. When Communications personnel receive a call from a citizen wishing to report an incident, the Communications Dispatcher will determine if the call falls within the scope of an online report. If so, Communications personnel shall:
   a. Determine if the citizen has Internet access
   b. Explain the online reporting process and the requirements of the party filing the report. Ensure that citizens are aware that there is no cost associated with the process.
   c. Advise the caller of the Contra Costa County Office of the Sheriff’s address: www.cocosheriff.org and the link titled, “File a Report.”

2. If the call screener determines the report is not suitable for online reporting based on the listed criteria, they will prioritize the call and send a Deputy Sheriff to take the report.

3. If the citizen interjects and demands to file a report with a deputy, or if a citizen calls back and states they are having difficulty filing the report online, the incident will be prioritized, and a Deputy Sheriff will take the report.

C. SERGEANT RESPONSIBILITIES

1. Patrol stationhouse Sergeants will accept the reports and import accepted reports in the Online Reporting System queue within 24 hours of their
submission. Stationhouse Sergeant’s will only be responsible for accepting reports submitted in their assigned areas.

2. Sergeants will refrain from making grammatical corrections to citizens’ reports, unless they are minor in nature, such as, “Sheriff” spelled as “Sherif” etc.

3. If the Sergeant determines the report was misclassified, it may be modified to fit the most appropriate section. The Sergeant shall ensure that reports contain adequate information, recognizing that the reports may be forwarded to outside agencies or used for future prosecution.

4. Prior to rejecting an online report, the Sergeant shall attempt to telephone the citizen for clarification of the issue. If a report is rejected, the reason for rejection will be appropriately and professionally noted in the rejection box, which is sent via e-mail to the citizen and a duplicate to a department storage mailbox.

5. The Sergeant may issue a follow-up request to the reporting citizen in-lieu of approving or rejecting an online report. A follow-up request shall only be issued after first attempting to contact the citizen via telephone or in person to clarify the issue in question.

6. The Sergeant shall request a Patrol response when, in their reasonable judgment, circumstances indicate an investigation is warranted. In this circumstance, a rejection should be sent to the citizen and the Sergeant will state in the rejection box that a response will be made.

7. Lost Passport Reports shall not be approved and imported; all other lost property is acceptable.

8. Supplemental reports may be filed through the Online Reporting System for any of the qualifying incidents to document additional information or loss, unless the information would tend to identify a suspect(s). Online Supplemental Reports may also be filed for burglaries/thefts where there is no suspect information. Serialized property and firearms cannot be reported via the Online Reporting System.

9. The stationhouse Sergeant shall check the general e-mail account on a regular basis (at least once per shift) for responses to follow-up requests initiated by any supervisor.

D. FIELD PERSONNEL RESPONSIBILITIES

1. Deputies dispatched to a call for service shall prepare a report when appropriate. If a deputy determines the report is suitable for online reporting, they may advise the citizen of their option to use this method of reporting if the citizen has internet access.

   a. The deputy will then provide the citizen with the Sheriff’s website address and the location of the link to file the report.

   b. In all cases in which a deputy in the field has referred a caller to use this feature and the caller agrees the deputy will close the call out appropriately using the specially designated disposition code OLR (Online report).
2. Deputies will not exploit this reporting method as a means to avoid taking calls for service or writing reports when requested by the reporting party.
I. POLICY

A. This policy is applicable to personnel operating Mobile Audio Video (MAV) or Body-Worn Camera (BWC) recording systems. Such systems are used to record Deputies in the performance of their duties by providing a visual and/or audio record of their activities, as outlined in this policy. Video recordings are intended to provide an objective visual/audio record of the incident and to augment the Deputy’s report.

B. The purpose of this equipment is to accurately document the events, actions, conditions and statements made during vehicle stops, pedestrian stops, arrests, disruptive inmate confrontations, medical responses and other critical incidents in order to verify the accuracy of crime reports, jail incident reports, collection of evidence, and testimony in court. Recordings also enhance the ability to review procedures for the purpose of employee evaluation and training.

C. Deputies will make every reasonable effort to record such contacts and incidents listed in section B above. If circumstances prevent a Deputy from recording such a contact, then this must be documented with the explanation in any subsequent report.

II. DEFINITIONS

A. MOBILE AUDIO VIDEO (MAV) & BODY WORN CAMERA (BWC) RECORDING SYSTEMS. For purposes of this policy, these systems refer to equipment mounted on a movable object, such as a dashboard camera in a vehicle, or mounted to an aircraft, or may also refer to video equipment affixed to a person, such as body-worn or lapel cameras. References in this policy to video recording systems are in regards to all types of mobile systems, including vehicle and body-worn cameras.
III. LEGAL ISSUES

A. Body-worn camera equipment and all data, images, video and metadata captured, recorded, or otherwise produced by the equipment is the property of the Sheriff’s Office. Use of body-worn cameras for any purpose other than in accordance with this policy is prohibited.

1. BWC equipment purchased and maintained by Sheriff’s Office Contract Cities shall remain the property of the city; however, the equipment shall be operated in accordance with this policy.

B. Employees shall not surreptitiously record department personnel without their expressed permission.

IV. TRAINING & ASSIGNMENT

A. Deputies shall not use a recording system until they have been trained in its proper use and care.

B. Training will be provided by a qualified trainer, will be documented, and will consist of a review of the recording system, its functions, usage, and recommended activation.

C. Deputies who have been assigned to a vehicle equipped with a MAV recording system shall use it and the portable audio transmitters pursuant to the provisions outlined in this policy.

D. Deputies who have been assigned a BWC recording system and deployed with it during the course of their respective shift shall wear and use it pursuant to the provisions outlined in this policy.

E. BWC recording systems shall be assigned to the following Deputies in Detention Facilities:

1. Intake Deputies working in booking facilities.
2. Escort Deputies.
3. SERT supervisors during cell extractions and other disturbances.
4. Other Deputy assignments as determined by the Facility Commander.

V. DEPUTY RESPONSIBILITIES

A. Employees are responsible for the reasonable care and maintenance of recording equipment issued or assigned for their use.

B. The systems will be operated according to the manufacturer instructions and recommendations.

C. Deputies shall be certain that their MAV/BWC recording system is fully charged at
the start of his or her shift. At the conclusion of their shift, Deputies shall ensure their MAV/BWC system is powered down and no longer recording.

D. At the beginning of each shift, Deputies shall determine whether their recording equipment is working satisfactorily. If a MAV/BWC system malfunctions or becomes inoperable during the Deputy’s shift, this shall be noted in all written reports in which a recordable incident occurs. The Deputy shall immediately report the malfunctioning equipment to his/her supervisor. The Deputy will make every reasonable effort to acquire a replacement BWC once it is discovered to be inoperable.

E. Deputies shall only use those devices issued by the Office of the Sheriff or designee (i.e. Contract City). All devices must be approved by the Division Commander or Facility/Station Commander.

F. Officers shall wear body-worn cameras above the midline of their torso and in position designed to produce an effective recording.

VI. SUPERVISOR RESPONSIBILITIES

A. Patrol vehicles with MAV recording systems shall be deployed whenever possible and should be utilized prior to a vehicle without a video camera system.

B. The shift supervisor is responsible for issuing BWC recording equipment and logging the assignments during lineup or at the beginning of the shift.

C. The shift supervisor shall ensure issued BWC equipment is returned at the end of the shift.

D. Supervisors are responsible for ensuring Deputies download video files and recharge the equipment from the previous shift as early in their shift as practical, to ensure it will be ready for the following shift.

E. Supervisors shall, upon learning a MAV/BWC is inoperable, make arrangements to have the device fixed or replaced.

F. Supervisors who are made aware a Deputy’s BWC has become inoperable during the Deputy’s shift will make a reasonable effort to provide a working device to the Deputy, if one is available.

G. Supervisors may review video recordings at any time for approved purposes, such as training, reviewing a Deputy’s performance, resolving citizen complaints, or during any necessary administrative inquiry. If, after reviewing a recording, a supervisor has developed cause for further inquiry (officer safety, use of proper procedures, or other administrative or operational issues), the recording may be used for such authorized inquiries or investigations.

VII. ACTIVATION

A. MAV recording systems can be activated either automatically (depending on the device specifications and settings) or manually. BWCs can only be activated
The systems need not be recording during normal shift activity. However, if either system (BWC or MAV) is intentionally activated (either automatically or manually) to record an incident, it shall remain on until the incident has reached a conclusion.

1. For a primary Patrol unit, the term “conclusion” in this context means when the Deputy places the arrestee into the Patrol vehicle, releases an involved subject, or turns the subject over to a third party.

2. For assisting Patrol units, the term “conclusion” in this context means the assisting Deputy has left the scene.

3. In a Detention Facility, the term “conclusion” in this context means when the combative or resistive inmate(s) has been secured inside a housing unit cell, holding cell or safety cell, the inmate(s) has been medically cleared (if applicable), and Central Control has acknowledged the situation is “Code Four.”

B. The MAV/BWC recording systems shall be activated as soon as practical and safe to record the following incidents:

1. All vehicle stops, including DUI’s.

2. All pursuits, or suspects attempting to evade arrest.

3. Major incidents (fires, explosions, protests, rescues via helicopter, critical incidents, etc.), any Code 3 response or when responding to an emergency or “in progress” type of crime or incident (Felony or Misdemeanor).

4. Suspect(s) held or transported in the rear of the patrol car. The recording of suspects shall continue through the pre-booking process, or until the suspect is turned-over to custody staff. Additionally, all transports or courtesy transports shall be recorded.

5. Major traffic accident investigations. (Deputies may use discretion during lengthy accident investigations and turn off the camera once the scene has been stabilized).

6. Investigative contacts such as Field Interviews, In-Field show-ups, and suspicious subject contacts.

7. Detention Deputies should activate BWC equipment before dealing with hostile inmates, before any anticipated use of force, and as soon as they realize a situation is escalating. The equipment shall be activated before responding to notice of a combative arrestee being brought into the jail for booking. BWC equipment shall be activated before escorting inmates who are known to be hostile, combative, or who routinely make allegations of excessive use of force. BWC equipment shall be activated when responding to any code called in the facility.
8. Any other incident where the Deputy deems it necessary to gather and retain evidence.

9. Deputies should make every reasonable effort to record non-enforcement contacts should they become confrontational, assaultive, or enforcement-oriented.

C. Deputies are not required to advise or obtain consent from a citizen when:

1. In a public place; or

2. In a detention facility or temporary holding facility;

3. In a location where there may be an expectation of privacy but the Deputy is lawfully present.

D. Deputies will notify the supervisor as soon as practical, of any recorded sequences that may represent significant evidence. The supervisor will determine if a copy of the recording should be made and placed into evidence.

E. No employee shall modify, alter, erase or record over any portion of an audio/video recording.

F. Deputies shall not be required to activate body-worn cameras when engaged in conversations with individuals with whom the officer is in a privileged relationship (e.g., spouse, attorney, police peer counselor, labor representative, minister, etc.).

G. In general, Deputies should not activate BWC equipment and/or use caution when entering a public locker room, changing room, restroom, jail showers, doctor or lawyer offices or interviews, or other places where individuals unrelated to the law enforcement incident are present and would have a heightened expectation of privacy.

H. BWC equipment shall not be activated during routine inmate strip searches, unless the situation becomes combative and/or violent.

I. No recording or portion thereof may be copied or released without the approval of the Division or Facility Commander. Requests for copies made pursuant to the Public Records Act shall be handled in accordance with Section XI. C. and D. Copies may be made for court or at the request of the District Attorney’s Office and County Counsel. Copies of recordings for training purposes require prior approval from the Division or Facility Commander.

VIII. REVIEW OF RECORDINGS

A. Recordings may be reviewed in any of the following situations:

1. By a supervisor reviewing a Deputy’s performance.

2. By a department detective who is engaged in an official investigation.
3. By the recording Deputy who needs to review his or her own recordings for report preparation or sworn testimony.

4. Recordings may be shown for the purposes of training value with prior review and approval of the Division or Facility Commander. If an involved Deputy objects to the showing of a recording, his/her objection will be submitted through the Chain of Command to determine if the training value outweighs the Deputy’s objection to showing the recording.

5. Deputies desiring to view any recording, not their own, shall submit a request in writing to the supervisor.

6. By authorized Departmental personnel for purposes of potential or actual litigation review and preparation, and by authorized personnel of the County’s Risk Management Division and County Counsel.

7. In no event shall any recording be used or shown for the purpose of entertainment or ridicule.

8. Recordings will not be posted to any social media internet site without the approval of the Bureau Assistant Sheriff.

IX. DOCUMENTING USE

A. Any incident recorded by a MAV or BWC system shall have a notation in the synopsis of the report indicating that there is video/audio evidence. If a citation is issued during a citizen contact of which a recording was made, the front of all copies shall have the notation, “VIDEO ON FILE” indicating there is video/audio evidence.

B. The Department recognizes that video images cannot always show the full story nor do video images capture an entire scene. The use of body-worn cameras does not reduce the requirement to provide thorough written documentation of an incident. Persons reviewing recordings must also be cautious before conclusions are reached about what the recordings show.

X. VIDEO MEDIA STORAGE AND INTEGRITY

A. Evidence videos may be booked in hard copy formats (e.g., DVD, Thumb Drive) or “soft” copy format into a server solution (cloud or local) that is CJIS compliant and approved by the Division Commander or Contract City Chief. The method of booking the videos shall be documented in the incident or crime report.

B. All video/audio recordings that are not booked into evidence in a “hard” copy format will be retained in approved storage for a period of two years, after which they will be deleted if no longer needed for an ongoing proceeding. Recordings relevant to on-going criminal or civil proceedings must be retained for so long as the proceedings are pending.
C. The Station House, Facility Commander, or Technical Services designee shall maintain control of all media storage resources relating to equipment used at their respective work station.

XI. COPIES OF VIDEO/AUDIO RECORDINGS

A. MAV/BWC recordings shall not be used for any purpose other than as outlined in this policy.

B. Stored recording media copies may be released in response to:

1. A Public Records Act Request (but see C and D, below);
2. A valid court order or subpoena (see Section XIII, below);
3. To the District Attorney’s Office for purposes of prosecution;
4. To authorized Departmental personnel for purposes of review, investigation, training, or potential or actual litigation defense;
5. To County Counsel; or
6. Upon approval by the Division or Facility Commander.

C. MAV/BWC recordings are subject to the Public Records Act and shall be released except where an exemption, such as the “investigations” exemption (Govt. Code 6254(f)), applies. Generally, investigative video recordings shall not be released pursuant to a Public Records Act request, but a release may be authorized under the provisions set forth in “D” below.

D. MAV/BWC recordings may be released to the public and to the media upon the specific approval of the Division or Facility Commander where such release will assist the interests of justice. However, a recording that was created during the commission or investigation of the crime of rape, incest, sexual assault, domestic violence, or child abuse that depicts the face, intimate body part, or voice of a victim of the incident depicted in the recording, shall not be released except upon the approval of the FOB Assistant Sheriff. If a decision is made not to release such video, the denial letter provided to the requester shall justify withholding such a video or audio recording by demonstrating, pursuant to Section 6255, that on the facts of the particular case, the public interest served by not disclosing the recording clearly outweighs the public interest served by disclosure of the recording.

XII. RECORDINGS AS EVIDENCE

A. If a hard copy of a MAV/BWC recording is booked into evidence, it shall be packaged and labeled and a Chain of Custody Label is to be affixed to the outside of the packaging in the same manner as other property and the collection and disposition of such evidence shall be referenced in the crime report (see Section IX.A).

B. If a soft copy of a MAV/BWC recording is booked into a digital evidence storage solution, it shall be identified by the case number and the retention status will be changed to an evidence category allowing for indefinite storage until the evidence is
no longer needed and manually deleted.

XIII. EXTERNAL REQUESTS - PROCEDURE FOR DISCOVERY OF EVIDENCE AND CITIZEN REVIEW

A. Upon receipt of a subpoena, a supervisor or designated Custodian of Records will be responsible to make a copy of the requested recording or segment thereof as ordered by the court or other authorized party. The procedure to complete the discovery recording copy process will be as follows:

1. A supervisor will make a copy of the identified video recording from video recording storage.

2. The supervisor will forward the discovery copy of the recording to the court pursuant to established procedures.

3. Recordings shall not be released under informal discovery requests, i.e. without a subpoena.

XIV. INTERNAL REQUESTS - PROCEDURES FOR DISCOVERY OF EVIDENCE

A. Upon written or email request by a Deputy or other staff member who requires a copy for court or administrative purposes (other than Departmental Personnel specifically authorized to view the video pursuant to Sections VIII and XI), a supervisor or designated Custodian of Records will be responsible to make a copy of the requested recording. The procedure to complete the recording copy process will be as follows:

1. A supervisor will make a copy of the identified video recording(s) from video recording storage.

2. The supervisor will then forward the copy of the original recording(s) to the Deputy or staff member.

XV. REQUEST FOR DELETION OF ACCIDENTAL RECORDINGS

A. In the event of an activation of a BWC where the resulting recording contains personal and/or private conversations of a Deputy unrelated to any ongoing criminal or Internal Affairs investigation, or otherwise has no valid official purpose, and which has no apparent evidentiary or investigatory value, a Deputy may request the deletion of the accidentally recorded BWC video file by submitting a written request to the Division or Facility Commander. If the Commander determines the BWC recording meets the above criteria, the video file may be deleted after 30 days.

B. In the event of an accidental activation of a BWC where the Division or Facility Commander determines a BWC recording contains the personal and/or private conversations or images of any other individual unrelated to an ongoing criminal or Internal Affairs investigation, or otherwise has no valid purpose, and which has no apparent evidentiary or investigatory value, it may be deleted after 30 days by direction of the Commander.
I. POLICY.

A. The high visibility vest policy is established to provide guidance to Sheriff’s Office personnel regarding the use and wear of reflective vests, as well as to conform to legal requirements as outlined in California Code of Regulations (CCR) and California Occupational Safety and Health Administration Standards (OSHA) Title 8, Section 1598, Title 23 Code of Federal Regulations (CFR) part 634, the American National Standards Institute (ANSI), and the International Safety Equipment Association (ISEA), commonly referred to as ANSI/ISEA.

B. ANSI/ISEA publications 107-2004, 2007-2006, and 207-2011 outline the performance specifications of safety vests and the requirements of employees when using these vests while exposed to the hazards of vehicular traffic. The ANSI/ISEA standards exist to protect first responders who are working on foot and in the right of way of a roadway or highway.

C. Department personnel will adhere to Sheriff’s Office policy and codified law when working on foot and in the right-of-way of a roadway. Supervisors will regulate the issuance and utilization of reflective vests to conform to the provisions outlined in this policy and with the publications and legal requirements regulated by CCR/OSHA, ANSI/ISEA, and federal and state law.

II. GENERAL.

A. High visibility vests are reflective clothing used to increase the visibility of personnel who are on foot and adjacent to roadways. The Office of the Sheriff high visibility vest is “HiVis” yellow, and has reflective fabric across the chest, waist, and neck, with “SHERIFF” embossed on the front and rear of the vest. Vests issued by contract cities shall be made of similar material, have reflective fabric, and be embossed with “POLICE” on the front and rear of the vest.

III. PROCEDURE.

A. GENERAL RULES.

1. Personnel who are on foot and performing tasks such as, but not limited to, traffic control, evidence collection, scene documentation, or on the outer perimeter of an
incident or event for the purposes of directing traffic away from or around an event and exposed to vehicular traffic, shall wear high visibility vests.

a. Personnel will only use those vests issued by the Office of the Sheriff and within the provisions of this policy. If personnel are assigned to a contract city, they will use only vests provided by their respective contract city. An Office of the Sheriff issued vest may be used in the absence of an issued vest by their respective city.

B. DEPUTY RESPONSIBILITIES.

1. Office of the Sheriff personnel who are on foot shall wear high visibility vests while performing their duties when:
   - Exposed to the hazards of passing traffic for the purposes of controlling, directing, or diverting vehicular traffic.
   - On foot and conducting crime scene documentation or evidence collection within any roadway.
   - Directed to by a supervisor.

2. High visibility vests are not required during a tactical operation or enforcement action when it would compromise the safety of the deputy.

3. High visibility vests are not required during traffic stops, unless such an incident evolves into a scene where the deputy is in a traffic environment for a prolonged period of time and reasonably has the ability to don a high visibility vest.

C. SUPERVISOR/MANAGER RESPONSIBILITIES.

1. PATROL SERGEANT. The Patrol Sergeant or applicable supervisor/manager will monitor and ensure that personnel are properly donning vests in the appropriate manner and in the necessitated environments and circumstances.

2. Supervisors/managers will ensure vest specifications conform to the standards outlined in this policy and the law.
I. POLICY.
   A. The Sheriff has established procedures for promoting safe, efficient, and lawful operation of the Contra Costa County Sheriff’s Office small Unmanned Aircraft System (sUAS). Safety, above all else, is the primary concern in each operation, regardless of the nature of the mission.

   B. It shall be the mission of those personnel who are trained in the use of the sUAS to use this resource to protect the lives and property of citizens of Contra Costa County and first responders in full compliance with applicable laws and regulations, including but not limited to applicable State and Federal Constitution and Federal Aviation Administration (FAA) regulations.

   C. The use of a sUAS can support first responders in situations which would benefit from an aerial perspective and enable responders to detect dangers that could otherwise not be seen. The sUAS can also be utilized for approved training missions.

   D. The FAA Modernization and Reform Act of 2012 provides for the integration of civil unmanned aircraft systems into national airspace by September 1, 2015. Existing federal law requires the Administrator of the FAA to develop and implement operational and certification requirements for the operation of public unmanned aircraft systems in the national airspace system by December 31, 2015.

II. DEFINITIONS
   A. SMALL UNMANNED AIRCRAFT SYSTEM (sUAS): Consists of the small unmanned aircraft weighing under 55 lbs., the command system, a secure control link, and other related safety support equipment.

   B. UNMANNED AIRCRAFT (UA): An aircraft that is intended to navigate in the air without an on-board pilot.
C. UA FLIGHT CREWMEMBER: A pilot, visual observer, or other persons assigned duties for a sUAS for the purpose of flight.

D. UNMANNED AIRCRAFT PILOT: A person exercising control over unmanned aircraft during flight. The pilot will be ultimately responsible for the operation and solely responsible for the input of commands/piloting during flight. The pilot will be certified in the operation of the sUAS by successful completion of an approved training course. Pilots are authorized to evaluate and accept or decline any mission or portion thereof due to safety concerns.

E. CERTIFICATE OF AUTHORIZATION (COA): Given by the FAA which grants permission to fly within specific boundaries and perimeters. Training and operational flights are only allowed if there is a valid Blanket Area COA in place with the FAA. Contra Costa County’s Blanket Area COA allows for sUAS flights in class G airspace within Contra Costa County. If a sUAS mission is required in restricted air space or during hours of darkness, an emergency addendum to the existing COA must be obtained.

Under the Blanket Area COA, the FAA will permit flights at or below 400 feet for UAS operators with a Section 333 exemption for aircraft weighing less than 55 pounds and for government UAS operations. Operators must fly under daytime Visual Flight Rules, keep the UAS within visual line of sight of the pilot and stay certain distances away from airports or heliports:

1. Five nautical miles (NM) from an airport having an operational control tower; or
2. Three NM from an airport with a published instrument flight procedure, but not an operational tower; or
3. Two NM from an airport without a published instrument flight procedure or an operational tower; or
4. Two NM from a heliport with a published instrument flight procedure.

F. OBSERVER: The observer is responsible for the visual observation of the sUAS while in-flight. The observer will maintain a visual observation of the sUAS while in flight and alert the pilot of any conditions (obstructions, terrain, structures, air traffic, weather, etc) which affect the safety of flight. The observer will be responsible for all aviation related communications required by the FAA. To accomplish this, the observer will be in close proximity to the pilot to ensure instant relaying of information. The observer will be certified in the operation of the sUAS by successful completion of an approved training course.

III. GENERAL.

A. DEPLOYMENT REQUIREMENTS: CCCSO will obtain a COA from the FAA in order to conduct operational or training missions. Requests for deployment of the sUAS will be made through CCCSO Dispatch. The Air Support Unit Commander can request and approve a sUAS call-out. In the absence of the Air Support Unit Commander or when extenuating circumstances exist, the Watch Commander or SWAT Commander/Asst. Commander can request and approve a
sUAS call-out. This includes any mutual aid requests made for the sUAS team by outside agencies.

1. When the sUAS is being flown, operators will take steps to ensure the camera is focused on the areas necessary to the mission and to minimize the inadvertent collection of data about uninvolved persons or places.

2. CCCSO will maintain a policy and procedure for the use of the sUAS to ensure that we are compliant with applicable laws and regulations regarding the operation of a sUAS program.

3. The use of the sUAS will be limited to the authorized missions described herein.

4. The sUAS will not be equipped with any weapons.

5. The authorized missions for the sUAS are:
   a. Post-incident crime scene preservation and documentation;
   b. Explosive ordnance disposal (EOD) missions;
   c. Response to hazardous materials spills;
   d. Search and Rescue (SAR) missions as defined in California Government Code Section 26614;
   e. Public safety and life preservation missions to include barricaded suspects, hostage situations, active shooters, apprehension of armed and dangerous and/or violent fleeing suspects, and high-risk search warrants;
   f. Disaster response and recovery to include natural or human caused disasters including a full overview of a disaster area for post incident analysis and documentation;
   g. Training missions;
   h. In response to specific requests from local, state or federal fire authorities for fire response and prevention;
   i. When there is probable cause to believe that (1) the sUAS will record images of a place, thing, condition, or event; and (2) that those images would be relevant in proving that a felony had occurred or is occurring, or that a particular person committed or is committing a felony and use of the sUAS does not infringe upon the reasonable expectation of privacy;
   j. Pursuant to a search warrant.
B. All procedures, laws and regulations on sUAS usage, shall be reviewed by the Special Operations Division Commander and be kept in the Sheriff’s Office G-drive for historical reference. The Field Operations Bureau will complete a quarterly report documenting mission information to be provided to the Sheriff and placed in the annual report.

IV. PROCEDURE.

A. A sUAS operation requires a Certificate of Authorization (COA) from the FAA.

B. A sUAS will only be operated by personnel, both pilots and crew members, who have been trained and certified in the operation of the system. All agency personnel with sUAS responsibilities, including command officers, will be provided training in the policies and procedures governing sUAS use.

C. All flights will be approved in advance by the Air Support Unit Commander or his/her designee.

D. The sUAS and all related equipment will be available and issued at the Air Support Unit.

E. All flights will be documented on the mission dispatch form designed for that purpose and all flight times shall be accounted for on the form. The reason for the flight and type of mission as specified above and name of the supervisor approving the operation will also be documented. The mission dispatch form will be attached to a police report with an associated report number. The entire sUAS mission packet will be routed up the Special Operations Division chain of command for review.

F. The administration, safety policy, training requirements, general operating procedures and pre/post flight actions are contained within the CCCSO sUAS Operations Manual.

V. DATA RETENTION AND PROCESSING.

A. Upon completion of each sUAS mission, the recorded data shall be reviewed and evaluated for evidentiary value.

1. Data which is found to have evidentiary value will be booked into evidence in the form of a CD, DVD, or other “hard” copy format.

2. sUAS evidence will be retained pursuant to CCCSO General Policy and Procedure Section 1.06.37- Evidence Retention.

3. If the evidence collected is part of another agency’s case, this evidence will be signed over to the agency making the request and thoroughly documented in an outside assist report.

B. Data found not to have any evidentiary value will be kept pursuant to CCCSO General Policy and Procedure Section 1.06.82 – Mobile Audio and Body-worn Camera.
C. The Special Operations Division Commander may retain video/photos from sUAS missions for the purpose of training and development of the unit. This video is not to be released without the consent of the Sheriff or his/her designee.

VI. PROTECTION OF RIGHTS AND PRIVACY CONCERNS.

A. sUAS managers, operators and observers will consider the protection of individual civil rights and the reasonable expectation of privacy as a key component of any decision made to deploy the sUAS. Each sUAS operator and observer will ensure that operations of the sUAS are consistent with local, state, and federal laws.
Former Policy Deleted
I. POLICY.
   A. Properly maintained equipment provides long service life and safety of operation. Office of the Sheriff employees shall ensure the proper care, maintenance and serviceable condition of all County property issued to them or assigned for their use.

II. GENERAL.
   A. EMPLOYEE RESPONSIBILITIES.
      1. Employees are responsible for the reasonable care and maintenance of equipment issued or assigned for their use.
      2. Employees will notify their Supervisors upon discovering damage to, loss of, or the unserviceable condition of County property assigned or issued to them.
      3. Willful, unauthorized, negligent use or abuse, or destruction of County property by an employee is cause for entry into the Corrective Counseling System or the County Disciplinary System.
      4. Presumption of Responsibility. In the event County property is found bearing evidence of damage which has not been reported, it shall be prima facie evidence that the last employee using the property was responsible for the damage.
I. POLICY.
   A. An accurate inventory of County property in the Office of the Sheriff is necessary to ensure adequate control of that property. Each division shall perform an annual inventory of items as defined in Section II below and deliver the results to the Support Services Bureau annually.
   B. Each division shall ensure its weapon systems inventory conforms to the information maintained by the Support Services Bureau in the Sheriff’s Personnel Administrative Record Keeping System (further referred to as SPARKS).

II. DEFINITIONS.
   A. EQUIPMENT POSSESSION LIST FORM. Refer to County Form M166.
   B. REQUEST FOR CHANGE OR RELEASE OF CUSTODY OF FIXED ASSETS FORM. Refer to County Form M349.
   C. WEAPONS SYSTEMS. Firearms or other devices that are authorized for deployment as described in Sheriff’s Policies and Procedures 1.07.32, Authorized Firearms and Ammunition.
   D. FIXED ASSET. An item with a threshold cost of $5,000.00 (including sales tax, shipping costs, etc.)
   E. OTHER ASSETS TO BE INVENTORIED. Other items that must be inventoried are:
      1. Vehicles (to include motorcycles, ATVs, trailers, boats, etc.).
      2. Gas masks.
      3. Cellular telephones (including cellular air cards).
      4. Computer CPUs and MDCs.
      5. Computer monitors.
      6. Printers.
      7. Video projectors.
III. GENERAL.

A. DIVISION INVENTORY. Each Division shall have on file an annotated copy of the computer printout from the County Auditor’s Office listing all County property maintained by that Division.

B. ANNUAL INVENTORY. The Auditor’s Office, on an annual basis, provides each County Department a printed list of assigned fixed assets. The Sheriff’s Office Fiscal Unit is responsible for distributing the appropriate inventory list to each Division.

C. MISAPPROPRIATION OF PROPERTY. Sheriff’s Office employees shall not appropriate for their own use any County property, evidence or found property.

D. CHANGES IN EQUIPMENT STATUS. Upon approval of the County Administrator, fixed assets can be discarded, traded in for new equipment, or donated to another organization. Upon approval of the Bureau Assistant Sheriff, weapons systems may be returned to the Support Services Bureau via the Law Enforcement Training Center for decommissioning. With the approval of the Bureau Assistant Sheriff, other assets as described in section II above can be discarded, traded in for new equipment, or donated to another organization compliant with policy, procedure, and the law.

IV. PROCEDURE 1.

A. EQUIPMENT INVENTORY.

1. In the event of inventory changes of fixed assets, the Division Commander shall notify the Fiscal Unit, using County Form M349, Request for Change or Release of Custody of Fixed Assets.

2. The Fiscal Unit shall be responsible for notifying the Auditor's Office, using Form M349, upon receipt of changes from Divisions. The affected Division Commander shall arrange removal and storage of the unneeded/unserviceable equipment.

3. In the event of inventory changes of weapons systems, the Division Commander shall notify the Support Services Bureau Assistant Sheriff by memo via the chain of command. The Division Commander will initiate the removal of unneeded or unserviceable fixed assets from his/her Division, forwarding County Form M349 to the Fiscal Unit. The Division Commander will initiate the removal of unneeded or unserviceable weapons systems from his division by memo to the Support Services Bureau Assistant Sheriff via the chain of command.

4. In the event of inventory changes of other assets as described in section II above, the Division Commander shall notify the Support Services Bureau Assistant Sheriff by memo via the chain of command.

V. PROCEDURE 2.

A. ANNUAL INVENTORY.
1. Each Division Commander, upon receipt of the annual list of Assigned Fixed Assets from the Fiscal Unit, will provide the following inventory control documents:
   a. An annotated Auditor's Office printout indicating the location of those items in the Division that are on the inventory list. Items on the inventory list, but not physically in the Division, will be so described on the annotated list.
   b. A list of those items physically in the Division but not on the inventory lists, using County Form M166.

2. The lists will be forwarded to the Fiscal Unit for collation of an Office of the Sheriff inventory list.

B. WEAPONS SYSTEM INVENTORY

1. Each January, each Division Commander, upon receipt of the annual list of Assigned Weapons System Assets from the Support Services Bureau Assistant Sheriff, will provide the following inventory control document:
   a. An annotated copy indicating any discrepancies from the list provided. If the provided list is accurate, the Division Commander shall note it as such.
   b. The Division Commander shall send the annotated copy of the list to the Support Services Bureau Assistant Sheriff via chain of command for review no later than the first day of February.
## I. POLICY.

A. Items of unclaimed found property, confiscated property and evidence may be retained for Office of the Sheriff use in lieu of being sold at auction, destroyed or being turned over to other agencies. Sheriff’s employees are prohibited from directly or indirectly purchasing unclaimed property sold at regional auctions.

## II. DEFINITIONS.

A. **IMMEDIATE FAMILY.** The immediate family members are limited to the Office of the Sheriff employee’s spouse, children, stepchildren, parents, stepparents, siblings, grandchildren, parents-in-law, children-in-law, and siblings-in-law.

B. **PROPERTY FOR DEPARTMENT USE FORM.** Office of the Sheriff form used to request items of unclaimed/confiscated property.

C. **REQUEST FOR CHANGE OR RELEASE OF CUSTODY OF FIXED ASSETS FORM.** Refer to County Form M349.

## III. GENERAL.

A. **REQUESTS FOR USE OF UNCLAIMED/CONFISCATED PROPERTY.**

1. Divisions may request items of unclaimed found and confiscated property for their use by completing a Property for Department Use Form.

2. Division Commanders may submit lists of types of items desired to the Director of Property Services, via the Forensic Services Division Commander. The Director of Property Services will use these as a guide and, whenever possible, will set such items aside for the requesting Division Commander.

3. Division personnel are responsible for maintaining control of the property while it is in the possession of the Division.

4. Capital items will have County identity tags affixed by the County Auditor-Controller.
B. OFFICE OF THE SHERIFF USE OF FIREARMS/DANGEROUS WEAPONS.

1. The Training Unit is responsible for inventory and control of all firearms obtained from Property Services.

2. The Director of Property Services will issue firearms to the Training Unit when requested, see “Procedure 3”.

3. The Training Unit will issue firearms to individual employees as required.

4. Firearms that have been received for Office of the Sheriff use shall not be issued to retiring employees.

5. The Training Unit shall return firearms to the Sheriff’s Property Services Manager when they are no longer needed for Sheriff’s Office use.

6. All transactions involving dangerous weapons shall be in accordance with Federal and State dangerous weapons laws regulations.

C. RELEASE OF EVIDENCE.

1. The release of evidence for County use is governed by Penal Code, Chapter 13, Disposition of Evidence in Criminal Cases.

2. Employees shall ensure that all provisions of the Penal Code are met prior to release of any evidence for County use.

D. PROHIBITION AGAINST AUCTION PURCHASES.

1. Office of the Sheriff employees are prohibited from directly or indirectly purchasing any Office of the Sheriff property offered for sale at any regional auction, whether the auction is conducted by a County contractor or the County.

   a. Indirect auction purchases include purchases by:

      • Any member of the Office of the Sheriff employee’s immediate family;

      • Any person who received inside information about auction items from the Office of the Sheriff employee; or

      • Any third party acting for the Office of the Sheriff employee.

IV. PROCEDURE 1.

A. DIVISION RESPONSIBILITY.

1. The Division Commander must authorize all transactions and shall sign the Property for Department Use Form (PS-23) for issuance of specified items.

2. All requests must be submitted to and approved by the Forensic Services Division Commander.

3. If the item is of capital value, the Division Commander will ensure it is entered into the County Computerized Inventory System by submitting County Form M349 to the Personnel and Finance Division.
4. If the item has no capital value, it will be entered on Division inventory records only. Expendable small items of low value are not subject to inventory and may be excluded from all inventory records.

5. If the item requested is a firearm, obtain approval from a Judge of the Court or District Attorney to retain the firearm on the Certification of Retention form.

V. PROCEDURE 2.

A. DIRECTOR OF PROPERTY SERVICES RESPONSIBILITY. Upon issuing the requested property, the Director of Property Services will:

1. When the property is a firearm, provide the Division representative with a Certification of Retention;

2. Obtain signatures on the property receipts and the Property for Department Use form (PS-23) of person receiving the property;

3. Maintain a file of fulfilled written requests. Cards will be kept in the section file;

4. In the case of firearms, notify the State Department of Justice of the transaction; and

5. The Certification of Retention form is to be filled out completely and distributed to the appropriate units.

VI. PROCEDURE 3.

A. TRAINING MANAGER’S RESPONSIBILITY.

1. Take receipt of completed copy of the Certification of Retention and a copy of the Division’s completed Property for Department Use Form.

2. Return the Certification of Retention to Property Services who shall release the firearm to the Training Unit.

3. The firearms will be added to the Training Unit inventory and released to the appropriate Division.

4. The Training Unit will provide the Records Unit with a copy of the Certification of Retention for inclusion with the case file report.
I. POLICY.
   A. The Office of the Sheriff will reimburse employees for loss of, or damage to personal property under certain conditions and in accordance with guidelines established by the Office of the Sheriff and the County.

II. DEFINITIONS.
   A. PERSONNEL PROPERTY REIMBURSEMENT CLAIM FORM. Refer to Sheriff’s Office Form AK130.
   B. COUNTY DEMAND FORM. Refer to Sheriff’s Office Form D-15.

III. GENERAL.
   A. REIMBURSEMENT CONDITIONS.
      1. To qualify for reimbursement, the loss or damage to personal property must have resulted from a sudden, unexpected event not normally encountered or anticipated on the job, and which was not subject to the control of the employee.
      2. Ordinary wear and tear on personal property used on the job is not compensable.
      3. Employee tools or equipment provided without the express approval of the Sheriff or his representative are excluded from reimbursement under this Policy.
      4. The loss or damage must have occurred in the line of duty.
      5. The exercise of good judgment under the prevailing circumstances at the time of loss or damage is an important consideration. Negligence or lack of proper care by the employee are grounds for denial of claims.
      6. The personal property damaged or lost must have been worn or carried by the employee in order to adequately fulfill the duties and requirements of the job.
      7. In the case of lost property that meets all of the claim criteria, proof of loss must also be submitted and rests with the claimant.
8. Personal automobiles are excluded from reimbursement under this Policy.

9. Personally owned computers used for report writing or for any other purposes are excluded from reimbursement under this policy.

B. AMOUNT OF REIMBURSEMENT.

1. The amount of compensation allowed will be the actual cost to repair damages, limited to no more than the original cost and subject to a determination of reasonable and necessary costs. Some items will be depreciated if part of the useful life of that item is gone. Expensive items will not be reimbursed at full cost if it is reasonable that a less expensive type is normally used.

2. Reimbursement for items damaged beyond repair will be limited to the actual value of the item at the time of loss or damage. For example, in the case of broken eyeglasses, only the replacement of broken lenses and repair to frames would be allowable. The cost of reexamination and a new prescription for glasses is not compensated.

IV. PROCEDURE 1.

A. CLAIMS PROCEDURE. Claims for compensation are processed in the following manner:

1. The claimant shall complete a Personal Property Reimbursement Claim (AK-130) and a County Demand Form (D-15) to include:
   a. The amount of the loss as claimed by the employee and the method used to determine this amount. There should be included an invoice of the actual cost of repair or a quotation of this cost. A statement indicating the original purchase price, date of purchase and estimated useful life should be completed for items damaged beyond repair or lost.
   b. A confirming statement from any other person who witnessed the accident and from the immediate Supervisor of the employee.

2. The forms will be forwarded to the claimant's Division Commander for signature along with the damaged article, if possible. After review by the Division Commander, the property may be discarded.

3. The Division Commander will forward the Claim and Demand forms to the Fiscal Unit.

4. The Sheriff's Chief of Management Services, or designee, will check the claim for accuracy and conformity to policy. If all is in order, the claim will be signed and sent to the appropriate County Office for further processing. Claims in excess of $300 require a Board Order. (Procedures for submission are detailed on Form AK-130.) If there are any problems or questions, the claim will be returned to the claimant for clarification.
V. PROCEDURE 2.
   A. FISCAL SERVICES UNIT RESPONSIBILITY-
      1. For Lost or damaged property demands, the Fiscal Services Unit will:
         a. Review the County Demand Form (D-15) and Personnel Claim Form (AK-130) for completeness;
         b. If the claim is over $300.00, a Board Order will be prepared and attached.
         c. Forward the claim to Risk Management for review;
         d. The Sheriff or representative will sit on the review committee; and
         e. Forward approved claims to the County Auditor for payment. Return disapproved claims to the employee.
I. POLICY.
   A. The Office of the Sheriff recognizes the significant cost savings that can be achieved from obtaining “free issue” surplus property through the Department of Defense (DoD) Defense Logistics Agency (DLA) Disposition Services 1033 Program and shall utilize this benefit when appropriate.

II. DEFINITIONS.
   A. LEA. Law Enforcement Agency, an authorized agency for purposes of screening excess military equipment and supplies. The Sheriff’s Office has an identifier of 2YTCR1.
   C. DLA. Defense Logistics Agency.
   D. DTID. Document Turn-in Identification Number found at the bottom of the DD Form # 1348.
   E. DRMO. Defense Reutilization and Marketing Offices, the locations at which available surplus property and equipment is located.
   F. DRMS. Defense Reutilization and Marketing Services.
   G. LESO. Law Enforcement Support Office.
   H. R/T/D. Reutilization, Transfer, or Donation.
   I. RCP. Recycle Control Point.
   J. C 5 RTD Program “Letter of Authorization.” Must be completed and forwarded to DRMO in order to release acquired property.
   K. SCREENERS. Sheriff’s employees authorized to select and procure approved government surplus property.
III. GENERAL.

A. PROPERTY REQUIREMENTS.
   1. Liability. The Office of the Sheriff agrees to hold the United States Government and the State of California harmless from any and all suits, actions, demands, or claims of any nature arising out of the condition of acquired property.
   2. Transportation and Storage. Transportation, storage, proper use, maintenance, internal review, control, accountability, documentation and disposal of all property received is the responsibility of the Office of the Sheriff throughout the properties life cycle.
   3. Use of Property. Property received must be placed into use within one year of receipt and used for a minimum of one year, unless its condition renders it unusable or there is an operational reason to hold it as back up. The property may not be sold, bartered, or given to non-certified CLEA entities. Property with demilitarization codes of “C”, “D”, or “L” must be returned to an authorized DRMO site if no longer needed or is deemed unusable.

IV. PROCEDURE.

A. BUREAU ASSISTANT SHERIFF (OR DESIGNEE) RESPONSIBILITIES.
   1. The Bureau Assistant Sheriff or designee shall select employees to screen Federal and State Government surplus property;
   2. Review and approve or deny items placed on hold by the screeners; and
   3. Ensure proper pick-up for all obtained property.

B. SCREENER RESPONSIBILITIES.
   1. Screeners may view property in person at the DRMO or by using the Internet.
   2. Screeners viewing State surplus property at a DRMO site are required to wear the Screener’s Identification Badge.
   3. Government regulations permit only two screeners per visit to the DRMO.
   4. Selecting surplus property for acquisition via the Internet.
   5. Once the property has been placed on hold, the screeners shall obtain the approval of the appropriate Bureau Assistant Sheriff or designee.
      a. If approval is granted, screeners shall submit form C 5, Letter of Authorization to Remove Property, to selected DRMO:
         • LESO approves transfer, then prepares and submits to the applicable DRMO an Issue Release/Receipt Document (DD Form 1348) for each item approved.
         • Screeners are responsible for ensuring the approved property is picked up within ten (10) days from authorization.
- Items obtained from a Recycle Control Point (RCP) location will be shipped free of charge.

- After receipt of government surplus property, the screener shall forward form 1348 for each item to the State Coordinator and send a copy to the Sheriff’s Office Emergence Services Support Unit Lieutenant (or designee).

- All received property must be “Receipted” in the Federal Excess Property Management Information System (FEPMIS)

C. ESSU LIEUTENANT (OR DESIGNEE) RESPONSIBILITIES.

1. Shall maintain an updated inventory database of all State Donation Program property.

2. Shall ensure the property is being utilized in accordance to federal guidelines and disposed of properly when no longer used.
I. POLICY.
   A. In order to maintain a professional image, the Office of the Sheriff maintains standards relating to the clothing, uniforms, and equipment worn by employees. Members shall only wear prescribed uniforms. Adornments must be authorized by Office of the Sheriff Policy. No part of the uniform will be worn in a discrediting fashion or off-duty in public.

II. DEFINITIONS.
   A. BELTS.

   B. BRAIDED CORDS.
      1. 100% nylon, solid gold, solid black or combination of gold/black.

   C. CLOTH BADGE.
      1. The sewn on cloth badge is authorized for wear with the Class “D” TDU uniform shirt, and as an optional item for the foul weather jacket, or rain jacket/pants for Class B, C, and D uniforms. The badge will indicate appropriate rank (deputy, sergeant, lieutenant, etc.). Sewn on badges are not authorized for any other uniform shirts or jackets.
      2. The cloth badge authorized is the version made by “Stadri Emblems.”

   D. DUTY BELT.
      1. Black basketweave leather two and one-quarter inch wide, with plain brass buckle.

   E. BELT KEEPERS.
      1. Black basketweave leather, with plain brass snaps.

   F. GLOVES.
      1. Black. Plain leather.

G. HATS.

1. Black Felt. Stratton Campaign style, model F40 with gold cord, acorn, and hat shield (Ed Jones Catalog No. 668) worn on the facing.

2. Tan Straw. Stratton Campaign style, model S-40DB with black band, black strap, gold cord, acorns, and hat shield as above.

3. Cap. Baseball style, black, 100% wool, New Era brand, sized (non-adjustable) with the prescribed Sheriff's cap insignia.

4. Cap. (Authorized only for specialized units as approved by this policy) Baseball style, black, (red for Rangemaster/Firearms Instructors). 100% wool, New Era brand or similar, sized (non-adjustable.) The prescribed lettering in ½ inch gold embroidered letters “Contra Costa Sheriff” in a semi-circle on the front with designated specialized unit (i.e. Marine Patrol, Rangemaster, Chaplain Unit, Off-Highway Vehicle Unit, Reserve Motor Unit, etc.) on the bottom in a straight line.

5. Cap. Utility, tan, or red if authorized per Section II.G.4 above, 65%, Nylon, 35% Cotton Ripstop, 511 style, model number 89422.

H. JACKETS.

1. Foul Weather. Flying Cross brand, model #59131WP.

2. Foul Weather with Fur Collar. Flying Cross brand, model #59131.

3. The above foul weather jackets shall have appropriate rank insignia, name tape, and badge when worn as the outer most garment.

4. Class A Jacket. Flying Cross brand, model #COCOIKE01. Shall be California Highway Patrol style but using Raeford #645-561 material, 55% poly/45% wool, 17-17.5 oz/sq yd, elastique weave, black. To have a peak lapel, front fastened with zipper, pleats in back with adjustable strap on back. Sleeve braids shall be A.H. Rice brand, ½” nylon lacquered braids sewn on both sleeves. Braids shall be sewn 3” above sleeve hem. Braid color is Sunset, part number #4631. Four braids sewn on both sleeves are designated for the Sheriff. Three braids sewn on both sleeves are designated for the Undersheriff. Two braids sewn on both sleeves are designated for Assistant Sheriffs. Captains and below shall have one braid sewn on both sleeves.

5. Motorcycle Unit Jacket. Tour Master brand, model Flex LE 2.0 Jacket, 8703-1005-xx (“xx” based on size). The jacket shall have an Office of the Sheriff patch and motor officer patch with gold winged wheel and whit arrow on each shoulder, a cloth badge or Office of the Sheriff badge, and name tape on the front.

6. Rain Jacket. Blauer brand, Gortex, model #GTX9691, black/yellow reversible with “Sheriff” in reflective 3” block lettering on the back.

I. PANTS.

1. Black / Tan Utility. Propper brand, button fly #9500, style 89706, 65% polyester, 35% cotton (for wear with specialty uniforms/ESSU worn/authorized as described in Procedures 7 & 8).
2. Rain Pants. Blauer black Gortex, model #GTX9561 or black vinyl.

   a. Class A: Flying Cross Poly Wool, model number #SCSTR01.
   b. Class B and C: Flying Cross Poly Wool, model number SCSTRS02, with side seam zipper pockets.
   c. Class B and C: Flying Cross Polyester, model number COCOTRS0, without side seam zipper pockets.
   d. Above listed trousers shall have quarter top pockets, hidden flexible waistband, keystone belt loops, button tab closure on left and rear pockets, and side seam glove pockets.

5. Black Utility. Black TDU, ripstop, 65% polyester, 35% cotton, cargo pockets. Authorized: 511 brand TDU black (black, per 511 Corp.)

6. Tan Utility. Tan TDU, ripstop, 65% polyester, 35% cotton, cargo pockets. Authorized: 511 brand TDU tan (khaki, per 511 Corp.)

   a. First Tactical. Men’s Velocity Tactical, 52% polyester, 48% cotton, Style #114001
   b. First Tactical. Women’s Velocity Tactical, 52% polyester, 48% cotton, Style #124001
   c. First Tactical. Men’s Specialist Tactical, 65% polyester, 35% cotton, Style #114005
   d. First Tactical. Women’s Specialist Tactical, 65% polyester, 35% cotton, Style #124005

J. SHIRTS.

2. Black Mock Turtleneck. Cotton or cotton poly/lycra blend such as, but not limited to, Port Authority K321 or Flying Cross 52610. The mock turtleneck shall be embroidered with gold “CCCSO” on the wearer’s left side in ¼ inch block lettering (just as the embroidered name-tape used on the TDU uniform). Embroidery should be centered between the left seam and the front center of the collar. The thread used should match the shoulder patch gold thread (for example, Madera Corporation, rayon thread, color 1137).

   a. Authorized Wear: with long sleeve uniform shirts only, Class C-winter uniform or the Class D TDU-long sleeve shirt. The mock turtleneck will not be worn with a short sleeve shirt in any uniform configuration, or outside the “C” and “D” uniforms described above.
3. Button-Down. Long sleeve “Munsingwear” sanded twill button-down collar long sleeve shirt. Hunter green (navy blue for Law Enforcement Training Center only) 100% combed cotton, 4.5 oz., two button adjustable cuffs and single button sleeve plackets, contrasting inside neck band and yoke back with center box pleat. Mens style #40452, Ladies style #40752.

   b. Embroidery. See J.4. (Polo.)

4. Polo. Long or short sleeve, navy or black (red is authorized for the rangemaster, firearms instructor, and defensive tactics instructor only). 100% polyester fabric, with collar, gusseted sleeves, and three buttons. Left breast area shall have “Contra Costa” with “Sheriff” positioned directly below, and an embroidered Sheriff’s badge centered below the writing. Right breast area shall have the employee title positioned above the first initial and last name. All lettering shall be ½ inch block style, Madeira #1137 gold thread.

   a. Polo shirt examples meeting the above criteria include, but are not limited to:
      - 5.11 Performance Polo
      - Under Armour Tactical Performance Polo
      - Fechheimer Vertx Action Polo

5. Black Utility. Black TDU, ripstop, 65% polyester, 35% cotton. Authorized: 511 brand TDU black (black, per 511 Corp.)

6. Tan Field Utility. Propper Brand, two pocket with epaulette, #9600, style # 89706, 65% polyester, 35% cotton (for wear with specialty uniforms/ESSU worn/authorized as described in Procedures 7 & 8).

7. All shirts listed below shall have shoulder straps, badge holder, two front pleated pockets, scallop pocket flaps, five permanent creases, and hidden pencil pocket:
   - Tan Short Sleeve. Flying Cross Poly Rayon, model number #69R6604.
   - Black Long Sleeve. Flying Cross Poly Wool, model number #305W8510Z.
   - Black Short Sleeve. Flying Cross Poly Wool, model number #655R8510Z.
• Black Long Sleeve. Flying Cross Poly Rayon, model number #47W6610.
• Black Short Sleeve. Flying Cross Poly Rayon, model number #97R6610.
• White. Long or short sleeve Flying Cross model number #35W5400, or Elbeco 65/35%, cotton/poly blend.

K. SHOES/BOOTS.
1. Dress (female). Black, closed toe slip-on with heel not to exceed 2". Worn with plain conventional nylons.
2. Plain. Black leather shoes or boots with a smooth shined finish.
3. Boots/high tops (for training at Range or EVOC only). Combat/jump/jungle style, laced, with ankle support. Suede desert tan/coyote brown.

L. SKIRTS.
1. Black. Serge, 75% polyester 25% wool fabric. The style shall be A-line with conventional zipper, no belt loops and no pockets. The length shall be no more than 2" above or below the middle of the knee. Sinatra, #JK420DW; Poly, Sinatra, #JK420. Female only.

M. SOCKS.
1. Black when visible above uniform shoes or boots.

N. SUSPENDERS.
1. Load bearing ballistic nylon or Cordura suspenders, in either black or tan, manufactured by various companies including: Blackhawk, HWC, and BMP 911.
2. Optional for wear by sworn staff, but when worn, shall be worn under the uniform shirt in any uniform configuration (Class A, B, C, or D (TDU)). Staff opting to wear the suspenders will be required to have openings tailored into their shirts in the appropriate positions to allow for suspenders to be worn under the shirt. The suspenders shall be fastened to the trouser belt, not the gun belt/Sam Brown Belt.

O. SWEATERS.
1. Cardigan. SFKM, style #5600, black button-up, 100% acrylic.
2. Wooly Pully. Blauer, or Flying Cross, Models 721,731 or 74010 black, "wooly pully" style. 70% piltril acrylic, 100% nylon patches left breast and shoulders with epaulets and "wind stopper" gore lining. (This sweater must be worn over the uniform shirt.) V-neck model is for Lieutenants and above and must be worn with a tie. The crew neck is for Sergeants and below. Sweater is to be worn with patches on both shoulders with rank designations on the collar. The sweater may be either tucked inside uniform trousers or left outside when wearing uniform leather/duty belt.

P. T-SHIRT.
1. Black crew neck.
2. Orange crew neck (Search and Rescue).

Q. TIES.

1. Black. 3'' wide non-crushable Dacron-wool with breakaway neck loop or clip. Female Deputies may wear the cross tie.

2. Blue. 3'' wide non-crushable Dacron-wool. Females may wear the cross tie.

R. UNIFORM: Dress of a distinctive design or fashion worn by employees of the Office of the Sheriff that serves as a means of identification.

S. EXTERNAL VEST CARRIER: The external vest carrier utilizes the employee’s existing ballistic vest panels and is designed to look like a uniform shirt. Employees can move gear off their duty belt and onto the external vest carrier, except for their duty firearm, primary ammunition magazines and electronic weapon. The firearm, primary ammunition magazines and electronic weapon are to remain on their duty belt as prescribed by policy. The exterior vest carrier is to be worn in conjunction with the uniform shirt, or the optional external vest carrier undershirt. Employees are required to affix their department issued badge to the front of the external vest carrier. External vest carriers are optional and all associated costs will be incurred by the employee. Employees who choose to equip themselves with the external vest carrier shall train with the vest carrier to better prepare for use in the field. Models with forward facing external Molle webbing (Safariland and Point Blank) must be covered by pouches to conceal at least 75% of the Molle webbing.

1. Black or Tan (dependent on assignment).

2. The following brands and models are authorized:
   a. Point Blank. Model – Modified Guardian
   b. Safariland. Model - USC Sac-PD
   c. The Vest Man. Model – Hybrid

   1. No longer authorized for new purchase
   2. Authorized for wear until January 1, 2024

T. EXTERNAL VEST CARRIER UNDERSHIRT (OPTIONAL).

1. Black or Tan (dependent on assignment). 5-11 PDU Rapid Assault. Long or short sleeve.

III. GENERAL.

A. The uniform of our Office represents our reputation and is a symbol of our authority. If it is properly maintained and displayed, it defines and reinforces the professionalism of the Sheriff's Office. A monthly uniform allowance is provided for the purchase of Sheriff's Office uniforms for those who are required to wear a uniform (excludes clerical and Forensics). It is each employee's responsibility to maintain the standards set forth in this Policy.
All uniform shirts, jackets, wind breakers, “wooly pullys” will have the Sheriff’s Office patch and rockers if appropriate on both sleeves located one-half inch below the sleeve head. (Exceptions: polos, button-downs, cardigans and non-uniformed employee wind breaker.)

Information on approved uniform insignia including approved tie bars, stars, hash marks, chevrons, etc. can be located in Sheriff’s Office Policy Section 1.07.22, Rank and Service Insignia.

1. **UNIFORM WEARING AND CONDITION.**
   a. Clothing will be clean, neat and pressed.
   b. Sleeves will not be cuffed or rolled.
   c. Military creases will not be sewn into any clothing.
   d. Uniform shirts will have ironed military creases.
   e. Shoes and leather goods will be kept clean and polished.
   f. All metal work will be kept cleaned and polished.
   g. Uniforms and other apparel will be kept in good condition.
   h. Clothing and equipment bearing excessive wear or in need of repairs are prohibited.
   i. A black tie is required when wearing a Class “A” uniform.
   j. The Class “C-Winter” and Class “C-Summer” uniforms may be worn without calendar or seasonal limitations. The seasonal references serve only to distinguish the two uniform specifications.

**IV. PROCEDURE.**

A. **UNIFORMED SAFETY EMPLOYEES.**

1. **Class "A" Duty Uniform (Required)**
   a. This uniform shall be required at all formal functions or as directed by the Sheriff. The Class "A" uniform may be worn at any time:
      - Hat, black felt (Optional)
      - Black dress jacket
      - Tie, black
      - Shirt, black long sleeve
      - Pants, black poly wool
      - Duty belt
      - Socks
      - Shoes/boots
      - Holster
• Magazine Holder
• Single Handcuff Case
• Belt Keepers (Four)

b. Belt, holster, magazine holders and handcuff case in regulation black basketweave, shall be worn on occasions representing the Office of the Sheriff when firearms are authorized.

c. Optional items that may be worn with the Class "A" Duty uniform:
   • Rain jacket/pants (with optional sewn-on cloth badge)

2. Class “A” Inspection Uniform (Required):
   a. This uniform shall be required at all formal Sheriff’s Office Uniform Inspections or as directed by the Sheriff.
      • Hat, black felt (Required)
      • Black dress jacket
      • Tie, black
      • Shirt, black long sleeve
      • Pants, black poly wool
      • Duty belt
      • Socks
      • Shoes/boots
      • Holster
      • Belt Keepers (Four)

3. Special Detail Class "A." This uniform shall consist of the Class "A" dress uniform with the addition of a braided cord. The braided cord will be worn on the right shoulder. This uniform is to be worn by a small contingent of designated personnel at special occasions and ceremonies. Approval to wear the Special Detail Class "A" uniform will be given by the Patrol Division Commander or the Sheriff's Office Funeral Coordinator.

4. Class "B" Uniform. This uniform is authorized for normal Office of the Sheriff functions. This uniform may be worn at any time of the year the formal dress uniform is not required.
   a. Class “B” Uniform:
      • Tie, black
      • Shirt, black long sleeve
      • Pants, black
      • Duty belt
      • Socks
5. Class “C” Uniform

a. Class “C-Winter” Uniform:

   • Shirt, black long sleeve
   • Pants, black
   • Duty belt
   • Socks
   • Shoes/boots
   • Optional items that may be worn with the Class “C-Winter” uniform:
     • Cap
     • Foul weather jacket (with optional sewn-on cloth badge)
     • Rain jacket/pants (with optional sewn-on cloth badge)
     • Black mock turtleneck
     • External Vest Carrier and EVC Undershirt (optional)

b. Class "C-Summer" Uniform:

   • Shirt, black short sleeve
   • T-shirt, black
   • Pants, black
   • Duty belt
   • Socks
   • Shoes/boots
6. Class “D” Uniform:
   a. This uniform is authorized for certain tasks and for the following assignments: Patrol (as specified in b. below), Marine Patrol, J-Team, Civil Unit, Coroners, Transportation, Detention (MDF, MCDF, WCDF), Canine Officer, Litter Control Officer, Vehicle Abatement Officer, Lab Crime Scene Unit, with approval of the Division Commander.
   b. Patrol personnel may wear this uniform in the event of inclement (stormy, severe, or harsh) weather. In cases not involving inclement weather, this uniform may be authorized by the Patrol Division Captain, or Station House Commander for a period no longer than seven days, or by the on-duty Watch Commander who may authorize it for the duration of the current shift. In either case, authorization will be documented by a memo to the Field Operations Bureau Assistant Sheriff stating the justification for the authorization and the specific day/time when the authorization will end.
   c. Class “D” Uniform:
      - This uniform is not authorized as court attire.
      - Shirt, black utility
      - T-shirt, black
      - Pants, black utility, worn un-bloused, except in Detention Divisions, Coroners Division, K-9 Unit, and Civil Unit
      - Duty belt
      - Socks
      - Boots only
      - Optional items that may be worn with the Class “D” uniform:
         - Rain jacket/pants (with optional sewn-on cloth badge)
         - Cap
• Foul weather jacket (with optional sewn-on cloth badge)
• Black mock turtleneck (long-sleeve only)
• External Vest Carrier and EVC Undershirt (optional)

7. Class “E” Attire:
   a. This attire is authorized to be worn only when business or uniform dress is impractical or when identity and informality are critical to the task with authorization of the Division Commander.
      • Specific examples are training exercises or classes where informal dress is expected or tasks that are likely to result in dirty clothing (dusting for fingerprints, firearms qualification, cleaning/moving items).
   b. The polo and button-down shirt may not be substituted for business attire or uniform dress.
   c. Shirt, button-down or polo
   d. Utility, tan as described in sections II.1.6 and II.1.7 of this policy. Un-bloused.
   e. Belt
   f. Socks
   g. Shoes/boots
   h. Optional:
      • Foul weather jacket
      • Rain jacket/pants
      • Cap

V. PROCEDURE 2.
A. UNIFORMED GENERAL EMPLOYEES. Dispatchers, Sheriff’s Specialists, and Sheriff's Aides assigned to field work and all other uniformed general employees are authorized to wear the uniforms listed below:

1. Class “B” Uniform:
   a. This uniform is authorized for normal Sheriff’s Office functions.
   b. This uniform is required at all formal functions and may be worn at any time.
   c. Shirt, black long sleeve
   d. Tie, black
   e. Pants, black
   f. Skirt, black for female dispatcher (dress shoes required)
g. Belt, basketweave
h. Socks
i. Shoes/boots
j. Optional for field personnel:
   • Hat, black or cap when jacket is worn
   • Foul weather jacket
   • Rain jacket/pants
k. Optional for Dispatchers:
   • Wooly pully sweater may be worn over long or short sleeve shirt, tie optional.
   • Cardigan sweater, SFKM style #5600, black button-up.

2. Class “C” Uniform:
   a. Shirt, black short sleeve
   b. Pants, black
   c. Belt, basketweave
   d. Socks
   e. Shoes/boots
   f. Optional:
      • Wind breaker
      • Skirts, black for female dispatcher (dress shoes required)
   g. Optional for field personnel:
      • Cap
      • Foul weather jacket
      • Rain jacket/pants

3. Class “D” Uniform:
   a. This uniform is authorized for uniformed general employees working the MDF, MCDF and WCDF, and for certain FOB assignments with appropriate approval.
   b. Shirt, black utility
   c. Pants, black utility
   d. Belt, basketweave
   e. Socks
   f. Shoes/boots

4. Class “E” Attire:
a. This attire is authorized to be worn only when business or uniform dress is impractical or when identity and informality are critical to the task with authorization of the Division Commander. Specific examples are training exercises or classes where informal dress is expected or tasks that are likely to result in dirty clothing (dusting for fingerprints, firearms qualification, cleaning/moving items). The polo and button-down shirt may not be substituted for business attire or uniform dress.

- Shirt, button-down or polo
- Utility, tan as described in sections II.1.6 and II.1.7 of this policy. Un-bloused.
- Belt
- Socks
- Shoes/boots
- Optional:
  - Foul weather jacket
  - Rain jacket/pants

VI. PROCEDURE 3.

A. SHERIFF’S RANGERS. Sheriff’s Rangers assigned to Court Security, Patrol, or other non-field assignments are required to adhere to the following prescribed uniform:

1. Class “A” Uniform:
   a. Authorized for use at court appearances
   b. Foul weather jacket
   c. Tie, black
   d. Shirt, long sleeve tan
   e. Pants, black
   f. Belt, basketweave
   g. Socks
   h. Shoes/boots

2. Class “B” Uniform:
   - Shirt, long or short sleeve tan
   - Tie, black (with long sleeve only)
   - Pants, black
   - Belt, basketweave
   - Socks
   - Shoes/boots
VII. PROCEDURE 4.
A. STUDENT WORKERS. Student Workers assigned to Patrol or other non-field assignments are required to adhere to the following prescribed uniform:

1. Class “A” Uniform:
   a. Authorized for use at court appearances
   b. Foul weather jacket
   c. Tie, black
   d. Shirt, long sleeve tan
   e. Pants, black
   f. Belt, basketweave
   g. Socks

   a. Cap, black, as described in Section II.G. 3. of this policy.
   b. Black, short or long sleeve shirt
c. Black motorcycle breeches by Sinatra with black and gold stripe

d. Duty belt

e. Black motorcycle boots

f. Helmet, gold and black D.O.T. approved. Metal badge with “SHERIFF” across the banner

g. Tie, black bow

h. Optional Motorcycle Unit jacket as described in Section II.H. 7. of this policy.

i. Optional for training and maintenance only:
   • Black utility pant and shirt

5. Forensic Unit Crime Scene Processing Uniform:
   a. Slacks, black or utility pants, tan
   b. Polo shirt, black
   c. Cap
   d. Foul weather jacket or wind breaker with “Contra Costa County”, “Sheriff” and “Crime Lab” printed on back
   e. Shoes/boots

6. S.W.A.T. Tactical Team Uniform:
   a. Utility shirt, olive drab Tru-Spec XTREME combat
   b. Utility pants, olive drab Tru-Spec XTREME combat
   c. Cap, S.W.A.T. Team logo
   d. Cap, Utility, black
   e. Balaclava mask (only to be worn in authorized situations – i.e.: deployment of diversionary devices)
   f. Black T-shirt with “Contra Costa Sheriff’s S.W.A.T. Team” on the back
   g. Gloves, olive drab or black
   h. Rain gear, olive drab
   i. Boots/high-tops, combat/jump style with ankle support
   j. Duty gear, black tactical nylon with heavy stitching

7. Hostage Negotiations Team and Tactical Dispatcher Team Uniform:
   a. Polo shirt, black, long or short sleeved, as described in Section II.4. of this policy with the addition of “NEGOTIATOR” or “TACTICAL DISPATCHER” above the name.
b. Utility pants, black
c. Jacket, black, 5.11 Chameleon Soft Shell, with “SHERIFF” heat transfer on the back flap and the embroidered Sheriff’s star on left breast.
d. Cap, Utility, black
e. Shoes/boots
f. For H.N.T. team members only:
   • Duty belt (If the optional external outer carrier is not worn)
   • Optional: External outer carrier, with vest and safety equipment, black, with gold “Sheriff” patches on front and back. The carrier will be worn when deploying in a tactical situation in place of duty belt.

8. Defensive Tactics/EVOC/First Aid/Force Options/Electronic Weapons/Rangemaster/Firearm Instructors:
   a. Cap, black, (red for Rangemaster/Firearm Instructors), as described in Section II.G.3. or 5. of this policy.
   b. Polo shirt, blue or black, (red for Rangemaster/Firearm Instructors).
   c. Utility pants, tan, as described in Section II.I.6 and II.I.7 of this policy. Un-bloused.
   d. Foul weather jacket
e. Boots/high tops, as described in Section II.K.2. or 3. of this policy.
f. Optional:
   • Hat, tan straw

9. K-9 Officer:
   a. Utility shirt, black, with cloth name tag and badge sewn on and “SHERIFF K-9” embroidered on the back.
   b. Utility pants, black.

10. Mutual Aid Mobile Field Force (MAMFF):
    a. Cap. Baseball style, black, 100% wool, New Era brand or similar, sized (non-adjustable) with approved MAMFF patch affixed.
    b. Utility shirt, black, with cloth name tag and badge sewn on. The Office of the Sheriff shoulder patch will be worn on the right shoulder and the MAMFF patch will be worn on the left shoulder.
    c. Utility pants, black.
11. Pipes and Drums:
   a. Hat, plain black Glengarry (no checkers) with black badge rosette, to be worn with hat badge.
   b. Long or short sleeve uniform shirt (determined by the bandleader depending on the venue) in accordance with uniform shirt specifications including rank insignia and badge. Contract city members may wear their uniform shirts in accordance with the above guidelines, if approved for the occasion. Civilian members shall follow the same regulations wearing a badge indicating their civilian status.
   c. A black, V-neck Blauer poly/cotton “wooly pully” with epaulets is authorized when authorized by the bandleader. It will be worn with name tag and badge. This sweater will be worn tucked in to the kilt.
   d. Kilt, wool black watch regimental tartan with buckles and fringe. All kilts will have matching tartan.
   e. Sporran (pouch), white with black tassels, gold metal chain and cantle. Slight variations are acceptable.
   f. Belt, holster, and magazine holders in regulation black basketweave, shall be worn on occasions representing the Office of the Sheriff when sidearms are authorized. Members from outside agencies may wear their own issued sidearms in black basketweave holster, belt and magazine holders. Members not authorized to wear sidearms shall wear a black basketweave Sam Browne belt with brass buckle. A black leather “box pouch” may be worn on the Sam Browne belt for the storing of piping accessories. A black water bottle may be worn on the belt during parades only.
   g. Black kilt hose (socks) with Black Watch tartan flashes (ribbons). A Scottish “skian dube” (black knife) of any tasteful design may be worn inside the top of the right kilt hose.
   h. Black marching shoes shall be worn with white spats.

12. Emergency Services Division - Homeland Security Unit Supervisor, Emergency Services Support Unit Supervisor, Deputy Sheriffs, Civilian Managers, Emergency Planners, Crime Analysts, and Student Workers are authorized to wear the optional uniform listed below only when business or uniform dress is impractical or when identity and informality are critical to the task, and it has been authorized by the Division Commander:
   a. Shirt, polo, long or short sleeve, Navy blue, as described in Section II.J.4. of this policy. Embroidered as described in that section.
   b. Utility Pants, Tan, button fly, as described in Section II.I.6. of this policy.
   c. Belt, black
d. Socks  

e. Shoes/Boots, black leather  

f. Optional:  
  • Foul weather jacket  
  • Rain jacket/pants  
  • Wind breaker  

XI. PROCEDURE 8.
A. Emergency Services Support Unit (ESSU). The ESSU is comprised of several volunteer units. These volunteer units have specific uniforms which are necessary to meet the demands of their specialized functions.

1. Air Squadron:  
   a. Cap, black, as described in Section II, G.3. of this policy.  
   b. Shirt, polo, long or short sleeve, Navy blue, as described in Section II.J.4. of this policy. Embroidered as described in that section.  
   c. Utility pants, tan, button fly, as described in Section II.I.1 of this policy.  
   d. Belt, black basketweave  
   e. Socks  
   f. Shoes/Boots, black leather  
   g. Optional:  
      • Foul weather jacket  
      • Rain jacket/pants  
      • Wind breaker  

2. Chaplain Unit:  
This attire is authorized to be worn only when business attire (As outlined in Procedure 8) is impractical or when identity and informality are critical to the task with authorization of the Division Commander.  

   a. Cap, black, as described in Section II.G.3. of this policy.  
   b. Shirt, polo, long or short sleeve, navy blue, as described in Section II.J.4. of this policy. Embroidered as described in that section.  
   c. Tan Slacks  
   d. Belt, black  
   e. Socks  
   f. Shoes/Boots  
   g. Optional:
3. Dive Team:
   a. Cap, black, as described in Section II.G. 3. of this policy.
   b. Shirt, polo, long or short sleeve, Navy blue, as described in Section II.J.4. of this policy. Embroidered as described in that section.
   c. Utility Pants, tan, button fly, as described in Section II.I.1. of this policy.
   d. Belt, black basketweave
   e. Socks
   f. Shoes/Boots, black leather
   g. Optional:
      - Foul weather jacket
      - Rain jacket/pants
      - Wind breaker

4. Explorer/Scouts Program:
   Class “B” Uniform:
   a. Shirt, tan long sleeve
   b. Tie, black
   c. Pants, black
   d. Belt, black basketweave
   e. Socks
   f. Shoes/Boots
   g. Optional for field personnel:
      - Cap
      - Foul weather jacket
      - Rain jacket/pants

5. Food Service Unit:
   a. Cap, black, as described in Section II.G.3. of this policy.
   b. Black T-shirt, long or short sleeve.
   c. Utility Pants, tan, button fly, as described in Section II.I.1. of this policy, 65% Polyester, 35% cotton.
   d. Apron, black or tan, with Food Service Unit/Sheriff Insignia
   e. Belt, black basketweave
6. Mutual Aid Mobile Support Unit and Mutual Aid Medical Support Unit:
   a. Utility Shirt, black, two pocket, with epaulette, as described in Section II, I.5 of this policy, 65% polyester, 35% cotton, with cloth name tag and badge sewn on. The Sheriff’s Office shoulder patch will be worn on the right shoulder and the MAMFF patch will be worn on the left shoulder.
   b. Utility Pants, black, button fly, as described in Section II.I.5. of this policy, 65% polyester, 35% cotton.
   c. Optional:
      • Foul weather jacket
      • Rain jacket/pants

7. Off-Highway Vehicle Unit:
   a. Cap, Black, as described in Section II.G.3 of this policy.
   b. Shirt, black utility
   c. T-shirt black
   d. Pants, black utility as described in Section II.I.5. of this policy.
   e. Duty belt
   f. Socks
   g. Boots only
   h. Optional:
      • Foul weather jacket
      • Rain jacket/pants

8. Sheriff’s Auxiliary Volunteer Extended Services (S.A.V.E.S.):
   a. Shirt, polo, long or short sleeve, navy blue, as described in Section II.J.4. of this policy. Embroidered as described in that section.
   b. Slacks
   c. Belt
   d. Shoes/boots
   e. Optional:
      • Foul weather jacket
• Rain jacket/pants

9. Search and Rescue:
   a. Cloth badge, silver Search and Rescue
   b. Utility Shirt, tan, two pocket, with epaulette, as described in Section II.I.12. of this policy, 65% polyester, 35% cotton.
   c. Search and Rescue shoulder patches are worn on both the left and right shoulders
   d. Utility Pants, tan, button fly, as described in Section II.I.1. of this policy, 65% polyester, 35% cotton.
   e. Cap, utility
   f. Orange T-shirt
   g. Socks
   h. Boots
   i. Duty Gear
      • Foul weather jacket – Mountain Uniforms brand, orange/black (custom #34 and/or #004m long length matching soft shell) or equivalent.
      • Rain jacket/pants

10. Sheriff’s Reserve Deputy:
   a. The Sheriff’s Reserve Deputies will comply with the uniform requirements as outlined in Procedure 1 and Procedure 2 of this policy based on their specific assignment.
   b. Reserve Deputy Sheriffs who are members of Search and Rescue and are providing security in the field for a Search and Rescue mission may wear the modified Search and Rescue uniform. The uniform shall consist of duty leather, firearm and Search and Rescue utility uniform. The shirt shall have a Search and Rescue patch on the right shoulder and a Sheriff’s Office patch on the left. This uniform is only to be worn during Search and Rescue functions.

11. R.A.C.E.S. (Radio Amateur Communications Emergency Service)
   a. Cap, black as described in Section II. G.3. of this policy
   b. Embroidered shirt, polo, long or short sleeve, navy blue, as described in Section II J.4. of this policy.

XII. PROCEDURE 9.
   A. NON-UNIFORM DRESS CODE. Unless otherwise specified by the Division Commanders, the following is the dress code for employees working in a non-uniform assignment:
      1. Men shall wear a suit, dress shirt and tie or a sport coat, dress shirt, tie and slacks with appropriate shoes and socks.
2. Women shall wear a dress, dress suit, pants suit or slacks/skirt, blouse and jacket with appropriate shoes.

3. Except when specifically authorized by the Division Commander for a limited time and special purpose (e.g. clean-up days) shorts, jeans, jean-type trousers and T-shirts are prohibited.
I. POLICY.
   A. Uniform rank and service insignia are established to identify an employee’s classification, rank, assignment, awards, and time in service. Insignia worn on uniforms must be in conformity with this policy or approved by the Sheriff.

II. DEFINITIONS.
   A. RANK INSIGNIA. Rank insignia are a set of symbols that represent the organizational hierarchy of safety positions.

III. GENERAL.
   A. RANK INSIGNIA USED ON UNIFORMS. The insignia identifying the rank of the positions are:
      1. Sheriff.
         a. Sheriff’s badge inscribed with “Sheriff-Coronor” or “Sheriff”
         b. Four gold stars
         c. Four embroidered gold stars if worn on the TDU Class “D” uniform. Stars shall be five point, 17 millimeters in size, thread color Madeira Rayon, number #1137.
      2. Undersheriff.
         a. Sheriff’s badge inscribed with “Undersheriff”
         b. Three gold stars
         c. Three embroidered gold stars if worn on the TDU Class “D” uniform. Stars shall be five point, 17 millimeters in size, thread color Madeira Rayon, number #1137.
      3. Assistant Sheriff.
         a. Sheriff’s badge inscribed with “Assistant Sheriff”
b. Two gold stars

c. Two embroidered gold stars if worn on the TDU Class “D” uniform. Stars shall be five point, 17 millimeters in size, thread color Madeira Rayon, number #1137.

4. Captain.

a. Sheriff’s badge inscribed with “Captain”

b. Two gold bars

c. Two embroidered gold bars if worn on the TDU Class “D” uniform. Bars shall be .827 x .791 in size, thread color Madeira Rayon, number #1137.

a. Sheriff’s badge inscribed with “Chief – Forensic Services”

b. Two gold bars

c. Two embroidered gold bars if worn on the TDU Class “D” uniform. Bars shall be .827 x .791 in size, thread color Madeira Rayon, number #1137.

a. Sheriff’s badge inscribed with “Lieutenant”

b. One gold bar

c. One embroidered gold bar if worn on the TDU Class “D” uniform. Bars shall be .827 x .307 in size, thread color Madeira Rayon, number #1137.

7. Deputy Sheriff Forensic Manager.

a. Sheriff’s badge inscribed with “Forensic Manager”.

b. One gold bar

c. One embroidered gold bar if worn on the TDU Class “D” uniform. Bars shall be .827 x .307 in size, thread color Madeira Rayon, number #1137.

8. Sergeant Major.

a. Sheriff’s badge inscribed with “Sergeant Major”

b. Three gold chevrons over three gold rockers, and a gold star in center on black background

c. Gold collar tabs

a. Sheriff’s badge inscribed with “Sergeant”

b. Black and gold three-stripe chevron

10. Deputy Sheriff Forensic Supervisor.

a. Sheriff’s badge inscribed with “Forensic Supervisor”
b. Black and gold three-stripe chevron.

11. Corporal.
   a. Sheriff’s badge inscribed with “Deputy Sheriff”
   b. Black and gold two-stripe chevron

12. Deputy Sheriff First Class.
   a. Sheriff's badge inscribed with "Deputy Sheriff"
   b. Black and gold one-stripe chevron
   c. Completed 15 years of service with the Sheriff’s Office in grade, coincides with attainment of longevity pay

   a. Sheriff's badge inscribed with "Deputy Sheriff"
   b. Upon successful completion of probation, the Training Unit will issue Deputy Sheriff's badges with name ribbons.

   a. Sheriff’s badge inscribed with “Deputy Sheriff”
   b. Upon successful completion of probation, the Training Unit will issue Deputy Sheriff's Badges with name ribbons.

15. Reserve Deputy Sheriff.
   a. Level I. Sheriff’s badge inscribed with “Deputy Sheriff”
   b. Level II and Level III. Sheriff’s badge in silver or chrome (with gold or brass State seal) inscribed with “Deputy Sheriff”

16. Sheriff's Aides, Clerks, Community Service Officers, Rangers, Student Workers, and Sheriff's Specialists.
   a. Sheriff’s badge inscribed with “Aide”, “Clerk”, “Community Service Officer”, “Ranger”, “Student Worker”, or “Specialist” as applicable
   b. Rocker inscribed with "Aide", “Clerk”, “Community Service Officer”, “Ranger”, “Student Worker”, or "Specialist” as applicable

17. Communications.
   a. Dispatch Director.
      • Badge inscribed with "Sheriff's Dispatcher" with a metal ribbon attached inscribed with "Director"
      • Rockers reading "Communications Director" on both sleeves
   b. Dispatch Supervisor.
      • Badge inscribed with "Sheriff's Dispatcher", with a metal ribbon attached inscribed with "Supervisor"
• Rockers reading "Communications Supervisor" on both sleeves

c. Dispatcher.
  • Badge inscribed with "Sheriff's Dispatcher" Rockers reading "Communications" on both sleeves

18. Investigation Division. Detective badge (shield) issued by the Investigation Division Commander to all Deputies and Sergeants upon transfer to the Investigation Division.
   a. Sergeant.
      • Detective badge (shield) with a metal ribbon attached to the bottom inscribed with "Sergeant"
   b. Deputy Sheriff.
      • Detective badge (shield) with a metal ribbon attached to the bottom inscribed with a number

B. CONTRACT CITY UNIFORM RANK INSIGNIA.

1. Lafayette Police Department.
   a. Lieutenant serving as Chief or Contract Police Manager.
      • Lafayette shield inscribed with "Chief"
      • One gold star
   b. Sergeant.
      • Lafayette shield inscribed with "Sergeant"
      • Yellow on blue, three-stripe chevron
   c. Officer.
      • Lafayette shield inscribed with "Police Officer"

2. Danville Police Department.
   a. Lieutenant serving as Chief or Contract Police Manager.
      • Danville shield inscribed with "Chief"
      • One gold star
   b. Lieutenant.
      • Danville shield inscribed with “Lieutenant.”
   c. Sergeant.
      • Danville shield inscribed with "Sergeant"
      • Yellow on blue, three-stripe chevron
   d. Officer.
      • Danville shield inscribed with "Police Officer"
3. Orinda Police Department.
   
   a. Lieutenant serving as Chief or Contract Police Manager.
      
      - Orinda shield inscribed with "Chief"
      - One gold star
   
   b. Sergeant.
      
      - Orinda shield inscribed with "Sergeant"
      - Yellow on blue, three-stripe chevron
   
   c. Officer.
      
      - Orinda shield inscribed with "Police Officer"

4. Oakley Police Department.
   
   a. Lieutenant serving as Chief or Contract Police Manager.
      
      - Oakley badge inscribed with “Chief”
      - One gold star
   
   b. Sergeant.
      
      - Oakley badge inscribed with “Sergeant”
      - Yellow on blue, three stripe chevron
   
   c. Officer.
      
      - Oakley badge inscribed with “Officer”

C. SERVICE INSIGNIA USED ON UNIFORMS. The service insignia for use on uniforms are:

1. Office of the Sheriff Badge.
   
   a. The badge is a 7-point star in gold or brass. In the center is the circular Great Seal of the State of California. Inscribed around the Great Seal is the rank (or position) of the badge holder and the words “Contra Costa County”. All authorized badges are manufactured by the Ed Jones Co. Sworn employees issued previous regular badges (non-commemorative) and continuously wearing or carrying them, may continue to do so.

2. Office of the Sheriff Patch.
   
   a. The patch is gold on black embossed with a scene of Mt. Diablo with the words "Contra Costa County Sheriff". The patch shall be issued by the Training Unit.

3. Name Plate.
   
   a. Employee's name plates are gold tone metal, 2 1/4 inches wide by 3/8 inches high inscribed with the member's first initial and last name. Exception: Criminalistics Laboratory employee name plates are inscribed with first and last names. Name plates serve to identify individual employees to the public.
4. Service Stars.
   a. Service stars shall be worn by the ranks of Lieutenant and above.
   b. Each star represents five years of completed service with the Office of the Sheriff in any uniformed capacity. Laterally hired Deputies may wear one service star for each five years of California law enforcement experience.

5. Hash Marks.
   a. Hash marks shall be worn by the ranks of Sergeant and below.
   b. Each hash mark represents five years of completed service with the Office of the Sheriff in any uniformed capacity. Laterally hired Deputies may wear one hash mark for each five years of California law enforcement experience.

   a. Training pins are a 3/8” gold tone metal cut out pin with periods between the letters. The training pins indicate a position in Training Programs and denote either "F.T.O.", or "D.T.O."

7. Employee of the Year Name Pin.
   a. The "Employee of the Year" name pin is awarded to each "Employee of the Year"; the pin is gold tone metal and will have the employee's name on top and "Employee of the Year 20__" on the bottom.

8. S.W.A.T. Pins.
   a. The S.W.A.T., H.N.T., and T.D.T. pin indicates a position with the Sheriff's Office Special Weapons and Tactics Team and is a 3/8” gold tone metal cut out pin with periods between the letters.
   b. S.W.A.T. Veteran’s Pin. A gold-colored pin displaying an eagle holding a banner in its talons. This pin may be worn on the uniform only after voluntary departure in good standing from the team by members who have served on the Tactical, H.N.T., or T.D.T. units of the S.W.A.T. team for more than two years.

9. S.E.R.T. Pin.
   a. The S.E.R.T. pin indicates a position with the Sheriff’s Emergency Response Team and is a 3/8” gold tone metal cut out pin with periods between the letters.

    a. The K-9 patch is yellow on black and indicates the position of Dog Handler.

    a. The K-9 pin is a 3/8” gold tone metal cut out pin and indicates the position of Dog Handler.
   a. The J-Team pin indicates a position with the Sheriff’s Justice Team and is a 3/8” gold tone metal cut out pin.

13. Deputy Sheriff’s Association Pin.
   a. The current pin issued by the Deputy Sheriffs’ Association may be worn.

14. Sheriff’s Aides, Clerks, Community Service Officers, Rangers, Student Workers, and Specialists.
   a. A cloth rocker designating “Aide”, “Clerk”, “Supervising Clerk”, “Community Service Officer”, “Ranger”, “Student Worker”, and “Specialist” is worn on both sleeves under the Sheriff’s Office patch.

15. “Serving Since” Name Plate Attachment (Optional).
   a. Gold tone with black lettering. Indicates year that service with a California law enforcement agency began in center, flanked to one side with the word ‘serving’ and to the other side with the word ‘since’. Resembles “pilot wings” and attaches to clutchback name plate.

   a. Gold with blue/white ribbon bar; Silver with red/white ribbon bar; or Bronze with red/blue ribbon bar.

17. 10851 Award Pin.
   a. General White pin; with or without ribbon.
   b. Blue Master pin; with or without ribbon.
   c. Gold Lifetime Achievement pin with center stone and ribbon.

18. Flag Pin.
   a. Gold tone with stars and stripes depicted in the appropriate colored paint/enamel. Flag pin shall be no larger than 7/8" by 5/8".

D. INSIGNIA USED ON SPECIALTY UNIFORMS.

1. Insignia used on specialty uniforms are established by the Divisions responsible for the special unit. Specialty uniforms and insignia shall be approved by the Sheriff or the Undersheriff. The descriptions presented here are informational only. Regulations for their use are the Division's responsibility.

   a. Danville patch
   b. Lafayette patch
   c. Orinda patch
   d. Oakley patch
e. Service hash marks. Contract cities wearing blue uniforms use the "hash marks" on the uniform sleeve to replace the service star used on the County uniform.

3. Communications.
   a. Communications rocker
   b. Lightning bolt pin

4. Patrol.
   a. Sheriff's Office patch blackened for S.W.A.T. use
   b. S.W.A.T. patch
   c. Marine Patrol pin (gold anchor) indicates an assignment in the Marine Services Unit
   d. S.T.A.R.R. pin (star with wings) indicates an assignment in the Air Support Unit
   e. Motorcycle pin (wings with a wheel) indicates an assignment in the Motorcycle Unit

E. RESTRICTIONS ON WEARING INSIGNIA.

1. Only those insignia listed in this Policy are authorized to be worn by employees.

2. Employees may only wear specialty Unit pins when assigned to that specific specialty Unit or involved in the specific activity.

3. The current Deputy Sheriffs' Association (DSA) pin is authorized to be worn. Any design changes to a DSA pin that will be worn on a uniform must be submitted to the Sheriff.

4. Insignia for specialty uniforms is generally established at the Division level. Such insignia shall be approved by the Sheriff or the Undersheriff.

5. General employees who carry badges will not display badges in such a way as to impersonate a Deputy. Badges will be worn on uniforms while on official duty only.

IV. PROCEDURE 1.

A. INSIGNIA STANDARDS/MAINTENANCE.

1. Standards. The insignia described in the above General Information are the insignia standards. Only those insignia authorized by this Policy are to be worn.

2. Maintenance. Sheriff's insignia shall be kept clean and in good repair. Metal insignia shall be kept polished.

V. PROCEDURE 2.

A. WEARING OF INSIGNIA. The Sheriff's insignia shall be worn as follows:

1. Sheriff's Badge. The Sheriff's badge shall be worn above the left breast pocket of the outer-most uniform garment. Optional: Badge backing -
black leather basketweave design. Exception: As authorized by the appropriate Bureau, plain clothes Deputies wearing a weapon shall display their badge on their belt.

2. Sheriff's Office Patch. The patch is gold on black embossed with a scene of Mt. Diablo and the words "Contra Costa County Sheriff." The patch shall be worn on both sleeves.

3. Name Plate. The employee's name plate shall be worn immediately above the right breast pocket of the outer-most uniform garment, with the exception of the foul weather and rain jacket.

4. Metal Rank Insignia (Stars, Bars, and Chevrons).
   a. Small set of stars shall be worn on the shirt collar. Small set of bars will be worn on the shirt collar between the collar tips and the neck opening, positioned along the seam on the front edge of the collar. The stars or bars shall be embroidered gold (as in General above) if worn on the TDU Class “D” uniform.
   b. Large set of stars or bars shall be worn on the epaulette (shoulder strap) of the uniform jacket, one inch from the seam.
   c. Small set of chevrons may be worn on the crew neck, wooly-pully sweater at the point where the collar of the uniform shirt tucks beneath the sweater.

5. Patch Chevrons.
   a. Chevrons shall be centered one inch below the Sheriff's patch on shirt and jacket sleeves.
   b. Chevrons shall not be worn on rain jackets.
   c. Chevrons shall be issued by the Training Unit

   a. Class “A” Jacket service stars shall be embroidered directly onto the left sleeve, beginning ½ inch above the top of the sleeve braid. The service stars shall be embroidered as a single row, with a maximum of 5 stars per row. The service stars shall be five point, 17 millimeters in size, and the thread color shall be Madeira Rayon, color number #1137.
   b. Long sleeved shirt service stars shall be embroidered directly onto the left sleeve, beginning ½ inch above the top of the sleeve cuff. The service stars shall be embroidered on to the left sleeve as a single row, with a maximum of 5 stars per row. The service stars shall be five point, 17 millimeters in size, and the thread color shall be Madeira Rayon, color number #1137.

7. Service Hash Marks.
   a. Class “A” Jacket hash marks shall be sewn onto the left sleeve, beginning ½ inch above the top of the sleeve braid. Each service stripe shall be 7/16” tall and 1 ½” wide per hash mark. Multiple hash marks shall be sewn as one continuous piece. The thread
material shall be comparable to Madeira Rayon #1137, and be embroidered onto a black twill background.

b. Long sleeved shirt hash marks shall be sewn onto the left sleeve, beginning ½ inch above the top of the sleeve cuff. Each service stripe shall be 7/16” tall and 1 ½” wide per hash mark. Multiple hash marks shall be sewn as one continuous piece. The thread material shall be comparable to Madeira Rayon #1137, and be embroidered onto a black twill background.

8. Training Pins and Unit Pins.
   a. Only one training pin or unit pin may be worn on the uniform at one time.

9. Training Pins. The training pins shall be positioned directly above the employee’s name plate.

10. S.W.A.T. Pins. If worn, they shall be positioned directly above the employee's name plate.

11. S.E.R.T. Pin. If worn, it shall be positioned directly above the employee’s name plate.

12. Employee of the Year Name Plate. This name plate may be used instead of the regular name plate.

13. K-9 Patch. The K-9 Patch shall be worn centered one-half inch below the Sheriff's patch on the left sleeve of the uniform shirts and jackets.

14. K-9 Pin. If worn, it shall be positioned directly above the employee’s name plate.

15. J-Team Pin. If worn, it shall be positioned directly above the employee’s name plate.

16. D.S.A. Pin. If worn, it shall be positioned directly above the employee’s name plate.

17. Sheriff’s Aides, Clerks, Community Service Officers, Rangers, Student Workers, and Specialists rockers. The "Aide", “Clerk”, “Lead Clerk”, “Community Service Officer”, “Ranger”, “Student Worker”, and “Specialist” rockers shall be worn on both sleeves, one-half inch below the Sheriff's patch.

18. Shooting Badge. As of January 1, 2013, shooting badges are no longer authorized for wear on the Sheriff’s Office Uniform.

19. Firearms Instructor Badge. As of July 01, 2019, Firearm Instructor Badges are no longer authorized for wear on the Sheriff’s Office Uniform.

20. “Serving Since” Name Plate Attachment. When worn, attaches to name plate via clutch posts and shall be worn directly below the name plate. The name plate shall be adjusted upwardly to accommodate the attachment.

21. Medal of Valor Ribbons. Will be worn above the left breast pocket centered under the Sheriff’s Badge. When appropriate, the silver or bronze valor award ribbon will be worn second to the gold. The bronze
will be worn second to the silver. When all three valor award ribbons have been earned, the gold valor award ribbon will be centered with the silver ribbon on its right and the bronze ribbon on its left. It shall be mandatory to wear the ribbon on the dress uniform and optional on the duty uniform.

22. Flag Pin. When worn, the pin shall be placed on the uniform shirt or jacket centered above the employee’s name plate and other pins. No other pins or devices shall be worn above the flag pin.

23. 10851 Award Pin. May be worn above the right pocket, centered above the name plate.

24. General Employee Badge Pin. All general employees will be issued a Badge Pin by Sheriff’s Training. The pin shall be worn on the employee’s lapel or above the breast pocket.

25. County Service Pins. Uniformed personnel shall wear the pin on the uniform shirt, in the center of the right pocket flap. General employees dressed in business attire may wear the pin on their jacket lapel.

26. Tie Bar. Brass tie bar to be worn on traditional style tie.

27. Badge Mourning Ribbon. Black mourning ribbons worn “in memoriam” of the death of an Office of the Sheriff employee or fellow peace officer shall be 1/4" wide and shall be worn on the badge from the top right to lower left on the badge (See illustration in Policy 1.05.75 at III. D.)
I. POLICY.
   A. In order to maintain a professional image and ensure Deputy Sheriffs carry only quality personal protection equipment, specific equipment standards are established.

II. DEFINITIONS.
   A. DEPUTY SHERIFF. As defined in Office of the Sheriff Policy Section 1.02.01 (II) (C) and 1.02.01 (II) (D).

III. GENERAL.
   A. LEATHER GEAR. All leather equipment shall be of good quality black leather, basketweave design, with exposed brass metalwork.

      1. Gun Belt. 2 1/4 inches wide, with brass buckle

      2. Holster. Level Three Retention with covered trigger and covered hammer. (Holsters purchased prior to March 14, 1994, will be "grandfathered"). Constructed of at least eight to nine ounce cowhide or a high quality, sturdy, synthetic leather, basket weave design, with exposed brass metalwork.

         a. All holsters must be equipped with a safety strap which has a reinforced inside thumb break with a durable metal snap. Shall be constructed so the weapon cannot be accidentally cocked while worn in the holster with the safety strap snapped. Safety straps shall be used.

         b. Shall be constructed and designed to fit the weapon carried. Holster will allow little or no free play while the weapon is seated. The end of the weapon's barrel will not protrude beyond the lowest portion of the holster. Must fit the standard Sam Browne belt on the lined portion snugly so the holster does not slide or move on the belt during withdrawal of the weapon.

         c. Shall completely, or nearly so, enclose, cover, and contain the weapon (except grips) as to protect the weapon against damage, foul weather, dust, grime, mud, accidental discharge, etc.
d. Shall be constructed so the trigger portion of the weapon is not exposed when the weapon is in place.

e. Other break front or front opening type holsters not listed may be approved for uniformed duty. Any such holster must meet Sheriff’s official standards and be approved by the Training Unit prior to use.

f. All duty holsters shall be maintained in proper repair and as equipped by manufacturer.

g. Deputies in plain clothes assignments shall use holsters shaped to fit the weapon.

h. If constructed of synthetic leather, it shall have the look and feel of genuine leather. Bianchi Accumold Elite and Safariland Safari-laminate are examples of acceptable synthetic leather.

i. Performance Requirements:

• The holster must retain the firearm with the safety strap unsnapped without manual assistance) while wearer performs the following job-related maneuvers:
  ➢ Seated in a patrol car (left and right front seats).
  ➢ Entering and exiting patrol car (left and right front seats).
  ➢ While jogging and running.
  ➢ Climbing a six-foot fence of any construction.
  ➢ Jumping from atop a six-foot fence.
  ➢ When wearer bends over at the waist, touching the ground.
  ➢ Moving from a standing position and dives to the ground, rolling at least completely while on the ground (both directions).
  ➢ Kneeling or squatting.

• Wearer must be able to withdraw the firearm while in a seated position in a patrol car without moving his or her upper body, except to grasp the firearm (wearer should not have to contort his or her upper body or raise his or her buttocks in order to reach and remove their firearm while seated).

• Wearer must be able to reholster the firearm with one hand in one movement (excludes snapping of safety strap).

• Wearer must be able to reach and draw the firearm with secondary hand.

• With the safety strap snapped, holster must retain the firearm while 75 pounds of direct pull is exerted on the firearm. Pull shall be at an approximate 90 degree angle from the holster forward, backward, up, and away from the body. Additionally, a torquing pressure is applied to the butt of the firearm in an effort to twist it loose. The safety strap must survive this “pulling test”
and remain snapped, and the holster is to remain on the belt without integral portions ripping or tearing loose.

3. Handcuff Case. Covered type, molded to fit the handcuffs.
4. Ammunition Case. Covered double magazine pouch with magazines or speed loader case with speed loaders.
6. Chemical Agent Holder. With or without cover and snap.
7. Key Strap. With or without skirt, or silent.

B. SHERIFF'S OFFICE ISSUED SAFETY EQUIPMENT.
1. Handcuffs. Smith and Wesson or Peerless. Other types are issued for some transportation details.
   a. A key for the handcuffs carried will be maintained by the Deputy at all times while on duty.
2. Baton. L.A.P.D. type, 26" wood, with black finish; PR-24 type 24" foam filled aluminum with side handle; the Monadnock expandable PR-24FX side handle baton; or the expandable straight baton type, 16"-26" steel, with a ball bearing or friction lock mechanism. Each requires a P.O.S.T. certified class before it may be carried.
3. Flashlight. Streamlight Model SL-20L, or any other comparable flashlight issued by the Training Division. Individually issued flashlights are considered mandatory safety equipment and shall be readily available by the employee during their tour of duty. Issued flashlights shall remain the property of the Office of the Sheriff.
4. Chemical Agents. Oleoresin Capsicum (OC) spray as issued. Deputies shall only carry and/or use the chemical agent for which they have received P.O.S.T. certified or Sheriff's Office authorized training.
5. Electronic Weapons. The TASER model X26E, X26P, or other issued by the Sheriff’s Office. All Deputy Sheriffs must complete the Office of the Sheriff POST certified TASER Operator Course prior to carrying the TASER on duty. After successful completion of the course, all Deputy Sheriffs assigned to any uniformed position shall carry the Office of the Sheriff issued TASER while on uniform duty. Personnel assigned to administrative positions (example: Administrative Deputies/Sergeants, Station House Commanders, etc.) who are not required to have regular or recurring enforcement contact with the public are exempt.
   a. All TASERS must be carried on the wearer’s duty belt, in an authorized holster worn on the non-dominant hand side of the body. The holster must be configured for draw with the non-dominant hand.
a. Deputies assigned to any uniformed position requiring regular and/or recurring public contact shall wear the Office of the Sheriff issued safety vest or a personal safety vest while on uniform duty.

b. Exceptions:
   - Marine Patrol Deputies while on active boat operations.
   - Any Deputy Sheriff at the discretion of his or her Division Commander.

c. Vests issued to Deputies as described above, irrespective of usage, shall be removed from service after five (5) years. Replacement safety vests will be coordinated by the Training Unit who will track the age of vests and notify Deputies, via their chain of command, when their vests approach five years length of service.

d. The Training Unit will issue vests to all Deputy Sheriffs. Deputy Sheriffs may wear their own safety vest while on duty in lieu of wearing an Office of the Sheriff issued safety vest.

e. Deputies wearing a personal vest must ensure that the vest is, at a minimum, the same protection level (determined by the National Institute of Justice) as those issued by the Office of the Sheriff: Level II.

f. Deputies electing to wear a personally owned vest will remove the vest from service as prescribed by the manufacturer.

g. Deputies that choose to purchase personal safety vests other than the vest issued by the Office of the Sheriff must place the order through the Training Unit. The Deputy will reimburse the Office of the Sheriff for the amount exceeding the cost of department-issued vests. Checks made payable to the Contra Costa County Office of the Sheriff must be delivered to the Training Unit before the vest is ordered. The Training Unit will maintain a list of authorized personal safety vests and vendors.

h. Investigators and Civil Unit Deputies shall wear the Sheriff's Office issued safety vest under circumstances set forth in the respective Division Manuals.

i. Detention Division shall maintain a pool of safety vests and sanitized cloth carriers at each work location for Deputies assigned to duties that involve public contact on a periodic basis.

7. Ballistic Steel Plate (2), Carrier, and Ballistic Helmet. As issued.

a. Sworn personnel assigned to the Patrol Division, Investigations Division, AC Transit, and Marine Patrol will be assigned an “Active Shooter” kit. This kit will contain; two ballistic steel plates (10x12), vest carrier, one Kevlar helmet, and a carrying case.

b. Once assigned this equipment, employees are required to have this equipment readily available to them during on-duty hours. For purposes of this policy, readily available means in near proximity for deployment to an active shooter or other applicable call for service.

c. The ballistic steel plate and carrier will be worn directly over the employees existing uniform of the day. It is intended to provide
additional protection to the employee and is not intended on replacing the employees existing ballistic safety vest.

d. This equipment is to be maintained in good working condition as prescribed by policy.

e. If the employee is transferred out of the above listed assignment, they are required to turn in the issued equipment to the Training Division for redistribution.

f. Special Operations Division Contract Cities are authorized to provide similar equipment to their employees. Contract City employees issued this equipment will be required to adhere to (b), (c), and (d) of the above mentioned policy (7).

IV. OPTIONAL EQUIPMENT.

A. Only the following optional equipment may be purchased by Deputies for use on duty.

1. Handcuffs. Extra handcuffs may be carried on the duty belt in an appropriate case, Smith & Wesson or Peerless.

2. Flashlight.
   a. Must be no larger than a typical 5 “C” or “D” cell flashlight.
   b. May be rechargeable.
   c. May be metal or high impact plastic.

3. Optional Leather Belt Equipment. Shall be of good quality black leather with basketweave design.
   a. Shotgun Shell Holder: Designed to hold three (3) or four (4) shells, with or without cover and snap.
   b. Audio Recorder Case: Designed to fit the type of recorder carried.
   c. Audio Recorder: No brand specified.
   d. Knife Case: Designed to fit the type of folding knife carried.
   e. Knife: Folding type knife with maximum of a 4-inch blade
   f. Knuckle Sap Gloves: Good quality plain black leather.
   g. Police Whistle: Good quality Thunderer Model or equivalent, black plastic or brass.
   h. Disposable Plastic Handcuffs: No brand specified.

4. Optional Holster and Weapon-mounted Flashlights
   a. The following black basket weave Level II Plus Retention holsters are authorized for weapon-mounted flashlights:
      • Safariland Model 6360 (mid-ride belt loop)
      • Safariland Model 6365 (1.5" belt drop)

      (The optional "Sentry" device is authorized to convert the above-mentioned holsters to Level III Plus Retention.)
b. Weapon-mounted flashlights from the following manufacturers, meeting these listed specifications, are authorized for on-duty use:
   • Manufactured by: Streamlight, Surefire, or Insight.
   • Must be powered by two CR123 batteries.
   • Must be a minimum of 80 lumens.
   • On/off switch must be ambidextrous.
   • Must fit authorized weapons without adapters.
   • Either L.E.D. or conventional bulbs are acceptable.
   • Remote pressure pad on/off switches are not authorized.
   • Laser sighting devices and on/off flashlight combinations are not authorized.

c. Deputies choosing to use a weapon-mounted flashlight shall also have an additional flashlight, meeting Office of the Sheriff specifications, available to them.

d. Deputies may not carry the weapon-light on their firearm, nor use the appropriate fitted holster, until they have qualified with each at the range.

e. Neither the weapon-light, nor the fitted holster, are issued by the Office of the Sheriff and may be acquired by the employee at his/her own cost.

f. It shall be the responsibility of the Assistant Patrol Commander to review this section on even-numbered years to ensure conformity with industry standards.

5. Optional Holster for Electronic Weapons
   a. Optional holster: Blade-Tech Taser Holster with Thumb Break and Tek Lok may be purchased by the Deputy Sheriff as an optional authorized holster. Carry requirements specified in section III apply.

V. PROCEDURE 1.
   A. STANDARDS, MAINTENANCE, AND REPLACEMENT.
      1. Standards. The equipment described above establishes the Office of the Sheriffs personal protection equipment standards. All Deputy Sheriffs shall ensure their equipment conforms to these standards.
      2. Maintenance. All leather goods shall be kept clean and polished. Most commercially available leather polish and wax are satisfactory for cleaning and conditioning leather.
         a. All metalwork will be kept clean and polished.
         b. All equipment will be kept in good condition. Leather goods bearing excessive wear or repairs are prohibited.
      3. Replacement. All leather goods issued by the department may be replaced after five years of service. Deputies wishing to have their leather goods replaced shall contact the Training Division and request new leather gear. Equipment will be replaced on a one-for-one exchange.
a. Replacement gear may be issued prior to the five-year service period under the following conditions:
   • Equipment which is severely damaged or broken in the performance of one’s duties.
   • Equipment which is defective.
   • Proper medical documentation supports earlier replacement.
   • At the discretion of the employee’s division commander.
I. POLICY.
   A. The image and morale of the Office of the Sheriff is enhanced when uniformed employees properly maintain their uniforms and equipment. Therefore, Class A Uniform inspections are required to ensure uniforms and personal safety equipment are properly maintained.

II. DEFINITIONS.
   A. Uniformed Employees. For the purpose of this Policy, the term "Uniformed Employees" includes all employees who receive a uniform allowance.
   B. Uniform Committee. The Uniform Committee is comprised of all levels of Office of the Sheriff personnel who set forth guidelines, for approval by the Sheriff, on the appearance and wearing of the Contra Costa County Office of the Sheriff Uniform. The Uniform Committee also coordinates activities pertaining to the Sheriff's Annual Inspection.

III. GENERAL.
   A. COMMITTEE COMPOSITION. The composition of the Uniform Committee is as follows:
      1. Undersheriff
      2. 1 Lieutenant
      3. 1 Sheriff's Specialist
      4. 2 Sergeants
      5. 3 Deputies
      6. The Deputy Sheriff's Association may assign a representative
      7. Other members assigned by the Sheriff
   B. INSPECTION REQUIREMENTS.
      1. All Uniformed employees are expected to maintain a Class A uniform, except for Sheriff's Dispatchers, Sheriff's Aides, Sheriff's Specialists,
Sheriff’s Ranger and Sheriff’s Clerk who will maintain their uniform as specified. This requirement is based on:

a. The desire of the Office of the Sheriff to present a professional image to the public.

b. The need of the Office of the Sheriff to ensure that all employees required to have a uniform can report to work in proper attire when needed, to include such times as:
   - County or Statewide emergencies which require all employees be on duty
   - Police funerals
   - Other specialized functions that dictate that all be in full uniform

c. The need to ensure that the employee's uniform/equipment is maintained in a clean serviceable condition.

2. Such inspections will be made to ensure compliance with all applicable policies concerning personal appearance, uniforms and equipment maintenance.

IV. PROCEDURE 1.

A. DIVISIONAL UNIFORM INSPECTIONS.

1. Each Division Commander or designee will conduct a formal inspection of all employees each year. This inspection is to be completed during the first quarter of each year.

   a. Formal inspections should be conducted by the Division Commander or his/her designee. However, the person conducting the inspection shall hold the rank of Lieutenant or higher.

   b. Division Commanders are encouraged to schedule more than the one required formal inspection each year.

2. Division Commanders will provide their inspection findings via the chain of command to the Sheriff/Undersheriff by the end of the third week in April of each year.

V. PROCEDURE 2.

A. SELECTION OF DIVISION REPRESENTATIVES.

1. Each Division Commander will select 10 percent of his/her employees to represent the Division at the Sheriff's Annual Inspection Ceremony, Sheriff’s Office Policy Section 1.05.22, Sheriff’s Annual Inspection Ceremony.

2. These representatives should be employees who have maintained the best uniform and equipment, and display a demeanor that enhances the professional image of the Office of the Sheriff.
3. Division Commanders will submit a list of their selected representatives to the Sheriff by the end of April each year.
   
a. The list should also reflect the fiscal impact on the Division (if any) based on overtime, replacement costs, etc., of employees attending the ceremony.

b. Division Commanders are encouraged to minimize overtime expenditures through advance scheduling, expanded use of volunteers, and short term reduction of non-critical programs and services.
I. POLICY.
   A. The Sheriff has established a respirator issuance and maintenance plan in compliance with Cal/OSHA requirements and POST guidelines to protect employees from airborne hazards or potentially hazardous materials during the performance of their duties.

II. DEFINITIONS.
   A. AIR PURIFYING RESPIRATOR. A unit with an air-purifying filter, cartridge or canister that removes specific air contaminants by passing ambient air through the air-purifying element. (For example: The MSA brand “Millennium” full-face respirator.)
   B. ATMOSPHERE-SUPPLYING RESPIRATOR. A respirator that supplies the user with breathing air from a source independent of the ambient atmosphere and includes supplied-air respirators (SARS).
   C. CANISTER OR CARTRIDGE. A container with a filter, absorbent, or catalyst, or combination of these items, which removes specific contaminants from the air that passes through the container.
   D. FILTER. A component used in respirators to remove solid or liquid aerosols from the air intake.
   E. FILTERING FACE PIECE. A negative pressure particulate respirator with a filter as an integral part of the face piece or with the entire face piece composed of the filtering medium often referred to as a dust mask.
   F. FIT TEST. Use of a protocol to quantitatively or qualitatively evaluate the fit of respirators on each individual who uses one. This protocol is also used to ensure proper filtering action of the respirator. Documentation shall be generated each time and records shall be filed and preserved by Contra Costa County Risk Management.
   G. PARTICULATE FILTERING RESPIRATOR (N-95). A half-face cloth respirator designed to remove specific airborne particulates from the ambient air.
III. GENERAL.
A. The Office of the Sheriff will issue respirators to all sworn personnel as well as non-sworn personnel whose potential job hazards require them. Most issued full-face respirators will be MSA brand “Millennium” or its equivalent except in situations where different respirators are required, as in the Forensic Services Division. In addition, the N-95 particulate respirator will be issued for the prevention of airborne communicable diseases. The issuance, fitting and maintenance of all respirators will follow POST guidelines as set forth in the Model Respiratory Program for Law Enforcement, issued in January 2004, which complies with Cal/OSHA Regulation 5144 and specifications of N.I.O.S.H.

IV. PROCEDURE 1.
A. GENERAL USE.
1. Only respiratory protective equipment authorized by Risk Management will be used.
2. No modifications or substitutions to equipment are permitted unless authorized by Risk Management.
3. Employees that have assigned respirators shall keep them available (at the ready).
4. A respirator shall be used only by the person to whom it is issued.
5. Individuals with facial hair, scars, or physical issues that prevent a tight seal of the respirator, as determined by a professional fit test, shall not wear the respirators.
6. The user shall inspect his/her respirator for damage before donning and after doffing the respirator.
7. Supervisors will ensure employee compliance and understanding of the Risk Management protocols and standard operating procedures on respirator use.
8. For personnel assigned to the Field Operations Bureau, respirators are to be used for Riot and Crowd Control events, where the use of chemical agents is possible.
9. Respirators shall not be used to enter any area that is designated as the “warm” (contamination reduction) zone or the exclusion (“hot” or “red”) zone of a hazardous materials incident or in any major event involving a weapon of mass destruction. They also should not be used to enter any areas that are known or suspected to be oxygen deficient, or that contain concentrations of hazardous substances that are unknown or are immediately dangerous to life or health (IDLH).

B. INSPECTION OF RESPIRATORS.
1. All respirators shall be inspected by the employee to whom it was assigned before each use including a positive and negative pressure check to ascertain a good seal, after each use and when cleaning and
storing in accordance with the manufacturer’s recommendations to ensure proper function.

C. RESPIRATOR USAGE.

1. Using a respirator may place a physiological burden on employees and should not be used if the ability to wear a respirator is compromised by a medical condition. Any employee whose medical status changes shall immediately advise their chain of command. A determination as to the ability to wear the respirator will then be made by Risk Management.

2. The P.O.S.T. Medical History Statement (POST 2-252), or its equivalent, shall be used for medical health clearance and respirator use authorization.

3. Risk Management shall establish and retain written information regarding medical evaluations, fit testing, and the respirator training program. This information will facilitate the administering of the program, assist in auditing the adequacy of the program, and provide a record of compliance with Federal or State OSHA requirements.

4. Further medical evaluations are required for any employee if:
   a. The employee reports signs or symptoms of difficulties that relate to the use of a respirator;
   b. A health care professional, supervisor, or the Office of the Sheriff Safety Coordinator/Designee determines the employee needs to be reevaluated;
   c. Observations made during fit testing and program evaluation indicate a need for reevaluation; or
   d. A change occurs in workplace conditions such as increased physical exertion, protective clothing or temperature change that may result in a substantial increase in the physiological burden placed on an employee.

V. PROCEDURE 2.

A. FORENSIC SERVICES EXCEPTION.

1. The Forensic Services Division requires special accreditation standards that may exceed the requirements of this policy. There is a special Forensic Services Division Respiratory Protection Program managed by the Chief of the Forensics Services Division. This Respiratory Protection Plan is regulated by California Code of Regulation Title 8, Section 5144.

B. OTHER EXCEPTIONS.

1. The Narcotics Enforcement Unit, Special Weapons and Tactics Team (S.W.A.T.), Mutual Aid Mobile Field Force (M.A.M.F.F.) and personnel from the Coroner’s Division may require special respiratory protective equipment depending on the nature of their operations. Any specialized equipment use shall comply with Title 8, California Code of Regulations, section 5144, and NIOSH Standards.
VI. PROCEDURE 3.

A. SERGEANTS RESPONSIBILITIES.

1. Supervising sergeants are responsible for overseeing the care, maintenance, replacement, repair, storage, protection, cleaning, and disinfecting of respirators in coordination with the Safety Services Manager.
I. POLICY.
   A. In conjunction with State standards, the Office of the Sheriff has developed an ergonomic program for the prevention and/or healing of job-related repetitive motion injuries.

II. DEFINITIONS.
   A. ERGONOMICS. An applied science dealing with the design and arrangement of equipment in the working environment to ensure that it interacts with employees with the utmost safety, comfort and efficiency.

III. GENERAL.
   A. The Office of the Sheriff has developed an ergonomic program that consists of a coordinated evaluation process for worker’s injuries, repetitive motion problems and other ergonomic problems that could potentially threaten an employee’s health. This program will include:
      1. Appropriate ergonomic training for Supervisors and employees;
      2. Evaluations and required modifications;
      3. Tracking requests and referrals for ergonomic assistance;
      4. Tracking the timeliness and cost of installing the required equipment;
      5. Training of employees in the use of the new or altered equipment;
      6. The reconditioning and redistributing of used ergonomic equipment.

IV. PROCEDURE 1.
   A. INJURY PREVENTION ERGONOMIC EVALUATIONS.
      1. Upon the request by an employee for an ergonomic accommodation, the employee’s Supervisor or Manager shall forward the request, on the approved form, to the Sheriff’s Safety Services Manager, who shall evaluate the request and recommend such action as is consistent with the Sheriff’s Injury and Illness Prevention Program Manual (I.I.P.P.), the
2. An Ergonomic Equipment Recommendation Form will be filled out by the Sheriff’s Safety Manager or an ergonomic evaluator contracted through the County Ergonomics Laboratory and forwarded through the Sheriff’s Safety Services Manager to the Supervisor or Manager of that work site. Once the Supervisor or Manager has approved the expenses involved, the Sheriff’s Safety Services Manager will order the necessary equipment.

3. This form will contain instructions for equipment or furniture return procedures should the employee relocate to another work site or terminate Office of the Sheriff employment.

4. The Supervisor or Manager and the employee involved must sign the Ergonomic Equipment Acknowledgement Form to acknowledge the receipt and installation of the equipment.

B. COMPLETION AND TRACKING OF EVALUATIONS.

1. All internal evaluations for preventative ergonomics will be retained by the Sheriff’s Safety Services Manager.

2. Evaluations for preventative ergonomics shall be completed as soon as reasonably possible based upon the circumstances following approval of the request.

3. The Supervisor or Manager will be notified of the cost of the equipment and/or furniture at the time the evaluation is completed.

C. DELIVERY AND INSTALLATION OF ERGONOMIC EQUIPMENT AND/OR FURNITURE.

1. The County Ergonomic Lab shall inform the Sheriff’s Safety Services Manager of large deliveries so that preparations can be made. All approved vendors contracted by the County are required to provide professional delivery and installation of ergonomic equipment and/or furniture.

2. Small items that do not require installation will normally be drop shipped directly to the Supervisor, Manager or employee who will then notify the Sheriff’s Safety Services Manager of the delivery.

3. Work site ergonomic modifications shall be coordinated among the site Supervisor or Manager, the Sheriff’s Safety Services Manager and the County General Services Division.

D. TRAINING.

1. The employee shall carefully review and follow the manufacturer’s usage instructions, and may receive further guidance from the Sheriff’s Safety Services Manager.

2. The Sheriff’s Safety Services Manager will fill out an Ergonomic Evaluation Request Form after the appropriate initiation period, if needed.
E. EQUIPMENT REUSE.

1. Upon leaving a job site or assignment, the Sheriff’s employee shall notify his or her Supervisor or Manager that he has ergonomic equipment or furniture that must be relocated or returned. The work site Supervisor or Manager shall notify the Sheriff’s Safety Services Manager and ensure that the equipment or furniture is returned to the County Ergonomic Coordinator. Such notification is also required if it is determined that the employee no longer requires the use of the ergonomic equipment or furniture.

V. PROCEDURE 2.

A. WORKERS COMPENSATION.

1. Workers Compensation related evaluations are handled by the County Risk Management Division. These evaluations are filled out by approved ergonomists at the County Ergonomics Laboratory, 2020 N. Broadway, Suite 203, Walnut Creek, (open 9 A.M. to 5 P.M. Monday through Friday). Call (925) 646-6041. FAX (925) 646-6042.

2. The County Ergonomic Laboratory will process all requested evaluations submitted by County Risk Management and the Sheriff’s Safety Services Manager. The lab maintains a supply of testing equipment for this purpose.

VI. SUPERVISORS RESPONSIBILITIES.

1. In the event the Supervisor or Manager of the work site becomes aware that employees are not using the prescribed ergonomic equipment in the manner prescribed, the Supervisor or Manager will take appropriate action to assure that the employee conforms to the prescribed usage.
I. POLICY.
   A. Specific provisions regarding the carrying, handling and use of firearms are established to provide direction and promote the safety of the public and employees.
   B. In the interest of public safety and the protection of Sheriff’s Office equipment, all personnel in possession of a handgun whether on or off duty, who need to secure a handgun in a department or personal vehicle shall do so in accordance with the law.

II. DEFINITIONS.
   A. SWORN PERSONNEL. This term applies to the Sheriff, the Undersheriff and all Deputies at every rank.
   B. SHERIFF’S OFFICE ANNUAL TRAINING. Refers to the Annual Mandated Advance Officers Training or Annual Mandated Administrative Training (Lieutenants and above), which includes demonstrating proficiency and proper use of firearms carried on duty as authorized by this policy and the Training Division.
   C. ANNUAL SHERIFF’S OFFICE FIREARMS QUALIFICATION. Refers to the scheduled annual Sheriff's Office Firearms Qualification.
   D. SUPPLEMENTAL FIREARMS EXERCISE. Refers to firearms exercises and testing utilized as remediation qualification, or secondary qualifications when changing duty firearms.
   E. TRANSITIONAL TRAINING. Refers to the two day semiautomatic firearms training for Deputy Sheriffs who are transitioning from revolvers to semiautomatics.
   F. SHERIFF’S OFFICE FUNCTIONAL PERFORMANCE TEST. Refers to the proficiency test required for Deputy Sheriffs to carry semiautomatic firearms.
III. GENERAL.

A. FIREARMS SAFETY. The handling of all firearms shall be in accordance with established safety practices. The following are some basic rules for firearm safety. Due to the nature of law enforcement, some rules may not apply in all situations and some situations may have no pre-established rules. In such situations, common sense and good judgment must prevail.

1. Check any firearm coming into your possession to determine if it is loaded.
2. Never point a firearm at anything or anyone you do not intend to shoot if and when necessary.
3. Never insert your finger into the trigger guard unless you are ready to shoot.
4. Never display a firearm unnecessarily or draw it in public except for inspections or official use. The promiscuous or frivolous display of a firearm is expressly forbidden, and will result in severe disciplinary sanctions, up to and including dismissal.
5. A shotgun or rifle shall be loaded and unloaded outside of buildings, unless being done in a controlled manner by Forensic Services Division staff for test purposes.
6. Gun clearing safety barrels shall be utilized at those sites maintaining them.
   a. Loading, unloading, or the performance of any function check of any firearm shall be performed at a gun clearing barrel.
7. While at the firearms range, all range rules shall apply. Complete firearms range procedures are in Office of the Sheriff Policy Section 1.07.34, Firearms Range Use Regulations.
8. Teach firearm safety in your home to your family. In accordance with the Children’s Firearm Accident Prevention Act of 1991, any person who keeps a loaded firearm within any premises where a child “is likely to gain access to the firearm,” may be fined or sent to prison (Penal Code Section 25100.)

B. USE OF FIREARMS.

1. Official use of firearms is described in Office of the Sheriff Policy Section 1.06.61, Use of Force.
2. Deputies are not required to carry firearms or other weapons while off duty.

C. STORAGE OF HANGUNS – ON OR OFF DUTY. Whenever personnel are in possession of a handgun whether on or off duty and there is a need to secure their firearm(s) in an unattended vehicle, the following shall be done:

1. Lock the handgun in a locked container that is permanently affixed to the vehicle’s interior and not in plain view.
2. This section does not apply to a peace officer during circumstances requiring immediate aid or action that are within the course of his or her official duties.

3. Secure Container Issuance: The Office of the Sheriff will issue one secure container (locked container) to each sworn member of the department for use in their department or personal vehicle.
   a. All issued locked containers are serialized. The Law Enforcement Training Center (LETC) is responsible for the inventory and issuance of the Hornady Tri-Point Lockbox/ Gun Safe for use by personnel for handgun storage in an unattended vehicle.
   b. The locked container shall remain the property of the Office of the Sheriff and shall not be modified, defaced, or in any way altered without prior approval from the LETC Division Commander.
   c. All issued locked containers must be returned to the Office of the Sheriff upon separation of employment or retirement.

4. Personnel may, at their own expense, purchase additional or different locked containers for personal vehicles. These locked containers must be a secure container that is fully enclosed and locked by a padlock, keylock, combination lock, or similar locking device. The term “locked container” does not include the utility or glove compartment of a motor vehicle (PC 16850).

D. SEMI-AUTOMATIC FIREARM AUTHORIZATION.
   1. All Sworn Personnel are required to successfully complete the Office of the Sheriff Functional Performance Test with an Office of the Sheriff Firearms Instructor.

      Deputy Sheriff Recruits and probationary Deputy Sheriffs will carry semiautomatic firearms as specified in Office of the Sheriff Policy Section 1.07.32, and upon graduation are required to successfully complete the Office of the Sheriff Functional Performance Test. Probationary Deputy Sheriffs who do not successfully complete the Office of the Sheriff Functional Performance Test with a semiautomatic weapon will be assigned to a non-firearms position until successful remediation or failure to do so per Section III F.

   2. Sworn Personnel carrying revolvers on duty will be required to have completed “Transitional Training,” as required by the Training Division, prior to being authorized to carry a semi-automatic pistol.

E. OFFICE OF THE SHERIFF FIREARMS TRAINING. No firearm shall be pointed at another person during training. Exceptions:
   1. The firearm used is a red, white or blue handled firearm that has been welded, or stripped so that it cannot be fired. These firearms will be issued by the Training Division or the Training Coordinator for each Division.
2. In a controlled classroom environment, where an Office of the Sheriff firearms instructor has personally inspected the firearm and will ensure that there is no live ammunition in the training area. Use of operational firearms during these training exercises will be approved by the Division Commander, S.W.A.T. Commander or the Training Division Commander prior to commencement of training.

F. OFFICE OF THE SHERIFF FIREARMS QUALIFICATION. All Sworn Personnel are required to successfully complete the Office of the Sheriff firearms qualifications within the time frame prescribed below and with the firearm(s) authorized for carrying while wearing the Office of the Sheriff prescribed standard uniform.

1. All Sworn Personnel assigned to a non-uniformed position which does not require the prescribed standard and/or Class "A" uniform must also qualify with the specific Office of the Sheriff authorized firearm carried while on duty in the non-uniformed positions.

2. All Sworn Personnel who change duty firearms to a different make, model, barrel length, or caliber must qualify at an Annual Office of the Sheriff Firearms Qualification or at a supplemental Firearms Exercise, with the new firearm before authorization will be given to carry the new firearm.

3. All Sworn Personnel must demonstrate firearms proficiency semiannually. Primary proficiency will be demonstrated during an Annual Office of the Sheriff Firearms Qualification, commonly referred to as the "Summer Qualification," and secondary proficiency will be demonstrated during the Office of the Sheriff Annual Firearms Qualification or the Functional Performance Test.

   a. The Workers Compensation Liaison and Leaves Director will advise the Training Division if a Deputy Sheriff’s disability or extended leave will cause him/her to miss the next cycle of either Advanced Officers Training or Annual Firearms Qualification, thereby placing the Deputy out of compliance with Office of the Sheriff Firearms Qualification Policy.

   b. The Training Division will forward a memo to the affected Deputy and his or her chain of command indicating that disability/extended leave will cause the Deputy to be out of compliance with the Office of the Sheriff Firearms Qualification Policy, placing them in a non-firearms carrying status.

   c. If the affected Deputy is in possession of an Office of the Sheriff owned firearm, the Training Division or Sheriff’s designee may request, via the Deputy’s Division Commander, that the firearm be returned until the Deputy is able to return to full duty and complete the firearms qualification.

   • Training will retain the firearm until the Deputy’s status is determined. If the Deputy returns to full duty, he/she will be re-issued the same firearm for qualification and duty use. If the Deputy resigns, retires or is terminated, the firearm will be placed back into inventory.
4. No Sworn Personnel shall carry any firearm during working hours until satisfactorily completing the Office of the Sheriff Annual Firearms qualification or the Functional Performance Test.

5. See Policy 1.07.37, “Shotguns and Patrol Rifles” for qualification with the authorized shotgun and patrol rifle.

G. FIREARMS QUALIFICATION REMEDIATION.

1. In the event a Deputy Sheriff fails to successfully complete either semi-annual firearms qualification with their handgun, the Deputy Sheriff will no longer be able to carry his or her firearm until he or she is able to successfully complete the qualification. The instructor will then immediately provide the Deputy Sheriff with a written notice to attend a supplemental Firearms Exercise within thirty days.
   a. A copy of this written notification will be forwarded to the Deputy Sheriff’s Division.

2. The Deputy Sheriff will have the responsibility of immediately notifying his/her Division Commander of the date and time of the rescheduled qualification.

3. Upon receipt of such notification, the Division Commander/Immediate Supervisor will make any schedule adjustments necessary to allow the Deputy Sheriff to attend the rescheduled Office of the Sheriff Supplemental Firearms Exercise.

4. Non-firearm carrying assignments, made pursuant to this Policy shall last no longer than thirty calendar days. During this period, the Deputy Sheriff may attend remediation training with the approval of his or her supervisor. Overtime is not authorized for remediation training.

5. Should a Deputy Sheriff fail to qualify by the end of a qualification day, the Deputy may be temporarily re-assigned until he or she successfully completes the qualification course; the Deputy may also be subject to Departmental action for failure to meet the minimum qualifications of a Deputy Sheriff.

6. The Training Division Commander will report all such cases to the appropriate Bureau Assistant Sheriff, via the chain of command, for appropriate action.
I. POLICY.

A. Standards for revolvers and semiautomatic firearms, as well as ammunition are established to promote safety. All Deputy Sheriffs shall be armed in accordance with this policy at all times when on duty, except when and where firearms are prohibited by policy. Deputy Sheriffs through the rank of Lieutenant shall not be issued more than one firearm at a time, unless there is a compelling organizational need. Captains and above shall be issued one firearm only.

II. DEFINITIONS.

A. DEPUTY SHERIFFS. For purposes of this policy, all Safety employee classifications to include: Deputy Sheriff, Sergeant, Lieutenant, Captain, Deputy Sheriff Criminalist, Deputy Sheriff Forensic Supervisor, Deputy Sheriff Forensic Manager, Chief of Forensics, Assistant Sheriff, Per Diem Deputy and Deputy Sheriff Reserve.

III. GENERAL.

A. All Deputy Sheriffs will be issued a semiautomatic firearm in accordance with this policy. This provision is applicable to both uniformed and non-uniformed assignments.

B. The .40 Cal. Sig Sauer P226R, P229R and the P239 are the standard issue Office of the Sheriff side arms. Sergeants or Deputy Sheriffs assigned to investigative positions may be issued a .40 Cal. P239. The use of the P239 is for the duration of the assignment only. Deputies issued an Office of the Sheriff owned firearm shall be required to carry it as their on-duty firearm whenever an Office of the Sheriff uniform with full leather is required.

C. All firearms used on duty will remain in their normal factory assembled condition. No firearm will be modified in any manner, except that different authorized grips and/or night sights may be installed. An authorized weapon-mounted flashlight may also be used. This includes personally owned firearms.
IV. ON DUTY IN UNIFORM.

A. This section is applicable to on-duty Deputy Sheriffs wearing all authorized uniforms (Class A, B, C, D and specialty uniforms), except Class E attire.

B. In place of the standard issue semi-automatic firearm, and at a Deputy’s own expense, a uniformed Deputy may elect to carry on duty any revolver or semi-automatic firearm listed in subsection “1.” or “2.” below.

1. Revolver Specifications.
   a. Make: Smith & Wesson, Colt or Ruger.
   b. Type: Revolver, 6 shot, exposed hammer
   c. Caliber: .38 Special or .357 magnum.
   d. Barrel: 4 or 6 inch barrel length.
   e. Sights: Fixed or adjustable.
   f. Finish: Blued, Parkerized, stainless steel, titanium (Scandium) alloy or aluminum alloy.
   g. Grips: Black or Brown - Wood, hard rubber or hard plastic, without thumb rest.

2. Semiautomatic Firearm Specifications.
   a. Make: Sig Sauer, Glock (Gen3/Gen4/Gen5), or Heckler and Koch pistols with the following characteristics:
   b. Type: Semiautomatic Pistol.
   c. Caliber: 9mm, .40 Cal., or .45 Auto.
   d. Barrel: Not longer than 5 inches and does not protrude past the end of the slide.
   e. Sights: Fixed or adjustable, or replaceable night sights.
   f. Grips: Black or Brown - Wood, hard rubber or hard plastic, without thumb rest.
   g. Finish: Stainless, blue, black, or two-tone stainless over blue or black.
   h. Trigger:
      • DA/SA (Double-action/single-action)
      • DAO (double-action only)
      • DAK (Sigarms)
      • LEM (Heckler and Koch)
      • Safe Action (Glock)
   i. Decocking Lever: Spring-loaded mechanism that safely drops the hammer and leaves the pistol ready to fire.
   j. The following characteristics are specifically NOT authorized:
• Threaded barrels;
• Laser sighting devices of any kind;
• Barrel weights or barrel compensators;
• SAO (Single-action only) trigger or any variants;
• Squeeze-cocking pistols or any variants.

V. ON DUTY IN PLAINCLOTHES
A. This section is applicable to all on-duty Deputy Sheriffs wearing attire other than their uniforms, and includes business attire, Class E attire, and undercover plainclothes.
B. Deputy Sheriffs working plainclothes assignments shall carry, or have in their immediate presence at all times, an Office of the Sheriff authorized firearm while on duty.
C. Deputies in plainclothes may carry any weapon authorized for carry by on-duty uniformed Deputies. Alternatively, Deputies in plainclothes are authorized to carry the following firearms:

1. Smith and Wesson, Colt or Ruger .38+P Cal. or .357 Cal. J-Frame models with a barrel length of 3” or less:
   a. Finished in satin, stainless, matte, blue, or black;
   b. Material: steel, aluminum, scandium, titanium, or alloy;
   c. Hammer may be exposed, enclosed, or shrouded;
   d. Variants equipped with grip-mounted laser sight are not authorized; and
   e. Only those .38 caliber models rated for +P ammunition shall be used as a plainclothes firearm.

2. Heckler & Koch P2000 SK:
   a. 9mm or .40 S&W caliber

3. Sig Sauer P230 or P232.
   a. .380 Caliber.

4. Glock compact or subcompact
   a. .380, 9mm, .40 or .45 caliber

VI. SUPPLEMENTAL FIREARMS
A. All Deputies carrying an authorized side arm are authorized, at their own expense, to carry a supplemental firearm.
B. Only those firearms listed immediately above in Section V(C)1, 2, or 3 or 4 for plainclothes carry are authorized as supplemental firearms.
C. Supplemental firearms (also referred to as “back-up” or “secondary” firearms) are to be carried concealed, and in such a manner to prevent unintentional cocking, discharge, or loss of physical control.
VII. DEPUTIES CARRYING PERSONALLY OWNED FIREARMS

A. Deputies in a uniformed assignment who choose to carry an authorized, privately owned firearm are not entitled to an Office of the Sheriff issued firearm. The Deputy Sheriff shall return any Office of the Sheriff issued firearm to the Training Division within thirty days.

B. Should a Deputy Sheriff elect to discontinue the use of a privately owned firearm as his/her on-duty firearm, an Office of the Sheriff owned semiautomatic firearm will be issued to the Deputy.

VIII. AUTHORIZED WEAPONS

A. Only those firearms (handguns, shotguns, rifles, etc.) issued by the Office of the Sheriff, and those firearms specifically permitted under this policy to be carried in place of an issued firearm, are authorized by this policy. Only such ammunition as is specifically permitted under this policy is authorized.

B. Deputies, either on duty or off duty, shall not carry any firearm, except those authorized by this policy, while in County facilities or while operating a County vehicle. This does not restrict Deputy Sheriffs from handling other firearms as part of their official duties. Administrative and Supervisory personnel may be held civilly liable for failure to enforce orders prohibiting the carrying of unauthorized firearms.

IX. S.W.A.T. TEAM

A. The Office of the Sheriff’s S.W.A.T. Team shall only utilize such handguns, shotguns, rifles, ammunition or automatic firearms as are issued by the Office of the Sheriff while performing S.W.A.T. training and operations.

X. SERVICE AMMUNITION SPECIFICATIONS

A. Ammunition used on duty will be new factory assembled commercial ammunition.

B. Deputies may carry the ammunition issued by the Training Division or may choose to purchase and carry (at no cost to the Sheriff's Office) other authorized ammunition listed in this section.

C. Ammunition carried on duty should be replaced annually.

D. Ammunition Specifications. On duty, Deputy Sheriffs will use one of the following types of ammunition specifically listed for the type of revolver or semiautomatic carried:

1. Lightweight frame revolvers (5 shot, alloy frame, etc.):
   a. Bullet caliber: .38 special.
   b. Bullet weight: 125 to 158 grain.
   c. Bullet Configuration: Lead portion of bullet shall be of solid construction and not contain shot pellets, plungers or be segmented. Authorized types:
- Jacketed Hollow Point (JHP)
- Semi-Jacketed Hollow Point (SJHP)
- Jacketed Soft Point (JSP)
- Load limitations: All loads including +P and +P+.
  ➢ Exception: The Smith and Wesson Company has advised that their .38 Cal. Revolvers without a model number on the frame by the cylinder are not safe to use with +P loads. Therefore, +P and +P+ are not authorized for those revolvers unless otherwise specified by the manufacturer.

2. Heavyweight frame revolvers: Bullet caliber: .38 special
   a. Bullet weight: 125 to 158 grain.
   b. Bullet Configuration: Same as for lightweight frame revolvers listed above.
      • Load limitation: All loads including +P and +P+.
        ➢ Exception: The S&W company has advised their .38 cal. revolvers without a model number on the frame by the cylinder are not safe to use with +P loads or +P+ loads. Therefore, +P and +P+ are not authorized for those revolvers, unless otherwise specified by the manufacturer.

3. .357 caliber revolvers:
   a. Bullet caliber: .357 magnum or .38 special.
   b. Bullet weight: 125 to 158 grain.
   c. All other specifications are the same as for the heavyweight revolvers listed in "2" above.

4. 9mm Semiautomatic Firearms:
   a. Bullet caliber: 9mm Luger (Parabellum) Bullet weight: 115 grain to 147 grain.
   b. Bullet Configuration: Jacketed Hollow Point.

5. .380 Cal. Semiautomatic Firearms: Bullet caliber: .380
   a. Bullet weight: 85 to 105 grain.
   b. Bullet Configuration: Jacketed Hollow Point.

6. .40 Cal. Semiautomatic Firearms:
   a. Bullet caliber: .40 Cal.
   b. Bullet weight: 155 grain to 180 grain.
   c. Bullet Configuration: Jacketed Hollow Point.

7. .45 Auto Semiautomatic Firearms: Bullet caliber: .45 Auto
   a. Bullet weight: 185 grain to 230 grain.
b. Bullet Configuration: Jacketed Hollow Point.

E. The Training Division will distribute the following ammunition at Office of the Sheriff Firearms Advance Officer's Training, Functional Performance Test, and Optional Firearms Exercise:

1. 9mm Luger, .40 Cal., 45 Auto, or .380 caliber practice ammunition.
2. 9mm Luger, .40 Cal., 45 Auto, or .380 caliber initial issue - 50 rounds.
3. .38 special practice ammunition.
4. .38 special initial issue - 18 rounds.

XI. PROCEDURE 1

A. TRAINING DIVISION RESPONSIBILITIES.

1. The Training Division will maintain a current listing of firearm makes and model numbers that meet the requirements specified in this policy.
2. Firearm Issuance. Training will issue firearms to all Deputy Sheriffs who choose to carry an Office of the Sheriff owned firearm on duty.
3. Inventory. Training shall maintain a record of the make, model, serial number and current location of all Sheriff's firearms used on duty.
4. Seized Firearms. Training is responsible for converting seized firearms to County property for use by the Office of the Sheriff. All converted firearms, except those maintained in the Forensic Services Division firearms collection, shall be recorded on the Office of the Sheriff inventory. Seized firearms may not be purchased by retiring Deputy Sheriffs. Refer to Office of the Sheriff Policy Section 1.07.33, Purchase of Office of the Sheriff Firearms.
5. Serviceability and Maintenance. Training will ensure that all Office of the Sheriff firearms are inspected for safety and serviceability prior to issuance. The inspection will be performed by an authorized service facility or an authorized armorer.
   a. All repairs to Office of the Sheriff owned firearms shall be contracted to an authorized service facility or an authorized armorer by the Unit. Upon request, Deputy Sheriffs may utilize the Office of the Sheriff contract to inspect or repair personally owned firearms. The cost of the service will be borne by the Deputy.

XII. PROCEDURE 2.

A. DEPUTY SHERIFFS RESPONSIBILITIES.

1. Issuance. Deputy Sheriffs choosing to carry an Office of the Sheriff owned firearm on duty shall contact the Training Division for issuance.
2. Personally owned Firearms. Deputy Sheriffs may use their own firearm while on duty. All personal firearms used as a duty firearm shall conform to Office of the Sheriff standards. Personally owned firearms shall be purchased by the Deputy at no cost to the Office of the Sheriff. The County will not reimburse or replace personally owned firearms.
3. Loss or Theft. Any loss of an Office of the Sheriff owned firearm shall be compensated for by the Deputy unless the loss occurs in the line of duty. A written report shall be made to the appropriate Bureau Assistant Sheriff as soon as possible. If the firearm is stolen, the appropriate crime report must also be submitted.

5. Care and Maintenance.

a. Firearms shall be maintained in a clean operating condition at all times.

b. Under no circumstances will Deputy Sheriffs have any Office of the Sheriff's owned firearm altered or modified, except as permitted in General “C”.

c. Office of the Sheriff owned firearms in need of repair will be turned in to the Training Division for servicing.

d. Personally owned firearms in need of repair are the responsibility of the owner. Repairs to personally owned firearms may be serviced by the Office of the Sheriff authorized service facility or armorer at the owner's expense, or the Deputy Sheriff shall provide a "certificate of inspection" to the Training Division Commander.

e. Personally owned firearms shall be subject to inspection by the Office of the Sheriff authorized service facility or armorer during annual training and/or summer qualifications.

• The Training Division will issue a replacement semiautomatic firearm when needed as appropriate.
XIII. PROCEDURE 3.

A. DIVISION COMMANDERS’ RESPONSIBILITY. Inspections of Deputy Sheriffs’ firearms shall be conducted by Division Commanders or their designated representatives in conjunction with employee evaluations. The inspection will include:

1. Cleanliness of the firearm
2. Conformance to Sheriff's Office standards
3. Approved ammunition
I. POLICY.
   A. Purchase and sale of weapons systems must be approved and accomplished from a single location in order to maintain accountability. Therefore, the Administrative Services Bureau Assistant Sheriff will maintain a centralized system to approve the purchase and sale of all weapons systems for the Office of the Sheriff.
   B. Ownership of Office of the Sheriff owned firearms may be transferred to a Deputy Sheriff only as prescribed by law with specific approval of the Sheriff.

II. DEFINITIONS.
   A. DEPUTY SHERIFF. All sworn personnel, for the purposes of this policy.
   B. HONORABLY RETIRED. Includes all peace officers who have qualified for, and have accepted, a service or disability retirement. Honorably Retired does not include an officer who has agreed to a service or disability retirement in lieu of termination.
   C. WEAPONS SYSTEMS. Firearms or other devices that are authorized for deployment as described in Sheriff’s Policies and Procedures 1.07.32, Authorized Firearms and Ammunition.
   D. ARMORER LINK. A firearm, equipment, and training management database.

III. GENERAL.
   A. Sheriff’s personnel shall forward all requests to purchase weapons systems via the chain of command to the Administrative Services Bureau Assistant Sheriff for approval. This includes purchases made using open purchase orders.
   B. The Fiscal Unit shall direct vendors to deliver all weapons systems to the Sheriff’s Range.
   C. All purchases and sales shall comply with State and Federal laws regulating weapons systems. All transactions and appropriate paperwork shall be filled out consistent with applicable laws, with the specific approval of the Sheriff, or his designee.
D. Upon delivery of weapons systems and before dispersal to the applicable divisions/employee, authorized Training Division personnel shall affix an Armorer Link asset label to each weapon and enter the weapons system information into the Armorer Link database. The information entered shall include the division where assigned, the serial number, Armorer Link asset tag number, type of weapon, caliber or gauge as applicable, the purchase order number used, the date placed in service, and the name of the grant used to purchase the item if applicable. Data entry will occur in a timely manner to ensure an accurate inventory. Inventory control shall conform with Office of the Sheriff Policy 1.07.12 Inventory Control.

E. The Office of the Sheriff may sell a duty weapon to an honorably retiring Deputy Sheriff.

1. The retiring Deputy must petition, prior to retirement, the Sheriff or his/her designee for permission to purchase the firearm(s) assigned to them at the time of retirement. Petitions to purchase must be made via written memorandum through the employee’s chain of command a minimum of thirty (30) days prior to the employee’s anticipated retirement date.

2. If the petition is granted, the firearm(s) will be sold for one dollar ($1.00) each.

3. Authorized Sheriff’s Training Division personnel will process all firearm transfer transactions.

4. Upon approval for an employee to purchase his/her service weapon(s), payment for said weapon(s) will be made to an authorized Training Division employee. Once payment has been received, the Training Division Manager will update the Armorer Link information system and change the ownership record of the firearm(s) in the California Department of Justice Automated Firearms System (AFS) to ensure firearm inventory and ownership accuracy. The Training Division Manager will ensure the completed change of ownership is placed in the employee’s personnel file.
I. POLICY.
   A. The Office of the Sheriff Firearms Range is maintained for use by Deputy Sheriffs and authorized outside agencies. The Firearms Range is a privilege, subject to safety procedures and administrative controls. The use of the Firearms Range and classroom is restricted to active Office of the Sheriff personnel and those with a current contract.

II. DEFINITIONS.
   A. RANGE AGREEMENT. A written signed document is required of all outside agencies that contract for use of the firearms range. The range agreement will contain terms and conditions for use of the range and will be renewed annually.

III. GENERAL.
   A. It is the responsibility of individual Deputies/Officers to know the rules and policies concerning use of the Range. Violations of these rules and policies are subject to corrective action by the individual Deputy/Officer’s chain of command.
   
   B. The Rangemaster shall be empowered to enforce all rules and regulations concerning Range operation and use. Users of the Range must conform to the Range Rules and adhere to the directions of the Rangemaster.
      1. The Marsh Creek Detention Facility Sergeant shall be responsible for enforcement of Range policy and procedure when the Rangemaster is not present.
      2. The Rangemaster may inspect any weapon or ammunition to insure conformance to safety standards.
      3. The final determination regarding the use of a specific type of weapon or ammunition rests with the Rangemaster.
   
   C. WHO MAY USE THE RANGE. The following individuals and groups are authorized to use the Office of the Sheriff Firearms Range:
      1. Office of the Sheriff Deputies;
2. Guests of Office of the Sheriff Deputies;
3. Members of other law enforcement organizations which have a current Range Contract on file with the Office of the Sheriff;
4. Quasi-law enforcement personnel meeting the above criteria who have been approved by the Sheriff; and
5. Special guests approved by the Sheriff or his designee.
6. Honorably retired Office of the Sheriff Deputies who have made prior arrangements with the Rangemaster.

D. RULES FOR USE OF RANGE. The following rules apply to all individuals and groups using the Office of the Sheriff Firearms Range:

1. Never fewer than two (2) persons will be allowed to use the Range when the Sheriff’s Rangemaster is not present. (Shooter plus a responsible person, e.g. wife/husband, friend or other adult capable of rendering first aid or seeking help in the event of an emergency.)
2. All range users shall wear ear and eye protection whether they are actually shooting or coaching.
   a. All outside agencies will be required to provide their personnel with appropriate ear and eye protection.
   b. Failure to use ear and eye protectors will be deemed cause to cancel Range privileges and any agreement thereto.
3. Groups from outside agencies must have one person in charge to act as Rangemaster. Authorization as Rangemaster may be done via letter from their agency or by displaying a current Certified Police Firearms Instructor's Certificate. All Certificates are to be presented to the Office of the Sheriff Rangemaster prior to any confirmation of use of the Range.
4. Groups from outside agencies must also submit a lesson/training plan to the Sheriff’s Rangemaster for review prior to confirmation of use.
5. Inexperienced shooters must be under the direction and supervision of an experienced shooter. (Experience met through qualification.) Shooting is permitted only when the experienced shooter is present.
6. Shooting is allowed only where permitted and only at targets.
   a. Targets will be furnished to Office of the Sheriff's personnel only.
   b. All other County agencies and outside agencies must provide their own targets and overlays, or purchase them from the Office of the Sheriff.
7. The Range grounds, facilities, or equipment shall not be damaged. Report any damage or anything in need of repair or maintenance to the Sheriff’s Rangemaster or Sheriff's personnel at the Marsh Creek Detention Facility Office.
8. Upon completion of shooting, all shooters must leave the Range in a neat, orderly condition. This includes:
a. Inspecting the Range.
b. Policing the grounds (empty cartridges, targets, paper, etc.).
c. Putting supplies away and locking buildings.
d. Returning all keys to Marsh Creek Detention Facility office and signing out.

E. RANGE HOURS/SCHEDULING USE OF RANGE.
1. The Sheriff’s Range is available for use Monday through Friday: 0800 - 2200 hours, and Saturdays 0900-1600, Sundays and Holidays: 1000 – 1600 hours unless prior approval has been obtained from the Training Division Lieutenant.
2. Weekend scheduling is reserved for Deputies of the Office of the Sheriff and organized groups scheduled by the Sheriff's Rangemaster.
3. Office of the Sheriff personnel shall contact the Sheriff’s Rangemaster at [Redacted] or the Marsh Creek Detention Facility Office at [Redacted] during hours the Sheriff’s Rangemaster is not present, to ascertain if the Range is available for their use.
4. Authorization to shoot will be denied if in conflict with prior reservations. Before utilizing the Range, Sheriff's personnel must wait until the Range has been vacated by persons with prior reservations.

F. EQUIPMENT.
1. Only Office of the Sheriff authorized handguns or otherwise legal firearms may be fired on the Range (except those listed as “Restricted” below).
2. Holsters will be used for all handguns.

G. RESTRICTED WEAPONS AND AMMUNITION.
1. No rifles larger than .22 caliber (Exception: S.W.A.T. Team exercises or Crime Lab or others authorized to use the Range with prior approval from the Sheriff’s Rangemaster or the Training Unit.)
   a. Approved rifles and shotguns are restricted for use on Ranges 5 and 6 only without prior approval from the Sheriff’s Rangemaster or the Training Unit.
   b. The use of rimfire ammunition (22 long rifle, etc.) is prohibited on ranges 1 and 4.
2. No automatic weapons of any kind (Exception: S.W.A.T. Team) unless prior approval is obtained from the Sheriff’s Rangemaster or Training Unit.
3. No armor piercing ammunition.
4. No tracer ammunition.

IV. PROCEDURE 1.
A. SIGN IN/REGISTRATION. Prior to the start of shooting, all shooters, including Marsh Creek Detention Facility personnel, must sign in, complete a registration
form at the Sheriff’s Rangemaster’s Office, and ensure the Sheriff’s Rangemaster is aware of their presence.

1. Shooters using the Range facilities when the Sheriff’s Rangemaster is not present, must sign in at the Marsh Creek Detention Facility office at which time they will be issued the keys to the Range, telephone and restrooms. A “Group Leader” must be identified on the Range Use Roster. The Group Leader will be responsible for members of his/her group. A second Group Leader will be required for groups with more than five shooters. At no time should there be more than five shooters per Group Leader. For larger organized groups, a Rangemaster must be identified and must account for all individuals shooting.

2. During scheduled Office of the Sheriff classes or competition, registration may be taken by officials at the Range.

3. Sheriff’s personnel will be provided a cardboard target and a paper target overlay by the Sheriff’s Rangemaster. Sheriff’s personnel may obtain targets from the target storage area when the Sheriff’s Rangemaster is not present using keys issued from the Marsh Creek Detention Facility office. If the cardboard target is still useable at the end of the shoot, it should be returned to the Range equipment room.

4. The Training Unit will be responsible for providing necessary forms, auditing of completed forms and recommendation for any necessary changes.
I. POLICY.
   A. No firearm shall be carried by a general employee during the performance of Office of the Sheriff duties without possession of the appropriate legal authority and express written consent by the Sheriff or designee.

II. DEFINITIONS.
   A. LEGAL AUTHORITY. A valid endorsement by an employer/agency certifying an employee to carry a concealed weapon, or possession of a valid California Concealed Weapons License.

III. GENERAL.
   A. PURPOSE. Procedures regarding the carrying and handling of any firearm by general employees are established to provide direction and to promote the safety of the public and Office of the Sheriff personnel.
   B. FIREARM APPLICATION. All policies and procedures not exclusive to Deputies pertaining to firearms, weapons and ammunition shall also apply to general employees in accordance with Sheriff’s Office Policy Section 1.07.12, Firearms Safety and Qualification and Section 1.07.13, Authorized Firearms and Ammunition.
   C. CHANGES IN JOB ASSIGNMENTS. Any changes in job assignments and/or duties will necessitate a new request for authorization to carry a concealed weapon during working hours.
   D. UNAPPROVED REQUESTS. The Sheriff’s disposition is final, however, should circumstances change, new requests will be considered.
   E. SHERIFF’S CONSENT. General employees possessing a CCW may, upon application and the written consent of the Sheriff or his designee, carry a weapon specified in the CCW while on duty. While it is the policy of this Office that general employees, including those with CCW’s, may not carry weapons with them while on duty, the Sheriff will exercise his discretion to grant such permission when warranted. In exercising his discretion, the Sheriff will be guided by factors such as: (a) whether the general employee is an honorably
retired peace officer or Federal Agent with an articulable need to carry at work, (b) whether the general employee’s duties present hazards warranting the carrying of a weapon for self-defense, and/or (c) such other matters as the Sheriff may determine, in his discretion, warrant the approval of an exception to the policy. Any grant of authority under this paragraph shall not vest any right in the employee, and the Sheriff may, without a hearing, revoke such authority at any time.

IV. PROCEDURE 1.
A. REQUEST FOR AUTHORIZATION.
   1. Any general employee who maintains legal authority to carry a concealed firearm and feels a need to do so during working hours must submit a written request through the chain of command to the Sheriff or designee.
      a. The request should explain the specific need or circumstances for carrying the weapon during the performance of duty.
      b. A copy of the legal authorization to carry a concealed firearm must accompany the written request.
   2. Each level in the chain of command will submit a personal recommendation along with the original request for review by the Sheriff.
   3. The Sheriff will approve, deny or return the request for additional information, via the chain of command.

V. PROCEDURE 2.
A. DIVISION COMMANDER’S RESPONSIBILITIES.
   1. Denials and requests for additional information will be routed through the requesting employee’s Division Commander.
   2. Approvals will be returned to the Division Commander, who will forward a copy to Internal Affairs.

VI. PROCEDURE 3.
A. INTERNAL AFFAIRS RESPONSIBILITIES.
   1. Internal Affairs will ensure the approved general applicants receive the appropriate training to ensure compliance with Office of the Sheriff’s firearm qualification requirements. Carrying a concealed firearm is prohibited until qualification requirements have been met.
   2. Annual reviews of approved requests will be performed by the Concealed Carry Weapons Unit / Internal Affairs for any discrepancies or recommended changes.

7. **REVISION DATE:** 2-16-2009

8. **CLEARANCE:** Office of the Sheriff

9. **CHAPTER:** Equipment and Property Management

10. **SUBJECT:** Flying Armed
I. POLICY.

A. The Office of the Sheriff recognizes the need for a variety of force options for sworn members. Rifles and shotguns are two additional options for deputies to use in the field following the guidelines of the Use of Force Policy. This policy is established in order to provide guidance regarding the carrying, handling, deployment and use of rifles and shotguns. The intent of the policy is to promote the safety of both the public and employees.

II. GENERAL INFORMATION.

A. AUTHORIZED WEAPONS AND MUNITIONS.

1. The authorized AR-15 series rifles are as follows:

   a. Bushmaster
   b. Colt
   c. Adams Arms
   d. Daniel Defense
   e. Del-Ton
   f. Fabrique Nationale d’Herstal (FN)
   g. Land Warfare Resources Corporation (LWRC)
   h. Smith and Wesson
   i. Stag Arms

   The rifle will have a standard or adjustable stock. The rifle will have a minimum barrel length of 16 inches as defined by the manufacturer or California Law (PC 33210). The rifle will be of .223 caliber/5.56 mm.
The authorized duty round for the rifle is the .223 / 5.56 mm caliber, 53 to 75 grain bullet. Authorized duty rounds will be from a manufacturer approved by the Sheriff’s Training Division and duty rounds will be obtained from Sheriff’s Training.

2. The authorized shotgun is a Remington brand, model 870, pump-action, 12 gauge, 18-inch barrel, standard stock, bead and/or rifle sighting system.

Although this particular weapon is capable of firing a multitude of different munitions for different applications, the only munitions authorized for duty use are the 12-gauge (8 or 9-pellet) 00 buckshot round and the 12-gauge rifled slug.

B. TRAINING.

1. Deputy Sheriffs shall successfully complete a basic course of instruction in the deployment and use of the rifle prior to being authorized to carry and/or deploy the patrol rifle during their shift.

2. Training and qualification with the rifle will occur after the initial training class. Employees who deploy the rifle will have qualified within the last twelve months with the rifle. Employees who have not qualified with the rifle in the last twelve months will not deploy the weapon.
   a. Recertification training with the rifle will occur within a twenty-four month cycle, and will consist of four hours of instruction on the rifle. Recertification training will also include qualification with the rifle.
   b. Copies of completed training rosters will be maintained in the Deputy’s division training file.
   c. The original training roster will be forwarded to the Sheriff’s Training Unit.

3. The Assistant Division Commander of a Division authorized to deploy rifles is responsible for the maintenance of a roster identifying the date each deputy completed the Basic Rifle Course and their current qualification date. The roster will be reviewed by division managers on a monthly basis.

4. Deputy Sheriffs will train annually with the shotgun. The training will consist of range instruction by a certified range instructor.
   a. The training will include a demonstration and practical application on the range.

C. USE AND DEPLOYMENT.

1. When properly deployed, the rifle and shotgun provide an enhanced tactical resource, with each of them filling a different tactical role.
2. The rifle and shotgun can be more effective than a sidearm when dealing with certain critical and life threatening situations, to include overcoming heavily armed resistance, achieving containment and saving lives. Such situations include, but are not limited to:
   a. Violent and armed suspects who are wearing body armor.
   b. Subjects armed with high capacity automatic or semi-automatic weapons.
   c. Multiple armed suspects.

3. All usages of the rifle and shotgun shall be in accordance with the Department “Use of Force” Policy 1.06.61, and the “Firearms Safety and Qualification” Policy 1.07.31.
   a. When not in use, the rifle and shotgun shall be secured in the designated armory. Weapons shall not be stored in vehicles for extended periods (typically overnight).

D. DOCUMENTATION.
1. Any incident involving the use of the rifle or shotgun will be fully documented in a Department report, and will include the following specific information:
   a. The name of the employee deploying the weapon.
   b. Circumstances surrounding the deployment of the weapon.
   c. Number of rounds fired.
   d. Distance between the suspect and the employee deploying the weapon.
   e. Area of suspect’s body struck by the fired rounds.
   f. Injuries sustained by the suspect and subsequent medical treatment.
   g. Any collateral damage (unintended injured person, property damage, etc.)

E. MAINTENANCE AND CARE OF THE RIFLE AND SHOTGUN.
1. Rifles will be maintained according to the guidelines of the manufacturer and common firearm maintenance procedures.
   a. In the event a rifle becomes wet or soiled, the operator shall ensure that rifle is cleaned and lubricated.
   b. Managers are responsible for ensuring that assigned rifles are cleaned and lubricated minimally at least at each shift change.
   c. Managers are responsible for reporting completed maintenance to the Division’s designee.
   d. Each Division will maintain a roster of routine maintenance that is
reported as having been completed by all Division Managers.

e. Annually, all rifles will be inspected, fired, and serviced by the designated armorer.

f. Rifles that require service beyond the capabilities of Department Armorers will be returned to the manufacturer or their designee for services.

2. Rifles or shotguns found to be defective shall be immediately forwarded to the Training Division armory for repair and replacement.

3. Rifles will be maintained in their original factory assembled condition and will not be modified, except for department purchased and installed sighting systems.

F. SAFE AND SECURE FIREARMS STORAGE FOR REQUIRED TRAINING.

1. All agency rifles shall be handled, maintained, and stored in a safe and secure manner whether on-duty or off-duty. It is incumbent upon each employee to exercise good judgment, common sense and compliance with training when handling and storing any firearm.

   a. Deputies who are attending required rifle training classes may, with their supervisor’s permission, take the rifle home on their last workday prior to scheduled training.

   b. In the event employees choose to transport their rifle to their residence for storage before training, personnel shall transport and store their weapons in a department issued locking case. Rifles shall be transported unloaded and a department issued cable gun lock shall be used to render the firearm inoperable.

   c. Rifles shall not be left unattended in a vehicle.

   d. Employees are reminded that Penal Code section 25100(c) states, in part, that a person commits the crime of criminal storage of a firearm if he/she keeps any loaded firearm with any premises that are under his/her custody or control and he/she knows or reasonably should know that a child (under 18 years of age) is likely to gain access to the firearm.

   e. Rifles will be returned to the deputy’s work location no later than their first day back to work or within 72 hours of the training date.

   f. Each station house commander will designate a supervisor to maintain a current inventory of patrol rifles to include those rifles being temporarily stored at a deputy’s residence for required training.

III. PERSONNALLY OWNED PATROL RIFLES

A. PROGRAM PARTICIPATION CRITERIA.

1. To participate in this program the employee must be a full-time sworn member, in good standing, with the Sheriff’s Office.

2. The employee must have successfully completed the basic patrol rifle course of instruction and be currently qualified to deploy a patrol rifle.
3. The employee must have successfully completed the Patrol Division Field Training Program.

B. PURCHASE AUTHORIZATION / APPROVAL PROCESS.

1. The employee will complete and submit a “Request to Purchase Patrol Rifle for Official Use” memorandum requesting to purchase an authorized rifle for duty use. The memorandum shall be addressed to the Sheriff and sent via the chain of command to the employees Division Commander. The memorandum will include the following information:
   a. The employee meets the program criteria listed in section A.
   b. Make, model, and general specifications for the rifle they wish to purchase, which must coincide with department policy stated in A.1. of this policy.
   c. The name, address, and telephone number of the firearms dealer the employee is using to complete the sales transaction.
   d. Completed and signed Purchase Agreement and Waiver of Liability Regarding Personally Owned Patrol Rifles. By signing this agreement, employees agree to comply with all sections contained in it. When completing this waiver, employees shall provide the brand name and model number of the rifle they wish to use while on duty. The information will be recorded on the Purchase Agreement Form and updated as necessary. The serial number of the firearm will be recorded on the Purchase Agreement Form when the purchasing employee takes delivery of the firearm.

2. The employees Division Commander will forward a copy of the memorandum to the Training Division Commander who will verify the rifle in question meets the departmental specifications for duty use. The Training Division Commander will also verify that the employee has completed the basic patrol rifle course and is currently qualified to deploy with a patrol rifle.

3. If the Training Division Commander finds that this request meets all the requirement outlined in this policy, he/she will forward the request to the Sheriff for approval. If the request does not meet policy, it will be returned to the requesting employee for correction.

4. The employee shall comply with all assault rifle registration requirements from the State of California and provide proof of compliance by submitting a copy of the Peace Officer Assault Weapon Registration Application and a copy of the registration verification letter from the State.

5. After the employee takes possession of the rifle they will arrange to have it inspected and certified by the Range Master. This inspection will take place within 2 weeks of date of delivery unless circumstances beyond the control of the employee delay inspection. A file will be maintained by the Training Division regarding each personally owned rifle. The file will contain a copy of the Purchase Agreement, a copy of the Assault Weapon Registration letter, and a copy of the inspection report detailing the rifles compliance with departmental specifications. Only rifles that have been inspected and approved by the Range Master are allowed to be deployed for duty use.
6. The employee will qualify with the rifle as outlined in Sheriff’s Office General Policy and Procedure section 1.07.31 – Firearms Safety and Qualification, prior to deploying the rifle for duty use.

7. The Training Division Commander will forward the Purchase Agreement, proof of registration, and inspection report to the Chief of Management Services. The Chief of Management Services will ensure that hardcopies of these documents are placed into the employee’s personnel file.

8. The steps for requesting authorization for deployment of a rifle the employee already legally possesses are the same as above except the original requesting memorandum should reflect the employee already legally possesses the rifle they wish to use in the performance of their official duties.

9. In the event a member separates from the Sheriff’s Office, he/she will abide by one of the following options regarding the possession of the patrol rifle.

   a. Upon mutual agreement between the employee and the Sheriff’s Office, the employee can sell the rifle to the Sheriff’s Office for fair market value, not to exceed the original purchase price, provided it is still in good working order and condition. If the rifle is in need of repair, the cost of these repairs will be deducted from the purchase price.

   b. The employee can arrange for the rifle to be transferred to another eligible member of the Sheriff’s Office. He/she will allow the agency to select a Licensed Dealer for this transaction. The agency will deliver the rifle to the Licensed Dealer in order to verify all applicable State and Federal regulations are complied with.

   c. Upon separation from the Sheriff’s Office, it is the employee’s obligation and responsibility to modify the rifle to ensure that it is compliant with current California law at the time of separation.

   d. Three (3) rifle magazines will be issued to the employee by the department. The magazines will be returned to the department upon separation or once the employee is no longer an active law enforcement officer.

C. AUTHORIZED PATROL RIFLES FOR PURCHASE

1. In the interest of ensuring that patrol rifles are reliable, functional, and dependable, employees are only allowed to purchase rifles that are approved for use by the department as specified in section A.1. of this policy. This includes all equipment affixed to the patrol rifle (sighting system, sling, etc.)

2. Magazines for the patrol rifle must have the capacity to hold no more, or less, than 30 rounds of ammunition, and each rifle will have a complement of 3 magazines. Magazines will be inspected at the time the patrol rifle is inspected by Range Master.

3. The trigger must function in semi-automatic mode of fire only and be of a single stage variety. The trigger pull weight shall not be less than five pounds. Two stage or “Match” triggers are specifically not authorized.

4. The finish of the patrol rifle must be black.

5. Although an uncommon occurrence, if the Sheriff’s Office makes a
technological upgrade to the departmental weapons systems, the owners of authorized rifles are responsible for the upgrade of their rifles to the same specifications. Compliance must be met within 30 days, with certain exceptions based on availability. Any employee unwilling to do this may choose to surrender the rifle to the Sheriff’s Office for compensation, based upon fair market value.

6. All rifles will have a lockable soft sided, padded case, or lockable hard sided case. These cases will be used to protect the rifle and equipment during transportation and storage.

7. The rifle must be assembled by the manufacturer. “Kit” rifles are specifically prohibited.

8. Any modifications or accessories not addressed above require the approval of the department Range Master prior to being installed on the rifle. Whatever approved modifications are made, the rifle must still lock properly in the patrol vehicle locking system.

9. The rifle shall be inspected annually by the department Range Master and at each qualification date.

10. All ammunition for duty use will be provided by the Training Division. Personal ammunition will not be permitted for duty use.

D. AGENCY LIABILITY

1. The Office of the Sheriff and the County will not accept liability for the loss, theft, damage, or total destruction of personally owned patrol rifles that are the personal property of employees who have been allowed to use them while on-duty. By signing the Purchase Agreement and Waiver of Liability, employees agree to all provisions of this statement.

2. In the event damage to a personally owned patrol rifle occurs, that is entirely beyond the control of the employee resulting from a law enforcement function, employees may request reimbursement/repair. In these cases, members shall submit a memorandum to the Sheriff, via chain of command, explaining the circumstances of the damage and request consideration for reimbursement. The final decision regarding reimbursement remains with the Sheriff or his designee.

3. The employee is responsible for the proper maintenance and repair of his/her personally owned patrol rifle. If repair is needed and it is within the scope of the departmental armorer’s capabilities, the armorer may repair the rifle with the employee being responsible for the cost of the required parts. If the repairs needed are beyond the scope of the departmental armorer’s capabilities, the employee is responsible for sending the rifle to the original manufacturer for the repairs.

4. In case of an Officer Involved Shooting with the personally owned patrol rifle, the employee will surrender the rifle to the proper authority for placement into evidence as part of the investigation. The employee will be provided with a department issued patrol rifle, until such time the personally owned rifle can be returned. The Sheriff’s Office is under no obligation to replace any rifles
placed into evidence.

5. If an employee has his/her police powers suspended and the employee is on administrative leave, he/she will surrender their rifle and magazines at the same time as their issued firearm, badge, and identification card. When the employee is returned to duty, the rifle and magazines will be returned to him/her along with the remainder of their issued equipment.

E. SAFE AND SECURE FIREARMS STORAGE

1. All agency authorized rifles shall be handled, maintained, and stored in a safe and secure manner, whether on-duty or off-duty. Employees assume a tremendous level of responsibility when exercising their authority to carry a firearm. This responsibility extends and applies to the safe storage or firearms, when they are not being used. It is incumbent upon each employee to exercise good judgement, common sense and compliance with training when handling and storing any firearm.

a. Employees are recommended to store their rifles at their duty station. Secure lockers will be available at each duty station to facilitate this storage. Employees will be able to ensure their rifle is stored in compliance with all State and Federal laws by utilizing this option. This will also reduce the exposure to theft by not having to transport the rifle during the daily commute.

b. In the event employees choose to transport their rifle to their residence, personnel shall utilize a storage method that will prevent theft or unauthorized access such as a safe or lockable cabinet. Employees shall notify their supervisor that they are keeping their rifle at their residence.

c. Employees are reminded that Penal Code section 25100(b) states in part that a person commits the crime of criminal storage of a firearm if her/she keeps any loaded firearm within any premises that are under his/her custody or control and he/she knows or reasonably should know that a child (under 18 years of age) is likely to gain access to the firearm. It is of paramount importance to assure that firearms stored in the home are stored safely and made inaccessible to children.

d. Off-duty, personally owned patrol rifles are prohibited from being stored in an unattended personal or Sheriff’s Office vehicles. If exigent circumstances exist that requires an employee to leave the firearm in an unattended vehicle, it should be placed in a locked trunk or a locked storage compartment, and never left in plain view.

e. While on-duty, the patrol rifle should be stored in a secure locking system in the employees assigned vehicle or in a secure location at the employees work location.

f. When storing firearms, employees shall exercise care and caution to assure that the weapon is not unnecessarily handled or exhibited and that the storing of the firearm is achieved as expeditiously and safely as possible.
PURCHASE AGREEMENT AND WAIVER OF LIABILITY REGARDING PERSONALLY OWNED PATROL RIFLES

I, ____________________________________________, certify that I am a sworn member of the Contra Costa County Office of the Sheriff and that I desire to purchase a personally owned patrol rifle for usage in the course of my official duties. I have read and fully understand the Contra Costa County Office of the Sheriff’s Policy (1.07.37 Shotguns and Patrol Rifles) pertaining to the use of personally owned patrol rifles by members of the Sheriff’s Office. I understand the restrictions placed on the purchase, storage, and use of personally owned patrol rifles outlined in the Policy and I will comply with all the provisions of the Policy.

By affixing my signature to this agreement/waiver, I acknowledge and accept the fact that the County of Contra Costa and/or the Contra Costa County Office of the Sheriff will not accept responsibility for the loss, theft, damage or complete destruction of my personally owned patrol rifle as a result of any circumstance or incident which occurs, either during on-duty or off-duty hours, except as otherwise provided by policy, at any place where I am authorized by the Sheriff’s Office to use my personally owned patrol rifle. I understand the provisions of this waiver also apply in regard to instances of damage to my personally owned patrol rifle resulting from its use by another Agency member with my permission.

I further agree that I will hold the County of Contra Costa and the Contra Costa County Office of the Sheriff harmless for the loss, theft, damage or complete destruction of my personally owned patrol rifle.

I further understand that a procedure exists which may allow compensation for the repair or replacement of my personally owned patrol rifle in the event the damage is caused by a situation which is entirely beyond my control, resulting from a law enforcement function.

I agree to properly store my personally owned patrol rifle in accordance with all aspects of California Penal Code Sections 25100-25135, regarding the safe storage of firearms. I understand and agree that, when off-duty, I am to store this rifle in a locked gun safe or locked gun cabinet in my home or in a locked armory at the station. I further agree to advise my supervisor if I intend to transport and store my personally owned rifle at my home.

I agree to comply with all of the purchase restrictions of the Policy pertaining to the use of personally owned patrol rifles. I understand that the rifle can be placed into evidence, without compensation or replacement, as a result of its use in an incident.

I agree that if I am placed on administrative leave and have my police powers suspended, I will surrender the rifle, without compensation or replacement, to competent authority until such time as my police powers are restored.

I further agree that if I separate from the Contra Costa County Office of the Sheriff, I will abide by one of the following options regarding the possession of my personally owned patrol rifle:

1. If I desire to sell the rifle upon separation to the Contra Costa County Office of the Sheriff, and if the Office of the Sheriff desires to buy the rifle, the sale will be priced at fair market value, not to exceed the original purchase price. Fair market value shall include factors such as age, use, working order and condition. I understand that if the rifle is in need of repair, the cost of these repairs will be considered in setting the fair purchase price. The decision whether to purchase a rifle that is offered for sale to the Sheriff’s Office shall be at the Sheriff’s Office’s discretion.
2. I can arrange for the rifle to be transferred to another eligible member of the Sheriff's Office. I agree to allow the agency to select the Licensed Dealer for this transaction. I understand the Agency will deliver the rifle to the Licensed Dealer in order to verify all applicable State and Federal regulations are complied with.

3. Upon separation from the Sheriff's Office, it is the employee's obligation and responsibility to modify the rifle to ensure that it is compliant with current California law at the time of separation.

Page 2 of 2 Rev. 6.2017
I. POLICY.
   A. It is the policy of the Sheriff to enhance patrol and investigatory capabilities by utilizing the latest technologies for crime prevention and the apprehension of criminals, while being cognizant of legitimate privacy concerns of law abiding citizens. By deploying Automated License Plate Readers (ALPRs), members of the Sheriff's Office can utilize this technology to scan, detect, and identify license plate numbers which appear on various "Hot Lists."

II. GENERAL.
   A. The use of ALPR devices enhances productivity, effectiveness, and officer safety by alerting officers to the presence of vehicles that appear on the "Hot List." ALPR Devices are typically used to identify stolen vehicles, wanted vehicles, stolen license plates, missing persons, and persons of interest. ALPR devices can also be used to gather information related to active warrants, homeland security, electronic surveillance, suspect interdiction, and the recovery of stolen property. Authorized ALPR devices may be deployed as mobile units, as fixed units, or as hand-held devices. ALPR equipment may be operated by employees and qualified volunteers, who have been trained in its operation. ALPR data will be safeguarded and used for official business only.

III. DEFINITIONS
   A. ALERT. A visual and/or auditory notice that is triggered when the ALPR system receives a potential "Hit" on a license plate.
   B. AUTOMATED LICENSE PLATE READER (ALPR). A device that uses cameras and computer technology to compare digital images to lists of known plates of interest.
   C. HOT LIST. License plates associated with vehicles of interest from an associated database, including but not limited to NCIC, CLETS, JAWS, BOLOs, etc. These lists serve an officer safety and investigatory purpose. The list provides a source for creating an alert when a specific license plate number is "read" by the ALPR device.
   D. HIT. A read matched to a plate that has previously been registered to an agency "Hot List" of vehicle plates related to stolen vehicles, wanted vehicles, or other
factors supporting investigation, or which has been manually registered by a user for further investigation.

IV. PROCEDURE

A. ALPR PROGRAM MANAGEMENT.

1. Management of the serviceability and deployment of ALPR equipment is the responsibility of the Patrol Division Commander. The Patrol Division Commander is responsible for:
   a. Identifying and training personnel in the operation of ALPR equipment.
   b. Identifying and training personnel in the function and proper alignment of ALPR equipment.
   c. Assist Fleet Services with coordinating necessary system repairs, hardware, or software, with authorized sources.

2. Management of ALPR data and the publishing of a daily "Hot List" to the ALPR devices are the responsibility of the Technical Services Division Commander. The Technical Services Division Commander is responsible for:
   a. Establishing protocols for access, collection, storage and retention of ALPR data and associated media files.
   b. Establishing protocols to preserve ALPR reads and data for conducting criminal prosecutions.
   c. Establishing protocols and procedures to ensure the safety and security of the ALPR data that is collected and retained.
   d. Establishing a procedure for documenting the successful use of ALPR devices in supporting law enforcement operations.

3. Management of ALPR training and record keeping from this training is the responsibility of the Training Division Commander. The Training Division Commander is responsible for:
   a. Developing a course of instruction on the operation and functions of ALPR devices. This course will include a review of this policy, the operation of the ALPR devices, the legal concerns regarding the operation of ALPR devices.

B. ALPR DEPLOYMENT.

1. Only trained employees and volunteers will deploy ALPR devices.

2. Only ALPR devices authorized by the Technical Services Division will be used by employees and volunteers to collect ALPR data.

3. ALPR devices will only be used to scan license plates of vehicles that are in places that are within public view.

4. ALPR devices may be used during normal patrol operations or while conducting criminal investigations. Reasonable suspicion or probable cause is not required to utilize the equipment.
5. ALPR devices should be considered to canvass the surrounding area of a serious incident or a terrorist incident to collect the license plate numbers of vehicles in the area.

6. ALPR devices may be deployed as part of a mutual aid request when approved by the Station Commander or the Watch Commander.

C. ALPR DEVICE INSPECTION / MAINTENANCE.

1. Prior to deployment, ALPR cameras will be inspected by the operator for damage and serviceability. Damage to cameras or other ALPR equipment will immediately be reported to a supervisor.

2. Prior to deployment, operators will ensure that the ALPR device is uploaded with the current "Hot List."

3. Vehicles equipped with ALPR devices will only be washed using brushless or hand-washing techniques. Taking the vehicle through a standard brush-equipped car wash may damage the ALPR cameras.

4. Only personnel who have been properly trained will perform adjustments to the alignment of ALPR devices.

5. Maintenance of ALPR devices will be coordinated through the Patrol Division Commander or his/her designee.

D. ALPR ALERTS / HITS

1. Once an Alert is received, the operator should confirm that the observed license plate matches the license plate of the observed vehicle.

2. Before any law enforcement action is taken as a result of an ALPR Alert, the Alert will be verified through a CLETS inquiry via MDC or through Dispatch. Employees will not take any police action that restricts the freedom of any individual based solely on an ALPR Alert, unless it is validated.

3. Because the ALPR Alert may relate to a vehicle and may not relate to the person operating the vehicle, officers are reminded that they need to have probable cause to make an enforcement stop of any vehicle. (For example, if a vehicle is entered into the system because of its association with a wanted individual, Officers should attempt to visually match the driver to the description of the wanted subject prior to making the stop, or should have another legal basis for making the stop.)

E. ALPR DATA MANAGEMENT / STORAGE.

1. All personnel are responsible for the security of ALPR data and may only access, use, release, and/or disseminate Hot List and file data for official and legitimate law enforcement purposes. Employees will safeguard ALPR data obtained from other law enforcement agencies and sources in the same manner.

2. ALPR data, when combined with Personal Identifying Information (PII) becomes intelligence data that must be provided additional safeguards. ALPR data will be stored separately from PII Data. These data sources may be combined when conducting analysis, but will not be stored on the
same drive as raw ALPR data. When ALPR and PII data are combined, they will be treated in accordance with current law.

3. ALPR data may be shared with other law enforcement agencies through the ARIES program, which is responsible for establishing safeguards regarding the contributed data.

4. ALPR data will be consolidated to a central storage device from field units. ALPR data will not be stored in field units nor on mobile collection devices for more than twenty-four hours. ALPR data will be shared with allied law enforcement agencies through the ARIES program.

5. ALPR data will be stored by the Office of the Sheriff for a period of one year. ALPR data that is stored will include photos and all data elements transmitted by the ALPR device. Data retention time periods may be shortened to meet data storage capabilities upon the direction of the Commander of the Technical Services Division.

6. Audits for the access of ALPR data will be conducted by the Technical Services Division. Employees who utilize ALPR data for non-official business will be subject to discipline under the County's Personnel Management Regulations.

7. In addition to administrative discipline, employees who misuse or unlawfully release ALPR data may be subject to civil, criminal and disciplinary action.

F. ALPR TRAINING.

1. ALPR operator training will be offered to both employees and volunteers.

2. ALPR training will follow the recommended training outline of the equipment vendor and will include:
   a. Training on current ALPR case law.
   b. This policy.
   c. Understanding the privacy concerns surrounding ALPR.
   d. Setup and maintenance procedures.
   e. Proper use guidelines.

3. Training courses and scheduling will be implemented by the Patrol Division in consultation with Technical Services.

4. Annual ALPR system training will be conducted via Six Minute Line Up training.
I. POLICY.
A. The Sheriff specifies policy for the acquisition of fleet equipment by Division Commanders for replacement of or supplement to fleet equipment.

II. GENERAL.
A. The General Services Department (G.S.D.) has the responsibility of maintaining and ordering fleet equipment for the County.
B. To help maintain the County fleet, each vehicle has an Internal Service Fund (ISF) depreciation fund. Divisions pay this monthly ISF depreciation charge set by G.S.D. on each vehicle in its fleet. These monies accumulate over a period of time and are available for replacement of vehicles.
C. Vehicles being replaced also have a salvage value. This is determined by the resale value of the vehicle and is also credited toward the purchase of a new vehicle.
D. G.S.D. receives a fleet budget. The amount is determined during the County budget process based partially on input from County departments as to how the money is allocated to the different departments.
E. G.S.D. provides each County department with a list of vehicles to be replaced. This list is devised using vehicle mileage, vehicle age and ongoing maintenance costs in relation to the fleet budget for each department. Through Division input, this list can be revised, possibly changing the priority of vehicles to be replaced.

III. PROCEDURE 1.
A. REPLACEMENT VEHICLES. A vehicle must meet the county mileage requirement (regardless of age) in order to be considered for replacement. Required mileages for replacement are as follows:
   1. Cars and Vans @ 90,000 miles
   2. Trucks and SUVs @ 100,000 miles
   3. Medium and Heavy-Duty Trucks @ 120,000 miles
   4. Transport Buses @ 180,000 miles
B. ADDITION or UPGRADE OF VEHICLES: Division Commanders may request the addition or upgrade of a vehicle that is not on the GSD replacement list.

1. Division Commander. The Division Commander or designee completes the first section of the Fleet Equipment Acquisition/Replacement Request Form and forwards it to the Technical Services Division Commander.
   a. State which vehicle is to be added/upgraded and the type of vehicle being requested.
   b. Provide a letter of justification for replacement and justification of sole-source if only one vendor/manufacturer is to be used.

2. Technical Services Division.
   a. The Assistant Division Commander and Fleet Coordinator will estimate the cost of the replacement vehicle and any related equipment.
   b. The Assistant Division Commander and Fleet Coordinator will obtain the depreciation and salvage value of the vehicle being replaced from G.S.D.
   c. The Communications Specialist and Fleet Coordinator will determine if the electronic equipment is to be transferred and/or if new equipment is to be purchased.
   d. The Communications Specialist will estimate the cost of communications equipment purchase and installation or transfer.
   e. The Form is then forwarded to Administrative Services for a financial report. The Sheriff’s Fiscal Officer will determine if monies are available and will forward the Form to the Undersheriff with recommendations.
   f. The Form is then returned to the Technical Services Division, who will notify the requesting Division Commander and initiate appropriate action. Route copy to the Administrative Services Fiscal Officer.

C. ADDITIONAL PURCHASES. The preceding procedures also apply for the purchase of additional vehicles or additional equipment.
I. POLICY.
   A. The Office of the Sheriff maintains a fleet of County vehicles. Assignment and use of those vehicles is restricted to official Office of the Sheriff business.

II. DEFINITIONS.
   A. OFFICIAL COUNTY BUSINESS. Authorized activities by proper authority to conduct one's occupation or work.
   B. DESIGNATED FIELD STAFF. Deputies or Sergeants whose assignments require them to conduct fieldwork as part of their duties (i.e. follow-up interviews/investigations, filing cases, obtaining and serving search warrants, serving eviction notices.) Such assignments include: Civil Unit, Deputies and Sergeant; Investigation Division Detectives, Deputies and Sergeants assigned to Narcotics, Vice, Crimes vs. Property, Crime vs. Persons, Sexual Assault Detail, Homicide/Crimes Specific Unit; Administrative Services, Internal Affairs Sergeants.

III. GENERAL.
   A. GENERAL OPERATIONS.
      1. Employees whose duties include the driving of Office of the Sheriff vehicles shall possess a valid driver's license issued by the State of California, of a class applicable to the type of vehicle being driven. The license shall be carried at all times when operating a motor vehicle.
      2. Employees shall observe courtesies of the road and practice defensive driving procedures and fuel conservation measures.
      4. All personnel driving or riding in County vehicles shall wear safety lap/shoulder seat belts. Cars with broken seat belts will not be used. The driver shall ensure that a work order for repair of the seat belt is submitted.
a. Prisoners, upon request, may be restrained in the rear of the vehicle using lap belts provided. Exception: Should the prisoner behave in such a manner as to create a potential injury to the Deputy or prisoner, the belt need not be used until the prisoner can be restrained safely.

b. Exception: Passengers of transportation vans and buses shall be exempt from the wearing of safety lap and shoulder seat belts.

B. VEHICLE PARKING. The intent of this information is to reduce the chance of a runaway vehicle and the corresponding injuries which often occur as the result of negligence.

1. Every parked and unattended vehicle shall be in a safe position and in compliance with California Vehicle Code regulations.

2. Vehicles with automatic transmissions shall have the shift selector in the "Park" position. Vehicles with manual transmissions shall have the shift selector in "Reverse".

3. The front wheels shall be turned against the curb, when a curb exists. When chock blocks are furnished, they shall be placed as needed.

4. The vehicle's engine shall be stopped, the parking brake set and the ignition keys removed.

5. Vehicles shall be secured by locking doors and closing windows. The driver is responsible for safeguarding the vehicle and property therein.

6. All parked and unattended vehicles will be locked, including those parked in the County lots. Emergency situations are exempt.

7. All Office of the Sheriff trucks and recreational vehicles, upon parking in a non-emergency response situation, shall have one 18" orange traffic cone at the front and back of the parked vehicle. Prior to moving the parked vehicle, check for obstructions and secure doors, gates and transported items.

C. ASSIGNMENT OF OFFICE OF THE SHERIFF VEHICLES.

1. Office of the Sheriff vehicles shall not be assigned for regular 24 hour use except as authorized by the Sheriff or, in his absence, by the Undersheriff. All 24 hour vehicles assigned will be used in accordance with direction of or as required by the Sheriff. See “Home Garaging of County Vehicles by Sheriff’s Managers” and “Home Garaging of County Vehicles by Designated Field Staff” below.

2. Employees to whom vehicles are not regularly assigned shall use vehicles only when and as directed by a Supervisor.

3. Vehicles shall be used for official County business only.

4. Employees shall not use vehicles outside Contra Costa County except when in pursuit of suspects or while performing official County duties, or unless specifically directed by a Supervisor, or home garaging as described in Section B.

5. Marked patrol cars shall not be used by employees not assigned to the Patrol Division, nor by employees in the Patrol Division for other than
Patrol functions, except with the permission of a Station House Commander or above. Personnel needing a vehicle shall exhaust all other possibilities before requesting a marked patrol car for routine business. An "Out-of-Service" sign will be prominently displayed in both rear door windows whenever it becomes necessary to use a marked patrol vehicle for other than patrol. This includes parking enforcement employees.

6. An employee operating an Office of the Sheriff vehicle shall not permit persons other than authorized County employees to ride in the vehicle, except those persons required to be conveyed in the performance of duty, or as authorized by a Supervisor. Refer to Office of the Sheriff Policy Section 1.06.27, Ride-Along Program.

7. Office of the Sheriff employees shall not use County pool vehicles unless authorized by their Division Commander.

8. When using County pool vehicles, employees must sign in and out with the pool garage attendant.
   a. Employees must notify the pool garage attendant if they will be significantly delayed in returning cars.
   b. If vehicles are not returned within a reasonable time of scheduled check-in, and no delay has been reported, an inquiry to locate the vehicles shall be initiated by pool garage personnel. Local law enforcement officials will be notified if the vehicle cannot be located.

D. HOME GARAGING OF COUNTY VEHICLES BY SHERIFF’S MANAGERS.
The Sheriff, in order to achieve optimum economy, will limit and control home garaging of Sheriff's vehicles for Managers of the Office of the Sheriff.

1. The home garaging policy is at the sole discretion of the Sheriff and will not be modified without approval of the Sheriff. Division Commanders may authorize a single overnight garaging of a vehicle in the case of an emergency. Bureau Assistant Sheriffs may authorize up to a week of home garaging of a vehicle in special or otherwise unusual circumstances. This Policy is separate from and shall not effect the home garaging policy as contained in Section 10.4 of the Deputy Sheriffs' Association's Memorandum of Understanding.

2. The Fleet Services Unit shall maintain a list of Managers that are approved for home garaging by the Sheriff. Approved Managers shall be listed by assigned position. Only those Managers on the then-current list may home garage their assigned vehicles. The list will be updated at least once a year as per section D3, but may be changed from time to time as needed at the discretion of the Sheriff. Fleet Services shall advise Managers, via the chain of command, of their addition to, or deletion from, the list.

3. Fleet Services Unit shall maintain a list of Managers that are recommended for home garaging by their respective commanders. This list will be forwarded to the Sheriff during the third quarter of each calendar year.
4. The Sheriff or his/her designee will issue an approved list by January 1st of each calendar year of those Managers authorized to home garage vehicles.

E. HOME GARAGING OF COUNTY VEHICLES BY DESIGNATED FIELD STAFF. The sole discretion for Field Staff home garaging a county vehicle rests with the Sheriff. The home garaging shall not be allowed for purpose of employee compensation.

   1. Designated Field Staff may be allowed to home garage their county vehicles to achieve the most efficient level of service, consistent with the mission of the Office of the Sheriff.

IV. PROCEDURE 1.

A. DIVISION COMMANDERS’ RESPONSIBILITIES.

   1. Home garaging by designated field staff requires specific written authorization by the Division Commander, and shall be reviewed annually. Each authorization will be valid for no longer than one year at a time.

   2. The Division Commander will ensure that Office of the Sheriff vehicles will be driven directly from the employee's residence to the employee's duty station or area of responsibility.

B. BUREAU ASSISTANT SHERIFFS’ RESPONSIBILITIES.

   1. Bureau Assistant Sheriffs will review and approve each authorization granted by the Division Commander for home garaging by field staff. The Professional Standards Unit will compile a report annually, listing those approved for home garaging by the Bureau Assistant Sheriffs.

      a. Information in this report will be included on the list of those approved for home garaging (Managers and designated field staff), issued by the Sheriff or his/her designee.

C. EMPLOYEE RESPONSIBILITIES.

   1. The employee will use the Office of the Sheriff vehicle for official business only, driving the vehicle directly from the employee's residence to the employee's duty station or area of responsibility.

   2. An employee operating an Office of the Sheriff vehicle shall not permit persons other than authorized employees of the Office of the Sheriff to ride in the vehicle, except those persons required to be conveyed in the performance of duty or as authorized by the order of a Supervisor.

   3. The employee will ensure that the Office of the Sheriff vehicle is parked in a safe place while at the employee's residence.

   4. The employee will be familiar with all County and Office of the Sheriff regulations pertaining to the operation and use of County vehicles.

   5. When utilizing electronic payment systems to pay tolls, the owner of the transponder will be responsible for listing his or her e-plate with FasTrak or the service used to detect transponder passage.
6. A County Vehicle with an e-plate is not exempt from paying toll, and the driver of a County Vehicle will be responsible for paying any or all tolls and/or Notice of Toll Evasion penalties.

V. PROCEDURE 2.

A. GENERAL OPERATIONS.

1. The vehicle will be fueled at a County fuel station. A non-County fuel station will be used only in an emergency.

2. In the event of an emergency breakdown after normal working hours, the Communication Center will be notified to call the "on-call" tow service.

3. In the event of an emergency breakdown during normal working hours, the employee will call the County pool garage at 313-7074, or have the Communication Center, 646-2441, call the pool garage for directions. Flat tires are not considered emergency service.

4. When the employee is on leave for a period of a week or longer, the County vehicle will be parked at the office and the keys placed on the vehicle keyboard.
I. POLICY.
   A. Office of the Sheriff vehicles will be regularly serviced and maintained to ensure maximum performance and safety.

II. GENERAL.
   A. VEHICLE SERVICING.
      1. The County General Services Department (G.S.D.) is responsible for the regular maintenance and servicing of all County owned vehicles.
      2. Office of the Sheriff vehicles based in Martinez will receive normal servicing and fueling at the General Services Waterbird Maintenance Facility located at 2467 Waterbird Way, Martinez.
      3. In the event of an emergency breakdown situation occurring during normal working hours, employees shall call the Waterbird Maintenance Facility directly or have the Communication Center call the Waterbird Maintenance Facility to receive instructions.
      4. Should an emergency breakdown occur after normal working hours, the Communication Center will call the contract towing company to respond to the breakdown location.
      5. In the event of a flat tire, contact G.S.D. to request an approved tow service for assistance.
      6. Patrol Division Vehicle Fueling and Servicing.
         a. Patrol Division vehicles that are assigned to specific Station Houses will be fueled at the private stations which have contracted with the County to provide that service.
         b. Minor repairs, such as fan belt replacement or tire repair, may be done at the contract station.
I. POLICY.

A. Office of the Sheriff communications equipment is varied in design and operation. Employees shall be responsible for the reasonable care and correct operation of communications equipment, as well as the proper procedure when using the equipment.

II. GENERAL.

A. OFFICE OF THE SHERIFF’S DISPATCHING FACILITIES. The Office of the Sheriff operates a Communications Center in Martinez.

1. Communications Center.
   a. Cars equipped with conventional two-way voice radio equipment operating in Contra Costa County are dispatched through the Communications Center, using the following channels.
      - CCSOWEST - West County, Orinda, Lafayette
      - CCSOCENT - Central and South County
      - CCSOEAST - East County
      - CCSOPIT - Pittsburg
      - CCSOTACE - Administrative channel used for car-to-car radio traffic
        * During critical incidents, these channels may be “patched” together.

2. Patrol cars may also be equipped with Mobile Data Computers (M.D.C.s) that are tied in with the computer at the Communications Center. Patrol cars with M.D.C.s may be dispatched by computer in lieu of voice.

3. Employees shall not use any Office of the Sheriff or County communications facilities for personal, social or unofficial purposes.
B. ROUTINE RADIO OPERATIONS.
   1. The Hand Microphone. The radio will not transmit instantly when the hand microphone is activated.
      a. Pause momentarily after activation to ensure peak performance.
      b. Speak directly into the microphone in a normal, even tone of voice at a moderate speed.
      c. Do not shout or whisper.
   2. Channel Selection. Select the channel according to the purpose of the transmission and your destination or assignment.
      a. The Fleet Service Coordinator will be notified of any electronic repairs needed to Sheriff's units via the Communications Equipment Trouble Report Form.
      b. Unauthorized persons will not tamper with, modify, repair or willfully damage any electronic equipment maintained or owned by the County.

C. TRANSMITTING RADIO MESSAGES.
   1. Message should be brief, concise and to the point.
   2. Listen to confirm the channel is clear before activating the transmitter.
   3. Know what to say before transmitting. Avoid pauses and repetition of words and ideas. If the message is lengthy, use the telephone.
   4. Select distinct words that convey a definite message with little room for doubt. When using proper names or spelling words, use the phonetic alphabet.
   5. Use radio “10” codes whenever possible.
   6. Be impersonal. Do not express emotions, irritation or humor over the radio.
   7. Do not talk faster than can be written or comprehended.

D. CAR-TO-CAR RADIO TRAFFIC.
   1. Car-to-car traffic should be confined to official business only.
   2. Channel T4 should be used under normal circumstances.
   3. Radio operators must identify themselves according to official call signs.
   4. Extended communications should be handled through telephone contact.

E. M.D.C. TRAFFIC.
   1. M.D.C. traffic should be confined to official business only.
   2. Messages should be kept brief and code should be used whenever possible.
   3. M.D.C. traffic is not private. It is subject to administrative review or subpoena at any time.
F. REQUESTS TO DISPATCHERS. Dispatchers will not place telephone calls for Office of the Sheriff employees (Sheriff, Undersheriff, and Bureau Assistant Sheriffs are exempt) when such employee is capable of placing the call themselves, except in the following cases:

1. In an emergency.
2. When the conversation must be retained on tape.
3. Any situation provided for within the Office of the Sheriff Manual.
I. POLICY.
   A. Control of employee access to Office of the Sheriff personal computers is required to safeguard equipment, program applications and data.

II. DEFINITIONS.
   A. APPLICATION SOFTWARE. Programs used to perform tasks such as Microsoft Word and Excel.
   B. DATA. Technically, raw facts and figures, such as orders and payments, which are processed into information such as balance due and quality on hand. However, in common usage, the terms data and information are used synonymously.
   C. HARDWARE DRIVERS. Software used by the operating system to allow it to control, or “drive”, a hardware device such as a printer, scanner, mouse, or keyboard.
   D. OPERATING SYSTEM. The software used to boot the PC and then serve as a platform for launching other software. Desktop computer operating systems currently include Windows 95/98, Windows NT, Windows 2000, Windows XP, Windows 7, Windows 8, various versions of Mac software, and Linux.
   E. SOFTWARE. Instructions for the computer, a series of instructions that perform a particular task is called a program. The two major categories are system software and application software.

III. GENERAL.
   A. The Sheriff’s Network has connections to the State of California, Department of Justice’s (DOJ) CLETS network so that authorized Office of the Sheriff personnel can access criminal history and other information. Because of this connection, the Sheriff’s Network and all Office of the Sheriff computer users are subject to the CLETS Policies and Procedures.
   B. The following rules are necessary to prevent the introduction of computer viruses, improper damage to the PC, installation of incompatible components,
installation of unlicensed or unauthorized software, and unauthorized use of licensed software or data:

1. No employee is to install any operating system upgrade, application or application upgrade to any PC or peripheral equipment owned by the Office of the Sheriff except when directed to do so by the Technical Services Division Commander or designee.

2. No employee is to move any PC to a different building or office without prior notification of Technical Services Division’s Network and PC Support Group. Technical Services staff will make all necessary changes in the infrastructure to accommodate network access at the new location.

3. No employee is to change any system configuration files or Windows Registry settings without approval from the Technical Services Division Commander or designee.

4. No employee is authorized to copy and remove any software from Office of the Sheriff computers without approval from the Division Commander or designee.

5. No employee is authorized to copy or remove any data from Sheriff’s Office computers or computer systems, or other computer systems attached to the Office of the Sheriff network, including State of California DOJ, Contra Costa County Law and Justice Systems etc. without specific business purpose or approval from the employee’s Division Commander.

6. No employee is to remove, install, or modify any internal or external hardware components or the PC system including circuit boards, drivers, printers, mice, scanners, modems etc. without approval from the Technical Services Division Commander or designee.

7. Specific exceptions to these rules may be authorized in writing by the Technical Services Division Commander or designee.

C. The following rules are necessary to conserve server hard drive space and communications bandwidth, preserving these shared resources for business purposes, and to mitigate the potential violation of copyright laws:

1. No employee is to place or store personal audio, video, or image files on any Sheriff’s Office owned computer or server drive. This includes downloaded music or copies of personally owned commercial CD’s or DVD’s; output from a personal digital camera; files received from others; animated or recorded clips from web sites such as YouTube; or other similar files.

   a. This rule does not apply to audio and/or video recordings of interviews conducted in the normal course of Sheriff’s Office business; inmate phone conversations; surveillance footage; training materials; or other business-necessary audio, video, or image files.

2. No employee is to place or store personal computer games or other video games or game files on any Sheriff’s Office owned computer or server.
3. No employee is to place or store any other personal files on Sheriff’s Office owned computer equipment.

D. PERSONAL LAPTOPS.

1. When an Office of the Sheriff report writing application is used, the following procedures will apply:
   
a. The employee must call the Technical Services help line and schedule a time Technical Services staff can evaluate the laptop computer to be used.

b. The Network Manager will ensure a log is kept of all personal laptop computers on which the application is installed to include the make, model, and serial number.

c. Once approved, the Technical Services Staff will be responsible for loading an authorized virus protection program on the laptop along with the authorized report writing software.

d. The employee will ensure the laptop has the most current virus protection update.

e. The Network Manager will ensure that the laptops be checked every 6 months for current virus protection updates.

2. The Office of the Sheriff assumes no responsibility for any damage to, or loss of any personally owned laptops.
I. POLICY.

A. Access to the Internet, e-mail, text messaging, or other electronic means of communication via Office of the Sheriff computers, handheld personal data assistants (PDA’s), smart phones, and/or any other Office of the Sheriff controlled medium are intended for official use as defined in this policy.

The use of e-mail, texting, and the Internet will be restricted and audited as necessary to ensure the integrity of Office of the Sheriff systems, as well as those of other law enforcement agencies. The Sheriff’s Intranet is for internal use by employees and volunteers only. There is no expectation of privacy in any form of electronic communication using equipment owned by the Office of the Sheriff.

II. DEFINITIONS.

A. CONTRA COSTA COUNTY INTERNET AND ELECTRONIC MAIL USE AGREEMENT FORM. Refers to Administrative Bulletin 505.8 “Telecommunications Procedures” dated 6/24/04.

B. E-MAIL, TEXT MESSAGING AND INTERNET. These terms shall have their common meaning, as understood by the public at large. The terms include communications over Mobile Data Computers (MDCs) or other such vehicle-mounted systems. The term “text messaging” includes instant messaging, either using the internal messaging system or Internet instant messaging. The term “Internet access” includes the use of the Internet (either to receive or to send) for any purpose, including Web usage, e-mail, text messaging, social networking, file downloading, etc.

C. INTRANET. An in-house website that serves the employees of the Office of the Sheriff from within the Sheriff’s Network.

D. CELL PHONES, SMART PHONES. See Policy 1.07.57, which relates to usage of these devices as cell phones. To the extent that such devices provide Internet access, such usage is governed by this policy.
III. GENERAL.

A. While the Internet provides a wealth of valuable information and facilitates communications, it also opens the potential for others to access the Office of the Sheriff confidential information as well as to disrupt operations. Irresponsible use reduces the availability of Office of the Sheriff data and systems for critical operations, compromises security and network integrity, and leaves the Office of the Sheriff open to potentially damaging litigation. In addition, access to other Federal, State and local information databases and systems could be restricted or terminated for misuse.

Employees may access the Internet for personal use during their break times to visit news, weather, financial, reference, and appropriate e-commerce sites. Social networking sites are not authorized for access. Sexually-oriented sites are strictly prohibited. The purposeful viewing of sexually-related items on e-commerce sites is strictly prohibited.

Employees are responsible for exercising good judgment regarding the reasonableness of their personal use. Employees should consult their supervisor or manager if they have any question as to the appropriateness of a particular web site prior to visiting the site.

1. Office of the Sheriff e-mail systems, text messaging, and/or Internet access shall be used only for purposes directly related to work being performed by that employee in furtherance of the Office of the Sheriff mission and shall not be used for personal matters, except as stated above and for short and infrequent messages to arrange or confirm appointments, inform family of overtime work, etc.

2. There shall be no expectation of privacy in any communication utilizing Office of the Sheriff Internet access or e-mail, which is subject to audits to ensure that electronic devices and Internet access are being appropriately used.

3. Office of the Sheriff employees are responsible for the security of their computer workstations, laptops, and other devices providing Internet access. Extreme care must be taken at all times to safeguard passwords. Employees are responsible for protecting their passwords and shall not leave their workstations unattended while they are actively logged in to the Internet or to County-, State- and Federal-controlled information systems. An exception would be Mobile Data Computers (MDCs) in locked vehicles while the operator is out of the car during their duty shift.

4. Employees are responsible for all data or material downloaded, received or sent from that employee’s e-mail account and/or computer during their logged-in sessions. Employees shall immediately advise their Supervisor in writing of any unwanted or unsolicited data or material received on or downloaded to the employee’s computer. Failure to advise one’s immediate Supervisor may result in a presumption that the member intentionally downloaded, retained or sent the material in question.

5. Deputies will check their department e-mail at least once per business day or while on any active duty shift.
6. Employees shall not send “ALLCCCSO” email messages without prior approval from a Captain or higher.

B. The Sheriff’s Intranet is intended to be used by members of the Sheriff’s Office to disseminate authorized information among employees and volunteers. It is not intended to be used or viewed by members of the public or non-Sheriff’s Office employees. The content on the Sheriff’s Intranet should always be professional and relevant to the goals of this Office. The only exception would be items posted in the Classified section, which is intended for personal use.

1. All content added to the Intranet, with the exception of the Classified section, must be approved by the Division Commander or his/her designee.

2. The classified section is a place for employees to post advertisements for the sale/rental of personal items and or property, or the exchange of overtime/shift trades. All content must be professional, include contact information and be current. It is the responsibility of the person posting the item to remove items that have been sold or expired. Items posted to the Classified section are transactions agreed upon between the involved parties. By using the Classified section, users agree the Office of the Sheriff will not be held responsible for damages (lack of payment, damaged merchandise, etc.) as a result of using the Classified section.

IV. PROCEDURE 1.

A. No Office of the Sheriff computer, or other device capable of Internet access, shall be provided Internet access except by authorized individuals in the Technical Services Division. This applies to all connections to the Internet through the Sheriff’s network or by use of a modem. In addition, Contract City agencies must comply with CLETS and ACCJIN policies to provide proper firewall protection if utilizing municipal Internet connections on the same work stations as are utilized to access the Sheriff’s network. Contract City agencies must collaborate with the Office of the Sheriff Technical Services Division to insure the security of the Sheriff’s network and its critical links.

1. Requests for new Internet access will be made to the Technical Services Division via e-mail addressed to pchelp via Groupwise.

2. All current Office of the Sheriff employees granted access to the Internet and/or e-mail will sign a Contra Costa County Internet and E-Mail Use Agreement Form provided by their Division or Facility administration. It will be the responsibility of the employee’s Division or Bureau Commander to ensure that a copy of this agreement is sent to Administrative Services Bureau, Personnel Services Unit, to be entered in the employee’s personnel file (one copy is sent to the Technical Services Division and one copy is given to the employee).

3. All new employees will sign this form provided by the Director of Personnel Services during orientation. One copy will be entered in the employee’s personnel file, one will be sent to the Technical Services Division, and one will be given to the employee.

4. The copyrights of Internet materials belong to the copyright owners, not the County employee who acquires a copy of the copyrighted material.
Violation of the copyright laws can result in costly fines and other penalties. The copyrighted material can be used to complete a County business project, but its use must be within the agreement as posted by the author or current copyright law. Violation of copyrights is prohibited.

5. Technical Services will retain a copy of the approved Internet and E-Mail Use Agreement Forms in a current file. Technical Services staff will immediately notify the Support Services Bureau Commander of any violation of this policy.

B. To post information on the Intranet, users must have a user name and password assigned to them.

1. Each Division shall designate at least one person as the Content Manager of their assigned page. That person(s) will be responsible for keeping the information on their page current.

2. User names and passwords for Content Managers can be obtained from Technical Services, with the approval of the requesting Division Commander or his/her designee.

3. Users wishing to post items to the Classified section will be required to register on the Intranet site using the legal name that belongs to the registrant, and provide a valid Department e-mail address for confirmation.
I. POLICY.
   A. Employees shall take reasonable precautions to prevent computer viruses from infecting Office of the Sheriff computers.

II. DEFINITIONS.
   A. COMPUTER VIRUSES. A computer program which is intended to replicate, distribute, damage, or destroy files on a disk; to replicate itself to other systems; to compromise security of a PC, segment, or network; and/or to prevent network services from being available to other users.

III. GENERAL.
   A. REASONABLE PRECAUTIONS. The following steps are considered reasonable precautions for the prevention of damage caused by computer viruses:
      1. Make frequent backups. One set is not enough. Use several copies in rotation. Viruses can infect backups as well. Using several backups in rotation increases the likelihood that a safe backup exists.
      2. Do not open any files attached to an e-mail from an unknown, suspicious or untrustworthy source.
      3. Do not open any files attached to an e-mail unless you know what it is, even if it appears to come from someone you know. Some viruses can replicate themselves and spread through e-mail.
      4. Do not open any files attached to an e-mail if the subject line is questionable or unexpected.
      5. Delete chain and junk e-mail. Do not forward or reply to any of them.
      6. Do not download any files from strangers.
      7. Exercise caution when downloading files from the Internet. Ensure that the source is a legitimate and reputable one. Verify that an anti-virus program check the files on the download site.

I. POLICY.

A. In order to maintain both the quality and compatibility of computer equipment, the Office of the Sheriff must strive to use standardized computer equipment throughout the Office, whenever possible and practical.

II. GENERAL.

A. All purchases of computers and peripherals, except disposable items such as toner, cartridges, diskettes, etc., must be completed by the Technical Services Division. Requisitions and orders for computer related purchases will be forwarded to Technical Services by the requesting Bureau/Division for evaluation and processing.

III. PROCEDURE 1.

A. PURCHASING COMPUTERS AND PERIPHERALS.

1. The requesting Bureau/Division will submit an Equipment/Software Order Request Form to Technical Services.

   a. [Redacted]

2. Technical Services will evaluate the request for compatibility and appropriateness to the stated purpose and return a price quote.

   a. On the face of the price quote will be a signature line and a request for your organization and account code.

3. The requesting Bureau/Division will return the price quote to Technical Services Division by fax or interoffice mail with an authorizing signature (Division Commander or Acting Division Commander), the appropriate organization number and the account code.

4. Technical Services will create the requisition and obtain a purchase order.

5. The equipment will be delivered to Technical Services. If needed, the equipment will be configured prior to delivery to the end user. Final
delivery and installation will be scheduled with the requesting Bureau/Division.
I. POLICY.

A. The ability to easily reach and communicate with and among certain Command staff within the Office of the Sheriff is imperative to Office of the Sheriff business. Possession of a cellular telephone by each Command staff member increases the ability to achieve this communication. In order to achieve optimum fiscal economy, the Sheriff will limit and control reimbursement for cellular telephone charges.

II. DEFINITIONS.

A. OFFICIAL COUNTY BUSINESS. Authorized activities by proper authority to conduct one’s occupation or work.

III. GENERAL.

A. MANDATORY CELLULAR TELEPHONES. The mandatory cellular telephone policy is at the sole discretion of the Sheriff and will not be modified without approval of the Sheriff.

1. Personal Cellular Telephones Authorized for Reimbursement.

a. The following Managers are mandated to carry a personal cellular telephone and are authorized for reimbursement for said mandated expenses:

- Sheriff;
- Undersheriff;
- Bureau Assistant Sheriffs;
- Chief of Management Services;
- Captains, including Chief Criminalist (except those issued County cellular telephones); and
- Other management employees as approved by the Undersheriff/Sheriff.
b. Reimbursement to the above designated staff shall be limited to the following:

- Actual cost of monthly base service charge not to exceed $39.95 plus applicable taxes and other legally required charges.
- Actual cost of airtime charges for official business calls above 300 minutes of business calls per month. The employee must present documentation verifying that the first 300 minutes were used for official business.
- The Sheriff’s Fiscal Services Unit shall compile and keep current a list of Managers, by name and employee number, who are mandated to have a personal cellular telephone and forward said list to the Auditor-Controller’s Office.

2. County Owned Cellular Telephones.

a. Positions below the rank of Captain may be issued and required to carry a County cellular telephone.

b. Positions authorized to carry County owned cellular telephones must be approved by the Undersheriff.

c. County issued cellular telephones shall be used to place or receive personal calls only for an emergency or during break periods where usage does not result in any charges to the County or interfere with business.

d. Personal business conducted on County owned cellular telephones shall be limited in duration and not interfere with normal work duties and/or disturb the work environment. Such use should not result in any charges to the County.
I. POLICY.

A. This policy addresses issues associated with employee use of social networking sites and provides guidelines for the regulation and balancing of employee speech and expression with the legitimate needs of the Sheriff’s Office. The secure use of social media enhances communication, collaboration, and information exchange.

Social Media provides a new and potentially valuable means of assisting the Office of the Sheriff and its personnel in meeting community outreach, problem-solving, investigative, crime prevention, and related objectives. This policy provides guidelines to employees regarding appropriate speech and expression for personal, social networking websites, web pages, and other electronically transmitted or hard copied material. Nothing in this policy is intended to prohibit or infringe upon any communication, speech or expression that is protected or privileged under law.

II. DEFINITIONS.

A. BLOG: A self-published diary or commentary on a particular topic that may allow visitors to post responses, reactions, or comments. The term is short for “Web log.”

B. FORUM: An on-line discussion site.

C. AVATAR: A computer user’s representation of himself/herself, or an alter ego.

D. PAGE: The specific portion of a social media website where content is displayed, and managed by an individual or individuals with administrator rights.

E. POST: Content an individual shares on a social media site. This includes text, photographs, audio, video or any other multimedia file.

F. PROFILE: Information that a user provides about himself or herself on a social networking site.

G. SOCIAL MEDIA: A category of Internet-based resources that integrate user-generated content and user participation. This includes, but is not limited to,
social networking sites (Facebook, MySpace, LinkedIn), microblogging sites (Twitter, Nixle), photo and video-sharing sites (Flickr, YouTube), wikis (Wikipedia), blogs, and news sites (Digg, Reddit).

H. SOCIAL NETWORKS: On-line platforms where users can create profiles, share information, and socialize with others using a range of technologies.

I. SPEECH: Expression or communication of thoughts or opinions in spoken works, in writing, by expressive conduct, symbolism, photographs, videotape, or related forms of communication.

J. WEB 2.0: The second generation of the World Wide Web focused on shareable, user-generated content, rather than static web pages. Some use this term interchangeably with social media.

K. WIKI: Web page(s) that can be edited collaboratively.

III. ON-THE-JOB USE.

A. OFFICE OF THE SHERIFF SOCIAL MEDIA PAGES.

1. All department social media sites or pages shall be approved by the Sheriff or his designee and shall be administered by personnel appointed by the Sheriff or as otherwise determined by the Executive Team. Day-to-day administration of this policy is the responsibility of the Administrative Services Bureau.

2. Each social media page shall clearly indicate that it is maintained by the Contra Costa County Sheriff’s Office and shall have department contact information prominently displayed.

3. Where possible, the social media page(s) should link to the Contra Costa County Sheriff’s Office official website and shall include an introductory statement that clearly specifies the purpose and scope of the agency’s presence on the website (i.e. recruiting deputies).

4. Social media page content shall adhere to applicable laws, regulations, and current CCCSO policies. It is important to note that social media content on Office of the Sheriff social media pages is subject to public records laws.

5. Where possible, social media pages should state that the opinions expressed by visitors to the page(s) do not reflect the opinions of the Sheriff’s Office.
   a. Pages shall clearly indicate that posted comments will be monitored and that the Sheriff’s Office reserves the right to remove obscenities, off-topic and inappropriate comments, and personal attacks.
   b. Pages shall clearly indicate that any content posted or submitted for posting is for public disclosure.

B. EMPLOYEE PROCEDURES.

1. Sheriff’s Office employees authorized to post and maintain content on the Sheriff’s Office social media pages shall adhere to the following guidelines:
a. Conduct themselves at all times as representatives of the Sheriff’s Office, adhere to all CCCSO standards of conduct, and observe conventionally accepted social media protocols and proper decorum.

b. Clearly identify themselves as a member of the Sheriff’s Office.

c. Shall not make statements about the guilt or innocence of any suspect, arrestee, or comments concerning pending prosecutions, nor post, transmit, or otherwise disseminate confidential information, including photographs, videos, etc., related to Sheriff’s Office assignments/training unless the transmitted information is necessary to aid in the investigation of criminal activity, or given express permission by the Sheriff or the Sheriff’s designee in order to accommodate the purposes set forth in section C.1. below.

d. Shall not conduct political activities, express political views nor engage in private business activities on the Sheriff’s Office social media pages.

e. Shall not use personally owned electronic devices to manage the Sheriff’s Office social media activities or in the course of official duties unless given express written permission by the Sheriff, the Sheriff’s designee, or a Bureau Assistant Sheriff.

f. Shall observe and abide by all copyright, trademark, and service mark restrictions in posting materials to electronic media.

C. OTHER POTENTIAL DEPARTMENT USES.

1. Social media provides a wealth of valuable information and facilitates communications. Social media can prove to be a valuable investigative tool when seeking evidence or information about:

a. Wanted persons;
b. Missing persons;
c. Gang participation;
d. Crimes perpetrated on line (i.e., cyber-bullying, cyber-stalking, identity theft); and
e. Photos, videos, or other evidence of a crime posted by a participant or observer.

f. Viewing other publicly available information of reasonable and legitimate interest to the Sheriff’s Office.

2. Social media can also be used for community outreach and engagement as follows:

a. Providing crime maps and statistics;
b. Providing crime prevention tips;
c. Offering on-line-reporting opportunities;
d. Soliciting tips about unsolved crimes;
e. Making time-sensitive notifications related to road closures, weather emergencies, missing or endangered persons, etc.

f. Notifying persons seeking employment or volunteer positions at the Sheriff’s Office of openings.

3. The Sheriff’s Office may utilize Internet-based content when conducting background investigations of job candidates or Professional Standards investigations of current employees. Search methods shall not involve procedures that are in violation of existing local, state or federal law.

   a. No employee or job candidate shall be requested to disclose a username or password for the purpose of accessing personal social media content; no manager, supervisor, or investigator shall require employees or job candidates to access personal social media content in their presence.

   b. Nothing in 3.a. prohibits the Sheriff’s Office from requesting an employee to divulge personal social media information that is reasonably believed to be relevant to an investigation of employee misconduct or violation of applicable laws and regulations, provided that the social media information is used solely for the purposes of that investigation or a related proceeding.

IV. PERSONAL USE.

A. GENERAL PRECAUTIONS AND PROHIBITIONS.

1. The public has placed its trust in the Office of the Sheriff to administer an honest effective law enforcement agency. The Office of the Sheriff embraces the public trust and recognizes that effective law enforcement would be severely hampered if such trust were lost.

   By accepting employment with the Office of the Sheriff, safety and general employees are subject to a higher standard of conduct than is found in other government service. Therefore, employees must be aware that their actions, whether on or off duty, are subject to public scrutiny and reflect on the entire Office of the Sheriff.

2. Barring state and federal law, or binding employment contracts to the contrary, Sheriff’s Office employees who choose to maintain or participate as private citizens in social media or social networking platforms shall abide by the following:

   a. Employees shall not post content on social media sites that will tend to discredit or bring the County or the Office of the Sheriff into disrepute.

   b. Employees are prohibited from using department computers or cell phones/devices for personal participation in social media or social networking, unless permission is granted from the Sheriff, his designee or a Bureau Assistant Sheriff.

   c. Employees are prohibited from using privately-owned personal computers or cell phones/devices for personal participation in
social media or social networking while on duty, except in the following circumstances:

- When brief personal communication may be warranted by the circumstances (e.g., inform family of extended hours).
- During authorized breaks; however, such usage should be limited and not be disruptive to the work environment.

d. Employees shall not post, transmit, or otherwise disseminate any information to which they have access as a result of their employment without express written permission from the Sheriff, his designee or a Bureau Assistant Sheriff.

e. Employees shall not post, transmit, or otherwise disseminate any text, photograph, audio, video, or any other multimedia file related to any investigation, either current and past, of the Sheriff’s Office.

f. Employees shall not post, transmit, or otherwise disseminate any text, photograph, audio, video, or any other multimedia file related to any past or current action of the Sheriff’s Office, if it may tend to bring the Sheriff’s Office into disrepute.

g. Employees shall refrain from speech or expression that could reasonably be foreseen as creating a negative impact on the credibility of the employee as a witness.

h. Employees shall refrain from posting content of any form that could reasonably be foreseen as creating a negative impact on the safety of the employees of the Sheriff’s Office, or the security of the Sheriff’s Office operations.

i. Employees shall refrain from posting content that violates the Policies and Procedures of the Sheriff’s Office.

j. Employees shall refrain from posting, transmitting or disseminating any photographs, video or audio recordings, likenesses or images of department logos, emblems, uniforms, badges, patches, marked vehicles, equipment or other material that specifically identifies the Contra Costa County Office of the Sheriff on any personal or social networking or other website or web page if doing so would tend to bring the Sheriff’s Office into disrepute.

k. Employees shall take reasonable and prompt action to remove any content that is in violation of this policy and/or posted by others from any web page or website maintained by the employee (e.g., social or personal website).

3. Sheriff’s Office employees are cautioned that postings on or off duty, relating to the Office of the Sheriff may form the basis for discipline if deemed detrimental to the Sheriff’s Office mission, function, reputation,
or professionalism. Employees are advised that their postings and related activity on social media sites will reflect upon the Sheriff’s Office.

4. Employees shall be cognizant of the fact that attorneys and courts scrutinize the credibility of a witness by using statements and activities from internet sources for impeachment purposes. Therefore, employees shall refrain from any form of speech or expression that contains obscene or sexually explicit language, images, or acts and statements, or that glorifies illegal acts, excessive alcohol consumption, illegal drug usage and reckless or irresponsible behavior. Additionally, employees shall refrain from other forms of speech or expression that ridicule, malign, disparage, or otherwise express bias against any race, religion, or any other protected class of individuals.

5. Sheriff’s Office employees should be aware that they may be subject to civil litigation for:
   a. Publishing or posting false information that harms the reputation of another person, group, or organization (defamation);
   b. Publishing or posting private facts and personal information about someone without their permission that has not been previously revealed to the public, is not of legitimate public concern, and would be offensive to a reasonable person;
   c. Using someone else’s name, likeness, or other personal attributes without that person’s permission for an exploitative purpose;
   d. Publishing the creative work of another, infringing trademarks, or revealing certain confidential business information without the permission of the owner.

6. Sheriff’s Office personnel should be aware that privacy settings and social media sites are constantly in flux, and they should never assume that personal information posted on such sites is protected. Additionally, postings made under the claim of restricted settings may still constitute a violation of policy.

7. Sheriff’s Office personnel should expect that any information created, transmitted, downloaded, exchanged, or discussed in a public online forum may be accessed by the Sheriff’s Office at any time without prior notice. Employees are advised that there can be no expectation of privacy with regard to anything they post on social networking sites. The Sheriff’s Office has the right to view all postings made on public social media sites.

8. Reporting violations. Any employee becoming aware of, or having knowledge of a posting or of any website or web page in violation of any provision of this policy shall notify his or her supervisor immediately for follow-up action.
Former Policy Deleted
As a Law Enforcement Officer, my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all people to liberty, equality and justice.

I will keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.

I will never act officiously or permit personal feelings, prejudices, animosities, or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.

I recognize the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession law enforcement.

**LAW ENFORCEMENT INVOLVED FATAL INCIDENTS**

2014
THE POLICE CHIEFS’ ASSOCIATION
CONTRA COSTA COUNTY, CALIFORNIA

PROTOCOL FOR

LAW ENFORCEMENT INVOLVED FATAL INCIDENTS
2014
Dedication

The Contra Costa County Police Chiefs’ Association dedicates this manual to the memory of Contra Costa County Deputy District Attorney Robert Hole who passed away in August of 2012. For over 30 years, Bob held the unique position of “investigative prosecutor” (a term he coined, and which aptly fit).

In the early 1980’s Bob recognized that one of the most important functions for the county’s law enforcement agencies was the investigation of Officer-Involved Shootings, and other law enforcement actions which resulted in death or serious injuries to either officers or civilians. Working in conjunction with the Police Chiefs Association, Bob was instrumental in establishing a county-wide policy to investigate these cases which to this day are known as “Protocols.” For the next three decades, Bob directed hundreds of such investigations at all hours of the day and night, in all parts of the county, and in all types of weather. He was a meticulous taskmaster, and he ensured that every possible investigative avenue was explored.

Every year there is an average of 20 or so “Protocols,” the majority of which are Officer-Involved shootings. Bob was always the first to respond to protocol investigations, and he was always the last to leave. Bob literally “Wrote the Book” on the investigation of such cases, and he had more experience in this unique area than virtually any other person in the entire state. Bob’s mentoring of law enforcement on probes of this nature will ensure that our county will benefit for decades to come.

Bob’s systems approach to such investigations proved to be extremely effective and it ensures that many of the county’s most sensitive cases are thoroughly investigated by very experienced investigators working with a deputy district attorney. The “Protocol” concept has since been copied nationwide.

Bob also taught classes on Search Warrants, Search and Seizure, and on Officer-Involved Shooting investigations. Thousands of investigators, officers, and deputies attended his courses. Literally hundreds of investigators throughout California had Bob’s cell phone number, and he made it clear that he was available to offer advice at any hour of the day or night, and he did so on hundreds of occasions.

Bob was cantankerous, opinionated, and never at a loss for words. With Bob you always knew where you stood, and he was never afraid to ask the tough questions, or point out the deficiencies in the investigative efforts. Bob was the ultimate mentor who was totally committed to his profession, and his personal quest for justice. His contributions to the county cannot be overstated.

Paul Mulligan
District Attorney’s Office
Chief of Inspectors

# H. Investigative agencies, formats and responsibilities

1. Three types or formats of LEIF investigations
   a. **Criminal Investigation** investigates possible criminal liability
   b. **Administrative Investigation** focuses upon LEOs' compliance with LEA rules; quality control analysis of LEA; other management concerns
   c. **Civil Litigation Investigation** prepares for possible claims and law suits

2. Separation of the three formats is required
   a. Sharing investigative products between the 3 investigative formats

3. The Criminal Investigation:
   a. Has investigative priority over Administrative and Civil Litigation Investigations
   b. Begins immediately after LEIF occurs
   c. Performed by an **ad hoc Multi-Agency Task Force (MATF)** composed of Criminal Investigators from Venue LEA(s), Employer LEA(s), the District Attorney, and other LEAs as needed
   d. Sheriff’s Crime Lab is responsible for physical evidence
   e. Venue and Employer LEAs and District Attorney are co-equal
   f. Goal of the Criminal Investigation, detailed
   g. Criminal Investigation’s product is provided to MATF agencies
   h. Investigative procedural rules for Criminal Investigation
   i. Must be thorough, fair, complete and professional
   j. **Protocol Investigators’ Group**
   k. Composition of MATF investigative teams
   l. **Case Managers Team**
   m. Venue Agency’s choices in particular situations
      1) Multiple venues, or the boundary is uncertain
      2) Determination for arrest and custodial fatalities
3) Special invocation rule for murder or non-vehicular manslaughter involving "off duty" Law Enforcement

HISTORY OF THE PROTOCOL

In the 1970's and early 1980's, the number of law enforcement related civilian fatalities increased around the country and in Contra Costa County during arrests, vehicle pursuits, and other types of law enforcement activity. At the same time, more law enforcement officers were killed while on duty as the result of both attacks on them, and as the result of auto accidents. Not only were the numbers of civilian and officer fatalities rising; but the incidents drew greater scrutiny from both inside and outside of law enforcement. The impact of such incidents was widespread, both in terms of legal and societal consequences. As a result, the investigation of such cases became considerably more complicated, and challenging.

In early 1982 the members of the Contra Costa County Police Chiefs' Association recognized these trends, and collectively concluded that the interests of everyone would best be served by a standardized system to investigate law enforcement involved fatal incidents throughout Contra Costa County. The members wanted a fair and thorough investigative process which would promptly gather all the relevant facts of each incident while simultaneously recognizing the legal rights and responsibilities of the involved individuals and agencies. In addition, for the first time the process was designed to address the emotional needs of those involved.

It was very important to the Chiefs that these investigations were viewed as being highly credible and impartial. From the beginning, the Chiefs favored using a multi-agency system for the Criminal Investigation of such incidents and they soon decided that all agencies investigating each fatal incident would have equal standing and authority within the investigative process. They believed this would produce the best and most credible investigative product, would maximize the use of investigative resources and skills, and would provide the impartiality that was critical to the integrity of the process.

To establish the new investigative system, a collaborative effort by officials representing all the County's law enforcement agencies began in 1982. The first step was a lengthy and intense meeting with the county's chiefs which helped identify and define many of the issues and expectations for the new system. In the beginning of the process, there was often heated debate among the chiefs on various issues and approaches, as many held very strong opinions as to how the Protocol process should work.

The first draft of the proposed new Protocol was then distributed countywide to be reviewed by a wide variety of personnel in various ranks and assignments in all the County's law enforcement agencies. These reviews resulted in many suggestions, criticisms, and comments. At a subsequent Chiefs' meeting the collective input was considered, after which the second draft was created and again distributed to all agencies. This evolutionary process continued through several more drafts, ending two years after it began when the ninth draft was unanimously approved and implemented in March of 1984. That document, which became commonly known as "The Protocol," was formally titled the "Officer-Involved Fatal Incident Protocol."

That first version of the Protocol contained some revolutionary provisions which drew
skepticism from outsiders. One was the broad range of fatal incidents to which the Protocol process applied, and another was the clear delineation of the three investigative formats. The most radical was the provision that an ad hoc multi-agency task force would conduct the Criminal Investigation of each incident, and that all involved agencies would have equal standing in the management of the investigations. The past three decades, and hundreds of investigations later, have shown the skeptics were wrong; those provisions (among others) are the principal reasons for the Protocol's well-acknowledged and lasting success.

The original 1984 Protocol edition was superseded in November 1989 and March 1991 by two slightly revised editions which contained a few substantive changes that clarified and strengthened previous editions. The Protocol's title remained unchanged.

This 2007 version was created through the same collaborative and evolutionary process that was used to create the original Protocol. It contained significant changes, and included a number of enhancements to various previous provisions to clarify, strengthen and build upon the 1984 Protocol's solid and enduring foundation. That version was formatted and reorganized to make its content more accessible and readable. The Table of Contents had considerably more detail (its Section D also serves as a substitute for an Index) and it referred readers to both a page number and a Reference Number (abbreviated "Ref") indicating where each topic can be located. For cross-referencing purposes, Reference Numbers were added throughout the Protocol's text to guide readers to other relevant provisions. The Protocol's title has been changed from "Officer-Involved Fatal Incident Protocol" to "Law Enforcement Involved Fatal Incident Protocol" because:

1. not all peace officers are referred to as "officers"

2. the Protocol also applies to non-sworn employees of law enforcement agencies in some situations

3. some fatalities occur in connection with law enforcement activities and operations rather than from the conduct of any specific law enforcement individual(s).

Substantively, the fourth edition of the Protocol:

1. extended the application of the Protocol to a broader range of law enforcement involved fatalities, and provided for investigative participation by out-of-county law enforcement agencies.

3. enhanced the structure of the Protocol's multi-agency criminal investigative system

4. contained six very useful Attachments:
   - an expanded Patrol Supervisors' LEIF Checklist for Shootings and Generic Incidents
   - a Patrol Supervisors' LEIF Checklist for Fatal Vehicle Collisions
• a Supervisors’ LEIF Checklist for Custodial Institutional Deaths
• a CSI Checklist - Before The Crime Lab Arrives
• an Autopsy Evidence Collection Checklist
• a Sheriff/Coroner’s Office document entitled Death Investigation Roles of the Coroner and Law Enforcement Agencies

Very significantly, the fundamental elements of the original Protocol were retained, and some were enhanced, through the revisions. Among them:

1. the need for high quality investigations
2. the establishment of three investigative formats (Criminal, Administrative and Civil Litigation), each having its own specified goals and investigative procedural rules and each its own staffing;
3. the recognition and explanation of the rights and authorities of the Criminal and Administrative formats and of the law enforcement personnel with whom they have investigative contact;
4. the designation of the Sheriff’s Crime Lab to process, collect, document and examine physical evidence; and
5. the use of public Coroner’s Inquests following fatal incidents to inform the public, the media, and the decedent’s family of the facts of each incident.

Since 1984, approximately 350 cases have been investigated under the Protocol format. While the majority of those cases involved fatalities and were therefore investigated under the Protocol’s mandatory invocation provision, a significant number of investigations were performed under a provision that allows agencies to request that a Protocol investigation be initiated on a variety of non-fatal law enforcement involved incidents - even in some incidents where no injuries at all were involved.

Deputy District Attorney Bob Hole was the author of the original 1984 Protocol, the revised versions in 1989 and 1991, and the 2005-2007 fourth edition. Five members of the Police Chiefs’ Association constituted a Protocol Revision Committee that collaborated with Bob Hole on the fourth edition. Those members were then Chief Ron Ace of Concord (who was also the Chairman of the Chiefs’ Association until his retirement from the Concord Police Department in May 2005); then Chief Dave Cutaia of Martinez (Chairman of the Chief’s Association from May 2005 to May 2006); then District Attorney Robert Kochly; then Chief Doug Krathwohl of San Pablo; and then Sheriff Warren Rupf. Gratitude is extended to Lana Fisher of the Information Technology Office of the City of Concord who formatted the Protocol’s fourth edition, and to Debbie Peña, Executive Secretary to then Concord Police Chief David Livingston, who did the proofreading.

In adopting the 2007 edition, the Chiefs’ Association recognized and expressed its appreciation to the members of the 1984 Chiefs’ Association, all of whom were responsible for the creation of this very successful system. The “1984 Chiefs” created a model with high standards, and they provided clear guidelines as to when the process should be initiated by an agency. Some set aside personal or institutional egos and territorialism for the ultimate benefit of everyone. They had the foresight to create and adopt Protocol provisions which
would still be valid and in use more than three decades later, and would still be fully supported by the county's law enforcement executives. The beneficiaries of their efforts have been the residents and the law enforcement personnel and agencies of Contra Costa County, and many other jurisdictions inside and outside of California which adopted various forms of the Protocol format.

In August of 2014, the manual was revised. The key addition was the adoption of a policy by the Police Chiefs' Association concerning when an officer involved in a critical incident was allowed to view a recording of the event. The chiefs also formally recognized Deputy District Attorney Robert Hole's by dedicating the manual to him.

MEMBERS OF THE CONTRA COSTA COUNTY POLICE CHIEFS’ ASSOCIATION

The substantive changes in this fifth edition of the Protocol manual were approved by the members of the Chiefs' Association in August of 2014. The years “2005” and “2007” following the Chiefs' names below indicate when the various Chiefs approved the fourth edition of the Protocol. The year “1984” identifies the “founding father” Chiefs who were responsible for the creation and implementation of the first Protocol.

A. PROLOGUE

Fatal incidents involving law enforcement personnel and law enforcement operations place extraordinary demands upon law enforcement agencies and their personnel. In addition to the knowledge, skill and resources required to investigate civilian homicide cases, Law Enforcement-Involved Fatal (LEIF) incidents present unique and often difficult
complexities and challenges.

Many LEIF cases attract considerable attention and scrutiny from family members, segments of the public, the news media, and from various civilian and governmental organizations, institutions and agencies. Occasionally, such incidents will spark riots or other disturbances resulting in significant injuries or deaths to civilians or law enforcement, looting, and extensive property damage.

The right of the public to know what occurred often requires a meticulous balancing of such rights against investigative necessities, and also a consideration of the privacy rights of the individuals involved in such cases.

Often, some members of the public are skeptical or distrustful of the ability of Law Enforcement Agencies (LEAs) to investigate incidents involving employees of their own departments. This is one of the key reasons why such investigations must be impartial, and viewed as true “fact finding missions” regardless of where the facts take the inquiries.

Some of our country’s persistent and profound social problems often are significant factors in encounters between law enforcement and civilians. These factors include mental health issues and the availability of treatment; poverty; language difficulties; actual and presumed biases; scarcity of governmental resources; use of intoxicants; the proliferation of deadly weapons, illegal drugs and criminal street gangs; and the increasing propensity of people to resort to violence to address problems.

LEIF incidents may result in negative social, civil, administrative and/or criminal law consequences for law enforcement agencies and officers, but the possibility of such consequences cannot be allowed to inappropriately affect the pursuit of the truth that is the ultimate goal of the investigation of all LEIF incidents.

During the Criminal, Administrative and Civil Litigation investigations of LEIF incidents, the rights and obligations of Law Enforcement Personnel (as the result of statutes, case law and employment agreements) must be reconciled with the law enforcement officers’ personal rights and obligations under the federal and state constitutions, statutes and case law. This can be a significant investigative complication not encountered during law enforcement’s investigations of purely civilian conduct.

Unless resolved in advance, confusion and even conflict can occur among the involved officers and agencies due to a variety of factors including unfamiliarity with the Protocol process; unawareness of the LEIF guidelines and the three separate investigative functions; individual and/or institutional personalities; training; prior experience; and limited resources. Issues involving the management of the investigation can delay and compromise in-progress investigations and may have long-term detrimental effects upon both the instant and future LEIF incidents.

Because these and other demands and complications exist, the Protocol was developed and has been periodically updated by the Contra Costa County Police Chiefs’ Association to serve as a guide for the investigation of law enforcement involved fatal
incidents in Contra Costa County.

B. SUMMARY OF THE PROTOCOL’S MAJOR PROVISIONS

This Protocol applies to incidents within Contra Costa County in which:

1-fatalities of civilians occur "actually or conceivably as a result of" (defined in Ref 8) conduct of law enforcement personnel, or "actually or conceivably as a result of" law enforcement operations or activities;

2-fatalities of law enforcement personnel which occur "actually or conceivably as a result of" conduct of another person or which occur while on-duty (with some specific exceptions). When incidents fit within any of those categories, use of this Protocol is mandatory. For other incidents involving law enforcement personnel or activities that do not meet the mandatory criteria, involved Member Agencies can optionally invoke the Protocol. Affiliate Protocol Members and Participating ad hoc Agencies (i.e. law enforcement agencies which are not members of the Chiefs’ Association) may request that Member Agencies invoke the Protocol process for incident(s) which occurred in their respective jurisdiction(s).

Three investigative formats (designated the Criminal Investigation, the Administrative Investigation, and the Civil Litigation Investigation) are defined and differentiated by their goals, staffing and procedural authorities. The latter two investigations are performed by the Employer Law Enforcement Agency, that is, the agency whose operation, activity or employee is involved in the fatality. The Criminal Investigation is performed by an ad hoc Multi-Agency Task Force (MATF) (Ref 157) staffed by investigators from the (1) Employer Agency, (2) the Venue agency within whose territorial jurisdiction the incident occurred, (3) the District Attorney’s Office, (4) the Sheriff’s Criminalistics Laboratory, (5) involved out-of-county Employer LEAs in the capacity of Affiliate Protocol Members (Ref 57) or Participating ad hoc Agencies (Ref 58), and (6) other agencies as needed. Within each ad hoc MATF, the Venue Agency(ies), Employer Agency(ies) and the District Attorney, and their investigators, have equal investigative authority and standing.

Due to the nature of Criminal Investigation and its possible consequences, it is required to adhere to the most stringent standards for acquiring its investigative products (such as physical evidence, statements and observations). As a result, the Criminal Investigation has investigative priority over the other two formats. The other two formats have full and timely access to the Criminal Investigation’s products and are free to investigate for their own purposes as long as it does not conflict with the Criminal Investigation.

The Protocol provides many procedural guidelines for the conduct of the Criminal Investigation and some for the Administrative Investigation.

Law Enforcement Personnel have the right to be represented and/or supported by an attorney or someone else during Protocol investigations. They may choose to provide statements, physical evidence and other relevant material and information to Criminal
Investigators and/or Administrative Investigators consensually, or they may choose to
provide such material and information to Administrative Investigators only when compelled
to do so under the authority of the Lybarger/Garry/Kalkines cases (Ref 52).

After each LEIF, a public Coroner’s Inquest will normally be held to present the facts of
the incident to the public, the news media, the decedent’s family and other interested
parties.

C. POLICY

The Chief Executive Officers ¹ of the law enforcement agencies of Contra Costa
County, acting together as the Contra Costa County Police Chiefs’ Association, continue to
strongly believe that justice for everyone is best served by ensuring that Law Enforcement
Involved Fatal Incidents occurring within Contra Costa County are investigated under the
provisions of this Protocol system. It is the policy of the Contra Costa County Police Chiefs’
Association, and of its individual Chief Executive Officer members, that such incidents shall
be investigated under the provisions of this Protocol with professionalism, objectivity,
fairness, thoroughness, compassion, and adherence to legal rights.

While this Protocol represents the understanding and agreement among Member
Agencies and Affiliate Protocol Members about how Law Enforcement Involved Fatal
Incidents are to be investigated, this Protocol is neither a statute, ordinance nor regulation
and it is not intended to increase the civil or criminal liability of Members, Affiliate Protocol
Members and Participating ad hoc Agencies or their employees, and it shall not be
construed as creating any mandatory obligations to, or on behalf of, third parties. Members,
Affiliate Protocol Members and Participating ad hoc Agencies expect that its provisions will
be followed when Protocol incidents occur but it is anticipated that agencies may make
minor modifications, which will not affect the Protocol’s basic principles, to meet agency
requirements.

D. DEFINITIONS AND ABBREVIATIONS

2. “Actually or conceivably a factor”
   “Actually or conceivably a result”

b

These phrases define the nexus that is required for mandatory Protocol invocation
purposes between

- civilian deaths and either the conduct of a “Law Enforcement Person” or the
  operations or activities of a Law Enforcement Agency. REF 69-81

¹ The term “Chief Executive Officers” refers to the Chiefs of Police of Contra Costa County’s various cities, towns, and districts; the
elected Sheriff; the elected District Attorney; and the Captain of the California Highway Patrol’s Contra Costa Office.
• deaths of anyone from vehicle collisions and either the conduct of a "Law Enforcement Person" or the operations or activities of a Law Enforcement Agency. REF 82-93
• deaths of LEOs and the conduct of a person or law enforcement operations or activities. REF 94-103
• specified on-duty and off-duty deaths of Non Sworn Personnel and the conduct of another person or the operations or activities of a Law Enforcement Agency. REF 104-113
• Deaths of anyone from the crash or operation of aircraft or watercraft under control of a Law Enforcement Person. Ref 114

As used in these phrases, the word "conceivably" means "possibly, believably, credibly, plausibly or feasibly" and the word "factor" means an "element, fact or circumstance".

3. "ad hoc". As used in the Protocol, this Latin term means "for the specific purpose, case, or situation at hand and for no other". In the Protocol it does not have its alternative meaning which is "improvised and often impromptu". Ref 9

4. "Administrative Investigation." This type of investigation is performed by Employer Agencies for administrative (i.e. non-criminal) purposes. See Refs 150, 301-315 for specifics. Ref 10

5. "Administrative Investigators". These investigators are assigned by the Employer LEA(s) to conduct Administrative Investigations. Ref 11

6. "Affiliate Protocol Members". These are out-of-county LEAs which have accepted an invitation to participate in Protocol investigations of future LEIF incidents involving those LEAs which occur in Contra Costa County. See Ref 118 for details. Ref 12

7. "Case Managers Team". The Criminal Investigation of each Protocol incident is led by an ad hoc Case Managers Team composed of one lieutenant level official from each of the MATF agencies involved in the investigation. See details at Ref 169. Ref 13

8. "Civil Litigation Investigation". This type of investigation is performed by or for LEAs in anticipation of possible civil law suits. See details at Ref 316. Ref 14

9. "Civil Litigation Investigators". These investigators are employed by, or function on behalf of, involved LEAs for the purpose of conducting Civil Litigation Investigations. Ref 15

10. "Criminal Investigation". These investigations, performed by MATFs, are conducted to determine whether or not anyone committed a crime during Protocol incidents. See details at Refs 149, 154-300. Ref 16
11. "Criminal Investigators". These investigators are assigned to the ad hoc MATFs by the Venue LEA(s), the Employer LEA(s), involved out-of-county LEAs in the capacity of Affiliate Protocol Members or Participating ad hoc Agencies, the District Attorney's Office and assisting LEAs, to conduct the Criminal Investigations of each incident.

12. "Detention". A detention occurs during a person's contact with law enforcement personnel whenever a reasonable and innocent person would believe he/she is not free to either leave or to otherwise disregard the police authority and go about his/her business. Detention is accomplished by exertion of police authority that is less than an arrest but is more substantial than a simple contact or consensual encounter. For further definition, see The Peace Officers Legal Sourcebook ², Section 2, Search And Seizure, Persons, Ill. Detentions and Stops, A. Definition and Purpose.

14. "Employer Agency". This is the LEA by whom the involved Law Enforcement Personnel (Actors and Witnesses) are employed or affiliated. In many cases, the Venue Agency is also the Employer Agency.

15. "Fatality" is synonymous with "death" and means
   a. death has been pronounced or is obvious beyond doubt, or
   b. there is probable cause to believe (Ref 61) the person will die.

16. "Law Enforcement-Involved Fatal Incidents" ("LEIF"s) summarized definition: This term refers to incidents occurring within Contra Costa County which involve law enforcement operations or personnel in which "fatalities" (Refs 21-23) occur to civilians or law enforcement personnel under specified circumstances. A summary of those circumstances follows immediately below; see Refs 68-115 for details.
   a. Fatalities of civilians which are "actually or conceivably a result of" (Ref 8):
      1) conduct of LEOs (either on-duty or off-duty), or of on-duty Non Sworn Personnel, or
      2) law enforcement operations or activities of any type, and specifically including fatalities while under detention, arrest, custody; attempts to detain, control or arrest; and fatalities occurring within 48 hours of a person's release from arrest or custody. See Ref 79 for an exception.

² This excellent publication, written and regularly updated by the California Attorney General's Office, is distributed to all California law enforcement agencies and is also available for purchase by agencies and individuals. For more information refer to the Attorney General's website: http://ag.ca.gov/publications/index.php#lawenforcement.
b. **Fatalities of LEOs, civilians and on-duty Non Sworn Personnel** which are "actually or conceivably a result of" (Ref 8) vehicle collisions which are "actually or conceivably the result of" conduct of LEOs or on-duty Non Sworn Personnel or of law enforcement operations or activities.

Ref 28

---

c. **Fatalities of LEOs**, whether "on-duty" or "off-duty", and "on-duty" Reserve LEOs, which are "actually or conceivably a result of" (Ref 8) conduct of another person or which occur while on-duty or during law enforcement operations or activities (with exceptions listed at Refs 98-101).

Ref 29

---

d. **Fatalities of Non Sworn Personnel** which occur or are caused while "on-duty" and which are "actually or conceivably as a result of" conduct of any other person, or from other circumstances while on-duty, and during law enforcement operations or activities (with exceptions).

Ref 30

---

e. **Fatalities of anyone** caused by the crash or operation of aircraft or watercraft which is under operational control of Law Enforcement Personnel.

Ref 31

---

17. "**Law Enforcement Person**" and "**Law Enforcement Personnel**". These terms encompass the people in the categories below.

Ref 32

---

a. "**Law Enforcement Officers**" (the plural is "LEOs" and the singular is "LEO"). These are sworn peace officers including those who work part-time or on per diem, and those on sick, disability or disciplinary leaves or on vacation at the time of their involvement in a Protocol incident.

Ref 33

---

Reserve LEOs are in this category when they are "on-duty" (Refs 102, 112) but are categorized as "Non Sworn Personnel" when "off-duty".

Ref 34

---

b. "**Non Sworn Personnel**". This term refers to non-peace officer LEA personnel and others who are so closely associated with LEAs in other roles that some Protocol incidents involving them warrant application of the Protocol.

Ref 35

---

1) Examples of people in this category:

Ref 36

---

a) non-peace officer personnel who are employed full time, part time, or temporarily by LEAs, in the following illustrative positions: (1) civilian jailers and other civilian custodial staff such as cooks, teachers, maintenance; (2) medical personnel; (3) security personnel; (4) civilian crime lab, evidence and property room personnel; (5) dispatchers; (6) civilian pilots and crew members of law enforcement owned or operated aircraft or watercraft; (7) civilian technicians, mechanics and fleet staff; (8) civilian managers, analysts and planners; (9) traffic and parking control personnel; (10) non-peace officer Community Service Officers; (11) LEA animal control personnel; (12) clerks, secretaries and receptionists; (13) facility and

Ref 37
equipment personnel; (14) civilian Public Information Officers; (15) non-peace officer employees of the District Attorney's Office including prosecutors and support staff; (16) non-peace officer staff of the Coroner's Division; (17) non-peace officer trainers and their staff; (18) paid cadets and interns; (19) members of the clergy. This category does not include outside vendors and their employees who are performing work for LEAs or within LEA facilities, or employees of the LEA's parent governmental entity (e.g. town, city, county, state or federal).

b) volunteers performing non-paid service to LEAs under the supervision of a LEA, such as civilians, auxiliary officers, former peace officers or other former LEA employees volunteering their services, Volunteers In Police Service (VIPS), Explorer Scouts, non-paid interns and cadets, and Search and Rescue personnel who are neither sworn peace officers or Reserve LEOs. Also included are people serving as volunteers performing job functions listed in Ref 37.

c) informants. For Protocol purposes, informants are categorized as "Non Sworn Personnel" who are "on-duty" only when they are working under the supervision and control of a LEO. At other times they are "off-duty" and are therefore categorized as civilians.

d) visitors in LEA facilities and passengers of LEOs or "on-duty" Non Sworn Personnel.

e) Reserve LEOs are in this category when they are "off-duty" (Ref 34) but are classified as LEOs when they are "on-duty". (Ref 102,112)

c. Duty status

1) "On-duty" for Protocol purposes, includes

a) the usual and common definitions used in law enforcement for "on-duty", and

b) occasions when the Law Enforcement Person is actually, purportedly or apparently acting for a law enforcement purpose at the time of the incident, when he/she would otherwise normally be considered to be "off-duty". (See Ref 39 for a specific provision regarding informants.)

2) "Off-duty" for Protocol purposes are those times when neither 1-a (Ref 44) nor 1-b (Ref 45) apply.

18. "LEA". This acronym means "Law Enforcement Agency".
19. "LEA Actors". These are Law Enforcement Personnel whose conduct was "actually or conceivably a factor" (Ref 8) in a fatality.

20. "LEA Witnesses". These are Law Enforcement Personnel who have knowledge of the circumstances of a Protocol incident but whose conduct was not "actually or conceivably a factor" (Ref 8) in the fatality.

21. "LEIF". This acronym means "Law Enforcement-Involved Fatal Incident" ("LEIFs" is the plural). (See Refs 24-31 for summary definition and Refs 68-115 for details.)

22. "LEO"and "LEOs". These acronyms mean "Law Enforcement Officer" and "Law Enforcement Officers" respectively. Ref 33

23. Lybarger ³/ Garrity ⁴/ Kalkines ⁵. These appellate court cases (hereafter referred to collectively as Lybarger) address and resolve the legal and investigative conflicts that are created when public employees (including Law Enforcement Personnel) invoke their Constitutional rights (such as “taking the ⁵th Amendment) during investigations conducted by their public agency employers. The courts recognize that these employers have legitimate and sometimes very urgent need to obtain information from their employees concerning work-related matters, so they allow public agency employers to legally compel their employees to answer employment-related questions by threatening to take significant disciplinary action against them (which usually involves job termination) if they do not comply. In such situations, the cases hold, employees’ Constitutional rights are sufficiently respected and protected by court decisions that prohibit compelled evidence of any type from being used in criminal proceedings against the person from whom it was compelled. California law allows employers to discipline employees who refuse to answer when compelled to do so, but only if (1) they have been ordered to answer; and (2) they have been told that the resulting compelled information cannot be used against them in criminal proceedings; and (3) the questions are sufficiently related to employee job performance or fitness for duty. Statements made under administrative compulsion can be used administratively against the employee if the statements are false or incomplete or if they contain admissions of wrongdoing. Further, compelled statements can usually be used against the employee in civil law suits.

In January 2007, a California Court of Appeal decision (Spielbauer vs. County of Santa Clara, 146 Cal. App. 4th 914) ruled that the Lybarger procedure does not provide legally sufficient assurance to employees that their administratively compelled incriminating statements will not be used against them in any subsequent criminal case in which they are defendants, and therefore employees who refuse to give such statements cannot be terminated for insubordination. The decision said that, without new legislation, only the grant or offer of formal “use immunity” granted by the courts is legally sufficient. However, that decision was vacated on May 9, 2007 by the California Supreme Court when that Court granted a petition to review the DCA’s decision, leaving the Spielbauer decision

³ Lybarger v. City Of Los Angeles, 40 C3d 1822 (California Supreme Court, 1985)
⁴ Garrity v. New Jersey, 385 US 493 (United States Supreme Court, 1967)
⁵ Kalkines v. United States, 473 F2d 1391 (United States Court of Claims, 1973)
without any legal effect. Thus, the *Lybarger* case remains the controlling authority on this issue until and unless the California Supreme Court and/or the Legislature decide otherwise.

24. “Major Case Page Numbering System”. This is the method used in Protocol investigations for numbering the pages of police reports and their attachments. See details at Ref 299.

25. “MATF”. This acronym refers to the *ad hoc* Multi Agency Task Forces which perform the Criminal Investigations of LEIFs. Each MATF is composed of Criminal Investigators from the involved Venue Agency(ies), the Employer Agency(ies), involved out-of-county Employer LEAs in the capacity of Affiliate Protocol Members or Participating *ad hoc* Agencies, the District Attorney’s Office, and assisting agencies. For incidents involving traffic collisions, the assigned Protocol Collision Investigators are also members of the MATFs. See Ref 157.

26. “Members”, “Affiliates” and “Participating *ad hoc*” LEAs"

a. “Members”, also referred to as “Member Agencies”, are the Law Enforcement Agencies whose chief officers are members of the Contra Costa County Police Chiefs’ Association, all of which have chosen to join this Protocol agreement.

b. “Affiliate Protocol Members” are LEAs which are not Contra Costa LEAs (and whose Chiefs therefore are not “Members” of the Contra Costa County Police Chiefs’ Association) which have chosen in advance, upon invitation, to join this Protocol agreement so they will have Employer Agency status in Protocol investigations of future incidents in which those LEAs or their Law Enforcement Personnel are involved. Ref 118

c. “Participating *ad hoc* Agencies” are LEAs which are neither “Members” nor “Affiliate Protocol Members” but, when they or their Law Enforcement Personnel are involved in Protocol incidents in Contra Costa County, they choose at that time upon invitation on a case-by-case basis to participate as Employer Agencies in Protocol investigations of such incidents. Ref 119

27. “Non Sworn Personnel”. See definition at Refs 35-41.

28. “Participating *ad hoc* Agencies”. See definition at Ref 58.

29. “Probable Cause”. The Protocol definition of this standard of proof is the equivalent of that used so commonly in criminal law i.e., the totality of facts and circumstances, of a reasonably trustworthy nature, known to the decision maker, which are sufficient to warrant a person of reasonable caution or prudence to believe whatever point is at issue. This standard is found in Protocol provisions which define “fatality” (Ref 21-23), which pertain to murder and non-vehicular manslaughter cases involving “off-duty” Law Enforcement Personnel (Refs 72, 96, 180), which apply to certain deaths in custody (Ref 79) and to deaths of Law Enforcement Personnel in solo traffic collisions (Ref 93).
30. "Protocol Case" and "Protocol incident". These terms refer to an incident that is or was investigated, or will be investigated, or should be investigated, under the provisions of this Protocol, whether by mandatory or optional invocation. Ref 62

31. "Protocol Collision Investigators". These are investigators from law enforcement agencies and from the private sector who are qualified to investigate vehicle collisions (and vehicle movement in non-collision incidents) as members of the MATF investigations of Protocol cases. See Refs 189-192 for details. Ref 63

32. "Protocol Collision Investigators Group". This is a manpower pool of pre-selected Protocol Collision Investigators from various Member LEAs who are potentially available to join MATF investigations of Protocol cases involving LEAs other than their own when their assistance is needed by the MATF or by an LEA participating in the MATF investigation. See details at Refs 193-202. Ref 64

33. "Protocol CSI Group". This is a manpower pool of pre-selected Crime Scene Investigators from various Member LEAs who are potentially available to join the MATF investigations of Protocol cases involving LEAs other than their own when their assistance is needed by the Crime Lab. See Ref 212 for more details. Ref 65

34. "Protocol Investigators' Group". This is a manpower pool of pre-selected investigators from various Member LEAs who are potentially available to join MATF investigations of Protocol cases which involve LEAs other than their own when their assistance is needed by the MATF or by a LEA participating in the MATF investigation. See Ref 167 for details. Ref 66

35. "Venue Agency". The Venue LEA is/are the one(s) within whose geographical jurisdiction the Protocol incident occurs. Only Members of the Contra Costa Police Chiefs' Association can be Venue Agencies. See Refs 170-179 for Venue Agency Determination In Particular Situations. Ref 67

E. "LAW ENFORCEMENT INVOLVED FATAL INCIDENTS" "(LEIFIs)" - MANDATORY Ref 68

Law Enforcement-Involved Fatal incidents (LEIFIs) are "fatalities" (Refs 21-23) of civilians and of Law Enforcement Personnel which occur in Contra Costa County under any of the circumstances listed below. Fatalities which met the criteria listed below shall be investigated under this Protocol, i.e. they are mandatory Protocol cases, the criteria for which are:

1. Incidents fatal to civilians in which (a) the conduct of a "Law Enforcement Person" or (b) the operations or activities of an LEA, is/are "actually or conceivably a factor" (Ref 8) in the fatality. Ref 69

   a. Conduct of Law Enforcement Personnel:

      1) LEOs (Ref 51) who are either "on-duty" (Refs 42-45) or "off-duty" (Ref 46). Ref 70

      Ref 71
a) Special rule for some murder or non-vehicular manslaughter cases: When there is probable cause to believe (Ref 61) that a "Law Enforcement Person" (Ref 32+) is either a murder or non-vehicular manslaughter victim or suspect, and when it appears that the fatality was not during an "on-duty" (Refs 42-45) event for either involved person, the Venue Agency, if it is not also the Employer Agency, has the option, after consultation with the District Attorney's Office, of investigating the incident itself without utilizing the Protocol. Determining the Venue Agency shall be on the same basis as in any civilian homicide case. The same provision is at Refs 96, 180.

2) Reserve LEOs only when "on-duty" (Ref 34).

3) "Non Sworn Personnel" (Refs 35-41) only when "on-duty" (Refs 43-45).

b. Law enforcement operations or activities of any type in which a fatality occurs, such as these examples:

1) during attempts by LEOs, "on-duty" Reserve LEOs or by "on-duty" Non Sworn Personnel to detain, arrest or gain physical control of a person.

2) while the person is under "detention" (Ref 18), arrest or physical control by LEOs, "on-duty" Reserve LEOs or by "on-duty" Non Sworn Personnel.

3) while the person is in custody including, for example, in the field, in vehicles, sally ports, holding cells, jails, interview rooms, court facilities, or medical facilities.

a) Exception: Excluded from mandatory Protocol investigations are post-booking deaths of prisoners which occur in jails, hospitals or other facilities while prisoners are under the care of LEA-provided medical personnel for diagnosed diseases or conditions which have been known and monitored and/or treated by the LEA’s medical care provider prior to death, but only when the deaths were medically expected and when there is probable cause to believe (Ref 61) that custodial suicide, trauma, accident, or use of intoxicants was not involved.

4) fatalities occurring within 48 hours after the decedent’s release from detention, arrest or custody.

a) Qualification: Such fatalities are mandatory Protocol cases only if any LEA categorized in Refs 175 to 179 conclude(s), based upon evaluation of the circumstances after law enforcement’s awareness of the fatality, that the fatality is "actually or conceivably a result" (Ref 8) of something that occurred during the decedent’s recently-ended detention, arrest or custody. In each specific case, any or all the LEAs within the listed
categories may elect to participate in these Protocol investigations.

2. **Vehicle collisions: Incidents fatal to anyone from vehicle collisions** which are "actually or conceivably a result of" (Ref 8) collisions of one or more vehicles with something or someone, when (a) the conduct of on-duty or off-duty LEOs, on-duty Reserve LEOs or on-duty Non Sworn Personnel, or (b) the operations or activities of law enforcement, are "actually or conceivably a factor" (Ref 8) in the result. For incidents to be within this category it is not necessary that vehicles operated by Law Enforcement Personnel collide with anything or anyone, nor is it necessary for a vehicle pursuit to be involved. Examples of included situations are:

   a. routine or normal driving

   b. emergency response driving

   c. training

   d. pursuits

   e. driving with intent to catch up to another vehicle for the purpose of identifying it or its occupants, or for surveillance purposes.

   f. fatalities which occur very soon after Law Enforcement terminates pursuits before stopping the target vehicles when it appears from the manner of driving and the close time and distance proximity of the collision to law enforcement vehicle(s) that the drivers of the pursued vehicles who directly or indirectly caused the fatalities (including to himself/herself) were still driving in apparent attempt to evade the LEOs or to avoid being stopped or identified.

   g. fatalities caused by vehicle collisions "actually or conceivably the result of" (Ref 8) utilization of law enforcement attempts, techniques or equipment to stop or alter the course of vehicles. Examples include pursuits, stationary or rolling road blocks, check-points, barricades, ramming, precision immobilization technique (PIT maneuver), in-line active vehicle containment, tire deflation devices, etc.

   h. attempts by Law Enforcement Personnel, with or without use of vehicles driven by them, to slow, redirect or stop vehicles for purposes of traffic control.

   i. fatalities of passengers of LEOs or of "on-duty" Reserve LEOs or "on-duty" Non Sworn Personnel, such as ride-alongs, victims, witnesses, injured people, stranded motorists, etc.

   j. fatalities in which law enforcement gunfire directed at a person or at a vehicle is "actually or conceivably a factor" (Ref 8) in the collision's occurrence.

   k. excluded: solo traffic collisions in which driver LEOs, "on-duty" Reserve LEOs
or “on-duty” Non Sworn Personnel are the decedents and only occupants of the involved vehicles and when there is probable cause to believe (Ref 61) that no other people or occupied vehicles were involved in the collisions or in their causation.

3. Incidents fatal to LEOs

a. in which the conduct of another person is “actually or conceivably a factor” (Ref 8) in the fatality, whether the victim LEO is “on-duty” or “off-duty” at the time of the incident, and whether or not there was a law enforcement purpose for the conduct of either party. (This category includes the fatality of one LEO caused by another LEO).

1) Special rule for some murder or non-vehicular manslaughter cases: When there is probable cause to believe (Ref 61) that a “Law Enforcement Person” (Ref 32+) is either a murder or non-vehicular manslaughter victim or suspect, and when it appears that the fatality was not during an “on-duty” (Ref 43-45) event for either involved person, the Venue Agency, if it is not also the Employer Agency, has the option, after consultation with the District Attorney’s Office, of investigating the incident itself without utilizing the Protocol. Determining the Venue Agency shall be on the same basis as in any civilian homicide case. The same provision is at Refs 72, 180.

b. which occur “on-duty”, or when law enforcement operations or activities (including training) are “actually or conceivably a factor” (Ref 8) in the result, even when there is no indication that the conduct of another person is “actually or conceivably a factor”.

1) Exception: LEO fatalities from the causes and circumstances listed below are not mandatory Protocol cases unless criminal conduct (including the LEO’s) is “actually or conceivably a factor” (Ref 8) in the fatality:

a) deaths from apparent natural physiological causes such as heart attacks.

b) accidental deaths caused by weather and other natural events such as floods, mud or land or rock slides, earthquakes, tornadoes, tsunamis, lightening, high winds, falling trees, etc.

c) accidental deaths caused by falling, drowning, fire, smoke, hyperthermia (heat stroke), electrocution, exposure to the toxins including those from insects, structure collapse, being struck by falling objects, and animals.

c. which occur to “on-duty” Reserve LEOs (Ref 34) with exceptions listed in Refs 98-101.
d. “off-duty” suicides of LEOs are mandatory Protocol cases only when the conduct of another person is “actually or conceivably a factor” (Ref 8) in the death.

4. Incidents fatal to Non Sworn Personnel:

a. “On-duty” (Ref 43-45) when the fatality is “actually or conceivably the result of” (Ref 8) the following:

1) conduct of another person.

2) other circumstances while “on-duty”, or during law enforcement operations or activities, including training.

a) exception: “on-duty” fatalities to Non Sworn Personnel from the causes and circumstances listed below are not mandatory Protocol cases unless criminal conduct is “actually or conceivably a factor” (Ref 8) in the fatality:

1. deaths from apparent natural physiological causes such as heart attacks.

2. deaths apparently caused by weather and other natural events such as floods, mud or land slides, earthquakes, tsunamis, lightening, tornadoes, falling trees, high winds, etc.

3. accidental fatalities apparently caused by falling, drowning, fire, smoke, electrocution, exposure to toxins, being struck by falling objects, including during search and rescue attempts.

b. Fatalities of “on-duty” Reserve LEOs are considered to be the same as fatalities of regular LEOs (Ref 34).

c. “Off-duty” fatalities of Non Sworn Personnel are not mandatory Protocol cases.

5. Aircraft and watercraft deaths: Incidents fatal to anyone which are “actually or conceivably a result of” (Ref 8) the crash or operation of an aircraft (whether in the air or on the ground) or watercraft, which at the time of the incident is under the operational control of Law Enforcement Personnel.

6. See Chart entitled “Duty Status Criteria For Mandatory Protocol Invocation” on the following page:
Duty Status Criteria for Mandatory Protocol Invocation

when "conduct of a law enforcement employee" (Refs 69-74, 82, 95, 105-106) is the required nexus between a fatality and law enforcement's possible causal relationship to it. This chart is not applicable when the required nexus is "the operations or activities of a Law Enforcement Agency" (Refs 69, 75-81, 82-93, 97-103).

### Actor

the individual whose conduct was "actually or conceivably a factor" (Ref 8) in the fatality

"LEO" means a Law Enforcement Officer, i.e., a sworn peace officer. Ref 33.

"NSP" means Non Sworn Personnel of a Law Enforcement Agency. Refs 35-41. Reserve officers are categorized as LEOs when they are "on-duty" but are considered Non Sworn Personnel when "off-duty". See duty definitions below.

"On-duty" means (1) when actually "on-duty", or (2) when acting actually, apparently or purportedly for a law enforcement purpose when otherwise off-duty (Refs 43-45). "Off-duty" means at other times (Ref 46).

"Mandatory but exception" means these are mandatory Protocol cases except when there is "probable cause" (Ref 61) to believe that the LEO or NSP is either the victim or suspect in a murder or non-vehicular manslaughter and when it appears that the fatality was not during an "on-duty" (see definition above) event for either involved party. In such cases the Venue Agency, if it is not also the Employer Agency, has the option, after consultation with the District Attorney's Office, of investigating the incident itself without utilizing the Protocol. Refs 72, 96, 180.
F. LEIF INCIDENTS INVOLVING NON-MEMBER (OUT-OF-COUNTY) LEAS

1. The activities or operations of out-of-county LEAs, or the conduct of their Law Enforcement Personnel, may result in LEIF incidents that occur within Contra Costa County. For Protocol purposes non-Member Agencies fall within one of the classifications below:

   a. Affiliate Protocol Member: The Chiefs’ Association may invite selected out-of-county LEAs to become Affiliate Protocol Members. LEAs that accept will have full participation as Employer Agencies in future Protocol investigations of LEIF incidents involving their personnel or their activities and operations that occur in Contra Costa County.

   b. Participating ad hoc Agency: Out-of-county LEAs which are not Affiliate Protocol Members may be invited by the Case Managers Team (Ref 169) to be a Participating ad hoc Agency when involved in an LEIF incident in the County. If it agrees, it will have full participation as an Employer Agency in that Protocol investigation.

   c. Out-of-county LEAs that are neither Affiliate Protocol Members nor Participating ad hoc Agencies will not have a full participatory role in Protocol investigations of incidents involving their personnel or their operations or activities in the County, although some accommodation may be made by the Case Managers Team regarding their involvement in the Protocol investigations of each incident.

2. LEAs, including out-of-county LEAs in any capacity, may conduct their own Administrative and Civil Litigation investigations of Protocol incidents as they wish but those investigations shall not be conducted in conflict or competition with the Criminal Investigation (Refs 308, 316).

3. See Refs 125-146 for the optional invocation provisions applicable to Affiliate Protocol Members and Participating ad hoc Agencies.

G. INVOKING THE PROTOCOL

1. Automatic and Immediate (“mandatory”) Invocation:

   Upon the occurrence of each “Law Enforcement Involved Fatal Incident” (defined in summary at Ref 24-31 and in detail at Refs 68-115) this Protocol is automatically and immediately effective. Prompt notification to appropriate LEAs and officials is the responsibility of the Venue Agency(ies).

2. Optional Invocation:

   This Protocol may be optionally invoked for incidents involving law enforcement personnel or LEA activities and operations which are not included within the
definition of "Law Enforcement Involved Fatal Incidents" (Refs 68-115) if possible criminal conduct of anyone involved in the incident is an issue that should reasonably be determined. Neither death nor bodily injury is a pre-requisite to optional invocation under this category, thus the Protocol may be invoked for incidents involving any type of potential crime, including but not limited to: property and person crimes; integrity crimes; crimes against the government or the justice system; contraband crimes; crimes against public health, safety or peace; threat crimes; and state civil rights crimes.

a. **Member Agencies**: each Member Agency of this Protocol, when in the capacity of a Venue Agency or Employer Agency, may optionally invoke this Protocol for incidents of the type described above (Ref 125). Upon these optional invocations, incidents will be investigated under the provisions of this Protocol.

b. **Affiliate Protocol Members** (Ref 118) and **Participating ad hoc Agencies** (Ref 119) may request that the optional invocation provision of this Protocol be utilized for incidents involving their personnel or their law enforcement operations or activities occurring within the County, but the decision to optionally invoke the Protocol must be made by a Member Agency who has Venue or Employer Agency status concerning the incident. Upon these optional invocations, the incidents will be investigated under the provisions of the Protocol with the Affiliate Protocol Members and Participating ad hoc Agencies having investigative roles in the Protocol investigation, as would be the case with a mandatory invocation.

c. **Examples of optional invocation situations**: (Also see decision-making factors at Refs 133-143.)

1) Fatalities to civilians or to Law Enforcement Personnel which are outside the definition of "Law Enforcement Involved Fatal Incidents" (Refs 68-115).

2) Incidents involving physical injuries which are not “fatal”. Refs 21-23

3) Other sensitive events involving LEAs operations or activities or their personnel where the issue of anyone’s possible criminal conduct should reasonably be determined.

d. **The District Attorney may decline to participate in optional invocations.** Declination would most likely occur when it appears to the District Attorney that the possibility of criminal conduct is either absent or not sufficiently high to warrant the District Attorney’s participation in the Protocol investigation, or when it lacks the necessary resources to participate. The District Attorney will not investigate, nor participate in another LEA’s investigation of, matters which are purely of an Administrative or Civil Litigation nature.

e. These factors may be relevant to those considering optional invocations:
1) Injuries to an involved person have not resulted in death, and imminent death is not then medically expected, but the LEA wants a Protocol investigation to begin immediately despite the medical prognosis. Ref 134

2) The LEA lacks the resources, experience and/or manpower to conduct a proper and timely Criminal Investigation by itself. Ref 135

3) Circumstances concerning the incident cause the LEA to have a special need to utilize the Protocol to ensure a thorough, impartial and credible Criminal Investigation. Ref 136

4) The personnel, or the operations and activities, of multiple LEAs are involved in the incident. Ref 137

5) One or more other LEAs may be affected by the results of the investigation. Ref 138

6) The LEA may be concerned about an actual or perceived conflict of interest which a Protocol investigation could minimize. Ref 139

7) The involvement of a notable person in the incident may actually or perceivably have a negative impact upon the ability of the LEA to properly conduct a credible investigation by itself. Ref 140

8) The incident is connected to another matter which is being or was investigated as a Protocol case. Ref 141

9) The incident is factually and/or legally complicated, or involves many people. Ref 142

10) For other articulated reasons the LEA believes that the interests of justice would be best served by utilizing the Protocol. Ref 143

f. When in doubt about optionally invoking on a specific case, it is usually advisable to promptly invoke so a Protocol investigation can start immediately. Subsequently, if the facts or the perceptions of the incident change after the investigation begins, the Protocol investigation can be terminated by mutual agreement and the involved agency(ies) may complete the investigation as they consider appropriate. Ref 144

g. In lieu of invoking the Protocol in optional situations, the involved LEA(s) may, of course, unilaterally investigate the incident or may seek investigative services from other LEAs as they choose. Ref 145

h. If the Employer Agency could use the optional invocation provision for a specific incident but has declined to do so, a displeased Law Enforcement
Person who is an Actor (Ref 48) in the incident or who is otherwise involved in it in a substantial way may ask his/her Employer Agency, directly or through his/her attorney or other representative, to reconsider the decision and take into account the person’s desire for optional invocation. If the LEA is still not convinced that optional invocation is appropriate, it is suggested that the LEA, the involved person (directly or through his/her legal or other representative) and the District Attorney's Office promptly hold a three-way discussion to resolve the matter.

H. INVESTIGATIVE AGENCIES, FORMATS AND RESPONSIBILITIES

1. Three types or formats of investigations are available for LEAs to use for Protocol incidents. Each of the three has a distinct purpose:

   a. A Criminal Investigation is performed to determine whether or not any of the involved individuals did or did not commit a crime. (See Ref 154-300 for specifics about this format.) This format is always utilized but the other two are at the discretion of the involved LEAs.

   b. An Administrative Investigation may be performed to (1) determine if involved Law Enforcement Personnel acted within the LEA's policies, procedures, training and orders; (2) determine if and how the LEA can improve any aspect of its operations (i.e. a quality control analysis); and (3) provide information about the incident to the LEA's leadership for other management purposes. See Refs 301-315 for specifics about this format.

   c. A Civil Litigation Investigation may be performed to prepare the LEA, its parent government, and usually its employees, to defend against civil claims or civil law suits that may arise from Protocol incidents. See Ref 316 for specifics about this format.

2. To ensure that each of these three different investigations have the best opportunity to achieve their respective purposes, to conform to and benefit from the different legal procedural rules applicable to each, and to avoid problems that result from investigators crossing back and forth between investigative formats in the same case, separate investigations must be performed for each of these investigative purposes. Each investigation must use its own investigators, each investigates for its own purposes, and each follows the investigative procedural legal rules applicable to it.

   a. The Criminal Investigation can and will share its information freely with the other two investigative formats (Ref 164) but the converse is not true. The Administrative Investigation generally cannot share any information with the Criminal Investigation that was obtained directly or indirectly as a result of a Lybarger (Ref 52) admonition, however exceptions may occasionally apply, so consult a knowledgeable prosecutor or legal advisor if this issue arises. To preserve a primary advantage of using the Civil Litigation Investigation, the
sharing of its investigative product with the other two formats may need to be significantly restrained; confer with the LEA’s civil litigation attorney or risk manager.

3. The Criminal Investigation

a. The Criminal Investigation has investigative priority over both the Administrative Investigation and the Civil Litigation Investigation. The latter two formats may take whatever investigative action they wish when the Case Managers Team (Ref 169) determines that the Criminal Investigation would not be compromised by such actions. Regarding interviews with anyone, in most cases this means that once the Criminal Investigation has finished its interview with a person, or the person declines to be interviewed by the MATF investigators, the other investigative formats are free to interview that person as they wish.

b. It begins immediately after an LEIF has occurred.

c. It is performed by Criminal Investigators supplied by the Venue LEA(s), the Employer LEA(s) (including involved out-of-county LEAs in the capacity of Affiliate Protocol Members or Participating ad hoc Agencies), and the District Attorney’s Office. The Protocol Investigators Group (Ref 167), the Protocol Collision Investigators Group (Ref 193) and other LEAs and personnel may be utilized as needed. These investigators are formed into an ad hoc Multi-Agency Task Force (“MATF”) for each LEIF investigation.

d. The Sheriff’s Crime Lab (Ref 211) is responsible for physical evidence. See Ref 203 concerning use of the Crime Lab for vehicle collision cases.

e. Venue and Employer LEAs (including Affiliate Protocol Members and Participating ad hoc Agencies) and the District Attorney’s Office are co-equal within MATF investigations.

f. The goal of the Criminal Investigation is to develop all available relevant information about the Protocol incident so a subsequent determination about the presence or absence of criminal liability on the part of anyone involved in the incident can be properly made. Specifically it investigates:

1) whether or not conduct of anyone involved in the incident is prohibited by California criminal law, and if criminal conduct did occur:

   a) determine who is responsible for that conduct; and

   b) determine the degree of the crime(s); the existence of any factual or legal defenses; and the presence or absence of any factors which would mitigate or aggravate punishment for such crime(s).
g. Its entire investigative product will be promptly shared with all LEA(s) participating in the MATF and with other LEAs as appropriate for their uses, including use in any Administrative or Civil Litigation Investigations they may conduct. While the Criminal Investigation does not directly address Administrative or Civil Litigation concerns, its investigative product is often very relevant to issues those other investigative formats may address.

h. The Criminal Investigation is required to follow the rules of law that apply to all criminal investigations, i.e., those established and defined by the federal and state constitutions, federal and state statutes, and case law.

i. It is performed in a manner that provides both the appearance and the reality of a thorough, fair, complete and professional investigation that is free of conflicts of interest.

j. **Protocol Investigators' Group:**

Investigators from Member Agencies and Affiliate Member Agencies who are experienced and skilled in Protocol investigations may be invited to join the Protocol Investigators Group. Thereafter, when their investigative expertise and experience is needed, members of this Group may be called upon to join MATF investigations of incidents in which their LEAs are neither a Venue nor Employer Agency. (Of course investigators may participate in MATF investigations of incidents in which their LEA is a Venue or Employer Agency whether they are members of this Group or not.) To be eligible for membership in this Group, there must be an adequate indication from the investigator, as well from his/her LEA, that the investigator is potentially willing and available to assist in such investigations. The District Attorney's Office selects the members for this Group and maintains the list of its members. Decisions to call upon Group members for assistance on specific Protocol incidents, and selection of specific investigators to be used, shall be made by the Case Managers Team (Ref 169).

k. For each incident, the MATF investigators will be assigned as appropriate to investigative teams by the Case Managers Team. The number of teams utilized will depend upon the specific circumstances of each incident, the number and complexity of investigative tasks to be performed, how rapidly various tasks must be performed, and upon manpower availability. Normally each team will consist of one criminal investigator from each of the MATF agencies. The MATF agencies may elect to participate or not participate on various teams and in various aspects of the MATF's investigation as they consider appropriate.

l. **Case Managers Team:**

Each MATF investigation is led by an *ad hoc* Case Managers Team. Each of the MATF agencies will contribute one person to this team. Generally the
officials assigned to this Team should hold the approximate rank of lieutenant, or if holding lesser rank, should be given lieutenant-level authority by their agencies for their participation on this Team.

These individuals should be experienced and knowledgeable in LEIF investigations, should have supervisory authority over investigators from their respective agencies and should have sufficient knowledge and authority to make a variety of decisions pertaining to the MATF investigation of the incident on behalf of their agencies and to implement those decisions.

As members of the Case Managers Teams they will become aware of issues that may affect their LEAs which are collateral to or outside the realm of the Criminal Investigation. They will need both the authority and the management perspective of a lieutenant-level individual to properly address those issues.

Officials assigned to the Case Managers Team work together as a team and the members are co-equal. While their primary function is to work with each other to manage and coordinate the Criminal Investigation, occasionally one or more members may need to perform some Criminal Investigative functions. See Refs 228-236 regarding criteria for selecting Criminal Investigators and Case Managers.

m. Venue Agency Choices in Particular Situations:

1) When a Protocol incident occurs in part in two or more jurisdictions, or if it occurs on the boundary of two jurisdictions (per the definition of California Penal Code §782), or at a location where the boundary is not readily ascertainable or is in dispute, the Venue Agency(ies) shall be:

   a) the Employer Agency if the LEA Actor (Ref 48) is employed by either boundary LEA; or

   b) both boundary agencies if LEA Actors are employed by both; or

   c) the LEA which has the greater interest in the case by virtue of having the predominant police involvement in the LEIF or by virtue of having had the majority of acts leading up to the fatality occur within its jurisdiction.

2) For detention, arrest and institutional custodial fatalities, the following LEAs may be Venue and/or Employer Agencies and may participate in the Protocol investigations of such incidents as they decide:

   a) the LEA having custody of the person at the time his/her distress was first discovered.

   b) the LEA(s) having territorial jurisdiction to investigate the death or
any event which may have caused or contributed to it.

c) the LEA which had actual custody at the time of the fatality.  

d) an LEA which surrendered the detainee, arrestee or prisoner into the possession of another LEA.

3) Special rule for some murder or non-vehicular manslaughter cases: When there is probable cause to believe (Ref 61) that a "Law Enforcement Person" (Ref 32+) is either a murder or non-vehicular manslaughter victim or suspect, and when it appears that the fatality was not during an "on-duty" (Refs 43-45) event for either involved person, the Venue Agency, if it is not also the Employer Agency, has the option, after consultation with the District Attorney's Office, of investigating the incident itself without utilizing the Protocol. Determining the Venue Agency shall be on the same basis as in any civilian homicide case. The same provision is at Refs 72, 96.

4) When an "on-duty" LEO is an Actor (Ref 48) in a Protocol incident that occurs within the jurisdiction of another Member LEA, and when that LEO was apparently "on-duty" (as defined in Refs 43-45) at the time of the Protocol incident, the Venue Agency may elect to relinquish its Venue Agency role in the Criminal Investigation to the Employer Agency if both LEAs agree. The Employer LEA would then act as both the Venue and the Employer LEA for purposes of the Protocol investigation. The same option applies when the nexus between the fatality and the non-Venue LEA is its operations or activities.

5) Protocol incidents occurring within the jurisdiction of Districts:

The LEAs of the East Bay Regional Park District (EBRPD), the Bay Area Rapid Transit District (BART), and the Contra Costa Community College District shall be Venue Agencies for incidents occurring within their jurisdictions. Other LEAs, such as the Sheriff's Office and city police departments may, at their option, also be Venue Agencies for incident investigations when they have concurrent jurisdiction over such incidents, or when they are Employer Agencies, or when requested by the involved District.

n. When a Venue or Employer Agency lacks sufficient investigative resources to perform its role in a Protocol investigation, or when it believes it is more appropriate for another LEA to participate in the investigation in its place, it has these options:

1) Obtain investigators from the Protocol Investigators Group to staff MATF positions which would otherwise be staffed by the LEA's own personnel. These borrowed officers would work on behalf of the requesting LEA as
if they were employed by it.

2) Obtain Criminal Investigators directly from one or more other Member Agencies. These borrowed officers would work on behalf of the requesting LEA as if they were employed by it.

3) Inform the Case Managers Team that it lacks sufficient manpower to staff its normal positions on the MATF. If the Case Managers Team believes more investigators are necessary to fill those positions, it can obtain them from the Protocol Investigators Group or elsewhere. Those investigators would then work as MATF investigators under the Case Managers Team but would not work as if they were employed by the requesting Agency.

4) Relinquish its criminal investigative responsibility to another Member Agency which is willing to substitute itself into the position the requesting LEA would otherwise have had on the MATF.

o. Vehicle collision fatalities:

1) **Vehicle Collision Investigators**: Fatalities associated with vehicle operations (as defined in Refs 82-93) shall be investigated by one or more well qualified vehicle collision investigator(s) working as members of the MATFs investigating those incidents. The Case Managers Team will determine which of the following collision investigators shall be used:

   a) members of the **Protocol Collision Investigators Group**. Refs 193-202

   b) members of a **California Highway Patrol Multidisciplinary Accident Investigation Team** ("MAIT"). For Protocol purposes this category includes active MAIT members as well as CHP officers who are former MAIT members who have retained their qualifications and are in good standing.

   c) other qualified vehicle collision investigators (not from Refs 190-191) selected by the Case Managers Team.

2) **The Protocol Collision Investigators Group** is composed of vehicle collision investigators from law enforcement agencies and from the private sector who have been pre-selected to perform Protocol investigations of traffic collision incidents and other selected Protocol incidents which involve vehicle movement.

   a) A qualifications committee, appointed by the Chiefs' Association and meeting as necessary, will screen interested investigators and will establish the membership of the Group. The listing of qualified
investigators in this manpower pool will be maintained by the District Attorney's Office and shall be updated as necessary.

b) The qualifications for membership in the Protocol Collision Investigators Group are:

1. successful completion of a California POST (or equivalent) approved Traffic Accident Reconstruction (TAR) course or an Advanced Traffic Collision Investigation course.

2. a demonstrated sufficient quantity of practical field experience, including the identification, documentation, collection and interpretation of collision physical evidence, and interviewing.

3. previous qualification as an expert witness on the subject in court and/or in approximately equivalent non-courtroom proceedings, or a showing that he/she is capable of being so qualified.

4. evidence that he/she keeps current with the subject.

5. familiarity with, and acceptance of, this Protocol's method of conducting investigations and willingness to work within its MATF format.

6. an adequate indication from the investigator, as well from his/her LEA, that the investigator is potentially willing and available to assist in such investigations.

c) the Case Managers Teams will select the members of the Protocol Collision Investigators Group to be utilized for individual Protocol cases.

3) The assigned vehicle collision investigators may be assisted by other vehicle collision investigators (even if not from MAIT or from the Protocol Investigators Group) working under their/his/her supervision. For scene measuring, diagramming, photography, videography and evidence collection, assistance may also be provided by Crime Lab personnel, forensic scene diagrammers or mappers, Crime Scene Investigators, or by other LEA personnel. On-scene collaboration with the Sheriff's Crime Lab regarding the identification, documentation, collection and laboratory analysis of physical evidence is encouraged.

4) One or more vehicle collision investigators from the Employer Agency cannot investigate the incident alone; at least one other qualified vehicle collision investigator from another agency must jointly investigate.

5) If additional experts are needed they shall be selected by the MATF's Case Managers Team after consultation with the assigned vehicle collision investigators.
6) The Case Managers Team will determine the responsibility for the quality control review of investigative reports written by members of the Protocol Collision Investigators Group on a case by case basis.

p. First Responders’ Scene Responsibilities, Procedures and Checklists

1) After Protocol incident scenes are tactically stable, each LEA is responsible for immediately securing scene(s) within their territorial jurisdiction and for effectively and appropriately managing the numerous first responder tasks that need to be performed. Before the Crime Lab arrives and before the MATF investigation begins, this responsibility may be shifted by mutual consent of the involved LEAs, and it may be modified later by the Case Managers Team.

2) The scope of the first responders’ scene-related tasks is shown in the content of four Checklists which are Attachments to this Protocol and are listed below. Three of them apply to the most common types of incidents (shootings, vehicle collision fatalities and institutional custodial fatalities) and the fourth is a checklist to guide CSIs (and others) before the Crime Lab arrives. While these Checklists contain many specific directions and suggestions, no Checklist can anticipate everything that needs to be done, therefore sound judgment must be exercised because some tasks will need to be performed which are not on the Checklists and some deviations from the Checklists will occasionally be appropriate. For some incidents it will be appropriate to utilize all or portions of several Checklists.

- *Patrol Supervisors’ LEIF Checklist - Shootings and Generic Incidents.* Attachment A on Pages 50-62.

- *Supervisors’ LEIF Checklist - Institutional Custodial Deaths.* Attachment C on Pages 70-76.

q. Physical Evidence Responsibility:

1) The Contra Costa Sheriff’s Criminalistics Laboratory (the Crime Lab) has the responsibility for processing scenes and physical evidence in most Protocol cases (Ref 158). This includes: documenting the scene(s) and their contents; locating, collecting, preserving and analyzing physical evidence; conferring with LEIF investigators; writing reports; and testifying as needed. See Ref 203 for the Crime Lab’s role in vehicle collision cases.
2) The Protocol CSI Group

This Group is established to assist individual Member Agencies, the MATF investigators, and/or the Crime Lab, with evidence and scene processing aspects of Protocol investigations. Members of this Group are LEA employees, either peace officers or not, for whom there is adequate indication from the CSI as well from his/her LEA that the CSI is potentially willing and available to assist with physical evidence work on Protocol cases on an as-needed basis. Qualifications for membership in this Group will be determined by the Director of the Crime Lab who shall also maintain and update the list of Group members as necessary.

3) In rare Protocol cases, very little physical evidence work may need to be performed in the field. In those cases the Crime Lab need not be utilized to process the scene(s) or to collect evidence if all the members of the Case Managers Team agree. If any member of the Case Managers Team does not agree, the Crime Lab shall be used.

   a) When the Crime Lab is not utilized in such cases, the MATF may utilize members of the Protocol CSI Group, but the Group member(s) who selected may not all be employed by the Employer Agency.

   b) If the Case Managers Team is inclined toward not using the Crime Lab to process specific scenes, it should consider that criminalists who are later asked to do forensic reconstructions may be at a disadvantage if they did not perform the scene processing themselves or were not present when it was being done.

4) The Crime Lab may request that MATF Agencies furnish personnel (whether CSIs or not) to assist it with scene and evidence work. Furnished personnel will work under the direction of the Crime Lab. MATF investigators designated by the Case Managers Team may also be assigned to scene or evidence tasks; their work may be performed under the direction of the Crime Lab or not, as the Case Managers Team and the Crime Lab jointly decide. The primary considerations in this decision are whether the Crime Lab has already completed its searching and processing before the MATF investigators begin to search, and what type of evidence the MATF investigators will be seeking.

5) If an employee of the Crime Lab is involved in a Protocol incident as an “LEA Actor” (Ref 48) or as a victim, at least one physical evidence

---

6 Criminalists of the Contra Costa County Sheriff's Criminalistics Laboratory are Deputy Sheriffs who are sworn and armed peace officers. If the Crime Lab employs any civilian criminalists in the future this provision (Ref 217) will still apply.
specialist designated by the Case Managers Team and not affiliated with the Sheriff’s Office will be actively involved in processing physical evidence with Crime Lab personnel. Members of the Protocol CSI Group may be used for this purpose.

6) Prior to the final relinquishment of pivotal scenes:

a) MATF investigators and scene processors should brief each other and jointly walk-through the scene(s) to further their mutual understanding of the physical evidence aspects of the incident and its relationship to testimonial information, as well as to assess the need for further scene work.

b) Management staff, Administrative Investigators and Civil Litigation Investigators of the involved MATF agencies will be given scene walk-throughs and scene briefings if they desire.

7) In some cases the Crime Lab and the Case Managers Team may determine that customized procedures are necessary for tagging evidence items, documenting collected items on evidence lists, and/or storing collected evidence. Such procedures will be jointly determined by them on a case-by-case basis.

r. Notifications

Promptly upon identifying an event as a Protocol case, the Venue Agency/Agencies shall make notifications as promptly as possible to:

1) intra-departmental personnel as required by each agency’s procedures;

2) other involved and affected LEAs if not yet aware;

3) the District Attorney’s Office, directly or through Sheriff’s Dispatch;

4) the Sheriff’s Crime Lab;

5) the Coroner’s Office upon confirmation of a fatality. This notification must be made promptly but removal of the remains will not occur until authorized by the Crime Lab and the Case Managers Team. Refer to Attachment F, Death Investigation Roles of the Coroner and Law Enforcement Agencies on Page 97+ for more details.

s. Selection of MATF investigators and Case Managers

The complexities and challenges of LEIF investigations demand that well qualified investigators be assigned to the MATFs by their LEAs. It is most important that members of the Case Managers Team, as well as the primary
investigator from each LEA, be well qualified and carefully selected. The best
available people should be selected for those assignments. The following
qualifications are important:

1) Experience in Protocol investigations, homicide investigations, non-
homicidal crimes against persons, (or vehicular collisions, when appli-
cable) is especially helpful.

2) Ability to effectively interview people of various backgrounds.

3) Good working knowledge of physical evidence collection and pres-
servation techniques, an appreciation of the abilities and limitations of
physical evidence and scientific analysis of it, and an understanding of
the inter-relationship between physical evidence and other types of
evidence, especially testimonial accounts of participants and witnesses.

4) Good knowledge of police operational procedures and the criminal
justice system.

5) Good understanding and personal acceptance of this Protocol.

6) Excellent report writing and communication skills.

7) For Case Managers, good organizational and supervisory skills.

8) Possess deserved professional respect of those with whom he/she
works for being competent, thorough, objective, fair and honest.

t. Interviewing Law Enforcement Personnel

1) Law Enforcement Personnel have the same rights and privileges
regarding Criminal Investigation interviews that other citizens have.

2) Criminal Investigations of Protocol incidents must adhere to legal rules
that apply to all criminal investigations (Ref 165). One of the most basic of
these rules is that statements (as well as physical evidence) cannot be
used in criminal proceedings against people from whom they have been
unconstitutionally coerced. Because Criminal Investigations must
acquire testimonial and physical evidence through methods that ensure
admissibility in potential criminal prosecutions, MATF interviewers must
usually not even attempt to obtain statements or physical evidence from
Law Enforcement Personnel by using direct or indirect coercion;
specifically, in most situations, they must not utilize the authority of the
Lyberger cases (Ref 52) to obtain non-consensual (i.e. involuntary)
statements (or physical evidence) from LEA Actors (Ref 48). Any
exception in individual cases to this very significant limitation must be
jointly approved in advance by the District Attorney’s Office and by the
LEA(s) which employ(s) the involved Law Enforcement Person prior to a Lybarger admonition being given. 7

3) To ensure the voluntariness of interviews, MATF interviewers may advise Law Enforcement Personnel interviewees of the following:

a) The interviewee is not in custody and is free to leave at any time (if true).

b) The interviewee is not required to participate in the MATF interview and is not obligated to answer any questions asked by MATF investigators. Further, no punitive action can be taken by the Employer Agency against the interviewee if he/she exercises the right against self-incrimination when speaking to MATF investigators.

4) Miranda is applicable if and when the interview becomes a custodial interrogation, as Miranda case law prescribes.

5) Law Enforcement Personnel have the right to consult with representatives and/or support people prior to interviews and to have them present during Criminal Investigation interviews. Representatives are usually lawyers or officials of peace officers' associations or labor unions, while supporters are usually spouses, co-workers, friends, or members of the clergy.

a) Privileged communications:

Under California statutes, "private communications" (as defined in the statutes) between individuals (including Law Enforcement Personnel) and the categories of representatives and supporters listed below can be kept confidential (i.e. privileged against compelled disclosure) only when the applicable statutory criteria are met.

- Lawyer 8

The California Evidence Code provides that the content of "confidential communications" between people and their lawyers can be kept confidential if the communication meets several other statutory criteria. Among them: the communication must have been made within the lawyer/client relationship.

---

7 The policy of the United States Justice Department does not allow federal LEAs to grant Lybarger-type "use immunity" to employees in return for administratively compelled statements or other evidence without the prior consent of the Justice Department. U.S. Attorney's Manual Chapter 9-23.140; 28 C.F.R. § 0.175; 18 USC § 6004; and Attorney General's memorandum of June 4, 1980.

8 Lawyer: California Evidence Code §§950-962. See §952 for the criteria for confidential communications.
relationship and it must have been made in confidence, meaning that no third parties were present except those present as a legitimate agent of the lawyer.

- Physician⁹, Psychotherapist¹⁰, Member of the Clergy¹¹

These professionals infrequently act as representatives for Law Enforcement Personnel during interviews but often support them later in other ways. Confidential communications between individuals and these professionals may also be protected from disclosure. The statutory criteria for confidentiality differs slightly for each category so refer to the statutes for details.

- Spouse¹²

Confidential communications between husband and wife are privileged when the communication was made in confidence between the spouses while they were husband and wife but some exceptions apply. Refer to the statutes for details.

b) Non-privileged communications:

Communications made to others who are not within the categories above, such as to peace officer association representatives, non-lawyer labor union representatives, co-workers, girl friends or boy friends, other friends, companion officers, sequestering officers and peer support officers are not privileged under California law except when such people are present and acting as legitimate agents of the person's lawyer, physician, psychotherapist or member of the clergy.

c) Representatives should be allowed to consult privately about the facts of the incident with only one Law Enforcement Person at a time.

6) The Peace Officers' Bill Of Rights (California Government Code §3300 et seq) is formally titled the Public Safety Officers Procedural Bill of Rights.

a) This statute is abbreviated in the Protocol as POBR.

b) POBR has virtually no restrictive effect upon most interviews con-

---

¹⁰ Psychotherapist: California Evidence Code §§990-1007. See §1012 for the criteria for confidential communications.

¹¹ Member of the Clergy: California Evidence Code §§1030-1034. See §1032 for the criteria for confidential communications.

¹² Marital communication: California Evidence Code §§980-987

37
ducted by MATF interviewers with Law Enforcement Personnel for the following reasons:

1. POBR is applicable to “Public Safety Officers” which Government Code §3301 defines as all California peace officers (LEOs) with a few minor exceptions not relevant to this Protocol. POBR is not applicable to Law Enforcement Personnel who are not peace officers, i.e. people who are referred to in the Protocol as Non Sworn Personnel. (Some LEAs grant their Non Sworn Personnel rights and benefits that are the same as or similar to those accorded to “public safety officers” by POBR.)

2. When referring to the questioning of LEOs, POBR exclusively uses the term “interrogation” instead of the word “interview”. Although these terms may be synonymous to some people, they are not synonymous for Protocol purposes. MATF investigators usually conduct interviews (not interrogations) with LEOs and other Law Enforcement Personnel (and with nearly all civilians) and do not utilize many of the techniques which are typical of police interrogations.

3. POBR applies to “interrogations” of LEOs who are “under investigation”. In most Protocol investigations, the subject of the MATF’s investigation is not the Law Enforcement Personnel but the entire incident. Law Enforcement Personnel are usually interviewed as victims or witnesses to the incidents.

4. POBR does not apply to interviews with LEOs who are being “interrogated” by LEAs other than their Employing Agency. In rare situations where there is a desire to avoid any possible complication or restriction this provision might impose on MATF interviews, Employer Agencies might withdraw their interviewers from MATF interviews.

5. POBR does not apply to “interrogations” of LEOs, even when conducted by their Employing LEA, when the “investigation is concerned solely and directly with alleged criminal activities”.

6. POBR applies to “interrogations” of LEOs who are under investigation if the “interrogation” could lead to punitive action.

---

13 One explanation of the differences between interviews and interrogations is found in the training materials and literature of John E. Reid Associates.
Since Protocol investigations are Criminal Investigations, not Administrative Investigations, the possibility that "interrogations" could lead to punitive action is usually beyond the intention, knowledge, scope and interest of the MATF investigators. In most cases the LEO/ interviewee and his/her representative know more about the possibility of punitive Administrative action than the MATF interviewers. If the LEO and his/her representative believe that punitive Administrative action could result from the LEO's participation in the MATF interview, the LEO has these options: (1) decline the MATF interview; (2) agree to be interviewed by MATF interviewers but avoid discussing aspects of the incident that might be administratively incriminating; (3) attempt to resolve possible administrative issues prior to the MATF interview; and (4) elect, with the advice of his/her attorney, to give a complete voluntary statement to MATF investigators despite the possibility of administrative punitive action, believing that doing so is in his/her best interest.

7. In those few instances when the "interrogation" restrictions of paragraphs a,b,c,d,e,g,h,i of POBR §3303 might apply to MATF interviews of LEOs, those interviews are usually conducted in a manner that complies with those statutory requirements.

8. Since interviews with MATF investigators are voluntary, Law Enforcement Personnel have the power to decline to be interviewed at all, and/or can attempt to negotiate acceptable conditions for interviews.

9. MATF interviews of LEOs are normally preceded by a statement that informs them that the interviews are conducted on a consensual and voluntary basis and are NOT conducted under the compulsion of the Lybarger cases, except in rare cases when a witness Law Enforcement Person might be administratively compelled by his/her LEA to cooperate with MATF: see Ref 239. Interviewees are also clearly informed whether or not the interview is a custodial interrogation within the meaning of the Miranda cases.

c) POBR §3304(a) permits heads of LEAs to order their LEOs to cooperate with Criminal Investigations being performed by other agencies and provides that an LEO's failure to comply with such orders may result in a charge of insubordination. When applicable, interviewees may be advised of this provision by their Employer.
However, Law Enforcement Personnel must usually not be compelled by threats of administrative punitive action (or otherwise) to answer questions of MATF interviewers which would be criminally self-incriminating. Also see Refs 52, 237-242, 312-313.

7) Interviews will be conducted separately. Ref 265

8) Interviews will normally be fully recorded 14 by MATF investigators. Interviewees and/or their representatives may also record. Ref 266

9) Interviewees will be considered as witnesses or victims unless the circumstances dictate otherwise. Ref 256

10. At the initial stages of the investigation it is extremely important to interview witnesses when their memories of the incident are fresh, and their recollections are not impacted by any outside influences, be it other witnesses or recording(s) of the incident. This is the key reason why witnesses are sequestered between the incident and the interview.

11. The initial interview of an officer involved in a LEIFI should occur before the officer has reviewed any audio/video recordings of the incident. An involved officer will have an opportunity to review recordings after the initial statement has occurred, and he/she can be re-interviewed if either the officer or members of the investigating team believe it is necessary. Investigators should be mindful that audio/video recordings have limitations and may depict events differently than the events recalled by involved officers. If an investigator shows any audio/video recording to an Involved Officer after the initial interview, the investigator should admonish an Involved Officer about the limitations of audio/visual recordings.

12. The following is an example of an admonition that might be given in such situations:

- In this case, there is recorded evidence that you will have an opportunity to view after you have given your initial statement. Recorded evidence has limitations and may depict the events differently than you recall, and it may not depict all of the events that you saw or heard. Recordings have a limited field of view and may not capture events normally seen by the human eye. The “frame rate” of the recording may limit the camera’s ability to capture movements normally seen by the human eye. Lighting as seen on the recording may be different than that which is seen by the human eye. Recordings are two-dimensional and may not capture depth, distance, or positional orientation as well as the human eye. Remember, the video evidence is intended to assist your memory and your ability to recall and describe the incident.

---

14 Audio and/or video recordings may be made using analog and/or digital equipment but digital is preferred.
u. Intoxicant Testing of Law Enforcement Personnel

1) Law Enforcement Personnel have the same rights and privileges that civilians have regarding intoxicant testing. When MATF investigators determine that a Law Enforcement Person's state of sobriety or intoxication is relevant to their investigation, they have these options:

a) Obtain blood, breath and/or urine (Ref 279) samples through valid consent.

b) Obtain blood, breath and/or urine (Ref 279) samples Incidental To Arrest.

c) Obtain a search warrant for biological samples if they have probable cause to do so.

d) In traffic incidents, utilize California Vehicle Code §23612 (implied consent) when applicable.

e) When an arrestee refuses to submit to collection of samples sought Incidental To Arrest, attempts may be made to obtain blood samples for intoxicant testing in accordance with case law. When the collection of blood or other biological samples is authorized by a Search Warrant, the use of reasonable force to obtain the evidence may be authorized by the Search Warrant.

2) An Administrative representative of the Employer Agency will be promptly notified (usually by its representative on the Case Managers Team) if the MATF does not seek or obtain biological samples for intoxicant testing. After the MATF investigators have had the opportunity to obtain samples, the Employer Agency may then seek to obtain administrative samples for its use.

a) The legal authority for the Employer Agency to obtain samples includes (1) valid consent, and (2) ordering employees to provide the samples utilizing the authority of the Lybarger (Ref 52) cases.

b) Some LEAs have blanket provisions in their General Orders or Policy And Procedure Manuals requiring intoxicant testing after

[As used here, "case law" refers to California and federal appellate cases that authorize peace officers to use reasonable force to obtain blood samples from non-compliant arrestees. To be reasonable, the amount of force must not shock the conscience and the sample must be taken in a medically acceptable manner. The leading case is Schmerber v. California (1966) 384 U.S. 757; 16 L.Ed.2d 908; 86 S.Ct. 1826.]
specified events, while others make such decisions on a case-by-case basis.

3) Toxicology test results from biological samples obtained by MATF investigators are available to Administrative and Civil Litigation Investigators.  

4) Blood is best for alcohol testing while urine is best for drug screening. Optimally, samples of both should be obtained for most complete results. Breath testing for alcohol yields less meaningful results.  

5) Samples should be collected promptly after incidents for most meaningful results.  

6) Whether or not the MATF or the Employer Agency have obtained samples for toxicological testing, Law Enforcement Personnel may have their own samples collected for toxicology testing by a qualified person or facility of their choice. Such requests will be promptly honored but the taking of samples, their storage and chain of custody, and their subsequent testing will be the responsibility of the individual Law Enforcement Peson and/or their agents and not the MATF or the Employer Agency.  

v. Autopsies  

1) For information about the Coroner's Office in general, and about autopsies specifically, see Attachment F, *Death Investigation Roles of the Coroner and Law Enforcement Agencies* on Page 97.  

2) The extensive *Autopsy Evidence Collection Checklist* (Attachment E on Page 80) will assist evidence collectors, working with the pathologist at autopsy, in discovering, documenting and processing body conditions and physical evidence, as well as in collecting and preserving autopsy evidence.  

3) At least one member of the Case Managers Team, a member of the MATF's primary investigative team, and a representative of the District Attorney's Office will attend the autopsies. Other MATF Investigators may also attend.  

4) MATF investigators and the Crime Lab will brief the autopsy pathologist prior to the autopsy, incorporating all information known by the investigators and by the physical evidence processors which may be relevant to the pathologist's examination of the decedent and to the determination of the cause, manner and means of death. It is very important that investigators and evidence processors who are very knowledgeable about relevant case facts be involved in these briefings.
5) For LEIF autopsies conducted in Contra Costa, and for autopsies conducted in other counties where the pathologists agree, the Crime Lab has the responsibility for physical evidence.

   a) Exception: For vehicular collision fatalities, the Protocol Collision Investigators have that responsibility with assistance, if appropriate, from the Crime Lab or other qualified physical evidence processors.

6) Although the Coroner's Office has authority to determine who attends autopsies, it is usually advisable to allow legitimate professionals who have been retained by or for the decedents' families to attend. Examples are licensed medical doctors, licensed private investigators, and recognized professional criminalists.

w. The District Attorney's Office

1) The District Attorney's Office has the following roles in Protocol cases:

   a) Participate as a coequal investigating agency in the MATFs with the Venue and Employer Agencies and with assisting LEA(s).

   b) Assist and advise MATF investigators and others on various criminal law and investigatory issues which may arise, such as: (1) search and seizure, including consensual searches; (2) interviewing including Miranda, voluntariness of statements and interview content; (3) detentions and releases; (4) decisions to arrest, including evaluation of probable cause; (5) elements of crimes; (6) legal defenses; (7) immunity issues; (8) sharing of information between the various investigative formats; (9) physical evidence matters; (10) investigative strategy and tactics; (11) sources for acquiring information and investigative resources; (12) methods to compel and preserve testimonial information including use of the Grand Jury; (13) crime charging matters; and (14) recognition and resolution of other criminal law issues.

   c) Upon completion of the Criminal Investigation, analyze the facts of the incident and apply the relevant law to determine whether or not criminal laws were violated. Prosecute or decline to prosecute as appropriate. For fatal incidents, the final analysis usually occurs after the Coroner's Inquest.

2) The District Attorney's Office has its own separate investigative authority and may perform independent investigations of incidents, separate from the MATF or any other investigations, when deemed appropriate by the District Attorney or his/her designated alternate in his/her absence.
x. MATF reports and documents. Also see Refs 344-350.  
Ref 296

1) All Criminal Investigators will write reports documenting their participation in MATF investigations.  
Ref 297

2) Investigators within each MATF team will allocate among themselves the responsibility for documenting the team's investigative activity.  
Ref 298

3) The Major Case Page Numbering System  
Ref 299

The Case Managers Team will designate an MATF investigator to assemble and disseminate all MATF reports and documents. All MATF agencies will submit one legible copy of each page of its reports and other documents to the designated investigator but will maintain possession of their originals. (Original evidentiary documents will not receive these page numbers; instead, copies of such documents will be submitted and will receive page numbers.) The investigator will collect and organize all documents from all LEAs and an alpha character identifying each reporting or source agency, followed by sequential page numbers starting at the number 1, will then be placed onto all pages in each LEA's set. Copies of those page numbered sets will then be created and all numbered sets will be distributed to all MATF agencies. The LEA of the designated investigator will maintain the complete library/archival collection of all pages in all sets onto which the original page numbers were placed.

4) Prompt completion, submission and distribution of reports is essential. All MATF and assisting agencies and investigators will strive for report completion and distribution within 30 days after each Protocol incident.  
Ref 300

4. The Administrative Investigation  
Ref 301

a. In addition to its participation in the MATF's Criminal Investigation of Protocol incidents, involved LEAs may also wish to conduct investigations of Protocol incidents for their own administrative (non-criminal law) purposes. Such purposes include:

1) **Internal Affairs**: to determine whether or not its employees violated LEA regulations, orders or training instructions.  
Ref 303

---

16 For example, the Sheriff's Office might be designated with S, the Crime Lab with L, the District Attorney with D, the Coroner's Office with C, the Antioch Police with A, and the Richmond Police with R. Document pages from each agency would be numbered with its assigned letter followed by a sequential number starting at 1 and going upward as far as necessary.
2) **Agency Improvement / Quality Assurance**: to examine the adequacy and functioning of its policies, procedures, programs, operations, training, equipment and personnel, to confirm their efficacy or to identify needed improvements.

3) **Accountability and Communications**: to meet LEA management's responsibility of informing and discussing the facts of incidents with people outside the LEA such as those in the LEA's parent government, other LEAs, other government agencies, risk managers, insurance carriers, the public, decedents' families, the news media, etc.

4) **Civil Claims and Litigation**: to prepare the LEA for claims and/or civil litigation that may be filed. (Some LEAs utilize the Administrative Investigation for this task if they don't utilize the separate Civil Litigation Investigation format.)

b. The initiation of Administrative Investigations and the extent of those investigations are at the discretion of Employer Agencies.

c. LEAs may conduct Administrative (and Civil Litigation Investigations - Ref 316) as they wish but not in conflict or competition with the Criminal Investigations. Similar provisions are at Refs 121, 316.

d. Employer Agencies needing investigative assistance to perform Administrative Investigations may seek advice and/or obtain investigators from other LEAs or from other sources. Those investigators would perform, or help perform, the Administrative Investigations under the authority and direction of the Employer LEA.

1) Legal and investigative advice on conducting Administrative Investigations may be obtained from the LEAs' legal advisors (county counsel, city attorney, Chief's attorney, associations to which the Chief or the LEA's parent government belongs, etc.), from other LEAs or from elsewhere.

2) The District Attorney's Office may be contacted for advice concerning criminal law matters (Ref 293) related to Administrative Investigations but it does not otherwise give legal advice on Administrative Investigations. It does not perform Administrative Investigations for other LEAs nor does it participate in them.

e. Any evidence or information that was administratively compelled (Refs 52, 239) from Law Enforcement Personnel shall not be revealed in writing, orally or otherwise to Criminal Investigators or to any member of the District Attorney’s Office without prior approval of the District Attorney’s Office. This prohibition applies to interview statements, physical evidence (including biological samples taken from Law Enforcement Personnel and the results of their testing), police reports or witness statements, scene re-enactments, and
other information including investigative leads. Some exceptions to this prohibition (Ref 239) may apply.

1) Products of the Administrative Investigation that were not acquired directly or indirectly through administrative compulsion (i.e. Lybarger) are subject to disclosure to Criminal Investigators and the District Attorney’s Office. Confer with the District Attorney’s Office prior to disclosure.

f. Upon being notified of Protocol incidents, Employer Agencies should consider assigning at least one LEO to represent the Employer LEA’s Administrative interests for the first 6 to 12 hours of the MATF’s investigation. This investigator should “roll out” at the same time that MATF investigators do, should attend the MATF’s briefings and observe the scenes and physical evidence, and be thoroughly knowledgeable about the MATF’s investigative product and progress. He/she should be alert for, and brief LEA management on, matters of Administrative (and Civil Litigation if tasked) interest and should be prepared to advise upon or make acute Administrative Investigative decisions and to begin an active Administrative Investigation if and when assigned to do so. This investigator can also serve as an MATF contact with the Employer Agency for certain personnel matters.

g. The MATF will promptly and periodically brief Administrative Investigator(s), as requested, about its investigative products and progress. Administrative Investigators will have access to MATF briefings, the scene(s), physical evidence, and interviewees’ statements and all other material.

5. The Civil Litigation Investigation

In anticipation of possible civil claims and civil law suits, a separate Civil Litigation Investigation may be performed by involved LEA(s). These investigations are performed under the direction of, and on behalf of, lawyer(s) who would represent the LEA and its parent governmental body (and often LEA employees) in the event a civil claim or lawsuit is filed against them. Risk Management personnel are often also involved. Investigators for this format are usually supplied by the involved LEA or its parent government, or they may be from the private sector. Certain privileges, such as the Attorney/Client privilege 17 and the Attorney Work Product privilege 18 may apply to its investigative results. Civil Litigation Investigators have access to MATF briefings, the scene(s), physical evidence, and to all the MATF’s investigative products.

LEAs may conduct Civil Litigation Investigations as they wish but not in conflict or competition with the Criminal Investigations. The same provision is at Refs 121, 308.

I. GUIDELINES FOR INFORMATION RELEASE TO THE PUBLIC AND NEWS MEDIA

17 California Evidence Code §815

18 California Code of Civil Procedure §§2018.030 (a) and (b).
1. The public’s right to know what occurred must be balanced with the investigative requirements of the three different investigative formats (Criminal, Administrative and Civil Litigation) and with the rights of involved and affected individuals and/or the public.

2. As in all other law enforcement contexts, great care must be taken to ensure that intentionally or recklessly misleading, erroneous or false statements are not made.

3. Agencies and individuals who are not well informed and not intimately involved with the progress and results of the MATF investigations should not make statements to the press or public about that investigation.

4. Regarding specific agencies:
   a. **Venue Agency(ies)**
      Unless the involved LEAs otherwise agree, Venue Agencies have the responsibility for making press releases about the facts of the incident and MATF’s investigation of it for the first 48 hours.

   b. **Employer Agency(ies)**
      When the Employer Agency is not also the Venue Agency, fewer problems will arise, especially within the first 48 hours of the investigation, if the Employer Agency limits its comments to the following:

      1) The employer-employee relationship;

      2) Factual material revealed by the Employer Agency’s own Administrative and/or Civil Litigation Investigations of the incident;

      3) Information that has been cleared for release by the MATF.

   c. **The Crime Lab**
      Its press releases should usually be confined to general information about the laboratory’s role and functions, scientific facts and principles, and testing procedures. Specific results of searching, testing and analysis should generally not be released without clearance from the MATF’s Case Managers Team unless release of information is considered necessary to publicly correct information which the Crime Lab considers to be incorrect or misleading.

   d. **The Coroner’s Office**
      Information generally should be limited to the following:

      1) General information about the functions of the Coroner’s Office.
2) Autopsy findings, including the condition of decedent, the cause, manner and mode of death and toxicology test results, but only after the MATF agencies have received this information.

3) The identity of those present at the autopsy and the identity and affiliation of the pathologist and other experts used by the Coroner.

4) The general nature of further medical testing or medical investigation to be performed.

5) Information obtained directly by Coroner’s investigators from medical sources, the decedent’s family members, participants, witnesses or others, and the general nature of further investigation to be done by Coroner’s investigators.

6) Any information which was obtained by the Coroner’s Office from MATF investigators or from the involved agencies should generally not be released by the Coroner’s Office without clearance from the MATF’s Case Managers Team.

5. If the Case Managers Team determines that the release of specific information would materially jeopardize the MATF’s investigation, it shall notify the agencies possessing it about the hazards of releasing it.

6. Interruptions to MATF investigations and investigators will be minimized if LEAs assign individuals to be Public Information Officers who are not MATF investigators.

7. Releasing the identities of LEA Actors (Ref 48) and LEA Witnesses (Ref 49) to the news media and the public is often a sensitive issue. Before making such disclosures, the involved MATF agencies should: (1) determine if there are investigative reasons or personal safety reasons for delaying release of the identities, and (2) confer with the involved employees and their representatives about the timing and content of such releases.

J. CORONER’S INQUESTS

1. For general information about the role of the Coroner’s Office, see Attachment F, Death Investigation Roles of the Coroner and Law Enforcement Agencies on Page 97.

2. A public Coroner’s Inquest will normally be held after the Criminal Investigation of each fatal incident is completed. Because evidence at Inquests is received under penalty of perjury, Inquests are a valuable mechanism for informing the public, decedents’ families, the news media and other interested parties of the facts of LEIF cases. They also provide another opportunity to develop further information
about such Incidents.

By Protocol agreement, Coroner's juries are utilized for these Inquests. By statute\(^\text{19}\) Inquest verdicts include findings regarding (a) the name of the decedent; (b) the time and place of death; (c) the medical cause of death; and (d) whether the death was by natural causes, suicide, accident, or death at the hands of another other than by accident.

While the Coroner's hearing officer has the discretion to determine which witnesses will testify, it is the Protocol's general intention that all Law Enforcement Personnel who were Actors (Ref 48) and Witnesses (Ref 49) to the incident be subpoenaed, as well as citizens who are believed to have relevant personal knowledge.

3. In a few cases where the facts of an LEIF incident are very clear and law enforcement's role was obviously appropriate and non-controversial, Inquests may not be necessary. In a few other cases the filing of criminal charges against someone in connection with the Protocol incident may provide an adequate opportunity for public access to the facts of the Incident. In either case, the Sheriff/Coroner, and the Police Chief(s) of all involved LEAs, and the District Attorney would have to all agree that an Inquest is not needed.

4. Not less than 96 hours prior to the beginning of Inquests, Law Enforcement Personnel who are subpoenaed to testify shall be given access to a copy of any recording(s) or a transcript(s) of their own MATF investigative interviews.

5. In addition to the Protocol's provisions for Inquests, California Government Code §27491.6 provides that the Coroner shall hold an Inquest if requested to do so by the Attorney General, the District Attorney, the Sheriff, City Prosecutor or City Attorney, or a Chief of Police in the county where the Coroner has jurisdiction.

K. REPORTS AND EVIDENCE

Also see Refs 296-300 for other provisions concerning MATF reports.

1. Material created and collected by the MATF investigation, as well as by the Crime Lab, Coroner and other agencies and investigators, will be made available in a timely manner to involved LEAs and other appropriate LEAs.

2. Such material includes:

   a. Reports written by MATF personnel, and reports and documents collected by them from other sources.

   b. Access to physical evidence.

\(^\text{19}\) California Government Code §27504
c. Photographs and diagrams.

d. Audio and video recordings.

3. When the Case Managers Team and the District Attorney's Office conclude that physical evidence collected by the MATF no longer needs to be retained for criminal law purposes, the involved LEAs shall be notified of that decision. At that time, responsibility for the continued custody and preservation of physical evidence may shift by mutual agreement to the Employer Agency if it believes continued retention is appropriate for potential for Administrative and/or Civil Litigation purposes.
1. **Emergency life saving measures are the first priority.**

   A. First aid

   B. Consider need for more EMS resources: fire; additional ambulances; medical helicopter.

2. **Request** (enroute if possible) **additional personnel, equipment and other resources** as needed for Patrol Division's scene management responsibilities. Make requests promptly then periodically review situation for further needs. Consider the need for:

   A. **More Patrol Officers** for LEIF Incident and/or Patrol responsibilities not connected with the LEIF Incident:

      1. Borrowing LEOs from other jurisdictions; mutual aid.
      2. Calling in next Patrol shift early and/or delaying release of current shift.
      3. Recalling off-duty LEOs.
      4. Reserve officers, parking/traffic control officers, etc.

   B. **More Patrol Supervisor(s)** to assist with LEIF scene(s) and/or Patrol responsibilities not connected with the LEIF Incident

   C. **Traffic control:** (1) personnel; (2) flares, barricades, traffic advisory or warning signs, scene tape; (3) traffic detours; (4) notification to Public Works, other LEAs, CHP, CalTrans, etc. if major traffic disruption will occur.

   D. **Translators** for victims, witnesses and canvassing.

3. **Ensure** (enroute if possible) that **notifications are made** about the LEIF (by your Dispatcher, a designated LEO, or other) to:

   A. **Your LEA’s personnel** per your LEA’s procedures, including as appropriate:

      1. **Chain of command**—management and supervisors.

      2. **Criminal Investigators** (Homicide or Crimes Against Persons, and other relevant investigative specialties).

      3. **CSIs** - for immediate scene needs and/or to assist Crime Lab.

      4. **Vehicle Collision Investigators**—for immediate scene needs and/or to work with designated Protocol Collision Investigators.

      5. **I. A. (Administrative Investigators)** and/or **Civil Litigation Investigators**.

---

**ATTACHMENT A**

**PATROL SUPERVISORS’ LEIF CHECKLIST**

Shootings and Generic Incidents

51
6. **Press Information Officer.**

7. **Community Relations Officers.**

8. **Representatives for involved LEOs:** POA officials (Police Officers' Association, the Deputy Sheriffs' Association (DSA) etc.

9. **Peer Support,** Trauma Team, or other supportive personnel for traumatized law enforcement personnel.

B. **Other LEA(s)** whose employees are involved in the Incident (if not already aware).

C. **The District Attorney's Office** (either directly or through the Sheriff's Office Dispatcher).

D. **The Crime Lab.**

E. **The Coroner's Office** upon a death. This is a preliminary or courtesy notification; body removal by the Coroner will be made at the direction of MATF investigators.

4. **Anticipate receiving many inquiries** via cell phone from various officials needing more information after they are notified about the LEIF. They will require phone briefing, then more details upon their arrival at the scene.

5. **Consider** the need to:

   A. **Check the field(s) of gun fire** for injured people and evidence.

   B. **Arrange additional lighting** for scene(s).

   C. **Establish a Command Post** (mobile command vehicle or other type).

   D. **Assign a scribe** to record actions taken.

   E. **Designate a Press Information Officer** if LEA has no designated PIO.

   F. **Establish a news media area.**

   G. **Shield the public's view** of unpleasant, distracting, or investigation-hampering sights.

   H. **Assign an LEO to write the police report** on the event which started the LEIF. (In many cases an investigator assigned to the MATF will write this report.)

6. **Determine which LEO(s) and supervisor(s) have responsibility for performing routine police work** in the rest of your jurisdiction while attention and resources are involved with LEIF.
7. Assign an LEO with a tape recorder to ride in the ambulance or helicopter when a person is transported to a hospital. Purposes:

   A. **Physical evidence tasks**: (1) recognize, locate, secure and protect it properly so its value is not diminished; (2) maintain chain of custody; (3) report its discovery to a supervisor, investigator or physical evidence processor.

   B. **Custody of the injured person** if he/she has been or might be arrested.

      1. Prevent escape.
      2. Prevent destruction of evidence.
      3. Protect that person.
      4. Adjust or remove physical restraints for medical purposes as necessary and if safe.
      5. Prevent unauthorized contacts.
      6. If the injuries are fatal, maintain the chain of custody on the body until relieved.

   C. **Safety** of EMTs/paramedics, hospital staff and other patients

   D. Provide **aid and comfort to injured Law Enforcement Personnel**; protect the person, physical evidence and property belonging to the person or LEA.

   E. **Document any statements made** by the person, especially spontaneous statements (California Evidence Code §1240), dying declarations (California Evidence Code §1242), contemporaneous statements (California Evidence Code §1241); or statements of then-existing or previous mental or physical state (California Evidence Code §§1250-1251), and those made in connection with medical attention. In most cases the LEO should **not** attempt to interview the person unless directed to do so by investigators.

   F. Provide **information to medical** personnel as relevant for medical treatment, and obtain information **from medical** personnel relevant to the investigation.

      1. **Identify medical personnel**, including EMTs, paramedics and Emergency Room staff involved.
      2. **Serve as the contact for LEIF investigators** calling for information about the injured person, physical evidence, people present, etc.
      3. **Obtain copies of EMS and medical reports** if then available to law enforcement.

   G. **Contacts with the injured person’s family** and friends at the hospital, and with

---

**ATTACHMENT A**
**PATROL SUPERVISORS’ LEIF CHECKLIST**
**Shootings and Generic Incidents**

53
witnesses.

1. Identify people.

2. Serve as the contact for LEIF investigators who may want information about the LEIF or the injured person from these people, or may want assistance to arrange personal contacts with them.

3. Collect and preserve information they give.

4. Occasionally there may be a need to keep the peace at the hospital.

8. Protect sensitive investigative information. Use caution on radio broadcasts and cellular phone calls. Use hard wire telephone, secure radio or in-person contact when confidentiality is needed.

A. Be aware of the technical and investigative capabilities of the news media, including zoom lenses, long range microphones, use of concealed recording devices and transmitting microphones, night vision cameras, access to public and news media records and files, and aggressiveness in interviewing civilian witnesses.

9. Scene(s): Immediately identify and secure. Establish a perimeter for each a sufficient distance away to safeguard evidence, law enforcement personnel and operations. In some circumstances an inner and outer perimeter are appropriate. Adjust scene boundaries as necessary as more information becomes available. Establish and maintain true control of the scene.

A. Multiple scenes are often involved, such as

1. Location(s) of the body or injured person.

2. Location(s) where injuries occurred or where force was used.

3. Vehicles: LEO's; suspect's; struck by gunfire; involved in collision.

4. Residences.

5. Location of personal property.

6. Location where crimes or incidents connected to the LEIF or the injured/ deceased person were committed prior to the fatal incident.

    a. Location of victims and witnesses of the crimes.

    b. Location of evidence of those crimes.
7. Hospital where the injured person was taken.

8. Location of involved weapon evidence such as firearms (and bullets, casings, magazines); knives, etc.

9. Routes (vehicle or pedestrian) taken by LEIF participants.

10. **Protect scene(s) and their contents.** No alterations shall be made to scenes, and no items shall be moved inside scenes or removed from scenes, without prior approval of the MATF and the Crime Lab, unless absolutely necessary for public or officer safety, for preservation of evidence, for emergency medical reasons, or for other very compelling reason.

    If some alteration of a condition, or movement or removal of an item without prior approval is necessary, the removal must be witnessed and documented. Document the identity of the person making the change and the person who authorized it, the reason for the change, the identity of the official who witnessed the change, and the time of change of condition. When possible, these actions shall be photographed or videotaped. Extreme care must be taken to avoid compromising any physical evidence.

    A. **Evidence contamination** may occur from movement, alteration, removal or addition of items. Especially subject to contamination are fingerprints, footprints, blood, trace evidence, cigarette material, bullets and casings, firearms, lights and light switches, vehicle positions and vehicle conditions.

    B. **Medical aid debris** - leave in place.

11. **Access to the scene(s) must be strictly limited** to only those officials who must enter for an investigative, medical or other emergency purpose.

    A. A **single access point**, chosen to avoid contamination of evidence, should be used in most cases.

    B. When not necessary for patient care efforts, **entry and re-entry by EMS personnel** (fire and ambulance) should be restricted to the absolute minimum necessary to perform needed duties, especially after the patient has been removed from the scene.

    C. **Do not allow the news media to enter** crime scenes.

    D. Only MATF investigators can authorize crime scene entry for the following:

        1. Representatives of Law Enforcement Personnel including attorneys or police association representatives.

        2. Civilian review board personnel.
3. LEAs' civil attorneys.

4. LEAs' Risk Management representatives.

12. A **written scene log** must be established as quickly as possible. Use pre-printed forms when possible.

   A. Promptly and very diligently **reconstruct who was inside the scene before the scene log was started**. List by name, affiliation and contact information as appropriate. Include:

   1. Law enforcement personnel.
   2. Ambulance and fire department personnel.
   3. Civilians (witnesses, victims, bystanders, residents, passersby, suspects).

   B. Identify and list **everyone who enters the scene after the log is started**, including their names and agency affiliation, the times of their entries and exits, and the reasons for entry.

13. **Discharged firearms in possession of LEOs**

   A. When an involved LEO **still has personal possession of a weapon** he/she used in the Incident, normally the supervising patrol officer at the scene should promptly and discreetly (i.e., in private, out of view of the public and other LEOs) consensually obtain possession of the weapon. Exigent circumstances may justify a seizure if consent is denied. If handled indelicately, the process of collecting the weapon can have an unfair and very damaging impact on the LEO and may also create negative and false impressions on members of the public who see it.

   If already holstered when the supervisor does this, side arms must not be removed from their holsters. Obtain the entire gun belt.

   Only qualified LEOs should handle special weapons such as sub-machine guns, MP-5s, etc.

   B. **Side arms should be replaced** as quickly as possible if the LEO so wishes, unless reasons dictate otherwise.

   C. The person **collecting any weapon must document** its readily visible general description, condition and appearance, and the details of any trace evidence adhering, to the extent these observations can be made without removing a firearm from its holster or otherwise compromising physical evidence. The location where the weapon or instrument was first observed by the supervising patrol officer, and the identity of the person or location from which the weapon or instrument was received, shall also be
recorded.

1. In firearms cases, also make note of whether the firearm is cocked, has its safety on or off, has its hammer back, any apparent jamming of either fired or unfired ammunition; the location and position of the weapon's magazine(s) (e.g., fully or partially inserted, completely separate from the firearm, missing, etc.), to the extent possible without removal of the weapon from its holster.
   a. If the firearm is obviously jammed, no attempt shall be made to unload the weapon or clear the jam.
   b. If the firearm is cocked (or if a semi-automatic pistol cannot be determined to be cocked or not), the safety may be put ON but this act must be documented. If the firearm’s hammer is back, it may be lowered and that fact must be noted.

2. Anyone receiving a weapon or instrument from another person, or obtaining it otherwise, shall note its serial number if readily visible without removing the weapon from its holster or otherwise compromising physical evidence, and shall maintain the chain of evidence.

3. Otherwise, weapons and instruments will not be disturbed in any way. They shall not be handled by anyone other than the official who obtains them and he/she shall handle them minimally to preserve the exact state of the weapon or instrument when received.

4. The collected weapons or instruments shall be transferred to the Crime Lab staff as soon as practicable, along with the information required above.

5. If the supervising patrol officer at the scene was an Actor or Victim in the Incident, the responsibility for security and/or collection of weapons and instruments shall rest with an uninvolved supervisor or the next-in-line uninvolved LEO at the scene. This may also be done by an uninvolved investigator.

6. Normally twelve rounds of the same type(s) of ammunition fired by LEOs will be collected later by the MATF investigators or physical evidence processors from each shooting LEO. When possible another source will be used if the LEO has insufficient similar rounds remaining.

7. The Crime Lab understands that prompt return of LEO's firearms is important so it endeavors to complete examinations as soon possible.

When examinations of LEO’s firearms are completed, the Crime Lab will notify the MATF which will then determine whether each firearm will be retained for criminal investigation purposes.

When the MATF decides against long term retention of a firearm for Criminal Investigation purposes, it will notify the Employer LEA (usually via the Administrative Investigators) of that decision. From that time, the disposition of the weapon is at the discretion of the Employer Agency which has the option of keeping

ATTACHMENT A
PATROL SUPERVISORS' LEIF CHECKLIST
Shootings and Generic Incidents

57
it for Administrative Investigation purposes and/or for Civil Litigation purposes. When the Employer Agency no longer desires to maintain custody of the weapon, it shall decide upon its disposition.

14. **If another weapon or instrument was involved**, promptly see to the **security and/or collection** of such items as follows:

A. If the area is secure, such items shall be left in place and undisturbed. Consider stationing a guard.

B. If the area is not secure, decide whether the weapons can be safely left in place with a guard stationed if necessary, or whether prompt removal is necessary. If such items must be moved or removed for protection, they should be photographed or videotaped in place first and the removal witnessed.

15. **Check the firearms and ammunition of all LEOs** who were present at the time of the LEIF shooting Incidents. This will ensure that all discharged firearms are identified and collected, as well as to identify weapons which were not fired. This includes back-up firearms and those inside vehicles. Detailed documentation is essential.

16. Prior to the Crime Lab’s arrival, **physical evidence at risk** of being compromised in any way must be promptly and effectively observed and documented, then collected promptly if absolutely necessary, Otherwise protect it for subsequent Crime Lab collection. Examples include evidence which is endangered by

A. Its adherence to live participants (such as bloodstains, gun shot residue, and some other types of trace evidence).

B. Crowds, vehicular traffic, the weather (wind, rain, snow, dew, sunshine or heat), sprinklers, evaporation or melting, fire, animals or insects.

C. Electrical power being turned on or off (e.g. computer information).

D. Being recorded over (e.g. contents of audio or video tapes, certain telephone call data).

E. Being erased or deleted.

F. Peoples' normal activities.

17. **All officers must conduct themselves with appropriate decorum.** They may be closely watched by the media, residents of the neighborhood, people associated with the decedent, members of police oversight groups, family, and others.

18. **Separately ask the Involved and Witness LEOs “What happened”?**

A. **Miranda** applies only to custodial interrogations.

**ATTACHMENT A**
**PATROL SUPERVISORS' LEIF CHECKLIST**
**Shootings and Generic Incidents**
B. If the LEO answers freely and without being ordered (Lybarger) to do so, there are no legal restrictions on the scope of the conversation.

1. Seek information relating to (a) exigent circumstances; (b) public safety; (c) crime scene management issues (d) capture of outstanding suspects; and (e) a summary of the incident for briefing investigators and management.

2. Many LEOs want to volunteer much more information than the patrol supervisor needs for the above purposes. This may be psychologically beneficial to some LEOs and may be very informative for the LEA, but the patrol supervisor may not have time to listen to it all and it may be difficult for the supervisor to later accurately document what the LEO said.

3. Try to mark relevant positions which the LEO identifies.

C. If an LEO from your LEA refuses to answer unless ordered to so do:

1. Determine if the necessary and urgent crime scene functions (listed below under b-1) can be performed without obtaining compelled information from LEA Actors, such as by using only what you have learned or expect to learn from other sources such as non-Actor LEOs, civilian witnesses, physical evidence, dispatch recordings, other audio or video recordings, etc.

   a. If you do not absolutely need involuntary information from an LEA Actor to perform critical crime scene functions, do not compel the LEO to give a statement or answer your questions. Investigators will attempt to interview the LEO later.

   b. If the LEO's information is absolutely necessary to the performance of critical crime scene functions, give the LEO a Lybarger admonition.

      1. Compelled answers must be limited to critically needed information concerning public safety, exigent circumstances, and scene management.

         a. Examples of information to obtain:

            1. Injured people who may need medical attention

            2. Suspect information, such as identity, crimes committed, flight information, vehicle, level of hazard, probable cause for arrest, etc.

            3. Crime scene(s) identity, location and size.

            4. Physical evidence identity and location, and information relating
to preservation of evidence.

5. **Weapons**, including who fired, the number of shots, the direction(s) of fire, the current location of weapons, etc.

6. The identity of people who were involved in the Incident as **actors, victims and witnesses**.

b. Do not compel information for these purposes:

1. To determine if the LEO committed a crime.

2. To determine possible Internal Affairs violations.

3. To obtain information to brief LEA investigators or management (other than information for reasons listed in paragraph "a" (above).

D. **Treat the involved LEOs appropriately** (as well as everyone else).

1. Ask about their physical and emotional condition and any needs.

2. Isolate and protect them from the news media, the public in general, hostile people, and well-meaning but intrusive or inappropriate comments or questions by other officers.

3. It is psychologically important to have a Companion Officer remain with involved LEOs at the scene as well as at the LEA facility where they will be taken.

   a. Companion Officer is a generic term used to describe an LEO who accompanies and supports another LEO. A Companion Officer may be a member of a Peer Support Team, Trauma Team, or Crisis Intervention Team, but need not be.

   b. In choosing Companion Officers for LEOs, solicit the wishes of the involved LEO(s). Select individuals who are a good fit with specific LEOs, otherwise the benefits of using Companion Officers are lost and discomfort may result.

4. Suggest that involved personnel call home when appropriate.

E. **Order the LEOs not to talk to others** about the case other than their attorneys and assigned investigators.

F. **Don’t give legal advice**.

G. **Prepare to document** LEOs’ information accurately.

1. Methods:

**ATTACHMENT A**

**PATROL SUPERVISORS’ LEIF CHECKLIST**

Shootings and Generic Incidents
a. The supervisor writes a written report.

b. MATF Investigators may interview the supervisor instead.

2. Accuracy and completeness is very important.

19. Make radio broadcasts on outstanding suspects, vehicles, witnesses, evidence items, etc.

20. Collect perishable evidence (e.g. GSR) from shooter(s) and victim(s) before they are taken from the scene if doing so does not cause a medically detrimental delay.

21. Transporting and “sequestering” the Involved and Witness LEOs:

“Sequester” means to remove or withdraw into protection; isolate; set apart from others; seclude.

A. LEOs who were present at the scene at the time of the Incident, whether Actors or Witnesses, will be relieved of their duties at the scene as promptly as possible and shall be sent to their own LEA facility unless other suitable and agreeable arrangements are made for them (such as another LEA facility or a hotel). Companion Officers will accompany these people either in a group or individually. LEOs who are either Actors and/or distressed Witnesses should be driven by others to their destinations and should not be permitted to drive until they are ready to do so.

B. Collect perishable evidence before transporting.

C. If circumstances prohibit simultaneous removal of all Involved and Witnessing officers from the scene, Actors and distressed individuals should be relieved first. Some Witness officers may be needed temporarily for scene security until they can be relieved.

D. Uninvolved Companion Officer(s) should remain with the sequestered LEOs (except during confidential conversations with a physician, lawyer, psychotherapist, clergyman or spouse), either in a group or individually, until they can be interviewed.

1. Functions of Companion Officers:

a. Provide companionship and emotional support.

b. Ensure the sequestered officers have privacy.

c. Accommodate LEOs’ needs for food, exercise, rest, sleep, clothing change.

d. Assist with notification to close family members, attorney and/or POA representative.

e. Refresh the LEOs’ knowledge about upcoming investigative procedures.
f. Ensure the integrity of each LEO's later statements to investigators.

E. Involved and Witness officers must **not discuss the case** among themselves, with Companion Officers, or with others, except their lawyers and the Investigators.

F. LEOs should be sequestered in locations which are **quiet, private, of suitable size, not emotionally negative** and which are **away from areas where Investigators are working**. Rest rooms, telephone access, non-alcoholic beverages, food or snacks should be nearby or provided. Conference rooms, meeting rooms, libraries, and break rooms often work well, but interview or interrogation rooms, the Chief's Office and the Internal Affairs Office are usually not satisfactory.

G. While awaiting interviews, Involved and Witness LEOs should be encouraged to relax and to carefully reflect upon what occurred. For their own use they **may wish to make notes** about the Incident which may be helpful during consultations with their attorneys and during interviews with MATF investigators.

22. **Locate, identify, detain, statementize and sequester witnesses** as well as possible.

   A. Prompt, aggressive and thorough efforts are needed.

   B. LEOs should interview them and then obtain statements from each which (1) detail their knowledge, or (2) clearly document their claim to have no knowledge of the Incident. This may be the only interview that will ever be possible with some witnesses. Audio recordings are best, followed by written and signed statements, followed by the officer taking notes and writing a comprehensive and accurate report of a non-recorded interview.

   C. When there are many witnesses, it may be necessary to triage them to determine the order of Patrol interviews.

   D. Identify witnesses thoroughly.

   E. Try to sequester witnesses who give patrol officers significant information pending formal interviews with MATF investigators.

23. **CSIs** (and other qualified personnel) can perform valuable functions at LEIF scenes prior to the Crime Lab's arrival, after which they may be asked to assist Crime Lab personnel.

   A. For immediate CSI duties, see the **CSI Checklist – Before The Crime Lab Arrives**, Attachment D on Page 77.

   B. OK to photograph and/or video until the Crime Lab arrives **without disturbing, contaminating, or collecting**. Photos of the crowd may be useful.
24. Plan and then start an **area canvass** to find more witnesses, relevant vehicles, weapons, evidence, routes of travel, or people.

25. Consider need to arrange for short-term **assistance for civilians** who are emotionally traumatized or displaced by the Incident.

26. Consider **needs of your personnel**: relief, food, water, shelter, restrooms.

27. **Debrief your Patrol officers** to determine what they have learned, what they have accomplished, and what remains to be done.

28. Collect your information and your thoughts and **prepare to present your detailed and specific information to a briefing** of investigators, crime scene processors, and LEA management and supervisors.

### Reduced Size Pocket Version

---

**Patrol Supervisors’ LEIF Checklist for Shootings and Generic Incidents**

1. **Emergency life saving is first priority.**
2. Enroute; if possible request needed additional resources: • more patrol cops • equipment • traffic control • translators, etc.
3. Make prompt decisions then review as necessary.
4. Notifications: • to your LEA’s command staff, detectives, CSIs, vehicle collision investigators, IA, PIO, POA, Peer Support • other LEAs if involved or affected • DA • Crime Lab • Coroner.
5. Expect many inquiries by cell phone from notified officials.
6. Consider: • checking field of fire • additional lighting • Command Post • record actions taken • designate a PIO • media alerts • media area • shielding public’s view • who writes original report?
7. Determine LEA and supervisor responsibility for non-LEIF duties elsewhere.
8. Assign LEI with tape recorder to ride ambulance or helicopter with injured person; • physical evidence • custody of person • safety of EMS & hospital personnel • safety of LEO • document statements made by any witnesses • document information & from medical personnel • contacts with witness’s family & witnesses.
9. Protect sensitive information. Caution on radio broadcasts & cell phones. Use hardware or personal contact when confidentiality is needed.
11. Secure control of scene access. • single safe ingress/egress point • limit EMS entry/exit to minimum after patient is removed • no news media inside scenes • MATF OK needed for LEO reposition, civilian reposition, & management.
12. Scene log: • diligently reconstruct who was inside scene(s) before log was started • all entries & exits made after log is started.
13. LEO’s discharged firearms in possession • normally in the field promptly & discretely obtain weapon and holster with gun belt • replace magazine if appropriate • minimal manipulation • CK to engage safety or lower hammer if really necessary • don’t open or disturb its condition • document readily visible details - model and serial number, trace evidence & condition • transfer to Crime Lab.
14. Other weapons involved? Secure in place and guard if necessary. Collect devices if area not secure.
16. Physical evidence at site: Promptly observe & document, then collect only if absolutely necessary.
17. All LEOs must act with proper decorum. Many people are watching.
18. The “What happened?” question. • Treat everyone appropriately • Ask each Actor & Witness LEO separately • Miranda only if custodial interrogation • voluntary statements are usually given • if not, don’t Liar/Suret unless absolutely necessary for public safety, exigent circumstances or crime scene management • order LEOs not to talk except to their reps and to investigators • don’t give legal advice • prepare to document their information accurately.
19. Radio broadcasts on wanted suspects, witnesses, vehicles, etc.
20. Collect perishable evidence from shooters and injured people before they are transported if not medically detrimental.
21. Transporting & sequestering involved and witness LEOs • send with uninvolved Companion LEOs to their own LEA facilities unless another suitable & agreeable location (e.g. other LEA hotel) is chosen • have perishable evidence collected first • remove Actors and distressed witness LEOs first • LEOs not to talk about case • sequester appropriately • encourage them to make notes to prepare for interviews.
22. Witnesses: locate, fully identify and “statementize”, then detain & sequester if appropriate.
23. CSIs and others: • Use CSI Checklist • CK to photograph/video and document detail without disturbing, contaminating or collecting, until Crime Lab arrives • crowd photos?
24. Area canvass and search for more witnesses, relevant vehicles, weapons, dropped evidence or clothing, route of travel, etc.
25. Need for short-term assistance for affected civilians?  
27. Debrief your personnel on their task results and progress.
28. Prepare yourself to brief investigators and others with specific and detailed information. Collect case information and your thoughts.

### ATTACHMENT A

**PATROL SUPERVISORS’ LEIF CHECKLIST**

Shootings and Generic Incidents

---

63
PATROL SUPERVISORS’ LEIF CHECKLIST
FATAL VEHICLE COLLISIONS

This Checklist is a guide to help Patrol Supervisors manage patrol officers’ response to vehicle collision Incidents where Contra Costa County’s “Law Enforcement Involved Fatal Incident Protocol” has been or will be invoked. It also has some application to non-Protocol collisions.

1. **Enroute** to collision scene(s)
   a. **By radio, establish control of vehicular and pedestrian traffic**, then modify as needed upon arrival and throughout operation.
      - Establish **detour routes** for public travel when practical.
   b. **Anticipate manpower needs** at collision site(s) and elsewhere; request more LEA personnel promptly.

2. **Approach to scene(s):**
   a.) All responders to scan for various **hazards** and **criminal threats** to anyone. Avoid or eliminate/mitigate hazards.
   b. All responders to **treat collision scenes as crime scenes**.
   c. Involved vehicles: lights, siren, engine, switches/controls, interiors = see Section 8(a)

3. **Emergency medical / life saving**
   a. Ensure **adequate emergency medical response** is already present or is enroute.
   b. Ensure **first aid** is provided as appropriate.
   c. Confer with Fire Dept. on **need for additional ambulance, medical helicopter**, etc.
   d. Consider **searching area** (bushes, fields, ravines, in water, over fence, etc.) for other involved vehicles, people.

4. **Identifying and handling the parties**
   a. **Differentiate suspects, victims and witnesses**, then have them identified, secured, separated and sequestered as appropriate.
   b. Suspects: Check for **probable cause** and/or outstanding warrants; **search for safety**; consider blood alcohol (B/A) testing; other physical evidence; spontaneous and/or medical statements;

ATTACHMENT B
PATROL SUPERVISORS’ LEIF CHECKLIST
Fatal Vehicle Collisions

64
c. Witnesses: see Item #8 below.
d. Radio broadcasts for outstanding suspect(s), vehicle(s), witnesses, evidence.

5. Re-evaluate need for additional LEA personnel throughout operation.

6. Ensure appropriate notifications are made (per Protocol and LEA policies), including:
   a. Other involved and affected LEAs.
      - Investigation of the Incident will be performed by the Protocol's Multi-Agency Task Force (MATF).
   b. Command duty officer.
   c. Specialized investigative units or investigators per LEA policy.
      The MATF’s Case Managers Team will coordinate the selection and callout of Protocol Collision Investigators).
   d. District Attorney’s Office.
   e. The LEA’s own collision investigator(s) (other than Vehicle Collision Investigators selected by the Case Managers Team).
   f. Crime Lab and/or/CSIs as appropriate.
   g. LEA’s Press Information Officer.
   h. Public Works, CalTrans or others for barricades, traffic diversion, traffic signal devices, lighting, traffic advisory or warning signs, spilled material, roadway structural damage, downed signage, downed trees.
   i. Public utility company for water, gas and/or electrical problems.
   j. CalTrans and/or CHP if regional traffic impact is expected.
   k. A representative of the Police Officers’ Association (POA), the Deputy Sheriffs’ Association (DSA) etc., to support involved LEOs.

7. Prepare yourself to brief responding officials on arrival; expect many cell phone calls.

8. Witnesses
   a. Promptly locate and adequately identify. Collision witnesses are very mobile and do not remain long at collision scenes.
   b. Include people who stopped to render aid.
REduced Pocket Version

PATROL SUPERVISORS' CHECK-LIST
LEIF FATAL VEHICLE COLLISIONS

1. En route to collision:
   a. Establish scene control via radio
   b. Establish alternate routes for public travel if necessary
   c. Anticipate manpower needs for scene(s) and elsewhere. Request more if needed.

2. Approach to scene(s):
   a. Scan for hazards and criminal threats. Avoid, mitigate or eliminate them
   b. Call for scenes are crime scenes (for all suspects)
   c. Involved vehicle lights, siren, engine, controls/windshields, interiors

3. Emergency medical and life saving:
   a. Ensure adequate EMS response is on-scene or enroute
   b. Ensure first aid is provided as appropriate
   c. Contact with EMS as needed for additional ambulance, medical helicopter
   d. Circulate area search for inter-involved vehicles, people in bushes, fields, ravines, in water, over fences, etc.

4. Identifying and handling the parties:
   a. Differentiate suspect, victim and witnesses; identify, secure, separate, sequent
   b. Suspects PC to arrest for involved; Warrant? Search for safety. B-A listing
   c. Other physical evidence

5. Witness(es):
   a. Witness(es): See Item #7 below

6. Radio broadcast for outstanding suspects (vehicle(s), witnesses, evidence:
   a. Re-evaluate need for additional LEA personnel throughout operation
   b. Ensure appropriate notifications are made (per LEA and PALEA policies) to:
   c. Close involved or affected LEAs
   d. Command staff
   e. Investigating unit(s)/investigative team(s)
   f. LEA's Press Information Officer
   g. Public Works; Caltrans or others for barricades, traffic diversion, traffic signal devices, lighting, warning signs, spilled material, roadway structural damage, damaged signs, etc.
   h. Utility company for gas and/or electrical problems
   i. Caltrans and/or CHP: regional traffic impact is expected

7. Prepare to brief responding officials on arrival; expect many cell phone calls

8. Witness(es):
   a. Promptly locate and fully identify. Collision witnesses don't remember long at scenes
   b. People who stopped to render aid
   c. Patrol officers to take initial statements from all witnesses
   d. Sign, date witnesses must be interviewed by MATF investigators
   e. Identity medical and fire responders
   f. Photo or videos made by deputies before officers' arrival? ID marker and get images
   g. Immediate pre-incident environment. Also see CSI Checklist

9. All involved vehicles:
   a. Photo or video documentation of vehicle (photos best) minus of gear, seat belt use, makes/brands, lights & signals, alcohol, BAC
   b. Scene photos, flips, etc.
   c. Vehicle identification, condition

10. Emergency vehicles:
    a. If needed for safety. OK to cut off power after documenting (photos best)
    b. Whether lights and sirens were activated, and configuration of their controls
    c. Otherwise LEA lights stay on (especially Code 3): OK to turn off siren after documenting

11. If vehicle lights are off, do not turn them on.

12. Non-emergency vehicles: OK to turn off engine or disarm guns for safety

13. Evidence on people leaving scene(s) (especially paraphernalia)

14. Photographic scene(s) and/or people before any potential alteration or departure

15. Leave evidence in place unless imminent danger; stop kinetic clean-up unless to eliminate immediate hazards

16. All gear, equipment, and property is to be left in place and on all vehicles, including involved LEA or LEO vehicle(s)

17. Tow trucks should not be used to tow until MATF investigators approve but OK for emergency rescue

18. Be alert for stationary video cameras that may cover area

19. Try to establish contact with B-A's from involved but not-expect civilians

20. Unless under arrest, B-A's for involved LEO's will be decided by MATF and/or Employer LEO's

21. Officer with tape recorder to ride in ambulance with injured for: Physical evidence

22. Custody of evidence and prevent unauthorized contacts

23. Release from handcuffs

24. Safety of EMS and medical personnel

25. Hot, comfort and protection for injured LEO

26. Document events leading up to event. In response to medical questions, typing declaration. Guest described body, items of clothing, information to and from medical personnel, contact with family, witnesses

27. Scene control issues:

28. Identify and secure all scenes, including crime scenes, excluding minor collisions

29. Vehicle pursuits involved. Foot chase suspects

30. Submit vehicle lights on at time of collision

31. Contact LEA's JSOC to keep in contact for processing by MATF

32. Suspect(s) vehicle(s)

33. Victim(s)

34. Location of body or injured person

35. Scene perimeter(s) must be sufficiently large

36. Consider evidence in pre-impact and post-impact zones. Evidence scatters

37. Establish pre-impact positions for safety and for evidence integrity

38. Turn scene movement by EMS present is necessary for patient care

39. Have crime scene log started. Strictly limit access

40. Determine what changes to scene have occurred. Changes documented before, who, why

41. Need to check any of scene from public view

42. Non-involved people and/or vehicles wanting to leave crime scene perimeter. Decide on case-by-case basis. Document (pictorially) identity of the people and vehicles, request vehicles to ensure non-involved, check location of those vehicles before movement

43. Interdicted LEOS, another Officers or Witnesses

44. Determine their condition

45. Ask: What happened?

46. Transport to their local LEA unless they agree otherwise

47. Assign Companion Officers

48. Have LEOs sequenced pending MATF contact

49. Establish Incident Command Post, including staging area and news media area as needed

50. Neighbors or area canvass needed

51. Law Enforcement Involved Shooting Involved - see Patrol Supervisors' Checklist for Law Enforcement Involved Shootings

52. Provide sensitive information - consider use of blindline or secure phone

53. Dead bodies(?) don't search or make notifications to next of kin. Notify coroner but body removed by MATF's decision

54. B-A's to act with proper decorum

55. Control vehicle approach

56. Prepare to brief MATF investigators: detailed and specific information needed

57. Logistics:

   a. Medic琉aid for LEOs

   b. Rotate scene personnel

   c. Responsibility for law enforcement service elsewhere and supervision of

---

This Checklist was created through the efforts and collaboration of the following individuals:

Sgt. Marty Birch, Richmond Police Department; Sgt. Chris Childs, California Highway Patrol; Lt. David Chilimidos, Concord Police Department; Officer Mark Covington, Walnut Creek Police Department; Lt. Dave Fox, California Highway Patrol; Sgt. Darrel Graham, Concord Police Department; Sgt. Lee Hendrixson, Richmond Police Department; DDA Bob Hole, Contra Costa District Attorney's Office; Lt. Rob Patrick, California Highway Patrol; Sgt. Mike Perry, Pittsburg Police Department; and the California Highway Patrol's Golden Gate Division MATF team led by Sgt. John Blencowee.

ATTACHMENT B
PATROL SUPERVISORS' LEIF CHECKLIST
Fatal Vehicle Collisions

70
SUPERVISORS’ LEIF CHECKLIST
INSTITUTIONAL CUSTODIAL DEATHS

Contra Costa County’s “Law Enforcement Involved Fatal Incident Protocol” applies to most institutional custody deaths.

This Checklist is to assist Custodial Institutional Supervisors manage the initial response to deaths of people in the custody of LEA custodial institutions, whether such deaths occur within county or city jails, holding rooms, court facilities, transportation vehicles, medical facilities, interview rooms, or elsewhere. The tasks listed below are typically performed in the interval between the discovery of the death (or discovery of the person’s medical distress which is expected to result in death) and the time the Protocol’s Multi-Agency Task Force’s investigation begins.

- This Checklist is not primarily intended to apply to deaths which occur prior to the time arrestees enter a custody facility for the purpose of custodial processing, although portions of it may be useful in those situations.
- It applies to all institutional deaths occurring by accident, suicide or at the hands of another and it applies to some “natural physiological deaths”.

Because nearly all deaths in custodial institutions are of inmates, this Checklist does not directly and specifically address the deaths of non-inmates (e.g. Law Enforcement Personnel or civilians) in custodial environments because these deaths occur so infrequently.

Abbreviations

- MATF = Multi-Agency Task Force.
- LEIF = Law Enforcement Involved Fatal Incident. Under Contra Costa County’s LEIF Protocol, this term includes most deaths which occur in custodial institutions.
- LEA = Law Enforcement Agency
- LEO = Law Enforcement Officer

Protocol Invocation

The death, or imminent death, of a person who is in institutional custody in Contra Costa County is a mandatory Protocol case, except custodial deaths which were medically expected and were caused by previously diagnosed medical conditions (such as cancer, AIDS, a heart condition, emphysema, etc.), and which were being treated by institutional medical personnel, provided that institutional suicide, trauma, accident, or use of intoxicants was not involved. Protocol Ref 79.

Protocol investigations are also performed on some deaths which occur within 48 hours of the person’s release from a Contra Costa custodial facility. Protocol Refs 80-81.

The Protocol contains an optional invocation provision allowing LEAs to initiate a Protocol investigation of Incidents which are not mandatory Protocol cases (even those in which death is
not involved). Make the optional invocation decision promptly. When invoking, quickly notify the appropriate officials within your LEA and outside your LEA.

1. **Life saving efforts** are the first priority.
   a. Immediate life saving efforts by first responders - first aid, CPR, etc.
      • Reminder: unless death is pronounced by competent medical authority, immediately cut down hanging inmates if it is safe to do so and not wait for photos, a supervisor, medical assistance, etc.
   b. Ensure notification to institutional medical staff (EMTs, paramedics, nurses, doctors, nurse practitioners and physicians' assistants).
   c. Ensure notification to the fire department and/or ambulance.
   d. If medical transport to an outside facility is needed, assign an LEO to accompany the patient in the same vehicle for these purposes: (See Patrol Supervisors LEIF Checklist for Shootings and Generic Incidents Item 7 for more details on these points.)
      1) Physical evidence protection.
      2) Custody of inmate.
      3) Aid, comfort, protection.
      4) Spontaneous statements, statements during medical treatment, dying declarations.
      5) Information to and from medical personnel.
      6) Potential contact with witnesses and family at hospital.
      7) Identification of EMTs, Paramedics and ER staff.
   e. Consider that the inmate or area may pose a health hazard such as from chemicals or a communicable disease.

2. **Security:**
   a. Lock down involved incident areas (not just the specific Incident scene) as appropriate for: (1) institutional security; (2) personnel safety (staff, inmates and civilians) (3) evidence protection; and (4) investigative procedures.
   b. If a completed or attempted escape is involved, follow LEA’s procedures.
   c. Consider need to close the facility to new inmates and to visitors.
   d. Consider blocking all inmates’ phone calls.

3. If **deadly force was used** by law enforcement personnel, also refer to the separate Patrol Supervisors LEIF Checklist for Shootings and Generic Incidents.

ATTACHMENT C
SUPERVISORS’ LEIF CHECKLIST
Institutional Custodial Deaths
4. Promptly request additional LEA personnel as needed, for:
   a. Security: scene(s) protection, lockdown procedures, cell searching for weapons or contraband (when necessary for custodial security purposes, not as part of the LEIF investigation), sequestering people.
   b. Assisting investigators: access and escorting, inmate movement for interviews, etc.
   c. Handling non-LEIF duties in the rest of the facility.
   d. Consider need for more supervisory staff for the LEIF and/or routine detention duties.

5. Notifications
   a. Chain of the LEA’s Command.
   b. PIO.
   c. LEA’s Civil Litigation investigators and/or Risk Manager.
   d. Notification about Protocol invocation to:
      1. District Attorney.
      2. Crime Lab.
      3. Coroner.
      4. Any other LEA(s) if recently involved in the inmate’s arrest or transportation.
      5. POA/DSA representatives for involved personnel per LEA procedure.
   e. Notification of facility’s closure to other potentially affected LEAs.
   f. MATF investigators will make death notifications to next of kin.
      1. Exception: When a verified family member learns that his/her inmate relative has a medical problem in the jail and then either telephones or makes a personal visit to the facility to check, notification should be made at that time by a suitable official.
   g. Anticipate receiving phone requests for more information from officials who are notified of the Incident.

6. Incident scene(s) and physical evidence: Treat involved scene(s) as Crime Scenes.
   a. Limit access to scenes to only those officials who must enter.
   b. Have photos taken of involved inmate(s), scene, medical response, etc. as promptly as possible. Be careful not to disturb evidence.
   c. Remove and/or sequester other inmate(s) from scene(s) and/or area(s) as necessary
for security, evidence protection, interviewing, and emotional concerns.
• This may be difficult in small jails. More officers may be needed for sequestering, and transferring to other facilities may be necessary.

d. Consider need and authority for **prompt searching of inmates** being removed from the scene or area of the incident.

e. Initiate a **Crime Scene log**.

f. Are there **secondary scene locations** inside and outside the institution such as:
   1. Cell(s) where the inmate had recently stayed.
   2. Booking.
   3. Sally port.
   4. Holding cells or areas.
   5. Interview or visiting rooms.
   6. Medical treatment rooms and facilities.
   7. Areas involved in escape or an attempt.
   8. Recreation or eating area.
   9. Law enforcement vehicle(s) which transported inmate to jail and/or medical facility.
   10. Arrest scene.
   11. Ambulance.
   12. Court areas.
   13. Other vehicles, residence, business.

g. Caution for **health hazards**, such as chemical agents (OC spray, etc.), biological materials.

h. Ensure **relevant evidence is safeguarded**: instruments, weapons, and/or evidence. Include items that may be even possibly relevant. Examples:
   1. Medical paraphernalia. **DO NOT COLLECT OR DISCARD** – leave in place.
   2. Intoxicants (alcohol, drugs, chemicals, etc.).
   3. Medications.
   4. Containers for medications and intoxicants.
   5. Law enforcement restraints.
   7. Inmate weapons.
   8. Ligatures and their source material.
   9. Documents such as notes and letters and especially suicide notes (i.e. anything that shows inmate’s state of mind including inmate’s reading material).
   10. Biological matter such as blood, vomit, urine and fecal material, on floors, walls, furniture, clothing and bedding, etc.
11. Inmate’s clothing which was removed from him/her during medical efforts.
12. Foods and beverages and their containers and wrappings, especially in inmate’s housing area.
13. Trace evidence:
   a) Fingerprints.
   b) Footprints.
   c) Suspicious substances.
14. Inmate’s personal property stored by the facility.
15. Other property of the inmate:
   a) If in cell = leave undisturbed.
   b) Elsewhere (such as in booking) = locate, identify the container, safeguard, and hold for investigators.
16. Any video or audio recordings or photos made of the Incident?

7. Refer press inquiries to PIO or other official specified by LEA procedures.

8. Determine which people are relevant to investigation of the Incident, then: (a) get their identities; (b) determine their roles in the Incident; (c) know the end of shift time for staff members; (d) obtain a summary of what they know about the Incident in preparation for briefing (see # 11-a below).

   a. Sequester involved and witnessing persons (see sections b and c immediately below for examples)

   b. Jail staff and involved LEOs (whether assigned to the institution or not):
      1) Separately ask involved staff "What happened?" for these purposes:
         a) Managing the Crime Scene(s) and physical evidence
         b) Identifying and handling any Exigent Circumstances
         c) Ensuring safety of people and property
         d) Briefing MATF investigators and others
         This information is usually provided consensually by staff members. Do not compel this information through Lycager unless absolutely necessary. (See Patrol Supervisors LEIF Checklist For Shootings and Generic Incidents for more details.)
      2) Anticipate holding some involved staff members past shift end for interviews (especially custody staff and medical personnel).
      3) Have staff listen for comments from inmates about the Incident.
      4) Have staff try to collect intelligence material from inmate sources about the Incident and the decedent.

   c. Inmates
      1) Have relevant inmates screened for injuries, involvement and any knowledge of

ATTACHMENT C
SUPERVISORS' LEIF CHECKLIST
Institutional Custodial Deaths

75
Incident.

a) Medical or mental health attention as appropriate.

b) Consider moving inmates to other areas pending MATF interviews.

c) Special consideration to inmates who may have had recent contact with involved inmate.

d) OK to take brief patrol-type statements from inmates with significant information. (MATF investigators will re-interview those inmates later, as well as other inmates who were not interviewed by staff.) It is often important to determine where each inmate was when the Incident occurred. Audio recordings may be very useful, especially if surreptitiously done.

e) Consider delaying transfers and releases of inmates pending custodial staff's consultation with MATF investigators.

2) Sensitive areas (such as death scene, body, etc.) should not be viewable by inmates. Inmates should not view even a covered body. Cover windows, erect screening or move inmates to other locations. Try to prevent inmates from hearing official conversations about the Incident.

3) Sequester appropriate inmates for MATF interviews

d. **Medical staff /EMS/fire department.** Have all identified and their duty stations and contact information ascertained.

e. **Civilians,** such as janitors, trades and repair people, inmates' visitors.

9. OK to have **photos** taken but don't compromise any physical evidence. MATF and Crime Lab will do scene and evidence processing.

10. Assign an **LEO to write reports** (criminal and/or administrative) required by LEA procedures. Usually an MATF investigator from the custodial LEA will write any crime report that is necessary.

11. **Preparation for the MATF investigation:** A Supervisor will have a major role in briefing the investigators.

a. **For briefing MATF investigators** and others:

1) Collect detailed information about the Incident and about the inmate from staff and documents including:

a) Chronology of Incident.

b) Information on inmate's condition (alive? prognosis? presence or absence of trauma?).

c) Observations and actions of staff members.

d) What staff members have learned from inmates and from other interviews.

e) Inmate's history in the institution.

f) Language difficulties requiring interpreter(s).
g) Actions taken pursuant to this Checklist.

2) Collect, review and have copies made of relevant documents, including:
   a) Inmate’s complete booking file, including arrest records. Records of the
      inmate’s prior incarceration in the facility may also be needed. (Note: copies
      must be made for investigators of ALL documents in the file.)
   b) History of the inmate’s movement and housing inside the institution.
   c) List of who has visited inmate, and of who is authorized to visit.
   d) Disciplinary or other Incident records on the inmate.
   e) Any history of telephone calls made by inmate.
   f) Inmate’s institutional medical records (if obtainable). If not obtainable, try to
      ensure their integrity until they can be obtained by legal process (such as
      consent, coroner’s subpoena, search warrant, court order, etc.).
   g) Inmate’s classification documents.
   h) Separation logs.
   i) Observation checklist or log.
   j) Computerized Incident history (if any).
   k) Copy of Dispatcher recordings of relevant radio and telephone traffic.
   l) Roster of inmates in relevant housing areas and room/bunk assignments.
   m) Listing of LEA staff (sworn, non-sworn, medical, etc.) involved in Incident and
      the response to it.
   n) Housing unit’s event log or note book (computerized or handwritten).
   o) Logs or printouts showing relevant entries into controlled areas (whether
      handwritten, computerized, or by card readers).

b. **Notify front counter/lobby** personnel to expect arriving investigators.

c. Arrange **adequate rooms for MATF** briefing and operations.
   1) Chart paper, broad tip marking pens, tape to attach paper to walls.
   2) Telephone access (if possible).

12. Consider **emotional impact** of Incident on staff and inmates. Take appropriate action.

13. **Meals** for staff, investigators and inmates may be needed during the investigation.

This Checklist was created by a committee consisting of:

Sergeant Dimitri Barakos, Antioch Police Department; Commander Scott Daly, Contra Costa Sheriff’s Office; Captain Greg Gilbert,
Contra Costa Sheriff’s Office DDA Bob Hole, Contra Costa District Attorney’s Office; Sergeant Garrett Voerge, Concord Police
Department; Lt. Pat Welch, Antioch Police Department

ATTACHMENT C
SUPERVISORS’ LEIF CHECKLIST
Institutional Custodial Deaths
CSI CHECKLIST
BEFORE THE CRIME LAB ARRIVES

Pending arrival of the Crime Lab, certain physical evidence tasks should be performed by early responding officers to protect the evidentiary value of physical evidence and conditions at the scene(s). Preferably these officers have had CSI or evidence technician training. The quality of the physical evidence that will ultimately be collected by the Crime Lab often depends upon prompt and effective action by LEA personnel who are at the scenes shortly after LEIF Incidents occur.

- **Extreme caution** must be used by all personnel (including CSIs and Evidence Technicians) to avoid contaminating, altering or removing evidence at the scene, and to avoid creating artifacts.

- Crime Lab personnel are usually available to consult with on-scene personnel via cellular phone while they are enroute to the scene. Obtain their phone numbers through the Sheriff's Dispatch Center or from District Attorney personnel investigating the incident.

1. Take immediate steps to **secure the scene(s)** and to **control scene access** and routes. (This must be done in conjunction with the Venue Agency's patrol supervisor who is in charge at the scene.)

2. **Record transient detail** through photographs, videos, note taking, and/or sketches to document items, conditions, actions and observations which are likely to change before the Crime Lab arrives. Examples:
   
   a. General appearance of the scene and surrounding area prior to darkness falling, the arrival of a storm, start of heavy commute traffic, etc.
   
   b. Location and condition of weapons.
   
   c. Location of bullet casings.
   
   d. Condition of relevant people (injuries, clothing, actions, appearance, etc).
   
   e. Blood drops, flow or spatter patterns.
   
   f. Location/condition of other biological evidence.
   
   g. Location and condition of involved vehicles (including LEA vehicles).
   
   h. Operation of lighting and other features of relevant vehicles, including patrol car emergency equipment (Code 3 equipment), hazard warning lights, loud radio.
   
   i. Other vehicles in the area (possibly involved, belonging to witnesses or victims, etc.).
   
   j. Doors (open, opened partially, closed).
   
   k. Lighting (man-made and natural).
   
   l. Windows, blinds, curtains and shutters (open or closed).
m. Weather conditions.

n. Traffic conditions (if relevant).

o. Skid marks, collision debris and the extent of debris scatter field, impact and gouge marks, vehicle fluids on ground.

p. "Artifacts," As used here, these are artificial changes of an item or condition caused by something that is extraneous to the Incident, i.e., something that was not present when the Incident occurred and had no direct bearing upon the Incident's occurrence. Examples:

1. Results of emergency medical efforts, including the movement of an injured person, movement of furniture, cutting or total removal of clothing, creating or obliterating foot tracks, dropping or smearing of blood, removal of doors or gates, abandonment of medical debris, turning lights on or off.

2. Weather.

3. Water from sprinkler systems, dew, river or stream flow.

4. Arrest, struggle, and/or removal of suspect.

5. Animal (especially dog) or insect activity.

6. Clean up efforts.

7. Vehicle movement or change in the vehicle's condition (such as turning off emergency equipment).

8. People walking inside scene.

10. Items dropped, such as gum, cigarette butts, matches, food wrappers and containers, scrap paper, hair.

12. Evidence items changed by being picked up, stepped on, kicked.

q. People present at the scene, including crowds (if relevant).

3. If possible, collect Gunshot Residue samples from gunshot victim(s) and shooters who are being transported from the scene. Use Gunshot Residue collection kits. Other types of trace evidence may also need to be collected, as stated in #4.

4. When necessary, protect if possible (and collect if absolutely necessary) any evidence which is in imminent danger of being lost, destroyed or contaminated. Examples include footprints, blood drops, expended bullets or shell casings, vehicles, vehicle tire tracks, items which will be blown away by wind or washed away by rain, firearms or valuables which are subject to theft, trace evidence on people leaving the scene, etc. Consider the ambulance and Emergency Room as locations of evidence which may need protection.

5. Scene log: Help ensure that a written log is started to adequately record every entry and exit at the scene. Information must include identity of each person, their agency or other affiliation to the case or scene, the time(s) of entry and exit, and the reason for entry. (Refer to Patrol Supervisors LEIF Checklist for Shootings and Generic Incidents for more details.)
a. The log must include the names and identifying information of everyone (police, fire and ambulance personnel; civilian passersby, victims, witnesses; etc.) who entered the scene prior to the log being started, whether they are still present or have already left the area. (Contact may later be needed with those people to obtain elimination shoe prints or fingerprints, or to ask about certain observations and actions.)

6. Take full length (stand-up, head-to-toe, and of all sides) color photographs of involved people (officers and civilians). Pay particular attention to wounds, damaged clothing, trace evidence, etc. and document them with close-up photographs.

7. Assist the scene supervisor or investigators in the documentation and/or collection of LEOs' firearms, duty belts, and/or clothing, if these items are being collected at that time and place.

8. As needed, assist in the collection of blood or urine from LEOs or others.

9. Document the position of participants and witnesses at the scene as revealed by them during initial scene explanations.

10. Make a preliminary sketch of easily visible aspects of the scene without entering the scene (unless OK'd by MATF investigators or by the Protocol-designated evidence collectors). Do not take measurements or do anything else that might contaminate the scene. Use a straight edge and make the sketch in correct proportion but not necessarily to scale.

   a. MATF investigators will probably ask for another sketch which shows scene landmarks but which does not show evidentiary detail at the scene (such as the location of a body, blood, gun(s), bullets, etc.). Copies of these sketches will be used primarily by investigators during interviews.

11. When the Crime Lab arrives, they will assume responsibility for processing the scene.

   a. Brief them in detail on what you have observed and done and on any evidence processing you believe should receive priority attention.

   b. Confer with them on the immediate disposition of evidence you collected.

   c. Qualified officers may be asked to assist the Crime Lab with preparation of diagrams, processing of latent and patent prints, photography, logging of measurements and photographs and evidence, scene lighting, transportation of evidence and other duties. They will be working under the direction of the Protocol-designated evidence collectors.
# Autopsy Evidence Collection Checklist

Contra Costa County

Decedent's Name: ____________________________ Coroner Case No. ____________________________

LEA and Case No. ____________________________ CSI/Criminalist(s) ____________________________

Autopsy Date ____________ Pathologist ____________________________ Lab No. ____________________________

**Use notes:**

A. This guide corresponds with the procedures followed in Contra Costa County, and it is organized to follow those procedures sequentially. Modifications may be necessary for use in other jurisdictions. In many jurisdictions the pathologist and his/her staff collect and document all evidence at autopsy, while in other jurisdictions the police investigators and/or CSIs or criminalists do much of that work.

B. Use a separate fresh copy of this guide for each autopsy.

C. Prior to each autopsy, review this guide to determine which steps will be relevant to that specific case. Place a Checkmark (✓) in the "To Do" column beside each step that is applicable. When each step has been completed, place a checkmark in the "Done" column.

D. You may make notations on this document.

### A. Preparatory to Autopsy

1. Bring to autopsy: Decedent's clothing; OTC and RX medications; weapons or objects which may have marked the body; relevant photos. Also see the Contra Costa County Sheriff/Coroner's document entitled *Death Investigation Roles Of The Coroner And Law Enforcement Agencies.*

2. Arrive at morgue at least ½ hour before scheduled autopsy time.

### B. Pre-Autopsy Processing of Body

Many of these procedures may be performed prior to the pathologist's arrival but they must be done without disturbing the body or clothing.

1. Ensure that trace evidence is not compromised when x-rays are taken.

2. Without moving or undressing body, conduct a visual examination, and do head to toe photography before subsequent undressing, washing, evidence removal or removal of medical therapy devices. Ensure complete body coverage. Use good lighting. Use magnifying glass and/or stereo microscope if appropriate. See Item #12 regarding trace evidence.

   a. Use normal and close-up lenses as appropriate.

ATTACHMENT E

Autopsy Evidence Collection Checklist
b. To confirm or determine the decedent's identity, or for other immediate investigative needs, take digital or other instant photos of face and/or identifiable body features. Delay this until Item #146 if cleaning is needed before presentable ID photos are taken.

c. **Note regarding photography:** When photographing wounds and marks on any body surface (but especially on curved surfaces) at any stage of the autopsy, it is essential to position the camera perpendicular (i.e. at 90 degrees) to the plane of the wound or mark, and to aim the lens directly into the center of the wound or mark.

---

3. Examine the body and clothing using good lighting and magnification if necessary. Make written notes and/or sketches of the condition of the body and clothing, relevant positions, location of observable evidence, body or clothing defects which appear significant, and possible "artifacts" (see Item #123 for artifacts).

4. Examine carefully for trace evidence which undressing or body clean-up will disturb.

a. Use good lighting and magnifying glass.

b. Trace evidence types (examples):

   1. Soil

   2. Vegetable/vegetation matter.

   3. Blood. Remember that blood on the decedent may be from the decedent or from someone else (such as the suspect).
4. Hair (human, animal)
   a. Loose hairs: collect with new comb and/or clear tape lift and/or
tweezers. Package into a paper bundle and then place into a paper
envelope.
   b. Hair standards from the body will be collected later at Item #183+.

5. Fibers

6. Glass

7. Grease, oil

8. Gunshot residue. Collection of GSR will be done later at Item # 70+.

9. Face powder, lipstick (decedent’s or from another person)

10. Semen

11. Visible prints (finger, shoe, tire, etc). See Items # 46-56 for collection

12. Paint

c. Document trace evidence by photography and sketching prior to collecting.
Collection is immediately below at Item #30.) Consider macro photography.

d. Collection methods. If removal of clothing may disrupt important trace
evidence, ask that clothing be cut off carefully, avoiding wounds, defects, GSR
patterns, blood on clothing, or other evidence.

1. Collect by gloved hand or clean/new fine tip forceps.

2. Tape lifts. Use clean tape. To store, suspend tape pieces inside closed
containers made of clear glass or plastic, or to inside of clean plastic
bags.

3. Swabs
   a. If only a small quantity of material exists, concentrate stain by
   collecting it on tip of cotton swab using small amount of water.
   Distilled water is preferable.
   b. If stains are at multiple sites on body, collect from many areas
   using separate swabs for each stain.
   c. Label each swab or their individual containers, showing case
   number and collection site of each swab.
   d. Air dry swabs if possible before packaging. Must not contaminate
   one swab with another.
   e. Control swabs are necessary – collect one from each area where a

ATTACHMENT E
Autopsy Evidence Collection Checklist

83
stain sample is collected. (Controls are swabs of unstained surfaces adjacent to each stain site.)

e. Hands, fingernails

1. Examine with good lighting and a magnifying glass or stereo microscope. ONLY IF no trauma is present, collect and package trace evidence from hands and nails. If trauma is present, delay collection until pathologist's approval.

2. Fingernail cuttings: delay collection if trauma present. Cut nails with clean instrument.
   - Clean the cutter with bleach before and after using.
   - Collect and package clippings from the right hand separately from clipping from the left hand.

3. Examine for, photograph, and consider subsequent collection of broken nails if possibly relevant to case.

4. Fingernail scrapings (only if nails are too short to clip): use clean/new wood-tipped device such as toothpick. Package the scrapings in clean paper with pharmaceutical folds. Use a separate device for each hand.

5. Remember to look between all fingers.

f. On clothing: Collect loosely adhering trace evidence which may be dislodged.

g. Prints on cadaver's body surface (e.g. fingerprints, shoe prints, tire prints, etc.)

1. Bloody: After you are certain that good close-up (macro) photos have been taken of prints one-to-one, both with and without scale, consider use of a blood reagent to develop or enhance bloody prints, smears or stains. CONTACT LAB for advice or assistance.

2. Other visible prints (e.g. grease): contact Lab for advice.

3. Latent fingerprints on the body: if latent fingerprints are a possibility the body should not be refrigerated.

   a. Photography: (See Item #10 regarding photos of curved surfaces.) Take good close-up (macro) photos of prints, one-to-one, with and without scale.

   b. Methods of developing, lifting and/or photographing: CONTACT LAB.

      1. Electrostatic lifting of dust prints.

      2. Iodine fuming with silver plate lifting. Photograph the silver plate lifts.

4. Magna brush with metal powder.

5. Sampson Lift Method. (Contact Lab for details.)

h. Alternative light sources (ALS):

Use ALS and/or black light (ultra-violet) exam of body and clothing before wash-up and clothing removal.

1. View in dark using protective lenses to protect your eyes.

2. Be sure the pathologist is shown anything you find, prior to further processing.

Photograph (see Item #10 regarding curved surfaces) significant findings such as healing wounds, trauma, stains, trace evidence, etc., under the ultraviolet light. Contact Lab for photography method.

3. Sketch.

4. Outline any luminescent stains with a permanent ink marker for exam under normal light. Photograph marked areas under room light or with flash.

5. Swab luminescent stains as described in Items #33-38.

6. Obtain control swabs as described in Item #38.

i. Gunshot cases

1. Gunshot residue (GSR) may help determine:

   a. Proximity of decedent's body or clothing to the muzzle or to the side of a discharged firearm.

   b. Orientation (positioning) of various body parts to the firearm at the time of discharge.

   c. If the decedent fired a gun.

   d. Type of ammunition fired.

2. GSR on body surfaces:

   a. If GSR was not previously collected from the body at the scene prior to removal of the body to the hospital or morgue (as is preferable), the body should not be refrigerated prior to GSR collection at the morgue.

   b. Photograph (see Item #10) regarding photography of curved surfaces) any visible GSR with and without scale. Some of your photos must show 100% of the GSR pattern.

   c. Consider tracing visible gun powder particle pattern on clear acetate sheets.

ATTACHMENT E
Autopsy Evidence Collection Checklist
d. Collect visible and invisible GSR.

1. Use magnifying glass or stereo microscope (one is located at the Morgue) to look for non-obvious GSR.

2. Consider tape lifting but do not do tape lifting on areas that might be processed for latent prints.

3. Use adhesive SEM disks for back of hands, palms and other surfaces as appropriate.

3. GSR on clothing:

   a. Photograph with and without scale.

   b. Remove garment later (at Item #124+) and package it without disturbing GSR.

4. Photograph wounds and the immediately surrounding GSR pattern(s) with scale. Describe in notes. Have area around wound shaved if necessary.

5. Collect dry residue from wound site(s). Look for tattooing.

6. With pathologist's approval, swab interior of wound for GSR. Consider swab of wound track.

7. Have hair shaved from wound site. Look for tattooing.

8. Collect shaved hair for later Lab exam for GSR and shattering.

9. Photograph wound after shaving and cleaning, with and without scale. Consider one-to-one photography to show specific detail.

10. Take additional photographs of all wounds after cleanup.

j. Explosives cases:

1. Dynamite is often tagged with small multi-layer chips. Use a magnet placed inside a new plastic bag to collect these.

2. Using swabs with wooden or paper shafts, moisten swab with acetone and swab relevant areas. Air-dry the swabs and place in plastic or glass containers. Wear rubber gloves.

3. Collect control swabs from body areas which are not contaminated by the explosive.

4. Bite marks:

   a. Examine suspected bite areas with ultraviolet light. Wear protective lenses to avoid damaging your eyes. Photograph positive areas using the black light for illumination. Call Lab for advice about this photography.

**ATTACHMENT E**

*Autopsy Evidence Collection Checklist*
b. Swab the bite mark area for possible saliva using a swab moistened with a small amount of distilled water. To concentrate the saliva on the swab, use only the tip of the swab.

c. Obtain control swab(s) in same manner as evidence swabs. See Item #38.

d. Label swab(s) and air-dry. See Items #36-38.

e. Photograph suspected bite marks, with and without scale, in color (and in black and white if using film). (Color digital photos can later be converted to black and white using Photoshop.) Take macro (one to one) photos in addition to standard photos at normal range.

f. Photograph suspected bite marks in color, with and without scale. Take macro (one to one) photos in addition to standard photos at normal range. If using a digital camera, ensure the camera settings are at a high enough resolution to allow for adequate enlargement and image enhancement without loss of image quality.

g. Cast bite marks with Mikrosil casting putty.

h. Have the pathologist excise the bite mark at autopsy. It should then be frozen and retained. Store in formalin to preserve tissue shape (Formalin is OK because DNA is not needed from the tissue).

---

5. X-rays. If x-rays will be taken at autopsy, use care not to disturb trace evidence. With the pathologist, examine any autopsy or hospital x-rays, MRIs or CT scans for:

a. Bullets, knife tips, wound paths, bone and metal fragments. (Keep in mind that some people have old bullets in their bodies from previous incidents.)

b. Broken bones.

c. Old fractures which have healed (especially relevant in child abuse, spousal and elder abuse cases).

d. Photograph significant x-rays while they are on the x-ray viewer using the viewer's light but no flash. Be sure x-rays are retained (usually by the Coroner's Office).

---

6. Ligatures/hangings

a. Photograph ligature in place on the body if it has not already been removed.

b. Pathologist should determine tightness and exact orientation.

c. Pathologist should cut the ligature a distance away from the knot,
then tie those newly cut ends together with string or wire to clearly identify ends which were cut at autopsy. Be careful not to contaminate ligature with sources of DNA, especially blood or other body fluids/tissue from the decedent, as someone else’s DNA may be present on ligature.

d. Preserve ligature for non-victim DNA, prints and trace evidence.

e. With ligature on an absolutely clean surface, photograph ligature after removal from body. Be sure to include the knot.

f. Photograph the skin surface previously beneath the ligature, especially any furrows, marks, fingernail scrapings, etc., with and without scale.

g. If decedent apparently tried to loosen the ligature, check fingernails for tissue from neck. If found, photograph, then follow Item # 39+ for collection.

h. Tape-lift the area previously beneath the ligature for trace evidence.

i. Consider tape-lifting hands for hairs and fibers (especially fibers from the ligature).

7. Photography of other markings, trauma, and conditions, with and without scale. Consider use of various lighting techniques, filters, and different films. Examples:

a. Writing on skin, including faint tattoos.

b. Stains and smears.

c. Footwear impressions.

d. Blood flows, patterns or spatter: photograph blood patterns with and without a scale. If removal of clothing may disrupt important bloodstain evidence, ask that clothing be cut off carefully to avoid any wound defects. GSR patterns, blood stains on clothing, or other evidence. Avoid contaminating the clothing with additional blood from the victim as clothing is removed.

e. Lividity. This photography is especially relevant if the fixed lividity is inconsistent with the position of the body when found. Show scene photos of body’s position to the pathologist.

8. Decomposing body: Collect representative samples of all the various types of insects on the body, and for each type, collect samples of each of their stages of life (e.g. eggs, larvae, pupae, and adults). An entomologist may be able to use this evidence to help determine time of death.

9. CAUTION FOR ARTIFACTS: At all stages of the autopsy, be alert for

ATTACHMENT E
Autopsy Evidence Collection Checklist

88
post-mortem artifacts. These are conditions, marks, items, and substances which are present on the body or clothing but which were made, left or deposited during medical procedures, transportation or handling of the cadaver, during morgue procedures or evidence processing, or even during the autopsy itself. They have nothing to do with the cause and circumstances of the person's death, but because they are in fact present, they cannot be ignored and must be documented. Their origin must be accounted for if possible to avoid possible subsequent misinterpretation. Confer with the pathologist about identifying them and their sources and about how to best document them.

Some examples of artifacts: the presence on the body of fingerprint ink or powder caused by fingerprinting the cadaver; impressions on the torso caused by EKG pads; medical incisions (such as cut-downs for catheters or drainage tubes) or needle marks made during life saving efforts; blood or hair transferred onto the body from the autopsy table, from dirty equipment or supplies, or from someone attending the autopsy; glove impressions on the skin left when handling the body; impressions on the body made by the autopsy table, the gurney or backboard or by tie downs; incisions made in the skin during the autopsy; and blood on a previously clean body surface which flowed from an autopsy incision.

C. REMOVAL OF CLOTHING AND CLEAN UP OF BODY – done only at the pathologist's direction

1. Photograph the layer by layer undressing of the body.

2. Clothing is to be removed intact if possible, without cutting or tearing. If cutting is necessary, cut to avoid any wounds, defects, GSR patterns, blood on clothing, or other evidence. Record what cutting was done.

3. Collect all clothing and footwear. Collect clothing in a manner to avoid losing, disturbing, contaminating or cross-contaminating evidence.

4. Air-dry wet items before packaging if possible.

5. Clothing with important blood patterns, biological stains or other significant evidence should be separately sandwiched between sheets of clean butcher paper before each item is folded and separately packaged.

6. Package each item separately in paper bags (not plastic).

7. The clothing should be cautiously and thoroughly searched for evidence and personal items.

8. Determine which items of decedent's personal property at the morgue should be collected and retained as evidence. Remember that items not collected for evidence will be released to the next-of-kin or disposed of by the Coroner's Office.
   a. Examples: clothing, jewelry, wallet or purse, address books, money, notes, cell phones.
   b. Consider photographing or photocopying items you elect not to collect as

ATTACHMENT E
Autopsy Evidence Collection Checklist
evidence as they might later have value as evidence or investigative leads.

9. Possible sexual assault:

a. The pathologist will examine body orifices for trauma and for evidence.

b. Swabs and swarbs: Vaginal, rectal and oral. The pathologist will do the swabbing of body orifices, then will transfer collected material to glass microscope slides. Multiple swabs are required. Label the slides and swabs. Air-dry the slides and swabs before packaging. If pertinent, request esophageal, vaginal, cervical, and uterine swabs.

c. Examine the body for seminal stains, especially on external genitalia and thighs. Also look for foreign material or encrustation. Use ultraviolet light to aid. Photograph first, then collect possible stains with swabs or otherwise.

d. Swab breasts/penis for saliva.

Perform blind swabs of areas the offender may have mouthed or licked, such as neck, lower abdomen, fingers, external genitalia, external anal, inner thighs, and toes. (Blind swabs are swabs that are collected from areas even though one does not see any foreign material present.) These swabs are collected from areas in case there is foreign material present that cannot be seen, such as saliva stains.

e. Obtain control swabs from areas adjacent to areas from which evidence was collected on swabs.

f. Tape-lift pubic area, followed by combing of pubic hair with clean combs. Wrap the comb or brush into a clean paper towel and place into a paper envelope.

g. Obtain hair standards from decedent later in autopsy at Item #183+.

10. Ensure that only new sponges and scrub pads are used to clean body.

11. Collect debris washed from body if appropriate for the case.

12. Before continuing the photography, dry body surfaces to avoid reflections on the photos from photo flash and room light. Be sure clean towels are used.

13. Be sure the height and weight of the body is taken and is accurate and is not simply taken from driver’s license or other ID.

D. PROCESSING OF UNCLAD AND CLEANED BODY

1. Complete photographic coverage of the body, head to toe, front and back.

a. Use normal and close-up lenses as appropriate.

2. Take portrait of face for identification and courtroom purposes.

a. In these identification photos, minimize wounds, distortions, instruments, other bodies, and unpleasant background. Make the facial pose as natural and life-like as possible. Fill the frame with the face. Take front and profile views.

ATTACHMENT E
Autopsy Evidence Collection Checklist
b. Take digital or other instant photos for immediate identification if needed, if not already done at Item #9.

3. Wounds (including defense wounds):

   a. Photographs – See Item #10 regarding curved surfaces.

   1. If gunshot or stab wounds are numerous, consider numbering the wounds on the skin, with pathologist’s concurrence. When photographing wounds, be sure to include the wound number marked on the skin in each wound photograph. Alternatively the pathologist may only number the wounds on his/her diagram of the body; you should use these for photo referencing and/or to correlate wounds to collected evidence such as projectiles.

   2. Photograph wounds in relation to other wounds and in relation to body landmarks.

   3. Photograph wounds one-to-one if possible, with and without scale. Close-up photographs are especially important: (a) when there may be an issue about entry or exit wound determination; (b) when the wound is or may be a shored exit; (c) to show trace evidence in a wound, (d) to show tissue bridging or its absence; (e) to show directionality of the force causing the wounds; (f) to show any pattern to the wound(s); (g) to show characteristics of the weapon or object that caused the wound.

   4. When photographing bruises, use a Kodak color scale (or similar) to ensure accuracy of bruise colors on color photos.

   5. For admissibility of photos in court, exclude unnecessary blood, incisions, surgical instruments, internal organs, genitalia, and other bodies. However do not limit your photos to only those that will be admissible in court. Ensure full photographic documentation of the body.

   6. Photograph penetrating wounds with probes placed by the pathologist. Photos of in-place probes will also be taken at the completion of the autopsy, after the body is sewn up at Item #225.

a. Trace evidence must be collected from wounds before probing.

b. Probes will be used only when the pathologist believes they are useful in establishing wound trajectory. The pathologist, not a Criminalist or CSI, will place probes.

c. Photograph each probe in place, as follows:

   1. Place a large protractor at the base of the probe to show the angle.

   2. Use a normal lens, not a wide angle. Set focal length to 50mm.

   3. Use the smallest possible lens aperture to obtain the greatest depth of field.

ATTACHMENT E
Autopsy Evidence Collection Checklist

91
4. The entire visible length of the probe must show in each photograph, along with the skin surface it penetrates.

5. Probes may be more visible when photographed against a clean solid background, such as a sheet, blanket, towel or even clean surgical scrubs. Light-colored backgrounds may reflect too much light – consider using light blue or green colored fabric.

6. Photograph each probe from at least three angles which are 90 degrees apart, as follows:

   a. Perpendicular to the wound surface, that is, 90 degrees to the wound surface. For example, for an anterior chest wound (graphic below), the perpendicular view would be from directly and straight above the wound, with the camera pointing straight downward to the center of the wound, showing the wound and the visible full length of the probe. A photograph looking straight down the probe towards the body should also be taken.
b. From the body's head or feet, with the camera at the level of the visible wound surface, shoot toward the body's opposite end, showing the full length of the visible portion of the probe.

---

c. From the body's right or left side, with camera at the level of the visible wound surface, shooting toward the body's opposite side, showing the full length of the visible portion of the probe.
d. For entry-exit-reentry situations: If a bullet passed through one part of the body (e.g. a forearm) and then passed into or through another (e.g. the chest), or if that is a possibility, have the pathologist position the body parts as they would have been when hit by the bullet, then photograph from the different angles described above.

7. Photograph gunpowder stippling (tattooing) with and without scale. Consider using a plastic overlay.

8. Photograph each shotgun pellet pattern in its entirety, with and without scale. Consider using a plastic overlay.

b. Diagramming:

1. Obtain a copy of the pathologist’s diagram of the body for your use. If not available, use standard pre-printed body diagrams to locate wounds. Strictly adhere to the pathologist’s wound numbering.

2. Make written notes of wound(s), including appearance, color, pattern, location, size, and assigned numbers if any.

c. Measurements:

1. For wounds, whether from gunshot, knife, blunt force, vehicle impact, etc:
   - Obtain a copy of the pathologist’s diagram, and/or
   - Make notes of the pathologist’s measurements of all wounds, using distance from heels or top of head, as well as from the body’s mid-line.

2. In cases of questioned suicides where long guns are used, obtain the pathologist’s measurements of the length of decedent’s arms.

3. In cases of hot water bathtub burns, obtain height of water marks on the body.

4. Hair standards

a. Body hair: obtain 10-20 hairs from following areas, depending upon facts of the case: pubic, facial, chest.

b. Head hair: collect at least 20 hairs from each of the following areas: right and left sides, front, back, top. If facial hair is present perform the same collection procedure trying to obtain at least 20 hairs from the moustache, chin, side of face, and neck.

5. Teeth impressions. If the decedent may have left teeth marks on another person or on an object, a forensic odontologist should photograph the decedent’s teeth and take dental impressions. The intact jaws may be collected and retained by the pathologist or odontologist.

ATTACHMENT E
Autopsy Evidence Collection Checklist
6. Photograph any identifying marks on the body, such as tattoos, unique scars, and any unique body features. This is especially important if the decedent has not yet been identified. Consider photographic filters to make some tattoos more legible. After photographing tattoos on decomposed or burned bodies, have the pathologist rub off the outer layer of the skin as this will often reveal much more detail.

E. DURING THE AUTOPSY

1. Photograph evidence items as they are found.

2. Photograph specific injuries and relevant body features and conditions.

3. Photograph specific findings that the pathologist says are medically significant.
   a. Keep in mind that absence of a specific condition or a specific type or location of trauma may be very significant. (E.g. the decedent had not been struck in the head as someone may have claimed.)
   b. In cases involving strangulation or neck holds, photograph the presence or absence of hemorrhaging, bone fractures and other signs of neck trauma.
   c. If the decedent was dismembered, be alert for tool marks on the cut ends of bones. Photograph the cut ends with direct as well as oblique lighting, then obtain the cut ends of the bones. If not possible, make casts of them.

4. Blood samples: The pathologist will collect blood samples from the heart or from an uncontaminated blood vessel.
   Depending upon the types of testing that is desired for collected blood, different blood preservatives must be used. Vacutainer tubes for blood collection have different colored caps to show what type of preservative is inside: PURPLE capped tubes are used for blood which will be tested for genetic markers, and GREY capped tubes are used for drug and alcohol testing.
   a. For DNA or typing:
      1. Obtain blood in all cases for this purpose.
      2. In decomposition cases, collect bone samples and/or teeth for DNA reference samples. Avoid bones that have been on the downside of the body during decomposition, or which have been exposed to a moist external environment.
      3. Refrigerate ASAP in an evidence locker.
      4. Submit to the Laboratory ASAP.
   b. For toxicology:
      1. Blood should be collected in all cases for toxicology testing.
      2. The Coroner's Office will submit this sample for toxicology testing, along with other appropriate body fluids and tissue.

ATTACHMENT E
Autopsy Evidence Collection Checklist

95
5. Gunshot evidence
   a. Carefully collect, and separately package, bullets, bullet jacketing, shotgun pellets and wadding. Collect as many shotgun pellets as possible. Do not handle projectiles with forceps and do not place any markings directly onto any of these items.
   b. If the bullet has no visible adhering trace evidence (such as glass, fabric, wood, vegetation, etc.), wash body fluids from bullets with a very gentle stream of cold water, being very careful to catch and preserve any trace evidence that might be present. Don't let the bullet go down the drain!
   c. Consider having the entry and exit wounds excised and retained by the pathologist. This is important in cases where there may be a question about differentiation of entry and exit wounds.

6. Teeth and dentures - if relevant to the case
   a. Retain broken portions of teeth or dentures, and/or make castings of fractured tooth surfaces.
   b. If teeth are broken, note direction of the fracture and the angle of the broken teeth.
   c. Collect broken dentures for matching with pieces that may be found elsewhere.

7. Drug overdoses:
   a. Ask that non-medical needle puncture sites be excised and retained.
   b. Consider having the nose swabbed.

8. Patterned impressions in bone (such as by a hammer with a checkered striking surface, a hatchet, a pipe, etc): have the pathologist excise and retain the bone.

9. Ask the pathologist to check stomach contents, as appropriate, for:
   a. Swallowed items, such as gum, jewelry, controlled substances and/or their packaging, broken teeth, paper.
   b. What type of food was ingested before death. (In some cases there may also be a limited possibility of determining how long before death the food had been eaten.)

F. AFTER AUTOPSY

1. Note regarding taking of the decedent's fingerprints:

Criminalists, CSIs and police evidence technicians must obtain their own set of fingerprints and palm prints from the decedent in every criminal case. Fingerprints taken by the Coroner's Office are for a different purpose and may not be suitable for all Laboratory comparisons.

ATTACHMENT E
Autopsy Evidence Collection Checklist

96
a. Fingerprints: Take full set including fingertips and edges on all criminal cases.
b. Palm prints: take in all cases. Always include the heel of the hand and the wrist.
c. Desiccated or decomposed fingers: Contact the Laboratory.
d. Take footprints if appropriate to the case.
e. Take photographs of probes placed by the pathologist into penetrating or perforating wounds AFTER the body is sewn back up. (These photos are in addition to photos of the probes taken previously at Item #s160-172.)
f. Consider having body held (e.g. for at least 24 hours) for reasons such as:
   • further development of bruises
   • further crime scene work that may be needed due to some autopsy finding
   • information from expected interviews or interrogations
   • evaluation of decedent's rolled fingerprints (especially on decomposing bodies)
   • need for (further) dental examination
   • need for a forensic anthropologist

2. All evidence items must be properly marked and packaged according to local Laboratory requirements and accepted practices.

3. If you retain personal property items of the decedent which you collected at the morgue, you must sign for them on a Coroner's form.

*Death Investigation Roles of the Coroner and LEAs*
A. INTRODUCTION

The Coroner is an administrative officer within County government whose position was created by California statutes to determine the cause and circumstances of certain statutorily defined deaths which occur within the County. In Contra Costa, as in 42 of California’s other 58 counties, the Coroner is also the county Sheriff. By state statute, the Coroner is not required to be a medical doctor, and in fact, none of the 43 Sheriff/Coroners in California are medical doctors. Coroners perform the investigative and administrative aspects of death investigations by using civilians and/or peace officers staff members but they employ licensed physicians, most of whom are board-certified forensic pathologists, to perform post-mortem medical examinations (autopsies) and to provide the medical expertise and testimony as necessary. The Coroner also has some ancillary duties.

Law enforcement agencies are often involved with the discovery of deaths. They perform criminal investigations on many deaths, especially homicides and other cases where crimes have been, or may have been, committed. This means that for many death cases, the Coroner’s Office and law enforcement agencies have complementary but potentially intersecting investigative roles which can cause needless confusion and conflict. The information below is provided to avoid that.

B. PRIMARY ROLE OF THE CORONER

The Coroner’s primary duty is to determine the cause, manner and means of certain deaths which are specified by California Government Code §27491. Generally those deaths are by homicide, suicide, accident, and deaths which are unexplained or medically unattended. When a death falls within one of those categories, it is “reportable” and is “a Coroner’s case”.

Only “reportable deaths” are within the Coroner’s jurisdiction. The categories of reportable deaths (from California Government Code §27491) are summarized below:

1. violent, sudden or unusual deaths.
2. unattended deaths which occur in the continued absence of a physician for twenty days or more. The decedent has no recent medical history which documents medical problems that could have caused death.
3. deaths related to (or following) known or suspected self-induced or criminal abortion.
4. deaths known or suspected to be from:
   a. homicide
   b. suicide
   c. accidental poisoning
5. deaths known or suspected as resulting, in whole or in part, from or related to, accident or injury, either old or recent.
6. deaths due to:
   a. drowning
   b. fire

ATTACHMENT F

c. hanging

d. gunshot

e. stabbing

f. cutting
g. exposure

h. starvation

i. acute alcoholism

j. drug addiction

k. strangulation

l. aspiration

m. suspected Sudden Infant Death Syndrome

7. deaths caused by criminal means, in whole or in part.

8. deaths associated with known or alleged rape, or crime against nature.

9. deaths occurring in prison or while under sentence.

10. deaths known or suspected due to contagious disease and constituting a public hazard.

11. deaths from occupational diseases or hazards.

12. deaths of patients in mental hospitals operated by State Department of Mental Health and serving the mentally disabled.

13. deaths of developmentally disabled patients in state hospitals operated by the State Department of Developmental Services.

14. deaths occurring under circumstances affording reasonable grounds to suspect death was caused by the criminal act of another.

15. deaths reported by physicians or other persons with knowledge of death for inquiry by the Coroner.

C. ADDITIONAL CORONER’S DUTIES

The decedent’s identity

Another duty of the Coroner is to establish and confirm the decedent’s identity for legal and other purposes. This may be done by visual identification, photographic comparison, fingerprint comparison, unique body markings or conditions, dental comparison, DNA, x-ray comparison, or by personal effects.

Notifications

The Coroner is required to make reasonable attempts to locate the family of the decedent after taking custody of the dead body. Government Code §27471.

The Coroner’s Office takes this responsibility very seriously and strives to ensure that death notifications are promptly, compassionately and supportively made to the legal next-of-kin, whether notification is made
by a member of the Coroner’s staff, by a law enforcement officer or another official, or by someone at the request of an official.

Notifications can be difficult following any type of death but they are often especially difficult following sudden and unexpected deaths.

When possible, the Coroner’s Office will have its investigators make local death notifications. Law enforcement agencies may wish to make death notifications in selected death cases they investigate because they can also provide the family with some explanation of the case circumstances and can attempt to obtain needed information. Law enforcement agencies must promptly notify the Coroner’s Office if they wish to do this so the Coroner’s Office won’t attempt to make notification. After the law enforcement agency has made the death notification, the person who made it shall immediately notify a Coroner’s investigator that the notification has been made and shall provide: (1) the name of the person receiving the notification, as well as his/her address, age, phone number and relationship to the decedent; (2) the identity and affiliation of the person making the notification; and (3) the time, date and place of notification.

**Safeguard Property**

The Coroner is responsible for safeguarding the property of the decedent. In some cases this involves taking actual possession of property and safekeeping it pending other disposition, and in other cases the property may be left in place with a Coroner’s seal affixed to safeguard it. In many cases a legal next-of-kin simply takes responsibility for the property.

**Uniform Anatomical Gift Act**

The Coroner assists with the implementation of the Uniform Anatomical Gift Act (Health and Safety Code §7150) and with lawful utilization of organ and tissue transplantation procedures. Government Code §7491.44. et al.

**Training**

The Coroner’s Office participates in scientific and medical research, training and education. Government Code §27491.45.

**Death Review Boards**

The Coroner’s Office participates in mandated and other Medical Reviews such as Child Death Review and Domestic Violence Death Review.

**Coroner’s Inquests**

The Coroner has discretion to conduct Coroner’s Inquests, and must hold Inquests if requested to do so by the Attorney General, the District Attorney, the city prosecutor or city attorney, or a chief of police of a city in the county. Inquests may be with or without a jury, at the Coroner’s discretion. Government Code §27491.6.

- Inquests on Law Enforcement Involved Fatal Incidents

ATTACHMENT F
Death Investigation Roles of the Coroner and LEAs

102
The vast majority of Inquests in the County are held following deaths which involve law enforcement personnel or law enforcement operations or activities.

By its own policy, and pursuant to the county-wide Contra Costa Law Enforcement Involved Fatal Incident Protocol (which has been in effect since 1984), the Contra Costa County Sheriff/Coroner's Office holds Inquests following most deaths which involve law enforcement personnel or law enforcement operations or activities. These Inquests are open to the public, are conducted by a private attorney acting as the hearing officer for the Coroner's Office, and are held in front of a jury of citizens randomly selected from the Superior Court jury pool.

In addition to the statutory purposes for holding Inquests, Inquests are held on these cases to provide the public, the news media, and various interested parties with information about such incidents through sworn testimony of participants, witnesses and investigators. Inquest testimony also provides another opportunity for investigators and decision-makers to acquire more information about the incidents.

- **Other Inquests**

  The Coroner occasionally holds Inquests on other types of cases when considered appropriate or when requested under Government Code §27491.6. These Inquests are usually conducted by the Coroner's Office Commander or his/her designee and are held without a jury. Government Code §27491.7

- **Inquest Verdicts**

  Government Code §27504 requires the Inquest jury, or the hearing officer if no jury is used, to render a verdict on the following matters:
  
  - the name of the deceased
  - the time and place of death
  - the medical cause of death
  - whether the death was by (1) natural physiological causes, (2) suicide, (3) accident, or (4) the hands of another person other than by accident (i.e. homicide).

Government Code §27504 provides that Inquest findings shall not include, nor shall they make any reference to, civil or criminal responsibility on the part of the deceased or any other person.

D. **LEVELS OF CORONER’S INVESTIGATIONS**

Depending upon the type of each death and the circumstances of it, the Coroner’s Office performs its role using one of five standardized levels of investigation. In Contra Costa County, these levels are known as:

1. Full Coroner's Case
2. Inspection
3. Not Brought In
4. Co-Sign
5. Brief Case

ATTACHMENT F
Death Investigation Roles of the Coroner and LEAs
Levels 2 through 5 are used primarily for natural physiological deaths which occur following treatment by physicians, and are occasionally used in traumatic deaths. Homicides, suicides, and most other traumatic deaths are handled as Full Coroner's Cases, as are all Law Enforcement Involved Fatal Incidents (as that term is defined in the Contra Costa Law Enforcement Involved Fatal Incident Protocol).

For Full Coroner's Cases, the Coroner's Office determines the cause, manner and means of deaths using information obtained from multiple sources:

- Reports by Coroner Investigators and/or law enforcement officers.
- Reports by emergency medical responders.
- The decedent's previous medical history.
- Photographs, clothing, and objects associated with the death.
- A forensic medical autopsy performed by a forensic pathologist. In addition to the autopsy examination, autopsies may include x-rays, toxicology and other laboratory testing, and microscopic examination of tissue. Experts in relevant medical sub-specialties, or in forensic fields such as odontology, entomology and anthropology, are sometimes utilized.

E. LAW ENFORCEMENT'S REPORTING OF DEATHS

1. The initial report:

Law Enforcement agencies who have charge of a deceased person's body must immediately notify the Coroner's Office. (This requirement also applies to others, such as funeral directors and physicians.) Violation of this requirement is a misdemeanor. Government Code §27491, Health and Safety Code §102850.

The Coroner's 24 hour phone number is 925-313-2850. If no answer, call Sheriff’s Dispatch at 925-646-2441

- Initial Telephone Summary (I.T.S.)

Law enforcement's initial notification to the Coroner's Office should include a summary of the information which is then available, including the identity of the law enforcement agency and, if known, the decedent's name, location of the body, circumstances of the death, special problems anticipated in body removal, etc. (See sample of the I.T.S. form on Page 111.)

2. Continuing obligation to provide information:

To properly perform its statutory responsibilities, the Coroner's Office must be promptly and fully informed in each case of all the facts and physical evidence that relate to (1) the cause, manner and means of death; (2) the identity of the decedent; (3) identity of next-of-kin; and (4) information concerning any notification of the death to next-of-kin that has already been made. Law enforcement agencies have an on-going obligation to provide this information to the
Coroner’s Office. This obligation starts with the initial notification of the death and continues even after the autopsy is completed. Most of the needed information is collected by the assigned Coroner’s investigator(s) from law enforcement officers, but often the forensic pathologist needs specific and updated information directly from law enforcement officers, as well as access to some physical evidence, at the time of autopsy.

F. CORONER’S RESPONSE AFTER NOTIFICATION

After being notified of a reportable case by a law enforcement agency which is conducting a criminal investigation of the death, the law enforcement agency may request the Coroner to delay removal of the body until sufficient investigation and evidence processing can be performed. A Coroner’s investigator may elect to come to the scene for a brief inspection or for photography and to collect preliminary information. (Government Code §27491.2) The Coroner’s Office then will usually not make removal until after it receives a follow-up notification that the law enforcement agency is ready for body removal.

When the reportable death is one for which a criminal investigation will not be performed by the law enforcement agency, a Coroner’s deputy will usually respond promptly following the initial notification to investigate and make body removal without a follow-up call requesting removal.

Whether the law enforcement agency handles the death as a criminal case or not, the Coroner’s Office requests that a law enforcement officer maintain the chain of custody on the body (and the scene of death if the body hasn’t been removed from it) until a Coroner’s deputy arrives to make removal.

G. CORONER’S DUTY TO NOTIFY LAW ENFORCEMENT

When the Coroner’s Office determines that reasonable grounds exist to suspect that a death has been caused by a criminal act of another person, it is required to immediately notify the law enforcement agency having jurisdiction over the matter (if that agency is not already aware). Notification shall be made by the most direct communication available. The notification shall include the name of the deceased person (if known), the location of the remains, and other information received by the coroner relating to the death including any medical information of the decedent that is directly related to the death. Information from the Coroner cannot include any information contained in the decedent’s medical records which relates to another person unless that information is relevant and directly related to the decedent’s death. Government Code §27491.1.

H. LEGAL RESTRICTIONS REGARDING THE BODY, ITEMS ON IT AND ITEMS WITHIN THE DECEDEENT’S ESTATE

1. THE STATUTES AND THEIR EFFECT:

   - Misdemeanor crime: the body shall not be disturbed or moved from the position or place of death without permission of the coroner or the coroner’s appointed deputy. (This applies whether or not notification to the Coroner has been made, and it applies to everyone including law enforcement officers, firefighters and emergency medical personnel.) Violation of this provision is a misdemeanor. (Government Code §27491/2(b)).

ATTACHMENT F
Death Investigation Roles of the Coroner and LEAs

105
Exception for Exigent Circumstances: If, prior to the Coroner’s arrival, it is urgently and clearly necessary (i.e. exigent circumstances exist) for a peace officer to move or disturb a body (e.g. to prevent if from being consumed by fire, lost in a body of water, damaged by traffic, etc.) permission must first be sought from the Coroner’s Office either by telephone or by radio. If contact cannot be made quickly, the Coroner’s Office hereby grants permission to move the body only as minimally necessary to avoid the immediate harm. See Section 2 below regarding searching for or removing any items from the body.

- **Misdemeanor crime:** any person who searches for or removes any papers, moneys, valuable property or weapons constituting the estate of the deceased from the person of the deceased or from the premises, prior to arrival of the coroner or without the permission of the coroner, is guilty of a misdemeanor. 27491.3(c).

- **Statutory Exception:** Peace officers may search the person or property on or about the person of the deceased, whose death is due to a traffic accident, for a driver’s license or identification card to determine if an anatomical donor card is attached. If a peace officer locates such an anatomical donor card which indicates that the deceased is an anatomical donor, the peace officer shall immediately furnish such information to the coroner having jurisdiction. Government Code §27491.3(d). "Peace officer," as used in this subdivision, means only those officers who are designated in Penal Code §§830.1 and 830.2. (27492.3(d)).

- **Law enforcement's right in criminal cases to process the body and collect evidence:** At the scene of any death, when a police investigation or criminal prosecution may ensue, the Coroner shall not further disturb the body or any related evidence until the law enforcement agency has had reasonable opportunity to respond to the scene, if their purposes so require and they so request. Custody and control of the body shall remain with the Coroner at all times. Reasonable time at the scene shall be allowed by the Coroner for criminal investigation by other law enforcement agencies, with the time and location of removal of the remains to a convenient place to be determined at the discretion of the coroner. Government Code §27491(3) (c).

2. **PROCEDURES FOR LAW ENFORCEMENT IN CRIMINAL CASES**

- **Evidence from the body prior to body removal**

  When necessary for immediate investigative needs, law enforcement officers may search for and remove weapons, wallets, papers, money and valuables from the body (see the paragraph immediately below regarding removal of other types of evidence from the body), but must seek permission of the Coroner’s Office before doing so. Permission may be sought in person, by telephone, or by radio. Examples of necessity include: (A) urgent need to identify the decedent; (B) protection of evidence from loss or contamination (such as from the weather, from movement and/or removal of the body, or from crowds); and (C) obtaining probable cause information. When permission is obtained, or if contact with the Coroner’s Office cannot be reasonably made, such items may be removed from the body to satisfy the immediate need. Great care must be taken to preserve the condition of the body, the evidentiary value of removed items, to prevent contamination, and to maintain the chain of custody. Items removed from the body shall not be removed from the immediate location of the body without the express permission.
of the Coroner's Office.

**Exigent Circumstances:** Evidence on the body, such as loose hairs, fibers, vegetation, blood, gunshot residue, etc., may only be removed from the body *without the prior permission of the Coroner's Office* when necessary to protect it from loss or contamination which could be caused by the removal and transportation process, by the weather, or otherwise. Evidence which can safely be left on the body for later observation and collection at the autopsy shall be left in place for the pathologist's inspection.

**Fingerprint exemplars** may be taken from the body's fingers by law enforcement agencies without the Coroner's approval when there is an immediate and urgent need to identify the decedent which cannot be satisfied by postponing fingerprinting until the after removal of the body. These conditions must be met:

1. There can be no trauma to the areas of the fingers or to portions of the hands which will have to be manipulated.

2. The fingers and hands must be adequately photographed before being disturbed.

3. The hands and fingers must first be examined for trace evidence, such as gunshot residue. If trace evidence is found, it must be photographed and collected prior to fingerprinting.

- **Evidence not on the body** which is within the decedent’s estate or is at the decedent's premises:

Searching for and removing items present at the place of death but which are (1) not on the body and (2) not within the decedent’s estate, is *not controlled by statutes applicable to the Coroner's function*. Officers are responsible for assuring the lawfulness of all searches and seizures they perform as determined by standard search and seizure rules.

Items such as weapons, wallets, papers, money and valuables, at decedent’s premises which are not on the body which have evidentiary value to the investigating agency may be inspected and collected by the investigating agency without the prior approval of the Coroner's Office. However, these items shall not be removed from the scene without the Coroner's express approval.

**Statutory exception:** The search for and the removal of evidence from a decedent's estate which is conducted under authority of a search warrant is not subject to Government Code §§27491.3(c) and (d) and does not require approval of the Coroner.

3. **PROCEDURES IN SUICIDE CASES**

- **Suicide notes and related writings**

If the death is believed to be suicidal and the law enforcement agency will not conduct a criminal investigation of it, any note, letter or document apparently written by the
deceased which may tend to indicate the decedent's intention to take his own life, including directions for disposition of his property or the disposal of his remains shall be delivered to the Coroner's Office (Government Code §27464). By long-standing policy in Contra Costa County, the seizure of these documents shall be done by the Coroner's Office. Copies will be then made available to any interested law enforcement agency upon request. Originals will be available for Criminalistics examination. If the law enforcement agency conducts a criminal investigation of the death in the belief that it involved criminal conduct, the note evidence may be collected by that agency, with a copy provided to the Coroner's Office.

- **Suicide implements**

If the death is believed to be suicidal and the law enforcement agency will not conduct a criminal investigation of it, implements used in the suicide shall be collected by the Coroner’s Office. If the law enforcement agency conducts a criminal investigation of the death in the belief that it involved criminal conduct, implements may be collected by that agency.

**I. SAFEGUARDING THE DECEDEENT’S PROPERTY**

- The Coroner may take charge of any and all personal effects, valuables, and property of the deceased at the scene of death or related to the inquiry and hold or safeguard them until lawful disposition thereof can be made. The coroner may lock the premises and apply a seal to the door or doors prohibiting entrance to the premises, pending arrival of a legally authorized representative of the deceased.

However, this shall not be done in such a manner as to interfere with the investigation being conducted by other law enforcement agencies. Government Code §27491.3(a).

- Any property or evidence related to the investigation or prosecution of any known or suspected criminal death may, with knowledge of the coroner, be delivered to a law enforcement agency or district attorney, receipt for which shall be acknowledged. Government Code §27491.3(b)

**J. AUTOPSIES**

1. **Rules for attendees**

   a. Attendance at an autopsy by persons other than Coroner's Division personnel is subject to the approval of the Coroner (Government Code §27491.4.) The number of people attending an autopsy must be kept to a minimum due to space limitation, evidentiary considerations, and the need to eliminate distractions.

   b. People attending are required to sign a Coroner's Office Autopsy Permission Form.

   c. No audio or video recordings of an autopsy are allowed without the express prior permission of the Coroner's Division Commander and the pathologist.

   d. Photographs may be taken of remains at the morgue only for official use by the
Coroner's Office or a law enforcement agency, or for purposes of forensic pathology, or for use in medical or scientific education or research. They may not be taken for personal purposes. All photographs taken at the morgue are subject to discovery by the Coroner's Office and by involved law enforcement agencies, and are subject to discovery in administrative, civil and criminal proceedings.

e. Law enforcement personnel attending an autopsy are present to give information to the pathologist, to observe and understand the findings, to collect and record evidence, and/or for training purposes. The extent of their participation will be governed by the pathologist.

f. Those attending must adhere to the Coroner's safety rules in order to minimize exposure to biohazards. These rules include wearing protective clothing. Different standards may apply to those who will be in contact with the body verses those who will only be viewing the autopsy.

g. Autopsy attendees are strongly urged to use great diligence to ensure that any notes and diagrams they make of the pathologist’s findings and opinions are accurate and are not in conflict with the pathologist’s findings, report and diagram(s). Attendees usually need not create their own diagrams as the pathologist will usually give investigators a copy of any diagram(s) he/she makes at the completion of the autopsy.

2. Autopsy Evidence Collection Checklist

An Autopsy Evidence Collection Checklist is available at the morgue and as an Attachment to the Law Enforcement Involved Fatal Incident Protocol to help guide CSIs and investigators through autopsy evidence collection procedures. Its use is encouraged, especially for those who are not well experienced in such procedures.

3. Before the pathologist's arrival

a. Until the pathologist has inspected the body and given approval, the body at the morgue shall not be disturbed nor its condition altered in any of the following illustrative ways:

- Movement or removal of clothing.
- Movement or removal of any weapon or object.
- Fingerprinting.
- Collection of hair standards.
- Collection of gunshot residue associated with wound sites.
- Clipping or scraping of fingernails.
- Washing or cleaning.
- Removal of medical devices from the body.

b. Without the pathologist’s approval, trace evidence may be collected from areas of the body that are not directly involved with trauma and which are easily accessible without moving or turning the body. Exception: do not collect gunshot evidence without the pathologist’s approval.
c. Photography of the body, without disturbing it, is encouraged.

4. Informing the forensic pathologist

a. Investigative information:

When the law enforcement agency is aware of information that may be relevant to the Coroner’s determination of the cause, manner and means of a person’s death that has not previously been adequately communicated to a Coroner’s investigator, that information must be promptly transmitted to a Coroner’s investigator prior to autopsy or during it, or it must be provided directly to the pathologist by a knowledgeable officer at autopsy.

b. Items for the pathologist’s inspection:
Below is a list of types of items that should be present at the Coroner’s Office for inspection by the pathologist at the time of autopsy. These may be brought by an investigating law enforcement agency, by evidence collectors or by Coroner’s investigators. In unusual cases, where bringing items to the morgue is not practical, arrangements must be made with the pathologist for other timely inspection.

Extreme care must be taken to prevent the contamination of any evidence that is brought to the morgue for the pathologist’s inspection. Items must be absolutely protected from contamination at the autopsy, especially transfers of biological material from the autopsy process to evidence items. Latent fingerprints and trace evidence on displayed items may also be at risk. Proper pre-packaging of items will help avoid problems, as will physical separation of items from the autopsy process. Clean paper is available at the morgue for use in displaying items.

1. Weapons and objects which may have come into contact with the body of the decedent, such as:

a. Firearms

b. Cutting and stabbing instruments

c. Blunt force objects, such as rocks, clubs, furniture, footwear

d. Tools

e. Adequate photographs of items and their surfaces which may have contacted the decedent’s body but which cannot be displayed to the pathologist at autopsy, such as the portion(s) of a vehicle which struck the decedent, a fence or tree trunk the decedent fell against, etc.

e. Ligatures, bindings and other restraint devices.

2. Clothing.

a. Articles of clothing which are known or suspected to have been worn by the
decedent at the time of death and/or at the time of injury. This includes inner and outer clothing, footwear and jewelry. The pathologist's examination of clothing worn by gunshot victims is often relevant to the determination of muzzle-to-body distances and to the body's possible positions when it was struck.

b. If the decedent was hospitalized prior to death, be sure to include decedent's clothing that came with him/her to the hospital.

3. Medications, poisons and intoxicants.

Law enforcement and Coroner's investigators must make diligent efforts to locate and collect any medications, poisons and/or intoxicants (and their containers) which could relate to the cause of death and/or to autopsy toxicology testing. These items may be found in the decedent's clothing, vehicle(s), residence, or elsewhere. When medication or poison containers are found, they shall be brought to the autopsy. Exception: This does not apply to medications directly administrated by medical professionals. Neither these medicines nor their containers need be brought to autopsy.

4. Hospital and other medical evidence:

Blood and urine samples collected from the decedent by medical personnel during medical treatment prior to blood transfusions and the administration of medications are important in some cases. Law enforcement personnel who are aware that such samples were collected can help assure their later availability by asking medical personnel to retain those samples for the Coroner to pick up.

Medical records and body scans from medical providers can also be very important.

Coroner's personnel will collect these items from medical providers, using a Coroner's subpoena when necessary.

During their investigation of death cases, law enforcement personnel should be alert for information about the decedent's prior medical history and the identities of medical service providers. This information should be provided to a Coroner's investigator for appropriate follow-up.

If an item would normally be displayed to the pathologist, but cannot be brought to the morgue, photographs, sketches, diagrams or a detailed description must be available at the time of autopsy.

Contra Costa Law Enforcement County Protocols

Child Abduction

Revised July 2013
ADDENDUM I-RESOURCES: Law Enforcement

When activated, the Child Abduction Protocol Team should include an individual assigned as the Logistics Section Leader for the Incident. The Logistics Section Leader is responsible for requesting and managing the resources that are needed by the affected law enforcement agency and the Child Abduction Protocol Team.

When activated, the Logistics Section Leader should follow the basic guidelines identified in the Child Abduction Protocol Logistics Section Leader Checklist.

1. **Command Post Resources.** When an agency activates the CAP protocol, it is suggested that a robust command structure be established to support the conduct of the investigation. The site for the command post would be best suited in a furnished office space with dedicated equipment to support investigators and resource personnel. The following resources should be considered in establishing a command post.

<table>
<thead>
<tr>
<th>RESOURCE</th>

## Contra Costa Law Enforcement County Protocols

### Child Abduction

**Agencies:** CCCSO (1); Antioch Police (1); Brentwood Police Department (1); Hercules Police (1); Martinez Police (1); San Pablo Police (1)

**Description:** The Contra Costa County Operational Area purchased a trailer to support the coroner's office in time of disaster. This trailer doubles as a support trailer for the conduct of incident operations activities. The trailer is equipped with desks, chairs, generator, air conditioner, white boards and ample wall space for the placement of maps. The trailer features a large work area for operations activities. The trailer is equipped with a UHF Radio. Other trailers provide office space and equipment to support the operations section.

**Costs:** There is no cost for the use of these trailers.

### Resource: Tables and Chairs

**Agencies:** CCCSO

**Description:** The Sheriff's Emergency Services Support Unit maintains a supply of tables and chairs for critical incident support. Requests for support should indicate the number of tables and chairs that are needed. Materials will be delivered to the location identified by the Incident Commander.

**Costs:** There is no cost for the use of this resource.

### Resource: External Portable Generator and Light Units

**Agencies:** CCCSO (4); Danville Police Department (2); Antioch Police Department (1)

**Description:** Portable generator and light units provide large amounts of scene lighting to support law enforcement and search operations. The generator provides 4k of power without the lights, but requires all the generator power to support the lights themselves. Light units are powered with a diesel generator and provide 24 hours of continuous power without refuelling.

**Costs:** There is no cost for the use of this resource.

### Resource: Generators, Light Units and Power Cords

**Agencies:** CCCSO (12)

**Description:**

**Costs:**

| Description: | Generators provide electrical power for various items of electric equipment. Portable light units provide lighting in both interior and exterior areas. Materials will be delivered to the location upon request by the Incident Commander. |
| Costs: | There is no cost for the use of this resource. |

**Resource: Maps / GIS Printouts**

**Agencies:** Contra Costa County Office of Emergency Services; Contra Costa Public Works; San Ramon Valley Fire Communications Support Unit

**Description:** The agencies are able to deliver large-scale maps and photographs to the Incident Commander. Common map programs include Thomas Brothers, Aerial Orthophoto (Satellite), USGS 7.5 minute quadrangle, assessor, and base map. Maps can be produced up to 36x48 size. Smaller maps in color can be produced as well.

**Costs:** There is no cost for the use of this resource.

**Resource: Pictometry**

**Agencies:** Contra Costa County Office of Emergency Services; Contra Costa Public Works; San Ramon Valley Fire Communications Unit

**Description:** The agencies are able to produce high quality photos of structures and neighborhoods. The pictometry system allows investigators to obtain three hundred sixty degree photos of structure and areas. For interactive use, the investigator must be present at a terminal (SRVFD 131 has a mobile system).

**Costs:** There is no cost for the use of this resource.

**Resource: ICS Staging / Personnel Management Resources**

**Agencies:** Contra Costa County Fire Department; Sheriff's Emergency Services Division

**Description:** Several agencies within the Contra Costa County Operational Area have been charged with the mission of maintaining trained personnel and the equipment to conduct staging operations at an incident. These resources are available using personnel who have received training in managing personnel in a large-scale event / incident. Through the use of this resource, the Incident Commander can maintain accountability of the personnel associated with the operation.

</tbody>
</table>

2. **Communications Resources.** When an agency activates the CAP protocol, it is suggested that the Contra Costa County Fire Department Communications Section Chief be contacted to coordinate communications resources and devices. The communications technician will develop a communications support plan and manage the resources within this section. Fire Service Communications support can be obtained by contacting the CONFIRE Dispatch Center.

| Resource: AMBER Alert | | 925-646-2441 CCCSO Dispatch |
| Agencies: California Highway Patrol | | |
| Description: The California Highway Patrol is the organizing agency for the AMBER Alert System. The system requires that local agencies contact the Sheriff’s Dispatch center requesting that the system be activated. An activation of the system requires the following items of information: 1. A confirmed abduction has occurred. 2. The victim is a person under the age of 18 years or who has a mental or physical disability. 3. There is reason to believe the victim is in imminent danger of serious bodily injury or death. 4. There is sufficient information available that, if disseminated to the public, could assist in the recovery of the victim. | | |
| Once activated, there is an expectation that an enormous amount of telephone calls will be routed to the police agency. When the AMBER Alert System is activated, it is suggested that the Call Center be activated as well. | | |
| Costs: There is no cost for the use of the AMBER Alert System. | | |

### Contra Costa Law Enforcement County Protocols

#### Child Abduction

**Description:** The Contra Costa County Homeland Security Approving Authority has purchased a series of radio caches, repeaters, and interoperability boxes for use during critical incidents within Contra Costa County. The radio caches are distributed throughout the county and can be dispatched to various locations quickly. Through the use of interoperability boxes, communications of all the law enforcement agencies within the county can be "patched" to create a common frequency.

**Costs:** There are no costs for the use of the communications cache.

**Resource:** Helicopter Video Downlinks (Contra Costa SO and East Bay Parks Police)

**Agencies:** Contra Costa County Fire (1); Contra Costa County Sheriff (6), Brentwood Police (1), Antioch Police (1), Pittsburg Police (1), Martinez Police (1), Walnut Creek Police (1), Richmond Police Department (1)

**Description:** The Helicopters of the Contra Costa County Sheriff's Office and the East Bay Regional Parks Police Department are equipped with video downlink capabilities. This capability allows for personnel in command posts and using hand-held devices to view images from the video cameras of the various helicopters. This provides the incident commander with the ability to view remote sites from afar and coordinate command and control operations. Viewers can be obtained from any of the listed agencies.

**Costs:** There are no costs for the use of these resources.

**Resource:** EDIS System (California Office of Emergency Services)

**Agencies:** California Office of Emergency Services

**Description:** California OES maintains an electronic notification program entitled EDIS (Electronic Digital Information Service). The service allows for subscribers to obtain email and pager announcements of emergencies and disasters within the State of California. The system provides information to many citizens, governmental agencies, and news services within California. Messages may be limited in their scope to areas within only Northern California. The system is used to transmit messages from the AMBER ALERT System as well.

**Costs:** There are no costs for the use of this resource.

**Resource:** Amateur Radio Communications Support (RACES)
# Contra Costa Law Enforcement County Protocols

## Child Abduction

**Agencies:** Contra Costa County Office of Emergency Services  
925-646-2441  
On Call OES Manager

**Description:** Within Contra Costa County, the County Office of Emergency Services is charged with maintaining a group of trained and ready radio operators (RACES). These operators have been assigned to various emergency operations centers throughout the county but can be assigned to assist any communications operation. RACES operators can maintain both HAM radio and other radio networks. Many RACES members have been trained in radio cache and staging operations.

**Costs:** There are no costs for the use of this resource.

**Resource: Critical Reach / TRAK**

**Agencies:** Most Contra Costa County Law Enforcement Agencies; Contra Costa County Sheriff (1 mobile system)  
See Agency Contact Listing

**Description:** The Critical Reach notification program was founded in 1995 using the program name TRAK. Today, the network connects more than 1700 law enforcement agencies in 32 states. Through the use of the system, users can create, modify and distribute flyers to law enforcement agencies and media outlets throughout the area. The service provides a flyer creation program that allows for the design and printing of flyers. The system also allows for the receipt of drivers license photos from California DMV.

**Costs:** There is a minimal cost for the transmission of flyers to allied agencies.

**Resource: Automated Regional Information Exchange System (ARIES)**

**Agencies:** All Contra Costa County Law Enforcement Agencies  
See Agency Contact Listing

**Description:** ARIES allows law enforcement personnel to author BOLO’s and alerts and post them on the regional information system. The system can be accessed on-line by Alameda County, Solano County, San Joaquin County, San Mateo County, and Santa Clara County Law Enforcement personnel. Alerts can be authored and posted within minutes of a child abduction.

**Resource: FAX Support**

**Agencies:** Most Contra Costa County Law Enforcement Agencies; Contra Costa County Sheriff (1 mobile system); San Ramon Valley Fire (1 mobile system); Contra Costa OES (1 high speed); OES SANDS System  
See Agency Contact Listing
## Contra Costa Law Enforcement County Protocols

### Child Abduction

| Description: | The OES SANDS system allows rapid notification of local law enforcement agencies with FAX data. The system allows for simultaneous distribution of FAX to up to 70 recipients. Contra Costa OES has a high speed FAX that is preprogrammed with the FAX numbers of all police, fire, and emergency operations centers within the County. |
| Costs: | There are no costs for the use of these resources. |

| Resource: Mobile Data Computers |
| Agencies: | Most Contra Costa County Law Enforcement Agencies; Contra Costa County Sheriff (4 portable system); |
| Description: | Mobile Data Computers allow for the transmission of law enforcement information within law enforcement agencies. Many of these systems provide access to law enforcement databases such as ARIES, JAWS and the jail booking systems. |
| Costs: | There are no costs for the use of these resources. |

| Resource: TENS / SAND Notification Systems |
| Agencies: | Contra Costa County Community Warning System (CWS) |
| Description: | The Telephone Emergency Notification System (TENS) allows for the distribution of telephone messages to targeted areas quickly and efficiently. The system allows for the delivery of a pre-programmed message to identified areas using both local and national phone lines. The system allows for up to one thousand telephone lines to be used to make notifications to the public. At the conclusion of the broadcast, reports can be generated that provide data as to locations called and messages delivered. The program can be activated using the internet and a series of scripted notification messages are available. The system is programmed to contact all businesses and residences within Contra Costa County. |
| Costs: | There are minimal costs for the use of these resources. |

| Resource: REDDINET Notification Systems |
| Agencies: | Contra Costa County Sheriff's Office; Contra Costa County Fire Agencies; Contra Costa County Health Service Agencies; Contra Costa County Ambulance Providers and the same agencies in Alameda and Solano Counties. |
| See Agency Contact Listing |

| See Agency Contact Listing | 925-646-2441 On Call CWS Manager |
Description: The REDDINET system allows for the rapid exchange of information between local law enforcement agencies and medical service providers. Through the use of email messages, announcements and requests for information are quickly transmitted to all of the health service providers within the County. By using the system, queries about missing persons can be delivered to medical service providers. The system also has contact with health service providers within Alameda and Solano Counties as well. Access to the system is gained through the dispatch supervisor at the Sheriff’s Dispatch Center.

Costs: There are no costs for the use of this system.

Resource: Call Center

Agencies: Contra Costa County Sheriff's Office of Emergency Services

Description: The Contra Costa County Call Center provides 24 operator terminals and trained volunteers to staff the center. During a critical incident law enforcement should provide the public with an agency telephone number that allows for call forwarding. Once the call center is activated, the original phone is placed in the call forward mode - forwarding calls to the call center phone line.

Incoming calls to the call center can be screened with a computer-aided answering system. The system allows for choices where information can be provided to repetitive calls (for example, "Press1 for suspect description"). The use of computer assisted system allows for the elimination of repetitive telephone calls to the call center. Calls to the center are screened using the DOJ call form; all calls are screened by a supervisor, with all calls screened by an assigned investigator. Clue logs and investigator updates are provided to the requesting agency. The Call Center can be staffed by paid members of the County Health Services Department and the volunteers of the Office of the Sheriff.

Costs: Incoming calls are charged at .25 per call by the telephone company, no cost from the county for personnel or equipment

3. Incident Support Resources. When an agency activates the CAP protocol, the following resources may be beneficial in addressing the initial scene and the initial stages of the search / investigation.

Contra Costa
Law Enforcement County
Protocols

County Intersection Observation Plan, Code 666 and Be On The Lookout (BOLO) Broadcast

Revised July 2013
Contra Costa Law Enforcement County Protocol
County Intersection Observation Plan, Code 666, and BOLO Broadcast

Objective
To provide a coordinated effort in the county toward the apprehension of suspects fleeing by vehicle from felony crimes.

Policy
A. Means
Designated road and intersection observation points throughout the county will be manned by participating agencies to cover probable escape routes.

The exact location of these observation points and the responsible agencies are indicated on the Code 666 map and listings attached to this policy.

B. Procedures
1. Requisite
The necessary elements for initiating the implementation of this plan are:
   a. A felony crime.
   b. Reason to believe the suspect fled in a vehicle and there is an identifiable vehicle description.
   c. Good judgment by the initiating agency’s watch commander.

2. Implementation
In order to implement the 666 plan or to provide BOLO type information, the same procedure will be used.

The initiating agency, with the approval of their watch commander, will broadcast the required information on the CLERS radio. The encoder green light should always be on to allow receipt of such messages. The information would then be broadcast. In cases where acknowledgement is necessary, the initiating agency will include “Please acknowledge” at the end of their broadcast.

When the crime is of a serious nature, the watch commander of the initiating agency may request implementation of a Code 666 pending further information. On such an occasion, participating agencies would immediately man their check points. Should sufficient information not be forthcoming to satisfy the needs of a Code 666, the plan can then be canceled by the initiating agency.

This immediate response technique will enhance the probability of apprehension by having the involved units in position at the time pertinent information is obtained rather than waiting to respond until the information is available. The decision to employ this option will be based upon the seriousness of the crime involved and the judgment of the watch commander of the initiating agency.

The attached "Information Format" should be used to insure that all available information is obtained.

Information on vehicles should include whether everybody in the suspect vehicle is a suspect. This could help avoid injury to a hostage.
Contra Costa Law Enforcement County Protocol

County Intersection Observation Plan, Code 666, and BOLO Broadcast

3. **Coverage responsibility**
   Units assigned should remain at their designated locations until the suspect is apprehended, activation of the plan is canceled, or the 20-minute automatic cancellation time expires.

4. **Apprehension Of Suspect**
   When a suspect has been apprehended as a result of this plan, the agency which initiated the plan shall immediately respond to the scene of the apprehension. Under normal circumstances, the initiating agency shall take custody of the suspect and all property and evidence. This provision will hold true even though the apprehending agency may hold a want or warrants for the suspect.

   In an instance where the apprehending agency holds a want or warrant for a more serious crime involving the same suspect or the apprehending agency suffered an injury to an officer, such as a gunshot wound, etc., custody of the suspect should be negotiated.

5. **Cancellation**
   Once a Code 666 has been implemented, it will be the responsibility of the initiating agency to determine when it should be canceled. This decision will be based upon the judgment of the watch commander of that agency as to the diminishing probability of apprehension.

   The Code 666 will remain in effect as long as the watch commander of the initiating agency believes that the probability of apprehension has not diminished beyond the point of credibility. If the initiating agency does not request an extension of time, however, units at designated locations may resume their normal duties after twenty (20) minutes from the Code 666 call.
Contra Costa
Law Enforcement County
Protocols

Inter-Agency Execution of Search
and Felony Arrest Warrants

Revised July 2013
Contra Costa Law Enforcement County Protocols
Inter-Agency Execution of Search and Felony Arrest Warrants

I. Policy Statement:

A. This guideline represents the understanding and agreement among the member agencies of how warrants should be served.
B. This guideline shall be in effect when members of any department conduct a planned operation within the jurisdiction of another agency.
C. This guideline is not a statute, ordinance or regulation. This guideline is not intended to increase the civil or criminal liability of the member agencies or their employees and shall not be construed as creating any mandatory obligations to, or on behalf of, third parties.

II. Definition of Terms:

A. Venue Agency – The agency or agencies within whose geographical jurisdiction the warrant is to be served.
B. Service Agency – The law enforcement agency that has accepted the responsibility for service of the arrest or search warrant.
C. Hazardous Materials – Any substance or material in any form or quantity that poses a physical or health hazard to life, property or the environment.
D. Briefing – A structured meeting involving the communication of information, instructions, and guidelines.

III. General:

A. The service of search and felony arrest warrants frequently involves multiple jurisdictions and/or is accomplished in geographical areas where the agency serving the warrant does not have the primary responsibility for the delivery of general police services.
B. The establishment of a formalized guideline among the law enforcement agencies in Contra Costa County for the service of warrants, will tend to maximize the probability that they will be executed in a safe, orderly and effective manner.
C. The service of felony arrest and/or search warrants will normally be the responsibility of the agency, which has prepared the affidavit or is investigating the crime. An agency may, however, defer the service of a warrant to another agency as they agree.
D. This guideline does not require that the venue agency participate in all warrants served in its jurisdiction as individual priorities, needs and circumstances may dictate otherwise. However, each agency will make every effort to provide reasonable levels of assistance and should not obstruct, impair or delay the execution of a warrant lawfully held by another agency.
E. This guideline is not intended to address the service of non-felony arrest warrants which will be handled on a case-by-case basis as the involved agencies agree.

IV. Warrant Service Procedure:

The service of a warrant may be a relatively routine task or, in varying degrees, one which requires a great deal of planning and coordination to reduce the associated risks.
A. Command Structure:

1. The service agency is responsible for the execution of the warrant.
2. The service of a warrant shall include the designation of one of the involved officers as the “officer in charge.” Such an officer may or may not be a supervisor, but he or she shall be responsible for the proper execution of a warrant.

B. Notification:

1. Prior to the service of a warrant, the service agency shall notify, in a timely manner, the venue agency of the proposed execution. Where appropriate, notification will normally be made to the watch commander and to units assigned to similar functions. Such notification shall include, but not necessarily be limited to:
   a. The location where the warrant(s) will be served and the name of the person involved.
   b. The general circumstances surrounding the obtaining of the warrant(s) and the charge(s) upon which the warrant is based.
   c. Any potentially dangerous circumstances which are known to exist.
   d. What assistance, if any, is required of the venue agency.
   e. The name of the officer in charge.
   f. The proposed time of the execution.
   g. The location and time of the warrant briefing.

2. Once received, the venue agency is responsible for:
   a. Maintaining the confidentiality of the information.
   b. Any intra-department communications, which are appropriate given the nature of the warrant service.

C. Risk Analysis:

The officer in charge shall evaluate the risk(s) to the public and/or to the officers involved in the service of the warrant and shall incorporate tactical planning steps to reduce the associated dangers.

1. The service of warrants which offer a high degree of potential danger should include, where feasible, the following:
   a. Involvement of a representative from the venue agency in the development of a tactical plan.
      1. Tactical plan should include:
         a. Type of operation
         b. Background
         c. Objectives
         d. Location to be searched
         e. Suspect/Vehicles
         f. Time of search
         g. Personnel involved
Contra Costa Law Enforcement County Protocols
Inter-Agency Execution of Search and Felony Arrest Warrants

1. Name
2. Vehicle
3. Hours
4. Radio # and Call Sign
5. Cell #
6. Assignment

h. Tactical Entry Plan
   1. Key
   2. Other Emergency entry equipment

i. Actions if shots fired prior to entry

j. Actions if shots are fired after entry or barricaded suspect.

k. Actions if officer is down, either interior or exterior

l. Actions if hostage situation

m. UC information

n. Arrest signals

o. Special Problems
   1. Violence potential
   2. Weapons
   3. Children

p. Radio frequency

q. Equipment issued

r. Scene assignments

s. Hospital, Fire Department and Ambulance locations and telephone numbers
   1. Landing zones

t. Law Enforcement jurisdiction
   1. Notified by
   2. Person contacted
   3. Watch Commander name and telephone number for tactical support
   4. Venue agency emergency telephone number

2. Where circumstances are such that the inclusion of the venue agency in the tactical plan is not feasible, the venue agency should be notified in advance.

b. A briefing that includes:
   1. Attendance by all of the officers involved in the search warrant. In instances where patrol officers cannot attend because of other duties, they should be briefed in the field.

c. The identification and description of the suspect(s), premises, and all of the officers involved in the warrant service.
Contra Costa Law Enforcement County Protocols

Inter-Agency Execution of Search and Felony Arrest Warrants

d. Except where circumstances dictate otherwise, non-uniformed participants should wear distinctive clothing such as armbands, hats or raid jackets, which clearly identifies them as law enforcement personnel.

e. All weapons and ammunition must be approved and authorized by the respective Service or Venue Agency that employs the officer(s) using those weapons and ammunition.

2. Where circumstances are such that the inclusion of the pre-service steps outlined in 3.a.1 through 4 of this guideline are not feasible, the venue agency must be notified in advance.

3. The service of warrants which do not offer a high degree of potential danger will be handled on a case-by-case basis as the involved agencies agree.

   a. Where possible, the officer in charge shall strive to obtain concurrence from the venue agency as to the manner and means by which a warrant will be served.
   b. In the event the venue agency does not concur with the tactics and/or the manner in which a warrant is to be served, the officer in charge shall provide a representative of the venue agency the opportunity to discuss his/her concerns with a superior officer from the service agency prior to the execution of the warrant.

D. Personnel and Resources:

1. The venue agency will normally provide, given adequate notice, one uniformed officer to assist in the service of a warrant. Personnel commitments beyond one officer must be arranged well in advance of the execution of the warrant.

2. Unless otherwise agreed, officers from the service agency shall be responsible for providing any equipment and/or other resources necessary to accomplish the warrant service.

E. Investigative Responsibility:

1. Unless otherwise agreed, officers from the service agency shall be responsible for the writing of any reports and/or the identification, collection and storing of evidence associated with the execution of the warrant.
   a. The service agency will include in its reports the names of all the personnel involved in the execution of the warrant.
   b. In instances where personnel from the venue agency have witnessed events essential to the prosecution of the case, they shall provide, upon request, a written report to the service agency.

2. Unless otherwise agreed, officers from the venue agency shall be responsible for criminal events which are unrelated to the service of the warrant and/or which
occur during the service of the warrant. This shall include the writing of reports of
the incident and the collection of evidence pertaining to the new criminal event.

F. Hazardous Materials
The venue agency shall, as provided for in Contra Costa County’s Hazardous
Material Incident Contingency Plan, be responsible for the disposal of any
hazardous materials discovered in the service of a warrant.

G. Clandestine Laboratories:
1. Where the service of a warrant directly relates to the investigation of clandestine
laboratory, the collection of evidence shall, unless otherwise provided for, be the
responsibility of the service agency. CCCNET, State BNE Lab Team, and DEA
resources may be used to facilitate the removal or collection of evidence.
2. Any agency may, at their option, seek civil recovery as provided for
in Section 11470.1 of the Uniform Controlled Substance Act.

H. Transportation of Prisoners:
1. Unless otherwise agreed, the transportation of prisoners will be the responsibility
of the service agency.
2. Where the service agency is comprised of a multi-agency task force such as the
Contra Costa County Narcotics Enforcement Team, the venue agency will
provide, given prior notification and sufficient resources, for the transportation of
prisoners.
3. Where the venue agency accepts responsibility for the transportation of prisoners,
the officer who affected the arrest should provide a completed booking sheet to
the transporting officer.
4. During transportation of prisoners, a properly equipped patrol unit, transportation
van or bus will be the preferred means of transportation.

I. Booking/Housing of Prisoners:
1. Unless otherwise agreed, the service agency shall be responsible for the booking
and housing of prisoners.
2. In instances where the venue agency agrees to book and house the arrestee(s), it
shall be the responsibility of the arresting officer to convey any special and/or
procedural instructions to the transporting officer. Once received, the transporting
officer should make a reasonable effort to ensure that the requests of the
arresting officer, where proper, are complied with.
3. When the service agency is comprised of a multi-agency task force such as the
Contra Costa County Narcotics Team, the venue agency will provide, given prior
notification and sufficient resources, for the booking and housing of the prisoners.
J. Press Releases:

All press releases that directly relate to the service of the warrant will be handled by the service agency. Exceptions will be handled on a case-by-case basis as the involved agencies agree.

DISCLAIMER

The intent of this guideline is to provide for the effective service of search and arrest warrants. It is recognized, however, that on occasion circumstances may arise where the public’s interest and/or welfare may necessitate that the guideline not be followed. An exception to these provisions shall be resolved by the involved agencies on a case-by-case basis.
Policy Statement

It is the stated purpose of the Contra Costa County Law Enforcement Funeral AD HOC Committee to establish a standard for the planning, facilitation, and maintenance of a law enforcement funeral protocol and resource guide through the formation of a standing Law Enforcement Funeral Committee for Contra Costa County Law Enforcement agencies; developed in such a way as to be suitable, and therefore adoptable, by all law enforcement agencies in the County.

In all aspects of this endeavor the concept: "at the discretion of the Agency Head" is understood. Law enforcement executives are, as always, at liberty to make whatever decisions are in the best interest of their agency. It is also assumed that any decedent subject to the provisions of this protocol was not involved in criminal conduct at the time of death.

This protocol is intended to provide guidance and direction for departments that may experience the death of an employee, dignitary or family members within their organization. The primary focus of this protocol is to provide guidance and direction for the planning and facilitation of a line of duty death law enforcement funeral (Category I) due to the significant resources and planning required to conduct such a ceremony.

The Committee

This document references two separate entities, the Contra Costa County Law Enforcement Funeral AD HOC Committee, comprised of members of the Contra Costa County Operations' Working Group (OWG) whose mission is the development of this protocol as well as the formation of a standing Contra Costa County Law Enforcement Funeral Committee (hereafter referred to as the Committee) which will be comprised of recognized subject matter experts.

The Committee will be comprised of between four to eight individuals selected from CC County agencies, preferably with experience or expertise including but not limited to, the Incident Command System (ICS), large event planning, and or police funeral/memorial planning. In addition to being responsible for the creation and maintenance of a Resource Manual intended to contain police funeral related resources (for example buglers, pipers, police chaplains, trauma support, honor guards, vocalists, equestrian units, helicopters, explosive detection canine teams, security teams, etc.) the Committee will meet on a predetermined basis as necessary to facilitate desired training, presentations on available or proposed shared resources, as well as the continued maintenance of the Resource Guide, etc.

Most importantly, the Committee will come together to assist an impacted agency, as needed, in the planning and facilitation of any line of duty funeral, subject to the provisions of this protocol, occurring within the county. Nothing in this protocol is intended to restrict the Committees' ability to call upon other identified subject matter experts to assist them in their efforts.
Shared Resources

It is the recommendation of the Contra Costa County Law Enforcement AD HOC Committee and the OWG that all Law Enforcement agencies within Contra Costa County adopt a "Mutual Aid" position in response to a law enforcement line of duty death subject to the provisions of this protocol; and furthermore commit to provide, as needed, specialized personnel resources to the impacted agency, for example law enforcement funeral experts, buglers, pipers, horses, helicopters, honor guard, chaplains, etc.

Debriefing

It is recommended that following any line of duty law enforcement funeral that the Committee meet with the impacted agency representatives involved in the planning and facilitation of the funeral to debrief the event for evaluation purposes to determine if any changes to policy or practice are appropriate.

Mourning Ribbon (Bands) / Flag Protocol

It is recommended that a standard protocol be established for the display of mourning ribbons and flags and that a uniform time period be established for the resumption of normal operations, to wit: ribbons to be worn and flags placed at half-staff upon the "official notification" of a death, and ribbons off, with flags at the norm, midnight after the funeral.

Critical Injury / Death And Funeral Notice

It is recommended that a standard form "Critical Injury/Death and Funeral Notice" be established for release relative to the critical injury or death of an officer. The "critical injury" aspect of the form is reserved for those injuries that are so grave that there is little or no expectation of recovery.

Classification Of Decedents

It is recommended that five classifications of law enforcement employees be adopted for the purpose of identification and discharge of the appropriate level of funeral ceremonies.

1. **Sworn**: Those sworn to enforce laws, including Reserve Officers killed in the line of duty;

2. **Civilian**: All other employees, including volunteers;

3. **Retired**: Those honorably retired on service or disability pensions;

4. **Separated**: Those who have left the employ of an agency and whose welfare and whereabouts are of general interest to the agency or other government employees;

5. **Immediate Family Members**: Spouse, children, parents, siblings of all employee classifications.
Classification Of Events

It is recommended that five classifications of law enforcement related deaths be adopted:

1. CATEGORY I: Death of a sworn employee at the hands of a criminal adversary or that is the proximate result of traumatic injury sustained in the line of duty.
2. CATEGORY II: Death of a sworn employee in any other manner.
3. CATEGORY III: Death of a civilian employee.
4. CATEGORY IV: Death of a retired or separated employee.
5. CATEGORY V: Death of an immediate family member of any employee.

Agency Recommended Notification Protocol

Upon confirming the facts and circumstances of the critical injury or death of an employee the Watch Commander should cause appropriate agency-specific notifications to be made. Interest in law enforcement matters is often high, and information will become public that there is a seriously injured or deceased law enforcement employee from a certain jurisdiction. Given that the identity of the involved employee will be withheld pending notification of next of kin, it is highly recommended that on-duty personnel be advised to interrupt their duties and contact their own families to notify them that they are not the involved party. Employees should be admonished not to release the names of any parties actually involved in an incident.

Recommended Order Of Notification

1. Agency Head
2. Police Chaplain/Trauma Support/Psychologist (to assist in further notifications as deemed appropriate)
3. Next of Kin
   a. The notification to the next of kin should, whenever possible, be made in person, by one of equal or greater rank than the decedent who is accompanied by a Chaplain.
   b. The notifier should be well informed regarding the circumstances surrounding the death and should freely impart that information to the decedent's family.
   c. The notifier, or other suitable person, shall remain with the decedent's family until arrival of a suitable assisting person so as not to leave the family unattended during this critical period.
   d. The notifier should obtain the name of the employee preferred by the family to act in their behalf as Family Liaison Officer.
   e. The employee identified as the Family Liaison Officer should act in that capacity at the behest of the Incident Commander, in consultation with a member of the Committee, and should carry that designation as a primary duty assignment until completion of the post-funeral reception.
4. The "Officer's Association" Executive.
5. On-duty personnel.
Contra Costa Law Enforcement County Protocol

Law Enforcement Funeral

Once all appropriate notifications have been made, the “Critical Injury/Death and Funeral Notice" should be completed. This form is an official, public notification of the death of a law enforcement employee. It should be completed as soon as practical, and as completely as possible. It is the document from which all information will be taken for press releases, teletype and fax notifications, etc. Having all recipients receive the same information at the same time from the same official source is crucial to an efficient evolution of events. If there are aspects of the initial release that are unanswered, (usually viewing and funeral arrangements) they can be addressed as "pending" and an updated notice resent when the family makes its wishes known.

Funeral Protocols

1. CATEGORY I (Sworn employee - Traumatic Death in the Line of Duty): A Category I funeral is generally a public event that denotes full, military style, ceremonial honors. This category is reserved for sworn employees (including reserve officers) killed in the line of duty.

   The Agency Head is the final arbiter of what ceremonial elements will be included in a Category I funeral however a Category I funeral generally involves a Full Honors ceremony as discussed below.

2. CATEGORY II (Sworn employee - Non-Traumatic Death): A Category II funeral is generally reserved for sworn personnel whose death is not the result of a traumatic, duty-related event. A Category II funeral may be a public event depending on its circumstances. It denotes a reduced level of military-style honors to be determined by the Agency Head in consultation with the County Law Enforcement Funeral Committee and may involve an Honors ceremony as discussed below.

3. CATEGORY III (Death of a Civilian Employee): A Category III funeral is generally a non-public event with limited Department involvement. At the discretion of the Agency Head, in accordance with the wishes of the decedent's family, an Honor Guard ceremony may be deemed appropriate.

4. CATEGORY IV (Death of a Retired or Separated Employee): A Category IV death is an informational matter addressed through publication of a Death and Funeral Notice. At the discretion of the Agency Head, in accordance with the wishes of the decedent's family, an Honor Guard ceremony may be deemed appropriate.

5. CATEGORY V (Death of an Employee's Family Member): A Category V death is an informational matter addressed through publication of a Death and Funeral Notice.

Ceremonial Funeral Honors

There are three levels of Ceremonial Honors, for the purposes of this protocol, reserved for the death of a law enforcement employee:
Contra Costa Law Enforcement County Protocol

Law Enforcement Funeral

1. **Full Honors Ceremony** (Sworn) – A ceremony generally reserved for a Category I funeral, comprised of:
   a. An Honor Guard conducting a Rifle Salute,
   b. Ceremonial Flag Folding and Presentation,
   c. TAPS,
   d. Aircraft Flyovers,
   e. Equestrian elements,
   f. K-9 elements if the officer was associated with a K-9 Program.

   **Note:** Bagpipers and the release of birds are non-official funeral elements and are included at the behest of the decedent's family in all cases.

   **Note:** Additionally, depending upon the place of worship, the American flag may not be permitted to be draped upon a casket while the body is at rest within the facility. Special consideration or optional planning may be required in those cases.

2. **Honors Ceremony** (Sworn) - A ceremony reserved for a Category One funeral and in some cases a Category Two funeral depending on the wishes of the decedent's family, comprised of:
   a. An Honor Guard conducting a Rifle Salute,
   b. Ceremonial Flag Folding and Presentation,
   c. TAPS.

3. **Honor Guard Ceremony** (Retired/Non-Sworn) – For purposes of this protocol a ceremony that may be performed for Category III-IV funerals at the discretion of the agency head. Honor Guard ceremonies may also be made available for funerals of dignitaries from the affected jurisdiction at the discretion of the agency head.
   a. Static Honor Guard
   b. Pre-folded flag presented to family.

**Full Honor Ceremony (Considerations)**

In the event the impacted agency does not have the specialized resources needed for the planning and implementation of a Category I funeral members of the Committee can be contacted for advice and assistance.

Family members should be advised that a funeral with “Full Honors” will take considerable time to properly conduct. It usually consists of a religious ceremony in accordance with the family's faith group, and a graveside ceremony that will require an extended wait for all elements, dignitaries and attendees to be in place before it can begin. It potentially involves the movement of thousands of persons and hundreds of vehicles from the house of worship to the graveside. In almost all cases the family will be in place at the graveside before the last vehicle in the motorcade has left the house of worship. It is not uncommon for there to be a two-hour delay from the time the family arrives at the graveside and the last attendees are in place.)
Planners should arrange for logistical necessities including but not limited to portable toilets, aid stations, water/shade stations, etc, to be in place at the cemetery to meet the needs of attendees. Acquisition of an RV, for the family's comfort during the waiting period, should also be considered. If the family and their designated clergy are unwilling to invest the time required for a properly conducted Category I funeral they should consider a funeral with a reduced level of honors.

**Recommendations For Planning And Conducting A Category I Funeral**

Based on need of the affected agency, the agency head should consider activating the Committee to assist in the development and implementation of the funeral plan.

Generally, the development and implementation of a Category I funeral will include the following:

1. Employing the Incident Command System to manage the event.
2. Designating an Incident Commander (preferably one of high rank with decision-making authority).
3. The Incident Commander should announce a planning meeting and activate the following positions:
   a. Command Liaison Officer
   b. Public Information Officer
   c. Operations Section Chief
   d. Planning and Intelligence Section Chief
   e. Logistics Section Chief
   f. Traffic Group Leader
   g. Ceremonies Group Leader
   h. Officers Association Liaison

**Position Descriptions And Responsibilities**

**A. Command Liaison Officer**

The Command Liaison Officer is assigned directly to the Incident Commander and is the initial point of contact for all outside agencies, dignitaries and VIPs. The Command Liaison Officer should:

1. Facilitate the attendance of such persons;
2. Advise such persons to make direct contact with the Command Liaison Officer upon arrival at the jurisdiction;
3. Document the attendance of such persons and the size of their delegations;
4. Ensure that the level of participation and visibility of such delegations is commensurate with the office represented;
5. With prior clearance from the Family Liaison Officer, allow VIPs to personally express their condolences to the decedent's family on the day of the funeral;
6. Maintain a journal of all activities;
7. Submit all records of the attendance of such persons and delegations to the Planning and Intelligence Section prior to the incident debriefing. (Such records are critical to inter-agency relations. Follow-up letters of thanks are expected).

B. Public Information Officer

The Public Information Officer (assigned to the Incident Commander) is the point of contact for all media outlets and should:

1. Confer with the Family Liaison Officer regarding completion of the Critical Injury / Death and Funeral Notice;
2. Prepare a press release regarding the death of the employee and the subsequent ceremonial arrangements. (Critical Injury / Death and Funeral Notice is sufficient for this purpose);
3. Compose a brief biographical history of the deceased employee;
4. Maintain a journal of all activities;
5. Submit all documents to the Planning and Intelligence Section prior to the debriefing.

C. Family Liaison Officer

The Family Liaison Officer is the person chosen by the decedent's next of kin as the primary point of contact for the family on all matters relating to the death and funeral of the employee. This is the most critical role in the Incident Command structure. It requires one of strong character who has a close bond with the family. Ideally, all contact with the family should be through this person. It is calming for the family to interact with one of their choosing rather than a flood of callers. The Family Liaison Officer should:

1. Be with the decedent's family as much as possible during the funeral period;
2. Maintain routine contact with the Incident Commander;
3. Ensure that the family's wishes relating to the funeral are communicated to the Incident Commander on all matters;
4. Be a conduit for all incoming or outgoing family communication;
5. Attend all planning meetings;
6. Maintain a journal of all activities;
7. Communicate the family's wishes on all matters directly to the mortuary, through the Funeral Director;
8. If circumstances permit, arrange a visit, before the funeral, between the family and the command staff of the Department;
9. Submit the journal and any related documents to the Planning and Intelligence Section prior to the incident debriefing;
10. Attend the incident debriefing.
D. Operations Section Chief

It is the duty of the Operations Section Chief to oversee the various facets of the funeral preparation and execution in behalf of the Incident Commander. As such, the Operations Section Chief should:

1. Schedule and maintain contact with all activated segments of the Incident Command structure;
2. Attend all planning meetings;
3. Appoint a Mortuary Liaison to discharge the duties listed on the Mortuary Liaison Checklist;
4. Appoint a House of Worship Liaison to discharge the duties listed on the House of Worship Checklist;
5. Appoint a Cemetery Liaison to discharge the duties listed on the Cemetery Liaison Checklist;
6. Exercise functional supervision over the progression of all funeral related events;
7. Ensure that bomb sweeps are conducted at all venues prior to the arrival of personnel;
8. Change and re-direct the Incident Action Plan as necessary;
9. Maintain a journal of all activities;
10. Submit all documentation to the Planning and Intelligence Section prior to the incident debriefing;
11. Attend the incident debriefing.
12. **Security for the service. Participating agencies will assist.**

E. Planning and Intelligence Section

It is the duty of the Planning and Intelligence Section Chief to oversee the conduct of all planning meetings, maintain all records and documentation and coordinate the participation of elements from within and without the Department who will be contributing technical expertise to the proceedings. The Planning and Intelligence Section Chief should:

1. Announce and conduct an initial planning meeting;
2. In conjunction with the Operations Section, identify an Operational Period;
3. Compose a written Action Plan that allows sufficient time for all organizational components to complete assigned duties;
4. Conduct a site survey at the house of worship and produce a security plan;
5. Conduct a site survey at the cemetery and produce a security plan;
6. Establish and maintain contact with;
   a. The religious leader identified by the Family Liaison Officer;
   b. The Funeral Director;
   c. The Benefits Counselor;
   d. The Department Psychologist;
   e. A Piper;
   f. A Bugler;
   g. A photographer for both venues the day of the funeral;
   h. An audio expert for the church and grave side ceremonies;
Contra Costa Law Enforcement County Protocol

Law Enforcement Funeral

7. Maintain a journal of all activities;
8. Maintain copies of all written plans, diagrams, maps, etc.;
9. Handle all correspondence;
10. Monitor the weather;
11. Collect and archive all journals, notes and documents;
12. Conduct the incident debriefing;
13. Prepare an After-Action report.

F. Traffic Group Supervisor

Under the direction of the Operations Section it is the responsibility of the Traffic Group to plan and coordinate all traffic related elements the day of the funeral. The Traffic Group Supervisor should:

1. Attend all planning meetings;
2. Diagram the parking facilities at the mortuary and the cemetery;
3. Contact (through the Command Liaison Officer) the California Highway Patrol and other jurisdictions that may be impacted during the funeral procession;
4. Formulate a motorcade and parking plan for all venues;
5. Maintain a journal of all activities;
6. Submit all plans and related documentation to the Planning and Intelligence Section prior to the second planning meeting;
7. Notify the Logistics Section of all items necessary to accomplish the Traffic Group mission (cones, delineators, flares, barricades, etc.);
8. Submit all journals and other documentation to the Planning and Intelligence Section prior to the incident debriefing;
9. Return all unused or re-useable items to the Logistics Section;
10. Attend the incident debriefing.

G. Ceremonies Group Supervisor

Under the direction of the Operations Section it is the responsibility of the Ceremonies Group to research, plan and execute all funeral related ceremonies. The Ceremonies Group Leader should:

1. Establish a Church Ceremonies Team and designate a Team Leader;
2. Establish a Cemetery Ceremonies Team and designate a Team Leader;
3. Ensure that the position of Master of Ceremonies is staffed by one well versed in military drill and ceremonies who possesses a commanding voice;
4. Meet the Funeral Director, the Cemetery Curator, the Family Liaison Officer and the religious leader at the cemetery well in advance of the interment and choreograph the grave side ceremonies.
5. Conduct dress rehearsals with all involved parties at both venues. Ensure that the following issues are addressed:
   a. That the ceremony as planned, is in accordance with the wishes of the next of kin;
   b. That the location of the grave is satisfactory to the next of kin;
Contra Costa Law Enforcement County Protocol

Law Enforcement Funeral

c. That a diagram of the cemetery has been obtained;
d. That the location of the Rifle Squad has been identified;
e. That the location of the uniform formation has been identified;
f. That the location of the family delegation has been identified, and that a canopy and sufficient chairs will be in place;
g. That the arrival route of the hearse, and its eventual parking space, have been identified;
h. That the location of the Piper and Bugler have been plotted;
i. That the location of the Honor Guard has been identified.
j. After addressing the necessary issues, mark the locations of the components of the ceremonial groups with wire flags, spray chalk or other suitable substance and conduct a walk-through of the grave side ceremony. (When mapping out the ceremonial elements, especially the uniform formation) remember that it is easier to constrict a plan that is too large than to expand one that is too small).

6. Contact all members of each component of the ceremonial groups and direct them to report to their respective duty stations well in advance on the day of the funeral in order to dress rehearse their roles;

7. Confer with the Parking Team Leader to ensure that all vehicles belonging to the members of the ceremonial groups are positioned for rapid departure from the house of worship, to the cemetery, well in advance of the funeral motorcade.

8. Position arriving personnel in accordance with the parking plan;

9. Oversee the conduct of the grave side ceremonies.

H. Logistics Section Chief

The Logistics Section Chief is responsible for site security at all venues, provision of all necessary supplies, procurement of certain key personnel and apparatus, operating a transportation detail to assist arriving and departing personnel, and assisting the family with the post-funeral reception. The Logistics Section Chief should:

1. Arrange for the deployment of a tow truck at both venues the day of the funeral;
2. Arrange for the deployment of a rescue ambulance at both venues the day of the funeral;
3. Arrange for the deployment of portable toilets at a suitable location in the cemetery;
4. Arrange for the deployment of a catering truck at a suitable location in the cemetery proper, on the day of the funeral;
5. Arrange and supervise a transportation detail to assist persons attending from distant locales;
6. Obtain a casket flag and white gloves;
7. Obtain a sufficient supply of cones, barricades, flares, delineators and other equipment to supply the Traffic Group;
8. With the concurrence of the Family Liaison Officer, offer to assist the family with the post-funeral reception;

9. Ensure that all equipment and supplies are returned or accounted for prior to the incident debriefing;
10. Maintain a journal of all activities;
11. Submit all documentation to the Planning and Intelligence Section prior to the incident debriefing;
12. Attend the incident debriefing.

I. Officers Association Liaison (or other identified Specialist)

1. Assist the decedent's family with matters related to the death such as benefits, insurance policies, personal documentation, costs, etc.
2. Attend all planning meetings;
3. Assist with funeral planning and arrangements.

Graveside Ceremonies - Category I Funeral (Full Honor Ceremony)

A Category I funeral consists of some or all of the following ceremonial elements:

1. Master of Ceremonies;
2. Pallbearers;
3. Honor Guard;
4. Rifle Squad;
5. Ceremonial Flag Folding;
6. Piper;
7. Bugler;
8. Flyover Squadron;
9. Riderless Horse;

A. Choreography

A Category I funeral is choreographed as follows:

1. Ensure that the family's wishes are met;
2. Ensure that the family can see and hear all elements of all ceremonies;
3. Ensure that the Master of Ceremonies has drill and ceremonies expertise and a commanding voice. (The position of Master of Ceremonies is not a function of rank but of competence, assertiveness and expertise. The Funeral Committee may have a referral for a Master of Ceremonies).
4. Ensure there is a clear path for all ceremonial elements, paying particular attention to the pallbearers;
5. Ensure the elements of the formation can hear the proceedings at the grave side. (This issue is best addressed by procurement of a sound system by the Logistics Section).

B. Flag and Coffin Protocol

1. When the United States flag is draped on a coffin the field of stars is positioned at the head and over the left shoulder of the deceased, as pictured in the addenda.
2. When a flag-draped coffin is on display the head is to the viewer's left. The striped area of the flag faces the viewer and is considered the "front" view.
3. When a coffin is moved, whether flag-draped or not, it is oriented feet first.
4. When outside, if a flag-draped coffin is moved from one place to another, uniformed personnel are expected to salute when it passes.
5. Nothing is to be placed on a flag-draped coffin at any time.
6. During the ceremony the United States flag is folded by the Honor Guard (see addenda). Once folded it may be passed from person to person or carried from place to place. If so, it is carried left hand on the bottom, right hand on the top. Before it changes hands the receiving person, if in uniform, salutes the presenter.

C. Special Element Roles

The grave side ceremony consists of several ceremonial elements. The Rifle Squad, Pallbearers, Honor Guard, Bugler, Piper, etc., at times act independently of the main formation in the discharge of their duties. The following are guidelines for such special element roles:

1. The Master of Ceremonies is the leader of all uniformed elements;
2. The commands of the Master of Ceremonies are given in a voice audible to all present. (Depending on the circumstances of the officer's death, sworn funerals can draw several thousand uniformed attendees. The entire formation will be receiving commands of execution from the Master of Ceremonies. A powerful voice and a strong command presence are essential to the success of the ceremonies).
3. The commands to the special elements by their individual Officers in Charge are audible only to the concerned elements.
4. When the Master of Ceremonies intends for the special elements to operate independently of his commands, the command: "SPECIAL ELEMENTS, STAND FAST!" will be given prior to the command given the main formation. On all other occasions the special elements are to function as part of the main formation.

D. Positioning of Elements

1. The Master of Ceremonies should be at the grave side well in advance of the motorcade, and should, in an expeditious manner, position arriving officers into the ranks and files of the main formation;
2. The Master of Ceremonies should also position the Honor Guard, Piper, Bugler, Rifle Squad and other special elements
3. Upon arrival of the hearse the pallbearers should stand at Parade Rest, facing one another in two ranks, at the rear of the hearse, until directed by the Master of Ceremonies to remove the casket.
Recommended Order Of Ceremonies

A. Category I – Full Honors
After the Master of Ceremonies has positioned all elements and the main formation is complete the Order of Ceremonies (with the MC giving the commands) is as follows:

1. The command "DETAIL...ATTENTION!" is given. This signals the Mortuary Director and the pallbearers to remove the casket from the hearse;

2. "PRESENT ARMS" is directed to the entire formation; "Present Arms" is held while the pallbearers move the casket to the bier. (The casket is oriented feet first when moved and when positioned for the service. If the casket needs to be turned or re-oriented it is done with a pivoting movement immediately prior to being set at rest).

3. "DETAIL - ORDER ARMS!" is given after the pallbearers have placed the casket on the bier, adjusted the flag to its proper position and come to attention;

4. "DETAIL, PARADE REST!"

The OIC of the pallbearer detail directs a facing movement followed by a marching order that positions the detail to the side (but in close proximity) to the bier, for the duration of the religious rites.

Upon completion of the religious rites the Honor Guard positions itself on either side of the casket for the folding of the flag.

"DETAIL ATTENTION!" queues the piper to begin a musical selection and the Honor Guard to begin folding the flag in accordance with the addendum to this document.

The folded flag is presented to the Agency Head who renders a hand salute, receives the flag from the presenter, turns and presents it to the primary next of kin.

It is not uncommon for Category I ceremonies to be attended by the Governor or a representative of that office. In almost all cases, uniformed officers from the California Highway Patrol will be in attendance to present a State of California flag, and condolences from the governor, to the primary next of kin. This occurs immediately after the presentation of the United States flag by the Agency Head.

After the flag presentations and condolences are complete, the command "DETAIL, PRESENT ARMS!" is given to all personnel.

Immediately thereafter,

"PREPARE FOR THE VOLLEY!" is given as a warning that the rifle volley is about to occur and queues the rifle squad to conduct the rifle salute.
After the rifle squad completes the volley and comes to "Present Arms" the bugler begins "TAPS". (If there is a flyover it should be coordinated to pass overhead as "TAPS" is ending).

Upon completion of "TAPS" and the flyover "DETAIL, ORDER ARMS!" is given.

This queues the pallbearers to align with the end of the casket farthest from the next of kin, remove their gloves and file past the casket, placing their gloves thereon as they do so. After having done so the pallbearers form a rank at attention and "DETAIL... DISMISSED!" is given, ending the ceremony.

Graveside Ceremonies - Category II-V Funerals

A. Category II (Death of an employee in any other manner)
   Category II graveside ceremonies are generally confined to:
   
   1. Motor Escort,
   2. Rifle Salute,
   3. Ceremonial Flag Folding,
   4. TAPS.

B. Category III (Death of a Civilian Employee)
   The graveside ceremony for a Category III funeral should include an attendance policy identified by the Agency Head and is generally restricted to:
   
   1. Motor Escort,
   2. Static Honor Guard,

C. Category IV (Death of a Retired or Separated Employee)
   The graveside ceremony for a Category IV funeral should include an attendance policy identified by the Agency Head and is generally restricted to:
   
   1. Static Honor Guard

D. Category V (Death of an Immediate Family Member of an Employee)
   The protocol for a Category V funeral should be limited to an attendance policy identified by the Agency Head.

Death Of Animals

It is recommended that a subordinate protocol for the death of animals in law enforcement service be established as an addendum to this policy.
It is recommended that agencies adopt an "Employee Emergency Notification Form" to be completed by employees and updated during their calendared review process. The form will contain notification wishes and special instructions by the decedent in the event of his death.
County of Contra Costa, California

Law Enforcement Mutual Aid (LEMA) Agreement

January 1, 2019

References.

a. California Disaster and Civil Defense Master Mutual Aid Agreement, November 1950, Office of the Governor, State of California
b. California Emergency Services Act, Chapter 7 of Division 1 of Title 2 of the Government Code
c. California Law Enforcement Mutual Aid Plan, June 2016, Governor's Office of Emergency Services, State of California

Introduction

The authority for public agencies to enter into Mutual Aid Agreements is provided in the State of California Emergency Services Act and the Master Mutual Aid Agreement contained in the California Government Code. The purpose of this Law Enforcement Response Mutual Aid Agreement is to permit signatory agencies to make the most efficient use of their powers by enabling them to coordinate resources and maximize their response during time of disaster/emergency.

This agreement allows signatory agencies to support each other within the operational area during disasters/emergencies to protect life and property when the event is beyond the capabilities of the affected entity. This agreement supports the mechanism for an immediate response to the requesting agency provided the responding agency has the resources and expertise necessary and is ultimately available to do so.

When faced with a disaster or emergency, law enforcement agencies have a responsibility to maintain service and recover in the most expedient way. This can best be accomplished by preparation, coordination, and cooperation with other law enforcement agencies.

When the Chief of Police of a City or Special District, or his/her designee, determines that an emergency situation in his/her jurisdiction may become or is already beyond the control of his/her department's resources, it is his/her responsibility to request mutual aid from the County Sheriff, who is the Operational Area Coordinator.

This agreement is not intended to replace or supersede the utilization of day-to-day mutual aid protocols or local agency agreements.

This agreement supersedes previous law enforcement Mutual Aid agreements within Contra Costa County.
County of Contra Costa, California
Law Enforcement Mutual Aid (LEMA) Agreement

Section I. Definitions.

The following terms shall have the following meanings, unless the context indicates otherwise:

Agency. Any general-purpose law enforcement agency as defined by law.

Agreement. Local agreements entered into by two or more agencies for the purpose of Law Enforcement Mutual Aid.

Day-to-Day Mutual Aid. During the course of normal law enforcement, smaller incidents may occur that could require immediate assistance, such as: back-up on a traffic stop, perimeter control for a fleeing suspect, or crowd control at a barricaded suspect’s location pending the arrival of additional local resources. Officers from nearby jurisdictions may respond to these emergency broadcasts on their own initiative (department policy permitting) without a formal mutual aid request.

Disaster. An expected or unexpected event, in which a community's available and pertinent resources are expended, or the need for resources exceeds availability, and in which a community undergoes severe danger, incurring losses so that the social or economic structure of the community is disrupted and the fulfillment of some or all of the community's essential functions are prevented.

Emergency. An emergency includes, but is not limited to, a human-caused or natural event or circumstance within the area of operation of any party agency causing or threatening loss of life, damage to property, injury to person, human suffering or financial loss, such as: fire, explosion, flood, severe weather, drought, earthquake, volcanic activity, spills or releases of hazardous materials, contamination, utility or transportation emergencies, disease, infestation, civil disturbance, riots, and acts of terrorism or sabotage. An emergency event is likely to be beyond the capacity of an affected party agency or party agencies in terms of personnel, equipment, and facilities, thereby requiring emergency assistance.

Emergency Assistance. Emergency Assistance means employees, services, equipment, materials, or supplies offered during an emergency by the responding agency and accepted by the requesting agency when such service has been disrupted by acts of the elements, equipment malfunctions, accidents, terrorism/sabotage, and other occurrences when emergency assistance from other party agencies is necessary or advisable as determined by the requesting agency.

Fifty Percent Guideline. No jurisdiction is required to unnecessarily deplete its own personnel, equipment, and service capabilities in order to furnish mutual aid resources. When requested to provide mutual aid, it is generally accepted that a reasonable response will consist of up to 50% of available on-duty uniformed personnel.
Mobilization. To organize or put into readiness for active law enforcement services.

Mutual Aid Region. A Mutual Aid Region is a geographic area comprised of multiple Operational Areas. A Mutual Aid Region manages and coordinates information and resources among Operational Areas within the Mutual Aid Region and between the Operational Areas and the state level. All jurisdictions in Contra Costa County are part of Region II. The Alameda County Sheriff/designee is the Region II Coordinator.

Operational Area. The area comprising Contra Costa County along with all of its political subdivisions.

Operational Area Coordinator. The County Sheriff is the Operational Area Coordinator.

Party Agency. An agency who has adopted, signed and subscribes to this Mutual Aid Agreement. Also referred to in this agreement as Signatory Agency.

Regional Law Enforcement Mutual Aid Coordinator. The Regional Law Enforcement Mutual Aid Coordinator is an Operational Area Law Enforcement Coordinator, who is elected by other Operational Area Coordinators within the Mutual Aid Region, to coordinate the collective law enforcement mutual aid response of agencies within the Region (currently Alameda County Sheriff’s Office).

Requesting agency. An agency who has adopted, signed and subscribed to this Mutual Aid Agreement, has made a request for Emergency Assistance, and has received commitments to deliver Emergency Assistance pursuant to the terms of this Mutual Aid Agreement.

Responding Agency. An Agency who has adopted, signed, and subscribed to this Mutual Aid Agreement and has agreed to deliver Emergency Assistance to another Party Agency pursuant to the terms and conditions of this Mutual Aid Agreement.

State Law Enforcement Mutual Aid Coordinator. The State Law Enforcement Mutual Aid Coordinator is the Chief of the Law Enforcement Branch of the Governor’s Office of Emergency Services. The State Coordinator is responsible for mutual aid response coordination and administrative interaction between state and local law enforcement agencies during emergency and non-emergency situations, where the mutual aid system is, or could be, involved.
Countes of Contra Costa, California
Law Enforcement Mutual Aid (LEMA) Agreement

Section II. Participation.

Participation in this Mutual Aid Agreement is voluntary and at the sole discretion of the responding agency. The responding agency shall have the primary interest of protecting its own constituency. The safety and security of the responding agency's jurisdiction is the responding agency's first concern and only staff and equipment that can be spared without leaving the jurisdiction unprotected shall be sent. No party agency shall be liable to another party agency or be considered to be in breach of or default under this Mutual Aid Agreement on account of any delay in or failure to perform any obligation under this Mutual Aid Agreement.

Section III. General Nature of Emergency Assistance.

Emergency assistance will be in the form of resources, such as equipment, supplies, and personnel or the direct provision of services. The execution of the Mutual Aid Agreement shall not create any duty to respond on the part of any party agency. A party agency shall not be held liable for failing to provide emergency assistance. A party agency has the absolute discretion to decline to provide any requested emergency assistance and to withdraw resources it has provided at any time without incurring any liability. The participating agencies recognize that time is critical during an emergency and diligent efforts will be made to respond to a request for resources as rapidly as possible, including any notifications that requested resources are not available.

Section IV. Requests for Emergency Assistance.

Requests for emergency assistance shall be directed to the designated contact person(s) on the contact list provided by the party agencies. The extent to which the responding agency provides any emergency assistance shall be at the responding agency's sole discretion. In the event the emergency impacts a large geographical area that activates either Federal or State emergency laws, this agreement shall remain in effect until or unless this agreement conflicts with such Federal and State laws.

In the event of a major emergency/disaster or other law enforcement operation, the first law enforcement resources to be used shall be those of the requesting agency. In the event that such resources are inadequate to control the situation, or there is a need for a specialized unit, a request for mutual aid under this plan will be made directly to a party agency (requests for specific individual units) or through the Office of the Sheriff who is designated as the Mutual Aid Coordinator for the County. Such requests for assistance shall, if possible, specify the number of law enforcement officers and type of equipment required and shall further specify where and to whom such officers are to report and where and to whom the equipment should be delivered. The initial request will also include an overview of the situation and intelligence available from the requesting agency.
County of Contra Costa, California
Law Enforcement Mutual Aid (LEMA) Agreement

The County Mutual Aid Coordinator may directly coordinate with the local Commander of the California Highway Patrol.

Each party agency has agreed to contribute as many on-duty personnel as possible, still maintaining personnel to continue routine police functions in their individual jurisdictions. Each party agency has agreed to recall off-duty officers, if necessary.

The parties to this agreement shall provide the names and telephone numbers of agency staff who have the authority to commit personnel and/or equipment to any mobilization effort to the county Mutual Aid Coordinator.

If the County cannot provide resources, the Mutual Aid Coordinator may request resources from the Region to meet the requesting agency's needs.

The agency making the request for mutual aid is responsible for the following:

1. Identifying numbers and types of mutual aid resources that are needed.
2. Identifying specific missions for mutual aid responder tasking.
3. Advising responders what equipment they should bring.
4. Establishing an assembly area for responding resources.
5. Identifying communications channels compatible with command and control of field resources.
6. Designating a liaison officer to facilitate a coordinated assimilation of responding mutual aid resources.
7. Preparing a situation briefing, including local maps for responders.
8. Providing logistical support such as food, lodging, rest intervals and equipment and as appropriate for mutual aid personnel.

Section V. Command and Communications.

A. Command.

1. In the event of mobilization under this agreement, the requesting agency shall take charge of the operation, unless the requesting agency specifically requests that a different law enforcement agency fulfill this responsibility, or unless the scope of the problem is multi-jurisdictional, in which case the Operational Area Coordinator will take charge. This shall include directing the assignment of all personnel and equipment. The assignment of duties to officers of assisting agencies shall be made by the supervising officer of the requesting agency unless that responsibility is delegated to a different law enforcement agency as indicated above.

2. The Incident Commander or officer in charge of a requesting unit at the scene of an emergency is authorized to request assistance from another party agency if confronted
with an emergency situation at which the requesting agency has need for equipment or personnel in excess of that available through the responding agency’s department.

3. Upon receipt of such a request, the officer in charge of the party receiving the request shall immediately take the following action:

   a. Determine if the responding agency has equipment and personnel available to respond to the requesting agency.
   b. Determine what available equipment and personnel should be dispatched in accordance with the operating plans and procedures established by the parties.
   c. In the event the needed equipment and personnel are available, to dispatch such equipment and personnel to the scene of the emergency with proper operating instructions.
   d. In the event the needed equipment and personnel are not available, to immediately advise the requesting agency.

4. Command Responsibility at the Emergency Scene: The underlying principle of mutual aid is that other agencies and jurisdictions are serving as a resource to the primary or requesting agency. The Incident Commander of the requesting agency shall be in command of the operation under which the equipment and personnel sent by the responding agency shall serve. The responding personnel and equipment shall be under the immediate supervision of the officer in charge of the responding agency. The Incident Command however, may be relinquished to the senior officer of any department/agency rendering assistance under the terms of this agreement.

5. The requesting agency shall have the responsibility of establishing a command post and notifying all responding agencies at the earliest possible time of its location. The requesting agency shall establish a command post in such a manner as to provide an area suitable for the staging and directing of resources.

6. Termination of Service: The personnel and equipment of the responding agency shall be released from service and returned to the responding agency by the commanding officer in charge of the operation as soon as conditions warrant.

B. Communications.

1. Radios. To facilitate the utilization of mutual aid, common frequencies will be used wherever possible, including the statewide law enforcement coordination channels (i.e., CLEMARS). When deployment is within the EBRCs coverage area, Mutual Aid will generally operate on:

   - Primary: XCC LAW1
   - Secondary: XCC LAW2
   - Tertiary: XCC LAW3
County of Contra Costa, California
Law Enforcement Mutual Aid (LEMA) Agreement

2. Frequencies. The requesting agency will specify the frequency to be used during the incident. If a common frequency cannot be established, an interoperability unit will be requested to facilitate communications. If possible, portable radios will be issued to each responder or group of responders.

3. Call Signs. Call signs may be assigned by the requesting agency or responding agencies may use their own jurisdictional designations.

4. Public / Press Relations. The department head, or his/her alternate, in whose jurisdiction the incident occurs shall designate a person as a Public Information Officer. This person shall be the only one empowered to make press releases.

Section VI. Mutual Aid Mobile Field Force.
(Developed in 2003)

1. Purpose. The Mutual Aid Mobile Field Force (MAMFF) was developed to create an organized response by allied agencies to mutual aid requests. The term Mutual Aid Mobile Field Force will be used throughout this section to describe this mutual aid element. The MAMFF is an organized, trained, and equipped force of officers and supervisors from allied law enforcement agencies within Contra Costa County. The operational concept is to deploy a force with sufficient personnel and equipment to mitigate potential or real problems resulting from a formal request for mutual aid.

2. Operating Guidelines.

A. Activation. The MAMFF will be made available for response pursuant to requests for mutual aid in the event of disaster, civil unrest, or other major incidents following the guidelines as specified in the State of California Guidelines for Law Enforcement Mutual Aid Response and the Contra Costa County Police Chief’s Association Mutual Aid Agreement. Upon receipt of a mutual aid request:

1. The County Law Enforcement Mutual Aid Coordinator will:
   a. Notify the Mutual Aid Mobile Field Force Officer in Charge (MAMFF OIC)
   b. Notify the Sheriff’s chain of command seeking deployment approval
   c. Notify the Regional Mutual Aid Coordinator
   d. Notify the allied agency mutual aid coordinators

2. The Mobile Field Force Officer in Charge will:
County of Contra Costa, California
Law Enforcement Mutual Aid (LEMA) Agreement

a. Notify the individual members of the MAMFF. This will include the location of the assembly point for the MAMFF as well as event information as needed.

B. SEMS/NIMS/ICS. When activated, the MAMFF will follow the SEMS/NIMS/ICS protocol outlined in the Law Enforcement Guide for Emergency Operations.

C. Personnel. The MAMFF will be comprised of personnel from the following allied agencies. Each agency is responsible to ensure that appropriate members of the MAMFF are available for deployment in an emergency.

1. MAMFF West Squad
   a. Kensington Police Department 1 Officer
   b. Richmond Police Department 5 Officers / 1 Sergeant
   c. El Cerrito Police Department 1 Officer
   d. San Pablo Police Department 2 Officers
   e. Pinole Police Department 1 Officer
   f. Hercules Police Department 1 Officer
      Total: 11 Officers / 1 Sergeant

2. MAMFF Central Squad
   a. Concord Police Department 4 Officers / 1 Sergeant
   b. Pleasant Hill Police Department 2 Officers
   c. Martinez Police Department 1 Officer
   d. Walnut Creek Police Department 3 Officers
   e. Clayton Police Department 1 Officer
      Total: 11 Officers / 1 Sergeant

3. MAMFF East Squad
   a. Antioch Police Department 3 Officers / 1 Sergeant
   b. Pittsburg Police Department 3 Officers
   c. Oakley Police Department 1 Officer
   d. Brentwood Police Department 1 Officer
   e. East Bay Regional Parks Police Department 2 Officers
   f. Contra Costa County College District Police 1 Officer
      Total: 11 Officers / 1 Sergeant

4. MAMFF South Squad
   a. Contra Costa County Sheriff’s Office 1 Sergeant
   b. BART Police Department 2 Officers
   c. Orinda Police Department 1 Officer
   d. Danville Police Department 1 Officer
   e. San Ramon Police Department 2 Officers
   f. Lafayette Police Department 1 Officer
   g. Moraga Police Department 1 Officer

Page 8 of 15
Updated: January 2019
County of Contra Costa, California
Law Enforcement Mutual Aid (LEMA) Agreement

8 Officers / 1 Sergeant

5. MAMFF County Sheriff Squad
   a. Contra Costa County Sheriff’s Office
   b. Contra Costa County Sheriff’s Office

13 Deputies / 1 Sergeant
1 Lieutenant (OIC)
13 Deputies / 1 Sergeant / 1 Lieutenant

D. Equipment. MAMFF members will be equipped with the following equipment by their assigned agency for response to a MAMFF activation.

1. Duty Uniform
2. Duty belt
3. Eye protection
4. Gloves
5. Soft Body Armor
6. Ballistic Helmet
7. Baton, 36” Riot
8. Department issued Patrol Baton PR24/ Straight Baton/ ASP
9. Flashlight
10. Riot Shield
11. Elbow and knee pads
12. Shin guards
13. Turtle Shell Chest Protector
14. Personal Water system
15. Respirator mask
16. Deployment bag

E. Communications. To ensure common communications capability, communications equipment will be provided to members of the MAMFF by the MAMFF OIC using the Contra Costa County cached radio system if their home agencies are not currently on the interoperable radio system and they do not have compatible radios.

F. Training. Appropriate training is crucial to the maintenance of an effective MAMFF. MAMFF training will consist of an initial twenty-four-hour training session and supplemented with a quarterly eight-hour MAMFF update training sessions. The initial twenty-four-hour training will be certified through the California Commission on Peace Officer Standards and Training (POST).

G. After Action Reports. After Action Reports will be completed by the MAMFF OIC and forwarded to the Incident Commander immediately following the event that initiated the MAMFF activation. After Action Reports will be forwarded to the Chief Executive of each agency and the County Law Enforcement Mutual Aid Coordinator. The After Action Report will include a synopsis of the event, the
personnel deployed and hours worked, arrests made, expenditures and reimbursements, problems encountered and recommendations for improvements to the MAMFF Program.

   A. Payroll. All officers, when assigned to the MAMFF, will be paid by their respective agencies. When an incident is organized under the Standardized Emergency Management System (SEMS), the MAMFF OIC will report and coordinate all personnel record keeping with the Logistics Representative.

   B. Illness. If a MAMFF member becomes ill while assigned to the MAMFF, the MAMFF member's agency sick leave policy will be used. The MAMFF OIC will report any illness report to the MAMFF member's agency representative.

   C. Overtime. All overtime for members of the MAMFF will be the responsibility of their home agency.

Section VII. Administrative Guidelines.

1. Peace Officer Authority Consent. Penal Code 830.1 (a)(2) requires the prior consent of the Sheriff or Police Chief before a peace officer from one jurisdiction will have the authority of a peace officer in another jurisdiction unless the circumstances presented in Penal Code 830.1 (a)(3) are present. Pursuant to 830.1(a)(3), any peace officer has such authority, anywhere in the state, when a crime is committed in the peace officer's presence or where probable cause exists to believe there is immediate danger to a person or property or to stop the escape of the perpetrator.

   Under the authority given pursuant to 830.1(a)(2) any duly authorized deputy sheriff or police officer from any jurisdiction listed in this Mutual Aid Agreement shall have the consent of the Sheriff and Police Chiefs to extend his/her authority as a peace officer to any place which is under the jurisdiction of the Sheriff and Police Chiefs approving this agreement. PLEASE NOTE: WHEN SUCH AUTHORITY IS BEING EXERCISED IN ANOTHER JURISDICTION, THAT SHERIFF OR POLICE CHIEF SHOULD BE NOTIFIED AS A PROFESSIONAL AND LAW ENFORCEMENT COURTESY.

2. Chain of Command. In a MAMFF deployment, the MAMFF will be assigned to support the Incident Commander of the mutual aid event. When operating as part of the MAMFF, assigned officers will be placed under the operational control of the MAMFF OIC. The MAMFF OIC is subordinate to the IC, but should advise on tactics and operations based on the specialized training and experience gained as the MAMFF OIC.

3. Use of Force. Responding officers will adhere to their agency's Use of Force policies including when deployed to Mutual Aid Mobile Field Force (MAMFF) events.
4. Officer-Involved Shootings. The investigation of officer-involved shootings shall be under the existing officer involved protocol, or if outside of Contra Costa County, will be the primary responsibility of the jurisdiction in which the incident occurred. The responding agency will immediately be notified of any such incident. In the case of a MAMFF event, the MAMFF OIC would immediately notify the involved officer's parent agency.

5. Arrests. It shall be the primary responsibility of the police agency(ies) having immediate jurisdiction of the incident to furnish arrest teams or other arresting personnel. In instances where the requesting agency by reason of size does not have an arrest team, at least one (1) uniformed member of that agency shall participate as a member of a responding arrest team.

A. A Field Booking Team may be established to facilitate the booking process and transportation of those arrested. The size of the team depends on the nature of the incident and the number of arrests expected.

B. In all types of disturbances, in addition to arrest teams, jurisdictions should utilize special teams for photography and video recordings. Liaison should be established to obtain and/or view photographs and videotapes taken by news media, television stations and amateur photographers.

6. Detention. The requesting agency will be responsible for all field-booking procedures, including photography, fingerprinting and booking sheets. The Office of the Sheriff will provide assistance as needed, if requested.

7. Transportation of Prisoners. In instances where the requesting agency cannot handle the transportation of prisoners or its resources are taxed, the Office of the Sheriff will assist in transportation from the scene to the County Jail or other designated holding facilities.

8. On-Duty Motor Vehicle Accidents. Responding agency members who are involved in on-duty motor vehicle collisions will report the incident to their immediate supervisor. In the case of a MAMFF event, the MAMFF OIC will ensure the accident is reported and investigated by the jurisdictional police agency. Copies of the completed collision report will be forwarded to the MAMFF OIC, the officer's agency and the County Mutual Aid Coordinator. The involved officer will be responsible for meeting specific requirements detailed within his/her agency's vehicle accident reporting policy.

9. On-Duty Injuries. When a responding agency officer is injured on-duty, the requesting agency OIC will ensure that immediate medical attention is administered to the officer. The injured officer's agency will be notified as soon as possible. During a MAMFF training or deployment, the MAMFF OIC will ensure those responsibilities are addressed.
County of Contra Costa, California
Law Enforcement Mutual Aid (LEMA) Agreement

10. Citizen Complaints. Complaints regarding misconduct of officers will be directed to the agency of the officer against whom the complaint is filed. Completion of any required investigation(s) will be the responsibility of the subject officer’s agency. In the case of a MAMFF deployment, the MAMFF OIC, if aware of a complaint during the deployment, shall document the facts surrounding the complaint and any other relevant information and forward the complaint to the involved officer(s’) agency to investigate the allegation.

11. Food, Fuel, and Lodging. The requesting agency is responsible for the provision of food, fuel, and lodging support to all officers assigned through mutual aid.

Section VIII. Indemnification and Limitation of Liability.

1. Mutual Indemnification: Requesting Agency will indemnify, save, and hold harmless Responding Agency(ies) and its/their officers and employees from any and all claims, demands, losses, costs, expenses, and liabilities for any damages, fines, sickness, death, or injury to person(s) or property, including any and all administrative fines, penalties or costs imposed as a result of an administrative or quasi-judicial proceeding, arising directly or indirectly from or connected with the services provided hereunder that are caused, or claimed or alleged to be caused, in whole or in part, by the negligence or willful misconduct of Requesting Agency, its officers, employees, agents, contractors, subcontractors, or any persons under its direction or control in the performance of this agreement.

Responding Agency(ies) will indemnify, save, and hold harmless Requesting Agency and its officers and employees from any and all claims, demands, losses, costs, expenses, and liabilities for any damages, fines, sickness, death, or injury to person(s) or property, including any and all administrative fines, penalties or costs imposed as a result of an administrative or quasi-judicial proceeding, arising directly or indirectly from or connected with the services provided hereunder that are caused, or claimed or alleged to be caused, in whole or in part, by the negligence or willful misconduct, errors or omissions of Responding Agency(ies), its/their officers, employees, agents, contractors, subcontractors, or any persons under its direction or control in the performance of this MOA.

This provision will survive the expiration or termination of this MOA.

1. Conformance with Federal and State Regulations and Laws: Should federal or state regulations or laws touching upon the subject of this agreement be adopted or revised during the term hereof, this agreement will be deemed amended to assure conformance with such federal or state requirements.
County of Contra Costa, California
Law Enforcement Mutual Aid (LEMA) Agreement

2. Each party agrees to be adequately self-insured or maintain adequate insurance coverage for its own equipment and personnel, including liability, workers’ compensation and property damage.

3. All Parties to this agreement should have equal access to the records created by any of the agencies involved in a request for assistance so that they can have the appropriate information to defend themselves in lawsuits.

4. If a party to this agreement is served with a claim or lawsuit arising out of an emergency response operation, that party shall timely notify every other party who responded to a request for assistance arising out of or connected with the same incident or emergency.

Section IX. Loans of Personnel and Equipment.

The requesting agency will be responsible for supplying and/or replacing supplies needed and/or used by officers from responding agencies. These supplies shall include food, fuels, lodging, or any other supplies that are reasonably needed to sustain the officers in enforcing the law and maintaining order. The responding agency will be responsible for any repairs and/or damages done to its own vehicles as a result of participation in a mutual aid event.

Section X. Expenditures.
Unless otherwise agreed, or under those circumstances where the State of California or the Federal Government will reimburse, responding agencies shall be responsible for all costs associated with the equipment and personnel under their control.

Section XI. Term, Modification, Termination and Review.

1. Term. This agreement shall be in effect until it is replaced or discontinued following the provisions contained in this section and commences when this agreement has been approved by all signatory parties.

2. Modification. No changes or modification to this agreement shall be valid or binding upon parties to this agreement unless such changes or modification are in writing and executed by the parties.

3. Termination. This agreement may be terminated as to any single party, when that party gives notice to all the other participating parties in writing at least ninety (90) days prior to its intended withdrawal from this agreement.

4. Review. This agreement shall be reviewed and updated as needed annually, by the Mutual Aid Coordinator.

Contra Costa Law Enforcement County Protocols

Police Service Dogs

Revised July 2013
Contra Costa Law Enforcement County Protocols

Police Service Dogs

Purpose:

To establish guidelines for requesting the assistance of a Police Service Dog from an allied Law Enforcement Agency and to establish a standard operating procedure for agencies to adhere to after the deployment and use of a Police Service Dog.

Policy:

Each Law Enforcement Agency in Contra Costa County has policies and procedures which govern the behavior of their individual employees. Nothing in this protocol should be interpreted to supersede those individual agency policies. Rather, this protocol should be viewed as a policy on how agencies will perform their duties when requesting, or responding to the request of, an allied agency for the use of a Police Service Dog and the responsibilities assumed after a Police Service Dog is deployed.

1. Any deployment of a Police Service Dog will conform to the policies and procedures which govern the actions of the agency having control of the Police Service Dog.

2. When deciding to deploy the Police Service Dog, consideration should be given to the age of the offender. Except in circumstances of great bodily injury, or extreme danger to Officers and/or citizens, Police Service Dogs should not typically be used when the offender is known to be under 14 years of age.

3. Police Service Dogs may be used during riot and crowd control events when they are preplanned and rules of engagement are clearly defined.

4. During non-planned crowd control events, Police Service Dogs will only be deployed on an outside assist basis when the following applies:
   a. A supervisor from the Police Service Dog agency is on scene.
   b. There is clear threat to the safety of officers or innocent bystanders.
   c. The deployment of the Police Service Dog would otherwise meet the threshold of deployment for the agency owning the Dog.
   d. The Police Service Dogs agency does not have a policy prohibiting their use in crowd control events.

Requests for Assistance:

Police Service Dogs will be requested from allied agencies through the standard communication process, typically each agencies dispatch centers. At the time of the request, the requesting agency will provide the facts and circumstances surrounding the incident they are working. The request will be reviewed by the supervisor and Police Service Dog handler to assure the use will meet the requirements of their agency.
Upon arrival, the Police Service Dog handler will meet with the Officer in charge to receive a detailed briefing. The Police Service Dog handler will again confirm the requested use falls within his/her departmental policy.

After his/her assessment, the Police Service Dog handler will advise the officer in charge of his/her planned response. The handler shall maintain the authority to stop any search or deployment at anytime during the incident.

Documentation:

Both the requesting agency and the responding agency will produce written police reports in the event the Police Service Dog is responsible for the apprehension of the suspect. The reports shall minimally include the reason for the request, actions taken when the Police Service Dog was on scene, injuries sustained (if any) resulting from the Police Service Dogs use, and all efforts to provide aide to injured parties after injuries sustained. Photos of all injuries sustained will be taken and supplied to the involved agencies.

Care and Custody:

In cases where a Police Service Dog is used to assist in an apprehension, it shall be the responsibility of the requesting agency to take custody of the arrestee and provide/arrange for any necessary medical care.

SART PROTOCOL DOCUMENT

DEVELOPMENT OF PROTOCOL

The Contra Costa County Executive SART Task Force Members will have the ultimate responsibility for developing, approving and implementing the protocol.

Upon approval, a representative from each member agency of the Sexual Assault Response Team shall sign the Protocol Document.

The SART Protocol Document shall be made available to members of the SART Task Force, Law Enforcement Agencies, the Sexual Assault Nurse Examiner (SANE), Sexual Assault Forensic Examiner (SAFE) team, Community Violence Solutions (CVS) Staff and Volunteer Counselors, and to any participating agency at their request. Each member of the SART Executive Task Force will keep a copy of the protocol document.

The SART Executive Task Force will conduct an annual review of the protocol document. This shall be accomplished in order to determine the needs for revision. After this review is completed, a recommendation will be presented to the entire Task Force. The Protocol Document will be reviewed annually during the month of October.

Current protocols shall remain in effect until canceled or superseded. Newly adopted protocols shall be noted as such, noting also the date of adoption.
Contra Costa County Sexual Assault Response Team Protocol
for Sexual Assault Cases

STATEMENT OF PURPOSE

The mission of the Sexual Assault Response Team (SART) is to coordinate and implement services to victims of sexual assault.

SART is an innovative concept that allows for enhanced sensitivity to sexual assault victims’ needs, rapid medical response, more enhanced enforcement interviews and greater prosecution ability. SART is a countywide program coordinated by Contra Costa County Executive SART Task Force, Community Violence Solutions (CVS), Contra Costa County District Attorney’s Office (DA), Local Law Enforcement Agencies, Contra Costa County Department of Health Services (CFS), Contra Costa Regional Medical Center (CCRMC), Contra Costa County Crime Lab. Services offered through SART include medical evidentiary collection and examination, forensic interviews, emotional support, advocacy, court accompaniment, counseling, information and referrals, follow-up, expert witness testimony and other support services for the victim and the family. The medical evidentiary examination is provided by Sexual Assault Nurse Examiners (SANE) and/or Sexual Assault Forensic Examiners (SAFE) who are employed by the County Health Services Department and have attended and completed training sexual assault examiner training.

Many professionals may feel unclear as to what their role is in cases of sexual assault and/or have questions about the best way to proceed. We have attempted to establish protocols for all members of the SART. The protocol is intended to be used by all involved agencies as a guideline for handling sexual assault cases. It is designed to clarify the roles and responsibilities of respective agencies, procedures to be followed, and make all of us more aware of the issues that need to be considered in sexual assault cases.

This protocol can contribute to positive change on behalf of victims of sexual assault only to the extent it is issued and implemented.
PHILOSOPHY OF INTERVENTION

Intervention in sexual assault cases should be for the purpose of accomplishing the following goals:

- Protecting the victim from further assault
- Minimizing the effects of the assault on the victim and encouraging the healing process
- Arresting and prosecuting the offender
- Providing for the needs of the victim and their family through counseling, advocacy, support and accompaniment
- A sensitive, yet comprehensive medical exam and Forensic exam.
- Medical follow-up referral

While it is necessary to pursue the prosecution of the offender, it is important that the foremost concern of intervention in sexual assault cases remain the assistance and protection of the victim. Prosecution is an integral part of the intervention process. However, it is important not to lose sight of the needs of the victim throughout the process from the time the incident is reported to the time of adjudication and even following the completion of the court process.

Immediately upon receipt of a referral falling within this protocol, a support system should be put into place for the victim of sexual assault. The system should continue to operate until such time as the victim no longer needs the services. While each case is different, there are some special needs to be considered in each case:

1. We must believe victims when they state they have been sexually assaulted.

2. The victim needs to feel safe from further assault.

3. The victim needs a support system that is always available to him/her. This support system may include Child & Family Services (CFS), Law Enforcement, a CVS Victim Advocate, District Attorney, a therapist, and/or medical treatment.

4. The victim needs to feel that THEY ARE NOT TO BLAME and the offender is the wrongdoer and is to blame. If possible, the offender will be prosecuted.

5. Victims need coordination of services among agencies working on their cases.

6. The needs of the victim's family must be considered throughout the process.
BASIC PROCEDURES FOR SEXUAL ASSAULT CASES

It is understood that not all cases fall neatly within a specific category or classification. But, as a general guideline the following categories are created:

CHILD VICTIM - Under 12 years of age

1. The initial verbal report is made to a Law Enforcement and if appropriate then Child & Family Services at (925) 646-1680 (Hotline: (925) 427-8811 East, (510) 374-3324 West). In addition, reports need to be filed for all cases of in-home abuse for victims under the age of 18 years old. A written report of suspected child abuse is required within 36 hours – See Appendix A - CFS Reporting form – (Suspected Child Abuse Report).

2. Agency receiving the initial report will cross report to each other (i.e. Law Enforcement will notify CFS and vice versa).

3. If there is a question over jurisdiction, contact each law enforcement agency in question and allow them to determine appropriate jurisdiction.

4. Law Enforcement or CFS will perform the initial intake interview. Referral to the Children’s Interview Center (CIC) for a forensic interview is at the Police Department’s discretion, though encouraged.

5. Law Enforcement or CFS can then contact Community Violence Solutions Crisis Line at 1-800-670-7273 for a CVS Counselor to offer additional emotional support and advocacy for the entire family.

6. If a victim presents to Kaiser Permanente or other medical facility in Contra Costa County, the victim will have a medical screening exam and, if necessary, treated for emergent medical needs. The medical facility notifies Law Enforcement in the city in which the sexual assault occurred. Then request to authorize evidentiary exam if less than 120 hours. Once Law Enforcement has authorized the exam, the medical facility is to obtain a case number and call to notify CCRMC ED of a patient referral for a sexual assault forensic exam. The hospital where the victim presents or law enforcement will assist with arrangements for the victim to be transported to CCRMC ED.

7. If the assault occurred within 120 hours of report (Acute), Law Enforcement will take the victim to Contra Costa Regional Medical Center Emergency Department for medical care and sexual assault evidentiary examination. Call CCRMC Emergency Department Charge Nurse 925-370-5975 and notify the ED of your arrival. If the requesting personnel is experiencing any difficulty with this process, or needs advice about how to proceed, they should ask to speak to the physician in charge at the Emergency Department. A call to CVS advocate Counselor will provide initial crisis response. Law Enforcement will sign/or phone authorize on the CalEMA 2-930 form (Appendix B) to approve the medical evidentiary exam. Referring hospitals (after medical screening exam) will discharge the patient and then refer patient for evidentiary examination. The referring hospital must have the CFS reporting form (Suspected Child Abuse Report) completed by their physician and faxed to 925-370-5266 to CCRMC ED.
7. **If the assault did not occur within 120 hours of report**, Law Enforcement will make the decision of whether or not to proceed with the forensic medical examination. (If unsure call CCRMC ED Charge Nurse 925-370-5975 or Pediatrician on call 925-346-4733 for consultation) In the case of chronic sexual abuse or non-acute cases of sexual assault, LE (or CFS) should contact the Children’s Interview Center (925-646-2305) to arrange for forensic interview and possible non-acute medical examination in the CIC Medical Suite. See appendix for Procedures for CIC Medical Exam referrals.

8. Upon completion of acute exam, Law Enforcement if present receives the evidence from the SANE/SAFE or Law Enforcement will be called to pick up the evidence. Both the officer and examiner/or ED charge nurse will sign off on evidence collected noting the chain of custody. Once the call is received by the law enforcement agency it is imperative the agency picks up the evidence urgently to preserve the evidence.

9. A CVS Counselor will make the victim and his or her family aware of the supporting agencies within the community.

10. Victims and/or their families will be referred to CVS for additional services and referrals for the services available in Contra Costa County, Children’s Interview Center, STAND! Against Domestic Violence, Victim Witness Assistance, Planned Parenthood, private physician, and/or other appropriate services).

11. Law Enforcement will coordinate with CFS as to whether removal from the home is needed, followed by placement.

12. Law Enforcement will make a determination regarding initial charges, custody, etc. of suspected offender.

13. If the case goes to trial the Sexual Assault Forensic Examiner (SAFE) will testify as a medical examiner when requested by the DA’s office.
ADULT (18+) & ADOLESCENT VICTIMS (12-17AGE) –

1. Law Enforcement receives the initial verbal compliant from victim or the victim arrives to a medical facility.

2. Law Enforcement will immediately notify Community Violence Solutions 24-hour Crisis Line for a CVS Counselor, 1-800-670-7273, once a sexual assault victim presents.

3. If the victim is under the age of 18, and the abuse occurred within the home, an initial report must be made by the Law Enforcement Officer to Child & Family Services. A written report of suspected child abuse must be filed within 36 hours.

4. Law Enforcement makes the decision to authorize a forensic examination and signs/phone authorizes the CalEMA form (appendix B). Once CCRMC has been notified the victim is in route; CCRMC then contacts the on-call SANE/SAFE, and contacts CVS if not already called by Law Enforcement.

5. A SANE/SAFE (must have ID badge) should respond to the hospital within 60 minutes of the call. It is Contra Costa Regional Medical Center’s responsibility to call the SANE/SAFE following ED protocol for contact.

6. Law Enforcement if present should consult with the SANE/SAFE in regards to the case.

7. If a victim presents to Kaiser Permanente or other medical facility in Contra Costa County, the victim will have a medical screening exam and, if necessary, treated for emergent medical needs. The medical facility notifies Law Enforcement in the city in which the sexual assault occurred and informs if victim incident less than 168 hrs (5 days), then request to authorize evidentiary exam with victim consent. Once Law Enforcement has authorized the exam, the medical facility is to obtain a case number and call to notify CCRMC ED of a patient referral for a sexual assault forensic exam. The hospital where the victim presents or law enforcement will assist with arrangements for the victim to be transported to CCRMC ED.

8. CVS Crisis Intervention Counselor will respond to hospital within 60 minutes of the call from CCRMC or Law Enforcement. The CVS Crisis Intervention Counselor (must have ID badge) will identify herself to the Emergency Department, Law Enforcement and to the victim in the SART waiting room. The CVS Counselor is present to advocate for the victim, provide emotional support and information to the victim and family, and provide appropriate referrals.

9. Interviews may be done in the SART exam room. Delay of bring the victim to the hospital should be avoided.

10. Victims have a right to a support person of their choosing and a CVS Counselor present during the interview and exam, as pursuant to Penal Code 679.04 - See Appendix C.

11. A SANE/SAFE will perform the forensic medical examination, with the appropriate consent of the patient.
12. Upon completion of exam, Law Enforcement if present receives the evidence from the SANE/SAFE or Law enforcement is called to pick up the evidence. Both the officer and examiner/or ED charge nurse will sign off on evidence collected noting the chain of custody. Once the call is received by the law enforcement agency it is imperative the agency picks up the evidence urgently to preserve the evidence.

13. Victims 12 years old and older have a legal right to refuse any or all parts of the forensic exam or to stop the exam at any time.

14. CVS Crisis Intervention Counselor will provide crisis intervention, counseling, emotional support, information and referral, and follow-up.
ROLE OF LAW ENFORCEMENT

1. Once it has been determined that a sexual assault has occurred, assess the victim’s immediate safety needs. Then provide for injuries that require immediate medical attention.

2. If victim is in need of immediate medical care, transport to nearest medical facility and call CVS Crisis Line (1-800-670-7273) for the on-call CVS Counselor to respond. As soon as immediate medical needs are met the medical facility will notify Contra Costa Regional Medical Center (CCRMC) that a sexual assault victim is being discharged and referred for an evidentiary exam. (In extreme medical situations, the medical evidentiary exam may need to be performed at the hospital where the initial medical response occurred, page SART (925) 346-4456 or (925) 346-4079 for authorization to respond to other facilities within Contra Costa County).

3. Once the victim has a completed medical screening exam, and is stable for transport and discharged, transport to CCRMC Emergency Department. The victim will be screened by an Emergency Department Nurse, and then taken to the SART room. See Appendix D for directions.

4. Contra Costa Regional Medical Center Emergency Department will contact a SANE/SAFE to perform the medical evidentiary exam once authorized by Law Enforcement. The authorization for a medical evidentiary exam may be initiated by the physical presence of an officer, or by phone authorization for a medical evidentiary examination. The phone authorization may reduce the wait time for a SANE/SAFE to respond to the hospital.

5. Explain briefly to the victim the investigative steps that must be taken to properly and effectively investigate the case; i.e., collection of evidence by medical personnel, postponement of bathing, eating, drinking and brushing teeth in order to preserve all evidence, collection of soiled clothing, etc.

6. If victim has changed clothes, secure all items of clothing that victim was wearing at the time of attack. All clothing items are to be individually packaged in paper bags. Wet items are to be air dried as soon as possible and packaged in paper bags.

7. Advise the victim that she/he has the right to a certified Sexual Assault Crisis Intervention Counselor (CVS) and a support person during the investigation and medical examination. Officer can limit support person’s involvement, as per penal code 679.04. This does not pertain to the CVS Victim Advocate. See Appendix C.

8. The officer will set the evidentiary exam in motion by phone authorization or by signing the CalEMA Form authorizing the medical evidentiary exam. If the victim is in need of immediate emergency medical care, they will then be treated as any other medical emergency.

9. Assure that a CVS Victim Advocate has been contacted (1-800-670-7273) as pursuant to Penal Code 679.04 - See Appendix C. Law Enforcement is required by law to inform the victim of their right to accompaniment in each case of sexual assault.
10. Work jointly with CVS and CFS (when appropriate) by cross-referring all cases of sexual assault.

11. Prior to the start of the exam, meet briefly with the SANE/SAFE to provide information, this may assist the SANE/SAFE in focusing the exam and interview process.

12. **Law Enforcement is to notify CCRMC Emergency Department if suspect will be sent to CCRMC ED for medical clearance for custody process.**

13. Law Enforcement or assigned officer is responsible for complete investigative interview with the victim (it is suggested this occur with the SANE/SAFE so repeated interviews can be avoided). The officer will participate in the history-taking portion of the exam. Once the investigative interview is complete the officer can return to duty while waiting for the physical evidence to be collected by the SANE/SAFE. The officer will be contacted to pick up evidence or can remain till end of exam to pick up evidence. (The SANE/SAFE and CVS Counselor will remain in the examination room with the victim).

14. Upon conclusion of the exam, the SANE/SAFE will communicate with the officer to obtain any additional information critical to the investigation. It is imperative that constant communication flows between the officer and the SANE/SAFE.

15. Upon completion of exam, Law Enforcement if present receives the evidence from the SANE/SAFE or Law enforcement is called to pick up the evidence. Both the officer and examiner/or ED charge nurse will sign off on CALEMA form following the chain of custody. Once the call is received by the law enforcement agency it is imperative the agency picks up the evidence urgently to preserve the evidence.

16. Law Enforcement writes all reports required by his/her agency.

17. Law Enforcement obtains all required medical information releases from the victim.

18. Arrest and custody of the suspect.

19. Provide all reports for criminal justice processes.

20. Ensure that the victim and his/her family are kept informed in a sensitive manner throughout the investigation.

21. **Law Enforcement is to ensure that all victims have a safe place in which to go after the examination/or after sexual assault. Provide transportation if needed.**

22. **Law Enforcement is to follow all child abuse reporting procedures when applicable.**

23. **Law Enforcement should have the victim and or family bring clothing to change into if clothing will be collected. (A CVS Counselor should have an extra set of clothing for the victim if needed).**

24. **If applicable/requested, Emergency Department should notify the clergy services of the hospital.**
25. Assist CVS Counselor and CFS in following the case through the criminal justice system when appropriate.

26. A representative from each Law Enforcement Agency (if appointed by their department) shall attend quarterly SART Task Force meetings.

27. A representative from the Police Chief’s will attend the Executive SART Task Force meetings.
ROLE OF CONTRA COSTA COUNTY CRIME LAB

1. Assist with training SANE/SAFE and other medical personnel as required in the proper collection and preservation of forensic evidence.

2. Provide sexual assault kits to Contra Costa Regional Medical Center.

3. Examine, analyze and interpret findings of forensic evidence collected by SANE/SAFE.

4. Provide quality assurance of evidence collection and documentation process by providing comments to SANE/SAFE.

5. Inform and update SANE/SAFE and collaborative members regarding new policies, procedures and protocols regarding evidence collection.

6. Crime Lab personnel will be available for 24 hour consultation to the SANE/SAFE. Call Sheriff’s dispatch (925) 646-2441 after hours.

7. Testify in court regarding findings in SART cases.

8. Participate in SART Executive task force meetings and quarterly task force meetings.
ROLE OF CHILD & FAMILY SERVICES

1. Receive reports of suspected child abuse.

2. Cross-report all cases of suspected child abuse to Law Enforcement.

3. Work jointly with Law Enforcement in investigation of suspected abuse. Follow the protocol as established by the Children’s Interview Center.

4. Help in the coordination of the initial intake with CVS appropriate referral for follow-up.

5. If appropriate, contact CVS in order to provide crisis intervention services, emotional support, information and referral, advocacy, and accompaniment from the time of report through the court process for the victim and his/her family.

6. Contact family, if not already involved.

7. Assess whether child is in jeopardy by remaining in his/her home.

8. Determine appropriate action, along with Law Enforcement, in regard to an interview, medical exam and whether child must be removed from home.
ROLE OF CCRMC/ED PRIMARY NURSE

1. Contact a CVS Counselor if not already contacted by Law Enforcement. (Performance of the exam is completed with a CVS Counselor in the examination room, unless otherwise stated by the patient).

2. Report all cases of suspected or acknowledged child sexual assault to CFS and/or Law Enforcement.

3. Patients must be given the following information:
   - The patient has the right to refuse collection of evidence.
   - The local government pays for the cost of the forensic medical examination once authorized by local police. (California Penal Code Section 13823.95.)
   - The patient can obtain prophylactic treatment for some sexually transmitted diseases and prevention of pregnancy without charge.
   - Consent for evidence collection may be withdrawn at any time.
   - The patient has the right to refuse collection of reference specimens, such as head and pubic hair, blood and/or buccal swabs.
   - Failure to collect reference samples will prevent the crime lab from conducting a comparative analysis of the evidence in question.
   - Physical evidence deteriorates rapidly, and must be collected as soon as possible or not at all.

3. The SANE/SAFE will have the victim or the victim’s agent sign the proper consent forms/CalEMA. Confirm proper Law Enforcement authorization in accordance with the state and local policies, CalEMA Form 2-923, 2-924, 2-930 for adults/adolescents and CalEMA Form 2-925 for children.

4. Provides professional nursing care that assesses, plans, implements, and evaluates needs in order to restore and promote the bio/psycho/social health of the survivor of sexual assault/abuse and to collect, preserve and document forensic evidence.

5. Primary ED nurse assures emergent medical treatment and provides information/referral on discharge for follow-up on assault related health care concerns that are not included as part of the evidentiary exam.

6. Provide written follow-up medical procedure to the sexual assault victim. Make sure the CVS Counselor knows the medical follow-up needs of the victim so that support, accompaniment and advocacy can be provided.
ROLE OF: SEXUAL ASSAULT NURSE EXAMINERS (SANE)
SEXUAL ASSAULT FORENSIC EXAMINERS (SAFE)

Provides the sexual assault victim with a medical evidentiary exam according to the following:

1. Respond to CCRMC SART room within 60 minutes of call from CCRMC ensures that the SART room is prepared prior to exam. SANE/SAFE nurse must have ID badge.

2. Comply with minimum CalEMA SART training requirements to perform medical evidentiary exams.

3. Confirm proper Law Enforcement authorization in accordance with the state and local policies, CalEMA Forms (appendix B)

4. Ascertain that the victim or the victim’s agent has signed proper consent forms.
   
   - Patients must be given the following information:
   - The patient has the right to refuse collection of evidence.
   - The local government pays for the cost of the forensic medical examination once authorized by local police. (California Penal Code Section 13823.95.)
   - The patient can obtain prophylactic treatment for some sexually transmitted diseases and pregnancy without charge.
   - Consent for evidence collection may be withdrawn at any time.
   - The patient has the right to refuse collection of reference specimens, such as head and pubic hair, blood and/or buccal swabs.
   - Failure to collect reference samples will prevent the crime lab from conducting a comparative analysis of the evidence in question.
   - Physical evidence deteriorates rapidly, and must be collected as soon as possible or not at all.

5. Comply with evidence collection forms CalEMA 2-923, 2-924, 2-925, 2-930 – See Appendix B.

6. Properly document findings, using CalEMA Form 2-923, 2-924, 2-925 and 2-930 accordingly.

7. Obtain pictures as indicated by procedure, label and store following chain of custody procedures set for CCRMC digital imaging / film image processing.

8. Provide expert witness as needed.

9. Refer to CVS for support services.

10. Use the designated SART exam room at CCRMC for the sexual assault exams. Each SANE/SAFE should ensure that the cart is restocked with the equipment needed for the next case. Each SANE/SAFE should also complete necessary paperwork, and make an entry in the logbook furnished in the SART room.
11. Act as liaison between the criminal justice system and the health care system. This entails conferring with Law Enforcement prior to and following the exam in order to ascertain any additional information critical to the investigation. It is imperative that constant communication flows between Law Enforcement and the Nurse Examiner.

12. Upon completion of the exam, turn over the forensic evidence kit to Law Enforcement (or ED charge nurse if Law Enforcement not present) noting the chain of custody. The officer and the SANE/SAFE/ED charge nurse will sign off on evidence collected.

13. Consults with primary ED Physician and nurse whom coordinate the actions of others in response to the health needs of the client and the client's family.

14. Contact Contra Costa Regional Medical Center Housekeeping to clean SART room.

15. Attend SANE staff meetings and educational offerings, as well as quarterly case review meetings.

16. Attend and participate in SANE/SAFE/Advocate meetings, SART Task Force, Quarterly system review.
ROLE OF THE CVS - CRISIS INTERVENTION COUNSELOR

Community Violence Solutions advocates provides continuity of care from the first contact with the survivor to case closure by the following:

1. Respond to Contra Costa Regional Medical Center Emergency Department within 60 minutes of call from CCRMC. (See Appendix C for applicable Penal Code requirements)

2. Comply with the CalEMA training requirements to receive and continue certification as a Crisis Intervention Counselor.

3. Once at the hospital, with name badge on, identify self to Emergency Department charge nurse, Law Enforcement, SANE/SAFE and the victim.

4. Provide support and information (follow current HIPPA guidelines) to the victim and/or victim’s significant other(s) throughout the entire process. Explain the SART services the victim is about to receive and the process that he/she will most likely experience (if not already done by primary ED nurse). If the patient refuses an advocate, the CVS Counselor must obtain a signed “Counselor Waiver Form” (as required by CVS funders) – See Appendix E (revised 3/03) In addition, provide victims with the following information:

   • The patient has the right to refuse collection of evidence.
   • The local government pays for the cost of the forensic medical examination once authorized by local police. (California Penal Code Section 13823.95.)
   • The patient can obtain testing for pregnancy and prophylactic treatment for some STDs without charge.
   • Consent for evidence collection may be withdrawn at any time.
   • The patient has the right to refuse collection of reference specimens, such as head and pubic hair, blood and/or buccal swabs.
   • Failure to collect reference samples will prevent the crime lab from conducting a comparative analysis of the evidence in question.
   • Physical evidence deteriorates rapidly, and must be collected as soon as possible or not at all.

5. During the interview & evidence collection procedures the CVS Counselor must minimize conversation with victim to allow SANE/SAFE to conduct a thorough evidentiary examination. CVS Counselor should coordinate patient medical concerns to the primary ED RN.

5. Provide a change of clothing for the victim if needed.

6. Advocate for the victim’s rights when appropriate, with Law Enforcement, hospital staff, and/or significant others.

7. Attend to the needs of the victim.
8. If present, provide support to the victim during the police interview unless he/she prefers the CVS Counselor leave the room.

9. Stay with the victim throughout the exam, unless he/she prefer the CVS Counselor leave the room.

10. Explain options to those victims who may question or refuse the evidentiary exam. If the victim refuses exam, have the victim sign CVS Waiver Form.

11. CVS Counselor must NOT handle evidence or attempt to assist in the medical exam, interview questions or the labeling of evidence. CVS Counselors also must NOT be used as language interpreters due to confidentiality requirements and availability of on-going support to the victim.

12. Assist victim in making arrangements for transportation, housing and safety and assess if they have a personal support system available to them.

13. CVS Counselors are expected to stay with the victim until the SART exam is completed, follow-up instructions are given, and the victim has all CVS information: CVS card, 24 hour crisis line number, Victim Witness information, Medical Discharge Instruction Sheet, etc. Works with Law Enforcement to reasonable provide transportation to his/her destination of their choice. CVS Counselors are prohibited from driving any victims. If transportation is unavailable the police officer is called for transport.

14. Follow-up with victim within 72 hours of initial contact (hospital out-call).

In addition, rape crisis staff, as employees of Community Violence Solutions, is responsible for the following:

1. Provide case management follow-up for victims as needed, preferably, once a week for one month, then monthly for a minimum of 6 months. Provide crisis intervention services and accompaniment as needed.

2. Provide information and referral to community resources for the victim (such as CVS Crisis Line and in-person counseling services, STAND! Against Domestic Violence, Planned Parenthood, Victim Witness, CVS Counseling Center, personal physician, and other appropriate services).

3. Be a support person throughout the criminal justice process.

4. Community Violence Solutions coordinates Task Force and System Review meetings, record and submit meeting minutes, monitor implementation and operational issues and report to Executive SART Task Force members to update and change protocols.

5. Conduct training about the SART Program for Contra Costa County law enforcement agencies, medical centers, public organizations, and other groups.
SART System Review Guidelines

Mission Statement

The purpose of the Contra Costa County SART Systems Review is to insure coordination in responding to sexual assault and to secure consistent services for victims. The cases that will be reviewed at the SART Systems Review will be acute sexual assault cases where the victim is ages 14 and older. By bringing various community systems that interact with sexual assault victims together for ongoing dialogue, develop and maintain a more coordinated response to sexual violence. We are committed to meeting the diverse needs of all SART Task Force members. The Systems Review Committee exemplifies how cooperation and collaboration can enhance outcomes of multi-disciplinary programs.

The Committee is comprised of representatives from Community Violence Solutions, The Contra Costa County District Attorney’s Office, Law Enforcement Agencies, Contra Costa Regional Medical Center General Hospital, Contra Costa Crime Lab and Contra Costa Victim Witness.

System Review Goals

The SART Systems Review Committee will:

- Implement policies and procedures related to the SART program in Contra Costa County. Enhance communication between systems and clarify policies and procedures

- Address issues which lead to re-victimization, barriers to services and a reluctance to report

- Evaluate the strengths and weakness of the SART program and present outcomes to the Contra Costa SART Task Force at quarterly meetings

- Collect basic demographic victim information

- Utilize the SART System Review Checklist as a tool to discuss the systems, track the SART facility, forensic examination process, law enforcement, advocate agency participation and judicial outcomes

- Continue to educate ourselves and the community through multi-disciplinary trainings and adhering to current standards of professional practice

- Provide non-judgmental and honest interaction with victims and open respectful communication with other professionals

- Address any issues that impact a quality systems response within a timely manner with appropriate parties involved

- Listen/attend to one another’s concerns and opinions and offer support through community education and resources

- Adhere to Confidentiality Policy (Members of the SART Task Force will adhere to the Confidentiality Policy by signing in on the SART Systems Review “Sign-in Sheet” at each meeting)
SART System Review Confidentiality Policy

1. Each agency shall take responsibility to identify and resolve any conflicts of interest or other ethical issues that may affect the agency’s participation in any given case. All committee members shall assist members of the collaboration in becoming aware of conflicts of interest issues that may arise.

2. Members of the committee agree that otherwise confidential or sensitive information shared for the purpose of helping victims is not to be used for the purpose of prosecution or punishment of these persons.

3. Members shall avoid citing sources of information disclosed at meetings that could jeopardize the relationship that any member or community agency might have with a client.

4. Members are responsible for the appropriate management and disposition of any meeting notes, consistent with their agency’s guidelines, professional codes of conduct and this confidentiality policy.

5. All members can be expected to comply with fiduciary or professional duties, if any, required of their relationship to client under discussion. Where, in the judgment of a member, he/she cannot participate in a collaborative discussion without compromising a legal, ethical, moral or professional standard, member/agency should not participate in discussions concerning that client.

6. Where confidential or privileged information about a client is likely to be discussed, persons or agencies with conflicts of interest against the client should excuse and remove him/her from the discussion room or site of communication.

7. Committee members shall not seek or acquire otherwise confidential or privileged information for purposes that would adversely affect the client under discussion.
ROLE OF CONTRA COSTA COUNTY DISTRICT ATTORNEY'S OFFICE - VICTIM / WITNESS UNIT.

1. Make contact with the victim as soon as possible after receiving the case information, and no later than 48 hours after receiving copies of cases filed by the District Attorney. Contact is made to offer and provide crisis intervention, support services and court accompaniment for victim and family. Victim Witness Unit will act as a liaison within the criminal justice system for the victim and family.

2. Work closely with CVS Counselor towards providing and coordinating referrals and needed services. Make referrals to CVS for court advocacy for victims who go to court, utilizing the CVS Confidential Referral form as set out in the Operational Agreement between the District Attorney and CVS.

3. Assist with filing of Victims of Violent Crimes Claims Forms/State Board of Control for reimbursement of medical, mental health and other eligible losses resulting from the crime. Also assist with the filing of Victim Compensation Program applications for medical, mental health and other eligible losses resulting from the crime.

4. Provide victims with case disposition and assist with the implementation of rights to be notified on cases where the defendants are sent to jail and/or prison.

5. Send a representative to participate in SART Executive task force meetings and quarterly task force meetings.
ROLE OF THE CONTRA COSTA COUNTY DEPARTMENT OF HEALTH SERVICES

The Division of Health Services, in the Department of Health and Human Services, will coordinate the medical response component of the Sexual Assault Response Team at Contra Costa Regional Medical Center.

A. Department of Employment and Human Services will:

1. Coordinate training and Certification of Sexual Assault Nurse Examiners.

2. Oversee credentialing and hiring process for medical personnel & training

2. Establish and maintain an appropriate billing system for sexual assault examinations, supervising all billing and collection activities.

3. Coordinate with the Community Violence Solutions, Law Enforcement, the hospitals and the District Attorney to address ongoing operational and quality assurance activities related to medical personnel and their role with SART.

B. Role of Contra Costa Regional Medical Center

Contra Costa Regional Medical Center (CCRMC) will provide the facilities needed for the medical response of the Sexual Assault Response Team as follows:

1. Provide an examination room and a secure site for the collection of evidence.

2. Maintain and service all SART equipment as needed. This includes but is not limited to the photography equipment, the microscope, supplies, locked cabinetry, furnishings, evidence, and paperwork.

3. Keep the SART rooms stocked and organized.

4. Follow all basic procedures for sexual assault victims as outlined in protocol document.

5. Provide sexual assault forensic examination in the Emergency Department if a SANE/SAFE is not available.

6. Provide emergency medical care for the sexual abuse victims.

7. Provide ED physician for consultation with a SANE/SAFE for victims.

9. Provide pediatrician/FP to work with SANE/SAFE when Victim under 12 year of age.

10. Agree to not bill SART victims or their insurance companies for SART exams.
C. Role of Contra Costa Regional Medical Center Emergency Department Nurse Program Manager/SART Coordinator will:

1. Oversee SANE/SAFE training program.

2. Coordinate examiners schedules, assure appropriate coverage, generate and distribute schedules and assure contact mechanism for on-call examiners.

3. Establish continuing quality assurance process of SART exams through chart and case review and proctoring.

4. Coordinate with other collaborative partners to address operational issues.

5. Assist with joint training with other collaborative partners on medical and forensic issues related to SART.

6. Participate in SART Executive task force meetings and quarterly task force meetings and Case Review meetings.

7. Provide support for both the on-call SANE/SAFE and SART preceptors.

8. Coordinate monthly SANE/SAFE staff meetings, educational offerings and Quality Assurance meetings.

9. Coordinate the training of Sexual Assault Nurse Examiners by screening potential SART candidates, scheduling training facility and scheduling all trainees.

10. Follow up with all SANE/SAFE issues, concerns and complaints, in regards to SART, the Emergency Department, STAT, CVS, Crime Lab, Law Enforcement and the DA.

11. Coordinate the SART preceptor-ship for potential SANE/SAFE.

12. Write and update all SART protocols and procedures.

13. Coordinate; provide leadership for SART Executive Taskforce meetings.

14. Coordinate SART billing with STAT Nursing Registry.

15. Coordinate SART billing with police agencies.

16. Track all cases from hospital exam through judicial system.

17. Assure Sexual Assault Exam Kits (SAEK) are properly stocked at each SART room.

18. Provide implementation and assessment tools to satisfy on-going quality assurance of SANE/SAFE performance.
D. Role of the CCRMC Emergency Department Physician

1. Evaluate and treat patients for acute medical illnesses and injuries.
2. Check pregnancy status, risk of pregnancy, and treat with post coital prophylaxis, if appropriate.
3. Offer empiric treatment for STD’s, when appropriate.
4. Consider/offer post exposure HIV prophylaxis to sexual assault patients when appropriate.
5. Ensure that all components of evaluation have been completed including forensic examination and medical treatment.
6. Provide follow up recommendations to sexual assault victim.
7. Be available for consultation for SANE/SAFE nurses who are providing forensic examinations of sexual assault victims who are $>12$ years of age.

E. Role of Adult SART Medical Consultant

1. Update local hospitals annually regarding county SART protocols.
2. Update CCRMC ED physicians periodically regarding any SART protocol changes and coordinate in-service education as needed.
3. Provide continuing quality assurance of SART examinations through chart review of cases of patients $>12$ years of age.
4. Participate in SART Executive task force meetings and case review.
5. Provide consultation to CCRMC Emergency Department physicians regarding sexual assault cases.

F. Role of the Pediatric Hospitalist

1. Participate in pediatric ($<12$ yr) forensic examinations with SANE/SAFE and ED physician. Pediatrician on call can be reached by paging at 925-346-4733 (4PED).
2. Respond in a timely manner to patient following the arrival of the SANE/SAFE.
3. Participate in continuing education regarding child sexual assault, including completion of CCFMTC Ped’s/SAFE training.
4. Provide court testimony as needed in cases that are prosecuted.
5. Provide telephone consultation to LE, CFS, or healthcare providers regarding medical aspects of child sexual abuse if pediatric SART medical consultant is not available.
G. Role of the Pediatric SART Medical Consultant

1. Be available to provide or supervise forensic examinations for non-acute cases of sexual abuse of children under the age of 18 in the CIC – medical suite or, if necessary, in the CCRMC SART Room.

2. Assist with joint training with other collaborative partners on medical and forensic issues related to SART.

3. Provide continuing quality assurance process of SART exams through chart and case review and proctoring.

4. Provide in-service education regarding child sexual abuse to pediatric hospitalist, SANE/SAFE and residents.

5. Coordinate use of CIC- medical suite or the SART exam room and supplies with staff and the SANE/SAFE as needed.

6. Provide expert witness testimony for sexual assault cases as needed.

7. Participate in SART executive task force meetings and quarterly SART task force meetings.

8. Provide consultation regarding child sexual abuse to LE, CFS, DA, and healthcare providers.

9. Provide bimonthly SART updates to Pediatric Department.

### C. PATIENT INFORMATION

- I understand that hospitals and health care professionals are required by Penal Code Sections 11160-11161 to report to law enforcement authorities cases in which medical care is sought when injuries have been inflicted upon any person in violation of any state penal law. The report must state the name of the injured person, current whereabouts, and the type and extent of injuries.

  

  *Initiated by the patient*

- I have been informed that victims of crime are eligible to submit crime victim compensation claims to the State Victims of Crime (VOC) Restitution Fund for out-of-pocket medical expenses, psychological counseling, loss of wages, and job retraining and rehabilitation.

  

  *Initiated by the patient*

### D. PATIENT CONSENT

**Minors:** Family Code Section 6927 permits minors (12 to 17 years of age) to consent to medical examination, treatment, and evidence collection for sexual assault without parental consent. See instructions for parental notification requirements for minors.

- I understand that a forensic medical examination for evidence of sexual assault at public expense can, with my consent, be conducted by a health care professional to discover and preserve evidence of the assault. If conducted, the report of the examination and any evidence obtained will be released to law enforcement authorities. I understand that the examination may include the collection of reference specimens at the time of the examination or at a later date. I understand that I may withdraw consent at any time for any portion of the examination.

  

  *Initiated by the patient*

- I understand that collection of evidence may include photographing injuries and that these photographs may include the genital area.

  

  *Initiated by the patient*

- I hereby consent to a forensic medical examination for evidence of sexual assault.

  

  *Initiated by the patient*

- I understand that data without patient identity may be collected from this report for health and forensic purposes and provided to health authorities and other qualified persons with a valid educational or scientific interest for demographic and/or epidemiological studies.

  

  *Initiated by the patient*

## E. Patient History

1. Name of person providing history: [relationship to patient: [date: [time:]

2. Pertinent medical history:
   - Last menstrual period
   - Any recent (60 days) anal-genital injuries, surgeries, diagnostic procedures, or medical treatment that may affect the interpretation of current physical findings? □ No □ Yes
     If yes, describe:
   - Any other pertinent medical condition(s) that may affect the interpretation of current physical findings? □ No □ Yes
     If yes, describe:
   - Any pre-existing physical injuries? □ No □ Yes
     If yes, describe:

3. Pertinent pre- and post-assault related history:
   - Other intercourse within past ☐ days? □ No □ Yes □ Unsure
     If yes, anal (within past ☐ days)? □ Yes □ No
     vaginal (within past ☐ days)? □ Yes □ No
     oral (within past 24 hours)? □ Yes □ No
     If yes, did ejaculation occur? □ Yes □ No
     If yes, where? □ Yes □ No
     If yes, was a condom used? □ Yes □ No
     - Any voluntary alcohol use within 12 hours prior to assault? □ Yes □ No
     - Any voluntary drug use within 96 hours prior to assault? □ Yes □ No
     - Any voluntary drug or alcohol use between the time of the assault and the forensic exam? □ Yes □ No

   * If yes, collection of toxicology samples is recommended according to local policy. □ Blood □ Urine

4. Post-assault hygiene/activity: ☐ Not applicable if over 72 hours
   - Urinated □ Yes □ No
   - Defecated □ Yes □ No
   - Genital or body wipes □ Yes □ No
     If yes, describe: _____________________________
   - Douched □ Yes □ No
     If yes, with what? _____________________________
   - Removed/inserted tampon □ Yes □ No
     diaphragm □ Yes □ No
   - Oral gargle/rinse □ Yes □ No
   - Bath/shower/wash □ Yes □ No
   - Brushed teeth □ Yes □ No
   - Ate or drank □ Yes □ No
   - Changed clothing □ Yes □ No
     If yes, describe: _____________________________

5. Assault-related history:
   - Loss of memory? □ Yes □ No
     If yes, describe: _____________________________
   - Lapse of consciousness? □ Yes □ No
     If yes, describe: _____________________________
   - Vomited? □ Yes □ No
     If yes, describe: _____________________________
   - Non-genital injury, pain and/or bleeding? □ Yes □ No
     If yes, describe: _____________________________
   - Anal-genital injury, pain, and/or bleeding? □ Yes □ No
     If yes, describe: _____________________________

## F. Assault History

1. Date of assault(s): [time of assault(s):]

2. Pertinent physical surroundings of assault(s):

3. Alleged assailant(s) name(s): Age Gender Ethnicity Relationship to patient Known Unknown
   - #1: □ M □ F
   - #2: □ M □ F
   - #3: □ M □ F
   - #4: □ M □ F

4. Methods employed by assailant(s):
   - Weapons □ Yes □ No
     If yes, describe: _____________________________
   - Threatened? □ Yes □ No
     If yes, describe: _____________________________
   - Injuries inflicted? □ Yes □ No
     If yes, describe: _____________________________
   - Type(s) of weapons? □ Yes □ No
     If yes, describe: _____________________________
   - Physical blows □ Yes □ No
     If yes, describe: _____________________________
   - Grabbing/holding/pinching □ Yes □ No
   - Physical restraints □ Yes □ No
   - Choking/strangulation □ Yes □ No
   - Burns (thermal and/or chemical) □ Yes □ No
   - Threat(s) of harm □ Yes □ No
     If yes, describe: _____________________________
   - Target(s) of threat(s) □ Yes □ No
   - Other methods □ Yes □ No

   Involuntary ingestion of alcohol/drugs □ Yes □ No
     If yes, □ Alcohol □ Drugs
     □ Forced □ Coerced □ Suspected
     If yes, toxicology samples collected: □ Blood □ Urine □ None

5. Injuries inflicted upon the assailant(s) during assault? □ No □ Yes
   If yes, describe injuries, possible locations on the body, and how they were inflicted:

H. GENERAL PHYSICAL EXAMINATION

Record all findings using diagrams, legend, and a consecutive numbering system.

1. Blood Pressure  Pulse  Resp  Temp  2. Exam Started  Exam Completed
   Date  Time  Date  Time

3. Describe general physical appearance

4. Describe general demeanor

5. Describe condition of clothing upon arrival.

6. Collect outer and underclothing if indicated.

7. Conduct a physical examination.

8. Collect dried and moist secretions, stains, and foreign materials from the body. Scan the entire body with a Wood's Lamp.

9. Collect fingernail scrapings or cuttings according to local policy.

J. GENITAL EXAMINATION - FEMALES

Record all findings using diagrams, legend, and a consecutive numbering system.

1. Examine the inner thighs, external genitalia, and perineal area. Check the box(es) if there are assault related findings:
   - No Findings
   - Inner thighs
   - Perineum
   - Labia majora
   - Labia minora
   - Clitoris/surrounding area
   - Periurethral tissue/urethral meatus
   - Perithymenal tissue (vestibule)
   - Hymen
   - Fossa navicularis
   - Posterior fourchette

2. Collect dried and moist secretions, stains, and foreign materials.
   Scan the area with a Wood’s Lamp. Findings
   - No Findings

3. Collect pubic hair combing or brushing.
4. Collect pubic hair reference samples according to local policy.

5. Examine the vagina and cervix. Check the box(es) if there are assault related findings:
   - No Findings
   - Vagina
   - Cervix

6. Collect 4 swabs from the vaginal pool. Prepare one wet mount slide and one dry mount slide.

7. Collect 2 cervical swabs (if over 48 hours post assault).
8. Examine the buttocks, anus, and rectum (if indicated by history).
   - Yes
   - Not applicable
   Check the box(es) if there are assault related findings:
   - No Findings
   - Anal verge/folds/rugae
   - Perianal skin
   - Rectum

   - Findings
   - No Findings

10. Collect 2 anal and/or rectal swabs and prepare one dry mount slide.
11. Conduct an anoscopy exam if rectal injury is suspected or if there is any sign of rectal bleeding.
    Rectal bleeding
    - No
    - Yes
    If yes, describe:

12. Exam position used:
    - Supine
    - Other

### A. GENERAL INFORMATION

1. Name of Medical or Examination Facility
   - Contra Costa Regional Medical Center

### B. MANDATORY REPORTING RESPONSIBILITY

1. Jurisdiction (☐ City ☐ County ☐ Other) Patient refused to disclose ☐ or unable to disclose location of assault ☐

2. Telephone report made to law enforcement agency ☑ Yes ☐ No ☐ N/A
   - Name of Office: 
   - Agency: 
   - ID Number: 
   - Telephone: 
   - Reported by: 
     - Name: 
     - Date: 
     - Time: 

### C. INFORMED PATIENT CONSENT FOR ABBREVIATED ADULT/adolescent SEXUAL ASSAULT EXAMINATION

1. In accordance with the Violence Against Women Act of 2005, 42 U.S.C. § 3796gg-4(d), states and territories may not "require a victim of sexual assault to participate in the criminal justice system or cooperate with law enforcement in order to be provided with a forensic medical exam." Abbreviated Forensic Medical Exams provide individuals who have been reportedly sexually assaulted access to a Sexual Assault Forensic Medical Exam (SAFE) without engaging with law enforcement.

2. By delaying an interview and not engaging with law enforcement at this time, the following may occur:
   - An Abbreviated Sexual Assault Forensic Medical Exam collecting only perishable evidence will be performed.
   - Evidence that would normally be collected by law enforcement will be permanently lost.
   - Suspects and witnesses will not be interviewed, they may not be identifiable or located, or willing to cooperate at a later time.
   - It may be more difficult, if at all possible, for a prosecutor to file charges against a suspect.
   - I may or may not be eligible for California Victim Compensation Funds to pay for out-of-pocket expenses relating to this crime, including counseling, out-of-pocket medical expenses for medical evaluation and treatment, moving expenses and lost wages by not cooperating with law enforcement per State law.

3. If I decide instead to engage with law enforcement at this time, the benefits will include:
   - Law enforcement will have an opportunity to collect evidence from the crime scene(s), interview suspect(s) and witnesses in a timely fashion, and a complete Sexual Assault Forensic Examination will be performed.

4. I do not want to be interviewed at this time by law enforcement and request an Abbreviated Sexual Assault Forensic Medical Exam.

5. I understand that I will not be billed for this exam per Violence Against Women Act (VAWA) of 2005, 42 U.S.C. § 3796gg-4(d)

6. After a Sexual Assault Forensic Medical Exam is performed, law enforcement will transport the evidence collected to storage, and law enforcement will store this evidence for 2 years.

   All evidence collected during the Abbreviated Sexual Assault Forensic Medical Exam may be destroyed by law enforcement agencies after 2 years and a 60 day notice will be given to me pursuant to the Sexual Assault Victim Bill of Rights. Law enforcement will need, however, a current address on file. If requested in writing, I will be notified before the evidence kit is destroyed.

7. I understand that medication is available to decrease the risk of pregnancy and/or sexually transmitted diseases that may occur as a result of the sexual assault. The SAFE can provide you with a referral for this follow up medical care, if needed.

8. Material from the exam, including photographs, may be used without identifiers for education and scientific purpose.

I have read and understand all of the above and consent to an Abbreviated Sexual Assault Forensic Medical Exam.

Patient Identification

3. Age  DOB  Gender  Ethnicity  Date/Time patient arrived at facility  Date/Time patient discharged from facility

F. GENERAL PHYSICAL EXAMINATION

Record all findings using diagrams, legend, and a consecutive numbering system

3. Collect clothing that is nearest to genital structures.
4. Review patient questionnaire and conduct a physical examination for findings relevant to assault. Injuries? Yes  No
   Foreign Material? Yes  No
5. Collect samples per patient history and per Wood's Lamp®.
   Samples Collected? Yes  No
6. Collect fingernail scrapings or cuttings according to local policy.
7. Collect 2 swabs from the oral cavity up to 24 hours post assault, if indicated per history, or if history absent or incomplete.

2/14/2012
G. FEMALE GENITALIA
Record all findings using diagrams, legend, and a consecutive numbering system.

1. Examine the inner thighs, external genitalia, vestibule, vagina and perineal area. Check the box(es) if there are assault related findings.
   □ No Findings    □ Periurethral tissue/urethral meatus
   □ Inner thighs  □ Perineal tissue (vesitis)
   □ Perineum      □ Hymen
   □ Labia Majora  □ Fossa Navicularis
   □ Labia Minora  □ Posterior Fourchette
   □ Clitoris/surrounding area □ Cervix
   □ Vagina
2. Collect 4 swabs from the vagina pool.
3. Collect 2 cervical swabs.

H. MALE GENITALIA
Record all findings using diagrams, legend, and a consecutive numbering system.

1. Examine the inner thighs, external genitalia, and perineal area. Check the box(es) if there are assault related findings.
   □ No Findings □ Glans penis □ Scrotum
   □ Inner thighs □ Penile Shaft □ Testes
   □ Perineum    □ Urethral meatus
   □ Foreskin
2. Circumcised: □ No □ Yes
3. Collect 2 penile swabs, if indicated by assault history. □ N/A
4. Collect 2 scrotal swabs, if indicated by assault history. □ N/A
5. Collect dried and moist secretions, stains, and foreign materials.
   □ Findings □ No Findings

I. ANAL AND RECTAL EXAM
Record all findings using diagrams, legend, and a consecutive numbering system.

1. Examine the buttocks and external anus using traction.
   Check findings if relevant to assault:
   □ No Findings □ External anus/anal verge/folds/rugae
   □ Buttocks □ Rectum
   □ Perianal Skin
2. Collect 2 perianal swabs.
3. Conduct an anoscopy exam if rectal injury is suspected or if there is any sign of rectal bleeding. Collect 2 rectal swabs if anoscopy done.
   Rectal Bleeding: □ No □ Yes, describe:
   Rectal Injuries/Other: □ No □ Yes, describe:
4. Exam position used: □ Supine □ Other describe:

**C. CONSENT FOR EXAMINATION BY PATIENT/Parent/GUARDIAN**

Note: Parental consent is not required for a suspected child sexual abuse examination if the child is in protective custody. Family Code Section 6927 permits minors (12 to 17 years of age) to consent to medical examination, treatment, and evidence collection for sexual assault without parental consent. See instructions regarding parental notification requirements for minors.

- I hereby consent to a forensic medical examination for evidence of sexual abuse. I understand that collection of evidence may include photographing injuries and that these photographs may include the anal-genital area (private parts). I further understand that medical providers are required to notify child protective authorities of known or suspected child abuse; and, if child abuse is found or suspected, this form and any evidence obtained will be released to a child protective agency.
- I have been informed that victims of crime are eligible to submit crime victim compensation claims to the State Victims of Crime (VOC) Restitution Fund for out-of-pocket medical expenses, psychological counseling, loss of wages, and job retraining/rehabilitation.
- I understand that data without patient identity may be collected from this report for health and forensic purposes and provided to health authorities and other qualified persons with a valid educational or scientific interest for demographic and/or epidemiological studies.

   | Yes                                   |    |     |           |       |     |

   | Behavioral changes?                   |    |     |           |       |     |
   | No                                    |    |     |           |       |     |
   | Yes                                   |    |     |           |       |     |

*Collection of urine toxicology sample (<36 hours) is recommended according to local policy.

### G. MEDICAL HISTORY

1. Name of person providing history
2. Any recent (60 days) anal-genital injuries, surgeries, diagnostic procedures, or medical treatment that may affect the interpretation of physical findings?
   - No
   - Yes
3. Any other pertinent medical conditions that may affect the interpretation of physical findings?
   - No
   - Yes
4. Any pre-existing physical injuries?
   - No
   - Yes
5. Any previous history of physical abuse and/or neglect?
   - No
   - Yes
6. Any previous history of sexual abuse?
   - No
   - Yes
7. Other intercourse? (For adolescents only)
   - Yes
   - No
   If yes, anal (within past 5 days): When
   - Vaginal (within past 5 days): When

   If yes, did ejaculation occur? Where
   - No
   - Yes
   If yes, was a condom used?
   - No
   - Yes
8. Menstrual periods?
   - No
   - Yes
   If yes, age of menarche: Last menstrual period:

### 9. Other symptoms disclosed

If yes, describe onset, duration and intensity:
1. EXAMINATION OF THE EXTERNAL GENITALIA AND PERINEAL AREA

Record all findings using diagrams, legend, and a consecutive numbering system.

1. Use a colposcope or employ other means of magnification.
2. Examine the genital structures.
   - See page 5 of instructions for diagrams of the genital structures.
   - Use exam techniques described in instructions.
   - Diagram the position that best illustrates your findings.

### J. ANAL-GENITAL FINDINGS

1. **Exam method:**
   - [ ] Direct visualization
   - [ ] Colposcope
   - [ ] Other magnification

2. **General Female/Male**
   - [ ] WNL
   - [ ] ABN
   - [ ] Describe
   - Inguinal adenopathy [ ]
   - [ ]
   - Perineum [ ]
   - [ ]

3. **Genital Tanner Stage**
   - [ ] 1
   - [ ] 2
   - [ ] 3
   - [ ] 4
   - [ ] 5

4. **Female Genitalia**
   - **Exam positions/methods:**
     - Separation
     - Traction
     - Knee
     - Chest
     - Supine [ ]
     - [ ]
     - Prone [ ]
     - [ ]
     - Saline/water [ ]
     - [ ]
     - Moistened swab [ ]
     - [ ]
     - Catheter [ ]
     - [ ]
     - Other: [ ]

   - [ ] WNL
   - [ ] ABN
   - Describe

   - [ ] Labia majora
   - [ ]
   - [ ]

   - [ ] Labia minora
   - [ ]
   - [ ]

   - [ ] Clitoral hood
   - [ ]
   - [ ]

   - [ ] Perineal tissues (vestibule)
   - [ ]
   - [ ]

   - [ ] Hymen
   - [ ]
   - [ ]

   - [ ] Supine
   - [ ]
   - [ ] Prone
   - [ ]

   - Record morphology:
     - [ ] Annular
     - [ ]
     - [ ] Crescentic
     - [ ]
     - [ ] Imperforate
     - [ ]
     - [ ] Septate
     - [ ]

   - [ ] Fossa navicularis
   - [ ]
   - [ ]

   - [ ] Posterior fourchette
   - [ ]
   - [ ]

   - [ ] Vagina (pubertal adolescents)
   - [ ]
   - [ ]

   - [ ] Cervix (pubertal adolescents)
   - [ ]
   - [ ]

   - Discharge
     - [ ] No
     - [ ] Yes
     - If yes, describe:

### K. FINDINGS AND INTERPRETATION

1. **Anal-Genital Findings**
   - [ ] Normal anal-genital exam
   - [ ] Abnormal anal-genital exam
   - [ ] Indeterminate anal-genital exam

2. **Assessment of Anal-Genital Findings**
   - [ ] Consistent with history
   - [ ] Inconsistent with history
   - [ ] Limited/insufficient history

3. **Interpretation of Anal-Genital Findings**
   - [ ] Normal exam: can neither confirm nor negate sexual abuse
   - [ ] Non specific: may be caused by sexual abuse or other mechanisms
   - [ ] Sexual abuse is highly suspected
   - [ ] Definite evidence of sexual abuse and/or sexual contact.

4. [ ] Need further consultation/investigation

5. [ ] Lab results or photo review pending (may alter assessment)

6. **Additional comments regarding findings, interpretations, and recommendations.**

### L. MEDICAL LAB TESTS PERFORMED

- **STD Cultures**
- **GC**
- **Chlamydia**
- **Other**

I request a forensic medical examination for suspected sexual abuse at public expense.

Telephone Authorization
Agency:
Authorizing party:
ID number:
Date/time:

[ ] Law enforcement officer
[ ] Child Protective Services

C. CONSENT FOR EXAMINATION BY PATIENT/ PARENT/ GUARDIAN

Note: Parental consent is not required for a suspected child sexual abuse examination if the child is in protective custody. Family Code Section 6927 permits minors (12 to 17 years of age) to consent to medical examination, treatment, and evidence collection for sexual assault without parental consent. See instructions regarding parental notification requirements for minors.

- I hereby consent to a forensic medical examination for evidence of sexual abuse. I understand that collection of evidence may include photographing injuries and that these photographs may include the anal-genital area (private parts). I further understand that medical providers are required to notify child protective authorities of known or suspected child abuse; and, if child abuse is found or suspected, this form and any evidence obtained will be released to a child protective agency.
- I have been informed that victims of crime are eligible to submit crime victim compensation claims to the State Victims of Crime (VOC) Restitution Fund for out-of-pocket medical expenses, psychological counseling, loss of wages, and job retraining/rehabilitation.
- I understand that data without patient identity may be collected from this report for health and forensic purposes and provided to health authorities and other qualified persons with a valid educational or scientific interest for demographic and/or epidemiological studies.

### J. GENITAL EXAMINATION - FEMALES

Record all findings using diagrams, legend, and a consecutively numbered system.

1. Examine the inner thighs, external genitalia, and perineal area.

2. **Exam method:**
   - [ ] Direct visualization
   - [ ] Colposcope
   - [ ] Other magnification

   **Exam positions/methods:**
   - [ ] Supine
   - [ ] Prone
   - [ ] Saline/Water
   - [ ] Moistened swab
   - [ ] Toluidine Blue Dye
   - [ ] Catheter
   - [ ] Other:

3. **Genital Tanner Stage**
   - [ ] 1
   - [ ] 2
   - [ ] 3
   - [ ] 4
   - [ ] 5

4. Examine the genital structures. Check the ABN box(es) if there are abuse/assault related findings and describe.

   **WNL, ABN Describe:**

   - Inner thighs
   - Inguinal adenopathy
   - Labia majora
   - Labia minora
   - Clitoral hood
   - Perineum
   - Periurethral tissue/urethral meatus
   - Perivhymenal tissue (vestibule)
   - Hymen
     - [ ] Supine
     - [ ] Prone

   - Record morphology:
     - [ ] Annular
     - [ ] Crescentic
     - [ ] Imperforate
     - [ ] Septate

   - Fossa navicularis
   - Posterior fourchette
   - Vagina (pubertal adolescents)
   - Cervix (pubertal adolescents)

   - Discharge
     - [ ] No
     - [ ] Yes

   If yes, describe:

   - No Findings

5. Collect dried and moist secretions, stains, and foreign materials. Scan the area with a Wood's Lamp.

   **Findings**
   - [ ] No Findings

6. Collect swabs and prepare slides.

   - [ ] Prepubertal female
     - Collect at least 2 vulvar and 2 vestibular swabs.
   - [ ] Pubertal female
     - Collect 4 swabs from the vaginal pool.
     - Prepare one wet mount and one dry mount slide.
     - Collect 2 cervical swabs (if over 48 hours post assault).

7. Collect pubic hair combing or brushing.

   - [ ] Not applicable

8. Collect pubic hair reference samples according to local policy.

   - [ ] Not applicable

K. GENITAL EXAMINATION – MALES

1. Examine the inner thighs, external genitalia, and perineal area.
2. Exam method: ☐ Direct visualization ☐ Colposcope ☐ Other magnification
   Exam positions/methods:
   ☐ Supine ☐ Prone ☐ Moistened swab
   ☐ Toluidine Blue Dye ☐ Other:

3. Genital Tanner Stage 1 2 3 4 5
4. Circumcised: ☐ No ☐ Yes
5. Check the ABN box(es) if there are abuse/assault related findings and describe.
   Inner thighs
   Ingual adenopathy
   Perineum
   Foreskin
   Glans Penis
   Penile shaft
   Urethral meatus
   Scrotum
   Testes
   Discharge ☐ No ☐ Yes If yes, describe:
   No Findings ☐

6. Collect dried and moist secretions, stains, and foreign materials. Scan the area with a Wood's Lamp.
   ☐ Findings ☐ No Findings
7. Collect pubic hair combing or brushing.
8. Collect pubic hair reference samples according to local policy. ☐ Not applicable
9. Collect 2 penile swabs, if indicated by assault history. ☐ Not applicable
10. Collect 2 scrotal swabs, if indicated by assault history. ☐ Not applicable

L. FEMALE/MALE ANAL AND RECTAL EXAMINATION

1. Examine the buttocks, perianal skin, and anal folds for injury, foreign materials, and other findings.
2. Record exam positions, methods, observations:
   ☐ Direct visualization ☐ Colposcope ☐ Other magnification
   Exam positions
   Observation Observation with traction
   Supine
   Supine knee chest
   Prone knee chest
   Lateral recumbent
   Exam methods:
   ☐ Moistened swab ☐ Toluidine blue dye ☐ Anoscopy ☐ Other:

3. Check the ABN box(es) if there are abuse/assault related findings and describe any abnormal or unusual findings.
   ☐ No Findings ☐ WNL ☐ ABN ☐ Describe:
   Buttocks
   Perianal skin
   Anal verge/folds/rugae
   Rectum
   Anal excision ☐ No ☐ Yes If yes: ☐ Immediate ☐ Delayed
   Stool present in rectal ampulla ☐ No ☐ Yes ☐ Undetermined
   ☐ Findings ☐ No Findings
5. Collect 2 anal and/or rectal swabs and prepare one dry mount slide.
6. Rectal bleeding: ☐ No ☐ Yes If yes, describe:

### Q. FINDINGS AND INTERPRETATION

1. Anal-Genal Findings
   - Normal anal-genital exam
   - Abnormal anal-genital exam
   - Indeterminate anal-genital exam

2. Assessment of Anal-Genal Findings
   - Consistent with history
   - Inconsistent with history

3. Interpretation of Anal-Genal Findings
   - Normal exam: can neither confirm nor negate sexual abuse
   - Non specific: may be caused by sexual abuse or other mechanisms
   - Sexual abuse is highly suspected
   - Definite evidence of sexual abuse and/or sexual contact
   - Need further consultation/investigation
   - Lab results or photo review pending (may alter assessment)
   - Additional comments regarding findings, interpretations, and recommendations:

   ■ Recommend interview & non-acute exam at CIC

APPENDIX C

PENAL CODE 679.04

ACCOMPANIMENT LAW
CA Penal Code 679.04.

(a) A victim of sexual assault as the result of any offense specified in paragraph (1) of subdivision (b) of Section 264.2 has the right to have victim advocates and a support person of the victim's choosing present at any interview by law enforcement authorities, district attorneys, or defense attorneys. However, the support person may be excluded from an interview by law enforcement or the district attorney if the law enforcement authority or the district attorney determines that the presence of that individual would be detrimental to the purpose of the interview. As used in this section, "victim advocate" means a sexual assault victim counselor, as defined in Section 1035.2 of the Evidence Code, or a victim advocate working in a center established under Article 2 (commencing with Section 13835) of Chapter 4 of Title 6 of Part 4.

(b) (1) Prior to the commencement of the initial interview by law enforcement authorities or the district attorney pertaining to any criminal action arising out of a sexual assault, a victim of sexual assault as the result of any offense specified in Section 264.2 shall be notified orally or in writing by the attending law enforcement authority or district attorney that the victim has the right to have victim advocates and a support person of the victim's choosing present at the interview or contact. This subdivision applies to investigators and agents employed or retained by law enforcement or the district attorney.

(2) At the time the victim is advised of his or her rights pursuant to paragraph (1), the attending law enforcement authority or district attorney shall also advise the victim of the right to have victim advocates and a support person present at any interview by the defense attorney or investigators or agents employed by the defense attorney.

(c) An initial investigation by law enforcement to determine whether a crime has been committed and the identity of the suspects shall not constitute a law enforcement interview for purposes of this section.
APPENDIX D

DIRECTIONS TO CCRMC
AND
WITHIN CCRMC TO SART ROOM
Contra Costa Regional Medical Center
2500 Alhambra Avenue
Martinez, CA 94553

Emergency Department located on the backside of hospital - follow the signs to ED

From East and Central County
Take Highway 4 towards Martinez
Exit Highway 4 at Alhambra Avenue
Turn Right at Stop Light at Exit
Medical Center is 1 mile down on left hand side at B Street

From West County
Take I-80 East
Exit I-80 at Highway 4 East towards Martinez
Exit Highway 4 at Alhambra Avenue
Turn left at Stop Light under Freeway
Medical Center is 1 mile down on left hand side at B Street
APPENDIX E

**ADULT SEXUAL Assault Victims Action Plan**

Sexual Assault Victim Makes Contact with Police Agency

↓

**ADULT PATIENTS >12 & ABOVE**, (<12 sec pediatric)

Victim discloses sexual assault history
Obtain a detailed history of incident.

* **ACUTE INCIDENT**  <168 hours (7 days)

** ** NON-ACUTE INCIDENT > 168 hours (7 days)

↓

**MEDICAL TREATMENT:**
If Officer feels emergency medical treatment is needed i.e. obvious broken bone, facial swelling, head battered with object, cuts, altered level of alertness

**Emergency Evaluation Needed:**
Victim to the closest Emergency Department by EMS or Police
ED to perform triage, registration and physician medical screening exam and any needed emergent medical needs.
Discharges then refer CCRMC for SART Exam. If discharged in stable condition: transport to SART Site (CCRMC)

* → Non –Acute Incident >168 hours

This includes victim’s whom refuse evidentiary exam
If unsure call Charge Nurse at CCRMC ED SART site for consultation
(Advise medical follow-up in a health care system)

Community Violence Solutions / Rape Crisis Counselor:
1-800-670-7273

No SART evidentiary exam required

** → Acute <168 hours of incident

Ask victim to consent to medical care & evidentiary exam

Community Violence Solutions / Rape Crisis Counselor
1-800-670-7273
↓
SART Contra Costa Regional Medical Center - ED (925) 370-5975

Request Charge Nurse: Provides the following Victim Information:
* Name, * age, * DOB, * time of incident, * authorizing officers name and * badge number, * Case Number

CCRMC will call in the SART nurse if the patient is in route per the police officer to CCRMC ED

---

**→Non –Acute Incident >120 hours**

► Most pediatric victims fall into this category as disclosure occurs very late → Incident > 5 days to a week, or month ago, or now again; or the parent may say I am not sure when occurred, story vague in-determinent time or no collectable evidence

→ Officer to refer pediatric victim / care takers:

Community Violence Solutions/Rape Crisis Counselor

1-800-670-7273

Children’s Interview Center 925-646-2305

---

**→Acute <120 hours of incident**

Evidentiary Exam needed. No emergency medical treatment needed

→ Officer calls Contra Costa Regional Medical Center ED (925) 370-5975
Request Charge Nurse: Provides the following Victim Information:
*Victim name, *DOB, *age,*time of incident, *authorizing officers name and *badge * Case Number

Community Violence Solutions /Rape Crisis Counselor

1-800-670-7273

Police Interview can continue at the SART site.
CCRMC will call in the SART nurse if the patient is in route per police officer to CCRMC ED
Proceed with acute pediatric victim to the CCRMC Emergency Department Site
APPENDIX G

Medical Exam Referral to the CIC
PROCEDURES FOR MEDICAL EXAM REFERRALS TO THE CIC

PROCEDURE: 05-01

SUBJECT: PROCEDURES FOR MEDICAL EXAM REFERRALS TO THE CIC

PURPOSE: The Examiner is an MD or appropriately qualified medical practitioner, SAFE whose role is to conduct specific NON-ACUTE Forensic Medical Evaluations.

I. Policy

The CIC is NOT a medical clinic. ACUTE cases should follow the SART Guidelines.

The CIC is not required by law to conform to HIPPA Guidelines, and the signature on the State Forms allows for photography during the evaluation.

II. Procedure

CIC Forensic Medical Evaluation Intake, Scheduling and Billing:

A. It is preferred that the minor be interviewed at CIC prior to the CIC non-acute Forensic Medical Evaluation.
   The Examiner needs to know what happened in order to compare findings, etc. with the history.

B. California State Forms (CalEMA 2-925) page 1 must be filled out and signed appropriately by an officer from the referring investigating agency prior to the FME being conducted. Faxed copies are acceptable.

C. CIC staff set the appointment with the Examiner and mark the main calendar as a “med” (in black) on the date noting the time.

D. The family / caregiver will be contacted by CIC staff prior to the appointment to confirm their ability to locate the facility and to facilitate transportation, if necessary. The CIC staff does not transport clients, but a bus line comes right by the Center.

E. Once completed, the CIC FME File remains in the possession of the Examiner in a securely locked cabinet. Interview and Medical records are to be kept separate once the medical evaluation is completed. DO NOT ATTACH ANY FME INFORMATION TO THE CIC INTERVIEW FILE FOLDER.

F. Officers requesting an FME can come by the Center to pick up the FME completed forms or have it mailed. Social workers should request a copy, if appropriate.

G. Community Violence Solutions is responsible for managing the FME Billing and payments from law enforcement jurisdictions. CVS will provide an accounting of the CIC FME fees as requested by the CIC Policy Oversight Committee.

I. REQUESTS.

A. Prior to any travel to schools, training, seminars, etc., by Office of the Sheriff employees the Travel Request Form must be correctly completed, in accordance with Office of the Sheriff Policy Section 1.05.39, as follows:

1. Name(s) of person(s) attending the training/travel.
2. Title (Deputy Sheriff, Sergeant, Records Clerk, etc.).
3. Phone number of employee who can answer questions regarding the Travel Request. (Usually the person completing the form.)
4. Actual date of departure (if the employee is attending a course which starts June 11 at 0800 hours in Los Angeles, he/she will have to be in Los Angeles the day before, making the departure date June 10).
5. Date the employee returns to this County, most often the day the course ends.
6. Location of the training.
7. The “Travel Justification” section of the Travel Request must explain why the travel is necessary and beneficial to the County. The explanation must include the importance of the trip to the employee’s responsibilities and the Office of the Sheriff. One or two sentences explaining the need to send the employee away; i.e., "to attend homicide investigations school. Detective Jones is newly assigned to the Homicide Unit."
8. A copy of the conference schedule and/or itinerary should also be attached.
9. County Car - no cost; Plane - the round trip airfare. The tickets will be purchased by a Purchasing Clerk; Rental car - estimated cost. Vouchers provided by the Purchasing Department.
10. The actual round trip mileage to the destination. You may only charge for the distance to/from your place of employment to/from your assigned destination. (If you leave from your home, and it is a greater distance from your approved destination than your assigned facility/station house, use your place of
employment as your starting/ending point.) The reimbursement rate for mileage is changed periodically to conform to IRS-approved rates.

11. Reimbursement for meals: Actual expenses, including tax and gratuity, for individual meals, and snacks, will be reimbursed up to $65.00 per day, if the individual is eligible for three meals on that day. If eligible for two or fewer meals, the following individual maximums shall apply:
   a. Breakfast $10.00
   b. Lunch $20.00
   c. Dinner $35.00
   • Receipts of actual expenses required.

12. The number of nights lodging is required times the room rate plus tax.

13. Any other expenses such as tuition, registration fee, supplies, parking, cab fare, rental car, bridge tolls, telephone and FAX charges (relative to County business), BART or bus fares, tips, porterage (baggage handling), checking fees, etc. If meals are included in the registration fee, state this on the request and omit meals in No.11.

14. Total amount.

15. Type "Office of the Sheriff" on the line requesting Department and date the request.

16. If it is a POST-reimbursed course, note it and the plan (POST Plan II).

B. The Travel Request must be submitted by the employee to the employee’s Supervisor. The Supervisor will submit the Request to the Division Assistant Sheriff for approval/disapproval.

C. Travel costing less than $1,000, and involving fewer than five travelers on the same trip, and with the travel destination within the continental United States, requires the approval of the traveler’s Bureau Assistant Sheriff. Travel costing $1,000 or more per person, or involving five travelers or more on the same trip, or with a travel destination outside of the continental United States requires the approval of the traveler’s Bureau Assistant Sheriff and the County Administrator’s Office.

D. All Travel Requests should be fully approved at least two weeks prior to the commencement of travel. If the travel requires approval by the County Administrator’s Office, allow an additional week for processing.

E. Travel Requests submitted late will not be granted except in unusual, urgent, or exigent circumstances. Travel undertaken in the absence of an approved Travel Request will not be reimbursed.
I. INTRODUCTION TO THE JOB PERFORMANCE EVALUATION.
   A. The purpose of the performance evaluation interview is to bring supervisors and employees together to review the employee’s job performance and job related standards. In addition, the interview should serve to encourage communications regarding performance expectations on the part of both persons, and to develop a positive, cooperative approach to maintaining and improving job performance in the future.

II. OBJECTIVES.
   A. To encourage strengths and improve weak areas of performance.
   B. To improve communication within the organization.
   C. To recognize special skills and training possessed by employees.
   D. To stimulate an employee to enter a self-improvement program.
   E. To establish realistic goals and objectives for the employee.

III. STANDARDIZED EVALUATION GUIDELINES.
   A. The evaluation standards are subdivided into clearly defined performance areas. Each of these performance areas is defined by expected employee behavior in relation to the performance area.
   B. The standards, in the form of behavioral guidelines/examples, are presented for each definition. Each area describes the expected behavior of each employee. Employees who meet, exceed, or prove deficient within a specific area, will be rated on a scale of 1 to 4, with 4 representing the highest rating and 1 representing the lowest rating within a category.

IV. RATER’S RESPONSIBILITY.
   A. The Division Commander will schedule the most appropriate supervisor to conduct the evaluation when an employee has been with a supervisor for fewer than four months and an evaluation is due.
   B. Supervisors are encouraged to keep notes (both positive and negative) that will enable accurate recall of incidents that should be discussed during the interview.
C. Supervisors conducting evaluations are encouraged to obtain data from other supervisors who have personally supervised the employee during the evaluation period.

D. Schedule the interview where undivided attention can be directed toward the employee.

E. Advise the employee of the scheduled interview at least one week in advance and provide a blank copy of the Evaluation Package for self-evaluation.

F. Complete the worksheet prior to the interview. Be specific in your remarks and focus on job-related performance. Avoid the “Halo Effect” (one good trait causes high ratings in all categories) or the “tendency to the mean” (all employees evaluated midrange).

G. Review the employee’s self-evaluation worksheet prior to the interview and be prepared to discuss any variances.

H. Any potential flaws noted in the system should be brought to the attention of Administration in writing with suggested modification.

I. Supervisors conducting evaluations must determine the weight to be given each trait/behavior as it relates to an employee’s overall performance in an area. Having only one trait or behavior which is unacceptable does not necessarily determine the employee’s overall performance in that area unless that trait carries significant and controlling weight for that performance area as determined by the supervisor.

V. EMPLOYEE RESPONSIBILITIES.

A. Prior to your scheduled meeting with your supervisor, you should review the evaluation worksheet in detail and compare your performance during the rating period with the standards.

B. Rate yourself in each category. Include any pertinent information which supports your rating.

C. Submit the completed worksheet to your supervisor at least two work days prior to your scheduled interview.

D. Come to the evaluation meeting with a positive attitude prepared to objectively discuss your strengths, weaknesses and what you hope to accomplish during the next evaluation period.

VI. EMPLOYEE OPTIONS.

A. The evaluated employee may submit a memo in response to each performance evaluation, which will be filed in both the divisional and departmental file. This memo shall be submitted within five days of the performance evaluation.

VII. FORMS.

A. Employee Performance Evaluation Forms are maintained on the Office of the Sheriff’s Intranet in the “Forms” tab. Evaluation Forms are also maintained on the Sheriff’s Network “G” Drive in the “Forms” folder, “Evaluations” subfolder. Four categories of evaluation forms are available for use for both sworn and professional staff:

1. Probationary Employee Evaluation
2. Employee Evaluation
3. Supervisor Evaluation
4. Manager Evaluation
VIII. RATING GUIDELINES.

A. Each of the evaluation forms listed above includes ratings guidelines that shall be used by all evaluators.

IX. RED STRIPE POLICY REVIEW.

A. At the conclusion of each employee, supervisor, or manager evaluation, the evaluator will review the Red Stripe policies. Red Stripe Policies are those that are critical knowledge for proper conduct during high-risk events that do not occur frequently. Personnel to whom a particular “Red Stripe” Policy applies must know the policy in total so that effective and correct action may be taken when there is no discretionary time available to reference the manual or other resources. (Reference CCCSO Policies and Procedures Section 1.01.01).
I. REQUIRED TRAINING FOR PEACE OFFICERS.
   A. THE FOLLOWING MANDATED TRAINING IS PROVIDED IN ACCORDANCE WITH STATE REQUIREMENTS:
      1. POST Basic Academy
      2. POST Continuing Professional Training
      3. POST Supervisory Course (for new first-line sworn supervisors)
      4. POST Management Course (for new sworn middle managers)
      5. STC Basic Jail Operations
      6. STC Annual Corrections Update
      7. First Aid
      8. Cardiopulmonary Resuscitation
      9. Domestic Violence
      10. Firearms Qualification

II. SPECIALIZED TRAINING.
   A. ADMINISTRATIVE SERVICES.
      1. Background Investigator
      2. Community Relations Specialist
      3. Criminal Intelligence Officer
      4. Department Instructor
      5. Internal Affairs Investigator
      6. Training Manager
B. PATROL.
   1. Contract City Officer
   2. Field Training Officer
   3. Marine Patrol Unit

C. FORENSIC SERVICES DIVISION.
   1. Crime Scene Investigator
   2. Criminalist
   3. Fingerprint Examiner
   4. Fingerprint Technician
   5. Forensic Toxicologist
   6. Property Technician
   7. Coroner Investigator

D. TECHNICAL SERVICES.
   1. Dispatcher
   2. Field Training Officer
   3. Records, Clerical Supervisor

E. EMERGENCY SERVICES DIVISION.
   1. Mutual Aid Coordinator
   2. Volunteer Services Coordinator

F. DETENTION DIVISION.
   1. Classification Deputy
   2. Facility Training Officer
   3. Search Team Deputy
   4. Transportation Deputy

G. INVESTIGATIONS DIVISION.
   1. Fraudulent Document Investigator
   2. Homicide Investigator
   3. Juvenile/Sexual Assault Investigator
   4. Narcotics Investigator
   5. Special Services Investigator

H. SPECIALIZED POSITIONS.
   1. Hostage Negotiator
2. Narcotic Enforcement Team
3. Special Weapons and Tactics Team
4. Suppression Team
1. PROFESSIONAL CERTIFICATE PROGRAM.

A. The Commission on POST has set forth the following guidelines for the Professional Certificate Program. To qualify for award of certificates, applicants shall have completed combinations of education, training and experience as prescribed by the Commission.

B. BASIC CERTIFICATE.

1. Have satisfactorily met the appropriate POST Basic Course training requirement.

2. Have satisfactorily completed the period of probation, of no less than one year. An applicant must acquire the certificate upon completion of probation but within 24 months of date of hire.

C. INTERMEDIATE CERTIFICATE.

1. Possess or be eligible to possess a basic certificate; and

2. Satisfy the prerequisite basic course training requirement, and have acquired the training and education points and/or the college degree designated and the prescribed years of law enforcement experience in one of the following combinations:

<table>
<thead>
<tr>
<th>Minimum Training Points Required</th>
<th>15</th>
<th>30</th>
<th>45</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum Education Points or Degree Required</td>
<td>15</td>
<td>30</td>
<td>45</td>
</tr>
<tr>
<td>Associate Degree</td>
<td>Baccalaureate Degree</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Years of Law Enforcement Experience Required</td>
<td>8</td>
<td>6</td>
<td>4</td>
</tr>
</tbody>
</table>
D. ADVANCED CERTIFICATE.
   1. Possess or be eligible to possess an intermediate certificate; and
   2. Satisfy the prerequisite basic course training requirement and have acquired the
      training and education points and/or the college degree designated and the
      prescribed years of law enforcement experience in one of the following
      combinations:

<table>
<thead>
<tr>
<th>Minimum Training Points Required</th>
<th>30</th>
<th>45</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum Education Points or Degree Required</td>

<td>12</td>
<td>9</td>
</tr>
</tbody>
</table>

E. SUPERVISORY CERTIFICATE.
   1. Possess or be eligible to possess an intermediate certificate; and
   2. Have no less than 60 semester units; and
   3. Satisfactorily meet the training requirement of the Supervisory Course; and
   4. Have served satisfactorily for a period of two years as a first-line Supervisor,
      middle Manager, assistant Department head, or Department head as defined in
      POST regulations.

F. MANAGEMENT CERTIFICATE.
   1. Possess or be eligible to possess an advanced certificate; and
   2. Have no less than 60 semester units; and
   3. Satisfactorily meet the training requirement of the Management Course; and
   4. Have served satisfactorily for a period of two years as a middle Manager,
      assistant Department head, or Department head as defined in POST regulations.

G. EXECUTIVE CERTIFICATE.
   1. Possess or be eligible to possess an advanced certificate; and
   2. Have no less than 60 semester units; and
   3. Satisfactorily meet the training requirements of the Executive Development
      Course; and
   4. Have served satisfactorily for a period of two years as a Department head as
      defined in POST regulations.
I. PERSONNEL FILES.

A. The following personnel files exist in Contra Costa County for employees of the Sheriff’s Office:

<table>
<thead>
<tr>
<th>File Name</th>
<th>Custodian of Records</th>
<th>File Contents</th>
</tr>
</thead>
<tbody>
<tr>
<td>Contra Costa County Human Resources Personnel File</td>

Former Policy Deleted
I. DEFINITIONS.

C. BLOODBORNE PATHOGENS. Pathogenic microorganisms that are present in human blood and can cause disease in humans. These pathogens include, but are not limited to Hepatitis B Virus (HBV) and Human Immunodeficiency Virus (HIV).

D. CONTAMINATED. The presence or reasonably anticipated presence of blood or other potentially infectious materials on an item or surface.

E. DECONTPAMINATION. The use of physical or chemical means to remove, inactivate, or destroy bloodborne pathogens on a surface or item to the point where they are no longer capable of transmitting infectious particles and the surface or item is rendered safe for handling, use, or disposal.

F. ENGINEERING CONTROLS. Controls (e.g., sharps disposal containers, self-sheathing needles) that isolate or remove the bloodborne pathogens hazard from the workplace.

G. EXPOSURE INCIDENT. A specific eye, mouth, other mucous membrane, non-intact skin, or parenteral contact with blood or other potentially infectious materials that results from the performance of an employee's duties.

H. HAND WASHING FACILITIES. A facility providing an adequate supply of running potable water, soap and single use of towels or hot air drying machines.

I. HBV. Hepatitis B Virus which causes an infectious disease of the liver transmitted by blood or sexual fluids.

J. HIV. Human Immunodeficiency Virus is the virus that causes AIDS.

K. LICENSED HEALTH CARE PROFESSIONAL. A person whose legally permitted scope of practice allows them to independently perform the activities as described in
Hepatitis B Vaccination and Post-Exposure Evaluation and Follow-Up Sections of this plan.

L. OCCUPATIONAL EXPOSURE. Reasonably anticipated skin, eye, mucous membrane, or parenteral contact with blood or other potentially infectious materials that may result from the performance of an employee's duties.

M. OTHER POTENTIALLY INFECTIOUS MATERIALS. Body Fluids contaminated with human blood, and all body fluids in situations where it is difficult or impossible to differentiate between body fluids, any unfixed tissue or organ (other than intact skin) from a human living or dead.

N. PARENTERAL. Piercing mucous membranes or the skin barrier through such events as needle sticks, human bites, and abrasions.

O. PATHOGEN. Disease causing organism.

P. PERSONAL PROTECTIVE EQUIPMENT. Specialized clothing or equipment worn by an employee for protection against a hazard. General work clothes (e.g., uniforms, pants, shirts, or blouses) not intended to function as protection against a hazard are not considered to be personal protective equipment.

Q. REGULATED WASTES. Liquid blood, semi-liquid blood or potentially infectious materials; contaminated items that would release blood or other potentially infectious materials in liquid, semi-liquid state, or dried state.

R. SHARPS. Any object that can penetrate the skin including, but not limited to, needles, scalpels, broken glass, broken capillary tubes, and exposed ends of wires.

S. SOURCE INDIVIDUAL. Any individual, living or dead, whose blood or other potentially infectious materials may be a source of occupational exposure to the employee.

T. WORK PRACTICE CONTROLS. Controls that reduce the likelihood of exposure by altering the manner in which a task is performed (e.g., prohibiting recapping of needles by a two-handed technique.)

II. PURPOSE OF THE PLAN.

A. One of the major goals of the Occupational Safety and Health Administration (OSHA) is to regulate facilities where work is carried out, to promote safe work practices in an effort to minimize the incidence of illness and injury experienced by employees. Relative to this goal, OSHA has enacted the Bloodborne Pathogens Standard, codified as 29 CFR (Code of Federal Regulations) 1910.1030. The purpose of the Bloodborne Pathogens Standard is to "reduce occupational exposure to Hepatitis B Virus (HBV), Human Immunodeficiency Virus (HIV) and other "bloodborne pathogens" that employees may encounter in the workplace.

B. The Contra Costa County Sheriff’s Office believes there are a number of "good safety practices" that should be followed when working with bloodborne pathogens. These principals include:
   1. Minimize all exposures to bloodborne pathogens.
   2. The risk of exposure to bloodborne pathogens should never be underestimated.
3. The Sheriff's Office shall institute as many practical work practices and engineering controls as possible to eliminate or minimize employee exposure to bloodborne pathogens.

C. The Exposure Control Plan purpose is to meet the letter and intent of the OSHA Bloodborne Pathogens Standard. The objective of this plan is twofold:

1. To protect employees from the health hazards associated with bloodborne pathogens.
2. To provide appropriate treatment and counseling should an employee be exposed to bloodborne pathogens.

III. BLOODBORNE PATHOGEN EXPOSURE CONTROL PLAN

A. INSTRUCTIONS

1. The immediate supervisor of an employee who has sustained an exposure has the responsibility to ensure that the following steps are taken:
   a. Employee must have blood drawn within 24 hours to determine baseline. They will test for HIV, HEP B, and HEP C. Physicians should be requested to begin antibody procedures immediately.
   b. Employee MUST go to either Muir/Diablo Occupational Medicine, or Kaiser Occupational Medicine. The employee may not seek treatment from their own medical provider, UNLESS a Physician’s Predesignation form is on file in the Sheriff’s Personnel Unit (call Personnel 925-335-1500 to verify).

2. **If Subject consents to blood draw**, contact Blood Alcohol Detection (BAD) Nurse via Dispatch.
   a. BAD Nurse will respond and perform blood draw of subject.
   b. Subject MUST initial and sign “Consent for HIV Antibody Test” form. Fax form Attention: Sheriff’s Professional Standards, 651 Pine St., Martinez (925-335-1508).
   c. Blood must be transported as soon as possible by Sheriff’s personnel to:
      
      CONTRA COSTA REGIONAL MEDICAL CENTER (CCRMC)
      2500 Alhambra Avenue, Martinez
      Public Health Lab, Room 209

3. **If Subject does NOT consent to blood draw**, immediately complete “Petition and Proposed Order to Test for Bloodborne Pathogens” form.
   a. Immediately deliver or fax Petition to Sheriff’s Professional Standards (fax: 925-335-1301), who will obtain a signature from a Superior Court presiding judge.
   b. If exposure occurs after hours or on the weekend, contact Sheriff’s Watch Commander (925-313-2481), who will immediately seek a signature from the on-call judge.
   c. Once Petition Order is signed, note Subject’s refusal to sign on “Consent for HIV Antibody Test” form. Forward form to Professional Standards Division, 651 Pine St., Martinez.
   d. Contact BAD Nurse via Dispatch to perform blood draw of Subject.
   e. Blood must be transported as soon as possible by Sheriff’s personnel to CCRMC Public Health Lab (see address above).
f. Forward original forms to Sheriff’s Professional Standards, 651 Pine St., Martinez.

4. If the person is deceased, call and email a supervisor in the Coroner’s Division to arrange for an immediate blood draw.

5. Documentation as a result of any exposure to bloodborne pathogens will be maintained by the Health Services Department for thirty (30) years, (see V.F.3.a.

6. 6.) If “Declaration of Phlebotomist” document is received, FAX copy to Sheriff’s Standards (925-335-1532) and send original to: Contra Costa D.A.’s Office, 900 Ward St., Martinez, ATTN: Paul Mulligan, Chief of Inspectors.

IV. GENERAL.

A. RESPONSIBLE PERSONS. The Sheriff’s Office has four major categories of responsibility to effectively implement the Exposure Control Plan. These categories are the Professional Standards Division, Division Commander, Division and Sheriff’s Office Training Units, and all Sheriff’s Office employees.

1. Professional Standards Division.
   a. The Professional Standards Division will be responsible for overall management and support of the Sheriff’s Office Bloodborne Pathogens Compliance Program. Responsibilities typically include, but are not limited to:
      1. Implementing the Exposure Control Plan for the Sheriff’s Office and identifies employees whose jobs entail potential exposure hazards.
      2. Working with Division Commanders/designees and the Professional Standards Lieutenant to develop and administer any additional bloodborne pathogen-related policies and practices needed to support the effective implementation of this plan.
      3. Implement this Exposure Control Plan, as well as revise and update the plan when necessary.
      5. Act as the Sheriff’s Office liaison during OSHA Inspections.
      6. Review and update the plan at least annually.
   b. The Professional Standards Division will require assistance in fulfilling their responsibilities. To assist in implementing required duties, a Manager from each Division will be appointed as a member of the Safety
Committee that is chaired by the Professional Standards Division and meets on a regularly scheduled basis.

2. Division Commanders.
   a. Division Commanders are responsible for exposure control in their respective Divisions and will ensure that proper exposure control procedures are followed. The Division Commanders will also select a divisional Manager to serve on the Safety Committee.

3. Sheriff’s Office Training Unit
   a. The Training Unit will be responsible for providing information and training to all employees who have potential exposure to bloodborne pathogens. Activities falling under the direction of the Training Unit include:
      1. Maintain an up-to-date list of Sheriff’s Office employees for training. (Information to be provided by Divisions.)
      2. Develop suitable education/training programs.
      3. Assisting Divisions with periodic training of employees.
   b. Maintain appropriate training documentation such as "Sign in Sheets" for the duration of employment plus 30 years. (Divisions will maintain those training documents for update and Division specific training.)
   c. Review training programs with the Professional Standards Division, and the Safety Committee annually to include appropriate new information.
   d. The Training Unit Commander will annually appoint and ensure qualification of the Sheriff’s Office Bloodborne Pathogen Instructors with concurrence from the Professional Standards Division.

4. Sheriff’s Office Employee Responsibilities.
   a. As with all of the Sheriff’s Office activities, employees have the most important role in the bloodborne pathogens compliance program and for the ultimate execution of the plan. In this capacity, employees must:
      1. Know what tasks have possible occupational exposure.
      2. Attend bloodborne pathogens training sessions.
      3. Plan and conduct all operations in accordance with work practice controls.
      4. Develop and maintain good hand washing techniques.
      5. Understand their responsibilities listed in the Sheriff’s Office Injury and Illness Prevention Program.

V. AVAILABILITY OF THE EXPOSURE CONTROL PLAN TO EMPLOYEES.

A. To assist employees with their efforts, the Exposure Control Plan is available to employees at any time. Employees are advised of this availability during Sheriff’s Office orientation and training sessions. Copies of the Exposure Control Plan are kept in the Appendix of the Sheriff’s Office Manual and Illness and Injury Prevention Program. The
Sheriff’s Office recognizes that it is important to keep an Exposure Control Plan updated. To ensure this, the plan will be reviewed and revised under the following circumstances:

1. Annually, on or before July, of each year.
2. When new or modified tasks and procedures are implemented which affect occupational exposure of employees.
3. When employees' jobs are revised such that new instances of occupational exposure may occur.
4. When new positions are established and their tasks/functions involve potential exposure to bloodborne pathogens.

B. EXPOSURE DETERMINATION - JOB CLASSIFICATIONS IN WHICH ALL EMPLOYEES HAVE EXPOSURE TO BLOODBORNE PATHOGENS. Listed below are Sheriff’s Office job classifications in which all employees may come in contact with human blood or other potentially infectious materials, which may result in possible exposure to bloodborne pathogens:

<table>
<thead>
<tr>
<th>JOB CLASSIFICATION</th>

</tr>
<tr>
<td>11. Criminalist Forensic Supv.</td>
<td>Forensic</td>
<td>Performs analysis of blood and urine for presence of alcohol or drugs. Examines evidence at crime scenes and autopsies; blood typing, examination of items stained with blood, semen</td>
</tr>
</tbody>
</table>
12. Laboratory Aide  
Forensic  
Disposes of biohazardous wastes, performs analysis of blood and urine for the presence of drugs. Examines items stained with blood, semen or saliva. Examines crime scenes.

13. Fingerprint Examiner  
Forensic  
Processes evidence for latent prints, handles fingerprint cards which may be contaminated with body fluids, fingerprints deceased persons.

14. Sheriff’s Specialist  
Forensic/Custody/Property  
Package, store and destroy evidence, package urine for drug alcohol testing.

15. Director/Property/Evidence  
Forensic  
Package, store and destroy evidence.

16. Sheriff’s Aide  
Forensic/Custody  
Handles property that may be contaminated with body fluids.

E. METHODS OF COMPLIANCE. To effectively minimize exposure to bloodborne pathogens, this plan and training sessions will address the use of universal precautions, establish appropriate engineering controls, implement appropriate work practice controls, use of necessary personal protective equipment and implement appropriate housekeeping procedures.

1. Universal Precautions.
   a. Section 1.06.34 of the Sheriff’s Office Manual addresses Universal Precautions. The assumption is made that all human blood and body fluids which are contaminated by human blood, such as semen, vaginal secretions, feces, and saliva are treated as if they are known to be infectious with HBV or HIV, and other bloodborne pathogens.
   b. In circumstances where it is difficult or impossible to differentiate between body fluid types, we assume all body fluids to be potentially infectious.
   c. Each Division is responsible for overseeing the Universal Precautions Program.

2. Engineering Controls.
   a. In accordance with 1910.1030 of Title 29 CFR, one of the key aspects to an Exposure Control Plan is the use of Engineering Controls to eliminate or minimize employee exposure to bloodborne pathogens. As a result, employees use cleaning, maintenance and equipment that is designed to prevent contact with blood or other potentially infectious materials.
   b. Each Division will establish and periodically work with Managers and Supervisors to review tasks and procedures performed in daily operations where engineering controls can be implemented or updated. The hazard assessment shall include:
      1. Operations where engineering controls are currently employed.
2. Operations where engineering controls can be updated.

3. Operations currently not employing engineering controls, but where engineering controls could be beneficial.

c. Each of these controls will be reexamined during the annual Exposure Control Plan review and opportunities for new or improved engineering controls will be identified. Any existing engineering control equipment will be reviewed for proper function and needed repair or replacement every twelve months, in conjunction with the Division work site safety inspection and remediation process.

d. In addition to the identified engineering controls, the following controls shall be used throughout Sheriff’s Office operations:

1. Hand washing facilities (or antiseptic hand cleaners and towels or antiseptic towelettes), which are readily accessible to all employees who have the potential for exposure.

2. Color-coded, puncture-resistant containers or containers labeled with a biohazard warning label for contaminated sharps.

3. Red bio-hazard bags used to dispose of contaminates.

a. Work Practice Controls.

1. Division Commanders shall assume the responsibility for overseeing the implementation of general work practice controls. Division Managers and Supervisors will work in conjunction with Division Training Coordinators to assist with implementation of the code of safe work practices as outline in the Sheriff’s Office IIPP.

2. Each Division shall develop their own Work Practice Controls, if there are specific tasks performed that are not covered in the Sheriff’s Office code of safe work practices.

3. When an employee is first hired, or changes jobs, the Division Commander shall ensure training, upon assignment, on the appropriate work practice controls of those classifications listed in the Work Activities Involving Potential Exposure list and as outlined in the IIPP documentation of this training is required and retention of these records shall form to the IIPP guidelines.

4. Personal Protective Equipment.

a. The Sheriff’s Office provides Personal Protective Equipment that is needed to protect employees against exposure. This equipment may include, where appropriate and necessary, but not be limited to:

1. Gloves

2. Safety Glasses

3. Goggles

4. Masks and respirators

5. Coats/Jackets
b. To ensure that personal protective equipment is not contaminated and is in the appropriate condition to protect employees from potential exposure, the following will be practiced for non-disposable items:

1. All personal protective equipment is inspected periodically and repaired or replaced as needed to maintain its effectiveness.
2. Reusable personal protective equipment is cleaned, laundered and decontaminated as needed.
3. Single-use personal protective equipment (or equipment that cannot, for whatever reason, be decontaminated) is disposed of by forwarding that equipment to the Coroner Division. (Refer to divisional procedures for collection of disposable items)

c. To make sure that this equipment is used as effectively as possible, employees will adhere to the following practices when using their personal protective equipment:

1. Any garments soiled by blood or other infectious materials will be removed while using gloves immediately, or as soon as is feasible.
2. Potentially contaminated personal protective equipment is removed prior to (or as soon as is feasible) leaving a work area or accident/incident site and placed in a biohazardous material container.

5. Uniform Laundering. Division Commanders will ensure that employees submit all potentially contaminated personal uniforms to be laundered as follows:

a. Seal contaminated garments in a red biohazard bag.

b. Attach a memo including employee’s name and work location, article description and quantity, date of contamination, suspected contaminant if known, and case number/property number associated with the exposure. The Supervisor will retain a copy of the memo.

c. Supervisor will call Crime Scene Cleaners, Inc. at 1-800-357-6731 who will respond to the work location within two hours. The Crime Scene Cleaners receipt should be attached to the memo.

d. Once the decontaminated garment has been returned, all paperwork should be forwarded to the Professional Standards Division.

6. Housekeeping.

a. Employees will ensure that the work site is maintained in a clean and sanitary condition. Appropriate Divisions will determine and implement an adequate written schedule for cleaning and method of decontamination and disinfection based upon the location within the facility, type of surface to be cleaned, type of soil present, and tasks or procedures being performed in the area.

b. The following employees are designated to develop the work schedule and maintain housekeeping records:
Coroner | Administration Sergeant  
---|---  
Forensics | Forensic Manager/Deputy Sheriff Forensic Mgr.  
Detention | Bureau of Administrative Svcs. Sergeants  
Investigations | Team Sergeants  
Patrol | Administration Sergeants

c. The Division Commander is responsible for ensuring completion within their respective Divisions.

7. Disposal.
   a. All bloodstained trash will be sealed in a red "biohazard" labeled bag. No items shall be transported in a manner other than using the biohazard labeled bags while wearing protective gloves. The Martinez and West County Detention Facilities dispose of their own biohazard bags. The designated Sheriff’s Office drop-off point is located at:

   1. The Coroner's Office, 1960 Muir Road, Martinez

F. HEPATITIS B VACCINATION, INFECTIOUS DISEASE POST EXPOSURE EVALUATION AND FOLLOW UP. The Sheriff’s Office recognizes that even with good adherence to all exposure prevention practices, exposure incidents can occur. As a result, a Hepatitis B Vaccination Program has been implemented as well as procedures for infectious disease post-exposure evaluation and follow-up, should exposure to bloodborne pathogens occur.

1. Vaccination Program.
   a. To protect employees as much as possible from the possibility of Hepatitis B infection, the Sheriff’s Office has implemented a vaccination program. This program is available, at no cost, to all employees who have occupational exposure to bloodborne pathogens. The vaccination program consists of a series of three inoculations over a six-month period. As part of the bloodborne pathogens training, employees will have received information regarding Hepatitis B vaccinations, including the effectiveness.

   b. Division Commanders may schedule employee vaccinations through the Occupational Health Department.

2. Infectious Disease Post-Exposure Evaluation and Followup.
   a. If an employee is involved in an incident where exposure to bloodborne pathogens may have occurred, the two most important steps taken will be:

      1. Making sure that the employee receives medical consultation and treatment as expeditiously as possible after exposure at either Muir/Diablo Occupational Medicine or Kaiser Occupational Medicine.

      2. Investigating and documenting the circumstances surrounding the exposure incident.

   b. The affected employee's Division Commander will investigate the exposure incident. This investigation is initiated within 24 hours after the incident occurs and involves gathering the following information through
the completion of an Employee’s Injury Reporting Form (AK30) and Sharp’s Injury Form (if appropriate):

1. When the incident occurred - Date and Time
2. Where the incident occurred
3. What potentially infectious materials were involved in the incident - Type of material (blood, etc.)
4. Source of the material
5. Under what circumstances the incident occurred - Type of work being performed
6. How the incident was caused
7. Personal protective equipment being used at the time of the incident
8. Actions taken as a result of the incident
9. Employee decontamination
10. Cleanup
11. Notifications made

c. After this information is gathered it is evaluated, a written summary of the incident and its causes is prepared and recommendations are made for avoiding similar incidents in the future. It will then be forwarded to the Sheriff’s Professional Standards Division.

d. In order to make sure that employees receive the best and timeliest treatment if an exposure to bloodborne pathogens should occur, the Sheriff’s Office has set up a comprehensive post-exposure evaluation and follow up process.

e. Because the exposure is work related, the exposed employee qualifies for Workers’ Compensation. The Division Commanders will advise the exposed employee to make an appointment with a qualified healthcare professional of their choice to discuss the employee's medical status. The employee will take a copy of the AK30 and the "Employee's Claim for Workers' Compensation Benefits" form (DWC FORM 1) to the chosen healthcare professional.

f. *NOTE: The above is applicable only following immediate medical treatment for the exposed employee.

3. Medical Recordkeeping.

a. The Health Services Department Director of Pre-employment Clinic is responsible for maintaining the records of vaccination status and exposures. These records should include the following:

1. Name of the employee
2. Social security number of the employee
3. A copy of the employee's Hepatitis B Vaccination status
4. Dates of vaccinations

5. Medical Records relative to the employee's ability to receive vaccination

6. Documentation as a result of any exposure to Bloodborne pathogens will be maintained for thirty years.

b. As with all information of this type, it is recognized that it is important to keep the information in these medical records confidential. Disclosure or reporting of this information to anyone will not be done without the employee's written consent (except as required by law).

G. LABELS AND SIGNS.

1. One of the warnings of possible exposure to bloodborne pathogens are biohazard labels. Because of this, the Sheriff’s Office when appropriate uses red “color-coded” containers and red bio-hazard bags. Division Commanders are responsible for maintaining the availability of the warning labels and signs.

H. TRAINING AND INFORMATION.

1. Having well informed and educated employees is extremely important when attempting to eliminate or minimize employees' exposure to bloodborne pathogens. All employees who have potential for exposure to bloodborne pathogens are put through a comprehensive training program and furnished with as much information as possible within 10 days of receiving a new assignment.

2. Employees will be retrained at least annually to keep their knowledge current or to address changes in the workplace. Additionally, all new employees, as well as employees changing jobs or job functions, will be given additional training that a new position may require at the time of a new job assignment.

3. The Training Unit is initially responsible for ensuring that all employees who have potential exposure to bloodborne pathogens receive training. All other training on bloodborne pathogens will be coordinated by the Division Training Coordinators with assistance in instructor selection by the Training Unit.

4. The following topics covered in the Sheriff’s Office training program include, but are not limited to the following:

a. Use and recognition of the Sheriff’s Injury and Illness Prevention Program.

b. Bloodborne Pathogens Standard

c. The epidemiology and symptoms of bloodborne diseases

d. The modes of transmission of bloodborne pathogens

e. The Sheriff’s Office Exposure Control Plan (and where employees can obtain a copy)

f. Appropriate methods of recognizing tasks and other activities that may involve exposure to blood and other potentially infectious materials.

g. A review of the use and limitations of methods that will prevent or reduce exposure, including:

1. Engineering controls
2. Work practice controls
3. Personal protective equipment

h. Selection and use of personal protective equipment including:
1. Types available
2. Proper use
3. Location within facility
4. Removal
5. Handling
6. Decontamination

7. Disposal

i. Visual warnings of biohazards within the facility including label, signs and "colored-coded" containers

j. Information on the Hepatitis B Vaccine, including its:
1. Efficacy
2. Safety
3. Method of Administration
4. Benefits of Vaccination
5. The Sheriff’s Office Free Vaccination Program

k. Actions to take and persons to contact in an emergency involving blood or other potentially infectious materials

l. The procedures to follow if an exposure incident occurs, including incident reporting

m. Information on the post exposure evaluation and follow up, and the medical consultation.

5. The Office of the Sheriff training methods will use numerous training techniques and allow employees an opportunity to ask questions and interact with instructors.

I. RECORDKEEPING. To facilitate the training of Office of the Sheriff employees, as well as to document the training process, training records will contain the following information:

1. Dates of all training sessions
2. Contents/summary of the training sessions
3. Names and qualifications of the instructor
4. Names and job titles of employees attending training sessions

5. These training records are maintained by the Training Unit, and site Manager’s on the Safety Committee which are available to employees and their representatives, as well as OSHA and its representatives for examination and duplication.
J. SHARPS INJURY LOG. Every Division shall maintain a written or electronic Sharps Injury Log documenting each exposure incident involving a sharp. Each exposure incident shall be recorded on the log within 14 working days of the date the incident is reported to the employer. The information recorded shall contain the following information, if known or reasonably available:

1. Date and time of the exposure
2. Type and brand of sharp involved
3. A description of the exposure incident which shall include:
   a. Job classification of the employee
   b. Work area where the exposure occurred
   c. Task the employee was performing at the time of the exposure
   d. How the incident occurred
   e. The body part involved
   f. If the sharp had engineered injury protection, whether the protective mechanism was activated, and whether the injury occurred before, during or after the activation of the mechanism.
   g. If the sharp had no engineered injury protection, the injured employee’s opinion as to whether and how such a mechanism could have prevented the injury.
   h. The employee’s opinion about whether any engineering, administrative or work practice control could have prevented the injury.

K. CONFIDENTIAL ASSISTANCE. For additional information or for confidential or general questions regarding this plan, exposure, risks or infection, contact:

1. Office of the Sheriff
   Professional Standards Division 335-1517
   Worker's compensation 335-1527

2. Public Health Department
   Public Health Nurse: 313-6740
I. SHERIFF’S OFFICE FIREARMS QUALIFICATION COURSE. (PISTOL)

A. A.O. QUALIFICATION. The following shall constitute the current Sheriff’s Office Firearms Qualification Course. All Deputy Sheriffs shall be required to satisfactorily complete the Sheriff’s Office Firearms Qualification Course on an annual basis, as scheduled by the Training Division. This course of fire shall be followed at Advanced Officers (A.O.) training.

1. COURSE OF FIRE.

   a. Semiautomatic Weapons shall be loaded with twelve rounds in the weapon and six rounds each in two magazines. Revolvers shall be loaded with six rounds in the weapon and eighteen rounds in speed loaders.

      • Stage 1: From the one-yard line, six rounds are fired, one-handed grip or two-handed grip, with a time limit of six seconds.

      • Stage 2: From the five-yard line, six rounds are fired, two-handed grip, shoulder level, with a time limit of five seconds.

      • Stage 3: From the seven-yard line, six rounds are fired, two-handed grip, shoulder level, with a time limit of ten seconds.

      • Stage 4: From the fifteen-yard line, six rounds are fired, two-handed grip, shoulder level, with a time limit of fifteen seconds.

   b. Five Round Revolvers - twenty rounds. All stages of fire begin with the firearm loaded with five rounds secured in a snapped holster.

      • Stage 1: From the one-yard line, five rounds are fired, one-handed grip or two-handed grip, with a time limit of six seconds.

      • Stage 2: From the five-yard line, five rounds are fired, two-handed grip, shoulder level, with a time limit of five seconds.

      • Stage 3: From the seven-yard line, five rounds are fired, two-handed grip, shoulder level, with a time limit of ten seconds.
Stage 4: From the fifteen-yard line, five rounds are fired, two-handed grip, shoulder level, with a time limit of fifteen seconds.

2. **MODE OF FIRE.** Revolvers shall be fired double-action only during all stages. Semi-automatic pistols shall be fired double-action only on the first shot and single-action only on all subsequent shots at each stage.

3. **TARGET.** Each course of fire shall utilize one CCCSO-1CB silhouette target.

4. **SCORING.**
   
a. **Semiautomatic Weapons and Six Round Revolvers.** Scoring shall include all shots located within the 8, 9 and 10 rings of the CCCSO-1CB target. Shots located on or touching the ring itself shall count as if located within the ring. The firearms instructor administering the shoot shall resolve any disputed shot placement. Each shot shall count for the numeric value of the ring the shot is placed in, i.e. a shot in the 10 rings counts 10 points and so forth. Shots located outside of the 8 ring shall be counted as misses. Shots made after the time limit shall result in a deduction of 10 points from the overall score for that course of fire. A total possible score for a single course of fire shall be 240 points.

   b. **Five Round Revolvers.** Scoring shall include all shots located within the 8, 9 and 10 rings of the CCCSO-1CB target. Shots located on or touching the ring itself shall count as if located within the ring. The firearms instructor administering the shoot shall resolve any disputed shot placement. Each shot shall count for the numeric value of the ring the shot is placed in, i.e. a shot in the 10 rings counts 10 points and so forth. Shots located outside of the 8 ring shall be counted as misses. Shots made after the time limit shall result in a deduction of 10 points from the overall score for that course of fire. A total possible score for a single course of fire shall be 200 points.

5. **QUALIFYING.** In order to satisfactorily complete the Sheriffs Office Firearms Qualification, a qualifying score and weapon proficiency must be demonstrated to the satisfaction of the firearms instructor.

   - All Deputy Sheriffs who carry semiautomatic weapons or six shot revolvers shall fire a single twenty-four round course of fire. All Deputy Sheriffs who carry five shot revolvers shall fire a single twenty round course of fire. All rounds fired are on a single A qualifying score shall be a minimum of 80% of the possible total score of 240 points (or 192 points) for semiautomatic weapons and six shot revolvers, and a minimum of 80% of the possible total score of 200 points—(or 160 points) for five shot revolvers.

   - All Deputy Sheriffs must demonstrate proficiency in safe manipulation of the weapon to include:
     - Five step pistol presentation;
     - Tactical reload;
     - Out-of-battery reload;
     - Clearing malfunctions.
6. **SHOOTING BADGE.**

a. Shooting badges shall be awarded to those Deputy Sheriffs who have satisfactorily completed the annual Sheriff's Office Firearms Qualification and have demonstrated a superior proficiency in marksmanship, as follows:

<table>
<thead>
<tr>
<th></th>
<th><strong>Semiautomatic Weapons/Six Shot Revolvers</strong></th>
<th><strong>Five Shot Revolvers</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Marksman level</td>
<td>216 to 227 points</td>
<td>180 to 189 points</td>
</tr>
<tr>
<td>Expert Level</td>
<td>228 to 240 points</td>
<td>190 to 200 points</td>
</tr>
<tr>
<td>Qualifying scores:</td>
<td>192 to 215 points</td>
<td>160 to 179 points</td>
</tr>
</tbody>
</table>

b. At the conclusion of the qualification course of fire, any Deputy Sheriff obtaining a final score that merits issuance of a shooting badge shall receive it.

II. **SHERIFF'S OFFICE FIREARMS ALTERNATE QUALIFICATION COURSE.** (PISTOL)

A. **SUMMER QUALIFICATION.** The following shall constitute the Sheriff's Office Firearms Alternate Qualification Course. All sworn personnel shall be required to satisfactorily complete a Sheriff's Office Firearms Qualification Course on an annual basis. This course of fire shall be followed at the Summer Qualification.

1. **COURSE OF FIRE.**

a. Semiautomatic weapons with a magazine capacity of 12 or more will begin with 13 rounds in the weapon and one 12 round magazine in the magazine pouch.

- Stage 1: From the one-yard line, six rounds are fired in four seconds, two from retention center mass, shooter takes one step to the rear and fires four from point center mass, follow through, assess, and holster.

- Stage 2: From the five-yard line, seven rounds are fired in six seconds. All rounds fired center mass, complete an out of battery reload (Not timed) with a twelve round magazine from the magazine pouch, follow through, assess, and holster.

- Stage 3: From the seven-yard line, six rounds are fired in six seconds center mass, follow through, assess, and holster.

- Stage 4: From the ten-yard line, six rounds are fired in seven seconds center mass.

b. Semiautomatic weapons with a magazine capacity of less than 12 rounds and 6 shot revolvers will begin loaded with 6 rounds in the weapon and 3 magazines or speed loaders loaded with 6 rounds each in the magazine pouch.

- Stage 1: From the one-yard line, six rounds are fired in four seconds. Two from retention center mass, shooter takes one step...
Stage 2: From the five-yard line, six rounds are fired in six seconds. All rounds fired center mass. Complete an out of battery reload, follow through, assess, and holster.

Stage 3: From the seven-yard line, six rounds are fired in six seconds center mass. Reload, follow through, assess, and holster.

Stage 4: From the ten-yard line, six rounds are fired in seven seconds center mass, follow through, assess, and holster.

5 shot revolvers will begin loaded with 5 rounds in the weapon and 3 speed loaders loaded with 5 rounds each in the magazine pouch.

Stage 1: From the one-yard line, five rounds are fired in four seconds. Two from retention center mass, shooter takes one step to the rear and fires three from point center mass. Reload (Not timed), follow through, assess, and holster.

Stage 2: From the five-yard line, five rounds are fired in six seconds. All five rounds fired center mass. Reload (Not timed), follow through, assess, and holster.

Stage 3: From the seven-yard line, five rounds are fired in six seconds center mass. Reload (Not timed), follow through, assess and holster.

Stage 4: From the ten-yard line, five rounds are fired in seven seconds center mass, follow through, assess, and holster.

2. **MODE OF FIRE.** Revolvers shall be fired double-action only during all stages. Semi-automatic pistols shall be fired double-action only on the first shot and single-action only on all subsequent shots at each stage.

3. **TARGET.** Each course of fire shall utilize one FBI Q silhouette target.

4. **SCORING.**

a. Semiautomatic weapons with a magazine capacity of 12 rounds or more. Scoring will be based on the hit/miss system. Scoring shall include all shots located within the marked silhouette or touching the line of the silhouette. The minimum passing score is 80%. Twenty hits inside the silhouette constitute a passing score. The firearms instructor administering the shoot shall resolve any disputed shot placement. Shots located outside of the silhouette shall be counted as misses. Shots made after the time limit shall result in a deduction of 1 point from the overall score for that course of fire. A total possible score for a single course of fire is 25.

b. Semiautomatic weapons with a magazine capacity of less than 12 rounds and 6 shot revolvers. Scoring will be based on the hit/miss system. Scoring shall include all shots located within the marked silhouette or touching the line of the silhouette. The minimum passing score is 80%. Nineteen hits inside the silhouette constitute a passing score. The firearms instructor administering the shoot shall resolve any disputed
shot placement. Shots located outside of the silhouette shall be counted as misses. Shots made after the time limit shall result in a deduction of 1 point from the overall score for that course of fire. A total possible score for a single course of fire is 24.

c. Five Round Revolvers. Scoring will be based on the hit/miss system. Scoring shall include all shots located within the marked silhouette or touching the line of the silhouette. The minimum passing score is 80%. Sixteen hits inside the silhouette constitute a passing score. The firearms instructor administering the shoot shall resolve any disputed shot placement. Shots located outside of the silhouette shall be counted as misses. Shots made after the time limit shall result in a deduction of 1 point from the overall score for that course of fire. A total possible score for a single course of fire is 20.

5. QUALIFYING. In order to satisfactorily complete the Sheriff's Office Firearms Qualification, a qualifying score and weapon proficiency must be demonstrated to the satisfaction of the firearms instructor.

a. All sworn personnel who carry semiautomatic weapons shall fire a single 25 round course of fire. Six shot revolvers shall fire a single 24 round course of fire. All sworn personnel who carry five shot revolvers shall fire a single 20 round course of fire. All rounds fired are on a single FBI Q target and a qualifying score shall be a minimum of 80% of the possible total score. There is a maximum of 25 points possible for high capacity semiautomatic weapons and 24 points for low capacity semiautomatic weapons and six shot revolvers, and a maximum of 20 points for five shot revolvers.

b. All sworn personnel must demonstrate proficiency in safe manipulation of their weapon.

III. SHERIFF’S OFFICE FIREARMS QUALIFICATION COURSE. (RIFLE)

1. Rifle Qualification. The course shall be conducted by a trained rifle instructor and will consist of classroom instruction, demonstration, practical application on the range, a written test, and live fire qualification. When practical, this Basic Rifle Course will be presented and conducted following a POST-approved course outline and course of instruction (to allow the employee to meet the requirements of PC 12020 when handling and deploying other agency weapons.)

a. Qualification. Qualification with the Rifle will consist of firing 32 rounds on an approved course of fire. To qualify, deputies must strike the target a minimum of 25 times (80%). The approved course of fire is:

<table>
<thead>
<tr>
<th>Distance</th>
<th>Action/Drill</th>

b. **Requalification.** Requalification with the rifle will consist of completing the same course of fire as done for qualification.
I. INITIAL APPLICATION.

A. SHERIFF’S DESIGNEE. Applications and licenses for the carrying of a concealed weapon (CCW) are issued by the Sheriff, or his/her designee, and registered with the California Department of Justice pursuant to provisions associated with California Penal Code Sections 26150-26225.

1. The Sheriff’s Designee, for the daily administration of the program is the Internal Affairs Lieutenant.

B. Authorized signatory to Concealed Weapons Licenses is the Sheriff.

C. PROVIDING APPLICATIONS. Any resident of Contra Costa County who is a United States citizen and/or is otherwise permitted to purchase a firearm in the State of California will be issued the appropriate application forms and instructions upon request. Such request may be received in person, by phone or United States mail.

D. RESTRICTING ABILITY TO APPLY. The ability of a citizen to apply for a CCW will not be abridged or restricted.

E. MAINTAINING APPLICATIONS. Applications and instructions will be provided by Sheriff’s Administration, and Internal Affairs.

F. MAINTAINING RECORD OF ISSUE. Internal Affairs will maintain a log or registry of CCW Licenses issued. This record will contain, as a minimum, the following information:

1. The number of licenses issued to civilians;

2. The number of licenses issued to Reserves; and

3. The number of licenses issued to judges.

G. REPORTING REQUIREMENTS. Annually, Internal Affairs will submit to the California Attorney General the total number of CCW licenses issued to Reserve officers and the number issued to judges.²

---

1 Proof of citizenship, either native-born, naturalized, or as a resident alien, is required.
2 Pursuant to P.C. §26225 (effective 1/1/2011)
H. PROHIBITION AGAINST REPRODUCTION. Internal Affairs is charged with maintaining control and accurate records on the application, processing and issuance of CCW licenses. Therefore, applications and instructions will not be reproduced or copied, except by Internal Affairs. Reproduced applications shall not be processed (original only.)

I. COMPLETION OF APPLICATION. It is the responsibility of the applicant to accurately complete all components of the application.

1. The application must be on the latest revision of the California Department of Justice application “License to Carry Concealed Weapon” form and in the format required by the Sheriff’s Office at the time the application is received.

2. There is no requirement that applications be typed, however, applications that are not clearly readable, understandable, or incomplete will be rejected without action or prejudice.

3. If an application is complete and acceptable for processing, the applicant will be advised, by a series of letters, as to the next step required, such as fingerprinting, formal interview, and training requirements. Each such letter shall require that the respective step be completed and the information sought submitted within the time specified in the letter. The failure to abide by these timelines shall be considered an abandonment of the application and the application and all submissions will be destroyed.

J. SUBMISSION OF COMPLETED APPLICATION. All applications for a CCW may be mailed or delivered in person to:

1. Contra Costa County Office of the Sheriff
   Concealed Carry Weapons Processing Unit / Internal Affairs
   651 Pine St., 11th Floor
   Martinez, CA 94553

II. FEES.

A. ESTABLISHMENT OF FEES. Fees are established by statute (P.C. §26190).

B. ANNOUNCEMENT OF FEES. Fees shall be itemized and listed in the application instructions provided with each application. Fees paid are not reimbursable.

III. BACKGROUND INVESTIGATION.

A. OVERVIEW. The purpose of a background investigation is to determine an applicant’s qualification and establish some reasonable expectation of suitability for a CCW.

B. CONFIDENTIALITY. Information developed during a CCW background investigation, unless specifically waived by the applicant or subject to disclosure under the California Public Records Act, shall be deemed confidential except in cases where evidence of unreported criminal activity surfaces.

1. All applications shall include a waiver informing the applicant that their name and reason for issuance of a CCW may be released to the newspapers or other persons requesting information. (Government Code 6250, et seq. and CBS INC. vs. BLOCK, (1986), 41 Cal 3rd 646).

C. WAIVERS. Applicants may be requested to grant the Sheriff’s Office specific releases necessary to the making of an informed evaluation of the applicant. Such information
access may include, but is not limited to: employment, medical, judicial and financial.

D. SPECIFIC CONSIDERATION. The applicant’s background shall address, as minimum, the following areas:

1. Criminal, civil, and social history
2. Physical ability to handle a firearm
3. Emotional stability to control a firearm

E. METHODOLOGY. The background investigation is divided into three phases, commencing with information provided by the applicant. These are non-invasive, direct, and reference investigations as described below.

1. Non-Invasive Investigation. A non-invasive background examination is records oriented and generally consists of the following historical reviews: federal, state, and local criminal history; civil history including restraining orders; tax and Assessor’s rolls; and driver’s license history.

2. Direct Investigation. A direct investigation will consist of a personal interview with Sheriff’s personnel and may include a home visit, contact with the applicant’s employer, co-workers, neighbors or other persons of interest to whom the applicant is known.

3. Reference Investigation. A reference investigation shall generally focus on a specific professional assessment of the candidate. Such inquiries are designed to determine freedom from physical or emotional impairment which, when coupled with a concealed firearm, could place the applicant or others at risk. The scope of this investigation may vary based upon the candidate, non-invasive and direct findings, and the needs of public safety.

F. NOTIFICATION. The Sheriff’s Office must notify an applicant, in writing, if their application has been approved or denied within 90 days of the original application or within 30 days after receipt of the applicant’s criminal background check from the Department of Justice, whichever is later.

IV. LICENSE RESPONSIBILITIES AND RESTRICTIONS.

A. LICENSE TIME LIMITS. Generally, licenses are valid for twenty-four (24) calendar months and expire on their issue anniversary date. For information on licenses having a greater than two-year life and for additional restrictions, see the following sections: Revocation, Seizure or Amendment of License, Special Purpose Licenses (law enforcement), and Renewals.

B. GENERAL RESPONSIBILITY. The license holder is responsible for compliance with any regulations or conditions imposed by the Sheriff. In addition, the license holder is responsible for the exercise of good judgment and sound decision-making in the care, transport, holstering, discussion, display, and/or use of a licensed weapon.

1. In the event a license holder is detained or arrested by any law enforcement officer, and is carrying a firearm at such time, the license holder shall immediately present his/her CCW along with his/her California Driver License to the officer.

2. In the event a license holder is detained or arrested by any law enforcement agency, or he/she is asked to present his/her CCW License to any peace officer, the license holder shall notify Contra Costa County Sheriff’s Internal Affairs as soon as it is practical to do so. This notification shall be made to the Internal
Affairs Lieutenant and will require the license holder to describe the details of the law enforcement contact.

3. A license holder must notify the Sheriff’s Office Internal Affairs within 10 days of any change in residence address.

4. A license will expire 90 days after the license holder moves from Contra Costa County if the residence was the basis for the issuance of the license.

C. GENERAL RESTRICTIONS. The Sheriff may exercise a variety of options within the law to ensure public safety. These may include, but are not limited to:

1. The application of specific restrictions on CCWs
2. The granting of probationary or provisional CCWs
3. Mandate of inspections, weapons qualifications, and reevaluation of license holder’s fitness
4. Any other reasonable and appropriate conditions regarding an individual requesting or renewing a CCW license

D. RESTRICTIONS BY ACT. Any of the following or similar acts while in possession of a firearm shall be considered a violation of the license holder’s general responsibilities as specified above:

1. Violation of law
2. Under the influence of alcohol or any narcotic/drug, including an adverse reaction to prescription medications
3. Any unjustified display
4. Failure to show the license to any peace officer upon demand
5. Failure to surrender weapons to any peace officer upon demand
6. Impeding or interfering with any peace officer
7. Possessing a weapon altered from its originally approved design
8. Any other act, omission or commission, deemed by the Sheriff to violate these regulations and/or the Sheriff’s reasonable expectation of sound judgment and responsible conduct

E. SHERIFF’S RESERVATION OF RIGHT. The Sheriff may revoke, amend or impose any specific restrictions on a licensee as deemed reasonable and appropriate by the Sheriff. These restrictions need not be specifically cited in these regulations but may be assigned to each license as needed or warranted to be in the public good.

V. DETERMINATION OF GOOD CAUSE.

A. GENERAL. The Sheriff’s determination of good cause is based on an overall consideration of public good and safety.

---

3 The act of possession is complete whenever a firearm, its ammunition, and the person can be united with relative ease. Hence, a license holder arrested for driving under the influence and having a weapon in the glove compartment of the car and ammunition in his/her pocket would be considered to be in “possession.”
B. GOOD CAUSE. CCW applicants must demonstrate good cause. Such cause may vary based on the nexus between one or more of the following factors: degree or frequency or exposure to harm, employment, demographics and victimization or risk to applicant averted by the granting of a CCW.  

1. In making a determination as to good cause, the Sheriff will consider all available information and, where there exists a sufficient nexus between the approval of a CCW and the avoidance of victimization, the Sheriff will make that decision most beneficial to public good and safety. A fear of victimization, unsupported by articulated facts that would cause a reasonable person to believe that he or she was specifically and personally targeted for serious harm, is generally insufficient to support the good cause requirement. Similarly, the desire to carry a firearm, unaccompanied by other factors that support good cause, is generally also insufficient. In making a determination, the Sheriff will rely primarily on standards, personal history, training and professional evaluations of the applicant, in addition to other factors.

VI. RENEWALS.

A. GENERAL. The application must be on the latest revision of the California Department of Justice application “License to Carry Concealed Weapon” form and in the format required by the Sheriff’s Office at the time the application is received. All applicants renewing their licenses are to complete this form in its entirety and may be subject to a full background investigation to determine if any changes have occurred since the initial issuance of the license. This process will be administered by Internal Affairs. All licenses issued may, absent other administrative action, be renewed and reissued as long as the justification for the license has not materially changed.

B. FEES. The Sheriff may, when appropriate, assess such fees as are necessary to recover the costs associated with renewal of a CCW License. Those costs will be listed in the application instructions.

C. PROPERTY RIGHTS. An applicant, even if once approved for a CCW, neither earns nor holds any property right to a license and/or its renewal.

D. LIBERTY RIGHTS. An applicant, even if once approved for a CCW, neither earns nor holds any actual, inferred or implied liberty rights resulting from, or in relation to, a license and/or its renewal.

VII. CCW LICENSE ISSUE, NUMBERING AND INSPECTION.

A. California Department of Justice, Bureau of Firearms, License to Carry Concealed pistol, revolver, or other firearm within the State of California will be completed and provided to successful applicants after all requirements and fees have been paid. Licenses issued by the Sheriff shall clearly specify the CCW License expiration date, limitations, weapon(s) and such other data as deemed appropriate.

---

4 Contra Costa County consists of urban, suburban, rural and wilderness areas. What may be reasonable cause in one area of the County may be wholly unreasonable in another area.

5 In general, acts associated with the normal course of living, working, and conducting business shall not constitute sufficient cause for issuance of a concealed weapons license. However, the totality of circumstances surrounding the applicant and the application will be considered. For example, a CCW will not be issued solely because the applicant “handles money,” but may be issued based on the volume of money, frequency, absence of alternatives, history of victimization, and related factors. Correspondingly, an issued license may be either unrestricted or subject to specific limitations.
B. CCW Licenses shall be numbered and controlled as to clearly identify the applicant and all related information within the Sheriff’s records.

C. All licenses are subject to inspection upon demand by the Sheriff or any peace officer.

D. The Sheriff shall provide, upon demand, any information required to be disclosed pursuant to the California Public Records Act. The Sheriff may charge a reasonable fee for the research, reproduction and/or presentation of such information.

VIII. WEAPONS: TYPE, QUALIFICATIONS AND TRAINING.

A. TYPE. Only those weapons allowable on the Sheriff’s Range shall be approved for use. Those approved weapons shall be the product of a recognized manufacturer; free from mechanical and other flaws, within tolerances determined by manufacturer’s specifications; and in good working order.6 Weapons approved shall be either a revolver or semi-automatic handgun with an ammunition capacity of no fewer than five rounds.

1. Revolvers. The following revolvers are authorized for use as a concealed weapon:

   a. Make. Smith & Wesson, Colt or Ruger; additional makes must be pre-approved by the Internal Affairs Lieutenant.

   b. Caliber. Not less than .32 caliber, nor greater than .45 caliber.

   c. Barrel. Not less than 2 inches, nor greater than 6 inches.

   d. Sights. Fixed or adjustable.

   e. Finish. Blued, parkerized, nickel, chromed or stainless steel.
