2. Semi-automatic. The following semi-automatic handguns are authorized for use as a concealed weapon:

   a. Make. Smith & Wesson, Beretta, Sig Sauer, or Glock; additional makes must be pre-approved by the Internal Affairs Lieutenant.

   b. Caliber. Not less than .32 caliber, nor greater than .45 caliber.

   c. Barrel. Not less than 2 inches, nor greater than 6 inches.

   d. Sights. Fixed or adjustable.

   e. Grips. Standard.

   f. Additional. Internal Firing Pin Block Safety; manual decocking lever/safety and firing pin safety. (First round can be fired double-action.)

3. Licenses will not be issued for derringer or other “hide-away” type weapons.7

B. TRAINING REQUIREMENTS.

---

6 It is impractical to list every potential manufacturer. Questions concerning a particular firearm may be directed to the Sheriff’s Range Master/Armorer. The final decision on the quality, and therefore safety, of a firearm not listed shall rest with Internal Affairs.

7 Commonly, these weapons are designed for excessive concealment and may include, but are not limited to, wallet guns, buckle guns, sleeve guns, hat guns, etc. This shall include any weapon, regardless of manufacturer ammunition capacity, as determined to be inappropriate for use by Internal Affairs.
1. New CCW Applicants. New applicants must successfully pass a course of instruction/training as provided or recognized by the Office of the Sheriff prior to the issuance of the license. During the course of that instruction/training, the applicant must pass a written exam and demonstrate firearms proficiency during a qualification shoot by a qualified Sheriff’s Office range master.

2. CCW License Renewals (every 2 years). Prior to renewal, complete a 4-hour legal firearms update refresher course. Renewal applicants must qualify on each weapon listed on CCW License.

3. The Office of the Sheriff will develop and maintain a course of instruction/training or approve a course provided by local community colleges. This course shall be offered in such locations, at such times, and with such frequency as to allow for reasonable applicant access. It will consist of the following:
   a. Firearms safety;
   b. Weapons maintenance and inspection;
   c. Actual demonstration of firearm skill;
   d. Inspections and approval of weapon to be carried;
   e. California laws regarding the possession and use of firearms; and
   f. Use of force.

4. The cost of this course shall be the responsibility of the applicant.

C. QUALIFICATIONS.

1. The Sheriff’s Office may waive the required course of instruction/training upon certification of acceptable, like training, i.e., 832 P.C. Course, Reserve Officer training, NRA Firearms Instructor, etc.

2. The Sheriff’s Office will not waive the requirement that the applicant demonstrate firearms proficiency during a qualification shoot by a qualified Sheriff’s Office range master.

3. Range Qualifications. Licensees must qualify biennially (every 2 years) or upon renewal of license with the weapon(s) / type(s) listed on license. If additional weapons are desired, qualification is required on all weapons listed on CCW License.

4. Failure to successfully pass the course of instruction upon remediation shall constitute failure and termination of the new and renewal applicant process.

IX. DETERMINATION OF PHYSICAL FITNESS / PSYCHOLOGICAL TESTING.

A. PHYSICAL FITNESS. The applicant may be required to provide certification from a competent medical doctor acceptable to the Sheriff, on a form specified by the Sheriff, attesting to the fact the applicant is free from physical characteristics which, when coupled with a firearm, might present an unacceptable risk to the applicant or others.8

---

8 The Sheriff reserves the right to specify and or reject certification without a showing of cause. Generally, such examination from a recognized health maintenance organization (HMO), hospitals, clinics, and established general practice physicians will be accepted.
1. Such an examination may include, but is not limited to, reasonable eye sight and hearing, regular consumption of mood or muscle reflex-altering medications and neurological disorders.  

2. The cost of this examination shall be the responsibility of the applicant.  

B. PSYCHOLOGICAL TESTING. The applicant may be required to undergo a psychological evaluation from the Sheriff’s Office psychologist or psychiatrist that he/she is free from mental disorders which might, when coupled with a firearm, present an unacceptable risk to the applicant or others.  

X. WAIVER OF FEES OR CONDITIONS.  

A. WAIVER OF FEES. Fees may be waived under the four following conditions:  

1. Where the fee is for completion of a redundant service.  
2. Where the fee is for a service separately certified.  
3. Where the fee imposes an undue hardship.  
4. County fees for a Sheriff’s Office Reserve Officer.  

XI. REVOCATION, SEIZURE OR AMENDMENT OF LICENSE.  

A. The Sheriff reserves the right to revoke, seize, amend or not renew any CCW at any time.  

1. When a CCW is revoked, seized, amended or not renewed, the Internal Affairs Lieutenant may, but is not obligated to, hear matters of mitigation presented by the applicant. The Sheriff is the final authority in all contested licenses or restrictions.  

2. As the holder of a CCW, the holder has neither a property nor liberty right to the license, the Sheriff is not obligated to demonstrate cause for the revocation, seizure, or amendment of conditions associated with that license.  

3. The Sheriff shall not be liable for any costs incurred by the applicant arising from the applicant’s anticipation or holding of a license subsequently revoked, seized, amended or not renewed.  

4. When the Sheriff takes action under this section, the applicant shall not be

---

9 Each applicant will be evaluated on his/her own merit. While some characteristics, such as loss of hearing, might seem to automatically exclude an applicant, this may not be the case when the totality of circumstances is considered.  
10 The same general conditions as discussed for physical fitness above, shall apply to psychological testing.  
11 Where there is a competent record already on file with the Sheriff that meets the requirement of the CCW application.  
12 Where a certificate of equivalency is on file with the Sheriff, the fee and performance may be waived. A common example might be Internal Affairs’ acceptance of prior weapons training, resulting in waiver of the classroom training and resulting fee.  
13 The Sheriff may waive all or part of the fees for services rendered by the Sheriff’s Department upon a showing of cause. Such cause shall normally consist of a demonstration by the applicant, through official governmental records, the total payment of these fees would constitute an undue hardship. The waiver of fees shall require the approval of the Sheriff. The Sheriff may not waive, absorb or intervene on behalf of an applicant for fees required by another service provider, e.g., a physician.
XII. SPECIAL PURPOSE LICENSES (Law Enforcement).

A. GENERAL. There are a variety of law enforcement and governmental personnel, either active or separated under honorable conditions, who may not meet the specific requirements of being a “peace officer” or “member of the criminal justice system” as defined by the California Penal Code or defined elsewhere within these procedures.

1. Such persons may, for example, be associated with federal agencies, foreign governments or be peace officers or officers of the court within another state or territory of the United States.  

2. The Sheriff reserves the right, but is not compelled, to accept and treat such persons as having prima facie reasonable cause for issuance of CCW Licenses or certification and/or to treat them as Sheriff’s Office employees for the waiver fees or conditions.

B. Pursuant to California Penal Code Section 26220, CCW licenses may, at the Sheriff’s discretion on an individualized basis, be issued to the following individuals for a period of four (4) years:

1. A Reserve peace officer appointed pursuant to Penal Code Section 830.6. (This includes Level I, II, and III Reserves, per Penal Code Section 832.6).

C. Sitting judges shall be issued a CCW license for a period of three years.

XIII. AUTHORITY TO CONDUCT RANDOM INSPECTIONS.

A. GENERAL. The Sheriff reserves the right to inspect any license, weapon or associated equipment at will.

1. The refusal or failure of a license holder to comply with a request or demand for such inspection within a reasonable time, given the prevailing circumstances of that request or demand, shall subject the license to immediate revocation.

XIV. NUMBER OF WEAPONS ALLOWED PER LICENSE.

A. GENERAL. Licenses shall normally be limited to no more than two (2) weapons. Any exception to this standard shall be considered a waiver of conditions and requires the express approval of the Sheriff.

1. All weapons authorized by the license must be registered to the applicant.

XV. SPECIFICATION OF AMMUNITION.

A. GENERAL. The type of ammunition carried and used will be within the guidelines as defined by Internal Affairs.

---

14 For example, where a license is amended to add restrictions or take some other action deemed appropriate by the Sheriff, and these changes require a new license be issued, the applicant will not be charged for the cost of issuing the new license. If, however, the applicant requests an amendment to conditions or restrictions imposed on a license, and that request is granted and requires the issuance of a new license, the applicant may be charged for the cost of issuing the new amended license.

15 Penal Code Section 25650 as it relates to honorably retired federal officers or agents of federal law enforcement agencies.

16 See Waiver of Fees or Conditions.
1. Ammunition designed to fragment, explode, inject or that is capable of penetrating body armor or armor plating, is prohibited. The mere fact that such ammunition is available for sale or is not prohibited by other laws of California or the nation is immaterial.

2. Pellet rounds, commonly called “Snake Shot,” may be used as appropriate.

3. Dart rounds or rounds containing animal tranquilizer may be carried if the licensee is certified, qualified and has appropriate need and use for such ammunition. Authorization for this, or other specialized ammunition, must be specified at the time of application and be reflected on the license as a special authorization.

4. Violation of these conditions shall subject the license to revocation.

XVI. ALTERATION OF WEAPON.

A. GENERAL. The alteration of a weapon approved for a CCW is prohibited.

1. This includes the addition of equipment, alteration of trigger pull, trimming of springs, honing or filing of mechanical parts or any similar or related alteration.

2. The addition of flashlights, laser sights, expanded capacity or extended magazines, or similar modifications, are prohibited and shall constitute an alteration.

3. The alteration of a weapon shall be cause for the immediate seizure of the weapon and revocation of the license. ¹⁷

XVII. NUMBER OF LICENSES ALLOWED.

A. GENERAL. The Sheriff may, at his/her discretion, limit the total number of licenses allowed at any one time or within any geographical zone or political subdivision of the County.

XVIII. SHERIFF’S OFFICE EMPLOYEES.

A. GENERAL. Not all Sheriff’s Office employees, by mere virtue of their employment, possess prima facie reasonable cause for possession of a CCW. This determination, unless specified elsewhere within these procedures, shall be made on an individual basis.

B. Sheriff’s Office employees shall not be subject to County fees for services provided by the Sheriff as part of the CCW application process. However, the Sheriff may not absorb the costs of fees required by other agencies for issuance of a CCW. ¹⁸

C. Sheriff’s Office employees already subjected to a law enforcement background investigation, Contra Costa approved physical examination, psychological examination or related physical, emotional and character examinations need not repeat, unless there is

¹⁷ A license issued for one or more specific weapons does not extend to any other weapon or to a weapon altered in violation of the license. Therefore, the possession of such a weapon carried concealed within a vehicle or the person is not protected by the CCW and is in violation of provisions associated with California Penal Code Sections 26150-26225 (et. seq.).

¹⁸ The Sheriff may not make a gift of public funds. Therefore, for example, if the Department of Justice requires a new set of fingerprint cards to be filed with a CCW License and charges a fee for processing these cards, then the cost of that service must be paid by the employee. The same would apply to the costs associated with a reevaluation of physical fitness or psychological testing, if warranted.
specific cause, these procedures for the purpose of a CCW application.¹⁹

D. The granting of a CCW to a member of the Sheriff’s Office shall be specifically noted and posted in that individual’s official personnel file, located in Sheriff’s Administration.

E. All Sheriff’s Office employees applying for a CCW must meet the following minimum qualifications:

1. Must be off initial probation (re-hires will be evaluated on a case by case basis).
2. Not be a subject of an internal investigation.
4. Have a current evaluation report rated “meets standards” or above.
5. Complete a course of instruction as provided in Section VIII. C. or provide documentation of completion of an acceptable firearm safety course.

F. Those employee applicants who reside in Contra Costa County will:

1. Complete a memorandum requesting the CCW application form and their reasons for the request. The memorandum shall be forwarded to their Bureau Assistant Sheriff via their Chain of Command.
2. The Bureau Assistant Sheriff will review the request for the application and return it to the applicant indicating the Sheriff’s Office will/will not process their application further and state reasons for denial.
3. If approved by the Bureau Assistant Sheriff, the applicant will forward the endorsed request for the CCW application to Internal Affairs for further processing.

G. Those Sheriff’s Office employee applicants who reside outside of Contra Costa County will: ²⁰

1. Complete a memorandum requesting a favorable recommendation to another county jurisdiction regarding their CCW application process. The memorandum shall be forwarded to their Bureau Assistant Sheriff via their Chain of Command.
2. The Bureau Assistant Sheriff will review the request for a recommendation and return it to the applicant indicating the Sheriff’s Office will/will not make a positive recommendation to another county or state the reason for denial.
3. If approved by the Bureau Assistant Sheriff, the applicant’s request for a positive recommendation will then be forwarded to Internal Affairs for processing and preparation of the letter for the Sheriff’s signature.

H. All firearms qualifications for a CCW shall be conducted on off-duty time.

I. All general employees are prohibited from carrying a concealed weapon at any time while on duty with the Sheriff’s Office; this includes general employees who have a CCW License unless they have the permission of the Sheriff pursuant to Sheriff’s Office Policy

¹⁹ In this case “cause” may include a variety of factors. The physical health, emotional stability, performance or conduct of an employee may have changed between original hiring and CCW application. Such changes may not impact the individual’s job retention, but may warrant reevaluation in considering granting a license to carry a concealed weapon.

²⁰ The Sheriff cannot issue a standard license to any person not residing within Contra Costa County. However, he/she can recommend to another county favorable consideration be given to the applicant.
Section 1.07.35, On-Duty General Employee Possession of Concealed Weapon.

J. Upon separation from the Sheriff’s Office, the continued possession of the CCW shall be evaluated. The license may be revoked at the discretion of the Sheriff.

K. When a CCW is issued to any Sheriff’s Office employee who resides in a Contra Costa County Municipality, the Sheriff’s Office will notify that police department of the issuance and restrictions.

XIX. SHERIFF’S JURISDICTION FOR ISSUE OF CCW LICENSES.

A. GENERAL. The Sheriff may issue licenses to any eligible resident of the County. Non-resident Reserve Deputy Sheriffs are also eligible. The Sheriff shall not issue a CCW to any person within a prohibited class as defined by Federal or State law.

B. The Sheriff will generally not issue a license to any person residing within a municipality that doesn’t have police services contracted with the Sheriff.

1. Persons residing in a municipality should contact their local Police Chief and apply for the license there.21

2. Applications submitted to the Sheriff’s Office by residents of a municipality who have not first applied with their local Police Chief may be denied without prejudice.

3. Residents of a municipality who have applied with their local Police Chief and allowed sufficient time for a decision to be made, may apply or renew their application for a CCW with the Office of the Sheriff.

   a. It is the responsibility of the applicant to provide sufficient evidence confirming the status of his/her application with the Chief of Police where he/she resides.

   b. Any action by the Chief of Police of the municipality where the applicant resides will be given appropriate weight for the approval or denial of an application for a CCW with the Sheriff’s Office. However, that action will not be the sole consideration when deciding the merits of an applicant’s “good cause.”

C. If notified by the Department of Justice that a current license holder is within a prohibited class, the Sheriff’s Office shall revoke his/her license and may take whatever legal steps are available to recover the license.

XX. RELATIONSHIP TO ALLIED AGENCIES.

A. The Sheriff may treat County residents who are employed within the Criminal Justice System of an allied jurisdiction as if they were Sheriff’s Office employees.

B. The Sheriff may deny such consideration where the same waivers and considerations are not provided to Sheriff’s Office employees.

21 Reference Section XXI of this policy regarding Municipalities contracting with the Sheriff for general law enforcement services.
XXI. CONTRACT CITY MUNICIPAL CODES.

A. GENERAL. Municipalities contracting with the Sheriff for general law enforcement services shall consider these procedures as incorporated into their services contract as a part of General Administrative Support Services.
I. SUBMITTING DOCUMENTATION.

A. Gather the required documentation CCCERA (Contra Costa County Employee Retirement Association) needs to process your retirement:

1. Your birth certificate.
2. Birth certificates of all your beneficiaries.
3. Social Security Numbers (SSN) of all your beneficiaries.
4. Marriage Certificate if you are married, or State of California Domestic Partnership Registration, if you are a registered domestic partner.
5. Divorce Decree, if you are/were divorced.
6. If you have any service in Tier 2, you must submit an estimate from the Social Security Administration before your final benefit calculation is completed.
7. Request an Application for Service Retirement packet from CCCERA. (Call 925-646-5741).
8. Submit your completed application along with required documentation no earlier than 2 months (60 days) before your planned retirement date to:

   a. CCCERA
      1355 Willow Way, Suite 221
      Concord, California 94520

B. RETIREMENT MEMO TO DIVISION.

1. It is suggested that each employee submit a memo to his/her Division Commander not less than 30 days prior to retirement advising of the employee’s intention to retire in order that retirement checks not be delayed. It shall then be incumbent upon the Division Commander to ensure that the Undersheriff, the Administrative Services Bureau Assistant Sheriff, the Bureau Assistant Sheriff affected by the leave, the Training Division Commander, the Professional Standards Division Commander, and the Chief of Management Services receive a copy of the memo immediately.
C. IDENTIFICATION CARD.

1. Sheriff’s Administration will issue a new identification card to honorably retired safety employees in accordance with current statutes. If eligible, a Deputy Sheriff’s identification will have an endorsement stating “CCW Approved”. (A Deputy Sheriff who has retired in lieu of termination will not be issued an identification card or CCW endorsement.) Civilian employees do not receive a retiree identification card.

2. It is the responsibility of the Retiree to ensure their identification card and CCW endorsement is renewed upon expiration.

3. Retirees are required to complete the CCW Firearms Qualification course every three years and present proof of their qualification to Sheriff’s Administration. The Retiree can qualify at the Sheriff’s Range or with an Official Range Master at a location of their choice. Special retiree shoots will be scheduled two times each year by the Training Unit. One of those qualification shoots will correspond with the DSA “Old Timers Night”.

D. RETIREMENT HEALTH COVERAGE.

1. Upon retirement, employees may remain in the same County group medical and Dental plans if, immediately before their retirement, they are active subscribers to one of the County Health Plans. (Employees on authorized leave of absence without pay who have retained individual conversion membership from the County plan may also qualify.) All retiree health plan requirements are subject to the employee’s MOU and specific requirements of the employee’s health plan. All retiring employees are encouraged to research their retirement health coverage through the Human Resources Department, Employee Benefits Service Unit, Retiree Health and Dental Coverage Desk on the fifth floor of 651 Pine St., Martinez.

E. RETIREE BADGE.

1. Badges for all Safety Members, as well as badges for Dispatchers, Rangers, Aides, and Specialists shall be returned to the Training Unit. At no cost to the employee, the badge will be refurbished, and a ribbon installed at the bottom of the badge that states “Retired.”

F. BUYING YOUR HANDGUN.

1. The Office of the Sheriff may, under certain circumstances, sell a semi-automatic pistol to an honorably retiring Deputy Sheriff. The retiring Deputy must petition the Sheriff or his/her designee for permission to purchase the firearm, pursuant to CCCSO Policy Section 1.07.33. If the petition is granted, the firearm(s) will be sold for one dollar ($1.00) each.

G. ACCUMULATED SICK LEAVE.

1. Upon retirement, an employee's accumulated sick leave shall be converted to retirement time on the basis of one (1) day of retirement service credit for each day of accumulated sick leave credit.
H. RETURNING EQUIPMENT.

1. Retiring Deputy Sheriffs shall turn in all Sheriff's Office issued equipment:
   a. To Training:
      
      • Handgun
      • Three Magazines
      • Trigger Lock
      • Gun Case
      • Flashlight/Battery/Chargers
      • Two Sets of Handcuffs
      • O.C. (Pepper) Spray
      • Leather Duty Belt
      • Holster
      • Magazine Pouch
      • Two Handcuff Cases or One Double Handcuff Case
      • OC Pouch
      • Key Holder
      • Radio Holder
      • Four Keepers
      • Baton/ASP
      • Baton Holder (brass or plastic)/ASP Holder
      • Respirator Mask
      • Ballistic Vest
      • Rain Gear
      • Locked Container (Hornady Lockbox)
      • Taser/Cartridge/Battery/Taser Holster
      • Gas Mask/Filters/Holder
   
   b. To FOB:
      • FOB Card
      • Report Writing Manual
c. To Your Duty Station:
   • Department Keys
   • Patrol Rifle/Magazine Holder/Three 30 Round Magazines (Patrol Division)
   • Active Shooter Kit (Patrol Division)
   • Any Additional Duty Station Equipment Assigned

I. RECOGNITION CEREMONY.

Sworn or General employees with a minimum of ten years working in the field of law enforcement, with five of those years being with the Office of the Sheriff, who are honorably retired, will be invited to participate in a dinner or receive recognition during a scheduled Oath of Rank/Oath of Office ceremony (at the discretion of the Sheriff.) All employees being recognized will receive the same recognition regardless of job classification or rank. The dinner/award ceremony will be held annually. Each employee will be recognized by an introduction and a brief synopsis of his/her career and given a plaque of recognition.
## I. APPROVED BADGE IMAGES.

A. The following photographs and graphic images are the only approved badge images allowed by the Office of the Sheriff. Other variants of the badge image (example: the LETC uses an approved image with the words Law Enforcement Training Center above and below the badge), and new photographs and alternative images may be used for specific applications upon the approval of an Assistant Sheriff.

1. The black and white Sheriff-Coroner badge image.

2. The Photographed Sheriff Badge.

3. The Photographed Sheriff-Coroner Badge.
4. The Photographed Sheriff Badge without name ribbon.

5. The full color Sheriff-Coroner badge image.
Contra Costa County
Office of the Sheriff
Air Support Unit
Policy and Procedure
2018
Preface

The purpose of this Manual is to establish policy, direction, guidelines, and operational procedures for managing the Office of the Sheriff Air Support Unit.

The objective of this Manual is to provide standardization in the use of aircraft, reporting procedures, flight operations, aircraft maintenance, personnel selection criteria, training procedures and to ensure Departmental aircraft are used in an effective, efficient, and safe manner. Safety, above all else, is the primary concern in each and every operation.

This version of the Manual supersedes all previously issued versions of the Air Support Unit’s Manuals, but it does not supersede any applicable State, Federal Laws and Regulations.

As FAA regulations, industry standards, and mission procedures evolve, so must the content of this Manual. Therefore, it is imperative that all personnel assigned to the Air Support Unit be given the opportunity to provide suggestions during the annual review and updates.

Mission Statement

The mission of the Air Support Unit is to enhance community safety and protect life and property by assisting Sheriff’s Patrol, Marine Patrol, and allied law enforcement agencies in their capabilities to provide law enforcement services.

Additionally, the Office of the Sheriff Air Support Unit shall use its airborne resources to protect the lives and property of the community by preventing and detecting crime, providing aerial support to locate and assist in the apprehension of wanted persons, and to conduct search and rescue missions, both on the water and land, throughout Contra Costa County.

Finally, the Air Support Unit can be requested to perform any task that can best be accomplished in the air in a safe, efficient, and effective manner.

Captain Steve Borbely
Special Operations Commander
September 2018
### Administration

1.1 Purpose of the Air Support Unit Manual
1.2 Organization, Structure, and Duties
1.3 Air Base Operations
1.4 Hours of Operations
1.5 Uniforms and Personal Equipment

7.4 Special Weapons and Tactics (SWAT) Operations
7.5 Formation Flights

**Appendixes**

Appendix 1
Appendix 2
Appendix 3
I. POLICY.
   A. The Air Support Unit (ASU) will provide aerial assistance and support to all law enforcement patrol, maritime personnel, and other first responder agencies within Contra Costa County.
   B. Aviation safety will be paramount during all flight operations conducted by the Air Support Unit.

II. GENERAL INFORMATION.
   A. PURPOSE AND SCOPE.
      1. The purpose of the ASU manual is to:
         a. Maximize safety in aviation operations by providing operational policies, procedures, and guidelines.
         c. Provide clear standards for the pilots and air crew members.
         d. Comply with FAA regulations and industry standards set forth by outside agencies, Cal-Fire, the Airborne Law Enforcement Association (ALEA), and Helicopter Association International (HEI).
   B. ANNUAL REVIEW.
      1. The Air Support Unit Lieutenant shall review the ASU manual on an annual basis and make any revisions and / or changes to reflect current unit standards, procedures, flight operations, and FAA regulations.
      2. The Special Operations Division Captain will authorize any policy changes.
      3. Any policy changes and manual revisions shall be made available to all members of the Air Support Unit.
I. ORGANIZATION.
A. The Air Support Unit is under the command of the Marine Services Unit within the Special Operations Division. The Marine Services Unit Commander reports to the Special Operations Division Commander.
B. All aircraft utilized by the Air Support Unit are owned by Contra Costa County. Maintenance and support are provided by private vendors contracted through existing County procurement process.

II. STRUCTURE AND DUTIES.
A. UNIT COMMANDER (MARINE SERVICES UNIT LIEUTENANT).
1. The Unit Commander is responsible for ensuring adherence to Federal Aviation Regulations, general and unit policies and procedures, and all pertinent laws and standards for flight operations. In addition, the Unit Commander shall ensure accountability for accuracy of maintenance records and invoices, budget recommendations and control, personnel selection, identifying training, and purchasing of aviation related equipment.

B. UNIT SUPERVISOR (SERGEANT).
1. The Unit Supervisor is responsible for the day to day aviation operations including the review of all daily and monthly activity flight reports, schedule flight missions and special event requests, scheduling of air crew and aircraft, reviewing and approving crime reports, review all ride-along requests, equipment inventory and maintenance. The Unit Supervisor will also ensure the aircraft are serviced and maintained for airworthiness by the contract service provider. The Unit Supervisor shall serve as the unit’s Safety Officer.
C. TACTICAL FLIGHT OFFICER (DEPUTY SHERIFF).

1. The Tactical Flight Officer’s (TFO) primary function is to be an airborne coordinator between the aircraft and ground personnel. The senior TFO may also be called “Lead TFO” or “Crew Chief” for CRM purposes. The senior TFO will be responsible for providing training to other crew members when required. The TFO has overall responsibility of all flight missions.

2. Other responsibilities of the TFO’s include but are not limited to:
   a. At the beginning of every shift, ensuring all specialized aircraft and rescue equipment are in working order. All damaged or lost equipment are to be reported to the Unit Supervisor immediately, or as soon as practical. The equipment to be checked include:
      - •
      - •
      - •
      - •
      - •
      - •
      - •
      - •
   b. Operation of all specialized aircraft equipment during flight.
   c. Monitoring and communicating on all Sheriff’s and outside agencies’ radio frequencies, as required.
   d. Pursuit and perimeter management, if requested.
   e. Coordinating search and rescue efforts.
   f. Coordinating initial fire suppression requests and operations.
   g. Navigation of the aircraft; this includes directing flight paths and patterns (orbits). The pilot shall evaluate each request from the TFO for flight safety before performing any flight maneuvers.
   h. Maintenance, completion, and updating of all required flight reports and crime reports.

3. All TFO’s shall receive and successfully complete 10 hours of rotorcraft flight instruction from a certified flight instructor and initial ground training shall be given by the contract pilot on principles of flight.
   a. All TFO’s will continue to receive sufficient, recurring flight instruction from the Lead Pilot(s) to enable the TFO to land the aircraft safely in an emergency.

D. AIRCRAFT PILOTS (CONTRACTS).

1. Aircraft pilots are civilian contractors who have successfully completed a thorough background check, authorized to operate the Office of the
Sheriff’s aircraft, and must wear the authorized Office of the Sheriff’s flight uniform.

2. In addition to successfully completing the initial Manufacturer’s Factory Flight and Ground school for all Office of the Sheriff aircraft models, pilots must meet the following flight requirements prior to entering into a contractual agreement with the County and being designated as a pilot in command of an Office of the Sheriff’s aircraft:
   a. Must have a minimum of 3,000 hours logged as a pilot in command in a rotorcraft aircraft.
   b. Must have 2,000 hours logged in a turbine aircraft.
   c. Preferred to have 500 hours logged in night time flight and 50 hours logged with night vision goggles (NVG’s) during night time flight.
   d. The pilots must possess a current and valid Commercial and Instrument Rotorcraft rating.
   e. The pilots must maintain proficiency and currency of all required licenses, to include annual refresher training for all make and models of the Office of the Sheriff’s aircraft.

3. Other responsibilities of the pilots include but are not limited to:
   a. Assure maximum safety for all passengers and crewmembers.
   b. Act as “Pilot in Command” of assigned aircraft.
   c. Assure aircraft is airworthy prior to initial scheduled flight (pre-flight).
   d. Assure proper certificates, licenses, manuals and supplies are aboard aircraft.
   e. Conduct flight operations in accordance with federal, state, local and Unit regulations / policies.
   f. Maintain an increasing level of aviation knowledge and proficiency in accordance with industry and aviation standards.
   g. Maintain a professional manner and appearance reflected by the uniform, attitude, and bearing.
   h. Complete any aviation related assignments as designated by the Unit Supervisor or Unit Commander.

E. ADDITIONAL MISSION ESSENTIAL CREWMEMBERS.

1. Additional Mission Essential Crewmembers may be assigned and scheduled to the Air Support Unit daily and authorized to fly in the Office of the Sheriff’s aircraft during all flights. Mission Essential Crewmembers are comprised of Contra Costa County Fire Protection District (Con-Fire) Captain Paramedics and Search and Rescue (SAR) volunteers who are specifically trained in aviation rescue operations and initial attack fire suppression operations.

2. Mission Essential Crewmembers shall be part of the CRM procedures aboard the aircraft.
3. The Con-Fire and SAR personnel must be approved by the Unit Commander and must successfully complete the minimum requirements and currency proficiency standards in human external cargo and long-line operations to be considered as Mission Essential Crewmembers.

4. Mission Essential Crewmembers assigned to the Air Support Unit may be trained to serve as an additional observer from the aft seat of the aircraft. The crewmembers shall not manipulate the controls of the aircraft or TFO equipment unless under the direction and supervision of the Lead TFO.

5. Mission Essential Crewmembers shall only wear the authorized flight uniform or aviation type garments that are approved by the Unit Supervisor and Unit Commander.

6. Mission Essential Crewmembers will help with cleaning of the aircraft, maintenance of the hangar and office space, and assist with any other duty as directed by the Unit Supervisor and / or Unit Commander.
I. POLICY.

A. The Office of the Sheriff’s Air Support Unit shall follow all FAA and control tower regulations during flight operations in or near all airport airspace. Furthermore, the Air Support Unit shall foster a positive working relationship with the Operations Administration of the Buchanan Airport (Concord), the lease owner of the unit’s office space and hangar, and the local Flight Standards District Office (FSDO) / Federal Aviation Administration (FAA).

II. GENERAL INFORMATION.

A. AIR SUPPORT UNIT OFFICE AND HANGAR.

1. Unit members will not leave the building unoccupied without making sure the office and hangar have been secured.

2. Unit members will not leave the building unoccupied without making sure the office and hangar have been secured.

3. Non-Sheriff’s Office employees shall not be left unattended or unescorted inside the office or hangar.

4. All personnel are equally responsible for maintaining the building in a neat, clean, and orderly fashion.
I. SCHEDULING

A. DAILY FLIGHT SCHEDULES

1. Hours of operations will vary at times, depending on the need for the Air Support Unit and the availability of the flight crew.
   
   a. 
   
   b. The Unit Supervisor or Unit Commander shall be notified and approve working beyond the 10-hour tour of duty.

2. In the interest of safety and efficiency, guidelines on the number of duty hours a member can work in any 24-hour period are necessary.
   
   a. 
   
   b. 

3. Any air crew member shall cancel or terminate the flight anytime he or she experiences fatigue or illness that would jeopardize the safety of the flight.

4. Conditions such as weather, aircraft maintenance, or operational necessity may require alterations of the schedule. Such alterations shall be recorded on the Daily Flight Activity Log and the Unit Supervisor shall be notified as soon as practical.

5. Any deviation from this policy section can only be authorized by the Unit Commander.
6. Regular operations shall be controlled by the posted, approved monthly schedule.

7. Schedules shall be submitted to the Unit Commander for approval prior to the beginning of each month.

II. REQUEST FOR S.T.A.R.R. DURING NON-OPERATION DAYS / CALL-OUTS

A. PROCEDURE

1. Any request for S.T.A.R.R. helicopters during non-operational days or hours can be authorized by the Unit Commander or Watch Commander.

2. All other requests for outside agency aircraft shall be exhausted before calling in the Air Support Unit during non-operational hours.

3. The Air Support Unit is not mandated to be available for call-outs. The response will be determined if the pilot and a Tactical Flight Officer are available to respond.

4. The following types of incident can necessitate a need for a S.T.A.R.R. call out:
   a. Officer involved fatal incident
   b. Extended missing juvenile
   c. Missing elderly with life threatening medical conditions
   d. Search and Rescue
   e. Escapee
   f. Major felony incident
   g. Critical incidents

5. The Tactical Flight Officer or Unit Supervisor will check in with the Watch Commander or Unit Commander and request the following information:
   a. Description of the incident, involved vehicles and persons (race, clothing description, color of hair, hats, etc.).
   b. Direction of travel, time element, etc.

6. The Pilot and the Tactical Flight Officer or Unit Supervisor will have the final determination to launch during a call out request. The following shall be considered:
   a. Weather conditions
   b. Adequate rest period for the pilot and air crew members
I. POLICY.
   A. All uniform, dress and grooming standards are set forth in the General Policy and Procedures Manual and are applicable to personnel assigned to the Air Support Unit.
   B. Uniforms, flight suits, and applicable equipment will be clean and presentable at all times.

II. UNIFORMS.
   A. FLIGHT SUITS.
      1. When engaged in flight activities, the pilot and air crew members shall wear the issued fire-resistant flight suit. To be most effective, the sleeves should be rolled down and the zippers fully closed. Other protective equipment (gloves and boots) should be worn during flight.
      2. Undergarments and civilian clothing worn under the flight suits shall be made of wool or cotton. Synthetic fabrics, such as rayon or polyester, should not be worn, as they melt when exposed to fire.
      3. Flight suits will have the departmental patch on each sleeve, authorized embroidered badge over left chest, and leather name tag on the right chest. Rank insignia shall be worn, where appropriate.
      4. No part of the uniform, including distinctive caps, is to be worn while engaged in secondary employment.
      5. Deputies and contract pilots who are assigned to the Air Support Unit, and are required to appear in court, will comply with the General Policy and Procedures for dress. Flight suits are not authorized for court appearances.
      6. Any member of the Air Support Unit choosing to wear a flight suit en route to, or from, work shall cover / remove Department or Unit insignia, badges, etc.
7. Flight suits are considered safety gear and will be replaced every two years or per the manufacturers' recommendations. Any flight suit with unrepairable rips or tears will be taken out of service and replaced.

B. Deputies assigned to the Air Support Unit full time are authorized to wear the appropriate Air Support Unit pin on the Class A – C uniform shirt and/or jacket, centered just above the name tag.

III. PERSONAL PROTECTION EQUIPMENT.

A. FLIGHT HELMETS.
   1. Flight helmets shall be worn at all times while in the aircraft.
      a. Any deviation from this requirement requires approval from the Unit Supervisor.

B. BOOTS.
   1. Any department approved leather boot for wear by patrol officers or firefighting is approved for wear by the Air Support Unit personnel.

C. JACKETS.
   1. Flight crew uniform jacket will be an optional NOMEX or leather flight jacket.

D. RESCUE HARNESS AND PERSONAL FLOATATION DEVICES (PFD’S).
   1. Only the approved Class II or Class III rescue harness and flight vests shall be worn by members of the Air Support Unit. The following equipment shall be issued by the Department:
      a. Rescue and pilot knives.
      b. Heeds compressed air bottles.
      c. Approved PFD’s.
      d. NOMEX gloves.

E. SERVICE WEAPONS.
   1. Service weapons are to be worn by flight crew members authorized to carry such weapons.
      a. [Redacted]
I. POLICY.

A. The Air Support Unit shall follow the Office of the Sheriff’s General Policy and Procedures concerning any press release and / or use of social media involving any event wherein the S.T.A.R.R. helicopters were instrumental in the capture of a suspect or the protection of persons or property.

II. GENERAL.

A. MEDIA PRESS RELEASES.

1. Inquiries from news media shall be forwarded to the Unit Commander for evaluation and consideration.

   a. The Unit Commander shall also notify the PIO and Special Operations Division Commander of the inquiry.

2. All requests of video release to the news media shall be reviewed and approved by the Chain of Command.

B. SOCIAL MEDIA.

1. All social media requests shall be forwarded to the Office of the Sheriff’s Public Information Officer (PIO).

2. Videos and pictures requested to be used in social media may be sent to the PIO in “raw” form for editing.

3. No videos or pictures shall be used for personal social media use.

C. UNUSUAL INCIDENT REPORTS (UIR’S).

1. UIR’s involving the S.T.A.R.R. helicopters will be forwarded to the PIO.

2. The PIO may use the information contained within the UIR’s for news or social media releases.

3. The following incidents shall generate a UIR:

   a. Any completed short-haul rescue or victim extraction.
b. Any completed initial fire suppression mission; use of Bambi bucket.

c. All approved mutual aid or outside assist (outside Contra Costa County) requests for S.T.A.R.R. helicopters.

d. Any incident involving a “laser strike” against a S.T.A.R.R. helicopter.

e. Any significant event in which the use of the S.T.A.R.R. helicopters played as significant part in the operation.

4. UIR’s may be prepared by the Unit Commander, Watch Commander, or Unit Supervisor.
I. POLICY.
   
   A. The Air Support Unit shall encourage all sworn members of the Office of the Sheriff to participate in familiarization ride-along flights with the S.T.A.R.R. helicopters to learn about the program and the county.

   B. Ride-Along flights by non-sworn members of the Office of the Sheriff, outside agency representatives, or civilians must be referred up the chain of command for approval by the Bureau Assistant Sheriff, Undersheriff, or Sheriff.

II. GENERAL.

   A. PROCEDURE.

   a. All ride-along requests shall be referred to the Air Support Unit Commander.

   b. Upon approval, the Unit Supervisor will schedule the ride-along.

   c. The Unit Supervisor shall ensure a Ride-Along waiver (Form PF-52) is completed and forwarded to the Field Operations Bureau – Special Operations Division Administration for processing via the Unit Commander.

   d. Any ride-along participant arriving later than 15 minutes after their scheduled ride-along time shall be rescheduled for a later date.

   e. All requests for ride-alongs involving VIP’s shall be referred to Sheriff’s Administration for review and approval.

   B. AIR CREW RESPONSIBILITIES.

   f. All ride-along participants shall be required to watch the “Safety Briefing” video.

   g. Additional safety information shall be provided by the Unit Supervisor or Lead Tactical Flight Officer to include; use of the
issued personal floatation device, communications headsets, helicopter emergencies, etc.

h. All ride-along participants must sign the approved Air Support Unit Ride -Along Form.

i. The Unit Supervisor, Lead Tactical Flight Officer, and/or Pilot will terminate any ride-along flight if the S.T.A.R.R. helicopter is requested to perform a Special Aircraft Operation.

j. Under no circumstances will a ride-along participant be left unattended near or inside the S.T.A.R.R. helicopters, even if the aircraft is powered down.

k. Unless under extreme circumstances (mechanical failure) or if necessary to complete a rescue or fire suppression mission, off-airport landings are not authorized while a ride-along passenger is onboard the S.T.A.R.R. helicopters.

m. Under no circumstances will a ride-along be left unattended during an off-airport landing.

n. Ride-alongs are not to participate in any specialized helicopter training (short-haul, water rescue, etc.) unless specifically scheduled for that purpose. Role players (civilian volunteers and off-duty sworn) used for such training are authorized with prior approval from the Unit Supervisor.

   • A complete training plan shall be submitted to the Unit Commander for review and approval prior to any role player allowed to participate in any specialized helicopter training.
I. POLICY.
   A. Operational necessity occasionally dictates the need to rent or borrow privately-owned aircraft to accomplish the law enforcement mission.
   B. Such use will only be permitted if the Office of the Sheriff aircraft are unavailable or incapable of performing a mission.

II. PROCEDURES.
   A. UNIT COMMANDER RESPONSIBILITIES.
      1. The Unit Commander shall assess the need to use a non-departmental aircraft.
      2. The Unit Commander and / or designee shall exhaust all local or regional aviation resources before considering using a non-departmental aircraft. This will include the use of the Office of the Sheriff’s Air Squadron (volunteers).
      3. The Unit Commander shall forward the request to the Division Commander with his / her recommendation for use of the non-departmental aircraft, to include what expenses, if any, should be reimbursed to the owner of the aircraft. The Division Commander will make the final approval on such requests.
   B. PILOTS.
      1. The contract pilot shall make the final determination if he / she is qualified, capable, and licensed to fly the non-departmental aircraft.
I. POLICY.

A. Properly maintained aircraft are essential to safe aviation operations. Compliance with manufacturer’s scheduled maintenance checks, airworthiness directives issued by the FAA, pre-flight inspections outlined in the aircraft operating manual and immediate repairs of mechanical problems ensure the availability and safety of the Office of the Sheriff’s aircraft.

B. Aircraft maintenance shall be provided by a certified aircraft mechanic who has successfully completed a factory maintenance course provided by the manufacturer of the Office of the Sheriff’s aircraft requiring the maintenance.

C. The contracted maintenance provider / facility shall have primary responsibility for ensuring the Office of the Sheriff’s aircraft are maintained in accordance with Federal Aviation Administration (FAA) and manufacturer maintenance directives, monitoring the workmanship of the maintenance employees to ensure required standards are met, keeping maintenance records, logs, job tags, and performing other duties related to aircraft and equipment.

D. In accordance with the current maintenance provider contract, the Office of the Sheriff’s aircraft are to be maintained in accordance to manufacturer’s specifications and FAA Part 91 (non-commercial) and FAA Part 135 (commercial) standards.

E. Office of the Sheriff employees shall not perform actual maintenance of any kind on any Office of the Sheriff aircraft. Furthermore, no equipment or items shall be affixed, attached, or altered onto the aircraft without the approval of the Unit Commander.

II. DEFINITIONS.

A. AIRCRAFT FLIGHT LOG. Flight record book kept in each aircraft.

B. AIRCRAFT MAINTENANCE RECORDS. Maintenance records required to be kept by the FAA for each aircraft.
C. CONTRACT MAINTENANCE PROVIDER. Aircraft repair/maintenance vendor with whom Contra Costa County has a contractual service agreement to provide authorized maintenance work and repairs to the aircraft.

D. PREVENTATIVE MAINTENANCE. Minor, preservation repairs or service, or the replacement of small standard parts not involving complex assembly of the aircraft or parts.

E. SCHEDULED MAINTENANCE. Periodic maintenance on aircraft at known intervals, per manufacturer’s recommendations and specifications.

F. UNSCHEDULED MAINTENANCE. Repairs or service to an aircraft in response to mechanical deficiencies or discrepancies.

III. CONTRACT MAINTENANCE PROVIDERS.

A. The contract maintenance provider shall designate a lead civilian mechanic.

B. All civilian maintenance personnel authorized to perform maintenance on an Office of the Sheriff’s aircraft shall:
   1. Hold a FAA mechanic certificate with airframe and power plant rating; and,
   2. Attend model specific factory field maintenance training.

C. The Unit Commander or designee shall make a physical visit to the contract maintenance provider’s facility ahead of a contract renewal with the vendor. The facility should be inspected for cleanliness, hazards, and overall aircraft care satisfaction prior to renewing a contract with the maintenance provider.

D. The contract maintenance provider will be responsible for keeping all logs and journals current on all Office of the Sheriff’s aircraft. The logs and journals are to be kept at the Air Support Unit office.

E. A weekly “Time Sheet” shall be generated by the contract maintenance provider or mechanic and forwarded to the Air Support Unit Commander and Supervisor for review.
   1. Any reporting discrepancies in the Time Sheets shall be reported immediately to the contracted maintenance provider and/or mechanic. The aircraft shall be placed “out of service” until the discrepancy is clarified, endorsed, and documented in the log book by the mechanic.

IV. GENERAL.

A. MAINTENANCE FACILITIES.
   1. Any routine or scheduled maintenance can be done by the contract maintenance provider at the Air Support Unit’s hangar.
   2. Any major service inspection, overhaul, and major avionics upgrades shall require the aircraft to fly-in or be transported (ferried) to the contracted maintenance provider’s facility or other facility of their choice.
B. OPERATIONAL CHECK FLIGHTS.
1. Operational Check Flights or “Check Flights” are required when maintenance procedures or modifications have been made which could affect the flight characteristics of the aircraft.
2. Checks Flights will only be conducted when the aircraft has been returned to service by an authorized maintenance provider or mechanic under FAR 43.7.
3. One Office of the Sheriff contract pilot and one mechanic shall be assigned to perform the Check Flight(s).
4. The pilot and mechanic shall have the final say if an aircraft is to be returned to service. The Unit Supervisor and Unit Commander are to be notified of the aircraft’s status.
5. The Unit Supervisor will ensure the maintenance log books and records reflect the maintenance work performed.

V. DISCREPENCY REPORTING SYSTEM.
A. Pilots shall take the following action when mechanical irregularities are discovered during pre-flight and/or flight.
1. For minor problems that do not necessitate aircraft grounding (out of service):
   b. If available, notify the mechanic.
   c. The incident shall be documented in an Incident Report Form, completed by either the Unit Supervisor or Tactical Flight Officer.
   d. The Incident Report Form shall be forwarded to the Unit Commander.
2. For major problems requiring grounding:
   b. Notify the Unit Supervisor for instructions.
   c. Affix a placard to the primary aircraft controls indicating the aircraft is “out of service”.
   d. Arrange for security for the aircraft if the aircraft is grounded at a location other than a County facility. Any Office of the Sheriff’s aircraft grounded at an off-airport location must have security maintained at all times.
   e. The Unit Commander shall be notified as soon as possible.
   f. Complete an Incident Report Form and forward a copy to the Unit Commander.
VI. UNIT RESPONSIBILITIES.

A. UNIT COMMANDER.

1. The Unit Commander has overall responsibility for assuring proper maintenance for all Office of the Sheriff aircraft.

2. The Unit Commander shall review the maintenance invoices submitted by the contracted maintenance provider for accuracy. Should discrepancies be found, he/she shall contact the provider for corrections.

3. The Unit Commander shall receive weekly and monthly reports (Time Sheets) compiled by the contracted maintenance provider regarding all maintenance on life-limited components, scheduled and unscheduled maintenance.

B. UNIT SUPERVISOR.

1. The Unit Supervisor shall monitor the quality of work performed by the contracted maintenance provider. If any problems are detected, they will be brought to the attention of the provider for immediate correction.

2. The Unit Supervisor shall ensure accurate aircraft maintenance records and flight officer records required by either the FAA or this manual are maintained.

3. The Unit Supervisor shall receive weekly and monthly reports (Time Sheets) compiled by the contracted maintenance provider regarding all maintenance on life-limited components, scheduled and unscheduled maintenance.

4. The Unit Supervisor will assure that a Check Flight test is made of any aircraft following maintenance that could change the flight characteristics of the aircraft.

5. The Unit Supervisor shall notify the Unit Commander of the results of the Check Flight.

C. PILOT.

1. Conduct a thorough pre-flight inspection of the aircraft in accordance with the aircraft operating manual. The Discrepancy Reporting System shall be followed if problems are noted.

2. The Aircraft Flight Log shall be reviewed prior to flight and the appropriate data entered after each flight.

3. Pilots are not authorized to order work, parts, or other service from the contracted maintenance provider without first obtaining authorization from the Unit Supervisor.

4. The pilot is the final authority on whether to fly an aircraft with a mechanical discrepancy (non-grounding nature) and to determine, in his/her opinion, if the aircraft is not airworthy.
VII. AIRCRAFT CLEANING.

A. All aircraft will be cleaned weekly, both interior and exterior. Waxing will be done on an as-needed basis.

B. The use of aircraft fuel as a solvent or cleaner shall be avoided. Nonflammable, safe solvents should be used.

C. Hazards are present in many forms when cleaning aircraft including: falls, eye and skin injuries from chemicals. Employees shall exercise caution when performing this duty.

D. The pilots and Tactical Flight Officers are responsible for cleaning the aircraft.

E. The Unit Sergeant will inspect all aircraft weekly to ensure cleanliness.
I. POLICY.
   A. The Air Support Unit shall maintain safe policies and procedures in place for continuous safe operations and a high professional level of aviation competency. A primary step to maintaining a safe aviation program is establishing minimum and recurrent standards and training for personnel and mission readiness and response.

II. GENERAL.
   A. ANNUAL TRAINING BUDGET.
      1. The Unit Commander will meet with the Air Support Unit crew members annually to ascertain training needs for the upcoming fiscal year.
      2. The Air Support Unit crew members shall complete two recurrent training courses to be determined by the Unit Supervisor or Unit Commander each calendar year. Training course topics may include, but not limited to: Human Factors, Tactical Flight Operations, Flight Training, Rescues, The annual Airborne Public Safety Association Conference, or other related Pilot refresher courses.
      3. The annual flight hours shall include 30 minutes of flight time per shift dedicated to recurrent training.
      4. Conferences and training seminars will be approved for air crew members and Pilots based on the relationship to the Air Support Unit’s operations, crew scheduling and cost.
III. AIR CREW TRAINING.

A. UNIT MANAGERS.
   1. Within one year of appointment, Unit Managers should complete the Unit Managers course offered by the Airborne Law Enforcement Association.

B. TACTICAL FLIGHT OFFICERS.
   1. Training objectives will vary, depending on whether the member is new to the Air Support Unit or an existing member. Objectives should challenge the member to increase his or her competency in the knowledge and skills necessary to perform as a member of the Air Support Unit.
   2. New Tactical Flight Officers shall complete following initial, recurring, and proficiency training:
      a. The Air Support Unit’s Tactical Flight Officer training program.
      b. The Air Support Unit’s Short-Haul and Fire Suppression Operations training program.
         - Proficiency with all rescue devices
         - Helicopter rigging with rescue and fire devices
      c. The Airborne Public Safety Association’s Basic Tactical Flight Officer Course.
      d. Airborne Thermographer Certification course.
      e. Water Egress training (in-house or by vendor).
      f. 10 hours of Basic Helicopter Pilot training.
      g. Complete Ground School training from lead pilot.
   3. Existing members shall receive required recurrent training as identified by the Unit Commander and/or Unit Supervisor.

C. TRAINING RECORDS
   1. All training records will be secured and kept at the Air Support Unit Office and readily accessible to the Unit Commander and Special Operations Division Captain.
I. POLICY.
   A. Training requirements are established by the Federal Aviation Regulation FAR Part 61. This manual does not waive nor make exception to any rules regarding training requirements as specified under FAR Part 61.
   B. The required certificates, flying experience, and training of each pilot will be documented and a record of same will be kept in a pilot’s training folder secured at the Air Support Unit’s office.

II. GENERAL.
   A. TRAINING MINIMUMS.
      1. Pilots who meet the minimum requirements for hire will be evaluated at the time of hire to determine the need for immediate or recurrent training prior to assignment to the Air Support Unit operations.
      2. Pilots conducting Night Vision Goggle (NVG) operations shall obtain training and certification by a FAA approved course.
      3. Pilots holding certified flight instructor ratings are authorized the necessary training to maintain that rating.
   B. INITIAL, CURRENCY, AND PROFICIENCY TRAINING.
      1. Pilots shall successfully complete the following initial, recurrent, and/or proficiency training:
         a. Initial aircraft manufacturer’s factory ground and flight school.
         b. Annual “check” rides or refresher course.
         c. Bi-annual recurrence training.
         e. Emergency procedure training.
         f. Night flight recurrence training.
2. In addition to the above training, all pilots must demonstrate proficiency in the following skills and equipment prior to being authorized to deploy to specific flight missions:

a. Aircraft radio and functionality.
b. Fire suppression water drops.
c. FAA Part 141 long-line skills course.
d. Night Vision Goggles (NVG) flight.
e. Skid deployment.
f. External loads.
   - Jettison procedures.
g. Short-haul operations.
   - Various rescue device.
   - Rigging of the helicopter.
h. Law enforcement missions.
   - [Blacked out text]
   - [Blacked out text]

   - [Blacked out text]
i. Formation flights.
j. Off-airport landings (day / night).
k. Water rescue operations.
   - Helo-casting.
   - Water “picks” and rescues.
• Various rescue devices.

1. Load calculations.
I. QUALIFICATIONS AND REQUIREMENTS.

A. A safe and effective short-haul and aerial fire-fighting program is highly dependent upon precision long-line skills. The S.T.A.R.R. pilot(s) must comply with the following minimum requirements before they are approved to conduct these operations:

1. Must complete a 141-standard precision placement course under the observation of the Unit Commander or PIC; or qualified in accordance with 14 CFR 133 for Class A and B external load operations.

2. Logged 2,000 hours as Pilot-in-Command (PIC) in a rotorcraft type aircraft.

3. Logged 200 hours PIC in a helicopter in the preceding 12 months; 50 hours of vertical reference experience requiring precision placement in the preceding 12 months.

4. Approved for long-line operations.

5. Understand short-haul techniques, short-haul signals and operational concerns.

6. Demonstrate the ability to work with an air rescue crew.

7. Obtain final approval from the Unit Commander.

B. Precision Placement Course.

1. Center Circle.

   a. Using a 100-ft. long line with a designated weight at the end of the rope, the pilot must maintain the load within a 10’ circle for 2 out of 3 minutes. The load must not rise higher than 6’ Above Ground Level (AGL). Higher than 6’ stops the test clock and lowering back to 6’ or less resumes the test clock. Touching load to the ground resets the testing clock. Leaving the circle stops the clock, re-entering resumes the clock.
2. Corner Circles.
   b. Move load from corner to corner, placing load into circle. The circles are 50’ apart arranged in a square. After lowering the load to the ground, the load must not lean greater than a 45-degree angle. The placement must be held for 5 seconds.

3. Serpentine.
   c. Move load through serpentine course at no greater than 6’ AGL. The serpentine course is 50’ long with 4 vertical obstacles 10’ apart (cones, rebar stakes, etc). Reverse and retrace serpentine to exit. The load must be kept within 8’ of serpentine course track.

II. TACTICAL FLIGHT OFFICERS / FLIGHT RESCUE TECHNICIANS.

A. Tactical Flight Officers shall complete the following minimum requirements:
   1. Successful completion of the Tactical Flight Officer’s training program.
   2. Demonstrate knowledge of the inspection, nomenclature, characteristics (breaking strength), care and maintenance of short-haul and water rescue equipment.
   3. Demonstrate the ability to rig the helicopter for short-haul, provide a safety briefing and conduct a safety check of short-haul personnel without procedural errors.
   4. Demonstrate knowledge of emergency procedures.
   5. Conduct five (5) self-picks (harness only) and five (5) short-haul flights with each rescue / victim extraction equipment without procedural errors.
   6. Demonstrate the ability to work with the pilot during short-haul and water rescue missions.
   7. Demonstrate knowledge of risk assessment and mission structure.
   8. Obtain final approval from Unit Commander.

B. Flight Rescue Technicians shall complete the following minimum requirements:
   1. Successful completion of the Flight Rescue Technician training manual and program.
   2. Demonstrate knowledge of the inspection, nomenclatures, characteristics (breaking strength), care and maintenance of short-haul and water rescue equipment and rigging.
   3. Demonstrate knowledge of short-haul and water rescue procedures.
   4. Demonstrate knowledge of emergency procedures.
   5. Conduct five (5) self-picks (harness only) and five (5) short-haul flights with each rescue / victim extraction equipment without procedural errors.
III. PROFICIENCY STANDARDS.

A. SHORT-HAUL AND WATER RESCUE MISSIONS AND EQUIPMENT FAMILIARITY.

1. It will be the responsibility of the Unit Commander or designees to determine, beyond the minimum requirements listed above, the frequency of proficiency short-hauls for all Tactical Flight Officers and Flight Rescue Technicians, including the pilots. An operational short-haul rescue within the proficiency period may count as a proficiency short-haul.

2. Minimum Standards.

C. FIRE SUPPRESSION OPERATIONS.

1. The S.T.A.R.R. pilot(s) must complete four live fire water drop exercises without procedural errors before being approved for live fire-fighting operations.

2. The pilot(s) must complete four (4) Bambi Bucket evolutions within a one-year period to remain current. An operational fire suppression (water drop) operation within the proficiency period may count as a proficiency water drop evolution.

3. Minimum Standards.

I. POLICY.

A. It is incumbent upon every member of the Air Support Unit to contribute to the goal of continued safe operations in and/or around the S.T.A.R.R. aircraft. This contribution may come in many forms and includes maintaining an alert, conscientious posture during day-to-day operations. Any safety hazard, whether procedural, operational, or maintenance-related should be identified and notified as soon as possible after, if not before, an incident occurs. Any suggestions in the interest of improving the safety of operations should be made without reservation.

B. If any member observes or has knowledge of an unsafe or dangerous act committed by another member of the Unit, the Unit Supervisor and/or Unit Commander shall be notified immediately so that corrective action may be taken. The incident shall be documented in a Hazards / Incident Report form and forwarded to the Unit Commander via Chain of Command.

II. GENERAL.

A. No person shall operate the Office of the Sheriff’s aircraft in a careless or reckless manner likely to endanger life or property.

B. No person will perform the duties of a crew member or ride in the Office of the Sheriff’s aircraft if his / her physical or psychological condition might be detrimental to safety.

1. For example:
   a. Motion sickness.
   b. Anxiety.
   c. Various medications with serious side-effects.

C. Smoking is prohibited in, and within 50 feet of, the Office of the Sheriff’s aircraft.
III. RESPONSIBILITIES.

A. PILOTS
   1. Ensure all safety equipment is installed per the appropriate aircraft operator’s manual and any additional Air Support Unit’s requirements.
   2. Ensure all rotors/props have stopped rotating and are secured before leaving the aircraft unattended.
   3. Complete performance planning to ensure adequate power for each flight as needed or required. The same performance planning will suffice for consecutive take-offs and landings where load and/or environmental conditions have not changed significantly.
   4. Under no circumstances will any Pilot engage or attempt an aerobatic flight maneuver.
   5. The Pilot in Command of an Office of the Sheriff’s aircraft is directly responsible for, and is the final authority as to, the operation of that aircraft.
   6. In an in-flight emergency requiring immediate action, the Pilot in Command may deviate from a section of this policy and FAA Rule Part 91 to the extent required to meet that emergency.

B. TACTICAL FLIGHT OFFICERS AND AIR CREW MEMBERS
   1. Conduct a safety briefing to all non-air crew passengers.
   2. Demonstrate how to properly wear and deploy all personal safety issued equipment.
   3. Ensure every person entering / riding in the aircraft can operate the seat belts, communication equipment, and doors.
   4. Ensure every person is in a seat, or is properly secured.
   5. Ensure all aft doors to the aircraft are properly closed.
   6. Escort all non-air crew passengers in, out, and away from the aircraft.

IV. TACTICAL MISSIONS.

A. ESSENTIAL CREW MEMBERS
   1. During tactical missions, rescues, or firefighting missions, no person may be carried on an Air Support Unit aircraft who does not meet one of the following criteria:
      a. Is a required crew member.
      b. Is a flight crew-member trainee.
      c. Performs an essential function in connection with the operation.
      d. Is necessary to accomplish the work activity directly associated with that operation.
I. POLICY.
   A. The Unit Supervisor will act as the Unit Safety Officer.

II. DUTIES
   A. UNIT SUPERVISOR.
      1. Duties of the Safety Officer include the following:
         a. Take appropriate action once a hazard is identified.
         b. Complete and forward all OHIR’s or Aviation Incident Forms to Unit Commander.
         c. Assist the Unit Commander with investigating and resolving OHIR’s.
         d. Copy and circulate pertinent safety information.
         e. Prepare documentation (memos and monthly reports) containing all reported safety-related matters with aircraft/facilities/procedures and corrective action taken. If there was an in-flight problem, the proper procedures for resolving that problem will be documented.
         f. Prepare and circulate emergency safety bulletins.
         g. Establish a file containing miscellaneous reading materials, references, and sources related to safe operations and accessible to all Air Support Unit crew members. Materials can come from magazines, FAA publications, etc.
         h. Maintain and update mishap and overdue aircraft response plans and ensuring all Air Support Unit crew members are familiarized with the plan(s).
         i. Coordinate and schedule monthly Unit Safety meetings.
j. Track, post, and advise on aircraft maintenance.
k. Work with the air crew to schedule aircraft maintenance.
I. POLICY.
   A. All Air Support Unit crew members shall report to work rested and mentally prepared for the assignment.

II. GENERAL.
   A. PHYSIOLOGICAL AND PSYCHOLOGICAL READINESS
      1. Physical illness, exhaustion, emotional problems, etc., can impair judgement, memory, and alertness. The safest rule for all crew members is to remove themselves prior to any flight when suffering from any of the above. Crew members are expected to ground themselves when these problems could reasonably affect their ability to perform flight duties.
         a. A self-assessment of physical condition shall be made by all flight crew members during pre-flight activities.
         b. No Air Support Unit crew member shall participate in any flight operation within 72-hours of donating blood. Loss of red blood cells that carry oxygen to all body organs and the reduction of iron content of the blood will cause the body to be less tolerant to altitude, G-forces, turbulence, shock, and stress. 72-hours allows the body to adjust and replenish lost fluids.
            • The Unit Supervisor shall be notified prior to blood donations in sufficient time to adjust schedules to accommodate the 72-hour grounding period.
B. FATIGUE

1. Crew members should have a minimum of eight (8) consecutive hours of “off duty” whenever possible.
2. Pilot fatigue is cause for grounding during any mission.
3. Anytime a crew member believes his/her performance has been adversely affected by fatigue, he/she shall remove themselves from flight status.
4. The Unit Supervisor shall be notified when a flight is canceled or postponed due to fatigue.

C. MEDICATIONS

1. Performance can be significantly affected by prescription and over-the-counter drugs and medications. The Unit Supervisor shall be advised any time such drugs are being taken by any flight crew member.
   a. The Unit Supervisor will, if necessary, consult with the Employees’ Health Service to determine if member should be prohibited from engaging in flight activities while taking medication.
   b. Per FAR 91.17(a)(3), all crew members should be aware of the side effects of all drugs they use with respect to their ability to function normally under all flight conditions. When uncertainty exists, Pilots should consult with an FAA Medical Examiner to determine potential side effects.
   c. Prior to taking a prescription that will be used before or during any flight assignment Pilots should consult with an FAA Medical Examiner to determine potential side effects.

D. ALCOHOL CONSUMPTION

1. No Air Support Unit crew member will participate in any flight operations within eight hours after consumption of any alcohol beverage, while under the influence of alcohol, or while having a .04% or more of weight of alcohol in the blood.
2. Alcoholic beverages shall not be consumed while on duty.
3. Alcoholic beverages shall not be consumed while on reserve status or on “standby”.

III. PILOT REQUIREMENTS.

A. MEDICAL EXAMINATIONS.

1. All pilots shall obtain a Class II medical physical annually administered by an authorized FAA Medical Examiner. Flight physicals are obtained at the Pilot’s expense but may be reimbursed through monthly billing.
   a. Pilots who allow their physicals to expire shall be grounded until the physical is renewed. Once the physical is obtained, a copy of the medical certificate shall be submitted to the Unit Supervisor.
I. POLICY.
   A. To provide an orderly compilation of information and efficiency of reporting, the Operation Hazard and Incident Report (OHIR), otherwise known as the Aviation Incident Report, shall be used to report any anticipated, current, or observed safety hazard. The hazard may be mechanical or procedural.

II. GENERAL.
   A. PROCEDURE.
      1. Any air crew member shall immediately report any hazards associated with the Office of the Sheriff’s aircraft, either mechanical or procedural.
      2. The Unit Supervisor, or in his absence the Lead Tactical Flight Officer, shall investigate the nature of the hazard and complete an Aviation Incident or Hazard Report.
      3. Hazards requiring immediate attention shall be brought to the attention of the Unit Commander without delay, verbally or by completing the Aviation Incident Report.
      4. The Aviation Incident Report should document in detail the hazard being reported, the cause, and procedures taken to mitigate the hazard when discovered.
         a. If mitigation actions are identified, the Unit Supervisor will ensure these steps are taken and documented on a mitigation supplement to the OHIR.
      5. The Aviation Incident Report shall be forwarded to the Unit Commander for review and follow up.
      6. The Unit Commander shall notify the Special Operations Division Commander if any aircraft is grounded due to a mechanical hazard.
      7. The Unit Commander will investigate any procedural hazards and determine if any corrective actions are needed.
8. All Air Support Unit members are authorized to take action to correct a hazard if, in that member’s opinion, delay will result in accident or injury. The Unit Commander will be notified immediately in such situations.
I. POLICY.

A. The helicopters shall be operated only by a County contracted licensed pilot during general operations. The pilot shall exercise the final authority to commence a flight mission or request based on all factors which could affect the safe outcome of the flight.

II. REQUESTS FOR AIR SUPPORT.

A. DURING DUTY HOURS.

1. Requests for air support assistance will be handled by the crew on duty.
   a. Requests can be made in the following manner:
      • Via Sheriff’s Office Dispatch.
      • Direct telephone call to the Air Support Unit’s office or Tactical Flight Officer on duty.
      • Via radio transmission; the Air Support Unit monitors multiple law enforcement and fire frequencies.

2. Depending on the incident, the Air Support Unit may begin a law enforcement or search and rescue related response, prior to being dispatched, should the incident warrant such action.

3. Air Support Unit requests are often made directly through the Tactical Flight Officer and/or the air flight crew will self-initiate a response. In either case, the flight crew will notify Dispatch of the nature and the location of the mission as soon as practical or upon take-off.

4. If the Air Support Unit is not available and immediate assistance is needed or if the request exceeds the capabilities of the Contra Costa Sheriff’s Office aircraft, the request shall be referred to the California Highway Patrol or East Bay Regional Parks.
5. The on-duty Tactical Flight Officer shall call Sheriff’s Office Dispatch and tell them what aircraft is available (call-sign) and when the tour of duty ends.

B. DURING NON-DUTY HOURS.

1. Requests for immediate assistance will be referred to the Watch Commander.
   a. The Watch Commander will refer all non-duty hour requests for air support to the California Highway Patrol or East Bay Regional Parks.

2. All other requests will be referred to the Unit Commander for scheduling.

3. To facilitate a quick response by Communications personnel, a copy of the Air Support Unit’s schedule will be forwarded monthly to the Sheriff’s Office Dispatch Center.
I. POLICY.

A. Flights leaving the jurisdictional boundaries of Contra Costa County (out of county requests) require the specific approval of the Unit Commander or in his/her absence, the Watch Commander, prior to the flight. Approved out of county flights will adhere to this policy.

II. GENERAL.

A. It may periodically become necessary to conduct flights outside Contra Costa County. Out of county flights can be conducted for reasons such as, but not limited to:

1. Missions approved by the Unit Commander
2. Maintenance Flights
3. Honor guard, dignitary, and/or formation flights
4. Training evolutions and interagency coordination

B. PROCEDURES.

1. The Unit Commander or Watch Commander will review the nature of the out of county request and confirm with Sheriff’s Office Dispatch there are no Sheriff’s Office “priority calls” pending.

2. The following information must be obtained by the Unit Commander or Watch Commander prior to approving an out of county request:

   a. Name of agency requesting support.
   b. Name of person making the request and phone number.
   c. Details of incident requiring air support.
   d. Verbal certification from the requesting agency that the flight is necessary due to imminent threat to life and property.
3. The Unit Commander or Watch Commander will verbally advise dispatch the approval of the out of county flight.

4. Upon approval to fly out of the county, the Tactical Flight Officer will advise Sheriff’s Office dispatch their flight destination and the name of the agency dispatch the air crew will be communicating with.

5. Upon return into Contra Costa County, the Tactical Flight Officer will re-establish contact with Sheriff’s Office Dispatch via radio.

6. All authorized out of county requests, in which the flight actually crossed jurisdictional boundaries, shall be documented in a Sheriff’s Office report (Outside Assist).

B. EXCEPTIONS.

1. If flight is incidental to an ongoing Contra Costa County operation (for example, a search or pursuit begun in Contra Costa County and expanded into a neighboring county).

2. Surveillance operations frequently cover many jurisdictions. In these cases, the Unit Commander or Watch Commander will be advised of the general location prior to the flight.
I. POLICY.
   A. Simultaneous requests for air support shall be prioritized for service. The following priorities shall be applied in resolving response conflicts:
      1. Protection and / or saving of human life
      2. Protection of property, valuable resources, and critical infrastructure
      3. Other missions
   B. Office of the Sheriff aircraft are not to be used to conduct personal business or for personal use.

II. GENERAL.
   A. PRIORITIZATION.
      1. Calls for air support assistance shall be prioritized as follows (listed in order of importance):
         a. Search and rescue of innocent victims.
            • Juveniles
            • Elderly
            • Life threatening medical emergencies
            • Life threatening rescue missions
      2. In progress calls involving a threat to the safety of any person
      3. Searches for fleeing criminal suspects
      4. Crime in progress calls
      5. Initial fire suppression missions
      6. Surveillance of criminal suspects
      7. Traffic control operations
8. Photo or evidence documentation flights
9. Other non-emergency requests to support other government agencies
10. If time and circumstances permit, the Air Support Unit Supervisor will resolve prioritization conflicts.
I. POLICY.

A. Thorough pre-flight planning and inspections are critical to safe flight operations and response to missions. Scheduled air crew members shall conduct flight preparations so the aircraft is ready for departure within thirty (30) minutes from the start of the shift.

B. The flight crew will consider all operational safety factors at the beginning of each shift and complete a Flight Risk Assessment Tool (FRAT) form, which will be filed with the daily activity log and submitted to the Unit Supervisor.

II. PROCEDURES.

A. AIR CREW RESPONSIBILITIES.

1. Pilot.
   
a. Prior to all flights, the pilot is responsible for ensuring the following tasks are completed.

   - The aircraft is in airworthy condition.
   - A pre-flight inspection in accordance with manufacturer’s operations manuals has been conducted and each crew member visually checks the aircraft prior to flight.
   - The aircraft status board, appropriate log books, and discrepancies have been reviewed.
   - Complete a Flight Risk Short Form, ensuring conditions from the daily FRAT have not changed.

2. Tactical Flight Officer.
   
a. The T.F.O. shall conduct a final walk-around inspection of the aircraft before each flight, immediately prior to take-off.
b. The T.F.O. shall walk completely around the aircraft to ensure that all tie-downs are removed, all cowlings, panels and baggage doors are closed and latched, the fuel cap is installed and no obvious problems exist.
c. T.F.O.’s shall be responsible for ensuring the inspection of all rescue and firefighting equipment is completed.

3. Flight Rescue Technicians
   a. FRT’s shall be responsible for inspecting all rescue and firefighting equipment.

B. PHYSICAL (SELF) ASSESSMENT.
   1. Pre-flight begins with the air crew making a self-assessment of their physical condition (refer to Safety – Medical Factors section).
   2. If unable to perform flight duties, the Unit Supervisor will be notified.

C. AIRCRAFT / EQUIPMENT INSPECTION
   1. The pilot and T.F.O. shall conduct a visual and physical inspection of the aircraft, as noted above.
   2. All special equipment, excluding the Nightsun, will be tested prior to flight.
   3. The Air Support Unit should utilize the use of a pre-flight and equipment checklist.
   4. If, in the course of the pre-flight inspection, any mechanical discrepancy is found, the discrepancy shall be evaluated and addressed immediately.
   5. All flight crew members shall conduct a visual and physical inspection of their flight vests, harnesses, and other worn equipment.

D. PRE-FLIGHT PLANNING.
   1. The pilot(s) shall familiarize themselves with all available information concerning the flight.
      a. Charts.
         • Proper and up-to-date charts will be maintained and reviewed by the Pilots.
         • For flights outside of Contra Costa County, the Pilot shall have the proper chart in the aircraft.

E. WEATHER
   1. At the beginning of each tour of duty, the pilot shall obtain a full weather briefing from a trusted and reliable source or application. The pilot will ensure that he or she gathers enough information to become familiar with the weather situation existing throughout the area of operation or flight plan.
2. Subsequent to the original weather briefing, the pilot will obtain, if necessary, sufficient weather information to ensure that the original briefing stays valid or current. The frequency of these additional weather checks will be determined by the severity of existing or forecasted weather.

3. Weather minimums for helicopters and fixed-wing aircraft are contained in the listed sections of this manual.

F. PASSENGER BRIEFING.

1. All passengers and temporary air crew will be properly briefed prior to approaching the aircraft.

2. The briefing will be conducted by a Tactical Flight Officer or Unit Supervisor. The briefing will cover the following:
   a. Approaching and departing the aircraft (hazards of tail and main rotor blades).
   b. Proper door opening, closing, and locking procedures.
   c. Procedures for proper egress / ingress of the cockpit.
   d. Use of seat belts.
   e. Use of headsets.
   f. Emergency exit procedures.
   g. Over water procedures, (if applicable: donning / doffing and inflating life jackets, aircraft ditching procedures, use of portable breathing apparatus).
   h. Estimated length of flight.
   i. Location of the fire extinguisher inside the aircraft.
   j. No smoking in or near the aircraft.

3. The briefing will be conducted using the passenger ride-along form and video.

4. The passenger and crew member conducting the briefing will sign the form.

5. The form will not be carried in the aircraft, unless the passenger is picked up somewhere other than the Air Support Unit’s office. In these cases, the briefing must still take place and the form returned to the office, when practical.

6. Completed forms will be kept on file (hard copy or electronic) for a period of three years.
I. POLICY.
   A. Thorough post-flight procedures and inspections are critical to safe flight operations and mission readiness. The Office of the Sheriff’s aircraft shall always be ready for immediate launch.

II. PROCEDURES.
   A. AIR CREW RESPONSIBILITIES.
      1. Pilot.
         a. Will ensure the aircraft is re-fueled or has enough fuel for the following launch.
         b. All fluid level gauges will be checked.
         c. Overall inspection for damage, defects, or oil leaks.
         d. Any flight restricting condition to the aircraft shall be reported to the Unit Supervisor and the contract maintenance provider as soon as possible. The pilot is responsible to ensure all discrepancies of the appropriate aircraft’s maintenance discrepancy log are recorded accurately.
         e. Necessary entries will be made into the aircraft flight log.
      2. Tactical Flight Officer.
         a. The T.F.O. will conduct a walk around inspection of the aircraft immediately after shut-down to ascertain if any damage occurred during the flight.
         b. Appropriate flight report will be completed after each flight.
         c. Flight vests and helmets are to be removed from the aircraft after each flight.
         d. All rescue and firefighting equipment shall be made ready for the following flight.
B. FLIGHT ACTIVITY REPORTING.

1. All flight activities will be documented on a Daily Activity Report.

2. Individual activities will be documented on the appropriate form and e-mailed to the Unit Sergeant, Unit Commander, Division Commander, and Assistant Sheriff at the end of each tour of duty.

3. Electronic copies of the above are to be stored at the Air Support Unit Office and / or with the Unit Commander.
I. REFUELING PROCEDURES.

A. The pilot is responsible for having the proper type and amount of fuel on board the aircraft at all times. The pilot is also responsible for refueling operations.

B. Prior to refueling, aircraft engines will be shut down, as will all electrical equipment in the aircraft.

1. EXCEPTION. During lifesaving requests or operations critical time may be saved by refueling the aircraft while it is running, also known as “hot fueling.”

C. No maintenance work will be performed during refueling.

D. No smoking is permitted within 50 feet of the aircraft.

E. The pilot will assure the proper grade of fuel and lubricants are put into the aircraft.

F. If possible, the pilot should personally observe refueling operations.

G. A small amount of fuel will be drained from all sumps after refueling to ensure the proper fuel was pumped into the aircraft and to check for contamination. Fuel filler caps will be checked to make sure they are secure once per shift at pre-flight.

H. Only those Tactical Flight Officers who have been trained to re-fuel the aircraft at the airport Operations Base (Concord Jet) are authorized to refuel at this location only.

I. The Tactical Flight Officer is responsible for driving the fuel tender truck, if necessary.
II. HOT-FUELING PROCEDURES.

A. Refueling an aircraft is inherently dangerous for all involved in this procedure. Unless a clearly, articulated emergency exists, aircraft shall not be refueled with the engine running, rotors under power, or with electrical switches on, commonly referred to as “hot fueling.” If an Office of the Sheriff aircraft must be “hot fueled,” the following procedures shall be strictly adhered to:

1. The aircraft pilot shall remain at the flight controls at all times during the refueling operation.
2. The aircraft shall be reduced to flight idle.
3. Only trained Tactical Flight Officers shall conduct the actual refueling and bonding/grounding of the helicopter. The TFO shall wear appropriate safety equipment, which shall consist at a minimum of gloves and protective clothing (Nomex flight suit).
4. If available, a second flight crew member shall be equipped with a fire extinguisher and shall monitor the refueling operations.
5. All persons not directly involved with the refueling operations, including any passengers, shall be kept clear of the area.

B. In the event of a fire or other emergency during hot fueling, the pilot shall perform an emergency shutdown of the aircraft and immediately disembark. Refueling shall be immediately halted.

III. PAYMENT PROCEDURES.

A. Refueling will normally take place at [insert location]. The Unit Commander is responsible for checking the accuracy of fuel invoices and payments.

B. Commercial credit cards have been issued to the Air Support Unit to pay for fuel and oil. Each Office of the Sheriff aircraft has been issued its own fuel card and are to be kept in the aircraft.

C. If planned operations or flights necessitate refueling at another airport, the pilot shall be given the commercial credit card by the Tactical Flight Officer. The card and any receipts will be submitted to the Unit Supervisor and forwarded to the Unit Commander immediately upon return.

      • [REDACTED]
   2. [REDACTED]

B. [REDACTED]

1. [REDACTED]
   a. [REDACTED]
C.

1. [Text obscured]
I. POLICY.

A. The primary concern of any in-flight emergency incident or precautionary landing is survival of the air crew and preventing injury to persons on the ground.

B. Subsequent to an Air Support Unit aircraft involved accident / mishap / incident, Air Support Unit personnel must accomplish the following as expeditiously as possible:
   1. Rescue and care of the air crew and other involved persons.
   2. Protection of the scene and department equipment.
   3. Acquisition and preservation of evidence needed for a thorough investigation.
   4. Immediate notification to the chain of command and assigned investigative personnel.

II. DEFINITIONS.

A. AIRCRAFT ACCIDENT. An occurrence associated with the operation of an aircraft which takes place between the time any person boards the aircraft with the intention of flight and all such persons have disembarked, and in which any persons suffers death or serious injury, or in which the aircraft receives substantial damage.

B. AIRCRAFT INCIDENT. An occurrence other than an accident associated with the operation of an aircraft, which affects or could affect the safety of operations.

C. FATAL INJURY. An injury which results in death within 30 days of the accident.

D. SERIOUS INJURY. Any injury which:
   1. Requires hospitalization for more than 48 hours, commencing within 7 days from the date of the injury was received.
2. Results in a fracture of any bone except simple fractures of fingers, toes, or nose.
3. Causes severe hemorrhages, nerve, muscle or tendon damage.
4. Involves any internal organ.
5. Involves second or third degree burns or any burns affecting more than five percent of the body surface.

E. MINOR INJURY. Any injury not classified as fatal or serious.
F. SUBSTANTIAL DAMAGE. Damage or failure which adversely affects the structural strength, performance, or flight characteristics of the aircraft, and which would normally require major repair or replacement of the affected component.

III. PROCEDURES.

A. PRECAUTIONARY LANDINGS WITH NO INJURY AND / OR MAJOR PROPERTY DAMAGE.
   1. Immediately notify Dispatch and give the location of the landing.
   2. Request sufficient police personnel to maintain security in the landing area.
   3. Request notification of the Unit Commander and / or Watch Commander.
   4. If the landing is a result of mechanical problems, survey the extent of the problem and advise Dispatch as soon as practical, indicating if additional notification or assistance is needed.
   5. If the problem can be corrected at the landing site, those personnel assigned to the aircraft at the time of the landing shall remain with the aircraft until the necessary repairs are made.
   6. If the problem is of a nature necessitating the removal of the aircraft by another vehicle, assigned personnel shall remain with the aircraft to provide assistance in the loading of the aircraft onto the vehicle provided.
   7. The Unit Commander and Unit Supervisor shall coordinate repair / removal with the crew and /or the contract maintenance provider.
   8. As soon as practical after the landing, the pilot and onboard air crew shall submit a detailed memo to the Unit Commander. The report shall contain:
      a. The reason for the landing.
      b. The name of the owner or agents of the property on which the landing was conducted.
      c. The extent of damage sustained to any property, shrubbery, etc.
      d. The names and addresses of any witnesses to the landing, including any statements taken.
B. EMERGENCY / PRECAUTIONARY LANDINGS WITH PERSONAL INJURY AND / OR MAJOR PROPERTY DAMAGE.

1. Air crew responsibilities.
   a. Immediately notify Dispatch and request assistance / medical.
   b. Render first aid to injured persons.
   c. Request notification of the Unit Commander, Watch Commander, Area Commander, and / or jurisdictional law enforcement agency.
   d. Survey the damage to the aircraft and / or any other property.
   e. Notify Dispatch as soon as practical indicating the extent of injury or damage.
   f. Request the Federal Aviation Administration (FAA) and National Transportation Safety Board (NTSB) be notified of the incident.
   g. If possible, the air crew shall preserve and secure the aircraft wreckage.
   h. Prior to the arrival of the FAA and NTSB, personnel shall ensure the aircraft and its contents are moved or disturbed only to the extent necessary to:
      - Remove persons injured or trapped.
      - Protect the public from injury.
      - Protect the wreckage from further damage.
   i. Provide any additional assistance or information requested by the FAA and NTSB personnel on the scene.
   j. The pilot and air crew shall submit a detailed memo to the Unit Commander.

2. The Unit Commander will respond to the scene and coordinate accident investigation efforts.

III. NOTIFICATIONS.

A. MANDATORY NOTIFICATIONS

1. The following circumstances require immediate notification to the FAA, per Federal Aviation Regulations 830.5.
   a. Flight control system malfunction or failure.
   b. Inability of any required flight air crew member to perform normal flight duties as a result of injury or illness sustained during course of employment as a crew member.
   c. Failure of structural components of a turbine engine excluding compressor and turbine blades and vanes.
   d. In-flight fire.
e. Aircraft collision in flight.
f. Damage to property, other than the aircraft, estimated to exceed $25,000 for repair (including materials and labor) or fair market value in the event of total loss, whichever is less.
g. Release of all or a portion of a propeller blade from an aircraft, excluding release caused solely by ground contact.
h. A complete loss of information, excluding flickering, from more than 50 percent of an aircraft’s cockpit displays known as:
   • Electronic Flight Instrument System (EFIS) displays.
   • Engine Indication and Crew Alerting System (EICAS) displays.
   • Electronic Centralized Aircraft Monitor (ECAM) displays.
   • Other displays of this type, which generally include primary flight displays (PFD), primary navigation display (PND), and other integrated displays.
i. Airborne Collision and Avoidance Systems (ACAS) resolution advisories issued when an aircraft is being operated on an instrument flight rules flight plan and compliance with the advisory is necessary to avert substantial risk of collision between two or more aircraft.

j. Damage to helicopter tail or main rotor blades, including ground damage, that requires major repair or replacement of the blade(s).

2. The following information is to be given during FAA notification, per Federal Aviation Regulations 830.6:

   a. Type, nationality, and registration marks of the aircraft.
   b. Name of owner, and operator of the aircraft.
   c. Name of the Pilot in Command.
   d. Date and time of the accident.
   e. Last point of departure and point of intended landing of the aircraft.
   f. Position of the aircraft with reference to some easily defined geographical point.
   h. Number of persons aboard, number killed, and number of seriously injured.
   i. Nature of the accident, the weather and the extent of damage to the aircraft, if known.
   j. A description of any explosives, radioactive materials, or other dangerous articles carried.
III. POST INCIDENT / ACCIDENT PROCEDURES.

A. FLIGHT STATUS OF PILOT AND AIR CREW MEMBERS.

1. After an accident or incident, the pilot and/or air crew members may be temporarily removed from flight duty by the Unit Commander, Division Captain, Assistant Sheriff, Undersheriff, or Sheriff.

2. Such removal will not affect pay status.

3. A post-accident/incident flight evaluation and physical may be required prior to reinstatement to flight duty.

4. Critical incident stress management support shall be made available to all affected by the accident/incident.
I. POLICY.
   A. Standard aviation procedures and guidelines will be used by flight crew members during flight to enhance safety and operations while performing assigned duties in the aircraft.

II. FLIGHT CREW RESPONSIBILITIES DURING FLIGHT.
   A. PILOT.
      1. The pilot is directly responsible for and is the final authority over the operation of the aircraft.
      2. Pilots have absolute authority to reject a flight or mission based on weather, aircraft limitation, physical condition, etc. No member of the Office of the Sheriff, regardless of rank, can order a pilot to make or complete a flight when, in the opinion of the pilot, it cannot be done safely.
      3. Pilots are responsible for compliance with unit standard operating procedures, FAA regulations, and the aircraft operating manual.
      4. Pilots shall handle radio communications with air traffic control, other aircraft, and ground law enforcement / fire personnel during rescues and firefighting missions.
      5. Pilots shall be responsive to the requests of the Tactical Flight Officer in order to accomplish the law enforcement and rescue missions.

   B. TACTICAL FLIGHT OFFICER (T.F.O.).
      1. T.F.O.’s are responsible for the law enforcement operational aspects of the flight.
      2. 

3. The T.F.O. shall remain alert for suspicious persons or activities on the ground and coordinate an appropriate response by ground units or make notification to dispatch.

4. The T.F.O. shall monitor law enforcement radio groups for calls where air support would be beneficial.

II. CREW RESOURCE MANAGEMENT (C.R.M.).

A. C.R.M. CONCEPT.

1. The Crew Resource Management concept and communication will assist in achieving and maintaining safe flight operations and unit culture.

2. The pilot, T.F.O. and F.R.T.’s will work together to form the aircrew which will ultimately accomplish mission objectives.

3. In the interest of safety, the pilot, T.F.O. and F.R.T.’s must be comfortable with any decision made while working as a crew. This begins when deciding whether to accept a mission and continues throughout the mission. If there is a serious concern on the part of either the pilot, T.F.O. and / or F.R.T., the mission shall not be flown.

4. Concerns on the part of either crew member should be immediately expressed to the other members. Communication is key. Concerns about a mission can sometimes be put to rest with a simple explanation.

5. All crew members have the right and the responsibility to question the pilot whenever they do not understand something or are uncomfortable with certain procedures, weather, flight pattern, etc. The pilot shall honestly answer any questions posed to him / her and not feel as though he is being challenged or doubted. In the event that explanations are refused, not completely understood, or concerns not addressed, then it is incumbent on the flight crew member(s) to contact the Unit Supervisor and / or the Unit Commander for a satisfactory explanation.

6. All crew members have a “go” or “no go” voice prior and /or during each flight or operation.

B. COMPONENTS OF C.R.M.

1. Each of the following is a component part of C.R.M.

   a. Good judgement.

   b. Good decision-making.

   c. Good and positive communication and interpersonal relationships.

      • Direct assistance.

      • Announce actions.

      • Offer assistance.

      • Make acknowledgements.

      • Be explicit to avoid confusion.
d. Common sense.

C. ROLE OF UNIT’S SAFETY OFFICER (UNIT SUPERVISOR).

1. Periodically monitor the Air Support Unit’s C.R.M. training to ensure compatibility with current aviation standards, procedures, and technologies.

2. Periodically monitoring the Air Support Unit’s C.R.M. practices to verify conformity with Unit policy.

3. Maintaining and distributing current information related to C.R.M.

4. As requested and needed, provide C.R.M. training.
I. POLICY.

A. Aerial searches, to include FLIR searches for various suspected criminal activities (i.e. marijuana grow houses), are considered a “search” and therefore come under the protection of the Fourth Amendment to the U.S. Constitution. Requests for such searches should be assessed independently of each other and all members of the Air Support Unit are responsible for being familiar to existing case laws and exercising best judgement to ensure there are no search and seizure violations while carrying out an Office of the Sheriff air support mission.

II. GENERAL.

A. Aerial searches to inspect activity on the ground may, under some circumstances, intrude into a person’s reasonable expectation of privacy, and therefore, come under the protection of the Fourth Amendment to the U.S. Constitution.

B. The Supreme Court has cautioned against assuming that compliance with FAA regulations will automatically satisfy Fourth Amendment requirements. Instead, the courts will determine whether the police aircraft is in the public airways at an altitude at which member of the public regularly travel. Other considerations include:

1. Type of property; open field versus curtilage.
2. Frequency of other aircraft flights; whether or not routine flights are conducted over the area.
3. Steps taken to conceal property and activity from aerial observation; actions taken by property owner to ensure privacy.
4. Location of observer (lawful altitude); the Supreme Court has held that 400 feet AGL is acceptable.

C. As a result of the case law, aerial searches will be conducted at an altitude of at least 400 feet AGL. The altitude of the aircraft may be lower, depending on the needs of the mission and the scope of the search.
III. PROCEDURES.

A. UNIT SUPERVISOR RESPONSIBILITIES.
   1. Requests for surveillance and/or aerial searches pursuant to a search warrant, shall be forwarded to the Unit Supervisor for review and approval. In the absence of the Unit Supervisors, the Unit Commander can review and approve such requests.
   2. A copy of the search warrant shall be obtained and review by the Unit Supervisor or Unit Commander for accuracy and validity.
   3. Out of county aerial searches, pursuant to a search warrant, must be approved by the Division Commander.

B. FLIGHT CREW RESPONSIBILITIES.
   1. Surveillance and/or searches pursuant to a search warrant will normally be scheduled with much advance notice as possible to allow the Air Support Unit to make appropriate arrangements for extended fuel, fresh flight crews, appropriate aeronautical charts, etc.
   2. If applicable, all flight crew members involved in the aerial search must review and acknowledge the validity of the search warrant.
   3. All aerial searches pursuant to a search warrant shall be documented in an Office of the Sheriff’s report.
   4. Flight crew members must make all reasonable efforts not to “warm up” the FLIR camera over property or areas suspected of criminal activity.
   5. Any deliberate acts to obtain probable cause using the FLIR equipment in violation of the Fourth Amendment shall be addressed using the corrective counseling system or discipline.
I. POLICY.

A. Pursuant to a letter of agreement between the Office of the Sheriff, the Federal Aviation Administration, and the local airports, the helicopter call signs are “S.T.A.R.R. ONE” and “S.T.A.R.R. THREE”.

B. The aircraft will communicate with police and / or fire dispatch using the appropriate call sign.

C. The aircraft may be assigned a different call sign during formation flights or fly-overs.
I. POLICY.

A. All helicopter operations will be conducted in accordance with the Air Support Unit’s standard operating and procedures, FAA regulations, and aircraft operating manual guidelines.

II. DEFINITIONS.

A. Instrument Meteorological Conditions (IMC). An aviation flight category that describes weather conditions that require a pilot to fly primarily by reference to instruments, and therefore under instrument flight rules (IFR), rather than by outside visual references under visual flight rules (VFR).

B. Above Ground Level (AGL). Height measured with respect to the underlying ground surface. This is as opposed to altitude / elevation above mean sea level (AMSL).

C. FAR 91-119A. Pilots must operate at an altitude that permits an emergency landing in the event of power unit failure without undue hazard to persons or property on the surface. There are no published minimums.

D. FAR 91-119D. Helicopters may be operated at less than the minimums prescribed for fixed wing aircraft if the operation is conducted without hazard to persons or property on the surface.

III. GENERAL.

A. WEATHER.

1. 

2. 

3. 

I. POLICY.
   A. The landing of the S.T.A.R.R. helicopters requires the undivided attention of the Pilot and the assistance from the air crew members. While there are no specific procedures that will cover all landings, these general guidelines shall be used to minimize potential risks of significant injuries, or deaths, and damage to the aircraft.
   B. The pilot is responsible for operation of the aircraft on the ground and in the air.

II. GENERAL.
   A. AIRCRAFT TOWING / GROUND HANDLING.
      1. A minimum of two people will be used for all towing operations into and out of the operations base hangar or authorized landing zones.
      2. Only authorized Air Support Unit personnel trained in towing the helicopter shall tow the aircraft.
      3. Only authorized Air Support Unit personnel trained in use of the all-terrain vehicle (ATV) may use the vehicle to tow the helicopters.
      2. The pilot or Tactical Flight Officer will ensure that no items are attached to the aircraft prior to movement.
      3. The pilot or Tactical Flight Officer will ensure that adequate clearance exists between hangar doors and the aircraft.
      3. The aircraft will be “tailed-in” into the hangar facility and “nosed-out” due to the rotor design.
   B. GROUND SAFETY.
      1. The pilot and flight officer must be constantly aware of dangers to ground personnel from spinning main and tail rotors.
      2. The pilot should, when possible, plan to position the helicopter in a manner that isolates the tail rotor and shall clear the tail rotor prior to turning the aircraft.
3. During ground operations when the helicopter is running and the blades are turning, the Tactical Flight Officer or Flight Rescue Technicians may exit the helicopter to ensure the aircraft is guarded.

4. The pilot will not depart the helicopter while the main rotor is turning, unless the pilot elects to stand outside the aircraft and warn people to stay away until the rotors stop.

5. The pilot will not leave any unauthorized persons in charge of the helicopter controls while the engine is running. If it is necessary for the Pilot to leave the aircraft, the engine will be shut down and control frictions set.
I. POLICY.
   
   A. Landing a helicopter anywhere other than an airport or heliport presents unique challenges to the pilot. Not only is there the possibility of rotor blades striking an unseen object close to the ground, but the crew has no control over people who may feel compelled to approach the aircraft. There are also concerns and fears from the public and others who object to aircraft noise. Therefore, off-airport landings will be conducted only when operationally necessary. The decision to land rests with the pilot. If called to account for the decision, the pilot must be able to clearly articulate the operational necessity of the off-airport landing.

II. PROCEDURE.
   
   A. PLANNED OPERATIONS.
      
      1. Secure permission from Unit Supervisor, Unit Commander or Watch Commander.
      2. If possible, a marked police car will be requested to secure the landing zone.
      3. A high reconnaissance will be required prior to landing to determine suitability of the proposed landing area.
         a. The high reconnaissance determines the location of potential hazards, such as:
            • Wires
            • Towers
            • Power lines
            • Telephone / electric poles
            • Other ground hazards (surface, size, slope, etc.)
         b. The high reconnaissance is utilized to:
• Determine wind direction
• Determine type of approach necessary (normal / steep)
• Locate approach / departure paths

c. The high reconnaissance should always be conducted at an altitude high enough to allow for successful forced landing, should an emergency occur.

4. A low reconnaissance will be performed while the aircraft is on final approach to the landing site.
   a. The low reconnaissance is utilized to confirm information gained during the high reconnaissance and continued to landing.
   b. If, during the low reconnaissance, a successful landing appears questionable, perform a “go-around” prior to loss of translational lift.

5. Never land in an area from which a take-off cannot be performed.
   a. Ground reconnaissance is performed prior to landing. It is utilized to determine the suitability of the ground area for ground operations.
   b. The ground reconnaissance supplements information gained by both the high and low reconnaissance and helps decide the best course of action to take in executing the take-off and departure.

6. Landing zone considerations:
   a. Size
   b. Obstructions
   c. Surface or terrain
   d. Location
   e. Crowd control

B. EXCEPTIONS.

1. The following are authorized landing sites:
   a. Any airport.
   b. Remote locations when an investigation or a mission requires a landing such as:
      • Short-haul
      • Firefighting
      • Water rescue operations
      • Skid riding insertions / deployments
      • Tactical team operations
   c. Private or public property for static display. Prior permission and authorization to land must be obtained from property owner and the Unit Supervisor, to include Cal-Trans (if applicable).
d. Any location when providing emergency services where the site is free of obstructions and precautions have been taken to prevent personal injury or property damage.

e. Any location when conducting training with a Tactical Flight Officer. The air crew shall ensure the site is free of obstructions, and that precautions have been taken to prevent personal injury or property damage.

2. The flight crew shall exercise sound judgment and follow procedures outlined in this manual during such operations.
I. POLICY.
   A. Except for actual water rescue missions or low altitude search and rescue
      missions, all over-water operations are to be conducted so that the aircraft can
      fly at an altitude and speed that will allow for autorotation to a suitable landing
      area in the event of a mechanical failure.

II. GENERAL.
   A. AIR CREW AND PASSENGERS EQUIPMENT
      1. During over-water operations, all personnel onboard an Office of the
         Sheriff’s helicopter must wear the following equipment:
         a. An approved personal floatation device.
         b. A “spare air” or HEED breathing device.
   B. FLIGHTS.
      1. If an aircrew must transit a large waterway (SF Bay, etc.) the crew
         should consider higher altitudes or deviation from a direct route across
         the bay and cross at or near a bridge.
      2. While conducting over-water operations the pilot will have his radio
         frequency on the nearest open airport control tower. The Tactical Flight
         Officer will have his radio channel on the nearest Sheriff’s Office
         channel.
      3. For over-water operations that exceed (10) ten minutes, the TFO will
         advise dispatch of their status.
      4. A pilot may deviate from the above when operational necessity dictates.
         The aircraft must return to minimum altitudes as soon as practical.
         Further, the pilot must be able to articulate the operational necessity if
         called upon to do so.
C. TRAINING.

1. Annual water egress / survival training shall be conducted and all crew members will be evaluated by the Unit Commander or Unit Supervisor. Included in the training shall be a water dunker course.

2. The training will be documented in the Unit Training Log and kept at the Air Support Unit’s office.
I. POLICY.
   A. The S.T.A.R.R. helicopter’s involvement in vehicle and foot pursuits shall be in accordance with existing CCCSO pursuit policy and procedures.
   B. The S.T.A.R.R. helicopters will respond to vehicle pursuits on a priority basis.

II. PROCEDURES.
   A. AIR CREW RESPONSIBILITIES.
      1. The role of the air crew during a vehicle or foot pursuit is to assist and coordinate field unit activities and response.
      2. The air crew is responsible for monitoring and broadcasting pursuit information, unless the field supervisor requests ground units maintain the responsibility. The following should be broadcasted by the air crew:
         a. Traffic hazards.
         b. Suspect’s movements.
         c. Actions of the suspect(s).
         d. Any other pertinent information.
      3. The air crew shall videotape the pursuit for evidentiary, tactical and training purposes.
      4. Overall control of the pursuit shall remain with the primary ground unit and field supervisor.
      5. For the benefit of the involved officers, the air crew may re-broadcast transmissions from supervisors, the Watch Commander or Dispatch regarding dropping off, discontinuing or limiting the pursuit.
   B. S.T.A.R.R. HELICOPTER PURSUIT NON-AUTHORITY.
      1. The S.T.A.R.R. helicopters cannot assume the role of primary pursuit vehicle because aircraft are not recognized as emergency vehicle under
Section 165, Section 17004 of the California Vehicle Code, which states in part that public employees are not liable for civil damages while operating authorized emergency vehicles in the line of duty, or when in immediate pursuit of an actual or suspected violator of the law.

C. TERMINATION OF PURSUIT.

1. If pursuing units discontinue a pursuit, or if a supervisor terminates a pursuit for any reason, the air crew may, at the discretion of a supervisor or in the best judgment of the Tactical Flight Officer, continue tracking (i.e. monitoring) the suspect or vehicle from the air.

2. The air crew may follow the suspect vehicle until such time that they believe the suspect may be apprehended without engaging in another vehicle pursuit.

D. INVOLVEMENT OF OTHER AGENCY AIRCRAFT.

1. In the event another agency aircraft becomes involved in the pursuit, the pilot or Tactical Flight Officer shall initiate radio contact and confirm primary authority or transfer of the pursuit coverage to the other agency prior to continuing or departing from the pursuit.
I. POLICY.

A. Caution shall be exercised so that officers on the ground will not be illuminated unnecessarily.

B. Caution shall be exercised so that automobiles will not be illuminated, which might temporarily blind the operator.

C. Citizens and residences will not be illuminated indiscriminately. There must be some indication of suspicious or criminal activity prior to illuminating them.

D. The Tactical Flight Officer shall ask or suggest to personnel on the ground if the use of the spotlight would be beneficial during the incident.
I. POLICY.

A. At scenes where Medevac helicopters (REACH, CAL STAR, CHP) are also called to evacuate injured persons, the Pilot of Contra Costa County aircraft will contact the Medevac pilot using the aircraft radio. This is essential to coordinate the response of both aircraft and assure safe operations.

B. If the Medevac aircraft cannot be contacted, Contra Costa County aircraft will leave the area until the medevac aircraft has departed from the scene.

II. GENERAL.

A. EMERGENCY MEDICAL TRANSPORT MISSIONS

1. Office of the Sheriff Air Support Unit crew members (TFO’s) receive only basic first aid instruction and training, and the aircraft are equipped with only basic first aid kits. Therefore, transportation to the hospital of critically injured patients is generally prohibited.

2. Under the most extreme lifesaving cases may the air crew request for onboard transport of a critically injured patient (child, law enforcement personnel) to a local hospital, and only if there is an authorized Con-Fire Captain Paramedic assigned to the air crew.

3. Onboard transportation flights of injured persons are authorized in rescue situations requiring relatively short flights from scenes where rescue personnel have limited access and only if there is an authorized Con-Fire Captain Paramedic or SAR member (FRT’s) assigned to the air crew.

a. Under these circumstances, the air crew should coordinate their actions with other rescue / medical personnel and make arrangements to transfer care of the patient to qualified emergency medical personnel as soon as possible.
I. POLICY.
   A. The Office of the Sheriff’s S.T.A.R.R. helicopters will respond when requested to perform a short-haul rescue or long-line operation. Procedural guidelines should always be followed for consistency, familiarity, and standardization.

II. DEFINITIONS.
   B. SHORT-HAUL RESCUES. The term “short-haul” refers to moving one or more persons from one location to another while suspended on the end of a rope beneath the helicopter. The purpose of the technique is to insert or extract from remote locations, areas of restricted access, or from the water which are otherwise unreachable via conventional transportation means or the life of the victim(s) are in imminent danger.
   C. HUMAN EXTERNAL CARGO (H.E.C.). The transport of a person or persons at the end of a helicopter’s long line, or outside of the helicopter’s interior cabin (skid-riding).
   D. JETTISON. To discard the external cargo load from helicopter. HEC’s ARE TO BE CONSIDERED NON-JETTISONABLE.
   E. TACTICAL FLIGHT OFFICER (T.F.O.) / CREW CHIEF. Deputy Sheriffs assigned to the Air Support Unit and who have successfully completed T.F.O. training. The T.F.O. assigned to the front seat of the aircraft is the designated Crew Chief when other rescue personnel are assigned to the unit. The T.F.O. must complete the minimum requirements for short-haul rescues before they can be appointed to Crew Chief. The Crew Chief oversees the rescue evolution.
   F. FLIGHT RESCUE TECHNICIANS (F.R.T.). Selected firefighters and Search and Rescue personnel who have successfully completed the minimum requirements for short-haul rescues / skid riding insertions and are approved to augment the air rescue crew during short-haul missions.
III. STATEMENT OF RISK.

A. Helicopter short-haul insertion, extraction and rescue techniques involve specialized training and skills and should only be performed under the supervision of qualified, experienced Flight Rescue Technicians (F.R.T.’s) and pilots. Short-haul techniques require careful risk management and assessment prior to and during the application of these practices. It is imperative that the S.T.A.R.R. helicopters and equipment used in short-haul insertion, extraction, and rescue are capable, mechanically air worthy and maintained in a constant state of readiness as prescribed by the manufacturer.

B. Failure to adhere to the approved short-haul guidelines within this manual may lead to serious injury and/or death.

IV. GENERAL.

A. APPLICATIONS OF THE SHORT-HAUL MISSION.

1. Search and rescue insertion, victim extraction or evacuation, law enforcement tactical operations, high-rise structural fires and insertion of firefighters are all viable applications of the static short-haul.

   a. Short-haul rescues are often the quickest, safest, and most efficient method of victim extraction or evacuation in remote locations or areas with restricted access.

   b. Only trained flight air rescue crew members shall perform any inspection, hook up, or rigging of rescue gear and short-haul equipment on the helicopter.

   c. Prior to any short-haul rescue mission, the pilot and air crew shall perform three manual and three electrical release cargo hook checks.

   d. No Human External Cargo (H.E.C.’s) shall be transported without the use of an approved portable secondary device (ARS Heli-Bridle) or approved secondary mechanical belly hook installed on the aircraft.

   e. The pilot and the flight crew shall have the ultimate responsibility to determine whether a safe rescue can be performed. This decision will be based on a variety of factors and known facts including, but not limited to: weather conditions, ambient light, artificial light, terrain, obstacles, pilot or air crew expertise, and the capabilities of the aircraft and/or rescue equipment.

   f. The Unit Supervisor and the Unit Commander or Watch Commander shall be notified.

   g. It is the responsibility of the air rescue crew to find safe, effective and reasonable alternatives prior to using short-haul tactics. These alternatives may include the use of ground rescuers or landing near the victim and approaching by foot.

   h. The pilot and air rescue crew shall make every effort to limit the amount of time the helicopter is hovering.

   i. The pilot and air rescue crew shall make every effort to limit the time that a rescuer or victim is suspended from the helicopter.
V. PROCEDURAL GUIDELINES

A. PRE-FLIGHT

1. All rescue gear, ropes, and Heli-Bridle are to be inspected by either a trained T.F.O. or F.R.T. Damaged equipment shall be documented and removed from service until thoroughly inspected, repaired, or replaced by the manufacturer.

2. The rescue equipment will be stowed in a ready to deploy manner.

3. Helicopter load calculation (Form FC 67) will be completed by a TFO or qualified Con-Fire personnel. The completed form shall be reviewed, initialed, and filed by the pilot.

B. RESCUE CALL OUT

1. Flight Restrictions. Short-haul and long-line operations shall only be conducted from ½ hour before official sunrise until ½ hour after official sunset.

2. Mission Reconnaissance Flight. Coordination between the pilot, Crew Chief, and FRT’s is essential for the safe and efficient completion of short-haul missions. The Crew Chief will assist the pilot with navigation and hazards to include other aircraft, wires, and blade clearance. The pilot and Crew Chief must evaluate and select short-haul insertion and extraction sites, as well as possible staging areas. The FRT’s may also assist with site selection. Short-haul insertion and extraction sites should be evaluated for the following:
   a. Proximity to incident; if insertion / extraction site is not at the incident site
   b. Approximate size
   c. Slope
   d. Rotor clearance
   e. Weather conditions
   f. Ground / aerial hazards
   g. Approach and departure routes
   h. Non-incident personnel in the area

3. A “hover check” to determine available aircraft power will be performed and all information necessary to make a “Go / No Go” decision will be gathered. Landing areas suitable for rigging the aircraft will be approved by the pilot.

4. Mission Briefing. A briefing shall be provided by the appropriate incident manager(s), Unit Supervisor, and/or Crew Chief prior to short-haul operation and must include the pilot, the Flight Rescue Technicians, and all persons involved in the operation. As a minimum, the following shall be addressed during the mission briefing:
   a. Risk assessment
   b. Nature of the mission
   c. Location
   d. Terrain
e. Weather conditions
f. Landing areas
g. Individual responsibilities
h. Choice of rescue equipment to be utilized
i. Cargo letdown procedures, if applicable
j. Hazards
k. Safety considerations
l. Emergency procedures
m. Situational awareness review
n. Determine “Go / No Go” status

5. Risk assessment is an ongoing process, to be applied throughout the entire operation. Life threatening emergencies as determined by the pilot, Crew Chief, Unit Supervisor, and/or Incident Manager may prompt deviation from these procedural guidelines. Although the entire air rescue crew should work together to develop a response and rescue plan, the Crew Chief or onboard Unit Supervisor oversee the rescue evolution.

6. Personnel and Helicopter Equipment Checks
a. Personnel Safety Check
   • Individuals will check themselves and their partner before operations commence. Inspections will be done from head to toe. Inspections should cover helmets, eye protection, harness, gloves, and any other necessary equipment and hazards such as open pouches, loose straps and equipment.

b. Helicopter Equipment Check. The pilot, Crew Chief, and FRT’s shall complete the following before operations commence:
   • Remove all cargo not essential to the mission
   • Short-haul or long-line rope correctly attached to primary hook and Heli-Bridle
   • Secure all seatbelts
   • Secure all loose equipment inside the helicopter
   • Remove and secure the helicopter door(s)
   • Ensure all radios are operational and on correct frequencies
     ➢ A radio check should be done to establish communications between the aircraft, the Crew Chief, FRT’s, and ground crewmembers, if necessary.

c. Three (3) manual and three (3) electrical cargo hook checks are to be performed by the pilot and T.F.O. or F.R.T. The pilot will receive confirmation after each hook check.
7. Rescuer Duties During Insertion.
   a. If rescuers are inserted in pairs, one rescuer should be responsible for communications with the pilot (hand, head, and/or verbal)
   b. Short-haulers remain a safe distance from helicopter.
   c. Helicopter lifts and establishes a hover
   d. After pilot receives the “up” signal, the pilot lifts the rescuers and flies to the incident site
   e. Prior to insertion, the pilot will do a final power assurance check
   f. Rescuers continue to communicate with the pilot until point of insertion (hand, head, and/or verbal)
   g. Rescuers will disconnect from the short-haul rope after deeming safe to do so

8. Rescuer Duties During Extraction.
   a. Maintain communication with the pilot
   b. Communicate any situation changes
   c. Move unnecessary people away
   d. Move victim or rescuers to a more desired extraction site (if needed)
   e. Request delivery of the short haul line from the pilot
   f. Rescuers and/or victim attach to short-haul rope
   g. Upon receiving the “up” signal, the pilot lifts rescuers, clears obstacles, and flies to landing area for victim transfer to awaiting medical personnel
   h. Repeat all steps until all rescuers are accounted for and the rescue mission has been completed or stopped

   a. Provide feedback to involved personnel
   b. Identify areas of concern for follow up
   c. Reinforce lessons learned
   d. Complete an After-Action Report

C. DOCUMENTATION.

1. The Crew Chief will draw a DR and document the rescue mission or long-line operation, whether or not the operation was completed. The documentation shall include the following:
   a. Nature of the call-out
   b. Names of air rescue crew members involved in the mission, to include designated roles
   c. How long the mission took (time of dispatch to conclusion of rescue)
d. Names of medical personnel and medical unit number receiving victim, if possible

e. If the mission was not completed or called off, the reasons for the call off will be documented

2. A Patient Care Report (PCR) may be completed by the TFO or FRT, if necessary. The PCR shall be filed at the Air Support Unit office in a locked drawer.

3. An Unusual Incident Report (UIR) will be completed and distributed after every rescue.

VI. SHORT-HAUL AND RESCUE EQUIPMENT.

A. All short-haul / long-line equipment and rescue gear must be approved by the Unit Commander before being purchased and placed into service.

1. All equipment used in short-haul operations shall be rated to meet the industry standard (NFPA/IHRA)

2. Class II or Class III harnesses are approved

3. All carabiners (steel and aluminum) must have a minimum rating of 30 kilonewtons (kN); 1kN = 224.8 lbs.

4. Carabiners must be either 2 stage or 3 stage locking type

5. All rescue gear and equipment should be rated for a minimum 10:1 safety margin

B. The short-haul rope will be constructed of synthetic material which may include nylon, polyester or high molecular weight polyethylene (eg. Spectra or Dyneema). Cordage will be single strand or greater and of low-stretch/no stretch, kernmantle, or braid-on-braid construction. The designated rope used for HEC shall not be used for long-line operations. All ropes designated for long-line cargo shall not be used for HEC short-haul operations.

C. The Heli-Bridle will be inspected daily. The Heli-Bridle will be retired after 5 years from the date of manufacture.

VII. MAINTENANCE

A. The Air Support Unit Commander or Unit Supervisor will maintain records of inspection, maintenance and use of all the short-haul rescue equipment.

1. Records will be retained for the life of the rescue equipment, or as long it is in use and should contain the following information:

   a. Identification number issued by the manufacturer

   b. Date of last inspection and signature of individual who performed it

   c. Maintenance performed, including the date and location where it occurred, and the signature and certificate type of the person who did the work
I. POLICY

A. S.T.A.R.R. helicopters may respond as an initial strike fire-fighting asset to battle wildland and grass fires at the request of a local or state fire agency when such fire presents a threat to people or structures. The Unit Supervisor and Unit Commander, or Watch Commander, shall be advised of these operations. Procedural guidelines should always be followed.

II. PROCEDURAL GUIDELINES

A. PRE-FLIGHT

1. All firefighting equipment is to be inspected by either a trained TFO or FRT. Damaged equipment shall be documented and removed from service until repaired or replaced.

2. The Bambi Bucket will be stowed in a ready to deploy manner during the designated fire season.

3. Helicopter load calculations (Form FC 67) will be completed by a TFO, pilot, or qualified Con-Fire personnel. The completed form shall be reviewed, initialed, and filed by the pilot.

B. FIRE SUPPRESSION CALL OUTS

1. Flight Restrictions. Bambi Bucket fire suppression operations and long-line operations shall be conducted no earlier than ½ hour before official sunrise and no later than ½ hour after official sunset.

2. Mission Reconnaissance Flight. Coordination between the pilot, Crew Chief, FRT’s, and responding fire personnel is essential for the safe and effective completion of firefighting missions. The Crew Chief will assist the pilot with navigation and hazards to include other aircraft, wires, and blade clearance. The pilot and Crew Chief must evaluate and select water sources, as well as possible staging areas. The FRT’s may also assist with site selection. Water sources and staging areas should be evaluated for the following:

   a. Proximity to fire
b. Approximate size
c. Slope
d. Rotor clearance
e. Wind condition
f. Ground / aerial hazards
g. Approach and departure routes
h. Non-mission personnel in the area

3. A “hover check” to determine available power will be performed and all information necessary to make a “Go / No Go” decision will be gathered. Landing areas suitable for rigging the aircraft will be approved by the pilot.

4. Mission Briefing. A briefing shall be provided by the appropriate incident manager(s), Unit Supervisor, fire agency personnel, and/or Crew Chief prior to any firefighting operations and must include the pilot, the Flight Rescue Technicians, and all persons involved in the operation.

5. Helicopter Equipment Check. The pilot, Crew Chief, and FRT’s shall complete the following before firefighting operations commence:
   a. Remove all cargo not essential to the mission
   b. Bambi Bucket correctly attached to the helicopter
   c. Secure all seatbelts
   d. Secure all loose equipment inside the helicopter
   e. Remove and secure helicopter doors
   f. All radios operational and on correct frequencies. A radio check should be done to establish communications between the aircraft, the Crew Chief, FRT’s, and the appropriate fire agencies involved

6. Three (3) manual and three (3) electrical cargo hook checks are to be performed by the pilot and TFO or FRT. The pilot will receive confirmation after each hook check.

7. Execution of Water Drops
   a. Pilot fills Bambi Bucket from water source and conducts one practice water drop to ensure proper function of the Bambi Bucket
   b. Pilot communicates with ground or aerial fire personnel for water drop placement provided they are on scene
   c. Pilot should evaluate the water drop placement in proximity to personnel on the ground, vehicles, structures, or other hazards
   d. The pilot will have the final determination if it is safe to release the water from the Bambi Bucket
   e. After the release of the water, the pilot should continue with these steps until the fire has been extinguished or instructed otherwise
8. **Debrief.** A debrief should be conducted following any training exercise or actual mission.
   a. Provide feedback to involved personnel
   b. Identify areas of concern for follow up and improvements
   c. Reinforce lessons learned

C. **DOCUMENTATION**

1. The Crew Chief will draw a DR and document the firefighting operation, regardless if the operation was completed or not. The documentation shall include the following:
   a. Nature of the call out
   b. Names of the fire agencies involved
   c. Names of the air rescue crew members involved in the mission, to include designated roles
   d. How long the mission took; time of dispatch to conclusion of the water drops
   e. If the mission was not completed or called off, the reason(s) for the call off will be documented

2. **An Unusual Incident Report (UIR) and an After-Action Report (AAR) will be completed at the conclusion of every firefighting operation.**
I. POLICY.
   A. The Office of the Sheriff’s aircraft will respond when requested for surveillance or search operations involving a known armed (firearm) suspect. Special considerations on flight patterns will be made by the pilot for the safety of the aircrew and aircraft, which may include requesting the assistance and response of a fixed-wing aircraft.

II. GENERAL.
   A. 
      1. 
      2. 
   B. 
      1. 
I. POLICY.

A. [Redacted]

II. GENERAL.

A. 1. [Redacted]
   2. [Redacted]
   3. [Redacted]
      a. [Redacted]
      b. [Redacted]
      c. [Redacted]
      d. [Redacted]
   4. [Redacted]

B. 1. [Redacted]
I. POLICY.
   A. Formation flights involving Office of the Sheriff aircraft may be conducted for special events if previously approved by the Unit Commander. If the formation flight is out of county, the Division Commander must authorize the flight.

II. PROCEDURES.
   A. Formation flights include two or more aircraft of the same class flying in a common direction at a safe distance.
   B. Fixed wing aircraft shall not be involved in a helicopter formation.
   C. All formation flights shall be coordinated on the ground prior to the flight with all pilots involved in attendance (briefing).
   D. The Pilot-In-Command of the lead aircraft shall be identified as the Flight Leader.
   E. The Flight Leader shall be responsible for conducting a pre-flight briefing during which assignments and “chock” position of each craft in the flight shall be assigned.
      1. The Unit Supervisor shall review and approve all formation flight operation plans.
   F. The type of formation, call signs, radio frequencies, assembly areas, and landing zones shall be established during the pre-flight briefing.
      1. A radio in all aircraft involved in formation flights shall be tuned to a common frequency at all times during the course of the flight mission.
   G. A Tactical Flight Officer capable of monitoring the aircraft instruments, aircraft position and generally assisting the Pilot-In-Command is highly recommended for each aircraft involved in the formation flight.
      1. In all cases, Office of the Sheriff aircraft participating in a formation flight shall have, at least, a pilot and a Tactical Flight Officer on board.
H. All pilots in the formation shall be responsible for maintaining visual contact with other aircraft in the formation, and to maintain proper separation and interval.

I. Formation flights with non-departmental aircraft shall not be conducted without the specific authorization of the Division Commander.
Introduction

This manual is intended to direct Civil Unit employees in their specific functions. It is to be used in conjunction with the Sheriff's Policy and Procedure Manual, as well as the State Sheriff's Association Civil Procedural Manual, and all applicable Federal and State Laws. Any employee discovering a conflict between any of these directives will immediately bring this to the Civil Manager or Civil Supervisor’s attention for resolution.

OFFICE OF THE SHERIFF

CIVIL UNIT

CIVIL UNIT MISSION STATEMENT

Our mission is to maintain a professional and efficient organization reflecting not only the overall mission of the Office of the Sheriff but a specific dedication to the timely and responsive movement of the Civil process.

OUR UNIT VALUES

➢ Dedication
➢ Honesty
➢ Integrity
➢ Professionalism
➢ Respect
➢ Sensitivity
➢ Trust
SUBJECT: CLERICAL STAFF JOB DESCRIPTION/DUTIES

GENERAL INFORMATION: Clerical staff assigned to the Civil Unit clerical detail work under the supervision of the Unit Manager, Sergeant, and Clerical Supervisor. Civil clerical staff is responsible for dealing with the receipt, logging, billing, tracking, storage, and filing of civil process.

The clerical staff must become knowledgeable with sections of the Civil Code of Procedure and the Sheriff's Procedural Manual. Cross Training is a necessity in a unit of this size. To facilitate cross-training, task assignments are rotated at the discretion of the Unit Manager.

Good communication skills are necessary to convey information both verbally and in writing to the Courts, attorneys, and to the general public.

PROCEDURE 1 Clerical Supervisor

The Clerical Supervisor duties include, but are not limited to, the following:

- Provide supervision for all clerks to include employee evaluations, training and time off approval.
- Process Purchasing and Requisitions. Place orders when supplies are low, including typing of requisition when there is no open purchase order.
- Pay incoming bills through accounts payable.
- Prepare written responses to inquiries on cases.
- Relief coverage for all clerical assignments as needed.
- Process/return NSF checks.
- Assist Unit Lieutenant/Sergeant as directed.
- Process:
  - Claims of Exemption
  - Releases
  - Third-party claims
  - Sale of Property
  - Bankruptcies
  - Unusual writs
  - Writs of Sale
  - Writs of attachment
  - Personal and Real property levies
  - Vehicles sales
- Provide supervision and direction for S.A.V.E.S. volunteers
- Maintain safeguards over cash-receiving and depositing of monies.
- Participate in Civil Users Group

**PROCEDURE 2**

The below-listed tasks are the responsibility of the Clerical staff. These tasks will be assigned to specific Clerks at the discretion of the Unit Manager, Sergeant, or Clerical Supervisor. The intent is to promote Cross Training. A category may be assigned to one clerk in its entirety or distributed across multiple clerks to promote efficiency.

**Reception**

- Receive new process over the counter from the public (registered process servers, attorneys, other Sheriff’s agencies, etc.)
- Field incoming calls
- Check voice mail and return calls
- Sort US Mail and County Mail and distribute appropriately
- Post monies under executions
- Label new file folders
- Process writ returns

**Input**

- Enter new file information for earnings withholding orders, bank levies, third-party levies, keepers, and other Civil processes into the computer.
- Receive keeper monies from Deputies, verify and sign off on Deputies receipts
- Verify information on the Memorandums of Costs and Credits and input the information into the system. **Note** - The employer must also be informed of this information.
- Post-trip tickets and verify the information on the Proof of Service the following day. Send out Proof of Service to the appropriate Court and defendant.
- Assemble and organize Civil Process for field service.
- Provide relief and back up to reception as needed for the phones and counter.

**Evictions**

- Schedule evictions for West, East, Central and Central/East
- Input new eviction process
- Assemble eviction papers for field Deputies, plaintiff/agent/attorney, and tenants in possession
- Process eviction calls to include:

  Tenants - claims of right of possession, legal aid, etc.
  Plaintiff - eviction procedures, times of scheduled evictions
Courts - stays, hearing date and times, date of eviction, claim of rights
Deputies - Field questions

- Print out Notice to Vacate and Evictions Trip Tickets
- File eviction papers by date of eviction
- Writ of Possession (Real Property) writ returns

**Accounting**

- Responsible for disbursement of monies under Writ of Execution
- Prepare disbursement checks for payment and/or refund from a Warrant Proof Listing from confirmation of applicable information
- Balance all Civil Units Clerical receipts, charges, deposit each day
- Reconcile all daily receipts, charges, and previous days' disbursement checks against computerized reports.
- Prepare deposit permits and deposit receipts/cash daily with the County Treasurer.
- Maintain cash receipt, charge, cash disbursement, and management summary registers.
- Maintain petty cash refund, form sales, and assessment fee logs.
- Maintain cash receipt books
- Process all voided, canceled, lost, or stale dated warrants following County guidelines.
- Record service fees on files where Proof of Service by a Registered Process Server was never received. Close files, as appropriate, and return files to respective Court.
- Assist other clerical activities as necessary or directed
CONTRA COSTA COUNTY  
INVESTIGATION DIVISION  
CIVIL UNIT  
POLICIES AND PROCEDURES

SUBJECT:  CIVIL DEPUTY JOB DESCRIPTION/DUTIES

GENERAL INFORMATION:  Civil deputies work under the supervision of the Civil Unit Manager and Sergeant. Civil deputies are responsible for dealing with a myriad of technical tasks unique to civil law enforcement.

The civil deputy must have the ability to interpret the applicable civil law and possess good communication skills necessary to convey information both verbally and in writing to attorneys and the public; must be willing to work flexible hours and have the ability to review, organize and formulate a route plan for service of civil documents.

DUTIES:  The Civil Unit Deputies duties include but are not limited to:

- Preparation and service of various civil processes; attach, levy, and sell both real and personal property; seize business assets and install keepers; serve notices to vacate and complete restoration of real property for evictions.
- Serve civil and criminal warrants of arrest and warrants of attachment.
- Execute auto levies.
- Conduct real and personal property sales.
- Execute bank levies.
- Plan, organize, and execute keeper levies.
- Serve Earnings Withholding orders, both personal service and certified mailing.
- Transport and book prisoners.
- Book prisoners at county facilities.
• Schedule office time, to include answering telephone messages, daily routing of documents to be served.
• Extradition matters.
• Inquiries in PIN, NCIC, DMV.
• Provide training to newly assigned employees when assigned to do so.
• Schedule activities to ensure all assignments are completed in a timely manner.
• Serve TRO’s
• Travel overnight to out of state locations
• Fly armed with inmates
• Prepare rendition documents, schedule and attend court appearances related to renditions, file Penal Code 1551.1 charges as needed.
• Other duties as assigned.
SUBJECT: CIVIL UNIT PERSONNEL DRESS CODE

POLICY: Civil Unit personnel shall dress neatly and in good taste in keeping with the standards established by the Office of the Sheriff.

REFERENCE: DEPARTMENT MANUAL 1.07.21

GENERAL INFORMATION: DEPUTIES

A. Evictions

1. Deputies will wear the standard Class “C or D” uniform. This attire will be clearly marked and identify participants as Sheriff’s Office employees.

2. An optional uniform specific to the Civil Unit may consist of a Long or Short-sleeved black polo with black BDU pants.

3. If assistance is required, the uniformed deputy is readily recognizable, lessening the chance for confusion on the part of the cover officer, and increasing the safety of all concerned.

4. [Blank]

B. Service of Process

1. Deputies may wear the prescribed standard uniforms Class B, C, or D during the Service of Process.

2. The optional uniform may consist of the short or long sleeve black Polo shirt and Tan Utility pants.

3. [Blank]

4. Deputies may wear civilian attire as per the Department manual with the prior permission of the unit supervisor.
C. Extraditions

Special attention must be paid to the clothing restrictions in place at any custody facility deputies may visit during their travels.

CLERICAL EMPLOYEES

A. Clerical/Civilian employees will wear appropriate traditional business attire as specified in Department Manual 1.07.21. Clerical Uniform – Options are allowed as provided in the Department policy with the approval of the unit manager.
SUBJECT: DOCUMENT MANAGEMENT

GENERAL INFORMATION: Documents received for service must be handled in a manner that promotes a smooth transition, without unnecessary delay, between the Sheriff's Civil Unit, the various courts of jurisdiction, and between plaintiffs and defendants. All Civil Unit personnel are responsible for ensuring the timely service of the Civil process.

Documents for service will be received at the Civil Unit office where they are checked to ensure they are "Plain on their face," and can lawfully be served. They are time and date stamped. They will then be entered into the computer system, printed, and sent to field staff for service.

PROCEDURE 1 The documents will be distributed to the appropriate distribution box in the Deputies office. The Civil Supervisor will ensure the logging of ALL service of process attempts promptly. Service of process attempts may be made based upon current workload, as well as the area of the County the specific Deputy or team is working.
SUBJECT: CELLULAR TELEPHONES

POLICY: Cellular telephones are provided to assist employees in conducting county business when business cannot be conducted via normal telephone systems.

REFERENCE: Department Manual 1.07.54 & 1.07.57

GENERAL INFORMATION: Cellular telephones are provided for use in conducting County business only. Employees shall follow these guidelines when using this telephone system;

PROCEDURE 1 CELLULAR TELEPHONE USAGE

A. Employees will use cellular telephones in accordance with the listed policy.

B. Telephone usage by the driver of a vehicle is not authorized except for official, priority business.

C. Operator information or 411 calls are authorized only in business-related matters and should be avoided when possible.

D. The Civil Unit Manager will review all Bureau monthly telephone bills.

E. Employees are responsible for reporting and/or correcting any problems identified in assigned equipment.
SUBJECT: COMMUNICATION EQUIPMENT AND RADIO PROCEDURES

REFERENCE: Department Manual 1. 07.51

GENERAL INFORMATION: Sworn personnel assigned to field activities will be assigned vehicle and portable radios. These radios will provide immediate communication throughout the County.

PROCEDURE 1: Field personnel will sign on with their call sign before working in the field. Throughout the day, personnel will keep dispatch advised of all changes in status and locations, as well as the end of their assigned shift. Department radio procedures will be followed at all times.

PROCEDURE 2: Employees are responsible for reporting and/or correcting any problems identified in assigned equipment.
SUBJECT: BUSINESS LEVY

POLICY: Business levies will be processed expediently to ensure timely collection of judgments.

GENERAL INFORMATION: Business is normally seized or levied upon by service of either a writ of execution, possession, or a writ of attachment issued by a court with jurisdiction over the matter.

The time limits and property to be seized will be explained in the letter of instructions attached to the writ.

PROCEDURE 1 INSTALLATION OF KEEPER PERSONNEL

A. Upon receiving the levy packet, the civil deputy will completely familiarize themselves with the written instructions of the judgment creditor or his attorney.

B. A "keeper list" has been established and is maintained at the civil office. When scheduling keeper personnel, the civil deputy will contact persons from this list.

Deputies should attempt to use all persons on the list and avoid using specific individuals exclusively.

C. When keeper personnel has committed to a job, the civil deputy will notify them when and where to meet the installing deputy, advise them of the nature of the business and give any advance instructions necessary for the smooth operation of the levy.

Keeper personnel is never permitted to enter the business prior to the arrival of the installing deputy.

D. The civil deputy will notify the supervisor in charge of the civil unit prior to the levy by giving him a photocopy of the trip ticket. Include in the notification the name of the keeper(s), time of levy, and the telephone number of the business, if known. Deputy will obtain current pay off from clerical staff, including all interest accrued to date.
E. Upon entering the business, the civil deputy will locate the owner or person apparently in charge. The deputy will introduce himself, advise the owner/agent of the levy, ask for and inspect the business license to ensure that the levy can proceed. NOTE - Should there be a discrepancy of ownership between the State License and the Levy Instructions, the State License takes precedence.

While the deputy is involved in the above actions, the keeper should be instructed to watch the cash register to ensure that monies are not removed as the levy is being made.

F. Till Tap: A Till Tap is a request to levy on cash-on-hand only. If instructed, pursuant to a Writ of Execution, the Levying Officer may seize and remove all cash from a place of business without placing a Keeper, per C.C.P. section 700.030.

PROCEDURE 2 MAINTAINING THE LEVY

GENERAL INFORMATION:

The keeper acts as the Sheriff's representative in maintaining the levy and securing the property attached. They must maintain personal, physical custody and control of the assets at all times or the levy may be lost, and the Sheriff may become liable to the plaintiff for damages. It is imperative that the keeper remains on the premises at all times until relieved or released.

A. A keeper's log is required for every job, even if the levy is paid off immediately. The time the keeper is installed will be noted, and the correct times of each keeper when they are going on or off duty. The log will be used to note all unusual circumstances occurring during a shift, information regarding the progress of the levy, and special instructions from the installing deputy or the supervisor of the civil unit. The log will be signed by the keeper at the end of each shift.

B. All of the defendant's property on the premises, unless specifically excluded, is under levy. No stock or merchandise is allowed to leave unless paid for in full, and the money paid over to the keeper. Persons other than the defendant, claiming ownership of property on the premises, will be referred to the installing deputy or the supervisor in charge of the civil unit. Nothing will be released without approval.

C. At the installation of the keeper, cash and checks on the premises will be counted. The business will be allowed to operate out of this "bank." The amount of the "bank" will be determined by the type of business and the volume of transactions at the business. Excess
monies will be removed from the store, a receipt issued, and the monies given to the civil clerical section for deposit.

D. Unless otherwise instructed, all sales are to be cash or check. Credit sales will not be permitted.

E. Mail addressed to and received by the business (defendant/debtor) becomes the property of the business upon delivery by the U.S. Postal Service. Mail may be seized and opened by the Deputy/keeper. Any monies or checks made payable to the business may be taken and applied to the judgment. Caution must be used in opening only the mail addressed to the business and seized only those items made payable to the defendant/debtor.

F. Incoming goods may not be paid for with funds on the premises or from the "bank"; however, the defendant may accept deliveries if he wishes to pay for them "out of Pocket" or if the delivering firm is willing to extend credit. The defendant may elect to refuse delivery. Once delivery has been accepted, those items become part of the assets under levy.

PROCEDURE 3  RELEASE OF LEVY

GENERAL INFORMATION: All instructions to release the levy will come from the creditor, creditors attorney, or the civil unit. Instructions to release, other than written instructions, will be verified by a telephone call to the creditor or his attorney. You may release on verbal instructions, but instruct the creditor to immediately forward written instructions to the civil Unit office. (Immediately fax, then mail hard copy)

PROCEDURE 4  AFTER HOURS KEEPER LEVY

GENERAL INFORMATION: The installation of keepers occasionally requires the keeper to work after the installing deputy's shift has ended. Keeper levies sometimes extend into a weekend when there are no civil deputies on duty. This section is intended to address these circumstances and establish a guideline to follow when such matters arise.

A. When installing keeper levies, the civil deputy will make every effort to minimize the need for overtime.

B. During the changing of shift for keeper personnel, the installing deputy will only be present when there are monies seized and receipts to be issued or when the complex nature of the levy requires the deputy to be present.
The installing deputy will coordinate the shift change with each keeper prior to conducting the levy. Keepers will relieve each other without the installing deputy being present.
SUBJECT: BENCH WARRANTS

GENERAL INFORMATION: Due to Detention Facility overcrowding and the difficulty of housing Civil prisoners, a system of "Agreement to Appear" Citations is used to assure the defendant is aware of the Court's order and to encourage the closure of the process without the use of Jail.

To encourage appearance in the Court, the initial effort should be made to collect cash bail. If this is not possible, the “Agreement to appear” citation form will be used.

PROCEDURE 1: Deputy:

Check with the courts in the local area to determine the correct time Civil Bench Warrants are heard.

A. Fill out "Agreement to Appear" form. (Attached)
B. Have the defendant sign form.
C. Give the defendant the yellow copy.
D. Return white and pink copies with the trip ticket to clerical staff.

PROCEDURE 2: Clerical:

Check trip ticket to ensure it is properly filled out and send down to Clerical with white and pink copies of "Agreement to Appear" attached.

A. Enter into the computer as served by citation.
B. Pull original warrant from the Civil file.
C. Send the white copy of "Agreement to Appear." original warrant and original (white) Report of Service return to the issuing court.

Send the yellow copy of the Report of Service return to the plaintiff/judgment creditor.
File the pink copy of "Agreement to Appear." the pink copy of the Report of Service return and the trip ticket into the folder with the letter of instructions.
SUBJECT: EVICTIONS

POLICY: The Office of the Sheriff will ensure rapid enforcement of the Judgement for Possession of Real Property, Writ of Possession. Enforcement will be performed in a timely and professional manner.

GENERAL INFORMATION: DOCUMENTS

A. A judgment for possession of real property may be enforced by a Writ of Possession of Real Property issued pursuant to CCP 712.010.

B. The appropriate Writ shall be reviewed to confirm the content meets the requirements of CCP 712.020. The Writ shall be directed to Contra Costa County Sheriff.

C. Adequate instructions shall be provided by the requester and contain the signature of attorney or party without an attorney. An instruction sheet will be available for use to provide the required information.

D. The above-listed documents will be provided along with the appropriate fee for posting eviction and removing occupants and putting a person in possession, as provided by GC 26733.5.

PROCEDURE 1 RECEIVING

A. The above-listed documents shall be received at the front window. The receiving personnel will review documents for completeness.

1. An estimated week of service will be provided to the requester.

2. If requested, the requester will be provided a Date/Time stamp on a copy of the writ.

3. The receiving personnel will place their initials in the upper right corner of the instructions.
4. The new file will be placed in the “Eviction” file for processing.

PROCEDURE 2 PROCESSING

A. The following document will be received to initiate the eviction process. The documents will be reviewed to confirm compliance with applicable laws.

1. Writ of Possession Real Property.

2. Instruction to the Sheriff (initialed by the receiving clerk)

3. Proper payment received.

B. Eviction clerk will create a file in Teleosoft with the above-listed documents and creates the below-listed service packets and their respective content.

1. Notice to Vacate
   a. Trip ticket
   b. Notice to Vacate (personal service)
   c. Notice to Vacate (posting)
   d. Claim of Right of Possession (if not previously served)
   e. Copy of Writ of Possession

2. Mailing to Debtor
   a. Notice to Vacate (signed by eviction clerk)
   b. Claim of Right of Possession (if not previously served)
   c. Copy of Writ of Possession

3. Mailing to Plaintiff
   a. Eviction Information for Property
   b. Eviction Procedures letter

4. Notice of Restoration
   a. Trip ticket
   b. Eviction Restoration Notice (w/copies)
   c. No Trespass postings (w/copies)

C. The returned trip tickets will be scanned into Teleosoft, and the writ returned to the court if applicable.
PROCEDURE 3.  TRIP TICKET - PERSONAL SERVICE/POSTING PROPERTY

A. The deputy will be responsible for completing the trip ticket attached to the process. The following information will be entered by the deputy on the trip ticket.

1. How served. Personal or posted
2. Name and title of the person served
3. Where served or posted
4. Date and time process served or posted.
5. Name of deputy (signature) and employee number.

B. In the event the property is posted, the deputy will mark the boxes “post.” and return the trip ticket to the Eviction Clerk. The eviction clerk is required to mail a copy of the process posted, to the location of the posted property.

C. The eviction clerk will do the necessary mailings as required by Code.

D. The eviction clerk has notified, by mail, the property owner/agents of the eviction. The notice mailed gives specific instructions for the property owner/agents to follow regarding the lock-out date. It is the responsibility of the Deputies to notify the agent/owner, by phone, the specific time and date to meet with the deputies at the location.

PROCEDURE 4  EXECUTION OF THE WRIT

A. The deputy shall serve a copy of the Writ of Possession of Real Property and Claim of Right to Possession form on one occupant of the property by:

1. Leaving a copy with the occupant personally.

2. In the occupant’s absence, with a person of suitable age and discretion found upon the property when service is attempted, who is either an employee or agent of the occupant or a member of the household.

B. If unable to serve the occupant, the deputy shall execute the Writ by posting a copy of the Writ in a conspicuous place on the property and serving a copy on the judgment debtor. Service shall be made
personally or by mail. The provisions of CCP 684.120 extending time
do not apply to the five-day period specified in this subdivision.

C. If the judgment debtor, members of the judgment debtor’s
household, or any occupant holding under the judgment debtor, do
not vacate the property within five days, the deputy shall remove the
occupants and place the judgment creditor in possession.

PROCEDURE 5   RESTORATION OF REAL PROPERTY TO PROPERTY
OWNER/AGENT

A. Upon completion of the “Notice To Vacate,” the eviction clerk will
have notified the property owner/agent of the steps necessary to
meet with the deputy to obtain possession of the property. This is
the “Restoration” phase.

B. The deputies will meet with the property owner/agent at the time
specified to restore the property to the judgment creditor.

C. Contact and entry will be attempted at the main entrance to the
location. If no response and the main entrance is secured, deputies
may make reasonable attempts to locate an alternative unsecured
entrance. Deputies shall not make entrance through anything other
than a doorway. No one else may enter the location for any purpose
prior to the Deputies rendering the location safe.

The agent/owner on scene may, at their discretion and effort, force
entry to the location, which might require the use of a locksmith.
Deputies are not to assist in the breaching of any entry point unless
exigent circumstances exist or approval of the unit supervisor. It is
the agent/owner responsibility for gaining entry into the location.

D. The deputy may not remove any person who claims a right to
possession accruing prior to the commencement of the unlawful
detainer action and who is not named in the writ. The claim must be
presented prior to restoring the property and be properly completed.
Time will not be provided to cure deficiencies in the claim.

E. Once the deputies have gained entry, they will ensure the location is
vacated. After the deputies are satisfied that the location is vacated,
they will turn the possession of the property over to the property
owner/agent. The property owner/agent will sign the restoration
(eviction form) papers. Owner/agent shall not make entry or be
allowed into the location prior to deputies rendering the location safe.
F. In the event, the premises are not clear, and no lawful “Claim of Right to Possession” is received, the deputy will remove the occupants from the location.

G. The deputy will be responsible for completing the trip ticket attached to the process. The following information will be entered on the trip ticket.

1. Served
2. Where served
3. Date and time process served
4. Names of person property returned to
5. Signature of deputy and employee number.

H. The deputy will return the completed trip tickets for “Restoration” to the eviction clerk for final postings.

In any event where a preponderance of the evidence identifies the owner or any agent for the owner has entered the location prior to restoration by the Sheriff. The Owner is considered to have “self-restored” the property. No further action will be taken by the Sheriff. No paperwork indicating the Sheriff participated in the action will be provided.

PROCEDURE 6 CLAIM OF RIGHT TO POSSESSION (CCP1174.3)

A. Unless a prejudgment claim of right to possession has been served upon occupants in accordance with CCP 415.46 any occupant not named in the judgment for possession who occupied the premises on the date of the filing of the action may object to enforcement of the judgment against the occupant, by filing a “Claim of Right to Possession”.

B. This section applies to any Writ of Possession of Real Property. The levying deputy shall accept possession claims on commercial property as well as residential property.

C. This procedure DOES NOT APPLY when the Writ of Possession contains a statement that the writ applies to all tenants, subtenants, if any, named claimants if any, and any other occupants of the premises. This exclusion applies when a Summons, Complaint, and “PREJUDGMENT CLAIM OF RIGHT TO POSSESSION” was
effected on the occupants of the premises. (CCP 415.46, 715.010a, and 1174.3(a))

D. The “Claim of Right to Possession” may only be made by a person 18 years of age or older, and who occupied the premises on or before the date the unlawful detainer (eviction) action was filed.

E. A claim may be filed at any time after service or posting of the writ of possession, up to and including the time at which the levying deputy returns to affect the eviction of those named in the writ of possession. A claim of right to possession is effected by the claimant “presenting a completed claim form in person, with identification, before the date of eviction at the Office of the Sheriff, OR at the premises at the time of eviction.”

F. Filing the claim shall constitute a general appearance for which a fee shall be collected as provided in the Government Code. The fee amount is established by local rule of court and collected by the court, not the sheriff.

PROCEDURE 7. ACCEPTING THE CLAIM OF RIGHT TO POSSESSION BY THE FIELD DEPUTY

A. Upon receipt of a claim in the field, the deputy will indicate the date and time of its receipt. When the deputy returns to the office, he will give the Eviction Clerk the original claim.

B. The eviction clerk will deliver the original to the issuing court, provide a copy to the claimant, and notify the plaintiff.

C. When the deputy accepts the claim, the deputy will STOP THE EVICTION. No further action will be taken at this time.

PROCEDURE 8. ACCEPTING THE CLAIM OF RIGHT TO POSSESSION WHEN PRESENTED AT THE OFFICE OF THE SHERIFF, CIVIL UNIT

A. Upon receipt of a claim at the Civil Office, the person accepting the claim will first check with the eviction clerk to ensure that the claim has been filed in a timely manner. To clarify the term timely manner, the person accepting the claim will check the date of eviction. The date of eviction is checked to ensure that the Claim of Possession is delivered before the date of eviction. Should the claim be presented on the Same Day as the Eviction, the claim cannot be accepted.
B. After checking the claim, and ensuring that the claim is made in a timely manner, the clerk will accept receipt of the claim indicating the date and time of its receipt and deliver the original to the issuing court, provide a copy or receipt to the claimant and notify the plaintiff.

C. The court will set a hearing to be held on the fifth day after the filing is completed. The court will notify the claimant and the plaintiff of the hearing date.

D. After the claim has been accepted, DO NOTHING FURTHER WITH THE EVICTION UNTIL FURTHER ORDERED BY THE COURT

PROCEDURE 9 CLAIM DENIED

A. If the claim is denied or, upon hearing, the court determines that there are no valid claims, the court shall order the deputy to proceed with enforcement of the original writ of possession as deemed amended to include the claimant.

B. Upon receipt of the court’s order, the levying officer will enforce the writ against any occupant or occupants within a reasonable time not to exceed five days.

PROCEDURE 10 DISPOSITION OF PERSONAL PROPERTY

A. The disposition of personal property remaining on the real property after eviction restoration becomes the responsibility of the Property owner/Agent. The property owner/agent is to dispose of the property, as outlined in Chapter 5 of the Civil Code.

PROCEDURE 11 EXECUTION OF A WRIT OF POSSESSION/REAL PROPERTY BY A REGISTERED PROCESS SERVER

A. In the event the levying deputy does not execute the writ within three days (exclusive of Saturday, Sunday, and legal holidays), a registered process server may execute the writ of possession of real property as provided in CCP 715.020.

B. If the writ is not executed within such time, the levying deputy will upon request give the writ to the judgment creditor or a registered process server designated by the judgment creditor.

C. Within five days after executing the writ, the registered process server shall file with the levying deputy all of the following:

1. The writ of possession of real property.
2. An affidavit of the registered process server stating the manner the writ was executed.

3. Proof of service of the writ.

4. Instructions in writing, as required by CCP 687.010.

D. The levying deputy shall perform all other duties under the writ and shall return the writ to the court.
SUBJECT: EARNING WITHHOLDING ORDER (EWO)

POLICY: Service of civil documents shall be completed in a manner consistent with the Civil Code of Procedure and the Sheriff's Civil Manual. Service of earnings withholding is the responsibility of personnel assigned to the Civil Unit when accompanied by a fee waiver from the court.

GENERAL INFORMATION: Process received for service will be checked by clerical staff to ensure all documents, instructions, fees, and attachments necessary for the service of process are complete and correct. Clerical staff will receive, input, and process all EWO documents, open case files and route to the Civil Unit sergeant for assignment to field personnel, if a physical process is required.

The Civil Code of Procedure allows Earnings Withholding Orders to be served by either a levying officer or a Registered Process Server (RPS), in the same manner. The exception being an RPS may NOT serve by registered mail.

PROCEDURE 1: Unless specifically instructed to serve EWO's by personal service, these documents will be served via certified mail. Employees of the Federal Government, such as Military and USPS, will be served via Certified mail.

PROCEDURE 2: When instructed, and when accompanied by a fee waiver, the levying officer shall affect personal service.
SUBJECT: EXTRADITIONS

POLICY: Arrests of fugitives in other States or Countries, who have active Contra Costa County Felony Warrants, will result in the initiation of extradition proceedings within the Sheriff’s Civil Unit. The extradition will be completed in an appropriate and timely manner to ensure the fugitives appearance before a local Court and Magistrate.

GENERAL INFORMATION: The process of fugitive extraditions requires certain procedures that are relative by law, record retention, and financial reimbursement.

Extradition personnel must become knowledgeable about these procedures in order to obtain monetary advancement and reimbursement for extraditions.

Extraditions conducted by commercial flights will only be handled by full-time Deputies.

PROCEDURE 1: DUTIES

A. Civil deputies will regularly monitor fax machine, voicemails, and emails for incoming extraditions.

B. The Civil Unit Sergeant shall be notified when a subject is in custody in another state on a Contra Costa County Warrant.

C. If a potential extradition is received, the deputy will notify the assigned extradition deputy District Attorney and Civil Unit Sergeant and obtain extradition approval.

D. The deputy will contact the holding agency and confirm approval/authorization paperwork has been completed, a copy of a signed waiver of extradition is received, and the inmate is ready to be transported to Contra Costa County.

E. Deputies will create an extradition folder for a wanted fugitive that will include demand form, any correspondence, extradition authority, signed waiver, and fugitive photo/booking information.
G. Book/schedule trip using issued procurement credit card.

H. Send teletype to TSA to obtain the individual NLETS number for each deputy conducting extradition.

I. Complete a Flying Armed Authorization Form that will be signed by Civil Unit Supervisor, Manager, or Captain.

J. Complete Extradition Advance Request form to secure funds for travel, meals, lodging, etc.

K. Extradition Advance Request Forms are to be submitted to the Civil Lieutenant or designee in cases of their absence. One photocopy is to be made for the Extradition Unit file. The original is to go to the Department Finance Officer for his/her signature, or in his/her absence, the Sheriff, Undersheriff, Bureau Commander or Chief of Management Services.

M. The Extradition Advance Request is to be walked over to the Auditor-Controller's Office for the issuance of a check.

N. The check is to be cashed at the Treasurer's Office or per Treasurer's instructions.

O. If the District Attorney advises the fugitive is not wanted, the deputy will change extradition status of the warrant to California Only and notify County Records/Warrants.

PROCEDURE 2 POST-EXTRADITION PROCEDURES

A. Upon completion of an extradition, the following procedures will be carried out in order to ensure reimbursement of funds expended.

B. The deputy will assemble all receipts of expenses arising from the extradition.

1. All unused monies/funds will be returned to the Civil Unit Accounting Clerk, or other designated individual, for deposit
in the County Treasury. The receiving party will provide evidence of the deposit to be placed in the Extradition file.

2. The deputy will complete the "Travel Expense Claim." The claim will be forwarded to the Civil Unit Supervisor within three business days following the receipt of supporting documents.

3. The Extradition folder will be provided to the Civil Unit Supervisor or their designee for further processing.

PROCEDURE 3 BILLING OF THE STATE FOR REIMBURSEMENT

A. The Civil Unit Sergeant or their designee will compile those documents required by the state for reimbursement.

1. Documents shall be forwarded to the state in a timely fashion.

2. A copy of those documents forwarded to the state will be placed in the Extradition file.

3. A copy of the Travel Expense Claim will be placed in the Civil Unit accounts receivable folder to be matched up with the payment when received.

4. When reimbursement is received, the funds will be deposited into the County Treasury.

PROCEDURE 4 EXTRADITION (NOT WAIVED)

A. Forward a certified copy of the complaint and warrant to the asylum state.

B. Upon notification that the subject has refused to waive extradition:

1. Forward notification of custody, refusal of extradition, and a copy of the report to the District Attorney's Office.

2. The District Attorney's Office will request a Fugitive Warrant from the Governor's Office and Agent's Appointment.

C. When the fugitive becomes available for transportation, initiate extradition proceedings as described above.

D. Upon return of the subject:

1. Complete the Agent's Appointment and return it to the Governor's Office.
2. Closeout any necessary forms, as described above.
CONTRA COSTA COUNTY
INVESTIGATIONS DIVISION
CIVIL UNIT
POLICIES AND PROCEDURES

SUBJECT:  RENDITION BILLING

POLICY:  All Rendition proceedings shall be the responsibility of the arresting agency. The Office of the Sheriff, Civil Unit, will process all Sheriff’s Office (including all contract cities and CHP) arrests, with timely notification of the fugitive’s availability to the agencies outside of California. Other arresting agencies within Contra Costa County may contract with the Office of the Sheriff for rendition services.

GENERAL INFORMATION  Office of the Sheriff General Policy 1.06.30 provides specific guidelines for the handling of arrest/bookings for Penal Code 1551.1. This policy addresses the billing of arresting agencies for those services provided under contract. This contract requirement may be waived by the Civil unit manager or his chain of command on a case by case basis.

PROCEDURE 1  NOTIFICATION OF ARREST

A. Civil Unit Deputies will monitor e-mail for receipt of the “Civil 1551” report issued and maintained by Technical Services.

B. The Civil Unit Deputy assigned the file will confirm the arresting agency has contracted for the Office of the Sheriff to provide rendition services.

PROCEDURE 2  BILLING FOR RENDITION

A. The deputy will create an invoice to the contracting agency. The invoice number will be that individuals file number when created in the “Extradition Log.” The deputy will mail one copy to the arresting agency and provide the Civil Unit Sergeant a copy of the invoice.

B. The Civil Unit Sergeant will place a copy of the invoice in the Civil Unit Accounts Receivable folder.

C. When payment is received, the amount will be deposited with the Treasurer, and a copy of the payment will be placed in the Rendition file.
D. The Civil Unit Sergeant will monitor the Civil Unit Accounts Receivable folder and resend any unpaid invoices outstanding for greater than sixty days.

E. Any additional efforts required for the collection of amounts due will be handled by the Civil Unit manager.

PROCEDURE 3  DISPUTED BILLINGS

A. Any disputes as to billing will be submitted in writing to the Office of the Sheriff’s Civil Unit Supervisor. If the billing dispute cannot be resolved, it will be forwarded to the Office of the Sheriff’s Civil Unit Manager for final written determination.

PROCEDURE 4  RENDITION CONTRACTS (AGREEMENTS)

A. The Civil Unit Sergeant will maintain a file of all signed “Rendition Service Agreement(s).”

B. The Agreements will be for a period of three years unless terminated sooner as provided in the Agreement.

C. The appropriateness of the fee amount will be addressed by Command prior to subsequent renewals of the contract.
SUBJECT: COMPENSATION

POLICY: The regular and overtime pay for Deputies on Extraditions will fall within the guidelines of FSLA, State law, respective MOU’s and the below-listed policy, with precedence in that order.

GENERAL INFORMATION: Extradition details may be scheduled for one or more days, depending on the geographical location where the fugitive is being held pending pick-up by the fugitive unit. The following procedures state the compensation methodology under normal circumstances.

PROCEDURE 1 Personnel assigned to an extradition detail during his/her regular duty shift will be paid at the normal rate of pay for their regular workday hours. Overtime will then be paid for actual time worked above this time. An example would be the team is still driving to, or returning from, the destination when the regular workday hours are exceeded. The necessity for this overtime must be articulated via e-mail to the Unit Supervisor.

PROCEDURE 2 Personnel assigned to an extradition detail traveling by plane will be allotted a full travel day for the outbound portion of the trip. A second travel day will be allotted for the inbound portion of travel. An additional travel day will be provided at the destination for those destinations east of the Mississippi River, Hawaii, and Alaska. This additional travel day may be granted at the discretion of the Civil Unit manager for destinations which present a complicated travel itinerary.

PROCEDURE 3 Personnel assigned to an extradition detail who are on their regular days off, after having worked a full FSLA work week, will receive a maximum of the regular workday hours of overtime pay per day.

PROCEDURE 4 Deputies assigned to extradition details that would normally be two days in duration, but are scheduled for a one-day turn-around, will be paid for the total amount of overtime worked.

PROCEDURE 5 Overtime demands must be accompanied by e-mail stating the reasons, i.e., canceled flight, delayed departure due to weather, mechanical problems, medical needs, etc. Each demand will be evaluated on an individual basis by the Civil Unit Manager or Supervisor.
SUBJECT: VEHICLES

POLICY: In order to maintain the highest standard of service and utilize the available work hours in the most economical manner, Civil Unit Staff may home garage their assigned vehicles.

REFERENCE: Department Manual 1.07.42 & 1.07.43

GENERAL INFORMATION: JUSTIFICATION

The Civil Staff's duties are such that check-out of a County vehicle from the Civil Unit at the start or end of the workday are impractical and uneconomical due to lost efficiency and increased fuel consumption.

The option of home garaging allows the Civil staff to start their day in an assigned area, rather than at the office. Staff can, therefore, make more efficient use of time in the field, i.e., avoiding traffic during congested times and in congested areas, because of planning and direction.

Home garaging also avoids the added travel time to and from the office to pick up a car when necessary to perform other civil functions outside of normal work hours. These include:

- The placement and removal of "Keepers," and response to a keeper's location in case of an unplanned status change.
- The levying of property.
- The service of process after hours.
- Travel to and from airports for the purpose of extraditions after/before hours.

PROCEDURE 1 Deputies will normally begin and end their shifts at the Civil Office to assure maximum coordination and organization of tasks by the Unit Supervisor. Prior approval by a supervisor is necessary for ALL service of process by staff taking place on the way in, or the way home from work.
GENERAL INFORMATION:  

GENERAL OPERATIONS

The Civil Unit has been provided expressed permission from the Field Operations Bureau Assistant Sheriff to operate a marked patrol car. The use of the assigned patrol car will be supervised by the Civil Unit Supervisor. The purpose of the vehicle is to provide easily identified presences while conducting evictions and the service of process.
Preface

The mission of the Coroner's Division is to inquire into and determine the circumstances, manner and cause of sudden, violent, unusual and unattended deaths that occur in Contra Costa County. Coroner's Division staff shall strive to serve the community in the most responsive, compassionate and professional manner possible.

This manual is a composite of current practices, principles, policies and administrative procedures governing the operation of the Office of the Sheriff Coroner's Division. The policies and procedures listed herein provide the members of the Coroner's Division with a method to achieve an objective and accurately reflect the professional expectations and standards of the Office of the Sheriff.

Every employee assigned to the Coroner's Division is responsible for familiarization with the Sheriff's Policy and Procedures Manual and the Coroner's Division Policy and Procedures Manual. Each employee shall review and understand these manuals as part of his or her initial orientation and again as necessary to remain current.

The Coroner's Division Commander will conduct an annual review of this Manual to ensure best practices reflect current policy and procedures. Suggestions for corrections or additions to this Manual may be submitted directly to the Coroner's Division Commander.

Captain David J. Hartman
Coroner's Division Commander
December 2019

Chapter 4 – Physical Plant & Equipment

3.3.43 Use of Coroner Equipment and Facility
3.3.44 Building Security
3.3.45 Smoke Alarms
3.3.46 Slug Discharge Plan
I. POLICY

A. The primary function of the Coroner’s Division is to inquire into and determine the circumstances, manner and cause of all sudden, violent, unusual and unattended deaths that occur in the county. Additionally, the Coroner’s Division will determine the extent of inquiry to be made into any death occurring under natural circumstances and falling within the provisions of the Government Code. Coroner’s Division staff shall strive to serve the community in the most responsive, compassionate and professional manner possible.

II. DEFINITIONS

A. The Sheriff-Coroner receives his authority and responsibilities from the California Government Code and the California Health and Safety Codes. The following two mandates represent the primary code sections that dictate the duties and responsibilities of the coroner.

1. California Government Code Section 27491
   “It shall be duty of the coroner to inquire into and determine the circumstances, manner, and cause of all violent, sudden, or unusual deaths; unattended deaths; deaths related wherein the deceased has not been attended to by a physician in the 20 days before death; deaths related to or following known or suspected either homicide, suicide, or accidental poisoning, criminal abortion.”

2. Health and Safety Code Section 102850
   The coroner shall investigate all deaths:
   a. Under circumstances as to afford a reasonable ground to suspect that the death was caused by criminal act of another.
   b. During the continued absence of the attending physician and surgeon.
   c. When the attending physician is unable to state the cause of death.
   d. Where suicide is suspected.
   e. Following an injury or an accident.
III. PROCEDURE

A. The Coroner, pursuant to California Government Code Section 27491, has the duty to inquire into and determine the circumstances, manner, and cause of all violent, sudden, unusual, or unattended deaths. These are deaths as a result of known of suspected homicide; accidental death, such as from a vehicle accident, drug overdose, drowning, fall, known or suspected suicide, suspected Sudden Infant Death Syndrome or any death that is suspicious. Additionally, the coroner investigates deaths wherein the identification of the decedent is not known and any deaths that are connected with the actions of law enforcement personnel. The coroner will assume jurisdiction when the decedent does not have a physician or if the physician, based on his knowledge of the decedent’s medical history, is unable to determine a reasonable cause of death.

B. The primary responsibilities of the Coroner include:

1. **Determine of the cause and manner of death:** The forensic pathologist will review the Coroner’s Investigative Report, pictures of the scene and any pertinent medical history. After an autopsy is conducted, toxicology or histology may be requested. The forensic pathologist will determine the cause of death after all the test results are received. The coroner investigator will then review the cause of death, any investigative findings from the agency of jurisdiction and recommend a manner of death. As each case is individually evaluated, an autopsy may not always be required. The forensic pathologist may review the medical records and/or consult with the attending physician to determine the cause of death.

2. **Establish and confirm the decedent’s identity:** If the deceased is visually recognizable, the investigator may confirm identity contextually based on photographic identification combined with personal effects, circumstances, body markings and physical descriptions. In cases involving badly disfigured, burned, badly decomposed or unidentified bodies, the investigator will use fingerprints, dental records, radiological and/or DNA comparisons to positively identify the remains.

3. **Safeguard the property of the deceased:** A coroner’s investigator can inventory, secure and transport the property to the office for safekeeping. In all suicide cases, involved weapons are made safe and collected as evidence. In cases when no next of kin is located at the scene, the investigator may place the Coroner Seal on the residence, precluding anyone from the entering until legal authority is verified.

4. **Notify the Next of Kin:** Pursuant to Government Code 27471, whenever the coroner takes custody of a dead body he or she shall make a reasonable attempt to locate the family.

5. **Additional roles:**
   - Facilitate organ/tissue harvesting.
   - Conduct Coroner’s Inquests.
   - Participate in Death Review Teams.
I. POLICY

A. The Coroner’s Division Manual is a composite of current practices, principles, policies and administrative procedures governing the operation of the Office of the Sheriff Coroner’s Division.

II. GENERAL INFORMATION

A. The policy and procedures established within this manual apply only to those members of the Coroner’s Division and does not apply to the standard of care, in an evidentiary sense, to criminal or civil proceedings.

III. PROCEDURE

A. REVIEW AND ACCESS

1. Every employee is responsible for familiarization with the Sheriff’s Policy and Procedures Manual and the Coroner’s Division Policy and Procedures Manual. Each employee shall review and understand these manuals as part of his or her initial orientation and again as necessary to remain current.

2. Each employee shall have access to the Coroner’s Division Manual located in the Sheriff’s Personnel Administrative Record Keeping System.
I. POLICY

A. To achieve effective direction, coordination and control, clear lines of authority are established designating who is in command at all times.

II. GUIDELINES

A. Coroner investigators often work without the assistance of direct supervision. When questions arise, the investigator should refer to established law, practice or policy. Additionally, the investigator may contact command personnel to receive direction or clarification.

III. PROCEDURE

A. In the event an investigator requires a supervisory decision or opinion, he or she shall make a reasonable attempt to contact the Coroner’s Division sergeant or captain.
B. If the sergeant and the captain are both unavailable, the investigator shall contact the Officer of the Day for direction.
C. If the Officer of the Day is not available, the investigator shall contact the Coroner’s Division Senior Deputy.
D. If the Officer of the Day or Senior Coroner Deputy is utilized, the coroner’s investigator shall notify the Coroner’s Division captain and sergeant by leaving a message on their cell phones.
I. POLICY
   A. Each employee or volunteer working in the Coroner’s Division shall be aware of their respective duties and responsibilities. Each person will be given the necessary authority to effectively execute the responsibilities of their assignment or position.

II. GENERAL INFORMATION
   A. The Coroner’s Office in Contra Costa County consists of ten full-time employees who provide service to the community twenty-four hours a day, seven days a week, twelve months a year. The Coroner’s Division utilizes six deputy sheriffs trained as coroner’s investigators. Two full-time clerks provide clerical support for the Division. The organizational chart is as follows:

1. 1 Captain
2. 1 Sergeant
3. 6 Deputy Sheriff coroner investigators
4. 1 Per Diem Deputy Sheriff
5. 2 Clerks
6. 1 Contract Forensic Assistant
7. 3 Contract Forensic Pathologist
III. DEFINITION

A. CAPTAIN
   1. The functions and responsibilities of the Coroner’s Division are commanded by a Captain. As the Division Commander, the Captain administers and develops programs for the successful operation of the Division.
   2. These duties include conducting a final review of all investigative reports, organizing and assigning work details within the Division, reviewing personnel performance, administering the annual budget, interacting with the media and other administrative duties as required.

B. SERGEANT
   1. The sergeant acts as the Assistant Division Commander and is required to possess a working knowledge of the duties and responsibilities of all employees within his or her span of control.
   2. The sergeant’s duties include reviewing investigative reports for accuracy, maintaining the Division Inventory, supervision of the coroner investigators, clerical support, volunteers, support personnel and other duties as required.
   3. The sergeant will exercise direct command in a reasonable manner that assures the good order, proper discipline and efficiency of the employees.

C. DEPUTY SHERIFF
   1. The coroner’s investigators determine the manner of death through examination of evidence, scene investigation, interviewing witnesses and doctors, researching the decedent’s medical history, autopsies and/or conducting Coroner Inquests.
   2. Additionally, the information developed by the crime scene investigators, investigators from law enforcement agencies having jurisdiction over the death, criminalists and fingerprint examiners is used by the coroner’s investigator to complete the investigation.
   3. The coroner’s investigator will remove the deceased from the place of death and transport them to the Central Morgue in cases requiring an examination by a pathologist.
   4. The coroner’s investigators are responsible for the receipt, collection, documentation and storage of the decedent’s personal effects and notification of the legal next of kin.
D. CLERICAL SUPPORT
1. The clerks provide critical support to the Coroner’s Division as they prepare death certificates, transcribe autopsy reports, collate and compile mandated statistical information, process invoices and provide general clerical duties associated with the Division.

E. FORENSIC PATHOLOGISTS
1. The Office of the Sheriff contracts with the Forensic Medical Group (FMG) for forensic pathologists and other specialists as needed. The forensic pathologists’ primary function is to determine the cause of death.
2. These doctors also participate on County/State mandated death review boards and provide expert testimony at Coroner’s Inquests.

F. FORENSIC ASSISTANT
1. For each autopsy, the pathologist works with a forensic assistant who will assist with the procedure.
2. The forensic assistant maintains the autopsy and body storage areas in a clean and orderly manner.
3. The forensic assistant works under the direct supervision of the pathologist and will accomplish the tasks enumerated in the service plan between the pathology services contractor and the Office of the Sheriff.

G. VOLUNTEERS
1. All volunteers working in the Coroner’s Office must be a member of S.A.V.E.S. (Sheriff All Volunteer Extended Services).
2. The volunteers can request to work in areas of their interest, to include working in the Autopsy Examination Room assisting the pathologist assistant or working in the front office to assist with clerical functions.

H. VICTIM ASSISTANCE GROUPS
1. Numerous groups provide assistance to families after the death of a family member. The Coroner’s Office works closely with several organizations to include:
   a. The Crisis Center, Contra Costa Prescription Drug Abuse Coalition, Suicide Prevention and Stand! Against Domestic Violence.
2. The Coroner’s Office provides these groups with statistical information and access to specific files for review provided they have successfully completed a background check and or have been granted access by the supervisor or Division Commander.

I. CONTRACT EMPLOYEES

1. In addition to all SAVES volunteers, all contract employees must successfully complete a background examination before access is allowed within the Coroner’s Office and the Central Morgue.
I. POLICY

A. Persons working in the Coroner’s Division will perform their duties with integrity and honesty. They will conduct themselves in an exemplary manner, both on and off duty, in keeping with the standards of the Office of the Sheriff Policies and Procedures Manual and the Coroner’s Division Manual.

II. GENERAL INFORMATION

A. The Coroner’s Division offers a unique work environment for personnel. Frequently during an investigation, deputies will become aware of the availability of property or real estate for sale. For example, the investigator may learn that a home, vehicle, or weapons not involved in the death are available for purchase. Because of the unique nature of the interaction with the next of kin, the employee is afforded information about the sale of property not afforded to the public.

III. PROCEDURE

A. While conducting a Coroner’s investigation, personnel are not to use information they obtained for personal gain. This policy does not prohibit the employee from purchasing property or real estate once it has become available for purchase to the public and is sold through proper channels.

B. Employees solicited to assist the next of kin either in disposing of property or because of their employment with the Coroner’s Office shall explain to the person that they cannot accept a gratuity pursuant to department policy.

C. If solicited to purchase items from the estate involving a Coroner’s case, the deputy shall report the solicitation to their Chain of Command.
I. POLICY

A. Members of the Coroner Division will be appropriately dressed while on duty. Civilian clothing will present a professional image at all times. Uniforms will adhere to Division requirements.

II. GUIDELINES

A. As a representative of the Sheriff-Coroner, personnel shall present themselves in a professional manner at all times. Specific dress guidelines have been established addressing both civilian and uniformed apparel. The Division Commander maintains the authority to modify these requirements when necessary.

III. PROCEDURE

A. The Coroner’s Division Uniform (Refer to CCCSO Policy 1.07.21):

1. Class “D”
   a. Black, 10”x4” CORONER logo with black background and 2 3/4” gold lettering with a 1/8” gold border on the back of the uniform.
   b. 1” x 6 1/2” cloth name patch (black with gold lettering) over right front pocket (no patches on sleeves).
2. **Foul Weather Jacket**
   a. Black jacket, (Refer to CCCSO Policy 1.07.21).
      
      * 10”x4” **CORONER** logo with black background and 2 ¾” gold lettering with a 1/8” gold border on the back of the jacket. 1”x6 1/2” cloth name patch (black with gold lettering) over right front pocket and **CORONER** over left front pocket. (no patches on sleeves).

3. **Specialized Unit Cap**
   a. Black baseball style, 100% wool 1/2” gold embroidered letter CONTRA COSTA SHERIFF in a semi-circle on the front with **CORONER** on the bottom in a straight line.

4. **Class E**
   a. Coroner’s investigators may wear a black polo shirt and tan pants in accordance with CCCSO Policy 1.07.21.

5. **Windbreakers**
   a. Black, nylon, embroidered windbreakers are issued to personnel assigned to the Coroner’s Division and may be worn when performing coroner functions only.
I. POLICY

A. All written and verbal communications will project a professional image, be properly formatted and grammatically correct. The preparation of reports, documents, correspondence, and public presentations will follow a Division standard outline presented in the Department and Coroner Manuals.

II. CORRESPONDENCE

A. All outgoing correspondence, except documents directed to other divisions within the Office of the Sheriff, shall be on approved, current letterhead stationery. No correspondence shall be sent out without the prior approval of the Coroner’s Division sergeant or captain.

III. PUBLICATIONS/FORMS

A. All publications, to include forms and brochures, shall only be authorized by the Division Commander. An investigator shall not author their own forms for use in their investigations.
I. POLICY

A. Records or copies of reports can be released only if the requests meet prescribed legal and internal guidelines.

II. GENERAL INFORMATION

A. Request for reports come from law enforcement agencies, next of kin, hospitals, government agencies, insurance companies and interested parties. All requests will be reviewed, and dissemination of the report will be documented. Fees collected, when appropriate, will be receipted and tracked.

III. DEFINITIONS

A. *Coroner’s Investigative Report*: This report documents the classification, case number, decedent information, next of kin information, place of death, medical history, injury information and investigation findings. The Autopsy Report, Blood Alcohol Report, Report of Toxicology Examination, Report of Controlled Substances Examination, and Coroner’s Findings are included in the Coroner’s Investigative Report.

B. *“Need to Know”:* Access will be evaluated and approved by the Coroner’s Division Commander. Non-assigned persons requesting access to files shall provide the Division Commander with a written request outlining the information sought and the need to know.

C. *Death Certificate*: The death certificates are never released from the Coroner’s Office. Copies may be purchased from the Public Health Department, Vital Registration Office, 826 Main Street, Martinez, CA 94553.
IV. **PROCEDURE**

A. Security of Records

1. Coroner files shall be stored in an area that can be directly accessed and monitored by members of the Coroner’s Division.

2. All Coroners’ files, to include microfiche files, shall be stored at the Coroner’s Office or placed on a redundant server.

B. Accessing Records / Investigative Reports

1. Coroner’s reports are public records and may be viewed at the Coroner’s Office, or in the presence of Coroner’s Office staff without charge.

2. All requests for reports provided verbally or in writing shall be reviewed to confirm validity.

3. Counselor(s) for the Crisis Center can access files only under the direct supervision of Coroner’s Division personnel and only after a background investigation has been completed on the counselor and a Confidentiality Agreement signed.
I. POLICY

A. The Coroner’s Division shall be a source of information on the cause and manner of death of all Coroner’s cases. The investigative staff is encouraged to share scientific and investigative facts with the media, however speculation is not authorized. In high profile cases, the Coroner’s Division shall defer to the Press Information Officer (PIO) for communication with the media.

II. GENERAL INFORMATION

A. The Coroner’s Division provides a public function which requires written records. These records are deemed public records and can be made available to the public via the media.

III. PROCEDURE

A. INFORMATION THAT MAY BE RELEASED

1. Criminal Investigations
a. The media should be directed to contact the involved law enforcement agency for information. Investigators often withhold specific facts about the incident for a variety of reasons.

b. Specific information shall not be released by Coroner’s Division personnel without the approval of the primary investigator of the law enforcement agency conducting the criminal investigation.

B. Celebrity/Notorious or High-Profile Deaths

1. Deaths of celebrities or high-profile persons may generate considerable media interest. As soon as such a death becomes known to an investigator, it shall be brought to the attention of the Coroner’s Division Commander and/or Assistant Division Commander.

2. The Coroner’s Division Commander will ensure the Sheriff’s Executive Team (Sheriff, Undersheriff, Assistant Sheriff’s) and the Sheriff’s PIO have been notified of the death, investigation status, and the cause of death (when issued by the pathologist).

3. Also, in such cases where any initial media inquiries have been met with a response from the Coroner’s Division, Sheriff’s command staff will be notified as well via the chain of command.

C. Law Enforcement Involved Fatal Incident Protocol Cases (LEIFI):

1. In LEIFI Protocol cases the Coroner’s Division shall ensure the following entities will be notified of the official cause of death immediately upon the completion of the pathologist’s report:

   a. Sheriff’s Executive Team (Sheriff, Undersheriff, Assistant Sheriffs), via the chain of command.
   b. The Sheriff’s PIO
   c. The investigating law enforcement agency and agency having jurisdiction over the case.
   d. In cases involving the Office of the Sheriff, notifications will be made to the Investigation Division.

2. Staff will complete the LEIFI Protocol Cause of Death notification form, indicating specifically the person who was advised of the cause of death. The form will be placed on the outside of the Coroner’s investigation folder.

3. Also, in such cases where any initial media inquiries have been met with a response from the Coroner’s Division, Sheriff’s command staff will be notified as well via the chain of command.

D. Inquiries by news media and other persons:

a. The name and age of the deceased can be released only after the next of kin has been notified.
b. The city of usual residence for the deceased can be released.
c. The cause of death may only be released after the pathologist has completed the report.

E. All other information may be obtained via a normal written request and after the completed report is signed by the Division Commander.

IV. PHOTOGRAPHS

A. A coroner’s photograph includes any photograph, taken by Coroner’s Division personnel, their agent(s) and or contractors, of a decedent, death scene or post-mortem examination. Copies of coroner’s photographs shall be made only in compliance with Code of Civil Procedures section 129.

B. Pictures of death scenes and of decedents will not be duplicated, reproduced, copied or distributed for any means other than for a law enforcement agency conducting an official investigation related to the photographs or pursuant to a court order.

C. Copies can be made for forensic pathology use or used as a teaching tool for law enforcement personnel only. Pictures of deaths currently under investigation shall not be displayed.
I. POLICY

A. The Coroner’s Office shall supply copies of reports, photos, and x-rays, along with body organs, samples of organs, blood, and tissue slides for court proceeding or medical studies via a properly submitted subpoena, court order, or written authorization.

II. PROCEDURE

A. Subpoenas/Court Orders for Materials/Reports

1. When served a subpoena or court order for copies of reports, photos, x-rays and other medical studies, the investigator or clerk shall first confirm the validity of the court order or subpoena.

2. The coroner’s investigator or clerk shall document on the outside of the case file envelope the receipt of the court order or subpoena.

3. The coroner’s investigator or clerk shall notify the supervisor and place the document in the case file.

B. Processing requests

1. Coroners Reports

   a. The coroner’s investigator or clerk shall make a copy of the Investigative Report, all diagnostic reports, the Autopsy Report and the Coroner’s Findings and return to the requester pursuant to the subpoena instructions.
2. There is no charge for Coroner’s Investigative Reports for government agencies. Subpoenas for coroner’s reports made for a civil court require a service fee and a check for $26.00 must accompany the request. The coroner’s investigator or clerk shall make a receipt and include the yellow copy with the report. The coroner’s investigator or clerk shall attach the check to the white copy of the receipt and place it in the locked receipt box located near the front desk. The coroner’s investigator or clerk shall complete the area labeled “COPIES SENT TO” with the appropriate information.

3. Slides
   a. The Forensic Medical Group currently supplies the slides for coroner’s cases. In cases involving subpoenas, the coroner’s investigator or clerk shall forward the original subpoena to the appropriate Forensic Medical Group representative.

4. Photographs and Dental Photographs
   a. Pictures and dental records may only be obtained through court order or subpoena.
**Coroner’s Fees**

**Autopsy**

Private Requested Autopsy to determine cause of death only.................$2,995.00
(Includes removal fees. Laboratory cost extra if any)

**Body Removal**

Body removal fee cost charged to mortuary........................................$267.00
(Minimum fee required by state law)

**Removal Supplies/Equipment**

Removal supplies and/or equipment charge to mortuary.......................$45.00 to $75.00

**Coroner’s Reports**

Coroner’s Report..............................................................................$26.00 per copy
(Includes Autopsy report and Laboratory results, if any)
Note: No charge for legal next of kin, hospital, medical professionals or government agencies.

**Discovery Request**

(Compilation of information for non-government agencies)
Support Staff.................................$32.00 per hour or part thereof plus shipping if any.
(Laboratory Aide, Clerical, Etc.)
Sworn and Technical Staff.............$149.00 per hour or part thereof plus shipping if any.
(Sergeant, Deputy Sheriff-Coroner, Criminalist, Fingerprint Examiner or Technician)

**Copy of Coroner Photographs and X-Rays**

(Per State Law these items are released for criminal prosecution, civil trial, and per court order only)
DVD/CD.................................................................$10.00 per disc

**Protective Clothing**

Autopsy Suite Personal Protective Clothing.......................................$10.00 each

REVISION DATE: 05/12/2017
CLEARANCE: Office of the Sheriff

CHAPTER: Administration
SUBJECT: Certificate of Death

I. POLICY

A. A certificate of death will be completed on all coroner cases according to the requirements of the Health Services Department Vital Registration Unit.

II. DEFINITION

A. Government Code 27491.5

“The cause of death appearing on a certificate of death signed by the coroner shall be in conformity with facts ascertained from inquiry, autopsy and other scientific findings. In case of death without medical attendance and without violence, casualty, criminal or undue means, the coroner may, without holding an inquest or autopsy, make the certificate of death from statements of relatives, persons last in attendance, or persons present at the time of death, after due medical consultation and opinion has been given by one qualified and licensed to practice medicine and so recorded in the record of the death, providing such information affords clear grounds to establish the correct medical cause of death within accepted medical practice and within the requirements for accuracy prescribed by the Division of Vital Statistics of the State Department of Health Services. The coroner shall not finally exclude crime, suicide, or accident as a cause of death because of lack of evidence.”

III. PROCEDURE

A. A Coroner’s Division investigator or clerk will fill in the name, date and time of death and attest information pertaining to the cause, manner and injury information. All other information is completed by the funeral director or mortuary personnel.
I. POLICY

A. The Coroner shall keep an official register of all coroners’ cases. The register shall document the information mandated by the Government Code.

II. DEFINITION

A. Government Code Section 27463

The Coroner shall keep an official register labeled “Coroner’s Register” with pages numbered, indexed and bound in which the Coroner shall enter:

1. The name and any aliases of the deceased, when known, including such descriptions as may be sufficient for identification and which may, in his discretion, include fingerprint records.

2. A narrative summary of the circumstances leading to and surrounding the death, together with the names and addresses of any witnesses to such event.

3. The property taken from the person or premises of the deceased by the coroner or by any other law enforcement agency.

4. The disposition of any property or monies so taken.
5. Information as to the disposition of the remains.

6. The cause of death, when known, with reference or directions to the detailed medical records upon which decision as to cause of death has been based.

7. Persons notified of the death, together with a notation of any unsuccessful attempts at notification.

B. Government Code Section 27463.5

In lieu of the “coroner’s register”, the coroner may keep an official file for each deceased person containing all the information required by Section 27463.5. At any time after the completion of the coroner’s investigation, and the closing of the particular case involved, the coroner may photograph or microphotograph the contents of the file in accordance with the provisions of Section 26205, and, when the photographs or microphotographs are placed in conveniently accessible files and provision is made for preserving, examining, and using the same, the original file may be destroyed.

III. PROCEDURE

A. Pursuant to Government Code Section 27463 & 27463.5, Coroner’s Division personnel shall document the required information in the following manner:

1. An electronic database will be maintained by the Coroner’s Division Clerk Specialist. This database shall contain the decedent’s name, date of birth, manner of death and type of examination conducted.

2. All other requirements of Government Code Section 27463 are satisfied by the Coroner’s Investigative Report. All completed reports shall be scanned into Disc Image and stored indefinitely.

Government Code Section 27491.55

ISSUE DATE: 08/01/2005  
REVISION DATE: 05/12/2017

CLEARANCE:  
Office of the Sheriff

CHAPTER: Administration  
SUBJECT: Delegation of Jurisdiction

I. POLICY
A. The jurisdiction of a coroner’s case may be delegated to another county or the federal government pursuant to certain conditions provided within Government Code Section 27491.55.

II. DEFINITION
A. Government Code Section 27491.55
   1. “In cases where a coroner is required to inquire into a death pursuant to Section 27491, the coroner may delegate his or her jurisdiction over the death to an agency of another county or the federal government when all of the following conditions have been met:

a. The other agency has either requested the delegation of jurisdiction or has agreed to take jurisdiction at the request of the coroner.
b. The other agency has the authority to perform the functions being delegated.
c. When both the coroner and the other agency have a jurisdictional interest or involvement in the death.”

III. PROCEDURE
A. DELEGATION OF AUTHORITY
   1. Occasionally, another county requests jurisdiction over a case. This usually happens when the decedent incurred an injury that led to their death in another county and the decedent was transported to Contra Costa County for medical treatment.
2. When the Coroner’s Office receives a request for release of jurisdiction, the investigator will FAX or email the “Request to Assume Jurisdiction” form to the requesting party.

3. The coroner’s investigator will put the coroner’s case number on the form prior to sending it.

4. Upon receipt of the completed form, the coroner’s investigator will call the agency and advise that jurisdiction is being delegated to them as requested.

5. The coroner’s investigator will note in the report delegation of authority was given to the requesting party, how the decedent came to Contra Costa County and justify the transfer of jurisdiction.

6. The “Request to Delegate Jurisdiction” form shall be placed in the Coroner Case File envelope.

B. REQUEST TO ASSUME JURISDICTION FROM ANOTHER COUNTY

1. In those cases whereupon Contra Costa County has a jurisdictional interest or involvement in the death of a person from another county, delegation of jurisdiction can be made pursuant to Government Code Section 27491.55. For example, if a child is pronounced dead at Children’s Hospital in Oakland in Alameda County, the Contra Costa County Coroner may request jurisdiction if the investigation reveals that the child sustained fatal injuries while in Contra Costa County.

   a. The coroner’s investigator will confirm the death of the individual and advise a supervisor or manager that the law enforcement agency has a true jurisdictional interest and has requested jurisdiction.

   b. The investigator will FAX or e mail a “Request to Assume Jurisdiction” form to the county the death occurred in.

   c. Upon arrival of the transfer of jurisdiction, the coroner’s investigator will handle the case in the same manner as if the decedent died in Contra Costa County.

   d. The complete “Request to Assume Jurisdiction” form shall be retained in the case file.
I. POLICY
   A. Pursuant to Civil Code Section 56.10 (b)(8), the Coroner’s Office may issue subpoenas for medical records, documentation, video tapes, or other items which, in the opinion of the coroner’s investigator, are necessary to assist in determining the circumstances, manner and cause of death of a decedent.
   B. A person may be subpoenaed under authority of Government Code Section 27498 to testify at a Coroner’s Inquest if the investigator believes the person has information that could assist in determining the circumstances, manner and cause of death of a decedent.

II. DEFINITION
   A. Government Code Section 27498: Subpoena Powers; Witnesses; Records

   1. “The coroner may issue subpoenas for witnesses, returnable forthwith or at such time and place as the coroner appoints, which may be served by any competent person. The coroner may also require any such witness to bring with him or her any books, records, documentation, or other things under the control of the witness which, in the opinion of the coroner, are necessary to conduct the inquest and as a further aid in determining the circumstances, manner, and cause of death of the decedent. To enforce the procedures of this section, the coroner may issue subpoenas duces tecum in accordance with Section 1985 of the Code of Civil Procedure.”

   2. “Any books, records, documents, or other things under the control of a law enforcement agency, subpoenaed pursuant to subdivision (a), shall not themselves be made a part of the record in any coroner’s inquest without written consent of the law enforcement agency, when such inquest pertains to a death caused by a police officer.”
B. Government Code 27500: Penalty for Failure to Attend

1. “A witness served with subpoena who willfully and without reasonable excuse fails to attend and testify is guilty of a misdemeanor.”

III. PROCEDURE

A. SUBPEONA DUCES TECUM

1. The Coroner’s Subpoena Duces Tecum is used for medical records, blood samples, urine, x-rays, or other medical items or information.

2. The coroner’s investigator will complete a “Coroner’s Subpoena” to include the name of the deceased, date of birth, case file number and item(s) requested.

3. The coroner’s investigator will attach a copy of the subpoena to the case file

4. Requests for medical records may be faxed.

5. Requests for blood or other items will be served at the hospital in person whenever possible.

B. CORONER’S SUBPOENA

1. The Coroner’s Subpoena is issued under authority of Government Code 27498 for mandatory appearance of the person at an inquest. A witness served with a subpoena who willfully and without reasonable excuse fails to attend and testify is guilty of a misdemeanor.

2. The investigator charged with preparing the inquest witness list will serve the subpoena in person when possible.
3. The Coroner’s Division sergeant will ensure a copy of the subpoena with proof of service is retained in the case file.

4. Subpoenas for law enforcement personnel are delivered to the agency subpoena clerk.
I. POLICY

A. Pursuant to Health and Safety Code Section 7104 (A) and (B), the Coroner’s Division shall assume jurisdiction of the disposition of the remains of an indigent or abandoned body.

II. GENERAL INFORMATION

A. A county-subsidized interment may be authorized for those persons who cannot acquire the resources to provide for interment. The annual County Interment Allowance Schedule is provided to the Coroner’s Division each fiscal year.

B. Interments may be authorized by the County Hospital, Employment and Human Services Department, the Sheriff-Coroner or Public Administrator. The County Hospital authorizes interment for persons who die at the hospital or clinics and the Employment and Human Services Department authorizes interment for those individuals who were recipients of public assistance at the time of death. The Public Administrator will assume jurisdiction only in cases where the deceased has sufficient assets. All other cases are referred to the Sheriff-Coroner. A thorough investigation will be conducted regarding the status of the decedent’s estate and family’s ability to pay for the interment.

C. Pursuant to Health and Safety Code Section 7100, the liability for the reasonable cost of interment devolves jointly and severally upon all kin of a decedent, assuming they live in the state of California. Failure of the next of kin to perform this mandated duty is a misdemeanor pursuant to Health and Safety Code Section 7103.
D. Pursuant to Health and Safety Code Section 7104 (A) and (B), the coroner may be required to inter the remains of a decedent when the next of kin cannot be found or lacks sufficient funds.

E. Health and Safety Code Section 7104.1 allows the Coroner to inter the remains of a decedent if, within 30 days after the Coroner notifies or diligently attempts to notify the person responsible for the interment of a decedent’s remains which are in the possession of the Coroner, the person fails to inter the remains.

F. If the next of kin fails to contact the Coroner’s Office or make arrangements for the decedent’s disposition, a certified letter may be sent to the next of kin advising the requirements of Health and Safety Code Section 7104.1 and the scheduled date of cremation. If the next of kin fails to respond by the date scheduled for the cremation, the Coroner may inter the remains in the manner provided for interment of the indigent deceased. The Coroner’s Office will explore the possibility of recovering the expenses for the disposition from the next of kin.

G. County policy requires cremation to be the method used for county-authorized dispositions involving resident indigent decedents, unless the county has received actual notice that a decedent objected to cremation on religious grounds, in which case disposition shall be by ground burial.

H. Regardless of the type of disposition, the Coroner’s Division will not authorize an indigent interment until the indigent status has been confirmed.

III. DISPOSITION ALLOWANCE

A. Each year the county will determine the maximum allowable amount for the disposition of the indigent deceased. These allowances may be increased only in exceptional circumstances and with the approval of the County Administrator or his designee.

1. Cremations
   Funeral or cemetery directors are allowed the annually-established rate for cremation, interment, memorial service, container, body removal and administrative costs for a decedent seven years of age or older and a smaller allowance for a decedent seven years or younger.

2. Ground Burials for Religious Exceptions
   Funeral directors are allowed the annually-established rate for interment arrangements to include embalming, suitable clothing, regularly manufactured, cloth-covered and trimmed casket, memorial service,
administrative costs, body removal and ground burial for a decedent three years of age or older and a smaller allowance for a decedent less than three years of age. In the event that all of these services are not provided, the County Administrator shall authorize only a pro-rata share of the maximum allowance.

a. Cemetery operators will be allowed the established rate set annually for a burial plot for a decedent three years of age or older and a smaller allowance for a decedent less than three years of age.

3. **Excess mileage**

Funeral directors who are reasonably required to travel more than fifteen miles round trip to make dispositions shall be allowed the current mileage reimbursement rate for county employees.

4. **Repayment**

Funeral Directors shall explore any resources not reported and shall turn over to the county any monies received for the funeral and/or interment from any other source, including the decedent’s family and friends, Social Security benefits, Veterans Administration benefits or life insurance benefits.

5. **Social Services Department’s Eligibility Standards**

a. Available Resources

- The decedent’s available resources are those immediately available (cash, bank accounts). Available resources in excess of fees allowed for a county-authorized interment render the decedent ineligible for a county-authorized interment.

b. Resources not immediately available

- Resources that are not immediately available (equity in real property, death benefits) are not a disqualifying factor for a county-authorized interment.

IV. **PROCEDURE**

A. **NEXT OF KIN**

1. The supervisor or investigator shall advise the next of kin of their responsibility to handle the interment.
2. If the next of kin claims they cannot afford interment and requests county assistance for burial, the supervisor or investigator should indicate that county assistance is only for the indigent dead and the remains will be cremated.

3. The coroner’s investigator or supervisor shall provide the next of kin with a “Next of Kin Eligibility Determination Form” to be completed, signed and returned to the Coroner’s Office.

4. The coroner’s supervisor will review the completed form and determine eligibility for County-authorized interment.

5. After eligibility has been determined, the interment arrangements can be entrusted to a funeral director of the next of kin’s choosing. The coroner’s investigator or supervisor shall instruct the next of kin to inform the funeral home they have requested a county-authorized cremation.

B. COUNTY CREMATION

1. If the next of kin cannot be located or has abandoned the remains, the Coroner’s Office will handle the disposition in its entirety.

2. The investigator or supervisor will complete an Authorization for County Interment form and ensure a copy is retained in the case file. The original and yellow copies are provided to the funeral director selected to perform the cremation.

3. Funeral Director’s Responsibility

   a. Upon completion of the disposition, the funeral director shall submit a demand for payment.

   b. The funeral director requesting funds for the county-authorized interment will be responsible for submitting any property or currency obtained from the decedent to the Coroner’s Division.
I. POLICY
   A. The Coroner’s Division performs numerous mandated duties and a wide range of public services. These duties will be performed in a professional manner and include but are not limited to those listed below.

II. PROCEDURE
   A. DUTIES
      1. The coroner investigator’s duties include but are not limited to the following:
         - Log on with Sheriff’s Dispatch.
         - Review new cases for necessary follow-up with 24-hour deputy, i.e. NOK notifications, X-rays, fingerprinting etc.
         - Check to confirm the telephones are off voice mail by 7:00am.
         - Check voice mail for messages.
         - Unlock building and lobby by 0745 hrs.
         - Remove vans from Vehicle Sallyport.
         - Attend Daily Briefing.
         - Answer telephones.
         - Respond to public requests at lobby counter.
         - Process body and property releases.
         - Check and sign in visiting agency representatives.
         - Log off at end of shift.
2. The Coroner’s Division sergeant’s duties include but are not limited to the following:
   • Verify Activity Log and morgue body count.
   • Check the temperature charts in the morgue and replace as necessary.
   • Conduct Daily Briefing.
   • Check mail at FOB daily / run mail to FOB.
   • Review all new cases for date and time of death accuracy, decedent names and all critical areas of the report required to prepare the death certificate.
   • Review and manage the current case load.
   • Approve and review indigent cremation applications.
   • Update and manage individual unidentified remains case histories as required.

B. DAILY BRIEFING
   1. In an effort to conduct the most reliable and productive investigations, the coroner’s investigator shall provide the coroner’s supervisor and forensic pathologist with a comprehensive daily briefing prior to the post-mortem examination. The briefing will include all relevant facts and physical evidence known to the investigator at the time.

C. ITEMS FOR PATHOLOGIST’S INSPECTION
   1. The coroner’s investigator shall collect the following items for inspection by the pathologist at the time of autopsy:
      a. Firearms used in suicides and if any part of the firearm may have come into contact with the body of the decedent.
      b. Sharp force implements.
      c. Blunt force objects.
      d. Tools.
      e. Ligatures and bindings.
      f. Clothing or other items which may have caused impressions on the skin.
2. The coroner’s investigator will provide photographs, sketches, diagrams or a detailed description of any item that is unavailable at the time of autopsy.

D. AUTOPSY PROTOCOL

1. All persons attending an autopsy are required to sign a Coroner’s Office Autopsy Permission Form and complete the Autopsy Viewing Log located in the Autopsy Viewing Room.

2. No Audio or video recording of any autopsy shall be allowed without expressed prior permission of the Coroner’s Division Commander and the forensic pathologist.

3. All persons viewing an autopsy must remain inside of the Autopsy Viewing Room.

4. Law enforcement personnel may enter the Autopsy Suite to obtain evidence from the decedent. The extent of their contact with the body will be governed by the forensic pathologist.

5. Personnel authorized to enter the Autopsy Suite are required to wear the provided personal protective equipment and adhere to established safety guidelines in order to minimize exposure to hazards.

E. MEALS/BREAKS

1. Coroner’s investigators shall not leave the county for breaks or meals.

2. Coroner’s investigators shall advise Sheriff’s Dispatch when leaving the building for a break or lunch.
I. POLICY

A. The coroner is required to inquire into and determine the circumstances, manner and cause of all violent, sudden or unusual deaths, and all other deaths specified in Government Code 27491.

II. GENERAL INFORMATION

A. The coroner shall keep an official Coroner’s Register. Refer to Coroner’s Manual Section 3.03.12 and Government Code Section 27463 and 27463.5 for specific requirements.

III. PROCEDURE

A. Coroner’s cases are processed in the following manner:

1. Coroner’s Case
   a. A Coroner’s Case consists of a Coroner’s Investigative Report, an Autopsy Report and any diagnostic test results. The Coroner’s Division Commander shall sign the Coroner’s Findings page contained within all Coroner’s Cases.
2. Inspection only
   a. The pathologist conducts an external inspection of the body, reviews the medical records and the Coroner’s Investigative Report, and provides a cause of death. The death certificate is signed by the Division Commander, Assistant Division Commander or authorized deputy on duty.

3. NBI (Cases Not Brought In)
   a. The remains are not brought into the Coroner’s Office and, as such, no autopsy is performed. The pathologist determines the cause of death based on review of medical records and the Coroner’s Investigative Report. The report number of the responding police agency shall be included in the Coroner’s Report. The death certificate is signed by the Division Commander, Assistant Division Commander or authorized deputy on duty.

4. Co-sign
   a. A Co-sign pertains to a non-natural death where the cause of death on the death certificate is provided by the treating/attending physician who has signed the death certificate.

   b. Co-signs may be authorized for non-natural deaths usually the result of accidents (automobile/mechanical) and the person has been hospitalized. The coroner’s investigator will obtain the approval of the Coroner’s Division Commander or Assistant Division Commander prior to classifying a case as a co-sign.

   c. The treating physician will provide the coroner’s investigator with a cause of death.

   d. The coroner’s investigator will subpoena all medical records.

   e. The coroner’s investigator will pick up first drawn blood, if any.

   f. The forensic pathologist will review the medical records and confirm the cause of death. No autopsy is performed.

   g. The injury information and manner of death are entered on the death certificate by the coroner’s clerk or coroner’s investigator.
h. The Coroner’s Division Commander, Assistant Division Commander or authorized investigator will also sign, or “Co-sign” the death certificate.

The forensic pathologist will be available by phone to discuss any cases that may fall into the co-sign category.

5. Non-Forensic
   a. A Coroner’s Non-Forensic Report will be generated when a death is reported to the Coroner’s Office and the coroner’s investigator determines that the cause of death is due to a natural cause or causes and, as such, waives or does not assume jurisdiction of the decedent. The coroner’s investigator will authorize the decedent’s attending physician to state the cause of death and to sign the death certificate.
I. POLICY
A. Every effort will be made to identify and personally notify the next of kin of a decedent in a timely manner.

II. DEFINITION
A. Order of Notification
   1. Order of notification is determined by order of custody control outlined in Health and Safety Code 7100. The Deputy Coroner will not notify all persons of the same degree of kindred, i.e. if the decedent is survived by four siblings, the Coroner’s Office is obligated to only notify one.

B. Custody and Duty of Internment Health & Safety 7100
   “Right to Control; Liability, etc.” The right to control the disposition of the remains of a deceased person, the location and conditions of internment, and arrangements for funeral goods and services to be provided, unless other directions have been given by the decedent pursuant to Section 7100.1, vest in, and the duty of disposition and the liability for the reasonable cost of disposition of the remains develops upon, the following in the order named:
   
   a) An agent under power of attorney for health care who has the right and duty of disposition
   b) The competent surviving spouse
   c) The sole surviving competent adult child of the decedent, if there are more competent adult children,
   d) The surviving competent parent or guardian.
   e) The surviving competent adult or persons respectively in the next degree of kindred. If there is more than one surviving competent adult of the same degree of kindred.
   f) The public administrator when the deceased has “sufficient assets.”
III. PROCEDURE

A. Notification

1. All notifications of coroner’s cases, whenever possible, will be done by a coroner investigator. Every effort will be exhausted to identify the next of kin and notify them in person. Notification made over the telephone should be avoided. Exceptions may include situations involving a family member contacting the office to confirm information they have been provided by another source.

2. In all coroners’ cases, the coroner’s investigator is responsible for ensuring the next of kin is notified. Due to the specific circumstances of the death, Emergency Room personnel, the law enforcement agency having jurisdiction, or a Highway Patrol Officer may have notified the next of kin prior to reporting the death to the coroner. The investigator will in all situations confirm the person notified is the true next of kin as defined in Health and Safety Code 7100. The full name of the person who notified the next of kin will be listed on the coroner’s report.

3. Notification in Order of Degree of Kindred:

   a. The first person to be notified is the legally recognized spouse or legally recognized partner (AB 205).

   b. Next degree of kindred is adult children. They are all of equal standing under the law. The first sibling notified meets the notification requirement and the office is not required to notify all persons of equal kindred.

   c. Parents: The investigator is not obligated to notify anyone except the immediate next of kin, therefore one parent will meet the requirement.

   d. Minor child: When the immediate next of kin is a minor child, the legal next of kin will be in order of above as defined by Health and Safety Code Section 7100. For example, if the immediate next of kin is a 15-year-old, the legal next of kin to meet the notification requirement would be adult siblings. If all children of the deceased are minors and the deceased is not married, the decedent’s parent would be next in the order of notification. The full name of the person who notified the next of kin will be listed in the Coroner’s Report.
IV. **RIGHT OF DISPOSITION**

1. Health and Safety Code Section 7100 applies to the right of disposition of the body and the manner of internment.

V. **OUTSIDE ASSIST REQUEST FOR NOTIFICATION**

1. When the coroner’s investigator has identified the next of kin does not reside in Contra Costa County or, due to workload, is unable to make the notification in person, assistance from the law enforcement agency assuming jurisdiction where the next of kin resides should be requested. The investigators may teletype the agency requesting assistance and include a copy of the teletype request in the case file. If the law enforcement agency is unable to notify the next of kin, the coroner’s investigator shall notify the coroner’s supervisor or manager immediately.
I. POLICY
   A. A coroner’s case requires a complete, concise and thorough investigative report to be completed in a timely manner. The report consists of a documentation of the classification of death, next of kin information, medical history and an investigative narrative. A Brief Report will be completed when the Coroner’s Office has waived jurisdiction and authorized an attending physician to sign a death certificate.

II. PROCEDURE
   A. PREPARATION OF CORONER’S REPORT
      1. A Coroner’s Investigative Report shall include the following sections:
         a. The first section includes the classification of death, the identification of the decedent, when and where he or she was last seen alive, the place of death, physical descriptions, addresses where the person lived and the names of other investigative agencies to include case numbers.
         b. Next of kin information.
         c. Place of death.
         d. Medical history.
         e. Injury information.
         f. The investigative narrative completed by the field investigator.
B. CORONER’S INVESTIGATIVE REPORTS: REQUIRED INFORMATION

1. CORRECT SPELLING OF NAME
   a. The investigator should ensure the correct name and spelling of the decedent’s name is included on the death certificate.

2. SOCIAL SECURITY NUMBER
   a. The investigator should document the decedent’s social security number whenever possible. If the case becomes a county cremation, a social security number is necessary to access records from the Social Services Department, the military, and the Social Security Administration.

3. LAW ENFORCEMENT AGENCY INFORMATION
   a. The investigator shall obtain and note the name of the investigating officer, the investigative agency, and the agency case number.

4. NEXT OF KIN
   a. The investigator shall obtain and document the true name of the next of kin, address and all phone numbers. The investigator shall indicate the next of kin’s relationship to the decedent and why he or she is the next of kin. The investigator shall document the name and phone number of the person who notified the next of kin.

5. PLACE OF DEATH
   a. If the person died in the hospital, the investigator shall indicate whether it was in the emergency room or if the decedent was an in-patient. The investigator shall document the names, addresses and phone numbers of the person who determined death, notified the Coroner’s Office of the death and the person who discovered the decedent.

6. MEDICAL HISTORY
   a. The investigator shall obtain the name, address and phone number of the decedent’s regular physician, along with pertinent
medical history to assist the pathologist in determining the cause of death.

7. INJURY INFORMATION

a. The investigator shall state whether or not the injury occurred within the city limits and whether or not the injury occurred at work. If the injury occurred at work, the investigator shall notify OSHA and include that information in the investigative report.

8. INVESTIGATIVE REPORT

a. The investigator shall write a thorough, complete and concise report. All reports will be written in the “First Person” i.e.; “I saw a knife” rather than, “A knife was seen.”

b. If the first-drawn blood is available, the investigator shall include the dates on the vials in the report narrative.

c. The investigator shall describe the death scene in detail, to include where the body was initially discovered, whether or not it had been moved and by whom, and where it was when you arrived on the scene. If the body was moved, the investigator shall state the reason in the narrative.

d. The investigator shall photograph the scene in detail. Implements of death shall be photographed and taken into custody whenever possible.

e. Supplemental information regarding the case is to be added to the narrative by the investigator receiving the information.

C. PREPARATION OF BRIEF REPORT

1. Should the investigator waive jurisdiction, the investigator will complete a Brief Report and assign the next available case number. The mortuary should refer the certificate of death to the Coroner’s Office. The investigator will review the certificate of death and ensure the cause of death is appropriate. The investigator shall assign a case number and transfer the certificate back to the mortuary.

NOTE: The coroner’s investigator will not provide a case file number to a mortuary or peace officer at the death scene until the completed death certificate has been reviewed.
I. POLICY
   A. Decedents removed from their place of death by a coroner’s investigator will be transported to the morgue for further investigation.

II. GENERAL INFORMATION
   A. After being notified of a case falling under the jurisdiction of the coroner, a coroner’s investigator will respond to the scene, conduct an investigation, document the scene and either transport the decedent to the morgue for further examination or release the deceased to the designated funeral home.

III. PROCEDURE
   A. REMOVAL FROM PLACE OF DEATH

       1. The following steps should be taken when removing a body from the scene or residence:

           a. Notify Sheriff’s Dispatch of the incident and location of the removal.

           b. If traffic is causing an extended delay, and the body at the scene is causing a traffic hazard, the investigator can give permission to the law enforcement agency to remove the body to the side of the road.

           c. At the place of death, the investigator will photograph the scene, particularly documenting the position and place of death. No personal property shall be removed from the decedent at the scene.
d. The body will be placed in a yellow (regular) or red (extra large heavy-duty) bag depending on the decedent’s size and condition of the body. The body can also be wrapped in sheeting with a blanket placed over the gurney.

e. If the body is unusually large, the investigator shall request assistance from the host law enforcement agency. When the investigator returns to the morgue, he or she may request assistance from County Patrol for help in removing the body from the van.

f. Prior to removal, the deputy will collect all medications and bring them to the morgue with the body.

g. The investigator shall photograph the instrument of death and collect the item(s) for storage in the Coroner’s Property Room.

h. If removal is made at an unoccupied residence, the coroner’s investigator is responsible for securing the building. If appropriate, a Coroner’s Seal is placed on the doors of the residence.

i. If removal is made from a vehicle or the decedent’s vehicle is at the place of death, the host law enforcement agency is responsible for securing or towing the vehicle.

j. It is the host law enforcement agency’s responsibility to care for any animals at the death scene.

B. TRANSPORTING THE REMAINS

1. The investigator will transport the body directly to the morgue unless required to respond to other needs of the case or to another scene. Other needs of the case may include responding to the hospital to pick up medical records, first drawn blood or taking fingerprints to Central Identification Services (CIS).

2. An investigator may not take a break of any type with a body in the Coroner’s vehicle.

3. A Coroner’s Division supervisor or manager’s approval is required for an investigator to personally notify the next of kin while transporting a decedent’s remains.
C. PROCESSING THE REMAINS

1. The door to the vehicle sally port is always to be closed prior to handling a body or remains in the morgue or sally port.

2. The investigator will transfer the body from the gurney to an autopsy table and ensure the feet are always positioned towards the drain plug of the table.

3. The investigator will always weigh the body. If the Department of Motor Vehicle information is unavailable, the investigator will measure the length of the body and document the overall height. The height and weight of the decedent shall be written on the back of the toe tag.

4. The investigator shall always place a toe tag on one of the big toes of the decedent. If toes are not available, place the toe tag on a finger or extremity.

5. The investigator shall photograph the decedent for identification.

6. The investigator shall itemize all of the property on the property form and place the property in a clear plastic bag with the yellow copy stapled to the outside of the bag. Any amount of money exceeding $500.00 shall be witnessed and co-signed by the shift supervisor.

7. The investigator shall store personal property in the designated cabinets in the locked Coroner’s Property Room. If personal possessions appear to have significant value, the investigator shall notify the sergeant or manager. Valuable items may be stored in the Division Commander’s safe.

8. X-RAYS

   a. All deceased children under three years of age are to be completely X-rayed.

   b. All homicides are to be completely X-rayed. Make sure the markers (left and right) are included on the X-rays.

   c. Decedent victims of fire whose bodies are charred must be X-rayed.
9. All unidentified bodies must be fingerprinted via the Livescan system and the additional physical prints shall be taken to Central Identification as soon as possible.

10. If the body is infested with insects, keep the pouch sealed and store away from other bodies in the cooler.

11. If the decedent is suspected of containing a contagious or communicable disease, the investigator shall place an “Exposure/Bio-Hazard” sticker on the outside of the pouch and note the specific hazard in red ink on the outside of the case file to alert staff of the potential hazard.
## Contra Costa County Office of the Sheriff

**Coroner Division Policy and Procedure**

**CORONER NUMBER:** 3.03.23

**RELATED ORDERS:**
Government Code Sections 27465, 27466, 27467, & 27491.3

**ISSUE DATE:** 03/17/1999  
**REVISION DATE:** 05/12/2017  
**CLEARANCE:** Office of the Sheriff

**CHAPTER:** General Operations  
**SUBJECT:** Collection and Release of Property

### I. POLICY

A. During the investigation of a coroner’s case, the coroner’s investigator may come into possession of property belonging to the decedent. This property must be collected for safekeeping, secured within a locked building or vehicle, or turned over to the next of kin.

### II. GENERAL INFORMATION

A. Except as otherwise provided, any person who searches for or removes any papers, monies, valuable property or weapons constituting the estate of the deceased, from the deceased person, or from the premises prior to the arrival of the coroner without permission of the coroner is guilty of a misdemeanor (Government Code Section 27465).

### III. PROCEDURE

A. Collection

1. In the case of any death falling under jurisdiction of the coroner, the coroner shall take charge of all personal effects, valuables, and property of the deceased at the scene of death or related to the injury and hold or safeguard the effects until lawful disposition can be made.

2. Any property or evidence related to the investigation or prosecution of any known or suspected criminal death will be delivered to the applicable law-enforcement agency or district attorney, receipt for which shall be acknowledged in writing.
3. During the investigation of a coroner’s case, the decedent’s property will be turned over to the next of kin or a representative of the next of kin upon release of the remains. If the property hasn’t been released prior to the completion of the investigation, a letter will be mailed to the next of kin indicating any property not claimed within 90 days will either be destroyed or sold at auction. The proceeds of any sale will be turned over to the County General Fund. If no next of kin or representative is available, the investigator will collect and/or secure the decedent’s property. The following items will be handled accordingly:

a. Vehicles
   • Vehicles are normally locked and left at the residence. If the case is a suicide that occurred in a vehicle away from the decedent’s residence, the coroner investigator shall ensure the vehicle is towed and secured and notify the next of kin of the vehicle location as soon as possible. The coroner’s investigator or the law enforcement agency investigating the suicide may tow and store the vehicle.

b. Valuables
   • The coroner’s investigator will collect and secure valuables which could easily be stolen to include cash and jewelry. The coroner’s investigator will complete a property/clothing inventory report, attach one copy to the bag containing the items and place a second copy in the case folder.

c. Drug and Drug Paraphernalia
   • Drugs and drug paraphernalia will be collected at the death scene by the law enforcement agency having jurisdiction over the case.

d. Suicide Implements
   • Implements of suicide, other than firearms and medications, will be returned to the next of kin, destroyed, or forwarded to the Sheriff’s Property.

e. Personal Property
   • Personal property will be brought to the Coroner’s Office for storage and eventual release to the next of kin or destroyed.
f. **Firearms**
   - The coroner’s investigator will note any firearms taken as evidence by the law enforcement agency investigating a crime in the Coroner Investigative Report. Firearms taken by a coroner investigator will be logged on the Firearms Report Form and handled as noted in the Firearms Section of this manual.

g. **Medications**
   - Medications seized pursuant to a coroner’s investigation will be brought to the Coroner’s Office by the coroner’s investigator and handled pursuant to the Medication Section of this Manual.

**B. RELEASE OF PROPERTY**

1. After the autopsy or inspection, the decedent and any property will be released to the funeral director of choice or to whomever the decedent or legal next of kin has chosen to dispose of the remains.

2. The task of releasing the decedent and any property is a multi-phased procedure that involves checking and completing the forms outlined in Release of Decedent – Coroner’s Division Manual Section 3.03.28.

3. Release of property to the next of kin: The next of kin can come to the office to obtain the personal effects of the decedent, provided the body has been released to a funeral home. When releasing property, the investigator shall:
   
   a. Confirm the identity of the legal next of kin.
   
   b. Check the Clothing/Property Inventory Report in the file to verify there is property to be released.
      
      - The clothing inventory is located at the top of the inventory report, and the clothing will usually be bagged and kept with the decedent.
      
      - The property inventory is located on the lower portion of the inventory report, and the property is stored in a file cabinet in the Coroner’s Property Room.

4. Retrieve the personal property and confirm the contents with the Inventory Form.
5. Ensure the next of kin signs and dates the certification of receipt for the clothing and the property on the Inventory Form. The investigator making the release will also legibly sign the form.

6. Place the original Property/Clothing Inventory Report in the case file folder and give the yellow copy to the next of kin.
I. POLICY

A. In any death into which the coroner is required to investigate, the coroner may take charge of all personal effects, valuables, and property of the deceased at the scene of death or related to the inquiry and hold or safeguard the property until lawful disposition can be made.

II. DEFINITIONS

A. Government Code 27491.3
   1. “Control of Premises: Where Body Found: In any death into which the coroner is to inquire, the coroner may take charge of all personal effects, valuables and property of the deceased at the scene of death or related to the inquiry and hold or safeguard the property until lawful disposition thereof can be made. The coroner may lock the premises and apply a seal to the door or doors prohibiting entrance to the premises, pending arrival of a legally authorized representative of the deceased.”

III. CORONER’S SEAL

A. The use of a Coroner’s Seal is described in Government Code Section 27491.3 (a). The seal may be affixed to the door or doors of a decedent’s residence stating under authority of the Government Code, the premises are sealed and anyone tampering with the seal or entering the property is subject to prosecution. Deputies shall print their name, date and time on the seal upon application to a door.
IV. PROCEDURE

A. INVESTIGATOR’S RESPONSIBILITY

1. The coroner’s investigator, after removing a body from a residence or vehicle, is responsible for ensuring that the residence or vehicle is secured until a legally recognized representative of the decedent is located.

2. The coroner investigator’s actions shall not interfere with or impede an investigation being conducted by another law enforcement agency. The death scene investigation may require the removal of the decedent to allow the law enforcement agency to continue to process the scene.

3. The premises are to be secured by the coroner’s investigator if there is no next of kin available. If there is no legally authorized representative of the decedent, the coroner’s investigator shall secure the premises and place a completed Coroner Seal on the door(s).

4. Unless permitted by law, any person who enters any premises or tampers with or removes any lock or seal is guilty of a misdemeanor.

5. Except as otherwise provided by the Government Code, any person who searches for or removes any papers, moneys, valuable property or weapons constituting the estate of the deceased from the person of the deceased or from the premises, prior to the arrival of the coroner or without the permission of the coroner is guilty of a misdemeanor.

6. The coroner’s investigator shall ensure the appropriate law enforcement agency or the investigator properly tows and stores a vehicle when a vehicle is the place of death.

7. Costs arising from the premises being locked or sealed while occupied by property of the deceased may be a proper and legal charge against the estate of the deceased.

8. When the next of kin has been verified, the coroner may give permission for them to remove the Coroner Seal and enter the premises.
I. POLICY

A. The coroner is responsible for the collection of all instruments of death. Depending on the manner of death, the coroner may physically take possession of the implement of death or transfer custody of the implement of the law enforcement agency with jurisdiction over the criminal investigation.

II. DEFINITION

A. Government Code 27491.3 (a): “In any death into which the coroner is to inquire, the coroner may take charge of any or all personal effects, valuables, and property of the deceased at the scene of death or related to the inquiry and hold or safeguard them until lawful disposition thereof can be made.”

B. Government Code 27491.3 (c): “Except as otherwise provided in subdivision (d), any person who searches for or removes any papers, moneys, valuable property or weapons constituting the estate of the deceased for the person of the deceased or from the premises, prior to the arrival of the coroner or without the permission of the coroner, is guilty of a misdemeanor.”

III. PROCEDURE

A. The investigator shall take pictures of the instrument of death. Additional photographs should be taken to assist the pathologist in understanding the death scene.

B. The investigating agency may remove items of evidentiary value at the scene with the express permission of the coroner.
C. The coroner’s investigator shall be notified by the investigating agency of any property taken off of the decedent or evidence related to the investigation of any known suspected criminal death. The investigator shall document this information in their report.

D. In homicide cases, the investigator may transfer possession of the weapon to the agency having jurisdiction.

E. Firearms used to commit suicide shall be collected by the coroner’s investigator pursuant to Government Code 27491.3.

F. All medications used to commit suicide shall be collected by the coroner’s investigator pursuant to Government Code 27491.3.

G. The coroner’s investigator will ensure the instrument of death (knives, rope, bindings, etc.) is available for examination by the pathologist at the time of the autopsy.
I. POLICY

A. The coroner shall collect all notes, letters or other documents written by the deceased which may tend to indicate an intention by the writer to take his or her life, including directions for disposition of property or disposal of the remains. The coroner shall process all documents with the court if they include directions for the disposition of property or disposal of remains.

II. GENERAL INFORMATION

A. Government Code Section 27464 outlines the handling of writings of the decedent:

1. “Whenever the death of a person shall have been referred to the coroner for investigation, there shall be delivered to the coroner any note, letter, or other document apparently written by the deceased which may tend to indicate an intention by the writer to take her/her life, including directions for disposition of the property or disposal of the remains. A facsimile copy thereof shall be placed in the coroner’s records. If an inquest is held, a true copy shall be read into the record and transcribed into the official notes of the official stenographer.

B. Upon completion of legal proceedings arising from the death, the original instrument shall be delivered by the coroner to the addressee or to the legal representative of the estate of the decedent provided, however, that if the instrument purports to be testamentary in nature, it should be filed with the county clerk as provided by law.”
III. PROCEDURE

A. SECURING DOCUMENT

1. At the scene of death, writings, letters, notes, or any document apparently written by the deceased which may tend to indicate the deceased took their own life shall be collected by the coroner’s investigator.

2. The Last Will and Testament of the deceased shall be collected if it is in plain view. Any suicide note that indicated disposition of property shall be considered a Last Will and Testament.

3. Any object that the deceased wrote on, i.e. sheet, book, diary, shall be collected.

4. If the deceased wrote on an object that cannot be removed, i.e., mirror, furniture, the coroner’s investigator shall take pictures of the writings.

B. PROCESSING DOCUMENTS

1. The coroner’s investigator will make a copy of all original documents that have been collected.

2. The coroner’s investigator shall notify the next of kin that the decedent left a Last Will and Testament or suicide note. The investigator shall advise the next of kin that they will file the Last Will and Testament with the court.

3. Should the next of kin refuse to take possession of a suicide note, the coroner’s investigator will document this fact in the investigative report and send the note to the Sheriff’s Property Room for destruction.

4. The investigator will take the Last Will and Testament or suicide note indicating any disposition or property to the Superior Court Clerk’s Office for filing at no cost.
I. POLICY

A. All medications prescribed to the deceased are to be collected, inventoried and stored in the Coroner’s Property Room pending destruction.

II. DEFINITION

A. Medications are defined as any prescription medication issued by a physician.

III. GENERAL INFORMATION

A. As the decedent’s medical history is an integral part of a coroner’s investigation, the collection of prescribed medications may:

- Indicate past and present medical history.
- Assist the pathologist in forming a more complete picture of the deceased’s medical history.
- Provide information regarding the degree of illness, depending on the type and dosage of the medications.
- Indicate possible overdose, reaction or interaction.

IV. PROCEDURE

A. COLLECTION OF MEDICATIONS

1. The coroner’s investigator shall collect all medications and all empty containers prescribed to the decedent located at the death scene.
2. The investigator shall count all medications and document the pill amount, dosage and prescribing doctor in the investigative report.

3. The investigator shall distribute four copies of the Medication Inventory Report:
   a. Original stays with the case file folder.
   b. One copy is attached to the pathologist’s file.
   c. One copy is attached to the bag containing the medications.
   d. One copy is placed in the Medication Inventory Log located in the Coroner’s Property Room.

4. After the medications are inventoried, the coroner’s investigator shall place them in the locker designated for medications in the Coroner’s Property Room.

B. DISPOSAL OF MEDICATIONS

1. Medications collected on coroner’s cases may be retained until the case has been completed.

2. Medications collected regarding deaths that are not coroner’s cases are sent to Sheriff’s Property for destruction.

3. The Coroner’s Assistant Division Commander will ensure the Medication Log accurately reflects the medications currently stored in the Coroner’s Property Room on a weekly basis.

4. An assigned coroner’s investigator will regularly transport stored medications to Sheriff’s Property for destruction.
I. POLICY
   A. Firearms used to commit suicide shall be collected by the coroner’s investigator and processed through the Property Room. Firearms used as an instrument of death, i.e. accidental death or homicide shall be collected by the law enforcement agency.

II. PROCEDURE
   A. COLLECTION OF FIREARMS

      1. Firearms used to commit suicide shall be collected at the scene by the responding coroner’s investigator.
         a. Photograph the scene
         b. The firearm should be rendered safe
         c. The firearm shall be stored in a secure area

      2. The firearm will be entered into CLETS to determine the registered owner of the weapon. If the weapon is not registered, the weapon will be considered the property of the next of kin.

      3. The coroner’s investigator assigned to firearms is responsible for transporting the weapon to the Sheriff’s Property Room and maintaining the chain of evidence.

   B. FIREARMS RETENTION/DESTRUCTION

      1. Firearms may be retained until the investigation is completed.
2. The weapon (cleared and safe) shall be made available to the pathologist for inspection at the time of the autopsy.

3. All other weapons not used to commit suicide but taken for safe keeping shall be logged as personal property on the Property/Clothing Inventory Report without completing a Firearms Report.

4. Law enforcement agencies that have collected weapons in homicide cases or questionable deaths shall be responsible for those weapons.

5. After 30 days the Property Room will send a Disposition Letter to the next of kin asking for instructions on how to dispose of the weapon.

6. The weapon may be returned to the registered owner or next of kin as part of the estate.

C. The weapon may be destroyed at the written request of the responsible party. The Property Room is responsible for the destruction of all firearms.
I. POLICY
   A. After autopsy or inspection, the decedent and his or her property will be released to the funeral director when authorized by the legal next of kin.

II. GENERAL INFORMATION
   A. When the autopsy or inspection is complete, the decedent’s remains and his or her property are ready for release to the funeral director of choice.

III. PROCEDURE
   A. The funeral director of choice will be listed on the front of the file folder. The sergeant or investigator will contact the funeral director to inform him that the decedent is ready for removal and advise him of any fees associated with the removal. The front cover of the case folder will state if a removal fee and/or body bag fee applies. The task of releasing the decedent and his or her property is a multi-phased procedure that involves checking and completing the following forms and tasks:
      1. Funeral Director of Choice or Authorization to Release Form
      2. Certificate of Death
      3. Collecting pouch fee
      4. Receipt
      5. Fingerprints
      6. Clothing/Property Inventory Report
      7. Case file envelope
      8. Physical release of decedent
B. Funeral Director of Choice or Authorization to Release form

1. When the funeral director arrives to take possession of the remains, the coroner’s investigator will retrieve the decedent’s file folder from the active case file bin. The decedent and his or her property cannot be released to the funeral director without authorization from the next of kin (Funeral Director of Choice Form) or the deceased via a pre-need form. A pre-need form is a document on file with the funeral home that the decedent has completed and signed designating their funeral/burial wishes.

2. The coroner’s investigator will obtain a copy of the authorization form from the funeral director and check to make sure it is signed by the legitimate next of kin. If the authorization is signed by anyone other than the next of kin, the release cannot proceed until the matter is resolved. If the funeral director doesn’t have the authorization form, check the case file as a form may have been faxed or delivered by the next of kin.

3. If the deceased has made prior arrangements (pre-need) with the Neptune Society or the Nautilus Society, the representative from the society who accepts the body must present an Authorization to Release form which must be dated and signed by the deceased.

4. The coroner’s investigator will release the decedent’s personal property and sign the property sheet. The coroner’s investigator shall document the date and times released on both the folder and in the report. The coroner’s investigator will indicate whether the removal fee was paid by the funeral director or needs to be billed. If the removal fee was paid, the investigator will write the receipt number in the space provided on the outside of the case file folder.

5. The coroner’s investigator will ensure the funeral director dates and initials the top section of the form and legibly signs the form. The coroner’s investigator will also ensure the name of the mortuary is legible on the form.

6. The coroner’s investigator will indicate:

   a. The decedent was identified.
   b. Fingerprints were or were not obtained.
   c. The next of kin release authorization was obtained.
   d. The pathologist report is in the case file.
7. Certificate of Death
   a. The coroner’s investigator will compare the spelling of the name on the death certificate with the name listed on the release presented by the funeral director.
   b. The coroner investigator will ensure line 126 on the death certificate has been signed by the lead investigator or in their absence the Division Commander, Assistant Division Commander or by an appointed investigator.
   c. The coroner’s investigator will ensure a copy of the death certificate is included in the case file.

8. Removal Fee Collected
   a. A removal fee will be collected pursuant to County Ordinance No. 2009-10 and Government Code Section 54985(a) unless:
      - The decedent is under 15 years of age.
      - The decedent is the victim of a criminal offense. If the decedent was also involved in a criminal act which contributed to his/her death, a removal fee is required.
      - The deceased and his/her family are indigent.
      - The body was delivered to the Morgue by a funeral director.

9. The coroner’s investigator will check the front cover of the case file folder to determine if the removal fee is to be collected. The coroner’s investigator will indicate whether or not a fee is required on the file cover.

10. Local funeral directors may be billed on a monthly basis, or they may pay at the time of removal. Out-of-county funeral directors should pay at the time of release. However, after the name, address and phone number of the funeral home has been obtained along with assurance the fee will be remitted in a timely manner, the funeral director may be billed.

11. The Public Administrator is authorized to make a removal without paying the removal fee at the time of release and may credit the Coroner’s General Account after settling the deceased’s estate.

12. The removal fee is a charge against the decedent’s estate. The funeral director pays the fee to the Coroner’s Office and then collects the fee from the family of the decedent. At no time will the Coroner’s Office refuse to release a decedent to a funeral director after they have presented a signed release from the next of kin. (To withhold a Death certificate
may be a misdemeanor under Section 7053 of the Health and Safety Code.]

C. Pouch

1. The coroner’s investigator will check the front of the file folder to determine if a pouch has been issued and collect any pouch fee (dependent on the type of pouch to be replaced) at the time of release.

D. Receipt Book

1. The coroner’s investigator will issue a receipt for the removal and pouch fees and provide the yellow copy to the funeral director. The coroner’s investigator will attach the white copy to the check or cash and place it in the metal cash box located near the reception clerk’s desk and leave the pink copy in the receipt book. The coroner’s investigator will write the receipt number on the case file folder as well as on the Coroner’s Office Release Form.

E. Fingerprints

1. Fingerprints are the preferred method of identification; however, fingerprints are often unavailable, particularly in badly decomposed bodies. The coroner’s investigator will ensure the all fingerprints information is documented in the narrative of the report.

F. Clothing/Property Inventory Report

1. Any clothing is usually bagged and kept with the decedent. The property inventory is located on the lower portion of the inventory report, and the property is stored in the Coroner’s Property Room.

2. In the presence of the funeral director, the coroner’s investigator will ensure the clothing and property correspond to the items listed on the inventory form and ensure the funeral director signs and dates the certification of receipt on the Property/Clothing Inventory Report. The investigator making the release must legibly sign at the bottom of the form and place the original Property/Clothing Inventory Report in the case file folder and provide the funeral director with the yellow copy.
G. Case File Envelope

1. The coroner’s investigator will initial and date the front of the file folder indicating to whom and when the death certificate, body and property were released.

2. If the case is an NBI (not brought in) or Co-sign, the coroner’s investigator will indicate on the front of the case file folder that only a death certificate was released.

H. Physical release of the remains to the funeral director

1. The coroner’s investigator will direct the funeral director to the vehicle sally port located on the south side of the Central Morgue. The coroner’s investigator will close the roll up door once the vehicle is inside.

   **The coroner’s investigator will match the decedent’s name and case number to the toe tag on the decedent and instruct the funeral director to confirm the name on the toe tag.**

2. The coroner’s investigator will help transfer the decedent from the Coroner’s Office autopsy table to the funeral director’s gurney. The coroner’s investigator will clean the autopsy table with approved disinfecting supplies in the wash area.
I. POLICY

A. After completion of an autopsy, toxicological specimens are to be collected and delivered to the Sheriff’s Crime Laboratory or reference laboratory for analysis.

II. PROCEDURE

A. Autopsy

1. During the course of an autopsy, blood, urine and other samples are collected. To comply with legal mandates or when the results of the autopsy fail to visually disclose a medical cause of death, these samples require further testing by an approved forensic laboratory to assist in determining the cause of death.

2. The forensic assistant will provide the clerical staff with a Pathologist’s Autopsy Report and, when warranted, a Coroner’s Toxicology Request Form for each case.

3. The Pathologist will do all testing needed to provide his or her opinion of the cause of death. If a test is unusual or costly, the test will be approved by the Coroner’s Division Commander. If an outside agency requests a test that is not needed to establish the cause of death, the requesting agency will pay for the additional testing.

4. Once the forensic laboratory returns the completed diagnostic test results to the Coroner’s Office a coroner’s clerk will date stamp the results, enter the results into the Coroner’s Database and update the file.
B. DNA COLLECTION
1. DNA samples are collected on all bodies brought in to the Central Morgue.
2. The pathologist’s assistant will collect four drops of the decedent’s blood for the DNA card on all cases. Exceptions may be made for advanced decomposed remains.
3. The DNA cards are retained indefinitely.

C. FORENSIC ASSISTANT
1. At the beginning of shift, the forensic assistant will retrieve the copies of the Coroner’s Investigative Reports, medication logs and medical records for review by the pathologist on duty.
2. The forensic assistant will label the specimen tubes and tissue jars to include the coroner’s report number.
3. The forensic assistant will collect four drops of every decedent’s blood for the DNA cards.
4. At the direction of the pathologist, the forensic assistant will open or assist in opening the head and chest cavities and collect the necessary blood and tissue samples.
5. The forensic assistant will prepare and deliver toxicology requests at the direction of the pathologist. The forensic assistant will complete the paperwork in accordance to the respective laboratory requirements and submit specimens according to the laboratory procedures.
6. Blood samples are stored in the Coroner’s Office freezer for one year and one day. Tissue samples will be fixed in formalin and stored in the storage locker area for one year and one day. Paraffin blocks and slides will be prepared by the pathologist and retained for up to ten years and maintained by the Coroner’s Division.
7. All requests for private testing of blood will be made by the legal next kin and they will arrange for the pick-up and transport of the sample by the lab of their choice.
I. POLICY

A. Deaths involving a decedent driving or riding in a motor vehicle or as a result of being struck by a motor vehicle: The Coroner’s Division shall take blood samples from the body of the deceased before it has been prepared for burial and make appropriate related chemical tests to determine the alcohol contents.

B. On or before the tenth day of each month, the Coroner’s Division shall report in writing to the Department of Highway Patrol in Sacramento, the death of a person during the preceding calendar month which was the result of an incident involving a motor vehicle, and the circumstances of the incident.

II. GENERAL INFORMATION

A. California Vehicle Code Section 20011 requires every coroner to provide the Department of the California Highway Patrol with motor vehicle death data on or before the tenth day of each month.

B. Government Code Section 27491.25 outlines specific requirements of the coroner in handling Motor Vehicle Deaths:

“The coroner, or the coroner’s appointed deputy, on being notified of a death occurring while the deceased was driving or riding in a motor vehicle, or as a result of the deceased being struck by a motor vehicle, shall take blood and urine samples from the body of the deceased before it has been prepared for burial and make appropriate related chemical tests to determine the alcoholic contents, if any, of the body. The coroner may perform other chemical tests including, but not limited to, barbituric acid and amphetamine derivative as deemed appropriate.”
C. The detailed medical findings, resulting from those examinations that are conducted, shall either be reduced to writing or permanently preserved on recording discs or other similar recording media and shall include all positive and negative findings pertinent to the presence or absence of any alcoholic or other substance content.

D. This section shall not apply to the testing of deceased persons under the age of 15 years, unless the surrounding circumstances indicate the possibility of alcohol, barbituric acid, and amphetamine derivative consumption, nor shall it apply when the death has occurred more than 24 hours after the accident.”

III. PROCEDURE

A. BLOOD SAMPLES

1. The forensic assistant will draw a blood sample on all cases meeting the mandated requirement.

2. Blood samples are taken on all decedents over 15 years of age involved in a motor vehicle accident.

3. Drug tests may be performed at the request of the law enforcement agency having jurisdiction.

B. REVIEW OF DATA

1. The coroner’s investigator assigned to motor vehicle accident data collection will review the cases from the prior month and compile a list of those cases that involve fatalities as a direct result of an incident involving a motor vehicle.

2. The coroner’s investigator will thoroughly review each case to ensure the appropriate toxicology testing has been requested.

3. The coroner’s investigator will prepare and submit a monthly Motor Vehicle Fatal Accident Report to the California Highway Patrol.
I. POLICY

A. Coroner’s investigators are required to investigate all reported sudden, unusual, unexpected and violent deaths that occur in the county. These investigations include but are not limited to industrial deaths, deaths that occur on military bases, aircraft accidents and the disposition of recovered Native American remains.

B. Coroner’s investigators shall ensure the special investigations are compliant with applicable statutes and regulations.

II. DEFINITIONS

- FAA: Federal Aviation Administration
- NTSB: National Transportation Safety Board
- OSHA: Occupational Safety and Health Administration

III. PROCEDURE

A. INDUSTRIAL ACCIDENTS

1. Pursuant to California Administrative Code Section 342, the coroner’s investigator shall notify OSHA as soon as practical of any death occurring in a place of employment or in connection with employment.

2. The coroner’s investigator shall photograph and document the make, model and serial number of any equipment the decedent may have been operating at the time of injury. If practical, the equipment may be taken as evidence.

3. The supervisor shall ensure an expanded toxicology panel is requested for all workplace deaths.
B. MILITARY RESERVATIONS

1. Deaths of military personnel may fall under federal jurisdiction and, as such, the Coroner’s Office will delegate jurisdiction pursuant to Government Code Section 27491.55. If the military requests the Coroner’s Office to accept jurisdiction or joint jurisdiction, the Coroner’s Office will do so in accordance with Sheriff’s Office Policy.

C. FEDERAL AVIATION ADMINISTRATION (FAA) AND NATIONAL TRANSPORTATION SAFETY BOARD (NTSB) INCIDENTS

1. Airplane crash fatalities require special handling at the scene. The FAA and the NTSB require the coroner to send tissue samples to the FAA Headquarters in Oklahoma City, Oklahoma for testing.

2. The investigation of airplane crashes falls under the jurisdiction of the FAA and the NTSB. Coroner’s investigators shall comply with the following special considerations:

   a. In the event of an aircraft crash or any death falling under the NTSB jurisdiction, the coroner’s investigator shall notify the Coroner’s Division Assistant Division Commander as soon as possible. The Coroner’s Division Assistant Division Commander shall notify the Coroner’s Division Commander as soon as possible.

   b. The first responding coroner’s investigator will assess the scene and determine the extent of personnel and equipment required to process the scene.

   c. The Coroner’s Division Commander or designee will determine whether or not to implement the Mass Fatality Plan.

   d. Prior to responding to the scene of an aircraft crash, the coroner’s investigator will confirm that the FAA and the NTSB have been notified.

   e. The coroner’s investigator will consult with the FAA investigator prior to removal of the decedent(s). The coroner’s investigator will photograph and document the location and position of the decedent(s) prior to removal.
f. The coroner’s investigator will not remove aircraft parts or paperwork from the crash scene without permission from the FAA or NTSB representative.

g. The coroner’s investigator will obtain a toxicology box from the FAA investigator for each decedent.

h. The forensic assistant will collect the required specimens following the instructions included in the FAA toxicology box.

i. Prior to shipment, the coroner’s investigator or supervisor will contact the FAA during normal working hours and obtain their Federal Express shipment number for delivery of the samples.

j. The FAA/NTSB will reimburse the county for the special handling and collection of the tissue and toxicology tests. The clerical staff will prepare an invoice for this service. Any questions concerning billing should be addressed to the FAA/NTSB/Program Assistant/Accounts Payable.

D. NATIVE AMERICAN REMAINS

a. Pursuant to Health and Safety Code Section 7050.5 the following actions must be taken immediately upon discovery of possible Native American remains:

b. The Coroner’s Office must determine whether or not the remains are Native American within two working days after being notified by the person responsible for the excavation or discovery.

c. If the remains are determined to be Native American, the Coroner’s Assistant Division Commander will ensure the Native American Heritage Commission is notified within 24 hours.

d. The Native American Heritage Commission will immediately notify the person it believes to be the most likely descendent of the deceased Native American for disposition of the remains.
I. POLICY

A. The Coroner’s Office will process unidentified bones or human remains as a Coroner’s case. The Coroner’s Office will provide for interment of unclaimed human remains or cremains as authorized by law.

II. DEFINITIONS

A. Government Code 27521 Unidentified Bodies and Human Remains

1. Any postmortem examination or autopsy conducted at the discretion of a coroner upon an unidentified body or human remains shall be subject to this section.

2. A postmortem examination or autopsy conducted shall include, but shall not be limited to, the following procedures:

   a. Taking all available fingerprints and palm prints.

   b. Dental examination consisting of dental charts and dental X-rays of the deceased person’s teeth, which may be conducted on the body or human remains by a qualified dentist as determined by the coroner.

   c. The collection of tissue, including a hair sample, or body or fluid samples for future DNA testing, if necessary.
d. Frontal and lateral facial photographs with the scale indicated.

e. Notation and photographs, with a scale, of significant scars, marks, tattoos, clothing items, or the personal effects found with or near the body.

f. Notations of observations pertinent to the estimation of the time of death.

3. Precise documentation of the location of the remains. The postmortem examination or autopsy of the unidentified body or remains may include full body X-rays.

4. The Coroner shall prepare a final report of investigation in a format established by the Department of Justice. The final report shall list or describe the information collected pursuant to the postmortem examination or autopsy conducted under subdivision (b).

5. The body of an unidentified deceased person may not be cremated or buried until the jaws (maxilla and mandible with teeth) and other tissue samples are retained for future possible use. Unless the coroner has determined that the body of the unidentified deceased person has suffered significant deterioration or decomposition, the jaws shall not be removed until immediately before the body is cremated or buried. The coroner shall retain the jaws and other tissue samples for one year after a positive identification is made, and no civil or criminal challenges are pending, or indefinitely.

6. If the Coroner with the aid of the dental examination and any other identifying findings is unable to establish the identity of the body or human remains, the coroner shall submit dental charts and dental X-rays to the Department of Justice on forms supplied by the Department of Justice within 45 days of the date the body or human remains were discovered.

7. If the Coroner with the aid of the dental examination and other identifying findings is unable to establish the identity of the body or human remains, the coroner shall submit the final report of investigation to the Department of Justice within 180 days of the date the body or human remains were discovered.

B. Government Code 27521.1 Unidentified Bodies and Human Remains: Reporting Death

1. The law enforcement agency investigating the death of an unidentified person shall report the death to the Department of Justice, in a format
acceptable to the Department of Justice, no later than 10 calendar days after the date the body or human remains were discovered.

III. PROCEDURE

A. PROCESSING UNIDENTIFIED BONES OR HUMAN REMAINS

1. The coroner’s investigator taking custody of the unidentified bones or human remains will conduct a complete investigation and ensure the bones or remains are properly packaged and identified with the assigned case number.

2. The pathologist may examine the remains to determine if they are human.

3. If the pathologist needs more detailed examination of the remains, the coroner’s investigator shall coordinate with the coroner’s supervisor to determine which of the available consultants (i.e. forensic dentist, anthropologist, etc.) will be contracted to conduct further examination.

4. The coroner’s investigator may send photographs of the remains to the contract anthropologist for assessment.

5. The coroner’s investigator will submit a portion of the remains best-suited for DNA comparison to the Department of Justice for analysis. The coroner’s investigator will complete a Department of Justice DNA submission form, attach a copy signed by a Department of Justice representative to the case file and document the transaction in the narrative portion of the investigative report.

6. The coroner’s investigator will attach detailed photographs of the remains to the case file.

7. The remains will be stored at the Central Morgue for one year.

B. COUNTY INTERMENT OR DISPOSITION OF REMAINS

1. Under certain conditions, it may be necessary for the Coroner’s Office to assume jurisdiction of the disposition of unclaimed human remains or identified bones.

   a. County-subsidized interment is authorized for human remains or unidentified bones where no next of kin is located. Interments
may be authorized by the Employment and Human Services Department, Health Services Department, Sheriff-Coroner or Public Administrator.

b. Health and Safety Code 7104 (A) and (B) outline the circumstances under which the coroner may be required to inter the remains, assuming there is no next of kin identified. Pursuant to Health and Safety Code 7104.1, if, within 30 days after the coroner notifies or diligently attempts to notify the person responsible for the interment or inurnment of a decedent’s remains, the person fails to inter the remains, the coroner may inter the remains.

c. Cremation is the method of county-authorized disposition for unidentified human remains. After eligibility has been determined, coroner’s supervisor will assign a funeral director to dispose of the remains.

d. The coroner’s supervisor will complete the Authorization for County Interment form and provide the pink copy to the coroner’s clerical staff for filing. The coroner’s supervisor will ensure a copy is placed in the decedent’s case file and provide the original and yellow copies to the selected funeral director.

e. Upon completion of the disposition, the funeral director shall submit a demand for payment.

C. INTERMENT OF UNCLAIMED CREMAINS

1. Pursuant to Health and Safety Code Section 7104, if the person who has the legal responsibility to inter the cremains of a decedent cannot be located within the state, the person who has custody of the cremains may require the coroner of the county where the decedent resided at the time of death to take possession of the cremains and inter the cremains in the manner authorized by law for the interment of the indigent dead.

2. The person who has custody of the cremains must verify that reasonable diligence was taken to locate the legal next of kin and that the next of kin was unable to be located.

3. The person who has custody of the unclaimed cremains must contact the Coroner’s Office and request interment of the cremains by the Coroner’s Office.

4. The person who has custody of the cremains must present to the Coroner’s Office with written documentation (a copy of a certified or registered letter from the post office), showing the next kin has moved
and left no forwarding address, which must accompany the letter requesting that the coroner take custody of the cremains.

5. In the event the cremains are being held by a commercial business (funeral chapel or mortuary), a copy of the original contract for disposition shall be forwarded to the Coroner’s Office, along with the above-mentioned documentation.

6. The coroner’s investigator taking custody of the cremains will write a Coroner’s Investigative Report for each case received for interment. The cremains will be properly packaged, identified by the assigned case number and stored at the Central Morgue for eventual interment.

7. If a Police agency has custody of cremains, they shall deliver the cremains to the Coroner’s Division with a completed police report documenting the circumstances of the cremains and the determination of the next of kin.
I. POLICY

A. All deaths involving the actions or inactions of a peace officer, on duty or off, where the Officer Involved Protocol has been invoked, shall be reportable to the Coroner’s Office. The Coroner’s Division Commander will decide whether or not a Coroner’s Inquest will be held to determine the manner of death.

II. PROCEDURE

A. NOTIFICATION

1. The coroner’s investigator should obtain an initial summary of the available information including the name of the decedent, location of the body, circumstances of the death and the involved agency.

2. The coroner’s investigator will not respond to make the removal until requested by the police agency.

B. DISTURBING THE DEATH SCENE OR BODY

1. Pursuant to Government Code 27491.2, any person who moves or disturbs a dead body without the permission of the coroner is guilty of a misdemeanor. Police officers, fire fighters or paramedics may not move or disturb a body once it is determined the person is deceased. Additionally, any person who searches for or removes any papers, monies, valuable property or weapons constituting the estate of the deceased from the person of the deceased or from the premises, prior to the arrival of the coroner or without the express permission of the coroner, is guilty of a misdemeanor pursuant to Government Code Section 27491.3 (c).
C. SEARCH EXCEPTION

1. Pursuant to Government Code Section 27491.3 (d), a peace officer may search the person and property around a decedent whose death was caused by a traffic accident for the purpose of locating a driver’s license or identification card to determine if an anatomical donor card is attached.

D. PHYSICAL EVIDENCE ON THE BODY

1. Prior to the pathologist’s inspection, the body shall not be disturbed at the morgue nor its condition altered in any of the following ways:

   a. Movement or removal of clothing.
   b. Movement or removal of any weapon or object.
   c. Collection of hair standards.
   d. Collection of gunshot residue which is associated with wound sites.
   e. Clipping or scraping of fingernails.
   f. Cleaning.

2. Removal of evidence from the body may be necessary for immediate investigative needs and to protect the evidence from loss or contamination.

3. Evidence on the body, such as loose hairs, fibers, vegetation, blood, gunshot residue etc., may be removed from the body without the prior permission of the coroner’s office if necessary to protect the evidence. Evidence which can safely be left on the body for later collection at the autopsy shall be left in place for the pathologist’s inspection.

E. PHYSICAL EVIDENCE AT THE DEATH SCENE

1. Weapons, wallets, papers, money and valuables which have evidentiary value to may be inspected and collected by the investigating agency without the prior approval of the Coroner’s Office. However, these items shall not be removed from the scene without the coroner investigator’s approval.

2. Searches for evidence and the removal of items from a decedent’s estate which are conducted under authority of a search warrant do not require the approval of the coroner.
F. FINGERPRINTS

1. Fingerprints may be obtained from the decedent without the pathologist’s approval if an immediate need exists to identify the decedent provided:
   
a. No trauma to the areas of the fingers and hands is detected.
b. The fingers and hands are photographed prior to fingerprinting.
c. The hands and fingers have been examined for trace evidence.

G. PHOTOGRAPHS

1. The coroner’s investigator shall photograph the body prior to moving the body when possible.

H. INQUESTS

1. Pursuant to the Officer-Involved Fatal Incident Protocol, a Coroner’s Inquest will be held at the discretion of the Coroner’s Division Commander.
I. POLICY

A. Pursuant to Government Code Section 27491.6 and the Contra Costa County Officer Involved Fatal or Serious Injury Incidents Protocol, the Sheriff-Coroner may choose to conduct a formal inquest into any death that involved law enforcement personnel.

B. “The coroner may, in his discretion, hold an inquest, and he shall hold an inquest if requested to do so by the Attorney General, the District Attorney, the Sheriff, City Prosecutor, City Attorney, or Chief of Police of a city in the county in which such Coroner has jurisdiction. Such inquest shall be held with or without a jury, at the Coroner’s discretion, and shall be open to the public”.

II. PROCEDURE

A. Preparation for the Coroner’s Inquest

1. The Coroner’s supervisor or designee will select an appropriate date and time for the Inquest upon receipt of the autopsy report, the toxicology reports, and the investigative reports. The Coroner’s supervisor or designee will prepare and submit a list of witnesses to the Division Commander for approval. Copies of the witness list will be provided to the Hearing Officer and the Inquest Recorder.

B. Press Release

1. The Coroner’s supervisor or designee will prepare and submit a press release to the Division Commander for approval. The Press Release will contain the name of the decedent, the date, time and location of the Coroner’s Inquest. The Division Commander shall notify the decedent’s family in writing of the date, time and location of the scheduled Coroner’s Inquest.
C. Subpoenas

1. The Coroner’s supervisor or designee will prepare and serve subpoenas to all witnesses and retain a record of proof of service.

D. Hearing Officer

1. A hearing officer shall be appointed to conduct the proceedings of the Coroner’s Inquest.

E. Inquest Reporter

1. An inquest Reporter shall be hired to record the Coroner’s Inquest proceedings and testimony.

F. Jurors

1. The coroner’s supervisor or designee will contact the Jury Commissioner’s Office to select not less than nine nor more than 15 jurors. The Coroner’s supervisor or designee will provide the selected jurors with a brief description of their duties.

2. To assure the hearing officer that the juror will base a verdict on what testimony and evidence are presented at the inquest, the voir dire process is used to eliminate anyone who has close ties with the involved agencies, has read or heard about the case, and any juror who knows the decedent.

G. Verdict of Coroner’s jury

1. One Verdict of Coroner’s Jury form shall be made for each of the four findings by the jury or hearing officer:

   a. Natural causes
   b. Suicide
   c. Accident
   d. At the hands of another person, other than by accident

2. After all testimony has been completed, the hearing officer will instruct the jury. All witnesses, the hearing officer, the bailiff, etc. shall leave the room prior to the jury deliberations to allow the jurors to determine the verdict of the Inquest.
3. After the jury has determined the verdict, the Coroner’s Assistant Division Commander or designee shall verify all of the jurors signed the Verdict of Coroner’s Jury form, personally sign the form and deliver the form to the hearing officer. The hearing officer will read the jury’s verdict into the court record.

H. Miscellaneous

1. Hearsay testimony is admissible at the discretion of the Hearing Officer. The lead investigator may comment on witnesses, and/or read into the record from witness interviews. The pathologist may comment on the propriety of emergency medical treatment, blood alcohol level, drug levels, etc.

2. Attorneys present may submit questions in writing to the Coroner’s supervisor or designee. The hearing officer will decide whether or not to ask the question.
I. POLICY

A. The Contra Costa Sheriff-Coroner will utilize the Death Scene and Deputy Coroner Investigation Protocol and International Standardized Autopsy Protocol for Sudden Infant Death Syndrome Investigations. Pursuant to Government Code Section 27491.41, the Coroner’s Division Commander shall ensure a complete autopsy is performed on all SIDS cases.

II. DEFINITIONS

1. SIDS: Sudden Infant Death Syndrome.
2. SUID: Sudden Unusual Infant Death.

Both definitions refer to the sudden death of an infant one year of age or younger which is unexpected and a through postmortem examination fails to demonstrate an adequate medical cause of death.

III. GENERAL INFORMATION

A. The unexpected death of children and infants require extensive investigation of the surroundings circumstances, to include detailed questioning of the parents and examination of the residence or place of death at the time of death.

B. Although the death may arouse suspicion of inflicted injury or neglect, and the investigating agency may focus such suspicion on the parents or caregiver, death investigators must balance their investigative duties with the need to be both professional and compassionate towards the grieving family. Coroner’s investigators shall work with Health Department, Public Health Nurses and Crisis Center counselors.
C. The death Scene and Deputy Coroner Investigation Protocol (DHS 4439) for investigation of the scene of SIDS deaths has been approved by the California Department of Health Services pursuant to Government Code, Section 27491.41 (enacted in 1989 with the passage of SB 1059). The protocol is used throughout California to assist coroner’s investigators and pathologists in establishing the medical cause and manner of death. The coroner’s investigator shall comply with the protocol on all infants and children under the age of 12 months who die suddenly and unexpectedly, and the cause of death is not obvious. Certain deaths may be excluded from the protocol, to include deaths obviously due to a recognized trauma.

D. Additionally, the International Standardized Autopsy Protocol is used during an autopsy to assist the pathologist in determining the cause of death of infants and children under the age of 12 months who die suddenly and unexpectedly, and the cause of death is not obvious.

IV. PROCEDURE

A. NOTIFICATION

1. Coroner’s investigators will adhere to the following procedures:

   a. Remind hospital staff to not disturb or “warm” the body for the family to hold, remove clothing, cut lockets of hair or disturb any physical evidence on the decedent. Collect any cut off clothing, diapers or blankets.

   b. Advise the investigating agency that you will be responding as soon as possible and remind them to not let the infant or the death scene be disturbed.

   c. If the infant has been transported to the hospital, respond to the location of the decedent prior to the scene of death.

B. RESPONDING TO THE DEATH SCENE

1. The pathologist needs the most accurate depiction of the position the infant was in at the time of death. Additionally, the pathologist may need to inspect the object or materials the decedent was lying on prior to death.
2. Coroner’s investigators will adhere to the following procedures:

   a. Take measurements of the actual sleeping surface. Note the texture of the sleeping surface and the temperature of the scene.

   b. Collect the bedding and any toys or objects that could have a connection to the cause of death.

C. PHOTOGRAPHS

1. In addition to taking relevant photographs of the decedent and death scene, the coroner’s investigator may use an approved Coroner’s Division doll to recreate the position the decedent was found in. The coroner’s investigator shall inspect and photograph the condition of the residence, to include available food and necessities.

D. MEDICATIONS

1. The coroner’s investigator will collect all medications and over the counter medications provided to the decedent.

E. REMOVAL

1. The coroner’s investigator will wrap the decedent in a blanket and carry the remains to the Coroner’s van in a compassionate manner. Exceptions to this procedure must be authorized by the Coroner’s Division sergeant or manager prior to the removal. The coroner’s investigator will collect all items that accompanied the decedent to the hospital.

F. MEDICAL HISTORY / RECORDS

1. The coroner’s investigator will obtain all records of resuscitation attempts, laboratory studies and clinical histories initiated by the transportation paramedic team or Emergency Room medical personnel.

2. The coroner’s investigator will obtain all available medical records.

G. AGENCY REPORT

1. The coroner’s investigator shall request and obtain a copy of the investigating agency’s investigative report. This report can assist the investigator during their investigation and will be provided to the Child
Death Review Team. The investigator shall ensure a copy of the agency report is attached to the coroner’s investigative report.

H. REPORTING REQUIREMENTS

1. The coroner’s investigator is required to report the SIDS death to the Child Death Review Team by faxing or emailing both the coroner’s report and the DHS form 4439. The investigator will also notify Children and Family Services by telephone within 24 hours.

2. The Division Clerk will mail the completed protocol to:

State of California  
Department of Health Services  
Epidemiology and Evaluation Section  
P.O. Box 997420  
Sacramento, CA 95899-7420

3. The Division Clerk shall mail the completed Coroner’s Notification Card to the California SIDS Program within 24 hours or as soon as possible after the completion of the gross autopsy.
I. POLICY

A. A mass fatality event is generally defined as any event that results in more fatalities than can be handled effectively by a jurisdiction using its existing capabilities and resources. Coroner’s Division command staff will utilize the Contra Costa Operational Area All Hazards Mass Fatality Plan to effectively manage a mass fatality incident.

II. GENERAL INFORMATION

A. The purpose of the plan is to provide for Operational Area management of mass fatalities. The plan has been prepared in accordance with the standards of the National Incident Management System, the California Standardized Emergency Management System and other Federal and State requirements and standards for emergency response plans applicable as of August 2010.

III. PROCEDURE

A. The Contra Costa Operational Area All Hazards Mass Fatality Plan was prepared for the Bay Area Urban Area Security Initiative with grant funding provided by the Department of Homeland Security. In the event of a Mass Fatality Incident, the Coroner’s Division Commander or designee shall implement the plan pursuant to the guidelines provided in the Mass Fatality Activation Levels section.

B. The plan shall be distributed to all Coroner’s Division personnel. All members of the Coroner’s Division are encouraged to review the plan on a regular basis.
I. POLICY

A. Pursuant to Government Code Section 27520, the coroner shall perform or cause to be performed an autopsy on a decedent if the surviving spouse requests him to do so in writing. If there is no surviving spouse, the coroner shall perform the autopsy if requested to do so in writing by a surviving child or parent, or if there is no surviving child or parent, by the next of kin of the deceased. The cost of the autopsy shall be borne by the person requesting that it be performed.

II. GENERAL INFORMATION

A. The requesting party must be the legal next of kin with authority to request the procedure and assume the responsibility for all costs involved.

B. The Coroner’s Office charges a fee approved by the Board of Supervisors for the autopsy and removal of the decedent. This fee and all other coroner fees shall be reviewed annually by the Division Commander and amended by the Board of Supervisors as required. Additional charges, to include toxicology tests required to determine the cause of death, shall be borne by the person requesting the autopsy.

III. PROCEDURE

A. Full payment of Coroner’s Office fees is required at the time of the request for autopsy. Additionally, the following documents shall be submitted by the appropriate next of kin (or representative):

1. A copy of the death certificate signed by the attending physician.
2. A completed Survivor-Requested Autopsy form, with instruction regarding toxicology work to be done and by whom.
B. The coroner’s investigator will assign a Coroner’s Case File Number and complete a Coroner’s Investigative Report, listing the classification as PRIVATE AUTOPSY.

C. Upon completion of the investigation the Coroner’s clerk will send the next of kin (or representative) a copy of the Autopsy Report, the Coroner’s Investigative Report and any diagnostic reports.

D. The Death Certificate will not be amended if the cause of death remains natural.

E. The Coroner’s Division Commander or designee will amend the Death Certificate in those cases where the Coroner’s Office assumes jurisdiction of the death. If the cause of death is determined to be other than natural, the fees collected for the autopsy and diagnostic tests will be returned to the requesting party.
I. POLICY

A. Coroner’s Division personnel shall, in accordance with Health and Safety Code Section 7151.15, cooperate with organ procurement organizations to maximize the opportunity to recover anatomical gifts for the purpose of transplantation, therapy, research or education.

II. GENERAL INFORMATION

A. Pursuant to Health and Safety Code Section 7151.20, an organ procurement organization must obtain permission from the coroner before harvesting can be performed. The coroner’s investigator shall, whenever possible, provide medical records to a forensic pathologist currently under contract with the Office of the Sheriff to determine transplant feasibility.

B. If an autopsy is required and the forensic pathologist determines that the removal of the organs will not interfere with the investigation, the coroner’s investigator will release the organ(s) for removal.

III. PROCEDURE

A. The coroner’s investigator should ask the decedent’s next of kin, at the time of the death notification, if the decedent was a donor and inform them of their ability to donate viable organs and tissues.

B. The organ procurement organization can provide first drawn blood, vitreous, and medical records prior to and after harvesting of the organs or tissue.
I. POLICY

A. The Coroner’s Office bears the responsibility to the public and its employees to increase awareness about risks, methods of transmission, and procedures for handling communicable diseases.

II. GENERAL INFORMATION

A. This policy will supplement Office of the Sheriff Policy & Procedure section 1.06.34.

III. PROCEDURE

A. PROTECTIVE EQUIPMENT

1. All persons entering the Coroner’s Office and Central Morgue are required to use universal precautions to avoid possible disease contamination.

2. Only that Personal Protective Equipment provided by the Coroner’s Division will be used and shall be properly worn in the Autopsy Examination Room by any person required to come into contact with or be in close proximity with a dead body, body parts and or body fluids. In an effort to prevent cross-contamination, Personal Protective Equipment shall not be worn outside of the Autopsy Examination Room.
B. EXPOSURE REPORTING

1. A coroner’s investigator, upon learning a decedent may have had a communicable disease, shall clearly post the particular disease on the decedent’s toe tag and in red ink on the outside of the case folder. Persons who believe they have been exposed to a possible communicable disease are required to immediately notify the Coroner’s Division Commander or Assistant Division Commander.

2. If the Commander or Assistant Commander are unavailable, anyone who believes they may have been exposed to a communicable disease shall notify an on duty sworn staff member or the Officer of the Day. The person reporting the possible exposure should be advised to immediately contact their physician and seek medical advice. The coroner’s supervisor shall immediately notify Risk Management.
I. POLICY

A. Designated Coroner’s Division personnel actively participate with the Child Death Review Team and the Domestic Violence Death Review Team. Additionally, the Coroner’s Division provides information and data obtained from Coroner’s Investigative Reports authorized for release to approved agencies and entities.

II. GENERAL INFORMATION

A. Pursuant to Penal Code Section 11174.32, the Child Death Review Team was created to ensure that incidents of child abuse or neglect are recognized, and other siblings and non-offending family members receive the appropriate services in cases where a child has expired. The Domestic Violence Death Review Team, established pursuant to Penal Code Section 11163.3, exists to develop recommendations for policies and protocols for community prevention and intervention initiatives to reduce and eradicate the incidence of domestic violence.

B. These Death Review Teams are comprised of representatives from the following agencies and organizations:

1. Sheriff-Coroner
2. District Attorney
3. Probation
4. Department of Family Services
5. Public Health
6. Pediatrics
7. Mental Health
8. Child Advocacy
9. Crisis Center
10. S.T.A.N.D.!
III. PROCEDURE

A. PARTICIPATION

1. The Coroner’s Division Commander will provide a designated staff member to participate on the death review teams.

2. The Coroner’s Division representative will provide copies of Coroner’s Investigative Reports as requested.

B. OUTSIDE AGENCIES

1. The Coroner’s Office will assist other approved agencies and entities by providing materials, reports and statistics as requested. Examples of approved agencies and entities include:

   1. Consumer Products Review
   2. Child Crib Consumer Board
   3. Contra Costa Prescription Drug Abuse Prevention Coalition
   4. Cal-OSHA
I. POLICY

A. Guided tours of the Coroner’s Office and autopsy viewing may be authorized by the Coroner’s Division Commander or Assistant Division Commander for educational purposes.

II. DEFINITIONS

1. Tour: A guided tour of the Coroner’s Office and Morgue Facility.

2. Autopsy Viewing: Observing an autopsy performed by a forensic pathologist.

III. PROCEDURE

A. TOURS

1. The Coroner’s Division Commander or Assistant Division Commander will approve and schedule all tours. A master schedule of tours and classes is located in the Assistant Division Commander’s office.

2. Requests for tours and or autopsy viewing are preferably submitted at least one week prior to the requested tour and or viewing date.
3. The Coroner’s Assistant Division Commander will advise the person requesting an autopsy viewing of the $10.00 per participant fee collected prior to the viewing to recover the cost of Personal Protective Equipment required to be worn in the Autopsy Examination Room. There is no fee for law enforcement personnel.

4. The request will list all persons desiring the tour, designate a contact person, provide a phone number, and describe the reason for the tour.

5. The contact person will be advised of the approval or denial of the request.

6. The Assistant Division Commander will assign a Coroner’s Office staff member to conduct the tour. This information is to be noted on the original request.

B. Qualifications to Tour or View Autopsy

1. All persons viewing an autopsy must be 18 years of age. A person under 18 years of age may tour the facility but will not have access to the area of the facility where bodies are stored, nor may they view bodies.

   **Note:** The exception to this policy applies to students participating in the “Every 15 Minutes” program. These students may film their program in the body storage area, however they may not be allowed into the cooler or to view a body.

2. All tours must be of an educational nature. Guests touring the facility must be registered into a class, trade school, or employed in the medical or public safety field.

3. Cameras and recording devices are not allowed to be used during a tour or a viewing in the Central Morgue.

4. All tour guests must sign a confidentiality agreement.

5. Family members of currently housed decedents are not allowed to participate in a tour or view an autopsy.

C. Presenting Tour or Viewing Autopsy

1. The person arranging the tour will report to the front counter. This person will insure all participants sign an Autopsy Viewing Release Form which includes the Confidentiality Agreement. (This requirement applies to law enforcement personnel as well)
2. Persons viewing autopsies are advised not to leave their purses and personal belongings in their vehicles.

3. The fees for autopsy viewing will be paid prior to the viewing. The person arranging the class is exempt from the fee if they do not view an autopsy.

4. Only Coroner Division personnel will conduct the tour of the facility. The forensic pathologist will conduct training as requested.

5. The person arranging the tour will remain on the property throughout the tour or the autopsy viewing.

D. Cancellation of Autopsy Viewing

1. Tours and autopsy viewing may be cancelled due to staffing and caseload constraints.
I. POLICY

A. The Coroner’s Office will make meeting rooms, equipment and vehicles available for use by other Office of the Sheriff personnel.

II. PROCEDURE

A. MEETING ROOMS

1. The briefing area behind the investigator bay and the small conference room may be used to hold meetings by other department personnel with the approval of the Coroner’s Division Commander or Assistant Division Commander.

2. Any reservations of these meeting areas shall be communicated to all members of the Coroner’s Division.

B. EQUIPMENT

1. Coroner’s Division equipment available for use by other department personnel includes:

   a. Generators
   b. Portable Lighting
   c. Command Post
   d. Utility Trailer
2. The Coroner’s Division Commander or Assistant Division Commander may authorize the loan of Coroner’s Division equipment.

3. The Coroner’s Assistant Division Commander shall maintain a log of all equipment checked out to other department personnel.

4. When checking out equipment or vehicles, the supervisor shall conduct a visual check of the condition of the item.

5. When the item or vehicle is returned, the Coroner’s Assistant Division Commander shall conduct an inspection of the equipment and note any new damage or missing equipment in a memo addressed to the Division Commander.
I. POLICY

A. The Coroner’s Office is protected by a variety of security measures to include key locks, electronic access card readers and an alarm system that may be utilized when the building is unoccupied.

II. GENERAL INFORMATION

A. The Forensic Science Building is equipped with an alarm system installed to protect the contents of the building when the building is unoccupied. The alarm system is designed to allow a variety of access for each card holder and provides the identity, time and date of entry for each door accessed. The Coroner’s Assistant Division Commander is responsible for maintaining an accurate access card inventory, distributing access cards to new employees and designating the level of access for each employee.

III. EMERGENCY ACCESS

A. 

B.

D.
IV. PROCEDURE

A.  

1.  

2.  

3.  

4.  

D.  

1.  

2.  

C.  

1.  

2.  

3.  

4.
I. POLICY

A. Coroner’s Division personnel will familiarize themselves with the building smoke detection system.

II. PROCEDURE

The Forensic Science Building is protected by a fire and life safety system which automatically alerts the local fire department in the event of an activation. The fire department will contact the Coroner’s Office or Sheriff’s Dispatch to verify the alarm.

A. Building Door Key for Fire Department

B. A key to the building is located in the key lock box in Sheriff’s Dispatch.

C. Location of Smoke Alarm Systems

1. The first panel is located on the first floor wall next to the elevator doors near the Coroner’s Office front door. This panel will show the location of the alarm that the main panel must use to reset the system. The second panel is located in the utility room.

D. Fire Extinguisher Locations

1. Five fire extinguishers are located in the following areas:

   a. On the first floor at the front interior entrance of the Coroner’s Office.
b. Between the hallway doors that separate the garage from the front exterior office/entrance area near the stairwell.

c. In the rear hallway across from Room 109.

d. In the hallway to the east side entrance to the autopsy room.

e. In the garage utility room near the door.

E. Location of Smoke Detectors

1. The smoke detectors are located in the ceilings throughout the building. When a smoke detector goes into alarm, a small red light will illuminate. The following procedures will assist members of the Coroner’s Division in the event of a smoke alarm activation:

   a. Locate the utility room control panel or the panel just outside the Coroner’s Office entrance door.

   b. The area that is in alarm will be illuminated.

   c. Proceed to the indicated location and check for any signs of fire. Look for the smoke detector that has been activated and note the location.

   d. If no sign of a fire is detected, contact Sheriff’s Dispatch and cancel any fire department response.

   e. Return to the utility room and turn off the alarm by pressing the button labeled SILENCE TROUBLE SIGNAL.

   f. Press and hold the reset button for at least three seconds.

   g. Check the alarm that was activated to ensure the red light is no longer illuminated.
I. POLICY

A. The Coroner Division Commander is required to plan for and prevent the discharge of hazardous materials into the sanitary sewer system.

II. GENERAL INFORMATION

A. Formaldehyde shall be used by the pathologist or pathologist assistant only and restricted to use within the laboratory hood only.

B. Formaldehyde shall be stored in the Labconco laboratory hood. The hood sink drain shall be plugged with the issued stopper. A catch drain is installed under the hood sink to collect and store any formaldehyde overflow until it can be neutralized.

III. SPILL RESPONSE EQUIPMENT

A. Polyform-F: Used to dam and gel formaldehyde spilled, of a quantity, which could run into drains.

B. Formalex: Used for small spills of formaldehyde.

C. Mop and bucket: Used for clean up after neutralized with the above products.

The spill response equipment is located in the autopsy storage room. Neutralization products are in the cabinet marked “Hazardous Spill Material.”
IV. PROCEDURE

A. SPILL RESPONSE

1. During normal hours of operation, employees shall make regular/routine observations of the use of formaldehyde to ensure safe storage and containment practices are employed. If storage and containment is not evident to the employee, the employee shall investigate to the extent necessary to determine if a spill has occurred.

2. Upon determination that a spill has occurred, the employee shall notify the Coroner’s Assistant Division Commander or designee as soon as practical.

3. The extent of the spill shall dictate the appropriate response. The reporting employee shall choose the appropriate response.

4. The reporting employee shall use the appropriate material to neutralize the spill prior to clean up.

5. If possible, the reporting employee shall determine how the spill occurred. All findings and actions taken shall be reported to the Coroner’s Assistant Division Commander or designee.

6. The Coroner’s Assistant Division Commander or designee shall submit to the Central Contra Costa Sanitary District within five (5) days a detailed written report describing the accidental discharge and the measures taken to prevent similar future occurrences.

7. Residuals from the spill and clean up shall be disposed in the medical waste receptacles marked bio-hazard.

B. NOTIFICATION PROCEDURES

1. In the event of a prohibited discharge into the sewer, the Coroner’s Assistant Division Commander shall immediately notify the Central Contra Costa Sanitary District.

2. The notification shall include:
   a. A Coroner’s Office contact person and telephone number.
   b. The location and duration of the discharge.
   c. The composition of the substance and its dangerous properties.
   d. The concentration and volume.
   e. All immediate corrective actions taken.
C. EMPLOYEE TRAINING

1. All Coroner Division personnel will review this policy upon initial assignment and each year thereafter while assigned to the Division.
Contra Costa County
Office of the Sheriff
Custody Services Bureau
COURT SECURITY SERVICES
POLICIES AND PROCEDURES

2020
Preface

A well-developed policy and procedure manual is vital to Court Security's efficiency. The Court Security manual is designed to afford every employee a clear insight into the organization and its operations. This manual reflects the policies of the current administration while continuing to represent the needs of both management and non-management employees. It is recognized that the procedures contained within are only as effective as they are applicable and as lasting as they are flexible. Each procedure is written to establish uniformity and describe the order of steps to be followed to resolve a problem or accomplish a given task. It is the responsibility of all employees to acquaint themselves with this manual and use it as a guide in the performance of their daily assignments.

This manual supersedes all, Court Security manuals previously issued by the Office of the Sheriff Contra Costa County. It does not supersede any applicable Federal or State Laws. The manual contains policies and procedures relating to specific functions and associated responsibilities and authority.

The Department Manual, the Custody Services Bureau Manual, County ordinances and regulations, Federal and State laws, written and verbal orders issued by superiors, also governs Court Security employees.

Matthew Schuler, Assistant Sheriff

I) POLICY

A) The Court Security Unit of the Office of the Sheriff Contra Costa County is dedicated to providing the highest level of service to the Superior Courts in Contra Costa County and shall strive to make these courts among the safest and most security conscious in the State of California. References: California Government Code – 26625, 26611

B) The Court Security Unit was created to provide an elevated level of service to the Superior Courts, eliminate duplication of efforts in the areas of civil process and Court Security, and to offer a more cost-effective system in the area of Court Security.

C) Court Security Unit operations will utilize the most advanced and up-to-date methods available in performing its day-to-day tasks.

D) Court Security staff will develop and maintain an attitude of professionalism and dedication to service that is consistent with those of other court related staff.

E) Community input will be received and encouraged in the implementation and adoption of Court Security policies and procedures.

F) Court Security staff will participate in the development and implementation of the Division’s goals, objectives, policies and procedures.

G) The philosophies, goals and policies will be consistent with Contra Costa County, and more specifically, the Contra Costa County Office of the Sheriff.

H) The written or electronic document describing the Court Security Unit’s philosophy, goals and objectives will be available to Unit personnel, members of the judiciary and the general public without restriction.
I) The written document describing the Court Security Unit’s philosophy, goals and policies will be reviewed and/or updated annually.

J) California Government Code 26625.7: An employee of the Sheriff’s Office who desires to transfer into the office of Court Services shall make application through the appropriate division to the Court Security Bureau Assistant Sheriff. That employee, if approved by the Court Security Oversight Committee for transfer to the Court Security Unit, shall execute an agreement to serve in the Court Security Unit for a minimum term of three years.
I) POLICY

A) To facilitate the service to the courts and the community, the Sheriff’s Office Court Security Unit maintains facilities and offices at the various Superior Court locations throughout the County. Personnel assigned to these locations shall adhere to all policies and procedures applicable to Department members.

II) CARE AND MAINTENANCE

A) Court Security Unit members assigned to the various facilities in the county court system shall be responsible for the overall care, cleanliness and maintenance of equipment in locations under the care and control of the Sheriff’s Office. Janitorial services are provided; however, personnel assigned shall perform those daily tasks necessary to maintain a presentable appearance to the public.

III) INSPECTIONS

A) The assigned Court Security Supervisor shall ensure a Fire Life Inspections is conducted on a monthly basis. The inspection shall be documented the required form and kept on file for three years.

B) The assigned staff shall conduct daily holding cell checks and document their findings on the appropriate form noting any vandalism, malfunctioning equipment, and/or security problems. The cell logs shall be completed in INK. Any mistakes shall be lined out with the initials of the person making the correction. Cell logs will be held for three years.
IV) LOCATION OF FACILITIES

A) The Court Security Unit members shall report for duty at the appropriate assigned facility. The locations for Court Security Unit facilities are as follows:

1) Martinez Courts
   (a) Justice Wakefield Taylor Courthouse
       725 Court Street Martinez, California 94553
   (b) A.F. Bray Courthouse
       1020 Ward Street Martinez, California 94553
   (c) Peter L. Spinetta Family Law Center
       751 Pine Street Martinez, California 94553
   (d) Martinez Court Annex
       1010 Ward Street Martinez, California 94553

2) Richmond Court
   (a) Richmond Courthouse
       100-37th Street Richmond, California 94805

3) Pittsburg Court
   (a) Richard E. Arnason Justice Center
       1000 Center Drive Pittsburg, California 94565

4) Walnut Creek Court
   (a) Walnut Creek Courthouse
       640 Ygnacio Valley Road Walnut Creek, California 94511

5) Juvenile Courts
   (a) Juvenile Hall
       202 Glacier Drive Martinez, California 94553

6) Office of the Sheriff Contra Costa County
   Court Security Services Office
   (a) 815 Court Street,
       Martinez, California 94553.
I) POLICY

A) In order to provide efficient, productive service, all Court Security Services personnel shall be punctual in reporting for duty at the time and place designated by their supervisor.

II) PROCEDURE

A) All Court Security personnel will be properly attired in neat and clean uniform, shoes shined and brass polished. All required and necessary equipment shall be carried to include a safety vest per Sheriff’s Office Policy and Procedure section: 1.07.23 – Personal Protection Equipment.

B) Personnel assigned to Court Security shall report to their assigned Court Security Office location at the beginning of their shift. Failure to do so will be neglect of duty, and they will be subject to the Department Corrective Counseling procedure / Personnel Management Regulations.

C) A sergeant may wish to hold muster or roll call before assigned staff go to their respective posts or duty assignments.

D) Personnel shall check their mailbox and Microsoft Outlook e-mail account at least once per shift per CCCSO Policy section: 1.07.54 – E-Mail, Texting, Internet, and Internet Access.

E) Court Security is not manned 24 hours. Therefore, voice mail is available for staff to leave a message for absences and tardiness. Staff are reminded this does not relieve the employee of his or her responsibility from speaking to an on-duty supervisor after the office opens per Sheriff’s Office Policy and Procedure section: 1.04.63 – Sick Leave
F) When leaving a message on the answering machine, please include the following:

1) Name.
2) Assigned work location.
3) The reason for non-attendance or tardiness.
4) A location/phone number where they can be contacted.
I) POLICY

A) The Office of the Sheriff has an obligation to provide efficient, productive, and professional service to the public. How employees conduct business and utilize their on-duty time is a major factor in meeting this obligation. Therefore, guidelines are established regarding on-duty time and conduct. Sheriff’s Office Policy and Procedure Section: 1.05.41 – On-Duty Time.

II) PROCEDURE

A) The following working conditions will be adhered to by all members of Court Security Services:

1) Normal work hours for Court Security Services are Monday thru Friday 0800 to 1700 hours, excluding some holidays. Hours may be adjusted to accommodate court business. Any modification of work hours is to be reported to the Court Security sergeant before the modification. All modifications of work hours and work conditions shall be reported to the Court Security sergeant.

2) In the event, a court will not be in session for the day, or during the morning or afternoon sessions, the bailiff will notify the Court Security sergeant or Operations Deputy as soon as this information is learned.

3) In the event, a bailiff needs to leave the courthouse complex for any reason during working hours, except for lunch period, the Court Security sergeant will be notified upon leaving and returning.

4) Bailiffs are required to remain in attendance of their respective courtrooms at all times when court is in session. Bailiffs shall not wander the halls, or visit with other personnel or civilians when court is in session. When court is in recess, and the bailiff needs to leave his/her assigned court, the bailiff shall notify the court of his/her absence in case his/her presence is required.
5) Court Security personnel will refrain from reading any periodicals, books, newspapers or other literature when court is in session, or when in general view of the public. All books, periodicals, or newspapers, as well as, cell phone and personal electronics shall be kept for off-duty use and will be stored away and out of public view.
I) POLICY

A) The purpose of a written report is to have a permanent record of an incident and the persons involved. The most efficient way to capture and have readily available the information contained in a report is to document incidents on a standard form. This is best accomplished by using the Sheriff’s Office Automated Report Writing System (ARS).

II) PROCEDURE

A) To properly track and recover information contained in Court Security Services reports pertaining to incidents occurring at Court Facilities the below procedures shall be followed:

1) When calling Sheriff’s Dispatch to obtain a report number, you will be asked for the location of occurrence or where the incident occurred. Give the exact location, as listed below, then ask them to confirm that the location indicates CRT area group or city code.

2) Location of Occurrence(s)

   (a) Bray
   (b) Classic
   (c) Family Law Center
   (d) D.C.S.S.
   (e) Juvenile Hall
   (f) Delta Court
   (g) Richmond Court
   (h) Walnut Creek Court
3) On the INCIDENT Tab, “Beat,” will always be “CT.”

4) On the INCIDENT Tab, “City Code,” will always be “CRT.”

5) On the INCIDENT tab the Disposition shall be one of the following:
   (a) Cleared
       • Misdemeanors which do not require any more investigation or follow-up.
       • Case is ready for Misdemeanor Complaints to forward to the DA for prosecution.
   (b) Continued
       • Misdemeanors requiring additional investigation or follow up.
       • Suspect is usually known.
   (c) Suspended
       • Misdemeanors with no more investigative leads.
       • Suspect is unknown.
   (d) Referred
       • All felonies
       • Found Property
       • Missing Persons

6) For all “Judicial Requests” use detail code type 1770

B) The Sheriff has accepted primary law enforcement jurisdiction over the courts and will respond to handle service requests that originate inside the courtroom and their immediate surroundings.

C) Once the situation is stable, a supervisor will determine if the matter shall be referred to the agency having jurisdiction or investigated by Sheriff’s personnel.

D) Sheriff’s personnel may initially handle service requests outside the courthouses.
I) POLICY

A) Employees in permanent positions are entitled to vacations with pay. Vacation accrual and use of vacation time is established for the mutual benefit of the employee and the Office of the Sheriff.

Sheriff’s Office Policy and Procedure Section: 1.04.62 – Vacation Accrual and Use.

II) PROCEDURE

A) The Court Security Unit annual vacation sign-up will be posted for all employees to select annual vacations based on their allotted accruals and seniority. Vacation accruals are addressed in Sheriff’s Office Policy and Procedure section: 1.04.62 – Vacation Accrual and Use, and the M.O.U. The order in which employees bid for vacation (seniority) is addressed in Sheriff’s Office Policy section: 1.04.71-Seniority (Anniversary dates and Abridged Service), and the M.O.U.

B) A list of eligible employees, the available weeks of vacation, and a directive with information on how to sign up is posted throughout the unit before the New Year.

C) Vacation is selected in week blocks. Each week starts on Monday and ends on Sunday. There are fifty-two* week blocks to select from.

D) Four deputies and one ranger can sign up for the same week

E) There is no “Same as judge” vacation option/preference.

F) Employees shall sign-up in order of seniority and should list their choices in order of preference.

G) Employees should clearly indicate if they are requesting consecutive weeks.
H) Junior employees signing up in advance of senior employees may wish to make several alternative selections in case their first choice is not granted.

I) Employees not signing up in the time allotted shall forfeit his/her opportunity to sign-up and may submit a request in writing at a later date after the completion and posting of the approved vacation list.

J) Reminder, when an employee selects vacation, he/she must have a sufficient amount of vacation accruals acquired at the time the vacation is to be used. (This information is located on an employee’s paycheck stub). Employees requesting to use other accruals as vacation time must have pre-approval from a supervisor.

K) Employees signing up for annual vacation shall maintain the proper amount of vacation accruals. Failure to maintain proper accruals could result in the employee forfeiting his/her selected week.

L) All employees are responsible for monitoring their vacation accruals. The M.O.U. states the department agrees to schedule vacations to prevent loss of accrued and accruing vacation provided the individual employee gives 60 calendar days advanced written notice to the Bureau Assistant Sheriff that he/she is approaching maximum accrual.

*Note: Some annual vacation sign-ups will have fifty-three weeks.
I) POLICY

A) It is the policy of the Court Security Unit to assign personnel to the court facilities based on seniority, personal preferences, Unit need, sound management and the ability for the employee to perform the job.

II) DEFINITIONS

A) Seniority: Determined by the amount of time one has with the Office of the Sheriff. If identical times exist between two or more employees, the following is the order in which the senior person will be determined.

1) Department Seniority
2) Academy Ranking

III) PROCEDURE

A) The Court Security Unit’s shift sign-up is posted at all affected work sites approximately one month before shift change.

B) Eligible employees are required to sign up within the specified time or forfeit their seniority ranking.

C) Deputies assigned, as courtroom bailiffs will not be affected by shift sign-up unless they have completed their commitment to their assigned court and are assigned to the security pool before the sign-up closing date.

**ISSUE DATE:** 12/01/2014  
**REVISION DATE:** 12/10/2014  
**REVIEW DATE:** 12-18-2019

### I) POLICY

A) The Court Security closed circuit video system was installed to allow Sheriff’s Office personnel the ability to monitor the areas in and around the courthouses in Martinez. The video system is designed to enhance the Sheriff’s Office security presence and to enable a quicker response to emergency situations.

### II) DEFINITIONS

A) Video System – The closed-circuit video system installed in and around the Martinez courthouses.

B) System Administrator – A Sheriff’s Office Supervisor, Manager or the Court Facilities Manager with administrative access to the system.

C) Level 1 User – A Sheriff’s Office employee that can access the camera system, but cannot change camera settings, add or remove users, or “burn” video.

D) Burn Video – Transfer a video file from the system hard drive to an external storage device such as a USB thumb drive, CD, or DVD.

### III) PROCEDURE

A) The purpose of the video system is to accurately document the events and actions of disruptive inmates, medical emergencies, and other critical incidents to verify the accuracy of crime reports, jail incident reports, and collection of evidence. Recordings also enhance the ability to review procedures for employee evaluation and training.
B) The video recordings will not be used as a tool by supervisors or management to “remotely supervise” an employee.

C) The video system will be monitored by Sheriff's Office personnel only. The public or people not employed by the Sheriff's Office will not be allowed access to the system.

D) If an outside agency requests a copy of a video from the court security video system, they must submit a written request to the Presiding Judge (or designee) to authorize the release.

IV) SUPERVISOR RESPONSIBILITIES (System Administrator)

A) Supervisors may review video recordings at any time for approved purposes, such as training, reviewing a Deputy’s performance, resolving citizen complaints, evidence collection, or during any necessary administrative review. If, after reviewing a recording, a supervisor has developed cause for further inquiry (officer safety, use of proper procedures, or other administrative or operational issues) the recording may be used for such authorized inquiries or investigations.

B) In the event, a video needs to be “burned” to a USB thumb drive or a CD/DVD it must be done from the terminal in the Court Security office.

C) These recordings shall be made for evidentiary, evaluation, or training purposes only. They will not be made available to the public or media unless authorized for release by the Custody Bureau Assistant Sheriff or the Court Security Services Manager.

D) Only a supervisor or manager has the system authorization to burn video to a USB drive or CD/DVD.

V) DEPUTIES AND RANGER RESPONSIBILITIES (Level 1 User)

A) Deputies and Rangers will use this camera system only in a way that conforms to Sheriff's Office policies and procedures.

B) Deputies and Rangers at a security post will only display the exterior and corridor cameras. They will not view the interior courtroom cameras at the posts unless directed by a supervisor, or in an emergency.

C) If suspicious activity is observed by a deputy or ranger, they will notify the security desk and a supervisor immediately.

D) At the end of each shift, the closing deputy or ranger is responsible for logging off the workstation and turning off the monitors.
VI) SECURITY DESK DEPUTY RESPONSIBILITIES

A) The desk deputy is a specialty position and is selected by the court security supervisors and Court Services Manager. This deputy receives a higher level of training in the operation of the video system and is authorized to monitor all of the cameras in the system and review video as needed.

1. The Desk Deputy will log on the workstation using the preset Windows login username and password. They will then log on to Prism using their username and password.

2. The Desk Deputy will monitor all of the cameras during their shift. They will be vigilant for suspicious or criminal activity, medical emergencies, disruptive inmate or citizen behavior, or any other activities or situations that may require the attention of Court Services personnel.

3. If an incident occurs, the Desk Deputy will note the time of occurrence and camera location so the video of the incident may be reviewed by the Court Services Manager, supervisor or Court Facilities Manager.

4. During the court's lunch recess, the security desk will not monitor the courtroom cameras.
I) POLICY

A) The Court Security Unit realizes that special considerations are to be taken into account by all personnel when dealing with such things as prisoners in court, the handling and care of firearms and other weapons offered as exhibits in court and other special security measures.

II) PROCEDURE

A) Bailiffs and Court Security personnel shall NEVER leave any prisoner alone in the courtroom at any time. If circumstances dictate that the bailiff / deputy must leave the courtroom for any reason, the prisoner must be secured in a court holding cell or another deputy must be summoned to relieve the bailiff.

C) The bailiff may allow the prisoner to sit with his / her attorney in the courtroom for interviews if ordered by the judge.

When court is in session, the bailiff shall allow the unrestrained prisoner to sit next to his / her attorney during the proceedings.

Multiple defendants (one of which is in-custody) in a courtroom shall not be allowed to sit next to each other. Their respective attorney’s should be placed in a position to separate the defendants.
F) Any disciplinary problems with prisoners will be handled pursuant to C.S.B. Policy 2.16.03 & 2.16.05 and/or California statute violations pursuant to the California Penal Code.

G) Prisoners / defendants in jury trial will be allowed to dress in “street clothes” (non jail clothing). Prisoners who do not have trial clothing shall make arrangements through their attorney, family, friends, or Friends Outside, etc. Occasionally there are times when the clothing is brought to the courthouse, due to unforeseen problems. This practice is highly discouraged and conflicts with the Custody Services Bureau policy of one for one clothing exchange (CSB 2.11.22).

1) If the clothing is brought to the courthouse, the person delivering the clothing will be advised to take the clothing to the jail for exchange of the prisoners booked clothing.

2) If sending the person to the jail is not an option the deputy will notify a supervisor to review the situation. The guidelines of C.S.B. policy 2.11.22 shall be considered when resolving the situation.

I) If a prisoner’s behavior demonstrates the need for restraints, other than for security reasons, they are transported back to the M.D.F. Special restraints, as defined in C.S.B. Policy 2.08.22, will be used on a case-by-case basis with approval of a supervisor (Special restraints do not include leg shackles, handcuffs or waist chain).
I) POLICY

A) The handling of firearms will be in accordance with established safety practices. Due to the nature of court proceedings some practices and rules may not apply, in such situations common sense and good judgment must prevail.

II) PROCEDURE

A) All firearms produced in court as exhibits of evidence shall be inspected and confirmed to be unloaded before being submitted to the court. All firearms shall be secured in such a fashion as to render them incapable of being fired. Special trigger locks will be available to achieve this.

B) Firearms and ammunition shall not be placed together or allowed to come into close proximity of one another.

C) Bailiffs shall assist the court in the handling of weapons for inspection by the jury and attorneys. Bailiffs will closely monitor all weapons offered as evidence and will assure they are not in a position accessible to the defendant(s), victim(s) or witness(s).

D) Personnel should familiarize themselves with the various types of weapons that could be offered as evidence and have a basic knowledge of their nomenclature. Deputies confronted with a weapon of unknown nomenclature shall call for assistance.

E) AT NO TIME WILL FIREARMS BE LEFT ALONE WITH DELIBERATING JURORS.
I) POLICY

A) The Court Security Unit has established a set of guidelines for the restraint of prisoners. Restraints are often necessary for the safety of deputies, court staff, and the general public. Restraints are also necessary at times to prevent the escape of prisoners. The court has the ultimate deciding authority on the use of such devices.

II) PROCEDURE

A) Prisoners shall not wear restraints in the courtroom. (Exceptions are outlined in this policy).

B) When restraining any prisoner for transporting, the handcuffs will be secured behind the prisoners back and doubled locked. EXCEPTION: When the use of a waist chain sufficiently immobilized the prisoner’s hands, the handcuffs may be applied in the front.

C) If a prisoner’s behavior demonstrates the need for restraints, other than for security reasons, they are transported back to the MDF. Special restraints, as defined in C.S.B. Policy 2.08.22, will be used on a case-by-case basis with the approval of a supervisor (Special restraints do not include leg shackles, handcuffs, or waist chains).

D) When a prisoner is to appear in court whose status necessitates the use of restraints, for any reason, the bailiff shall immediately notify his/her supervisor. The Bailiff or Sheriff’s Office representative shall articulate the reason for the use of the restraints to the Judge before the proceedings (People v. Duran, 1976 16 Cal. 3rd 282, United States v. Gomez-Sanchez). The court relies on a showing of “manifest need” and “compelling governmental interest” for the use of restraints inside the courtroom. This can include but is not limited to:
1) Prior escapes

2) Violence or threats of violence towards staff, other prisoners, or victims or witnesses

3) Failure to comply with the requests or instructions of transporting deputies

4) Plans to disrupt proceedings by non-violent means.

E) Upon the approval of the Court, the use of a security chair may be utilized, when justified, on high-risk hearings or trials to prevent the use of visible restraint devices during court proceedings and to maintain control of the prisoner.

F) Pregnant inmates will not be restrained while being transported, pursuant to CSB Policy and Procedure Section: 2.08.29 – Inmate Transports.
I) POLICY

A) To provide Court Security services effectively, personnel will be given direction and authority for the control and issuance of facility keys. Storage, control, and accounting of facility keys shall be strictly observed by all personnel to preserve the integrity of all Court Security facilities.

II) DEFINITIONS

A) Master Key Lock-Box: Contains keys to the facility.
B) Operational Facility Keys: Keys used in the normal day-to-day operation of a courtroom and/or workstation.
C) Controlled Facility Keys: Keys used for specific areas, requiring a higher level of accountability and approval for use by a Shift Supervisor.
D) Electronic Key Card / FOB: Key cards / FOB’s used to gain access to secure areas by authorized personnel only, i.e. clerk’s office, Judge’s Chambers.

III) PROCEDURE

A) Key Control

1) No facility keys shall be issued to persons not assigned to the Court Security Unit. Exceptions would be to those authorized to carry them while working overtime, or any Administrative or Maintenance personnel.
2) Operational Keys and Electronic Key Cards / FOB’s issued to personnel, must be returned to a Court Security Unit Supervisor upon reassignment or termination from the Court Security Unit.

3) The Shift Supervisor and/or the Lead Security Deputy shall keep all Master Key Lock-Boxes closed, locked, and controlled.

4) Controlled Facility Keys shall only be used during emergencies or training exercises, and shall be accounted for by the Shift Supervisor.

5) No inmate, under any circumstance, shall be permitted to take possession of any type of facility keys.

6) A master key sheet, listing all facility keys, will be maintained at each individual courthouse.

B) Operational Facility Keys and Electronic Key Cards/Fob’s

1) All personnel assigned to the Court Security Unit shall be issued an Electronic Key Card/FOB.

2) All personnel assigned to the Court Security Unit shall be issued one set of operational facility keys for use at their assigned work location. *Exception: All personnel assigned to the Pittsburg location will be required to check out and return operational facility keys on a daily work basis.

3) An assigned Court Security Supervisor shall complete a key sign-out form, indicating the assigned keys and Electronic Key Card/Fob issued to any assigned personnel in the Court Security Unit. The recipient must sign the key form.

C) Inventory of Keys

1) The Shift Supervisor and/or the Lead Security Deputy at each Courthouse location shall conduct a daily inventory of all Controlled Facility Keys and non-assigned Operational Facility Keys maintained for overtime use.

2) Any unresolved discrepancy regarding the accountability of inventoried keys, shall be reported to the Shift Supervisor and/or the Facility Commander.

3) During the annual Court Security Unit’s evaluation period, assigned Court Security Supervisors will be responsible for completing a key inspection of personnel they supervise.
D) Missing or Lost Keys

1) All Court Security Personnel to whom any type of facility keys have been issued, shall be responsible for such keys. If any employee loses a key or discovers a key to be missing, the loss shall be reported immediately to a Shift Supervisor.

2) If it is determined that the loss of a key occurred outside of any facility, the employee shall submit a written memorandum to the Facility Commander with as much detail as possible.

3) If it is determined that the loss of a key occurred inside any of the facilities, a search of the facility will occur and the employee will submit a written memorandum to the Facility Commander with as much detail as possible.

E) Missing or Lost Electronic Key Cards/Fob’s

1) All Court Security Personnel, to whom an Electronic Key Card/FOB has been issued, shall be responsible for such. If any employee loses an Electronic Key Card/FOB or discovers it to be missing, the loss shall be reported immediately to a Shift Supervisor.

2) Upon receiving notification of a lost/missing Electronic Key Card/FOB, the Shift Supervisor will notify Court Facilities at [redacted] for deactivation of the Electronic Key Card/FOB.

F) Broken Keys

1) Broken keys shall be immediately reported to and turned in to the Shift Supervisor for issuance of a duplicate key.

G) Duplication of Keys

1) Unauthorized possession, alteration, marking, manufacturing, or impression making of keys is prohibited.

2) Duplication of keys for inventory and issuance purposes only, shall be controlled by Court Maintenance.
I) POLICY

A) Administrative and statutory segregation is employed as a protective measure to ensure the safety of staff, prisoners, and to maintain security in the division. Segregation of prisoners will not be based on race, color, creed, or national origin.

II) PROCEDURE

A) Law requires minimum segregation of prisoners. True segregation means not only from physical contact but also from visual and audible contact.

B) Persons held as material witnesses or under an order imposing punishment for contempt shall be kept separate from persons charged with a crime, unless the person held in contempt is also pending criminal charges.

C) Persons in-custody for civil warrants shall be confined separately and distinctly from other prisoners. All attempts shall be made to keep civil prisoners from "sight and sound" of adult prisoners.

D) Males and females shall be confined separately. (While attending court female and male prisoners will be seated in such a way that does not allow for either party to make physical contact).

E) Juveniles shall NOT be confined with adults (W&I 208). All attempts shall be made to keep juveniles out of sight and sound of adult prisoners. Juveniles are considered those persons under the age of eighteen (18) years.
I) POLICY

A) Administrative Segregation (AD-SEG) is employed as a protective measure to ensure the safety of staff, other prisoners, and to maintain security within the facilities. It shall be the policy of the Court Security Unit to supervise prisoners placed in administrative segregation.

II) PROCEDURE

A) Administrative segregation assists in jail management for the care and control of the unusual prisoner and shall be provided as follows:

B) Complete segregation shall be provided for those prisoners who may cause harm to other prisoners or who may be harmed by other prisoners.

C) Mentally ill persons likely to cause injury to themselves or others and requiring immediate care, treatment or restraint shall be segregated (according to W&I 5150) until transportation to the jail or mental health facility. Such persons shall be transported as soon as possible.

D) Segregation of persons shall not be based on race, creed, color or national origin.

E) Any prisoner known to have any communicable disease shall be segregated from other prisoners. These diseases include but are not limited to, tuberculosis, hepatitis, or any other special medical problem identified.

F) For complete information on segregated prisoners, Court Security personnel shall review the C.S.B. Policy and Procedure Manual starting with chapter 2.09.01.
I) POLICY

A) Court Security personnel will be responsible for the security and monitoring of prisoners brought into the Court’s Facilities. The coordination between the various assignments of Court Security personnel, as well as, the court staff is essential to ensure security is maintained.

II) PROCEDURE

A) Courthouse holding cells will be used as a temporary place for in-custody defendants awaiting their court hearing or trial.

1) At the beginning of the day and before using the holding cells the assigned floor deputy shall inspect the cells noting any vandalism, malfunctioning equipment, and security problems.

2) These log entries will be in INK documented on the cell-log.

3) All repair requests will be documented on a work order located in the Court Security sergeant’s office.

B) When the cells are in use, the assigned floor deputy (or department bailiff) will be responsible for checking holding cells on their assigned floor at least twice an hour (15 minutes for juveniles and some prisoners classified with mental health issues) to ensure the well-being of all prisoners located in the holding cell area.

1) The floor deputy will document the time and location of each security check in INK on the cell log provided for that purpose.

2) At the end of the shift, completed logs will be returned to the Security Office for filing.
C) Securing Weapons
1) When utilizing the holding cells, the deputy shall first secure his or her service weapon, ammunition, etc. in the gun lockers provided.

D) Applying & Removing Restraints
1) On the second and third floors of the Bray courthouse, the security door to the holding cell area shall be secured before removing or applying restraints to any prisoner.
2) It is optional whether the deputy will apply or remove restraints through the porthole of the holding cell door.

E) Holding-Cell Occupancy
1) The number of prisoners allowed in any one cell is based on certain factors, including but not limited to, the size of the cell, the amount of seating, and the amenities within the cell, etc.
2) The holding cells are designed to hold a maximum of compatible prisoners at one time.
3) The holding cells in the staging area of the A.F Bray courthouse are designed to hold a combined maximum of compatible prisoners at one time.

F) Housing Juveniles
1) Any court holding cell can be designated as a temporary holding place for juvenile defendants awaiting a court hearing or trial.
2) A Juvenile shall not be housed in the same cell area with an adult.
3) The court bailiff or floor deputy shall be responsible for checking any holding cell occupied by a juvenile.
4) The cell will be checked at least once every fifteen (15) minutes at irregular intervals to ensure the well-being of the juvenile.
5) The deputy will document the time and location of each security check on the log provided.
6) In most cases, a deputy will not know a juvenile’s housing status at Juvenile Hall. Therefore, deputies shall secure juveniles in individual holding cells.

III) Prison Rape Elimination Act (PREA)
A) The Prison Rape Elimination Act (PREA) was signed into law in 2003 and became effective in December 2012.
B) Court Security Services is committed to providing a safe, humane, and secure
environment free from sexual misconduct and shall maintain a zero tolerance towards all forms of sexual abuse and/or harassment in all its jail holding facilities.

C) The Office of the Sheriff will thoroughly investigate and immediately address all allegations of sexual assault, sexual abuse, and sexual harassment of those in our custody.

D) Reporting of Sexual Abuse/Harassment

1) Inmate and staff shall be permitted to report any sexual assault or sexual harassment to any rank they feel comfortable reporting to.

   (a) There is no time limit for filing a “Good Faith” sexual harassment or sexual abuse report.

   (b) Inmates making a PREA report deemed to be made in “Bad Faith” shall be subject to disciplinary action.

   (c) No disciplinary action can be taken against an inmate if a report of sexual harassment or abuse has been deemed to have been made in “Good Faith,” even if the allegation is determined to be unfounded.

2) Any staff member who has cause to believe an inmate has been or may be subjected to an act or threat of sexual abuse or harassment, is required to immediately notify a Court Security supervisor or manager.

3) All staff must accept any report of sexual abuse or sexual harassment whether it is in verbal form or writing and must take the appropriate action.

E) Refer to CSB Policy and Procedure section: 2.08.49 – Prison Rape Elimination Act (PREA) for definitions, report follow up procedures, and investigation requirements.
I) POLICY

A) Every effort will be made by Court Security personnel to recognize the signs and symptoms of suicidal behavior and to deter or address any potential problems.

II) PROCEDURE

A) Any prisoner may be a suicide threat. Deputies must be aware of this and stay alert when making facility checks.

B) At no time, shall a prisoner, classified as SUI, be allowed to retain any personal items, to include but not limited to, belts, ties, and pencils, which may be used to take his/her own life. These items shall be taken from the prisoner before putting them in the holding cells.

C) Special attention shall be given to any prisoner who is classified (SUI) as suicidal. Such prisoners shall be checked every fifteen (15) minutes, and the deputy shall document this in INK on the cell log provided for that purpose.

D) If a prisoner’s behavior demonstrates the need for restraints, other than for security reasons, they are transported back to the M.D.F. Special restraints, as defined in C.S.B. Policy 2.08.22, will be used on a case-by-case basis with approval of a supervisor (Special restraints do not include leg shackles, handcuffs or waist chain).
I) PROCEDURE

A) If a person becomes ill or injured while in the court facilities, the following procedure will be followed:

1) Minor injuries requiring first aid (i.e., a small cut on the finger requiring a band-aid) will be handled in the facility.

2) If, in the opinion of the deputy, any prisoner who is sufficiently ill or injured may be taken for EMERGENCY treatment or examination. The deputy shall notify the supervisor and may accompany the ambulance used for transportation. The deputy will maintain control of the prisoner until the prisoner is discharged or another deputy relieves him/her. If the prisoner is to be admitted to the hospital, the MDF Custody Sergeant shall be notified and will make arrangements to take over control of the prisoner.

3) All injuries or medical emergencies shall be reported to a Court Security supervisor. The deputy will document the incident using a Sheriff’s Office crime report, incident report, or both.

B) First aid kits shall be readily available. A supervisor shall ensure the kits are maintained and re-supplied when requested. It is the responsibility of each deputy/ranger, assigned to a work location, to maintain the proper inventory in the first aid kits.

C) Inmates who are authorized to self-medicate per C.S.B. manual policy 2.13.08 will be allowed to possess their medication when in the holding cells.
I) POLICY

A) Investigation of police involved fatal or serious injury incidents are often complex and demanding. Such cases often attract considerable public and news media interest. The consequences of the incident can be profound and affect many people. Because of these factors, incidents of this nature shall be fully and fairly investigated. Proper disposition of such cases will be based on all the legally readily available evidence. (Sheriff’s Office Policy and Procedure section: 1.06.62 – Police Involved Fatal or Serious Injury Incidents Policy)

II) PROCEDURE

A) When a serious death or injury occurs in any of the court facilities the Court Security personnel will follow the Sheriff’s Office Officer Involved Protocol procedure listed above in the related orders. Additionally, per the Board of Corrections, procedures B, C, and D (below) must be completed.

B) Any death of a prisoner in the Sheriff’s Office custody will cause the Contra Costa County “Officer Involved Fatal Incident” protocol to be invoked.

C) Should a prisoner die while in Sheriff’s Office custody, a “Death In-Custody Reporting” form will be submitted along with a written report of all the facts in our possession concerning the death to the Attorney General within ten (10) calendar days.

1) Mail to:  
   Department of Justice  
   Law Enforcement Information Center  
   Attn: Death In-Custody Program  
   4949 Broadway Sacramento CA 95820  
   Phone: 916-227-3535
D) Should a juvenile die while in Sheriff’s Office custody the following will occur:

1) A copy of the report submitted to the Attorney General shall be forwarded to the Board of Corrections within ten (10) calendar days.

2) The review team concerning a juvenile death within the court facilities shall include:

   (a) The Facility Administrator and/or the Facility Manager
   (b) The Health Administrator
   (c) The responsible physician and other health care and supervision staff who are relevant to the incident.
I) POLICY

A) A prompt response to acute medical problems will be provided for non-urgent, urgent and emergency situations by means of the appropriate notification system. Court Security personnel will work with the medical staff to provide the best medical care.

II) PROCEDURE

A) Court Link

1) Central Control will dispatch medical personnel for ALL medical emergencies occurring in the Court Link.

2) Central Control will dispatch Court Security personnel and Detention personnel for all Code-2 and 11-99 requests occurring in the Court Link.

B) Staging A.F. Bray

1) Court Security will dispatch fire and ambulance for all medical emergencies occurring in the staging area.

2) Court Security will dispatch Court Security personnel for all Code-2 and 11-99 requests occurring in the staging area.
I) POLICY

A) Court Security Services shall assume reporting responsibilities for all escapes of persons in physical custody of Court Security employees.

II) PROCEDURE

A) The deputy from whom the escape occurred is responsible for notifying the appropriate personnel and initiating the original escape report. Escape is a serious crime and should be investigated as such. The report shall include certified copies of documents justifying custodial status.

B) If the escape occurs from a deputy not assigned to Court Security, the Court Security sergeant will assign a unit deputy to assist in the preparation of the report.

III) MARTINEZ COURTS

A) The deputy from whom the escape occurred is responsible for broadcasting the escape over the Court Security radio channel advising; description, direction of travel, pending criminal charges, etc., to the Court Security sergeant, all Court Security deputies, and the Operations Deputy. If present, the Court Security sergeant will coordinate with the Operations Deputy to broadcast the logistics of a perimeter and any additional resources needed.

B) The Court Security sergeant is responsible for the notification of the following:

1) Local agency dispatch
2) Unit Assistant Sheriff
3) Under Sheriff via chain of command
4) Sheriff via “Unusual Incident Report”
IV) WALNUT CREEK, RICHMOND, AND PITTSBURG COURTS

A) If the escape occurs while the Court Security sergeant is present, the procedure will be as in the above procedure.

B) If the escape occurs while the Court Security sergeant is not present, the security deputy will be responsible for notifying the following:

1) Local agency dispatch

2) Court Security supervisor

3) The Court Security sergeant will immediately respond to the location to assume the duties listed herein.

4) The security deputy will assume the responsibilities of the supervisor until the supervisor arrives at the court facility.
I) POLICY

A) Court Security Services will use all resources available to aid in the capture of escaped prisoners from its facilities. Prisoners who have a propensity for violence who attempt to escape or successfully escape are individuals who could pose a continuing threat to the public at large. In the event, an escape occurs Court Security personnel will work toward containment of the incident.

II) PROCEDURE

A) Pursuing Deputies

2) All deputies available to pursue the escapee shall report their status to the Court Security Supervisor and Operations Deputy.

B) The Court Security supervisor may assign deputies to the pursuit or to the area of escape to assist in evidence collection, securing the scene, controlling prisoners (if applicable).

C) Duration of Pursuit

1) Pursuing deputies shall terminate pursuit under the following circumstance

   (a) When the suspect(s) location is unknown after completing a thorough search of the area.

   (b) When directed by a supervisor.
D) Modes of Transportation

1) Limited to the following:
   
   (a) Foot pursuit

   (b) Official emergency vehicles.

E) Radio Frequencies

F) Violence Potential

1) When an escape occurs, the concerned facility supervisor will contact the Investigation Division Assistant Sheriff, Unit Assistant Sheriff or Officer of the Day if the following applies:

   (a) A deputy is injured

   (b) The escapee has displayed propensities toward committing violent crimes.

   (c) There is a need for immediate follow-up investigation.
I) PROCEDURE

A) The concerned Assistant Sheriff shall initiate an investigation of the escape incident to determine if the escape indicates a deficiency in one or more of the following areas:

1) Transportation/custodial procedures.

2) Deputy mental/physical error.

3) Structural weaknesses/deficiencies

B) The concerned Assistant Sheriff shall obtain and review all reports relative to the incident and, if necessary interview all deputies and witnesses. Upon completion, the Assistant Sheriff shall forward the results of his/her investigation to the Undersheriff with recommended policy, procedural or structural changes, or corrective personnel action(s) if necessary.

C) Escapes or attempts are most likely to occur:

1) While in transit between correctional facility and court.

2) When moving through an area open to the public, lobbies, hallways, parking lots, etc.

3) In the courtroom, particularly if a prisoner is dressed in civilian clothes or unrestrained.
4) In any temporary holding area: this includes but not limited to, jury rooms, designated holding facilities that are not jails.

5) Persons ordered into custody by the court pose a high risk of violence or escape.

D) Escapes result from one of two conditions, and either type may include the taking of hostages. They are:

1) Opportunity: Prisoners that are not properly restrained, moved and monitored may escape

2) Planned: Prisoners have the time and may have the motivation to plan their escape. There is the probability of collaboration in this type of escape attempt. All escapes are potentially violent and particularly when an accomplice is involved
I)  POLICY

A)  Court Security personnel will ensure that high-risk trials are planned, staffed and carried out to protect the safety of the judge, public, court officers and the defendant.

II)  PROCEDURE

A)  A high-risk trial is one that provokes a strong emotional response from the general public or interested groups. Such a response may threaten the safety of the participants or threaten the integrity of the process.

B)  A high-risk trial requires careful and detailed planning.

C)  A special security committee will normally be composed of the trial judge, Court Security Lieutenant, and Judicial Protection Unit (JPU) Sergeant. The committee will convene before the trial to discuss and plan the implementation of security procedures. Plans will include the amount of security, and any special precautions to be taken for the judge, defendant or jury, and the use of the JPU.

D)  Court orders may be necessary to formalize some or all of the security procedures implemented.

E)  The Court Security Lieutenant shall have overall responsibility for high-risk trial operations. As a member of the security committee, he/she will help design the operational plan and coordinate the work of all involved entities.

F)  The Court Security Sergeant(s) will serve as second in command and day-to-day operations supervisor.
G) Intelligence and Communication

1) As the potential high-risk trial approaches, the Court Security Lieutenant and Sergeant will gather and analyze intelligence data that might affect security.

2) Intelligence results will be reported to the security committee to aid in decisions of security measures.
I) POLICY

A) It is the responsibility of the Sheriff's Office, via Court Security Services, to provide for the safety of all participants in the judicial system within Contra Costa County.

1) It is recognized that this responsibility may, under unusual circumstances, extend beyond the normal security provided on a daily basis.

B) Court Security Services will maintain a Judicial Protection Unit (JPU) to provide the additional security under these unusual circumstances.

C) The Judicial Protection Unit will be used to provide additional security, as required, for any threatened judicial officer.

D) Judicial Protection Unit Coordinator

1) The JPU coordinator will be the Court Security Assistant Sheriff.
2) The JPU coordinator will provide administrative support and will obtain command level authorization for the activation of the unit.
3) The coordinator will share responsibility for threat analysis and tactical implementation with the JPU Team Leader.
E) Team Leader

1) The JPU Team Leader will be a Sheriff’s Sergeant assigned to the Court Security Unit.

2) The Team Leader will provide direct supervision to team members when the unit is activated.

3) The team leader will share responsibility for the threat analysis and tactical implementation with the JPU coordinator.

4) In the unforeseen absence of the JPU coordinator, the Team Leader will inform the coordinator or his/her supervisor throughout the security detail.

F) Team Members

1) Court Security Services shall recruit and maintain a specialized unit of qualified individuals to be designated as the Judicial Protection Unit.

2) The JPU members will be selected from among those deputies assigned to Court Security Services.

3) Deputies selected for the unit shall be highly motivated, receive specialized training to develop their expertise in the area of executive protection and related subjects, be expected to work well as a team, and have good writing skills.

4) Team members must be available to be moved from their routine assignments for the duration of the protective detail.
I) POLICY
   A) It is the responsibility of the Sheriff’s Office, via Court Security Services, to provide for the safety of all participants in the judicial system within Contra Costa County. It is recognized that this responsibility may, under unusual circumstances, extend beyond the normal security provided on a daily basis. Court Security Services will maintain a Judicial Protection Unit (JPU) to provide the additional security under these unusual circumstances.

II) PROCEDURE
   A) Notification of Threat
      1) The Judicial Protection Unit may be activated when a threat is received involving any Superior Court judge or commissioner.
      2) In rare instances, the services of the JPU may be extended to other participants in the judicial system.
      3) Any Court Security deputy who becomes aware of a threat to any participant in the Court Security system will immediately notify his/her facility sergeant and when appropriate, document the incident on a crime report form.
      4) The facility sergeant will make a preliminary evaluation, take any immediate action that may be necessary and notify the JPU coordinator.

   B) Threat Assessment
      1) The JPU coordinator and team leader will meet with the threatened judge and conduct a threat analysis to determine whether the threat is of a sufficient level to warrant the activation of the unit.
      2) During the threat assessment, all available resources will be used, including criminal history and intelligence files, D.O.J. neighboring police departments and the California Highway Patrol.
3) The Judicial Protection Unit will be activated, after the completion of the threat assessment, by the next level of command with the approval of the affected judge.

4) If the threat itself is considered minor by the affected judge, the team leader will assign the incident directly to security personnel for review, investigation, and documentation in a crime report.

C) Advance Preparation

1) When the Judicial Protection Unit is activated; the coordinator or the team leader will reassign as many team members as are necessary from their normal duties to the JPU detail.

2) One or more members will be assigned the task of advanced preparation.

3) Team members assigned to this task will complete a security survey of the threatened judge's courtroom, home and any other location to where the protective detail will be extended.

4) Advance preparation will also include the collection of as much information as possible about:

(a) The person(s) making the threat,
(b) History of events leading up to the threat
(c) Responsible(s) criminal record and violence potential.

D) Tactical Implementation

1) The Judicial Protection Unit Coordinator or team leader will provide review all of the information provided by the team member(s) assigned to advance preparation.

2) The JPU coordinator or team leader will then give individual assignments to team members to carry out the protective plan.

3) All team members will be familiar with the advanced preparation report.

4) The coordinator, team leader or designee will have responsibility for the supervision of team members to ensure that the protective detail is carried out as planned.

E) Additional Considerations

1) During the length of a protective detail, the JPU coordinator or team leader will continuously evaluate and make adjustments to the original protective plan.

2) The JPU coordinator or team leader along with the affected judge will continue the threat assessment process throughout the length of the protective detail.
3) When the threat level has dropped to an acceptable level, the protective detail will be terminated.

4) The threatened judge should be contacted periodically after the termination of the protective detail for follow-up and threat assessment.

5) Due to the size and scope of a security detail, the JPU Coordinator could request assistance in the case of fatigue, intelligence, and locations, etc., from within the Sheriff’s Office or other police agencies, but only after familiarizing any assisting personnel with the advanced preparation report.
I)  POLICY

A)  All information relative to anticipated unusual incidents or high-risk court proceedings must be properly documented, in advance of those occurrences, to ensure that the appropriate planning and preparation takes place. A standard format has been developed to report such information.

II)  PROCEDURE

A)  The following format will be used when documenting operational plans or anticipated unusual incidents, to assist in the strategic planning of the situations and report those operational steps taken to ensure the security of the event taking place.

1)  Heading – The heading will read, “Court Security Services Incident and Operational Plan.”

2)  Date and Time – Provide the date and time the situation is to occur. If the exact duration is unknown, include estimated time periods.

3)  Incident – Describe exactly what is to occur and provide background information.

4)  Problem – Provide a statement describing what it is to be accomplished or overcome, the objective of the mission.

5)  Operation – Provide a detailed account of how the objective or mission is to be accomplished. Be sure to include personnel, resources, costs and any other pertinent information.

6)  Attachment(s) – Attach any information relative to the operational plan.
I) POLICY

A) The emergency response plan provides for general procedures to ensure the safety of employees and the general public. Any questions about the specific operation procedure should be discussed with your supervisor. The plan describes procedures used in the event of emergencies such as medical, fire, and earthquake. An emergency condition can occur without warning, it is important to take steps to prepare for such an occurrence.

II) PROCEDURE

A) Medical

1) If an injury or sudden illness occurs in your area:
   
   (a) Immediately notify the Court Security sergeant via portable radio or by phone. State the location and nature of the problem.
   
   (b) Evaluate the need for emergency response personnel, summon help when necessary and begin first aid procedures if required.
   
   (c) If applicable, document the incident (Medical - 1730) on a crime report form.

2) If an injury to an employee results in hospitalization or death, the supervisor must report the injury to California Division of Industrial Safety and the County Risk Management Division Safety Office.

3) Employees working after hours or on weekends should dial 911 and state the nature of the problem.
B) Fire Alarm

1) If fire or smoke is detected in your area:

(a) Immediately notify the Court Security Supervisor and Operations Deputy via portable radio or telephone.

(b) Advise the location of the fire.

(c) Size and type of fire, if known.

(d) Sheriff’s Court Security personnel will respond to the affected area, evaluate the need for emergency response personnel, and summon additional assistance as needed.

(e) Employees working after hours or on weekends should dial 911 and immediately give the following information:

- Address and location of the fire.
- Your name and telephone number.
- Describe the size and type of fire.

(f) Evacuate your immediate area (utilizing the affected courthouse’s evacuation procedure) and report to your designated assembly area.

(g) When possible, have someone direct emergency personnel to the affected area.

(h) Do not re-enter the courthouse until directed to do so.

(i) When a fire alarm sounds, the Operations Deputy, and supervisor will be immediately informed.

(j) The Operations Deputy will coordinate with the designated Court Security personnel, and any additional staff necessary, to search the courthouse or building to detect any evidence of fire or smoke.

(k) Deputies with prisoners will notify the Operations Deputy of their status and location.
The Operations Deputy will designate a deputy (preferably the lead deputy assigned to the screening posts) to respond to the fire control panel located at the below locations. The deputy will determine the specific location of the alarm by reading the alarm box display panel and relay this information via radio.

**Bray Courthouse**: near the northeast front entrance (Post 4) of the Bray courthouse. The access door is marked “Fire Control Sprinkler.”

**Spinetta Courthouse**: Main Courthouse entrance at Post-9

**Taylor Courthouse**: First floor on the wall to the left of room 127 near Post-1

**Court Records Building**: 1111 Ward Street Martinez

The Centurion Alarm Company monitors the fire alarm system. An automated voice will transmit over the Court Security radios as to the alarm location. Court security personnel will respond for evacuation. The control box is located at Post-4.

As Court Security personnel have completed their assigned evacuation and search procedures, they will advise their floor team leader and the Operations Deputy via radio of their status.

If there is no evidence of fire or smoke the designated deputy at the fire control panel will advise the supervisor or Operations Deputy. The supervisor or his designee will approve an announcement on the public-address system regarding the status of the courthouse, and whether it is clear to re-enter.
(s) The Operations Deputy will advise the fire department of the status of the alarm.

(t) Other activation points, i.e., smoke detectors, will be reset at the fire control panel.

(u) If an actual fire or smoke is discovered, the current emergency evacuation procedure (see 4.09.04 thru 4.09.08) will be followed.

(v) If applicable, a crime report shall be required to document the incident.

C) Earthquake

1) When indoors get under a table, desk or workbench and hold on to heavy pieces of furniture. Stand in an interior doorway, if a desk, workbench or table is not available. Stay away from walls, glass cabinets, and shelves. Be alert to falling plaster, bricks, light fixtures and other objects.

2) As soon as possible, turn off or unplug all electrical office machines and appliances.

3) If directed to do so, calmly evacuate the courthouse and report to the designated assembly area.

4) Do not re-enter the courthouse until directed to do so by the Building Warden.

5) When outdoors, stay outdoors. Get into the open, away from buildings, walls, trees and power lines. Be alert for other objects that could fall.
I) POLICY

A) The emergency response plan provides for general procedures to ensure the safety of employees and the general public. Any questions about the specific operation procedure should be discussed with your supervisor. This plan describes procedures used in the event of a bomb threat. An emergency condition can occur without warning. It is important to take steps to prepare for such an occurrence.

II) PROCEDURE

[Text obscured]
Notify a supervisor immediately.

DO NOT USE RADIOS TO CALL FOR ASSISTANCE.

The Assistant Sheriff or designee and/or the Presiding Judge will determine the need for an evacuation of the courthouse(s).

If a suspicious device is located immediately notify a supervisor. REMINDER: THE USE OF POLICE RADIOS NEAR SOME EXPLOSIVE DEVICES MAY TRIGGER THE DEVICE TO EXPLODE. USE EXTREME CAUTION SHAL BE USED.

### CHAPTER: Emergency Management Plan

#### ISSUE DATE: 01-01-07

#### REVISION DATE: 02-11-2013

#### REVIEW DATE: 12-18-2019

#### I) POLICY

A) All courthouse alarms at Superior Courthouses will be handled as emergency situations that may interrupt the normal operations of the courts. Deputies will respond as needed to all alarms as an in-progress situation with due regard for the potential dangers involved. Deputies main concerns will be officer safety, public safety, and courthouse security.

#### II) PROCEDURE

A) When a duress button is depressed an automated voice, message will be transmitted twice over the Court Security police radio system.

1) The message will advise the **specific location** of the activation, to include building name and room number or duress button location.

B) Office Operations Responsibilities

1) After the duress message has been broadcast

   (a) Determine if the alarm is occurring in a courtroom and call for the assigned deputy’s status.

   (c) If the courtroom deputy requests assistance, then available deputies shall be dispatched to investigate. The number of deputies shall be determined by the urgency of the incident (i.e., code 2 or 3).
(e) The Operations Deputy will advise all other staff to hold their radio traffic until a status can be obtained.

3) If the alarm is determined to be accidental and the person who activated the alarm is identified, a Court Security sergeant will be advised. If the reason for the accidental/false alarm is unknown, the Court Security supervisor shall request a review of the alarm history at the appropriate control panel located at [ ] to determine the responsible duress button.

4) When appropriate, the Operations Deputy shall advise court staff when to resume all normal radio traffic.

C) Deputies Responsibilities,

1) If the courthouse and room number transmitted over the radio specifies your location (i.e. courtroom bailiff), you shall immediately advise your status.

2) Available deputies within proximity of where the alarm has been activated shall advise the Operations Deputy of their intention to respond via radio.

3) All other available sworn personnel shall stand by for status.

4) The responding personnel shall immediately advise of their arrival and their status as soon as possible.

5) If additional personnel are needed, the responding deputies will use the appropriate radio traffic to inform the Operations Deputy about the urgency.
Screening Personnel Responsibilities

1) If the duress button has been activated in your assigned courthouse, stop screening until a status is known.

2) If additional security personnel are responding to your assigned courthouse, direct the citizens within the door entrances and hallways to clear the area.

3) Lead Deputies will not respond to alarms in the courthouse, as they may be the result of a disturbance intended to draw security away from the court entrance. EXCEPTION: If the alarm button is activated at 1111 Ward Street the Lead Deputy at Post-4 will be assigned first responder with an additional deputy to assist.

Maintenance

1) The Centurion Alarm System shall be routinely checked to ensure the system is operating correctly. It is the responsibility of all Court Security deputies to know how to operate, maintain and test the system.

2) All malfunctions or repairs will immediately be reported to a supervisor.

F) There are two-alarm control panels; Post-2 (Taylor Courthouse) and Post-4 (Bray Courthouse). Both posts have instructional manuals on how to operate the system. The Post-2 control panel receives all alarms from the Taylor and Spinetta Courthouses. The Post-4 control panel receives all alarms from Court Records 1111 Ward St, the Court Annex, and the Bray Courthouse.
I)  POLICY

A)  In order to ensure the safe, secure operation of Superior Court, Court Security Division will accept the responsibility for the emergency evacuation of Superior Court facilities.

II)  PROCEDURE

B)  All court employees will evacuate the courthouse when directed to do so by their immediate supervisor, the Building Warden, or the Presiding Judge.
D) Attempts shall be made to communicate with court staff supervisors for any unaccounted employees. Persons who may need medical treatment should be reported to the Building Warden as soon as possible. The Building Warden will make all necessary notifications. In the event of an evacuation, the designated assembly areas for the Martinez Superior Court facilities are as follows:

1) Site #1 - Pedestrian area adjacent Starbucks (700 Main Street) and Bank of America (626 Main Street).

2) Site #2 - Martinez Regional Shoreline – Waterfront Park. Located at Ferry Street and Joe DiMaggio Drive, north of the railroad tracks.

3) Site #3 - Southeast corner of the MDF parking lot adjacent to the intersection of Willow Street and Mellus Street. Court Security personnel involved in any courthouse evacuation should advise all employees to report to this location if the primary and secondary are unavailable.

E) In any evacuation, all persons should be directed to leave the courthouse by the nearest available exit.

F) It is possible that only one of the listed courthouses would be affected by any evacuation order. In this instance, the Building Warden will determine the most appropriate course of action.

G) Any personnel who requires assistance, or is unable to complete his/her assigned evacuation task should immediately notify the Court Security Unit Operations Deputy or supervisor.

H) As deputies perform their evacuation duties, each deputy will ensure a thorough search and evacuation of his/her zone, so as not to leave anyone inside the courthouse.

I) Not until all areas have been checked and cleared should the courthouse(s) be considered evacuated. Upon completion of clearing an assigned area the deputy will notify the Office Operation Deputy who shall be responsible for monitoring the courthouse and advising the Building Warden.
K) The Operations Deputy or a designee will be responsible for documenting the evacuation of the courthouse(s) by completing the “Evacuation Notification Checklist.” This checklist does not replace a crime report.

L) **Handicap Persons:**

1) In the event of a courthouse evacuation, it is the responsibility of the Building Warden and Court Security personnel to identify handicap persons.

2) Once a person has been identified as having a disabling handicap, arrangements will be made to evacuate by the safest and most direct route available.
I) PROCEDURE

A) When an evacuation of the Wakefield Taylor courthouse is ordered the following procedures will apply:

1) The lead deputy will make an announcement using the public address system.

2) Each security/floor deputy will immediately escort their prisoner(s) to the Martinez Detention Facility. Upon returning from the Martinez Detention Facility, they will advise the Court Security office they are available for assignment.

3) Each bailiff will evacuate and secure his/her courtroom. Each bailiff must dismiss and evacuate any sequestered jury to the designated evacuation area.

4) After the courtroom and jury have been evacuated a systematic search and evacuation of the courthouse must be conducted. Court Security personnel working as a team shall ensure all areas of the floor are searched before advising the Operations Deputy it is clear.
Admittance to locked areas may be gained by using key #767.

Upon coordinated completion of the evacuation advise The Security Office.

2) Bailiff - Room 200

The room 200 Bailiff will secure their courtroom and remain available to account for and escort all Taylor Court judges and ASSIGNED jurors to the Evacuation Assembly Point.

It is the discretion of the building Supervising Judge when this group leaves the building.

3) Bailiff - Room 201

Initial responsibility will be to account for all judges and their ASSIGNED jurors on the second floor and escort them to Room 200. When complete, respond to the First Floor and coordinate with the Room 102 bailiff to evacuate the floor.

ALL rooms/offices on the first floor will be checked and evacuated.

Admittance to the locked areas may be gained by using key #767. Upon coordinated completion of the evacuation, advise the Security Office.

4) Bailiff - Room 209

Will remain on the Second Floor and coordinate with the Room 212 & 215 & 222 bailiff to evacuate the second floor.

ALL rooms/offices on the first floor will be checked and evacuated.

Admittance to locked areas may be gained by using key #767. Upon coordinated completion of the evacuation, advise the Security Office.

5) Bailiff - Room 212

Will remain on the Second Floor and coordinate with the Room 222 & 215 & 209 bailiff to evacuate the second floor.

ALL rooms/offices on the second floor will be checked and evacuated.
Admittance to locked areas may be gained by using key #767.

Upon coordinated completion of the evacuation, advise the Security Office.

6) Bailiff - Room 215
(a) Will remain on the Second Floor
(b) ALL rooms/offices on the second floor will be checked and evacuated.
(c) Admittance to locked areas may be gained by using key #767.

7) Bailiff - Room 222
(a) Will remain on the Second Floor
(b) ALL rooms/offices on the second floor will be checked and evacuated.
(c) Admittance to locked areas may be gained by using key #767.

8) Bailiff - Room 300
(a) Will remain on the Third Floor
(b) ALL rooms/offices on the third floor will be checked and evacuated.
(c) Admittance to locked areas may be gained by using key #767.

9) Bailiff - Room 301
(a) Initial responsibility will be to account for all judges and their ASSIGNED jurors on the second floor and escort them to Room 200. When complete, respond to the Third Floor and coordinate with the Room 305 bailiff to evacuate the floor.
ALL rooms/offices on the first floor will be checked and evacuated. Admittance to the locked areas may be gained by using key #767. Upon coordinated completion of the evacuation, advise the Security Office.

10) Bailiff - Room 305
(a) Will remain on the Third Floor to coordinate with the Room 301 & 300 bailiff to evacuate the third floor.
(b) ALL rooms/offices on the third floor will be checked and evacuated.
(c) Admittance to locked areas may be gained by using key #767. Upon coordinated completion of the evacuation, advise the Security Office.

11) Bailiff - Room 312
(a) Will respond to the Fourth Floor to coordinate with the Room 320 bailiff to evacuate the fourth floor.
(b) ALL rooms/offices on the fourth floor will be checked and evacuated.
(c) Admittance to locked areas may be gained by using key #767. Upon coordinated completion of the evacuation, advise the Security Office.

12) Bailiff - Room 320
(a) Will respond to the Fourth Floor to coordinate with the Room 312 bailiff to evacuate the fourth floor.
(b) ALL rooms/offices on the fourth floor will be checked and evacuated.
(c) Admittance to locked areas may be gained by using key #767. Upon coordinated completion of the evacuation, advise the Security Office.
D) Handicapped or (persons in wheel chairs) can be evacuated by placing them in an ordinary chair and carrying them downstairs.

E) All Unassigned Deputies will advise the Operations Deputy when they are available.

F) Court Security Rangers - Wakefield courthouse Rangers will position themselves on the exterior of the courthouse near the entrance and exit doors preventing persons from entering the courthouse.

G) Court Security Lead Deputy - The Wakefield Lead Deputy will coordinate with the Rangers to have the elevators cleared and brought to the lowest level where they will be turned off until the building is opened. The Lead Deputy may also be called upon to address any problems, which may develop at any of the entrances and exits.

H) The Operations Deputy will complete the evacuation form and make all the appropriate notifications.

I) The Court Security radio channel shall be kept open and used for priority traffic only. This will allow for emergency traffic to be broadcast to the affected parties. If radio use is not an option, then land wire telephones shall be used for priority traffic.
I) PROCEDURE

A) When evacuation of the A.F. Bray courthouse is ordered, the following procedures will apply:

1) The lead deputy will make an announcement using the public-address system.

2) Each bailiff will evacuate his/her courtroom. Each bailiff must dismiss and evacuate any sequestered jury to the designated area.
The following responsibilities will apply:

(a) Bailiff - Room 1001
• The room 1001 bailiff will secure the courtroom and escort all inmates from the security box to staging for movement back to the MDF by either the Staging / Floor Deputy.
• The bailiff will remain in the courtroom for the arrival of all Bray Court Judges and their ASSIGNED jury’s.
• The bailiff will escort the Judges and their assigned jury to the evacuation site.

(b) Bailiff - Room 2003
• Initial responsibility will be to account for all the judges and their ASSIGNED jurors on the second floor and escort them to room 1001.
• When complete, respond to the First Floor and coordinate with the Room 2012 bailiff to evacuate the first floor.
• ALL rooms/offices on the first floor will be checked and evacuated.
• Upon coordinated completion of the investigation, advise the Security Office.
• Admittance to the locked areas may be gained by using key #1701.

(c) Bailiff - Room 2012
• Respond to the First Floor and coordinate with the Room 2003 bailiff to evacuate the first floor.
• ALL rooms/offices on the first floor will be checked and evacuated.
• Upon coordinated completion of the evacuation, advise the Security Office.
• Admittance to locked areas may be gained by using key #1701.
Bailiff - Room 2016
• Will remain on the Second Floor and coordinate with the Room 2025 & 3003 bailiffs to evacuate the second floor.
• ALL rooms/offices on the second floor will be checked and evacuated.
• Admittance to locked areas may be gained by using key #1701.
• Upon coordinated completion of the evacuation, advise the Security Office.

Bailiff - Room 2025
• Will remain on the Second Floor and coordinate with the Room 2016 & 3003 bailiffs to evacuate the second floor.
• ALL rooms/offices on the second floor will be checked and evacuated.
• Admittance to locked areas may be gained by using key #1701.
• Upon coordinated completion of the evacuation, advise the Security Office.

Bailiff - Room 3003
• Initial responsibility will be to account for all the judges and their ASSIGNED jurors on the third floor and escort them to room 1001.
• When complete, respond to the Second Floor and coordinate with the Room 2016 & 2025 bailiff to evacuate the second floor.
• ALL rooms/offices on the first floor will be checked and evacuated.
• Admittance to the locked areas may be gained by using key #1701.
• Upon coordinated completion of the investigation, advise the Security Office.
Bailiff - Room 3012
• Will remain on the Third Floor and coordinate with the Room 3016 & 3025 bailiff to evacuate the third floor.
• ALL rooms/offices on the third floor will be checked and evacuated.
• Admittance to locked areas may be gained by using key #1701.
• Upon coordinated completion of the evacuation, advise the Security Office.

Bailiff - Room 3016
• Will remain on the Third Floor and coordinate with the Room 3012 & 3025 bailiff to evacuate the third floor.
• ALL rooms/offices on the third floor will be checked and evacuated.
• Admittance to locked areas may be gained by using key #1701.
• Upon coordinated completion of the evacuation, advise the Security Office.

Bailiff - Room 3025
• Will remain on the Third Floor and coordinate with the Room 3016 & 3012 bailiff to evacuate the third floor.
• ALL rooms/offices on the third floor will be checked and evacuated.
• Admittance to locked areas may be gained by using key #1701.
• Upon coordinated completion of the evacuation advise the Security Office.

C) If the evacuation of the roof becomes necessary due to fire or other hazard, roof access is by the north stairwell only (key # 1701).

D) All unassigned deputies will advise the Operations Deputy they are available.
Court Security Rangers

1) A.F. Bray rangers will position themselves on the exterior of the courthouse near the entrance and exit doors preventing persons from entering the courthouse.

2) One ranger will respond to Post 6.

Court Security Lead Deputy

1) The Bray Lead Deputy will coordinate with the rangers to have the elevators cleared and brought to the lowest level where they will be turned off until the building is reopened.

2) The Lead Deputy may also be called upon to address any problems, which may develop at any of the entrances and exits.

Operations Deputy will complete the evacuation form and make all the appropriate notifications.

H) The Court Security radio channel shall be kept open and used for priority traffic only.

1) If radio use is not an option, land wire telephones shall be used for priority traffic.
1) **PROCEDURE**

When evacuation of the Peter Spinetta courthouse (Family Law Center) is ordered, the following procedures will apply:

1. The lead deputy will make an announcement using the public address system located near Post-9.
2. Each security/floor deputy (C500 if available) will immediately escort their prisoner(s) to the Martinez Detention Facility.
3. The security/floor deputies will return from the Martinez Detention Facility as soon as possible and advise the Court Security Office they are available for assignment.
4. Each bailiff will evacuate and secure his/her courtroom.

B) After the courtroom and jury have been evacuated a systematic search and evacuation of the courthouse must be conducted. Court Security personnel working as a team shall ensure all areas of the floor are searched before advising the Operations Deputy it is clear.

1. The following responsibilities will apply:
   - **Bailiff – Room 206**
     - The Bailiff will remain on the second floor and coordinate with the Room 223 bailiff to evacuate the second floor.
     - All rooms/offices on the second floor will be checked and evacuated.
Admittance to locked areas may be gained by using key #3041.

Upon coordinated completion of the evacuation, advise the Security Office.

(b) Bailiff – Room 223
- The Bailiff will remain on the second floor and coordinate with the Room 206 Bailiff to evaluate the second floor.
- All rooms/offices will be checked and evacuated.
- Admittance to the locked areas may be gained by using key #3401.
- Upon completion of the coordinated evacuation, advise the Security Office.

(c) Bailiff – Room 225
- The Bailiff will respond to the first floor and coordinate with the Room 229 and 233 Bailiffs to evacuate the first floor.
- All rooms/offices will be checked and evacuated.
- Admittance to the locked areas can be gained by using key #3041.
- Upon completion of the evacuation, advise the Security Office.

(d) Bailiff – Room 229
- The Bailiff will respond to the first floor and coordinate with the Room 225 and 223 Bailiffs and evacuate the first floor.
- All rooms/offices will be checked and evacuated.
- Admittance to the locked areas can be gained by using key #3041.
Upon completion of the evacuation, advise the Security Office.

Bailiff – Room 233

The bailiff will secure their courtroom and report to the judge's chambers in room 220.

The bailiff will account for all judges and escort them to the Evacuation Assembly Area.

If the evacuation of the roof becomes necessary due to fire or other hazard, roof access is in the south stairwell only.

All unassigned deputies will advise the Operations Deputy they are available.

Court Security Rangers

1) The Spinetta Rangers will position themselves on the exterior of the courthouse near the entrance and exit doors preventing persons from entering the courthouse.

2) One ranger will respond to the Southside employee entrance.

Lead Deputy

1) The Spinetta Lead Deputy will coordinate with the Rangers to have the elevators cleared and brought to the lowest level where they will be turned off until the building is reopened.

2) The Lead Deputy may also be called upon to address any problems, which may develop at any of the entrances and exits.

The Operations Deputy will complete the evacuation form and make all the appropriate notifications.

The Court Security radio channel shall be kept open and used for priority traffic only.

1) If radio use is not an option, then land wire telephones shall be used for priority traffic.
1) PROCEDURE

A) When evacuation of the Court Annex (1010 Ward Street) is ordered, the following procedures will apply:

(a) Podium Deputies will return all prisoners to the jail.

(b) The podium deputies will then take up positions at Post-7 and the northeast door entrance to ensure persons exit the building and not re-enter.

2) Bailiffs

(a) The bailiffs will clear and secure their respective courtrooms.

(b) After securing their courtrooms persons remaining in the hallways will be ushered out through Post-7, or into the Bray courthouse (if not affected), or out through Post-6.

(c) A systematic search of the common areas and rooms will be conducted.

B) If the Court Annex is the only area affected the lead deputy (C1000) at post-4 will respond to assist until relieved by additional deputies.

C) Operations Deputy will complete the evacuation form and make all the appropriate notifications.

D) The Court Security radio channel shall be kept open and used for priority traffic only. If radio use is not an option, then land wire telephones shall be used for priority traffic.

**ISSUE DATE:** 01-01-2002  
**REVISION DATE:** 01-01-08  
**REVIEW DATE:** 12-18-2019

### CHAPTER:

- **Emergency Management Plan**

### I) POLICY

A) It is the responsibility of all deputies assigned permanently or temporarily to Court Security Services to familiarize themselves with the location and the procedure of the emergency shutoff valves and breakers for the courthouses.

### II) PROCEDURE

- **Main Electrical Junction**
  1) Located on the first floor, near the clerk's office.
     a) Entrances are located in the clerk's office (room #103) and the Engineer's Office (room #111).
     b) Deputies are **NOT** to turn these electrical mains off due to high voltage but should be able to direct responding emergency personnel to the locations (i.e., fire and PG&E).
  2) **Emergency Generator**
     a) The electrical main and emergency generator is in the vault located on the south wall next to the large copy machine.
     b) To turn off the main electrical switch, you **MUST** push the button marked "CLOSED."
     c) The main switch is a rectangular blue plate with a black handle.
        • You **MUST** use a broom handle to push the trip button because the black handle is wound like a spring.
B) Gas Main

1) Located outside the northwest basement door (Post-1) at ground level.
2) To turn OFF the MAIN GAS valves, turn the flat-sided 1-½ nut a ¼ turn with a large crescent wrench. This nut is located at the top of the right side of the meter facing the courthouse.
3) All valves and nuts must be turned clockwise.

C) Water Mains

1) Located outside on the north wall west of the basement automatic doors at Post-1.
2) To turn OFF the water main facing the water valve, there is a butterfly nut in front of the valve.
3) Fit the wrench to the flat side of the nut and turn ¼ inch clockwise.

D) Roof Access

1) There are three roof accesses:
   (a) The elevator located in the northeast portion of the courthouse.
      • When entering the elevator on any of the four floors, put the #555 key into the slot between the "emergency" and "stop" buttons.
      • Turn the key and then remove it.
      • This will automatically key into the roof.
   (b) Room #409, 4th Floor south of the elevator, there is a small staircase leading to the access door of the roof.
      • Use the #555 key.
   (c) Room #416 located on the 4th Floor southwest corner leads outside onto a catwalk on the Westside of the courthouse.
      • Use the #555 key.

E) NOTE: An emergency generator will come on in the Wakefield Taylor courthouse when the electricity is shut off.
I) POLICY

A) It is the responsibility of all Deputies assigned permanently or temporarily to Superior Court to familiarize themselves with the location and the procedure of the emergency shutoff valves and breakers for the courthouses.

II) PROCEDURE

A) Electrical Main

   1) Located in a closet on the southwest wall between the A.F. Bray courthouse and the jail annex.

      a) Deputies are NOT to turn these electrical mains off due to high voltage but should be able to direct responding emergency personnel to the locations (i.e., fire and PG&E).

      b) Turn OFF the main electrical power by pushing the RED BUTTON UNDER THE MAIN BREAKER TRIP SWITCH.

B) Gas Main

   1) Located outside the west wall in the shrubbery bed, alongside the sidewalk to the Martinez Detention Facility court link.

   2) To turn off the gas valve, turn the flat-sided nut 1½ turns.

      a) If facing the gas meter, this nut is located on top of the right side of the gas meter.

      b) All valves and nuts are turned clockwise. This meter also has a seismic valve. In case of an earthquake, it should shut itself off.
C) Water main

1) Located east of the main front entrance of the A. F. Bray courthouse, under the Martinez Detention Facility sign. It is encased in cement with a cover reading "water."

2) To turn OFF the water, lift up the cement cover. There is a water valve with a hand wheel. The hand wheel is turned clockwise.

D) Roof Access

1) There is only one roof access in the Bray courthouse. It is located at the top of the north staircase.

2) The #1701 key is used for this door.
I) POLICY

A) It is the responsibility of all deputies assigned permanently or temporarily to Superior Court to familiarize themselves with the location and the procedure of the emergency shutoff valves and breakers for the courthouses.

II) PROCEDURE

- Electrical Main
  1) Located on the lower level in the northeast corner of the building.
  2) Enter through door #108, then door #109, and then through door #113.
  3) Deputies are NOT to turn these electrical mains off due to high voltage, but should be able to direct responding emergency personnel to the locations (i.e., fire and PG&E).
  4) Follow instructions for turning off power.

- Gas main
  1) Located on the east side of the building next to the loading dock roll-up door.
  2) Call facility maintenance for assistance.

- Water main
  1) Located on the southeast corner of the building near Ward Street is enclosed within a fence.

- Fire Sprinkler System
  1) Located at south side of the building on Ward Street next to the staff
There is one roof access from the second-floor south staff stairwell. Key #3041 will unlock the door.
### I. POLICY

#### A) 1111 Ward St. and 911 Alhambra Ave. are not courthouses, but fall under the responsibility of Court Security Services.

### II. PROCEDURE

- If an emergency is reported at either of the buildings, a deputy will respond and determine if an emergency exists and inform the Court Security Supervisor and the Operations Desk.
- If an actual emergency exists, the Court Security Lieutenant and Court Security Sergeant will respond to the affected building.
- Once on scene, the Lieutenant and supervisor will make the needed notifications via the Court Security Operations Desk.
- If a building needs to be evacuated, the supervisor will contact the Facilities Manager (911 Alhambra Ave.) or the building manager (1111 Ward St.).
- The managers will account for their staff and will report to the supervisor on scene the status of all personnel.
- If all personnel are present or accounted for, they will be escorted (if needed) to the court evacuation site. If it is safe to remain in the area, personnel will be kept a safe distance from the building, until the all clear is given by the building manager or on scene supervisor.
- If it is safe to do so, the supervisor or deputy will sweep the building to ensure all personnel has been evacuated.

CHAPTER: Weapons Screening

SUBJECT: Objectives & Operating Times

I) POLICY

A) The Court has ordered that all persons entering the courthouses are required to submit their person and property for weapon/contraband screening. Persons who intentionally avoid submission to the screening and inspection of one’s person and accessible property will be denied access - P.C. 602(y).

II) PROCEDURE

A) The primary focus for screening staff is the detection of weapons and prohibited items to ensure the safety of the court staff and the public.

B) The assigned Deputy Sheriff at each screening station is responsible for taking the appropriate action for police services and crimes occurring in and around the screening station.

C) The screening staff has the discretion to forbid items from being brought into the courthouse if they reasonably suspect an item may compromise the security of the building, the safety of the court staff, or the general public.

D) If the screening staff have a question or receive a complaint about whether an item should be allowed in the courthouse, they shall notify a supervisor to receive direction on how to proceed.

E) Examples of prohibited items include, but are not limited to:

1) Firearms/Ammunition
2) Knives (pocket knife, belt buckle knife, etc.)
3) Metal Knuckles
4) Chains including wallet chains
5) Tools (hammer, screwdriver, wrench, etc.)
6) Pepper spray, mace or tear gas
7) Cutting instruments (Scissors, letter opener, box cutter, hatchet, sword, etc.)
8) Handcuffs/handcuff keys
9) Syringes
10) Knitting needles, sewing needles, large safety pins
11) Glass Containers, ice picks, corkscrews and metal eating utensils
12) Lighters, torches, flammable liquids
13) Chemicals/Fertilizers that are corrosive or flammable
14) Explosives
15) Skateboards, golf clubs, and bats
16) Alcohol
17) Illegal drugs or paraphernalia
18) Laser Pointers
19) Graffiti tools – markers, paint, etching tools, etc.
20) Large poster board sheets or signs
21) Cameras or audio recording devices
   (a) Unless the camera or recording device is approved by the courts ADA Coordinator, Presiding Judge, or designee.

F) Belts and footwear are to be removed only after personnel have exhausted less intrusive means of screening.

G) Staff assigned to the weapons screening station shall test the screening equipment before opening the station each day. Staff will ensure all equipment is functioning correctly.
   1) Any problems will be reported to a supervisor or the Operations Deputy as soon as possible.
      (a) The Operations Deputy will send an email to Court Facilities describing the problem and requesting a repair.

H) Screening personnel will be responsible for opening the courthouse for the general public each morning.
   1) A security check of the courthouse’s interior and exterior shall be completed before opening.
   2) The A.F. Bray Courthouse, The Spinetta Family Law Center, and The Arnason Justice Center (Pittsburg) will be open at 0730 hours to the public.
   3) The Wakefield Taylor, George D. Carroll (Richmond), and The Walnut Creek Superior Courthouse will open at 0800 hours to the public.
I) At 1700 hours, the exterior courthouse doors will be locked by screening personnel.
   1) After securing the courthouse doors, an interior security check of the courthouses floors will be completed by the deputy assigned to clear the building.
   2) Security personnel checking and clearing the courthouse shall communicate the completion to the Operations Deputy.
   3) The post X-ray machines will be turned off and secured. The keys will be returned to the Court Security Office.

J) Case law requires that criminal court proceedings (trials), which are open to the public, remain open. In the event a criminal proceeding continues after 1700 hours, one weapon screening station (post) will remain open until the court concludes its business.

K) Civil court trials and some juvenile court hearings, which are closed to public viewing, will not normally require after-hours weapon screening unless requested by a court official or authorized by a Court Security supervisor.

L) Court officials hearing civil matters may choose to remain in the courthouse after hours with attorneys and their clients without security present. In this event, the judge will be reminded of the delayed police response time and to escort the remaining parties from the courthouse.
I)  POLICY

A)  Court Security staff assigned to the screening posts are responsible for the detection of weapons, contraband, and enforce applicable laws, to ensure the safety and security of the courthouse and maintain proper decorum.

1)  Our policy does not contain an all-inclusive list of prohibited items. The court gives security staff discretion and relies on their good judgment to keep objects from entering the courthouse they believe could pose a threat or security risk.

2)  If there is ever a question or complaint about an object that has not been allowed into the building, a Court Security Sergeant will be notified and respond to the screening post.

D)  Screening post personnel should never leave their assigned posts unless requested to do so by the security office or a Court Security supervisor.

1)  The deputy shall notify the office, before leaving the post.
E) Sheriff’s Office personnel who perform weapon-screening functions should keep in mind they are directly in the public eye. Conduct should be professional and appropriate at all times.

F) Personnel should not sit on tables, eat, drink beverages, read personal material, talk on personal cell phones (see also CCCSO policy 1.05.83), or use personal electronics, while at the workstation.

G) Personnel assigned to a straight eight-hour shift may eat at the post.

H) Personnel should never gather around the screening station work area unless assigned to or assisting with security tasks.

I) Demeanor toward the public should always be tactful and courteous. For many court visitors, the screening process is a negative experience, and it may be the only direct contact they have with the Sheriff’s Office; therefore, courtesy and tact cannot be overemphasized.

1) The emphasis on courtesy should not distract from the duty at hand. Personnel should constantly remain alert for threats to security and be conscious of officer safety at all times.

II) PROCEDURE

A) Duties of the Deputy Sheriff assigned to screening stations

1) Responsible for the operation of all equipment at each screening station.

2) Responsible for taking the appropriate action for police services and crimes occurring in and around the screening station, as well as, notifying the agency of jurisdiction for crimes outside the courthouse.

3) Law enforcement functions and responsibilities at the screening stations.

B) Duties of the Sheriff’s Rangers assigned to the screening stations:

1) Responsible for the detection of weapons and prohibited items entering the courthouse.

2) Responsible for the operation of all equipment at each screening station.

3) Perform tasks related to weapon screening as assigned by the screening deputy.

4) Tasks as assigned by a Court Security Sergeant or the Court Security Services Manager.

| CHAPTER: | Weapons Screening |

## I) PROCEDURE

A) Screening personnel shall remain alert to the possibility that legal or illegal weapons and/or dangerous devices may be inside items passing through the X-ray machine.

B) When a possible weapon is observed on the X-ray monitor, a hand search of the item shall be conducted.

C) During the search, care should be taken to ensure that the owner does not have access to the suspected weapon.

D) When an obvious weapon is observed on the X-ray monitor, the item should be temporarily stopped inside the machine until a deputy can detain the owner of the item.

1) EXCEPTION: if an object that is observed on the X-ray monitor appears to be an explosive device, the item should never be stopped inside the machine. Confining an explosive device inside a confined area could increase damage and injuries if the device is detonated.

E) If a weapon is found, the assigned deputy at the station shall conduct a hand search and ask questions to preserve the chain of evidence.

F) When a pat search of a person is warranted, a deputy sheriff shall do it.

1) Sheriff’s Rangers will NOT conduct pat searches.

G) When a weapon is confiscated, and/or an arrest is made, it shall be documented in a Sheriff’s crime report, and a supervisor will be notified.
I) PROCEDURE

A) Common examples of prohibited items include, but are not limited to, any chemical agent, folding knives, fixed blade knives, other stabbing instruments, alcoholic beverages, and firearms, which are legal to possess outside the courthouse.

1) All persons will be encouraged to return any legal weapon, not authorized in the courthouse to their vehicle. Items are NOT to be held at the screening station except in unusual circumstances. Some examples of unusual circumstances are, but not limited to:

   (a) The person carrying the item is disabled, and enforcement of the policy would cause undue hardship.

   (b) The person claimed they arrived on public transportation and they have no place to secure the item.

B) In those instances where a deputy determines that the property must be held, he/she shall complete a property receipt with the owner's name, address, phone number and date. He/she will have the owner sign the receipt and give the owner the pink copy of the receipt. The rest of the receipt will be affixed to the property. The Deputy accepting the property is responsible for its safe keeping until it is returned to the owner OR secured in a designated storage locker at the worksite.

   (a) The owner of the property will be advised failure to claim the property will result in the item(s) being sent to the Sheriff's Office property room for disposition. If the property has not been claimed after two business days, the owner of the property...
will be contacted (preferably by the deputy who issued the property receipt). The owner will be told that if the property is not claimed within two business days, it will be forwarded to the property room for disposition. The deputy will note on the attached receipt the date and time the call was made, as well as, who he/she spoke to, i.e., the owner, message machine, or roommate, etc. If the property is still not claimed within two business days the deputy (preferably the deputy who issued the property receipt) will write a found property report (1731) and take the property, property receipt, and completed Sheriff’s report to the Court Security Office for disposition.

C) Persons possessing a firearm with a valid Carry Concealed Weapon (CCW) and valid picture identification will be instructed to secure their firearm in their vehicle. If this is not an option, the lead deputy shall:

1) If assigned to the Bray Courthouse, secure their firearm in the provided gun locker.

2) If assigned to the Taylor or Spinetta Courthouse, refer the person to the Court Security office to secure the firearm.

D) Personal items that are routinely unclaimed, found, or given to court security staff shall be handled in the following manner:

1) All paper United States currency that is unclaimed within a reasonable amount of time and no later than the close of business that day shall be secured in a designated storage locker at the worksite and a report shall be written for disposition.

2) Any item of apparent value, which if left unsecured may disappear, shall be secured in a designated storage locker at the worksite and a report shall be written for disposition.

- Apparent value can be subjective. The employee should look at the item objectively. For example a pair of generic sunglasses being left unsecured versus a pair of designer sunglasses. (If unsure always secure).
I) PROCEDURE

A) Weapons or other articles, the possession of which anywhere in the state is a crime, shall be confiscated.
   1) This will normally include weapons described in penal code section 19200, 20310, 20410, 20510, 20610, 20710, 20910, 21110, 21310, 21510, 21810, 22010, 22210, 22410, 24510, 24310, 24410, 24610, 24710, 30210(a)&(b), 31500, 32310, 33215, 32900, 33215.

B) Weapons or articles that are normally lawful to possess outside the courthouse, but constitutes a felony under penal code section 171(b) if carried into the courthouse will not normally be confiscated.
   1) If they are declared or discovered in the course of the weapons screening operation they should be excluded from the courthouse, or if circumstances meet the parameters outlined in 4.10.04, then the item may be temporarily held.

C) Weapons or articles, which are excluded from the courthouse by department policy or court order, will not be confiscated.
   1) Individuals will be told to remove the item(s) from the courthouse.
   2) Items will only be held if appropriate under 4.10.04.

D) In most cases confiscation of property will not necessitate an arrest.
   1) If the type of weapon or contraband presents a threat to safety or security, or the bearer has made an obvious effort to conceal the contraband, or the weapon is illegal, an arrest may be appropriate.
   2) Other unusual situations may also warrant an arrest. In the event an arrest is made; a Court Security sergeant will be contacted and the deputy shall document the incident in a crime report.
E) Individuals who have a valid California Concealed Weapons Permit (CCW) are not authorized to carry a firearm in the courthouse facility.

1) Individuals in possession of a firearm with a valid CCW will not be allowed to enter the courthouse.
   (a) The individual will be asked to return the weapon to their vehicle.
   (b) If this is not possible, they will be escorted to the Court Security office to store their weapon.

2) Persons without a valid CCW, or individuals in possession of an illegal weapon, will be detained and the sergeant shall be notified immediately.

 ISSUE DATE: 01-01-2002  
REVISION DATE: 01-01-09  
REVIEW DATE: 12-18-2019  

## I) PROCEDURE

A) All persons processed through the weapons screening station should be screened carefully.

B) Although some persons may have disabilities or other conditions that make screening procedures difficult, they should be searched using patience, tact, and courtesy.

   (a) The Court Security supervisor will be notified of any person requesting access to a court facility at a non-public entrance due to a disability or special condition.

   (b) The supervisor will ensure that the individual is searched using a hand-held magnetometer.

   (c) Their property will be x-rayed prior to them being allowed access to the affected facility.

C) Persons in wheelchairs and pushing strollers frequently have bags in their possession. These items should not be overlooked when performing the screening process.

D) Persons with pacemakers or other medical devices may occasionally request to be searched by hand or be checked with a hand-held metal detector.

   1) Although walking through the metal detectors does not affect the operations of medical devices, it is normally preferable to perform the search as requested.

E) Elderly and non-English speaking persons may also require special attention.

   1) Again, a balance between courtesy and caution will usually produce the best results.
F) Any item brought into the courthouse for evidentiary purposes will not be subject to search and/or confiscation.
   1) The item must be clearly marked as evidence
   2) The item must be in the possession of:
      a) Law enforcement
      b) District Attorney’s Office
      c) Public Defender’s Office
      d) Superior Court Clerk’s Office
      e) Private Attorney

G) Jury panels being escorted from the Jury Services Room, by court security staff, may enter the Taylor Courthouse through Post-3.
   1) Staff shall ensure all jurors are wearing their juror identification cards.
   2) Jurors who are unable to ascend the stairs at Post-3 shall be referred to Post-1 where they will be screened unless escorted by security staff.
   3) A security staff member assigned to the Bray Courthouse screening shall monitor the jury panel as it crosses Ward Street to ensure no unauthorized person(s) approach the jurors or enter into the jury line.
   4) Friends or family of the jurors will NOT be allowed to enter Post-3 and must enter through Post 1 or 2 to be screened.

### I) PROCEDURE

1. In court facilities, court employees, persons with restricted access, and peace officers will be admitted without being subject to weapon screening if they display the following identification:
   1. A valid employee identification card issued by Contra Costa County Court Administration.
   2. A valid employee identification card identifying a peace officer, issued by a federal, state, or local law enforcement agency.
   3. Plainclothes officers, who are on official business, will be allowed to bypass screening with proper department identification.
   4. Judges and other judicial officers who display a current identification card issued by Contra Costa County Court Administration.
   5. County employees who display a current Contra Costa County General Services Division (GSD) identification.
   6. All others identified by Court Administration policy.
   7. Attorneys who possess current bar cards and valid photo identification. *PDF Bar cards are now being issued by the State Bar Association. These PDF cards are acceptable and are usually on the attorney's phone or other electronic device. Paper bar cards may be used during a grace period while awaiting the issuance of a renewed or new card.*
B) Attorneys representing themselves, or entering the building on personal matters, are not exempt from screening.

C) Court staff appearing on personal matters are not exempt and must go through the screening process.

D) **NO PEACE OFFICER** appearing on a personal matter, such as his/her family law case or filing papers shall be permitted to carry **ANY** weapon in a courthouse and must go through the screening process.

1) They shall be asked to secure their weapon(s) in their vehicle.

2) If this is not an option, the peace officer will be referred to the Court Security Office to have the weapon(s) secured by the Operations Deputy or designee.

   a) Due to an unforeseen scenario, the court security supervisor may authorize the securing of firearms at the post gun lockers, if available.

E) Individuals who are members of foreign consulates are subject to search but, their diplomatic pouches are exempt and will not be allowed in without approval by a supervisor. State Department’s Operation Center 24/7 phone number is 202-647-1512.

F) The Superior Courts in conjunction with the Office of the Sheriff of Contra Costa County reserve the right to revoke anyone’s “exempt status” for bypassing screening.
I) POLICY

A) The Judicial Council of California approved a rule permitting television, radio and photographic coverage of state court proceedings effective July 1, 1984, under certain conditions. Court Security personnel will ensure the rule is followed.

II) PROCEDURE

A) California Rules of Court: 1.150 replaces rule 980 through 980.3 dated before July 1, 1984. The new rule will incorporate the following provisions:

1) Courtroom photography and recording is permitted, subject to the consent of the trial judge and any restrictions the court might impose in the order to protect the rights of the litigants, preserve the dignity of the court and prevent disruption of the proceedings. (“Court” means the courtroom at issue, the courthouse, and its entrances and exits). The Presiding Judge authorizes courthouse photography and recording.

B) All restrictions found in experimental rule 980.2 (1.150) apply. The experimental rule is before July 1, 1984.

C) A provision of the rule effective July 1, 1984, provides that the clerk must promptly inform the parties when a request is made for film or electronic media coverage.

D) Perimeter screening personnel will not allow cameras and recording devices to enter the courthouse.
1) Court Security personnel confronted with anyone attempting to enter the courthouse with any items listed in the above definitions will do the following:

(a) Ask the person(s) their destination (courtroom).

(b) Ask the person if they have submitted a request to the bench officer of the courtroom.

(c) Absent a court order; the screening station will contact the court bailiff to determine if the device has been approved and inquire about the order.

(d) Screening personnel will ensure these approved devices are thoroughly examined and x-rayed before allowing them into the courthouse.

(e) If you are unsure, call a Court Security supervisor.

E) EXCEPTIONS

1) Personal cell phones with audio and photographic recording abilities are allowed in the courthouse, although persons using their cell phone in a manner, which violates this policy will have their cell confiscated while the incident is investigated.

2) It is incumbent upon all Court Security staff working within the courthouses to monitor any person using a recording device (i.e. cell phone) in violation of this policy to take action.

### CHAPTER:
- Weapons Screening

### I) PROCEDURE

- **A)** The Post 6 door is located outside on the southeast corner of the A.F. Bray courthouse and connects the A.F. Bray courthouse to the Court Annex. The enclosure is a secure pass between the two courthouses. This door is alarmed and has a 15-second activation delay.

- **B)** The Post 7 door is also alarmed and is located on the east side of the Court Annex near room 2. This door is primarily used for an emergency exit.

- **C)** Personnel working at Post 4 & 5 can monitor persons using Post 6 & 7 by way of cameras. Post 6 has a two-way intercom, which allows persons to request entry and exit from the screening personnel positioned at Post 4 & 5.

  - *(The GSD employees use Post 6 to access the area for repairs and landscaping).*

- **D)** To deactivate the alarm at Post 6 & 7, personnel at either Post 4 or 5 must turn the key to the *off* position. The keyhole is marked "Post 6" or "Post 7". To reactivate the alarms turn the key to the left and back to center. This alarm key is assigned to all Sheriff's Rangers and Court Security Lead Deputies.

- **E)** To unlock the door and allow entry or exit through Post 6, personnel at Post 4 or 5 must turn the key (#1701) to "entry/exit." The keyhole entry/exit panel is silver plated and marked "entry/exit."

- **F)** If someone attempts to exit through Post 6 or 7, without permission from the personnel at Post 4 or 5, the alarm will sound. The door at Post 6 has a 15-second delay before unlocking. The door at Post 7 is not delayed for fire safety reasons.
Personnel should monitor the camera to determine if this is an accidental occurrence or intentional and notify the Security Office if there appears to be a breach of security.

Court Security Personnel escorting persons through Post 6 & 7 can request the alarm be deactivated via radio. Do not attempt to open the door until the screening personnel at Post 4 or 5 advise the alarm has been deactivated.

Persons entering coming in through Post 6 & 7 who are not exempt (see 4.10.07) must be taken to a screening post or hand wand at the entry point.

Both Post 6 & 7 are considered emergency exits and shall be manned by security personnel at the time of evacuation.

### I) POLICY

**A)** Court Security Services recognizes the need for a set of guidelines for Court Security personnel to do an effective job in the performance of their tasks. This general guideline of rules and procedures is by no means all-inclusive of every task. Court Security personnel should consult the specific operations orders (Department Bailiff Protocol) for their work locations for a more specific description of duties at each location. *(References: California Government Code –26625, 26611)*

### II) PROCEDURE

**A)** One area that encompasses a considerable share of the Sheriff’s responsibility is Court Security. This service provides direct support and direction for the County Superior Courts. In as much as all sworn personnel could, at any time, be called upon to work Court Security Services, these procedures are not limited to bailiffs and other personnel assigned to Court Security Services. All sworn personnel should make themselves aware of the provisions contained herein.

**B)** Deputy Sheriffs are assigned to each of the Superior Courts in Contra Costa County pursuant to section 26625 of the California Government Code. Courtroom security personnel are charged with the following responsibilities:

1) Preserving courtroom order.

2) The protection of judicial officials and the general public.

3) Care and custody of prisoners.

5) Other duties that may be assigned by a Court Security supervisor.
6) Annually reviewing and updating the courtrooms “Bailiff Protocol” procedures as needed.

C) Reading of personal periodicals and personal business conducted on electronic communication devices to include phone calls, tablets, text messaging, computers, etc., except during emergency situations, should not interfere with normal duties or disturb the work environment and is prohibited.

D) Before any court session, there are duties a bailiff will be required to complete to ensure the proper operation of the courtroom. The bailiff will follow the guidelines below to ensure his/her courtroom is ready for the court calendar:

1) Inspect courtroom for suspicious containers, any recognizable explosive devices, narcotics, and contraband. All suspicious packages should be dealt with the utmost caution.

2) Check and report to Facility Maintenance any mechanical failures within the courtroom, which includes:
   
   (a) Electrical
   
   (b) Plumbing
   
   (c) Heating and ventilation systems.

   • If any of these issues arise, the bailiff will notify the Operations Deputy or a supervisor.
   
   • The Operations Deputy will notify Court Facilities via email describing the location and type of problem.

3) Check and refill water containers and re-supply bench and counsel tables with disposable cups.

4) Turn on public address system.

5) Check and restock diagram paper and marking pens for use in witness testimony.

6) Review court calendar.

   (a) Ascertain unusual or high profile cases on the calendar.

   (b) Request the court take the person out of order thus removing
potential threat.

(c) Coordinate with the Operations Deputy to ensure in-custody cases are posted for transport to the courtroom at the appropriate time.

7) Communicate with the Operations Deputy or supervisor any security concerns. The bailiff should educate him or herself as to the anticipated problem and be able to articulate why the problem may cause a security concern.

8) When the courtroom is opened to the public, request all persons present be seated. Be alert to any suspicious or unusual persons present in court. If needed contact these persons before starting court. THINK SECURITY.

a) If a large group of spectators is gathered the bailiff should caution them as to their expected conduct while in the courtroom. Any anticipated problems should be reported to a Court Security supervisor.

E) All bailiffs will communicate with the courtroom clerks regarding the inspection of mail and packages delivered to the courtroom.

1) The bailiffs will communicate with the court clerk regarding mail inspection procedures regardless if the clerks/bailiffs are permanently assigned to that courtroom.

2) The court clerk should inspect the mail and parcels delivered to the courtroom. It is imperative that each bailiff discusses with the assigned clerk the importance of reporting any item of mail believed to be suspicious.
(e) Any suspicious package should be immediately reported to a Court Security supervisor.

F) Ensure that all appropriate court paperwork, as it relates to in-custody prisoners (defendants), is completed and accompanies the prisoner to the jail.

1) This paperwork includes but is not limited to:

(a) Any documents that change the status of the prisoner (i.e., sentenced time, bail reduction, release from custody, etc.). This paperwork is in addition to a court card or head card, and is authored by the court and sent to the jail to update a prisoner’s custody file.

G) Bailiffs should be aware there are two types of jury instructions.

1) CALJIC (Criminal) and BAJI (Civil).

2) The judge may request his/her bailiff to assist the court clerk in preparing the jury instructions.

3) The judge may request the instructions, which go to the jury, be prepared in a certain way. Always ask if you are unsure.

H) In-custody defendants who are representing themselves. (Pro-Per).

1) Before the start of the hearing, the bailiff should confer with the judge (and counsel) to discuss security issues.

4) Any security concerns should be referred to a Court Security supervisor.

I) All Court ordered, “Book and Release,” should be referred to the Custody Alternative Facility. Persons referred shall be advised to call for an appointment before arrival. (They will no longer be referred to the MDF).
PROCEDURE

I) Court Security personnel shall enforce and follow the guidelines below to maintain the proper court decorum while court is in session.

A) Persons entering the courtroom shall not be allowed to:

1) Use tobacco products (smoke cigarettes, chew, dip, or snuff)
2) Use E-cigarettes
3) Use Marijuana
4) Use any illegal drugs or consume alcohol
5) Bring in food or drinks (other than water)
6) Socialize
7) Sleep
8) Read newspapers, books, or magazines
9) Enter the court with bare feet
10) All electronic equipment such as cell phones, tablets, and laptops, shall be turned off.
11) Wear any headgear (i.e. hats, earphones, sunglasses without a prescription).
12) Wear clothing, which causes a distraction and disrupts the courtroom proceedings.
   1) Those persons may return when properly attired for court.

B) When courtroom security personnel observe a violation of courtroom regulations, the deputy or ranger shall attempt to resolve the violation in a courteous, diplomatic manner.
   1) If such violation requires action by the bailiff or other court security personnel, the violation shall be communicated to the offending person in a private, discreet manner not to disrupt the court.
   2) In the event, the person becomes argumentative or disruptive; they will be asked to leave the courtroom.
      1) Depending on the circumstances, the person may be asked to wait outside until their case is called.
      2) The bailiff will then call the person back into the courtroom if they can follow the courtroom rules.

C) Individuals with small children or babies who cannot be controlled will be asked to wait outside the courtroom until their matter is called.

D) In the event, a bailiff has questions regarding any courtroom procedures, which conflict with security, they shall notify a Court Security supervisor.

E) During trials, especially jury trials, Court Security personnel will refrain from unofficial contact with attorneys, witnesses, or jurors, which might convey the impression of partiality. Personnel shall refrain from:
   1) Commenting on the evidence, orders, judgments, verdicts, or the conduct of attorneys, witnesses, and jurors.
   2) It is the duty of Court Security personnel to appear nonpartisan, regardless of personal opinion.
   3) Court Security personnel shall try to remain free of facial expression, which could be construed as an opinion.

F) When a witness is called to testify, the bailiff shall notify the witness to come forward and will direct him/her to the witness stand.
G) Depending on the proceeding before the court, the bailiff may be seated or remain standing. In either case, the bailiff will stay alert and observe the courtroom for any situation that may arise.

H) When a prisoner(s) is present, the bailiff shall take a position to prevent an escape.

I) The bailiff shall be aware of exhibits offered as evidence.

1) The bailiff may assist the clerk in marking and posting exhibits as long as it doesn’t diminish the security level in the courtroom, i.e. in-custody prisoner.

J) When the courtroom is open to the public court security staff is prohibited from reading personal periodicals conducting personal business on electronic communication devices to include phone calls, text messaging, computers, etc.

K) Deputies allowing prisoners to be seated at the witness stand shall familiarize themselves with Court Security manual policy number 4.14.11.
I) PROCEDURE

A) The deputy in attendance upon the court shall act as crier thereof. He/she shall call the parties and witnesses and all other persons to appear before the court, and make the proclamation of the opening of the court and any other matter under its direction.

B) There is no statutory manner in which the bailiff shall open the court. The customary opening for the court is: “Please rise, Department (Dept #) of the Superior Court of the State of California in and for the County of Contra Costa is now session. The Honorable (Full name) judge presiding, (after the judge takes the bench), please be seated.”

C) As a general rule, with the approval of the judge, an informal opening is used after recesses and for the afternoon session. An informal opening usually consists of: “Remain seated and come to order” or “Court is again (or now) in session” or “Please rise, be seated and come to order.”

D) When in doubt ask the judge what his/her preference is.
I) POLICY

A) When transporting prisoners to and from court, Court Security personnel will employ practices and procedures, which guard against escape, ensure the safety and well-being of prisoners, staff, and the public.

II) PROCEDURE

A) DEFINITIONS:

1) Courts Holding: The holding cells in Transportation (MDF)

2) Courtroom Security Booth: The transparent enclosure located in the arraignment courtrooms where in-custody prisoners are secured for short hearings.

3) Court Link: The enclosed corridor, which connects the A.F. Bray Superior courthouse with the Martinez Detention Facility. This is used for the transportation of prisoners to and from the Martinez Superior Courts.

4) Staging Area: The holding area at the north end of the court link, on the first floor of the A.F. Bray courthouse. This is used to house prisoners awaiting their court appearances.

5) Bailiff: The Deputy who is temporarily or permanently assigned to a courtroom.

6) Floor Deputy: A floor deputy is usually assigned to each floor, during in-custody hearings, at the Superior Court Buildings in Martinez. Their duties are as follows:
   
   a) The transportation of in-custody prisoners to and from court.
(b) Responding to emergencies.
(c) Providing relief to bailiffs and or screening personnel.
(d) Other duties as assigned.

B) Court Security Service deputies will pick up prisoners for court at the Martinez Detention Facility Transportation / Courts holding area.

1) Court Security will not normally escort inmates from their living modules.
   (a) EXCEPTION: Some Ad-Seg prisoners are not held in Transportation and may need to be picked up and returned to their assigned module.

2) Court Security will not normally “dress-out” Martinez Detention Facility prisoners for jury trials.
   (a) EXCEPTION: Some Ad-Seg prisoners are not held in Transportation and may need to be dressed out for jury trials. Court Security deputies shall coordinate with the Transportation Unit to determine if the prisoner has been, or will need to be, dressed so as not to delay the court.

C) Court Security deputies will ensure that all appropriate paperwork (i.e., court card, head card and necessary court appearance paperwork) is obtained before transporting the prisoner(s) to and from the court.

D) Court Security Unit deputies will ensure that all prisoners are searched before leaving and when returning to the MDF in accordance with Custody Service Bureau Policies and Procedures manual section 2.08.39. All prisoners will be secured with handcuffs (per Court Security Unit manual procedure 4.02.03) before transporting.

E) For prisoners with special medical or physical considerations (such as crutches or arm casts), which prohibit the use of handcuffs, leg shackles and waist chains will be used. Prisoners will not be transported to courts outside the Martinez Detention Facility unrestrained.

G) Any prisoner transported individually will be handcuffed behind their back or with the use of a waist chain.

H) Protective Custody (PC) and Administrative Segregation (Ad-Seg.) prisoners
will be transported and housed separately. At no time is an Ad Seg. or PC prisoner to be handcuffed on the chain with compatible prisoners.

I) Whenever it is necessary to transport a prisoner through a public area, Court Security deputies will use extreme caution to ensure personal safety, the safety of the public, and the safety of the prisoner.

J) Any unusual conditions or transportation problems should be reported immediately to a Court Security supervisor.

K) Court Security deputies are expected to be attentive at all times. Each deputy is expected to understand and demonstrate good officer safety. The Prisoner should lead, guided by voice commands. Maintain a position of advantage, gun-side away and do not hold onto prisoner unless situations demand it. Carrying and/or drinking beverages or eating is prohibited while escorting prisoners.

L) Reading of personal periodicals and personal business conducted on electronic communication devices to include phone calls, text messaging, computers, etc., except during emergency situations, should not interfere with normal duties and/or disturb the work environment and therefore prohibited.

M) Check with the court bailiff before transportation to a courtroom.

O) To minimize confrontations, request the public clear the courtroom before moving an in-custody prisoner from a jury trial.

Under normal circumstances, prisoners and new remands being seen in courthouses other than the Bray and Court Annex will enter and exit the Martinez Detention Facility.

Q) Newly remanded prisoners will be escorted directly to the jail intake area, where the Court Security deputy will complete all necessary booking paperwork.

R) Prisoners (Defendants) who are released on their charges are still considered a prisoner until the completion of C.S.B. Policy section: 2.11.11-Inmate Release Process. Prisoners shall not be released from the courtroom. All prisoners (Defendants) shall be transported back to the jail in the same manner in which
they arrived in court per Court Security Policy section: 4.02.03 – Security and Control of Prisoners.

S) JUVENILE TRANSPORTATION: When a juvenile is being transported the Court Security deputy(s) shall be mindful of adult prisoner(s) throughout the security hallways and holding cell areas and shall make every attempt not to allow contact between juvenile and adult prisoner(s). No juvenile shall be housed in the staging area without approval from a supervisor.

T) Deputies shall familiarize themselves with Court Security Policy section: 4.13.03-Juvenile Arraignment and Hearings.

V) When Juvenile Hall Transportation brings a prisoner through the A.F. Bray Courthouse, the Lead Deputy, assigned Bailiff, or Floor Deputy shall escort Juvenile Hall personnel with the prisoner to the designated courtroom. The procedure shall be done in reverse when the juvenile matter has concluded.

W) In addition to being pat searched, prisoners shall be scanned for metal objects concealed upon their person by using a hand-held metal detector. This secondary screening process is an extra layer of protection to locate weapons or contraband from entering the courtroom or jail.

X) Each court shall designate a “wanding area” which allows the deputy easy access and ability to wand the prisoner before entering the courtroom and then when being returned to courts holding or the satellite court jails.

III) PREGNANT PRISONERS

A) The deputy shall confirm all pregnancy claims through jail medical staff.

1) Pregnant prisoners with a history of violence, escapes, etc., may only be restrained after the approval of medical staff. and a Court Security Supervisor.

B) If medical staff cannot confirm the prisoner is pregnant the deputy shall:

1) Notify a supervisor before transporting
2) Complete an I.R. before the end of the shift.
C) Unrestrained pregnant prisoners shall be transported separately.

D) Deputy’s transporting unrestrained pregnant prisoners shall maintain control of the prisoner by holding the prisoner’s upper arm.
I) PROCEDURE

A) Court Security deputies who are transporting prisoners to courts located within the A.F. Bray courthouse will secure their firearms, ammunition, and batons, etc. in the provided gun lockers per C.S.B. Policy and Procedure section - 2.08.46 – Control of Weapons and Armory Equipment.

B) Gun lockers are located on each floor in the security hallways on the west and east side of the courthouse. Access to these hallways is from the public corridor.

1) The access doors to these security hallways shall remain secured at all times.

C) After entering the elevator security area, the deputy will take the security elevator to the first floor, continue through staging, south through the court link, and exit the link at the Transportation courts holding area.

1) The total capacity of the security elevator is seven (7) persons including security staff.

D) If a juvenile is being transported, the Court Security deputy should be mindful of the adult prisoner(s) throughout the courthouse and holding cell areas and shall make every attempt to minimize contact between juvenile and adult prisoners.

E) When picking up and returning prisoners, deputies will follow the procedures outlined in the Court Security Manual section: 4.12.01 – General Duties – Martinez Specific
Once the prisoner has been collected from the MDF, the courts holding area deputy and prisoner will proceed north through the court link, east through staging to the security elevator. Deputies will escort the prisoner(s) into the security elevator, instructing the prisoner to face the rear of the elevator accompany the prisoner to the appropriate floor. At the appropriate floor, the deputy will exit the secure holding area, with the prisoner, by manually activating the intercom. The prisoner will be escorted into the security hallway. While the deputy collects his/her firearm, the prisoner will be directed to face the west wall away from the gun locker. The deputy will collect his/her firearm then proceed with the prisoner(s) to the appropriate courtroom(s). When transporting a prisoner across the public corridor, to the courtrooms on the east side of the courthouse, the Court Security deputy will have the prisoner remain facing the west side wall until a visual scan of the corridor, from the security doorway, can be conducted for any potential security concerns. Before crossing the public corridor, the deputy transporting the prisoner will notify the Operations Desk deputy via radio. The deputy should advise the bailiff of the court upon the prisoner's arrival. Under normal circumstances, the prisoner shall enter the courtroom using the security hallway access (side door entrance into the courtroom). All accompanying paperwork will be handed to the bailiff. Whenever possible prisoner restraints should be applied and removed at the defense table or the witness stand as long as: 1) Court is not in session 2) Jurors are not present. 3) The judge or bailiff has ordered otherwise. Prisoners shall be returned to the MDF utilizing the reverse of this procedure. The floor deputy and bailiff are responsible for notifying the Operations Deputy when a prisoner has completed their hearing.
I) PROCEDURE

A) The deputy may transport a maximum of three (3) "compatible prisoners" at one time.

B) All prisoner(s) shall be restrained with leg shackles and waist chains.

C) Any prisoner administratively segregated (Ad-Seg) by the Jail’s Classification Unit shall be moved in the most security conscious manner available.

D) Physically impaired prisoners will be transported in the most security conscious manner available.

E) Pregnant inmates, known to be pregnant, in labor, or immediately following delivery, will not be restrained by the use of leg chains, waist chains, or handcuffed behind their body while being transported. C.S.B. Policy and Procedure section: 2.08.29 – Inmate Transports.

G) The deputy will enter the court link and proceed to the MDF courts holding to pick up the prisoner(s) and any accompanying documents. The prisoner(s) will be secured as described above in Procedure I A thru C and searched per C.S.B. policy 2.08.39.

H) The deputy will escort the prisoner...
L) The prisoner(s) shall be called out once it appears safe to do so.

2) The floor deputy should communicate with bailiffs who have prisoners in their courtroom if they intend on leaving.

R) The judge or bailiff has ordered otherwise. Prisoners shall be returned to the MDF utilizing the reverse of this procedure. The floor deputy and bailiff are responsible for notifying the Operations Deputy when a prisoner has completed their hearing and left the courthouse.
I) PROCEDURE

A) The Post-3 entrance/exit door is designated as an emergency exit only with a few exceptions detailed in this procedure.

B) Security staff at Post-2 shall monitor the movement of persons entering and exiting Post-3.

C) Post-2 security staff may have to slow or stop screening until persons can safely enter/exit Post-3.

D) Persons entering and exiting Post-3 shall do so under the following conditions:

1) The public may only exit Post-3 during emergencies.
2) Judges, Commissioners, and Court Security staff may enter and exit using their assigned electronic key card.
3) Juvenile Probation Officers escorting prisoners shall enter in the following manner:
   a) Using the intercom located on the exterior of the Taylor Courthouse at Post-3, Juvenile Probation shall notify Post-2 security personnel of their presence.
   b) Post-2 personnel shall confirm the identity of the person requesting entrance/exit Post-3.
   c) Security personnel shall request Juvenile Probations courtroom destination and relay that information to the intended bailiff via portable radio.
After releasing the electronic lock, security personnel shall continue to monitor the door until it is secured to ensure no unauthorized persons enter.

When possible, security personnel shall monitor the movement of the Juvenile Prisoners via camera monitor through the East and South corridors.

When possible, Juvenile Court Bailiff's shall stand-by the entrance of their courtroom door and monitor the movement of Juvenile Prisoners approaching and leaving their courtroom.

Upon completion of the Juvenile hearing, Courtroom Bailiff's shall notify Post 2 of departure through Post 3.

Post 2 security staff shall monitor Post 3 and override the alarm to allow Juvenile Probation to exit.

Post 2 security personnel shall continue to monitor the Post 3 door until it is secured to ensure no unauthorized persons enter.

Court security staff transporting prisoners through the Post-3 door shall use the assigned electronic key card to bypass the alarm.

The transport deputy shall notify the bailiff of their pending arrival.

Jury panels entering through Post 3 shall be escorted from The A.F. Bray Building to the Taylor building by the bailiff or security deputy.

Escorting security personnel shall request Post 2, to de-activate the Post 3 alarm.

The deputy or ranger from Post 4 shall monitor the jury panel as they cross the street.

During an emergency (courtroom alarm, request for assistance, etc.) security staff at Post 2 shall stop all screening procedures.

Post 2 will monitor Post 3 to allow security personnel to enter or exit.

H) Emergency response or Evacuation

II) INSTALLED EQUIPMENT FEATURES
C) Interior phone and an audio speaker to communicate with persons at Post 2.

D) Intercom to communicate with persons on the exterior of Post 3.

E) Exterior camera to monitor persons using Post 3.

F) Interior Pan-Tilt-Zoom (PTZ) camera to allow staff to monitor persons using Post 3.

G) Interior and exterior override key card devices for persons authorized to use Post 3.

H) Doorbell chime locates at Post 2 to notify personnel anytime the Post 3 door is opened.

I) Over key box (#555) locate at Post 2 to turn off the alarm.

J) A phone capable of calling and communicating with persons waiting at Post 3.

K) Video monitor to observe persons using Post 3.

Clearance: Court Security

Chapter: Arraignment Courts

Subject: Annex Courtrooms

I) Procedure

A) There are two deputies (Podium and bailiff) assigned to each of these courtrooms. These deputies will become familiar with and comply with the procedures of the court. Each court may operate slightly different. Below are some general guidelines:

B) Podium Deputy Responsibilities

- Obtain the court calendar from the court clerk.
- Obtain inmate head cards and paperwork from MDF Transportation.
- If applicable, maintain the calendars and the attorney sign-in.
- If applicable, coordinate with the District Attorney to determine which prisoners are needed in court.
- Advise Transportation via intercom the names of the prisoners to be placed in the court holding sally port A, B, C, or D.
- The podium deputy will secure their firearm, ammunition, and baton in the gun locker provided at the podium. (NO FIREARMS ALLOWED IN SECURITY BOX)
- The deputy will retrieve prisoners from the court holding sally port and bring them into the security booth located in the courtroom.
- Prisoners being brought into the security booth shall be seated until called. The deputy shall be conscious of CSB policies concerning male
10) Persons approaching the security booth shall check with Court Security personnel.

11) Court Security personnel shall monitor all persons near the security booth to ensure safety and security are maintained.

12) The podium deputy will coordinate the classification status (i.e. Ad-Seg, PC, etc.) of prisoners before bringing them into the security booth.

13) The podium deputy will convey any security concerns to the courtroom bailiff and work closely with the bailiff to keep the criminal calendar moving in the most efficient and security conscious manner.

14) As prisoners conclude their court business, the deputy will return the prisoner to the court holding sally port and advise Transportation.

15) Ensure all paperwork and head cards are returned to Transportation.

**Courtroom Calendar Guideline**

1) 

   a) Conduct a security check of courtroom security booth and sally ports A & B or C & D depending on which courtroom.

   b) Pick up the in-custody list, alpha list and court cards from sally port.

   c) Write in in-custody warrants on attorney sign in sheet and make out the in-custody worksheet.

   d) Obtain Public Defender (PD) acceptance forms and arraignment cards from the bailiff and advise if any interpreter is needed.

   e) Start coordinating with the bailiff and courtroom District Attorney the in-custody matters for the day (a.m.).

   f) Contact Transportation and have them load the needed prisoners into the A or B sally port.
2) Coordinate in-custody appearances in court with the bailiff, District Attorney, and Defense Attorneys.
   a) Load the requested prisoners into the security booth.
   b) Coordinate with the bailiff and complete appropriate paperwork i.e. probation orders, arraignment cards, PD referrals, sex/drug registration, CAF and EHD forms, etc.

3) Repeat procedure for morning calendar and record stats.

D) Courtroom Preliminary Hearing Guideline

1) Conduct security check of courtroom security booth and sally ports C & D.
   a) Pick up the in-custody list from sally port C or D and make six copies.
   b) Start coordinating with the bailiff the in-custody matters for the day.
   c) Contact Transportation and have them load the needed prisoners into the sally port(s).

2) Coordinate in-custody appearances in court with the bailiff and Defense Attorney’s and load the security booth.
   a) As needed, in each case, obtain and complete appropriate paperwork (same as above).

3) Repeat procedures for the morning calendar

E) Courtroom Bailiff Responsibilities

1) The courtroom bailiff will focus on the activities of the persons in the gallery and out-of-custody matters.

2) If the court is in session after 1630 hours, the courtroom bailiff will deliver a copy of the calendar to the MDF.
3) Update prisoner court cards and complete necessary court paperwork.

4) Work closely with the podium deputy to keep the criminal calendar moving in the most efficient and security conscious manner.

5) Coordinate and communicate with the podium deputy the classification status (i.e. Ad-Seg, PC, etc.) of prisoners before bringing them into the security booth.

6) Convey any security concerns to the podium deputy and work closely with the deputy to keep the criminal calendar moving in the most efficient and security conscious manner.
1) PROCEDURE

A) When a defendant is remanded the bailiff, or podium deputy will handcuff the individual behind his/her back and perform a search for weapons and contraband.

B) The bailiff or designee will complete all appropriate MDF booking paperwork.

   1) Booking authority
   2) Pre-booking medical questionnaire
   3) Property receipt

C) The remanded prisoner will be kept separate from the prisoners in the security booth until the appropriate time to transport.

D) The bailiff or podium deputy will coordinate with Transportation or the Operations Deputy to transport the prisoner to the MDF intake area.

E) All paperwork for the booking process will be given to the booking deputies.
1) PROCEDURE

A) Juveniles transported by the Sheriff’s Office Transportation Unit are brought to the courthouses for arraignment or hearings, most of which are conducted in the arraignment courtrooms in the Court Annex.

B) When the juvenile arrives, the Operations Deputy receives a call from Transportation who will forward the information to the court bailiff hearing the matter.

C) If the court is not ready to hear the juvenile’s case, the juvenile will be temporarily housed on the second or third floor of the A.F. Bray courthouse.

D) The floor deputy where the juvenile is to be temporarily housed, will pick up the juvenile from Transportation and take him/her to the appropriate holding cell (preferably on the west side).

1) If the floor deputy is unavailable to assist in the transport procedure, then any available deputy may be called upon to assist.

2) A Court Security supervisor shall be notified if the transport of the Juvenile is being delayed.

E) The floor deputy will communicate with the Operations Deputy concerning the transport to ensure the movement through the court link, staging area and security elevator is conducted in a way that minimizes the chances of the juvenile coming within “sight or sound” of an adult prisoner.

F) When the juvenile is placed into a court holding cell the floor deputy will make the appropriate cell-log entry in INK and continue to monitor the juvenile every 15 minutes while he/she is housed in the cell.
G) The floor deputy will be responsible for ensuring the other courtroom bailiffs on the floor are aware there is a juvenile housed in a cell.

1) The placement of signs advising of a juvenile’s presence should be posted.

H) When the bailiff or assigned podium deputy of the court hearing the juveniles case is ready for the juvenile, they shall notify the Operations Deputy who will coordinate with the floor deputy where the juvenile is temporarily being housed to ready the juvenile for transport.

1) The podium deputy will ensure the courtroom security booth is empty of any in-custody adult prisoners, with the exception of an adult co-defendant.

I) The floor deputy will assist if called upon to collect the juvenile, make the appropriate cell-log entry, and coordinate with the podium deputy to transport the juvenile to the Court Annex.

J) All in-custody juveniles being transported to the Court Annex for hearings will have escort the juvenile from the security elevator to the Court Annex and back.

K) All Court Security personnel involved in the transport, to include the bailiff and Operations Deputy, shall be mindful of the dangers of moving in-custody prisoners through public areas and shall communicate via radio when any potential problem arises needing immediate attention.

L) The bailiff will prepare his/her courtroom for the pending arrival or departure of the juvenile, by accessing any potential problems (i.e. victim’s, witnesses, etc.) and the least confrontational route for the transporting deputies to enter and exit the courtroom. The bailiff may make a request of the persons seated in the gallery to remain seated until the juvenile prisoner has left the courtroom.

M) The juvenile shall be returned to his/her holding cell in the reverse order, unless Transportation is ready to take the juvenile back to Juvenile Hall.
N) If the court is ready to hear the juvenile’s case when the juvenile arrives, the podium deputy of the court hearing the juvenile’s case will respond to Transportation and take custody of the juvenile.

O) The podium deputy will coordinate with the Operations Deputy for any available deputy to assist with moving the juvenile through the public hallway to the Court Annex.

P) After completion of the hearing the juvenile shall be taken to a holding cell, unless Transportation is ready to take the juvenile back to Juvenile Hall.
I) PROCEDURE

A) DEFINITIONS:

1) MDF Courts Holding: The holding cells in Transportation (M.D.F.)

2) Courtroom Security Booth: The transparent enclosure located in the arraignment courtrooms where in-custody prisoners are secured for hearings.

3) Court Link: The enclosed corridor, which connects the A.F. Bray Superior courthouse to the (MDF), is used for the transportation of prisoners to and from the Superior Courts.

4) Staging Area: The holding area at the north end of the court link on the first floor of the A.F. Bray courthouse. This is used to temporarily house prisoners in holding cells awaiting their court appearances.

5) Podium Deputy: Also known as the Calendar Deputy, is assigned to the arraignment courtrooms to maintain the calendars and attorney sign-in. The podium deputy coordinates with the staging deputy and bailiff providing the names of the prisoners to be brought to the staging area holding cells, advising when to bring prisoners into court, and when to return the prisoner(s) to courts holding.
E) The staging deputy will receive a list from the podium deputy of all prisoners being transported to court. If applicable, the list should include any special prisoner housing considerations such as, administratively segregated prisoners.

F) The podium deputy, if needed, may accompany the staging deputy to the Martinez Detention Facility courts holding area to pick-up and transport the optimum number of prisoners needed for court or staging.

H) Court Security deputies will enter MDF courts holding using the court link, which connects staging to courts holding by an enclosed corridor.

I) Upon returning to staging, prisoner restraints shall be removed and they may be taken directly into the courtroom security booth depending on the direction of the podium deputy and/or bailiff.

K) Prisoner classifications shall be reviewed before filling the security booth or removing restraints. The special classified prisoners will have an effect on the number of prisoners allowed in the security booth at one time.

L) Deputies shall be conscious of CSB policies concerning male and female contact when seating male and female prisoners in the security booth. A good rule to follow is to allow enough space to minimize the opportunity for contact, i.e. one seat width.

N) The staging deputy will coordinate with the podium deputy in moving the now unrestrained prisoners from the staging area to and from the courtroom by using the sally port located between the staging area and the courtroom security booth.
P) The staging deputy will remove any prisoners, upon request of the podium deputy or bailiff, from the security booth who have completed their court appearance and return the prisoners to staging awaiting the completion of their court paperwork.

Q) The staging deputy will coordinate with the podium deputy and/or bailiff when to return the completed prisoners with paperwork to the MDF courts holding area and collect any additional prisoners and paperwork awaiting their court appearance.

R) If prisoners are present in the security booth at the time an out-of-custody subject is remanded into custody, take care not to intermingle the newly arrested/remanded subject with the prisoners in the security booth. The proper booking paperwork shall be completed prior to moving the newly remanded prisoner to the MDF intake area (see 4.13.02).

S) The staging deputy will coordinate with the podium deputy when to transport any “special handling prisoners” i.e., administratively segregated prisoners.

T) The staging deputy will maintain a cell log of all prisoners and conduct cell checks twice an hour for adults and every 15 minutes for juveniles or SUI. The log shall be turned in to the Court Security Office at the end of each workday. When staging is no longer being used, it will be indicated on the cell log. A safety cell check will be conducted and noted in INK on the cell log at the beginning of each days use and checked prior to leaving.

U) NO JUVENILE SHALL BE HOUSED IN STAGING WITH AN ADULT. A SUPERVISOR MUST APPROVE HOUSING A JUVENILE IN STAGING.

V) The staging area may be temporarily used to hold a prisoner(s) without a staging deputy with prior approval from a supervisor.

W) Deputies transporting prisoners will ensure that all P.C. and Ad Seg prisoners being brought to court/staging or returned to MDF Courts Holding are placed in the proper room.

X) The staging deputy may be called upon to assist in collecting a juvenile prisoner from the second or third floor of the Bray courthouse for the arraignment courts located in the Court Annex. If so,

1) The staging deputy will ascend to the floor and remove the juvenile from the holding cell and return to the first floor.

   1. The staging deputy will either hand off the juvenile to other transport deputies waiting in the public hallway on the first floor, or:

   2. Collect his/her firearm from the gun locker and assist in transporting the juvenile southward through the public hallway into the Court Annex.
I) PROCEDURE

A) The deputies assigned to this arraignment department will become familiar with and comply with the procedures, which include the staging deputy duties (4.13.04). The following is a general outline and subject to change:

1) The podium deputy will coordinate with the courtroom bailiff to maintain the calendars and attorney sign-in.

2) The podium deputy will also coordinate with the staging deputy and bailiff providing the names of the prisoners to be brought to the staging area holding cells, advising when to bring prisoners into court, and when to return the prisoners to courts holding.

3) The podium deputy will also ensure the paperwork and head cards are given to the transport deputy to ensure they return with the prisoner to the MDF.

4) The podium deputy will check the head and court cards on all prisoners being transported to and from court.

(a) Any prisoners who are scheduled for court at the same time that need to be separated, [REDACTED] This information will be shared between the Court Security personnel and court staff if necessary.
6) Deputies shall be conscious of CSB policies concerning male and female contact when seating male and female prisoners in the Security Booth.

   (a) A good rule to follow is to allow enough space to minimize the opportunity for contact, i.e. one seat width.

B) Courtroom Calendar Guideline:

1) 

   (a) Obtain daily alpha lists from the M.D.F. Conduct security check of staging area and Court Security booth.

   (b) Receive and review calendar.

   (c) Compile a in-custody worksheet for morning appearances.

   (d) If applicable, assist the staging deputy with in-custodies being bought to the staging holding cell area.

2) 

   (a) Coordinate in-custody appearances with the calendar DA, court clerk, and defense attorneys.

   (b) As needed in each case, obtain, and complete appropriate paperwork, i.e. probation orders, arraignment cards, sex or drug registration forms, EHD or CAF forms etc.

3) 

   (a) Repeat procedures for morning calendar.

   (b) **Out of custody remands:** handcuff subject, search and inventory property, and place person in booth. Complete proper booking paperwork and advise intake via phone that a remand is en-route. (See 4.13.02 / 4.20.01)
C)  Bailiff Duties

1)  In the arraignment courtrooms the bailiff should also focus on the activities of the public citizens in the gallery and out-of-custody defendants / matters.

2)  If court is in session after 1630 hours the courtroom bailiff will deliver a copy of the calendar to the MDF.

3)  The bailiff may need to update prisoner court cards and complete necessary court paperwork.

4)  The bailiff will work closely with the podium deputy to keep the criminal calendar moving in the most efficient and security conscious manner.

5)  The bailiff will coordinate and communicate with the podium deputy the classification status (i.e. Ad-Seg, PC, etc.) of prisoners prior to bringing them into the security booth.

6)  The bailiff will convey any security concerns to the podium deputy and work closely with the deputy to keep the criminal calendar moving in the most efficient and security conscious manner.

D)  Podium Deputy (Juvenile defendants)

1)  The podium deputy may be called upon to assist in collecting a juvenile prisoner from the second or third floor of the Bray courthouse for the arraignment courts located in the Court Annex.

2)  The podium deputy will ascend to the floor and remove the juvenile from the holding cell and return to the first floor.

3)  The podium deputy will hand off the juvenile to other transport deputies waiting in the public hallway on the first floor.
I) POLICY

A) All juries are the responsibility of the courtroom bailiff. When a defendant chooses a trial by jury, the jury is selected, and the bailiff cares for the needs of the jury until the judge dismisses the jury.

II) PROCEDURE

A) Consideration of jurors is very important. It should be remembered that jurors make a personal sacrifice to give their time to assist the courts and the community; hence, they are entitled to every consideration and courtesy.

B) At each recess, the jurors should be allowed to leave the courtroom before the spectators.

C) Sworn jurors who are on a break, lunch, or retired for the day are restricted from talking to anyone (including other jurors) about the court case they have been assigned to hear.

D) When bringing the jury into the courtroom, the bailiff shall announce to the spectators and counsel the jury is entering.
I)  PROCEDURE

A)  The court clerk or bailiff will telephone Jury Services and advise them how many jurors are needed and what time they are needed

1)  Jury panels are assembled in the Jury Assembly Room (#1010) on the first floor of the A.F. Bray Courthouse.

B)  When the bailiff or designee makes contact with Jury Services they will be provided with the following paperwork:

1)  A packet of completed questionnaires (one from each prospective juror in the panel).

2)  Six lists containing just the names of prospective jurors and one containing both the names and addresses of the prospective jurors.

C)  When the jury panel is assembled the bailiff shall:

1)  Introduce themselves and the department they are assigned.

2)  Explain any courtroom etiquette (i.e., wearing sunglasses, hats, use of cell phones, or reading of newspapers, etc.) in the courtroom.

3)  Inform the jury of their destination if they are separated.

D)  Upon the arrival of the jury panel to the courtroom, the bailiff will work with the court staff on where to seat the jurors.
E) All jury paperwork shall be given to the court clerk who will dissemnitate it to the appropriate parties.

F) During the jury selection, as jurors are challenged or excused for cause, direct them to return to Jury Services (Rm. #1007).
# Court Security Policy and Procedure

## Chapter: Jury Trials

### Subject: Care of the Jury During Trial

### Procedure

1. **PROCEDURE**
   
   **A)** At the beginning each day and after breaks, when the judge is ready, he/she will ask that the jury is brought in.
   
   **B)** Before bringing in the jury, the bailiff should check to see:
   
   1. All participants (i.e. Council, witness, the defendant, etc.) in the trial are present and ready.
   2. All jurors are present and accounted for outside the courtroom.
   3. The court clerk and court reporter are present and ready.
   
   **C)** If the Defendant is in-custody, the bailiff shall make arrangements to have a deputy standby while the jury is collected and brought into the courtroom.
   
   1. If another deputy is not available to assist in a timely manner, the bailiff will coordinate with the judge or court clerk for someone else to collect the jury.
   
   **D)** The bailiff shall escort the jury out of the courtroom at all recesses.
   
   1. Names and seat numbers of each juror should be noted on the jury seating form.
   2. The Bailiff will ensure that each juror returns to his/her respective seat each time court reconvenes.
   
   **E)** The bailiff shall refrain from idle chit chat with any juror(s), especially about the trial or law.
F) He/she shall not offer opinions or answer questions regarding the trial except as directed by the judge.

G) Extreme care must be taken not to prejudice the jury in any way by actions, expressions or statements.

H) Care should be taken to avoid becoming overly friendly with the jurors. A professional demeanor shall be demonstrated at ALL times.

I) Any juror with a question for the court should be directed to submit it in writing through the bailiff to the judge.
I) PROCEDURE

A) Before closing arguments, the bailiff will locate an available Jury Deliberation Room nearest the courtroom.

B) The Bailiff will reserve the room by putting a sign on the door reading, “RESERVED.”
   1) In the A.F. Bray Courthouse, these signs are located in the on the jury deliberation doors
   2) In the Wakefield Taylor courthouse, the signs are kept in the bailiff's desk

C) Ensure there are writing tablets, pencils, cups, and fresh water in the jury room.

D) Set and test the jury room “bailiff call buzzer” and light.

E) Cellular telephones will be collected from the jurors and held for safe keeping at the judge’s direction.
I) PROCEDURE

A) California Penal Code section 1119 reads: *When, in the opinion of the court, it is proper that the jury should view the place in which the offense is charged to have been committed, or in which any other material fact occurred, or any personal property which has been referred to in the evidence and cannot conveniently be brought into the courtroom, it may order the jury to be conducted, in body, in the custody of the Sheriff or Marshal, as the case may, to the place or such property, which must be shown to them by a person appointed by the court for that purpose; and the officer must be sworn to suffer no person to speak or communicate with the jury, nor to do so himself, on any subject connected with the trial, and to return them to the court without unnecessary delay, or at a specified time.”*

B) The bailiff, upon the request of the judge or a sergeant, can arrange for transportation of the jury if necessary. The bailiff will coordinate with the counsel who requested and was granted the viewing.

C) In civil cases, when it is necessary to hire a bus, the bus driver shall be advised that the attorney(s) will pay for transportation, and shall be given the number and title of the case and the attorney’s card, if available.

D) In criminal cases, the court pays for transportation costs, if necessary.

1) The bailiff shall notify Court Administration who will make arrangements for transportation.

2) County vehicles should be employed when possible.

3) If a private conveyance is utilized, the driver shall be given the title and number of the case and shall direct that the bill is sent to the Superior Clerk of Contra Costa County.
E) When the judge grants an in-custody defendant to be transported to a viewing location the following steps will be followed:

1) The judge and counsel will be apprised of Court Security concerning how prisoners will be restrained when outside the detention facility (i.e. leg shackles, handcuffs, or waist chain).

G) A Court Security supervisor will be advised and assist in any security contingency plan.
I) PROCEDURE

A) Section 167 of the California Penal Code reads: Every person who, by means whatsoever, willingly and knowingly, and without knowledge and consent of the jury, records or attempts to record all or part of the proceedings of any jury trial while such jury is deliberating or voting, or listens to or observes, the proceedings of any jury trial of which he is not a member while such jury is deliberating or voting is guilty of a misdemeanor. This section is not intended to prohibit the taking of notes by a trial juror in connection with or solely for the purpose of assisting him in the performance of his duties as such a juror.

B) Section 613 of the Civil Code of Procedure states in part; Unless by order of the court, the Officer having them under his charge must not suffer any communication to be made to them, or make any himself, and he must not, before their verdict is rendered, communicate to any person the state of their deliberation, or the verdict agreed upon.

C) Section 95 of the California Penal Code reads: Every person who corruptly attempts to influence a juror, or any person summoned or drawn as a juror, or chosen as an arbitrator or umpire or appointed referee, in respect to his or her verdict in, or decision of, any cause or proceeding, pending or about to be brought before him or her, is punishable by a fine not exceeding ten thousand dollars ($10,000) or by imprisonment in the state prison, if it is by means of any of the following:

1) Any oral or written communication with him or her except in the regular course of proceedings.
2) Any book, paper, or instrument exhibited, otherwise than in the regular course of proceedings.
3) Any threat, intimidation, persuasion, or entreaty.
4) Any promise, of assurance of any pecuniary or other advantage.
I) PROCEDURE

A) The oath is authorized by Section 1121 of the California penal code.

B) The bailiff is sworn just before the jury retires for deliberation.

C) Bailiffs must be available at all times during jury deliberation.
   1) If the bailiff must be absent from their court, the bailiff shall notify another court bailiff to monitor the bailiff call buzzer until the bailiff can return.
   2) If applicable, the trial judge may swear in another bailiff to monitor the deliberating jury.

D) Any questions from the jury about the case must be in writing and answered by the judge.
   1) The request must be dated and signed by the presiding juror.

E) Do not discuss or talk about the case to a juror or near any juror.

F) The jury room is locked with the jury inside to keep outsiders from going in.
   1) If there is an emergency, the jurors can unlock the door from the inside.
   2) Advise them the door must remain locked and to call if they need a break.

## Chapter: Jury Trials

### I) PROCEDURE

#### A) Take the jurors to the jury room once the judge has given the case to them for deliberation.

1) Jurors are allowed to take, without the permission of the judge, their notes from the trial.

2) With the permission of the judge, exhibits admitted into evidence may be taken into the jury room.

3) In criminal cases, the Jury Instructions may be taken to the jury room upon the request of the jury and with the permission of the judge.

#### B) Change the "reserved" sign on the jury room door to a "Jury Deliberating" sign.

#### C) Give the jury a demonstration of the bailiff call buzzer.

#### D) Bailiffs are prohibited by law to give advice or instruct the jury.

1) A safe rule to follow is to submit all requests from the jury to the judge in writing.
Contra Costa County
Office of the Sheriff
Court Security Policy and Procedure

C.S.B. NUMBER: 4.14.09

RELATED ORDERS: None

CLEARANCE: Court Security

CHAPTER: Jury Trials

SUBJECT: Jury Verdict

I) PROCEDURE

A) When the jury has reached a verdict, the bailiff will return to the court and advise the judge.

B) Civil Cases
   1) Contact the attorneys and parties and assemble them in the courtroom with the court staff before returning the jury to the court to deliver the verdict.

C) Criminal Cases
   1) If a defendant is in custody, contact the floor deputy or Operations Deputy.
   2) Request the defendant be returned to the courtroom due to the jury reaching a verdict.
   3) After attorneys, the defendant(s), and court staff are present in court, bring in the jury.
   4) The reading of a verdict can be an emotional time. If the bailiff shall notify the Court Security supervisor.
   5) With in-custody defendants, the conclusion of the verdict being read, the bailiff will notify the MDF, Classification Unit, and Court Security supervisor concerning the outcome.
   6) All verdicts of “Death,” must be reported to Custody Administrative Services (CAS).
D) Jury Dismissed

1) After a verdict has been read, or a "hung" jury is declared, the judge will dismiss the jury.

2) Persons who are viewing the trial from the gallery will be reminded proper etiquette is to remain seated until the jury has left the courtroom.

E) It is not uncommon during a high-profile trial for the jury or judge to request an escort for jurors when leaving the courthouse. The bailiff shall coordinate with their judge and Court Security Supervisor their needs to successfully achieve this request.
I) PROCEDURE

A) Criminal Grand Jury

1) The District Attorney’s Office coordinates with the Presiding Judge to impanel a criminal Grand Jury.

2) The assigned courtroom bailiff collects the potential juror members from Jury Services.

3) Once the criminal Grand Jury has been seated the process of reviewing evidence and testimony is put on by the District Attorney’s Office out of the presence of a judge.

4) The Grand Jury may use a room in the courthouse or a room located at the District Attorney’s Office (900 Ward Street Martinez).

5) With no security concerns raised by the District Attorney, there is no need for the presence of a deputy during this period.

(a) A deputy may be present when a prisoner is called to testify unless the DA arranges to have the prisoner released to his custody by the use of a DA Investigator.

6) ALL court security staff shall recognize that testimony and evidence exhibited during the Grand Jury indictment process are confidential and shall not be discussed with anyone.

7) The location where the Grand Jury is seated and its members are also confidential.

8) Security personnel assigned to collect the panel shall make every effort not to disclose the juror’s identity to the public at large.
9) Additionally, the selection of the jurors, as well as, any subsequent findings by the Grand Jury is NOT OPEN TO THE PUBLIC.

10) Court Security personnel shall not post any signs to indicate where the Grand Jury is seated.

11) Persons requesting any information about the Grand Jury shall be directed to the District Attorney’s Office.

12) When the District Attorney has completed the hearing process, the Grand Jury members are assembled in a courtroom where the assigned Judge will hear the findings.

   (a) A deputy will be assigned to ensure the security and integrity of the process.

B) Civil Grand Jury

1) The Civil Grand Jury is composed of 19 citizens independent of administrators, politicians, and legislators.

2) Citizens volunteer up to one year and make recommendations that improve city and county services and save taxpayers money.

3) Candidates are processed through an application reviewed by the Martinez Superior Courts.

4) Court Security personnel are rarely if ever used for a Civil Grand Jury.

5) Persons inquiring about the Civil Grand Jury shall be referred to Jury Services.
I) POLICY

A) Court Security Services recognizes the need for a set of guidelines for Court Security personnel to do an effective job in the performance of their tasks. This general guideline of rules and procedures is by no means all inclusive of every task. Court Security personnel should consult the specific operations orders (Department Bailiff Protocol) for their work locations for a more specific description of duties at each location.

II) PROCEDURE

A) In-custody (I/C) prosecution or defense witnesses pose an additional security issue for the courtroom Bailiff.

B) The Bailiff shall obtain a date and time as to when the additional prisoner will be summoned to court and inform the Security Office to allow for sufficient personnel.

C) Although it is Court Security’s preference to have the additional deputy positioned near the I/C witness, the Court's preference may cause a reassessment as where to place the security personnel.

1) To assist the Court in making a sound security decision, bailiffs should educate the Court using the criteria listed below:

(a) The witness’s behavior while incarcerated.
(b) The witness’s criminal history.
(c) Is the witness hostile to the proceedings?
(d) The witness’s housing status

D) The above criteria shall also be reviewed for when an I/C defendant testifies.

3) The Court's preference may cause a reassessment of where to place the security personnel.

4) The Bailiff shall assume the agreed upon position in proximity to the Defendant while they testify.

E) Any security concerns shall be brought to the attention of a supervisor.
I) POLICY

A) The Judicial Council of California approved a rule permitting television, radio and photographic coverage of state court proceedings effective since July 1, 1984, under certain conditions. Court Security personnel will ensure the rule is followed.

II) PROCEDURE

A) Personal Recording Devices

1) When approval is granted by the trial judge, inconspicuous personal recording devices may be used by persons in a courtroom to make sound recordings as personal notes of the proceedings.

2) A person proposing to use a recording device shall inform the court in advance.

3) The recordings shall not be used for any purpose other than as personal notes.

B) Other Photographing, Recording or Broadcasting

1) Any other photographing, recording or broadcasting of court proceedings is prohibited unless specifically authorized by the court.

C) Unauthorized Use

1) Any unauthorized use of photographs, recordings or transmissions made under this rule is an unlawful interference with the proceedings of the court (PC 166(a)(4)).
D) Film or Electronic Media Coverage
1) Any recording or broadcasting of court proceedings by the media using television, radio, photographic or recording equipment.

E) Media or Media Agency
1) Any person or organization engaged in news gathering or reporting and includes any newspaper, radio or television station or network, news service, magazine, trade paper, in-house publication, professional journal or other news reporting or news gathering agency.

F) Media Coverage
1) Film or electronic media coverage is permitted only on written order of the court.
2) The court may refuse, limit or terminate film or electronic media coverage in the interest of justice to protect the rights of the parties and the dignity of the court, or assure the orderly conduct of the proceedings.
3) This rule does not otherwise limit or restrict the right of the media to cover and report court proceedings.

G) Request for Order
1) A request for an order shall be filed, on an approved form by the Judicial Council, in a reasonable time before the portion of the proceeding to be covered.
2) The clerk shall promptly inform the parties of the request.
3) Unless the order states otherwise, it does not apply to proceedings that are continued except for normal recesses, weekends and holidays.

H) Prohibited Coverage
1) Proceedings held in chambers, proceedings closed to the public and jury selections shall not be photographed, recorded or broadcast.
2) Conferences between an attorney and client, witness or aid, between attorneys or between counsel and the court at the bench shall not be recorded or received by sound equipment.
3) Close-up photography of jurors is prohibited.

I) Pooling
1) If more than one media agency wishes to cover a proceeding, they shall file a statement of agreements.
2) If they are unable to agree, the court may deny film or electronic media coverage by that type of media agency.
J) Equipment and Personnel

1) The court may require media personnel to demonstrate that proposed equipment complies with this rule.

2) The court may specify the placement of media personnel and equipment to permit reasonable coverage without disruption of the proceedings.

K) Unless the court, in its discretion and for good cause, orders otherwise the following guidelines shall be used for media coverage of court proceedings:

1) One television camera and one still photographer, with not more than two cameras and four lenses, are permitted.

2) Equipment shall not produce distracting sound or light. Signal lights or devices to show when equipment is operating shall not be visible.
   (a) Motorized drives, moving lights, flash attachments or sudden lighting changes shall not be used.

3) Existing courtroom sound and lighting systems shall be used without modification.
   (a) An order granting permission to modify existing systems is deemed to require that modifications be installed, maintained and removed without public expense.
   (b) Microphones and wiring shall be unobtrusively located in places approved by the court and shall be operated by one person.

4) Operators shall not move equipment or enter or leave the courtroom while the court is in session, or otherwise cause a distraction.

5) Equipment and clothing shall not bear the insignia or markings of a media agency.

L) Perimeter screening personnel will NOT allow cameras and recording devices to enter the courthouse (California Rules of Court section: 1.150).

M) Screening personnel confronted with anyone attempting to enter the courthouse with any items listed in the above definitions will do the following:

1) Ask the person(s) their destination.

2) Ask the person if they have submitted a request to the bench officer of the courtroom.

3) Absent a court order; the screening station will contact the court bailiff to determine if the device has been approved and inquire about the order.

4) Screening personnel will ensure these approved devices are thoroughly examined and x-rayed before allowing them into the courthouse.
I) PROCEDURE

A) Opens outside gun locker at the start of the day.

B) Inspects vehicle sally port area daily for weapons/contraband.

C) Inspects holding cells and jail areas for weapons, contraband, mechanical problems or damage. Reports problems/damage, if any, to the facility manager. Ensures that cells are supplied with toilet paper.

D) Receive daily in-custody list from the criminal clerk.

E) Coordinate any problems or special transportation needs with MDF Transportation.

F) Receive prisoners and documents with Sheriff’s Transportation. Assists Transportation Deputy with the loading and unloading of prisoners.

G) Search all incoming prisoners with the assistance of the Transportation Deputy.

H) Separate prisoners by classification and determine where the prisoners will be housed while at the facility.

I) Removes prisoners from holding cells when needed in court. Returns prisoners to the holding cells at the conclusion of their court appearances.

J) Provide inmate lunches.
K) Receive court documents about prisoners and give them to Sheriff’s Transportation Deputy.

L) Receives and searches court-remanded prisoners, completes all booking forms and controls prisoner property. Maintain a property log and retains copies of property receipts and booking forms.

M) Maintain daily and monthly prisoner logs.

N) Check prisoners twice an hour and document this in INK on the log.

O) Approve entrance into the security areas.

P) Notifies facility sergeant of any medical problems or housing compatibility issues with prisoners, any emergency situations, and any escapes or escape attempts.

Q) Inspect the holding cells for new damage (i.e., graffiti) when removing prisoners for transportation.

R) Prepare incident and crime reports involving Prisoner rules or statute violations.

S) Oversee prisoner/attorney interviews.

U) Secure the facility vehicle in the vehicle sally port at the end of the day.

V) Related Security Procedures

1) No guns, ammunition or batons are allowed within the holding facility.

2) Vehicle sally port will remain closed except when prisoners are arriving or departing.

3) The door accessing the vehicle sally port from the jail may be left open when necessary to provide adequate ventilation for the jail holding cells, as long as the vehicle sally port, roll-up door is CLOSED.
I) POLICY

A) Court Security Unit personnel will employ practices and procedures, which guard against escape, ensure the safety and well-being of prisoners, staff, and the public while transporting prisoners to and from Superior Court.

II) PROCEDURE

1) Upon arrival/departure, prisoners will be handcuffed using a waist chain. Both hands will be secured to the chain.

2) Prisoners appearing in the arraignment court do not need to be handcuffed while in the courtroom security booth.

3) When a prisoner is to appear in court whose status necessitates the use of restraints, the bailiff will explain the full reason for the use of the restraints to the judge prior to the proceedings (People vs. Duran, 1976 16 Cal. 3rd 282). The court relies on a showing of "manifest need" for restraints.

   a) This can include but not limited to:

      i) Prior escapes
      ii) Violation of jail rules
      iii) Violence or threats of violence towards staff, other prisoners, victims or witnesses.
      iv) Failure to comply with requests or instructions of transporting deputies.
      v) Plans to disrupt proceedings by non-violent means.
The court will then make an appropriate decision on the use of restraining devices in court.

D) Generally, the courtroom bailiff will transport prisoners from the jail area to his/her courtroom.

III) Juvenile - Transportation

A) In the event an in-custody matter is heard at this facility, the Juvenile Hall Transportation Unit will remain with the juvenile and transport the juvenile to court until the hearing is over.

B) There may be a parent who is in custody at one of the Sheriff’s detention facilities.

1) In such instances, the bailiff and/or security deputy is responsible for transporting an in-custody parent up to the court proceeding.

2) If additional security assistance is needed, contact the court security office and the appropriate supervisor.

C) If a juvenile is remanded into custody, the bailiff will handcuff the juvenile and escort him/her to the second floor holding cell.

1) Additionally, the bailiff will:

   a) Search the juvenile and complete necessary paperwork.

   b) Coordinate transportation with Juvenile Hall.

   c) Begin a log to document the arrest. Log entries will be made in INK to include fifteen (15) minute cells checks, the time placed in the cell, the time released to Juvenile Hall transportation, etc.

CHAPTER:
Richmond Courthouse (Specific)

SUBJECT:
Alarm Procedure

I) POLICY

A) All courthouse alarms at Superior Courthouses will be handled as emergency situations that may interrupt the normal operations of the courts. Deputies will respond as needed to all alarms as an in-progress situation with due regard for the potential dangers involved. Deputies main concerns will be officer safety, public safety and courthouse security.

II) PROCEDURE
I) POLICY

A) To ensure the safe, secure operation of Superior Court, Court Security Services will accept the responsibility for the emergency evacuation of Superior Court Facilities.

II) PROCEDURE

B) Upon the decision to evacuate, each deputy's area of responsibility is outlined below.

C) As deputies perform their evacuation duties, each deputy will ensure a thorough search and evacuation of his/her zone.

E) Bailiff Responsibilities

1) Give the order to evacuate the courthouse.
2) Secure the courtroom doors.
3) Return and secure any inmates to the first-floor jail.
4) Evacuate any sequestered jury.
After the courtrooms, lobbies, and sequestered juries have been evacuated, the following additional deputy responsibilities apply:

1) Room 135 Bailiff - (Arraignment)
   a) Respond to the jail to assist the security jailer with prisoner evacuation.
   b) Escort Judge and assigned jury to the first-floor staging area near rear exit.

2) Room 110 Bailiff - (Traffic)
   a) Evacuate Zone 1 then respond to public "Exit Only" doors (access location #2) and relieve the Sheriff's Ranger at that post.
   b) Ensure door is secure and prevent entry into the courthouse.
   c) Escort Judge and assigned jury to the first-floor staging area near rear exit.

3) Room 203 Bailiff
   a) Respond to the first floor and evacuate Zone 2.
   b) Relieve Sheriff's Ranger at public "Exit Only" doors (access location #9). Ensure door is secure and do not allow entry into the courthouse.
   c) Escort Judge and assigned jury to the first-floor staging area near rear exit.

4) Room 205 Bailiff
   a) Remain on the second floor and evacuate Zone 3.
   b) Respond to the first floor to relieve the Sheriff's Ranger at the west side "blocked off" doors (access locations #6, #7 and #8).
   c) Escort Judge and assigned jury to the first-floor staging area near rear exit.

5) Room 209 Bailiff
   a) Escort Judge and assigned jury to the first-floor staging area near rear exit.
   b) Account for all judges and in-trial jurors while exterior evacuation point is searched and determined to be safe.
   c) Escort all judges and jurors to exterior evacuation point and remain with the judges and jurors until relieved of duties or courthouse is deemed safe.

6) Room 211 Bailiff
   a) Respond to the third floor and evacuate Zone 5.
Escort Judge and assigned jury to the first-floor staging area near rear exit.

Respond to the second floor and evacuate Zone 4.

Respond to exterior evacuation point and search area before judges and jurors being evacuated.

7) Security Jailer

(a) Chain prisoners and escort them to the vehicle sally port.

(b) Depending on the nature of the evacuation, it may be necessary to escort the prisoners to the south parking lot.

(c) There will be a minimum of two Deputies assigned to evacuate the prisoners.

(d) In the absence of prisoners, the security jailer will assist where needed.

(e) In the event the inmates need to be physically removed from the facility, the jailer will call the WCDF Sergeant @ 510-262-4200 or transportation @925-646-4664 to coordinate inmate pickup.

• The inmates will be transported to WCDF where they will be held in intake until the Incident Commander gives further direction.

• CCCSO dispatch will also be notified @925-646-2441.

8) Security Deputies

(a) Respond to the jail to assist the security jailer with prisoner evacuation.

(b) A minimum of two (2) Deputies will stay with the prisoners at all times.

(c) Once in the sally port (or parking lot) with prisoners, keep a visual on the "Judges Only" entrance (access location #5) to prevent entry into the courthouse.

9) All Remaining Bailiffs

(a) Report to the Richmond Security Office for assignment.

G) Sheriff's Ranger / Screening Deputy

1) The screening deputy will remain at his/her post and prevent entry into the courthouse.
The Sheriff's Ranger at the screening entrance will relocate to the west side “blocked off” doors (access locations #6, #7 and #8) and prevent entry into the courthouse.

1) Once the courthouse has been evacuated, the Court Security sergeant and/or designated deputy will direct deputies to conduct a courthouse search.
2) Any explosive devices discovered will not be disturbed.
3) Their location will be reported to the Court Security sergeant in charge.
4) The following procedure will be used in conducting a courthouse search:
   a) Available deputies will respond to the jail.
   b) The facility sergeant will assign, personally or via telephone, areas for each deputy to search (see attached map).
   c) Each deputy will respond to their zone(s) and conduct a search.
   d) Each deputy will report search results to the facility sergeant.
I) POLICY

A) It is the responsibility of all deputies assigned permanently or temporarily to Richmond Court to familiarize themselves with the location and the procedure of the emergency gas shutoff valve for the courts.

II) PROCEDURE

A) Main Electrical Junction

1) Located in the basement. Access is via the stairwell located in the courtyard. The access door is marked: "Switchboard Elevator Equipment No Admittance Caution Main Electric Shutoff".

2) Deputies are not to turn this electrical main off due to high voltage, but are only to direct responding emergency personnel to the location, i.e., Fire and PG&E.

3) The electrical main is on the north wall and is marked "Main Electrical Shutoff". To turn off the electrical main switch you must turn the handle clockwise.

B) Gas main

1) This is located at the southwest end of the courthouse, in the ivy near the sally port.

2) To turn OFF the MAIN GAS valve, turn the rectangular nut clockwise using the "T" wrench designed for the purpose.

3) The wrench is four feet tall, is painted yellow and is kept against the north wall of the basement, across the room from the main electrical shutoff.
Water Mains

1) There are three water mains in the sidewalk of 37th Street.
2) To turn OFF the water, lift up the cement cover and turn the handle on the north side of the valve clockwise.

There are two water mains located in the basement, in the same room as the electrical main, but in an inner room marked: "Telephone Equipment No Admission". To turn OFF the water, turn the wheel valve located on top of each valve clockwise.

Roof Access

- There are three roof accesses:
  1) One is located on the north wall of the third floor storage room.
  2) Two are in the third floor mechanical room, one on the west wall and one on the east wall. Entrance is gained via a #303 key.
I) PROCEDURE

A) There are  security/jailer deputies assigned to this facility. These deputies will become familiar with and comply with the following:

B) Inspect holding cells for weapons, contraband, mechanical problems and/or damage.
   1) Reports problems/damage, if any, to facility manager. Ensure that cells are supplied with toilet paper.

C) Inspect vehicle sally port area daily for weapons/contraband.

D) Receive master calendars from court clerks’ office.

E) Receive daily in-custody list, via JMS.
   1) Checks this list against the master calendar to determine the type of proceeding, the time scheduled, and the accuracy of the transport list.

F) Coordinate any problems or special transportation needs Sheriff’s Transportation.

G) Receive prisoners and exchange documents with Sheriff’s Transportation. Assist Transportation Deputy with the loading and unloading of prisoners.

H) Search all incoming prisoners.

I) Separate prisoners by classification and determine where the prisoners will be housed while at the facility.

J) Provide prisoner lunches.
K) Move prisoners in and out of Holding Cells as needed by the bailiffs.

L) Receive court documents pertaining to prisoners and provide document(s) to Sheriff’s Transportation Deputy.

M) If available the Security Deputies will receive / search court-remanded prisoners and complete all booking forms. Security Floor Deputies will control prisoner property and maintain a property log and retain copies of property receipts and booking forms.

N) Maintain daily and monthly prisoner logs.
   1) All logs shall be completed in INK. No pencil or whiteout will be used.

O) Check prisoners every thirty minutes and document this in INK on the log.

P) Approve entrance to security areas.

Q) Notify Court Security Sergeant of any medical problems with prisoners, any emergency situations, and any escapes or escape attempts.

R) Prepare incident and crime reports involving prisoner rules and/or statute violations.

S) Oversee prisoner/attorney interviews.

T) Related Security Procedures

- No guns, ammunition or batons are allowed within the holding facility and/or secure hallway.
- Security sally port cage will remain closed except when prisoners are arriving or departing.
I) POLICY

A) Court Security personnel will employ practices and procedures, which guard against escape, ensure the safety and wellbeing of prisoners, staff and the public while transporting prisoners to and from Superior Court.

II) PROCEDURE

A) Upon arrival/departure, prisoners will be handcuffed using a waist chain. Both hands will be secured to the chain.

B) Prisoners appearing in the arraignment court do not need to be handcuffed while inside the courtroom security booth.

C) When a prisoner is to appear in court whose status necessitates the use of restraints for any reason, the bailiff will explain the full reason for the use of the restraints to the judge prior to the proceedings. The court will then make an appropriate decision on the use of restraining devices in court.

D) The assigned Floor/Security Deputy will transport prisoner’s to/from the jail area and to/from the Courtrooms.

1) If the Floor Deputy is unavailable, the Courtroom Bailiff will assume transport responsibilities.

E) Inmates will complete any courtroom paperwork unless, for safety reasons, he/she is unable to do so.
I) POLICY

A) All courthouse alarms at Superior Courthouses will be handled as emergency situations that may interrupt the normal operations of the courts. Deputies will respond as needed to all alarms as an in-progress situation with due regard for the potential dangers involved. Deputies main concerns will be officer safety, public safety and courthouse security.

I) **POLICY**

A) In order to ensure the safe, secure operation of Superior Court, Court Security Unit will accept the responsibility for the emergency evacuation of Superior Court Facilities.

II) **PROCEDURE**

- An immediate decision to evacuate will come from a Court Security sergeant or designated security deputy. In the event of a discretionary evacuation, i.e., bomb threat, the facility-supervising judge will be consulted before a decision to evacuate is made.
- Upon the decision to evacuate, each deputy’s area of responsibility is outlined below.
- As deputies perform their evacuation duties, each deputy will ensure a thorough search and evacuation of his/her zone, so as not to leave anyone inside the courthouse.
- Each bailiff will:
  1. Return and secure any prisoners who may be in his/her courtroom to the security jailer and/or designated deputy after giving and audible order in the courtroom to evacuate.
  2. Return to the courtroom to ensure evacuation and secure the courtroom doors.
Additional deputy responsibilities:

1) Courtroom #A Bailiff (Level 2 West):
   a) Evacuate and secure zone #1 - northwest side of courthouse to center corridor. Escort all Judges and their assigned Jurors from the 2nd floor, to the area behind Courtroom #E for subsequent escort to the evacuation point by the Bailiff of Courtroom #E.

2) Courtroom #B Bailiff (Level 2 West):
   a) Evacuate and secure zone #2 - southwest side of courthouse to center corridor. Report to security jailer to assist in the evacuation of prisoners.

3) Courtroom #C Bailiff (Level 2 East):
   a) Evacuate and secure zone #3 - East side of courthouse, center section. Relieve Sheriff's Rangers at the north main entrance.

4) Courtroom #D Bailiff (Level 2 East-Juvenile):
   a) Evacuate and secure zone #4 - northeast and east end of courthouse.

5) Courtroom #E Bailiff (Level 1 West Traffic/Civil):
   a) Evacuate and secure zone #6. Gather with all Judges and their assigned Jurors in the hallway/clerk area behind Courtroom #E for escort through the stairwell and into the enclosed courtyard area. Direct Judges and Jurors to Evacuation Site #1 (Flag pole/grass area behind the Civic Center) or if needed, direct to Evacuation Site #2 (Pittsburg City Park – 1900 Railroad Ave).

6) Courtroom #F Bailiff (Level 1 East – Family Law):
   a) Evacuate and secure zone #7. Escort the Judge and assigned Jurors to the area behind Courtroom #E for subsequent escort to the evacuation point by the Bailiff of Courtroom #E.

7) Courtroom G Bailiff (Lower Level West – Arraignment):
   a) Evacuate and secure zone #9. Escort the Judge and assigned Jurors to the area behind Courtroom #E for subsequent escort to the evacuation point by the Bailiff of Courtroom #E.

8) Security Jailers (2):
a) Secure prisoners and escort them to the vehicle sally port. Depending on the nature of the evacuation, it may be necessary to move the prisoners to the parking lot. In the absence of prisoners, the security jailers will assist where needed.

b) In the event inmates need to be completely evacuated from the facility, the Security Jailer will call MDF transportation @ 925-335-4664 or CCCSO dispatch @ 925-646-2441 to coordinate transportation of inmates back to the MDF.

G) Sheriff's Ranger / Screening Deputy

1) During an evacuation, Rangers and the screening deputy will maintain their post to ensure no entry into the courthouse. Sworn deputies will subsequently relieve Rangers as the evacuation nears completion.

2) The screening deputy will secure main entrance doors to prevent entry.

Note: The Assistant Sheriff shall be notified as soon as possible.
I) POLICY

A) It is the responsibility of all deputies assigned permanently or temporarily to Pittsburg Court to familiarize themselves with the location and the procedure of the emergency gas shutoff valve for the courts.

II) PROCEDURE

---

---

---

---

---

---

---
C) Water Main

1) Located in the landscaping on the northwest corner of the staff parking lot.

2) There are (2) valves; the larger of the two is the water main for the courthouse (Main Domestic Water Supply).

3) To turn off the water, unlock the chain with a key located inside the "Jailer's Station" to access the hand wheel.

4) The lock is a "Break Away" style lock and may also be broken off by striking it with a heavy item, such as a hammer or wrench.

5) Turn the hand wheel clockwise to turn off the water supply to the building.

D) Gas Main

1) The Gas Main is located in the secure section of the vehicle sally port.

2) The shut off valve is located outside of DOOR 0045, labeled "GAS METER ROOM."

3) To shut off the gas use the wrench located in the GAS METER ROOM and turn the valve one-quarter inch from vertical to horizontal.

Walnut Creek Courthouse (Specific)

SUBJECT:  
Jailer Duties

I) PROCEDURE

A) Inspect holding cells for weapons, contraband, mechanical problems, and damage. Reports problems or damage, if any, to the facility manager. Ensure that cells are supplied with toilet paper.

B) Inspect vehicle sally port area daily for weapons/contraband.

C) Check all monitors and electrical doors to ensure proper working condition.

D) Receive master calendars from court clerks’ office.

E) Receive daily in-custody list, via fax or e-mail, from MDF Transportation and Juvenile Probation. Check this list against the master calendar to determine the type of proceeding, the time scheduled, and the accuracy of the transport list.

F) Coordinate any problems or special transportation needs with MDF Transportation and Juvenile Probation.

G) Monitor the staff parking area until prisoners arrive.

H) Receive prisoners and exchange documents with Sheriff’s Transportation. Assist Transportation Deputy with the loading and unloading of prisoners.

I) Coordinate the escorting of Juvenile prisoners with Juvenile Probation. It may be necessary to transport a Juvenile prisoner from the sally port to the second-floor holding area while the Probation Officer secures their weapon(s).

J) Search all incoming adult prisoners.
K) Separate prisoners by classification and determine where prisoners will be housed while at the facility.

L) Provide adult prisoners their lunches.

M) Move restrained prisoners in and out of court as directed by the bailiffs.

N) Receive court documents pertaining to prisoners and provide documents to Sheriff’s Transportation Deputy.

O) Receive/search court-remanded adult and juvenile prisoners, complete all booking forms, and control prisoner property. Maintain a property log and retains copies of property receipts and booking forms.

P) Complete a “Contra Costa Court Security Screening Form” medical questionnaire for all adult remands.

Q) Maintain daily and monthly prisoner logs. Logs shall be completed in INK.

R) Checks prisoners twice per hour. All checks will be noted in INK on the log.

S) Notify Court Security sergeant of any medical problems with prisoners, any emergency situations, and any escapes or escape attempts.

T) Prepares incident and crime reports involving prisoner rule violations or statute violations.

U) Attorneys will not be allowed entrance into the second-floor security area under any circumstance.

V) No guns, ammunition or batons are allowed within the upstairs holding area.

W) Security sally port cage will remain closed except when prisoners are arriving or departing.

II) Juvenile Transport Procedure

A) All Juveniles will be housed on the second-floor security hallway, seated in the chairs until their matter is ready in court.

B) The jailer or floor deputy will communicate with Juvenile Probation concerning the transport to ensure the movement through the security area is conducted in a way that minimizes the chances of the juvenile coming within “sight or sound” of an adult prisoner.

C) When the court hearing the juvenile’s case is ready for the juvenile, they shall notify the jailer who will coordinate with the floor deputy and juvenile probation to ready the juvenile prisoner for court.
D) The bailiff will ensure the courtroom is empty of any in-custody adult prisoners, except an adult co-defendant.

E) The floor deputy or jailer will assist if called upon to collect the juvenile and coordinate with juvenile probation to escort the juvenile back to the holding area.

F) All Court Security personnel involved in the juvenile transport, to include the bailiff, shall be mindful of the dangers of moving in-custody prisoners through the public areas and shall communicate via radio when any potential problem arises needing immediate attention.

2) TURN OFF the main electrical power by flipping the two breakers labeled, “MAIN BREAKER DPA and MAIN BREAKER DP.”

B) Roof Access

1) Located inside the janitor closet on the 2ND floor, directly across from “JURY ROOM A.”

C) Water Main

1) Located in sidewalk directly IFO 2020 N Broadway. (Bldg next to courthouse)

2) Remove the cement cover and turn the hand valve clockwise until it no longer turns.

3) The tool used to remove the cover is stored in the security office.
Located outside of the courthouse on the N/W corner.

To turn off the gas valve, first, loosen the hexagon nut painted blue by using the wrench located in the security office, then turn the flat-sided nut (painted blue) clockwise 1/4 turn until the flat side is horizontal.
I) POLICY

A) In order to ensure the safe, secure operation of Superior Court, Court Security Unit will accept the responsibility for the emergency evacuation of Superior Court Facilities.

II) PROCEDURE

A) An immediate decision to evacuate will come from a Court Security sergeant or designated security deputy. In the event of a discretionary evacuation, i.e., bomb threat, the supervising judge will be consulted before a decision to evacuate is made.

B) Upon the decision to evacuate, each deputy's area of responsibility is outlined below.

C) As deputies perform their evacuation duties, each deputy will ensure a thorough search and evacuation of his/her zone, so as not to leave anyone inside the courthouse.

D) Those people evacuated for a bomb threat will be directed to the Post Office parking lot on N. Broadway.

E) In case of a bomb threat, all radio transmission will cease.

1) Each bailiff:
   a) Return and secure any prisoners who may be in his/her courtroom to the prisoner holding cells after giving an audible order in the courtroom to evacuate the courthouse. In the event a juvenile prisoner is in the courtroom, it shall be the responsibility of the juvenile probation officer to return the juvenile to the rear court holding area. Each Bailiff shall coordinate with the juvenile
probation officer to ensure a safe transport.

b) Once the courtroom has been evacuated, secure the courtroom doors. The Court Security Sergeant and/or deputy will direct designated deputies to conduct a courthouse search. Any explosive devices discovered will not be disturbed. Their location will be reported to the Sheriff's supervisor in charge.

2) Additional deputy responsibilities:

(a) Security Deputy #1 (Screening Post):
• Evacuate all first floor public areas (criminal, traffic and civil lobbies).
• Evacuate the out-of-court stairwell (located on the first-floor lobby area between the drinking fountain and traffic windows. Door is labeled “NO ADMITANCE”.
• Evacuate and secure staff/employee areas on the first floor. Direct all employees to the post office for roll call.
• Lock elevator open. Elevator equipment room is located outside the courthouse on the east side. Open room using the #358 key and pull level to “OFF”.

(b) Security Deputy #2 (Jail Runner):
• Evacuate second floor employee/conference rooms. Direct employees to evacuate to the Post Office parking lot and to stand by for roll call.
• After clearing the second floor employee areas, clear the northeast employee stairwell (near the drinking fountain) on the first floor. Lock the stairwell door to prevent re-entry.
• Evacuate second floor lobby, lobby offices, and the two public restrooms.
• Evacuate the southwest stairwell (outside courtroom #202). First floor entry to this stairwell is permanently locked and located in the screening area.
• Evacuate the southeast stairwell located outside courtroom #1 down the first floor and lock the stairwell door to prevent re-entry.
Courtroom 106 (Traffic) Bailiff:

• Meet Judge in chambers on first-floor and escort the judge and department staff to the first-floor employee break room.

• Once all the Judges and their staff have gathered in the first-floor break room, the room 106 Bailiff will escort all court staff members out of the employee entrance to the Post Office parking lot evacuation point. The room 106 Bailiff will remain with all staff members in the parking lot until the courthouse has been rendered safe to reoccupy.

• The Bailiff will assist the designated court staff member in completing a roll call to ensure that all court employees are accounted for. The Bailiff will notify the deputies on scene of any unaccounted court employees and their last known location.

Room 202 Bailiff:

• Direct the Judge and assigned department staff to respond to the first-floor employee break room to be escorted by the Room 106 Bailiff to the evacuation point. Clear the courtroom of all citizens and non-department staff members and secure the courtroom doors. Report to the upstairs security office for assignment.

Room 205 Bailiff:

• Direct the Judge and assigned department staff to respond to the first-floor employee break room to be escorted by the Room 106 Bailiff to the evacuation point. Clear the courtroom of all citizens and non-department staff members and secure the courtroom doors. Report to the upstairs security office for assignment.

Room 206 Bailiff:

• Direct the Judge and assigned department staff to respond to the first-floor employee break room to be escorted by the Room 106 Bailiff to the evacuation point. Clear the courtroom of all citizens and non-department staff members and secure the courtroom doors. Report to the upstairs security office for assignment.
Coordinate with Juvenile Probation to ensure juvenile and adult prisoners are transported separately. Chain and secure adult prisoners, and escort them to the vehicle sally port after the juvenile prisoners have cleared the area. Depending on the nature of the evacuation, it may be necessary to escort the prisoners to the north-eastern portion of the courthouse parking lot. A minimum of two Deputies will be assigned to evacuate the prisoners. If no prisoners are present, the security jailer will assist where needed.

In the event the inmates need to be physically removed from the facility, the jailer will call the M.D.F. Sergeant @ 925-335-4661 or Transportation @ 925-335-4664 to coordinate inmate pickup. The inmates will be transported to M.D.F. where they will be held in intake until the Incident Commander gives further direction. CCCSO dispatch will also be notified @ 925-646-2441. Notify the Court Security Lieutenant as soon as possible.

Sheriff's Ranger

The Screening Deputy Ranger will maintain his/her position at the main entrance and secure entry doors.

The Ranger will respond to the Northeast private entrance door and prevent entry into the building. The Ranger will maintain that post until relieved by a Deputy.
I) PROCEDURE

A) The Juvenile Court bailiff is governed by the general rules, regulations and procedures as outlined in Chapter 11 of this manual. The only variance is in the specific duties of the bailiff.

B) Most court proceedings held at the Juvenile Hall location involve in-custody W&I 600 cases (criminal in nature).

C) The Juvenile Courtroom should be kept clear of spectators. Only persons with a direct interest in the case such as family members, attorneys, social workers, victims, etc., may be present in the courtroom.

D) The bailiff should not allow family visitation within the courtroom as it interferes with the security of the courtroom.

E) Transportation (Juvenile Hall)

1) In-custody juveniles will be brought into the courtroom by the bailiff.

2) Parties appearing in court who are not in-custody will be screened and directed to the courtroom by the screening deputy.

3) If a juvenile is remanded into custody, the bailiff will take the minor to Juvenile Hall transportation staff for processing.
F) Security Issues

1) All persons entering the Juvenile Hall courtroom will do so via perimeter screening. Lockers are available to secure purses, backpacks and other property for safe keeping while attending court proceedings.

2) In the event the bailiff needs immediate assistance the following options are available:

3) The bailiff is equipped with a portable radio.

G) Evacuation Procedures

1. Once the courtroom / area has been evacuated, the Court Security supervisor and/or designated deputy(s) will conduct a search. Any explosive devices discovered shall not be disturbed. The location of the device will be reported to the Court Security supervisor.
I) POLICY

A) Court Security Services will employ practices and procedures for the administrative and statutory segregation of remanded inmates (civil and criminal) as to ensure the safety of the inmates and maintain security.

II) PROCEDURE

A) In the event a bailiff is instructed by the judge to take an inmate into custody (remand), the following applies:

1) Immediately detain, handcuff, and search the inmate incident to arrest and notify a Court Security supervisor.

2) Complete the necessary paperwork
   (a) Booking authority
   (b) Medical Screening form
   (c) Property Receipt

3) Advise a Court Security Supervisor and Medical/Mental Health staff of any issues raised from the Court Security screening form.
   (a) This form will be given to the intake nurse.

4) In Martinez, the bailiff or security deputy will walk the inmate to the MDF or arrange for appropriate transportation to the MDF or CCCRM C.
   (a) The Court Security Screening form will not be completed if the inmate is taken directly to MDF.
(b) In the event the MDF is in “lock-down” status (i.e. protocol), the will be held in a Martinez court holding cell and the screening form will be completed.

(c) If the remand take place at a satellite court or juvenile hall, notify a Court Security supervisor and medical/mental health staff of any issues raised on the screening form.

(d) The bailiff will arrange for appropriate transportation to MDF or CCCRMC.

5) All remanded inmates will be segregated from in-custody inmates until they are processed and classified at the MDF.

B) In the event of a Civil Remand, the following procedure will be followed:

1) Immediately detain, handcuff, and search the inmate.

2) Notify a Court Security supervisor immediately of the civil status.

3) Notify MDF intake of the imminent arrival of the CIVIL remand.

4) Complete the necessary paperwork
   (a) Booking Authority
   (b) Court Security screening form
   (c) Property receipt

5) Advise a Court Security supervisor and Medical or Mental Health staff of any issues raised on the screening form.
   (a) This form will be given to the intake nurse.

6) In Martinez, the bailiff or security deputy will walk the inmate to MDF or arrange for appropriate transportation to either MDF or CCCRMC.
   (a) The Court Security screening form will not be completed if the inmate is taken directly to the MDF.
   (b) In the event the jail in “lock-down” (i.e. protocol) and the inmate will be held in a Martinez court holding cell, the screening form will be completed.

C) In the event a deputy makes an arrest (Warrant or On-View) the following procedure applies:

1) Immediately detain, handcuff, and search the inmate incident to arrest and notify a Court Security supervisor.

2) Complete the necessary paperwork
   (a) Booking authority
   (b) Medical Screening form
(c) Property Receipt

(d) Bail Schedule (felony on-view)

(e) Probable Cause Declaration in ARIES (all on-view arrests)

3) Advise a Court Security Supervisor and Medical/Mental Health staff of any issues raised from the Court Security screening form.

(a) This form will be given to the intake nurse.

4) In Martinez, the bailiff or security deputy will walk the inmate to the MDF or arrange for appropriate transportation to the MDF or CCCRMC.

(a) The Court Security Screening form will not be completed if the inmate is taken directly to MDF.

(b) In the event the MDF is in “lock-down” status (i.e. protocol), the will be held in a Martinez court holding cell and the screening form will be completed.

(c) If the remand take place at a satellite court or juvenile hall, notify a Court Security supervisor and medical/mental health staff of any issues raised on the screening form.

(d) The bailiff will arrange for appropriate transportation to MDF or CCCRMC.

5) All remanded inmates will be segregated from in-custody inmates until they are processed and classified at the MDF.

D) Inmate Property and Storage

1) All property received by the arresting deputy shall be retained in accordance with CSB Policy and Procedure 2.11.20.
Vision
In an unpredictable and constantly changing world, where communities and families expect safety and security, we must continually strive to be the state's premier Law Enforcement Agency recognized for our responsiveness and integrity.

Exhibiting dynamic leadership, pride and competence, we will attract and develop the state’s finest professionals, committed to multidimensional police services and sincere community partnerships tailored to maintain a decisive advantage over the criminal element.

Mission
The Office of the Sheriff works in partnership with our diverse community to safeguard the lives, rights and property of the people we serve. With unwavering dedication we provide innovative professional law enforcement services to our community. We accomplish this mission by maintaining our Core Values while always conducting ourselves with the highest ethical standards.

- David O. Livingston, Sheriff
This Manual is a composite of the current practices, policies and administrative procedures governing the operation of the Custody Services Bureau.

This Manual has been designed to provide a clear understanding and insight into the organization and its operations. The policies and procedures listed herein are meant to serve as positive guidelines for members of the Bureau.

This Manual supersedes all Policy Manuals and procedural memorandums previously issued by the Custody Service Bureau. It does not supersede any applicable State/Federal Laws.

Failure to follow policies leads to confusion, decreases the public’s confidence in law enforcement, and reduces our ability to operate as a cohesive unit. It is the responsibility of all employees to thoroughly acquaint themselves with this Manual and use it as a guide in the performance of their daily assignments.

Many of the directives contained within this Manual must change as current law and regulations change. In that regard, it is my hope that members of the Bureau will put forth their ideas so that the Manual may be kept up-to-date and progress with time.

Suggestions for corrections or additions to this Manual may be submitted to the Custody Services Bureau’s Administrative Unit

Matthew F. Schuler, Assistant
Sheriff Custody Services Bureau
December 12, 2019

AGENCY MISSION STATEMENT:

The Office of the Sheriff exists to serve the community. The protection of people and their property is our primary responsibility. Honor, Courage, Commitment, Leadership and Teamwork shall be the core values employed as we serve the citizens of Contra Costa County.

ADMINISTRATIVE SEGREGATION:

The administrative separation of an inmate(s) from the general population. Seg inmates are those who have been determined by classification to be prone to assault staff or other inmates, or are likely to need protection from other inmates, or prone to escape, or who continue to show complete disregard for established rules and regulations. Administrative Segregation Inmates can be high profile cases, or are placed in Seg for the security of the facility, and who are not currently in disciplinary isolation.

COMMISSARY:

Goods, articles and supplies purchased by inmates.

COMMUNICABLE DISEASE:

A respiratory, blood borne, or other infectious disease.

CONTRACT PERSONNEL:

Any person working in Detention Division who is not employed by the Sheriff’s Office, but who are working on site, via contractual agreement. (GSD, Teachers, Medical, Mental Health, Chaplains, Library, Etc.)
CONTRABAND:

Any item that is not issued by the facility in which the inmate is being housed, or has been issued by the facility or purchased through commissary but is not being used for its intended purpose, is a threat to the security of the facility, is in excess, or is no longer in its original form.

COUNTS:

FACILITY COUNT:

Any count that occurs to determine inmate or arrestee status and location within or assigned to a particular facility.

FORMAL COUNT:

Any count that requires the inmate or arrestee to clearly present themselves in a manner that allows the deputy to verify and match their identity to the Inmate Management Head card.

INFORMAL COUNT:

Any count that occurs in order to verify and account for the number of inmates physically present in any given area. Inmate Management Head cards will be required to match an inmate with the area they are specifically assigned.

SHIFT CHANGE COUNT:

Any count that occurs in order to verify the appropriate number of head cards and inmates physically assigned and present to a specific area.

SPECIAL COUNT:

Any count that occurs due to an exigent circumstance and is ordered by the Facility Commander or his/her designee.

CORRECTIVE COUNSELING SYSTEM:

A method of training and counseling employees in an effort to improve behavior and performance without a negative effect of lasting disciplinary measures. It consists of three phases, or levels, with procedures and policies for administration developed within the Office of the Sheriff.

CORRESPONDENCE:

PRIVILEGED CORRESPONDENCE:

Mail between an inmate and attorneys, legal aid services, other agencies providing legal services to inmates, or para-professionals having a bona-fide association with such agencies; attorneys, judges, and clerks of federal, state and local courts; or public officials and their authorized representatives acting in their official
capacities; and the Facility Commander and higher ranking Sheriff’s Office
officials.

JAIL MAIL:

Correspondence between inmates housed in a Contra Costa County Sheriff’s
Detention Facility.

LEGAL MAIL:

Correspondence between an inmate and his/her attorney, the court or other legal
agency.

DIPLOMATIC REPRESENTATIVE:

An official representative of a government who conducts relations with another individual,
official or government.

DISABILITY:

INDIVIDUALS WITH DISABILITIES:

The ADA covers individuals who have a physical or mental impairment that
substantially limits one or more major life activities, who have a record of such
impairment, or who are regarded as having such impairment.

Temporary conditions are generally not covered by the ADA. Certain other
conditions are expressly excluded from coverage of the ADA. These excluded
conditions include pedophilia, homosexuality, transsexuality, or current users of
illegal drugs or alcohol.

ELIGIBLE INDIVIDUALS:

Covered individuals are entitled to an equal opportunity to participate in
programs, services or activities offered by the Detention Division. Persons with
disabilities may be refused participation in services, programs or activities of the
division if there is a compelling reason for such refusal. One compelling reason
may be a threat to the disabled individual or others. The threat must be direct and
not speculative.

MAJOR LIFE ACTIVITIES:

Basic functions that the average person can perform with little or no difficulty.
DISCIPLINE:

FORMAL DISCIPLINE:

A process that occurs in response to a written incident report and formal disciplinary hearing. Major rules violations and repetitive minor violations require formal discipline.

INFORMAL DISCIPLINE:

An immediate, corrective action taken by facility staff to correct the inmate’s behavior without resulting in a loss of privileges to the inmate. Verbal counseling or reprimand, extra work detail, or removal from a work assignment without losing work credits are actions that can be taken without a written incident report. Single, minor rules violations may be handled through informal discipline.

MINOR VIOLATIONS:

Rules violations that are not likely to affect the health or safety of other inmates, or staff, or affect the security of the facility.

MAJOR VIOLATIONS:

Rules violations that are likely to affect the health or safety of other inmates or staff, or are likely to affect the security of the facility.

DISTURBANCES:

DISTURBANCE/RIOT:

Any tumultuous acts by inmates to cause willful disorder and confusion.

MINOR DISTURBANCE:

A disturbance, involving a minimal number of inmates, which can easily be controlled when immediately acted upon.

MAJOR DISTURBANCE:

A disturbance, involving numerous inmates, where the situation is out of control.

HUNGER STRIKE:

An act, of one or more inmates, refusing to eat as a protest for or against a cause or demand.

HOSTAGE:

Any person held against his/her will by another person for the purpose of escape, monetary gain or any reason that may place another person in danger of losing life or suffering serious bodily injury.
HOSTAGE EVENT:

An act of hostage taking behavior wherein the police have located the hostage taker and his victim, and a siege develops or has developed.

DIVISION SPECIFIC FORMS:

Any form utilized at the Division level and not intended for general departmental usage.

DUTY ASSIGNMENTS:

DUTY HOURS:

Schedules ranging from eight (8) to twelve and one half (12.5) hour shifts are available at Martinez Detention Facility, West County Detention Facility and Marsh Creek Detention Facility. Shift and duty hours vary based on job classification and assignment.

FIXED POSITIONS:

Any position that must be filled twenty-four (24) hours or less a day, seven (7) days or less a week, fifty-two (52) weeks or less a year and requires relief for meals, breaks, days off, vacation, sick leave, military leave, industrial leave, administrative leave and training.

NON-FIXED POSITIONS:

Any position that does not require relief for any time off.

EMERGENCY REQUESTS:

CODE ONE ASSISTANCE REQUEST:

A non-urgent, request handled by telephone or intercom system. Response is at the convenience of facility operations.

CODE TWO ASSISTANCE REQUEST:

An urgent, non-emergency request handled by telephone, intercom or radio. Response is immediate and controlled.

CODE THREE ASSISTANCE REQUEST:

An urgent and emergency request for assistance handled via any form of communication. Emergency response is required.

11-99 OFFICER NEEDS ASSISTANCE:

An emergency request for assistance handled via any form of communication. Staff members are directly involved in the incident. Response is maximized and immediate.
10-33 ALARM:

An activation of a radio duress alarm, panic/duress alarm or scan pen alarm. Emergency response is required.

RADIO DURESS ALARM:

An alarm function built directly into a portable radio unit that transmits an identifier and a duress alarm signal to Central Control.

PANIC/DURESS ALARM:

A wall mounted unit which, when depressed, transmits an alarm signal to a specific control point.

SCAN PEN ALARM:

A portable, spring-loaded mechanical device which, when activated, transmits a signal to at least one scan sensor unit located throughout the facility. Activation of a scan sensor unit transmits an alarm to Central Control with general location information.

CODE ONE MEDICAL ASSISTANCE REQUEST:

A non-urgent medical/mental health problem to include, but not limited to the following:

- An injury not immediately threatening to life or limb
- Severe back pain without obvious injury or paralysis
- Sudden headache but without history of head trauma or loss of
  Consciousness
- The individual gives history of mental problems but is not experiencing any symptoms

CODE TWO MEDICAL ASSISTANCE REQUEST:

An urgent problem to include, but not limited to the following:

- An acute injury with head trauma to include temporary loss of consciousness
- Suspected seizure but patient breathing
- An individual suffering severe hallucinations
- An individual threatening to commit suicide
CODE THREE MEDICAL ASSISTANCE REQUEST:

A medical emergency to include, but not limited to the following:

- An individual in the act of committing suicide
- Uncontrolled bleeding
- Any individual unconscious/unresponsive
- Cardiopulmonary arrest/severe chest pains

EMPLOYEE:

All terms referring to persons employed, such as personnel, staff, or employee, apply to all persons unless a job classification is specifically mentioned.

FACILITY COMMANDER:

A Lieutenant Level position under the direction of the Division Captain that is responsible for the overall operation of a detention facility or bureau. Synonymous with Facility Manager.

FACILITY MANAGER:

A Lieutenant Level position under the direction of the Division Captain that is responsible for the overall operation of a detention facility or bureau. Synonymous with Facility Commander.

FOREIGN NATIONAL:

Any person not having United States citizenship.

GOAL:

A relatively broad statement of the end or result that one intends to ultimately achieve. A goal usually requires a relatively long time span to achieve and, whenever possible should be stated in a way that permits measure of its achievement.

GENDER:

The use of the masculine gender in any procedure includes the female gender when applicable.
HAZARDOUS MATERIALS:

FLAMMABLE MATERIALS:

Liquids with a flash point below 100°F.

TOXIC MATERIALS:

Substances that through chemical reaction or mixture can produce possible injury or harm to the body by entering through the skin, digestive tract, or respiratory tract (e.g., zinc chromate paint, ammonia, chlorine, antifreeze, herbicides, pesticides).

CAUSTIC MATERIALS:

Substances that can destroy or eat away by chemical reaction (e.g., lye, caustic soda, sulfuric acid).

HAZARDOUS WASTE:

A waste or combination of wastes, which because of its quantity, concentration, or physical, chemical or infectious characteristics may either:

- Cause, or significantly contribute to, an increase in serious irreversible or incapacitating reversible illnesses.
- Pose a substantial present or potential hazard to human health or environment when improperly treated, stored, transported, or disposed of, or otherwise managed.

INFECTIOUS WASTE:

Infectious waste is considered to be the following:

- Laboratory wastes include cultures of etiologic agents that pose a substantial threat to health, due to their volume and virulence.
- Pathologic specimens, including human or animal tissues, blood elements, excreta and secretions that contain etiologic agents, and attendant disposable fomites.
- Equipment, instruments, utensils, food containers and other disposable materials that are likely to transmit etiologic agents from the rooms of inmates that have been isolated because of suspected or diagnosed communicable disease.
- Human dialysis waste material including arterial lines and dialyzed membranes.
- Any other material that in the determination of the facility medical staff, presents a significant danger of infection because it is contaminated with, or may reasonably be expected to be contaminated with, etiologic agents.
ETIOLOGIC AGENTS:

A type of microorganism, helminth, or virus that causes, or significantly contributes to, the cause of increased morbidity or mortality of human beings.

INDIGENT INMATE:

An inmate is considered to be indigent when they do not have enough money on their inmate account to purchase one (1) book of ten (10) stamps.

ITR:

An acronym that refers to areas associated with facility Intake, Transfer and Release of arrestees and/or inmates.

JUVENILE:

Anyone who has not reached the age of 18 on or before the date of incarceration.

KEYS:

CONTROLLED KEYS:

Key(s) for specific areas requiring a higher level of security than facility staff keys, and/or accountability, requiring Shift Supervisor approval to check out from the designated control point.

CONTROL POINT:

An area that specifically manages security and special duty keys for check in/out.

FACILITY STAFF KEY (S):

Keys allowing staff entry into locker room areas, specifically identified work stations/areas, fire equipment boxes, staff dining areas, and all common areas not accessible to inmates.

SECURITY KEY:

Any facility key allowing access to a secure inmate area and which, if lost or duplicated by inmates or others, would jeopardize the security of the facility, facility property, employees, visitors, or inmates, or directly or indirectly facilitate an escape.

SPECIAL DUTY KEYS:

Key(s) for special duty offices not authorized for general access, i.e., Classification, Administration, etc.
LOGS:

OBSERVATION LOG:

The form utilized to document the direct visual observation of a specified inmate.

SEPARATION LOG:

An observation log utilized to document the direct visual observation of an inmate in administrative segregation, disciplinary Isolation or protective custody. Entries shall be made utilizing JMS Inmate History.

MANUAL:

A collection of material designated and organized for use as a reference guide that explains the functions and operations of a specific section department.

MAY:

“May” is permissible.

MEAL:

A meal (breakfast, lunch or dinner), will consist of items outlined in the Food Services Menu.

NOTARY PUBLIC:

A person legally empowered to witness and certify documents and to take affidavits and depositions.

OBJECTIVE:

An end result that one intends to attain in order to achieve partial fulfillment of a goal. An objective is a sub-goal or an element of a goal and therefore, requires a shorter time to accomplish than does a goal. Goals and objectives should be both measurable and attainable.

ORGANIZATIONAL CHART:

An illustrated chart displaying chain of command and level of responsibility. Positions are placed under each line of authority and are represented by a box symbol having lines of delineation to give direction to the position.

PANIC/DURESS ALARM:

A wall-mounted plate with a black push-button switch or red push button panel, which when activated, transmits an alarm signal to Central Control.
POLICY:

A broad statement of agency and/or divisional principles. It is the framework for the development of procedures.

PROCEDURE:

A guideline for carrying out the agency’s and/or divisions activities

PROTOCOL:

A detailed list of procedures administratively approved, to be followed for providing specific crisis services.

PRO-PER:

IN PROPRIA PERSONA:

In one’s own person. For the purpose of this section, an inmate is in Propria Persona or Pro Se Status only if acknowledged by a court to be appearing in a specific criminal action without counsel.

LEGAL REPRESENTATIVE:

Attorneys, legal aid officers or assistants to the inmate’s attorney of record.

LEGAL MAIL:

Confidential correspondence between inmates and local, state and federal courts, any member of the State Bar or holder of public office and/or the State Board of Corrections.

SHERIFF’S REPRESENTATIVE:

For purposes of this section, The Sheriff’s representative for all inquires regarding the facility or the ability to carry out various court orders will be considered to be the Facility Administrator or his/her representative.

RELATED ORDERS:

References to other material or resources that directly relate to that specific policy section:

- **MJS**: Minimum Jail Standards
- **PC**: California Penal Code
- **CVC**: California Vehicle Code
- **CCCSO**: Sheriff’s Office Policy and Procedure Manual
- **Patrol**: Sheriff’s Office Patrol Manual
- **CSB**: Sheriff’s Office Custody Services Bureau Manual
SCAN PEN TRANSMITTER:

A silver colored mechanical device, similar in size and shape to a ballpoint pen, which when depressed, transmits an alarm signal to central control.

SEARCHES:

STRIP SEARCH:

A visual inspection of an inmate’s underclothing, unclothed body, breasts, buttocks, or genitalia after the inmate arranges or removes (partially or fully) his or her clothing.

VISUAL BODY CAVITY SEARCH:

A visual inspection of an inmate’s stomach, rectal cavity, or vagina. It may involve the unclothed inmate bending at the waist, squatting, or lifting or spreading breasts, buttocks, or genitalia to allow visual inspection of an inmate’s stomach, rectal cavity, or vagina. The mouth is not considered a body cavity for these purposes.

PHYSICAL BODY CAVITY SEARCH:

A visual body cavity search of an inmate plus a physical intrusion, manually or by instrument, into an inmate’s stomach, rectal cavity, or vagina.

CLOTHED PAT SEARCH:

A tactile, visual, and/or scanner inspection of an inmate’s clothing (including hats, wigs, coats, pockets, socks and footwear), personal effects, hair, mouth, or ears. The inspection may include requiring the inmate to remove footwear, socks, hats, wigs, gloves, and outerwear (coats, jackets, sweatshirts, sweaters). The inspection may include requiring the inmate to turn his or her pockets inside out.

SEXUALLY EXPLICIT MATERIAL:

Material that shows the frontal nudity of either gender, including the exposed female breast(s) and/or the genitalia of either gender. (CCR 3006 (c) (17(a)). Sexually explicit material can either be from professional publications or personal photos or drawing that have been collected from various sources.

SHALL/WILL:

“Shall” and “Will” are mandatory.

SIGNATURE:

The identification of a party in written and legible form.
SMOKE/SMOKING:

The carrying or holding of a lighted pipe, cigar or cigarette or any other lighted smoking equipment of any kind.

SUBPOENA DUCES TECUM:

A subpoena which, in addition to the usual clauses, requiring the attendance of the witness in court to testify, contains clauses directing him/her to produce at the same time for use as evidence in the litigation, certain described books, papers, records, and documents.”

TOBACCO PRODUCTS:

Includes, but is not limited to cigarettes, cigars, pipes, chewing tobacco and any smoking material.

TRANSMITTAL MAIL:

Mail between Contra Costa County departments that are transported by County employees.

VISITOR:

Any person not regularly assigned to Detention Division in either a full or part-time position.

Chapter Four  Training and Standards
I. POLICY

A. It shall be the policy of the Custody Services Bureau to have a single administrator who is responsible for the administration, control and management and to whom all employees or units of management are responsible.

B. The administrator will hold the rank of Assistant Sheriff and shall be appointed as the Assistant Sheriff of the Custody Services Bureau by the Sheriff.

II. PROCEDURE

A. AUTHORITY AND RESPONSIBILITIES

1. The Custody Services Bureau Assistant Sheriff shall be assigned by the Sheriff to take charge of and administer a division, section, or other office.

   a. The Custody Services Bureau Assistant Sheriff shall have the primary responsibility and authority for the efficient and lawful administration of operations, staff assignments, program developments, personnel supervision, maintenance and auxiliary inmate services.

   b. The Custody Services Bureau Assistant Sheriff is subordinate only to the Sheriff, Undersheriff and any other Bureau authority as established by Sheriff’s Office Policy.

   c. Statistics on inmate population.

   d. Facility budget.

   e. Facility problems and plans to resolve them.

2. It shall be incumbent upon the Custody Services Bureau Assistant Sheriff to respond promptly to all lawful requests from federal, state and local legislative and executive bodies for information pertinent to the detention facility.
3. Only the Custody Services Bureau Assistant Sheriff or designee will authorize the use of facility classrooms, conference rooms, or other accommodations for activities that are non-operational in nature.

## CSB Policy and Procedure

- **DETENTION NUMBER:** 2.01.02
- **RELATED ORDERS:** CCCSO Policy 1.03.51; 1.03.52  
MJS Section 1027  
CSB 2.08.49
- **ISSUE DATE:** 07-01-04
- **REVISION DATE:** 06-23-17
- **REVIEW DATE:** 03-26-19
- **CLEARANCE:** CUSTODY
- **CHAPTER:** Administration, Organization and Management
- **SUBJECT:** Organization and Staffing Charts

## I. POLICY

The Custody Services Bureau is one of three Bureaus within the Office of the Sheriff. The Bureau has been structured to effectively manage the units and personnel that are assigned to it. The purpose of the organizational chart is to identify the relationships and relative ranks of the units within the Bureau.

## II. PROCEDURE

### A. The Custody Administrative Services Lieutenant is responsible for maintaining the CSB Monthly Staffing Report. The CAS lieutenant will monitor staffing levels to ensure the safety and security of the facility staff and inmates

1. The continual monitoring of staffing levels will ensure that there is adequate inmate supervision for the bureau’s attempts to prevent and detect sexual abuse and sexual harassment.
I. POLICY

A. Every effort will be made to construct this manual to conform to the definitions and terms as outlined in the CSB Glossary in order to maintain grammatical consistency.

B. This manual will contain a complete and up-to-date alphabetical key word index.

II. DEFINITIONS

A. CROSS REFERENCE: A reference from one part of this manual to another, which provides additional information.

B. KEY WORD INDEX: An alphabetized listing of fundamental words used as a guide to facilitate locating a subject.

III. PROCEDURE

A. When policy and procedures are written or revised, the author and/or reviewer(s) will ensure they comply with this construction.

B. When a policy and procedure is written and/or revised, it will be the responsibility of Custody Administrative Services to ensure the index and key word index is also changed.
I. POLICY

A. The Custody Services Bureau will maintain a policy and procedural manual that is consistent in formatting and layout.

B. Certain formatting steps must be taken throughout the manual in order to prevent computer formatting and conversion errors from occurring.

II. PROCEDURE

A. PAGE SETUP

1. Manual page formatting shall be offset from the center in order for all material to be easily viewed when placed in large binders.

2. With the document selected:
   a. Click on “File”
   b. Click on “Page Setup”
   c. Adjust the Page Setup options to reflect the following:
B. NUMBER AND BULLET FORMATTING

1. Outline numbering and bulleted shall be used in place of tab or indentation formatting.

2. With the document selected, select all text that requires formatting.
   a. Click on “Format”
   b. Click on Bullets and Numbering
   c. Adjust the formatting options to reflect the following:
      - Select the Outline Numbered box that most closely resembles current formatting:

      ![Bullets and Numbering dialog box]

      - Select “Customize…” from the Bullets and Numbering menu.
• Adjust the “Customize Outline Numbered List” formatting to reflect the following for each “Level”:
C. FONT FORMATTING

1. Font formatting shall be as follows:
   a. Chapter Title Header
      • Times New Roman
      • Size 12
      • Bold for all Subheadings
      • Regular for all other text
   b. Section Text
      • Times New Roman
      • Size 11
      • Bold for all headers with Capital Roman Numerals preceding text (i.e. POLICY, DEFINITIONS, etc.)
      • Regular for all other text

D. CHAPTER TITLE HEADER

1. All sections in the title header shall appear as follows:

CHAPTER:
Administration, Organization and Management

SUBJECT:
CSB Policy and Procedure Manual Review and Dissemination

I. POLICY

A. A manual containing policies and procedures will be developed and maintained, that expresses the philosophies, goals, policies, facility security and control procedures, and all operational procedures specific to Martinez Detention Facility, West County Detention Facility and Marsh Creek Detention Facility.

B. This manual will specify how policies and procedures are to be implemented and be accessible to all employees and, where applicable, to the general public.

C. All new and revised policies and procedures will be disseminated to designated staff, volunteers and where appropriate, to inmates prior to implementation.

D. Employees assigned to Martinez Detention Facility, West County Detention Facility and Marsh Creek Detention Facility will participate in the formulation of policies, procedures and programs.

E. Related community agencies that the Detention Division has contact with may participate in policy and procedure development, coordinated planning and interagency consultation.

II. DEFINITIONS

A. POLICY: A broad statement of agency and/or divisional principles. It is the framework for the development of procedures.

B. PROCEDURE: A guideline for carrying out the agency’s and/or divisions activities.

C. MANUAL: A collection of material designated and organized for use as a reference guide that explains the functions and operations of a specific section department.
III. PROCEDURE

A. POLICY AND PROCEDURE DEVELOPMENT/REVIEW AND APPROVAL

1. All employees, volunteers, related community agencies and inmates will be encouraged to actively participate in the development and revision of policies and procedures at Martinez Detention Facility, West County Detention Facility and Marsh Creek Detention Facility.

2. Facility personnel may contact their Facility Commander, in writing, via the chain of command, with suggestions and/or problems with policies and procedures.

3. Inmates may forward their suggestions regarding policy and procedure development by means of an inmate request form. Those suggestions found to be applicable will be forwarded, in memorandum format, to the Facility Commander with a recommendation.

4. Personnel assigned to create, review, or revise policies and procedures will randomly meet with facility personnel, volunteers and inmates to seek opinions and ideas regarding the effectiveness of the policies and procedures.

5. The Facility Commander will review policy and procedure suggestions submitted by facility personnel on a continuous basis. Both positive and negative aspects will be evaluated. The Facility Commander will forward draft revision requests to Custody Administrative Services.

6. To facilitate the creation of policy revisions, copies of manual sections can be obtained from Custody Administrative Services on computer disk.

7. Custody Administrative Services will be responsible for reviewing all newly created or revised policies and procedures to ensure compliance with federal, state and local mandates, as well as continued compliance with Board of Corrections standards.

8. The final draft proposal will be presented to the Custody Services Bureau Assistant Sheriff and Division Captains for review and approval.

9. Once approved, Custody Administrative Services will disseminate the policy and procedure throughout the agency.

B. REVISIONS

1. Information to be omitted from a current policy will be lined through. This can be done on a hard copy of the policy or on a computer file of the policy.

2. Information added to the current policy can be hand written on a hard copy of the policy indicating where it will be inserted.

3. If a computer file of the policy section is used, the new information will be identified by italicized print.

4. The revised policy section will be accompanied with a memo/e-mail indicating
the reason for the policy change. It must include any legal justification for the change.

5. Custody Administrative Services will omit the lined through material and change the italicized to the correct font after the revisions are approved by the Bureau Assistant Sheriff.

C. DISSEMINATION

1. The Facility Commander or designee will be responsible for ensuring that every member is made aware of the material contained in the Policy and Procedures Manual, including all subsequent changes that are made to them.

2. The CSB Policy and Procedure Manual will be accessible at all major posts as indicated on the manual distribution list. Additionally, the CSB Policy and Procedure Public Information Manual will be made accessible to the public.

3. Policies and procedures relating to the security of the facility will not be disseminated to inmates or the public.

4. All new or revised policies and procedures will be distributed to all major posts, staff and volunteers when applicable.

5. All approved revisions will be posted on facility line up boards and read at line-ups.

6. The Facility Commander or his/her designee will obtain a signed acknowledgment from all members stating they have seen and understand the information provided.

7. The signed acknowledgments will be kept on a Training Roster. The roster will state the date and time the information was provided to the member and shall be maintained by Custody Administrative Services.

8. All facility manuals, manual distribution lists and manual updates will be maintained and distributed by Custody Administrative Services.

9. When appropriate, new or revised policies and procedures will be made available to inmates prior to implementation.

D. ORGANIZATION OF MANUALS

1. Policies and procedures will be contained in a manual.

2. The Policy and Procedure Manual will contain an alphabetized Keyword Index.

3. The Policy and Procedure Manual will be numbered by chapter and section.

4. The Policy and Procedure Manuals will be divided into chapters as directly related to agency policy and procedure issuance.

5. The Policy and Procedure Manuals will be separate from all other manuals and readily available to all affected members as a reference and guideline.
E. ANNUAL REVIEW OF POLICIES AND PROCEDURES

1. It shall be the responsibility of Custody Administrative Services to conduct an
   biannual review of the Policy and Procedure Manuals by April of each year, or
   more often as the need arises.

2. This review will include an assessment of facility operations to ensure they are in
   compliance with published policies, procedures and applicable Board of
   Corrections standards. Policies and procedures that need to be revised, deleted, or
   added will be addressed.

3. Custody Administrative Services will submit a report to the Bureau Assistant
   Sheriff via the chain of command. This report will include the following
   information:

   a. A general statement of the adequacy of policies and procedures.

   b. A specific listing of any problem areas.

   c. Proposals for revision.

4. Custody Administrative Services shall maintain copies of all canceled or rewritten
   policies and procedures, or other changes in the method of operations and include
   the date the change occurred.
I. POLICY

A. In order to maintain an effective system of communication within the Custody Services Bureau, there will be regular meetings between the Bureau Assistant Sheriff, Detention Division Captains, Facility Commanders and CSB Managers.

B. Such meetings are to be conducted at least monthly, with formal documentation of the proceedings.

II. PROCEDURE

A. All members are encouraged to support the exchange of information.

B. The chain of command will be used whenever appropriate and available methods of communication should be utilized.

C. In order to enhance the staff communication process, staff meetings will occur as follows:

1. BUREAU STAFF MEETINGS
   a. These meetings chaired by the Custody Services Bureau Assistant Sheriff are held bi-weekly or more often as needed.
   b. All designated staff members are required to attend.
   c. During these meetings, information is exchanged regarding the status of the Division, along with the dissemination of information obtained in Executive Management and Departmental Staff Meetings. Special project updates are provided to all staff in attendance. Discussions regarding current policies, procedures and practices are also conducted.
   d. Formal documentation of these meetings will be maintained.

2. SUPERVISORY STAFF MEETINGS
a. These meetings, chaired by the Facility Commander, are held at least quarterly or more often as needed.

b. During these meetings, information from the Executive, and Divisional Staff Meetings is disseminated. Duties are delegated, and daily facility business is to be discussed.

c. Formal documentation of these meetings will be maintained.

3. SHIFT BRIEFINGS

a. The Shift Sergeant conducts daily briefings.

b. Briefings will consist of the reading of post assignments, orders, policies and procedures, training, personnel inspections, special recognition of personnel and the relaying of pertinent information.

c. All briefings shall reinforce job responsibility, coordination of work efforts and the importance of communication.

d. All staff information shall be communicated in a timely fashion, with the exchange of information encouraged.

e. It shall be the responsibility of the shift supervisor, to invite members of specialized and support components from both within and out of the Sheriff’s Office and outside entities to attend shift briefings for the purpose of exchanging information and improving the job performance of involved personnel.

4. OTHER MEETINGS

a. In an effort to keep lines of communication open with criminal justice and service agencies, facility liaisons will be assigned to attend regularly scheduled meetings for the purpose of gathering, exchanging and standardizing information.

b. Facility personnel assigned to liaison positions within the Detention Division will attend the following meetings in addition to others as necessary:

- County Parole
- Medical/Mental Health
- Inmate Welfare Fund
- Department Safety Meeting
- Board of Corrections
- Training Advisory Committee
c. During these meetings, contractual agreements along with operational issues will be discussed if applicable. Each participant will be given the opportunity to present matters of interest.

d. Meeting minutes will be recorded and disseminated to the proper personnel when appropriate.

D. INMATE COMMUNICATION

1. All inmates incarcerated at Martinez Detention Facility, West County Detention Facility, and the Marsh Creek Detention Facility have access to the following methods of communication:

   a. Direct verbal contact with facility personnel
   b. Inmate Request Slips
   c. Grievances
   d. Mail
   e. Telephones
   f. Visiting
   g. Medical/Mental Health Triage phones
   h. Telephones
   i. Interviews

2. Facility personnel will attempt to answer all inmate questions using all available resources.

   a. Staff will provide the inmate with the necessary document(s) or forms to assist them with their request in the event they are unable to properly assist the inmate.

3. All documents received from inmates will be processed without delay and forwarded to the appropriate section of the facility for processing.
I. POLICY

A. Custody Services Bureau Memorandums shall be used to communicate proposals, notifications and directives to all custody staff members in a timely manner.

B. Memorandums must be certified by the final author’s initials in order to be considered valid.

C. All memorandums regarding proposals, temporary directives or procedural revisions or review of existing CSB policy must be forwarded to Custody Administrative Services.

D. Memorandums shall not be used to direct permanent policy change without any other supporting documentation (i.e. revised policy section, etc.)

II. PROCEDURE

A. Memorandums may be used for the following:

1. General communications

2. Proposals

3. Notifications

4. Letters of Interest

5. Temporary directives or procedural revisions

6. Review of current policy

B. Proposals, Notifications and Letters of Interest shall be routed to the author’s direct supervisor and intended recipient.

1. The author must initial the memorandum by their printed name to certify the document.
2. The author of any policy or procedural proposal shall route one (1) copy directly to CAS for review.

C. Memorandums directing CSB temporary directives or procedural revisions or review of current policy may be issued by the following:

1. CSB Assistant Sheriff
2. Detention Division Captain
3. MDF or WCDF Custody Administrative Services Lieutenant
4. Facility Commander

D. Other custody staff members may author the memorandum under the name of the authorizing command staff member.

1. The author shall place their name directly beneath the command staff member’s name as a “by” line.
2. The authorizing command staff member must initial the memorandum by their printed name to certify the document.

E. Temporary Directives or procedural revisions shall include an expiration date on the last line of the memo (no more than thirty (30) days in length) and shall be routed to the following prior to distribution and/or placement on the custody staff lineup board:

1. Detention Division Captain
2. Facility Commander
3. Custody Administrative Services

F. Memorandums directing permanent policy change shall not take effect until one or more of the following has occurred:

1. Changes are reflected in the appropriate CSB Policy and Procedures Chapter and Section.
2. Changes and/or revisions are placed in CSB Policy and Procedures Revision Appendix/Folder.
3. A copy of the memorandum is placed in the CAS hardcopy archive files.

G. Memorandums shall be formatted as follows:

1. Use the “Justify” option to line-up the margins.
2. The narrative font shall be Arial and the pica type shall be 12.
I. POLICY

A. Facility information shall be shared with the community, with facility access being granted to accredited news media representatives, when appropriate.

II. PROCEDURE

A. The Facility Commander, or his/her designee, shall allow bonafide media representatives, specialists in the field of Administration of Justice, Criminal Justice and the public, access to facility information.

B. Accredited news media representatives may have access to detention facilities.

C. Community personnel must properly identify themselves pursuant to CSB Policy and Procedure 2.08.03, CSB Visitor and Photo Badges.

D. The Facility Commander may grant college/university personnel access to the facility for their specified program or internship.

E. The Facility Commander or his/her designee shall provide information to the public and representatives of the media consistent with the preservation of inmate’s rights to privacy and maintenance of facility security.

F. The Facility Commander, or his/her designee, shall allow access to the facility to accredited news media representatives consistent with the preservation of inmate privacy and maintenance of security.

G. Release of information to the public/news media will be in accordance with CCCSO Policy and Procedure Section 1.06.78

H. Requests regarding personnel matters or internal affairs investigations shall be directed to Professional Standards.

I. Requests regarding information on established Divisional policies or procedures will be
referred to the appropriate Division Captain.

J. The public and news media are, by law, entitled to certain information about arrests, crimes and crime reports. The following may be released:

1. Full name, and occupation of adult arrestees

2. Current booking photo of arrestee

   a. Refer to CCCSO Policy 1.06.71 and 1.06.79 for additional guidelines regarding release of booking photographs.

3. The arrestee’s physical description, including date of birth, sex, height, weight, eye color and hair.

4. The agency location, time and date of arrest. The time and date of booking, bail, current holding facility, or time and manner of release.

   a. Release information will be provided only after an individual has been released.

5. Factual circumstances surrounding the arrest must be obtained from the arresting agency.

6. The arrestee’s charges, including outstanding warrants from other jurisdictions, parole or probation holds.

7. Transfer dates and court dates may only be released to those agencies authorized in accordance with 13000 P.C.

   a. Courts of the State

   b. Peace Officers

   c. District Attorneys of the State

   d. Prosecuting City Attorneys

   e. Probation Officers

   f. Parole Officers

K. The public and news media are entitled to the following information about investigations, but must obtain it from the arresting agency. In the event the arresting agency is the Office of the Sheriff, inquiries will be referred to Investigations Division.

1. Time, circumstances and location of all investigations.

2. Time and nature of actions taken.

3. Time, date and location of occurrence.
4. Time and date of the report.

5. The name, age, and current address of adult victims. Information regarding juvenile victims will not be released.
   
a. Exception: For crimes of 261 PC, 264 PC, 264.1 PC, 273a PC, 273d PC, 273.5 PC, 286 PC, 288 PC, 288a PC, or 289 PC, the following shall apply:
   
   • The address of the victim shall not be disclosed.
   
   • The name may be withheld at the victim’s request, or at the request of the victim’s parent or guardian if the victim is a minor.
   
   • Victims of any of the above crimes may request that information, circumstances and related incidents to the crime(s) be withheld from the public.

6. The factual circumstances surrounding the crime or incident.

7. The general description of any injuries, weapons, and property involved.

L. The public and news media are, by law, entitled to certain information about facility operations. Information about facility security will not be released.

1. Facility visitors will be allowed to review the Public Information Manual located in the facility lobby. Visitors may not remove any information from the binder and shall remain under direct supervision while viewing the binder.

2. The contents of the Public Information Manual will be consistent with Title 15, Section 1045 and reviewed on an annual basis.

3. All requests for copies of documents contained in the Public Information Manual must be submitted in writing.
   
a. Requests for Martinez Detention Facility documents will be directed to the Custody Administrative Services Sergeant assigned to that facility.
   
b. Requests for West County Detention Facility documents will be directed to the Custody Administrative Services Sergeant assigned to that facility.
   
c. Requests for Marsh Creek Detention Facility documents will be directed to the Facility Commander.

4. Requests for copies of documents must include the section number of the policy and procedure. Requesters will be informed they can research the desired policy and procedure section at the facility.
M. INMATE VIEWING OF CSB POLICY AND PROCEDURES

1. The following policies/procedures will be made available for inmate or general public review:
   a. Contra Costa County Detention Division rules and procedures affecting inmates as specified in Title 15, Section 1045:
      - Public Information Plan
      - Inmate Education
      - Visiting
      - Correspondence
      - Library Services
      - Exercise and Recreation
      - Books, Newspapers and Periodicals
      - Access to Telephones
      - Access to Courts and Counsel
      - Inmate Orientation
      - Individual/Family Service Programs
      - Voting
      - Religious Observances
      - Inmate Grievances
      - Rules and Disciplinary Penalties
      - Plan for Inmate Discipline
      - Forms of Discipline
      - Limitations on Discipline
      - Responsibility for Health Care Services

   b. Title 15 Board of Corrections Regulations (not Title 15 Guidelines) are available upon request to inmates or the public.
      - Anyone requesting copies of Title 15 and Title 24 documents will be referred to the Board of Corrections.
c. Staff will make every effort to obtain and furnish information, as authorized in this policy, in a timely manner.

N. INMATE REQUESTS FOR NEWS MEDIA INTERVIEWS

1. An inmate requesting an interview with the news media will submit an "Inmate Request Form" to the Detention Division Captain/designee prior to the requested date/time of the interview.

2. Inmate interviews will not be subject to auditory monitoring. Visual supervision may be maintained to ensure the safety of the media representative and the security of the facility.

3. The Division Captain/designee will select the appropriate location to be used for the interview. All interviews will be conducted during normal weekday business hours unless the Detention Division Captain/designee approves prior arrangements.

O. NEWS MEDIA REQUEST FOR INMATE INTERVIEWS

1. Representatives of the news media may request to interview an inmate. The request may be made in writing or by telephone to the Detention Division Captain/designee within a reasonable period of time prior to the requested time for the interview.

2. The request will normally be approved or disapproved by the Detention Division Captain/designee within a reasonable time depending upon the security conditions required.

3. After the request is received from the news media for an interview, the inmate will be notified of the interview request. The inmate must agree to be interviewed and sign a consent form before the request will be considered. The form will be placed in the inmate's booking.

P. INMATE/MEDIA CONSENT/AGREEMENT

1. An interview with an inmate or use of video, film or audio equipment may be denied for any of the following reasons:

   a. The news media representative, or the news organization they represent, does not agree to the conditions established by this policy or Department policy.

   b. The inmate is physically or mentally unable to participate. This will be supported by a medical statement from Medical/Mental Health staff, with a copy being placed in the inmate's booking, stating the reason for the denial.

   c. If the inmate is a juvenile (under 18) the Division Captain/designee will notify the representative of the news media of the inmate's status as a juvenile, and that a court order must be obtained for the interview.
d. The interview, in the opinion of the Division Captain/designee, would endanger the health and safety of the interviewer, or would cause serious unrest or disturb the good order of the Facility.

2. When media representatives visit a Facility, photographs of programs, activities and interviews may be taken. Inmates have the right to privacy. They will not be photographed (still, movie or video), or recorded without their consent.

3. A written consent must be obtained from the inmate(s) prior to photographing or recording them. The Release of Information/Interview authorization form (DET 009 FRM) will be completed and placed in the inmate’s booking.

4. Due to special security concerns regarding interviews, an inmate in segregation, overnight housing, or hospital status may be restricted from participating in an interview. All such cases must receive the approval of the Detention Division Captain/designee.

Q. INMATE/MEDIA INTERVIEW

1. Prior to any Facility visit for an interview by news media representatives, the lobby receptionist will advise the Shift Supervisor of the visit.

   a. The Shift Supervisor will:

      • Check the inmate's booking to determine if the inmate has consented to the interview and what (if any) equipment may be used by the media representative.

      • Give the media representative a "Media Agreement" and have the media representative complete the form (DET 041 FRM).

      • Separate the form, placing the original (white) copy in the inmate's booking and give the (yellow) copy to the media representative after the media representative has completed the form.

      • Notify the receptionist that the media representative is clear to proceed with the interview.
I. POLICY

A. To make available for public inspection, all Sheriff’s Office contracts within the Detention Division.

II. PROCEDURE

A. The Custody Services Bureau Assistant Sheriff may allow a member of the public access to Sheriff’s Office contracts relating to the Detention Division.

B. Requests for access to Detention contracts shall be made in writing to the Custody Services Bureau Assistant Sheriff.

C. The Custody Services Bureau Assistant Sheriff will review and respond to all requests in a timely manner.

Release of any contract information shall be in accordance with the California Code of Regulations Sections 6250 - 6257.
I. POLICY

A. The Custody Services Bureau will ensure that inmate population statistical data is accurately recorded.

B. It is the responsibility of the CAS Lieutenant to compile, record and report all inmate population statistical data. This data shall include, but not be limited to, records on admission, processing, and the release of inmates.

II. PROCEDURE

A. Information contained in the daily record shall be used to provide the necessary numbers for producing statistical reports.

B. Statistical information will be broken down into the following categories:

1. Male/Female.
2. Sentenced/Unsentenced.

C. The statistical information shall be compiled from each facility.

1. Population Analysis:
   a. Inmates booked.
   b. Inmates released
   c. Average daily count

       • MDF Female count will be confirmed by contacting the M Module Housing Unit Deputy.

2. Events Processed:
a. Overtime
b. Escapes
c. Batteries requiring medical attention
   • Inmate to staff
   • Inmate to inmate

D. All reports shall be compiled daily, with a monthly and year-end recapitulation.
   
   1. Completed Daily Status Reports are forwarded to Detention Administration via the Classification Unit.

E. All monthly and yearly recapitulations shall be distributed to CSB Command Staff for use in compiling agency statistics.
I. POLICY
   A. The Custody Administrative Services Lieutenant shall maintain a current listing of all forms. They shall be reviewed on an annual basis to ensure that they are accurate and appropriate for their intended function.

II. DEFINITIONS
   A. DIVISION SPECIFIC FORMS: Any form utilized at the Division level and not intended for general departmental usage.

III. PROCEDURE
   A. Custody Administrative Services shall maintain a current list of all Division specific forms in use.
   B. The Custody Administrative Services Lieutenant shall be responsible for the ongoing maintenance of the Division specific forms list.
   C. Division specific forms must be reviewed and approved by the CSB Assistant Sheriff prior to implementation and use. New forms submitted for such review shall include the following:
      1. An explanation of the need for the form.
      2. A description of how to complete and route the form.
      3. A description of who is responsible for completion and review of the form and how often or when it is required to be completed.
      4. A description of filing location and retention requirements.
   D. The Custody Administrative Services Lieutenant shall review the list on an annual basis to ensure that the forms are accurate and appropriate for their intended function and that duplicate forms are not in use.
I. POLICY

A. It will be the policy of this division, to abide by the standards set forth in Minimum Jail Standards 1029.

B. The Custody Services Bureau Assistant Sheriff, acting through designated personnel, shall develop and publish a manual of Policy and Procedures for the jail facilities.

C. This manual shall be made available to all employees and shall be updated at least annually.

II. PROCEDURE

A. The manual for the jail facilities shall provide for, but not be limited to the following:

1. Table of organization, including channels of communications.

2. Inspections and operation reviews by the Facility Commander and Division Management staff.

3. Policy on use of force and restraint equipment.

4. Procedure and criteria for screening newly received prisoners for release, per 849(b)(2) PC and 853.6 PC and any other such processes as the Facility Commander is empowered to use.

5. Security and control including physical count of inmates, searches of the facilities and inmates, contraband control and key control.

6. Emergency procedures including:
   a. Fire suppression preplan as required by Minimum Jail Standards 1032.
   b. Escapes, disturbances and the taking of hostages.
c. Civil disturbance.

d. Natural disasters.

e. Periodic testing of emergency equipment.

f. Storage, issue and use of weapons, ammunition, chemical agents and related security devices.

7. Suicide prevention.

8. Segregation of inmates.
I. POLICY

A. The Custodian of Records will respond to all Subpoena DUCES TECUM requests in a timely manner.

B. The Custodian of Records will immediately contact the requesting party of the Subpoena DUCES TECUM in the event the record cannot be produced within the time requested.

II. DEFINITION

A. SUBPOENA DUCES TECUM: A subpoena which, in addition to the usual clauses, requiring the attendance of the witness in court to testify, contains clauses directing him/her to produce at the same time for use as evidence in the litigation, certain described books, papers, records, and documents.”

B. CUSTODIAN OF RECORDS: The Custody Administrative Services Sergeant shall serve as the Custodian of Records unless designated otherwise by the Detention Division Captain.

III. PROCEDURE

A. The Custodian of Records will handle all subpoenas regardless of how the subpoena is addressed.

1. Exception: Subpoenas requesting information from Health Services must be delivered or mailed directly to the Director of Health Services.

B. EXAMINATION, COPIES AND FILING

1. The Custodian of Records will examine the subpoena to determine the exact documents requested.

2. The record in question shall be photocopied.

a. One copy shall be stamped indicating a true copy under the penalty of
perjury, signed by the Custodian of Records, sealed in an envelope (with copy of subpoena affixed), and forwarded to the court and department of jurisdiction.

b. A second copy, along with a copy of the subpoena, shall be retained by the Custodian of Records as confirmation of what records were forwarded.

• This copy will also serve, as a back up if the Custodian of Records is later required to appear on the case.

C. ORIGINAL DOCUMENTS

1. Original documents shall never be forwarded.

a. If originals are needed, the Custodian of Records shall appear in court with originals and certified copies for submission.

b. Original records shall never be turned over, unless ordered to do so by a judge.

D. CLARIFICATION

1. If the subpoena appears vague and ambiguous, a call to the requesting attorney to clear matters is suggested; noting the date and time of the call, and clarification requested.

E. DISTRICT ATTORNEY

1. When a subpoena is received from a defense attorney, the district attorney handling the case shall be notified.

a. If the district attorney requests a copy of the information going to the defense attorney, the request will be complied with.
I. POLICY

A. The policies and procedures established by the Detention Division shall not discriminate against any person protected by the Americans with Disabilities Act in the provision of services, programs and activities administered for program beneficiaries and participants.

B. This protection also extends to employees, visitors, volunteers, contractors and any citizen having legitimate business within the Detention Division.

II. DEFINITIONS

A. INDIVIDUALS WITH DISABILITIES

1. The ADA covers individuals who have a physical or mental impairment that substantially limits one or more major life activities, who have a record of such impairment, or who are regarded as having such impairment.

2. Temporary conditions, such as current users of illegal drugs or alcohol, are generally not covered by the ADA.

B. ELIGIBLE INDIVIDUALS

1. Covered individuals are entitled to an equal opportunity to participate in programs, services or activities offered by the Detention Division.

2. Persons with disabilities may be refused participation in services, programs or activities of the division if there is a compelling reason for such refusal.

a. One compelling reason may be a threat to the disabled individual or others. The threat must be direct and not speculative.
C. MAJOR LIFE ACTIVITIES

1. Basic functions that the average person can perform with little or no difficulty.

III. PROCEDURE

A. ACCOMMODATING DISABLED INDIVIDUALS

1. Disabled individuals who are eligible to participate in services, programs and activities, but require reasonable accommodations to participate fully, should request the accommodation(s) through their supervisor or employer.

2. Inmates who require reasonable accommodations must request them through the appropriate unit, i.e., Schools, Medical, Mental Health, Classification etc.
   a. This will be accomplished through the Inmate Triage phone or an Inmate Request form.
   b. Staff will assist those individuals that are unable to access this system due to their disability.

3. Visitors who need reasonable accommodations may request them through staff assigned to visitation or in advance, through the Facility Commander, or his/her designee.

4. Volunteers may request reasonable accommodations through the Inmate Services, Facility Commander, or his/her designee.

5. The appropriate personnel shall promptly review all requests. If the eligible individual’s participation in the service, program, or activity would fundamentally alter the nature of the service, program, or activity, or if the Facility Commander or his/her designee can document that the eligible individual’s participation would pose a direct threat to others, the individual does not need to be accommodated.

B. BOOKING/PROCESSING

1. Arrested subjects who appear to meet the criteria of a disabled individual for the purposes of A.D.A. will be held in such a way to ensure their safety. If Booking staff have questions about the subject’s condition or needs, health care personnel should be consulted immediately.
   a. During intake, arrested persons with an apparent physical impairment will be immediately brought to the attention of medical staff.
   b. All persons confined to a wheelchair shall be placed in a holding cell designated for the physically impaired, pursuant to CSB Policy and Procedure 2.11.04, Acceptance of Physically Impaired Inmates.
   c. Orientation materials, including PREA, will be available for inmates in audio, visual, and tactile formats, to ensure all forms of disabilities are accommodated while orienting inmates to the facilities and PREA.
d. For additional information regarding Booking procedures, refer to CSB Policy and Procedures 2.11.02, Introduction to Intake and 2.11.03, Intake Procedure.

C. INITIAL MEDICAL/MENTAL HEALTH SCREENING

1. Medical staff shall screen all inmates entering into the facility for medical and mental health issues, notifying Booking staff of those inmates meeting the “disabled individual” criteria.

   a. Medical staff will inform booking staff of any special needs the inmate(s) may have.

2. Upon notification of any special needs, booking staff will make all reasonable efforts to provide the noted accommodations.

3. Following the medical screening, if special needs are identified and/or special housing is indicated, the remaining processing will be completed immediately. The inmate will then be moved to the identified housing location without unnecessary delay.

4. In the event that “reasonable accommodations” cannot be made for the inmate(s), the Shift Sergeant shall be notified immediately.

5. For further information about the initial medical screening of inmates, refer to CSB Policy and Procedure 2.11.04, Acceptance of Physically Impaired Inmates and 2.13.03, Inmate Medical/Health Appraisal Screening.

D. CLASSIFICATION

1. All inmates will be classified in accordance with Chapter 12 of this manual.

   a. An inmate(s) disability shall be considered during the classification process.

2. Inmates with disabilities should be housed in general population and in designated cells unless such a housing assignment would jeopardize their safety or the safety of staff.

   a. Any special housing for disabled inmates will be considered on a case-by-case analysis of the inmate’s needs and facility security.

   b. For further information about classification procedures, refer to CSB Policy and Procedure Manual Section 2.12 “Classification.”

E. PROGRAM ELIGIBILITY CRITERIA

1. All inmate services, programs and activities, will develop and make available to inmates, a list of basic eligibility requirements.

   a. These requirements will relate directly to the program’s mission and goals.
b. If physical requirements are included as part of the service, program, or activity’s eligibility requirements, the material needs to clearly identify the purpose of these physical requirements as set forth.

c. Refer to the CSB Policy and Procedure Manual Section 2.18 “Inmate Services and Programs”, for information regarding services, programs and activities provided to inmates.

2. All services, programs and activities offered by volunteers will also include volunteer eligibility criteria.

a. If there are disqualifying physical disabilities for volunteers, such criteria will be directly linked to the services, programs, or activities, mission and goals and any threat to others posed by the volunteer’s participation.

b. Any physically limiting eligibility criteria are documented as having relevance to the volunteer position.

c. Exclusion of disabled volunteers will be evaluated on a case-by-case basis and will be approved by the Inmate Services Manager and the Facility Commander.

d. To every extent possible, consistent with facility safety and eligibility requirements, disabled volunteers will be accommodated.

F. INMATE PROGRAMS AND SERVICES:

1. Inmates with disabilities for the purposes of A.D.A. will be afforded access to all services, programs, and activities for which they meet eligibility criteria; except if their participation would pose a documented direct threat to themselves, others or if their participation would fundamentally alter the program.

2. Inmates needing reasonable accommodation to participate in services, programs, or activities for which they are eligible will notify the Inmate Services Manager via an Inmate Request form.

a. The Inmate Service Manager will make the necessary arrangements for the accommodation unless the accommodation poses an undue hardship (cost) or an administrative burden for the agency.

b. Most accommodations will not meet those thresholds and would require substantial justification prior to this being used as a reason to not provide the accommodation.

c. The Inmate Services Manager shall consult with the Facility Commander in all cases where questions arise as to granting reasonable accommodations for inmates.

d. Refer to Section 2.18, “Inmate Services and Programs” of the Policy and Procedure Manual for information regarding services, programs and activities provided to inmates.
G. INMATE GRIEVANCE AND DISCIPLINARY PROCESS

1. If a disabled inmate, as defined by A.D.A. is the subject of a disciplinary process that could deprive them of any privilege or right afforded by the Constitution, case law, or administrative procedure, the Custody Sergeant will ensure that the inmate understands the charges against them and is able to mount a credible defense of the charges.

   a. If the inmate in question is hearing impaired or deaf, appropriate arrangements will be made so that the inmate completely understands all phases of the disciplinary process.

   b. If the inmate in question is developmentally disabled or mentally ill, the Custody Sergeant may make whatever accommodations they think necessary for the inmate to understand and defend the charges.

   c. Refer to CSB Policy and Procedure 2.16.03, Inmate Discipline for additional information.

   d. If a disabled inmate, as defined by A.D.A. wishes to grieve an issue, staff will fully assist the inmate in understanding the grievance process and in completing the process. This is especially true if the inmate requires assistance in writing or if the inmate is mentally ill or developmentally disabled.

   e. Refer to CSB Policy and Procedure 2.16.04, Inmate Grievances for additional information.

H. ACCESS TO TELECOMMUNICATION DEVICES FOR THE DEAF (T.D.D.)

I. VISITATION

1. All disabled visitors will be afforded the same visiting privileges as non-disabled visitors. Staff will make accommodations for those individuals in need of this service.

2. Visiting rooms shall be equipped and made available to handle disabled visitors. Refer to CSB Policy and Procedure 2.17.02, Inmate General Visiting Rules for additional information.

J. FACILITY ACCESS

1. The County of Contra Costa is responsible for ensuring that all county-owned detention facilities are accessible to staff, inmates, visitors, volunteers and the public. The Office of the Sheriff, in conjunction with the Detention Division will assist the County in evaluating the accessibility of facilities and in providing any corrective actions that might be necessary to ensure access is maintained.

<td>SUBJECT: Facility Space and Equipment Review</td>
</tr>
</tbody>
</table>

## I. POLICY

A. The Facility Commander will review space and equipment requirements at least annually, report any deficiencies to the Detention Captains and plan with the Captains for the effective use of space and equipment.

## II. PROCEDURE

A. The Facility Commander will review space and equipment requirements with his/her management staff and any other appropriate staff members at least annually and submit the following to the Detention Captains:

1. Equipment deficiencies and needs in the annual budget request, with plans for their effective use.
2. Space deficiencies, needs and recommendations for their effective use.
3. Recommendations for reassignment of existing space and equipment.

B. As part of the space and equipment review, the Facility Commander or his/her designee shall prepare an inmate population projection plan designed to anticipate the future needs of the facility.

1. The plan will be submitted to the Sheriff, via the chain of command, at the end of each fiscal year.
2. The plan should extend for at least five (5) years into the future and include the following information:
   a. Expectations as to whether the inmate population will increase, decrease, or remain the same at the facility.
   b. Five (5) year staffing needs.
   c. Five (5) year effects on all areas of operations.
d. Five (5) year action plan to meet the changing needs of the facility.

3. Additionally, the Facility Commander shall ensure that there is a contingency plan to provide for the projected population trend. At a minimum, the plan should include the following:

a. Staffing requirements.

b. Physical plant needs.

c. Budget projections
I. POLICY

A. Accounting practices will be utilized to ensure the safe keeping of Inmate Trust Funds and all other facility funds.

B. Account Clerks are to provide support to the Detention facilities of the Sheriff.

II. PROCEDURES

A. Accounting is responsible for auditing the following accounts and procedures:

1. Shift Work
2. Indigent Inmate Mail
3. Engraving Shop Invoices
4. Bail
5. Commissary
6. Inmate Trust Account
7. Damaged Property Checks
8. Inmate Transportation Vouchers
9. Inmate Request Slips
10. Meals and Miscellaneous Deposits
11. Purchase Orders
12. Warrant Requests
13. Procurement Cards
14. Outstanding Balances Report
15. Record Retention
I. POLICY

A. All inmate funds accounts held by the facility are trust funds and cannot be co-mingled with other funds. These funds shall be controlled in accordance with the following:

B. All funds shall be accounted for, controlled and monitored by a system of generally accepted trust accounting practices and procedures.

C. All transactions of funds in an inmate’s account shall require a receipt.

D. All funds collected on each shift shall be placed in an officially designated and secure location.

E. All procedures will be reviewed annually and updated as needed.

F. All procedures will conform to Sheriff’s Office policies and procedures.

II. PROCEDURES

A. ACCEPTABLE FUNDS FOR INMATES

1. Money orders and Cashiers checks made out to the inmate.

2. Funds received via Postal Mail in the following circumstances:
   a. Money orders
   b. Cashiers checks

3. Funds can be received via Canteen Services by the following methods:
   a. Kiosks located in the lobby at Martinez and West County Detention Facilities
b. Telephone with credit or debit card at 1-866-394-0460

c. Web site at www.SmartDeposit.com

B. RECEIPTING FUNDS FOR INMATES AT INTAKE

1. The Booking Deputy counts the funds and enters amount in JMS as part of the pre-booking process.

2. The Booking Deputy then seals the receipts and funds in a plastic bag and places it into the Intake safe.

3. The Release Clerk retrieves the sealed bags from the Intake safe and brings the sealed bags to the Release desk to be opened. The Release Clerk will verify the money to the receipt. If it is correct, the Release Clerk will enter the funds into JMS and approve the transactions in JMS.

4. If the Release Clerk finds a discrepancy between the money and the receipt immediately notify the Intake Deputy.

5. Unresolved discrepancies will be reported to the shift supervisor and noted in the shift work.

6. If additional funds are found on an Inmate an additional note will be entered into JMS in Intake and placed in the Intake safe. The Release Clerk will then verify the funds against a JMS receipt.

C. RECEIPTING FUNDS FOR INMATES RECEIVED VIA POSTAL MAIL

1. Remove the funds from the envelope.

2. In JMS, click on the FUND MANAGEMENT module. Next, click on the Fund Management tab. Click on the Deposit tab at the top of the page. In the Account Selection, To Account, click Find to locate the correct inmate through Booking Search. Verify the name of the inmate, and if correct, click on Select Booking, which populates the account fields. Select check from right tab. Check box, and enter check information. Enter information in yellow highlighted fields (Deposit reason - Booking Deposit; Type – Money Order of Registered Check; Check #; Check amount; Check date). Click Save/Receipt. Click the Print button, on the bottom right. Once print screen options appear, request two (2) copies and click Print.

3. The printer will print two receipts. Give one receipt to the Release clerk with the funds to be locked up and the other receipt is to be given to the Inmate.
I. POLICY
   A. Accounting is responsible for processing stale dated checks.

II. PROCEDURE
   A. STALE DATED CHECKS
      1. Every check issued to an inmate upon release or other wise has printed on it “VOID AFTER SIX MONTHS”. This notice serves as the notice required under the Government Code Section 26642, “Disposition of Unclaimed Property”.
      2. Monthly: Accounting will generate two reports from the Funds Management Module of the Jail Management System (JMS) - Check Register Dates Report and Check Register Details Report. These reports include database of all checks not cashed that are six months or more from the date of issue.
      3. From this check register list in Funds Management, Accounting will enter the date funds are database to be transferred to the Auditor’s Office.
      4. Select the option “Mark Stale” on each stale dated check that is listed on the Check Register Details Report.
      5. 
      6. 
7. Post the check as a deposit to Electronic Deposit Permit and deliver the check to the Auditors Office with a copy of the check, check register details and copy of the receipt from the Electronic Deposit Permit.

8. Accounting will maintain a filing system of the stale date checks to be accessed when research is needed.

B. STALE DATED CHECK REPLACEMENT

1. Within a two-year period if an Inmate or former Inmate requests replacement for a stale dated check they will be directed to Accounting.

2. Accounting will research in the JMS database, the in Funds database, and in the file system for Stale dated checks.

3. If it is determined that the Inmate’s check has never been cashed nor replaced, Accounting will send the inmate a form from the Auditor’s office titled “Request for Replacement of Outdated Warrant”. If the check is lost or destroyed a “Lost – Destroyed Warrant Certificate” (also from the Auditor’s office) will be sent to the inmate to be filled out by the inmate and returned to Accounting.

4. When the form is returned a copy will be made and placed in the appropriate Stale dated check file and the original will be mailed inter-office to the Auditor-Controller.

5. The Auditor-Controller will then request a check from the Accounts Payable division. The check will then be forward to Accounting where a copy will be made and placed in the Stale Dated check file along with the form.

6. Accounting will mail the check to the inmate’s address listed on the form.
I. POLICY

A. Accounting is responsible for processing the stop payment that is placed on the inmate’s check and issuing a replacement check.

II. PROCEDURE

A. ISSUING A STOP PAYMENT ON AN INMATE’S CHECK

1. Former Inmates requesting a stop payment for a check that was issued to them at the time of release or for a Commissary refund will be directed to Accounting.

2. Accounting will research the information given to them by the Inmate and determine if a check was issued and if it had cleared the bank.

3. If Accounting determines that the check has not been cashed, the Inmate will be notified a fee of $30.00 will be charged to them for placing a stop payment.

4. This stop payment fee will be taken out of the amount of the money owed to the Inmate and the Inmate will be issued a check for the balance.

5. A waiting period of three working days will be in effect from the fax date. Then in JMS we will void the original check transaction, and reissue two checks, one for $30.00 stop payment fee and one for the balance.

6. The $30.00 fee check will be issued to the Sheriff’s Department and deposited on a Deposit permit to Fund/Org 2590 and Sub Acct 2310.

a. Note: by depositing the $30.00 to this Fund and Org it offsets the Stop payment fee charged on the billing statement to maintain this account.
8. The balance check will be either sent to the former inmate or held at the Front Window for pick up.
I. POLICY
   A. Accounting is responsible for auditing Inmate funds.

II. PROCEDURE
   A. AUDIT OF INMATES CASH ACCOUNTS
      1. The Accounting Unit is responsible for auditing the Shift work sent to Accounting from the Release area of Operations.
      2. In the audit process as soon as a discrepancy is found, an email or memo and a phone call will be directed to the Clerical Supervisor for investigation and copied to the Facility Commander.
      3. The findings will be put with the shift work and will be noted on the Audit log along with the copy of the findings to be reported to the Sheriff’s Fiscal Officer.
      4. Each Facility Accounting personnel will provide the Account Clerk Supervisor a monthly report of all discrepancies.
      5. If the inmate is out of custody with additional funds a collection letter will be sent to the last known address, followed by a phone call to demand payment or payment plan.
      6. If the Inmate is in the custody of CAF the CAF staff member handling the case will be notified to demand payment from the Inmate.
      7. The amount will be set up in the JMS historical account for the Inmate till the amount is received from the Inmate or the Inmate comes back into custody with funds, at that time the funds will be taken from the Inmate to be applied to the Historical account.
      8. The maximum amount of time an amount will be left in history will be 2 years. After the 2 years a relief of shortage process will start to replace the funds.
I. POLICY

A. Release Clerks are responsible for the proper handling and security of inmate funds.

II. PROCEDURE

A. GENERAL INFORMATION

1. Release clerks are responsible for balancing their shift work and only the Release clerks are authorized to have access to the cash drawer.

2. The cash drawers and check drawers are to be kept closed, locked, and the key secured.

3. **No change will be made out of the Cash drawer at anytime.**

4. **No monies will be used for balancing which are not documented by a computer transaction.**

5. After receiving receipted cash, checks or money orders, the Release clerk will verify the amount against the JMS receipt using the Funds Approval screen in JMS. Any discrepancies will be brought to the attention of who processed the receipt for explanation and investigation.

6. Release clerks are not allowed to view the prior shift’s Release clerk’s shift work.

7. The completed shift work package is to be placed in a secured drawer at the end of each shift.

8. Release clerks are responsible for voiding incorrect transactions.

9. If the Release clerk is running low on change it is possible to order change through Westamerica Bank by way of Accounting. The process is as follows:

   a. A request from the Clerical Supervisor (MCDF Senior Clerk) in the form of
an email to the Account Clerk Supervisor including the type of change needed and amounts.

b. The Account Clerk Supervisor will reply to the email to confirm receipt of the request.

c. The Account Clerk Supervisor will phone in the request to WestAmerica Bank.

d. The WestAmerica Bank teller will deduct the funds from the Inmate Trust Account, pull together the requested change and place it in a bag to be picked up by Loomis.

e. Loomis will deliver the change the next morning when picking up the deposits (MCDF request will be delivered to MDF).

f. Loomis will request the Clerical Supervisor’s (in the case of MCDF, MDF Clerical Supervisor will sign) signature on the receipt for the change.

g. The receipt for change will then be forwarded to Accounting, and a copy will be included with the shift work. (in the case of MCDF, MDF clerical supervisor will place the change in a locked blue bag to be taken to MCDF by transportation).

h. The cash drawer will be over the amount of change requested. Please have the Release clerk (MCDF Senior Clerk) deposit the overage making the appropriate notes.

Note: When urgent, Sworn or Accounting staff can go to the bank to get change.

B. CASH DRAWER COUNT IN

2. Circle which Facility: MDF WCDF MCDF

3. Circle which count: IN OUT RECOUNT

4. Write in date: _______ and circle which shift: D S G

5. Write in time: _______

6. Write in beginning check #: __________

7. Write in your initials: ______________

8. Count the number of each denomination. Write the number in the right column. Multiply this number by the denomination and write the amount in the $AMOUNT column.

9. Add all amounts and write in the total. It should be $1000 but simply report what you count.
10. If over or short, write the amount in the AMT.OVER/SHORT column.

11. Place this report in the shift work drawer.

C. REGULARLY DURING THE SHIFT

1. Keep all DEP and if applicable the INTK receipts in transaction number order according to the Cash Drawer Balancing Report or Funds Approval Screen.

2. Keep all FRLW CASH receipts in transaction number order and make certain all receipts are signed by Inmate and Sergeant.

3. Keep all FRLW CHECK receipts in transaction number order and make certain all receipts are signed by Inmate and Sergeant.

4. Keep all WITH CHECK receipts in transaction number order.

5. Keep all FRLW and WITH check stubs in numerical order.

6. Keep both cash drawers locked when you are not there.

7. Keep the cash drawer key with you at all times.

8. Keep the check cabinet locked at all times.

9. Check and remove DEP money from front drawer as necessary.

10. Clear all transactions from Approval Screen repeatedly throughout the shift.

11. If funds are check or money order, endorse with stamp.

12. Count the money attached to each receipt, one at a time and approve each transaction as you count it.

13. If the money does not match the receipt, advise a Supervisor and then create a new DEP transaction. In the notes field use the following format: To replace voided transaction #________ - money did not match receipt - was $_____ but shb $_____ - advised __________. Screen print your void notes, attach to the voided transaction and have the Supervisor sign off.

14. Write the following information across the face of the voided receipt: VOID - See corrected trans. #________@.

15. Void the transaction in the Funds Approval screen indicating the following in the notes field: example (Money doesn’t match receipt - was $_____ but shb $_____) - notified Supervisor __________ - See corrected transaction #___________. (VOID PROCEDURE)

D. JMS STEPS TO COUNTING OUT

1. Call Intake and/or Front Window to stop all transactions.
2. Open Funds Approval Screen and clear all remaining transactions. If you have INTK transactions on your screen and not yet in Release, call Intake to send receipts and money immediately through tube. If you have DEP transactions on your screen but do not have the receipts and money do a final check of the front window money drawer.

3. After clearing all transactions, exit the screen and go back into it again to make sure nothing else is there. Clear whatever shows up. Screen print a blank Funds Approval Screen for your shift work package, making sure the date and time appear on print out.

4. Print the Cash Drawer Balancing Report, enter the starting balance from the Count In Report.

5. Print the Check Register Report using the Start and End time from the Cash Drawer Balancing Report.

6. Call Intake and/or Front Window to begin receipting money again.

E. RECOUNT SHIFT BALANCE REPORT

1. Pull all but $1,000.00 from drawer if applicable.

2. Recount the drawer and prepare the RECOUNT REPORT.

3. Circle which Facility: MDF WCDF MCDF

4. Circle: RECOUNT

5. Write in date: _______ and circle which shift:  D  S  G

6. Write in time: _______

7. Write in your initials:_______________

8. Count the number of bills for each denomination and insert in the RIGHT column.

9. Multiply the denomination by the RIGHT column figure and insert in the $ AMOUNT column.

10. Add up the $ AMOUNT column and insert in TOTAL column.

11. The total should be $1,000.00 if applicable. If not, count again. Please note: There might be occasions were you might not have $1,000.00 due to releases and shortage of cash being received at the facility.

   a. NOTE: IF THE COUNT IN DRAWER REMAINS UNTouched AND THEREFORE UNCHANGED, YOU MAY SO STATE ON THE COUNT IN REPORT TO AVOID HAVING TO PREPARE A RECOUNT REPORT.

F. END OF SHIFT DRAWER COUNT (COUNT OUT):
2. Circle which Facility: MDF  WCDF  MCDF
3. Circle which count: IN  OUT  RECOUNT
4. Write in date: ______ and circle which shift: D  S  G
5. Write in time: ______
6. Write in beginning check #:__________
7. Write in last check # used:___________
8. Write in your initials:________________
9. Make a copy of the checks (check-in) and money orders. Run a tape and attach the white copy to the top of the stack. Attach the yellow copy to the photocopies of the check/money orders.
10. Write the total amount of checks/money orders in the $ AMOUNT column on the Shift Balance Report. Set aside checks/money orders and photocopies for now.
11. Count the number of each denomination in drawer.
12. Write the number in the left column.
13. Multiply the left column # by the denomination and write the amount in the $ AMOUNT column.
14. Add up each total in the $ Amount column. Put this number in the TOTAL column.
15. Staple the white tape to the upper left back side of the Count Out report.
16. The yellow copy of this tape should be stapled to the back of the blue deposit slip.
17. Ignore the $1,000.00 or cross out if applicable.
18. Put the number in the TOTAL COLUMN (SEE #14) in the AMT. TO DEPOSIT column.
19. Write in the amount shown on the final page of the JMS Cash Drawer Balancing Report in the AMT. JMS REPORT column.
20. If the amounts do not match, write in the difference on the final line and circle if over or short.
21. Document what you are able to determine about the overage/shortage using the Trouble Shooting Check List.
22. (See #8 under Trouble Shooting) and include it with your shift work.

G. PREPARE DEPOSIT

1. Count the currency and stack from the bottom up beginning with the largest denomination:
   a. Hundreds
   b. Fifties
   c. Twenties
   d. Tens
   e. Fives
   f. Ones

2. Run tape of currency and coin.

3. Put all loose Coin to be deposited in a small plastic bag.

4. Staple the white tape to the upper left back side of the Count-Out Shift Balance Report.

5. Staple the yellow copy of the tape to the back of the yellow deposit slip.

6. Rubber band this tape to the top of the stack of money.

7. Prepare the deposit slip.

8. Write in the date.

9. Write in your shift/initials (example DS/PF) in the top left corner.

10. Write in the total currency.

11. Write in the total coin.

12. Write in the total money order/checks and below that write (see attached list).

13. Write in the total deposit in both boxes at bottom of slip.

14. Write the Plastic Security Bag number on the deposit slip.

15. Remove the top 2 copies of the deposit slip (white and yellow).

16. Paper clip the yellow copy of the deposit slip to the front, top, right side of the Count-Out Shift Balance Report.

17. The white copy of the deposit slips is rubber banded to the top of the cash and
checks/money orders.

18. On the Plastic Security Bag put your name, shift, date, and total amount to deposit. Fill the rip off tab completely, but do not rip off the tag.

19. Put the money, tape and deposit slips in the security bag, seal bag and drop in safe.

H. OUT GOING RELEASE CHECKS

1. The checks are pre-stacked in reverse numerical order. Place them in the printer drawer the same way making sure they continue to run in consecutive order.

2. When printing a check, make sure the computer check number is the same as the actual check number.

I. CHECK REGISTER

1. Print the Check Register (same date and time as Cash Drawer Balancing Report).

2. Stack check stubs in numerical order.

3. Compare check stubs to register for accuracy (check numbers and amounts).

4. If a check number is wrong on the register, draw a line through the number and write the correct number right next to it.

   a. **NOTE:** IF THE CHECK NUMBER IS INCORRECT EMAIL OR FAX ACCOUNTING (925-646-4641) ADD THE CORRECT CHECK NUMBERS AND AMOUNTS. IF THE TRANSACTION DOES NOT PRINT THE CHECK VOID THE TRANSACTION AND REDO THE CHECK. MANUAL CHECKS ARE NOT ALLOWED

5. **Paper clip** the check stubs to the register in numerical order.

6. Place the check register with the attached check stubs, in the shift work package behind the money order/check copies.

J. ASSEMBLE SHIFT WORK PACKAGE FROM TOP TO BOTTOM

1. The top sheet is the Count Out Shift Balance Report.

2. Staple the $ AMOUNT tape to the back left side of the Count Out Shift Balance Report.

3. Staple the yellow copy of the deposit tape and the yellow copy of the $ AMOUNT tape to the back of the yellow deposit slip.

4. **Paper clip** the yellow deposit slip to the front of the Count Out Shift Balance Report.

5. Next, the troubleshooting notes if applicable.
6. Next, is the Cash Drawer Balancing Report.

7. Next, are the copies of the money orders and checks (check-in).

8. Next, is the Check Register, with check stubs paper clipped.

10. Next, is the Count-In Shift Balance Report.

11. Next are the Dep and Intk receipts in transaction number order.

12. Next are the signed Frlw Cash receipts in transaction number order.

13. Next are the signed Frlw and With Check receipts in transaction number order.

14. Rubber band the package flat. Please do not fold or bend. Place in the locked shift work drawer.

K. TROUBLESHOOTING

1. If the money does not match the report, check the first receipt and the last receipt to make sure they are on your report.

2. If the money still does not balance to the report, look at each check receipt to see if fund type check was selected instead of check-in. Check is wrong and will not show on the Cash Drawer Balancing Report.

3. If the money still does not match the report, compare all receipts to the report to see if something is missing.

4. If the money still does not balance, you may have a duplicate transaction on your report. If this is the case, void the duplicate.

5. Compare the dollar amount on the yellow deposit slip to the printed amount on the Dep transaction receipt.

6. Compare the dollar amount on checks and money orders to the dollar amount on the transaction receipts.

7. If all of the above steps do not resolve the difference, recount the money.

8. If the money still does not balance to the report, fill out the Trouble Shooting Check List to document the steps you took to resolve the difference and attach to the shift work package.

L. FINAL RELEASE OF INMATE FUNDS

1. After confirming the inmate is eligible for release, the Release Clerk will clear the inmate’s cash account in full.
2. Inmates may be given up to $50.00 in cash at the time of release.

3. Checks should not be issued for any amount under $25.00 with the following exceptions:
   a. An inmate will be released with their final balance in a check if being released or transferred to another law enforcement agency or detention facility.
   b. If the cash on hand is depleted or unavailable.
   c. If a release occurs on a commissary day and the inmate did not receive their commissary, the commissary amount will be refunded to the inmate.
   d. If an inmate has $50.01 cash, the inmate will be given $25.00 in cash and $25.01 will be issued in the form of a check.
   e. **Note:** At no time will the release clerk transfer funds into history instead of releasing the inmate with their funds.

4. If a release is processed but the inmate is not released the transaction or transactions must be voided and the Cash account reactivated.
   a. To void a released transaction in JMS enter the Booking number in Funds/Transactions screen click on the Find button. Locate the proper transaction number or numbers to be voided then click on the Void button a dialog box will appear type in explanation, print the screen, then press ok.
   b. To reactivate the cash account in JMS go to Configuration/System Tables/Account Maintenance/in BK# enter in the booking number/ in FAC click on the down arrow and choose All Inmates/click on Find/double click on the appropriate line (could be CAF or CASH Account type) change status box by clicking on the down arrow to change from I to A by highlighting the A, then click on close and then click on yes.
I. POLICY

A. Accounting is responsible for stamping all Legal and Indigent Inmate mail.

II. PROCEDURE

A. LEGAL AND INDIGENT INMATE MAIL

1. Inmates who deplete their cash account becoming Indigent are not eligible for two postage-free letters for one week after depletion. To verify the history of a cash account, go to JMS, Funds, Management, Account, Find, enter in the Booking number, click on Show; this will give the history of the Cash Account.

2. Indigent Legal mail will be processed every day.

3. Accounting will take the processed mail and run it through the postage stamp machine, then bring the stamped mail to the outgoing mail area of the facility.

REVISION DATE: 03-26-19  
CHAPTER: Fiscal Management

I. POLICY

A. Accounting is responsible for processing the Engraving Shop Invoices, T/C 62s, Journals, and Deposit Permit.

II. PROCEDURE

A. ENGRAVING SHOP INVOICES, T/C 62s, JOURNALS, AND DEPOSIT PERMITS

1. Inmate Industries Supervisor will give Accounting the report titled, “Completed Jobs End of Month”. This report will have the following information: A. the names of the departments or non-profits, B. the coding (fund/organization numbers and sub-account numbers to charge other departments), C. work order numbers, D. break down of services and tax, E. grand total of each order.

2. All orders placed by departments in Contra Costa County will be charged via T/C 62. To fill out a T/C 62 include: the Service Organization (2484 and Sub-account 9945 or 9951 for intrafund transfers), explanation: Printing/engraving services of a given month, fund/organization of the Contra Costa County department, Sub account of 2100 or 5011, total amount of order including tax, the Inmate Industries’ work order number will be placed on the T/C 62. The Excel version of the T/C 62 will calculate the total and place the total in the total box, if a manual T/C 62 is used the total will be manually calculated. Insert page numbers (if only one state 1 of 1), prepared by the Accounting personnel’s name, phone number of the Accounting personnel.

a. Note: Only the Sheriff’s Fiscal Officer can authorize a T/C 62, this document must be sent to the Fiscal Officer to be authorized. Only after the authorization will the T/C 62 be submitted to the Auditor’s Office. Two copies will be made of the completed T/C 62, one for Accounting’s file, , and the other to be sent to the Auditor’s Office.

3. A T/C 36 Journal will be issued for the amount of the total tax included on the T/C 62. To fill out a T/C 36 Journal process as follows: enter 36 in the TC box, leave the JV box and the Journal number blank (will be filled in by the Fiscal
Officer or by Account Clerk Supervisor, Circle T/C 36, in description line one type in type **IWF-Inmate Industries**, Fund/Organization number **2484** Sub Account **9945**, Debit amount is the amount of total tax, on line two **Sales Tax Payable,** Fund/Organization number **100300**, Sub-Account number **0633**, credit amount is the amount of total tax. Enter in **total Debit** and **total Credit** the amount of the total tax. In the area Prepared by either type in Accounting personnel name and initial or sign with a black pen, in date area type in the date processed, enter in page area 1 of 1, Explanation box type in **To record Sales tax collected on Sales from Inmate Welfare Engraving/Sign programs for the stated month.**

a. **NOTE:** This journal will be sent along with the T/C 62 to be authorized by the Fiscal Officer.

4. **Sales to non-county departments and non-profit agencies** the Accounting personnel will issue an excel invoice. The invoice numbers will be included on a copy of the “Completed Jobs End of Month Report” to be given to the Inmate Industries Supervisor. Pull up the master Engraving/Sign Shop Invoice and rename it with the next sequential invoice number (03=year, next in sequence 510, 03-510) and add the name of the non-county department or non-profit (03-510 DanvillePD), enter the invoice number (03-510) in Invoice No., enter in amount ordered in Qty, Description of order, and Unit price. The total and tax will be calculated by the excel formula. Print two copies, one to mail and the other for file.

5. **If an order is placed for Sheriff’s Office employees active or retired** a “yellow” Inmate Industries work order is to be filled out and approved by the Inmate Services Supervisor. The “yellow” with a total for service will be delivered to Accounting personnel for payment. Payment must be in full and in the form of a check or money order (no cash or credit cards accepted) made payable to: Office of the Sheriff Contra Costa County- IWF. The check or money order number, the payment date, and account personnel signature will be placed on the “yellow” and two copies of the “yellow” will be made, one for the employee or retired personnel and the second copy for the Accounting personnel. The original “yellow” will be forwarded to Inmate Industries to allow for the commencement of work.

6. When a payment or funds have been received a Deposit Permit will be processed. Fill out as follows: Organization **Office of the Sheriff**, Organization Number **2484**, Description **invoice number or employee name , check number, and coding (2484/9945)**, amount the **amount of sale**, next line description **Sales tax**, Fund/Org **100300**, Sub Acct **0633**, Total Deposit **enter total of the amount column**, Explanation **Engraving Shop Services Invoice number and or employee name and wof#**, Signed **Accounting personnel signature**, Title **Accounting personnel position**, Date **date of process**, check or money order copies will be made to attach to our copy of the Deposit Permit, the original Deposit Permit will be sent to the Auditor’s Office for processing. The pink copy of the Deposit Permit will be returned stamped with a Deposit Permit number and date. The Deposit Permits will be reconciled with the Inmate Industries’ expenditure detail report and any discrepancies will be brought to the attention of the Auditor’s Office for correcting.
7. At the end of the month an Accounts Receivable spreadsheet is prepared with the current month’s work-orders and invoices. The Accounts Receivable spreadsheet is then emailed to the Director of Inmate Services and the Inmate Industries Supervisor.

8. Note: Throughout the month the prior month’s spreadsheets are updated when payments are received.
I. POLICY

A. The Detention Facilities will accept Cash Bail in accordance with applicable law.

II. PROCEDURE

A. CASH BAIL GENERAL INFORMATION

1. Anyone including the Inmate may post bail in the amount established. Money orders, certified checks, and cash will be accepted. The amount for bail must be exact. No change will be permitted. Money orders and certified checks should be made out to the court, but are acceptable if made payable to The Office of the Sheriff although not preferred.

2. The Cash Bail safe will be locked at all times

3. When the Bail funds are in the form of money order or cashier’s check and made payable to the court, the funds are receipted and sent directly to the court. Accounting will receive a copy of the bail package provided by the Clerical Supervisor for Accounting’s files.

B. CASH BAIL PROCESS

1. Cash bail is manually receipted and the funds are placed in a sealed envelope and the yellow copy of the manual receipt is attached. The yellow receipt and the envelope are immediately placed in the locked cash bail safe by the clerk receipting the funds.

2. The Clerical Supervisor will take the previous days bail from the locked bail safe and verify the funds against the receipts. A deposit is made to Wells Fargo for the total amount of bail and put in the Loomis locked box to be picked up. If a discrepancy is found a notation must be made on all copies of the receipts and the booking. A memo is forwarded to Accounting documenting the discrepancy.
3. The Loomis receipt will be sent to Accounting with the next day’s deposit information via the shift work drawer from Operations.

4. Accounting personnel will enter the bail information into the Check Writer System. First, click on Enter Checks, Batch Header will pop up - make sure TC-54 is highlighted and the Fund/Org 811000 is entered, click on Continue, Warrant entry screen will pop up enter in the Vendor Name the Court name, skip a line and type in Facility Name Rect. Number (example B120239) and the date of the receipt, in For area type in Cash Bail For: Name of Inmate next line type Paid by: Name of the person that paid next line type Docket/Warrant: Docket or Warrant number, next line type Appear in Court Date @ Time of Appearance, type in Payee Name: Court Name, Amount: type in amount, Control # type 0400, Batch: type in Batch number received from the Auditor’s office. If you have multiple bails to process click on the bottom right arrow and a blank screen will appear to enter in another bail. When all bails are entered click on Quit. Second, click on Reports make sure that Select the Print selected batches (see below) is selected and TC-54 is selected, click on Print, print two copies. Third, click on Export a File, put disc into the A Drive of the computer, and click on TC-54 and Export. Remove the disc from the A Drive and put the disc and the Batch Verification form in the bag and lock the bag, then place the locked bag in a locked drawer.

5. The original batch verification form and copy of the Bail receipt with back up are sent by interoffice mail to the Sheriff’s Department Fiscal Officer for signature.

6. Fill out a Deposit Permit, Organization Sheriff-Jail MDF, Organization Number 2578, Description Bail Collections and the receipt number, Fund/Org 811000, Sub Acct. 0800, Amount total cash and money orders received, Total Deposit manually total column, Bank Deposits enter amount of Total Deposit, Explanation: Deposit bag #, Signed Accounting personnel name, Date date processed, Title Accounting personnel title, Ext. ext of Accounting personnel phone number. Place the filled out Deposit Permit on top of the copies of the bail package and place in the filing cabinet.

7. When the signed batch verification form is returned, attach a copy to the bail package in the drawer, put the original in the bag with the disc and send the bag to the Auditor’s Office via inter-office mail.

8. Checks will come from the Auditor’s Office along with a Warrant Register. Verify the checks against the bail package and send to the appropriate court in the inter-office mail along with the original bail receipt and back up. Attach the Warrant Register to the Batch Verification report to put in our file to be reconciled to the Auditor’s Trust Fund Account Subsidiary Detail Report on a monthly basis.

9. When the pink deposit slip comes to Accounting from Wells Fargo Bank Accounting makes a copy of the deposit slip against the Deposit Permit to attach to the bail package, the pink deposit slip is stapled to the Deposit Permit and placed in an inter-office envelope to the Auditor’s Office.

10. The pink copy of the Deposit Permit will come back to Accounting with a stamped Deposit Permit number and date. Attach to the bail package and file in
the completed Deposit Permit drawer and attach a copy of the deposit permit to the warrant register for reconciliation purposes.

11. If the Warrant issued by the Auditor’s Office is lost only the Court can initiate a stop payment. Accounting will supply the Court with the Warrant number, amount and date. The Warrant information will be placed on a “Lost Warrant Affidavit” by the court and sent to the Auditor’s Office for processing.

12. If payment was made by money order or cashier’s check we do not have the authority to place a stop payment. It is up to the purchaser and payee to place a stop payment. Accounting will give the Court the issuing bank and identifying numbers but that is the extent of our involvement.

13. Note: Once a month the Bail Trust Account 811000 is to be reconciled to the MTD Subsidiary Detail Report sent to Accounting from the Auditor’s office.
I. POLICY

A. Accounting is responsible for deducting, balancing, refunding and adjusting the Commissary for Inmates.

II. PROCEDURE

A. PROCESSING COMMISSARY

1. Transmit a cash file to the commissary vendor TKC Holdings via modem — **Tuesday** West County Detention Facility, **Wednesday** Marsh Creek Detention Facility, and **Thursday** Martinez Detention Facility every week.

2. The maximum commissary order is $100.00 per week.

3. TKC Holdings will fax an Inmate Status Sheet. Accounting verifies funds of questionable inmates in JMS. In the JMS system, go to JMS/Inquiry/Booking Summary, enter in booking number and click on Find (this allows a view to the inmates facility and module). Then go to Funds, Transactions, enter the booking number, then research the cash account. After researching the cash accounts of all questionable inmates, fax the information to TKC Holdings @ 925-754-8714 (example balance of funds, module number, if in custody).

4. A fax will be sent to Accounting from TKC Holdings of all of the Modules orders to be deducted - **MDF** modules: A,B,C,D,E,F,M,Q,T, **WCDF** modules: 4A, 5A, 5B, 6A, 6B, 7A, 7B, 8A, 8B and **MCDF** Dorms: D and E. If there is movement or releases note on a Commissary Change Form and fax information to TKC Holdings.

5. To deduct modules or dorms in JMS - go to JMS/Funds/Module Transactions, select Facility, Module, Section, Name (**always stays the same**), click on Find - in the Transaction area select the facility that is being processed, click on Apply, place cursor on the first top box, and enter in the amount of the Commissary Order. When finished with the module or dorm click on Save - then a message will flash, and click on Ok. Compare total on the bottom of the screen to the total
on the TKC Holdings Report - if correct click on close, if not research the difference and make the necessary corrections.

6. To run the Balancing Report in JMS - click on JMS/Funds/Balancing/Transaction Type Activity, enter the start time of deductions, enter in the end time of deductions, enter in Transaction Type (example MDCOM), view the report to verify module total, then click on Print.

7. Staple report to TKC Holdings Report and write the module or dorm on the upper left corner.

8. Continue with number 4 through 6 till all modules or dorms are deducted, verified and reports printed.

9. If there are late charges or “not-in-custody” inmates do the necessary adjustments, balance and total, then re-run report(s) and manually add to original report.

10. When finished with all modules or dorms in JMS, go to JMS/Funds/ Balancing/Account Balancing/Acct Grp, choose Commissary, click on Find, double click on the Commissary Account, set the date parameters, and do a Print Screen. This is the total amount of Commissary deducted.

11. In Excel enter in module or dorm information in the Commissary Balance Sheet. The module or dorm totals should balance to Commissary Account Balance Report.

12. The next day Accounting will receive the signed TKC Holdings Menus and Pick Lists. The menus are then placed in module or dorm order. The menus that are for inmates that are “not-in-custody”, have zero funds, or insufficient funds are to be placed together and labeled useless menus. The loose menus are to be put with proper module or dorm.

   a. Note: When looking at the amount of the menu the valid amount is the middle printed amount on the lower left hand corner.

13. Behind the Modified Changes Sheet (TKC Holdings Changes), first place the changed or invalid order forms in module order and then in the order listed on the sheet. Adjust each menu according to the Change Sheet by writing “VOID” or “CADJ”, write the correct total and the action taken on the Change Sheet along with the original total and adjusted total.

14. Process Voids first in the JMS system - JMS/Funds/Transactions, enter booking number and click on Find, select the commissary transaction for the correct day and verify the amount, and then click on Party Details to verify name, click on Void (lower right corner of screen) and the system will ask you if you are sure you want to void the transaction - click on OK, type in the commissary date and why it was voided. After all the voids are completed run a Void Report by going to JMS/Funds/Balancing/Transaction Type Activity, enter in the date and the time the voids occurred and then enter in the end time, type in VOID, then click on View, verify that you have all of the voids processed, and then click on Print. Take the printed report and attach the menus. Please note: If an inmate has been released reactivate the cash account in JMS by going to
Configuration/System Tables/Account Maintenance/Booking Number area, enter in the proper booking number - In Fac, select ALL and click on Find. The cash account will be pulled and double click on it - change the status from I to A, then click on Close and then Save.

15. To adjust amount of the commissary order in JMS – Go to JMS/Funds/Transactions/enter booking number in Booking Number area/click on Find, verify that the booking number and name are correct, click on ADD/Transaction area choose the appropriate CADJ (example CADJ1, CADJ2, CADJ3)/Fund Type Internal - in the Notes enter the commissary date and why the adjustment is occurring/ click on Party Details - click on Find next to Facility and Account Group (the commissary accounts will appear click on the proper one)/enter in booking number/click on find verify that it is the proper inmate/click on save. Run the same report as in the preceding step #14, but type in CADJ1, CADJ2 or CADJ3. Attach the CADJ receipts to the proper menu, and then attach all to the report. Adjust the module or dorms Grand Total to reflect the changes and add adjustments to the Excel sheet.

16. Fax TKC Holdings the Excel Adjustment Sheet.

17. To process the refund checks and the TKC Holdings payment – Go to JMS/Funds/Add/enter in proper “WITH” (WITH1, WITH2, or WITH3) transaction/Fund type check/type in amount/type in notes Commissary Refund for specific commissary/click on Party details/book # area enter in proper booking number/click on find/type in To party the Inmates name and address/click on save. The check number will appear verify the check number if not correct change to correct number. Place check in check printer and click on save. The check will print first and a receipt will follow.

18. To print the TKC Holdings Payment Check, select the proper $COM (SCOM1, $COM2, $COM3) and follow the same procedure as the refund checks stated in preceding step #17.

19. Package up Commissary as follows: Receipt of TKC Holdings Check/Change Forms and Excel Sheet/VOID and CAD Reports and Menus/Deduction day information/signed Pick Lists/signed TKC Holdings Menus, and then place in the file.
I. POLICY

A. Accounting is responsible for Inmate funds.

II. PROCEDURE

A. WESTAMERICA BANK POSITIVE PAY

1. The Inmate Trust Account has Positive Pay through Westamerica Bank. Accounting is required to send a file via e-mail with all authorized checks issued to inmates. Only the checks e-mailed to Westamerica Bank will be authorized for payment.

2. Accounting personnel will audit the check registers that are included in the Shift work packages or faxed to Accounting and will forward the check information to the Account Clerk Supervisor.

3. A query is run out of Oracle SQL Plus for either one day or several days. The date is entered (example 02-01-2003) or if over the weekend several days are to be processed (example start date 02-01-2003 end date 02-03-2003).

4. The check information is then transferred to the Report folder in several different reports. The first report shows the check information in the format needed to email to Westamerica Bank Positive Pay program; second report shows the grand total, and third report is in the format to transfer to the Access database where Accounting processes the bank reconciliation.

5. On the check information report delete the first three lines leaving only the records. Save the changes and click on exit.

6. To email the report to Westamerica Bank Positive Pay. Open up GroupWise, create a new email in the “to” box enter POSITIVEPAY@WESTAMERICA.COM, in the “subject” box type in Checks issued MM/DD/YY (020204), click on the “Attach” box, the file is
located on G:\ACCOUNTNG\JMSSCRIPTS\REPORTS, Double click on the appropriate file to attach (CCCSOITA 020204), then click on send.

7. A Confirmation report will be faxed to us from Westamerica Bank Positive Pay confirming the check transfer information. This report will be verified against the stored transfer report for accuracy then placed in the positive pay file to be used for bank reconciliation purposes.

B. CHECK TRANSFER TO THE FUNDS DATA BASE

1. On a daily basis after the transmission of the Westamerica Bank Positive Pay Check Report Accounting will transfer the check and booking information to the Funds Access Database.

2. In the report file click on Checks Transfer.txt. Delete the first three lines and then click on save. Next click on Chkbknginfo delete the first three lines and then click on save.

3. Go to the Funds Database and double click, then double click on the button labeled “Import checks”, click on the “OK” message prompt to authorize transfer, then click on the “OK” message when the transfer is complete.

4. To verify that the check transfer was complete, click on the All Checks button, place the cursor in the date box and click on Z to A button on the toolbar. This tool will place all the current check transfers at the top of the list.

C. WESTAMERICA BANK ACKNOWLEDGEMENT OF DEPOSIT RECEIVED

1. Monday through Friday the Clerical Supervisor deposits the funds for each of the three shifts. A list of deposits including what shift, date and amount, tags of deposit bags, and tape totaling deposits. The next day the blue copy of Loomis deposit slip is attached to the next day’s deposit package.

2. Westamerica bank will send copies of the deposit receipts after verifying the deposits received by Loomis Transport Service.

3. If a deposit receipt is not sent from Westamerica Bank call 925-335-3050 ADD to verify if the deposit was received, and then request a copy of the receipt to be faxed to Accounting at 925-646-4641 ADD. If not received write a letter and attach a copy of the Loomis blue deposit slip and the Westamerica bank deposit slip. A notice of deposit will be sent and then used to verify to the Bank Statement.

D. WESTAMERICA BANK STATEMENT

1. Westamerica statement is sent once a month to show the deposits and the checks that have cleared the Inmate Trust Account. If the statement is not received by the middle of the month call Westamerica Bank at 925-335-3050 to have the Branch Manager research the missing statement and to send a duplicate statement.
2. Take the Deposit lists from each facility and verify with deposits listed on the bank statement. Toward the end of the month some deposits will not be included on the statement. Copy the list and hold till the next month’s statement to verify.

3. Western Union funds will be in the deposit area of the bank statement. Pull the Recap reports from Western Union and verify against the statement. If a payment is missing call our Western Union representative to start research process and follow up with a letter listing the inmate’s name, booking number, sequence number, MTCN number, and amount. A letter will then be received from Western Union along with the copy of the transmittal of funds receipt.

4. Under the area “Withdrawals-Fees- Charges” lists miscellaneous debits to the account. An example is if an Operations clerk deposited funds exceeding the amount stated on the deposit slip.

5. The checks that have cleared the account are then verified with the checks that have been issued out of JMS in the Funds database. The date of the statement is entered clearing the check from the system at the same time the check number and amount is verified. If the check cleared the statement for a different amount other than what it was issued by JMS, the amount of the check is entered in the “cleared amount if different” column. The cleared check is pulled to see if any alterations were made to the check. If alterations have occurred a call to the Facility Commander is made to have a criminal report written, the amount of the fraud will be placed on the inmate’s CIN number to be collected the next time the inmate is in custody. If the error was made by the bank a call is placed Westamerica Bank Branch Manager and a letter will be sent along with a copy of the statement and check.

6. All of the bank statement information and other reports are then placed on an Inmate Trust Bank Reconciliation form to determine if the account is Over or Short. If short a relief of shortage is requested through the Fiscal Officer.

E. SECURITY OF INMATE TRUST ACCOUNT BLANK CHECKS

1. All blank, pre-numbered Inmate Trust Account blank checks are to be secured and accounted for at all times.

2. When a shipment of checks arrives at the facility Accounting will be notified immediately.

3. Accounting will verify the information on the checks. If incorrect call our Safeguard representative at 415-495-5000 to pick up the shipment and issue another order without delay.

4. When checks are required by Operations, Accounting will release one box at a time. A “release of check form” is filled out with the check numbers listed. A signature is required to enable the checks to be released. The signed form is then placed in the “Check release forms” folder and kept in the locked check cabinet next to the checks.

ISSUE DATE: 07-01-04
REVISION DATE: 
REVIEW DATE: 03-26-19

I. POLICY

A. When inmates are found liable for restitution for intentionally or carelessly causing damage or destruction to property Accounting is responsible for processing the funds portion of the claim.

II. PROCEDURE

A. INMATE REIMBURSEMENT OF DAMAGED PROPERTY

1. The Operations Sergeant will provide Accounting with a completed “Inmate Cash Authorization” form as well as the corresponding copy of the Incident Report.

2. Accounting will check the inmates account balance the same day the forms are received and deduct the full amount from the account if it is available. If the full amount is not available but a large portion of it is, deduct the available amount. Begin tracking the balance and payments until the charges are paid in full. Continue to check the available balance, each week thereafter, on the day prior to commissary deduction day.

3. To deduct from the inmate’s account, get a check from Release and put into printer. Go to JMS, Funds, Transactions, Add, Enter With1, With2 or With3 (which ever is appropriate) as the transaction type, select Check as payment type, enter check amount, enter support notes in note field to include the I/R number, click on Party Details, enter booking number, select the correct facility, click on Find, highlight the correct account from which the money will be deducted, go to “To Party” and enter CCC Sheriff’s Dept. in the name field, enter MDF in the “Street” field, click on Save, enter the new correct check number and click on Save. The check will print first, and then a receipt will follow.

4. Sign the check on the top line and give to the Accounting Supervisor to stamp the Sheriff’s signature on the bottom line. Staple the middle portion of the check to the bottom of the transaction receipt. Staple the receipt to the front of the support forms (i.e., Inmate Cash Authorization form and I/R report). Set aside, it will later be used to create a Deposit Permit. Make a copy of the transaction receipt.
and paper clip the bottom portion of the check to the front of the receipt – give to the Release Clerk for the shift work package.

5. A Wells Fargo Bank deposit is prepared each Friday of the current week-accumulated work.

6. To prepare the deposit: Stamp the back of each check, run a tape, and paper clip to the front of the checks. Stack the cash by denomination, run a tape by denomination, subtotal the cash, add the total sum of checks, and then total. Photocopy the check and cash tapes to keep with your records. Fill out a deposit slip with the date, total currency, coin and enter the total sum of money orders/checks next to the “List Each Check” area – write the following info under the total checks/money orders amount – “see attached list”. Fill in the “Total Deposit” amount. Write the Security Bag number on the body of the deposit slip. Remove the white and pink copies of the deposit slip from the book. Stamp a Letterhead envelope with the facility address and put it in the Security bag. Wells Fargo will return the pink copy of the deposit slip to us showing proof of deposit.

Write the following information on the front of the Security Bag: “Depositor Name” is CCC Sheriff’s Dept – MDF, 1000 Ward Street, MTZ, CA. “Financial Institution” is Wells Fargo, Main Street, MTZ, CA. Fill in the “Currency” amount, “Coin” amount, “Checks” amount and “Total” amount. Fill in “Date”. Write in the appropriate information on the tear tag. Put the following into the security bag: Checks/money orders w/tape, cash/coin w/tape, self-addressed envelope, deposit slip. Drop the bag into the safe, which is located in the Release area of Operations.

7. Prepare a Deposit Permit. “Organization” is Sheriff-Jail-MDF “Organization Number” is 2578. Write the following information across the first line of the DP: “Description” is Damaged Property, Fund/Org is 2578, Sub.Acct. is 9975, Amount is total amount of deposit. Write in the total deposit amount again at the bottom next to “Total Deposit” and then again next to “Bank Deposits”. Write the Security Bag number in the area under “Explanation”. Sign Accounting personnel name, title, date, phone number.

8. Paper clip the support documents to the back of the Deposit Permit. Place it in the pending DP file.

9. The pink copy of the deposit slip will be mailed back to us from Wells Fargo. Lay it across the front of the matching Deposit Permit and make a copy. Staple the pink deposit slip to the top of the Deposit Permit on the tear strip. Send it via Inter-Office mail to the Auditors Office. Paper clip the copy to the top of the support documents and put back in the pending DP file.

10. The pink copy of the Deposit Permit will be sent back to us from the Auditors Office with the official DP number on it. Pull the support copies from the pending DP file, attach the pink to the front and place in the “Complete” DP file.

11. If the total amount due is not paid in full by the inmate’s release date place the balance due in history in JMS.

12. The maximum amount of time an amount will be left in history will be 2 years.

**ISSUE DATE:** 07-01-04  
**REVISION DATE:** 03-26-19  
**REVIEW DATE:** 03-26-19

**CHAPTER:** Fiscal Management  
**SUBJECT:** Inmate Transportation Vouchers

## I. POLICY

A. Indigent inmates are eligible for transportation vouchers.

B. The Shift Supervisor will be responsible for issuing and logging transportation voucher activity to indigent inmates being released.

## II. PROCEDURE

A. CONTROL & AUDIT OF RELEASED INMATE TRANSPORTATION VOUCHERS

1. Each Friday, the previous week’s voucher logs will be audited by accounting.

2. Write the starting balance of each ticket type on the current day’s log from the previous week’s log.

3. Count and record the number of tickets used for the week and subtract from the starting balance. The current available supply should equal each total.

4. Count the available supply of each ticket type and record on the next line of the current day’s log.

5. If the totals do not balance make an adjustment entry for each ticket type.

6. If the required information is incomplete on any of the logs and or if the totals from the audit do not balance, notify the Operations Sergeant in the following manner. Fill in the appropriate blanks on the preformatted Inter-Office Memo and make one copy of each voucher log. Attach the voucher log copies to the back of the original Memo form, give to the Operations Sergeant and attach the original voucher logs to the Memo copy form for the accounting file.

7. Replenishment tickets are pulled from the supply in the Accounting Safe at Martinez Detention Facility.
I. POLICY

A. It is Accounting’s responsibility to deposit funds by Deposit Permit to the correct coding.

II. PROCEDURE

A. Detention meal payments (15.00 per month or 5.00 per meal) are deposited each Friday from the MDF to Wells Fargo Bank in the following Fund/Org per Facility: MDF 2578/9873, WCDF 2580/9873, and MCDF 2585/9873.

B. Miscellaneous payments are also deposited to Wells Fargo Bank each Friday, to include but not limited to the following: Found Money Fac. Org./sub-account 9975, Damaged Property- Fac.Org./sub-account 9975, IWF org 2483/sub-account 9975, Med.Assets HSCA Rebates Fac.Org./sub-account 2150.

C. Payments collected by WCDF and MCDF will be forwarded for deposit to MDF Accounting by Blue Bag via Transportation and are to be detailed on a standard “Property /Inmate Transfer List”. The MDF Accounting personnel will sign the Property List and return the copy to the sending facility in the Blue Bag via Transportation.

D. The accumulated cash/checks are to be secured under lock pending the Friday deposit.

E. To prepare the deposit: Stamp the back of each check, run a tape, and paper clip to the front of the checks. Stack the cash by denomination, run a tape by denomination, subtotal the cash, add the total sum of checks, and then total. Photocopy the check and cash tapes to keep with your records. Fill out a deposit slip with the date, total currency, coin and enter the total sum of money orders/checks next to the “List Each Check” area – write the following info under the total checks/money orders amount – “see attached list”. Fill in the “Total Deposit” amount. Write the Security Bag number on the body of the deposit slip. Remove the white and pink copies of the deposit slip from the book. Stamp a Letterhead envelope with the facility address and put it in the Security bag as Wells Fargo will return the pink copy of the deposit slip to us showing proof of deposit. Write the following information on the front of the Security Bag: “Depositor Name” is CCC Sheriff’s Dept – MDF, 1000 Ward Street, MTZ, CA. “Financial Institution” is Wells
Fargo, Main Street, MTZ, CA. Fill in the “Currency” amount, “Coin” amount, “Checks” amount and “Total” amount. Fill in “Date”. Write in the appropriate information on the tear tag. Put the following into the security bag: Checks/money orders w/tape, cash/coin w/tape, self-addressed envelope, deposit slip. Drop the bag into the safe, which is located in the Release area of Operations.

F. Prepare a Deposit Permit. “Organization” is Sheriff-Jail-MDF “Organization Number” is 2578. Fill in the appropriate information in the body of the DP (i.e. “Description”, Fund/Org, Sub.Acct., Amount). Write in the total deposit amount at the bottom next to “Total Deposit” and then again next to “Bank Deposits”. Write the Security Bag number in the area under “Explanation”. Sign: Accounting personnel name, title, date, and phone number.

G. Paper clip the support documents to the back of the Deposit Permit. Place in the pending DP file.

H. The pink copy of the deposit slip will be mailed back to us from Wells Fargo. Lay it across the front of the matching Deposit Permit and make a copy. Staple the pink deposit slip to the top of the Deposit Permit on the tear strip. Send it via Inter-Office mail to the Auditors Office. Paper clip the copy to the top of the support documents and put back in the pending DP file.

I. The pink copy of the Deposit Permit will be sent back to us from the Auditors Office with the official DP number on it. Pull the support copies from the pending DP file, attach the pink to the front and place in the “Complete” DP file.

RELATED ORDERS:
Department Fiscal Purchasing Manual

ISSUE DATE: 07-01-04
REVISION DATE: 03-26-19

CLEARANCE: CUSTODY

CHAPTER: Fiscal Management

SUBJECT: Purchase Orders

I. POLICY

A. Accounting will process Purchase Orders for Detention purposes.

II. PROCEDURE

A. All purchases must have a minimum three bids. Purchases under $50,000.00 are part of the SBE program, while purchases over $10,000.00 fall into the scope of the Outreach Program. (if further information is needed contact the Fiscal Office for program details.)

B. After receiving the three bids fill out a Solicitation form and an Award form (see #4 & #5 below.)

C. The Requisition is filled out as follows: Date: date of processing. Control No.: SHA is for MDF, SHD is for WCDF, and SHB is for MCDF; Location No.: 185 is for MDF, 187 is for WCSD, 186 is for MCDF; Dept.: Sheriffs Detention; APS Vendor No.: ) if standing PO enter the number assigned, if new vendor accounts payable will assign; Ship to Number: SHA for MDF then the year, SHD for WCDF then the year, SHB for MCDF then the year (example SHA-03); Invoice to Number: always SH9-0; Vendor: Listed on quote; Requisition No.: issued by Accounting; Line No.: enter 1 (only use 1 on a PO); Total: total amount for the whole term, ORG.: organizational number of division purchasing; Sub Object: coding for type purchase; Reason for Purchase/Comments: examples are for Operations, see bids attached, SBE forms attached, Requested by: Accounting Personnel’s name; Phone ext.: phone number of Accounting Personnel; Date: date of processing.

D. A Solicitation form is filled out for all purchases. In addition to information on bids/quotes received, it should include why the vendor was selected.

E. An Award form is then filled out for all purchases in the SBE program that were awarded to a SBE.

F. Attach the bids, Solicitation form, and Award form (if any) to the Requisition form and send to the Commander for signature.
G. Make a copy of all forms and send to the Director of Support Services located in our Fiscal division.

H. After being signed by the Assistant Sheriff the Green copy of the Requisition and a copy of the bids and forms are placed in a file.

I. Attach a copy of the forms and bids to the white copy of the Requisition and send inter-office to the Purchasing Department.

J. Log all information in the Purchasing log book and when the PO is returned from Purchasing log in the PO number.

K. Purchasing will generate a PO within four weeks.

L. Attach the processed PO to the green copy of the Requisition and place back in the file till an invoice and PO is received.

M. When the invoice is received type a TC52 as follows: Prepared by: Accounting Personnel; Date: date of processing; Originating Unit: Sheriff’s Detention; Date of Invoice: date of invoice; Description: Invoice number and Vendor name, Fund/Org: 2578 for MDF, 2580 for WCDF, 2585 for MCDF, or other appropriate detention org; Account: type of expenditure; Encumbrance No.: provided by Purchasing on the PO plus 01; P/C if PO is complete put a P if incomplete put a C; Payment Amount: amount of the invoice; Vendor: issued by Purchasing on PO; by the “$”: enter in the grand total.

N. Send the completed TC52, Invoice, and one copy of the PO to the Captain for signature.

O. Send the original, signed TC52 and the original invoice(s) and one copy of PO to Accounts Payable and a copy of the TC52 and invoice(s) to the file.
I. POLICY

A. Accounting is responsible for processing Warrant Requests for Detention.

II. PROCEDURE

A. WARRANT REQUEST

1. Warrant requests can be used for purchases up to $500.00 only.

2. An invoice for purchases is received that does not have an authorized Purchase Order for Detention.

3. To fill out the Warrant request: Type in the date of the Warrant request/the amount/payable to/date of the invoice/in the description area type in the invoice number/Fund or Org number/Sub-account number/amount/Department type in Sheriff-Coroner Detention/ Captain or Assistant Sheriff’s name/Description-information type in a brief explanation and check box to mail to payee.

4. Attach the invoice to the warrant request and send to the Captain or Assistant Sheriff for signature.

5. Take the signed Warrant request and make a copy of the invoice and attach the yellow copy of the Warrant request for Accounting’s files.

6. Take the white, pink and green signed Warrant request with the original invoice and send to Account’s Payable for payment.
I. POLICY

   A. Accounting is responsible for processing Procurement Card purchases for Detention.

II. PROCEDURE

   A. Procurement Card purchase limit is $3,000.00 for a single purchase and with a $10,000.00 maximum limit of charges for 30 days.

   B. All purchases will be recorded on the Procurement Card Log.

   C. Attach all Procurement Card receipts behind the Log sheet for a given month.

   D. The Procurement Card statement will be received on a monthly basis, each charge is numbered consecutively, then place the number in red on the Procurement Card log next to the corresponding charge.

   E. Verify recorded receipts (in order) to the Procurement Card statement.

   F. Fill out a Procurement Card Purchase Authorization form for each purchase prior to making the purchase.

   G. If the charge is for Inmate Welfare Fund have the IWF Director sign then forward to the Assistant Sheriff for signature; if it is a detention charge the Assistant Sheriff's signature is required.

   H. Make copies of the statement, receipts, Authorization forms, and log sheets. The original receipts, and Purchase Authorization form and a copy the Procurement statement are placed in a file at Detention Accounting. The copy of the receipts, Purchase Authorization form, and the original Procurement statement and Log sheet are forwarded to the Fiscal Division, then who will send to Accounts Payable for payment.

<table>
<thead>
<tr>
<th>CHAPTER: Fiscal Management</th>
</tr>
</thead>
<tbody>
<tr>
<td>SUBJECT: Outstanding Balances Report</td>
</tr>
</tbody>
</table>

## I. POLICY

A. Accounting is responsible for clearing items from the report.

## II. PROCEDURE

A. The Outstanding Balances Report is an accumulation of data reporting amounts owed to inmates or amounts owed to the County by the inmate from the JMS database.

B. The Historical account and the Outstanding Balances Report are to be used by Accounting Personnel only.

C. This report should be printed and reviewed daily. To run the report, click on JMS, Funds, Balancing, Outstanding Balances, then click on Print.

D. If someone returns to custody who has a balance due or balance owed, the current booking number will appear on the report next to the inmate’s name. Use the booking number to check for a cash account. A cash account must be established prior to transferring money owed or due from history. If there is no cash account, create one in JMS by going to JMS/Funds/Transactions/click on add/from the pick list in the Transaction field select PCOR (1,2,3)/Fund type Internal/amount .01/ in notes type in to create cash account/click on Party details/click on booking only/type in booking number to create the cash account on/click on New Account/Account type click on CASH/then save, then create a NCOR (1,2,3) in JMS (same as PCOR1 except cash account portion has been established) for .01 to back out the credit.

E. Anytime money is owed or due, is transferred to history, a hard copy of the support information is printed and kept on file for tracking purposes. Always research the amount owed/due before transferring from history. If a hard copy is not on file, research the origin of the transaction by going through the cash account of each booking. If the origin cannot be positively determined, the stated amount owed or due must be zeroed out. Transfer the amount out of history onto the active cash account and then NCOR (1,2,3) or PCOR (1,2,3) to clear the cash account.
F. When taking funds from a current booking and applying the funds to a history account for an IR report or CAF fee process as follows:

1. Transfer the amount to the active Cash account.
2. Issue a PCOR (1,2,3) for the amount transferred from history to the active booking.
3. Issue a With (1,2,3) for the amount of funds on the current booking, make the check out to CCC Sheriff Dept, also include the ORG and Revenue account and the type of CAF fee or IR number.
4. If there is an outstanding amount go to JMS/Release Funds enter in the booking number, click on find, under Summary of Accounts click on the box, do a screen print, then click on the Transfer to history button, and attach to the back up documentation, then place in the file.

G. All cash transactions in history are to be kept on an excel spreadsheet to be updated when needed. This sheet is to be used to balance the Inmate Trust Account.
I. POLICY

A. It is Accountings responsibility to retain the accounting reports and financial records according to County Standards and applicable law.

B. Accounting is responsible for boxing, labeling, and sending to storage Accounting documents.

II. PROCEDURE

A. The following reports and financial records will be retained for the period stated then destroyed.

B. Cash Deposit Receipts 5 years, Deposit Permits 5 years, Inmate Trust Account records 5 years, Inmate Commissary Records 2 years, Purchase Orders 2 years, Requisitions 2 years, Shift work 2 years.

C. The MDF Accounting storage boxes are to be marked with blue marker on the top left corner MDF and the destroy date with a red marker on the top right corner; WCDF Accounting boxes will be marked with green marker on the top left corner WCDF and the destroy date with a red marker on the top right corner. Clearly describe the contents of the box using the name of the facility, contents and dates.

D. All reports, records, logs will be clearly marked with the facility name. The boxes will be forwarded to the West County Detention Facility Support Services Aide for storage.

E. If a box is needed for research prior to the destroy date, request the box be pulled from storage from the West County Detention facility Support Services Aide.
I. **PURPOSE:** To have a documented trail to account and maintain control of numerically controlled documents

II. **POLICY:** All destruction and transferring of numerically controlled documents will be documented and accounted for by the parties involved. The documentation of the destruction and transferring will be retained for a period of 5 years.

III. **DEFINITION:** To explain the proper documentation for destruction and transferring of numerically controlled documents.

IV. **PROCEDURE:**

A. List the starting and ending numbers of the documents that are being destroyed and/or transferred to another’s custody (leave enough room for the individual to initial and date).

B. Have the individual taking custody of the numbered documents initial and date.

C. Take a photocopy of the document for the initiator’s records and retain the original for 5 years.

D. If there is more than one transfer of custody of the same numbered documents you should request a copy of the additional transfers from each custodian.

E. Document custodians assume responsibility for the security of documents in their care.
I. POLICY

A. The Administration of Custody Services Bureau personnel will operate under personnel policies and procedures developed by County Departments of Administration and the Office of the Sheriff to ensure standardization of practice.

II. PROCEDURE

A. DIVISION POLICY

1. The Custody Services Bureau Assistant Sheriff has the authority to issue regulations and/or policies concerning specific Division operations that do not conflict with any regulations or policies issued by any higher authority.

2. The Custody Services Bureau Assistant Sheriff has the authority to assign staffing to meet the operational needs of the Bureau.
I. POLICY

A. STAFF

1. All tobacco products and the use of such products within the Detention facilities are prohibited except in designated areas.

2. The irritation and health threat caused by smoking is a recognized problem in the work place.

3. To minimize these factors, while not unreasonably restricting the right of employees to smoke, the Department has established guidelines.

B. INMATES

1. All inmates are prohibited from smoking in any area of any facility.

II. DEFINITIONS

A. TOBACCO PRODUCTS: Includes, but is not limited to cigarettes, cigars, pipes, chewing tobacco and any smoking material.

B. SMOKE/SMOKING: The carrying or holding of a lighted pipe, cigar or cigarette or any other lighted smoking equipment of any kind.

C. DESIGNATED AREAS: Area authorized by the Bureau Assistant Sheriff for the use of tobacco products.

III. GUIDELINES

A. All restrictions in this policy have been established to meet the requirements set forth by County Ordinance and Department Policy.

B. Department Policy imposes other restrictions on employees; therefore Department employees should be familiar with Department Policy 1.05.51, as well as the guidelines listed here.
C. In any dispute arising under this smoking policy, the rights of the non-smoker shall prevail.

D. Smoking by Staff members will be permitted subject to Specific Restrictions:
   1. The authorized areas for smoking shall be determined by the Bureau Assistant Sheriff and all personnel will be made aware of these designated areas.
   2. Staff is prohibited from smoking in any county vehicle at any time.
   3. The Bureau Assistant Sheriff will ensure that “No Smoking” signs are posted in compliance with County Administrative Bulletin 23.4. (1/94)

IV. PROCEDURE

A. ARRESTEES
   1. In the case of new arrestees, they are to have their cigarettes, and all smoking materials, placed in their personal property by the arresting officer.
   2. A personal property receipt will be given to new arrestee, and they are to be informed of the smoking policy and that all smoking materials are considered contraband.
   3. Smoking materials confiscated from inmates after their initial booking and orientation are to be considered contraband.

B. STAFF & OTHER AGENCY PERSONNEL
   1. Staff members may smoke in designated areas only.
   2. Representatives of other agencies who are escorted by a staff member will utilize the appropriate smoking area or will leave the facilities to smoke.

C. DESIGNATED AREAS IN FACILITIES:
   1. MARTINEZ DETENTION FACILITY
      a. Vehicle Sally port
      b. Outside main lobby
   2. WEST COUNTY DETENTION FACILITY
      a. Vehicle Sally port
      b. Outside main lobby where cigarette urn is located
   3. MARSH CREEK DETENTION FACILITY
      a. Upper Camp Parking Lot
   4. CUSTODY ALTERNATIVE FACILITY
a. Staff areas-Rear parking lot where appropriate receptacle is located. During inclement weather staff may utilize the appropriate area outside the lobby.

b. Clients and guests may smoke outside the lobby where appropriate receptacle is located.
# Contra Costa County Office of the Sheriff
## CSB Policy and Procedure

**DETENTION NUMBER:** 2.03.03  
**RELATED ORDERS:**  
CCCSO 1.04.71  
CCCSO 1.04.12  
**ISSUE DATE:** 07-01-04  
**REVISION DATE:** 02-23-16  
**REVIEW DATE:** 03-26-19  
**CLEARANCE:** CUSTODY  
**CHAPTER:** Personnel  
**SUBJECT:** Detention Facility Transfers and Sign-Ups

## I. POLICY

A. It is the policy of the Sheriff’s Office, Custody Services Bureau to assign personnel to detention facilities based on seniority, personal preferences and the ability of the employee to perform specialized functions.

## II. DEFINITIONS

A. SENIORITY: Determined by the amount of time an employee has been employed in his or her current rank with the Office of the Sheriff. If identical times exist between two or more employees, the following is the order in which the senior person will be determined:

   1. Department Seniority – seniority for laterals is based on date of hire or rank with the department.

   2. Academy Ranking – seniority is based on how an Office of the Sheriff sponsored recruit placed in the academy at the time of graduation.

## III. PROCEDURE

A. SHIFT BIDDING PROCESS AND TRANSFERS

   1. Certain classifications of identified personnel are eligible to transfer from their assigned shift, days off, and respective detention facility (MDF, WCDF, or MCDF) at shift change. Personnel must indicate detention facility and shift preferences during the shift bidding solicitation process occurring at the semiannual sign-up.

   2. Situations may arise where a vacancy needs to be filled and no transfer requests have been submitted. In instances where vacancies cannot be filled, these positions will be filled, as needed based upon the needs of the bureau.
B. BID PROCESS

1. Sergeants and Deputies will be allowed to bid for shifts, days off, and detention facilities (MDF, WCDF, or MCDF) semiannually – approximately every six months.

2. The Custody Administrative Services Lieutenant (or designee) will post a list of all available shifts and days off for bid. Personnel eligible for bidding will be requested to submit multiple shift preferences; failing to do so prior to the published deadline could result in the employee losing his or her seniority ranking for the current shift assignment.

3. Sufficient time will be provided to allow for employees to make their bid requests.

C. FEMALE DESIGNATED POSITIONS

1. Within the Bureau, a specified number of female positions must be staffed for proper facility operations and to comply with state and/or federal Minimum Jail Standards. All female positions to be filled will be posted during each bid process.

   a. During each bid group, the number of female designated positions to be filled will be posted, along with a list of female employees available to fill those positions based on seniority.

   b. At the conclusion of the bid, designated female vacancies remaining will be filled by the least senior female employee of the required job classification who did not bid for a female designated vacancy.

D. ELIGIBILITY TO BID

1. Personnel assigned to the Custody Services Bureau prior to the completion of the sign-up will be allowed to bid as outlined in their union M.O.U. Shift bidding for detention Sergeants and Deputy Sheriffs will be based on seniority, with any combination of facility (MDF, WCDF, or MCDF) and available shift.

2. Personnel assigned to the Custody Services Bureau after the completion of the sign-up will be assigned as needed by the Division Commander.

E. TRANSFERS TO/WITHIN DETENTION DIVISIONS

1. All personnel transferred to MDF of WCDF will contact Custody Administrative Services for equipment issue and information. Personnel transferred to MCDF will contact the Facility Commander for equipment issue and information.
F. TRANSFERS FROM/WITHIN DETENTION DIVISIONS

1. All personnel being transferred out of the Custody Service Bureau shall report to the CAS Sergeant at MDF or WCDF, or the Facility Commander at MCDF prior to the end of their shift on the final day of their assignment.

2. All Personnel will be required to return all equipment issued by CAS during their assignment.

3. In the absence of the CAS Sergeant, the Shift Supervisor shall be responsible for collecting all keys, equipment and identification badges from the employee and providing them to CAS on the next business day.
I. POLICY
   A. Attendance reports at the Martinez Detention Facility, West County Detention Facility, and the Marsh Creek Detention Facility shall be completed in accordance with their span of control.

II. PROCEDURE
   A. It shall be incumbent upon each supervisor to document the attendance of all personnel within their duty station.
   
   B. Refer to Sheriff’s Department Policies and Procedures Manual Section 1.05.41.
I. POLICY

A. Detention personnel will be aware of all duty hours, schedules, shift assignments and relief procedures, as outlined herein.

B. Policy relating to On Duty Time shall be in accordance with CCCSO Policy 1.05.41

II. DEFINITIONS

A. DUTY HOURS: Schedules ranging from eight (8) to twelve and one half (12.5) hour shifts are available at Martinez Detention Facility, West County Detention Facility and Marsh Creek Detention Facility. Shift and duty hours vary based on job classification and assignment.

B. FIXED POSITIONS: Any position that must be filled twenty-four (24) hours a day, seven (7) days a week, fifty-two (52) weeks a year requiring relief for meals, breaks, days off, vacation, sick leave, military leave, industrial leave, administrative leave and training.

C. NON-FIXED POSITIONS: Any position that does not require relief.

III. PROCEDURE

A. DUTY HOURS

1. The Facility Commander will ensure that all master and daily schedules are posted and made available to staff.

2. Request for change of any schedules of shifts (shift trades) will be done by the following:

   a. Completion of a CSB Shift Trade Request/Agreement (DET 034:frm)

   b. Submit the completed form to your immediate supervisor.

   c. The approving authority will complete the request and return it to the
requesting staff member(s).

B. OVERTIME HOURS

1. Overtime procedures shall be in accordance with CCCSO Policy 1.04.52.

C. REPORTING FOR DUTY

1. Personnel will report to their assignment on time and relieve the prior shift punctually. Refer to CCCSO Policy 1.05.41

2. It is the responsibility of the employee taking scheduled leave to submit the appropriate forms to their immediate supervisor prior to taking the leave.

3. Personnel will be responsible for notices pertaining to schedule changes, announcements, and training and shift assignments placed in their assigned mailboxes and e-mail boxes.

4. Employees will report to their assignments through appropriate facility entrances.

D. LINEUPS

1. All lineups will take place on duty hours.

2. All employees will report to the lineup room ready for duty.

3. Loitering outside the lineup room is not permitted.

E. MEALS/BREAKS

1. All meals/breaks will be taken in accordance with Sheriff’s Office Policy and Procedures 1.05.53 Meal Periods.

2. Employees assigned to line positions are not authorized to leave the facility for meals/breaks.

3. The ability to leave the facility during meals/breaks for non-fixed positions shall be discretionary upon position assignment and with the approval of the employee’s supervisor.
I. POLICY
   A. Sheriff's Office personnel assigned to the Detention Division facilities are entitled to a meal while on duty.
   B. In order to prevent a negative impact on the Division budget, they will be charged a fee for meals.

II. DEFINITIONS
   A. VISITOR: Any person not regularly assigned to Detention Division in either a full or part-time position.
   B. CONTRACT PERSONNEL: Any person working in Detention Division who is not employed by the Sheriff's Office, but who are working on site, via contractual agreement. (GSD, Teachers, Medical, Mental Health, Chaplains, Library, etc.)
   C. MEAL: A meal (breakfast, lunch or dinner), will consist of items outlined in the Food Services Menu.

III. PROCEDURE
   A. MEALS WILL BE CAFETERIA STYLE AND THE FOLLOWING WILL BE ENFORCED:
      1. Adherence to posted rules.
      2. Bus your own trays, dishes, utensils and dispose of garbage.
      3. Food, trays, dishes or utensils shall not be taken from the dining area. All liquid containers will have lids on them prior to leaving the dining area.
      4. The dining area is no different from other locations throughout the facilities in that no posters, pictures or other items will be taped to doors or windows.
B. MEAL TICKET PURCHASE, USE AND ACCOUNTING

1. Employees eating facility prepared meals shall complete a County Payroll Deduction form (M203) authorizing $15.00 per month for meals provided. These payroll deduction forms may be obtained from Division or Facility Administrative personnel and forwarded to Payroll.

   a. Employees that do not have a completed Payroll Deduction form on file shall not eat Facility meals.

2. Authorized visitors may consume a meal if they have obtained permission from the Division Captain, Facility Commander, Custody Administrative Services Manager, or their designee.

3. Employees from other divisions are not authorized to consume any food or drink unless they are working overtime in that facility.

4. Any questions or conflicts regarding the meal policy will be referred to the Facility Commander.

Personnel |

### I. POLICY

A. Personnel assigned to Martinez Detention Facility, West County Facility and Marsh Creek Detention Facility may park their personal vehicles in the county parking lot pursuant to this policy.

### II. PROCEDURE

A. Free parking is provided at the facility. It is the employees’ responsibility to park their vehicles safely, properly and securely. Parking is at your own risk.

B. Daily parking will be available on a non-reserved basis for assigned personnel.

C. Employees must park legally and only in designated, marked parking zones/stalls.

D. All vehicles shall remain secured and locked at all times. (Keys shall be removed from the vehicle, windows rolled up, etc.)

E. Weapons shall not be stored in any personal vehicle while parked at the facility. All firearms and ammunition should be secured in personal lockers or gun lockers provided in the facility.

F. Restricted Parking-Martinez Detention Facility: No privately owned vehicles are authorized to park in the following areas:

1. Posted parking stalls reserved for judges, located in front of the facility entrance.
2. Adjacent to, or obstructing the Loading Dock ramp on the east side of the Facility.
3. Posted parking stalls (1 thru 4) reserved for management personnel, located northeast of the facility entrance.
4. Posted parking stalls (5 thru 8) reserved for county vehicles, located northeast of the facility entrance.
G. WEST COUNTY DETENTION FACILITY

1. No privately owned vehicles are authorized to park in the following listed areas:
   a. The security lot immediately adjacent to the Intake Vehicle sally port.
   b. Posted parking stalls designated for Bay Station patrol vehicles directly southwest of the facility.
I. POLICY
   A. Employee lockers will be provided for as many uniformed personnel as possible.

II. PROCEDURE
   A. **Martinez Detention Facility**
      1. Locker rooms are located
   B. **West County Detention Facility**
      1. Locker rooms are located
   C. **Marsh Creek Detention Facility**
      1. Locker rooms are located
   D. All lockers will be assigned through the Custody Administrative Services.
   E. Personnel will be assigned lockers based on their job classification.
   F. Cleanliness of the locker room will be the responsibility of all staff.
   G. Lockers are the property of the county and are subject to search in accordance with applicable law.
   H. Staff will comply with CCCSO Policy 1.05.34, Sexual Harassment, to ensure that no offensive materials are posted in their assigned locker.
   I. All employees assigned to the jail facilities shall report to the Custody Administrative Services for locker assignments.
   J. Upon transfer from the facility, it shall be the employee’s responsibility to remove personal contents from their locker.
I. **POLICY**

A. This policy applies to all employees who upon return from maternity leave need lactation accommodations.

B. Pursuant to Labor Code sections 1030 - 1034, The Contra Costa County Office of the Sheriff shall provide a reasonable effort to provide a private space other than a restroom, close to the employee’s work area, to accommodate an employee desiring to express breast milk for her infant child.

C. The break time shall, if possible, run concurrently with any break time already provided to the employee.

II. **PROCEDURE**

A. An employee who has a need for lactation accommodation should inform her supervisor and discuss any relevant workload issues.

B. A lactating woman may need to express breast milk every two to three hours when she is away from her infant child.

1. Twenty to forty minutes may be needed for each session.

2. Additional time may be needed to set up and clean equipment.

C. Lactation Room

1. **Martinez Detention Facility**
   a. A private office will be assigned by the Facility Commander as necessary.

2. **West County Detention Facility**
   a. A private office will be assigned by the Facility Commander as necessary.
3. **Marsh Creek Detention Facility**

   a. The Facility Commander’s office shall be made available in the event a lactation area is required.

4. The room is available on a drop-in basis and is designed for multiple users. The lactation room is shared by female employees needing to express milk.

5. Keys to the office are available for female employees through Custody Administrative Services.
I. POLICY

A. Criminal and Civil subpoenas shall be processed and served on Sheriff’s Office employees in an expeditious manner.

II. PROCEDURE

A. SUBPOENA SERVICE

1. The Operations Sergeant will be responsible for logging the subpoenas in the Subpoena logbook and disseminating subpoenas to the appropriate locations.

2. The Facility Commander or designee will be responsible for serving Sheriff’s Office employees with criminal and/or civil subpoenas in an expeditious manner.

3. Staff serving subpoenas will be responsible for logging the service in the subpoena logbook and returning all served subpoenas to the subpoena clerk via a designated red transmittal envelope.

B. Refer to CCCSO Policies and Procedures 1.05.63 (Civil) and Chapter 1.05.66 (Criminal) for additional information.

CHAPTER: Training and Standards

SUBJECT: Facility Training Program

I. POLICY

A. It shall be the policy of the Custody Services Bureau to ensure that staff development and training programs, at all facilities are planned, coordinated and supervised by a qualified staff member.

B. This training plan shall provide for ongoing formal evaluation of all provided training programs.

C. The Facility Training Program shall be reviewed annually, and a written report submitted by CAS to the Administrative Lieutenant regarding the status of any deficiencies and/or revisions.

II. PROCEDURE

A. FACILITY TRAINING OFFICER

1. The Facility Training Program Manager (Administrative Lieutenant) and the Facility Commander shall designate Facility Training Officer(s) who shall be responsible for implementation of the Facility Training program.

2. The designated Facility Training Officer(s) shall meet specified requirements as determined by the Custody Services Bureau Assistant Sheriff and receive specialized training to ensure development, coordination and continuity of the training plan.

3. All Facility Training Officers performance will be reviewed annually for overall facility knowledge and proficiency. The results of the review in conjunction with the officer’s compatibility with the ideals set forth in the “Facility Training Officers Philosophy” statement will determine if the training officer is selected to serve another year or not selected to serve.
B. FACILITY TRAINING PLAN

1. The Facility Training Program shall be reviewed and developed annually by the Facility Training Officer(s), in conjunction with the Custody Services Bureau Advisory Training Committee and approved by the Facility Training Manager. The Advisory Training Committee is composed of the following:
   a. Facility Training Program Manager (Administrative Lieutenant)
   b. Facility Commander
   c. Facility Training Coordinator (CAS Sergeants)
   d. Special Events Response Team (SERT) Training Coordinator
   e. Facility Training Officers

2. The Facility Training Officer(s) and the Advisory Training Committee shall meet at least quarterly to review the progress of the training program and to resolve any problems that may arise. The Facility Training Coordinator in the Custody Services Bureau Administrative Services Unit will keep a written record of these meetings on file in the Custody Administrative Services.

3. The Facility Training Program shall include, but is not limited to:
   a. Job specific training
   b. In-service training
   c. Facility operations, policies, procedures and updates
   d. Legal updates

4. The Facility Training Program is developed, evaluated and updated based on an annual needs assessment that identifies current job-related training needs. These training needs are as follows:
   a. Position requirements
   b. Professional development
   c. Current detention issues
   d. New theories, techniques and technologies

5. When conducting the annual needs assessment, the Facility Training Officer(s) shall obtain information about the training plan from the following sources:
   a. Observation and analysis of job components
b. Staff surveys regarding training needs

c. Reviews of agency/facility operations

d. Staff reports

e. Evaluations and findings from sources within and outside the jurisdiction

f. Feedback from trainees
I. POLICY

A. Personnel training programs will be provided that enable all employees to function effectively.

B. All personnel who work with inmates shall receive sufficient training so that they are thoroughly familiar with the rules of inmate conduct, the rationale for the rules, and the sanctions available.

C. Programs will be planned in accordance with the directives as set forth by the Department, County and State statutes.

D. Programs will be coordinated to ensure compliance with the needs of each employee's respective job classification and pertinent to his/her work with inmates.

II. PROCEDURE

A. Training Program Organization and Objectives

1. The Sheriff’s Office Law Enforcement Training Center and the Detention Division Training Program will coordinate training efforts to ensure compliance with standards outlined in MJS 1020, 1021, 1023 and 1025.

   a. All staff members are responsible for ensuring that all coordinated training is completed in a timely manner.

2. Training Methods: The training staff may utilize the following training methods:

   a. Departmental training packages and written programs

   b. Instructors and speakers from within the Facility

   c. Area specialists (Public Safety Officers, Fire Marshals and similar specialists often are available to supplement training)
I. POLICY

A. It shall be the policy of the Detention Division to ensure that all Volunteers/Reserve Deputies complete an appropriate orientation-training program prior to their assignment.

B. This orientation/training program will be administered and documented by the division’s training personnel.

II. PROCEDURE

A. ORIENTATION TRAINING

1. Prior to assignment, every volunteer will complete an orientation-training program appropriate to the nature of his or her assignment.

2. The length of the orientation training shall be as follows:

   a. Volunteers/Reserve Deputies engaging in activities requiring minimal inmate contact shall participate in 4 hours of orientation prior to their assignment, and 4 hours of training each subsequent year.

   b. Volunteers/Reserve Deputies engaging in activities requiring regular or daily contact with inmates shall participate in 24 hours of orientation prior to their assignment, and 24 hours of training each subsequent year.

3. Volunteers shall agree in writing to abide by all facility policies, especially those relating to security, emergency procedures and confidentiality of information, pursuant to Policy and Procedures:

   a. 1.05.33 Treatment of Offenders
   b. 1.05.34 Harassment and discrimination in employment.
   c. 2.08.01 Computer Access and Security.
   d. 2.11.27 Release of Inmate Information.

4. Reserve Deputies are sworn personnel and have already sworn to abide by
B. TRAINING CURRICULUM

1. Volunteer/Reserve Deputy training programs will be established and implemented by facility training personnel. The curriculum for these training programs will minimally include:

   a. Departmental Policies and Procedures
   b. Departmental Rules and Regulations
   c. Security Procedures
   d. Supervision of Inmates
   e. Inmate Rules and Regulations
   f. Fire, Evacuation and Emergency Procedures
   g. Key Control
   h. Interpersonal Relations
   i. Social/Cultural Lifestyles of the Inmate Population

C. SCHEDULE OF SERVICES

1. Upon completion of orientation training, volunteers will be placed on the appropriate schedule of inmate service programs.

2. Inmate Services will ensure that a current schedule of volunteer services is posted in all appropriate areas of the facility and made available to all inmates.
3. Basic Training Objectives: Program objectives will be as follows:
   a. To inform the new employees of the Department's mission and Division goals.
   b. To familiarize the new employee with the facilities' grounds and physical plant.
   c. To instruct new employees in Division policies, procedures and programs.
   d. To provide employees with improved skills in their specialty.
   e. To introduce resource personnel throughout the division to new employees.
   f. To develop improved job skills.
   g. To develop human relation skills to assist in establishing productive, meaningful and professional relationships with inmates.

B. Training Program Development and Coordination

1. The CAS Training Unit will be responsible for the coordination of all Division specific training.

2. Representatives of the CAS Training Unit and Division Administration will meet periodically to assess, plan, develop and coordinate the training plan for the Division.
   a. They will meet as often as necessary to resolve problems, develop training curriculum, evaluate and update based on current job-related training needs.

3. The Facility Training Program Coordinator will be responsible for meeting with the Facility Training Officers on a regular basis to review the following:
   a. Progress of Deputies in Training
   b. Training Program Development
   c. Policy and procedural issues/discrepancies
   d. The Training Coordinator will report the status of the Facility Training Program directly to the Administrative Services Lieutenant.

C. Facility personnel shall receive at least the following training as specified herein:
1. CLERICAL/SUPPORT PERSONNEL
   a. On-going training will be provided each year of employment.
   b. This training may minimally include the following categories:
      • Tour of Facility
      • Policy and Procedures
      • Organization of the Agency and Facility
      • Communications
      • Computer Training
      • Emergency Procedures
      • Hostage Survival
      • Key Control
      • Stress Management
      • Material Safety Data Sheets
      • Blood Borne Pathogens
      • Physical Assault Hazards
      • Con Games
      • Interpersonal Communications
      • Inmate Rights and Responsibilities
      • Inmate Rules and Regulations

2. DETENTION SERVICE WORKERS / COOKS
   a. Detention service workers and cooks shall receive First Aid and Cardiopulmonary (CPR) / Automated External Defibrillator (AED) training biannually along with the training offered to the support personnel.

3. CUSTODY LINE STAFF (DEPUTY SHERIFF)
   a. 40 hours of training prior to entry on duty and an additional 120 hours of
training during their first year of employment.

- This training will be included as part of the Academy and Jail Operations.

b. 1 hour of orientation and 40 hours of training upon assignment to a detention facility.

c. 40 hours of training each subsequent year of employment.

d. This training may minimally include the following categories:

- Tour of Facility
- Policy and Procedures
- Security and Search Procedures
- Use of Force Policy
- Management and Supervision of Inmates
- Rights and Responsibilities of Inmates
- Emergency Procedures
- Interpersonal Relations/Communication Skills
- Stress Management
- Key Control
- Computer Training
- Hostage Survival
- Con Games
- Precautions and Risks of Suicide
- Report Writing
- Inmate Rules and Regulations
- Firearms Training (Departmental Range Program)
- Social/cultural lifestyles of the inmate population
- First Aid
- Cardiopulmonary Resuscitation (CPR)
e. ADMINISTRATIVE SEGREGATION STAFF TRAINING:

- All personnel managing administratively segregated inmates, shall receive training, including, but not limited to the following areas:
  - Administrative Segregation Operations
  - Classification
  - Policy and Procedures
  - Minimum Jail Standards 1053.

4. SAFETY MANAGEMENT PERSONNEL

a. Forty (40) hours of training during their first year of employment in addition to employee Orientation.

b. All employees in this category also are required to receive twenty-four (24) hours training annually for each subsequent year of employment.

5. PART-TIME PERSONNEL

a. 1 hour of orientation and 40 hours of training during their first year as a volunteer.

b. Additional training as needed.

c. This training shall minimally include the following categories:
  - Tour of Facility
  - Policy and Procedures
  - Organization of the Agency and Facility
  - Communications
  - Emergency Procedures
  - Hostage Survival
  - Key Control
  - Stress Management
• Material Safety Data Sheets
• Blood Borne Pathogens
d. Additional training as needed to remain informed and up-to-date with changes in facility operations, policy and procedures.
  • This will be accomplished through their assigned supervisors in bulletins and videotape.

6. TRAINING RESOURCES
   a. In addition to an employee’s initial training, other mediums may include but are not limited to:
      • Shift Line-ups or general meetings
      • Training Bulletins
      • Memorandums
      • Video Tapes
      • On the Job Training
      • Annual Advanced Officer Training
   b. It shall be the employee supervisor’s responsibility to provide and document all training that occurs.
   c. All in-house documented training will be forwarded to Custody Administrative Services for filing.
      • All other training records will be maintained at the Sheriff’s Training Center.
B. FACILITY TRAINING PLAN

1. The Facility Training Program shall be reviewed and developed annually by the Facility Training Officer(s), in conjunction with the Custody Services Bureau Advisory Training Committee and approved by the Facility Training Manager. The Advisory Training Committee is composed of the following:

   a. Facility Training Program Manager (Administrative Lieutenant)
   b. Facility Commander
   c. Facility Training Coordinator (CAS Sergeants)
   d. Special Events Response Team (SERT) Training Coordinator
   e. Facility Training Officers

2. The Facility Training Officer(s) and the Advisory Training Committee shall meet at least quarterly to review the progress of the training program and to resolve any problems that may arise. The Facility Training Coordinator in the Custody Services Bureau Administrative Services Unit will keep a written record of these meetings on file in the Custody Administrative Services.

3. The Facility Training Program shall include, but is not limited to:

   a. Job specific training
   b. In-service training
   c. Facility operations, policies, procedures and updates
   d. Legal updates

4. The Facility Training Program is developed, evaluated and updated based on an annual needs assessment that identifies current job-related training needs. These training needs are as follows:

   a. Position requirements
   b. Professional development
   c. Current detention issues
   d. New theories, techniques and technologies

5. When conducting the annual needs assessment, the Facility Training Officer(s) shall obtain information about the training plan from the following sources:

   a. Observation and analysis of job components
b. Staff surveys regarding training needs

c. Reviews of agency/facility operations

d. Staff reports

e. Evaluations and findings from sources within and outside the jurisdiction

f. Feedback from trainees
I. POLICY

A. A “Special Event Response Team” will be utilized for those events/critical incidents that require a specialized tactical team deployment in order to minimize dangers to inmates, staff, and public and to maintain the good order and security of the Detention facility.

B. SERT is tasked with coping with critical incidents or special events in a Detention Facility.

C. The SERT unit is a team possessing specialized equipment and tactical training designed to neutralize a dangerous or potentially dangerous situation within departmental standards.

II. PROCEDURE

A. ORGANIZATION

1. The SERT unit is made up of the following:

   a. SERT Sergeant

      • The SERT Sergeant supervises all aspects of the SERT unit and reports directly to the Facility Commander.

      • The SERT Sergeant is responsible for the selection, training, supervision of SERT members, planning, scheduling of SERT events, and the inspection, inventory and operating condition of specialized equipment.

      • Additional SERT support Sergeant(s) may be assigned at the discretion of the Facility Commander.

   b. Team Leader

      • The SERT Team Leader is either a Sergeant or Deputy selected by the SERT Sergeant and Facility Commander. The SERT
Team Leader is responsible for those duties as directed by the SERT Sergeant and assumes all the duties of the SERT sergeant in that individual’s absence.

c. Assistant Team Leaders
   - The SERT Assistant Team Leaders will assist the Team Leader with all duties as directed by the SERT Sergeant/Team Leader.

d. Team Member
   - The SERT Team Member is a Deputy who will perform all the duties and tasks as directed by the SERT Sergeant/Team Leader.

A. SPECIAL EVENT RESPONSE TEAM (SERT) TRAINING
   a. 40 hours of training annually, which at least 8 hours are specifically related to emergency unit assignment.
   b. This training shall minimally include the following categories:
      - Use of Force Parameters
      - Security Procedures
      - Search and Seizure Techniques
      - Weaponless Defense
      - Weapons Training (Lethal and Non-Lethal)
      - Proper Application of Restraint Devices
      - Crowd Control/Riot Control
      - Chemical Agents

B. EQUIPMENT AND UNIFORMS
   1. Weapons and munitions will be maintained in the armory with the following exceptions:
      a. Tasers
      b. Pepperball Delivery System
      c. FN303 Launcher
   2. SERT safety equipment will be maintained in the secured storage lockers, located within the Facility.
   3. K9s that are trained and certified in article location (narcotics, weapons, etc.) are
authorized for use in the detention facility, with prior approval by the Facility commander.
a. Inmates will be physically separated from and have no direct contact with the K9s.

C. USE OF FORCE

1. All use of force shall be in accordance with CCCSO Policy and Procedure 1.06.61, Use of Force.

   a. The SERT Sergeant will consider that a calculated and planned use of force is feasible in most cases.

D. ACTIVATION

1. SERT can be activated for either pre-planned events or upon the request of a Shift Sergeant or at the direction of the Facility Commander.

2. SERT unit will be deployed to respond to a critical incident/special event in a timely manner. These critical incidents/special events are as follows but are not limited to:

   a. Cell extractions
   b. Disruptive/non-compliant inmates(s)
   c. Refusal to lock down
   d. Crowd control
   e. Evacuation
   f. Escapes
   g. Riots and/or major disturbances
   h. Planned and methodical cell searches
   i. Any other incident/events requiring specialized team response

3. The SERT may be activated to assist the Sheriff’s S.W.A.T. Team in the event of a hostage situation/armed barricaded subject in the Detention Facility.

4. Medical Staff will be advised, at the time SERT unit is deployed.

   a. Medical Staff will stage in an area as determined by the Sergeant or designee.
   b. Medical Staff will evaluate and treat inmates and/or staff as necessary.
E. DOCUMENTATION

1. All SERT deployment(s)/incidents will be documented by:
   a. An Informational Report and a completed Special Event Operation Order Packet. Which will include, but are not limited to the following:
      • Nature of the incident/event
      • Cause of the incident/event
      • Names of the involved persons
      • Actions taken
      • Any use of force
      • Injuries sustained
      • Any property/evidence, or contraband seized
      • Damage to the Facility or property

2. A Crime Report will be completed if the incident/event involves criminal activity or when deemed appropriate by the SERT Sergeant.

3. An After Action Report will be completed at the completion of the SERT Deployment. Which will include, but is not limited to the following:
   a. Nature of the incident/event
   b. Date/Time of the incident/event
   c. Time of SERT activation and deactivation
   d. Location of incident/event
   e. IR/DR numbers and total overtime involved
   f. Any use of force
   g. Any use of specialized equipment/weapons
   h. Any injuries
   i. Any property damages
   j. Any evidence/contraband seized
F. DEACTIVATION

1. Upon Deactivation of the SERT unit the Sergeant will ensure all equipment, weapons, and munitions are accounted for and returned to their proper storage locations.

2. All necessary documents are completed and routed to the proper channels.

3. When circumstances allow, a debriefing of the incident/event may be conducted with all involved SERT unit members. This may include, but is not limited to the following:

   a. Evaluation of the incident/event
   b. Evaluation of plan and tactics used
   c. Provide forum for input to improve future incident/events
I. POLICY

A. The Custody Services Bureau shall maintain a Facility Responsibilities Matrix to ensure accountability for tasks within a specific facility.

B. Accountability and Frequency of Inspections shall be in accordance with the following Facility Inspections Matrix (refer to following page):
I. POLICY

A. The Custody Services Bureau shall maintain a Facility Inspections and Reporting Matrix to ensure accountability and timely compliance and reporting of custody activities to local state and federal authorities.

B. Reporting of custodial activities shall be in accordance with the following Facility Reporting Matrix (refer to following page):

I. POLICY

A. Staff will comply with the following procedures when experiencing problems with facility computer equipment and/or programs that are a part of the Local Area Network or has mainframe access, as defined in this order.

II. DEFINITIONS

A. LOCAL AREA NETWORK (LAN): The data infrastructure system that links together all the personal computers throughout the Sheriff’s Office.

B. PERSONAL COMPUTER (PC): Common terminals which can perform functions (such as electronic mail and file exchange) in addition to Jail Management operations. The personal computers are connected through the Local Area Network. They can be found throughout each County facility (Martinez, West County and Marsh Creek).

C. TRADITIONAL “MAINFRAME” TERMINAL: Computer terminal that can perform operations, such as LJIS, RMS, Internet browsing, etc. These functions are performed via terminal emulator programs or selected Personal Computers.

III. PROCEDURE

A. The following procedures will be used to document and report problems associated with, LAN, personal computers, traditional terminals, monitors, printers, software applications, keyboard, mouse, etc.:

1. Immediately notify Central Control

2. Control will initiate a call out to the appropriate computer technician.

   a. Non-urgent hardware problems will be submitted on a work order and routed to Central Control.

I. POLICY

A. Departmental cellular phones will be issued to specific staff and will be utilized as specified in CCCSO Policy and Procedure 1.07.51.

II. PROCEDURE

A. Departmental cellular phones will be issued to the following personnel:
   1. Custody Services Bureau Assistant Sheriff
   2. Division Captain
   3. Facility Commander
   4. Other personnel as designated by the Division Captain

B. Personnel who are issued departmental cellular phones shall carry and utilize them in compliance with CCCSO Policy and Procedure 1.07.51.

C. Cellular phones shall be carried at all times while on duty, in an on-call status, or at other predetermined times.

D. Personnel who are issued departmental cellular phones are responsible for maintaining them in operational order. All repairs are to be arranged through Technical Services.

E. The Technical Services Specialist maintains a record of all departmental cellular phones issued to staff.
I. POLICY

A. Employees are responsible for proper use of facility communication systems. These systems provide the most common means of contact within or outside the facilities. Rapid and effective communication is provided with proper use.

B. Communicating systems will be used only to conduct official business.

C. When using any communication system, staff will speak distinctly, be courteous, listen carefully and write down messages.

D. Certain systems are electronically sophisticated and require care and diligence in their operation. Employees who are not familiar with the use of a particular system should receive sufficient training prior to use.

E. Staff will immediately report any malfunction of a communication system to a shift supervisor.

F. In the event of facility telephone system failure, communication within the facility will be by radio, except when bomb-threat procedures are in effect.

II. PROCEDURE

A. TELEPHONES

1. The facility telephone system is a component of the County’s Centrex system networks. All incoming calls made to the main telephone number and other selected numbers are received by the Operations and Central Control staff at the Martinez Detention Facility and Operations staff at Marsh Creek Detention Facility. The Operation staff is available 24 hours, 7 days a week.

2. The West County Detention Facility telephone system is a component of the PBX Electronic Telephone System. All incoming calls made to the main telephone number and other selected numbers are received by the Operation staff at the West County Jail. The Operation staff is available 24 hours, 7 days a week.

3. In the event that trouble receiving incoming calls is experienced Central Control
will be notified and call out for repairs will be initiated.

a. If the system develops a problem that cannot be resolved or for any emergency telephone repair, contact Central Control. Central Control personnel will contact the on-call Communications Technician through GSD, who will determine what type of maintenance will be required.

b. All requests for telephone repairs, other than those noted above will be made in compliance with Policy and Procedure 2.06.01, “Facility Repair Requests.”

- Department telephones are provided for Department Business.
- Personal multi-message or long distance calls will not be made from Department telephones unless the call is placed collect or billed to the caller’s home telephone or personal credit card.

c. Minimize the use of the telephone for personal business to reduce lost employee productive time and unavailability of the telephone line while the call is being made.

d. Staff will access the county Centrex/PBX system when calling any Contra Costa County Agency that is associated with the system.

B. MASTER INTERCOM/PAGING/STENOFOON AND ALL-CALL PAGING SYSTEM

1. Master Intercom/Paging System: This system is the module emergency and communication lifeline. It allows for transmission between control and the module housing units.

2. An all-page capability is available in the event of an emergency at Martinez Detention and West County Detention Facilities.

a. All-Call Paging: The all-call page is a one way, overhead PA, communications system that originates from Central Control only. The all-call paging areas cover the core building and the service building areas. The all-call is for emergency and informational announcements.

C. EMERGENCY RADIO SYSTEM

1. In the event of an emergency or an urgent/unusual situation, and conventional means of communication within the facility, i.e., telephones and Master Intercom Systems are disrupted; radios will be used for all communications.

2. The Facility Commander or his/her designee will ensure that all staff assigned to security positions is in possession of a radio.

a. In the event communication with the outside is disrupted, 800 MHz radios will be used to maintain communication with the community and the Sheriff’s Office Dispatch Center.

b. 800 MHz radios are designed to allow portable communication with Contra Costa County Sheriff’s Office Dispatch. 800 MHz radios are located in Intake, Central Control and Sergeant’s office at Martinez Detention Facility and in West County they are located in line-up/communication room.
c. During a crisis situation, Central Control and Operation Sergeant will assume dispatch duties and all correspondence with the network shall go through these areas.

D. ETIQUETTE

1. All communications will be professional and in accordance with CCCSO Policy and Procedure 1.07.51.
# Custody Staff Radios

## I. POLICY

A. Staff will utilize the radio equipment per their Assigned Area in compliance with all Departmental Regulations, and the following procedure.

## II. PROCEDURE

A. ACCOUNTABILITY

1. Central Control Staff shall maintain a master inventory list detailing work site location and status of radio equipment.

2. All portable radios, batteries and holders will be marked with identifying numbers.

3. Shift sergeants are responsible for ensuring that all radios, batteries and holders assigned to their areas are stored and used in those assigned areas. All supervisors will have access to radio assignments.

   a. Custody staff shall inventory and account for all radios within their unit at the beginning of each shift and report any discrepancies to the shift sergeant immediately.

4. Absent an emergency or mitigating circumstances, radios, batteries and holders will be returned to the appropriate control area upon completion of shifts.

   a. Storage of radios in personal lockers or vehicles is prohibited.

B. MAINTENANCE

1. Radio Operators discovering malfunctions and damage will submit a JMS Building Maintenance Order.

   a. The Work Order must include the serial number of the radio and accompanying battery.
b. Reporting staff will attach a “Write-it-don’t-say-it” form to the radio with the following information:

- Name of operator
- Date
- Radio serial number
- Confirmation that a work order was submitted

c. Reporting staff will deliver the radio to Central Control.
d. Central Control Staff will update their logs to indicate the radio is out of service.

2. Central Control Staff will deliver the radio to CAS during normal working hours.

a. The CAS Specialist will ensure the Work Order has been entered into JMS.
b. The CAS Specialist will facilitate delivery of the radio for repair.

D. PORTABLE RADIO CONTROL AREAS

1. The following have been designated as control areas for portable radios and battery chargers:

a. Operations/Shift Supervisor’s Office
b. Custody Sergeants Office
c. Transportation Office
d. Central Control

e. Housing Units

f. Classification Office

g. Intake

h. Custody Administrative Services (CAS)

E. 800 MHz RADIOS

1. 800 MHz radios are equipped with frequencies allowing communications with Sheriff’s Office Dispatch and Custody Services Bureau Staff.

2. In the event personnel are assigned to make prisoner transports, they are to be assigned an 800 MHz radio from the Transportation Office.

F. DETENTION DIVISION RADIO CHANNELS

I. POLICY

A. Custody Services Bureau personnel will properly maintain assigned vehicles, ensure the cleanliness of those vehicles, govern and ensure the proper use and security of the assigned vehicles, and when using personal vehicles for official purposes, only do so upon authorization of competent authority.

II. PROCEDURE

A. All personnel assigned to the Custody Services Bureau are directed to maintain the following minimum standards of vehicle security when parking vehicles on or about jail facility grounds.

1. Vehicle keys are to be secured the same as jail security keys. Keys are not to be left unattended and never left in parked vehicles.

2. All vehicles parked on or about jail facility grounds are to be locked and secured.

3. All staff, transportation officers, outside arresting agencies, etc., entering via the vehicle sally port will secure their firearms and ammunition in available gun lockers, or may temporarily secure them in their locked, departmental vehicle trunk, prior to entering the facility.

B. ALL VEHICLES

1. The driver of each vehicle assigned to the Custody Services Bureau is responsible for making sure the gas tank is full, the oil, water and tire pressures are adequate and that all trash is removed after each use.

   a. When a deputy is assigned a vehicle at a jail facility, he/she will be responsible for searching the vehicle prior to its use, except in emergencies.

   b. Any contraband or debris left in the car is to be reported to the on-duty Shift Supervisor or Facility Commander immediately.
c. The deputy who was assigned the vehicle prior to the discovery of any debris or contraband will be held accountable for it being left in the vehicle, in that it was his/her responsibility to search the vehicle when it was received.

d. The Shift Supervisor/Unit Supervisor shall periodically assign personnel on his/her shift to inspect each Custody Services Bureau vehicle for cleanliness, contraband and adequate supply of gas.

e. The Shift Supervisor or Facility Commander will take the appropriate disciplinary action when contraband or debris is found in a vehicle assigned to the Custody Services Bureau.

f. For Officer Safety reasons, it is the responsibility of all personnel to ensure that our vehicles are clean and free of weapons, contraband and debris.

2. Each week all Custody Services Bureau vehicles will be washed and if needed, waxed. Each section shall be responsible for the care of their vehicles and compliance with this procedure.

C. VEHICLE MAINTENANCE

1. Drivers shall be responsible for checking the vehicle for defects or damage prior to each use. Any discrepancies shall be reported to the on-duty Shift Supervisor prior to using the vehicle.

2. Drivers shall notify a Shift Supervisor in the event maintenance problems are discovered. The Shift Supervisor will be responsible for contacting County Garage personnel to report vehicle discrepancies, and to ensure needed repairs are made.

   a. Transportation staff shall be responsible for all vehicles within their unit.

   b. Custody Administrative Services will be responsible for all command staff vehicles.

D. VEHICLE ACCIDENT/DAMAGE REPORTING

1. Vehicle accident reporting will be in accordance with CCCSO Policy and Procedure 1.06.54, Vehicle Accident Reporting.

E. EMERGENCY VEHICLE USAGE CONTROL

1. Key Control

   a. All keys shall be maintained in as follows:

      • Transportation Unit keys shall be stored in the Transportation Office.
• Command staff vehicles keys shall be stored in the CAS Sergeant’s Office.

b. Each shift shall inventory and log the keys as received from the previous shift.

F. PARKING

1. All transportation vehicles should be parked in the following areas:

a. Vehicle Sally Port North Door parking area

b. South-West parking lot of Martinez Detention Facility

G. GAS CARD

1. Located in each county vehicle, or on its assigned key ring is a gas/diesel fuel card (Voyager) used for obtaining fuel products at various county facilities and selected contract stations.

2. Custody Administrative Services will maintain one (1) additional Voyager card in the event no vehicle fuel card(s) are available.

## I. POLICY

A. Vehicles assigned to the Transportation Unit may only be used by Transportation personnel, unless otherwise approved by the Transportation Sergeant or Facility Commander or designee.

## II. PROCEDURE

A. Personnel who wish to use any vehicle assigned to the Transportation Section, must receive permission from the Transportation Sergeant or Administrative Lieutenant prior to such use.

1. Keys for custody staff vehicles can be located.

B. If permission cannot be obtained, and the need is urgent, the Facility Commander or designee may approve the use of a transportation vehicle provided that a note is left for the Transportation Sergeant, stating the following:

1. Date and time of use
2. Person driving and vehicle identification
3. Destination and purpose
4. How long vehicle is expected to be used
5. Vehicle condition if breakdown occurs

C. When not in use, transportation vehicle keys will be secured.
### Detention Number: 2.05.07

**Related Orders:** None

**Issue Date:** 07-01-05

**Revision Date:** 03-26-19

**Clearance:** Custody

**Subject:** Facility Official Mail Procedure

#### I. Policy

A. All incoming and outgoing facility mail will be processed through the facilities mailrooms.

B. Employees shall not use the departmental address for personal mail, or process personal outgoing mail through the facility mailroom.

C. Inmate mail will be processed Monday through Friday, excluding holidays.

#### II. Definition

A. **Transmittal Mail:** Mail between Contra Costa County departments that are transported by County employees.

#### III. Procedure:

**A. Incoming U.S. Mail**

1. Mail will be delivered to Administration by the United States Post Office, Monday through Friday excluding weekends and holidays.

2. Sheriff’s Aides assigned to the lobby will sort all incoming mail and deliver to the respective areas as follows:

   a. All command and supervisory staff mail will be delivered to the mailboxes in the administration boxes in the 1st Floor Mailroom.

   b. All mail for line staff will be forwarded to the employee’s mailbox for delivery to the employee.

   c. All mail addressed to a specific section will be delivered to the day shift supervisor in that section or placed in the corresponding mail.

   d. Mail for any area located in the facility, will be hand delivered to that
particular area or placed in the corresponding mailbox.

B. OUTGOING U.S. MAIL

1. Outgoing staff and inmate mail shall be deposited in designated bins in the 1st Floor Mailroom.

2. Proper zip codes will be included on all outgoing mail.

C. TRANSMITTAL MAIL

1. Representatives from each county department or section will be responsible for forwarding all transmittal mail to central services for distribution and delivery.

2. Incoming Transmittal mail will be processed in the same manner as U.S. mail.

3. The Transportation Unit will deliver all transmittal mail between facilities.

4. Custody Administrative Services will be responsible for the pick up and delivery of all administrative mail and payroll.

   a. Blue payroll envelopes will be delivered promptly to Sheriff’s Administration at 651 Pine Street, 7th floor.
I. POLICY

A. General Services Department (GSD), Department of Information Technology (DoIT) and Global Tel-Link (GTL) work requests will be expedited and completed in a timely manner to ensure the efficient operation of the facility.

II. PROCEDURE

A. Routine repair requests shall be submitted in the following formats:

1. GSD Work Requests:
   a. Deputies will report routine maintenance/repair requests to the Shift/Ops Sergeant or CAS Specialist.
   b. The Shift/Ops Sergeant, or CAS Specialist will place a work order request online.
   c. Each work request can only contain one issue/location per work order. Do not list multiple items on one work order. This will ensure that work will be tracked and performed more accurately.
   d. Work request descriptions must contain:
      • Location (i.e. “D-Module”)
      • Description of issue
      • Description of type of work to be performed (i.e. Fix, Replace, Estimate, etc.)
   e. The CAS Specialist will review and approve/deny facility work orders daily.

2. DoIT Work Requests:
   a. DoIT work requests are for STAFF phones only.
   b. All DoIT requests will be emailed to CAS who will place the work request on the DoIT online site.
3. GTL INMATE phone Work Requests will be forwarded to the CAS Specialist for coordination with the GTL field service representative.

4. Vandalism
   a. Any work orders submitted that involve vandalism shall be submitted with the corresponding incident report.
   b. If the vandalism is under $250.00, the cost shall be incurred by GSD.

B. EMERGENCY REPAIR
   1. Emergency repairs are classified as equipment in need of repair that if delayed for any amount of time would result in a compromise of facility security or presents a hazard or life-threatening situation to any member within the facility.

   2. The Shift Supervisor will be notified of the emergency repair request.

   3. The Shift Supervisor will assess and determine if immediate repair is necessary.

      a. If immediate repairs are necessary the Shift Supervisor will contact Central Control who in turn will make the appropriate notification(s).
      b. All emergency work requests must be called into GSD, DoIT, GTL, without the use of the on-line service request systems.
      c. If immediate repairs are not necessary, the Shift Supervisor or his/her designee will follow the procedure in regards to routine work requests.

C. MARSH CREEK DETENTION FACILITY (MCDF)
   1. The MCDF Commander will serve as the liaison between the facility and GSD.

   2. The Shift Supervisor will be responsible for reviewing and submitting all work orders to GSD, DoIT and GTL for action.
I. POLICY

A. The General Services Department (GSD) will provide a preventive maintenance program for building systems and equipment in order to minimize out of service time due to failure, as well as, reduce costly breakdown repair.

B. Building Maintenance Division is responsible for:

1. Maintenance and repair of the Custody Services building structures
2. Upkeep of exterior grounds
3. Maintenance and repair of interior walls (including glazing and common hardware items)
4. Repair and replacement of floor coverings
5. Repair and replacement of machinery and systems inherent to the building, and other special purpose equipment.

C. Services may be provided by county forces, by a vendor under contract with GSD, or a combination of the two.

D. For specifics, see the applicable Memorandum(s) of Understanding (MOU), between the Contra Costa County Sheriff’s Office and General Services Department, regarding the specific detention facilities.

II. PROCEDURE

A. The Building Maintenance Division of the General Services Department will be notified of needs pertaining to operation, maintenance, repair and remodeling of structure, utility systems, refrigeration equipment, and mechanical equipment controls, which include setting and adjustments of thermostats.

1. If General Services Department/Building Maintenance Division cannot fix the
malfunction in a relatively short period of time, or if the repairs are beyond their expertise, they will notify the Facility Commander.

2. Upon agreement with the General Services Department, the Facility Commander will contact the original equipment manufacturer or his/her designated representative, who will carry out the repairs.

B. A maintenance team composed of a plumber, electrician, carpenter, lead painter and an operating engineer will be assigned to the facility.

1. This team will provide services to the facility during normal working hours.

2. Service during nights, weekends and holidays will be provided on an emergency basis and can be obtained by contacting the on-duty GSD employee.

C. Building Maintenance Division will be responsible for exterior window cleaning and other windows that require special equipment to clean. This cleaning will be minimally performed once per year.

D. The power generator and standby batteries will be tested at least every week for effectiveness and will be repaired as necessary to ensure reliability in time of need.

1. The Building Maintenance Division is responsible for landscape maintenance.

   a. The Building Maintenance Division is responsible for picking up litter within the enclosed areas of the perimeter of the building, vehicle sally ports and all areas around the building.

E. To ensure proper operation of maintenance equipment within the facility, the Building Maintenance Division will be responsible for the inspection and service of all maintenance equipment.

1. The Appropriate GSD Supervisor will maintain a record of all inspections and service.
## I. POLICY

A. In the event that any cell floods, water to the cell shall be shut off until repairs can be completed.

B. All housing units are equipped with floor drains and emergency water shut-off valves.

C. In instances of flooding severe enough to damage building contents, the housing unit deputy will notify the Custody Sergeant who in turn will contact Building Maintenance.

## II. PROCEDURE

A. **EMERGENCIES DUE TO NATURAL DISASTERS AND MAJOR INCIDENTS**

1. In the event that an earthquake or other major incident occurs causing a major failure in the facility water system or intrusive flooding, custody staff should take the following steps upon direction from the Facility Commander or designee or a General Services Department employee:

   a. The housing unit deputy on the flooding module shall notify all inmates housed in the cells to refrain from using their toilets and/or sinks.

   b. The housing unit deputy on both the flooding and problem housing units will shut off all water valves to the housing unit cells through the appropriate access panels.

      - Valve locations can be located in the Emergency Water Shut Off book in the Deputy Station.

2. The Shift Supervisor shall ensure General Services Department crews respond or have provided specific instructions on how to stabilize the situation until their arrival.

3. The shift supervisor will be advised.
4. Water service shall be restored as soon as possible.

B. EMERGENCIES DUE TO INTENTIONAL ACTS

1. Should it be determined that flooding is occurring as a result of intentional acts of sabotage, the following measures shall be implemented.
   a. The inmate shall be moved to an appropriate holding cell until their cell is deemed safe.

2. The Shift Supervisor will be advised.

3. Should the inmate continue flooding the cell, the following procedures will be followed:
   a. The inmate will be advised that the water supply to his cell will be restricted.
   b. Water to the holding cell will be manually turned off via the corridor chase.
   c. Water shall be turned on at the beginning of each shift for a period of ten (10) minutes.
      - Prior to feeding, water will be turned on for five (5) minutes for the inmate to wash their hands, etc.

4. The deputy assigned to the housing floor will supervise the turning on and off of water to prevent flooding.

5. The housing unit deputy will provide detailed information regarding the incident(s) to include the following:
   a. Incident Report
   b. Housing unit Redbook notes
   c. JMS Documentation of turning off/on the inmate’s water supply.

6. The Incident Report will be forwarded to the Facility Commander at the end of each shift, via the Shift Supervisor, advising of the time the water is turned on and off.
   a. One (1) copy will be placed in the inmate's booking file.

7. Inmates shall not remain on restricted water usage longer than necessary to ensure they will not continue flooding.
I. POLICY

A. The Custody Services Bureau is to provide a system of fire prevention and control through the use of efficient fire protection services and equipment, utilization of appropriate fire safety codes and regular monitoring to ensure the safety of all personnel, inmates and visitors.

B. These systems and controls will be reviewed annually and updated as needed; and shall include, but not be limited to the following:

1. An adequate fire protection service.
2. Fire drills at least once each quarter.
3. Quarterly testing of equipment refer to CSB Policy 2.06.02 Facility Plant Maintenance and 2.07.02, Fire Equipment-Description and Location.
4. A biennial inspection by a qualified outside fire inspector.
5. A monthly inspection by the facility Fire/Life Safety Officer.
6. A weekly inspection by a qualified departmental staff member.
7. Placement of adequate fire protection equipment throughout the facility.
   a. Refer to CSB Policy 2.07.02, Fire Equipment-Description and Location.
8. Use of various types of automatic fire alarm systems to provide early warning for the presence of fire and/or smoke.
   a. Refer to CSB Policy 2.07.02, Fire Equipment Description and Location.
9. A written facility wide evacuation plan which includes:
   a. Floor plan layout.
b. Location of exits.

c. Evacuation routes.

d. Location of fire plan.

• Refer to CSB Policy 2.07.03 through 2.07.05, Relocation and Evacuation Plan.

II. DEFINITIONS

A. FIRE/LIFE SAFETY OFFICER: The Custody Administrative Services Lieutenant or designee who is responsible for overseeing and assisting with fire safety, prevention and inspection tasks.

B. QUALIFIED DEPARTMENTAL STAFF MEMBER: An individual who has received training by the Fire/Life Safety Officer, to conduct the weekly facility fire/safety inspections.

III. PROCEDURE

A. FIRE PREVENTION

1. The most important aspect of an effective fire protection program is fire prevention and compliance with fire and safety codes.

2. Personnel should always be aware of fire hazards such as overloaded plug outlets, improper trash storage or expended fire extinguishers.

3. All personnel should make fire prevention a basic part of their daily routine.

4. To augment the fire safety plan, all personnel shall:

   a. Properly store combustible materials.

   b. Prevent hazardous electrical situations.

   c. Report fire hazards immediately.

   d. Check fire-fighting equipment regularly.

5. Specifications for the selection and purchase of furnishings must indicate acceptable requirements for fire and safety performances of materials prior to purchase by the supply section, pursuant to Title 19, of the California Code of Regulations.

B. FIRE SAFETY INSPECTIONS AND PLAN RESPONSIBILITY

1. The facility Fire/Life Safety Officer shall be responsible for facilitating inspections and ensuring the adequacy of the fire plan.
2. The Fire/Life Safety Officer is responsible for facilitating weekly and comprehensive monthly inspections.

3. The Fire/Life Safety Officer will train other staff members, designating them as Qualified Departmental Staff Members for the purpose of conducting weekly inspections.

4. Only the Fire/Life Safety Officer may conduct the monthly inspection. These inspections include, but are not limited to, the following:
   a. Fire equipment.
   b. Smoke detectors, sprinklers.
   c. Extinguishers, fire hoses and cabinets, standpipes.
   d. Fire hazards.
   e. Fire prevention practices.
   f. Use, storage and disposal of hazardous materials.

5. Fire Drills
   a. The Fire/Life Safety Officer will coordinate fire drills that will be conducted quarterly on each shift at the Martinez Detention Facility, the West County Detention Facility and the Marsh Creek Detention Facility, as directed by the Facility Commander or designee.
   b. The Facility Commander will maintain a record of all fire drills (January, April, July, October). Evacuation of inmates for fire drills will be at the discretion of the Facility Commander or designee, based on safety and security considerations of the facility.

6. Key and Lock Inspections
   a. The Facility Commander will designate a sergeant assigned to dayshift to conduct an inspection of all evacuation doors in the facility on a trimester basis.
      • The facility carpenter/locksmith will accompany the sergeant or designee throughout the inspection.
      • This inspection will include cycling the mechanism and manually opening the doors using the evacuation keys.
   b. The sergeant will complete a report documenting the inspection.
   c. The sergeant will forward the report to the Facility Commander.
7. Fire Extinguishers
   a. The facility engineer will inspect all fire extinguishers on a quarterly basis.
   b. The facility engineer will complete a report documenting the inspection.
   c. The facility engineer will forward the report to the Facility Commander.
   d. Any staff member using a fire extinguisher will place it in the Sergeants office with a write-it-don’t-say it describing its original location and the request for servicing.
      • The shift supervisor will ensure that a work order is submitted to the stationary engineer for the extinguisher to be serviced.
      • The shift supervisor will ensure that a replacement extinguisher has been issued at the original location until servicing has been completed.

8. Inspection Reports
   a. The Fire/Life Safety Officer shall submit the monthly inspection reports to the Facility Commander by the 10th of the month for the previous month’s inspection.
   b. The Facility Commander will then advise the appropriate personnel or entity responsible for the affected area(s) to take corrective action and report back, indicating the completed and/or initiated corrective action taken.
   c. The Fire/Life Safety Officer or designee shall complete and submit weekly inspection reports to the Facility Commander.
   d. All inspection reports will be returned to the Administrative Lieutenant.
      • The Administrative Lieutenant will then advise the personnel or entity responsible for the affected area(s) that need corrective action.
      • The supervisor or designated staff member will then report back to the Administrative Lieutenant, indicating the completed and/or initiated corrective action taken.
   e. The Administrative Lieutenant will follow-up on all pending corrective action and maintenance repairs until each deficiency is completed.
   f. Completed reports shall be maintained in Custody Administrative Services for at least two years.
C. AUTHORITY AND RESPONSIBILITY DURING A FIRE

1. During an emergency, the Facility Commander, or highest-ranking officer on duty, will have authority for decisions made affecting the facility, the emergency and security.

2. Upon arrival of the fire department, the on-scene firefighters shall assume command of the fire scene.

D. BASIC GUIDELINES FOR ALL PERSONNEL

1. Emergency evacuation routes will be posted throughout all detention buildings to facilitate evacuation of inmates, visitors, and staff.

   a. The travel distance of all exits shall be in compliance with the National Fire Safety Code and certified by the State Fire Marshal and/or designated local authority.

2. Fire doors will not be blocked or tied in an open position.

3. All housing units have emergency lighting installed to provide sufficient illumination to egress areas and stairwells during emergencies.

4. All facility staff will be trained in the operation of all written emergency plans prior to entry on duty.

5. All facility staff will be trained in the location and implementation of fire-fighting equipment and how to use it.

6. All facility staff will be trained in the location of fire exits and evacuation routes.

7. All fire incidents will be documented in an Incident Report or Crime Report (Arson) when necessary.

8. The fire department will be summoned for all designated fire incidents, depending on the severity of the incident.

   a. The Facility Commander or designee will determine if the fire department response should be cancelled.

9. Medical attention will be administered as necessary.

E. FIRE AND SMOKE ALARMS AT MDF and WCDF

1. Central Control, upon receiving a fire/smoke alarm, will immediately notify the Housing Deputy of the affected area.

   a. If the alarm is in a general area, they will advise an Escort Deputy.

   b. At the Deputy’s direction, Central Control will activate the abort button on the fire control panel.
2. The deputy will quickly inspect the area for signs of smoke and/or fire
   a. The deputy will maintain voice contact with Central Control at all times.
   b. If voice contact is lost, Central Control will notify a Shift Sergeant immediately.
3. The deputy will advise Central Control of their status upon completing their assessment.

F. FIRE AND SMOKE ALARMS AT MCDF
1. The Housing Unit Deputy, upon receiving a fire/smoke alarm, will immediately notify the Shift Supervisor / Operations staff of the alarm.
2. The deputy will quickly inspect the area for signs of smoke and/or fire
   a. The deputy will maintain voice contact with the Shift Supervisor/Operations staff at all times.
3. The deputy will advise the Shift Supervisor/Operations staff of their status upon completing their assessment.

G. DISCOVERY OF SMOKE AND/OR FIRE AT MDF OR WCDF
1. Should a fire be discovered, Central Control will announce a “929” over the facility all call system, preceded by a single tone.
2. All unaffected housing units will lock down.
3. All available Sheriff’s Aides will respond to Central Control to assist as needed.
   a. **MDF:** One Sheriff’s Aide should remain in the lobby until all visitors have been cleared from the facility.
4. Central Control staff will immediately call Sheriff’s Dispatch or the local fire district when a staff member confirms a fire.
   a. Central Control staff will provide the following information:
      - Name and address of the facility where the fire equipment is to respond.
      - That an alarm has been received
      - The type of alarm
      - That the alarm has been investigated and confirmed to be legitimate
      - Location of the fire (kitchen, locker room, building number).
• If any medical emergencies exists.

• Staging areas and/or command post location (if applicable)

b. Central Control staff will ensure the Facility Commander or designee is aware of the fire and its nature.

• The Facility Commander or designee will designate a staff member to wait for the arrival of fire personnel and escort them to and from the location of the occurrence.

c. Central Control staff will note all notifications and times pertaining to requests for Fire Department assistance in the Central Control Log.

5. If the fire is discovered in a room, the door to the room should only be closed if the staff is certain that there is no one in the room.

6. The deputy should assess the scene and determine:

a. If they can immediately contain the fire with available extinguishers/fire hoses

b. If an evacuation is necessary and advise Central Control.

H. DISCOVERY OF SMOKE AND/OR FIRE AT MCDF

1. All unaffected housing units will lock down.

2. The Shift Supervisor/Operations staff will immediately call Sheriff’s Dispatch or the local fire district when a staff member confirms a fire.

a. The Shift Supervisor/Operations staff will provide the following information:

• Name and address of the facility where the fire equipment is to respond.

• That an alarm has been received

• The type of alarm

• That the alarm has been investigated and confirmed to be legitimate

• Location of the fire (kitchen, locker room, building number).

• If any medical emergencies exists.

• Staging areas and/or command post location (if applicable)

b. The Shift Supervisor will ensure the Facility Commander is aware of the fire and its nature.
• The Facility Commander or designee will designate a staff member to wait for the arrival of fire personnel and escort them to and from the location of the occurrence.

c. Operations staff will note all notifications and times pertaining to requests for Fire Department assistance in the Central Control Log.

3. The deputy should assess the scene and determine if an evacuation is necessary and advise Central Control.

I. EVACUATIONS

1. Evacuations will be conducted in accordance with the following CSB Policies and Procedures:

a. CSB 2.07.03, MDF Relocation and Evacuation Plan

b. CSB 2.07.04, WCDF Relocation and Evacuation Plan

c. CSB 2.07.05, MCDF Relocation and Evacuation Plan
I. POLICY

A. The Custody Services Bureau will provide adequate fire detection and protection equipment for use in detecting and fighting fires.

B. All personnel shall be trained in the use and location of fire-fighting equipment present at all Contra Costa County Detention Facilities.

C. Although the fire suppression equipment and systems are inspected routinely as part of the fire/life safety program, all personnel are charged with the responsibility of reporting deficiencies of the equipment.

II. DEFINITIONS

A. TYPES OF FIRE EQUIPMENT:

1. Ansul fire protection: A dry chemical system, containing 98% bio-chemical soda, which activates when extreme heat is detected.

2. Dry chemical extinguisher: Dry chemical agent rated to extinguish Class A, B or C fires.

3. Water extinguisher: Contains pressurized water to extinguish common combustibles such as paper, wood or cloth. Not to be used on flammable liquids, metal or electrical fires.

B. FIRE CLASSIFICATIONS:

1. Class A Fire: Ordinary combustibles, such as paper, wood, and cloth, which can be controlled with large quantities of water.

2. Class B Fire: Fires in flammable liquids, such as gasoline, fuel oils, grease, or alcohol, where a blanket effect in smothering the fire is essential.

3. Class C Fire: Fires resulting from electrical equipment where the use of an
electrically non-conductive extinguishing agent is of primary importance.

4. Class D Fire: Certain combustible metals such as magnesium, titanium, potassium or sodium. Controlled with agents specially designed for the material involved. In most cases, they absorb heat and cool the material below its ignition temperature.

III. PROCEDURE

A. FIRE-FIGHTING AND DETECTION EQUIPMENT DESCRIPTION:

1. Equipment available within the facility consists of:

   a. Ansul-Automatic dry chemical extinguisher system in main kitchen.

   b. Automatic water sprinkler systems located throughout the facility, activated at 165°.

   c. Pre-Action sprinkler systems located on all facility housing units.

   d. Fire Extinguishers:

      • 10# dry chemical extinguishers Class a,b,c.

   e. Fire Racks:

      • Located throughout the facility and one on each inmate housing unit.

      • Each fire hose cabinet contains:

         • 10# dry chemical extinguishers Class a,b,c.

   f. Point of Control (POC) Automatic Fire Alert Systems

      • Smoke Detectors in all cells

      • LED indicator; integral with detector.

      • Inactivated: Flashing, low brightness.

      • Activated: Steady, full brightness.

      • Tamper proof mounting in all detention cells and inmate areas.

   g. Thermal Detectors MDF Only

      • 135°F; fixed temperature with rate of rise element.
2. Housing Units
   a. Activation of any alarm initiation device within the housing unit shall:
      • Annunciate on the housing unit smoke alarm annunciator.
      • Register (Annunciation and printed record) fire alarm condition at Building Management Control Center and at Central Control.

B. SEQUENCE OF OPERATION AND EQUIPMENT STANDARDS:

1. General
   a. The Fire Detection and Alarm System utilizes local fire alarm annunciation at all inmate housing units and is interfaced to a central monitoring station located in the Central Control. A computerized controller process monitors and dispatches all signals and data to the central control station. Central Control is the primary monitoring and control point for all fires.
   b. The entire system has both primary and secondary power sources for reliability and redundancy.
   c. Secondary monitoring locations are provided to assure timely and accurate notification of alarm in the event of failure or trouble at the primary location. Secondary locations are at:
      • Engineering Office
      • Each Housing Unit

2. Housing Unit Alarm Initiation
   a. Any alarm signal within a housing unit will initiate the following indications:
      • Primary:
         • An audible/visual signal on the graphic display panel at Central Control.
         • Martinez Detention Facility has a visual signal on the light display panel at the fire control panel located in Central Control and a printed alarm record showing time and detailed location.
         • An audible/visual signal on the annunciator panel in the Housing Unit.
      • Secondary:
• An audible/visual signal on the fire control panel at the Building Management Center.

• Acknowledgment of an alarm or trouble signal will silence the audible signal and change the flashing visual signal to steady. Time of acknowledgment shall be recorded on the printers at Central Control.

C. EQUIPMENT MAINTENANCE AND INSPECTIONS

1. The Administrative Services Lieutenant, Custody Administrative Services and the Fire/Life Safety Officers will coordinate with the General Services Department (GSD) and the local Fire Marshal to ensure the following equipment maintenance and inspections are accomplished in compliance with Local, State, and Federal Regulations:

   a. Fire Extinguishers-Dry
      • Service yearly or after use

   b. **Stand Pipe Risers**
      • Inspect Semi-Annually
      • Service every 5 years

   c. Automatic Sprinklers
      • Inspect Quarterly
      • Service every 5 years

   d. Water Flow Devices
      • Test Quarterly
      • Service every 5 years

   e. Supervisory Devices
      • Test Quarterly
      • Service every 5 years

   f. **Fire Hoses in Racks**
      • Unrack/Reload Annually
      • Test at 5 years initially then every 3 years.
g. Fire Hydrants
   ● Test Annually

h. Manual Fire Boxes
   ● Test Annually

i. Smoke Detectors
   ● 100% Test Annually

j. Heat Detectors
   ● Recurring Test
   ● 100% Test Annually

k. Annunciators
   ● Test Annually

l. Control Panels
   ● Test lamps, LEDs, Fuses
   ● Primary and Secondary Power

m. Fire Alarm
   ● Test Semi-Annually

n. Emergency Lighting
   ● Quarterly

D. MDF EMERGENCY EQUIPMENT LOCATION

1. FIRE HYDRANTS
   a. Northeast side of building (Ward Street)
   b. East side of building (Willow Street)
   c. Southeast side of building (Mellus/Willow Streets)
   d. Southwest side of building (Mellus/Pine Streets)
   e. West side of building (South Street)

2. FIRE HOSES
a. Maintenance Shops
   • Emergency Shut Off: Food dry storage room next to kitchen.

b. Hallway next to Custodian’s Office
   • Emergency Shut Off: Food dry storage room next to kitchen.

c. M Module Program Room
   • Emergency Shut Off: 2nd floor hallway in closet next to T3 visiting room

d. T Module Program Room
   • Emergency Shut Off: In closet, single side, A Module sally port

e. A, B, C Module
   • Emergency Shut Off: In closet, single side, A Module sally port

f. Main hallway across from
   • Emergency Shut Off: Just inside the door of

g. Q Module Program Rooms
   • Emergency Shut Off: West mechanical room

h. Booking Desk
   • Emergency Shut Off: Inside the door of west mechanical room.

i. Q Module visiting
   • Emergency Shut Off: Closet at foot of room #1 Q Module visiting room.

j. 2nd floor hallway across
   • Emergency Shut Off: Closet at foot of stairwell to F Module visiting.

k. D, E Module Program
   • Emergency Shut Off: Inside D Module janitor room, D/E hallway.

l. F Module, Old Deputy
   • Emergency Shut Off: Inside D Module janitor room, D/E hallway
3. **FIRE ALARM BOXES**
   
a. **First Floor Locations**
   - Sally port to loading dock
   - Stairwell east side
   - Stairwell west side
   - Maintenance room
   - Boiler room
   - Intake
   - Escort inner sally port
   - Main Lobby
   - East elevator
   - West elevator

b. **Second Floor Locations**
   - Stairwell east side
   - Stairwell west side

c. **Third Floor Locations**
   - Stairwell east side
   - Stairwell west side

4. **PORTABLE FIRE EXTINGUISHERS**
   
a. 1A10BC dry chemical fire extinguishers are provided in each fire hose cabinet. Additional fire extinguisher locations are also listed.

b. **First Floor Location**
   - M Module, Deputy Station
     - Dry 2A10BC and 3A20BC
   - Q Module, Deputy Station
     - Dry 2A10BC
- T Module, Deputy Station
  - Dry 2A10BC
- Admin Office, Beside Door
  - Dry 3A40BC
- Courts Holding, Deputy Station
  - Dry 3A20BC
- Hall, Maintenance, Hose Cabinet
  - Dry 4A60BC
- Hall, East Storage, Hose Cabinet
  - Dry 4A60BC
- Hall, Main Courtyard & Q Area, Hose Cabinet
  - Dry 4A60BC
- Hall, Visitor Stairwell, Main Entrance
  - Dry 4A60BC
- Intake, Booking, Hose Cabinet
  - Dry 4A60BC
- Classification Office Area
  - Dry 3A20BC
- Kitchen, South End
  - Dry 2A10BC
- Kitchen, North Entry Door
  - Dry 40BC
- Laundry, North End
  - Water Pressure 2 2A
- Laundry, South End
  - Dry 3A40BC
• Courts, Mechanical Room, beside door
  • Dry 4A60BC
• Courts, Entrance, B-side door
  • Dry 3A20BC
• Courts, Entrance, B-side door
  • Dry 3A20BC
• Courts, Lobby, Between both Court doors
  • Dry 3A40BC
• Jury Room Hall, South end
  • Dry 3A20BC
• Boiler Room, South end
  • Dry 2A10BC
• East Mechanical Room, North end
  • Dry 2A10BC
• Switch Gear Room, South end
  • CO 2 5BC
• Operating Engineer Office, beside door
  • Halon 10BC
• Electronic Shop, beside door
  • CO 2 5BC
• Maintenance Shop, East wall
  • Dry 2A10BC
• Maintenance Shop, West wall
  • Dry 3A40BC
• Maintenance Shop, Welding cart
  • CO 2 5BC
- Admin Electrical Room, beside door
  - CO 2 5BC
- West Mechanical Room, beside door
  - Dry 3A40BC
- Seven (7) spares, East Mechanical Room
  - (5) Dry 3A40BC
  - (2) CO2 5BC

c. Second Floor Locations
- M Module, Visitor room, hose cabinet
  - Dry4A60BC
- M Module Office - 2nd floor - 2M21
  - Dry 3A20BC
- M Module, Storage Room
  - Dry 3A20BC
- Q Module, Storage Room
  - Dry 2A10BC
- Q Module, Visitor room 1, hose cabinet
  - Dry 4A60BC
- T Module, Visitor room 2, hose cabinet
  - Dry 4A60BC
- T Module, Storage Room
  - Dry 2A10BC
- Central Control, North end
  - Halon 10BC
- Computer Room, beside door
  - Halon 10BC
d. **Third Floor Locations**

- Hall, Central Control area, hose cabinet
  - Dry 4A60BC

- A Module, Visitor Room 3, hose cabinet
  - Dry 4A60BC

- A Module, Deputy Station
  - Dry 2A10BC

- B Module, Visitor Room 3, hose cabinet
  - Dry 4A60BC

- B Module, Deputy Station
  - Dry 2A10BC

- C Module, Visitor room 3, hose cabinet
  - Dry 4A60BC

- C Module, Deputy Station
  - Dry 2A10BC

- D Module, Visitor Room 4, hose cabinet
  - Dry 2A40BC

- D Module, Storage Room 3D10
  - Dry 2A10BC

- D Module, Control Room
  - Dry 2A10BC

- D Module, Control room
  - Dry 3A40BC

- D Module, Control Room
  - Water Stream WP 40

- E Module, Visitor room 3, hose cabinet
• Dry 4A60BC

• E Module, Deputy Station
  • Dry 2A10BC

• F Module, Deputy Station, hose cabinet
  • Dry 2A10BC

• F Module Nurses Station
  • Dry 2A10BC

• F Module, Storage Room, F-Iso
  • Dry 2A10BC

• F Module, Preaction Station
  • Dry 3A40BC

• F Module, Storage between rooms 2 & 3
  • Dry 4A60BC

• F Module, Storage between rooms 30 & 31
  • Dry 3A40BC

• F Module, Medical Director’s Office
  • Dry 2A10BC

• Electrical Room, beside door, East
  • CO 2 5BC

• Electrical Room, beside door, West
  • CO 2 5BC

• West Stairwell
  • Dry 3A40BC

e. Fourth Floor Locations

• A Module, Mechanical Room
  • Dry 2A10BC
• B Module, Mechanical Room
  • Dry 2A10BC
• C Module, Mechanical room
  • Dry 2A10BC
• D Module, Storage Room
  • Dry 2A10BC
• E Module, Mechanical Room
  • Dry 2A10BC
• E Module, Mechanical Room (4E04)
  • Dry 3A40BC
• East Stairwell
  • Dry 3A40BC
• Library, beside elevator
  • Dry 3A40BC

5. PREACTION STATIONS

a. FIRST FLOOR WEST

• Shuts off water flow to fire sprinkler heads located in:
  • West mechanical room
  • Armory
  • Vehicle sally port
  • Booking area
  • Courts holding
  • Transportation
  • Visitor lobby and bathrooms
  • Staff locker area
b. FIRST FLOOR EAST

- Weight room
- Classification
- Administration area, hallway and sally port

Shuts off water flow to fire sprinkler heads located in:
- Kitchen area
- DSWs office
- Custodian’s office
- Shop area
- East mechanical room
- Laundry
- First Floor Sally ports
- T Module Housing Unit
- Loading dock
- Kitchen supply store room
- Janitorial supply and commissary room.

c. SECOND FLOOR WEST

Shuts off water flow to fire sprinkler heads located in:
- CAS
- Central Control
- Computer room
- Visitor stairwells to F, M, E and D Modules
- All hallways second floor west side.

d. SECOND FLOOR EAST
• The room is identified by 10# dry chemical extinguishers Class a, b, c.
  • a sprinkler controls sign.

• Shuts off water floor to fire sprinkler heads in:
  • Assistant Division Commander’s Office
  • Accounting Office
  • Health Services office
  • Visitor stairwells to A, B and C Modules
  • Visiting rooms M & T
  • All hallways and other rooms second floor east.

e. THIRD FLOOR WEST
• Shuts off water flow to fire sprinkler head in:
  • Schools area
  • F, E & D Module hallways
  • Inmate services offices
  • D, E & F sally ports
  • Storerooms and electrical panel rooms on the third floor west.

f. THIRD FLOOR EAST
• Shuts off water flow to fire sprinkler heads in:
  • Library
  • Chaplain’s offices
- Storage room
- Mental Health Director’s office
- Storage room and sally ports for A, B and C

| REVISION DATE:       |
| REVIEW DATE: 11-18-19 |

| CHAPTER: Safety and Emergency Procedures | SUBJECT: MCDF Relocation and Evacuation Plan |
I. POLICY

A. All requests for assistance will be handled appropriately and according to type of request and priority.

B. Emergency assistance requests scan pen alarms and emergency panic alarms will be handled as emergency situations that will interrupt the normal operations of the facility.

C. Deputies will respond to all alarms and requests to render necessary aid and maintain facility security.
F. RADIO DURESS, PANIC AND SCAN ALARMS

2. Central Control will announce all alarms by depressing the tone button one time and announcing, “Attention in the Facility: 10-33 Duress alarm at (location).”
I. POLICY

A. The Custody Services Bureau will maintain security and control of inmates during a power failure and to make every effort to ensure the safety of visitors, staff and inmates.

B. Each facility will have equipment necessary to maintain essential lights, power, and communications in an emergency.

C. All power generators shall be tested weekly and other emergency equipment and systems shall be tested for effectiveness on a quarterly basis.

D. Equipment will be repaired or replaced if necessary.

E. Emergency equipment such as standby lighting, batteries, firefighting apparatus, communication systems and alarms shall be checked at least quarterly to ensure their reliability.

II. DEFINITIONS

A. POWER FAILURE: Any loss or break in electrical service.

B. EMERGENCY POWER GENERATOR: Back up power source in event of power failure.
I. POLICY

A. Disturbances/riots, violent attacks on staff or inmates, and hunger strikes will be handled immediately to ensure the control and de-escalation of violence, to prevent personal injury to staff, volunteers and inmates, prevent property damage to the facility, and to minimize negative impacts on the general operation of the facility.

II. DEFINITIONS

A. DISTURBANCE/RIOT: Any tumultuous acts by inmates to cause willful disorder and confusion.

B. MINOR DISTURBANCE: A disturbance, involving a minimal number of inmates, which can easily be controlled when immediately acted upon.

C. MAJOR DISTURBANCE: A disturbance, involving numerous inmates, where the situation requires additional resources from outside the facility.

D. HUNGER STRIKE: An act, of one or more inmates, refusing to eat as a protest for or against a cause or demand.
B. PREVENTION

1. Disturbance in a detention setting can often be prevented by being able to interpret and act on changes in the jail atmosphere and/or behavior patterns of the inmates.

2. It is better to prevent, rather than react to, behavior which can quickly escalate. Some of the things staff can do to prevent disturbances within the facility are:
   a. Create and maintain good communications with all inmates regarding plans, programs and procedures.
   b. Staff members who are knowledgeable of policies and procedures create trust and confidence from inmates.
   c. Well informed staff members are better able to relay appropriate information to the inmates in a timely manner.

3. Open communications between staff members and supervisors will increase the reporting of unrest among the inmates.
   a. Staff briefings will include a reasonable time allotment for all staff members to contribute information to the group and the supervisor.
   b. Supervisors will make themselves available to staff members regularly.

4. Morale among inmates is maintained in a variety of ways. The objective in maintaining morale is to develop a feeling that the inmate's basic needs are being adequately met in such matters as food, clothing, medical attention, etc. Equally important to the inmates is a sense of being treated fairly and justly; having the opportunity to appeal to authority in the righting of grievances; and a belief that their basic welfare is a matter of concern to management.

5. The administration of fair and even-handed discipline is fundamental to maintaining an orderly facility. This cannot be accomplished if some staff
members are inexcusably lax and others are needlessly harsh. Rules, regulations, policies and procedures for the administration of discipline must be specifically spelled out. All staff and inmates must be informed of the policies.

6. Prompt and positive handling of inmate complaints and grievances is essential in maintaining good morale. A firm "no" can be as effective as granting a request in reducing an individual's tensions, particularly if the inmate feels the problem has been given genuine consideration by the appropriate officials and if given a reason for denial. An individual can live with "yes" or "no" but a "maybe" or "perhaps" creates frustration. Equivocation and vague answers create false hopes and increase a person's anger when nothing is done.

7. Food complaints are one of the primary causes of disturbances in a detention facility. Facility food must maintain a proper diet, be wholesomely prepared and attractively served in clean surroundings. It is important that cold food is served cold and hot food is served hot.

8. Clothing is another issue where many complaints are heard. Ill fitting clothing, improperly laundered, poor issue or exchange procedures could be very costly to the facility. It is important that inmates be provided the appropriate clothing.
E. HUNGER STRIKE

1. In the event of a hunger strike by inmate(s), the shift supervisor or Facility Commander will attempt to resolve the situation by communicating with the inmate(s) to determine the problem and a possible solution.

2. Should the hunger strike continue for more than 24-hours, medical staff will be advised and will check the physical well-being of the inmate(s) daily, to determine medical care needed.

3. All suspected hunger strike situations shall be documented in an incident report.

I. POLICY

A. Detention Facility staff will handle multi-casualty/disaster incidents in an expedient and professional manner to ensure the safety of staff and inmates and to prevent damage to the Facility.

II. DEFINITIONS

A. Multi-Casualty/Disaster Incident - An emergency incident involving any number of injured persons which may over-utilize the rescue and medical resources of the responsible agencies within a portion of the County. An incident could be a fire, earthquake, bomb, epidemic, riot or mass arrest.

B. External Facility Disaster - An incident which affects both a facility and the surrounding community.

C. Internal Facility Disaster - An incident which occurs in and is isolated to a Detention Facility.

D. Triage - The process of sorting casualties on basis of the urgency and type of condition presented.

E. Incident Commander - The highest ranking Sheriff’s Department Officer at the scene. He/she may delegate this responsibility to a more qualified Law Enforcement Officer. In the absence of a Law Enforcement Officer from the jurisdiction in which the incident occurs, the line of authority will be any other Law Enforcement Agency, or the Fire Department in whose area the incident occurs.

F. Command Post - The location designated by the Incident Commander from which all incident command functions are directed.

G. Medical Advisory Alert - A "warning" communicated to Sheriff's Central Dispatch by the Incident Commander/Shift Supervisor, or designee, that signifies that an incident has occurred or a condition exists which may tax the resources of the affected area. Based
upon information received from on-scene personnel Sheriff's Central Dispatch will begin Multi-Casualty Plan implementation protocol.

III. PROCEDURE

A. DECLARATION OF MULTI-CASUALTY INCIDENT

1. The declaration of a multi-casualty incident is the responsibility of the Incident Commander. The declaration will follow the Medical Advisory Alert.

2. Specific assignments and responsibilities under the Incident Command System (ICS) are outlined in the County MULTI-CASUALTY PLAN, a copy of which is kept in Central Control, the Operations Sergeant's Office, MCDFs Facility Commander's Office and Division C.A.S. Updates and answers to questions can be channeled through OES - County Office of Emergency Services. The primary County coordinating agency for response to earthquakes, floods, hazardous materials incidents and other major emergencies. OES provides off-site coordination and resources for casualty identification and tracking, and releasing of post incident public information.

3. First-in units—law enforcement, fire and ambulances—will function as they would in their normal day-to-day operations. In addition, they will request additional resources and immediately begin triaging all casualties.

B. TRIAGE OVERVIEW

1. Initial casualty triaging is to be done by first-in responders at the scene of the incident with minimal casualty movement.

2. Initial triage will take priority over initial emergency care treatment.

3. All casualties are sorted according to the seriousness of the injury and tagged to establish priority of treatment and transportation.

4. Triage categories will be identified by colored tags:

   a. White tag - D.O.A. (Dead on Arrival)

   b. Red Tag - Major injury

   c. Green Tag - Minor injury

5. Personnel performing triage are to give a triage examination based on the "start" method and attach the appropriate colored tag.

   a. They are not to fill out the tags.

6. The emergency care administered by triage teams is to be restricted to assisting in maintaining an airway, controlling severe hemorrhaging and maximizing perfusion of heart, lungs and head.

7. Personnel assigned to treat casualties are to give a secondary examination and fill
out the triage tag on all persons deemed triaged casualties.

C. CONDUCTING TRIAGE

1. The mission on initial triage will be assigned to first-in responders (custody or medical staff).

2. All persons involved in the incident are to be quickly examined and tagged using the three categories of (1) D.O.A., (2) Major, and (3) Minor.

3. Non-ambulatory casualties are to be triaged where they lie, unless they are in an unsafe area which requires their immediate movement.

4. Triage tags of the appropriate color are to be attached to casualties near the head.

5. Initial triage personnel will stay with a casualty only to administer the necessary critical care treatment of:
   a. Opening an obstructed airway
   b. Positioning unconscious casualties in the coma position (Placing them on their side). Use cervical spine precautions on all unconscious persons.
   c. Stopping arterial bleeding.
   d. Administering CPR if staff is available (internal incidents).

6. Medical staff will be responsible for tagging casualties.

7. At the completion of triage, triage teams are to change their assignment to treatment teams or become treatment teams as indicated.

8. Paramedics will provide additional treatment during internal Facility disasters.

9. Priority for transportation will be given to all casualties tagged red who have received a secondary examination.

10. If a casualty triage category is wrong or changes during treatment, the original tag that has not been filled out is to be removed and discarded and a new tag attached.

11. If the triage tag has been filled out by a treatment team and the triage category changes, it is not to be removed but folded in half. A new triage tag indicating the new triage category is to be attached.

D. INITIAL TRIAGE AREAS

1. The triage location will vary from site to site in the Facility.

2. It shall be up to the Operations Supervisor to assess the extent of damage to the physical structure and make a determination as to the area suitable for treatment, yet physically safe for occupancy.
E. EXTERNAL FACILITY DISASTER

1. In the event of a major disaster involving activation of the Contra Costa County Emergency Operations Center, medical incidents would be prioritized by the Medical Operations Center with ultimate authority from the Director of Emergency Services.

2. Medical priorities would be based upon an assessment of medical needs and available resources.

3. In injury disasters that extend beyond the physical limits of the Facility, but include the Facility; notify the Office of Emergency Services of the extent of damages and involvement and number of injuries.

4. The medical staff in the Facility will triage and treat injuries to the fullest extent of in-house capabilities.

5. If additional custody personnel are required at the location of the incident, it will be the Operations Supervisor's option to lock down the unaffected portions of the Facility and have the second Housing Unit Deputy respond to the incident.
I. POLICY

A. In an emergency, when it has been determined that the facility is uninhabitable, inmate housing and associated services will be provided at one or more alternate locations for control and continuous custody of the inmates.
I. POLICY:

A. A comprehensive Employee Injury and Illness Prevention Program (IIPP) shall be developed in order to promote safe work practices, provide a safe work environment and ensure compliance with applicable health and safety regulations within the Contra Costa County Sheriff’s Custody Service Bureau.

B. The program shall provide for the identification and control of hazards, the determination of accident causes and the instruction of employees in safe work practices.

II. PROCEDURE

A. All workers, including managers and supervisors, are responsible for complying with safe and healthful work practices.

B. The Custody Services Bureau Assistant Sheriff will ensure that all workers comply with these practices by including one or more of the following practices:

1. Informing workers of the provisions of the IIPP.
2. Evaluating the safety performance of all workers.
3. Recognizing employees who perform safe and healthful work practices.
4. Providing training to workers whose safety performance is deficient.
5. Disciplining workers for failure to comply with safe and healthful work practices.

C. The Division Captain shall be responsible for establishing an Employee Injury and Illness Prevention Program (IIPP) within their facility.

D. The IIPP may be reviewed by all department employees.

1. The IIPP may be located in each facility’s CAS or administrative office.
E. The IIPP shall conform to OSHA Title 8 guidelines as well as all other applicable Health and Safety Codes and Regulations.

F. The IIPP shall contain a description of the program authority, responsibility, organization and administration and shall include the following minimum components.

1. Creation of a Site Safety Committee to administer the IIPP
2. Hazard Communication and Training
3. Evaluation of Workplace Hazards
4. Investigation of Employee Injuries.
5. Mitigation of Unsafe or Unhealthy Conditions
6. Evaluation of Inspection Reports
7. Employee Compliance System
8. Records Keeping and Documentation of Employee Injuries/Accidents

G. The IIPP shall contain such optional components as are deemed necessary to ensure the safe and healthy maintenance of the workplace. Examples of optional components that may apply are:

1. A Respirator Protection Program
2. Blood borne Pathogens Plan
3. Infectious Disease Plan
4. Hazard Communication Program

H. The IIPP shall be reviewed on an annual basis by the Site Safety Committee and shall be revised as necessary to ensure that its content is accurate, timely and effective.
I. POLICY

A. The Custody Services Bureau will implement and maintain an up-to-date Master Products inventory and their locations on Material Safety Data Sheets (MSDS), and appropriate training within each work unit as required by the Hazardous Substances Information and Training Act of 1983, and as specified in the Sheriff’s Office Hazardous Communication Program, which will be documented and reviewed semi-annually. The review will be maintained with the (MSDS) Master file.

B. Disposal of all hazardous/infectious liquid and solid waste shall conform to the appropriate federal, state and local ordinances.

II. DEFINITIONS

A. FLAMMABLE MATERIALS: Liquids with a flash point below 100°F.

B. TOXIC MATERIALS: Substances that through chemical reaction or mixture can produce possible injury or harm to the body by entering through the skin, digestive tract, or respiratory tract (e.g., zinc chromate paint, ammonia, chlorine, antifreeze, herbicides, pesticides).

C. CAUSTIC MATERIALS: Substances that can destroy or eat away by chemical reaction (e.g., lye, caustic soda, sulfuric acid).

D. HAZARDOUS WASTE: A waste or combination of wastes, which because of its quantity, concentration, or physical, chemical or infectious characteristics may either:

   1. Cause, or significantly contribute to, an increase in serious irreversible or incapacitating reversible illnesses.

   2. Pose a substantial present or potential hazard to human health or environment when improperly treated, stored, transported, or disposed of, or otherwise managed.

E. INFECTIOUS WASTE
1. Infectious waste is considered to be the following:

a. Laboratory wastes include cultures of etiologic agents that pose a substantial threat to health, due to their volume and virulence.

b. Pathologic specimens, including human or animal tissues, blood elements, excreta and secretions that contain etiologic agents, and attendant disposable fomites.

c. Equipment, instruments, utensils, food containers and other disposable materials that are likely to transmit etiologic agents from the rooms of inmates that have been isolated because of suspected or diagnosed communicable disease.

d. Human dialysis waste material including arterial lines and dialyzed membranes.

e. Any other material that in the determination of the facility medical staff, presents a significant danger of infection because it is contaminated with, or may reasonably be expected to be contaminated with, etiologic agents.

F. ETIOLOGIC AGENTS: A type of microorganism, helminth, or virus that causes, or significantly contributes to, the cause of increased morbidity or mortality of human beings.

III. PROCEDURE

A. The following procedures will be used to assure that employees of the Custody Services Bureau and contractors working at Contra Costa County Detention Facilities will be informed about the properties and hazards of chemical substances present at both facilities.

1. Hazardous Substance Control

a. All hazardous substances stored or used at any Contra Costa County Detention Facility are to be cleared through the Facility Detention Service Worker Supervisor prior to such storage or use.

b. A Material Safety Data Sheet (MSDS) must accompany each hazardous substance that is to be stored or used at Contra Costa County Detention Facility.

- All Material Safety Data Sheets (MSDS) will be forwarded to Bureau Administrative Services for entry into a facility hazardous material information log.

- The CAS Specialist will forward the MSDS back to the appropriate department head.

- General Services Department Safety Officer.
Detention Services Worker Supervisor.

Medical Staff Director

The department head shall be responsible for placing the MSDS in a master log.

The master log will include information pertaining to the location of all hazardous material/substances.

A copy of the (MSDS) will be submitted to the Fire Department.

The Master file will include a comprehensive up-to-date list of emergency phone numbers i.e. Poison Control and Fire Dept.

Department employees shall be permitted viewing access to these records.

B. LABELS

1. Containers of products that contain hazardous substances will not be accepted from the supplier unless they are labeled with the name of the hazardous substance and appropriate hazard warnings.

2. When a product is transferred to a portable container in the workplace, the portable container must also be labeled. The label on the portable container may be handmade so long as it is legible and shows the product name as shown on the original container, has an MSDS, and lists the hazards associated with the product.

3. The responsible person within each work unit or, in their absence, a supervisor is responsible for assuring that containers, original and portable, are properly labeled.

C. INVENTORY CONTROL

1. All flammable, toxic and caustic materials received into the facility shall be inventoried by the requesting unit (Detention Service Workers, GSD, etc.).
   a. Inventory control shall consist of accurate recording of amount received by date and disbursement by amount and location receiving the substance.

2. All storage locations of flammable, toxic and caustic substances (storerooms, cabinets, lockers, etc.) shall maintain an accurate inventory control sheet showing amount stored therein.

D. TRAINING

1. The Sheriff’s Office Safety Officer will develop a training outline that complies
with the Sheriff’s Office Hazard Communication Program.

2. During employee orientation, new employees shall be given group instruction from the outline on the purpose, content and use of MSDS.

3. New employees will also be required to read and be familiar with the current Hazardous Substance Policy and Procedures.

4. Annual updates will be provided at the shift level by the training staff at each facility, following the outline used for new employees.

E. INMATE ACCESS TO HAZARDOUS SUBSTANCES

1. All flammable, toxic and caustic materials will be stored in secure areas that are inaccessible to inmates, in accordance with all applicable laws and regulations.

2. Inmates shall not possess or use such items unless under the constant supervision of qualified staff.

F. HAZARDOUS LIQUID WASTES

1. All hazardous liquid waste shall be stored in appropriate containers and removed from the facility by a state registered material or waste hauler, under the direction of the GSD plant manager.

   a. Responsibility for, and title to, all hazardous liquid wastes remains with the county until the chemical composition of the liquid has been changed to render it harmless by either burial or incineration.

G. HAZARDOUS SOLID WASTE:

1. All hazardous solid waste shall be placed in appropriate double-bagged, marked containers and removed from the facility by a state registered material or waste hauler, under the direction of the GSD plant manager.

   a. Hazardous solid waste may be buried.

H. INFECTIOUS SOLID WASTE:

1. All infectious solid waste shall be double-bagged in appropriately marked bags and removed from the facility by Health Services Division (HSD).

2. Health Services Division is responsible for the disposal of all contaminated medical waste, and the appropriate disposition of contaminated linens and/or trash pursuant to contractual agreement.

3. Health Services Division is also responsible for the disposal of used protective disposable kits. Personnel using the protective kit shall notify HSD upon removal so that disposal can be accomplished in a timely manner.
I. FLAMMABLE STORAGE/WASTE:

1. Flammable liquids shall be stored in appropriately marked fire-safe cabinets.
   a. An inventory control sheet shall be maintained for all flammable liquid storage locations.

2. Flammable refuse (rags, etc.) shall be stored in appropriately marked, covered, fire-safe containers.
   a. The containers shall be emptied and cleaned daily.
I. POLICY

A. All staff assigned to the Custody Services Bureau shall receive annual training on the proper use of disposable respirators.

B. Such training shall include a respirator fit test and information on when, where and how to obtain a respirator when such is needed.

II. PROCEDURE:

A. In order to provide staff protection from contact with airborne pathogens, disposable respirators will be readily accessible in all Sheriff’s detention facilities.

B. Use of respirators is required whenever contact with airborne pathogens is possible and where engineering controls such as ventilation and negative airflow isolation and/or administrative controls limiting are not adequate to ensure protection.

C. NIOSH/MSHA approved (Type N-95) quarter face, negative pressure, air purifying disposable particulate respirators shall be utilized. A sufficient variety of sizes and manufacturers brands may be provided to ensure that a comfortable and adequate fit are possible for all staff.

D. Staff shall receive annual training in the acquisition and use of the respirator. Such training shall be conducted during annual TB testing process and shall include the following components:

1. A health status assessment interview shall be conducted to ensure that each staff member is physically able to work while wearing a respirator.

   a. The health status assessment shall be documented and shall be placed in each employee’s division file.

   b. If concerns arise as a result of the assessment, the employee shall be referred for a medical evaluation prior to being fit tested and approved to use a respirator.
2. A qualitative fit test of each staff member shall be conducted by trained and qualified personnel.
   
a. The fit test shall include the opportunity to wear the respirator in a normal air environment, proper placement and fit checking, the verification of a tightly fitting face piece and odor threshold screening with isoamyl acetate.

3. Information shall be provided to staff on the capabilities and limitations of the respirator, where they can be obtained, and use and care of the equipment.

E. Documentation of the Medical Evaluation, Fit Test and Respirator Training shall be accomplished on the attached form and shall upon completion, be filed in the employee unit files at each jail facility.
I. POLICY

A. Adoption of the most current CDC (Center for Disease Control) guidelines as a basis for isolation precautions and infectious waste disposal provides the most reliable means to prevent the transmission of disease between people.

B. Since medical history and examination cannot reliably identify all persons infected with HIV (Human Immune-deficiency Virus) or other blood born pathogens, blood and body fluid precautions should consistently be used for all people.

II. DEFINITIONS

A. Body Fluids - Blood, semen, drainage, pus, saliva, mucus, urine, feces.

III. PROCEDURE

A. CUSTODY STAFF

1. Use gloves when touching:

a. Blood and body fluids

b. Mucous membrane

c. Non-intact skin

d. Items or surfaces soiled with blood and body fluid

e. When responding to an emergency call where there is a possibility of contact with blood.

2. Use a N95 Rated mask for suspected or diagnosed infectious respiratory disease, i.e., active tuberculosis. A private room will be required until the inmate is considered not infectious.
a. Masks are to be worn by staff inside the room.

b. The inmate is to wear a mask when leaving the room.

3. CPR Devices

a. Use CPR masks with protective exhalation valves for CPR. They are stored in blue cases in locked boxes on the housing unit - one near the Deputy Station and two in upper tiers.

b. Medical Services supplies clean masks for the modules.

4. Handwashing

a. Hands should be washed immediately and thoroughly if contaminated with blood or body fluid for a minimum of (15) fifteen seconds.

b. Wash even after removing gloves with the special soap provided by Health Services.

5. Searches

a. Gloves should be worn during pat searches to prevent possible infestation with lice, scabies or fleas.

6. Living Area Searches

a. Wear gloves and visually inspect all areas before using hands. Move slowly.

B. DETENTION SERVICE WORKERS

1. Disinfectants and chemical germicides:

a. Commercially available disinfectants and germicides are effective in inactivating HIV.

b. Those products that are approved for "hospital disinfectants" by EPA are tuberculocidal can be used for disinfecting and decontaminating surfaces and instruments.

c. Large spills can be flooded with a disinfectant and then cleaned up.

C. Housekeeping:

1. Environmental surfaces such as walls, floors and other surfaces are not associated with the transmission of HIV infection.

2. Cleaning schedules by module workers:

a. Upon inmate transfer or release
b. When soiling occurs

c. Regular routine

3. Use the disinfecting solution issued by Support Services.

D. Laundry

1. Risk of disease transmission is considered negligible by CDC and therefore "contaminated linen" designation is no longer needed.

2. All soiled linen will be placed in laundry carts on each module.

3. Linen contaminated with lice, scabies and/or fleas is to be red-bagged with a water dissolvable inner liner.

4. Laundry workers should wear gloves and an apron when transferring dirty linen into washing machines.

E. Kitchen

1. Risk of disease transmission is considered negligible by CDC, therefore disposable dishes and utensils are not necessary. All germs are killed by the 180 degree dishwasher water.

2. Kitchen workers are to wear gloves and hairnets when preparing food and when handling dirty dishes.

3. Kitchen workers are to be monitored by the Housing Deputy and kitchen staff. Inmates are to be infection free, i.e., no diarrhea, vomiting, fever, cold, open sores, etc.

F. Infective or Contaminated Wastes

1. CDC studies indicate that there is no evidence that most hospital waste is any more infective than residential waste or that hospital wastes cause disease in the community as a result of improper disposal.

G. Plumber

1. Precautions should be taken with the following items when there is a possibility of contact with blood or body fluids:

   a. Gloves

   b. Eye wear - plastic goggles for extreme splash

   c. Apron or coveralls as needed

   d. Mask for extreme splash
e. Trash infected blood and body fluids are to be put in a red bag labeled "trash".

I. POLICY

A. The Custody Services Bureau shall ensure that all inmates and detainees are safely transported while in the custody of the Office of the Sheriff. In the event of an emergency (Escape, medical emergency, facility evacuation etc), staff will utilize relevant policy and procedure and sound officer safety principles to ensure public safety, inmate/detainee safety and security and staff safety and security.

II. PROCEDURE

A. Emergency Detection / Response

1. While transporting ICE Detainees, staff will remain vigilant for any threat to the safety and security of all detainees.

2. If an emergency is detected (escape attempt, medical emergency, traffic collision) staff will take steps consistent with sound officer safety principles and existing policy to mitigate the emergency.

3. Once the emergency is mitigated, staff will notify Sheriffs Dispatch of the following:
   b. Amount and type (medical, mechanical etc) of assistance needed, if any.
   c. Any threat or danger to the public or responding personnel.

4. Once the appropriate assistance has arrived and the emergency has stabilized, staff will seek guidance from supervisors as to the disposition of the detainees.

5. The incident will be documented as needed.
B. Supervisors and Managers Responsibilities

1. Supervisors and managers will consider the following concerns when resolving transportation emergencies:

   a. Vehicular escorts if needed.
   
   b. Additional personnel as needed.
   
   c. Mechanical assistance as needed.
   
   d. A replacement vehicle if required.
   
   e. Notification of appropriate allied agencies.
   
   f. Consideration of alternate housing.
   
   g. Notification of ICE as appropriate.
I. POLICY

A. All information contained within the Facilities computers is confidential.

B. Staff authorized to use facility computers will adhere to all Sheriff’s Office policies regarding the release of information.

C. Unauthorized personnel shall not be permitted to view information that is derived from or displayed on facility computers.

II. PROCEDURE

A. ACCESS/SECURITY PASSWORDS

1. Only authorized personnel will be allowed to access information from Detention Facility Computers.

2. Access to facility computers will be gained through employee security passwords.
   a. Employees are responsible for the security of their personal password.
   b. If it any time an employee feels that the security of their password has been compromised the employee shall change their password as soon as possible.

B. COMPUTER ENTRIES

1. Any use of E-Mail, Instant Messaging, and /or entries into JMS shall be in accordance with the following CCCSO Policy and Procedures:
   a. 1.05.43, Sheriff’s Office Propriety and Decorum
   b. 1.05.44, Courtesy and Bearing
   c. 1.07.54, E-mail and Internet Access.
C. COMPUTER SYSTEM INTEGRITY

1. No personnel shall be permitted to add or remove software or hardware without the express written permission of the Technical Services Division.
   a. Addition of software to access Internet services, etc. is a direct violation of Sheriff’s Policy and could cause significant damage to Sheriff’s Office Local Area Networks.

2. No Deputy or civilian employee will teach any unauthorized person the operation of the computer.

3. No inmate (including inmate workers) will be allowed in any area having a computer terminal unless accompanied by staff or while being interviewed by a Deputy or Medical/Mental Health staff member.

D. PRIVACY AND SECURITY OF INFORMATION

1. Deputies working their assigned locations will not allow inmates to congregate around or lean on their desk while information about other inmates is displayed on their computer screen.
   a. All information displayed on the computer screen is confidential and inmates will not be allowed to view this information.

2. Personnel must close out any information displayed on their computer screen before leaving their assigned workstations.

null
I. POLICY

A. All personnel assigned or visiting the Custody Services Bureau as a condition of their professional duties, will display an authorized CSB photo badge or CSB visitor badge prior to entering any security area of the detention facility.

B. Social Visitors visiting inmates do not fall under this policy or process and shall never be issued a CSB badge. For social visitor procedures refer to CSB Policy 2.17.09.

II. DEFINITIONS

A. APPROVED IDENTIFICATION: A Contra Costa County Sheriff’s Office badge or a state, county, city department-issued identification card containing the name, picture and signature of the individual for whom it was issued and authorizing person’s signature.

CSB PHOTO BADGE: A jail security badge issued by CSB Custody Administrative Services (CAS) to authorized sheriff’s office and contracted custody employees, which grants the employee facility access, and indicates the employee is a full-time or part-time employee, permanently assigned to work in the CSB facilities.

B. CSB VISITOR BADGE: A jail security badge issued by Sheriff’s Office Custody Staff to a visiting member of the sheriff’s office, sheriff’s contracted service, vendor, or other authorized person requiring access to the jail for a professional purpose who do not fall within the scope of section (B).

III. PROCEDURE

A. CSB BADGE DESIGNATION, DISPLAY AND ISSUANCE

1. 1) All CSB Photo badges and 2) Visitor badges for Martinez and West County Detention Facilities are color-coded. Colors are used to designate an employee or visitor’s service category and type of access into the facility:
2. CSB badges will be displayed prominently to the front of the outer clothing approximately chest high.

3. Deputies will challenge all non-uniformed persons without properly displayed badges or those who are in an area other than what is indicated by the color-coded.

4. Any violation that cannot be resolved immediately at the location will be referred to a Shift Supervisor.

5. Off-duty personnel shall check-in with the Lobby personnel prior to entering the security area of the facility, unless going to or from a work assignment at the facility.
C. CSB VISITOR BADGE ISSUANCE

1. Visitor badges are issued by custody staff to sheriff’s office personnel, contract employees and professionals visiting the facility in the course of business.

2. A Visitor badge can only be issued once approved identification is provided and their access has been verified and authorized.

3. Custody staff issuing the visitor badge will:
a. Obtain and retain approved identification, such as a state, county, or city-issued agency photo identification card, driver’s license, California State Bar card, PI card, etc.

b. Verify the visitor is authorized to enter the facility by referring to the facility clearance list, court order, official visitor status, or written approval from the facility commander or designee.

c. Certain classes of Official Visitors (i.e.: Attorneys, Law Enforcement Officers investigating a case, Parole and Probation Officers) may not be found on the clearance list but are authorized access upon showing their official identification.

d. Provide the visitor with the correct color-coded visitor badge (MDF & WCDF only). The visitor will have their approved identification returned to them when leaving the facility once they have returned their issued visitor badge.

e. Ensure the visitor’s log has been completed with the following information:

   • Name
   • Number of pass being issued
   • Affiliation, Department, or Company
   • Name of inmate being visited (if applicable)
   • Authorized location of visit
   • Time pass was issued
   • Time pass was returned/Visitor time out

IV. VISITOR SERVICE CATEGORY ACCESS PROCEDURES AND BADGE DESCRIPTIONS

A. CONTRA COSTA SHERIFF’S OFFICE VISITOR

1. Sheriff’s Office personnel only.

2. May access facility unescorted.

3. Visitor must have permission from the housing unit deputy prior to accessing the housing unit.
B. OFFICIAL VISITORS

1. The attorney of record on an active criminal case, California attorneys working in their official capacity (with court documentation), “Out-of-State” attorneys practicing immigration law or law students identified on EIOR 27 or 28 presenting a valid copy, California licensed medical doctors, psychiatrists, psychologists, Active law enforcement officers conducting investigations, Active Probation and Parole Officers in the performance of their duties, and Public Defender Investigator (Level II only).

2. Must be escorted through the facility by Sheriff’s Office staff.

3. Afforded unscheduled contact visits with inmates any time (dependent on emergent and operational needs of the facility).
C. PROFESSIONAL VISITORS

1. Public Defender Investigator I, Private Investigators, Legal Runners, Agents working on behalf of the government or the court and Notaries.

2. Must be escorted through the facility by Sheriff’s Office staff.

3. Afforded unscheduled non-contact visits during regular social visiting hours (EXCEPT NOTARIES).

4. Notaries must schedule an appointment during designated days/times 24 hours in
D. OUTSIDE LAW ENFORCEMENT AGENCY VISITOR

1. Law enforcement officers that are guests of CCCSO facility staff.

2. Must be escorted throughout the facility by CCCSO facility personnel.
E. MEDICAL VISITOR

1. Medical employees only

2. Must be escorted throughout the facility by health services staff assigned to the facility.

3. May access the facility unescorted with prior approval of the Facility Commander and/or as designated by the clearance list.

4. Visitor must have permission from the housing unit deputy prior to accessing the housing unit.
F. MENTAL HEALTH VISITOR

1. Mental Health personnel only

2. Must be escorted throughout the facility by health services staff assigned to the facility.

3. May access the facility unescorted with prior approval of the Facility Commander and/or as designated by the clearance list.

4. Visitor must have permission from the housing unit deputy prior to accessing the housing unit.
G. MAINTENANCE SERVICES VISITOR

1. GSD, DOIT and Outside Maintenance employees only

2. Must be escorted by Custody or GSD Staff.

3. May access the facility unescorted with prior approval of the Facility Commander and/or as designated by the clearance list.
4. Visitor must have permission from the housing unit deputy prior to accessing the housing unit.

H. SCHOOLS VISITOR

1. Office of Education personnel only.

2. Must be escorted throughout the facility by Custody or Schools staff assigned to the facility.
3. May access the facility unescorted with prior approval of the Facility Commander and/or as designated by the clearance list.

4. Visitor must have permission from the housing unit deputy prior to accessing the housing unit.

I. INMATE PROGRAMS & INDUSTRIES VISITOR
1. Chaplain, Library, Engraving and Frame Shops

2. Must be escorted throughout the facility by Custody staff or the host program employee assigned to the facility.

3. Visitor must have permission from the housing unit deputy prior to accessing the housing unit.

J. IN-CUSTODY DEATH VISITOR

1. County Employees conducting an in-custody death investigation.
K. MARSH CREEK DETENTION FACILITY PHOTO AND VISITOR BADGES

1. All CSB photo badges for employees assigned to the MCDF will be color-coded to designate their service category.

2. The MCDF visitor badge will be issued to all service category visitors within the facility.

3. Must be escorted throughout the facility by the host program employee assigned to the facility.
4. Visitors must receive permission must by the housing unit deputy prior to accessing the housing unit.

VI. LOST OR MISSING BADGES

A. Staff members that have destroyed or lost their Photo badge must submit a memo to Custody Administrative Services (CAS) via their direct supervisor explaining the circumstances that require their badge to be replaced.

B. Staff members with photo badges will be required to check in and out of the facility as a visitor until a memo has been received and a new badge can be ordered.

C. Visitors that have lost their badge must report the lost badge immediately to custody staff so a thorough search can be conducted. Visitors who lose their visitor badge may be denied additional visiting privileges, until a memo has been submitted to CAS and/or the badge has been accounted for.
I. POLICY

A. Jail tours are intended to educate citizens about the role of law enforcement in Contra Costa County, promote good relations with the public, encourage transparency in county correctional practices, foster public engagement concerning the county’s criminal justice system, and deter criminal behavior.

B. These public benefits must be weighed against the impact caused to jail operations by touring groups. Such touring also raises safety issues for those touring, inmates, and staff, as Custody Deputies’ attentions may be diverted from observing the activities of inmates, to instead accommodating the needs of tour groups. Accordingly, the availability to tour detention facilities must be balanced against the custodial obligations of operating a secure jail facility.

C. Given these considerations, touring of detention facilities will be allowed on a limited basis and in accordance with the Procedures established in this policy.

D. This policy does not relate to official inspection groups, such as those on official business from fire authorities, OSHA, CalOSHA, jail facilities inspectors, police and correctional invitees on official business, health inspectors, contractors inspecting the facilities for purposes of bidding on open solicitations, or to individuals invited to visit a facility by the Sheriff.

E. All public tours are guided tours. All participants must stay within the sight and hearing of the guide at all times.

F. No person may tour jail facilities –

1. Who is under the age of 18 years.

2. Who is currently on parole or probation.
3. Who was an inmate in any of the Contra Costa County detention facilities within two years of the tour date.

4. Who has a currently incarcerated family member, friend, associate, or favorable acquaintance in any of the Contra Costa County detention facilities.

II. TOUR SCHEDULING AND APPLICATION.

A. In order to accommodate the goals of transparency and operational security, it is necessary to restrict public touring to scheduled dates and times. Tours shall be available once each quarter on a date and time set by the CSB Assistant Sheriff with the approval of the Sheriff or his designee.

B. No more than one tour group will be scheduled on any one available tour day. Tours shall run 1 hour, which may include a question period at the end. No more than five persons shall be permitted in any one tour group. Applications for the next available tour date will be accepted beginning on the Monday following the tour day in each quarter. The application window will close 45 days prior to the next available tour date to allow for processing. An “Interest List” for purposes of scheduling future tours will not be maintained. The timely submission of a tour application does not assure a place in a tour group. Applicants will be advised whether their applications have been granted approximately one month before the scheduled tour date. The Custody Administrative Services (CAS) Lieutenant at WCDF will be responsible for receiving and processing applications.

C. Each individual group seeking a tour appointment will be provided with a Tour Application Packet including:

1. A listing of rules (providing information concerning the prohibition of photography, contacts with inmates, acceptable dress/attire, contraband), upon which each applicant must sign that he or she has read and understood the rules and will comply with them;

2. A Release of Liability which must be signed by every person touring, both as an individual and as a member of a group. (This document discusses the inherent dangers of being in a detention facility, advises that the jail is a “No Hostage Facility,” and warns that the Sheriff’s Office will not negotiate with hostage takers.)

3. A personal information form will be checked on law enforcement databases including the National Crime Information Center (NCIC). All persons must bring with them to the tour the same Driver License (or other government issued picture ID card) as is listed on the submitted form (renewals are acceptable).

D. The Tour Application Packet (including the forms listed above) must be completed in its entirety at the time the application for a tour appointment is
submitted. (Tour Application Packets are available at the Reception windows in the lobbies of the MDF and WCDF.) Anyone wishing to tour MCDF may request a Tour Application Packet at either MDF or WCDF.

III. APPLICATION PROCESSING.

A. Within two weeks of the receipt of a timely application, the CAS Lieutenant shall review the application for completeness. If the application is not complete, it may be denied and returned to the applicant. The applicant may be permitted to correct deficiencies and resubmit his or her application.

B. If the application is complete, an NCIC/ARIES/RMS check shall be conducted on all tour applicants. If information is developed that would bar that person from joining a tour, he or she shall be informed that his or her application has been denied and advised of the basis for the denial. However, if the information shows a Want or Warrant on such person, they shall not be so advised and will be detained or arrested prior to the tour.

C. All completed and satisfactorily check applications will be forwarded to the CSB Assistant Sheriff 45 days prior to the next scheduled tour date, who shall recommend a rank ordering in the event that there are more applicants than can be accommodated under this policy. Such rank ordering will consider (a) county diversity (East County, Central County, and West County); (b) diversity by organizational type (educational, professional); (c) first time or previous tourer; (d) significance of tour to organizational purpose; (e) timeliness of applicant filing, and (f) such other considerations specified by the CSB Assistant Sheriff. In the event all considerations result in a tie, the earliest filed applications shall be given ranking priority.

D. The CSB Assistant Sheriff shall forward all acceptable, ranked applications (along with a brief description of the reasons for such rank ordering) to the Sheriff for review and approval. The Sheriff, or in his absence the Undersheriff, shall determine which applications to grant. If possible, this will be completed at least one month prior to the scheduled tour to allow for notification of the applicants.

E. Upon the return of the applications to CSB, the CAS Lieutenant at WCDF shall advise the successful applicants of the date, time, and location of their tour. The CAS Lieutenant shall also notify the unsuccessful applicants that their applications were not chosen after a comparative evaluation of applicants.

IV. TOUR PROCEDURES.

A. Approved individuals and groups will be instructed to arrive 30 minutes prior to the start of their tour. Identification will be checked and matched against the approved list for that tour. They will be instructed before the tour begins on touring rules and will be given time to leave prohibited or unnecessary items in their vehicles or in secured lockers if available. Anyone in inappropriate attire will be given the opportunity to add clothing as necessary, time permitting (refer to CSB Policy 2.17.09 “Official, Professional, and Program Visitors” Visiting
Rules – Dress Code). They will proceed into the facility through the metal detector (“Screening Station” and/or wand) in the facility lobby and will be subject to search. All individuals who have satisfactorily cleared this process will be issued a visitor identification card, which will be worn so that it is visible at all times. Individuals not complying with these instructions or refusing to be searched will not be allowed to tour. They will be advised that any disruptive behavior or violation of the rules will result in tour termination and removal from the facility.

V. TOUR CANCELLATION.

A. Tours can be cancelled at any time when required for the security of the facility, when in the opinion of the CSB Assistant Sheriff or his designee or the Officer of the Day, such cancellation is warranted. If a tour is cancelled on a security basis, it may be rescheduled by the CSB Assistant Sheriff outside of the standard schedule in Procedure I.A.
I. POLICY

A. The Custody Services Bureau will conduct regular inspections of all areas of the facility relating to food service, inmate housing, general site safety and fire/life safety.

II. PROCEDURE

A. The Facility Commander shall be responsible for conducting Facility Inspections on a weekly basis.

B. The Facility Inspection Team for MDF and WCDF shall consist of at least three (3) the following members:

1. Facility Commander and/or Operations Sergeant
2. CAS Sergeant and/or Custody Sergeant
3. CAS Specialist
4. GSD Representative
5. Housing Unit Deputy
6. Director of Food Services (Kitchen, Servery and Laundry areas only)

C. The Facility Inspection Team for MCDF shall consist of at least two (2) of the above listed members.

D. In the event of a Facility Inspection Team Members absence, a representative of equal or higher rank shall replace them.

E. The following areas will be inspected as applicable:

1. All housing units
2. Intake
3. Transportation
4. Clothing room
5. Kitchen and Servery area
6. Laundry area
7. Dry and chemical storage areas
8. Maintenance shops
9. Various program areas

F. Areas will be inspected for compliance in the following categories:

1. Cleanliness
2. Upkeep and maintenance
3. Compliance with local and state fire/life safety regulations
4. Compliance with local and state health and safety regulations

G. Reporting Discrepancies

1. Any discrepancies noted during the inspections shall be documented via General Services Department Work Order and/or Incident Report and the site survey inspection checklist.

   a. The Housing unit deputy shall be responsible for submitting the appropriate work order(s) to CAS by the completion of their shift.

   b. Facility Rules and Safety Violations

      • The Housing Unit Deputy shall be responsible for acting on and documenting any violations of facility rules via incident report.

      • The Housing Unit Deputy shall be responsible for acting on and documenting any officer safety hazards that have been identified.

      • Near miss accident reports are available at each facility’s safety bulletin board.

H. Area Supervisor Responsibilities

1. Area Supervisors, responsible for the inspected areas, shall ensure that all discrepancies are corrected in a timely manner.

I. Housing Unit Deputy Responsibilities
1. Housing Unit Deputies will ensure that no more than 10 inmate workers are selected to work and prepare the housing unit for inspection.

2. Housing Unit Deputies will ensure the following prior to arrival of the Facility Inspection Team:
   a. All inmate cells are clean, orderly and free of excess contraband.
   b. All deputy specific areas are in order and well maintained.
   c. All housing unit areas are clean and free of immediately preventable safety hazards.
   d. All Fire/Life Safety related areas are in proper working condition and free of hazards and/or obstructions.
   e. All work crewmembers are properly dressed and clean.

3. Housing Unit Deputies will ensure that all work crew members present themselves and remain in the servery or courtyard area while the Facility Inspection Team is on the housing unit unless directed otherwise.
   a. Work crew members shall place themselves in a single file line and shall be presentable within the following standard:
      - Gold or Gold and Green Top and pants
      - T-shirt
      - Socks
      - Sandals or shoes
      - Armbands
      - No hats
   b. Work crew members shall not speak during the inspection unless directed to by a Facility Inspection Team member

J. Housing Unit Scoring and Evaluation

1. The Facility Inspection Team will provide the Housing Unit Deputy with an overview of the inspection prior to exiting the housing unit.
   a. The housing unit deputy will be responsible for ensuring that all deficiencies have been properly addressed prior to completion of their shift. (i.e. GSD Work Orders, I/Rs, room searches, etc.)
b. Housing Unit Deputies will list all actions taken on the Housing Unit Inspection Form and place the form in the Facility’s CAS routing box in the mailroom.

- Deputies at MCDF will provide the information to the Facility Commander for routing.

2. The Facility Inspection Team will rate each housing unit based on the totality of the following conditions:

a. Housing unit order and cleanliness

b. Work Crew cell order and cleanliness

c. Work crew appearance and presentation

d. Work crews will not be penalized for areas outside their responsibility (i.e., a housing unit inmate’s cell condition, maintenance or safety hazards not created by the crew, etc.)

3. The Facility Inspection Team will rate the presentation on a scale from 1 to 10 (10 being the highest score possible).

a. Rating of 7 or above will allow the work crew the following privileges:

- Free time

  - MDF and MCDF

    From the end of inspection to 1800 hours

  - WCDF

    From the end of inspection to 1700 hours

- One (1) soda

- One (1) candy bar

- One (1) bag of popcorn (to be shared between work crew members)

b. Rating of 5 or 6 will allow the work crew the following privileges:

- MDF and MCDF

  - Free time from the end of inspection to 1800 hours

- WCDF

  - From the end of inspection to 1700 hours
c. Rating below 5 will result in no privileges being awarded.

4. DSW Staff will automatically provide all food items to all housing units unless they are otherwise contacted by CAS Staff.

   a. MDF and MCDF
      - Provisions will be made for no more than 14 work crew members.
      - Food items shall be delivered to the housing unit no later than 1500 hours.

   b. WCDF
      - Provisions will be made for no more than 10 work crew members.
      - Food items shall be delivered to the housing unit no later than Thursday at 1500 hours.

5. Documentation and Routing

   a. Copies of the Completed Facility Inspection Forms shall be routed to the following locations:
      - CSB Assistant Sheriff
      - Detention Division Captain
      - Director of Detention Division Medical Services
I. POLICY

A. In the event of an inmate escape or attempted escape, the Facility Commander will form an internal Escape Review Committee.

II. PROCEDURE

A. The Committee shall be composed of least three (3) Departmental members, one of which shall be the Facility Commander acting as Chairman.

B. The scope of the review shall be as follows:

1. Review reports submitted in conjunction with the escape/attempted escape.

2. Review the escape/attempted escape scene noting safety factors, equipment failure, procedural steps, security breaks, staffing levels, etc.

3. Review CSB Policy and Procedures, CCCSO Department Policy and Training Bulletins covering escapes/attempted escapes, noting appropriateness as to procedural steps, notification, etc.

4. At the discretion of the Facility Commander, the investigation may be deferred to another investigative body.

C. Upon completion of the review, the Committee shall adopt a finding consistent with one of the following dispositions:

1. Preventable.

2. Un-preventable.

3. Unresolved.

D. In the event the Committee adopts a finding of preventable or unresolved, the Committee, by majority consensus, may recommend further action be undertaken.
E. The Chairman of the Escape Review Committee shall submit such findings with a recommendation in writing to the Assistant Sheriff of the Custody Services Bureau, via chain of command.

I. POLICY

A. Facility Inmate Management Cards are to be used in addition to the JMS computers system to maintain inmate counts.

B. In the event of a computer failure, jail counts, inmate accountability and locations must be maintained.

C. Under no circumstances will inmates ever be allowed to possess a management card.

D. All filing, reconciliation, transportation, destruction, or storing of management cards will be done by Sheriff's personnel only.

II. PROCEDURE

A. ITR staff will make a management card for all inmates booked into Contra Costa County Sheriff's Detention Facilities.

1. The card must include the following information prior to the inmate being transferred to a housing unit:
   a. Full Name
   b. DOB
   c. Booking Number
   d. Photograph

B. ITR staff will transport the inmate to a housing unit once the booking process is completed.

1. The transporting deputy will ensure the management card accompanies the inmate and is delivered to the housing unit deputy.
C. Housing unit deputies will write only the inmate’s room assignment on the management card.

1. Classification shall be the only staff authorized to make any other notations on an inmate’s management card.
   a. This includes classification hazard codes and EIFs.

D. Disparaging comments or symbols, unauthorized placement of hazard codes or any other marks that deface the inmate’s management card is expressly forbidden.

E. Custody staff will exercise every precaution to prevent any inmate from viewing any information on any Inmate Management card.

F. The housing unit deputy will file the management card in a central location with all cards of that particular housing unit.

G. When inmates go to court or out to appointments, the inmate’s management card will follow the inmate.

H. If an inmate is bailed or released from their housing unit, a deputy will deliver both the inmate and management card to release.

1. In the event Operations staff is not ready to release the inmate, the inmate and management card shall be taken to Intake to await pick-up.

I. The deputy will give the management card to the Operations staff in Release, who will be responsible for filing the management card in the released inmate's booking records.

J. Replacement of management cards

1. Inmate management cards will be replaced by the housing unit deputy in which the inmate is assigned when any of the following conditions apply:
   a. The card has been damaged
   b. The card shows signs of significant wear
   c. The card is illegible
   d. The card no longer accurately depicts the physical description of the inmate

Chapter:
- Custody Operations
**I. POLICY**

A. Each Deputy assigned to F Module Housing Unit is responsible for conducting an inspection of each respiratory isolation cell to ensure it has proper negative pressure.

B. GSD Personnel are responsible for conducting an inspection of the respiratory isolation area on a monthly basis to ensure proper negative pressure functions.

C. GSD Personnel shall ensure that an airflow certification test is conducted on an annual basis.

**II. PROCEDURE**

A. F Module Housing Unit Deputies are responsible for the following:

1. If inmates with infectious precautions occupy the area, deputies will not enter the space without donning a N95 rated protective respiratory mask.

2. From the outside of each closed cell door (food port included), tear the corner from a sheet of tissue paper and release it at the threshold of the door.

3. Release the tissue paper and observe it for movement.
   a. The tissue paper should be drawn under the closed cell door and into the cell to indicate a proper negative pressure function for that space.
   b. If the tissue paper is not drawn under the door, ensure that it is placed at least halfway under the door.

4. Enter each cell and inspect the vent to ensure it is free of any obstructions and/or discrepancies that may hinder the airflow through the vent.

5. Repeat the process for each cell door in F-ISO.

B. Negative Pressure Failures or Discrepancies

1. The inspecting deputy will report any discrepancy or failure in negative pressure tests in the following manner:
   
a. Record any discrepancies in the JMS Work Order System.

b. In the event of a negative pressure test failure, the inspecting deputy will secure the affected room and make the following notifications:
   
   • Shift Supervisor
   • Medical Staff
   • GSD
   • Facility Commander

Custody Operations

SUBJECT:
Inmate Room Checks and Observation Requirements

I. POLICY

A. All inmates will be subject to observation and direct visual supervision by sworn custody staff.

B. Inmates who are violent or mentally disordered or who demonstrate unusual or bizarre behavior shall receive more frequent and direct observation.

II. DEFINITIONS

A. OBSERVATION LOG: A type of record utilized to document the direct visual observation of a specified inmate that has been placed in a safety cell, sobering cell or direct observation cell.

B. INMATE HISTORY: A JMS entry used to document the specific activities of an inmate that has been placed in administrative segregation, disciplinary/medical isolation or protective custody.

III. PROCEDURES

A. GENERAL OBSERVATION REQUIREMENTS

1. Deputies will observe inmates as frequently as possible to ensure their safety and general welfare.

2. Deputies will note activity of inmates and compare it to new observations as they are made to help determine their welfare status.

3. Deputies will note inactive or sleeping inmates by observing their skin, obvious movements or signs of distress.

4. Deputies unable to make a determination as to the inmate’s welfare through regular observation may use the following techniques:

   a. Using the flashlight to illuminate the area and/or inmate
b. Attempt to gain the inmate’s attention from the door before making a closer approach.

c. Entering the room to confirm the inmate’s presence and condition.
   • Caution should be exercised when entering a room of a sleeping inmate.
   • Deputies may request additional assistance to complete their investigation.

5. This policy does not apply to those inmates under direct supervision (i.e. work crews, schools, programs, etc.)

B. OBSERVATION REQUIREMENTS OF INMATE CLASSIFICATIONS

1. General Population Inmates
   a. All general population inmates shall be directly observed by custody staff:

   ![Image]

   b. Custody staff will log all observations into the JMS Activity Notes after they occur. Refer to CSB Policy and Procedure 2.08.18, Observation Logs, for additional information.

2. Disciplinary Inmates
   a. Any inmate placed into a disciplinary lockdown in excess of 48 hours shall require their daily activity to be recorded in JMS Inmate History.

3. Special Classification Inmates
   a. Any inmate placed into a special classification status as described in CSB Chapter 9, Special Management Inmates or Chapter 12, Classification shall have their activity recorded in JMS Inmate History.

4. Safety and Sobering Cell Placements
   a. Inmates placed into safety cells shall be observed in accordance with the following CSB Policy and Procedures:
      • 2.08.19, Safety Cell Use
      • 2.08.18, Observation Logs
   b. Inmates placed into sobering cells shall be observed in accordance with
the following CSB Policy and Procedures:

- 2.08.20, Sobering Cell Use
- 2.08.18, Observation Logs
I. POLICY

A. Custody staff will ensure that all inmates that have been determined to be a direct threat to the safety and security of the facility or a risk to themselves or to other inmates are observed on a frequent basis.

B. Custody staff will maintain written observation logs documenting their direct visual observations and interactions with the inmate until the time the inmate is no longer a threat or risk.

II. DEFINITIONS

A. OBSERVATION LOG: A type of record utilized to document the direct visual observation of a specified inmate that has been placed in a safety cell, sobering cell or observation cell.

III. PROCEDURES

A. CONDITIONS REQUIRING OBSERVATION LOGS

1. Observation Logs must be initiated and maintained whenever the following occur:

   a. Placement of an individual into a safety cell
   b. Placement of an individual into a sobering cell
   c. Placement of an individual into an observation room
   d. Any other time at the direction of the Shift Supervisor or Medical/Mental Health staff

2. MAINTAINING OBSERVATION LOGS

   a. Observation Logs will be completed in their entirety, describing the event(s) leading to placement in detail.
b. Observation log entries may be made by custody, medical and mental health staff.
   • All entries must be legible, to include name, date and time.

c. The staff member initiating the log shall ensure the following notifications are made:
   • Shift Supervisor
   • Classification staff
   • Housing unit or intake nurse
   • Mental health staff

d. The Shift Supervisor shall review and approve (as appropriate) the circumstances surrounding the initiation of the log and ensure that the log is completed correctly.

e. Custody staff will ensure that direct visual observations and log entries occur as follows:
   • Safety Cell Logs will be checked and maintained at least once every fifteen (15) minutes and no less than twice every thirty (30) minutes.
   • Observation Room Logs will be checked and maintained at least once every fifteen (15) minutes and no less than twice every thirty (30) minutes on an irregular basis.
   • Sobering Cell Logs will be checked and maintained no less than once every thirty (30) minutes on an irregular basis.
   • Restraint Logs will be checked and maintained at least once every fifteen (15) minutes and no less than twice every thirty (30) minutes.

f. Observations shall be recorded only as they occur and shall include the following:
   • Visual observations
   • Direct interaction with individual
   • Offers of food, drink and exercise
   • Escalation or de-escalation of placement or status
   • Any other supplemental information
• Video monitoring of inmates may supplement but shall not replace direct observations.

g. Observation Logs may not contain lines that are incomplete or are empty between entries.

h. Staff shall not make observation log entries based on other staff member’s observations.

i. The deputy initiating the action will complete an incident report for all placements into the safety cell and observation room.

j. The deputy initiating the action shall make an entry into the JMS Redbook Notes to provide a brief description of circumstances leading to the action.

k. The heading and details of the new or any additional Observation Log must be completed in its entirety.

l. Observation logs shall be maintained continuously until the appropriate supervisor has made the determination that the individual is no longer a threat or at risk.

• The supervisor terminating the activity shall provide detailed information on the observation log regarding their decision.

• The supervisor will legibly sign, date and document the time in which the termination of the log was approved.

• The supervisor terminating the activity shall ensure that the Shift Supervisor receives the completed Observation Log(s) in their entirety.

3. INMATE MOVEMENT

a. Observation logs must accompany inmates when they are moved out to internal or external appointments and must be under constant observation by sworn staff.

b. The Observation Log will be attached to the Inmate’s Management Card.

c. Transporting officers will be responsible for log entries during transport.

d. Sworn staff receiving inmates and providing security will continue log entries until the transport back to the housing location.

4. DISPOSITION OF COMPLETED OBSERVATION LOGS

a. All completed logs will be routed to the Shift Supervisor.

• The Shift Supervisor will review each log for completeness, accuracy, and legibility.
b. The Shift Supervisor will route a copy of the completed logs and incident report to the following locations:

- Facility Commander
- Involved inmate’s booking folder
- Classification Unit

5. RECORD RETENTION OF OBSERVATION LOGS AND RELATED REPORTS

a. All completed Observation Logs shall be maintained in the inmate’s booking file.

b. All medical reports and/or documentation relating to the initiation of an observation log will be maintained in the inmate medical file under the control of the contract medical service provider.

c. All psychiatric reports and/or documentation relating to the implementation of an observation log will be maintained in the inmate case files under the control of Custody Services Bureau Mental Health staff.
I. POLICY

A. The Custody Services Bureau will provide a safe and secure environment to those arrested or incarcerated persons who pose a threat to themselves or others or are considered a threat to the facility.

B. Safety Cells may not be used as standard holding cells for any reason.

C. The Facility Commander may delegate authority to place an inmate in a safety cell to a physician.

D. No inmate should be retained in a safety cell longer than is necessary for the protection of the inmate or others.

II. PROCEDURE

A. SAFETY CELLS

1. Only one inmate can be held per safety cell.

2. The Facility Commander will ensure that safety cells are used to segregate and protect those inmates who:
   
   a. Present a danger to themselves or others and require close observation.
   
   b. Display behavior that has resulted or may result in destruction of property.

3. Safety Cells shall not be used as a sobering cell, or for "attitude adjustment" or discipline or as a substitute for treatment.

4. Placement in a safety cell shall occur only with the approval of the Facility Commander or designee.
   
   a. Continued retention in a safety cell shall be reviewed and approved by the
Facility Commander or designee at a minimum of every four (4) hours.

5. Inmates shall be allowed to retain sufficient clothing or be provided with a suitably designed "safety garment," to provide for their personal privacy unless specific identifiable risks to the inmate's safety or to the security of the facility are documented.

6. Sanitation conditions shall be maintained at all times, and the cell shall be kept warm and dry.

7. Custody staff shall notify Medical/Mental Health staff of an inmate’s placement into a safety cell.
   a. Medical/Mental Health staff will render a medical/mental health opinion regarding placement and retention in the safety cell and inspect any restraint devices placed upon the inmate to ensure proper circulation.
   b. The inmate shall be medically cleared for continued placement, every eight (8) hours thereafter.
   c. Continual medical/mental health evaluations shall be performed at least once on each shift, until a referral appointment has been completed.
   d. Once placement has been made in a safety cell, an observation log shall be initiated in accordance with CSB Policy and Procedure 2.08.18, Observation Logs.
      • Custody staff shall conduct observation checks at least once every fifteen (15) minutes and no less than twice every thirty (30) minutes.
   e. Routine feeding shall be provided using paper plates and plastic utensils. Fluids shall be provided in paper or Styrofoam cups.
   f. Fluids must be offered to the individual, at least every two (2) hours.
   g. Following placement in a safety cell, a “Use of Safety Cell” Incident Report shall be completed and will include the following information:
      • Circumstances justifying placement
      • Use of restraints
      • Use of force
      • Use of modesty garment
      • The names of staff or medical personnel involved in the placement or retention.
      • Date and time of supervisor notification
• The name of the supervisor or physician approving the placement
• Date and time of placement
• Any statement by medical personnel, which justifies continued retention in the safety cell.
I. POLICY

A. The Custody Services Bureau will provide a safe and secure environment to those persons arrested or incarcerated who, due to intoxication, are unable to take care of themselves.

B. Sobering Cells may not be used as standard holding cells for any reason.

C. Inmates shall be removed from the sobering cell as soon as they are no longer a threat to their own safety or the safety of others, due to their state of intoxication.

II. PROCEDURE

A. SOBERING CELLS

1. The Facility Commander will ensure that sobering cells are used to segregate and protect those inmates who are a threat to their own safety or the safety of others due to their state of intoxication.

2. Staff will evaluate the following conditions when considering placement into a sobering cell:

   a. Are conscious
   
   b. Respond to simple commands
   
   c. Have no difficulty breathing
   
   d. Do not appear to be acutely ill or have apparent injuries
   
   e. Are able to respond verbally to stimulation and walk to the cell with minimal assistance.

3. All persons who are brought into custody for any charges involving alcohol or drugs shall be evaluated immediately upon entry, to establish their degree of intoxication.
4. The medical staff shall be notified immediately for an inmate's placement in a sobering cell and asked to render a medical opinion regarding placement and retention in the sobering cell.
   
a. Continued inmate placement in a sobering cell shall require a new medical evaluation at least once every six hours.

5. Placement in a sobering cell shall occur only with the approval of the Shift Supervisor.

6. All items of personal property, as well as shoes, socks, belt, or other potentially dangerous items, shall be removed prior to placing an inmate in a sobering cell. All other clothing items shall be retained and placed in a secure location.
   
a. Any soiled personal clothing may be replaced with facility issued clothing.

7. Sanitation conditions shall be maintained at all times, and the cell shall be kept warm and dry.

8. Once placement has been made in a sobering cell, an incident report will be written and the observation log shall be initiated. Refer to CSB Policy and Procedure 2.08.18, Observation Logs.

9. Intermittent direct visual observation of inmates held in the sobering cell shall be conducted no less than once every half hour and should include the following:
   
a. Observation of the inmate’s breathing to determine that breathing is normal.
      • Breathing should not be erratic nor indicate that the person is having difficulty breathing.
   
b. Observation of the inmate to ensure there has been no vomiting while sleeping.
   
c. An arousal attempt to ensure the person will respond to verbal or pressure stimulation
      • If unable to obtain a verbal response to stimulation, the officer must enter the cell and attempt to arouse the person to assess consciousness.

10. The Facility Commander or Designee, along with medical staff, must review retention every six (6) hours after placement.
    
a. Time between retention reviews shall not to exceed 6 hours.

11. A medical assessment shall be performed within 12 hours from the time of placement.
I. POLICY

A. Sworn Custody Staff may use the restraint chair to control inmates who have displayed hazardous behavior that results in the destruction of property or reveals intent to cause physical harm to self or others. Use of the restraint chair is a temporary means of securing and controlling an inmate who displays hazardous behavior.

II. DEFINITIONS

A. Restraint Chair: A chair with equipment designed to restrain, control, and limit the movements of inmates who display hazardous behavior.

B. Hazardous Behavior: Inmate conduct that results in the destruction of facility property or reveals intent to cause physical harm to self or others. This may include immediate verbal threats to cause such destruction or harm, accompanied by articulated information that would support the inmate’s stated intention.
III. PROCEDURE

A. USE OF RESTRAINT CHAIR

1. The restraint chair shall only be used after all other alternatives have been considered and deemed inappropriate.
   a. Other alternatives may include single person cells, single person sobering cells, safety cells, handcuffs, leg shackles, or waist chains and cuffs.

2. The Shift Supervisor shall be notified and approve of any placement or continued use of the restraint chair for the following circumstances:
   a. To temporarily restrain, control, and/or secure an inmate who engages in hazardous behavior
   b. For transportation of an actively violent inmate from the location of the disturbance to a facility safety cell
   c. The transportation of an inmate with known significant history or potential for violence from the inmate’s housing location to other custody facilities
   d. The transportation of an inmate that is a high security risk

3. Use of the restraint chair as punishment or disciplinary purposes is expressly forbidden.

4. A sergeant shall be present whenever an inmate is placed in the restraint chair for any reason.

5. The sergeant observing placement shall ensure that available medical/mental health staff are notified and respond as soon as possible, but no longer than one (1) hour from the time of placement to respond and provide a medical/mental health opinion on the placement of the involved inmate.

6. The sergeant observing placement shall ensure that medical/mental health staff are notified and respond no longer than four (4) hours from the time of placement to conduct a health screening of the involved inmate.
   a. This health screening shall include an assessment for signs of:
      • Medical distress
      • Mental illness
      • Proper circulation
      • Breathing restriction
      • Vital signs
7. The sergeant reviewing continued retention will consult with medical/mental health staff following their assessment(s) to determine if continued use of the restraint chair is necessary.
   a. If the Facility Commander or designee determines, with consult from Medical and Mental Health staff, that the inmate cannot be removed from the restraint chair within eight (8) hours. The inmate will be transferred to Contra Costa Regional Medical Center (CCRMC) for care/observation.

8. The sergeant observing placement shall ensure that an inmate observation log is initiated.

9. The Shift Supervisor and available medical/mental health staff shall review the need for continued retention in the restraint chair at least once every hour.
   a. All reviews and determinations shall be noted in the inmate observation log.

B. PLACEMENT OF AN INMATE INTO THE RESTRAINT CHAIR

1. Only deputies that have been trained in the proper use of the restraint chair shall be directly involved in the inmate’s final placement into the chair.

2. Deputies shall use only that amount of force that is necessary to place an inmate into the restraint chair.

3. Deputies shall ensure that a sergeant has been notified and observes the inmate’s placement into the restraint chair.

4. The inmate may also be fitted with a spit hood as necessary. Refer to CSB Policy and Procedure 2.08.23, TranZport Spit Hood for additional information.

5. Staff shall place the inmate in the restraint chair in accordance with the restraint chair manufacturer’s recommended procedure, while also maintaining officer safety and a position of advantage.
   a. Deputies will ensure that all of the individual’s personal property has been removed from them, to include jewelry, glasses, shoes, boots, socks, coat, hat and belt. They should only be clothed in their shirt, pants or dress, or an approved modesty garment.

   b. Deputies should ensure the individual is handcuffed and wearing leg irons when warranted.
6. **Manufacturer Cautions**
   
a. Violent behavior may mask dangerous medical conditions. Individuals must be monitored continuously and provided medical treatment if needed.
   
b. Handcuffs and leg irons must be removed as soon as possible to prevent injury.
   
c. Belts and straps may need to be loosened to ensure adequate blood flow.
   
d. The restraint chair must always be used in the upright position.
   
e. Individuals should not be left in the restraint chair for more than two hours.
      
      • The two hour limit may be extended, but only under direct medical supervision.
      
      • The extended time period must not exceed eight hours and must be accompanied with range of motion exercises.

7. Deputies should restrain an inmate with handcuffs and leg shackles prior to placement into the restraint chair.

C. **HYDRATION AND SANITATION**

1. An inmate placed in a restraint chair will be offered water and access to a toilet at least once every two hours by available medical staff.

2. If the inmate expresses a need to use the toilet, the Shift Supervisor will be notified and will respond and supervise.
   
a. The inmate will be removed from the chair in reverse order of placement, and will be restrained with handcuffs in the front and leg shackles.
   
b. The inmate will be escorted to a cell with a toilet and supervised by a Deputy of the same gender.
   
c. If, at any time during this process, the inmate attempts to injure self, staff, or others, he/she will be immediately returned to the restraint chair.

3. Any hydration and/or sanitation needs addressed by staff will be noted on the inmate observation log.

D. **EXERCISING EXTREMITIES**

1. Deputies will provide the restrained inmate an opportunity to exercise their extremities every two hours and at all other times as recommended by medical staff.
a. Deputies shall release one limb at a time, allowing the inmate to extend
the limb as fully straight as possible, ten times per limb or three minutes
per limb, whichever comes first.

b. If, at any time, the inmate attempts to injure staff or self, the inmate will
be immediately restrained.

c. Additional attempts to provide exercise will occur within two hours.

2. Any exercise addressed by staff will be noted on the inmate observation log.

E. MONITORING OF AN INMATE PLACED IN A RESTRAINT CHAIR

1. Custody staff must observe any inmate placed in a restraint chair at least once
every fifteen minutes and no less than twice every thirty minutes to ensure the
safety and well being of the inmate.

a. Any observations made by custody or medical/mental health staff will be
noted on the inmate observation log.

2. Deputies shall observe the restrained inmate for the following:

a. Restraints are properly employed

b. Visual checks of circulation and breathing

c. Behavior

3. The observing deputy shall notify the Shift Supervisor when the following occur:

a. The integrity of the restraint chair has been compromised

b. Dramatic changes in the inmate's physical or mental behavior would
require a new medical/mental health assessment

c. The inmate’s actions indicate they are ready to be removed from the
restraint chair.

4. The supervising sergeant shall personally observe the inmate at least once every
hour.

a. The supervising sergeant will determine if the inmate is to remain in or be
removed from the restraint chair.

b. The supervising sergeant will note and articulate the determination of
removal or continued placement of the inmate in the restraint chair in the
observation log.

F. REMOVAL FROM THE RESTRAINT CHAIR

1. The supervising Sergeant shall ensure that an inmate placed into a restraint chair
is removed as soon as possible.
2. Upon approval from the supervising sergeant, deputies will remove the inmate from the restraint chair.

3. Deputies will continue to maintain the inmate’s observation log.

G. DOCUMENTATION AND REPORTING

1. Any time an inmate is placed in a restraint chair, an inmate observation log must be initiated and completed as described in CSB Policy and Procedure 2.08.12 Observation Logs.

2. The supervising sergeant will ensure that an incident report and related inmate observation logs are prepared.

   a. The Incident Report will include:

      • Circumstances surrounding the restraint chair placement
      • Notification of the supervising sergeant
      • Time and duration of placement
      • Notifications, actions, and/or observations of Health Services staff
      • Other staff who were directly involved in the placement and/or observation of the inmate in the restraint chair
      • Initiation of the Inmate Observation Log

   b. The Shift Supervisor will ensure that a copy of the Incident Report and are forwarded to the following locations:

      • Facility Commander
      • Involved individual’s booking folder
I. POLICY

A. Special restraints shall be used only as prevention against self-injury, injury to others, property damage, or other occasions as may be approved by the Detention Division Captain, or designee, and the medical/mental health staff.

B. The use of special restraints on known pregnant inmates, or inmates in recovery after delivery, shall adhere to the requirements of PC 3407 whereby leg irons, waist chains, or handcuffing behind the body shall not be used.

C. Special restraints should be utilized only when it appears less restrictive alternatives would be ineffective in controlling the disordered behavior.

D. Restraints will be applied for only the amount of time absolutely necessary, and shall never be applied as a punishment.

E. This policy shall be considered separate from CSB Policy and Procedure 2.08.21, Use of Restraint Chair.

II. DEFINITION

A. SPECIAL RESTRAINT DEVICES- Special restraint devices include, but are not limited to, any device that immobilizes an inmate’s extremities and/or prevents the inmate from being ambulatory. Such devices as cloth or soft padded leather ties may be used to restrain an inmate.

III. PROCEDURE

A. In the event the use of special restraints are necessary and the inmate is not transferred to a medical/mental health unit, the following procedure shall be followed:

1. Physical restraints such as cloth or leather ties, etc., can only be used with the advance approval of the Shift Supervisor and under close supervision.

   a. The Shift Supervisor will be notified prior to or immediately following
any application of special restraints.

b. The Shift Supervisor will notify the Facility Commander as appropriate.

c. The Shift Supervisor shall notify the appropriate medical/mental health personnel.

d. Once special restraints have been applied, continual direct visual observation by staff shall be maintained prior to evaluation from the medical/mental health authority.

• The sergeant observing placement shall ensure that available Medical/Mental Health staff are notified and respond as soon as possible, but no longer than one (1) hour from the time of placement to respond and provide a medical/mental health opinion on the placement of the involved inmate.

• visual observation will be made approximately once every 15 minutes, no less than twice every thirty minutes.

• An observation log shall be initiated and maintained whenever special restraints are used.

• All cases requiring physical force shall be in accordance with CCCSO Policies and Procedures 1.06.61, Use of Force.

• The appropriate report, completely documenting the incident will be submitted.

2. The medical/mental health staff shall assess the inmate’s medical and mental health condition, and to advise whether, on the basis of serious danger to self or others, the inmate should be placed in a medical/mental health unit for emergency involuntary treatment with appropriate medical management.

a. Medical/Mental Health staff shall respond no longer than four (4) hours from the time of placement to conduct a health screening of the involved inmate.

• This health screening shall include an assessment for signs of:
  • Medical distress
  • Mental illness
  • Proper circulation
  • Breathing restriction
  • Vital sign

3. Special restraining devices shall not be used as punishment or in a way that causes
undue physical pain or restricts the blood circulation or breathing of an inmate.

4. Continued retention in special restraints shall be reviewed by the Shift Supervisor and health services staff every hour.

   a. If the Facility Commander or designee determines, with consult from Medical and Mental Health staff, that the inmate cannot be removed from the restraint chair within eight (8) hours. The inmate will be transferred to Contra Costa Regional Medical Center (CCRMC) for care/observation.

5. Inmates placed in special restraints must be housed in single cells and must be monitored once approximately every 15 minutes, no less than twice every thirty minutes.

6. Inmates in special restraints must be turned every two hours while awake and given the opportunity to use toilet facilities when necessary, and appropriate.

B. SPECIAL RESTRAINTS WITH THE USE OF CHEMICAL AGENTS

1. A situation may arise where the use of chemical agents has been ineffective and special restraints must be used to control an inmate who has been exposed. Caution must be used in restraining the subject so that breathing difficulty is not caused.

2. The Shift Supervisor shall be notified prior to the application of special restraints to the exposed inmate. If prior notification is not possible, the Shift Supervisor will be notified following application of special restraints as described above, and all provisions of CCCSO Policies and Procedures 1.06.61, Use of Force, will be followed.

3. The medical staff will be notified, and respond to assess, and treat as necessary.

4. An inmate exposed to chemical agents shall not be placed in a prone position and placed on his/her stomach. A subject who has been exposed to chemical agents may experience breathing difficulty. Refer to CSB Policy and Procedure 2.08.24, Prone Restraints, for additional information.
I. POLICY
   A. Custody staff members will utilize only the “TranZport Hood” Protective Spit Hood in an effort to take all reasonable precautionary efforts to protect themselves and other staff members and/or individuals from those that present a risk of transmitting potentially infectious fluids by spitting, sneezing or coughing.

II. PROCEDURE
   A. “TranZport Hood” PROTECTIVE SPIT HOOD
      1. The protective spit hood is a temporary protective hood for use on those persons where a risk of exposure to infectious disease is present.
      2. If used properly, the Hood can reduce the risk of the wearer transmitting fluids (saliva and mucous) from the facial area, as by spitting, sneezing or coughing.
      3. Improper use can result in serious injury or death.
      4. Improper use may cause asphyxiation, suffocation or drowning in one’s own fluids.
   B. CONDITIONS FOR USE
      1. The individual must be under control and restrained.
      2. An observation log must be started prior to any application of the hood to any individual.
      3. The wearer must be under constant visual supervision and will not be left unattended.
      4. Custody staff shall not use the Hood on anyone that is vomiting, having difficulty breathing, or is bleeding profusely from the mouth or nose area.
5. Custody staff will remove all of the wearer’s jewelry and eyewear prior to application.

6. The Hood is a “one-size-fits-all” application. Custody staff shall discontinue applying a Hood if they encounter any difficulty with fit.

C. INSTRUCTIONS FOR USE

1. Custody staff will notify and make all attempts to have medical staff available to observe placement of the Hood.

2. Open the Hood bag and remove the Hood.

3. Place the Hood over the head of the person where the mesh fabric is covering the eye area (top) of the head, and the filtration fabric is covering the lower half of the head (below the nostrils).

4. For best fit: The center elastic will go under the nose and over the ears.
   a. For increased protection, the elastic may be placed over the nostrils.

5. Carefully push the white plastic Secure-Lock tab down toward the top of the head while holding the top of the mesh fabric.
   a. This should take the slack out of the top and help to secure the Hood in position.
   b. Do not push so tightly as to be uncomfortable or impair the vision of the wearer.

D. FOLLOW UP ACTIONS

1. The sworn staff member applying the hood to the wearer shall ensure that details of the Hood’s application are included in an incident report and noted in the individual’s observation log.
   a. The reports will be completed and submitted to the Shift Supervisor prior to the employee leaving the facility from his/her tour of duty.
   b. The report shall include:
      • Staff members present at the time of the Hood’s application
      • If medical staff was present to observe application of the Hood
      • The individuals actions which caused the application of the Hood
      • Description of any observable marks or injuries to the inmate
      • Complaints from the individual
      • Refusals for medical attention
c. The Shift Supervisor will ensure that a copy of the Incident Report are forwarded to the following locations:

- Facility Commander
- Involved individual’s booking folder.

E. REMOVAL AND DISPOSAL

1. The TranZport Hood shall not be reused.

2. Custody staff shall remove and discard the Hood when the following occurs:
   a. When any type of fluid has accumulated inside the Hood
   b. The transport destination is reached
   c. When the prisoner is left unattended
   d. When directed by a supervisor

3. Custody staff removing the Hood will ensure removal is noted on the individual’s observation log.

F. STORAGE AND INVENTORY

1. The TranZport Hood may be stored for immediate accessibility in the following locations:
   a. Martinez Detention Facility
      - 3rd Floor Custody Sergeant’s Office
      - Intake
      - Transportation
      - M Module Housing Unit
      - Crime Scene Cleaners closet
   b. West County Detention Facility
      - The SERT Offices in Building 1 and the main compound area

2. The Shift Supervisor shall be responsible for the storage and inventory of the TranZport Hood.
I. POLICY

A. The use of prone restraint techniques shall be limited.

B. The use of prone restraints shall not be used for inmates known to be pregnant or in recovery after delivery.

C. Restrained inmates shall be constantly monitored, pursuant to CSB Policy and Procedure 2.08.22, Use of Special Restraints.

II. DEFINITIONS

A. PRONE RESTRAINT: The use of ankle, wrist, waist restraint devices, hobbles or any physical control applied to an individual in any manner which places the individual in a prone or supine position, while preventing his/her ability to move or change position without assistance.

III. PROCEDURE

A. PRONE RESTRAINT

1. Prone Restraint may be used to gain control of a combative or violent inmate when such force is deemed necessary to ensure the safety and security of staff and the affected inmate.

   a. Inmates in wrist, waist or ankle restraints, or any combination or any physical control, and who are subsequently placed in a prone or supine position, shall be constantly monitored to ensure they remain alert and exhibit no signs of respiratory difficulty.

   b. Special attention shall be paid to those individuals who are under a combined effect of any drug and alcohol.

      • The risk of sudden death increases significantly when individuals are impaired in such a manner.
The symptoms can be, but are not limited to the following:

- Bizarre and/or aggressive behavior/violence toward others.
- Shouting/Paranoia/Panic.
- Sudden Tranquility.
- Unexpected Physical Strength.

c. Duration of the application of prone restraint techniques shall be limited to the time necessary to gain control of the inmate and to ensure the safety and security of staff and the affected inmate.

d. Once control is gained and the situation is secure, the individual shall be returned to an upright or sitting position.

2. No individual shall be left unattended while restrained in a manner that prevents the individual’s movement from a prone or supine position without assistance.

3. Maximum Prone Restraint techniques shall not be employed during transportation of inmates.

a. Inmates in wrist, waist or ankle restraints, or any combination thereof, shall be transported in an upright or sitting position.

b. Personnel transporting inmates shall ensure their body position is such that normal respiration (breathing) is not inhibited.
I. POLICY

A. Inmates shall be allowed to retain sufficient clothing or be provided with a suitably designed "safety or modesty garment," to provide for their personal privacy unless specific identifiable risks to the inmate's safety or to the security of the facility are documented.

II. PROCEDURE

A. MODESTY GARMENT

1. The purpose of the modesty garment is to provide warmth and personal privacy to an inmate placed in the safety cell or observation room.

2. The modesty garment will be provided to the inmate immediately upon placement into a safety cell whenever clothing (i.e. shirts, pants, etc.) articles must be removed.

3. An explanation of how to get into the garment may be given from outside the cell if the violent nature of the inmate prohibits closer contact or assistance.

4. Once the inmate is removed from the safety cell and the modesty garment is no longer needed, the staff member receiving the garment will:

   a. Place the garment in a plastic yellow “soiled linen” bag

   b. Take the bag with garment to the following location:

      • MDF-Sergeant’s Office
      • WCDF-Sergeant’s Office
      • MCDF-Facility Commander’s Office

   c. The Shift Sergeant will contact the designated company to request
garment pick-up.

5. The Crime Scene Cleaners will retrieve and return all articles to be cleaned to the Shift Sergeant.

B. STORAGE AND MAINTENANCE

1. Modesty Garments may be stored for immediate accessibility in the following locations:
   a. Intake
   b. M Module Housing Unit

2. The Shift Supervisor shall be responsible for the storage and maintenance of all Modesty Garments.
I. POLICY

A. Deputies shall use only that force which is reasonable and necessary, given the facts and circumstances known at the time of the event, to effectively bring disruptive, resistant and/or combative inmates under control.

B. Deputies who must remove a violent or resistive inmate from a cell or holding area will comply with the guidelines presented in CCCSO Department Policy 1.06.61 (Use of Force).

II. DEFINITIONS

A. RESISTANT INMATE MANAGEMENT- The process utilized to engage and/or remove disruptive, resistive, combative and/or armed inmates from a cell/holding area, vehicle, etc. in such a manner as to maximize safety, while minimizing personal injury to staff and inmates.

III. PROCEDURE

A. TO GAIN VOLUNTARY COMPLIANCE

1. Staff shall attempt to identify the reason(s) the inmate is uncooperative, disruptive resistant or combative.

2. When possible, staff should utilize verbal techniques to encourage voluntary compliance.

3. In the absence of exigent circumstances, staff shall utilize time to de-escalate the situation.

4. The Sergeant shall be notified of any inmate who repeatedly refuses to comply with a lawful order, is uncooperative, disruptive, resistant or refuses to exit a cell or holding area.

5. If a staff member must engage the inmate, by means of opening a secured door or
other means, staff shall notify the Sergeant and request additional assistance prior to doing so unless exigent circumstances exist.

B. RESISTANT INMATE MANAGEMENT

1. The Sergeant will determine if relocation or removal of the inmate is necessary.

2. The Sergeant will determine if the situation justifies the need for SERT utilization and shall organize staff in accordance with CSB SERT Team Policy.

2. The Sergeant or designee will develop an operational plan and will brief involved staff.

3. If the inmate is actively resistive, destructive or assaultive, the Sergeant or designee shall assemble and assign personnel/equipment as necessary to safely control the inmate.
D. EQUIPMENT INVENTORY

1. The Facility Commander shall designate staff to conduct a monthly inventory of all equipment.

   a. This information will be forwarded to the Facility Commander and will be included as part of the Division’s Monthly Operational Readiness Report.

F. DEBRIEFING AND REPORTING

1. Immediately following the incident, the sergeant shall ascertain the welfare of the inmate(s) and staff, ensuring medical treatment for injuries is provided.

   a. Whenever force is used, inmates must be examined and treated by a nurse as soon as possible.

   b. The sergeant will review the incident with involved staff.

      • The videotape (as applicable) may be used to aid in debriefing.
2. The sergeant will ensure that all necessary reports are submitted by the end of the shift.

3. Facility Commanders shall review all reports and videotapes, to ensure compliance with agency and facility rules and regulations.
I. POLICY

A. Use of the Jaycor Pepperball Delivery System and/or FN303 Less Lethal Launcher is restricted to sworn members of the department who have been trained and certified to operate these devices.

B. Sworn members may use the Jaycor Pepperball Delivery System and/or the FN303 Less Lethal Launcher with the authorization of the Shift Supervisor for the purpose of:

1. Protecting an inmate from self-inflicted injury or suicide
2. To deter organized gatherings and/or failure to lockdown
3. Control combative inmate(s)
4. To affect a cell extraction
5. To prevent an escape
6. At any other time where force may be deemed necessary

II. DEFINITIONS

A. Jaycor Pepperball Delivery System: A defensive weapon that delivers an encapsulated chemical powder (OC) to a specific target in order to reduce or stop a predetermined threat.

B. FN303 Less Lethal Launcher: An impact launcher powered by compressed air that delivers a .68 caliber impact projectile (may be filled with paint or powder) to a specific target in order to reduce or stop a predetermined threat.

C. PAVA Impact projectile: Used in the FN303 Less Lethal, it is a .68 caliber impact projectile filled with PAVA powder (pepper). Its primary function is to impact with a secondary effect of irritation.
III. PROCEDURE

A. DEPLOYMENT AND USE:

1. Prior to use of the Jaycor Pepperball Delivery System or the FN303 Less Lethal Launcher, the following considerations should be made:
   a. The degree of threat the arrestee or inmate poses to the safety and security of the facility, staff and other inmates.
   b. Attempts to subdue or control the arrestee or inmate through lesser means.
   c. Custody staff members in the immediate area have been advised that deployment is forthcoming and are prepared for residual exposure.

2. Pepperballs or impact projectiles should not be targeted at a subject’s face, eyes, throat, spine or groin.

3. Deploying staff members shall deliver only the minimal amount of pepperballs or impact projectiles as necessary to effect compliance.
   a. Excessive projectiles will cause increased exposure to both staff and threat and may escalate the incident further.

B. FOLLOW-UP ACTIONS

1. Deputies shall immediately restrain any individual subdued by use of Pepperball or the FN303 Less Lethal munitions.

2. Deputies will place the exposed individual in an upright, seated position.

3. The sworn staff member deploying Pepperball(s) or FN303 munitions against a threat will immediately report the incident to their immediate supervisor.

4. Upon exposure to the Jaycor Pepperball Delivery System or after deployment of the FN303 Less Lethal Launcher, jail medical staff shall evaluate the individual.
   a. The Shift Supervisor will ensure that the Custody medical staff is notified.
   b. The medical staff will be asked to conduct a thorough medical examination and, if warranted, evaluate a chemical (OC) exposure.
   c. Deputies will assist medical staff in allowing individuals exposed to the chemical (OC) to access flushing stations, showers, etc.
   d. Medical refusal

   • Individuals exposed to the Jaycor Pepperball Delivery System or deployment of the FN303 Less Lethal Launcher must make all
refusals for medical treatment directly to medical staff.

- The reporting deputy will ensure the refusal and the medical staff member’s name receiving the refusal is documented in the incident report.

5. The sworn staff member deploying Pepperball(s) or FN303 munitions against the threat shall complete a “use of force” incident report.

a. The report will be completed and submitted to the Shift Supervisor prior to the employee leaving the facility from his/her tour of duty.

b. The report shall include:

- Staff members present at the time of Jaycor Pepperball Delivery System activation or FN 303 Less Lethal launcher deployment
- The individuals actions which caused the deployment of the device
- Description of any observable marks or injuries to the subject
- Complaints from the individual
- Refusals for medical attention
- Supplemental incident reports from witnessing sworn staff of the FN303 deployment

c. The Shift Supervisor will ensure that a copy of the Incident Report is forwarded to the following locations:

- Facility Commander
- Involved individual’s booking folder.
2. The Operations Sergeant and/or FN303 instructor/armor shall be responsible for the storage and maintenance of all Jaycor Pepperball Delivery Systems, FN 303 Less Lethal Launchers and peripheral equipment.

3. Maintenance and care of the pepperball and FN303 munitions and both weapon systems shall be completed by a certified armorer(s) and will include:
   
   a. Logging and tracking of all pepperball and FN303 munitions and both weapon systems
   
   b. Ensuring serviceability and completion of repairs and routine maintenance for each weapon system
   
   c. Ordering and maintaining adequate munitions and maintenance supplies for each weapon system
POLICY

A. It is the policy of the Office of the Sheriff that personnel only use that level of force objectively reasonable to perform their official duties. Electronic Weapons have been proven effective and are authorized for use in appropriate circumstances by trained personnel.

II. DEFINITIONS

A. Electronic Control Device (ECD). A device that uses propelled wires or direct contact to conduct electrical pulses to affect the sensory and motor function of the nervous system.

B. Electronic Weapon. An Electronic Weapon is a weapon designed to subdue a person by administering an electric current aimed at disrupting superficial muscle functions. The electrical pulses cause an uncontrollable muscle tissue contraction that physically debilitates the subject regardless of pain tolerance or mental focus.

C. Taser Cam. A digital camera attached to the Taser® brand of ECD, which makes video and audio records when the Taser® brand device is activated.

D. Holster. An agency authorized retention device meant to secure the Electronic Weapon to the operator’s weak side allowing it to be readily available when needed.

E. Deployed. Removal of the Electronic Weapon from its holster when in the presence of another other than for training or maintenance.

F. Discharge. The pulling of the trigger of the Electronic Weapon to fire the probes or to use the weapon in a drive stun mode.

III. PROCEDURE

A. Use of Electronic Weapons within the Custody Services Bureau (CSB) is limited to those sworn personnel who are currently certified as an operator of each Electronic Weapon.

1. Initial ECD training will be conducted by Custody Administrative Services (CAS)
upon assignment to the Custody Services Bureau. Initial user training will be completed following current POST and STC guidelines, as directed by Sheriff’s Training. CAS will maintain records regarding the ECD certification of all bureau employees.

2. Personnel will not be compelled to be exposed to the effects of the ECD as part of any training course.

B. Electronic Weapons may be used to:

1. Control a person who is actively resisting or showing active aggression.
2. Protect an inmate from serious self-inflicted injury or suicide.
3. Prevent an escape.
4. To conduct a cell extraction.
5. When attempts to subdue the subject by other conventional tactics have been, or will likely be, ineffective in the situation.
6. The ECD may be used in a situation where it is unsafe for officers to approach a person and take him or her into custody without the probability of injury to the officers or suspect.

C. Electronic Weapons will not be:

1. Used on an individual who is demonstrating passive resistance or is unresponsive.
2. Used on pregnant women, elderly persons, young children, or frail adults unless exigent circumstances exist.
3. Used on handcuffed or restrained persons unless they are actively resisting or exhibiting active aggression or attempting to harm themselves or others.
4. Used when the individual is in a location where a fall may cause substantial injury or death.
5. Intentionally discharged at a person’s head, neck or groin.
6. Used in a punitive manner, or to extract contraband or evidence.
7. Used in an environment where potentially flammable, volatile, or explosive materials (gasoline, natural gas, propane, oxygen, etc) are stored.
8. Modified by users. No changes, alterations or substitutions shall be made to Electronic Weapons. All repairs to Electronic Weapons will be made by trained staff or the manufacturer’s representative.
9. When possible, TaserCam equipped ECDs will be used.
10. No more than one officer should discharge an ECD against a person at a time.
D. ECDs should only be used for one, five second cycle and then stopped. Allowing the user to re-evaluate the situation. Repeated ECD cycles should be limited to five second cycles and will be restricted to the minimum number of activations that are necessary to place the subject under control.

E. When carried, the ECD will be maintained in an authorized holster on the Deputy’s weak side and drawn with the Deputy’s weak hand to avoid possible confusion with firearms.

1. Cross draw of the Electronic Weapon is not authorized, except under urgent circumstances

F. Deputies should give a verbal warning prior to activating the ECD, unless doing so would place the deputy at risk.

G. Follow-up actions:

1. Following exposure to the ECD, staff should use a restraint technique that does not impair respiration, to bring the subject under control.

2. Upon exposure to the ECD, the individual who was exposed will be examined by medical personnel (Jail Nurse, Paramedic, etc). Medical evaluation will be verified by the on-duty supervisor.

3. Staff members will report all deployments of an ECD to a supervisor, regardless of whether or not the ECD was discharged.

4. On-duty medical staff will evaluate the condition of the individual with emphasis on any injuries that may have been sustained because of the use of the ECD.

5. If the ECD contacts have penetrated the skin, the puncture sites shall be located and brought to the attention of medical staff for treatment and removal if necessary.

6. If any of the probes are embedded in the following areas, the subject shall be transported to a Hospital Emergency Room for probe removal.

   a. Face
   b. Neck
   c. Groin
   d. Spinal column
   e. Eyes

7. Medical Refusal

   a. Individuals who have had an ECD used upon them must make all refusals for medical treatment directly to medical personnel.
b. The reporting deputy will ensure the refusal, and the staff member’s name receiving the refusal, are documented in an incident report.

H. The staff member who deployed the ECD (regardless if discharged or not) will complete an incident report. Electronic Weapon discharges will include a “Supplemental Taser Use Form”.

1. The incident report will be completed and submitted to the Shift Supervisor prior to the employee leaving the facility from his/her tour of duty.

2. The report shall include:
   a. Staff members present at the time of the ECD deployment.
   b. If upon display of the ECD, the subject complied with directives.
   c. The individual’s actions at the time the device was deployed and an ECD was discharged, the actions of the individual at the time of discharge.
   d. Description of any observable marks or injuries to the inmate cause by exposure to the ECD, or injuries that resulted due to the ECD application.
   e. Complaints from the individual regarding injury or pain.
   f. Refusal of medical attention.
   g. In instances where the ECD was deployed, but not activated, an incident report will be generated (Incident type – Use of Taser)

3. The Shift Supervisor will ensure that a copy of the completed Incident Report is forwarded to the Facility Commander. The Facility Commander will review the report and place a copy of the initialed report in the involved inmate’s booking folder.

4. In the event an ECD is deployed and discharged, once the exposed subject is under control, all injuries associated with the deployment of the ECD shall be photographed and noted within the incident or crime report.

5. The Operations Sergeant and the Facility Commander will be notified of an ECD discharge. The Operations Sergeant/Facility Commander will then download the recorded incident. The videos are not to leave the facility without the permission of the Facility Commander.

IV. ECD STORAGE AND MAINTENANCE

A. ECDs are authorized for use by trained sworn staff members in the following locations:

1. Martinez Detention Facility (MDF).
2. West County Detention Facility (WCDF).
3. Marsh Creek Detention Facility (MCDF).

4. Contra Costa County Regional Medical Center (CCCRMC).

5. Contra Costa County Court Security (upon approval of the Presiding Judge).

B. The Shift Supervisor shall be responsible for the storage and serviceability of all ECD and the peripheral equipment.

C. CAS will be responsible for obtaining repairs of devices that exceed the user level.

## Investigation of Crimes

### I. POLICY

A. The Custody Services Bureau will take all steps necessary to ensure that any crime committed by an inmate while incarcerated within its facilities will be fully investigated.

B. Upon commission of any crime by an inmate, the Facility Commander or designee will determine if additional resources are necessary to properly complete the investigation.

C. The Shift Supervisor will ensure that a crime report is submitted by the investigating deputy and is properly routed for disposition.

### II. PROCEDURE

A. The following crimes will be investigated by detectives assigned to the Investigation Section at FOB upon notification and with the authorization of the Facility Commander:

1. All felonies that involve major injury or death of staff or inmate.
2. All sexual assault crimes.
3. Any case that originates within the Detention Division, but requires follow up outside of the facility.
4. Deaths/suicides, escapes, arsons and/or when the Facility Commander deems appropriate.
5. Any other crime that requires the expertise of a regularly assigned investigator due to special circumstances or needs as determined by the Facility Commander.

B. Once the assigned investigator arrives at the crime scene and is briefed, he/she then becomes in charge of the scene and the investigation. Detention personnel will assist in the investigation as needed.
C. Preliminary release of basic information to the media about the crime under investigation will be in accordance with CCCSO Policy and Procedure Sections 1.06.71, 1.06.78 and 1.06.79.

D. The investigation by detectives of crimes involving Detention staff or inmates, not otherwise noted in this procedure, will be at the direction of the Custody Services Bureau Assistant Sheriff, Investigations Captain, or the OOD, and upon notification by the Facility Commander or Shift Supervisor.

E. DETENTION PERSONNEL WILL INVESTIGATE THE FOLLOWING CRIMES WITHIN THE FACILITY:

1. All misdemeanors, unless involving unusual circumstances.

2. All narcotic/drug violations not requiring follow up investigations by a regularly assigned investigator.

3. Minor assault cases upon staff or inmates.

4. Any other crimes as directed by a supervisor.

F. CONDUCTING A CRIMINAL INVESTIGATION:

1. Once it has been determined that a criminal act has occurred, the deputy or sergeant in charge of the crime scene will direct and assign responding deputies.

2. The deputy or sergeant in charge will ensure the crime scene is secured and that suspects and witnesses are placed in separate holding cells.

3. The crime scene will be isolated and if necessary, a deputy will be posted to safeguard the scene.

4. The deputy, or sergeant in charge, will coordinate a search of the crime scene.

   a. Evidence in the crime scene will be identified and photographs will be taken (when needed) of the evidence before they are removed and processed in the evidence room.
Deputies assigned to the crime scene will take statements from all involved person(s) in the alleged crime.

- The statements will be attached to the Criminal and Incident Reports.
- Criminal and Incident reports will be written as directed by the Shift Supervisor.

All evidence shall be properly marked and routed and/or delivered in accordance with CCCSO Policy and Procedure 1.06.35 and 1.06.36.

G. REPORTING

1. All crime reports originating within the Detention Division will be reviewed for accuracy and completeness by the Custody Sergeant.

2. In the event of missing reports, reports being returned for follow up or other report problems, the Custody Sergeant of the responsible deputy will resolve such issues in a timely manner.

3. All crime reports investigated will be reviewed and processed by the Shift Supervisor. Reports will be routed in accordance with CCCSO Policy and Procedure Section 1.06.41.

**REVIEW DATE:** 8-18-17

### SUBJECT:
Sexual Assault Prevention and Investigations

---

### I. POLICY

A. All sexual assault allegations will be investigated and a crime report will be written.

B. A thorough investigation will be conducted, regardless if the victim has made a decision to press charges.

C. All victims of sexual assault will be referred to the jail medical staff for evaluation and referral for services.

D. This policy shall be in accordance with the Prison Rape Elimination Act (PREA), which makes prevention and detection of sexual assaults/abuse a top priority with a “Zero Tolerance” mandate.

---

### II. DEFINITIONS

A. **SEXUAL ASSAULT:** For the purposes of this manual, sexual assaults are comprised of the following criminal acts:

1. Rape
2. Sodomy
3. Forced oral copulation
4. Unlawful intercourse
5. Penetration with a foreign object
6. Sexual battery
7. Sexual exploitation

---

### III. PROCEDURE

A. **Assault Prevention**

1. Sexual assaults can be prevented in many ways, including but not limited to:
   a. Observations during room/cell checks.
b. Inmate orientation of “Zero Tolerance” policy and PREA reporting.

c. Make it clear that sexual behavior is not acceptable and discourage any activity that lends itself to sexual behavior.

d. Investigate all allegations of sexual abuse and sexual harassment whether the report is made verbally, in writing, or by a third party.

e. Be aware of grouping of probable aggressors near showers, courtyards or elsewhere.

f. Be aware of potential victims based on being physically smaller than average, lacking “street smarts”, developmentally disabled, homosexual or transgender inmates, and child molesters.

B. Victim Identification

1. The victim of a sexual assault can be identified in many ways, including:

a. Deputy discovers the assault in progress

b. Victim’s self-report to any staff member.

c. A third party reports a sexual assault

d. Staff member observes signs of victimization from an inmate. Including, but not limited to:

   • Depression

   • Uncharacteristic behavior for the individual

   • Change in appearance

   • Change in diet

   • Change in routine

2. Staff should question a suspected victim without jeopardizing the inmate’s safety, identity, and confidence by removing them from the immediate area.

C. Assault Investigation

1. Deputies will conduct an investigation in accordance with Sheriff’s Office Patrol Division Policy 3.04.06, Sexual Assaults, whenever a report is made alleging that an inmate has been sexually assaulted.

   a. If the alleged abuse appears to be a Felony, the Sexual Assault Unit will be notified immediately to conduct the investigation.

2. If a staff member has been accused of sexual assault, an investigation will be performed per CSB policy 2.08.49.

D. Staff member’s responsibilities following a sexual assault that occurred recently are as follows:

1. The staff member receiving the report or observing the assault will immediately notify the Shift Sergeant or nearest deputy (if applicable).
a. The Shift Sergeant will assign deputies to protect the crime scene, gather witnesses and keep them separate until interviewed, identify and isolate the assailant(s) and any other duties related to the investigation of the incident.

c. The Shift Supervisor will notify Medical and Mental Health Staff for an initial assessment of the victim. If transport to CCRMC is necessary for a Sexual Assault Forensic Examination, the shift Sergeant will notify the hospital staff to ensure that proper staff is available, to include:

- A Sexual Assault Forensic Examiner (S.A.F.E) and/or Sexual Assault Nurse Examiner (S.A.N.E).
- A sexual assault victim advocate.

d. The Shift Supervisor will request a detective and an evidence technician to respond, if necessary.

e. In the event the victim/suspect inmate needs to be removed from his current housing assignment for their safety or the safety of others, custody staff will isolate the inmate until classification arranges for a new assignment, either in protective custody or another housing area.

f. Evidence collected shall be booked in accordance with established procedures outlined in the Sheriff's Policy and Procedures Manual 1.06.35.

- Evidence (if available) that will be collected and booked shall include:
  - Physical evidence
  - Video Surveillance
  - Audio recordings
  - The reporting deputy will attach an inmate housing unit log sheet of the victim's housing area, and/or other area where the assault occurred, to the crime report.

g. Sexual assault investigations will be completed regardless of whether or not the alleged victim or abuser has been released or transferred.

h. The credibility of an alleged victim, suspect, or witness should not be determined by their status as an inmate or staff member.
2. Medical/Mental Health Staff Assessment and Follow Up

   a. All victims of sexual assault will be referred to the jail medical and mental health staff for evaluation and referral for services.

   b. Services for sexual assault cases which have occurred within the previous week and all follow-up testing and treatment may be given by the facility medical staff or at CCCMRC Emergency if necessary.

   c. Jail medical staff will make the referrals to Mental Health for psychological treatment. This referral may be immediate according to the inmate’s needs.

   d. Medical Staff will coordinate the delivery of follow-up services required during the remainder of the jail sentence or stay.

CHAPTER:
Custody Operations

1. [Redacted]
I. POLICY

A. The Custody Services Bureau will document, through the use of video equipment, any incidents required by policy.

B. Videotapes shall be retained at MDF Administrative Services for a three-year period.

II. DEFINITIONS

A. VIDEO EQUIPMENT SETS:

1. Martinez Detention Facility: One camera, a battery charger, one 3-hour battery, one 30-minute battery and two blank videocassettes.

2. West County Detention Facility: One camera, a battery charger, one 3-hour battery, one 30-minute battery and two blank videocassettes.

III. PROCEDURE

A. STORAGE/ACCOUNTABILITY

1. Martinez Detention Facility

   a. Video equipment set shall be stored in the Sergeant’s Office in a camera bag.

   b. Shift Sergeants will be responsible for inspecting the video equipment set daily to ensure that it is ready for immediate use.

2. West County Detention Facility

   a. Video equipment set shall be stored in the SERT Office in a camera bag.

   b. Shift Sergeants will be responsible for inspecting the video equipment set daily to ensure that it is ready for immediate use.
B. USE OF EQUIPMENT

1. The video camera is to be used only after obtaining authorization from the on-duty Shift Supervisor.

2. The supervisor coordinating the use of the video equipment shall ensure that camera users log the video equipment in and out.
   a. Such action shall include an entry on the shift log recording the event, the video equipment set number, the video operator’s name, and the time(s) of use.

3. At the conclusion of each use, the video camera set shall be returned to its originating storage area via the Shift Supervisor.
   a. The supervisor shall ensure that the set is made ready for the next use, including any arrangements for equipment maintenance and/or replacement of expended tapes.

4. Video camera set maintenance shall be coordinated through the Operations Sergeant.

C. TAPE STORAGE

1. Video tape(s) recorded as part of a criminal investigation shall be processed and stored as evidence in accordance with CSB 2.08.33, Evidence and Property Handling Policy and Procedure.

2. Any videotape used to record an incident shall also require the removal of the plastic record tab to prevent accidental erasure of recorded evidentiary events.

3. Video tape(s) recorded for purposes other than evidence shall be labeled in the following manner:
   a. Incident date/time and report number.
   b. Supervisor’s name and employee number
   c. Recording deputy’s name(s) and employee number
   d. Involved subject/inmate’s name and booking number.

4. Tapes, and a copy of any report generated from the recorded incident, shall be forwarded to the CSB Administrative Office for that facility.

5. Custody Administrative Services shall be responsible for maintenance of a videotape log and for storage, retrieval, and purging of all videotapes.
   a. The log will include:
      - Name of the subject/inmate being recorded
• Incident and/or crime report number
• Recording date
• Recording officer’s name
• Purge review date.
  • Tapes will be retained for a three-year period.
  • Prior to the purge of videotape, contact shall be made with the Internal Affairs Division to ensure purged videotapes will not detract from ongoing litigation(s).
  • Expired tapes will be forwarded to the Training Deputy for review of their potential in training staff members.

6. Additional blank tapes shall be kept in the Sergeant’s Office (MDF/MCDF), and CAS (WCDF).
   a. Additional tapes may be ordered through the Shift Supervisor

Contra Costa County
Office of the Sheriff
CSB Policy and Procedure

ISSUE DATE: 01-13-04
REVISION DATE: 08-08-18
REVIEW DATE: 03-17-19

CHAPTER:
Custody Operations
I. POLICY
   A. The Custody Services Bureau shall conduct a comprehensive investigation of the circumstances leading up to, during and following every inmate death, pursuant to Minimum Jail Standard 1218 and California Code of Regulations 12525.

   B. Inmate deaths will be handled as outlined in the Sheriff's Office Manual Section 1.06.62.

II. DEFINITIONS
   A. In-Custody – An inmate that is currently in the custody of the Sheriff's Office Custody Services Bureau.

   B. Constructive Custody – An inmate that is sentenced to the custody of the Sheriff and has been released to a Custody Alternative Program.

      1. Such constructive custody may be any of the following:

         a. County Parole

         b. Electronic Home Detention (EHD)

         c. Work Alternative Program (WAP)

         d. An “In-Custody” inmate on a temporary release pass

III. PROCEDURE
   A. INMATE DEATH/INCIDENT LIKELY TO RESULT IN DEATH

      1. In cases where cessation of life is not obvious, life saving measures (CPR, FIRST AID) will be administered immediately.

      2. Appropriate emergency life saving measures will be continued and the inmate immediately transported to the nearest hospital for medical treatment.
3. In cases where death has already been determined or death is obvious, i.e., post-mortem lividity, rigor mortis, the body will not be disturbed or moved from the scene until approved by and at the direction of Coroner's Division personnel.

4. Facility staff will not make any public comment regarding the situation or the individual(s) involved and will refer all inquiries to the Facility Commander or the Division Commander.

5. The Coroner's Division is responsible for the notification of next-of-kin on any inmate death.
   a. In the event that an inquiry is received regarding the incident, no information will be released. Contact information shall be obtained and forwarded to the appropriate investigating entity. (Coroner, Investigations, District Attorney, etc.)

6. The Coroner will be responsible for, and take custody of all the deceased's personal property and clothing.

B. RESPONSIBILITIES OF FACILITY STAFF

1. Staff Making Discovery
   a. Staff will secure or preserve the scene and all evidence.
   b. Staff will detain, identify and separate all suspects and witnesses.
   c. Staff will notify the Shift Supervisor.

2. Shift Supervisor (Sergeant)
   a. The Sergeant will notify the Facility Commander.
   b. The Sergeant will obtain the in-custody death kit and will respond to the scene.
   c. The Sergeant will complete the “In-Custody Inmate Death” checklist and forward the original to the Division Captain via chain of command.
   d. The Sergeant will coordinate activities with the investigating entity to ensure all inmates and other potential witnesses are interviewed.
      - In the event the investigating entity is unable to complete interviews in a timely manner, the Shift Supervisor shall assign sworn facility staff to interview witnesses.
      - Complete names, booking numbers, cell assignments and statements will be documented.
      - In all inmate deaths, which meet the definition of Department Policy 1.06.62, the Fatal Incident Protocol shall be invoked.
•Instances may arise when it would appear elements of the Fatal Incident Protocol are not met, but concerns arise. At this time the Facility Commander or designee may invoke protocol.

•In all inmate death cases, the Facility Commander/Sergeant will ensure County Risk Management is notified as soon as possible.

e. The Facility Commander will be responsible for the preparation and forwarding of the below documents to the Attorney General's Office at the listed address within ten (10) days of the inmate death.

•Incident Report

•D.O.J. "Death In Custody Reporting Form" (BCIA 713)

•Crime Report

•Forward to:

Sacramento, CA 94203-4270
Questions - (916) 210-4285
Facsimile: (916) 227-0427 or 227-3561

f. California Government Code (GC) Section 12525 requires the Attorney General to be notified within ten (10) days of the inmate death explaining the circumstances of the death.

g. A review team comprised of the below listed personnel will review all in-custody deaths within 30 days of an in-custody death.

Facility Commander
Health Services Administrator
County Counsel
Treating Physician
CAS Representative or Designee
Other health care and supervision staff relevant to the incident

h. The review will determine the following, but not limited to:

•Was appropriate clinical care provided

•Whether modification to policy(ies) and procedures are needed

•To identify issues that require further attention

i. The CAS Specialist will ensure completion of review and tracking for compliance.
3. Shift Supervisor or Designee
   a. In all cases of in-custody deaths, the Sergeant or designee shall make two complete copies of the contents of the inmate's booking folder, one for the CSB Administrative Services and one for Investigation Division.
   b. The Sergeant or designee will make copies of any housing unit documentation on the inmate, including diary entries, module logs, separation logs, etc., for CSB Administrative Services and Investigation Division.
   c. The Sergeant or designee will submit a memo to the Division Captain detailing the chronological set of events preceding the death of the inmate, to include a brief history of the inmate.

4. Custody Administrative Services
   a. CAS will retain the original booking folder, containing the Health Questionnaire and all other booking records on the inmate.
   b. CAS shall:
      • Maintain the original folder in CAS at Martinez Detention Facility indefinitely.
      • Notify California Board of Corrections of any juvenile injury or death within 10 calendar days after the death pursuant to 208.1 W&I and Title 15 section 1341.

C. DECEASED INMATE'S PERSONAL EFFECTS
1. The Coroner’s Division will secure the following:
   a. Any clothing on the inmate
   b. Any suicide note(s)
   c. Any medication(s)
   d. Any prosthetics, dentures, medical appliances (insulin pumps, etc.)
2. The Investigation’s Division will secure the following:
   a. All other clothing, personal property, cell property and money
   b. Any property not taken by the Coroner’s Division.

D. INCIDENT-CRIME REPORTS
1. A Deputy not involved in the incident as directed by the Shift Supervisor will initiate an incident and crime report.
2. The Investigation Division or Coroner’s Division as deemed appropriate will handle subsequent follow-up investigation.
   
a. Constructive Custody Inmate Deaths
   
   • The law enforcement jurisdiction at the death site will be responsible for initiating all criminal elements applicable "reports". The CAF Sergeant will submit a memo regarding the incident. The CAF Sergeant will assign an appropriate CAF staff member to complete the incident report.

3. The Shift Supervisor will initiate an "Unusual Incident Report".
   
a. The report must be routed via standard routing, prior to departing the Facility at the end of shift.

4. Facility Incident Reports and the initial Crime Report shall be completed and forwarded to the Facility Commander prior to the end of shift.

<tr>
<td>SUBJECT:</td>
<td>Automatic External Defibrillator (AED)</td>
</tr>
</tbody>
</table>

I. POLICY

A. The Automatic External defibrillator will be available for emergency treatment of victims exhibiting symptoms of sudden cardiac arrest who are unresponsive and not breathing.

B. Staff will be familiar with the use of the AED as part of their regular CPR training.

C. The device is not meant to replace staff trained in CPR and does not eliminate the need for basic CPR.

II. PROCEDURE

A. AED LOCATIONS

1. Martinez Detention Facility (MDF):
   a. 1st floor medical, on the wall near the copy machine.

2. West County Detention Facility (WCDF):
   a. Men’s (building 2) on the wall in the nurse triage room (left of dental)
   b. Building 8 on the wall in the nurse triage room.

3. Marsh Creek Detention Facility (MCDF):
a. Mounted on the wall in the staff office.

B. Medical Staff shall inspect the AED daily to ensure rescue readiness (green light is on.)

C. AED RESCUE PREPARATION

1. The AED will be carried to all Code 3 Medical situations.
   a. Responding staff will initiate CPR, if needed, until AED on site.

2. The operator should not open the AED until ready to use. The device is for short-term use only.

3. The operator will ensure that the green status indicator light is on (the AED is rescue ready.)
   a. If not, remove and reinsert the battery. (See device manual)

4. WARNING: Do not operate cell phones or wireless telephones within 1 meter (approximately 3 feet) of the AED (danger of incorrect rhythm recognition.)

D. AED RESCUE

1. The AED Operator will take the following steps:
   a. Ensure the skin site is clean and dry.
      • Shave if necessary
   b. Place electrodes on chest according to audible/written/pictured directions.
      • WARNING: Do not place electrodes directly over implanted pacemaker. Place at least one inch from device.
   c. Refrain from touching patient and allow AED to analyze cardiac rhythm.
d. If shock is advised by the AED, stand clear and push button to deliver shock.
   
   - This cycle will repeat until 3 shocks have been delivered or until a stable cardiac rhythm is established, whichever is less.
   
   - The 3-defibrillation shocks are delivered in a pre-programmed sequence.

e. Re-check for breathing, and if not breathing, give two breaths then check for pulse.

f. If no pulse, re-start CPR.

E. DOCUMENTATION

1. Medical staff will document all actions as soon as possible after each use and will notify the Facility Commander.

2. Custody Staff will complete an Incident
I. POLICY

A. The Shift Supervisor will coordinate and make the line-up room available to all law enforcement agencies in compliance with the following procedures.

II. PROCEDURE

A. SCHEDULE

1. In the event a request for the use of the line-up room is received, the requestor will be advised to contact the Shift Supervisor who will coordinate this activity.

2. Request for this service can be made by telephone, or in person Monday through Friday, between the hours of 0700-1500.

   a. At least five (5) days advance notice needs to be given.
      - This advance notice allows time to pick the appropriate inmates for the line-up, and ensure they will still be in custody on the day selected.

3. If circumstance indicates that a line-up needs to be conducted sooner, it will be at the discretion of the Shift Supervisor.

4. Line-ups will not be allowed when it is disruptive to the operation or affects the security/safety of staff or inmates.

5. The requestor of the line-up should be made aware of public visiting hours for inmates and of the possibility of any witness coming in contact with relatives/friends of the suspect.

6. It is suggested that line-ups will be scheduled between the following hours:

   a. MDF and WCDF: 0900-1100 hours and 1300-1500 hours, Monday through Friday.
7. Once a line-up is scheduled, the Facility Commander of the affected facility will be notified in writing of the event and what agency to expect.

8. The requesting agency is responsible for the coordination and escort of all witnesses.
   a. Under no circumstances will anyone involved in the line-up be allowed to enter the jail security area without proper authorization.

B. DEVELOPING THE LINE UP

1. Inmates (including the subject inmate) have a right to refuse to participate in the line-up for whatever reason.

2. It will be the responsibility of the agency/division conducting the line-up to ensure all legal issues involving a line-up are followed, i.e., defendants attorney present, suggestive wording to witness avoided, etc.

3. Only lineups involving in-custody inmates will be conducted inside a detention facility.
   a. Inmates selected shall be informed that participation is voluntary.
   b. Inmates will be brought to the line-up room as one group.
      • They will enter the line-up room in a straight-line formation.

4. To conduct a line-up, a group of five (5) subjects should be available. The following precautions should be observed:
   a. Subjects participating in the line-up should have the same general appearance as the suspect with respect to race, height, weight, hair color, clothing, etc.
   b. The suspect will be permitted to select his/her own position in the line-up. This will be done prior to the investigator conducting this viewing.
   c. The line-up members will be ordered not to talk while in transit to the line-up room, during the line-up, or while moving from the line-up room to the holding cell. If voice identification should be required, it will be done at the direction of the requesting agency. Line-up participants will be informed in advance that voice identification will be required.

5. The requesting agency should determine prior to the line-up if it will be necessary to have the line-up members wear hats, show certain physical areas or demonstrate any characteristics and provide them in advance.

6. The Shift Supervisor will select and direct deputies to conduct line-ups. These deputies will be responsible for selecting inmates to participate in the line-up.
   a. In the event it is impossible to match physical descriptions of subjects to a
suspect, the requesting agency will be notified in writing.

7. Numbered placards used to identify suspects are kept in the viewing room area and will be issued to the line-up members prior to entering the line-up room, out of the sight of witnesses. The suspect is to be allowed to select his/her position.

C. CONDUCTING THE LINE-UP

1. It is the policy of this division to have the requesting agency/or CCCSO investigation personnel conduct the line-up.
   
   a. The Detention Division will provide the availability of rooms, subjects for a line-up when needed, and other necessary assistance, such as security. This is done to limit the amount of duplicate reports, court time, etc., staff members could become involved in.

2. Deputies involved in the line-up must remember to exercise security and safety measures when dealing with witnesses. The possibility does exist that a witness could smuggle in a weapon in an attempt to injure a suspect.

3. A memorandum with attached Live Line-Up Log will be written by the deputy assigned to the line-up detail that will be forwarded to the Shift Supervisor for processing. A copy will be given to the person requesting the line-up and in the inmate’s booking.
I. POLICY

A. The Custody Services Bureau will establish policy and procedure for searching inmates that allows the following objectives to be reached:

1. To promote the safe, secure and orderly running of Sheriff’s Office detention facilities by locating contraband and deterring its introduction and movement.

2. To use the least intrusive type of search, depending on the suspected type of contraband and suspected method of introduction or movement.

3. To preserve the dignity of the inmate searched to the extent possible.

II. DEFINITIONS

A. STRIP SEARCH: A visual inspection of an inmate’s underclothing, unclothed body, breasts, buttocks, or genitalia after the inmate arranges or removes (partially or fully) his or her clothing.

B. VISUAL BODY CAVITY SEARCH: A visual inspection of an inmate’s stomach, rectal cavity, or vagina. It may involve the unclothed inmate bending at the waist, squatting, or lifting or spreading breasts, buttocks, or genitalia to allow visual inspection of an inmate’s stomach, rectal cavity, or vagina. The mouth is not considered a body cavity for these purposes.

C. PHYSICAL BODY CAVITY SEARCH: A visual body cavity search of an inmate plus a physical intrusion, manually or by instrument, into an inmate’s stomach, rectal cavity, or vagina.

D. CLOTHED PAT SEARCH: A tactile, visual, and/or scanner inspection of an inmate’s clothing (including hats, wigs, coats, pockets, socks and footwear), personal effects, hair, mouth, or ears. The inspection may include requiring the inmate to remove footwear, socks, hats, wigs, gloves, and outerwear (coats, jackets, sweatshirts, sweaters). The inspection may include requiring the inmate to turn his or her pockets inside out.

1. A male officer may not conduct a clothed pat search on a female inmate unless exigent circumstances exist and the supervising officer approves.

   a. If a cross-gender pat search is conducted on a female inmate, it must be documented in JMS.

2. A female deputy may conduct a clothed pat search on a male inmate as reasonably required.
E. CONTRABAND: For these purposes, contraband means weapons, money, controlled substances, or other items posing a threat to the security of a Sheriff’s detention facility.

F. CONVICTED INMATE: For these purposes, a convicted inmate is one who is currently serving a sentence and is incarcerated in a state or local detention facility.

III. PROCEDURE

A. INTAKE RECEIVING AREA

1. All arrestees and inmates entering the intake receiving area, for any purpose, will be clothed pat searched by deputies.

2. Clothed pat searches shall be conducted by deputies of the same sex as the person to be searched whenever possible.
   a. A male deputy may not conduct a clothed pat search on a female inmate unless exigent circumstances exist and the supervising sergeant approves.
      • If a cross-gender pat search is conducted on a female inmate, it shall be documented in JMS.
   b. A female deputy may conduct a clothed pat search on a male inmate as reasonably required.
   c. Pat searches of transgender or intersex persons may be conducted by a male or female deputy.
      • Split searches may be conducted by the deputy of the sex requested by the transgender person (if available) to search those parts of the body that are anatomically the same as the officer who is requested to do the search.
      • If a transgender or intersex pat search is conducted, it shall be documented in JMS.

B. SEARCHES OF PREARRAIGNMENT INMATES

1. All pre-arraignment inmates, whether arrested for an infraction, misdemeanor, or felony, will be searched before initially entering the jail population. Deputies will determine the appropriate kind of search to be conducted.

2. No pre-arraignment inmate will be subjected to a strip search or visual body cavity search unless there is reasonable suspicion that the inmate is concealing contraband that will be discovered in a search.

3. Reasonable suspicion must be based on specific and clear-cut facts related to the particular pre-arraignment inmate’s circumstances. The following factors are to be considered in determining whether reasonable suspicion exists:
   a. The nature of the inmate’s criminal offense. Consider whether the offense is associated with or involves weapons, violence, or controlled substances. The nature of the offense alone, however, does not necessarily constitute reasonable suspicion.
   b. The inmate’s appearance and conduct. Consider whether the inmate has made furtive movements or refused to cooperate.
   c. The inmate’s prior arrest and conviction record.
d. The inmate’s prior custody experiences, including custody status, classification, and discipline. Consider whether the inmate is known to staff as one who possessed contraband while in custody.

e. Other pertinent information.

4. No pre-arraignment inmate will be subject to a physical body cavity search absent a valid search warrant or a signed consent by the person searched, unless an immediate present danger exists that a concealed weapon will be used against a deputy or another person and no less intrusive alternative exists.

5. All pre-arraignment inmates may be subject to clothed pat searches.

C. SEARCHES OF POST-ARRAIGNMENT INMATES AND CONVICTED INMATES

1. No post-arraignment inmate or convicted inmate will be subjected to a strip search or visual body cavity search unless reasonable suspicion exists that the inmate is concealing contraband that will be discovered in a search.

2. Reasonable suspicion must be based on specific and clear-cut facts related to the particular post-arraignment or convicted inmate’s circumstances.

3. Reasonable suspicion may arise if a post-arraignment inmate or convicted inmate had a good opportunity to conceal contraband. A post-arraignment inmate or convicted inmate may be considered to have had a good opportunity to conceal contraband when any of the following have recently occurred:

   a. The inmate returns to his or her housing unit.

   b. The common area of the inmate’s housing unit was visited by non-sworn staff members (i.e. Kitchen staff, laundry staff, library staff, teachers, trades people, medical personnel, etc.)

   c. The inmate returns from physical contact with members of the public.

4. No post-arraignment inmate or convicted inmate will be subject to a physical body cavity search absent a valid search warrant or a signed consent by the person searched, unless an immediate present danger exists that a concealed weapon will be used against a officer deputy or another person and no less intrusive alternative exists.

D. CONDUCTING STRIP SEARCHES AND VISUAL BODY CAVITY SEARCHES

1. No strip search or visual body cavity search may be conducted without the prior written authorization of a supervising sergeant. The written authorization will state the factual reason(s) for conducting the search.

2. Deputies conducting strip and visual body cavity searches shall take all reasonable measures to protect the inmate from undue distress or embarrassment.

3. Each strip search and visual body cavity search must be conducted in an area of privacy so that non-participants cannot observe the search.

4. Only persons required to be present for a strip search or visual body cavity search may be present for the search.

5. Deputies conducting a strip search or visual body cavity search, or in the immediate vicinity of such a search, must be the same sex as the person searched, except licensed medical personnel required to be present.
6. Strip searches of transgender or intersex persons may be conducted by a male or female deputy.
   a. Split searches may be conducted by the deputy of the sex requested by the transgender person (if available) to search those parts of the body that are anatomically the same as the officer who is requested to do the search.
   b. If a transgender or intersex strip search is conducted, it shall be documented in JMS.

7. Strip or visual body cavity searches are not allowed for the sole purpose of determining the genital status of an inmate.

8. Deputies conducting a strip search or visual body cavity search may not touch the breasts, buttocks, or private parts of the person searched.

9. The hygiene and physical needs of the person searched will be reasonably accommodated.

10. A written record of every strip search or visual body cavity search will be made.
    a. The written record will identify who conducted the search, who was searched, when the search was conducted, where the search was conducted and what items, if any, were discovered or removed in the search.
    b. The written record of the search, along with the written authorization for the search, will be kept in the booking jacket with a copy to the Facility Commander via the chain of command.

11. The written record of a strip search or visual body cavity search shall be made available to the person searched upon his or her request for the record. The Facility Commander shall be notified whenever such a request is made.

E. CONDUCTING PHYSICAL BODY CAVITY SEARCHES

1. A physical body cavity search may only be conducted by licensed medical personnel in sanitary conditions (determined by licensed medical personnel).

2. Each physical body cavity search must be conducted in an area of privacy so that non-participants cannot observe the search.

3. Only persons required to be present for a physical body cavity search may be present for the search.

4. Deputies present during a physical body cavity search must be the same sex as the person searched.

5. Physical contact with the person searched shall be limited to only that which is necessary to carry out the search.
   a. Deputies shall comply with Sheriff’s Office Policies and Procedures 1.06.61, *Use of Force*, if force is necessary due to a lack of cooperation by the person to be searched.

6. The hygiene and physical needs of the person searched shall be reasonably accommodated.

7. A written record of every strip search or visual body cavity search will be made.
a. The written record will identify who conducted the search, who was searched, when the search was conducted, where the search was conducted and what items, if any, were discovered or removed in the search.

b. The written record of the search, along with the written authorization for the search, will be kept in the booking jacket with a copy to the Facility Commander via the chain of command.

c. The written record of a strip search or visual body cavity search shall be made available to the person searched upon his or her request for the record. The Facility Commander shall be notified whenever such a request is made.

F. PROCEDURE FOR DRESSING INMATES WHO ARE NOT BEING STRIP SEARCHED.

1. The deputy will inspect the dressing room for contraband.

2. The inmate will be given a clothing bag and told to enter the dressing room and to put their clothes in the bag.

3. The inmate will be told to knock on the door when their clothes are in the bag.

4. The deputy will take the bag and scan the room to ensure no contraband is in the room or street clothes remain on the inmate.

5. The deputy will give the inmate jail issued clothing and will close the door.

6. The inmate will be told to dress in the jail issued clothing and exits the room when dressed.

G. PROCEDURE FOR DRESSING INMATES WHO ARE BEING STRIP SEARCHED.

1. The deputy will inspect the dressing room for contraband.

2. The deputy will enter the dressing room with the inmate and instruct the inmate to remove his/her clothing.

3. The deputy will physically inspect each item of clothing as inmate removes them.

4. The deputy will put the inmate’s clothing in the inmate’s assigned clothing bag.

5. The deputy will conduct a visual body cavity search.

6. The deputy will give the inmate jail issued clothing and the deputy will exit the room.

7. The inmate will be told to dress in the jail issued clothing and to exit the room when they’re dressed.

H. WHEN SEARCH EVIDENCE MAY LEAD TO NEW CHARGES

1. When a search of an inmate yields contraband that may lead to the filing of new criminal charges against the inmate, staff shall collect, control, and handle the evidence in accord with Sheriff’s Office Policies and Procedures 1.06.35, Evidence Handling.

2. The officer obtaining the evidence shall write a report and submit it to the District Attorney’s Office for review about whether a criminal complaint should issue.

3. Ensure the new charges are listed and included in the inmates booking.

I. POLICY

A. Detention Division officers will search inmates to promote the safe, secure, and orderly running of Sheriff detention facilities by locating contraband and deterring its introduction and movement.

B. Techniques used to locate and deter contraband shall be through the least intrusive type of search under the circumstances, and preserving the dignity of the searched inmates to the extent possible.

II. EQUIPMENT COMPONENTS

A. POWER SWITCH: Setting the switch to the “On” position will cause a brief audio tone and red LED alarm to activate to signal the unit is ready for use.

B. AUDIO ALERT: The speaker provides a clearly audible sound whenever metal is detected. When the earphone plug is installed, the alert will sound only through the
earphone. The audio alert will change from a strong steady tone to a fluctuating tone to indicate the need for battery replacement.

C. LED ARRAY:

1. Green LED-Power is on.
2. Amber LED-Battery Warning. Approximately one-hour of power remains to the unit.
3. Red LED-Metal detection alert

D. INTERFERENCE ELIMINATION BUTTON: Press and hold this button to decrease sensitivity to a level that does not respond to interfering metal objects.

III. PROCEDURE

A. GSS Detection Principles and Capabilities

1. The Garrett Super Scanner (GSS) is an active hand held metal detector with very high sensitivity to all metals, including ferrous, non-ferrous and stainless steel.
2. Detection range of the GSS is dependent upon the size and the conductivity of the metal object.
   a. Larger objects will be detected more quickly.
3. The GSS is factory preset for maximum sensitivity.
   a. When metal objects are detected, a sharp, audible signal and a red LED will activate.
      • The audio alert may only be silenced by inserting an optional earphone into the audio jack.
   b. Should nearby metal objects cause interference during a particular scan, the operator should depress and hold the Interference Elimination Button to reduce the scanners level of sensitivity.
      • This will allow the operator to scan objects with greater precision.

B. Operator Scanning Techniques

1. Move the scanner within two (2) inches from the person being inspected.
2. The operator should scan person(s) being inspected in accordance with the following diagram:

3. When metal is detected adjacent to the scan area:
   a. Audio alert will increase sharply.
   b. The red alert light will illuminate.

CHAPTER:  
Custody Operations

SUBJECT:  
Inmate Clothing and Bedding

I. POLICY

It is the policy of the Office of the Sheriff to issue all inmates housed in Contra Costa County Detention Facilities clothing that is clean, freshly laundered, in good repair, and free of vermin. Inmates will be afforded the opportunity to launder their clothing and linen at least once each week. Each item of clothing and linen issued is Sheriff's Property for which the inmate shall be held accountable.

II. PROCEDURE

A. CLOTHING AND BEDDING ISSUE

1. All inmate clothing and linen will be issued at the Martinez Detention Facility (MDF). The MDF DSW Supervisor is responsible for ensuring all issued inmate clothing is clean, serviceable and free of vermin.

2. Pillows and blankets will be issued by the facility where the inmate is housed.

3. Inmates will be issued the following clothing, linen, and bedding items. A sufficient amount of undergarments will be issued to allow for laundry exchange on a weekly basis.

   a. Towel 
      2 each

   b. T-shirt 
      3 each

   c. Underwear (Female: Bras and panties) 
      (Males: Boxer shorts) 
      3 each

   d. Socks 
      3 pair

   e. Uniform Shirt 
      3 each
f. Uniform Trouser (Pregnancy pant for pregnant inmates) 3 each

g. Sheets 2 each

h. Pillowcase (When issued a pillow) 1 each

i. Blankets 2 each

j. Sandals 1 pair

k. Laundry Bag with inmate name tag 1 each

4. When an inmate is dressed out, the Deputy will issue the inmate a mesh clothing bag with the inmate's name and booking number written upon the tag. This will serve as the inmate's clothing bag until their release from custody.

a. Nylon tags with metal grommets will be secured to the bottom of the mesh bag using a Zip-tie.

b. The inmate’s name will be written on one side of the tag using a black marking pen.

c. Once the inmate is no longer in custody, the name will be crossed off with a black marking pen and the new name written on the opposite side of the tag.

d. Once both sides of the tag have been used, the tag will be cut off the bag, discarded, and a new tag secured to the bag.

5. Inmates are responsible for maintaining their clothing, linen, bedding, and clothing bag during their time of incarceration. When a Housing Deputy verifies that a county-issued item, is lost or damaged through no fault of the inmate it shall be replaced without charge to the inmate.

6. MDF DSW staff will be responsible to stock the property room with the net bags and clothing. DSWs will be responsible for filling the net bags with the proper amount and size of clothing. The net bags will contain two sets of clothing. The Deputy will give the inmate one set of clothing during the dress out process, for a total of three issued sets.

7. Upon arrival at a housing unit, all inmates will be assigned a serviceable mattress. They may request a pillow and pillowcase from the facility DSW.

B. INMATE CLOTHING

1. All inmates, regardless of status or work assignment, will not possess more than three sets of clothing. MCDF inmates will be allowed for four sets of clothing. Excess clothing, linen, or bedding will be considered contraband.

2. Inmates shall be appropriately clothed at all times, consistent with their housing assignment, work, or program activities as directed by staff. Inmate clothing will
be worn in the manner in which it was manufactured to be worn. Inmates will not alter or tailor issued clothing.

3. Facility Commanders may provide additional seasonal, labor, and safety clothing as required. Facility Commanders are responsible for developing procedures to ensure these clothing items are routinely cleaned and are recovered upon inmate release.

C. INMATE CLOTHING REPLACEMENT

1. Inmates shall not alter or dispose of damaged or worn out county-issued clothing in any manner without specific authority and direction to do so by staff.

2. Inmate clothing that becomes damaged or worn-out through no fault of the inmate, will be replaced without cost to the inmate. Inmates who have damaged or worn out items will complete a written request form identifying that a clothing item requires replacement. The inmate request form will be addressed and forwarded to the Facility DSW Supervisor, following approval by the module deputy.

3. If replacement at county cost is approved, the damaged clothing items will be replaced on a one-for-one basis. Damaged clothing items will be removed from the housing unit for destruction.

D. CLOTHING AND BEDDING TURN-IN

1. Prior to release, inmates will deposit all issued clothing and linen in the designated carts in the release area. Inmates will not retain any county-issued clothing upon their release.

2. Inmates will be held accountable for missing clothing, linen, and bedding items.

E. LAUNDRY GUIDELINES.

1. Each Facility Commander is responsible for publishing and posting a laundry schedule for their facility. Facility Commanders will ensure that laundry is collected for each inmate at least once each week. Facility Commanders may provide extra laundry service for inmate workers, but will not provide additional clothing. The facility laundry schedule will include the dates for blanket exchange, which will be at least once every three months.

2. All Inmates will participate in the laundry exchange process.

3. Federal Detainees shall be given the opportunity to exchange their clothing three (3) times per week.

F. LAUNDRY EXCHANGE
1. On clothing exchange day, inmates will be directed to fill their laundry bags with their dirty clothing, towels, and linen. Blankets will only be collected on special laundry days.

2. Inmates will be directed to retain one set of clothing for wear during the day.

3. Housing Unit Deputies will use a housing unit roster to record the clothing bags that are collected for cleaning from inmates.

4. Inmates with medical conditions, whose clothing is considered to be contaminated or infectious, shall have their clothing separated from general population clothing. Contaminated clothing will be collected and handled in accordance with CCCSO CSB Policy 2.15.08 - Contaminated Clothing, Bedding and Linen.

5. Housing Unit Deputies will apply a zip-tie on the inmate clothing bag to ensure the bag is secure. Clothing bags will then be placed in laundry carts for removal from the housing unit by laundry personnel.

6. Inmate laundry will be washed and dried in the bag provided by the inmate, ensuring that inmates receive their same clothing in return. Once laundered, the clothing bags will be returned to the housing unit by laundry personnel.

7. Housing Unit Deputies will use the roster created in (4) above to verify that all inmate clothing bags have been returned from the laundry process. Housing Unit Deputies will remove and discard the zip-ties from the laundry bags and return the clothing bag to the designated inmate.

G. BLANKET EXCHANGE

1. Facility Commanders will ensure that a blanket exchange is conducted at least once every three months.

2. The Facility DSW Supervisor is responsible for the organization and the conduct of blanket exchange within each facility. Typically DSW staff will deliver two clothing carts at 0700 on the day of the exchange. All dirty blankets are placed in these carts. The DSWs will pick them up, wash, dry and return them to the module by 1500 hours.

## I. POLICY

A. It is the Module Deputies' responsibility to ensure the safety/security of the facility during the ordering/distribution of commissary.

B. Commissary must be ordered at the kiosk in the housing units or by Commissary forms.

## II. PROCEDURE

A. Inmate Commissary Orders

1. **Martinez Detention Facility**
   
   a. Morning shift deputies will provide commissary order forms every Wednesday evening to any inmates requesting commissary.
   
   b. Evening shift deputies will collect all completed commissary order forms no later than 2200 hours every Wednesday night.
   
   c. Morning shift deputies will forward all commissary order forms to the kitchen staff by placing them on the meal service cart immediately following Thursday morning service.

2. **West County Detention Facility**
   
   a. Day shift deputies will provide commissary order forms every Monday afternoon to any inmates requesting commissary.
   
   b. Evening shift deputies will collect all completed commissary order forms no later than 2145 hours every Monday evening.
   
   c. Morning deputies will place completed commissary order forms in the mailroom slot marked “CANTEEN”.
3. **Marsh Creek Detention Facility**
   
a. Inmates must submit their commissary orders no later than every Monday at 2200 hours.

b. Deputies will collect the orders from the box at the deputy station and ensure that all forms are signed and have a booking number on them.

c. Deputies will place the forms on the clerk’s desk for delivery to Canteen on Wednesday morning.

d. Canteen will check in to the facility office on Wednesday evening. Deputies will escort Canteen through the number 5 gate.

e. After count has cleared, deputies will set up a table at the dorm entrance next to the deputy station.

f. Deputies will call inmates to the table to receive their orders.
   - Inmates must present their identification, settle any disputed items and sign for all purchases.
   - All commissary sales are final after the inmate leaves the table.

4. Adjustments may be made to the commissary schedule due to holidays, etc.

B. **Distribution of Commissary**

1. All housing units will remain in lockdown status every evening of commissary following evening meal service thru completion of commissary distribution and cleanup.

2. Housing unit deputies will conduct a contraband search and secure the programs room scheduled for commissary operations prior to commissary staff arrival.

3. Housing unit deputies shall allow the commissary service to enter the housing unit at their request at any time between 1900 and 2300 hours.

   a. Exceptions:
      - Facility emergencies
      - Conditions on the housing unit do not present a safe environment for commissary staff.

   b. Housing unit deputies will immediately notify the custody sergeant of any situation that prevents commissary staff from entering the housing unit at the requested time.
4. Housing unit deputies will place commissary staff in the scheduled program room.

5. Housing unit deputies will control the release and return of inmates to their cells.
   a. Housing Unit deputies will ensure that number of inmates being released is sufficient enough to complete commissary in a timely manner without overwhelming commissary staff or creating an unmanageable situation for the deputy.

6. Commissary staff will distribute commissary to the inmates.
   a. Housing Unit deputies must allow sufficient time for each inmate to inventory their order.
   b. Each inmate will be responsible for conducting an inventory and signing for his or her order.
   c. Any dispute of the inmate’s commissary order must be addressed at the time the order is received.
   d. Any dispute of the inmate’s commissary order that cannot be resolved in a reasonable time must be challenged by Inmate Request Form.
      • Housing unit deputies will provide the inmate with an Inmate Request Form if commissary staff acknowledges a dispute over an order.
      • Housing unit deputies will instruct inmates to direct their grievance to the Director of Food Services.

7. Inmates are not be allowed to keep the plastic bag that their commissary is delivered in.

8. Inmates must return directly to their cell upon receipt of commissary.

9. Commissary staff will be responsible for all undelivered items and will remove them from the facility.
I. POLICY

A. Meals will be served under the supervision of staff in a manner that ensures food safety, proper handling, adequate allocating, equal treatment of inmates and overall waste reduction.

B. Inmates will be provided three meals, at least one of which will be hot, served at regular meal times during each twenty-four (24) hour period.
   1. There will be no more than fourteen (14) hours between the evening meal and breakfast except in exigent circumstances.
   2. Supplemental food will be provided if the interval between meals exceeds fourteen (14) hours.

C. Meals at Marsh Creek Detention Facility will be served at a central dining room. All other facilities will follow the procedures contained within this policy.

II. DEFINITIONS

A. Transport Log - Detailed information regarding all food to be served at each meal, the portion sizes, microwave instructions, utensil counts, provision for meal evaluation responses and leftovers.

III. PROCEDURE

A. Inmate Meal Service Orders
   1. The cook responsible for loading the meal carts for each meal will contact the housing unit deputy to confirm the inmate count.
   2. The housing unit deputy will advise the cook how many meals are needed
      a. The supervising cook will contact the Custody Sergeant regarding any discrepancies in the housing unit count.
3. Any special food handling/deviation from a menu for a housing unit must be requested by the Facility Commander.

   a. Example: Emergency situations on a housing unit requiring bag lunches be served

B. Inspection of Meal Carts-Supervising Cook

1. The supervising cook will count the food portions on each meal cart to ensure that the number of portions sent to each housing unit is adequate to feed the number of inmates housed on the housing unit.

2. The supervising cook will record the meal count on the Transport Log which will accompany the meal cart to each housing unit.

3. The supervising cook will check each meal cart for utensils/flatware prior to the carts being moved to the housing units.

4. The supervising cook will sign at the top of the Transport Log on each cart verifying that the contents of each cart is accurate to feed the inmate count for the housing unit.

5. The supervising cook or Food Service Director will conduct random food safety and service checks on the inmate meals and record them on a Food Safety and Service Inspection Log.

   a. Food safety and service checks will verify the quality of food being served for taste, nutrition, and visual appeal.

   b. The food safety and service checks will occur a minimum of twice per week.

   c. The Food Service Director will audit the Inspection Logs monthly to ensure compliance.

C. Inspection of Meal Carts-Deputies

1. The housing unit deputy will count serving utensils, flatware and food items in the meal cart to verify that these items correspond with the Transport Log.

2. The housing unit deputy will conduct a thorough inspection of the entire meal cart for contraband secreted within the cart and/or meals.

3. The housing unit deputy will sign the log next to the cook's name if the count corresponds.

   a. The housing unit deputy will contact the cook for additional food/flatware should the count not correspond and make notation on Transport Log along with signature.
4. The supervising cook will provide additional food should the count not correspond.

D. Preparation of Meals

1. The Housing Unit Deputy will move the meal cart from the sally port to the serving counter.

2. The Housing Unit Workers will remove the bread, salads, desserts, flatware and serving utensils from the meal cart and place on the tables provided.

3. The Housing Unit Workers will be responsible for the following duties:
   a. Set up the inmate trays, i.e., flatware, napkins, salad, milk and desserts
   b. Serve all food items on the menu including beverages
   c. Heat entrees in each microwave oven provided; use the heating specification indicated on transport log; remove heated entrees from the microwave oven and place on the inmate's tray.

E. Distribution of Meals

1. The Housing Unit workers, under the supervision of the Housing Unit Deputy will serve the meals.
   a. The housing unit workers shall not be permitted to eat their meal until food services to the entire unit is complete.

2. The Housing Unit Deputy will instruct all Housing Unit workers to:
   a. Contain/cover hair with hats
   b. Wear plastic gloves at all times during the preparation or handling of meal service.
   c. Wash their hands upon reporting to duty, after using toilet facilities, after picking up items off the floor, after handling garbage or after any other potentially unsanitary practice.

3. Housing unit deputies will control the distribution of meals to the cells to a rate that allows the deputy to properly supervise and observe the housing unit. Inmates in locked sections of “A”, “B”, “C”, “D”, “E”, “F”, “Q” and “M” housing units will be served meals through the food ports.
   a. All food port doors will be closed and locked except during meal service and pill call. Food ports are to be opened only during the presence of a Deputy. If the Deputy leaves the door, the food port is to be closed. During the delivery of food and other items by the Deputy, the trays, food and other items are to be passed through the opened food port, and the food port closed immediately afterward.
b. Food Port doors will only be used for pill call when it has been determined by custody staff that administration of medication via open cell door is a threat to the safety and security of staff, inmates or the facility.

c. Eight (8) to ten (10) food ports opened at one time is considered to be a reasonable number during meal supervision, but is flexible based on the Deputy’s judgment, experience and capabilities.

d. D Module Meal Distribution-B and C Sides.

1. Housing Unit Workers from the "A" Section will act as tray runners for "B" and "C" Sections. Day shift Deputies will select them after checking with Classification. Selection will exclude escape risk inmates. The Floor Deputy must serve “B” and “C” Section inmates.

2. Inmate workers shall not serve "B" and "C" Section.

e. F Module Meal Distribution-F/B and F-Iso Sides

f. Module Workers from the F/A side will prepare all F/B side and F-Iso meals. Using the food ports, the F/B module workers will serve the F/B cells. The Housing Unit Deputy must serve the F-Iso cells.

g. Housing unit deputies will immediately notify the custody sergeant of any situation that prevents timely meal service.

4. Housing Unit deputies must allow sufficient time for each inmate to inventory their order.

a. Inmates must have a minimum of fifteen (15) minutes to consume their meals.

5. Inmates in a legal visit or medical/mental health appointment during meal service will receive their meals as soon as possible after completion of their visit or appointment.

a. Upon an inmate’s request, the inmate will be allowed to take his/her meal into the legal visit or medical/mental health appointment.

F. Post Meal Service

1. The housing unit deputy will ensure the following occurs:

a. All trays have been removed from each cell and/or eating area.

b. All excess food/food not consumed during meal service is removed from cells and disposed of.

c. Salt and peppershakers are returned to the pantry cabinet.

d. All tables are cleaned
e. Flatware, plates and useable leftovers are placed into the food meal cart.

f. Empty large wastebaskets and place plastic containers with dry garbage for removal from Housing Unit. The plastic containers with wet garbage are to be placed in the tote box and then into the meal cart.

g. The designated tables used for food service are returned to their original location.

h. Pantry area and equipment, i.e., microwave oven, coffee machine, juice machine, etc., are cleaned.

i. Pantry linoleum is mopped and carpet area is vacuumed.

j. All other areas used for meal service have been cleaned and secured.

k. The food cart is returned to the sally port with:
   - All metal trays
   - All excess items
   - Meal Log

l. Housing unit workers will be allowed to eat after all post service meal requirements are met.
   - Housing unit workers may not store excess food in the servery area or in their cells. Any violations may be handled through the inmate disciplinary process.

m. Foodports closed after meal service.

G. Meal Service-Intake and Courts Holding

1. Intake
   a. A new inmate received too late for regular meal service (the Shift Supervisor will determine if the inmate must be fed), will be given appropriate foods according to the time of arrival at the facility.

   b. Inmates already in custody, but are detained in Intake or Court Holding during lunch and dinner meal servings, will be provided a bag meal.

2. Courts Holding
   a. The Transportation/Booking Deputy will:
      - Unlock group holding cells
      - Advise inmates to form a single line for their bagged meal.
Advise inmates to place all refuse in the container provided after the meal.

H. Meal Service-March Creek Detention Facility (MCDF)

1. MEAL COUNT FOR INMATE POPULATION
   a. On a daily basis, the lead cook will obtain the inmate count from the Administration Office.

2. MEAL SERVICE
   a. Meal Service will take place at the following times:
      • 0620 Breakfast
      • 1215 Lunch
      • 1700 Dinner
   b. All dorms will be fed in order of their placement in the weekly inspection.
   c. The shift supervisor will assign at least two Deputies to supervise the movement of inmates to/from the dining hall as well as meal service to ensure the orderly flow of the line and the overall peace and quiet of the dining room.
      • Inmates will walk in a single file line while going to/from the dining hall.
      • Inmates are not permitted to loiter or roam to/from the dining hall.
      • All inmates shall be required to go to the dining hall for meal service regardless of whether they choose to eat or not.
   d. Kitchen Deputies:
      • The Kitchen Deputies will monitor the inmates in the dining room to ensure the inmates, upon finishing their meal, remove their plastic ware, plates, trays and refuse, and place them in the designated receptacles prior to leaving the dining room.
3. KITCHEN HOUSEKEEPING AFTER MEAL SERVICE

a. Upon completion of the meal, each inmate will:

- Dispose of leftovers, scraps and trash into the trash cans, place tray, plastic ware, plates, trays and refuse and place them in the designated receptacles, prior to leaving the dining room.

- No food is to be removed from the kitchen.

- No food, fruit or milk is to be stored in lockers or bed areas

  - Exception: Items purchased at Commissary.

I.  POLICY

A.  Each housing floor/unit will maintain an inventory list of the cleaning tools assigned to that housing floor/unit.

II.  PROCEDURE

A.  CLEANING TOOL CONTROL

1.  All cleaning materials will be secured in the housing floor janitor’s closet when not in use.

B.  CLEANING TOOL INVENTORY

1.  At the beginning of each shift, Housing Unit Deputies will conduct an inventory of the cleaning tools assigned to that housing floor/unit will be taken.

   a.  The inventory checklist will be completed showing the results, and will be checked against the previous shift’s inventory for consistency.

   b.  Any cleaning tools which are broken, damaged, etc. will be noted on the comments section of the inventory list.

      •  The disposition of the broken item will be noted (i.e. out to trash, etc.).

2.  The inventory checklists will be maintained on a clipboard located inside the janitor's closet.

3.  Completed inventory lists will be maintained for one month.  The previous month’s lists will be forwarded to the CSB Custody Administrative Services Office for that facility.

   a.  CAS will note any discrepancies and ensure compliance with inventory accountability.
C. REPORTING

1. Security staff will immediately notify their Shift Supervisor if the inventory shows an item lost or missing.
   a. A search of the immediate area in which the tool was last seen will be initiated.
   b. A search of the housing unit will be conducted at the discretion of the Shift Supervisor.

2. Broken or damaged tools recovered during a search will be checked against the inventory lists.

3. The appropriate documentation (reports, memos, etc.) will be generated at the direction of the Shift Supervisor.
I. POLICY

A. The Department recognizes the value and need for the use of less lethal weapons under certain circumstances.

B. The use of such weapons will follow the Department’s policies and procedures pertaining to the use of force.

II. DEFINITIONS

A. Cover Officer: A cover Deputy or Supervisor shall be assigned to the Deputy deploying the impact Projectile Weapon.

B. Sponge Round: The Def-Tech eXact Impact foam sponge round. (Blue Tip)

C. Gas Round: The Direct Impact OC round. (Orange Tip)

D. Marker Round: The Direct Impact marking round. (Green tip)

E. 40mm Launcher: The Defense Technology’s 40mm Launcher.

III. PROCEDURE

A. TRAINING

1. Initial instruction in the weapons system will include a block of instruction covering nomenclature, function, use of force and live fire/qualification of the 40mm less lethal system.

B. GENERAL PROVISIONS

1. The less lethal weapon system is intended for use by those who are trained and qualified in the weapons system to defend themselves and the public against combative, assaultive, resisting, and or violent individuals.
2. Upon assessing and determining the need for the impact projectile weapon, the Deputy will request a Supervisor to respond. Additionally, the Deputy will advise the Supervisor of the circumstances. The Supervisor if available, should make an assessment of the circumstances and situation. In determining whether or not the impact projectile weapon system should be used, the Supervisor, or Deputy when no Supervisor is available will consider the following:
   
a. Tactical considerations indicate that the use of impact projectile system would provide greater officer safety and reduce the likelihood of serious or lethal injury to the suspect(s).

3. Impact projectile weapons shall be treated the same as firearms for safety practices. Refer to Office of the Sheriff Policy Section 1.07.12, Firearms Safety and Qualification for firearm safety practices.

C. DEPLOYING LESS LETHAL ROUNDS

1. All users of the 40mm less lethal system must remember that any use of force must be objectively reasonable and necessary to protect themselves and others or to overcome resistance to lawful authority.

2. Whenever possible, the deploying officer will warn the intended target of the weapon’s eminent use in an effort to have him/her surrender to the officer’s lawful authority.

3. Prior to deploying the sponge round, the deploying sergeant/deputy will give a loud, clear warning to other personnel at the scene.
   
a. This is done to advise all personnel of the impending use of force so they may quickly move to affect the subsequent physical control of the subject and to minimize the potential of sympathetic weapons fire.

4. Primary target areas for the Exact Impact rounds will be lower torso, buttocks, thighs and lower leg area.

5. Secondary target areas will include the upper torso, arms, elbows and hands.

6. The groin, head and neck should be avoided at all times. The Sponge Rounds should not be deployed at distances of less than 10 feet.

D. HANDLING OF INJURED SUBJECTS

1. In all cases where the sponge round is deployed, medical staff will respond to evaluate. If medical is not available, the subject will be transported to a medical facility for evaluation and treatment.

E. DOCUMENTATION

1. All uses of the less lethal weapons system will be documented in a department incident report.
2. The report should minimally contain the number of less lethal rounds fired, the type of round fired, the distance they were fired from, the impact area, the injuries caused and actions taken to treat those injuries.

3. Photos of injuries will be taken and submitted into evidence.

4. When possible, the expended less lethal projectile will be recovered and placed into evidence.

F. STORAGE AND MAINTENANCE

1. Maintenance of the 40mm weapons system is the responsibility of the Facility Commander.

2. Maintenance of the 40mm weapons system will be performed by the department armorer.

3. Routine maintenance and repairs will be documented and a copy of all records maintained in the armorer’s files.
I. POLICY

A. The Prison Rape Elimination Act (PREA) was signed into law in 2003 and became effective in December, 2012. Final Standards were enacted in May, 2014 to address the prevention and elimination of sexual assault and rape in correctional institutions. PREA applies to Federal, State, and Local institutions.

B. The Contra Costa County Office of the Sheriff is committed to providing a safe, humane and secure environment free from sexual misconduct and shall maintain a zero tolerance towards all forms of sexual abuse and/or harassment in all of its jail and holding facilities. The Office of the Sheriff will ensure all policies are adhered to in an effort to prevent, detect, and respond to all forms of sexual misconduct, whether it is being perpetrated by an inmate or staff member.

C. This policy will be enforced by ensuring all employees, contractors, volunteers, visitors, or inmates within the Custody Services Bureau comply with the PREA standards. Staff members found to have sustained allegations shall be subject to disciplinary actions, including termination. Further, all sustained allegations will be criminally investigated and forwarded to the Contra Costa County District Attorney’s Office for review.

D. It shall be the policy of the Office of the Sheriff to thoroughly investigate and immediately address all allegations of sexual assault, sexual abuse, and sexual harassment of those in our custody, to include criminal and administrative sanctions as appropriate.

E. The standards apply to any person incarcerated or detained in a lockup or holding facility, regardless of adjudication status. The standards account in various ways for the inmates’, detainees’, and residents’ individual vulnerabilities.

F. This policy shall be in accordance with PREA, which makes prevention and detection of sexual assault and sexual abuse a top priority.

G. Any employee, volunteer, or contractor who has received information that an inmate has been or may be subjected to any form of sexual abuse or sexual harassment, whether received verbally or in writing, shall immediately notify the designated PREA Compliance Manager.
II. DEFINITIONS

A. CROSS-GENDER SEARCHES: A search of a person by a deputy of the opposite sex.

B. GENDER: A socially constructed concept classifying behavior as either “masculine” or “feminine,” unrelated to one’s external genitalia.

C. GENDER EXPRESSION: A person’s expression of his or her gender identity, including appearance, dress, mannerisms, speech, and social interaction.

D. GENDER IDENTITY: Distinct from sexual orientation, and refers to a person’s internal, deeply felt sense of being male or female.

E. GENDER NON-CONFORMING (GNC): A person whose appearance or manner does not conform to traditional societal gender expectations.

F. INTERSEX PERSON: A person whose sexual or reproductive anatomy or chromosomal pattern does not seem to fit typical definitions of male or female. Intersex medical conditions are sometimes referred to as disorders of sexual development.

G. TRANSGENDER: A person whose gender identity differs from their sex at birth.

H. TRANSEXUAL: A person whose physical anatomy does not match his or her gender identity and seeks medical treatment (sex reassignment surgery, hormones or a combination).

I. TRANSVESTITE: A person who engages in gender non-conforming behavior, such as adopting the gender expression of the opposite sex for purposes of sexual or emotional gratification, but does not necessarily consider his or her gender identity to be different from his or her sex.

J. LGBTI: Acronym for a group of sexual minorities including lesbian, gay, bisexual, transgender, and intersex individuals.

K. NEED TO KNOW: A criterion for limiting access of certain sensitive information to individuals who require the information to make decisions or take action with regard to an inmate’s safety or treatment or to the investigative process.

L. PREA COMPLIANCE MANAGER: Under the direction of the PREA Coordinator, the PREA Compliance Manager will oversee day-to-day PREA compliance in his or her assigned facility.

M. PREA COORDINATOR: An upper level manager who will be responsible for guiding and coordinating the Bureau’s effort to comply with PREA.

N. SEXUAL ABUSE: Any form of sexual activity between two or more persons, if the victim does not consent, is coerced into such an act by overt or implied threats of violence, or is unable to consent or refuse. This includes inmate on inmate and staff on inmate.

O. SEXUAL HARASSMENT: Any form of repeated and/or unwelcomed sexual advances,
requests for sexual favors, or verbal comments, gestures, or actions of a derogatory or offensive sexual nature towards an inmate. This includes inmate on inmate and staff on inmate.

P. STAFF MEMBER: Any employee, volunteer, or contractor working within any jail facility, who may have contact with inmates during the course of his or her assigned duties.

Q. TRANSGENDER PERSON: A person whose gender identity does not correspond to that person’s biological sex assigned at birth.

R. FOUNDED ALLEGATION: An allegation that was investigated and determined to have occurred.

S. UNFOUNDED ALLEGATION: An allegation that has been investigated and was determined not to have occurred.

T. UNSUBSTANTIATED ALLEGATION: An allegation that was investigated and the investigation produced insufficient evidence to make a final determination as to whether or not the event occurred.

III. PROCEDURES

A. TREATMENT OF LGBTI/GNC, DISABLED INMATES, AND DETAINEES

1. Cross-Gender pat searches of female inmates and detainees (absent exigent circumstances) are prohibited per CSB policy 2.08.39.

2. Cross-Gender strip and visual body cavity searches are prohibited except when licensed medical personnel are required to be in attendance. All strip and visual body cavity searches shall be conducted in accordance with CSB policy 2.08.39.

3. Pat searches and strip searches may not be performed to determine the genital status of inmates or detainees.

4. Disabled inmates shall be provided equal opportunity to participate in or benefit from all aspects of policies to prevent, detect, and respond to reported sexual abuse and sexual harassment. The same opportunities shall be provided to those inmates with limited English language skills.

5. Inmates acting as interpreters, inmate readers, or other types of inmate assistants should not be used to determine a victim inmate’s safety, assist with first responder duties, or investigate allegations, except in limited circumstances where an extended delay in obtaining an effective interpreter could compromise such duties.

6. Housing assignments of LGBTI/GNC inmates may not be determined based solely on being identified as a member of the protected group(s). Inmates at high risk for sexual victimization may not be placed in involuntary segregated housing unless an assessment of all available alternatives has been made and a determination has been made that there are no available alternative means of
separation from likely abusers. Classification of LGBTI/GNC inmates shall be made in accordance with CSB policies 2.09.02-2.09.03.

7. If an involuntary segregated housing assignment is made for an LGBTI/GNC inmate, the Classification Unit shall perform a review every 30 days to determine whether there is a continuing need for separation from the general inmate population.

8. Transgender and intersex inmates will be allowed to shower at a separate time from other inmates on the housing unit. Times allowed for this will be based on module activities and the safety and security of the facility.

B. PREVENTION

1. Inmate Orientation
   a. All new inmates will receive orientation information during the intake process, which includes PREA prevention and reporting information.
   b. Inmates will receive orientation information when transferred to a different facility, which includes PREA prevention and reporting information.

2. Intake deputies will perform an initial screening of inmates for potential sexual abusers and/or potential sexual victims per CSB Policy 2.12.01.
   A. If the initial PREA screening identifies a potential abuser or potential victim, the deputy will make a classification referral further evaluation
      • PREA evaluations and documentation collected by the classifications deputies will be maintained by the Classifications Unit.

3. Awareness / Prevention
   a. Inmate phone hotlines (speed dial numbers) and PREA reporting information shall be posted on every housing unit.
   b. PREA information shall be included in the Inmate Handbook.
   c. Random room checks shall be performed by housing unit deputies, at least twice per hour in compliance with Title 15 requirements and CSB Policy 2.08.17.
   d. Facility cameras are located in housing and intake areas, where possible.

4. Module announcements shall be performed to ensure the privacy of inmates. Staff shall announce the presence of any non-medical personnel of the opposite sex who is entering a living area or prior to approaching any holding cells to give the inmate an opportunity to cover him or herself while dressing, using the shower, or using the restroom.
A. Deputies shall directly notify inmates who are hearing impaired to ensure their privacy.

5. Unannounced Rounds will be performed at least once every shift by the on-duty shift sergeant to ensure that all efforts are being made to help protect, detect, and respond to sexual abuse and sexual harassment.

A. Staff are prohibited from “warning” other staff that the unannounced rounds are being performed.

5. Male deputies may be assigned to augment female deputies in a female housing unit. Absent exigent circumstances, male deputies will not be assigned to any female housing unit without a female deputy present per CSB Policy 2.10.25

a. Male deputies shall not perform clothed searches of female inmates, except when exigent circumstances exist and upon receiving approval from the Shift Supervisor.

C. REPORTING OF SEXUAL ABUSE/HARASSMENT

1. Inmates and staff shall be permitted to report any sexual assault or sexual harassment to any rank they feel comfortable reporting to.

a. There is no time limit for filing a “Good Faith” sexual harassment or sexual abuse report.

b. Inmates making a PREA report deemed to be made in “Bad Faith” shall be subject to disciplinary action.

c. No disciplinary action can be taken against an inmate if a report of sexual harassment or abuse has been deemed to have been made in “good faith,” even if the allegations are determined to be unfounded.

2. Any staff member who has cause to believe an inmate has been or may be subjected to an act or threat of sexual abuse or harassment is required to immediately notify the shift sergeant.

a. This notification may be made in private, but must be done immediately after obtaining the knowledge of possible sexual abuse or sexual harassment.

3. All staff must accept any report of sexual abuse or sexual harassment whether it is in verbal form or in writing, and must take the appropriate actions.

4. Any inmate who is subjected to an act or threat of sexual abuse/harassment may report the incident using any of the following methods:

a. Sexual assault crisis hotline (Inmate phone speed dial number, posted in housing units.)

b. Inmate request slip or any other form of written notification.
c. Reporting verbally to any staff member, contractor, or volunteer.

5. Third party reporting of sexual abuse or sexual harassment reports shall be permitted.
   a. Third parties include
      • Outside Advocates
      • Family Members
      • Sworn and Non-Sworn Staff Members
      • Contractors
      • Volunteers
      • Attorneys
      • Other inmates
   
   b. Any inmate advocating on behalf of another inmate may report an act or threat of sexual abuse/harassment incident by using the following methods:
      • Jail crisis hotline (Inmate phone speed dial number, posted in housing units.)
      • Inmate request slip, or any other form or written notification.
      • Reporting verbally to any staff member.
   
   c. The inmate shall be asked if he or she would like the report filed on their behalf upon receipt of a third party report.
      • If the inmate declines the report to be filed on his/her behalf, the decision shall be recorded in JMS.

6. If the allegation of abuse or harassment is against a staff member, the inmate is not required to report to, or attempt to resolve the issue with the accused staff member.

D. RESPONSE TO REPORTED INCIDENTS OF SEXUAL ABUSE OR HARASSMENT

1. All reports of sexual abuse or sexual harassment will immediately be referred to the PREA Coordinator via the facility PREA Compliance Manager. The Coordinator will be responsible for ensuring that a full investigation is completed on all reported incidents in accordance with CSB policy 2.08.32.
   a. The credibility of an alleged victim, suspect, or witness should not be
determined by their status as an inmate or staff member.

2. If an emergency report is received alleging that the inmate is in imminent danger of abuse, the shift sergeant shall notify the facility PREA Compliance Manager, Facility Commander, and Classification Unit immediately.
   a. Immediate action shall be taken to protect the inmate.
   b. An initial response to the report must be done within 48 hours.
   c. A final action plan and response shall be completed within five days.

3. Upon receipt of a report of sexual abuse or harassment, staff members will ensure steps are taken to separate the victim from the perpetrator. Non-Sworn staff members, contractors, and volunteers are to notify the nearest deputy or the shift sergeant immediately.
   a. The on duty shift sergeant shall be notified immediately. The sergeant will ensure the incident is documented in a JMS Incident Report.
      • The shift sergeant will assign a deputy to start an investigation of the allegation in accordance with CSB policy 2.08.31 and 2.08.32.
      • If it appears as if the alleged abuse is a crime, the incident will be thoroughly documented and forwarded to the Sexual Assault Unit for further investigation and disposition.
      • The PREA Compliance Manager will be notified within 24 hours of receiving the report.
   b. Staff members will also take measures to preserve any evidence which may be pertinent to the incident, in accordance with CCCSO Policy 1.06.35.
   d. Inmates who are an alleged victim of sexual abuse may not be placed in
involuntary segregated housing unless an assessment of all available alternatives has been made and there are no available alternative means of separation from likely abusers.

- The Classification Unit will be contacted to evaluate the housing assignment for the victim.
- If an involuntary segregated housing assignment is made for an inmate who has been the victim of an alleged sexual abuse, the PREA Coordinator shall ensure a classification review is completed every 30 days to determine if there is a continuing need for separation from the general inmate population per CSB Policy 2.09.02 and 2.09.03.
- The Classification Sergeant will consult with medical and mental health staff to screen the victim to provide the appropriate level of care and placement for the victim.

4. If the report involves misconduct or negligence by a staff member, contractor, or volunteer, the shift sergeant will notify the PREA compliance manager immediately to make the appropriate notifications to the PREA coordinator, and facility command staff.
   a. The notification to the Sergeant and/or Facility Commander can be made in private, but must be done immediately.
   b. Allegations shall not be forwarded to the accused person except through the appropriate administrative channels.
   c. Discussing the allegation with the accused staff member, volunteer, or contractor without approval from the facility command staff may result in administrative discipline.
   d. An administrative investigation into the allegation of staff-on-inmate abuse, negligence leading to an event, or harassment will be initiated at the direction of the Division Commander, in accordance with CCCSO policy 1.06.80.
   e. The PREA Coordinator will ensure the appropriate actions are taken to protect the inmate from further abuse and/or harassment.
   f. Based on the severity of the allegation, any of the following may occur during an investigation, or after there has been a final resolution from a criminal or administrative investigation:
      - Temporary work reassignment to another module or work area.
      - Administrative action
      - Termination
5. The victim must be informed whenever:
   a. The inmate, staff member, volunteer, or contractor is no longer to be assigned on the victim’s module.
   b. The staff member, volunteer, or contractor is no longer employed at the facility.
   c. The inmate, staff member, volunteer, or contractor has been indicted and/or convicted on charges related to the sexual abuse.
   d. All notifications are to be done in writing.
   e. Notifications shall continue until the inmate is released from custody or transferred out of the Contra Costa County Jails.
   f. All notifications shall be documented in JMS.

6. Any retaliation against an inmate or staff member who reports or assists in the investigation of a sexual assault or sexual harassment is strictly prohibited and is grounds for disciplinary action.
   a. Housing and/or work assignment changes will be made available for the inmate(s) who fear retaliation from cooperating with an investigation.
   b. Work assignment changes will be made available for staff members who fear retaliation from cooperating with an investigation.
   c. Crisis hotline (emotional support) will be available for any inmate who is involved in a sexual assault or harassment investigation.
   d. Support services (emotional support) will be available for any staff member who is involved in a sexual assault or harassment investigation.
   e. The PREA Compliance Manager shall monitor for retaliation for a period of 90 days following any incident.

- Weekly status checks on inmates shall be documented in an incident report.
- The Compliance Manager shall check in with any involved employee weekly and give written status updates to the PREA Coordinator.
- The obligation to monitor shall terminate following the release of the involved inmate from custody, or if the investigation
determines the allegations were unfounded.

f. If it is determined necessary, the PREA Manager will continue monitoring for retaliation beyond 90 days.

g. If it is determined that any retaliation may have occurred, the PREA Manager along with Classification will determine the appropriate actions to remedy the situation immediately.

7. A final report on any allegation of sexual abuse or harassment shall be completed no later than 90 days from the time of the initial complaint.

a. A 70-day extension may be applied based on the circumstances of the complaint.

   • The alleged victim must be notified of this extension in writing, and be provided a date as to when the final decision will be made.

b. The alleged victim shall be notified in writing when it is determined that the allegations are founded or unfounded.

8. If an allegation of sexual abuse, sexual harassment, or negligence leading to a PREA incident is received and the accused person is a staff member, volunteer, or contractor:

9. If there is a founded allegation of sexual abuse or harassment against a staff member, contractor, or volunteer, the report will be forwarded to the District Attorney’s office for criminal prosecution.

10. An accused inmate is subject to disciplinary action after being found guilty by an administrative or criminal investigation.

11. If an alleged sexual abuse or sexual harassment has occurred at another agency’s facility, and has not been previously reported, the on-site PREA Compliance Manager shall notify the facility manager where the alleged incident occurred.

   a. The notification shall be made within 72 hours.

   b. The notification shall be documented in an incident report.

   c. The facility in which the alleged incident occurred is responsible for investigating the allegation. The PREA Coordinator will determine the level of the CCCSO involvement in that investigation

12. Inmates shall be subject to disciplinary sanctions pursuant to a formal disciplinary process following an administrative finding that the inmate engaged in inmate-on-inmate sexual abuse or following a criminal finding of guilt for inmate-on-inmate sexual abuse.

13. Disciplinary sanctions may be applied to an inmate for sexual contact with staff only upon a finding that the staff member did not consent to such contact.
14. Allegations received from an outside facility shall be investigated as described in this section above.

E. INCIDENT REVIEW

1. An incident review and report must be completed within 30 days after completing the investigation on any founded sexual abuse or harassment claim.

2. Review team shall include:
   a. PREA Coordinator
   b. PREA Compliance Manager from the facility where the abuse or harassment was reported
   c. Shift supervisor (if applicable)
   d. Investigator(s) (if applicable)
   e. Medical Supervisor (if applicable)
   f. Mental Health Supervisor (if applicable)

3. Review Team Shall Consider
   a. Whether the investigation results indicate change(s) in policy or daily operations are necessary.
   b. What motivated the incident
      • Race
      • Sexual Orientation
      • Gender Identity
      • Gender Expression
      • Gang Affiliation
      • Any other factors
   c. Staff Dynamics/Levels
   d. Examine the location of the incident to determine if any further preventative measures could be implemented. Including:
      • Monitoring technology
      • Lighting
      • Mirrors
• Staffing

e. A “Report of Findings” will be prepared by the PREA Coordinator and submitted to the Division Commander for each incident review.

• Report will include a summary of the incident, findings of the review team, and recommendations for change (if any).

F. STANDARD OF CARE

1. Medical

   a. Victims of sexual abuse shall have immediate and unimpeded access to medical staff for emergency services at no cost to the inmate.

   b. Upon notification of an alleged sexual abuse, medical staff will attend to the victim and treat any injuries in accordance with standard medical protocol.

   c. A victim of a sexual assault who has suffered penetration of their anal or genital opening will be transported to Contra Costa Regional Medical Center for medical examination by a Sexual Assault Nurse Examiner.

   d. Inmate victims of sexually abusive vaginal penetration while in jail shall be offered a pregnancy test.

• If pregnancy does result from the sexual abuse, victims shall receive timely access to lawful pregnancy-related medical services.

   e. Any information regarding sexual victimization or abusiveness obtained during a medical screening in intake or during a medical examination will be made private, except sharing information to aide in housing and management decisions.

2. Mental Health

   a. Victims of sexual abuse shall have immediate and unimpeded access to mental health staff at no cost to the inmate.

   b. Upon notification, mental health staff will screen the victim within 24 hours. The mental health staff will notify the shift sergeant and classification staff of their recommendations.

   c. Mental Health staff shall attempt to conduct a mental health evaluation of the inmate perpetrator within 60 days of notification of the event, and offer appropriate mental health treatment.

   d. Classification staff will work with Mental Health staff to determine the appropriate housing assignment for the inmate perpetrator.
e. Any information regarding sexual victimization or abusiveness obtained during a mental health screening in intake or during a mental health examination will be made private, except with respect to the sharing of information to aide in housing and management decisions.

3. Victim Advocacy

a. Inmates may contact the sexual assault crisis hotline via inmate phones and the posted speed dial numbers. Calls to the hotline will be free of charge, unmonitored, and shall be unrecorded.

b. Inmates may contact Immigration and Customs Enforcement (ICE) via inmate phones and the posted speed dial numbers. Calls to ICE will be free of charge, unmonitored, and shall be unrecorded.

4. Disciplinary Sanctions for Inmates

a. Inmates are prohibited from all sexual activity between inmates, per CSB Policy 2.16.02.

b. Inmates are subject to disciplinary sanctions for engaging in any kind of sexual activity, pursuant to a formal disciplinary process, per CSB Policy 2.16.03.

G. ANNUAL PREA REVIEW

1. The PREA Compliance Manager or designee will generate an annual report assessing PREA compliance. The annual PREA Report will be forwarded to the Facility Commanders and the Custody Services Bureau Captains and Assistant Sheriff, to help develop action plans to achieve full compliance with PREA standards.

   a. A report of findings and corrective actions will be prepared for each facility.

      • The review shall consider the staffing plan, new monitoring technology, policy, and allocation of resources.

      • All available data from incident reviews and data collection will be considered. The data will also be compared to previous years to aide in further considering corrective actions.

   b. The report will be submitted to the division commanders on an annual basis.

   c. Once submitted to the Division Commander, the report shall be made available on the CCCSO website for public viewing.

      • Redactions may be applied to the report if the information poses a clear and specific threat to the safety and security of the facility.

H. DATA COLLECTION
1. All reports and investigation documents will be preserved for five years beyond the term that the involved parties are in custody and/or employed.

2. The PREA Incident Log will be preserved for 10 years.

3. The PREA Incident Log will be made public on the CCCSO website annually.
   a. All personal identifiers shall be redacted prior to making the information public.

IV. TRAINING

A. All sworn staff will receive biennial training in regards to prevention and identification of sexual abuse and sexual harassment in a confinement setting.

B. Orientation training for all staff members will be required within 60 days of work assignment to the detention facilities. The orientation will include training in prevention and identification of sexual abuse and sexual harassment, and PREA standards for reporting and investigation, related to their job classifications

V. PREA COORDINATOR

A. The CAS Lieutenant is designated as the PREA Coordinator.

B. The PREA Coordinator will oversee the implementation of the CCCSO PREA plan, and will:
   1. Ensure an investigation is completed on all allegations of sexual abuse/harassment.
   2. Review policies, practices, and procedures related to PREA to ensure compliance.
      a. Incident Review
      b. Annual PREA Review
      c. Data collection
   3. Work with training staff to develop a PREA education plan for Sworn and non-sworn staff, contractors, volunteers, and inmates.
   4. Advise on PREA elements of facility design and upgrades.
   5. Submit the U.S. Department of Justice Bureau of Justice Statistics (BJS) “Survey on Sexual Violence (SSV-3) annually. The PREA Coordinator will complete this and return it in a timely fashion.

VI. PREA COMPLIANCE MANAGER

A. Oversees daily operations in their assigned facility regarding PREA compliance and reports to PREA coordinator.
1. Accepts all reports and ensures investigations are started on all allegations of sexual abuse or sexual harassment.

2. Make sure “Unannounced Rounds” are being completed and documented at least once per shift by the designated shift supervisors.

3. Participates on the PREA incident review and annual review teams.

4. Ensures that the inmate orientation is being completed properly to provide all inmates with information regarding PREA.

B. The designated PREA Compliance Managers:

1. Jail Facilities
   a. MDF – Operations Sergeant
   b. WCDF – Operations Sergeant
   c. MCDF – Blue Team (weekday day shift) Sergeant

2. Court Holding Facilities
   a. Martinez Courthouse – Administration Sergeant
   b. Bay Court – Sergeant
   c. Delta Court – Sergeant
   d. Walnut Creek Court - Sergeant

VII. HIRING AND PROMOTIONAL PROCESS:

A. All incidents of sexual harassment shall be considered when determining whether to hire or enlist the services of any contractor, volunteer, or staff member who may have contact with an inmate.

B. All employees, contractors, and volunteers shall be subject to a criminal background check prior to employment. Consistent with Federal, State, and local law, the Sheriff’s Office shall make its best effort to contact all prior institutional employers for information on substantiated allegations of sexual abuse or any resignation during a pending investigation of an allegation of sexual abuse.

C. The agency shall not hire or promote anyone who may have contact with inmates, and shall not enlist the services of any contractor or volunteer who may have contact with inmates, who:

1. Has engaged in sexual abuse in a prison, jail, lockup, community confinement facility, juvenile facility, or other institution (as defined in 42 U.S.C. 1997).

2. Has engaged in sexual activity facilitated by force, overt or implied threats of
force, or coercion, or if the victim did not consent or was unable to consent or refused.

3. Omits misconduct or gives false information, shall be grounds for termination of the hiring process.

D. The agency is notified by the Department of Justice anytime a current CCCSO employee is fingerprinted as a result of any arrest.

E. Civilian contractors will renew their site clearance, which includes a background check, annually per CSB policy 2.08.02.

F. Contractors or volunteers who have been found to have participated in any abuse or harassment of an inmate shall have their site clearance revoked and will not be allowed on the property in any capacity.
I. POLICY

A. As a means to deescalate a potentially volatile situation or to control a subject while maintaining officer safety in a custodial setting, deputies may place an unrestrained inmate in a prone position.

B. Deputies shall use only that degree of force that is objectively reasonable to protect themselves and others, or to overcome resistance to their lawful authority.

C. Deputies shall only use approved force techniques for which they have received and completed P.O.S.T. certified and/or Sheriff’s Office authorized training. Refer to CCCSO Policy and Procedure 1.06.61, Use of Force, and CSB Policy 2.08.24, Prone Restraints, for additional guidelines.

II. DEFINITIONS

A. FORCE: Any physical effort or technique used to control, restrain, or overcome the resistance of another person.

B. PRONE POSITION: An individual lying flat on the ground on his/her stomach, in position, with his/her face down or turned to the side, as directed by the deputy.

C. TAKEDOWN: A maneuver or technique used to bring an individual down to the ground from an upright position.

III. GENERAL

A. PRONE CONTROL/PLACEMENT. The decision to place an inmate in the unrestrained prone position shall take into consideration the facts and circumstances of the current situation. The prone placement should generally not be used on a fully compliant inmate. The factors a deputy should consider when deciding to use prone control in a given situation include, but are not limited to:
1. Severity of the violation;
2. Whether or not the individual poses an immediate threat to the safety of deputies or others;
3. Whether or not the inmate is actively resisting or refusing to comply with orders;
4. Availability or limitation of space (if the area is open or confined);
5. Number of available deputies at the scene;
6. Age, size, and relative strength of the inmate to the deputy;
7. Special knowledge or skill level of the inmate to the deputy;
8. Physical abilities or disabilities of the inmate;
9. The inmate’s mental and/or emotional state.
10. Prior contacts with the inmate, or other information known to the deputy about the inmate at the time of the incident.

IV. PROCEDURES

A. In the event an inmate is in need of placement in the unrestrained prone control position, the following procedures shall be followed:

1. Combative or Actively Resisting Inmate
   a. Deputies may utilize a recognized control hold or takedown technique to control the inmate and place him/her in the prone position.
   b. Deputies may utilize a recognized prone leg control technique if the inmate is physically resisting while in the prone position.
   c. In the event an inmate’s arms are tucked under his/her body, deputies will use the proper technique(s) to extract the inmate’s arms.
   d. Once the inmate is in the prone position, the deputy will not order the inmate to place his/her hands under his/her body.
   e. If space permits, the deputy will give clear verbal commands to the inmate to keep his/her arms stretched out to the sides.
   f. In the event the inmate is being placed prone into a holding cell,
safety cell, or some other confined area, the deputy will order the inmate to place his/her hands behind the lower back, until deputies have safely exited the cell or area.

g. Deputies will notify the shift Sergeant and document the incident in the JMS incident report system.

2. Passive Resistant Inmate

a. When placing a passively resistant inmate into a holding cell, the deputy may place the inmate in the prone position to allow deputies to safely exit the cell.

1. In the event the inmate is responsive and adhering to the deputy’s commands, an alternate position to the prone position should be considered (e.g.: in a kneeling position, facing the wall, with hands behind the back).

b. Once the inmate is in the prone position, the deputy will not order the inmate to place his/her hands under his/her body.

c. If space permits, the deputy will give clear verbal commands to the inmate to keep his/her arms stretched out to the sides.

d. In the event the inmate is being placed prone into a holding cell, safety cell, or some other confined area, the deputy will order the inmate to place his/her hands behind the lower back, until deputies have safely exited the cell or area.

e. Deputies will notify the shift Sergeant and document the incident in the JMS incident report system.

3. Facility Emergencies

a. In the event of a “Code 2 Assist” or any “code” or emergency requiring additional staff members to respond to an area, deputies may order inmates to the prone position to minimize injuries to inmates and staff and to help gain control of the situation. Additional restraints can be added as the situation dictates, per CSB policy 2.08.50, Prone Restraints.

b. Deputies may order an inmate to face the wall with his/her hands behind the back if the inmate has a medical condition preventing the prone position.

Once control is gained and the situation is secure, inmates shall be returned to upright or sitting positions as soon as possible.
I. POLICY

A. It shall be the policy of the Custody Services Bureau to supervise inmates placed into Disciplinary Isolation only after an impartial hearing has determined:

1. Other available alternative dispositions are inadequate
2. The inmate’s presence in the general population poses a serious threat to the orderly operation or security of the facility.

B. When it is determined by a Disciplinary Hearing Officer with the Facility Commander or designee’s concurrence that an inmate is guilty of a serious rule violation, that inmate may be placed in Disciplinary Isolation.

C. Direct supervision of disciplinary isolation inmates will be the responsibility of the housing unit deputy.

D. Inmates in disciplinary isolation shall be provided with the same rights and provisions as other inmates unless it poses a threat to staff, other inmates or the security of the facility.

II. DEFINITIONS

A. DISCIPLINARY ISOLATION: Punitive segregation from the general jail population and restriction of privileges of an inmate who has committed a serious rule violation.

III. PROCEDURE

A. POST-DISCIPLINARY HEARING

1. Classification will track inmates in Disciplinary Isolation.

2. No inmate may be in disciplinary isolation for more than thirty (30) consecutive days without prior review and approval of the Facility Commander.

   a. The Facility Commander will consult with medical/mental health staff
prior to authorizing continued placement.

b. Disciplinary isolation reviews shall continue every fifteen (15) days thereafter until isolation status has ended.

3. When an inmate completes his/her time in isolation, a classification deputy may interview the inmate to determine the inmate's suitability for return to the general jail population.

4. Before the interview, the classification deputy will review the inmate’s classification, disciplinary history and previous housing assignments.

a. If an interview is / is not warranted, the classification deputy will put the inmate on the in-house movement list and assign the inmate to a new module.

b. The classification deputy will be responsible for updating the inmate Classification Chronological notes to reflect the status change.

B. DISCIPLINARY ISOLATION TRACKING

1. Classification will maintain records regarding an inmate’s disciplinary history.

2. Disciplinary Isolation records will be reviewed:

a. Any time an inmate receives disciplinary action against them

b. When reviewing an inmate’s record for transfer to another facility
I. DEFINITION

a. ADMINISTRATIVE MANAGEMENT: A designation applied to inmates who, due to demonstration of the following behaviors and/or risks, require housing in a more limited setting (This setting typically includes a single-cell assignment and reduced social interaction compared with the general population):

i. Prone to assault staff or other inmates
ii. High likelihood of victimizing other inmates
iii. Security risk to the facility and or staff.

b. PHASE 1: The initial Phase of Administrative Management. A more limited housing setting that, upon successful completion, an inmate can transfer from into Phase 2.

c. PHASE 2: A less restrictive housing setting with more privileges earned by good behavior and successful completion of the Phase 1 Administrative Management Plan.

d. STATUS CHANGE AGREEMENT and BEHAVIORAL CONTRACT: An agreement between the inmate and the Classification Unit to follow facility rules, obey all laws, and avoid placement into Administrative Management.

II. ADMINISTRATIVE MANAGEMENT PROCEDURE:

a. Only the Classification Unit can assign an inmate into Administrative Management. When Classification is unavailable, the Facility Commander, or his/her designee, may order immediate placement of any inmate into Pre-Classification Administrative Management for the safety and security of staff and inmate(s) under the following circumstances:
i. The inmate poses an immediate safety risk and no other housing classification or unit is sufficient to protect the inmate or others from harm.

ii. The inmate has failed to integrate into a less restrictive housing setting because of repeated and recent history of assaultive behavior or current threats of violence associated with being in a less restrictive setting.

iii. Objective evidence indicates the inmate participated in a recent assault and the assaultive behavior involved an assault on staff or inmate, serious injury, use of a weapon or multiple inmate assaults.

NOTE: Mutual combat situations that do not otherwise qualify for Administrative Management do not form a basis for placement.

iv. Pregnant female inmates shall not be placed into Administrative Management unless documented extreme risks to facility security and/or officer safety exist with the approval of the Facility Commander or Division Commander.

b. If a request for Administrative Management placement originates from outside the Classification Unit, an incident report based on facts, information, and/or observation will be initiated by the requesting individual. Any additional reports, memos, etc., which pertain to the request shall be attached. The entire package shall be forwarded to the shift supervisor for review and/or comment. The Facility Commander, Classification Sergeant or designee, will make the final determination on whether the information provided warrants a placement into Administrative Management.

c. The Classification Unit will review all cases and interview the inmate no later than five (5) days of the placement into Administrative Management. The interview with the inmate will be conducted in a private setting, either in the Classification office or in a private room removed from other inmates to ensure confidentiality. The Classification Unit will re-interview the inmate after 30 days in Administrative Management.

d. Upon initial placement of an inmate into Administrative Management, the inmate will be given documentation informing them of the reason for the placement and an explanation on the downgrade process to return to General Population. The inmate will be given a request form for the purpose of appealing his/her placement into Administrative Management. The inmate will be given a copy of the incident report detailing why he/she was placed into Administrative Management.

e. The inmate will be informed of the phase process involved at the time of placement. The inmate will read and sign a behavioral contract which will explain the Phase process.
f. An inmate may appeal movement into Administrative Management by submitting a request slip addressed to the Classification Sergeant. The Classification Sergeant or his/her designee will respond to the request form within 5 business days.

g. Notwithstanding any other provision in the Administrative Management Plan, the Office of the Sheriff may place any inmate in a more restrictive form of Administrative Management when the inmate is so violent that the inmate cannot be managed under the terms of the Administrative Management Plan. This option should rarely be invoked and requires the approval of the Facility Commander or Division Commander.

h. A Qualified Mental Health Professional will screen any inmate placed into Administrative Management within seventy-two (72) hours of placement. The Classification Unit deputy will immediately notify the following detention health services employees with each new Administrative Management placement:

   i. Mental Health Program Chief
   ii. Mental Health Program Manager
   iii. Director of Detention Nursing
   iv. Detention Nursing Program Manager

III. ADMINISTRATIVE MANAGEMENT PHASES

   a. The Office of the Sheriff shall develop and implement a phased system for inmates designated as Administrative Management to achieve a lesser restrictive housing setting.

   i. PHASE 1

      1. Phase 1 is the most limited housing for inmates in Administrative Management and can include lockdown time and loss of privileges.

      2. Inmates will be offered a minimum of one (1) hour per day free time for a total of seven (7) hours a week.

      3. Inmates shall be offered the opportunity to program in groups, unless grouping of an inmate is not possible for safety and security reasons. If an inmate is unable to be grouped, the decision and reasoning shall be documented by the Classification Unit. Group size for inmates in Phase 1 will be at the discretion of the Classification unit.

      4. Inmates shall remain in Phase 1 for no longer than fifteen (15) days unless the inmate engages in new conduct warranting further retention in Phase 1. A documented review will be completed by the Classification Unit deputy within fifteen (15) days of placement and forwarded to the Classification Sergeant for review. If an inmate has been in Phase 1 for fifteen (15) days and objective
evidence indicates the inmate participated in a recent assault involving an assault on staff or visitor, serious injury, use of a weapon or multiple inmate assaults, the Classification Sergeant must approve the inmate’s continued placement in Phase 1. Mutual combat situations, defacing or inflicting minor damage to state property, unauthorized medication or harassment do not otherwise qualify for continued placement of an inmate in Phase 1.

a. While placed in Phase 1, if an inmate commits a serious behavioral violation, Classification Deputies may review the inmate’s behavior and propose the inmate be extended in Phase 1.

5. An inmate placed into Administrative Management due to a PREA incident where by the inmate is the suspect, cannot be held for longer than thirty (30) days in Phase 1 without prior review and approval by the Classification Unit Sergeant or his/her Designee (unless new behavior in Administrative Management is documented).

a. The Classification Unit Sergeant, or Designee, will consult with medical/mental health staff prior to authorizing continued placement of PREA inmates.

6. Upon the successful completion of Phase 1 after fifteen (15) days with no new conduct warranting retention, the inmate shall be transferred to placement in Phase 2 of Administrative Management.

ii. PHASE 2

1. Inmates shall be offered two (2) hours of free time a day, for a total of fourteen (14) hours a week.

2. Inmates shall be offered the opportunity to program in groups, unless grouping of an inmate is not possible for safety and security reasons and those reasons are documented by the Classification Unit.

3. Inmates shall remain in Phase 2 for no longer than thirty (30) days unless the inmate commits a serious behavioral violation while in Administrative Management including, but not limited to: fighting; threatening staff or other inmates; resisting or delaying an order from staff that impedes jail operations (e.g., failure to lockdown), refusing to submit to a search of person or property, possessing contraband that implicates safety or security (e.g., weapons, razors) and/or sexual activity or harassment. If a minor violation occurs and does not pose a significant threat to the safety and security of staff, facility or inmates, the inmate will not be held in Phase 2.
4. If a serious violation occurs, the inmate could either be extended in Phase 2, or if warranted, be placed back into Phase 1.

5. After thirty (30) days, the Classification Unit will review an inmate in Administrative Management Phase 2 to see if the inmate can be placed in less restrictive housing such as general population, or protective custody.
   
a. If an inmate is to remain in Phase 2 for longer than thirty (30) days, the Classification Unit will work in conjunction with Mental Health to develop a behavioral management plan to facilitate returning the inmate to general population.

IV. DOCUMENTATION AND REVIEW OF ADMINISTRATIVE MANAGEMENT INMATES

a. The Classification Unit shall document the reason for placing an inmate into Administrative Management. This includes all paperwork, forms and notes, name of inmate, booking number, housing location, date admitted, reason for placement, and special medical needs of the inmate if advised via medical staff.

b. No inmate will be in Administrative Management longer than forty-five (45) days, unless specific information is developed which shows the inmate would be a continued threat towards staff or other inmates. The Classification Sergeant, Facility Commander, or Designee must approve the continued retention of an inmate in Administrative Management longer than 45 days, and the Classification Sergeant, Facility Commander, or Designee must reauthorize such placement at least once every forty-five (45) days.

c. The Classification Unit will document the removal of any inmate from Administrative Management through the completion of a Status Change Agreement and Behavioral Contract. The Classification Unit will explain the Status Change Agreement and Behavioral Contract to the inmate before a signature is obtained.

d. The Classification Unit Staff shall attempt to downgrade inmates to a less restrictive housing setting at the earliest opportunity, consistent with the safety and security of staff and the facility. In making this assessment, Classification Unit Staff shall:

   i. Consider all aspects of the facts which resulted in the inmate being placed in Administrative Management.
   ii. Examine the record for compliance with department and facility policy.
   iii. Develop a strategy to downgrade the inmate from Administrative Management, this will include inmate behavior, reports and other documentation.
e. The Classification Unit will continuously determine if Administrative Management is still necessary and/or whether a lesser restrictive form of Administrative Management housing is appropriate.

f. A Classification Unit Deputy will be designated to monitor all Administrative Management Inmates to include grouping of inmates for free time, interviewing and documenting all information related to the placement.

V. HOUSING OF ADMINISTRATIVE MANAGEMENT INMATES

a. The Office of the Sheriff shall provide inmates with access to the following services while in Administrative Management:

   i. Visiting
   ii. Mail
   iii. Reading materials
   iv. Religious services
   v. Telephone
   vi. Hygiene materials and clothing exchange
   vii. Commissary.

b. Room checks will be conducted per CSB Policy 2.08.17 (Inmate Room Checks and Observation Requirements).

   i. Administrative Management inmates shall be locked down in their assigned cells for the duration of room checks, pill calls and other essential movements on the module. Inmates will be let back out of their cells to continue their free time at the completion of these movements.

c. Administrative Management inmates will only be housed and grouped with other Administrative Management inmates.

d. Housing of Administrative Management inmates will be designated to one module unless the population of Administrative Management inmates exceeds the maximum occupancy of that module. Alternate module housing may be used if necessary. Attempts should be made to house all Administrative Management inmates on one designated module.

e. Administrative Management inmates will thoroughly be reviewed before being placed in a group setting. All efforts will be made to group inmates with compatible individuals.

f. All efforts will be made to group as many Administrative Management inmates as possible. The Classification Unit may have justification that certain inmates would not group well with other inmates based on history, compatibility or EIF (Enemies in Facility) issues. The safety of inmates and staff is paramount when considering grouping of Administrative Management inmates.
I. POLICY

A. Under certain circumstances, it may be necessary to place an inmate by request in Protective Custody pursuant to Minimum Jail Standards 1053. It shall be the policy of the Custody Services Bureau to supervise inmates requesting or requiring protection from the general population.

B. Each Protective Custody case should be reviewed frequently with the goal of terminating the separate housing assignment as soon as possible.

C. When Classification is unavailable, the Facility Commander or their designee may order immediate placement of any inmate into Pre Classification status for the safety of staff and inmates.

1. If this action is taken, an Incident Report will be generated. The Classification Sergeant and/or designee(s) will review the placement within (3) three working days.

D. The Classification Unit will review the status of inmates in Protective Custody every seven (7) days for the first two (2) months and at least every thirty (30) days thereafter.

E. During scheduled reviews, or as needed, the Classification Unit will review the status of inmates in Protective Custody to determine eligibility for reclassification to other appropriate housing.

F. In addition to the direct supervision afforded by the unit deputy, the Custody Sergeant may conduct daily reviews the inmates housed in Protective Custody.

G. Each inmate in Protective Custody placed into an isolated or Administrative Management status shall be seen by a qualified health care official three (3) times a week unless medical attention is needed more often.

I. DEFINITIONS

A. PROTECTIVE CUSTODY (PC): The separation of inmates, from the general
population, who request or require protection from other inmates for reasons of health or safety. Protective Custody is a non-punitive area for inmates who need protection from other inmates in general population.

II. PROCEDURE

A. Inmates requesting or requiring protection from the general population may be placed in Protective Custody and will be allowed to participate in as many of the programs afforded the general population as possible, providing it does not impose a threat to the inmate’s safety or the security of the facility.

1. Inmates in Protective Custody shall have access to qualified medical staff.

   - Protective Custody inmates will be allowed out of their cells a minimum of (3) three hours per day, six (6) days per week to exercise.

2. Each inmate will be allowed to shower and shave during their free time, unless these procedures present an undue security hazard.

B. When an inmate is placed in Protective Custody, it shall be warranted, fully documented, and no reasonable alternatives are available. An inmate may, at any time, request re-assignment to the general inmate population.

C. With consent signed by the inmate, an inmate shall, upon request be placed in Protective Custody.

D. If a deputy believes the inmate is in immediate danger, the deputy will place the inmate in a holding cell by him/herself and notify classification immediately.

E. A classification officer will classify an inmate into Protective Custody upon receiving a credible verbal or a written request any time the inmate believes their presence in the general population would jeopardize the inmate’s safety.

F. An inmate classified as Protective Custody, will be housed in a housing unit with other inmates with the same classification.

1. Classification may place a Protective Custody inmate into Administrative Management housing if it is determined the inmate’s life and safety would be at risk in all other housing units.

G. The Classification Unit will review the status of an inmate in Protective Custody status every seven (7) days the first two (2) months and at least every thirty (30) days thereafter with the goal of terminating the special housing assignment as soon as possible.

H. HOUSING

1. The same general rights and privileges which govern housing for general population inmates shall apply to inmates placed in Protective Custody, and will
not be restricted more than necessary to ensure the safety and security of the staff, other inmates, and the facility.

I. SUPERVISION

1. In addition to the direct supervision afforded by the unit deputy, the Custody Sergeant may conduct daily reviews of inmates housed in Protective Custody.

J. ACCESS TO LEGAL AND READING MATERIALS

1. Inmates in Protective Custody shall have access to both personal legal materials and available legal reference materials pursuant to CSB Policy.

2. Inmates in Protective Custody should be provided a sufficient quantity of reading materials and have the opportunity to borrow reading material from the library pursuant to CSB Policy.

K. PERSONAL HYGIENE

1. Protective Custody inmates shall have the opportunity to maintain an acceptable level of personal hygiene as inmates in the general population, e.g., toilet tissue, basic hygiene supplies, eyeglasses, etc.

   a. Exceptions are permitted only when found necessary by the Shift Supervisor

      • Any exception shall be justified in writing and recorded in the housing unit log.

2. Each inmate will be allowed to shower and shave during their free time, unless these procedures present an undue security hazard.

3. Each inmate shall receive laundry, and have access to hair care supplies, issue/exchange of regular jail clothing, bedding and linen on the same basis as inmates in the general population.

L. MEDICATION

1. Inmates in Protective Custody will be provided prescribed medication by medical staff on a schedule as prescribed by the issuing medical professional pursuant to CSB Policy.

M. CORRESPONDENCE AND VISITS

1. Correspondence privileges shall be continued in Protective Custody unless compelling reasons exist to the contrary.

2. Inmates in Protective Custody can write and receive letters on the same basis as inmates in the general population pursuant to CSB Policy.

3. Inmates in Protective Custody shall have the opportunity for visitation unless
there are substantial reasons for withholding such visits.

a. Every effort shall be made to notify approved visitors in advance of any restrictions on visiting.

H. TELEPHONE ACCESS

1. Inmates in protective custody will have access to telephones on during their regularly scheduled free time, pursuant to CSB Policy and Procedure 2.17.08, Inmate Telephone Access.

O. PROGRAMS AND SERVICES

1. Inmates in Protective Custody will continue to have access to programs and services including, but not limited to, educational services, commissary services, library services, social services, counseling services, religious guidance, and recreational programs.

2. There shall be no major differences from those offered the general population, as long as access to these programs does not pose a threat to the safety of inmates or staff or pose a threat to the security of the facility.

P. PROCESS FOR RELEASE FROM PROTECTIVE CUSTODY

1. Before inmates are released from Protective Custody, the Classification Unit shall ensure the following is considered:

   a. Review of inmate’s file by the Classification Unit or the assigned classification deputy to determine if the current status warrants the inmate’s release from Protective Custody.

   b. If initial reasons for placement into protective custody no longer exist, the Classification Unit or assigned classification deputy shall return the inmate to the general population.

   c. All information pertaining to the inmate’s release from Protective Custody shall include: date of release, reason for release and releasing authority.

   d. A complete interview of the inmate by (2) classification deputies will be conducted and the inmate will be advised of their return to general population. The inmate will enter into a contractual agreement with the Classification Unit prior to their placement.

CSB 2.08.18, 2.10.02, 2.10.05, 2.13.07, 2.17.01, 2.17.08, 2.18.06, 2.18.15 |
| CLEARANCE:  
CUSTODY |
| SUBJECT:  
Mental Health Inmates |

### ISSUE DATE: 05-19-16  
REVISION DATE: 12-04-19  
REVIEW DATE: 12-11-19

## I. POLICY

A. Inmates who have mental/emotional issues or psychiatric problems identified by history, receiving, intake screening, or after admission, must be monitored and followed up by Medical/Mental health staff.

B. Inmates experiencing psychiatric emergencies that present a threat to themselves or others shall receive immediate attention.

## II. DEFINITIONS

A. **MENTAL HEALTH INMATE**: An inmate with special needs who is afflicted with an illness, disease, or condition that substantially impairs the person’s thought, perception of reality, emotional process, or judgment; or which grossly impairs behaviors; or an inmate who demonstrates or has demonstrated evidence of an acute brain syndrome for which prompt remission in the absence of treatment is unlikely.

## III. PROCEDURE

A. The Classification Unit, in conjunction and in partnership with Medical/Mental Health staff, will continually strive to house mental health inmates in a manner that affords the maximum amount of free time and programs available.

B. Mental health staff, in conjunction with the Classification Unit, will attempt to reintegrate mental health inmates and special needs inmates into the general population as soon as possible. The assimilation of mental health inmates with the general population will occur with respect to the safety and security of the various inmate populations, the overall safety and capability of the facility, and the specific mental health needs of each individual mental health inmate.

C. When a mental health inmate is identified, he/she may be separated from the rest of the inmate population for his/her safety and/or the safety of others. Administrative Management should only be
considered when interaction with the general population poses a threat to the health, safety, danger to life, or security of the inmate, staff, or facility. Administrative Management should be ceased as soon as it is identified that the mental health inmate is safe to reintegrate with the general population.

D. When a mental health inmate is identified and subsequently separated from the rest of the inmate population, an observation log will be initiated in accordance with CSB Policy and Procedure 2.8.18, Observation Logs.

E. Medical/Mental Health staff will be notified and will perform an immediate initial evaluation.

1. Based on the results of the evaluation the medical staff may:
   a. Arrange for immediate or follow-up treatment, if needed.
   b. Recommend continuing or discontinuing the Observation Log.
   c. Recommend the inmate be housed on M Module.
   d. Facilitate transfer of the inmate to an appropriate psychiatric facility.

F. The Classification Unit will be notified and will arrange for the appropriate housing and security needs. Classification staff will continue to work with Medical/Mental Health staff to determine the least restrictive forms of housing for mental health inmates.

1. Mental health inmates or inmates who remain on observation logs will be housed on M Module when feasible with the appropriate hazard code designation.

G. Maximum cooperation between custody personnel and health care providers is essential so that both groups are made aware of movements and decisions regarding mental health inmates.

1. Psychiatric problems may complicate work assignments or disciplinary management and may be considered when determining housing assignments.

H. M MODULE HOUSING UNIT

1. Mental health inmates requiring special management considerations (e.g.: Out Alone, Protective Custody, distinct mental health needs), will be allowed a minimum of (1) one hour of exercise/free time per day outside their cells, excluding the facility inspection day, and/or unless security or safety considerations dictate otherwise.

   a. A written record/log of each mental health Administrative Management inmate will be kept in the Jail Management System (JMS) noting their free time participation, or lack of it. All other inmates housed on M module for medical / mental health reasons shall have the same free time as general population inmates.
b. Free time must be completed between 0700 and 2200 hours. In any instance where free time cannot be completed within this time frame, the facility commander or his/her designee (shift supervisor) must be notified; a written notation explaining the reason for the postponed free time must be recorded in the module notes.

c. Inmates on disciplinary lockdown shall receive (1) one hour of free time every other day in accordance with CSB Policy and Procedure 2.16.03, Inmate Incidents and Discipline; inmates on lockdown shall be afforded a reasonable opportunity to shower and shave daily, excluding facility inspection day.

2. The general rights, privileges and activities of mental health inmate and inmates placed on the Mental Health housing unit will not be restricted more than is necessary to ensure the safety and security of the staff, other inmates, and/or the facility. Deprivation of any right, privilege, and/or activity is to be documented and forwarded to the Facility Commander, via appropriate channels.

3. Admissions of all inmates to M module will be logged, including the following information:

   a. Name of inmate and booking number
   b. Designated room
   c. Date of admission
   d. Tentative release date
   e. Special medical or psychiatric problems or needs

4. The module log will also be used to record all visits by officials who inspect the units or counsel inmates, in addition to all unusual behavior and all releases.

I. SUPERVISION

1. In addition to the direct supervision afforded by the unit deputy, the Custody Sergeant may conduct daily reviews of inmate housing conditions.

J. MOVEMENT

1. Care must be taken when moving mental health inmates, so they are not mixed with general population inmates. When feasible, inmates will move in groups of like classification.

K. PERSONAL HYGIENE

1. Mental health inmates shall have the opportunity to maintain an acceptable level of personal hygiene as inmates in the general population (e.g.: toilet tissue, wash basics, toothbrush, eye glasses, etc.). Exceptions are permitted only when found necessary by the area supervisor or Custody Mental Health staff; any exception shall be justified in writing and
recorded in the housing unit log.

2. Each inmate shall have the opportunity to shave and shower every day, except facility inspection day, and/or unless these procedures present an undue security hazard.

3. Each inmate shall receive access to laundry, approved hygiene supplies, issue/exchange of regular jail clothing, bedding and linen on the same basis as inmates in the general population, except when any of these would pose a threat to safety.

L. MEDICATION

1. Inmates assigned to the medical module will be provided prescribed medication by medical staff on a schedule determined by the issuing medical professional, pursuant to CSB Policy.

2. Any separated mental health inmate shall have access to medical staff as needed.

M. ACCESS TO LEGAL AND READING MATERIAL

1. Mental health inmates shall have access to both personal legal materials and available legal reference materials, pursuant to CSB Policy.

2. Mental health inmates should be provided a sufficient quantity of reading materials and have the opportunity to borrow reading materials from the facility library, pursuant to CSB Policy.

N. CORRESPONDENCE AND VISITS

1. Correspondence privileges shall be continued in mental health housing units unless compelling reasons exist to the contrary.

2. Mental health inmates can write and receive letters on the same basis as inmates in the general population, pursuant to CSB Policy.

3. Mental health inmates shall have the opportunity for visitation unless there are substantial reasons for withholding such visits.

   a. Every effort shall be made to notify approved visitors in advance of any restrictions on visiting.

4. Mental health inmates can write and receive letters on the same basis as inmates in the general population, pursuant to CSB Policy.

O. TELEPHONE ACCESS

1. Mental health inmates will have access to telephones on a daily basis during their regularly scheduled free time, pursuant to CSB Policy and Procedure 2.17.08, Inmate Access to Telephones.

P. PROGRAMS AND SERVICES
1. Mental health inmates will continue to have access to programs and services including, but not limited to, educational services, commissary services, library services, social services, counseling services, religious programs, and recreational programs.

2. There shall be no major differences with mental health inmates from those programs and services offered to the general population, as long as access to these programs does not pose a threat to the health, safety, danger to life, or security of the inmate, staff, or facility.

The Classification Unit will work with the Medical/Mental Health staff to ensure the ability of inmates housed on the Medical Module for a temporary evaluation period to be re-entered into the general population on a case by case basis.
I. POLICY
   A. No one under the age of 18 will be housed at any Contra Costa County Sheriff’s Detention Facility. This does not prevent the housing of persons over the age of 18, who are being prosecuted on juvenile matters.

II. DEFINITIONS
   A. JUVENILE: Anyone who has not reached the age of 18 on or before the date of incarceration.

III. PROCEDURE
   A. If it comes to the attention of any staff that there is a possibility of someone under the age of 18 being housed, they will immediately bring it to the attention of the Shift Supervisor.

      1. The individual shall be immediately isolated and will remain isolated from any adult inmate until their age is verified.

      2. The supervisor will be responsible for verifying that the individual is in fact a juvenile.

         a. This can normally be accomplished by contacting a relative of the individual, or by contacting juvenile probation.

   B. Once the age has been verified, the supervisor will contact the arresting agency and inform them the individual is a juvenile and that they will need to transport the individual to Juvenile Hall.

      1. If the arresting agency refuses to transport, the Facility Commander will determine if we will transport or release.

   C. The Shift Supervisor will direct Operation staff to pull all appropriate records.

      1. Copies of the booking face sheet will be made available for the transporting
2. All personal property and money will be pulled and necessary receipts made out for signature of the transporting officer.
   a. The juvenile will be brought to Intake and held separately until the transporting officer is ready to leave.

D. The Shift Supervisor will complete a Records Correction Form and forward the information the Records Unit no later than the end of shift.

E. The deputy discovering the juvenile will be responsible for generating an Incident Report.
I. POLICY

A. All effort should be made to ensure all high profile inmates take precedence over all other inmates during booking, screening, classification and movement.

II. DEFINITION

A. High Profile inmates are considered to be the following:

1. Those inmates who draw special attention because of the nature of their crime.
2. Those having community status, e.g., public officials, dignitaries, law enforcement members, etc.
3. Members of racial/terrorist organizations, both foreign and domestic.
4. Those identified as being involved with organized crime, high ranking gang members, major narcotic traffickers, inmates with a documented history of attempting to manipulate the judicial process, and all others that seek out or act out to draw special attention.

III. PROCEDURE

A. FACILITY COMMANDER NOTIFICATION

1. All external inquiries regarding those identified as high profile inmates will be directed to the Facility Commander.

B. CLASSIFICATION PERSONNEL NOTIFICATION

1. Classification deputies will give priority to classifying high profile inmates so that the inmate will move through the receiving-booking process expeditiously, and will immediately notify movement deputies upon the completion of the classification process. Refer to Minimum Jail Standards 1050.
C. BOOKING/ITR STAFF

1. Booking/ITR staff responsible for movements will make every effort to move the high profile inmate expeditiously to their proper housing.
I. POLICY
   A. Whenever an inmate is separated from the main population and deprived of any usually authorized item or activity, a report of the action is made and forwarded through the appropriate chain to the Division Captain.

II. DEFINITION
   A. Administrative Management will refer to any classification of an inmate that as a result of certain conditions, requires housing which is separate from inmates assigned to general population housing units, pursuant to Minimum Jail Standards 1050.

III. PROCEDURE
   A. Inmates separated from the general population shall be afforded the same basic rights, privileges, services and participation in facility programs as those in general population except where security requirements or facility resources dictate otherwise.
   
   B. No item or activity should be withheld longer than is necessary to ensure the inmate’s safety and well being of the staff and other inmates.
   
   C. In no instance, will an inmate be deprived of an item or activity for the purpose of punishment.
   
   D. Staff members requesting a restriction of any item, program or service to an inmate shall obtain approval from the Facility Commander prior to implementing the restriction.
      
      1. A memorandum or Incident Report will be submitted, outlining the reason or basis for such action.
         a. Additional reports, memos, etc., which pertains to this request, will be attached.
      
      2. The package will be forwarded to the Shift Supervisor for review and comments.
3. The Facility Commander or their designee will forward the report to the Classification Sergeant, who will investigate the matter further if necessary.

E. Any deviation from this policy will be done at the direction of the Facility Commander or their designee, i.e., emergencies, immediate security problems.

1. If this action is taken, an Incident Report will be completed prior to the end of shift. The Facility Commander and Classification Sergeant and/or designee(s) will review the incident within (3) three working days.

F. The inmate may appeal any action taken against them in accordance with CSB Policy.

### I. POLICY

A. The Custody Services Bureau will identify any inmate who presents a unique threat, or security risk to themselves or others.

B. An inmate who falls into this category is anyone who has not been successfully managed through the normal disciplinary or behavioral health protocols.

C. Once identified, a formal written plan can be developed in accordance with the CSB procedures.

### II. DEFINITIONS

A. SPECIAL INMATE MANAGEMENT PLAN: A formal written plan approved by the Facility Commander that is developed through a cooperative effort of the various detention, medical and behavioral health disciplines to address special inmate management needs.

### III. PROCEDURE

A. Any deputy, medical clinician, or behavioral health specialist may recommend that an inmate be reviewed to determine whether a special inmate management plan should be implemented.

1. The request for review should be made to the Facility Commander.

B. The Division Captain or designee will approve the initiation and implementation of a Special Inmate Management Plan.

C. Once an inmate has been identified as a candidate for a Special Inmate Management Plan, the Classification Unit will conduct a thorough assessment of the inmate to include the following:

1. Complete Booking Information
a. To include booking date, charges, court of jurisdiction and court dates, conviction and sentencing information if applicable.

2. Background Criminal History

a. Past arrests and convictions, prior state prison commitment information including intelligence from CDC officials if applicable.

b. If necessary, the agency of jurisdiction for the inmate’s previous arrests and convictions may be contacted in order to obtain additional information regarding inmate’s history, behavior, etc.

3. Inmate’s Current Classification Status and Housing Assignment.

4. Criteria Justifying Classification

a. A synopsis of the reason for inmate’s current classification status and housing assignment.

5. Behavioral (or Potential Behavioral) Problems and Issues

a. A synopsis of the inmate’s current in-custody behavior, to include information obtained from the classification file, disciplinary records, interviews of line staff, reports, memorandums and logbook entries.

6. Medical and Psychological Status

a. Information that may have an impact on management options should be included, and may be obtained from Prison Health Services, Criminal Justice Mental Health, and from the inmate’s classification file, specifically the intake medical screening sheet.

a. If applicable, the Transportation Unit and Court Security Unit will be contacted to address issues regarding the inmate’s movement to and from appointments, and temporary holding at facilities other than county jails.

8. Inmate Management Options and Recommendations

a. The options and recommendations will be determined after completing a thorough analysis of the aforementioned areas of consideration, and must be complete, taking into consideration classification and housing options, daily actions taken by housing staff, criminal proceedings and disciplinary options, transportation and courts issues.

b. In all cases, a classification deputy will be identified as a liaison deputy to the inmate placed on the Special Inmate Management Plan.

D. The completed Special Inmate Management Plan will be submitted to the Division Captain via the chain of command for approval and/or additional recommendations.
E. At the time the Special Inmate Management Plan is approved, a classification deputy will be designated as the inmate’s liaison deputy. The contact through the liaison deputy will be the inmate’s primary means of communication with the facility’s management.

F. At a minimum, the liaison deputy will have weekly contacts and discussions with the inmate.
   a. The liaison deputy will thoroughly monitor and document the inmate’s behavior.

2. It will be the liaison deputy’s responsibility to interview housing unit staff, and review all logbook entries, memorandums and reports.

G. The Division Captain will be kept appraised weekly of the inmate’s behavior by the liaison deputy, via the Classification Sergeant, and in all cases will be notified immediately of any negative behavior on the inmate’s part.

H. The Special Inmate Management Plan must be updated, reviewed and approved as new information pertaining to the inmate status develops.

1. Any changes to the Special Inmate Management Plan must be made in writing and submitted to the Division Captain via the chain of command for approval and implementation.

2. These written addendums will be attached to the original Special Inmate Management Plan, with copies of the addendums appropriately disseminated by the Classification Unit.

I. Dissemination of the approved written plan will include, at a minimum:

1. Division Captain
2. Facility Commander
3. Administrative Lieutenant
4. Classification Unit
5. All shift sergeants

J. Additional dissemination will include, if applicable, the following:

1. Transportation Unit
2. Court Security Unit
3. District Attorney’s Office
4. Public Defender’s Office
5. Probation Department
6. Other applicable custody staff

K. In the event that the inmate governed by a Special Inmate Management Plan is transferred to another facility, the Facility Commander and Classification Unit of that facility will be notified, and provided with a copy of the Special Inmate Management Plan.

L. The Special Inmate Management Plan will become a part of the inmate’s classification file, and will be treated with the same confidentiality as any other classification document.

| T- Module Post Orders |
I. POLICY

A. All inmate-booking files will conform to one standardized format, in order to provide uniformity and expediency in the booking process.

B. The individual documents in the booking file will be placed in the appropriate section in all booking files, so that individual documents may be found easily.

C. The following Procedures/Guidelines will be adhered to when creating or maintaining an individual file.

II. PROCEDURE

A. MAINTENANCE

1. Each Facility will maintain custody records on all inmates incarcerated in the Facility. The files will contain but are not limited to:

   a. Intake/Booking information

   b. Court generated background information

   c. Cash and Property Receipts.

   d. Reports of Program participation, including Work Release or Trusty Programs and Program Time accumulated.

   e. Reports of disciplinary actions, incidents or crime(s) committed while in custody.

2. The documents in the Custody File ensure that the inmates are properly committed, that inmate property is correctly managed and that a record of major events while in custody is maintained.
3. Inmate booking files are transferred to Detention Division storage at the West County Detention Facility, approximately 24 hours following the inmate’s release (excluding weekends and holidays).

B. FILE SECTIONS

1. The inmate booking files will be Blue in color and divided into 4 sections. The following is a list of the sections and where they are located in the file:

   a. Section 1- Left side as you open the file (page 1).
   b. Section 2- Right side of file when you open it (page 2).
   c. Section 3- Backside of Section 2 (page 3).
   d. Section 4- Last page of file (page 4).

C. Documents that belong in booking files will be placed in the appropriate section and secured with the metal clasps. On-view court cards and enroute cards will be stapled to the file’s cover. Legal-sized documents will be folded up from the bottom of the document.

D. FILE ORGANIZATION CHART

1. SECTION 1- Initial Booking and Booking Information (starting from bottom):

   a. Booking Photo
   b. Booking Authority
   c. Booking Charge Report
   d. On View and Probable Cause Declaration
   e. Bail Determination
   f. Health Questionnaire
   g. Updated Charge Reports

2. SECTION 2- Legal/Criminal Authorities Preceding (Chronologically from the bottom):

   a. Prison Detainer
   b. Warrant Abstracts
   c. Remands
   d. Papers in Court
3. SECTION 3- Custodial/Housing/Administration (Chronologically from the bottom):
   a. Incident Reports
   b. Observation Logs
   c. Request Slips
   d. Visiting Lists
   e. Returned Mail Notices

4. SECTION 4- Inmate Property and Funds
   a. Fingerprint confirmation (pink paper)
   b. Orientation and Telephone Verification (Yellow paper)
   c. Strip Search Record
   d. Inmate Property Receipts
   e. Inmate Clothing Receipts
   f. All Release Authorizations
I. POLICY

A. The Booking/Intake section will serve as the main receiving and release area at the Martinez Detention Facility (MDF).

B. All transfers, intakes, and court remands will be processed at this location prior to the inmate being housed.

C. The intake process shall include medical screening, booking photo, classification, fingerprints, appropriate pre-trial interviews, mental health evaluation, and where applicable, dress-out.

D. For more specific procedures regarding this area, refer to the specific area manual(s), or appropriate procedures in this section of the Policy and Procedure Manual.

II. PROCEDURE

A. MARTINEZ DETENTION FACILITY

1. Booking

   a. This area is designed to process all inmates before being housed. Additionally, some inmates being released or transferred may temporarily be held in Intake. Intake contains the following:

      • Female/Male inmates are processed and held in the intake area but are separated at all times.

      • Holding Cells: There are nine (9) holding cells in male booking area. Included in this number are the following special cells:

         • Separation (3).

         • Sobering (2).
Safety (2).

Other rooms/areas include:
- Arrestee Search Station
- Photograph Station
- Booking Officer Area
- Phone Area
- Fingerprint Station
- Medical Screening Station
- Medical Exam Room
- Dress Out Rooms (2)
- Property Storage Room
- Mental Health Screening Station
- Female Holding Area
- Male Holding Room.

2. The Vehicle Sally Port of this facility is divided into distinct areas as follows:
   a. Law Enforcement Vehicle Parking
   b. Arresting Agency Files/Processing station
   c. Breathalyzer/ Biological Evidence Room.
   d. Work Station
   e. Arrestee Bench
   f. Gun Lockers (25)
I. POLICY

A. Acceptance of new inmates shall be done in accordance with 4015 PC.

B. Newly admitted inmates will be segregated from the general inmate population until the admissions process has been completed.

II. PROCEDURE

A. In all cases a completed Booking Authority, Probable Cause Declaration or Warrant, Property Receipt, and medical screening questionnaire shall accompany the inmate.

B. All sections shall be filled in that are needed, to facilitate a complete booking.

C. The on-duty Shift Supervisor is to be notified as soon as possible whenever there is a problem in accepting a prisoner.

D. In all cases where an arrest is made for reasons other than on-view, the supporting document(s) must be attached; i.e., a warrant arrest shall have either the physical warrant or a machine generated, verified warrant.

1. Contra Costa County warrants must contain “Warrant Abstract”.

2. Out of county warrants shall contain either “Warrant Abstract” or the following information:

   a. Inmate’s name

   b. Inmate’s DOB

   c. Inmate’s identifying information, including:

      • Race

      • Height
• Weight
• Eye color
• Hair color
• Driver’s License number
• Social Security Number
• Other identification number, i.e. FBI, SID or CIN

d. Charges
e. Bail amount
f. Judge
g. Court information
h. Warrant number

E. The following procedures shall apply in the acceptance of arrestees presented at the booking counter.

1. The arresting officer will secure his/her firearm(s), ammunition, baton, and any other lethal weapon(s) prior to bringing the arrestee into Intake.
   
   a. Firearms and ammunition will be stored in the provided gun lockers or temporarily secured in the locked police vehicle trunk, without exception.

   The arresting officer will be responsible for maintaining control of the arrestee, until Sheriff’s Office staff accepts them. Once the arresting officer has relinquished physical custody and control of the arrestee to Sheriff’s Office Staff, the arresting officer shall cease the use of any and all recording devices (body worn cameras, digital audio recording devices, cellular phone recordings, etc.) during the remaining administrative process associated with booking.

   i. If any exigency occurs during the booking process and the arresting officer actively assists in helping to manage the emergency he/she shall be permitted to activate the recording device during the duration of the incident, per the arresting officers’ department policy.

3. All interviews, breath tests, and blood tests will be completed prior to acceptance by receiving staff.

4. The arresting officer will bring the arrestee to the Intake sally port and completed paper work to the Booking Station. If there is no Escort Deputy in the sally port, the arresting officer will stay with the arrestee in the sally port until an Escort Deputy is present.
a. In all cases and prior to acceptance, a Custody Deputy will search the arrestee for property and/or contraband. The deputy will instruct the arrestee to remove their shoes and will conduct a thorough search of the shoes. The deputy will instruct the arrestee to put their shoes back on if the shoes are deemed safe for entry in the facility. In the event a strip search is deemed necessary, refer to Policy 2.08.39 (Inmate Body Cavity Searches – Body Cavity, Strip, Visual and Pat)

b. If during the intake process it is discovered a female inmate is pregnant, the Deputy shall advise the inmate of the standards and policies governing pregnant inmates. The Deputy will have the inmate read and sign the Pregnant Inmate Advisement Form (DET 023:FRM). A copy of the form will be given to the inmate, and a signed copy will be placed in the inmate’s booking file.

5. Prior to accepting a new arrestee, staff shall examine the documents supporting the arrest for completeness, and time stamp the Original Booking Authority.

6. If PC Dec form is required, the Intake Deputy will ensure one has been submitted through ARIES to cover the on-view arrest.

7. The arresting officer will collect all money and property from the arrestee’s person, bag property and money separately, and document each item and amount of money on the Property Receipt and give it to the on-duty booking Deputy.

a. All property bags containing personal property of an arrestee will be sealed by the arresting agency prior to custody staff taking possession of it.

8. Booking personnel will process the inmate’s money and property in compliance with Policy and Procedure.

9. If during the pat search, any alcohol, firearms, live ammunition, explosive substance, or suspected drug or paraphernalia is discovered, it will be the responsibility of the arresting officer.

a. Perishable items will not be accepted by this facility and must be retained or disposed of by the arresting officer/agency. Prescribed medication will be placed into the arrestee’s personal property bag.

10. The arresting officer will be permitted to leave immediately upon completion of pre-booking activities, to include medical staff review and acceptance.

11. If during the intake search, contraband is found and the arresting officer has left, the following will occur:

a. Contraband will be seized without listing it on the property inventory.
The Shift Supervisor will be contacted and;

- The supervisor shall contact the arresting agency, inform them of the item(s) seized and request they return to take possession of the item(s).

- If they comply, all items will be turned over to the arresting agency and no further action is necessary.

- If they refuse to return for the items, the deputy discovering the items will write an incident/crime report, place the contraband into evidence, and process as an on-view arrest, if appropriate.

- Contraband items shall not be placed in an inmate’s property.

12. Everyone entering Booking will receive a yellow wristband containing the following information:

a. Name

b. Booking Number

c. CIN Number

d. Booking Photo

13. All newly arrested persons will have fingerprints taken in accordance with Penal Code 7 section 21.
Sheriff's Office Policy Statement

An inmate known to be pregnant or in recovery after delivery, shall not be restrained by the use of leg irons, waist chains, or handcuffs behind the body.

A pregnant inmate in labor, during delivery, or in recovery after delivery, shall not be restrained by the wrists, ankles, or both, unless deemed necessary for the safety and security of the inmate, the staff, or the public.

Penal Code 3407

(a) An inmate known to be pregnant or in recovery after delivery shall not be restrained by the use of leg irons, waist chains, or handcuffs behind the body.

(b) A pregnant inmate in labor, during delivery, or in recovery after delivery, shall not be restrained by the wrists, ankles, or both, unless deemed necessary for the safety and security of the inmate, the staff, or the public.

(c) Restraints shall be removed when a professional who is currently responsible for the medical care of a pregnant inmate during a medical emergency, labor, delivery, or recovery after delivery determines that the removal of restraints is medically necessary.

(d) This section shall not be interpreted to require restraints in a case where restraints are not required pursuant to a statute, regulation, or correctional facility policy.

(e) Upon confirmation of an inmate's pregnancy, she shall be advised, orally or in writing, of the standards and policies governing pregnant inmates, including, but not limited to, the provisions of this chapter, the relevant regulations, and the correctional facility policies.

(f) For purposes of this section, "inmate" means an adult or juvenile who is incarcerated in a state or local correctional facility.

I acknowledge being provided with the above information.

_________________________________________ Date ________________________________
Inmate Signature

_________________________________________ Date ________________________________
Intake Deputy
I. POLICY

A. No inmate will be received who is in need of immediate medical care, until medically cleared for booking into the MDF.

B. Physically impaired inmates will not enter the MDF except under exigent circumstances.

C. The on-duty Shift Supervisor, in conjunction with Medical staff, will make the determination of whether or not the arrested person will be received into the facility or transported by the arresting agency for medical clearance prior to acceptance.

D. Arrestees who are apparently physically impaired (i.e., transported by ambulance or ambulatory service, wheelchair-bound, in possession of a colostomy bag, etc.) will be considered a priority upon intake and will be processed expeditiously.

E. No part of this policy shall be interpreted in such a manner as to cause discrimination against the physically impaired.

F. Physically impaired arrestees shall not be segregated from the main population unless the classification of the inmate, the security of the facility, and/or special needs of the inmate require it.

II. PROCEDURE

A. INJURED INMATES

1. The booking deputy will notify the Medical Staff and/or Shift Supervisor if an arrested person is in need, or appears to be in need, of immediate medical care.

2. The on-duty Medical Staff and/or Shift Supervisor and or Watch Sergeant will respond to the Booking/Intake area.

3. Medical staff will respond to Intake to examine the individual.

4. The Shift Supervisor will determine whether to accept the arrested person into the
facility or to inform the arresting agency that the individual must be medically cleared prior to acceptance into the facility.

a. Medical clearance will minimally consist of a release form and associated discharge paperwork from a hospital.

a. Intake Officers receiving inmates from arresting agencies after they have been treated at a hospital shall personally deliver any discharge orders issued by the treating physician to the medical staff immediately upon receiving the inmate into custody.

b. The arresting agency will not be permitted to leave until medical staff has reviewed and approved the discharge order.

5. If the determination is made not to accept the arrestee, all processing of the arrested person will stop.

a. All documents, property, money, or related items will be returned to the arresting agency for transport with the arrested person.

b. No property will be held for persons not accepted into Sheriff’s Office facilities.

B. PHYSICALLY IMPAIRED INMATES

1. Physically impaired inmates are to be housed at the MDF or WCDF.

2. Intake deputies will immediately notify medical staff of all arrested persons with an apparent physical impairment.

3. Following the intake property and contraband search, a physically impaired inmate will be escorted to the Booking/ITR nurse's station for medical screening.

4. The nurse will identify and notify the booking deputy of any special needs the inmate may have.

5. Upon notification of special needs, the booking deputy will make all reasonable efforts to provide the noted accommodations, including an accessible lavatory.

a. All persons confined to a wheelchair shall be placed in a cell designated for the physically impaired.

b. If the accommodations cannot be met, the booking deputy will notify the Shift Supervisor or Watch Commander.

6. Following the medical screening, if special needs are identified and/or housing on the medical floor or infirmary is indicated, the remaining processing will be completed immediately. The inmate is to be moved to the identified housing location without undue delay.

a. Intoxicated/under the influence inmates will remain in Intake until they are sober enough to be moved.
b. Violent and/or uncooperative inmates will be processed, housed and moved with due regard for the safety and security of staff.
I. POLICY

A. All incoming inmates shall undergo thorough screening and assessment upon admission, and shall receive orientation to the facility’s procedures, rules, programs and services pursuant to Departmental Policy and Procedure.

II. PROCEDURE

A. All new inmates will be interviewed by a classification officer, if needed, and a medical staff member, as required, at the time of admission to initially determine potential level of offense, sophistication, violence potential, and any medical or mental or chemical dependency issues in order to determine proper assignment to a housing unit.

B. Suicide screening will be conducted and any inmate with suspected suicide potential will be placed in appropriate accommodations and restraints, as required, in the Safety Cell.

C. Intake staff will complete the Health Questionnaire prior to the arresting agency leaving the Intake area to ensure that the arrestee does not have any serious medical/mental condition.

1. Medical staff will record the inmate’s response to all questions on the health questionnaire.

2. Whenever possible, medical staff will screen the arrestee prior to the arresting agency leaving.

D. All inmates showing signs of intoxication may be placed in the Sobering Cells until at such time they can continue processing.

1. An Observation Log is required and must be initiated.
E. All combative inmates, or those inmates posing a danger to themselves or others may be placed in a Safety Cell until they are no longer a risk.

1. Placement in the Safety Cells require the initiation of a Safety Cell Log, including notification to medical staff and the Shift Supervisor, as required.

F. All new inmates shall be issued clean, laundered jail clothing and bedding appropriate to their housing location.

G. Refer to CSB Policy and Procedure 2.12.01, Intake Classification and 2.13.03, Inmate Medical/Health Appraisal Screening for additional information.
I. POLICY

A. Staff will comply with Section 40304.5 CVC, which requires that persons taken into custody for two (2) or fewer traffic warrants be provided with the opportunity to immediately post bail and not be booked, photographed or fingerprinted, nor an arrest record made until that person has been given at least three (3) hours in which to arrange for the deposit of bail.

II. PROCEDURE

A. Ascertain if arresting agency has in fact given the arrestee opportunity to post bail. If so, request the same be noted on the Booking Authority.

1. Do not book the arrestee until the following has been complied with:
   a. Arrestee has been given up to three (3) hours to arrange bail.
   b. Arrestee has been given an opportunity to make not less than three (3) completed telephone calls to arrange bail.

B. If the arrest has sufficient cash in his/her possession, the arrestee shall be taken to the reception lobby by the arresting officer and immediately be given the opportunity to post bail.

C. Arrestee may be booked in advance of the conclusion of the three (3) hour waiting period in the following situations:

1. The arrestee states he/she will be unable to post bail irrespective of the three (3) hour time period.

2. The arrestee has been in continuous custody for three (3) or more hours and has been given the opportunity by the arresting agency to arrange bail. If this applies, request that the arresting agency make a notation of it on the Booking Authority.

3. The bail on one or all warrants is “No Bail”
I. POLICY

A. The Custody Services Bureau will ensure that proper judicial review of all arrests takes place within 48 hours per PC 825. This includes warrant arrests and warrantless arrests.

B. Arresting officers shall submit an electronic probable cause declaration for all warrantless arrests at or prior to the time of booking.

C. Custody Services Bureau personnel shall ensure an electronic probable cause declaration has been received from all arresting officers prior to completing the booking process.

II. PROCEDURE

A. Arresting officers will complete an electronic probable cause declaration through an electronic submittal system on all warrantless arrests, felony and misdemeanor.

B. The probable cause declarations are reviewed by the duty judge.

1. If the duty judge determines there is sufficient probable cause to detain the arrestee, the shift supervisor will detain the individual for arraignment pursuant to section 825 of the penal code and in accordance with the schedule listed in section C of this policy.

2. If the duty judge determines there is not sufficient cause to detain the arrestee, the shift supervisor shall ensure the arrestee is processed for release on the warrantless charges upon discovery of the rejected by the duty judge.

a. The shift supervisor may at their discretion make a courtesy call to the arresting agency to notify that their probable cause declaration has been denied by the judge and the arrestee is being released.

• Exception – PC 647f
C. The arraignment deadlines shall be followed as directed by the California Attorney General’s Office through the California Peace Officer’s Legal Sourcebook:

1. MONDAYS: For arrests occurring between 12:00 a.m. and 5:00 p.m. on a Monday, the arraignment may take place anytime on Wednesday by 1700 hours. For arrests occurring after 5:00 p.m. on a Monday, the arraignment may be anytime that the court is in session on Thursday by 1700 hours.

2. TUESDAYS: For arrests occurring between 12:00 a.m. and 5:00 p.m. on a Tuesday, the arraignment may take place anytime that the court is in session on Thursday by 1700 hours. For arrests occurring after 5:00 p.m. on a Tuesday, the arraignment may be anytime that the court is in session on Friday by 1700 hours.

3. WEDNESDAYS: For arrests occurring anytime on a Wednesday (12:00 a.m. till 11:59 p.m.), the arraignment must occur by close of business on Friday by 1700 hours.

4. THURSDAYS: For arrests occurring between 12:00 a.m. and 5:00 p.m. on a Thursday, the arraignment may take place during the court's regular session the following Monday by 1700 hours. For arrests occurring after 5:00 p.m. on a Thursday, the arraignment may be anytime that the court is in session on Tuesday by 1700 hours.

5. FRIDAYS: For arrests occurring between 12:00 a.m. and 5:00 p.m. on a Friday, the arraignment may take place during the court's regular session the following Tuesday by 1700 hours. For arrests occurring after 5:00 p.m. on a Friday, the arraignment may be anytime that the court is in session on Wednesday by 1700 hours.

6. SATURDAYS: For arrests occurring anytime on a Saturday (12:00 a.m. until 11:59 p.m.), the arraignment may occur anytime that the court is in session on Wednesday by 1700 hours.

7. SUNDAYS: For arrests occurring anytime on a Sunday (12:00 a.m. until 11:59 p.m.), the arraignment may occur anytime that the court is in session on Wednesday by 1700 hours.

8. Holiday Rule: If a weekday court holiday falls on or between the arrest time and the above arraignment deadline, add 24 hours for each holiday to the above arraignment deadline. The new deadline is the holiday-adjusted deadline.

9. If the holiday-adjusted deadline falls on a Saturday or Sunday, add an additional 24 hours for Saturday and 24 hours for Sunday to the holiday adjusted deadline.

D. Warrant arrests shall be scheduled for the next available court date without exception to comply with the 48 hour requirement of Penal Code section 825.
I. POLICY

A. Self-surrenders will be accepted and processed at the Martinez Detention Facility.

II. PROCEDURE

A. When people approach the Reception Lobby clerk to surrender themselves into custody, the clerk shall call for the on-duty Shift Supervisor.

1. This includes the acceptance of any person surrendering under a court order, except weekenders.

B. The Shift Supervisor will dispatch a deputy to contact the person surrendering. The deputy shall determine if there are legal grounds to accept the person by checking:

1. JMS records
2. Active suspense files
3. PIN, WPS and NCIC warrants
4. Authenticity of any documents provided by said person
5. Court commitment verification
6. Other sources as may be indicated

C. If documentation or information is substantial enough to affect an arrest, the deputy shall take the surrendered person into custody.

1. Appropriate arrest documents shall be generated and the subject booked per JMS procedures.

D. The subject will be processed the same as a law enforcement arrest and will be taken to the Intake area for processing.

**DETENTION NUMBER:** 2.11.09

**RELATED ORDERS:** None

**ISSUE DATE:** 07-01-04

**REVISION DATE:** 04-15-05

**REVIEW DATE:** 02-09-18

**CLEARANCE:** CUSTODY

**CHAPTER:** Intake, Transfer, Release and Records

**SUBJECT:** Bail Surrender

I. **POLICY**

A. The Custody Services Bureau will accept bail surrenders that comply with 1300 PC and 1301 PC as follows:

1. Bail surrenders will be accepted anytime before the forfeiture of bail, when the depositor may surrender the defendant or the defendant may surrender him/herself.

2. Bail surrenders will be accepted when the bail bondsman provides appropriate forms and records staff provides verification.

3. Bail surrenders will not be accepted for out-of-county warrants.

4. Bail surrenders will not be accepted on a case the subject is already in custody on.

II. **PROCEDURE**

A. **BAIL SURRENDER ON AN IN-CUSTODY DEFENDANT**

1. The Reception Lobby staff will notify the Clerical Supervisor or Shift Supervisor.

2. The Clerical Supervisor or designee will respond to the lobby and review all paperwork prior to accepting the surrender. Required forms are:

   a. If cash bail was posted, a copy of the cash bail receipt is needed.

   b. If posted bond surrender:

      • A certified copy of the bond or

      • Affidavit by bail licensee or surety company to include:

         • Name of defendant
3. All paperwork will be brought to the records office and the case will be booked in compliance with clerical procedures.

4. Court dates will be assigned at the time of booking, if possible, preferably the next court day, but never more than two (2) court days away.

5. All bail surrender papers will be placed inside the booking folder until the date of court appearance. The bond and surrender papers will then be sent to the appropriate court, with one (1) copy of the surrender papers remaining in the booking folder.

B. BAIL SURRENDER OF AN OUT-OF-CUSTODY DEFENDANT

1. Lobby staff will notify the Clerical Supervisor or Shift Supervisor.

2. The Clerical Supervisor and sergeant or designated deputy will respond to the lobby and review all paperwork prior to accepting the subject and surrender paperwork.

3. Required paperwork is the same as bail surrender on in-custody defendants.

4. The subject will then be processed as a new arrestee. The booking process will be the same as that of a not-in-custody surrender.
I. POLICY

A. The Custody Services Bureau will make every attempt to honor all requests from non-Contra Costa County law enforcement agencies for overnight inmate housing.

II. DEFINITIONS

A. COURTESY HOUSING- The temporary care and custody of an inmate(s) at the request of a non-Contra Costa County law enforcement agency.

III. PROCEDURE

A. Personnel receiving a request to courtesy house a prisoner(s) will notify the Shift Supervisor.

B. The Shift Supervisor will grant the request, unless unusual circumstances prevent us from housing the prisoner(s).

C. Intake staff will have the requesting officer complete a Detainer to provide the authority to hold the prisoner(s)

1. Intake staff will ensure that they obtain all of the requesting officer’s contact information in the event of a problem with the prisoner(s).

D. Prisoner(s) being housed on a courtesy basis will only be entered into JMS, as a prisoner type “Other”.

E. The prisoner(s) will be medically screened and classified.

F. The release portion of the courtesy housing form will be completed when the prisoner(s) is picked up.

1. The completed form will be forwarded to Operations, who will maintain it in the courtesy housing file. The form will be purged and destroyed after one (1) year.
I. POLICY

A. All inmates who are determined to be eligible for release, will be processed as quickly as possible.

B. No inmate will be released from physical custody to the street without the Shift Supervisor’s approval.

C. Inmates being released who are indigent, have clothing inadequate for climatic conditions, do not have clothing available at the time of release, or who can no longer fit in their clothing, will be provided appropriate welfare clothing.

II. PROCEDURE

A. Operations office staff will ensure the inmate is eligible for release and all paperwork is completed correctly, including bail forms and citations.

1. The booking file and all paperwork will be brought to the Shift Supervisor for verification. The sergeant will verify the information, initial the booking file and return it to Operations office staff for processing.

B. Operations office staff will perform a warrant check on all inmates being released.

C. Operations office staff will notify the housing deputy, property, clothing, and accounting of inmates cleared for release.

D. The Escort Deputy will ensure the inmate turns in all county clothing prior to returning the inmate’s personal clothing.

1. The Escort Deputy may not view the individual without clothing unless reasonable suspicion exists to conduct a strip search.

E. Escort Deputy will determine an individual’s need for welfare clothing at the time of release.
1. The Escort Deputy will issue the clothing from the Friends Outside clothing room, as needed.

2. The Inmate Welfare Clothing will be inventoried and stocked by Friends Outside.

3. If no inmate welfare clothing is available or a reasonable size cannot be found, a paper suit will be issued to the inmate in exchange for their inmate clothing.

F. The Shift Supervisor will confirm the inmate’s identity through the following means:

1. Inspecting their armband

2. Verifying their identity by use of the Iris Scan Device and by comparing the Intake print with the Release print

3. Asking the inmate for confirming information such as
   a. Date of birth
   b. Social security number
   c. Place of birth

4. Compares the inmate’s facial features to the Booking Photo.

5. The Shift Supervisor will not release an inmate until satisfied with the inmate’s identification and any and all discrepancies have been resolved.

6. When the inmate’s identity is confirmed, the Shift Supervisor will have the inmate sign all the necessary custody release paperwork.

7. The Shift Supervisor will ensure that all inmate identification is removed from the inmate.

8. All money and property will be released to the inmate.
   a. Inmates may not open any container or bag containing property until they have left the facility.

9. Sworn Personnel will escort the released individual to the un-secure area of the lobby upon Shift Supervisor approval.

G. RETURNING INMATE’S MONEY AND PERSONAL PROPERTY

1. Martinez Detention Facility (MDF)
   a. The release clerk will prepare the funds and personal property for disbursement.
   b. All money, up to $50.00 cash, will be disbursed as cash and placed in an envelope.
c. All money, above $50.00, will be disbursed in the form of a check.

d. Personal Property will be pulled from the assigned property bin/shelf.

e. All funds and property will be given to the Shift Supervisor for disbursement.

2. The Shift Supervisor will have the inmate sign the property receipt, cash receipt and check voucher, and return the inmate’s funds and personal property.

   a. The signed money and property receipts will be placed into the booking.

H. INMATES BEING RELEASED TO OTHER LAW ENFORCEMENT AGENCIES

   a. The release process will be conducted the same as above with the following exceptions:

      • All funds and property will be given to the transporting officer.
      • In addition to the inmate, the transporting officer will sign and date the booking before taking the released individual into custody.

I. PENDING ACTIONS

1. In the event that an inmate’s grievance is still pending at the time of release, the discovery of personal property missing at the time of release, or an inmate’s mail is delivered after their release, the following procedures will apply:

   a. Grievances

      • The assigned staff member will complete all grievance investigations.

      • Grievances resolved and/or completed after an inmate has been released from custody, will be properly documented, and the released inmate will be contacted at his or her last known address, and advised of the disposition of the grievance investigation.

      • Refer to CSB Policy and Procedure 2.16.04, Inmate Grievances for additional information.

   b. Missing property

      • Should it be determined that property is missing; the release clerk is to stop the inmate’s release process immediately, and institute a search for the property.

      • If the search fails to locate the property, the clerk is to notify the Shift Supervisor of the problem and request a deputy or Sheriff’s aide to conduct an investigation and complete an informational report.
• The Shift Supervisor will offer the individual being released a claim for lost/missing property if the property is not located in a timely manner.

• After the completing the investigation and interviewing the inmate, the remainder of the release process may be completed.

c. Mail

I. All mail delivered to detention facilities after an inmate’s release shall be returned to the U.S. Postal Service to be forwarded back to the original sender pursuant to Inmate Correspondence and Mail Regulations Policy and Procedure.

J. INMATE BOOKING (S)

1. No inmates will be released from custody on a duplicate booking without a supervisor’s approval.

2. All means should be exhausted to locate lost or misplaced booking prior to generating a duplicate booking.

3. A supervisor’s approval will be required prior to reproducing a duplicate booking.

4. If a duplicate booking is produced, both the employee and the supervisor who authorized the duplication will initial and date the new booking.
I. POLICY

A. No inmate will be released from physical custody to the street, without sworn supervisor approval.

B. Any person arrested on charges in accordance with current cite release policy, i.e., infractions, misdemeanor on-views and/or misdemeanor warrants, shall be released from custody on his or her signed promise to appear in a court at a specified date and time.

II. PROCEDURE

A. ON VIEW AND CITIZEN’S ARRESTS

1. Prisoners received and booked on misdemeanor offenses will be released on a citation following booking except in the following instances:

   a. A reasonable likelihood that the offense would continue, or when a person, property or evidence directly relating to the arrest would be endangered by the arrested person's release.

   b. The person arrested demands to be taken immediately before a magistrate or refuses to sign a citation.

   c. The arrest was for domestic violence.

B. WARRANTS FOR INFRACTIONS AND MISDEMEANORS

1. Individuals who are subject to arrest under the authority of a warrant may be issued a citation, in lieu of physical arrest, unless one of the following conditions exists, pursuant to 827.1 PC.

   a. The misdemeanor is for violence.

   b. The misdemeanor involves a firearm.
c. The misdemeanor is for resisting arrest.

d. The misdemeanor is for giving false information to a peace officer.

e. The person arrested is a danger to him/herself or others due to intoxication or being under the influence of drugs or narcotics.

f. The person has other ineligible charges against him/her.

g. The person requires medical examination or medical care, or was otherwise unable to care for his/her own safety.

h. There is a reasonable likelihood that the offense or offenses would continue or resume, or that the safety of persons or property would be immediately endangered by the release of the person.

i. The person refuses to sign the notice to appear.

j. The warrant of arrest indicates that the person is not eligible to be released on a citation.

2. ADDITIONAL CONSIDERATIONS FOR CITATION REFUSAL

a. A citation shall not be issued if the person arrested requires medical examination, or medical care, or if he/she is unable to care for his/her own safety.

b. When it is necessary to transport the arrested person to a hospital for medical treatment, a citation may be issued at the hospital.

c. Individuals arrested due to being a danger to themselves or others while under the influence of alcohol or drugs may be released when sober, provided no other limitations exist.

d. A citation shall not be issued if the person cannot or will not offer satisfactory evidence of identity.

- "Satisfactory evidence of identity", is defined as the degree of evidence required to reasonably assure the departmental member that the person is who he/she claims to be, taking into consideration the nature of the identification presented, and the circumstances of the misdemeanor offense involved.

- When the person cannot offer satisfactory evidence of his/her identity, the departmental member should attempt to verify the person’s identity by independent means, if it is practical to do so.

- This provision shall be considered met if after fingerprinting the subject, he/she is linked to a known person (CCIN or AFIS) or the subject provides adequate identification to the booking officers.
e. In the event a person is refused cite release for any condition beyond those listed in this policy section, supervisors shall document the reasons and circumstances for refusal.

f. All related documentation relating to the refusal will be forwarded to the Facility Commander for review.

Citation Release Form Procedures

---

### I. POLICY

A. If all release criteria have been met, pursuant to Policy and Procedure 2.11.12 “Citation Release”, the jail citation shall be used.

B. Custody Services Bureau staff involved in the issuing of citations for the release of inmates from custody shall document all information legibly when completing the jail citation release form.

### II. PROCEDURE

A. **USE AND DISTRIBUTION OF JAIL CITATIONS**

1. The jail citation shall be used for inmates being released on their promise to appear, pursuant to 853.6 PC.
   
   a. The jail citation shall not be used for non-custody matters, i.e. parking ticket.

2. The jail citation will be distributed as specified on the form.
   
   a. White, original, to appropriate court.
   b. Yellow, to arresting agency.
   c. Pink, copy for released person.
   d. Goldenrod, copy for booking folder.

B. **TELEPHONIC OR’S**

1. The jail citation form will be used in accordance with this procedure for telephonic OR’s, as specified in the Policy and Procedure 2.11.28 “Disposition of Court Proceedings
I. POLICY

A. The staff at Martinez Detention Facility (MDF) will release prisoners to “police officer’s release” when appropriate, and in compliance with Sections 849 PC and 851.6 PC.

B. No inmate will be released from physical custody, without sworn supervisor approval.

II. DEFINITIONS

A. PENAL CODE SECTION 849: This Penal Code Section reads in part:

1. 849(a): When an arrest is made without a warrant by a peace officer or private person, the person arrested, if not otherwise released, shall without unnecessary delay, be taken before the nearest or most accessible magistrate in the county in which the offense is triable, and a complaint stating the charge against the arrested person shall be laid before such magistrate.

2. 849(b): Any peace officer may release from custody, instead of taking such person before a magistrate, any person arrested without a warrant in the following circumstances: (1) The officer is satisfied there are insufficient grounds for making a criminal complaint against the person arrested. (2) The person arrested was arrested for intoxication only, and no further proceedings are desirable. (3) The person was arrested only for being under the influence of a controlled substance or drugs and the person is delivered to a facility or hospital for treatment, and no further proceedings are desirable. (4) The person arrested was arrested for driving under the influence of alcohol or drugs and the person is delivered to a hospital for medical treatment that prohibits immediate delivery before a magistrate.

3. 849(c): Any record of arrest of a person released pursuant to paragraphs (1) and (3) of subdivision (b) shall include a record of release. Thereafter, such arrest shall not be deemed an arrest, but a detention only.

B. PENAL CODE SECTION 849.5: This Penal Code Section reads in part:
1. 849.5(a): In any case in which a person is arrested and released and no accusatory pleading is filed charging him/her with an offense, any record of arrest of the person shall include a record of release. Thereafter, the arrest shall not be deemed an arrest, but a detention only.

C. PENAL CODE SECTION 851.6: This Penal Code Section reads in part:

1. 851.6(a): In any case in which a person is arrested and released pursuant to Paragraphs (1) or (3) of subdivision (b) of Section 849, the person shall be issued a certificate, signed by the releasing officer or his/her superior officer, describing the action as a detention.

2. 851.6(b): In any case in which a person is arrested and released and no accusatory pleading is filed charging him/her with an offense, the person shall be issued a certificate by the law enforcement agency which arrested him/her describing the action as a detention.

III. PROCEDURE

RELEASE UNDER SECTION 849(b)

1. Only the arresting officer, or other member of the arresting officer’s agency, will authorize release under PC 849(b).

2. The officer requesting the release will be asked to indicate “Release Per 849(b) PC” by filling out “Certificate of Release” form and adding it to the booking.

3. Telephone requests to release must be referred to the Shift Supervisor for approval.
   a. A faxed request must be received from the Arresting Agency indicating the name, case number, and the specific charges the inmate is being released by P.C. 849(b).

4. The arresting officer will complete the 849(b) form when possible.

B. Operations staff receiving notification of a release pursuant to 849(B) PC Will:

1. Complete the “Certificate of Release” form for the detainee upon release. The custody sergeant will sign the certificate
   a. Give the suspect the original
   b. Forward a copy to Sheriff’s Records
   c. Attach a copy to the booking
I. POLICY

A. The Custody Services Bureau will take all reasonable steps to reduce jail population to below mandated capacities.

B. The objective of this policy is to establish a procedure for the early release from custody of inmates pursuant to 4024.1 PC.

C. This procedure shall only apply to Contra Costa County Court sentences.

D. No inmate will be released from physical custody, without sworn supervisor approval.

II. DEFINITIONS

A. PENAL CODE SECTION 4024.1: This Penal Code Section reads as follows:

1. 4024.1(a): The Sheriff, Chief of Police, or any other person responsible for a County or City Jail may apply to the presiding Judge of the Justice, Municipal or Superior Court to receive general authorization for a period of 30-days to release inmates pursuant to the provisions of this Section.

2. 4024.1(b): Whenever, after being authorized by a Court pursuant to subdivision (a), the actual inmate count exceeds the actual bed capacity of a County or City Jail, the Sheriff, Chief of Police, or other person responsible for such County or City Jail may accelerate the release, discharge, or expiration of sentence date of sentenced inmates up to a maximum of five days.

3. 4024.1(c): The total number of inmates released pursuant to this Section shall not exceed a number necessary to balance the inmate count and actual bed capacity.

4. 4024.1(d): Inmates closest to their normal release, discharge, or expiration of sentence date shall be given accelerated release priority.

5. 4024.1(e): The number of days that release, discharge, or expiration of sentence is accelerated shall in no case exceed 10 percent of the particular inmate's
original sentence, prior to the application thereto of any other credits or benefits authorized by law.

III. PROCEDURE

A. The Facility Commander is considered the capacities coordinator and on-duty director for decisions associated with adjusting inmate populations when the population of the facility exceeds the established capacity.

B. If the Agency is operating under a valid accelerated release procedure, either judicial order or pursuant to 4024.1 PC, the following guidelines will apply:

1. Whenever an accelerated release order is implemented, all releases identified, are to be equitably released, with the following exceptions.

   a. This shall not apply to Work Furlough inmates, who have volunteered for the program in order to maintain their employment, vocational training, and/or education.

   b. In the event that only females or only males exceed the capacities for 4024.1 PC releases, then only prisoners of those sexes will be released.
      
      • It is not necessary to release inmates of both sexes if only inmates of one sex exceed the capacities.

C. RELEASE PROCESS

1. When it is determined that a release under Section 4024.1 PC is necessary, the timekeeper will request a JMS release list.

2. The bookings will be pulled by an MDF Operations clerk and examined by the day shift Supervisor to determine which inmates are eligible.

   a. All sentenced inmates who have 10% or 5-days remaining on their sentence, (whichever is less), are eligible for early release.

3. After the Shift Supervisor determines which inmates are to be released, the release clerk will prepare and distribute a release list.

   a. The morning shift will ensure the paperwork, property and money is ready and the inmates are moved to ITR, along with the regularly scheduled releases.

   b. The inmates will then be released on the following day shift.

   c. A copy of the release order will be placed in the booking.

   d. The reason for release will be documented as 4024.1 PC.

   e. JMS reason for release shall show “13-Other.”
D.  SPECIAL CIRCUMSTANCES

1.  Whenever the accelerated release order is required and numbers above ten inmates are released a written notice is to be affixed to the Public Information Log and the Press Log.

2.  Whenever an excessive number of releases are to occur, the Facility Commander will:
   
a.  Ensure that sufficient accounting funds are available to avoid potential cash shortages.

   b.  Ensure enough BART/bus tickets are available for the releases.

   c.  Attempt to conduct actual releases during the day shift
I. POLICY
   A. All 4011.5 PC and 4011.6 PC orders will be completed as directed by the court.

II. DEFINITIONS
   A. PENAL CODE SECTION 4011.5- Pertains to removing an inmate from a county or city jail for immediate medical or hospital care.
   B. PENAL CODE SECTION 4011.6- Pertains to the removal from a county or city jail of a disordered inmate, for 72-hour treatment and evaluation pursuant to 5150 W&I.

III. PROCEDURE
   A. Whenever an order for 4011.6 PC is made, the original paperwork from the court will remain in the custody of the Martinez Detention Facility (MDF) records.
   B. The documents to be held in the Records Office during the examination include but are not limited to; hard copy dispositions, consolidated arrest reports, commitments, etc.
   C. The Operations clerk will make a photocopy of the court disposition or other related document and attach it to the original 4011.6 PC court order.
   D. The clerk will make a photocopy of the 4011.6 PC order and attach it to the holding authority documents maintained in the Booking.
   E. Under no circumstances are the original court dispositions and other holding authorities to be transported to the treating mental health facility.
   F. The transportation section will handle forthwith 4011.5 PC and 4011.6 PC orders.
      1. Court orders being issued after the Transportation Office is no longer staffed will be referred to the Shift Supervisor who will arrange transportation or secure the court’s permission to have the evaluation completed the following day.
G. Upon receipt of a non-forthwith 4011.5 PC or 4011.6 PC order, Booking/ITR staff receiving such order will:

1. Date/time stamp the order.
2. Make a copy of the order and place the copy in the booking.
3. Forward the original order to the treating facility.
4. Refer any possible special handling/housing requirements to classification.

H. Upon completion of the examination or evaluation and the inmates return to the facility, the Intake deputy will:

1. Accept the inmate back into the facility.
2. If taken forthwith from court, receive the disposition/custody form.
   a. Ensure that the paperwork matches the inmate being returned.
   b. Ensure that the transporting officer has signed on the back of the disposition/custody form that the 4011.5/4011.6 PC is completed, including date/time and badge number.
3. Refer any possible special handling/housing requirements to classification and/or medical staff.

I. Upon completion of a 4011.5 PC or 4011.6 PC, with the inmate being admitted to a hospital and the paperwork being returned to the facility, the Operation clerk will:

1. If taken from court forthwith, receive the disposition/custody form.
2. Ensure the transporting officer has signed on the back of the disposition/custody form, the 4011.5/4011.6 PC has been completed, including date/time and badge number, and that the inmate has been admitted.
3. Inform the appropriate housing area of the inmate's admittance and request that the inmate be dropped from the count and all property be forwarded to the property room for holding.
4. Ensure the action is documented in the inmate’s booking.
5. Forward all cell property to the property room for inventory.
6. File the booking in the hospital file cabinet.
7. Track the inmate’s custody and make changes as needed.
8. When the inmate is returned to the MDF, the inmate will be placed back into active status, at the MDF, in JMS.

J. HEALTH CARE PROVIDER
1. Court-ordered procedures at MDF:
   
a. Court orders will be delivered directly to medical staff.

   b. All court orders received by medical staff will be forwarded to the facility physician.

   c. The inmate’s medical record will be pulled and evaluated by the facility physician.

   d. Forthwith court orders are handled in the same manner.

   e. A court order that requires a response to the judge will be answered as soon as the inmate/patient is evaluated. Responses will be addressed to the appropriate judge and court utilizing the Health Services stationery and forwarded, via U.S. mail.

2. Court-ordered evaluations
   
a. All court-ordered evaluations that are not forthwith will be taken directly to the medical staff and subsequent evaluation of the patient will be made in an appropriate time frame.

   b. Upon the issuance of a court-ordered medical evaluation forthwith, the order will be taken to the MDF medical staff for review and to schedule the inmate for an evaluation as soon as possible.

   c. Upon arrival at the MDF, the medical department will be immediately notified of a court-ordered medical evaluation forthwith and the inmate/patient will be taken to medical.

   d. The medical evaluation will be done by any of the following qualified individuals: Physician, Physician’s Assistant, or Nurse Practitioner.

   e. If a physician is not present on the premises, then following an initial evaluation by a nurse or the physician's assistant, the on call physician will be notified of the initial findings and a treatment plan established.

   f. If the inmate/patient requires transport to an outside medical facility for further evaluation and/or therapy, medical staff will order it. Detention facility personnel will handle further transportation.

   g. In those instances wherein the medical provider is unable to comply with the court order, or compliance with the order would circumvent sound medical practices, or wherein the medical procedure is unnecessary, or the procedure is determined to be inappropriate, the medical director/physician will contact the appropriate judge to provide a response.
I. POLICY

A. Facility Commanders may remove the guard from inmates confined to hospitals in compliance with 4011.7 PC or 4011.9 PC and the following procedure.

B. No inmate will be released from physical custody to the street, without sworn supervisor approval.

II. DEFINITIONS

A. PENAL CODE SECTION 4011.7 (IN PART)- “Not withstanding the provisions of sections 4011 PC and 4011.5 PC, when it appears that the prisoner in need of medical or surgical treatment necessitating hospitalization or in need of medical or hospital care was arrested for, charged with, or convicted of an offense constituting a misdemeanor,...The Sheriff or Jailer in action taken under 4011.5 PC may direct that the guard be removed from the prisoner while he/she is in the hospital.”

B. PENAL CODE SECTION 4011.9 (IN PART)- “Not withstanding the provisions of sections 4011 PC and 4011.6 PC, when it appears that the prisoner in need of medical or surgical treatment necessitating hospitalization or in need of medical or hospital care was arrested for, charged with, or convicted of an offense constituting a felony,...The Sheriff or Jailer in action taken under 4011.5 PC may direct that the guard be removed from the prisoner while he/she is in the hospital, if it reasonably appears that the prisoner is physically unable to effectuate an escape or the prisoner does not constitute a danger to life or property.”

III. PROCEDURE

A. When advised of an inmate being admitted, under guard, to a location or hospital ward:

1. The Operations Clerk will:

   a. Obtain all pertinent information about the inmate, including, but not limited to: booking, classification, disciplinary information and officer input.
b. Contact the hospital to determine the inmate’s length of stay.

c. Inform the Shift Supervisor of the inmate’s status.
   - Including the above information and condition of the inmate.

2. The Shift Supervisor will:

   a. Review information pertaining to the inmate.

   b. Ensure that it reasonably appears the inmate is physically unable to escape.

   c. Inform the Facility Commander of the inmate’s status, and if practical, request the inmate’s release pursuant to 4011.7 PC or 4011.9 PC as appropriate.

   d. If the guard is to be removed, the deputy guarding the inmate will be instructed to complete a “Police Hold” form.

      - One copy will be given to the hospital and one copy will be placed into the inmates booking.

      - The deputy must read the form to the inmate, explain that he/she is not released from custody and will be charged with escape if he/she leaves.

      - The deputy will write the jail telephone number on the form and instruct both nurse and inmate to call that number if there are problems, and when the inmate is ready to be discharged.

      - The deputy will instruct the nurse or hospital staff that the inmate is not to be told when he/she will be discharged.

      - The guard shall be removed after the above is completed.

   e. Advise the Custody Sergeant.

3. When notified by the Custody Sergeant that the guard has been removed, the Operations clerk will:

   a. Indicate in the booking, in the appropriate area, “Pursuant to 4011.7 PC or 4011.9 PC”, (Specify location of hospital).

   b. Update the inmate’s housing status.

   c. Operations staff will place the Inmate Management card (headcard) into the booking.

   d. If still assigned to a housing unit cell, the housing unit deputy will collect all cell property.
• The housing unit deputy will give the collected property to the Sheriff’s Aide assigned to property for assignment to a property shelf.

• If no Sheriff’s Aide is available, the housing unit deputy will ensure that the property is assigned and placed on a shelf in the property room.

• The deputy will update the inmate’s JMS property records and provide a copy to operations clerks for placement into the inmate’s booking.

4. Inmate Escapes

a. Any person receiving notification or being made aware of an inmate’s escape from the hospital shall immediately inform the Shift Supervisor of the incident.

b. Complete all required reports relative to the escape.

B. INTAKE PROCEDURE

1. When notified of an inmate’s return from 4011.7 PC or 4011.9 PC, Booking/ITRS staff will:

a. Inform the Release clerk and Medical staff of the inmate’s return.

b. The Release Clerk will place the inmate in MDF x-status in JMS.

c. The inmate will be interviewed/evaluated by medical staff.

d. The inmate will be re-housed.

2. Intake Deputies will ensure the inmate’s property is returned to the inmate prior to receiving their housing unit assignment.
I. POLICY

A. Inmates may be Temporarily Released from the Custody of Contra Costa County Office of the Sheriff under the following conditions:

1. Court Order
2. Removal Order by another agency or jurisdiction
3. Out of county contractual housing
4. Medical and mental treatment
5. Family emergencies

B. Any Inmate that is a Temporary Release from the custody of the Sheriff to another institution for a period of one (1) day or longer, upon their return to the custody of the Sheriff, will have a new photo taken and a new charge sheet generated which will be forwarded to the Classification Unit.

II. PROCEDURE

A. RELEASES TO OTHER AGENCIES OR JURISDICTIONS OVER 24 HOURS

1. Any inmate being temporarily released from any Contra Costa County Detention Facility for more than one (1) day shall be released in accordance with CSB 2.11.11, Inmate Release Process, with the following exception:

   a. The Release Clerk will stamp “Temporary Release” on the booking sheet and shall fill in all required information.

   b. The Inmate’s booking folder will be marked as “Temporary Release” and placed in the “Temporary Release” files.
2. An inmate who is released from the custody of the Sheriff to another city, county or state facility for a period of one (1) day or longer will adhere to the following:

a. The transporting agency will return the inmate to the MDF.

b. Transportation will deliver the inmate to the Booking area and ensure that the inmate has a new photo taken (If the inmate’s physical appearance has changed, etc.) and a new charge sheet is generated and a copy forwarded to the Classification Unit.

B. RELEASES TO OTHER AGENCIES OR JURISDICTIONS LESS THAN 24 HOURS

1. Any inmate being temporarily released for less than One (1) day from any Contra Costa Detention Facility under direct escort (i.e. Police or Sheriff’s Detectives, Parole or Probation Officer, etc) will remain in facility issued clothing and will not be eligible to change into civilian clothing or receive any personal property.

a. The Release Clerk will stamp “Temporary Release” on the booking sheet and shall fill in all required information.

b. The Inmate’s booking folder will be marked as “Temporary Release” and placed in the “Temporary Release” files, in the release area at the MDF only.

2. The escorting agency shall be responsible for returning the inmate to the location in which they were temporarily released from.

C. INMATE FAMILY EMERGENCIES

1. Inmates requesting a temporary release due to a family emergency must receive approval from the Facility Commander or Detention Division Captain.

2. The following considerations shall be applied to any request regarding family emergency temporary releases:

a. For sentenced prisoners, the Facility Commanders will reasonably exercise the Sheriff’s statutory discretion for family emergency passes under PC 4018.6, which means that the judges approached for “court ordered passes” on behalf of sentenced persons should refer them back to the Sheriff’s Office.

b. Consideration of passes for unsentenced prisoners will be the responsibility of the judges, who hold discretion to grant OR. Each judge-granted pass will specify a date/time and place to surrender, and the Sheriff’s Office will report any failures to surrender to the judge on their standard one-page form. “Escape” incident reports will not be necessary.

c. Both the Sheriff’s Office and the judges will limit passes to persons presenting low or no risk to the public (primarily considering the charges) and will conduct reasonable inquiry to verify the claimed emergency.
Pre-sentenced persons for whom the felony calendar department has indicated a state prison position will not receive passes. Nor will a pass be considered for anyone who is held on parole or out-of-county-warrant.

d. Note: It is recommended by the Contra Costa Superior Courts that appropriate additional conditions on passes/OR releases be imposed. Such conditions might include limiting the release to the minimum time necessary to attend the emergency situation, “no drugs or alcohol”, “search” and/or “testing” conditions on return to custody, and waiver of extradition.

3. Any inmate being temporarily released from any Contra Costa County Detention Facility for more than one (1) day shall be released in accordance with CSB 2.11.11, Inmate Release Process, with the following exception:

a. The Shift Supervisor will read the inmate the admonishment on the Temporary Release Form (DET 003) and have the inmate sign upon agreement to the conditions in the appropriate areas.

b. The Shift Supervisor will stamp “Temporary Release” on the booking sheet and shall fill in all required information.

c. The Inmate’s booking folder will be marked as “Temporary Release” and placed in the “Temporary Release” files.

d. If the inmate refuses to accept the conditions of the temporary release as outlined on the back of DET Form 003, the pass will be denied.
I. POLICY

A. All inmate property shall be stored in a secure location accessible only to Sheriff’s Office personnel.

B. All records storage areas shall be restricted only to those personnel authorized by the Custody Services Bureau Assistant Sheriff.

II. PROCEDURE

A. Restricted Areas

1. Clothing Exchange, Clothing Storage Rooms and Records Storage

   a. Inmates will not be permitted access to these areas.

   b. Non-Sheriff’s Office personnel shall not enter these areas. Access is restricted to the assigned Sheriff’s Office staff for that shift.

      • Assigned GSD staff/contractors entering the area for maintenance purposes.

   c. Custody Staff will not allow:

      • Other personnel to use their keys for entry into restricted areas

      • Entry of non-Sheriff’s Office personnel without the express permission of the Shift Supervisor

2. Property Room

   a. There shall be a minimum of one (1) Sheriff’s Aide on each shift assigned to the property room. In the absence of a Sheriff’s Aide, a deputy will be assigned. Only the designated person shall have access to the property storage area.
B. Storage, Handling and Inventory of Inmate Clothing and Property

1. Inmate Personal Property and Clothing Inventory
   
   a. Sheriff’s Aides will inventory inmate Property and Clothing storage areas at least once each week.
   
   b. An informational report will be generated to confirm the completion of inventory and will be routed to the Support Services Aide at the West County Detention Facility.
   
   c. Any items found which do not appear to belong to a present inmate shall be collected and forwarded to the Support Services Aide at the West County Detention Facility and the Facility Commander with the investigational incident report.
I. POLICY

A. All accepted inmate property will be inventoried, documented and stored in a secure location(s).

II. DEFINITIONS

A. BULKY ITEMS: Articles that will not fit into the assigned inmate-clothing bag. Items must have been in possession of the inmate at the time of placement at Martinez Detention Facility (i.e. backpacks, sleeping bags, etc)

B. PERSONAL PROPERTY: Inmates valuables, excluding money, clothing or bulky items. (I.e. wallets, jewelry, etc.)

III. PROCEDURE

A. PROPERTY RECEIVED-NEW ARRESTS

1. Accepting Property: All property, money and clothing shall be recorded on a Contra Costa County Property/Clothing Receipt (DET: 065). The property will be sealed in a clear plastic property bag by the arresting officer/agency prior to acceptance of the arrestee.

   a. The following property will not be accepted:

      - Perishables: Foods, candies and beverages.
      - Weapons: Guns, bullets, explosive devices (to include loose matches), or instruments with sharp points or edges.
      - Only folding knives will be accepted if taped closed.
      - Any property that, in sum, will not fit in a standard 8”x 7”x 3” storage box.
• Exceptions: Bulky items that are property of new arrestee’s of Detention staff only. (i.e. Transportation Inter Agency Transfers or Commitments taken into custody at the MDF)

• Any clothing item that, in sum, will not fit in a standard size clothing property bag.

b. In the event a discrepancy occurs, the intake officer will provide the arresting/transporting officer with an opportunity to remove items causing the discrepancy or to retain all arrestee property and return it to their agency for control and disposition.

1. If the property bag is opened and its contents are altered, the bag shall be resealed by the arresting agency prior to accepting the arrestee.

2. The Property Receipt will be updated by the transporting officer/agency.

c. Upon acceptance of property and before distributing the receipts, the intake officer or escort deputy shall pat-search the inmate to ensure all property has been removed. Any additional items found are to be added to the receipt as appropriate by the arresting agency. The transporting officer will then seal the property bag. Any contraband items are to be returned to the arresting officer for disposition.

1. If additional property is discovered after the arresting agency has left, the staff member who found the property will fill out an additional property receipt. The staff member will insert the original property bag into another property bag along with the newly found property. The new property bag will then be sealed along with a copy of the additional property receipt.

2. Packaging and Transfer of Property

a. Personal property is to be stored in permanently sealed plastic bags.

• Property will be placed in a single plastic bag with the pink copy of the property receipt (DET065:FRM) inserted into the bag and facing outward.

• The bag containing property will be inserted into a second plastic bag.

• The inmate will sign the computer generated property receipt and the pink copy of will be inserted into the second bag and the bag will be sealed. The white copy of the computer generated property receipt will be stapled to the outside of the sealed bag.

• An adhesive tag containing the inmate’s name and booking number will be attached to the outside of the bag.
• The tag will be dated and signed by the intake officer or escort deputy accepting the property.

• The person filing the property for storage shall also date and sign the tag.

b. All property will be marked legibly with the inmate’s name and booking number. If no booking number is available, the CCIN number may be used until a booking number is issued.

c. Clothing and shoes will be bagged, and stored pursuant to Policy and Procedure 2.15.06, Cleaning and Storage of Inmate Personal Clothing.

3. Packaging and Transfer of Money

a. The arresting/transporting officer will be responsible for inventory and documentation of all money removed from the arrestee on the Contra Costa County Clothing/Property Receipt (DET065: FRM).

b. The intake officer or escort deputy will count all money turned in at the time of booking with any money recovered during the booking pat-search and will ensure the amount reconciles with what is recorded on the receipt. Any corrections to the receipt shall have the arresting/transporting officer’s initials next to the corrected amount.

c. The intake officer or escort deputy will place the money into a plastic bag. The computer generated money receipt will be placed into the moneybag and sealed.

d. If the amount does not exceed $200, the intake deputy or escort deputy will place the sealed moneybag in the locked money safe.

• The release clerk will periodically go to intake and collect the moneybags from the safe for processing.

e. If the amount is $200 or more, the intake deputy or escort deputy will deliver the moneybag to the release clerk, by hand.

4. Distribution of Receipts

a. All white copies of the personal property and money receipts shall be placed inside the arrestees booking.

b. All pink copies will be either attached or inserted with property being transferred for accounting/storage.

c. The yellow and goldenrod copies will be offered to the arrestee and transporting officer, respectively, and may be discarded if refused.

B. HANDLING AND STORAGE OF PROPERTY
1. Upon completion of the Pre-Booking process, Inmate personal property will be placed in the locked property safe. The release clerk will periodically go to intake to collect the property bags and store them in the assigned bin.

2. The Operations Clerical Supervisor will ensure all inmate property is properly stored and accounted for.

3. Bulky items brought into the facility by detention staff will be searched, bagged, sealed, and marked with an adhesive tag with the inmate’s name and booking number.
   a. Bulky items will be immediately delivered to the property room for storage by the assigned Sheriff’s Aide.

4. Clothing: inmate clothing will be placed into one (1) issued clothing bag and stored in the facility property rooms.

5. Soiled Clothing
   a. Soiled arrestee clothing will be disposed of.
      • Option to dispose-Soiled clothing will be placed into a “Red Bag” and given to the DSW for disposal.
      • An incident report will be submitted regarding the disposal to include nature of the contamination, clothing description, etc.
   b. The Booking/ITR Deputy will make a detailed notation in the Pre-Booking notes regarding the final disposition of the soiled clothing.
   c. The Deputy responsible for handling the soiled clothing will complete an Information Only Incident Report regarding the final disposition of the clothing.
   d. The Booking ITR Deputy will notify the Shift Supervisor of the incident.
      • The Shift Supervisor will review and forward a copy of the incident report to the Property Room Sheriff’s Aide for records.
   e. Inmates entering the facility with soiled clothing will be issued a paper suit upon their release.
   f. Soiled clothing will not be stored in any Detention Facility.
I. POLICY

A. All inmate property in the care of jail staff will be properly receipted and stored in a secure location(s).

B. All inmate property either permanently released or in exchange for another item will be accompanied with a receipt and/or incident report.

II. DEFINITIONS

A. BULKY ITEMS: Articles that will not fit into the assigned inmate-clothing bag. Items must have been in possession of the inmate at the time of placement at Martinez Detention Facility (i.e. backpacks, sleeping bags, etc)

B. PERSONAL PROPERTY: Inmates valuables, excluding money, clothing or bulky items. (i.e. wallets, jewelry, etc.)

III. PROCEDURE

A. CLOTHING EXCHANGE

1. Inmate Civilian Clothing Exchange

   a. No exchange of civilian clothing will be accepted unless:

      • The exchange is on a ONE-FOR-ONE basis. (i.e. one pair of pants for one pair of pants, etc.)

      • The visitor must both deliver and accept all civilian clothing being exchanged.

      • Visitors conducting a clothing exchange must possess a valid form of identification.

   b. The following items of clothing will not be accepted for civilian clothing
exchange:

- Jewelry
- Belts with large, heavy or sharp buckles
- Hats
- High-top boots (above ankle)
- Topcoats or raincoats

2. Jury Trial Civilian Clothing Exchange

   a. Refer to CSB Policy 2.11.22, Inmate Trial Court Dress Outs, for additional details.

B. PROPERTY TRANSFER OR RELEASE

1. Inmates Transferred between Facilities

   a. The Shift Supervisor at each facility will oversee the arrival and departure of all inmates and their property.

   b. The housing unit deputy from the releasing facility will ensure that all inmate property is labeled with the inmate’s full name and booking number before the inmate is removed from their assigned housing unit.

   c. The Shift Supervisor or his/her designee will:

      - Accept the inmate into facility custody.
      - Inventory, search, store and account for inmate clothing, bulky items, personal property, and booking file.

   d. Each designee, including Transportation Deputy, will have a copy of the movement list.

   e. Each designee will legibly sign and place their employee number on their copy of the movement list upon completion of their delegated task.

   f. Each designee will return the completed, signed, and dated movement list to the Shift Supervisor supervising the action.

   g. Transportation Deputies will return their completed, signed, and dated movement list to the Transportation Sergeant.

   h. All completed movement lists will be signed and dated by the Shift and Transportation Sergeants and forwarded to the Facility Commanders of the receiving facilities.

   i. Any discrepancies concerning inmate personal clothing or property
should be brought to the attention of the Shift and Transportation Sergeants immediately.

- The Shift Sergeant will initiate an investigation prior to the inmate being accepted into facility custody.
- If the discrepancy cannot be immediately resolved, the Shift and Transportation Sergeants will evaluate the need to return or receive the inmate.
- In the event the items are not located, the Processing Sergeant will document the incident and forward to the Facility Commander.

2. Inmates released or transferred to another jurisdiction including Temporary Releases.

a. The Release Clerk will generate and distribute the Inmate Release List to the Shift Supervisor, Property Room Sheriff’s Aide and Escort Deputy.

b. The Property Room Sheriff’s Aide/Escort Deputy will gather all clothing and bulky property stored in the property room. These items will be delivered to the dressing rooms next to the release window.

c. The Release Clerk will collect and prepare all inmate personal property stored in the property bins located in Operations for release.

d. Sheriff’s Aides will gather all property for Marsh Creek and West County Detention Facility transfers.

e. Sheriff’s Aides will collect all property for inmates being transferred to San Quentin Prison.
   - Sheriff’s Aides will document the collection and disposition of state inmate property through an Information Only Incident Report.

f. The inmate will inventory all personal clothing and bulky items and acknowledge receipt of his/her items.
   - Inmates with no personal clothing will be issued either a paper suit or clothing provided by donation.
   - Paper suits are located in the property room.

g. Escort Deputies will ensure that all returned facility clothing is free of malicious damage or alterations. Escort Deputies will note any damage to facility property in an Incident Report and notify the Shift Supervisor.

h. Escort Deputies will place all clothing that is not damaged in the soiled clothing cart, next to the dress out rooms for cleaning.
i. The Shift Supervisor will provide the inmate with all personal property previously stored for them while in custody.

   • The inmate will be responsible for the inventory of all personal property returned by the Shift Supervisor and noting any discrepancies prior to their release.

   • Due to commonly stored valuables, small items and knives upon entering the facility, clear plastic sealed bags will not be opened until the inmate has been released from the facility.

   • The inmate must sign for receipt for all property being returned prior to their release.

j. The Shift Supervisor will provide all Funds, Personal Property and Bulky Items for inmates to the transporting officer of the jurisdiction receiving the inmate.

3. Lost or Missing Property

a. Any time it is discovered that an inmate’s property is lost or missing, the following actions will occur:

   • The Shift Supervisor will conduct a complete investigation in an attempt to determine the location of the property (i.e. bin search, review of booking, interview with Transportation/Clerical staff, etc).

   • An incident report will be submitted detailing the investigative steps and disposition (if known) of the inmate’s property.

4. Property Release

a. Inmate may release their property at any time by signing a property release form. Inmates choosing to release their property must release the entire contents of their property.

b. The person receiving the property must be present, have a valid form of identification, and accept the entire contents of the property being released.

c. The property release form must have the following information:

   • Inmate’s name and signature

   • Description of property being released

   • Witness/Deputy’s name

   • Name of person or bail company receiving property
C. STATE INMATE CLOTHING

1. Newly sentenced state inmates may release all their personal clothing to a family member or friend prior to leaving for state prison.
I. POLICY

A. Custody staff will allow any inmate appearing before a Jury Trial Court to dress in approved civilian clothing.

B. Custody staff will ensure that all of the inmates civilian clothing is accounted for and returned to the Jury Trial Court Dress Out rack upon their return from court.

C. Jury Trial inmates are allowed up to (2) sets of civilian clothing while in Jury Trial status.

II. PROCEDURE

A. Jury Trial civilian clothing exchange/receipt

1. A Sheriff’s Aide or Escort Deputy will proceed to the lobby with the clothing bag of the inmate.

2. The Sheriff’s Aide or Escort Deputy will meet with the visitor and will inventory and inspect all incoming clothing for contraband in the visitor’s presence.

3. The Sheriff’s Aide or Escort Deputy will complete a Receipt and Waiver for Inmate Clothing Exchange Form listing the accepted incoming clothing and/or exchanged clothing. State on the form whether the Inmate has (1) or (2) sets of clothing in our custody.

   Note: Receipt of a second set of civilian jury trial clothes can be done without conducting a one-for-one exchange.

4. The visitor must sign and date the Receipt and Waiver for Inmate Clothing Exchange Form for verification of receipt/exchange. A Copy of the Receipt and Waiver will be provided to the:

   a. Visitor
5. The Sheriff’s Aide or Escort Deputy conducting the receipt/exchange will document the activity in the JMS property-clothing notes of the inmate by noting:
   a. Date and time of exchange.
   b. Name and DL # or other acceptable form of identification of visitor.
   c. Initials and employee number of Sheriff’s Aide or Deputy receiving the clothing.
   d. State whether the Inmate has (1) or (2) sets of clothing in our custody.

   • Note: Inmate authorization is not necessary on a one-for-one clothing exchange.

6. The Sheriff’s Aide or Escort Deputy, upon receipt of civilian court clothing, will place the clothing into a Jury Trial clothing bag, in lieu of a traditional clothing bag.

B. Inmate Jury Trial Court Dress Outs

1. Inmates will only be allowed to change into civilian clothing for court trial.

2. Operations Supervising Clerk will generate a list of inmates to be dressed out for court from the Court Master Schedule.

3. The MDF Operations Court Clerk will confirm the list and make any additions or changes as necessary.
   a. The Operations Clerk will forward a copy to the Shift Supervisor, the Property Room Sheriff’s Aide and Escort Deputies.
   b. The Shift Supervisor will be responsible for reviewing the list and posting the information at the release window prior to the start of court movements.
   c. The Property Room Sheriff’s Aide will put only the inmate’s civilian clothing (no personal property) on the Trial Courts Dress Out Rack.
   d. The deputy transporting the inmate to the dressing room will conduct clothing exchange and ensure that all facility issued clothing is returned.
   e. Once the clothing exchange has been completed, the transporting deputy will return the clothing bag to the Trial Courts Dress Out Rack.

C. Inmate Refusal to Dress for Jury Trial Court
1. When an inmate refuses to dress out for a Jury Trial Court appearance, the following should occur:
   a. The clothing will be sent with the inmate to the court.
   b. A copy of an incident report detailing the refusal will be sent to the court with inmate.
   c. In the event the incident report is not completed at the time of inmate transport, the Shift Supervisor will fax a copy of the report to the court immediately upon completion.
   d. The Shift Supervisor, where the refusal occurred will telephone the court and advise the bailiff of the inmate’s refusal to dress for Jury Trial.

D. Inmate Returning from Jury Trial Court-

1. Upon returning from court, the deputy transporting the inmate to the dressing room will ensure that a full clothing exchange is conducted and the inmate is searched in accordance with CSB Policy and Procedure.

2. The transporting deputy will verify all the inmate’s civilian clothing is contained inside the Jury Trial clothing bag.

3. The deputy conducting the clothing exchange will ensure that the inmate’s trial clothing is returned to the Trial Courts Dress Out Rack.
I. POLICY

A. Personal property or clothing may be released to any law enforcement agency or court officer after signing a receipt for that property.

II. PROCEDURE

A. Prior to releasing any inmate’s property as evidence to a law enforcement agency, the following must occur:

1. The on-duty Shift Supervisor will be notified.
2. The representative must agree to take all inmate property or clothing.
3. The representative must be present upon removal of the evidence.
   a. No evidence will be seized and sent to the representative.

B. Upon any property being seized, the following will occur:

1. A written receipt of those articles seized will be prepared by custody staff and signed by the person receiving the property.
   a. The receipt shall be legible and will list the representatives identifying employee number and agency.
   b. A copy of the receipt will be sent to the inmate.
2. It shall be the responsibility of the individual releasing the property to ensure that an incident report is completed regarding the release.
I. POLICY

A. Unclaimed property will be disposed of in accordance with Section 26642 of the California Code of Regulations.

II. DEFINITIONS

A. CALIFORNIA CODE OF REGULATIONS SECTION 26642- “The Sheriff shall pay into the general fund for the use and benefit of the county any money of a prisoner or the proceeds of the sale of his or her valuables remaining unclaimed for a period of one year after his or her release, or 30 days with signed Detention form 042 (San Quentin Property only), or five years after his or her death, or 120 days after a notice has been sent to his or her last known address or, in the event of his or her death, one year after a notice has been sent to his or her last known next of kin.”

III. PROCEDURE

A. RELEASE

1. Ongoing purges of the property storage areas shall be conducted with at least one purge a month.
   a. An active inmate list will be used to obtain a property purge list.
      • This list is sorted by name, booking number, and storage location.
   b. Listing shall be run against all property in storage, including property in the bulk storage room and on clothing racks.

2. The property Aide shall handle any property found to be unclaimed as follows:
   a. Research booking number for last date of custody and current address.
   b. Consolidate property with clothing, label and mark with suspense date.
   c. Forward property to Warehouse Aide at the West County Detention Facility.
3. The Sheriff’s Aide assigned to the Warehouse will complete the following:
   a. Prepare a “Found Property Letter.” Mail the original letter and retain one office copy.
   b. Supervise the removal of property not claimed after a 120-day waiting period.
   c. The Sheriff’s Aide assigned to the Warehouse will repeat this process at least once per month.

4. All unclaimed property is taken to County property where the items will be destroyed, auctioned, or donated. The warehouse aide will record the following information
   a. Name of person receiving property
   b. Date and time property turned over

5. Claimed Property
   a. The Owner or his or her designated agent may pick up property that has been located and claimed.
      - The individual picking up the property must have a valid identification and be in possession of the “Found Property Letter” at the time of pick up.
   b. The individual handling the claim will retrieve a copy of the letter and property receipt from the property clerk’s file.
      - The staff member will ensure the person picking up the property signs the receipt prior to the property being released.
      - Attach the original letter recovered, to the copy and property receipts and file.
      - The property clerk’s copy of letter is to be destroyed.

B. IN CUSTODY DEATH

1. All property will be turned over to the Coroner’s Office on any in-custody death at the time of pick-up of the deceased.
   a. The coroner will issue a receipt for the property.

2. When property is discovered after the deceased has been removed, the procedure for purging property shall be the same as listed above with the following exception.
a. The time limit is increased from 120-days to one (1) year from when notification is sent.

b. The form letter cannot be used for notification. An individual letter following the form letter format shall be sent to the next of kin.

- The coroner will usually have a contact person and address for the deceased individual.
I. **POLICY**

A. Bails shall be accepted in all cases where applicable, and the subject is not eligible for other pre-arraignment release.

B. Fines and balance of fines are those penalties set by the court and payments are accepted in a similar manner as bail.

II. **PROCEDURE**

A. **ACCEPTABLE LEGAL TENDER FOR PAYMENT OF BAILS AND FINES:**

1. Cash - U.S. currency only (only negotiable paper acceptable for payment of fines).
2. Surety/Bail Bond.
3. Certified Bank Cashier checks.
4. Money Orders

B. **ACCEPTABLE NEGOTIABLE PAYMENT, OTHER THAN CASH:**

1. Certified Bank Cashier:
   a. Must be payable to the Contra Costa County Office of the Sheriff.
   b. It must be for the exact amount.
   c. No change will be given or checks cashed by the Reception Lobby staff.
   d. Questions or concerns about the validity of a Cashier’s Check will be referred to the Shift Supervisor.

C. **BAIL/SURETY BOND**
1. The Bond must be complete and correct in the following areas:
   a. Inmate’s full name
   b. Booking number
   c. Case or docket number
   d. Charge(s)
   e. Bail Amount
   f. Court date and time
   g. Must contain the surety of the bond on the face or page two
   h. Date of surety and corporate seal must be checked
   i. Expiration date of the surety
   j. Must be signed by the bondsman
   k. Surety of the bond must be for the exact amount posted on the disposition or more, if less, the bond is invalid

   l. If any of the above is missing or inaccurate, the bond is not valid.

D. MULTIPLE ARRESTS

1. Each arrest will be considered a separate bond.

2. If one bond is valid and one or more are not, accept only the one valid bond.

3. If an outstanding warrant is located and confirmed, you may still accept the original valid bond.

4. All invalid bonds are to be returned to the person posting bail.

E. RECEIVING BONDS

1. The Clerk receiving the bond will:
   a. Review the bond to ensure proper information.
   b. Forward bond to Shift Supervisor for review and approval.
   c. Place the original and a photocopy of the bond in the booking folder after the bond is signed by the Shift Supervisor.
2. Upon approval of the bond and prior to the release of the inmate, the inmates booking will be checked for accuracy by the Release Clerk and signed by the Shift Supervisor.

F. REPORTING OF BAILS OF $10,000 CASH OR MORE

1. Reporting requirements: Per section 26 USC 1.60501-2T, any clerk who receives more than $10,000 in cash as bail for any individual charged with a criminal offense, must complete IRS Form 8300 with respect to that cash receipt.

   a. The information must be reported on IRS Form 8300, and is required under the Violent Crime Control and Law Enforcement Act of 1994.

   b. The bank submits the IRS Form 8300 when a cashier’s check is used.

   c. Upon receiving $10,000 or more (U.S. Currency) as bail, the clerk will issue a receipt and obtain from the depositor the information for purposes of completing the attached form (IRS Form 8300-refer to appendix). The clerk shall complete the following:

       • Part I: The name, address, and taxpayer identification number (TIN) of each person posting the bail (payor of bail), other than a person posting bail who is licensed as a bail bondsman in the jurisdiction in which the bail is received.

         • Verification must be made of the identity of each payor of bail listed on the return. Driver’s license or comparable documentation with photograph thereon, i.e., passport, DMV registration card is acceptable.

       • Part II: the name, address, and taxpayer identification number (TIN) of the individual charged with the specified criminal offense.

       • Part III: The date the cash was received, the amount of cash received, type of transaction, description of service (bail) and criminal offense.

       • Part IV: Business that received cash:

         • Contra Costa County Office of the Sheriff
         • Facility Name
         • Facility Address
         • Employer identification number: 94-6000509
         • Nature of business: Law Enforcement

       • The clerk will sign and date the form, indicate their title and include the phone number.
• Original IRS form 8300 will be forwarded to the Fiscal Accounting Office with a copy of the cash deposit receipt.

d. A photocopy of the IRS Form 8300 will be placed into the inmate’s booking.
I. POLICY

A. In the event there is a discrepancy in the bail and/or fine between the inmate’s JMS information and the court disposition paperwork in the inmate’s booking, all attempts will be made to identify and resolve the discrepancy.

B. No inmate will be released until the Facility Commander or designee is satisfied that the discrepancy has been resolved.

II. PROCEDURE

A. To determine the correct bail or fine:

1. During normal business hours, the Operations clerk will call the appropriate court for confirmation.

2. If the court is closed and the booking contains no court document confirming a change in the bail status, the following shall be done:
   
   a. RUMBA will be checked for the amount of the bail/fine. A copy of the court docket will be printed.
   
   b. The Minute Order will be checked for the amount of bail/fine.
   
   c. A comparison of the RUMBA printout and Minute Order will be made.
   
   d. Attach the copy of the RUMBA court docket to the Minute Order and place in the booking with a memorandum detailing the discrepancy, and which method was used to determine the bail/fine amount.

3. Inform the on-duty Shift Supervisor of the discrepancy and obtain his/her approval for the release.

4. Process as directed by the Shift Supervisor.
I. POLICY

A. The Custody Services Bureau will provide the public with information about individuals in custody providing it meets the guidelines listed below and does not infringe upon an individual’s right to privacy.

B. Only authorized staff trained relative to records security and the use of records information systems may access inmate information.

C. Release of state and local information derived from CII and RUMBA rap sheets will comply with state, local statutes and regulations.

D. The office of the Sheriff contributes to, and has access to, current booking, housing, classification, court, and prior offender information through participation in local, state, and federal computer information systems.

E. These systems shall only be used by personnel authorized and trained in their use, and the information so accessed, shall only be used for official purposes including, but not limited to, processing inmate and operational requirements, research, and assisting in decision making processes necessary to the proper functioning of the facility.

II. PROCEDURE

A. CONFIDENTIALITY

1. In order to protect the confidentiality of inmate booking files, only facility personnel with a “need to know” basis are authorized access to the files, except with permission from the Shift Supervisor.

2. The majority of the information contained in an inmate's booking record is considered confidential and is released only on a “need to know” basis.

3. All staff will be advised of the laws and regulations relating to confidentiality of inmate booking information.
4. Any person who knowingly furnishes a record of information to someone not authorized by law to receive such record of information, is guilty of a misdemeanor pursuant to 13302 PC.

   a. Employees shall not reveal police information outside or within the Department as required by law, or competent authority.
   
   b. Names of informants, complainants, witnesses, suspects, and other persons known to the police are considered confidential.

5. Any person, knowing he/she is not authorized by law to receive a record of information, who knowingly buys, receives or possesses the record of information, is guilty of a misdemeanor pursuant to 13303 PC.

6. Pursuant to 13000 PC, some agencies which are authorized to receive information are:

   a. Courts of the State
   b. Peace Officers
   c. District Attorneys of the State
   d. Prosecuting Attorneys
   e. Probation Officers
   f. Parole Officers

7. To protect the confidentiality of inmate information, while maintaining a mechanism to release information authorized by the inmate to specific persons or entities, the facility shall have Information Release Consent Form(s) available for release of interview, personal, medical or mental health information.

8. The inmate authorizing the release, prior to the release of any information, shall sign the release of information form.

   a. A copy of the release of information form will be placed in the inmate’s booking.
   
   b. Contra Costa County Health Services is the only entity authorized to release medical/mental health information.

B. The following information is considered to be public information and may be released to the public, except to the extent that disclosure of a particular item of information would endanger the safety of a person involved in an investigation or would endanger the successful completion of the investigation or a related investigation.

C. All other information contained in the inmate’s jail record(s) is not for disclosure except with the Facility Commander’s approval or the inmate’s written signed release.
1. The information that may be released is as follows:
   a. Name and date of birth
   b. Booking name (if different)
   c. Arrestee’s physical description:
      • Sex
      • Hair color
      • Eye color
      • Weight
      • Height
   d. Date and time of arrest
   e. Date and time of booking
   f. City of arrest
   g. Booking Number
   h. Charges
   i. Bail
   j. Facility currently housing individual
   k. Release Date:
      • If prior to release, disclose the scheduled release date.
      • If following the inmates release, disclose the actual date of release and manner of release.
      • Staff will provide this information in person, over the phone, or direct the requester to the Sheriff’s webpage
   l. Arresting agency (Not officer’s name).

D. Staff will refer requests for the following information to the appropriate source:
   1. All inquiries for more detailed court information to be referred to the District Attorney or Clerk of Court, of appropriate jurisdiction.
   2. All inquiries for detailed arrest information shall be directed to the agency making
the arrest.

3. Requests for disciplinary information will be referred to Custody Administrative Services.

4. Refer formal record requests to Custody Services Bureau Administrative Services.

5. Refer requests for medical information to the Contra Costa County Health Services.

6. Non-Contra Costa County holds shall be confirmed as existing, the status i.e., bail amounts, charges, etc. However, refer specific information requests to the agency placing the hold.

7. All questions regarding the acquisition, use or release of state and local summary criminal record information will be referred to Custody Administrative Services.

8. No information shall be given, relative to court or transportation times either external or internal.
I. POLICY

A. It is the policy of the Custody Services Bureau facilities to return all State prisoners to the appropriate State institution as soon as possible.

II. PROCEDURE

A. All inmates in County custody for State charges only will be returned to the custody of the State.

B. There are five (5) categories of prisoners affected:

   1. 6253b PC prisoners
   2. 1767.3 W&I prisoners
   3. 3151 W&I prisoners
   4. 4530 PC prisoners
   5. 5054.1 PC prisoners.

C. All prisoners that have no pending local charges and possess only a state hold, shall be transported to the appropriate authority as soon as possible.

   1. The Transportation Unit will be responsible for coordinating the transportation of all inmates that apply.
I. POLICY
   A. Individuals committed under only Civil Code Sections will be accepted, processed and housed separately from criminal commitments.

II. PROCEDURE
   A. CIVIL CHARGES
      1. Civil commitments can be for civil contempt, 1209 PC and in conjunction with criminal charges.
         a. The inmate does not have to be isolated and handled separately while in custody on both criminal and civil charges.
      2. If the individual is held solely on civil charges, they must be processed, transported, housed and fed separately.
   B. WITNESS ORDERED HELD
      1. Witnesses are often held for their own protection because they will be a witness in a criminal case.
      2. They are to be processed, housed, transported, and fed separately.
      3. Witnesses held should have no contact with criminal inmates.
      4. If the individual is a witness in a criminal case and has other criminal charges pending, the individual will be housed according to Procedure II. 1(a) listed above and does not need to be isolated.
I. POLICY

A. Staff will receive and serve all legal process that complies with 4013 PC and 415.20b Code of Civil Procedure (CCP) for those persons in custody.

II. PROCEDURE

A. Service of process upon inmates shall be made in the following manner:

1. A private process server or any other person attempting to serve civil process upon an inmate must appear at the lobby of the appropriate detention facility.

2. The clerk shall determine if the inmate being served is in the facility, and if so, shall accept the papers for the named inmate in accordance with 415.20b CCP.
   a. The civil paper must be delivered to the inmate at the earliest opportunity in accordance with 4013 PC.
   b. Failure to comply with this procedure in a timely manner will subject the Office of the Sheriff to liability for any damages suffered by the inmate.

3. The clerk will notify Shift Supervisor that there are papers to serve an inmate.
   a. The Shift Supervisor will review the document and assign a deputy to serve the civil papers to the inmate forthwith.
   b. The deputy serving the civil papers to the inmate shall read the document to the inmate.
   c. The deputy serving the civil papers shall submit an Incident Report, detailing the time and date of service and any additional details that may be pertinent.

4. The deputy accepting service will fill out the “proof of service” section on the papers.
a. The deputy will serve a copy of the papers to the named inmate.

b. If a copy of the service is requested, the deputy will return a copy to the clerk. The clerk will ensure a copy of the service is provided to the requesting party.

5. Under no circumstances will civil process be accepted by mail.

a. All civil process received by mail for service upon an inmate will be promptly returned to the sender, with a notation that 4013 PC and 415.20b CCP have not been complied with.
I. POLICY:

   A. An accurate record of sentence related information will be established for each inmate committed to this facility as part of the inmate’s record. This is to provide that inmate time is accurately computed and recorded in conformance with applicable statutes and regulations.

   B. The record shall be designed to allow for computation of earned or forfeited good time and work time credits and projected release date.

II. DEFINITIONS:

   A. PROJECTED RELEASE DATE: Date the inmate will be released if all variables remain unchanged including deductions for good/work time or the addition of school credits or conditions of accelerated release.

   B. COMMITMENT PAPERS: Documents signed by the sentencing judge or clerk of the court ordering imprisonment of the inmate.

   C. PENAL CODE SECTION 4019, READS IN PART:

   1. “The provisions of this section shall apply…when a prisoner is confined in a county jail…including all days in custody from the date of arrest to the day on which the serving of the sentence commences…”

   2. (Good Time): “For each four day period in which a prisoner is committed…one day shall be deducted from the period of confinement unless it appears by the record that the prisoner has not satisfactorily complied with the reasonable rules and regulations established by the Sheriff…”

   3. (Work Time): “For each four day period in which a prisoner is committed…one day shall be deducted from the period of confinement unless it appears by the record that the prisoner has refused to satisfactorily perform labor as assigned by the Sheriff…”
III. PROCEDURE:

A. A prisoner is entitled to full “Good Time” and “Work Time” credits from the date of arrest so long as he/she does not violate reasonable rules and regulations or does not refuse to work.

B. Pre-sentenced good time and work time credits may be forfeited by disciplinary action in the same manner as post-sentenced credits. Forfeiture of good time and work time credits will be in accordance with the guidelines established by the California Minimum Jail Standards for Local Detention Facilities, and in compliance with Agency Orders.

C. When a sentence is imposed upon an inmate, the face of the booking folder will be appropriately marked by the clerk computing the sentence. This will be done by placing the terms of the sentence in the box called “Sentence” and the date of the sentence in the box called “Sentence Date.” The updating clerk will place their initials in the appropriate box on the custodial file.

D. The Clerk, prior to the completion of his/her shift, shall complete time computations using the procedures set forth in the Automated Jail Information System Manual. When the computer is not operating, the records officer shall manually determine a tentative release date to determine if the subject will be due for release on the date the sentence was imposed, or the following day(s) before the records officer returns to work.

E. It shall be the graveyard clerk’s responsibility, to ensure that the “Due For Release” list is generated on a daily basis and all scheduled inmates due for immediate release are processed accordingly.
I. POLICY
   A. It shall be the clerk’s responsibility, to determine those inmates who are eligible for processing in accordance with 1381 PC.

II. PROCEDURE
   A. 1381 PC provides a speedy trial for sentenced inmates in this county, who have unsentenced holds in another county, providing:
      1. Subject is sentenced for 90-days or more in this county.
      2. 1381 PC does not apply to any of the following holds:
         a. 3056 PC (Parole Violator, adult).
         b. 3151 W& I (Parole Violator, narcotic offense).
         c. 1767.3 W& I (Parole Violator, youth authority).
         d. 1551.1 PC (Out of State holds, extradition).
   B. Whenever a subject is found who fits the criteria as indicated above, the inmate shall initiate the 1381 PC process as follows:
      1. Complete the 1381 PC notification form in triplicate and forward it to Operations.
      2. The deputy delivering the form to the inmate shall inform the inmate that he/she is to sign the forms and return forms to Operations for mailing.
         a. If the inmate elects to mail the form his/herself, one (1) copy will be returned to records for filing in the booking folder with the notification that the inmate will mail forms.
b. If the inmate elects to have Operations mail the form, one (1) copy will be given to the inmate, and the other two (2) copies shall be returned to Operations, where the original is mailed to the appropriate location and one copy is placed in the inmate’s booking folder.
I. POLICY
   A. Whenever a warrant is found on a subject that is in custody, sections 821, 822, 850 and 976 PC will be complied with.

II. PROCEDURE
   A. LOCAL (CONTRA COSTA COUNTY): Whenever a warrant is served, wherein the court of jurisdiction is in Contra Costa County, the following procedure shall be followed:
      1. The warrant will be added to the inmate’s booking, in accordance with appropriate booking procedures.
      2. The inmate will be fingerprinted and the fingerprints verified through Central Identification Services (CIS).
      3. The inmate will be assigned a future court date, to the appropriate court, that is not in conflict with already assigned court dates.
   B. INTRA-STATE, (OTHER COUNTIES IN CALIFORNIA): Whenever a warrant is served, wherein the court of jurisdiction is within California, but not Contra Costa County, the following procedure shall apply:
      1. The warrant will be added to the inmate’s booking, in accordance with appropriate booking procedures.
      2. The inmate will be fingerprinted and the fingerprints verified through CIS.
      3. An enroute card will be attached to the front of the booking folder and an 821/822 PC form attached to the warrant.
         a. The inmate will have the option to make a local court appearance on the warrant. If a court appearance in Contra Costa County is chosen, no action is to be taken until directed by the court after said appearance.
b. If the inmate does not request a local court appearance or the local judge orders the inmate be sent to the other jurisdiction, a teletype will be sent.

- Whenever the inmate has more than one warrant under 821 and 822 PC, the agencies closest to our county shall be considered first. The date and time the teletype is sent will be recorded on the face of the booking folder and a hard copy of the notification will be placed inside the booking folder.

- Teletype format is to include:
  - Inmate’s name and booking number
  - Date of birth
  - Warrant number
  - Charges
  - Court jurisdiction
  - Date the inmate is available for pick-up
  - Request notification of date/time to be picked-up

- It shall be the clerk’s responsibility to ensure all notifications are made.

c. The responding agency must comply within the following time parameters. If they fail to comply, notification to that affect will be sent to the agency of jurisdiction. If no other holds exist, the subject will be released from custody.

- Whenever the agency of jurisdiction is more than 400 miles from the arresting jurisdiction and the warrant is for a felony, five (5) court days will be allotted for pick-up.

- When mileage is less than 400 miles or any misdemeanor, five (5) calendar days are allowed for pick-up.

4. If the out-of-county warrant is the only charge for the inmate, an “Out-of-County Warrant Only” paper will be attached to the front of the booking folder.

C. INTER-STATE, (STATES OUTSIDE CALIFORNIA): Whenever a warrant is served wherein the court of jurisdiction is outside the state of California, the following procedure shall be followed:

1. A booking authority will be completed, the inmate fingerprinted and the fingerprints verified by CIS.

2. The charge section of the booking authority is to read “1551.1 PC” with no bail. The charge and bail portion of the warrant abstract are to be ignored.
3. The Probable Cause Declaration will be faxed to the on-call judge.

4. The warrant will be faxed to the civil unit.

5. If the Out-of-State warrant is the only charge for the inmate, an “Out-of-State Warrant Only” paper will be attached to the front
I. POLICY

A. All demands for removal orders by outside agencies will be accepted and processed with the following exceptions:

1. The inmate has been sentenced to state prison. He/she will be transported to state prison, and the demanding agency can obtain him/her from the state prison facility.

2. If a conflict with our County’s unsentenced case is apparent. All conflicts will be referred to the Shift Supervisor for resolution.

II. DEFINITIONS

A. REMOVAL ORDER: An official court order from the court of one County to another County or state prison facility demanding that a specific inmate be released to the Sheriff of the demanding County for the purpose of transfer to that County for trial.

B. DETAINER: A written document issued by the submitting County or state prison facility that describes the type(s) of want(s) or hold(s) from that County or state prison facility. It further gives the status of those cases.

III. PROCEDURE

A. The removal order is turned over to the Sheriff of the requesting County or the Warden of the state prison facility for execution, and is normally coordinated by transportation units. The following will apply when receiving and releasing inmates on removal orders.

1. RECEIVING

   a. Contra Costa County Sheriff’s Transportation Unit, after receiving a removal order, will pick-up the inmate.
b. Transportation will deliver the inmate to booking, with the appropriate booking forms filled out, a copy of the removal order and detainer(s) from the submitting County or state prison facility.

- Whenever an inmate has an active case(s) pending in the submitting County, our transportation will track the inmate to ensure his/her return prior to the scheduled court date. If the case(s) are sentenced matters, records will track for compliance of release dates.

c. The inmate, upon intake, shall be processed as a new arrest. All property, clothing and money will be receipted. Medical screening and classification will be completed the same as other new arrests.

d. The inmate may not be booked on the removal order unless a valid warrant is received or the subject is remanded on the case.

e. If the court remands the subject, and our transportation returns the subject to the original county, and CCCSO detainer shall be sent informing the agency that we have a further want.

2. Inmates shall remain as enroute until:
   a. The inmate is returned to the agency or state prison facility received from.
   b. The agency received from detainer has expired or the release date from the state prison facility has passed.

- The clerk will contact the agency to confirm their release date.
- If correct, request that agency to send a teletype confirming their hold is dropped.
- If no other holds exist, the inmate is to be physically released.

B. RELEASE

1. Normally, an agency wanting to make a pick-up on a removal order will call ahead to arrange for pick-up. The release clerk shall handle all such calls.
   a. The release clerk will check the inmate’s status, approve or deny the request, and advise the requesting agency.

2. Approved requests for pick-up shall be scheduled to include, reason for removal order, and name of demanding agency.

3. A detainer for each case the inmate is in custody on will be filled out and placed in the booking folder.

4. On a release to a removal order, all property and money will be signed for and released to the demanding agency.
5. The booking release code used for removal orders shall be “TREL”. All custodial file(s) with a copy of the detainers shall be placed in the temporary release file in the operations office.

a. It shall be the Clerical Supervisor’s responsibility to ensure that all temporary release files are reviewed and verified with the holding agency on at least a monthly basis.

C. RETURN BY DEMANDING AGENCY

1. Remove the booking folder from the temporary release file.

2. Re-activate the booking in JMS.

3. The booking process consists of a new medical screening completed and a new booking photo, which are added to the current booking folder.

4. If a court date was missed, schedule the inmate for the next available court date.

5. If the subject is sentenced in this County, make sure the booking folder is returned to a clerk who will re-calculate the release date in JMS.
I. POLICY

A. It is the policy of the Contra Costa County Sheriff’s Office to return to custody any inmate who is released in error as quickly as possible.

II. DEFINITIONS

A. TECHNICAL ESCAPE: A release of an inmate in error due to an interpretation of paperwork or identification, an inmate in constructive custody (i.e. sentenced misdemeanants at the hospital, etc.) who leaves constructive custody without permission or authorization.

III. PROCEDURE

A. When it is discovered that an inmate has been released in error, on-duty personnel will take the following steps.

1. The employee who discovers that an inmate has been released in error will immediately notify the on-duty Shift Supervisor.
   a. The Shift Supervisor will in turn notify the Facility Commander.

2. The Shift Supervisor will ensure the following actions are taken:
   a. If there is a possibility that the released inmate is still in the area, a search of the immediate area surrounding the jail will be conducted.
   b. The Shift Supervisor will attempt to contact the subject by telephone and have him/her return voluntarily.
   c. The Shift Supervisor will assign a deputy sheriff to write a report which outlines the details of the technical escape.

3. The Facility Commander shall prepare a press release when appropriate.
B. The Shift Supervisor will take the following steps to ensure the proper police agencies are notified:

1. The Field Operations Bureau (FOB) Lieutenant of Investigations will be notified if the escape occurs during the weekdays (0800-1700 hours). The Officer of the Day will be advised through Sheriff’s Dispatch of escapes at all other times.

C. In the event the inmate was in custody on a warrant/warrants only and had not yet appeared in court on the warrant(s), the following will be done:

### CHAPTER:
- Intake, Transfer and Release and Records

### I. POLICY

A. The Custody Services Bureau will book all new arrestees into the facility in a timely manner.

### II. PROCEDURE

A. BOOKING/ITR STAFF WILL:

1. Pre-book each arrestee one at a time by conducting the following actions:
   a. Review all arrest paperwork for completeness and accuracy. If paperwork is accepted, a booking number will be issued.
   b. Verify with medical staff the inmate is cleared to stay in the facility.
   c. Remove any additional personal property from the arrestee.
   d. Photograph the inmate and issue a JMS Identification Wristband. Direct the inmate to an appropriate room/seating area for housing during the booking process.

2. Formally book the arrestee by entering the information from the arrest paperwork into JMS to create the necessary printouts for the booking folder.

3. Ensure the following has occurred:
   a. All arrestees have been fingerprinted.
   b. All arrestees have received access to a telephone as soon as practicable and have signed the acknowledgement form in the booking folder.
   c. All arrestees have received the inmate video orientation and have signed the acknowledgment form in the booking folder.
d. A completed medical questionnaire with appropriate signatures is in the booking folder.

- If the medical clearance form indicates the arrestee requires a mental health evaluation, the arrestee shall see Mental Health during the intake process.

e. If the arrestee needs to be dressed out for housing or court, check to see if the arrestee has been authorized for a strip search on JMS.

- If a strip search is performed, document in JMS whether contraband was found.

f. Confirmation from Central Identification Services (CIS) of fingerprints is in the booking folder.

4. Completed booking folders will be placed next to the pneumatic tube waiting for sergeant’s approval.

B. DELAYS IN BOOKING PROCESS

1. Intake staff will notify the Shift Supervisor upon discovering any circumstances that may exist for a particular arrestee that will delay the timely booking process.

a. A delay is considered to be over four (4) hours.

2. If the delay is due to the arrestee’s refusal to comply with any portion of the booking process, the following shall occur:

a. Staff will continue to monitor and document via incident report the arrestee’s refusal to comply

b. In the event the arrestee continues to refuse, they will be scheduled for the next available court appearance

c. The arrestee shall only be forced to comply with the booking process at the direction of the court.

3. The Shift Supervisor will review all documentation pertaining to an inmate who has been in custody for a period of four (4) or more hours to determine:

a. The actual amount of time in custody within the jail.

b. Type of charge and status of the arrestee, e.g., release to citation, 849b PC, court appointment, etc.

c. Completeness and accuracy of Arrest Summary/booking.

d. Proper number and quality of fingerprints taken.

4. If a delay is due to the confirmation of an arrestee’s fingerprints, the Shift Supervisor will assign a Booking/ITR staff member to telephone CIS to determine
the status of the prints and obtain confirmation if available.

a. If confirmation is received, continue the normal booking process.

b. If the confirmation is not obtained, proceed as follows:

c. Ensure enough fingerprints are obtained on the arrestee to create a new CCIN.

d. Instruct the Booking/ITR staff to book the arrestee on a new CCIN whenever possible, and to continue the booking process.

e. Instruct the Booking/ITR staff to book under an existing CCIN when the incarceration was the result of a warrant arrest, and the warrant number (Court docket/Case Number) is already attached to an existing CCIN.

CHAPTER:
Intake, Transfer, Release and Records

SUBJECT:
Inmate Interviews and Depositions In Civil Matters

I. POLICY

A. An attorney or his/her investigator may interview a consenting inmate regarding a civil matter, provided that the appropriate policies and procedures are followed.

B. An inmate is not required to participate in an interview.

C. The inmate may consult with his/her counsel, if any, prior to consenting to an interview or deposition.

D. It is this department's policy to facilitate an examination upon deposition in the jail pursuant to the Code of Civil Procedure (CCP) and when required by court order.

II. PROCEDURE

A. A licensed attorney with a bar card or his/her investigator may meet with an inmate under the following conditions:

1. The inmate must consent to the interview and shall be permitted to consult with his/her attorney, if any, prior to agreeing to the interview.

2. The interview must not have a detrimental effect on the safety of the inmate or staff, and must not constitute a risk to the security of the jail.

3. DEPOSITIONS

   a. An examination upon deposition of an inmate regarding a civil matter shall be preceded by a properly issued court order.

   b. Depositions will be limited to weekdays during normal business hours, excluding holidays.

   c. Depositions can only occur at a time which does not interfere with the operations of the facility, the inmate's court date appearances, or the inmate's movement schedule.
4. The deposition must be scheduled with the Facility Commander at least 24 hours in advance.

5. The Facility Commander or his/her Designee is responsible for scheduling the interview and for coordinating other arrangements as necessary.
I. POLICY

A. Every effort will be made by staff to have the inmate remove his/her jewelry to prevent loss or theft while in custody.

II. PROCEDURE

A. The following procedures will be adhered to when handling inmates with jewelry.

1. All inmates in possession of jewelry that is removable will have the item(s) removed, listed and described on the property receipt, and placed into a property storage bag.

2. Inmates in possession of jewelry that is not removable but who consent to have the item(s) cut off, will have the jewelry listed and described on the property receipt, initial the receipt and have the jewelry placed into a property storage envelope.

3. Inmates in possession of jewelry that cannot be removed by using hand cleaner, lotion, or soap will not have the jewelry cut off unless:

   a. The jewelry, by its design could cause injuries to staff, another inmate, or the inmate themselves.

   b. Classification determines the inmate has a documented past history of self-mutilation and the jewelry could be used to self-inflict injuries.

   c. Medical staff determines the inmate has the potential to injure themselves because of the nature of the charges, past history, or other relevant factors.

4. A receipt will be provided for any jewelry removed and the item placed into the inmates property.
5. In cases where jewelry is not cut off, the item(s) will not be listed in the property receipt.
I. POLICY

A. Inmates will not be allowed to possess any type of artificial hairpieces, including wigs, hairpieces, hair extensions, braids, or hair ornaments of any kind.

II. DEFINITIONS

A. WOVEN IN/SEMI-PERMANENT HAIRPIECES: Any artificial hairpiece simulating actual head hair and used for lengthening and/or thickening existing head hair, and which is attached by weaving the artificial strands singly or otherwise with existing hair strands, or by attachment with a mastic that requires (by manufacture’s standards and recommendations) multiple washings to free the mastic attaching the artificial strands to the existing head hair.

III. PROCEDURE

A. All inmates will be required to remove all artificial hairpieces at the time of booking.

B. Artificial hair and hair ornaments that are brought to the jail by visitors or sent through the U.S. mail will not be accepted.

C. A receipt will be issued for their artificial hairpiece.

1. The item(s) will be listed on the property receipt form, and placed into their property.

D. REFUSALS TO REMOVE HAIRPIECES

1. Intake staff shall take the following steps in the event an inmate refuses to remove their hairpiece:

   a. The Intake Deputy will notify the Shift Supervisor to determine the outcome of the inmate’s hairpiece.
      
      • Permanent Hairpieces: The inmate will be allowed to keep the
artificial hairpiece.

- An informational report will be written to document the inmate’s ability to keep the artificial hairpiece.

- Non-Permanent Hairpieces: Inmates will be required to remove the artificial hairpiece prior to being assigned to a housing unit.

b. Inmates, who refuse to remove their artificial hairpiece, after being advised by a Sergeant, will be disciplined until they have removed the hairpiece.

- An Incident report documenting the events will be submitted to the appropriate supervisor.

E. Only the Facility Commander may make any exception to these guidelines on an individual basis.
### CSB Policy and Procedure

**Contra Costa County Office of the Sheriff**

**Detention Number:** 2.11.41

**Related Orders:**

P.C. 1275

**Issue Date:** 07-01-04

**Revision Date:**

**Review Date:** 03-22-19

**Clearance:** Custody

**Subject:**

1275 PC Orders

---

### I. Policy

A. The Contra Costa County Office of the Sheriff will honor, and leave in effect, all 1275 PC orders until rescinded by a court.

---

### II. Definitions

A. **Penal Code Section 1275** - An order issued by the court that directs the Sheriff not to accept bail for an individual until the court has been convinced that no portion of the consideration was feloniously obtained by the defendant.

---

### III. Procedure

**A. Acceptance**

1. Upon the 1275 PC order arriving at records, the person accepting the order will:
   
a. Confirm that the order is correct.
   
b. Update the booking to reflect “No Bail”

2. The person receiving the order will immediately notify the Shift Supervisor.

**B. Removal**

1. To remove a 1275 PC order, a rescinding order must be received from the court.

2. Upon receipt of an order rescinding the original 1275 PC order, the accepting person will:
   
a. Time stamp the document immediately.
   
b. Remove the reduced copy of the 1275 order from the face of the appropriate custodial file.
c. Attach the original 1275 PC order to the rescinding order and place both in the appropriate custodial file.
## I. POLICY

A. When foreign nationals are arrested or detained, they must be advised of the right to have their consular officials notified.

B. In some cases, the nearest consular officials must be notified of the arrest or detention of a foreign national, regardless of the national’s wishes.

C. Consular officials are entitled access to their nationals in detention, and are entitled to provide consular assistance.

D. Foreign National Consular notifications are mutual obligations that also pertain to American citizens abroad.

   1. In general, you should treat a foreign national as you would want an American citizen to be treated in a similar situation in a foreign country. This means prompt, courteous notification to the foreign national of the possibility of consular assistance, and prompt, courteous notification to the foreign national's nearest consular officials so that they can provide whatever consular services they deem appropriate.

E. The Facility Commander shall ensure that the arrestee is allowed to communicate with, correspond with, and be visited by, a consular officer of his or her country.

## II. PROCEDURE

A. BOOKING FOREIGN NATIONALS

1. The United States Department of State must be contacted immediately when an arrestee claims to be a foreign national (diplomat or consular). Customary international law requires if a detainee is a national of any foreign country that their government must be notified if requested.

2. Sworn staff members shall take the following steps when it is determined a foreign national is in custody:
a. Determine the foreign national's country. In the absence of other information, assume this is the country on whose passport or other travel document the foreign national travels.

b. The Booking Officer shall ensure that the questions on the Booking Authority pertaining to a Foreign National wanting Consulate notification are checked.

c. If the questions pertaining to Consulate notification on the Booking Authority were not asked, the Intake Officer will ensure the Foreign National is asked if they would like their Consulate notified.

3. If the foreign national's country is **not** on the mandatory notification list:
   a. Offer, without delay, to notify the foreign national's consular officials of the arrest/detention.

4. If the foreign national asks that consular notification be given, notify the nearest consular officials of the foreign national's country without delay.

5. If the foreign national's country is **on** the list of mandatory notification countries:
   a. Notify that country's nearest consular officials, without delay, of the arrest/detention.
   b. Tell the foreign national that you are making this notification.

6. The sworn staff member making the notification will ensure an Incident Report is written and submitted that the provisions of notification and appropriate actions had been taken.

7. The Booking Authority shall be stamped with the “CONSULATE NOTIFIED” stamp and the employee shall place their employee number within the stamp area.

8. The Facility Commander or designee will ensure that proper notification has been made and that documentation of the event has been placed in the inmate’s booking folder.

9. Refer to next page for mandatory notification listings.

1. Refer to California Penal Code section 834(c) for additional details

### C. Suggested Statements to Arrested or Detained Foreign Nationals

1. **Statement 1-When Consular Notification is at the Foreign National's Option**
   a. "As a non-U.S. citizen who is being arrested or detained, you are entitled to have us notify your country’s consular representatives here in the United States. A consular official from your country may be able to help you obtain legal counsel, and may contact your family and visit you in detention, among other things. If you want us to notify your country's
consular officials, you can request this notification now, or at any time in the future. After your consular officials are notified, they may call or visit you. Do you want us to notify your country's consular officials? “

2. Statement 2-When Consular Notification is Mandatory

a. “Because of your nationality, we are required to notify your country's consular representatives here in the United States that you have been arrested or detained. After your consular officials are notified, they may call or visit you. You are not required to accept their assistance, but they may be able to help you obtain legal counsel and may contact your family and visit you in detention, among other things. We will be notifying your country's consular officials as soon as possible. “

D. Notification to Consulate by Fax

1. The Shift Supervisor should provide the following when faxing foreign national information to the appropriate consulate:

a. Date

b. Time

c. ATTN: Embassy/Consulate of:

   • Country

   • City

   • State

d. Subject: NOTIFICATION OF ARREST/DETENTION OF A NATIONAL OF YOUR COUNTRY

e. Supervisor Name

f. Detention Facility

g. Street Address

h. City

i. State

j. ZIP Code

k. Telephone

l. Fax

m. Foreign National Detainee Information
• Comment:
  
  “We arrested/detained the following foreign national, whom we understand to be a national of your country, on (Date and Time).”

• To arrange for consular access, please call the shift supervisor at (detention facility) in Contra Costa County, California. Please refer to booking number (number) and request to speak to (point of contact).

• Detainee’s full name
• Date of birth
• Place of birth
• Passport number
• Date of passport issuance
• Place of passport issuance
• Additional information

2. Any problems encountered with this notification process shall be immediately brought to the attention of the Facility Commander.
I. POLICY

   A. The Custody Services Bureau shall have access information pertaining to Victim Information Notification Everyday System (VINES) available to the public through the custody services phone tree system or via the Sheriff’s Office Web Site.

II. PROCEDURE

   A. Custody staff shall attempt to make victim notification of a suspect’s release when;

      1. Requested by the victim.
      2. Requested by the arresting agency.

   B. Custody staff are encouraged to notify the arresting agency of a suspect’s release when no request has been made for the following charges;

      1. Domestic Violence.
      2. Stalking.
      5. Arson.
      6. Threats of Violence.
      7. Any other Crimes of Extreme Violence.

<tr>
<td>CLEARANCE: CUSTODY</td>
<td>CSB Policy 2.08.49</td>
</tr>
<tr>
<td>CHAPTER: Classification</td>
<td>SUBJECT: Intake Classification</td>
</tr>
</tbody>
</table>

## I. POLICY

A. A continual objective process for determining all newly received inmates’ levels of custody and program suitability shall be maintained and will be based on personal, criminal, medical and social history.

B. Minimum Jail Standards 1050 for local detention facilities mandate that all inmates shall be classified prior to being housed.

1. The Classification Unit uses an “Objective Classification” system pursuant to Title 15, to ensure appropriate housing and programming of inmates.

2. The general guidelines for application of the classification procedures shall be followed as designated in Chapter 12 of this manual.

C. Classification or placing an inmate in Administrative Management status will not be based solely on race, religion, disability or national origin.

D. All inmates, including those with disabilities and transgender/gender-variant inmates will be housed in a manner that provides for their safety, security and participation in programs and activities in the most integrated setting appropriate for their needs.

## II. PROCEDURE FOR INMATES REQUESTING PROTECTIVE CUSTODY OR DISCLOSING GANG AFFILIATIONS

A. When an inmate is received into Booking as an arrestee or remand from court, or transferred from an outside detention facility, the booking personnel receiving the inmate shall determine the inmate's custody status, separating those inmates who are potentially violent from inmates who are non-violent.

B. The classification of inmates begins in Intake by the Booking Deputy.

1. The Booking Deputy will ask the following three classification pre-screening questions:
a. “Do you have any gang affiliations?”

b. “Do you fear for your safety?”

c. “Have you been here before?”

2. If the inmate discloses gang affiliation or fears for his or her safety, the Booking Deputy will take the following actions:

a. Place the inmate into a protected area separate from the inmate general population.

b. Attach the appropriate label on the Inmate Management Card.
   • No other notation regarding the inmate’s classification will be written on the Inmate Management Card.

c. Immediately notify the Classification Unit.

d. Booking Deputy will document the interaction in a JMS incident report.

C. The Classification Unit will screen and assign all inmates housing.

   Screening and assignment will be based on the following information:

b. Prior criminal conviction severity.

c. Escape history or attempts to escape.

d. Disciplinary history and history of institutional violence.

e. Prior felony convictions.

f. Current age.

g. Residency.

h. Medical or other special housing needs identified by county medical or mental health staff.

i. Current booking data (hard copy and/or computer visual).

j. Jail Management System (JMS), confidential classification information.

k. Department of Justice Criminal History (RAP).

l. Active or prior gang affiliations.

m. Potential for victimization.

2. Classification Interview
a. Prior to housing, all inmates will be interviewed. The classification interview should be completed in an area where the inmate feels at ease in discussing sensitive information.

- If possible, the interview should be held in the Classification Unit office. The “Classification Questionnaire” (DET 043) shall be used for gang interviews; the results will be entered into the JMS system.

b. The inmate will then be Classified based on the totality of assessment factors and the objective criteria of 4002 PC to include, but not limited to:

- Criminal sophistication.
- Seriousness of the charged crime.
- Presence or absence of assaultive behavior.
- Age.
- Any other criteria that provide for the safety of the inmate and staff.

c. In the event the inmate refuses to cooperate during the classification interview, the Deputy will explain the need for the interview, and give the inmate every opportunity to comply.

- If the inmate still refuses, the inmate will be assigned to maximum security subjective override or placed in administrative management to ensure their safety.
- This housing status will remain pending satisfactory completion of the “Initial inmate Questionnaire/Interview” and will be reviewed per policy.

3. An Initial Custody Assessment Scale will be calculated on a sliding scale of 0 to 10+, to determine a security rating and level of custody within the security rating, that the inmate will be assigned.

a. This will be based on the objective classification assessment factors pursuant to of 4002 PC.

b. Any Subjective Override Justification (raising or lowering the inmate’s numerical scale) based on applicable management concerns, hazard code(s), related issues will be documented via input into the JMS system.

4. Upon completion of the interview, the Classification Unit will generate a “Movement List” for the inmate to be transferred to the appropriate housing unit.

a. The movement list, after approved by Classification, will be provided to county medical and mental health staff for further assessment. The movement list will then be returned to custody staff to initiate the transfer process.
III. PROCEDURE FOR IDENTIFYING POTENTIAL INMATE SEXUAL VICTIMS AND/OR SEXUAL AGGRESSORS

A. Intake and Initial Classification

1. Identifying potential sexual aggressors or inmates at risk of sexual victimization.
   a. An intake deputy will screen the inmate by asking the PREA questions provided on the back of the “Intake Live Scan Verification” form. The intake deputy will refer the inmate to classification if the inmate answers “Yes” to any of the PREA questions provided.
      • The inmate has the right to refuse to answer the PREA questions. However, if the inmate does refuse to answer the PREA questions during inmate orientation, the deputy can still make a classification referral for a PREA review if it is believed the inmate may be at risk for victimization or sexual aggression.
      • If a referral is made to the Classification Unit for reasons related to potential sexual victimization or aggression and the deputy believes that it is necessary to separate the inmate from the general population for his or her safety, the deputy will place the inmate in a separate holding cell.
   b. Classification Deputy will screen the inmate further to determine if placing the inmate in Administrative Management or a special housing consideration is necessary to protect the inmate.
      • The Classification screening form shall be maintained by the classification unit.
      • Any actions taken by the Classification Deputy must be documented in the inmate’s classification notes.
      • The potential at risk inmate may be placed in involuntary Administrative Management housing for no longer than 24 hours while the risk assessment is being completed.
      • If an inmate has been a victim of sexual abuse in the past, the Classification Deputy shall refer the inmate to Mental Health for a screening within 14 days of intake.

2. Identifying Transgender/Gender-Variant Inmates
   a. When determining if an inmate is transgender/gender-variant, the following should be taken into consideration:
      • Inmate’s appearance or behavior does not match the gender marker on the inmate’s arresting/transportation paperwork or identification.
Inmate self-reports.

If there is doubt or a question concerning the validity of the self-report, the Booking Deputy shall consult with a supervisor.

Arresting/transporting agency has alerted the Booking staff to the inmate’s transgender/gender-variant status.

Inmate’s past history, if known.

Booking Deputy discretion.

b. Inmates shall not be searched for the sole purpose of determining genital status.

c. Medical Staff Notification

When a transgender/gender-variant inmate has been identified, the Booking Deputy will be responsible for notifying the medical staff.

B. Long-term Housing and Classification

1. Housing assignments of inmates who are at risk of sexual victimization or sexual aggression may not be determined based solely on being identified as being a potential victim or aggressor.

2. At risk inmates may not be placed in involuntary Administrative Management housing unless an assessment of all available housing alternatives has been made. If there are no available alternative housing assignments for identified inmates, classification of these inmates shall be made in accordance with CSB policies 2.09.02-2.09.04, and 2.08.49.

3. If an involuntary Administrative Management housing assignment is made for an at risk inmate, the Classification Sergeant shall ensure a review is performed every 30 days to determine if there is a continuing need for separation from the general inmate population.

4. Transgender/gender-variant inmates must be housed safely and in the least restrictive setting possible.

5. Requests from a transgender/gender-variant inmate to be placed in the same cell with another transgender/gender-variant inmate should be considered when possible.

6. Classification staff shall document in the Jail Management System (JMS) the choices and specific reasons regarding housing and any additional safety precautions for all at risk inmates.

a. If the reasons are due to a facility limitation:

   • Document what the limitation is.
• Length of the limitation is to be expected.
• Reasons for the limitation.

7. Whenever possible, at risk inmates who are placed in Administrative Management or protective custody for their safety and security shall have the same access to services and programs as any other inmate of the same housing status.

8. At risk inmates shall have the right to request their housing assignment be re-evaluated.
I. POLICY

A. Minimum Jail Standards 1050 directs that an inmate may request a review of his/her status if sentenced to more than 60 days, and that such requests are to be honored every 30 days.

B. Re-classification is an ongoing process to maintain the correct level of custody on the inmate population.

1. Re-Classification may be initiated by inmate or staff request, custody upgrade due to disciplinary sanctions, 60-day routine review, or by other specific means and is the responsibility of the classification sworn personnel.

II. PROCEDURE

A. CASE STATUS CHANGE

1. Whenever an in-custody inmate has a significant change in his/her status, the on-duty classification deputy shall be notified to determine whether re-classification/housing changes are necessary. The status changes shall include, but not be limited to:

   a. New charge(s).

   b. Going from unsentenced to sentenced status or the reverse.

   c. Extremely large bail movement either up or down.

2. The on-duty classification deputy who authorizes the re-housing of an inmate will note the move in the JMS classification chronological notes prior to the end of their shift.
B. INCIDENT STATUS CHANGES

1. Whenever an inmate is involved in an incident that causes disciplinary action or administrative action to be taken within the facility, or the inmate is involved in criminal activities, re-classification may take place.

2. In all cases, documentation must accompany re-classification in the form of either an Incident Report, crime report or memorandum.

3. Re-classification shall include, but not be limited to:
   a. Disciplinary Isolation
   b. Administrative Segregation
   c. Medical isolation.

C. RE-HOUSING

1. The on-duty classification officer shall ensure that the proper justification exists prior to any re-classification or re-housing of an inmate.

2. Only the Facility Commander or designee may re-house an inmate in the absence of a classification deputy.
   a. The Facility Commander or designee shall provide information to the Classification Unit outlining the move and the circumstances involved.

D. EMERGENCY SITUATIONS

1. This guideline does not restrict the Facility Commander or his designee from suspending any classification procedure in the event of an emergency.

2. When a situation arises which necessitates immediate action to protect the security of the facility or the safety of the inmates or staff, re-housing and temporary re-classification may be undertaken without compliance with the classification procedure.

3. As soon as practical, a listing of all movements and pertinent information will be forwarded to the Classification Unit in order that appropriate re-classification and updates can be made.
I. POLICY

A. Inmates will be assigned to housing buildings based on existing laws and regulations, the facility classification plan, the needs of the facility and pursuant to Minimum Jail Standards 1050.

II. PROCEDURE

A. Housing locations will fluctuate from building to building based on inmate population, staffing levels, maintenance procedures and facility needs:

I. POLICY

A. Classification reports and interviews will be stored in the main Classification Office.

B. All active or in-custody files will be on the automated Jail Management System, JMS, and accessible only by Classification Personnel or those persons given authorization by the Division Captain.

C. All secured files will contain the classification report, all pertinent information used in the initial classification process, and any additional reports, such as:

   1. Disciplinary reports
   2. Crime reports
   3. Memoranda
   4. Inmate grievances that affect the classification status of the subject while in custody.

II. PROCEDURE

A. SECURITY

   1. The Classification Office is to remain locked at all times when staff is not present.
   2. All Classification deputies/clerks on duty are responsible for maintaining record security.
   3. It is the responsibility of the Classification Sergeant to ensure the appropriate security measures are adhered to by all Classification deputies/clerks.
   4. Any file printed from the computer and removed for other than updating shall be logged out.
5. No classification file will be removed from the Classification Office by anyone not assigned to that office without permission from the Classification Sergeant.

6. The log shall contain the following information:
   a. Staff person’s name removing the file
   b. Inmate name and booking number
   c. Date file was removed.

B. DISSEMINATION

1. Whenever classification information critical to the operation of the facility is discovered, it shall be the Classification deputy’s responsibility to advise the Classification Sergeant or, in his/her absence, the Facility Commander or their designee of said information pursuant to Minimum Jail Standards 1050.

2. The Classification Sergeant, Facility Commander or designee shall take appropriate action determined by the information received.

3. Any information or documents of a sensitive/confidential nature will be immediately brought to the attention of the Classification Sergeant or in his/her absence, the Facility Commander or designee.

4. Classification files and records will only be released in accordance with applicable California State Statutes.

C. CLASSIFICATION RECORDS

1. Classification records shall include the following reports if available:
   a. Classification Questionnaire
      • May be completed for any inmate and/or each inmate whose detention is to be for more than seventy-two (72) hours. This record may include past county and state incarceration information, gang involvement, and personal history.
   
   b. JMS Criminal History
      • This allows for on-screen visual or hard copy report of the inmate’s Contra Costa Sheriff’s booking history. This record will be used to supplement a DOJ/FBI Rap Sheet, or in lieu of a DOJ/FBI Rap Sheet, should that system not be available at the time of data gathering or if the DOJ Rap is “manual”.

   c. DOJ Criminal Rap Sheet
      • Obtained via CLETS, indicates automated criminal history, FBI record alert, and DOJ Manual Rap record.
d. FBI Criminal History Rap Sheet
   • Obtained via CLETS, indicates out-of-state arrest and criminal history data.

e. Initial Custody Assessment Scale
   • A Classification Deputy will evaluate all pertinent data, fill in the appropriate scores with an end result being an objective custody level rating, or a justifiable documented reason for override.

f. Custody Reassessment
   • A Classification Deputy will enter the assessment screen and evaluate old and new data. The appropriate scores will be filled in with the end result being an objective custody level, or a justifiable documented reason for override.

g. Classification Records
   • May be automated and/or hard copy and will contain at a minimum:
     • Objective or documented subjective override justifiable for initial custody or reassessment custody levels.
     • Reports of disciplinary actions, grievances, incidents and crimes committed while in custody.
     • Medical and Mental Health information relative to classification.
     • When applicable, information relevant to program and Custody Alternative eligibility.

D. DISCIPLINARY REPORTS

1. A copy of all disciplinary reports will be forwarded to the Classification Office.

   a. This copy of the report will be reviewed by classification and pertinent information pertaining to sanctions, loss of privileges and relocation of the inmate will be entered in to the classification notes on the inmates JMS automated classification file.

   b. It shall be the responsibility of the classification deputy assigned by the Classification Sergeant to track all disciplinary isolations and loss of privileges reports, to ensure that proper care is taken in the completion of the disciplinary action.

   c. This includes insuring the inmate is moved to and from disciplinary isolation, and input of the proper disciplinary information into the JMS computer system.
E. COMPUTER INPUT

1. All classification information shall be input into JMS.

2. The Classification deputies are responsible for ensuring that all information in the JMS is current and accurate.
   a. This includes all initial and update information.

F. INMATE MANAGEMENT CARDS

1. All pertinent classification information will be stamped on the custody card by a Classification deputy.

2. All notations and housing assignments will be made by the Classification Unit.

G. PURGE

1. The classification records shall be retained in file/computer database, for at least five (5) years.

2. If a classification file has been inactive for a minimum of five (5) years it may be purged at the discretion of the Classification Sergeant.

H. TRANSFER

1. When an inmate is transferred to the West County Detention Facility or the Marsh Creek Detention Facility, their Classification File will be accessible by Classification personnel via the JMS computer system for evaluation and update purposes.
I. POLICY

A. The Classification Unit shall be responsible for the Hazard code entries in the JMS system and on the inmate management card. Hazard codes are based on the inmate history and degree of classification evaluation pursuant to Minimum Jail Standards 1050.

B. The codes are intended to identify specific reasons inmates are classified or reclassified to higher level of custody.

1. They may act as a warning to anyone who could come in contact with the inmate to be cautious when handling the person, that the person has enemies in the facility or requires medical or mental health treatment.

C. This information shall be available to the jail staff, transportation and court personnel, on the JMS System as well as noted on the individual inmate management card.

D. The hazard code shall appear as stamped abbreviation on the management card and in the JMS System.

E. Only the Classification Unit may authorize the addition or deletion of an inmate’s hazard code(s) on the inmate management cards and have the sole responsibility for updating hazard code data in the JMS system.
I. POLICY

The Office of the Sheriff affords inmates the privilege of legitimate telephone communications with individuals from the community. While providing this privilege, the Office of the Sheriff also has the responsibility to protect society from harm, including criminal activity, harassment, threats, the introduction of contraband, intimidation, and to prevent escape attempts facilitated using the facility telephone system. The monitoring, recording, and analysis of inmate telephone calls is done for the security of the facility, staff and the public. All recordings will be done in accordance with current law.

II. APPLICABLE CASE LAW

C. People v. Loyd, 83 Cal.App.4th 1166
D. People v. Sanchez, Case 80449-2; Order and Opinion 80039-1

III. DEFINITIONS

A. Blocked Number Database: Refers to the database of telephone numbers that inmates cannot call. This database can be accessed and updated by both CAS and GTL personnel. When a blocked telephone number is dialed by an inmate, the telephone call will not be completed - no connection will be made.

B. Confidential Communication: Any communication that is considered confidential under the law or by policy, including communication: between an attorney-client; between physician-patient; or with a psychologist, psychiatrist, minister, priest, or clergy. Calls initiated by pro-per inmates, using the provided pro-per telephone are recognized as privileged communications (Pro-per inmates are permitted to make unmonitored and unrecorded calls on legal matters when they have court documents that verify that they are representing themselves.)

C. Global/Tel*Link (GTL): The vendor that provides inmate telephone service and manages the hardware and software that manages, records, stores, and monitors inmate telephone communications.
D. **GTL Workstation:** A computer terminal that provides access to the GTL System as a primary function. These terminals are owned and serviced by GTL.

E. **Monitoring:** A staff function of listening, with or without monitoring equipment, to inmate telephone calls to ensure that prohibited activities are not coordinated using the telephone system.

F. **Privileged Number Database:** Refers to the database of privileged telephone numbers. This database can be accessed and updated by both Custody Administrative Services (CAS) and GTL personnel. When a privileged telephone number is called from an inmate telephone, the conversation will not be recorded by the GTL System.

G. **Records:** Refers to either the digital recordings of telephone calls originating from facility telephones, the corresponding computer-generated records of the telephonic activity, or both.

**IV. PROCEDURE**

A. **System Installation / Maintenance / Repair / Security**

1. Management of the GTL Contract within the Detention Facilities is the responsibility of the Director of the Inmate Welfare Fund.

2. GTL is responsible for the installation and maintenance of the inmate telephone systems used within the Detention Facilities operated by the Office of the Sheriff.

3. GTL is responsible for the physical security of the data recorded from the inmate telephones and stored on the GTL System.

4. Recordings maintained on the GTL System are Official Records of the Office of the Sheriff. These records will not be accessed by unauthorized users. Access to these records by unauthorized personnel may result in criminal prosecution.

5. GTL System Users will not modify, change, or alter GTL installations unless requested to do so by a GTL Technician and approved through the Chain of Command.

6. Management and maintenance of user accounts, the privileged number database, the blocked number database, and user training is the responsibility of CAS.

7. Users have the responsibility to ensure that their user name/passwords are kept confidential. User names and passwords will not be used by anyone other than the issued user. Users are responsible for controlling access to the inmate telephone system using their terminal/user account. Users who divulge access to the telephone system will have their access to the system suspended and may be subject to criminal prosecution.

B. **System Management / Access Control**
1. Custody Administrative Services is responsible for the management of user training and user accounts. CAS will maintain a database of user accounts and contact information. Two types of account access are authorized to this system:

a. **Administrator Accounts.** Administrator Accounts allow for the creation of user names, user passwords and detailed system permissions. The CAS Lieutenant will approve the establishment of all Administrator Accounts and identify the specific capabilities for each administrator. Administrator accounts will only be issued to members of CAS.

b. **User Accounts.** User accounts allow for authorized individuals to access, monitor and reproduce telephone calls made using the inmate telephone system. The CAS Lieutenant will approve the establishment of all User Accounts and define the restrictions for each user.

2. The Custody Administrative Services (CAS) Unit is responsible for monitoring and auditing user access and activity using the telephone recording system. Like the CLETS System, all activities of users are logged within the GTL System. Call monitoring, recording, and downloading are all activities that can be tracked by the CAS Unit.

3. The Custody Administrative Services Unit is responsible for deactivating accounts of personnel who fail to meet current user certification standards or who fail to complete administrative requests.

4. At least three times each calendar year, CAS will:

a. Audit administrator and user accounts, deactivating access when appropriate.

b. Update the privileged number database (by adding and deleting users/telephone numbers).

c. Conduct an audit of system access to ensure that only authorized users are accessing the system and that proper procedures are being followed.

d. Validate that inmate notifications about monitoring are still in place.

1. Orientation Video

2. Telephone Admonishment Booking Form

3. Signs at every inmate telephone

4. Inmate telephone message "branding" for both inmate and call recipient.

e. Validate that signs notifying attorneys of the process to add their telephone number to the privileged number database are posted at jail facilities.
C. User Authorization / Training / Certification

1. In order to access the Inmate Telephone System, users must:
   a. Be an employee of a law enforcement agency or GTL with a need to access the inmate telephone recording system.
   b. Sign and submit the completed GTL Use Admonishment Form to the CAS Office.
   c. Submit a business card with their name, telephone number and email address upon it.
   d. Agree to follow the guidance provided by this policy and procedure section.
   e. Complete user training during the next scheduled GTL User Training Course.

2. Requests for access will be forwarded for approval to the CAS Unit Lieutenant.

3. Approved Users will be granted access by a CAS Unit System Administrator. All user accounts issued by CAS will contain the prefix "CSB" to indicate the account was created by CAS Staff.

4. Copies of all administrative and training records for system users will be maintained by CAS.

D. System Training

1. System training requirements will be managed by CAS.

2. All system administrators and users will complete a course of instruction regarding the inmate telephone recording system that includes:
   a. Operation of recording and listening devices;
   b. Preservation and collection of evidence;
   c. Orientation to applicable state statutes;
   d. Confidentiality requirements of the system; and
   e. System security.

E. Authorized Monitoring Locations

1. The Custody Services Bureau Assistant Sheriff will approve all locations where the inmate telephone monitoring system may be accessed from. Inmate telephone recordings or records will not be accessed from any location that is not an approved location.
2. Inmate telephone calls will be accessed in a private setting, where conversations cannot be overhead by non-law enforcement personnel. Inmate telephone calls will not be shared with other non-law enforcement or judicial system personnel.

3. Access to the inmate telephone system will not be made via the internet.

F. Privileged Number Database

1. The telephone numbers of individuals who are authorized by law or policy to conduct confidential communications will be stored in the privileged number database. The purpose of the privileged number database is to ensure that certain telephone conversations are not recorded, nor monitored by law enforcement.

2. The privileged telephone number database will be populated from the following sources:
   a. Telephone numbers of practicing attorneys listed within the Contra Costa County BAR Telephone Directory.
   b. Telephone numbers assigned to the Public Defenders Office.
   c. Telephone numbers assigned to the Alternate Defenders Office.
   d. Telephone numbers assigned to the Contra Costa County Courts.
   e. Telephone numbers of practicing attorneys from local telephone directories.
   f. Telephone numbers from attorneys who request that their numbers be added to the privileged telephone number database. These numbers will only be added upon the verification that the individual is a practicing attorney.
   g. Telephone numbers from the Contra Costa County District Attorneys Office.
   h. Telephone numbers of medical and mental health professionals who request that their numbers be blocked because of their professional relationships with inmates.
   i. Telephone numbers of custody services religious advisors work phone numbers.
   j. Telephone numbers identified by inmates in pro-per status.
   k. Other telephone numbers approved for addition to the privileged telephone number database by the CAS Lieutenant.

3. GTL representatives will provide assistance by adding telephone numbers to the privileged number database upon the approval of CAS Staff.
4. Prior to the removal of privileged telephone numbers from the database (other than pro-per inmates), written approval will be obtained from the Detention Division Captain. Because pro-per inmates change telephone numbers frequently, members of CAS may change or delete those numbers when needed, without permission.

5. Complaints about the management of the Privileged Telephone Database will be directed to CAS.

G. Blocked Number Database

1. The blocked number database contains the telephone numbers of individuals who do not wish to receive telephone calls from inmates housed in the Sheriff's Detention Facilities. Because of the system denies inmates from connecting with these telephone numbers, there is little maintenance that is required.

   a. Adding Numbers to the Blocked Number Database. Numbers may be added to the blocked number database upon request to either the Classification Unit or CAS. Typically, requests for blocking are made by crime victims, families, or other persons who do not wish to have inmates calling specific telephone numbers. GTL representatives may also add telephone numbers to the blocked database without permission - as they receive complaints through their billing system.

   b. Removing Numbers from the Blocked Number Database. The removal of telephone numbers from the blocked number database will be done upon a verified request to either the Classification Unit or CAS. GTL representatives may also remove telephone numbers from the blocked database without permission.

2. Complaints about the management of the Blocked Number Database will be made to CAS.

H. Inmate Notification

1. Inmate non-privileged conversations conducted on telephones provided specifically for their use are not considered to be private and may be monitored and/or recorded.

2. Inmates using monitored phone lines within the Sheriff's Detention Facilities will be made aware that their calls may be monitored, analyzed, and reviewed by law enforcement. Notification to inmates will be done by:

   a. During the booking process, inmates will be shown the orientation video. The video does and will contain information that inmate telephone calls are subjected to recording and monitoring.

   b. During the booking process, inmates will sign a form that acknowledges that their telephone calls may be monitored and recorded by law enforcement.
c. All inmate telephones intended for non-privileged conversations will have a sign posted near the telephone that identifies that inmate telephone calls may be monitored and recorded by law enforcement.

d. All inmate telephones will provide an automated message to both the inmate and the telephone call recipient that calls are subject to monitoring and recording by law enforcement. The receiver of the telephone call must be given an option to refuse the receipt of the telephone call (thus refusing to consent to monitoring by law enforcement).

I. Attorney Notification

1. Signs will be posted in detention facility lobbies and court screening areas to notify attorneys of their ability to identify telephone numbers that should be added to the privileged telephone number database.

2. Custody Administrative Services will maintain records indicating attempts to obtain updated telephone rosters from entities that are likely to request privileged telephone access.

J. Inmate Telephone Call Review / Monitoring / Recording

1. Only those persons authorized by law will monitor inmate telephone conversations.

2. Only those personnel who have been issued a user name / password from CAS will be allowed to review inmate telephone calls from the Sheriff's Detention Facilities using the GTL System.

3. Legally recognized privileged communications will not be monitored (PC 636(a)). Any court order for monitoring of privileged conversations by any law enforcement agency will be approved by both County Counsel and the District Attorney's Office.

4. Telephone calls made on pro-per telephones are privileged communications and will not be monitored or recorded without a court order (as described in 3 above).

5. Employee conversations cannot be recorded using the inmate telephone recording system, unless an employee uses an inmate telephone. Employees will not use the inmate telephone system to complete personal telephone calls.

6. Authorized Allied Agency Law Enforcement Officers may monitor recorded inmate telephone calls

7. Authorized Allied Agency Law Enforcement Officers will not disconnect inmate telephone calls. Only personnel assigned to the Classification Unit are authorized to disconnect active inmate telephone calls.

8. Authorized Allied Agency Law Enforcement Officers will have a valid law enforcement investigatory reason to access specific inmate telephone calls. Only Authorized Sheriff's Office Personnel may conduct random monitoring of inmate telephone calls, in accordance with this policy and procedure. Non-Sheriff's
Office Users who are identified as performing random screening will be removed from the system and subject to disciplinary action, including criminal prosecution.

9. When High-Profile Inmates are housed in the Sheriff's Detention Facilities, CAS will monitor those accounts to ensure that telephone calls are monitored for legitimate law enforcement reasons only. CAS will notify system users of telephone numbers that are not to be accessed to avoid accidental monitoring.

10. When inmate telephone calls are recorded from the system, the original recording should be locked - to ensure that it is archived and not erased. Recordings of inmate telephone calls that are downloaded from the system will be safeguarded like other forms of law enforcement evidence. All recordings will be reviewed prior to downloading to ensure no privileged conversations are downloaded, recorded, or released.

11. Users are prohibited from discussing or commenting on the contents of any recorded / monitored interception except to safeguard facilities, in response to a court order, or in the prosecution / investigation of any crime.

K. Releasing Inmate Telephone Calls Records

1. Custody Administrative Services is the custodian of record for recordings made using the inmate telephone system. Official Requests or Subpoenas for records from this system will be directed to CAS.

2. The contents of a recorded/monitored telephone call shall be divulged only when necessary to safeguard the orderly operation of the facility, in response to a court order, or in the prosecution/investigation of any crime.

L. Allied Law Enforcement Agency Requests for Monitoring / Recording

1. All requests for telephone recordings from Allied Law Enforcement Agencies shall be addressed to CSBRecords@so.cccounty.us. Allied Law Enforcement Agencies will not release telephone recordings to other Law Enforcement Agencies. All approved requests will be forward to MDF/WCDF Classification Unit.

2. Allied Law Enforcement Agencies that request to monitor telephone calls may do so at the MDF/WCDF Classification Unit.

3. Only Authorized Users will be authorized access to the inmate telephone recording system in the Classification Unit.

M. Compromised Privileged Communications

1. Every effort will be taken to avoid intercepting any confidential communications by users of the Inmate Telephone System.

2. If a confidential communication is accessed, monitoring of that conversation should be terminated immediately.
3. Regardless of the length of the monitoring that is done, the mere access to this type of telephone call requires immediate reporting:

a. Users will immediately notify the Classification and CAS units.

b. A memo to the Detention Division Captain will be generated, identifying the reason for the user was performing monitoring, the length of time the call was monitored, and the identification of the specific record that was accessed.

c. The Detention Division Captain will notify the Bureau Assistant Sheriff.

d. The Detention Division Captain, or their designee, will contact the District Attorney's Office, the Privileged Party, and the Presiding Judge, notifying them of the violation.

e. A member of CAS will lock the telephone recording and identify the exact length of the violation. A copy of the recording will be burned to a CD and safeguarded as evidence.

f. A Corrective Action Plan (CAP) regarding the access to the recording will be completed, to identify how the intrusion occurred.

g. Custody Administrative Services will maintain a log and records of any compromises of privileged communications.
## Contra Costa County
### Office of the Sheriff

**CSB Policy and Procedure**

**ISSUE DATE:** 07-01-04  
**REVISION DATE:** 10-30-18  
**REVIEW DATE:** 03-15-19  

**RELATED ORDERS:** None

**CLEARANCE:** CUSTODY

**CHAPTER:** Classification  
**SUBJECT:** Selection of Housing Unit Inmate Workers

---

### I. POLICY

A. Custody Services Bureau personnel will ensure that inmate worker applicants have been properly screened prior to being selected.

B. The Classification Unit shall conduct a review of the inmate’s jail records and criminal history to determine the inmate’s eligibility to work.

C. The Classification Unit will have the final authority in the selection of all permanent inmate workers.

### II. PROCEDURE

A. Any housing unit deputy receiving an inmate request slip from an inmate desiring to be a module worker will concur/not concur before submitting the request to the Classification Unit for review.

1. Housing Unit Deputies will select module workers and will submit names to the Classification Unit for approval.

2. Housing Unit Deputies may assign Temporary Workers prior to receiving classification approval.

3. Temporary Module Workers will not be assigned more than one (1) day.

B. The Classification Unit will conduct a review of the selected inmate’s information, including, but not limited to:

1. JMS print out of:
   
   a. Custody Status and Charges
   
   b. Classification Profile
   
   c. Disciplinary Review
d. Release Date (if sentenced)
e. Inmate’s Account Transactions

C. The Classification Unit will research their records to make the following assessments:
   1. Propensity towards violence or gang affiliation.
   2. Psychiatric history for unstable behavior.
   3. Escape risk factors, i.e., 3-strike clause enhancement.
   4. Special circumstances/death penalty.
   5. Complete classification review (prior profile).

D. If the Classification Unit’s review deems the inmate suitable for selection as an inmate worker:
   1. The inmate request form will be stamped APPROVED, signed by the Classification Deputy and returned to the housing unit via mailroom procedures.
   2. The approving Classification Deputy will contact the housing unit to advise the housing unit deputy of the approval.
   3. The Classification Deputy will place all information used to determine the inmate’s eligibility in the inmate’s classification file.

E. If Classification’s review deems the inmate not suitable for selection:
   1. The denying classification deputy will update the Classification Detail Report to state, “Not cleared to work.”

F. The Classification Unit’s decision is the final authority.

I. POLICY

A. Health Services will be provided for all inmates who are in need of treatment and care to reduce suffering from medical/mental problems.

B. Policies, procedures and programs in the Health Care Program will be reviewed at least annually and updated as necessary by the Medical Director/Nurse Manager and Mental Health Program Supervisor.

C. The Medical Director/Nurse Manager and/or designee will meet with the Division Commander/designee at least quarterly (January, April, July, October) to confer on the Health Care Delivery System and an annual statistical report.

II. DEFINITIONS

A. TRIAGE: The sorting and allocation of treatment to patients according to priorities of need.

B. SERIOUS INJURY: Any injury causing the inmate to be admitted to a medical facility.

C. CO-PAYMENT: A charge for medical services paid by inmates for self-initiated, non-emergency medical visits.

D. CUSTODY HEALTH SERVICES M.O.U.: An agreement between Health Services Department and the Sheriff regarding Medical and Mental Health services to be provided in adult jail facilities.

E. DETENTION HEALTH SERVICES ADMINISTRATOR: The Detention Health Services Administrator (DHSA) serves as the Health Authority for Contra Costa County Detention facilities. The DHSA is responsible for coordinating the provision of inmate Medical, Psychiatric, Dental, Pharmaceutical, and Psychiatric health care for inmates in the county’s detention system. Additionally, the DHSA is responsible for executive oversight of health services operations, policies and procedures, quality assurance and program evaluation. The DHSA shall be under the direction of the Contra Costa Regional Medical Center’s Executive Director.
F. NURSING PROGRAM MANAGER: The Nursing Program Manager, under direction, plans, organizes and supervises the delivery of nursing services for the MDF, MCDF and WCDF; participates in special nursing assignments or study projects; and performs other related work as required. The Nursing Program Manager reports directly to the Director of Psychiatric Nursing.

G. CHARGE NURSES: The Charge Nurse receives direction from and reports to the Nurse Program Manager. The Charge Nurse directs staff nurses, LVNs and clerical staff. The Health Services Charge Nurse assumes responsibility for medical operations in the Facility in the absence of the Nursing Program Manager.

H. STAFF NURSE: The Staff Nurse position at the Contra Costa County Detention Facility receives direction from the Charge Nurse and the Nursing Program Manager, supervises the LVNs and other ward clerk's positions and coordinates with clerical and other Department personnel.

   1. The Staff Nurse is responsible for screening of patients in triage examinations, obtaining patient histories and acting in a supportive role to the M.D. in direct patient care.

I. MENTAL HEALTH CLINICAL SPECIALIST: A clinician who by education, training and experience is qualified to provide clinical and evaluative psychological services.

   1. Must possess a Masters Degree with a major in social work, psychology or psychiatric nursing and a valid California clinical license:
      a. PhD
      b. LCSW
      c. MFCC
      d. MFT

III. PROCEDURE

A. HEALTH SERVICES

   1. Matters of judgment regarding health services will be the sole province of the Health Services staff.

   2. Security regulations will be adhered to at all times by Health Services staff.
      a. If a situation arises where a medical emergency conflicts with a security requirement and no practical alternative exists, the situation will be resolved in favor of the medical emergency.

   3. Health Services personnel will not be asked to provide inappropriate non-medical duties such as body cavity searches.

   4. The primary responsibility of medical personnel is to provide required health
services for the entire inmate population.

5. Detention medical services include:

a. Screening of all newly received inmates
b. Inmate Sick Call (every day)
c. Medical and psychiatric availability
d. Referral service for hospitalization and specialty clinics as needed
e. Dental services
f. Optical services
g. Administering medications

6. No sterilization procedures are to be performed on any inmate except in the presence of exigent circumstances that are life threatening, emergency in nature, or as a part of an evidence-based treatment plan for a diagnosed condition.

   a. In the presence of exigent circumstances, the following conditions shall all be met:

      • Less invasive measures to address the medical need are nonexistent, unsuccessful, or have been refused by the inmate.

      • An independent physician has been consulted and confirms the need for medical intervention.

      • Inmate consent for sterilization is obtained after receiving all pertinent information and has been made aware of the full and permanent impact of the medical procedure.

   b. Any staff member, contractor, volunteer, or inmate who reports that an unlawful sterilization has been performed is entitled to the protection available under the California Whistle Blower Protection Act.

7. In reference to M.J.S. 1051 of Title 15, any inmate identified as having a communicable disease shall be housed as set forth in the Contra Costa Detention Facility Health Services Policies and Procedures Manual.

8. Health care services, including medical, dental and mental health, will be under the control of the Contra Costa County Health Services Department pursuant to an inter-departmental agreement between the Health Services Department and the Sheriff's Department (M.O.U. Appendix).

9. Inmates will not be used for the following duties:

   a. Performing direct patient care services
b. Scheduling health care appointments
c. Determining access of other inmates to Health Care services
d. Handling or having access to:
   • Surgical instruments
   • Syringes
   • Needles
   • Medications/Self-Medication
   • Health Records

10. Scheduled health care appointments will be conducted in designated exam rooms.

11. Sobering of inmates will be done under the supervision of medical staff. (Refer to Contra Costa County Detention Facility Health Services Policy and Procedures Manual.)

12. Medical and dental prostheses will be provided when the health of the inmate would otherwise be adversely affected, as determined by the responsible physician or dentist.

13. The Facility Commander or designee and the Nurse Manager/Mental Health Program Supervisor or designee will consult with each other regarding inmates who are diagnosed as having psychiatric illness prior to:
   a. Housing assignments
   b. Program assignments
   c. Disciplinary measures
   d. Transfers in and out of the Facility

14. Medical staff will be available on a daily basis for all housing units.

15. Inmates will not be used for medical, pharmaceutical or cosmetic experiments.

16. Inmates desiring the full name of a Health Services employee should be given the first name and employee number only. This will allow the inmate to file his writs, but will afford the employee protection and privacy.

B. MANAGEMENT OF PHARMACEUTICALS

1. The prescribing, dispensing and administering of drugs will be done in compliance with appropriate federal and state laws.
2. All medication administered to inmates must be taken immediately with liquid and in front of Health Services personnel unless the inmate is on the self-administration program in accordance with CSB Policy and Procedure 2.13.08, Sick, Dental and Pill Call.

3. Inmates will be allowed to carry certain prescribed medication and their inhaler as determined by medical staff. Inmates must possess a "Permission to Carry Medication" card with the specific medication, inmate's name, authorizing Medical staff, expiration date and maximum amount of medication to be carried by inmate.
   a. Exception: M Module inmates placed for mental health considerations will not be permitted to carry prescribed medications.

4. Inmates are to keep their prescribed medications secured in their assigned living area or on their person at all times.

5. Psychotropic medications are prescribed only when clinically indicated as one facet of a program of therapy. They will not be used as a means of chemical restraint.

6. Medical staff prescribing medication to inmates will include a "stop order" date for the medication and re-evaluate the prescription prior to renewal.

7. All controlled substances, syringes and needles will be stored in the Medical Room (nurse's station) when not in use.

8. The Nurse Manager/designee will be responsible for assigning a staff member to conduct a weekly inventory of syringes, needles and blades in the Medical Services Unit and count syringes daily.

9. First Aid kits are available at designated areas, approved by the Medical Director. The day shift supervisors of each working post will be responsible for checking and ordering supplies for the First Aid kits on a monthly basis and on an as need basis.

10. Unless indigent, inmates who desire over-the-counter medicines such as Aspirin, Tylenol, etc., can purchase these items through Commissary, at the inmates' expense.
   a. Indigent inmates may request over the counter medications via Inmate Commissary.

C. INMATE MEDICAL RECORDS (CONFIDENTIALITY)

1. Contra Costa County Health Services will establish written policy and procedure regarding the transfer of health records and information within the following requirements:
   a. Summaries or copies of the health record are routinely sent to the facility to which the inmate is transferred.
b. Written authorization by the inmate is necessary for transfer of health record and information unless otherwise provided by law or administrative regulation having the force and effect of law.

c. Health record information is also transmitted to specific and designated physicians or medical facilities in the community upon the written authorization of the inmate.

2. Compilation and completion of medical records data shall be completed in a uniform manner as directed by the medical director.
   a. Qualified health personnel shall collect all health data and history.
   b. Health Services will control access to the inmate medical records.

3. Health service staff will advise the classification unit of any information that affects the management of an inmate's security status or ability to participate in jail programs.

4. Health Services staff will share with the Division and/or Facility Commander or designee any information which the Health Services staff determines to be necessary for the management of inmate's security status and ability to participate in programs.

5. The inmate's consent is required for transfer of health services records unless the records are transferred directly from one health services provider to another for the express purpose of providing continued patient care. Other release of confidential information will be controlled by patient informed consent, unless otherwise stated by law.

6. Summaries or copies of inmate health services records will be routinely sent in a confidential manner to the Facility Health Services Unit to which the inmate is transferred.
   a. Custody staff will notify Medical of pending transfers as soon as they are known, in order to allow them time to prepare transfer paperwork.
      - Transfer paperwork shall be completed and delivered to custody staff in a timely manner.
   b. A medical transfer envelope will accompany all inmates being transferred out.
   c. Medical information arriving with a transferred inmate will be handed to a nurse upon arrival.

D. EMERGENCY CONTACT OF INMATE'S NEXT OF KIN

1. The Facility Commander or designee will make all notifications to a seriously injured or ill inmate’s next of kin.

2. Should an inmate desire notification of next of kin in an emergency situation, the
inmate must provide information of whom to contact.

3. The inmate's willingness to provide emergency contact information indicates the inmate's permission for emergency notification of next of kin by Facility staff.

4. The Operations personnel will only notify an inmate's next of kin in cases where the inmate is hospitalized or not physically able or mentally capable to make the notification on their own volition.

5. The individual making the emergency contact notification will complete an Incident Report regarding the contact.

E. SELF-INITIATED MEDICAL SERVICES CO-PAYMENT

1. A $3.00 co-payment charge may be charged to the inmate's personal account at the Facility for the following:
   a. Each prescription
   b. Each issuance of over the counter medication
   c. Each nursing sick call
   d. Cancellation of scheduled outside medical appointments without valid reason
   e. Any rescheduled required hospital appointments

2. Exceptions:
   a. Health Services shall waive all fees in any life-threatening or emergency situation.
   b. Follow-up visits at the direction of the Medical staff shall not be charged a co-payment.

3. Inmate initiated medical contacts and other required services resulting in the dispensing of over-the-counter (OTC) meds will result in a co-payment charge.

4. All monies received by the Sheriff shall be deposited into the County General Fund.

5. No inmate will be denied medical care due to lack of funds in their accounts.

F. CO-PAYMENT ELIGIBILITY

1. All inmates requesting to be seen by Health Services staff will be charged a $3.00 co-payment for their initial contact. Subsequent contacts for the same condition will not require a co-payment during treatment.
2. *Should the symptoms return after a reasonable time of good health and the inmate require further contacts, they may again be charged a co-payment for the initial visit.*

3. Personal contact is required for any co-payment
   a. Telephone triage is not chargeable.

G. **CO-PAYMENT AUTHORIZATION**

1. Health Services personnel will advise the inmate of the co-payment requirement prior to performing any services.

2. The Accounting Office will verify the inmate's account balance and make the appropriate adjustments or begin a no-cash ledger for those without adequate funds.

3. Each week, prior to the Facility's scheduled commissary day, the Facility Account Clerk will review the inmate's current account balance.

4. If the account shows a balance, the outstanding medical co-payment charge will be deducted prior to any commissary transaction.
I. POLICY

A. A prompt response to acute medical problems will be provided for non-urgent, urgent and emergency situations by means of an appropriate notification system.

B. Custody Services Bureau Staff shall work in concert with the medical staff to provide the best medical care.

C. In every instance where an emergency medical incident has occurred, or a weapon, chemical agent or force is used; an immediate medical examination and treatment shall be performed.

II. DEFINITIONS

A. CODE ONE MEDICAL ASSISTANCE REQUEST: A non-urgent medical/mental health problem to include, but not limited to the following:

   1. An injury not immediately threatening to life or limb
   2. Severe back pain without obvious injury or paralysis
   3. Sudden headache but without history of head trauma or loss of consciousness
   4. The individual gives history of mental problems but is not experiencing any symptoms

B. CODE TWO MEDICAL ASSISTANCE REQUEST: An urgent problem to include, but not limited to the following:

   1. An acute injury with head trauma to include temporary loss of consciousness
   2. Suspected seizure but patient breathing
   3. An individual suffering severe hallucinations
4. An individual threatening to commit suicide

C. CODE THREE MEDICAL ASSISTANCE REQUEST: A medical emergency to include, but not limited to the following:
   1. An individual in the act of committing suicide
   2. Uncontrolled bleeding
   3. Any individual unconscious/unresponsive
   4. Cardiopulmonary arrest/severe chest pains

D. CODE THREE MEDICAL-TRANSPORT ONLY REQUEST: An urgent medical problem (Code-2 situation) where medical staff has requested a code-3 ambulance for transport to CCRMC.

III. PROCEDURE

A. COMMUNICATIONS
   1. Staff members initiating any request shall provide descriptive information (i.e. tier, room number, etc.) regarding all incidents requiring response.
   2. All communications should be relayed in calm, even tone to ensure an accurate and appropriate response.
   3. All location descriptions will be announced using the approved CCCSO phonetic alphabet (“Adam” for A Module, “Boy” for B Module, etc.) when applicable.
   4. Shift Sergeants will be responsible for monitoring and controlling staff response and needs through incident conclusion.

B. MEDICAL EMERGENCY RESPONSE
   1. Medical staff will respond and handle all medical calls within the Facility and the lobby.
   2. Central Control will give priority to requests from medical staff during a medical emergency.
   3. Custody Staff should refrain from contacting central control unless an emergency exists.
   4. Housing Unit Deputies will notify Central Control via portable radio to expedite medical staff leaving the housing unit in order to respond to the emergency.
   5. Sworn staff will advise Central Control when situation is secure (Code 4) and/or if additional assistance is required.
C. CODE ONE MEDICAL ASSISTANCE REQUEST

1. Code One Medical Assistance requests should be generated only via telephone or intercom system.
   a. West County Detention Facility may utilize the radio for non-urgent Requests for Assistance.
   b. The Housing Unit Deputy will call Health Services staff and confer with the appropriate Health personnel regarding the inmate's problem and/or action to take, if any.

2. If the Deputy be unable to make contact with appropriate Health personnel, the Deputy will call Central Control who, in turn, will page Health personnel, i.e., "Medical staff contact (location)"

D. CODE TWO MEDICAL ASSISTANCE REQUEST

1. Code Two Medical Assistance Requests should be generated by telephone or intercom when possible and by radio only when necessary.
   a. West County Detention Facility utilizes the radio for all Requests for Assistance.

2. Central Control will announce all Code Two Medical Assistance requests by depressing the tone button one time and announcing, “Attention in the Facility: Code Two Medical Assistance Requested at (location).” (Repeat once).

3. All available Health Services nurses will respond to the location of the request.

4. The requesting deputy will ensure that Central Control is notified when no other assistance is required (Code 4).

5. Central Control will announce the conclusion of the incident by stating and repeating, “(location) Code 4.” (Repeat once).

E. CODE THREE MEDICAL ASSISTANCE REQUEST

1. Code Three Medical Assistance Requests will be generated via any form of communication.

2. Central Control will announce all Code Three Medical Assistance requests by depressing the tone button one time and announcing, “Attention in the Facility: Code Three Medical Assistance Requested at (location).” (Repeat once).

3. The Shift Supervisor will respond to the location.

4. All available Sheriff’s Aides will respond to Central control to provide assistance.

5. Central Control staff will request fire and ambulance respond code 3 to the facility.
6. All custodial activities will be terminated immediately in the affected area.
   a. Inmates in areas not directly affected will be locked down until the incident has been called “Code 4” by central control.
   b. Deputies transporting inmates will stop movement in the closest location where emergency response would not be hindered.

7. All custodial phone lines and radios will be cleared for any traffic being initiated by the area requesting the emergency assistance.

8. Central Control will open the intercom channel to the entry area of the emergency in order to monitor approaching staff and allow access as quickly as possible.

9. All Medical personnel will immediately respond to the scene in the following manner:
   a. The charge nurse (designated Medical Housing Unit nurse) will respond to the site of the emergency.
   b. One nurse will respond to Medical Housing Unit, obtain emergency equipment and transport to the scene.
   c. The physician or family nurse practitioner (if in the Facility) will respond to the scene.
   d. All otherwise unassigned medical staff shall report to the location of the emergency to assist as necessary.

10. Available deputies will respond to provide assistance if necessary.
    a. Deputies on housing units not affected by the emergency shall not respond unless directed to by their shift supervisor.
    b. Deputies wearing civilian clothes should not respond.

11. Deputies arriving at the location should approach with caution and from as many points as tactically possible to help identify and address unexpected hazards.

12. Deputies will control their response to an appropriate level based on the request and within the guidelines as set forth in departmental policies.

13. The requesting deputy or his/her designee will ensure that Central Control is notified when no other assistance is required (Code 4).

14. Central Control will announce the conclusion of the incident by depressing the tone button one time and stating and repeating, “(location) Code 4.” (Repeat once).

F. REQUESTS FOR FIRE AND AMBULANCE
1. Custody staff shall contact Central Control once a medical assessment is made to advise if additional emergency medical assistance or transport will be required.
   
a. In the event an Ambulance is requested by medical staff, Central Control will contact Central Dispatch and request an Ambulance respond Code Three to the Facility and will provide any known details of the injuries and number of people requiring emergency transportation.
   
b. Central Control will announce, “Code-3 Medical-Transport only.”
   
c. Custody staff will respond in the same manner as a code-3 medical (refer to section E).
   
d. Medical staff will respond according to the code-2 procedure (refer to section D).
   
e. An ambulance may also be requested if Medical staff has determined based on the nature of the injury and the inmate’s medical status that there is a risk of spreading an infectious disease to others.
   
f. If a Code-2 Medical situation is elevated to a Code-3 level, normal Code-3 procedures shall be followed.

G. AMBULANCE DISPATCH

1. All ambulance calls to the facility for medical codes will be directed to respond to the Vehicle Sally Port. Any exceptions will be at the discretion of the Shift Supervisor or Custody Sergeant requesting the ambulance call-out.

2. If an ambulance arrives at the facility to transport an inmate and Central Control has no prior knowledge of their arrival, the Central Control Operator will:
   
a. Notify the Shift Supervisor or Custody Sergeant.
   
b. Hold the ambulance crew in the vehicle sally port until receiving additional instructions.
   
c. The Custody Sergeant or designee will respond to location of ambulance arrival and wait to escort the ambulance crew to and from the location of the inmate.

H. NON-AMBULANCE DISPATCH

1. All urgent problems requiring assessment treatment at the hospital will be handled during the shift the problem was identified. Examples of urgent problems are: suturing and/or x-ray for trauma conditions that become unstable.

2. When an inmate requires transport to the hospital, but does not require an ambulance:
a. The Charge Nurse will contact and advise the Shift Supervisor of the following:
   - Injured party’s status
   - Transportation needs
   - Estimate of how soon they should be transported

3. The Shift Supervisor or Custody Sergeant shall make the appropriate transportation arrangements.

I. DOCUMENTATION OF CODE TWO AND THREE MEDICAL ASSIST REQUESTS

1. Central Control will make the following log entries:
   a. Time and location of emergency.
   b. Time medical staff was called/arrived at scene.
   c. Name of person requesting an ambulance.
   d. Injured person’s name, booking number if applicable and nature of medical problem.
   e. Time ambulance was called and estimated time of arrival.
   f. Time ambulance and/or Fire/Rescue arrive at facility.
   g. Time ambulance and/or Fire/Rescue leave facility.
   h. Log any other information pertinent to the emergency i.e., cancellation of ambulance, delays in arrival of ambulance or any changes in medical condition of injured person.

2. The deputy requesting a code two or three medical assist shall provide the following in both JMS Redbook, Activity Logs and an Incident Report:
   a. Date and time the medical emergency occurred
   b. Inmates name, booking number, and housing location
   c. If the medical emergency is involving a civilian or staff member, document the individuals name and badge number, if applicable
   d. Time medical complaint was originally reported
   e. Time the inmate, civilian, or staff member was contacted by the first responder
   f. Initial complaint, i.e., reason for the medical emergency
g. Responding staff members

3. A copy of all reports and log entries shall be provided to medical services via the Facility Commander for training and review purposes.
I. POLICY

A. Inmates are provided medical care from the time of admission and throughout their period of incarceration. This continuous care requires timely physical examinations that include medical screening and clinical history for each admission and a complete physical examination of each inmate within 14 days, following admission.

B. Inmates will receive periodic examinations as deemed necessary by the medical director.

C. Medical staff will provide community care referral information as necessary upon discharge.

D. Medical programs and services shall provide separate management aid for males and females, inmates with chemical dependencies, inmates in administrative segregation and disciplinary isolation, mentally disturbed and physically handicapped inmates, and inmates with communicable diseases.

II. DEFINITIONS

A. PHYSICAL EXAMINATION- A thorough evaluation of a patient’s current physical condition and medical histories conducted by a licensed professional.

B. MEDICAL SCREENING- An examination of a patient conducted by a member of the health care staff. The examination is intended to identify obvious ailments or injuries and reduce aggravation of the condition.

III. PROCEDURE

A. NEW ADMISSIONS

1. Physical examinations shall be completed for each inmate newly committed to the facility or transferred from another facility.

2. Receiving screening

   a. Prior to placement in the general population, a member of the medical
staff shall screen each inmate.

- In the absence of medically trained personnel at the time of intake into the facility, ITR staff will immediately notify the shift supervisor.

- At the direction of the shift supervisor, ITR staff will complete the medical questionnaire.

b. Findings of the screening shall be recorded on the Medical Intake Screening Form that is approved by the facility medical director.

c. The receiving screening shall include at least the following inquiries:

- Current illness and health problems
- Dental problems
- Venereal diseases and other infectious diseases
- Medications taken
- Special health requirements
- Use of alcohol, and other drugs including types of drugs used, amounts, frequency, date of last use, and history of problems occurring from withdrawal
- Past and present treatment or hospitalization for mental disturbance or suicide and other health problems as designated by the medical director.

d. Inmates who have, or are suspected of having developmental disabilities shall be separated from the general population pending assessment, to prevent their being victimized by potential predators.

- The health authority or designee shall contact the Regional Center of the East Bay on any inmate suspected or confirmed to be developmentally disabled for the purposes of diagnosis and/or treatment within 24 hours of such determination, excluding holidays and weekends.

e. Observation of general behavior including state of consciousness, mental status, appearance, tremor or sweating, body deformities and ease of movement, condition of skin including trauma, bruises, lesions, jaundice, rashes, infestations, needle marks or other signs of drug abuse.

f. Female inmate screening shall include an inquiry whether she is pregnant and/or using any drugs.

- The Intake Deputy shall notify the nursing and mental health staff of any female who has been charged with the murder or attempted murder of her child or children. The nurse will
immediately notify Mental Health Staff so that an immediate psychiatric evaluation may be made before the patient is housed.

- Nursing and Mental Health staff shall provide recommendations for disposition to general population, with referral to the appropriate physician or other staff member.

g. The intake health screening record shall become part of the inmate’s permanent medical record.

- All inmates will be scheduled for testing for tuberculosis by use of the purified protein derivative (PPD) skin test within 10 days of their incarceration.

3. 14-Day health appraisal

a. Each inmate shall receive a medical examination by qualified health personnel within 14 days of admission to the facility.

- This examination shall include a review of the receiving screening information and the medical history report, in addition to the procedures required for physical examination as specified in this policy.

- A new appraisal will not be required if there is documented evidence of a health appraisal within the previous 90 days.

4. Sobering

a. When screening and examination result in a diagnosis of chemical dependency, requirements for sobering from alcohol, opiates, stimulants, or sedative hypnotic drugs, appropriate medical/mental health plans will be developed and instituted for the individual.

B. PREGNANCY CARE

1. The health provider must provide pregnancy management specific to the following:

a. Pregnancy testing

b. Routine prenatal care

c. High-risk prenatal care

d. Management of the chemically addicted pregnant inmate

e. Postpartum follow-up

f. Counseling

C. FACILITIES FOR PHYSICAL EXAMINATIONS AND SPECIAL CLINICS
1. The clinic is staffed by clinically trained Health Services professionals and offers the following support services and special clinics:
   a. Screening of new bookings and Intra System Transfers
   b. History and Physical examinations
   c. Administration of Medication
   d. Sick call
   e. Emergency medical care (24 hours, 7-day/week)
   f. Referral service for hospitalization and specialty clinic (as needed)
   g. Dental care

2. Examinations for Communicable Disease
   a. Health Services will ensure any inmate suspected of having contracted a communicable disease is medically examined.
   b. Staff and inmates should use universal precautions and protection from infectious diseases:
      - Gloves shall be worn for touching blood and body fluids and should be changed after each contact.
      - Hands should be washed between each glove change.
      - Wherever practical, masks and protective eyewear, gowns or aprons should be worn during procedures that generate splashes of blood or other body fluids.
      - Hands and skin surfaces should be washed immediately and thoroughly if contaminated with blood or other body fluids.
      - Hands should be washed immediately after gloves are removed.
      - Needles shall be secured in a puncture-resistant container.
      - Deputies and staff shall use a ventilation device should resuscitation be needed.
      - Inmates with a contagious disease must be kept separate from other inmates.

D. QUARANTINES

1. Custody Services Bureau Personnel shall adhere to the following guidelines when made aware of the existence of contagious, infectious or communicable diseases for which the Health Officer deems the need for strict isolation or quarantine necessary:
a. Ensure the adequate isolation of each case and appropriate quarantine of the contacts and premises.

- Secure inmate movement in or out of the affected housing unit(s) for the prescribed time period.

- Establish lists of inmates having court appearances from the affected housing unit(s) and notify the court of the non-appearances.

- Court appearances via telephonic procedure from the jail will be utilized when possible.

- Inmates assigned to quarantine areas will not be permitted visits.

- Separation of inmates within the affected housing unit(s) when classification matters arise will be accommodated within the housing unit(s) if at all possible.

b. Follow local rules and regulations, all general and special rules, regulations and orders of the medical officer in carrying out the quarantine or isolation.

c. Personnel assigned to work in the affected quarantine area will be those previously inoculated for the contagious disease, if possible.

d. Any disputes or conflicts regarding quarantine issues shall be immediately brought to the attention of the Shift Supervisor.

E. CLINICAL MANAGEMENT OF CHEMICALLY DEPENDENT INMATES

1. Health Services staff will be responsible for the following:

a. Diagnosis of chemical dependency.

b. Determination as to whether an individual requires non-pharmacologically or pharmacologically supported care.

c. Individualized treatment plans developed and implemented by a multi-disciplinary team.

d. Referrals to specified community resources on release, when appropriate.

F. MENTAL HEALTH SERVICES

1. On-site services include evaluations of mental health needs, crisis intervention, counseling through routine appointments, medication administration and monitoring of patient status. Specifically, these services are to include, but not be limited to:

a. Evaluation, including pre-screening for mental disorders
b. Counseling

c. Group Therapy

d. Suicide Prevention

e. Medication Management

f. Crisis Intervention

g. Substance Abuse Counseling

h. 4011.6 PC Treatment and Evaluation

G. PSYCHIATRIC TRANSFERS

1. Whenever an inmate is transferred to and from any Contra Costa County Detention Facility for urgent and/or emergency psychiatric evaluation or possible admission to the a psychiatric unit, the inmate must be medically screened prior to being transferred.

2. Copies of all pertinent medical and psychiatric paper work will accompany the inmate.

3. The following receiving staff will be notified:

   a. Facility Commander

   b. Shift Supervisor

   c. Classification Unit

   d. Health Services Staff

   e. Mental Health Staff

4. Health Services and Mental Health staff shall determine if the inmate should be transported via CCCSO Transportation Unit vehicle or ambulance.

5. The inmate will be medically screened once they arrive at their destination to ascertain their current medical condition.

H. HOUSING OF MENTALLY OR PHYSICALLY IMPAIRED INMATES

1. Seriously ill inmates not requiring hospitalization shall be housed on a housing unit consistent with their classification status.

2. Inmates who are mentally disordered, or who demonstrate unusual or bizarre behavior, shall be housed on M Module.

3. Inmates with less serious injuries and illnesses may be housed on any general population module.

   a. Inmates with injuries requiring the use of mobility assistance devices such
as canes, crutches, walkers, etc., should be housed on F Module or at West County Detention Facility.

4. Custody staff is responsible for an inmate’s specific housing assignment within the housing unit.
   a. Medical instructions regarding housing unit placement will be clearly written on the Inmate Management Card and recorded the inmate’s JMS history under “Blue”.
   b. Instructions may be recorded for the following requirements:
      • Lower tier of the housing unit
      • Lower bunk of a cell
   c. Medical Permission slips or “Blue Cards” may not be written for bunk assignments that are not within a cell.

I. TERMINALLY ILL INMATES

1. In cases where an inmate has been diagnosed as being terminally ill, the following may occur:
   a. The Facility Commander or designee may, after confirmation from the medical provider, notify the inmate’s next of kin.
   b. Special visits may be arranged at the discretion of the Facility Commander.

2. The Facility Commander will contact the court and notify them of the inmate’s medical status.
I. POLICY

A. The Custody Services Bureau shall permit inmates to be removed from their assigned detention facility to be transported to privately owned and operated medical facilities or hospitals for medical treatment per PC 4023.

B. The Office of the Sheriff will require a court order directing them to transport the inmate to a private medical facility within Contra Costa County.

C. The court order must contain the following:
   1. Name
   2. Booking number
   3. Case number
   4. Date and time of the appointment
   5. Address, city and telephone number of the medical facility
   6. Attending physician's name

D. Inmates shall bear the cost of the medical treatment, transportation and security in its entirety.

II. PROCEDURE

A. The inmate will provide a court order from a Contra Costa County Superior Court judge. The order will provide that the inmate is responsible for all expenses associated with the transportation and medical treatment. The order will also specify the physician and facility of treatment and it must be located within the county.

B. The Custody Administrative Services Lieutenant or designee will receive the order and forward the information to the Classification, Transportation and Operations Sergeant for review.
C. The Classification Sergeant will determine the staffing level needed for the individual and forward the recommendation to the Operations Sergeant.

D. The Operations Sergeant will ensure that the necessary personnel needed for the assignment are available.

E. The inmate must be scheduled in the external appointment schedule 24-hours in advance of the actual removal.

F. The Operations Sergeant will contact the treating physician, and facility, to confirm the appointment and their willingness to treat the inmate and direct payment of services from the inmate.
   
   1. Should the private medical treatment for inmates involve a high security or high profile inmate, the Operations Sergeant will advise the court and attorney of record that a confidential appointment is needed for security reasons.
   
   2. The Operations Sergeant will then contact the attending physician reschedule the appointment and advise the physician that the information is to be maintained in strict confidence because of high security issues.

G. Payments for medical treatment, examinations or related procedures are not the responsibility of Contra Costa County, the Office of the Sheriff or the current health care provider.
   
   1. Costs for treatment under these conditions are between the inmate and his/her physician.

H. The Office of the Sheriff will not transport any medical records from the jail or return records to the jail from the inmates private care provider.

I. The Operations Sergeant is responsible for the completion and appropriate documentation to recover costs.
I. POLICY

A. This policy and procedure applies only to the above Penal Code sections listed under Related Orders.

B. The Contra Costa County Office of the Sheriff will comply with the provisions of PC 298.1 and 15 CCR Section 1059 for forced blood withdrawals from arrestees who refuse buccal testing procedures.

C. Health Services staff does not draw blood for forensic purposes.

II. PROCEDURE

A. COURT ORDER IN-CUSTODY

1. When the Court issues an order that directs a specifically named inmate to submit a DNA sample the following shall occur:

   a. The Court Clerk will forward the order to the Processing Sergeant at the appropriate Detention Facility.

   b. The Processing Sergeant will verify the order is valid and the proper DOJ information is contained on the Court Order.

   c. The Processing Sergeant will assign a Deputy to locate the inmate, complete the buccal DNA testing and obtain two palm print cards if necessary. This procedure can be performed on the housing unit or in intake.

   d. The Deputy collecting the sample will complete the compliance section and sign and date the appropriate box for each specimen collected. [Redacted]

   e. The completed Court Order will be forwarded to the facility CAS for entry
into JMS.

\[\text{[Redacted text]}\]

g. All outside agencies are responsible for delivery of the DNA sample collection kits to DOJ.

B. IN-CUSTODY CONVICTED FELONY OFFENDERS

1. Adults who are convicted or adjudicated of any felony crime and are currently in custody in conjunction with that conviction or adjudication are required to provide a buccal DNA sample.
   a. Absent a court order, the Classification Unit will run a daily report to determine these qualifying offenders.
   b. Classification will provide this list along with the inmate’s CII number to the Processing Sergeant of the appropriate detention facility.
   c. The Processing Sergeant will assign a Deputy to locate the inmate, complete the buccal DNA testing and obtain two palm print cards if necessary. This procedure can be performed on the housing unit or in intake.
   d. The Deputy collecting the sample will complete the compliance section and sign and date the appropriate box for each specimen collected. The completed sample kit when then be sealed and stored in the DNA box in the Sergeant’s office.

C. ARRESTED OFFENDERS

1. Defendant arrested on or after November 03, 2004 for Felony PC 290 sex crimes, murder, voluntary manslaughter, or attempts to commit those crimes are required to provide a DNA buccal sample.
   a. The arresting agency will complete the buccal testing prior to transporting the Defendant to the Martinez Detention Facility.
   b. Sheriff’s Office employees, who arrest a qualifying subject, will conduct all buccal DNA testing at the Martinez Detention Facility.
   c. If the Arrestee refuses to submit to the DNA buccal testing for the arresting agency the arrestee will be transported to the Martinez Detention Facility and the refusal policy in this section, will be followed.

D. OUT OF CUSTODY-APPOINTMENTS
1. Qualified offenders will report to the lobby of the Martinez Detention Facility or the West County Detention Facility during the designated hours.
   a. The qualifying offender will bring a copy of the court order authorizing collection of the DNA buccal sample. The MDF/WCDF Processing Sergeant should have a duplicate copy on file for verification.
   b. The assigned deputy will verify the identity of the offender via California driver’s license/California identification card, valid out of state licenses or a current passport.
   c. The deputy will complete the buccal DNA testing and obtain two palm print cards.
   d. The Deputy collecting the sample will complete the compliance section and sign and date the appropriate box for each specimen collected. The completed sample kit when then be sealed and stored in the DNA box in the Sergeants office.
   e. If the offender fails to appear for his appointment, the deputy will indicate such on the appropriate line. The form will forwarded to CAS for tracking.
   f. The PC 296 Sample Collection Order will be returned to the issuing court for processing.

E. PALM PRINTS
   a. When palm prints are required, two palm prints cards will be obtained.
      • One palm card will be forwarded to the Office of the Sheriff, Central Identification Bureau.
      • The additional card will be mailed to the Automated Latent Print Section (DOJ), 4949 Broadway Room D107D Sacramento, CA 94820 Attn: CAPPS.
      • Each week CAS Staff will ensure palm print cards are mailed to the DOJ.

F. REFUSALS
   1. Penal code 298.1 authorizes law enforcement personnel to employ reasonable force to collect blood samples from individuals who are required to provide such samples under PC 296 and who refuse following a written or an oral request. A Deputy/Officer must have a supervisors written authorization before the forced blood sample is obtained.
   2. If the use of reasonable force includes a cell extraction, the extraction will be videotaped.
   3. The subject’s refusal and forced withdrawal shall be videotaped. If the refusal or
withdrawal is not videotaped a report will document why the procedure was not videotaped.

a. The subject will be transported to the Martinez Detention Facility (MDF) and booked for the qualifying offense. The arresting agency’s supervisor will sign the PC 298.1 Admonishment Form acknowledging the refusal and authorizing the forced blood withdrawal. (This constitutes written authorization)

b. Once at the MDF, the Processing Sergeant will admonish the subject again to comply with buccal testing procedures. If the subject refuses, the arresting officer will complete the 298.1 Admonishment Form and the PC 298.1 Data Collection Form. The Processing Sergeant will also witness and sign the forms.

c. A BAD Nurse will be requested by the arresting agency and respond to the MDF and perform the blood withdrawal. The BAD Nurse will complete the DNA kit, seal it and mail the kit to the DOJ Laboratory.

d. Each occurrence, the Detention Facility Supervisor will insure the force used to complete the blood withdrawal is done in accordance with Department Policy as outlined in CCCSO Patrol Manual 7-1.

e. The videotape of the admonishment and blood withdrawal will be submitted into CCCSO evidence. The witnessing CCCSO Deputy will document the collection of the videotape on a Crime Report and reference the arresting agency’s report number. A supplemental report will be written if the arresting agency is the Office of the Sheriff.

f. In custody refusals will be handled at the current housing facility. The Deputy will document the refusal on a crime report for Penal Code 298.1(a) Refusal to provide specimens, samples or prints. The Deputy will also write an Incident Report for Incident type 046 Refuse to obey order.

g. Upon completion of the forced withdrawal the data collection sheet will be completed by the Facility Commander and sent to the Board of Corrections within 10 days. The data collection sheet shall document the use of reasonable force if necessary, the type of force used the efforts undertaken to obtain voluntary compliance and whether medical attention was needed by the inmate or other person as a result of reasonable force being used.

<td>Fasting Inmates</td>
</tr>
</tbody>
</table>

I. POLICY

A. Custody Services Bureau personnel will work in concert with the medical staff to ensure that any fasting inmate is medically supervised during the fast.

II. PROCEDURE

A. The following procedures will be followed for management of the fasting inmate who continues to refuse nourishment for a prolonged period:

1. The medical staff will be notified of the fasting inmate and the notification shall be documented. Medical staff will then initiate the medical protocol.

2. The Facility Commander will be notified via incident report of the fasting inmate and the reason for the fast.

3. The fasting inmate can remain in their classified housing unit until such time the medical staff deems it necessary for the inmate to be moved for medical reasons.

4. The fasting inmate will be required to attend each regular meal.

5. Custody staff will make efforts to observe the inmate’s eating habits and will make an entry into their Inmate History recording any consumption of liquid or solid foods.

6. The Medical Director will provide a status of the fasting inmate via weekly report to the Facility Commander.

B. The Facility Commander will be advised of all changes in the status of the inmate via incident report, including termination of fast, behavior problems, transfer to a hospital, etc.
I. POLICY

A. Each inmate will have a confidential means to contact the Triage Nurse for personal medical issues, if requested.

II. PROCEDURE

A. Phone Triage Hours:

1. Martinez Detention Facility
   a. Between 0730 and 1000 hours daily.

2. West County Detention Facility
   a. Building 4: between 0800 and 0830 hours daily.
   b. Building 5, 6, 7, and 8: between 0930-1030 and 1830-2030 hours daily.

3. Marsh Creek Detention Facility
   a. D and E Dorms: between 0900 and 0930 hours daily

B. The MDF and WCDF Morning Shift Housing Unit Deputy will be responsible for compiling a list of inmates requesting to speak with medical staff on the following dayshift.

1. The Triage nurse will contact the Housing Unit Deputy when ready to accept calls from that specific Housing Unit.

C. The MDF and WCDF Day Shift Housing Unit deputy will allow each inmate that has requested triage to make one call to the Triage Nurse in a timely manner.

1. Martinez Detention Facility
a. Inmates may call from the inmate phones by dialing 1-#-25.

2. **West County Detention Facility**
   a. Inmates may call from the inmate phones by dialing:
      - Men’s medical: #23
      - Female medical: #24

3. **Marsh Creek Detention Facility**
   a. MCDF Inmates may use the triage telephone between the listed hours on a first come, first serve basis.
   b. Inmates may call from the inmate triage phone(s) by picking up the receiver.
   c. Medical staff will contact custody staff when they are ready to have the inmate respond to their office.

D. Calls to the Triage Nurse will be made one at a time by each inmate.
E. The inmate will return to their bunk/room after completing their call to the Triage Nurse.
F. D and Q Modules and Administrative Segregation/Disciplinary housing Triage will be conducted through Inmate Request Forms only.
G. All Inmate Request Forms for medical and mental health services will be forwarded to the medical and mental health staff.

**PUBLIC**

**CHAPTER:**  
Medical and Health Care Services

**SUBJECT:**  
Sick Call and Administration of Medication

---

### I. POLICY

A. Sick call (screening rounds, nursing examination and physician referrals) will be made available seven days a week.

B. Sick call rounds and examinations will be determined through Phone Triage appointments, medical referrals and custody staff requests.

C. Medical staff will be responsible for the proper administration of all medication within the custody setting.

### II. DEFINITIONS

1. **Self-Administration** - Following instructions for self-administration of medications by the Medical Staff, eligible inmates will be expected to take responsibility for the storage and administration of certain medications prescribed for them.

2. **Nurse Supervised Administration** - Medical staff will administer medication prescribed to inmates who are unable to meet the self-administration criteria or are prescribed prescriptions that may not be self-administered.

### III. PROCEDURE

A. **INMATE REQUEST FOR HEALTH CARE**

1. Inmates will use the Triage Phone to access the medical health care system.

   a. Inmates on D module will fill out an inmate medical request form directed to the nurse.

   - Even though a Medical Request Form has been submitted that does not mean an inmate will automatically be seen the next day. Inmates should be told their request(s) will be evaluated and they will be scheduled to be seen by medical staff according to the
seriousness of the complaint.

B. SICK CALL

1. The main sick call will be conducted in each housing unit in compliance with the master Post Order schedule.

2. Inmates requiring dental care, special health care, or special treatments that cannot be done in the housing unit sick call office, will be referred to the MDF medical office or Contra Costa Medical Regional Center.
   a. Inmates requiring x-rays will be brought to CCCRMC not withstanding other options available to be determined by medical.
   b. If a Deputy believes that a non-life threatening emergency exists then he/she can call the on-duty nurse to notify them.
   c. Deputies are primarily responsible for moving inmates to and from medical appointments.

C. DENTAL SERVICES

1. All newly Federal admitted inmates shall receive a dental screening within 14 days of admission. This dental examination shall be included within the medical screening conducted by the jail medical staff.

2. Priority appointments will be given to inmates with emergency conditions requiring immediate evaluative treatment.

3. All Medical Request Forms received by custody staff shall be turned into medical staff daily.

4. Treatment for dental problems that existed prior to the inmate’s incarceration shall not always be considered necessary once the inmate is incarcerated.

5. If the dentist determines that a request for dental prostheses is not warranted, and that the inmate’s health would not be adversely affected, services will not be provided by the facilities.

D. PILL CALL

1. Inmates are required to bring a cup at least ½ full of water to nurse for pill call.

2. Inmates will be required to provide identification by displaying their JMS inmate wrist band.

3. All dispensed medications are to be taken immediately, and in front of health services personnel and the Deputy, after they have confirmed identity of the inmate.

4. Inmates will be required to show proof to the Deputy and Nurse that they
consumed their medications.

5. Inmates prescribed methadone shall be placed in a non contact visiting room for at least twenty (20) minutes. The Deputy will ensure that the visiting room has been searched both before and after the inmate placement and removal from the room.

6. Medication rounds or pill call will be conducted at least twice daily, to all housing units at MDF and WCDF only.

E. NURSE ADMINISTERED MEDICATION

1. Medical staff will administer inmate medication when the following applies:
   a. The prescription does not permit self-administration.
   b. The inmate has failed to follow the self-administration rules.
   c. Inmates with the following conditions are ineligible for self administration:
      - Currently on anti-psychotic medications with debilitating mental health history.
      - Organic Brain Syndrome
      - Physical handicaps making storage and administration of medications difficult
      - Demonstrated inability to understand procedure
      - Patients who have a history of repeated failure with the self-medication procedure
      - Inmates considered to be a mental health risk
   d. The following types of medication shall be administered by medical staff:
      - Psychotropic
      - Narcotics
      - Hypnotic
      - Court Ordered Medications
      - Insulin (Must be Supervised)
      - Other Injectables
      - Tuberculosis Medications

F. SELF ADMINISTERED MEDICATION
1. The medical staff writing the order will review the inmate's chart for appropriateness of self-administration of medications and also will review diagnoses, treatment, duration of treatment, medication of choice, any contraindications and dosing schedule with inmate.

2. Medical staff may authorize an inmate’s self administration of prescribed medication under the following conditions:
   a. The inmate is able to take responsibility for their prescription(s).
   b. The inmate is able to secure and store their prescription(s) properly.
   c. The inmate follows the direction of their prescription(s).

3. Prior to giving the prescription to the inmate, the pill call nurse will review self-administration rules, side effects or contraindications of medication, and duration and dosing schedule with the inmate.

4. After the advisement, the nurse will document the inmate's understanding of procedure and medication. Both the inmate and the nurse will initial understanding of procedure.

5. The Pill Call nurse will give the inmate a copy of self-administration rules, pharmacy information sheet and Blue Card for "Permission to Carry" when giving prescription.

6. Any inmates unable to comprehend and reiterate the advisement and medications rules will not be eligible for self-administration of medications.

7. Random spot checks of patient compliance will be done at least once per week by the A.M./P.M. nurses and results will be documented.

8. Inmates may be re-evaluated for self-administration status by a charge nurse. Blatant misuse of medications and or violations of self-administration rules may result in disciplinary action.

9. Inmates who claim their medications were stolen will be instructed to notify the Module Deputy who will investigate the theft. The inmate will then contact telephone triage.

10. Inmates found having excessive medication or giving their medication to other inmates may receive disciplinary action.

11. Copies of all medical related Incident Reports will be routed to the Medical Director.
I. POLICY

A. Sheriff’s Office staff working in a Custody Services Bureau detention facility will be attentive for observable symptoms of communicable diseases and report any concerns to medical staff for evaluation.

B. Contra Costa County Health Services shall notify custody staff on a need to know basis of any inmates who have tested positive for infection with HIV or have been diagnosed as having AIDS or AIDS-related conditions or any communicable disease.

C. Custody staff shall always exercise standard precautions when dealing with inmates.

II. DEFINITION

A. COMMUNICABLE DISEASE: A respiratory, blood borne, or other infectious disease.

III. PROCEDURE

A. MEDICAL ISOLATION AND SPECIAL PRECAUTIONS

1. The Facility Commander or Shift Supervisor is responsible for seeing that the inmate is housed according to his or her medical needs.

2. The Classification Unit will ensure the inmate has been housed accordingly.

3. An inmate’s medical information is confidential in nature. Therefore, sworn personnel are limited in the kind and amount of information they may have regarding an inmate’s medical condition.

   a. It is incumbent on sworn personnel to strictly adhere to directions set forth by Health Services Staff.

   b. In the event personnel need clarification about a specific situation, they should contact Health Services Staff. Sworn personnel who have a need
for clarification, must adhere to the confidentiality requirement.

B. SYMPTOM OBSERVATIONS BY SHERIFF’S OFFICE STAFF

1. The following is a list of observable symptoms that Sheriff’s Office staff shall watch for while working in the detention facility.
   a. Severe itching
   b. Skin rashes, lesions, or open sores
   c. Puss or fluid drainage
   d. Fever and/or night sweats
   e. Persistent severe headache
   f. Persistent upset stomach
   g. Sore throat
   h. Significant loss of appetite and weight
   i. Jaundice (yellowing of skin and/or eyes)
   j. Noticeable change in behavior
   k. Chronic fatigue
   l. Eye redness with fluid
   m. Intense itching
   n. Persistent coughing

2. If it is observed that an inmate is displaying any of the above symptoms, staff should:
   a. Immediately separate the inmate from the rest of the inmate population.
   b. Contact Health Services Staff for evaluation.

CUSTODY

CHAPTER:
Medical and Health Services

SUBJECT:
Suicide Prevention

I. POLICY

A. A written suicide prevention and intervention program will be maintained, reviewed and approved by a qualified medical or mental health professional.

B. All staff with responsibility for inmate supervision will receive training in the implementation of the program including identification of suicidal inmate(s).

C. Every effort will be made by custody staff to recognize the signs and symptoms of suicidal behavior and to deter inmate suicide threats and attempts.

II. PROCEDURE

A. SUICIDE RISK IDENTIFICATION TRAINING

1. All security staff, who are responsible for supervising inmates in a custodial setting to include a Court holding facility, will receive regular training in recognizing the signs and symptoms of mental illness and depression that could lead to suicidal behavior.

2. All jail personnel, sworn and non-sworn, with regular inmate contact must remain constantly alert to any behavioral changes which might indicate increasing depression and/or expressing thoughts of suicide. Good communication between custody and medical/mental health personnel will ensure cooperation in this surveillance.

   a. Certain times during confinement represent more serious threat (i.e., holidays, after arrest, after court dispositions, during domestic upheaval in the inmate's family).

3. Any inmate reported or suspected of being depressed or having a mental disorder will be evaluated immediately by mental health and/or medical personnel.
B. SUICIDE IDEATION

1. Custody staff shall take the following action in the event an inmate has expressed or appears to express through actions or gestures (physical or verbal) the desire to harm themselves.
   a. Call for mental health staff immediately
   b. Request medical staff as necessary
   c. Notify the Shift Supervisor
   d. Stay with the inmate until mental health staff arrives. If mental health staff is unavailable, medical staff should be summoned.
   e. Mental Health staff will determine if a referral to CCRMC In-Patient Psychiatric Unit is required.

2. If the inmate is not referred to a hospital by health care staff, one of three alternative actions will be employed. These alternative actions are as follows:
   a. Open observation
      • At the Martinez Detention Facility the inmate will be re-housed on M Module in Observation Rooms 7 or 8.
      • At West County Detention Facility, all high suicide risk inmates will be re-housed at the Martinez Detention Facility.
      • Inmates placed on any level of suicide precaution/observation should not be permitted to hold any medications until evaluated by Mental Health Staff.
      • If Mental Health staff determines the inmate can be housed with other inmates, the inmate may be housed at MDF or WCDF and shall be based on Mental Health staff’s recommendation.
      • Mental Health staff will see inmates within twenty-four (24) hours of notification from medical staff. If possible, the inmate should interact with other inmates during meals, recreation, etc.
      • Deputies will report any changes in behavior to Mental Health staff. If mental health staff is unavailable, medical staff should be notified.
   b. Safety cell
      • Based on the severity of the inmate’s condition, he/she may be placed into a safety cell.
      • While housed in a safety cell, all medications will be unit dosage. No clothing, linen, water cups or JMS Identification Wristband
will be allowed into the cell, with the exception of a modesty garment.

c. If there are no safety cells or observation rooms available, Rooms 3 and 4 on “M” Module may be utilized as overflow. If rooms 3 or 4 are utilized, the Custody Sergeant and Classification must be notified.

d. In all cases in which an inmate has been deemed to be a suicide risk, an observation log shall be initiated pursuant to CSB Observation Log Policy and Procedures.

e. Custody staff will complete an incident report regarding the incident.

C. SUICIDE ATTEMPTS

1. The following procedures shall be followed in the handling of suicide attempts:
   a. Call for medical aid immediately
   b. Notify Shift Supervisor
   c. Stay with inmate until medical staff arrives.
   d. Medical personnel will treat the inmate and may refer him/her to CCRMC or an alternate appropriate hospital, if necessary.
   e. Custody staff will complete an incident report regarding the incident.
   f. In the event that mental health staff or medical health staff is not able to respond, sworn staff may increase the level of suicide precaution.

2. Mental Health staff shall review all inmates at risk of harming themselves or others to determine if the inmate meets 5150 W.I. criteria.
   a. If the inmate meets 5150 W&I criteria, Mental Health staff shall coordinate with the Shift Supervisor and CCRMC Psychiatric Unit to ensure the inmate receives appropriate care and continuous observation by medical/mental health staff.
   b. An inmate shall not be downgraded or discharged from suicidal precautions until the mental health staff has thoroughly reviewed the inmate’s health care record, as well as confer with correctional personnel regarding the inmate’s stability.

3. All incidents involving suicide or suicide attempts will be administratively reviewed by mental health and custody staff.
   a. The review will determine the following, but not limited to:
      - Was appropriate mental health care provided
• Were policies and procedures followed
• Whether modification to policy(ies) and procedures are needed
• To identify issues that require further attention
I. POLICY

A. Custody Services Bureau staff shall transport inmates to scheduled mental and/or medical appointments.

II. PROCEDURE

A. All inmates scheduled for mental and/or medical health appointments will be transported to the appropriate mental and/or medical facility as scheduled.

B. Inmate Refusals

1. Inmates have a right to refuse medical treatment after medical staff is consulted.

2. Custody staff will notify medical staff upon any inmate’s refusal for medical treatment.

3. Medical staff will make a determination as to whether the need for the inmate’s treatment is necessary and immediate.

   a. MDF

      • Medical Staff will respond to the housing unit to assess the inmate’s needs as appropriate.

   b. WCDF

      • All inmates will be sent to Intake or the Transportation area to consult with medical staff regarding the medical treatment.

   c. MCDF

      • }
4. A signed waiver for treatment must accompany inmate refusals of appointments on the prescribed Inmate Medical Waiver form.

5. The original waiver form is to be forwarded to the facility clinic office for inclusion with the medical records. A copy is to be filed with the inmate’s custody file.

4. Medical staff will advise the Shift Supervisor of their recommendation.

5. The Shift Supervisor will take the appropriate action based on Medical staff’s recommendation, the security concerns of the facilities and the interests of the inmate.

6. An incident report will be submitted in all cases.

7. Inmates refusing to comply with the refusal process may be subject to disciplinary action.
1. POLICY

The Office of the Sheriff recognizes that emergency and unscheduled medical transports occur for inmates within our custody. The transportation of an inmate to a medical appointment is a recognized security risk. The objective of the transport is to perform it in a safe and secure manner. The safety and security of staff, inmates, medical staff, and the general public will be considered in the planning and conduct of all transports - both scheduled and emergency. Unless otherwise directed within this policy, inmates will be restrained during emergency/unscheduled medical appointments.
I. POLICY

A. Inmates shall not be deprived of the possession or use of any orthopedic or prosthetic appliance if the appliance has been prescribed or recommended and fitted by a physician, unless cause exists to believe possession of the device constitutes an immediate risk of bodily harm to any person in the facility or threatens the security of the facility.

B. Any inmate having a prosthesis containing metal shall not be permitted.

II. PROCEDURE

A. REMOVAL OF APPLIANCE FOR CAUSE

1. If custody staff deems an appliance an immediate risk of bodily harm to others or a threat to the security of the facility, they will immediately notify the Facility Commander/designee.

   a. A follow up incident report will be submitted by the reporting staff member.

2. The Facility Commander or designee may remove any orthopedic or prosthetic device from any individual’s possession if they have cause to believe possession of the appliance by an inmate constitutes an immediate risk of bodily harm to anyone in the facility.

   a. Only the inmate or approved medical staff will remove the appliance from the inmate.

3. If the appliance is removed, the inmate will be deprived of the appliance only during such time as the facts which constituted the cause for removal exists.

   a. If the facts cease to exist, the appliance will be returned to the inmate.

4. If the appliance is removed, the inmate must be examined by a physician within 24-hours.
5. If the physician determines removal is, or will be injurious to the health or safety of the inmate, he/she shall inform the Facility Commander or his/her designee.

   a. The Facility Commander will make a determination as to the final disposition of the appliance.

   b. Both the physician and inmate shall be informed of the reasons for such refusal by the Facility Commander.

   c. The Facility Commander or designee will promptly provide the inmate with a form as specified in 2656 PC Sub-Division (c) so the inmate may petition superior court for return of the appliance.

   • The court’s decision will be based upon the evidence received from the interested parties as explained in 2656 PC Sub-Division (b).
I. POLICY

A. Inmates restricted to wheelchairs shall be provided one issued by the Contra Costa County Health Services Department.

B. Wheelchairs are the property of the Contra Costa County Health Services Department and shall not be removed from their assigned facility.

1. Exceptions:
   a. Inmate court appearances
   b. Inmate medical appointments
   c. Transfer to another Contra Costa County Detention Facility until the receiving facility can provide a wheelchair.

II. PROCEDURE

A. All Martinez Detention Facility wheelchairs will be marked by the Health Services Department.

B. RELEASES

1. When the situation arises, the medical staff will evaluate the need of an individual and determine whether or not the individual being released should be wheeled to the awaiting vehicle.

   a. This process will be accomplished in a timely manner so as not to delay the release process.

2. A member of the medical staff will take those individuals requiring wheelchair assistance to the vehicle. The staff member will return the wheelchair to the facility.
C. SPECIAL TRANSPORTS

1. Custody staff will provide transportation of all wheelchair bound inmates, unless otherwise requested by medical staff. (i.e. those vehicles equipped with a wheelchair lift, etc.)
   a. Any requests for transportation via ambulatory vehicles will be made by medical staff.

2. When private transportation is utilized to move the inmate: e.g., an ambulance, ambulatory type vehicles, etc., the deputy sheriff in the follow-vehicle is responsible for the MDF or WCDF wheelchair and its return.

3. When Sheriff’s Office vehicles are used to transport an inmate requiring wheelchair assistance to the hospital, that deputy is responsible for the return of the wheelchair.
   a. If the original deputy is relieved of his or her duties by another deputy, the relieving deputy now becomes responsible for the return of the MDF or WCDF wheelchair.

4. Inmates taken to court or outside appointments may occasionally require wheelchair assistance. Notations will be made on disposition slips and/or appointment slips that the MDF or WCDF wheelchair is to be returned.

5. Wheelchairs brought in from arresting agencies, other correctional institutions or jails are not permitted and shall be returned to the agency for disposition.
   a. Exception: Incoming wheelchairs from outside agencies may be accepted and placed in property if the following conditions occur:
      • A thorough inspection of the wheelchair shall be performed prior to acceptance.
      • Staff conducting the inspection shall document the activity in an incident report.
      • A secure place is provided that the wheelchair can be locked at the storage location.
      • Conditions indicate that it would be more reasonable to store the wheelchair at the detention facility than return it to the transporting agency.
      • Approval of the Facility Commander

6. Personally owned wheelchairs shall not be permitted in any Contra Costa County Detention Facility without the approval of both medical staff and the Facility Commander.
   a. A thorough inspection of the wheelchair shall be performed prior to acceptance.
b. Staff conducting the inspection shall document the activity in an incident report.
I. POLICY

A. The Bureau of Food Services will operate under a Director technically trained in Food Services with proven experiences and abilities in organizing and administering a complex food services management system.

B. The Director of Food Services shall have the resources, authority and responsibility to provide complete food service, including three nutritionally adequate, palatable and attractive meals a day, produced under sanitary conditions and at reasonable costs.

C. The Director will:
   1. Plan menus
   2. Provide a portion control system
   3. Supervise kitchen personnel
   4. Train inmate food services staff
   5. Prepare a yearly food budget
   6. Plan logistical support system for the food services function
   7. Provide a food cost accounting system

II. PROCEDURE

A. BUDGETING, PURCHASING AND RECORD KEEPING

1. The Director of Food Services will maintain records of budgeting, purchasing and accounting, which will include the following:

   a. Food expenditure cost accounting designed to determine the cost per meal, per inmate.
b. Estimation of food service requirements.

c. Purchase of supplies at wholesale and other favorable prices and conditions, when possible.

d. Determination of and responsiveness to inmate eating preferences.

e. Refrigeration of food, with specific storage periods.

f. Accurate records maintained of all meals served.
   • The Director of Food Services will maintain a uniform system to record the number, cost and type of meals being served to inmates, employees, guests, and visitors.
   • Such records will be required for fiscal accounting, dietary purposes and budget planning.
   • Food service records will also include published menus, information on waste, food costs, and nutritional accounting.

B. MENU PLANNING

1. The Director of Food Services will ensure a planned menu is substantially followed, and that the planning and preparation of all meals take into consideration food, flavor, texture, temperature, appearance, and palatability.

2. All menus, including special diets, will be planned, dated and available for review at least five weeks in advance of their use.

3. Any substitutions in the meals actually served will be noted and will be of equal nutritional value.

4. The Food Service Manager will maintain a file of tested recipes, adjusted to a yield appropriate for the facility’s size.

5. Food will be served as soon as possible after preparation and at an appropriate temperature.

6. Clinical diets will be approved by a qualified nutritionist or dietician and documented accordingly.

C. DIETARY ALLOWANCES

1. The Director of Food Services will ensure the facilities dietary allowances are reviewed at least annually, by a qualified nutritionist or dietician to ensure they meet the nationally recommended allowances for basic nutrition, and maintain a record of the review.

   a. Menu evaluations shall be conducted at least quarterly for facility food
service supervisory staff, to verify adherence to the established basic daily servings.

b. Dietary allowances, as adjusted for age, sex and activity should meet or exceed the recommended dietary allowances published by the National Academy of Sciences.

D. TRAINING

1. The Director of Food Services, in conjunction with Inmate Services, will ensure his/her staff and the inmate workers are properly trained in the use of kitchen equipment and safety procedures within the kitchen.

   a. The Director of Food Services shall schedule regular meetings with food service personnel to discuss accident prevention, and analyze major accidents to prevent recurrence.

      • There will be documentation on file that this occurs.

2. Both inmate and civilian staff will be trained in the proper and safe operation of all equipment, large and small.

3. All safety training will be documented in training records. Retraining will occur annually, or as necessary.

4. In-service training will include, but not be limited to the following:

   a. Accident prevention and proper lifting techniques.

   b. First aid for cuts and burns.

   c. Equipment safety and maintenance.

   d. Use of fire extinguishers.

   e. Knife safety and count procedures.

   f. Proper storage, preparation and service of food.

   g. Proper sanitation and floor care.

E. INSPECTIONS

1. There will be documentation by an independent outside source that food services facilities and equipment meet established governmental health and safety codes.

   a. The Contra Costa County Environmental Health Agency will conduct annual and quarterly facility inspections, to ensure that all established governmental health and safety codes are met.

      • Documentation of this will be kept on file at the inspected facility.
b. In the event deficiencies are noted, corrective action will be taken.
   • A report on all deficiencies, along with their corrections, will be placed with the original inspection report and kept on file.

2. The Director of Food Services will ensure that weekly inspections are conducted of all food service areas, including dining, food preparation areas, and all equipment. The following is a list of those entities participating in the inspection:
   a. Food Service Management
   b. The Contra Costa County Office of the Sheriff
   c. General Services Department (GSD)

3. In conjunction with weekly inspections, daily reading and recordings of refrigeration and water temperatures are to be conducted by qualified food service employees and reviewed by food service management.
   a. Shelf goods are to be maintained at 45 degrees to 80 degrees Fahrenheit, refrigerated goods at 34 degrees to 40 degrees Fahrenheit, and frozen goods at, or below 0 degrees Fahrenheit.
   b. Water temperature on final dishwasher rinse should be 180 degrees Fahrenheit; between 140 and/or above 140 degrees Fahrenheit is appropriate if a sanitizer is used on the final rinse.

4. Documentation of all inspections will be on file and maintained by the Director of Food Services and Bureau Administrative Services.

F. HEALTH AND SAFETY REGULATIONS

1. Adequate health protection for all inmates and staff in the facility, and inmates and other persons working in food service shall be maintained.
   a. As part of the health protection process, the food service manager and the Contra Costa County Office of the Sheriff will ensure the following:
      • Where required by the laws and/or regulations applicable to food service employees in the community, all persons involved in the preparation of food receive a pre-assignment medical examination and periodic re-examination to ensure freedom from diarrhea, skin infections and other illnesses transmissible by food or utensils.
      • All examinations are to be conducted in accordance with local requirements.
   b. All food handlers will be instructed to wash their hands upon reporting to duty, and after using lavatory facilities.
c. The Director of Food Services or designee will monitor inmates and other persons working in food service each day for health and cleanliness. This will include inspecting the following areas:

- Cleanliness of hands and fingernails.
- Ensuring that hairnets and/or caps are worn.
- Ensuring that washable garments are worn.
- Ensuring that all personnel employ hygienic food handling techniques.

d. All food service personnel shall be in good health and free from the following physical ailments:

- Communicable diseases.
- Open infected wounds.
- Acute or chronic inflammatory condition of the respiratory system.
- Acute or chronic infection or skin disease.
- Acute or chronic intestinal infection.

2. The Director of Food Services shall provide the Contra Costa County Office of the Sheriff with written verification that his/her parent agency complies with all local and state regulations regarding food service.

a. This document will be kept on file by the Director of Food Services.
I. POLICY

A. The Custody Services Bureau will provide all inmates with meals that are nutritionally adequate and properly prepared pursuant to Minimum Jail Standards Section 1246.

B. All meals will be served under the direct supervision of staff, and in a manner that ensures safety, proper food handling, the least amount of regimentation and equal treatment of all inmates.

C. All inmates will be provided at least three (3) meals, at regular times, two (2) of which will be served hot. At no time shall there be more than fourteen (14) hours between the evening and breakfast meal.

D. Withholding of food, or any change in the normal menu, as a form of punishment and is strictly forbidden.

1. This does not preclude the service of approved special management diets or approved medical diets.

II. PROCEDURE

A. Inmate meals will be delivered to the housing areas and booking, per the Master Event Schedule at MDF and WCDF.

1. MCDF meals are served at the dining hall.

B. Upon receipt of a food cart, food is to be served as soon as the following occurs.

1. The housing unit deputy will conduct an inventory of the meal cart to ensure the following:

   a. No contraband is on the cart
b. A correct amount of meals and food items has been delivered

c. Excess issue is removed and returned to the kitchen

d. Special meals are noted and signed off.

C. The housing unit deputy will complete a Housing Unit Meal Log sheet when the cart is satisfactory for food service.

a. The kitchen will be notified immediately of all discrepancies shortages and contraband.

b. The completed Housing Unit Meal Log will be returned to the kitchen with the meal cart at the end of shift.

2. Martinez Detention Facility

a. Inmate meals will be served in the cells of each housing unit, under the direct supervision of a deputy.

3. West County Detention Facility

a. Inmate meals will be served in the common areas of each housing unit, under the direct supervision of a deputy.

   • Exception: Building 4 inmate meals will be served in each inmate cell.

4. Marsh Creek Detention Facility

a. Inmate meals will be served in the facility cafeteria, under the direct supervision of a deputy.

5. Inmates shall be given approximately fifteen (15) minutes to consume their meal.

6. Deputies will ensure that proper food handling is practiced at all times by the inmate workers.

7. Deputies will ensure that inmate workers return all items received to the food carts as soon as the meal has been completed and that all service areas are cleaned between each feeding.

   a. A total of forty-five (45) minutes will be allowed from start to finish of each feeding cycle.
8. Meals not consumed shall be returned to the kitchen in the food service carts separate from soiled trays.
   a. The kitchen shall be closed between 1900-0315 hours. Housing unit deputies are to contact the Shift Supervisor for any emergency bag meals during the hours the kitchen is closed.

9. Transportation staff will ensure that all inmates in their custody at regular food service times are properly fed prior to returning the inmate to their housing unit.

D. INTAKE MEALS

1. Intake Deputies shall conduct food service while conducting formal count.
   a. Once an inmate’s presence is verified through the formal count process, the counting deputy will advance the inmate through the line to accept their meal.

   b. All inmates being processed in intake will be provided a cold meal.

E. KITCHEN MEAL COUNT

1. Kitchen staff will contact individual housing unit deputies to determine how many meals will be required for the next food service.

2. Deputies will determine the number of meals needed by making the following considerations:
   a. Total inmate population
   b. Inmates remaining out to court or appointments during meal service
   c. Anticipated facility movements to and from the housing unit

3. The meals will be delivered to booking and the housing floors.

4. Each inmate will be allowed one (1) meal, with all extras being returned to the kitchen.
   a. Module Workers may have a second meal at the discretion of the housing unit deputy.

      • All module workers must be treated fairly when making considerations for meals.
• The meal must be heated and consumed at the time of service.

F. TRANSIT MEALS

1. The Food Services Director will ensure that all cold meals are nutritionally sound and based upon the Recommended Dietary Allowances (RDA) of the National Academy of Sciences (1989) and generally upon the California Daily Food Guide.

2. Each transit meal will contain a fresh, quality meal containing the menu developed by the Director of Food Services or designee.

3. Each transit meal shall meet the standards established by the California Department of Corrections.

4. The Director of Food Services or designee will be responsible for the preparation of the required number of transit meals for both the facility and appropriate courts.

5. The Director of Food Services or designee, in conjunction with custody staff, shall inspect the transit meals to ensure acceptable levels of freshness, quality and quantity are being met.

6. If these meals are not used for the same day, they may be used for the next day, provided the transit meal is properly and continuously refrigerated until used.
   a. Lunches not refrigerated and not used shall be discarded.

7. Transit meals requested by deputies or other personnel for inmate work crews must be requested in advance. The following information will be required:
   a. Number of lunches needed.
   b. Destination of lunches.
   c. Deputy signature.
   d. Date and time.

G. COURT TRANSIT MEALS

1. The kitchen will supply transit meals for inmates at court facilities and in Booking/ITR.

2. Transportation staff will ensure that the total number of transit meals required for morning courts is communicated to food service staff by 0400 hours, each day.
a. These numbers shall be derived from the daily court list generated in Booking/ITR.

H. MAIN LINE FOOD SAMPLING

1. The Supervising Cook shall be responsible for sampling/testing inmate meals daily.

2. Special attention should be on the temperature, quality and portion size.

3. Equipment such as thermometers and measuring cups will be used to sample the food.

4. The results of all completed tests shall be placed on a Main Line Sampling Sheet Form.

   a. The form shall be forwarded to the Director of Food Services for review and filing.

I. FOOD AS PUNISHMENT

1. Withholding of food or any change in the normal menu, as a form of punishment, is strictly forbidden.

2. This does not preclude the service of approved special management diets or approved medical diets.
I. POLICY

A. It shall be the policy of the Custody Services Bureau to provide inmates with special diets as prescribed by appropriate medical or dental personnel.

B. Special diets relating to religious beliefs or religious dietary laws will be honored, by providing an alternative to the regular menu.

C. The requesting party shall forward all Special Diet requests to the Director of Food Services.

II. DEFINITIONS

A. THERAPEUTIC DIET: Special meals or foods prescribed by a physician or dentist as part of a patient’s treatment.

B. RELIGIOUS DIET: An alternative diet offered in lieu of the regular menu that is consistent with a recognized religious order and approved by the Facility Chaplin.

III. PROCEDURE

A. SPECIAL DIETS

1. Therapeutic diets shall be made available to inmates upon medical authorization only.

2. Specific diets should be prepared and served to inmates according to the orders of the treating physician, dentist, or as directed by the responsible health authority.

3. Medical diet prescriptions should be specific and complete, furnished in writing to the Director of Food Services.

4. Special diets should be kept as simple as possible and should conform as closely as possible to the foods served to other inmates.
B. RELIGIOUS DIETS

1. Advise the inmate requesting a religious diet to fill out an inmate request slip requesting placement on a religious/vegetarian diet.
   a. The request form shall be addressed to the facility Chaplin.
   b. The request slip is then routed the same as all other request slips and shall be forwarded to the Chaplin.
   c. The facility Chaplin will verify the legitimacy of the request.
   d. Religious diet prescriptions should be specific and complete, furnished in writing to the Food Service Manager.

2. Cancellation of a religious diet will be done at the request of the inmate.
   a. Notification of cancellation shall be done via an inmate request slip.

C. INMATE SPECIAL DIET RECEIPT

1. The housing unit deputy shall ensure that each special diet delivered to the housing unit is handed directly to the requesting inmate.

2. The housing unit deputy will direct the inmate to sign for receipt of the meal on the meal cart log.
   a. In the event the inmate refuses the meal or refuses to sign for receipt of the meal, the housing unit deputy shall submit an incident report documenting the refusal.
I. POLICY

A. A regular schedule of housekeeping will be performed to maintain an acceptable level of cleanliness throughout the facility pursuant to Minimum Jail Standards Section 1280.

II. PROCEDURE

A. INFORMAL INSPECTIONS

1. Housing unit deputies will inspect their respective housing areas during each shift. Any cleanliness or maintenance problems will be immediately corrected.

   a. If the problem cannot be corrected, the housing unit deputy will notify their sergeant and the appropriate action will be taken.

2. The Custody Sergeants will inspect all housing units and other areas under their control at least once per shift, including weekends and holidays, and report their findings to the Facility Commander.

   a. Cleanliness or maintenance problems will be brought to the attention of the housing deputy and the appropriate action will be taken.

3. The Facility Commander, acting as chief security officer, or designee, shall conduct at least weekly inspections of all security devices needing repair or maintenance and report the results of the inspecting in writing.

   a. Refer to CSB Facility Inspection Policy for additional details.

4. The Booking/ITR Deputies will inspect booking during each shift.

   a. Any cleanliness or maintenance problems will be immediately corrected.

   b. If the problem cannot be corrected, the Booking/ITR Deputy will notify the Shift Supervisor and the appropriate action will be taken.
5. The Shift Supervisor will inspect all areas under their supervision at least once during each shift.
   a. Cleanliness or maintenance problems will be brought to the attention of the deputy responsible for the problem area or referred to the Watch Commander for appropriate action.

6. DSWs will inspect public areas and administrative areas of the facility for cleanliness or maintenance problems.
   a. Cleanliness or maintenance problems will be corrected as soon as possible.
   b. The cook will forward repair requests to BAS.

7. The Director of Food Services or designee will inspect the kitchen and staff dining area during each shift.

8. The Director of Food Services will conduct weekly kitchen inspections.
   a. Cleanliness or maintenance problems will be corrected as soon as possible.
   b. The cook will forward repair requests to BAS.

9. All Sheriff’s Aides assigned to Central Control, Property or the Reception/Lobby Areas will inspect their space daily.
   a. Cleanliness or maintenance problems will be corrected as soon as possible.
   b. Repair requests will be forwarded to the facility janitorial staff or GSD.

B. CIVILIAN HOUSEKEEPING RESPONSIBILITIES

1. DSW staff will be responsible for the cleanliness of all offices, lobbies, public and staff restrooms, hallways, control points, housing control units, libraries, classrooms, holding areas, and any other areas as designated by the Facility Commander.

2. The following housekeeping schedules will be performed in all staff and visitor areas within the facility by civilian staff.
   a. Facility floors will be kept clean, dry, and free of hazardous substances at all times, pursuant to CSB Hazardous Substance Policy.
      - Daily Service for offices, hallways, Operations, multi-purpose rooms and public areas:
        - Empty wastebaskets and remove trash.
        - Vacuum/buff tile floors.
• Spot mop for spillage.
• Vacuum carpets, stairs, and elevators.
• Spot clean carpets.
• Dust desks, file cabinets, and furniture.
• Clean and disinfect drinking fountains.
• Spot clean glass for fingerprints and smudges.

• Daily Service for public restrooms and staff locker rooms:
  • Clean and disinfect all fixtures.
  • Refill all dispensers.
  • Clean and disinfect toilets, urinals and showers.
  • Spot clean walls and partitions.
  • Clean mirrors.
  • Empty wastebaskets, remove trash.
  • Dust lockers, return air vents.
  • Mop floors.
  • Empty exterior cigarette urns.

• Weekly Service for offices, lobbies, hallways, Operations, Booking and multi-purpose rooms:
  • Scrub and sanitize showers.
  • Replace plastic liners in wastebaskets when applicable.
  • Clean doormats, thresholds, and entrance areas.
  • Spray and buff tile, damp mop stairs and elevators.

• General (As deemed necessary by Janitorial Supervisor.)
  • Dust door ledges, partitions, and moldings.
  • Spot clean doors, walls, and doorframes.
  • Vacuum and dust, clean Venetian blinds.
• Damp wipe wastebaskets.
• Clean all interior windows.
• Shampoo/steam clean carpet.
• Wash windows.
• Clean air vents.
• Semi-Annual
  • Clean all light fixtures and luminaries.
  • Shampoo/steam clean all carpets.
• Annual
  • Strip and wax tile pursuant to contract or established procedures.

C. SANITATION OF CELLS AND ROOMS

1. Each inmate is required to maintain sanitary living area conditions as follows:

2. Each inmate shall be responsible for the cleanliness of his or her cell or living area including walls, floors, sink, toilet, windows, and other property within the cell, room, or living area.

3. The housing floor/unit deputy shall provide cleaning materials and articles for cleaning to each inmate. The inmate is responsible for the proper usage and care of these articles.

4. Before leaving the cell/dorm area, each inmate shall sweep and mop the floor of their living areas, and deposit the trash in the trashcan located near the entrance of the unit.

5. No curtains, screen, paper, cellophane, cardboard or clothing, etc., shall be hung in the cell or on room doors.

6. The deputy shall issue the inmate a verbal warning or a disciplinary report in cases of continued noncompliance with cell/dorm cleaning.

D. The inmate workers will be responsible for the cleanliness of the common area within each pod, multi-purpose rooms, showers, quasi yards, and hallways.

1. The following housekeeping schedules will be performed in all pods/living areas by inmate workers daily:
   a. Clean all tabletops in common area.
   b. Clean pantry and mop floors.
c. Ensure that all trash is staged for pick up by 1900 hours.

d. Vacuum carpets in all common areas.

e. Sweep and mop inmate side of visiting room, the multi-purpose rooms, courtyards, and corridors leading to sally ports.

f. Spot clean all windows where needed.

g. Wipe down telephones.

h. Dust all TV's, bookcases, and other furniture.

i. Clean and disinfect inmate showers.

j. Clean marks from doors and walls.

2. Additional cleaning before and after meals

   a. The pantry area will be cleaned prior to serving meals. Any juice or coffee spillage will be wiped up.

   b. All tables where eating will occur will be wiped off.

   c. After meals have been served, the tables will be cleaned before recreation and social activities resume.

   d. Any spillage on the carpet will be cleaned immediately.

3. Other housing unit rooms (visiting, storage, showers, etc.)

   a. Showers will be cleaned daily.

   b. The storage rooms will be straightened, dusted and mopped as directed by shift deputies.

   c. The inmate side of the non-contact visiting rooms will be dusted, windows cleaned and the floor mopped and buffed after visiting.

4. Common area

   a. Shift deputies are responsible for supervising the inmate workers and ensuring cleaning assignments are accomplished in a timely and satisfactory manner.

   b. Vacuum all carpets.

   c. Spot clean soiled spots on carpet.

   d. Dust or wipe down all recreation equipment and furniture.
e. Clean all tabletops and wipe down pedestals.

f. Clean all windows accessible from inside the housing unit.

g. Clean outside of windows from courtyard.

h. Straighten books in bookshelves and dust.

i. Dust windowsills, over doors, stairs, and railings.

5. Pantry Area

a. Clean pantry counter top.

b. Straighten and dust inside of cabinets and drawers.

6. All necessary cleaning material (cleaner/disinfectant, cleanser, brooms, mops, etc.) will be stored in a locked closet within each housing unit.

a. These are to be issued to each housing unit and used by inmates to clean their living areas daily under the supervision.
I. POLICY

A. The Custody Services Bureau will maintain a waste disposal program that conforms to appropriate jurisdictional requirements and protects the health and safety of staff and inmates will be adhered to.

B. Liquid and solid trash and rubbish will be collected daily to avoid creating a menace to health, and to maintain good sanitary conditions pursuant to CCCSO Hazard Communication Program Policies.

II. DEFINITIONS

A. SECURITY SENSITIVE TRASH: Sensitive trash items are Security Hazards if left accessible to the inmate population. This would include soft drink cans, bottles, broken pieces of metal or porcelain and similar items. Secure garbage does not refer to security hazards of evidentiary value.

III. PROCEDURE

A. GENERAL

1. All staff is responsible for keeping their work areas free of trash, litter and garbage.

2. Security personnel are also responsible for ensuring that refuse is promptly removed from the inmate living areas.

3. All refuse will be disposed of in the proper receptacles.

4. The DSW staff shall maintain and insure the safe and sanitary operation of the Garbage Disposal Program for the facility.

B. MARTINEZ DETENTION FACILITY GARBAGE COLLECTION

1. The following units will place full trash carts at the appropriate pick-up points at
0700, 1300 and 1900 hours daily:

a. All Housing Floors  
b. Booking  
c. Medical Floor  
d. Staff Dining

C. WEST COUNTY DETENTION FACILITY GARBAGE COLLECTION

1. All buildings will place full trash carts at the appropriate pick-up points at 0700, 1300 and 1900 hours daily:

D. KITCHEN AND SERVICE AREA/BUILDING PICK-UP

1. DSWs will place food services and main kitchen waste in the compactor.

2. Trash for the service area/building will be delivered by the inmates to the trash staging area under the supervision of an escort deputy.

3. The escort deputy will inspect all outgoing trash by removing each trash bag from the bin it is placed in and placing it into a previously unused bin.

4. DSWs will take the trash from the staging area to the loading dock/compactor unit only after an escort deputy has inspected all trash and containers.

E. SECURITY SENSITIVE TRASH

1. Security sensitive trash will be collected by the on-duty housing floor/unit deputy when found.

2. Inmates may not have contact with secure garbage.

3. The staff member responsible for the secure garbage will contact the Shift Supervisor.

   a. The Shift Supervisor will direct an escort deputy to respond to the location and recover the garbage.

   b. The Escort Deputy will remove the secure garbage from the facility and place it directly into the compactor for destruction.

4. Staff members bringing items fitting the Secure Garbage description into the facility are responsible for removing them at the end of their shift.

F. Flammable, toxic, caustic and hazardous waste will be handled pursuant to CSB Hazardous Substance Program Policy and Procedure.
I. POLICY

A. A regular schedule of housekeeping will be performed to maintain an acceptable level of cleanliness throughout the Facilities.

II. PROCEDURE

A. HOUSEKEEPING-MDF and WCDF

1. DSW staff will be responsible for the cleanliness of the following:
   a. All offices
   b. Lobbies
   c. Public and staff restrooms
   d. Hallways
   e. Libraries
   f. Classrooms
   g. Court holding areas
   h. Other areas as directed by the Facility Commander or designee

2. DSW staff will ensure all facility floors are clean, dry and free of hazardous substances at all times.

B. HOUSEKEEPING SCHEDULE-MDF and WCDF

1. DAILY SERVICE
   a. Office, lobby, hallways, Central Control, and court holding.
• Second floor offices cleaned on weekdays only.
• Empty wastebaskets - remove trash.
• DSWs will place solid wastes into the trash compactor.
• Empty and clean *(outside)* ashtrays
• Sweep and mop tile floors
• Spot mop for spillage
• Vacuum carpets
• Sweep and mop stairs and elevators
• Spot clean carpets
• Dust desks, file cabinets and furniture
• Clean and disinfect drinking fountains
• Spot clean glass for fingerprints and smudges
• Public restrooms, staff locker rooms
• Clean and disinfect all fixtures
• Refill all dispensers
• Clean and disinfect toilets, urinals and showers
• Spot clean walls and partitions
• Clean mirrors
• Empty waste baskets - remove trash
• Dust front of lockers - return air vents
• Mop floors

2. **WEEKLY SERVICE**
   a. Offices, lobbies, hallways, and court holding
   • Replace plastic liners in waste baskets, when applicable
   • Clean doormats, thresholds and entrance areas
- Mop and buff tile
- Public restrooms, change rooms
- Scrub showers
- Sanitize showers
- Staff Locker Rooms
  - Remove all excess clothing hangers
- Trash Compactor
  - DSWs will place solid wastes into the trash compactor.
  - The Bay Shore Sanitary Service removes contents of trash compactor as necessary.

3. MONTHLY SERVICE
   a. General Facility Duties
      - Dust door ledges, partitions and moldings
      - Spot clean doors, walls and door frames
      - Vacuum and dust, clean Venetian blinds
      - Damp wipe waste baskets
      - Clean all interior windows
      - Staff Locker Rooms
        - Notify Operations Sergeant when preparing to clean tops of lockers.
        - If staff has not removed all items from the top of the lockers, notify the Operations Sergeant and request an escort to remove all items from tops of lockers.
        - Clean and disinfect tops and fronts of lockers

4. QUARTERLY
   a. General duties, coordinate scheduling of cleaning with B.A.S Fire and Life Safety Officer.
      - Sweep Fire Evacuation Stairwells
      - Dust, Mop and disinfect Fire Evacuation Stairwells
• Sweep and Mop Evacuation Stairway and Walkway on Roof of Court Annex (access through the Bray Building Link Sally port by the Transportation Hallway).

• Other assignments as directed by the Facility Commander.

5. SEMI-ANNUAL

a. General duties

• Clean all light fixtures and luminaries
• Shampoo/steam clean all carpets
• Strip and wax all tile & non-carpeted floors

C. HOUSEKEEPING-MCDF

1. DSW staff will be responsible for the cleanliness of the following:

a. Administration Office
b. Staff restrooms
c. Locker rooms
d. School offices
e. Range classroom
f. Medical office
g. Property room
h. Any other areas when directed by the Facility Commander.

2. DSW staff will ensure all facility floors are clean, dry and free of hazardous substances at all times.

D. HOUSEKEEPING SCHEDULE-MCDF

1. DAILY

a. Empty wastebaskets - remove trash
b. Empty and damp wipe ashtrays
c. Vacuum/buff tile floors
d. Spot mop for spillage
e. Vacuum carpets, stairs and elevators
f. Dust desks, file cabinets and furniture
g. Clean and disinfect drinking fountains
h. Spot clean glass for fingerprints and smudges
i. Inmate workers under the direct supervision of a DSW are responsible for the cleanliness of inmate classrooms, chapel and laundry.
j. Inmate KP's, under the supervision of the Lead Cook, will be responsible for housekeeping duties in the cafeteria and adjacent grounds.
k. The Officer Orderly will clean the holding cell.
l. Shop Complex

- All flammable liquids, i.e., paint, thinner, gasoline, oil, etc., will be kept in the secured flammable liquid storage locker at the shop.

- All rags and other refuse containing flammable liquids will be placed in the flammable waste receptacle located at the shop. This receptacle will be emptied and cleaned daily.
I. POLICY

A. The Custody Services Bureau shall ensure the following:

1. Inspections of the facility shall be conducted to ensure a high degree of cleanliness, sanitation and safety throughout the facility.

2. Weekly safety sanitation inspections of all facility areas shall be done by qualified staff members, with emphasis on security devises.

3. A monthly comprehensive and thorough inspection of all facility areas will be completed by the facility Fire/Life Safety Officer(s) for compliance with safety and fire prevention standards.

   a. There is a weekly fire and safety inspection of the facility by a qualified departmental staff member. This policy and procedure is reviewed annually and updated as necessary.

4. The facility will be inspected at least annually by state or local sanitation and health officials.

5. The facility complies with all applicable laws and regulations of the governing jurisdiction and shall have documentation by an independent, outside source that any past deficiencies noted in annual inspections have been corrected.

II. PROCEDURE

A. INFORMAL INSPECTIONS

1. All personnel will inspect their assigned work areas during each shift. Any cleanliness or maintenance problems will be immediately documented on a work order for correction.

   a. If the problem cannot be corrected, personnel will notify their supervisor to ensure appropriate action is taken.
2. Supervisors will inspect all housing units and other areas under their control at least once per shift.

   a. Appropriate action will be taken to ensure that cleanliness or maintenance problems are corrected.

3. The DSW supervisor will inspect public areas, program areas and administrative areas of the facility for cleanliness or maintenance problems. Cleanliness or maintenance problems will be corrected as soon as possible.

4. Custody staff and the Director of Food Services or designee assigned to the kitchen will inspect the kitchen and staff dining area on a daily basis.

   a. Cleanliness or maintenance problems will be corrected as soon as possible.

5. GSD supervisors and staff will inspect those areas in the service building they are directly responsible for on a daily basis.

6. The landscape supervisor will inspect areas of responsibility weekly.

7. Booking/ITR deputies will inspect Booking/ITR during each shift.

   a. Any cleanliness or maintenance problems will be immediately documented via work order for correction.

   b. If the problem cannot be corrected, the Booking/ITR deputy will notify the Shift Supervisor and the appropriate action will be taken.

8. The Shift Supervisor will inspect all areas under his/her supervision at least once during each shift.

   a. Cleanliness or maintenance problems will be brought to the attention of the deputy responsible for the problem area.

B. FORMAL INSPECTIONS

1. A weekly safety/security device/sanitation inspection of all facility areas will be conducted by the appropriate area supervisor, in accordance with CSB Facility Commander Post Orders and Facility Inspection Policy.

   a. The weekly inspection reports will be completed by a qualified departmental staff member as designated by the Facility Commander.

   b. All inspection reports will be returned to the CAS Lieutenant.

   c. The CAS Lieutenant will ensure that all discrepancies noted during the inspection have been assigned corrective action.

   d. The supervisor or designated staff member will then report back to the
CAS Lieutenant, indicating the completed and/or initiated corrective action taken.

2. The Administrative Services will conduct a comprehensive and thorough monthly safety/sanitation inspection of all facility areas.

   a. The Administrative Services shall submit the monthly inspection reports to Custody Administrative Services for records.

      • The CAS Lieutenant shall notify the Facility Commander of all discrepancies noted during the Fire/Life Safety and Sanitation Inspection.

3. The facility will be inspected biannually by the State Board of Corrections as specified in the 6031.1 PC.

4. The facility will be inspected annually by the Environmental Health Services Agency as specified in 101045 H&S.

   a. Water samples from both drinking and wastewater will be tested annually by the Environmental Health Services Agency to ensure that the facility’s water meets all applicable laws.

5. The facility will be inspected annually by the designated Fire Marshal of jurisdiction.

C. VERMIN/PEST CONTROL INSPECTION:

1. The CAS Specialist will be the liaison between the facility and the Director of Food Services or designee for vermin/pest control.

   a. GSD will ensure that vermin/pest control professionals are readily available to the facility.

   b. Regular weekly inspections will be conducted to identify any such conditions, and to eradicate by whatever means is necessary.

   c. Follow-up monthly inspections will be conducted by the CAS Lieutenant during the monthly Fire/Life Safety Sanitation facility-wide inspection.

| SUBJECT: Housing Unit Cleaning Chemical Procedures |

**I. POLICY**

A. Custody Services Bureau personnel will store and distribute housing unit cleaning chemicals in such a manner that security and inventory control can be maintained while ensuring inmate workers do not retain unused chemicals after use.

**II. PROCEDURE**

A. CHEMICAL DISTRIBUTION

1. Cleaning chemicals will be mixed to their proper and safe dilution ratio automatically by the dispensing systems.

2. Diluted cleaning chemicals will only be stored in their respective and appropriate labeled containers.

3. DSW staff will maintain an adequate inventory of approved cleaning chemicals and shall maintain the appropriate chemical storage jugs in the individual housing floors/units janitor’s closets, filling and/or replacing them as necessary.

B. CHEMICAL DISTRIBUTION TO INMATE WORKERS

1. The housing floor/unit deputy shall keep the janitor’s closet containing the cleaning chemicals in a constant locked condition.
   
   a. At no time shall an unescorted inmate be allowed in the janitor’s closet.

2. The appropriate, diluted cleaning chemical in its properly marked dispensing container, shall be given to the housing unit worker or individual inmate (if cleaning an individual cell).
   
   a. The deputy distributing the chemical(s) shall instruct the inmate to return the dispensing container with the unused cleaning chemical upon completion of the cleaning task.
3. Upon return of the dispensing container, the deputy shall return it to the janitor’s closet and ensure that the closet is secured.
   
a. No cleaning chemical is to be stored outside of the locked janitor’s closet or left unattended anywhere within the housing floor/unit.

4. At no time, is any inmate allowed to retain or store any cleaning chemical, either in the original dispensing container or in any other container.

5. At no time, are any inmates to be in contact with, or exposed to, any concentrated cleaning chemical.
I. POLICY

A. Flammable, toxic or caustic materials will be stored in an area inaccessible to inmates to ensure facility security and the safety of staff and inmates.

II. DEFINITIONS

A. Flammable Materials: Any product which will ignite when contacted with flame or spark, or at below 100 degrees Fahrenheit.

B. Toxic: A poisonous material that can destroy the life or health of a living animal or plant.

C. Caustic: A material able to burn or corrode persons or objects by chemical action.

III. PROCEDURE

A. USE OF FLAMMABLE, TOXIC AND CAUSTIC MATERIALS

1. Inmates will only be authorized to use flammable, toxic or caustic materials under the constant supervision of sworn, Food Service, Support Service personnel or other personnel as designated by the Facility Commanders.

2. All flammable, toxic or caustic materials will be stored in accordance with all applicable laws and regulations governing the Detention Facility.

3. Facility DSWs will be responsible for obtaining any flammable, toxic and caustic material within the Detention Facility for delivery to the modules.

4. Any personnel using flammable, toxic or caustic materials must use protective clothing, i.e., elbow length rubber gloves and knee length aprons.

B. CONTROL OF FLAMMABLE, TOXIC AND CAUSTIC MATERIALS

1. All personnel obtaining/using any flammable, toxic or caustic materials that are stored in the kitchen, laundry and/or DSW's office will sign the respective
Hazardous Substance Log.

a. The Hazardous Substance Log will contain the following information:
   - CHECK OUT
   - Date/Time
   - Quantity
   - Item
   - Destination
   - Employee's Name
   - CHECK IN
   - Time - Qty - Initial

2. West County and Marsh Creek Detention Facilities
   a. Gasoline, fertilizers and other restricted chemicals will be stored in the landscape storage room next to the Maintenance Shop.
   b. Gasoline will be stored in approved containers in the flammable liquids cabinet.
   c. Fertilizers and other materials will be stored in their original packaging. The safe handling and storage guidelines printed on the packaging will be adhered to.
   d. Gasoline which has been poured into the fuel tank of power equipment (i.e., lawn mower) may remain within the security perimeter provided the power equipment is stored in a secured location.
   e. Power equipment will not be refilled at the end of the workday so as to minimize the amount of flammable liquid within the security perimeter.

3. Marsh Creek Detention Facility Only
   a. Gasoline for emergency power generators will be stored in approved containers in the supply locker area on the south side of B and C dormitory complex, near the generator storage.
I. POLICY

A. Disposal of all hazardous/infectious liquid and solid waste shall conform to the appropriate Federal, State and local regulations:

1. BIO-HAZARDOUS LIQUID WASTES
   a. All bio-hazardous liquid waste shall be stored in appropriate containers and removed from the Facility by a State registered materials waste hauler.

2. BIO-HAZARDOUS SOLID WASTE
   a. All bio-hazardous solid waste shall be placed and stored in appropriate double-bagged, bio-hazardous marked containers and removed from the Facility by a State registered materials waste hauler.

II. DEFINITIONS

A. Bio-Hazardous Waste: A waste or combination of wastes, which because of its quantity, concentration or physical, chemical or infectious characteristics may either:

1. Cause, or significantly contribute to, an increase in serious irreversible or incapacitating reversible illness or

2. Pose a substantial present or potential hazard to human health or environment when improperly treated, stored, transported or disposed of, or otherwise managed.

B. Infectious Waste: Laboratory wastes which include cultures of disease causing agents which pose a substantial threat to health due to their volume and virulence:

1. Pathologic specimens, including human or animal tissues, blood elements, excreta and secretions which contain disease causing agents and attendant disposable
fomites.

2. Equipment, instruments, utensils, food containers and other disposable materials, which are likely to transmit disease-causing agents from the rooms of inmates that have been isolated because of, suspected or diagnosed communicable disease.

3. Any other material that, in the determination of the Facility medical staff, presents a significant danger of infection because it is contaminated with, or may reasonably be expected to be contaminated with, etiologic agents.

4. Etiologic Agents - A type of micro-organism, helmink or virus which causes, or significantly contributes to, the cause of increased morbidity or mortality of human beings.

III. PROCEDURE

A. INCIDENTS INVOLVING BIO-HAZARDOUS SPILLS OR POTENTIAL EXPOSURES

1. Any staff member discovering any possible hazardous or infectious waste that may pose a potential hazard to any staff or inmate will attempt to identify what the material is. Identification shall be limited to visual inspection.

2. The staff member will contact the Shift Supervisor and advise him/her of the discovery and the circumstances of the incident if known.

3. The Shift Supervisor shall assess the situation to determine the severity of the hazard and what type of resources will be required.
   a. The Shift Supervisor should make the following considerations:
      - Type of incident
      - Risk of exposure/injury to staff and/or inmates
      - Quantity of waste/size of affected area
      - Availability and response time of outside resources
   b. The Shift Supervisor will determine if the waste material may be reasonably cleaned up by resources within the facility.
      - Considerations for protective equipment shall be made for facility staff and inmate work crews in accordance with Sheriff’s Office Policy 6-3.4 and Appendix 10.
   c. The Shift Supervisor will advise Central Control of the incident and make requests as needed for professional bio-hazard cleaning services.
      - Central Control Staff will contact the current State registered materials waste hauler.
d. All hazardous/infectious waste shall be disposed of only in a double red plastic bag.
   - The Housing Unit Deputy will notify a D.S.W., via Central Control, that there is contaminated trash ready for pickup outside the housing unit.
   - The D.S.W. will pull the contaminated, double red-bagged trash from the housing unit and place it in the special locked bio-hazardous materials container.

e. A professional contractor designated by Contra Costa Health Services shall pick up the material from the special trash box for final disposal.

f. Additional Red Bags may be obtained at the following locations:
   - MDF and MCDF: DSW offices
   - WCDF: Facility Medical offices

B. DISPOSAL OF ETIOLOGICAL AGENTS

1. Medical staff shall identify which inmate rooms are the source of etiologic agents.

2. Medical Staff will notify the Shift Supervisor of any situation requiring the removal of etiological agents.
   a. The Shift Supervisor will advise Central Control to contact the current State registered materials waste hauler.

C. HAZARDOUS/INFECTIOUS WASTE ON INMATE LINENS AND CLOTHING

1. All clothing and/or linen items with hazardous or infectious waste on the item shall be disposed of.
   a. This does not apply to items contaminated with vermin infestations. Refer to CSB Policy 15.08, Contaminated Clothing Bedding and Linen Procedure for additional information.

2. The housing unit inmate workers, wearing protective throwaway gloves and apron, shall hold an open red plastic bag by the unit door.

3. The infectious inmate will deposit their soiled clothing and/or bedding into the bag.

4. The housing unit worker will remove their protective clothing and place them into a doubled red plastic bag.

5. The red bag shall be disposed of in accordance with Procedure A.3.d of this policy.
I. POLICY

A. All inmates will exchange clothing, bedding and linen at least weekly, or as needed, to control the contamination and/or spread of vermin.

B. Contaminated items will be sealed in red plastic bags.

C. Bags containing contaminated articles will be sent to the laundry for cleaning, disinfecting, or disposal.

II. PROCEDURE

A. The following procedures are to be used when handling contaminated clothing, bedding or linen:

1. The medical staff will be notified of all cases of suspected vermin infestation for confirmation and treatment.

2. Inmates in possession of contaminated articles shall have those items replaced in a timely manner.

3. All persons handling contaminated clothing, bedding or linen will wear disposable gloves.

4. The inmate shall place contaminated clothing, bedding and linen in red plastic bags at the time of treatment and clothing exchange.

   a. The bags shall be sealed and marked on the outside as follows:

      - Description of contents (i.e., 2 sheets, 1 blanket, 1 top and pants).
      - Type of contamination (i.e., lice, etc.).
      - Location of recovery (i.e., A Module Cell 1, etc.).
• Sealed bags will then be placed in laundry carts with normally soiled laundry that is destined for the laundry.

• Personnel recovering contaminated laundry shall notify the laundry that contaminated laundry is enroute.

b. The laundry supervisor will evaluate the contaminated articles for either laundering or disposal. To minimize handling, evaluation may in most situations result from reading exterior label.

5. Inmates instructed to handle contaminated articles shall be supervised to ensure compliance with proper safety techniques.

6. An adequate supply of red contamination bags shall be maintained in Booking/ITR, housing units, and the laundry.

7. The bags may be reordered through the Detention Service Worker Office at each facility.
I. POLICY

A. All inmate personal clothing received at the time of intake will be inspected and properly stored and cleaned when required, pursuant to Minimum Jail Standard 1264.

II. PROCEDURE

A. The clothing room clerk will give incoming inmates one hanger style mesh clothing storage bag.

B. Inmates will be instructed to place all clothing into the mesh bag.

C. The clothing room clerk will then inspect the clothing:

1. Acceptable Clothing:
   a. The mesh bag will then be covered with a clear plastic bag.
   
   b. The bag will then be marked with the inmate’s name and booking number, and placed on the appropriate rack.

2. Soiled Clothing:
   a. If the clothing appears to be severely soiled, the ITR/Booking Sergeant will be notified.
   
   b. If the ITR/Booking Sergeant determines the clothing is soiled to the point of being unacceptable for storage with other inmate personal clothing, the clothing shall be placed in a red bag, sealed, and tagged on the outside as follows:

      • Inmate’s name and Booking Number
      • Description of contents.
c. The bagged clothing shall be packaged and released to the inmate’s family or authorized receiving party.

3. Vermin Infested Clothing:
   a. If the clothing is believed to be contaminated with body vermin:
      • Notify the ITR/Booking Sergeant and the medical staff.
      • Upon confirmation from the medical staff that vermin are present, all clothing shall be placed into a red bag, sealed and tagged on the outside as follows:
         • Inmate’s name and Booking Number.
         • Description of contents.
      • The bagged clothing shall be packaged and released to the inmate’s family or authorized receiving party.
I. POLICY

A. Each inmate to be held over 24 hours who is unable to supply himself/herself with personal care items, because of either indigency or the absence of an inmate canteen, shall be issued a hygiene kit.

B. Inmates will not be required to share any personal care items that are not designated for use by multiple inmates. Items that are designed to be used by multiple inmates will be disinfected using supplied materials between uses.

C. Inmates will be allowed freedom in personal grooming except when a valid facility interest justifies otherwise.

D. Inmates, except those who may not shave for reasons of identification in court, shall be allowed to shave daily and receive hair care services at least once a month. The facility administrator may suspend this requirement in relation to inmates who are considered to be a danger to themselves or others or because of facility security concerns.

E. Inmates shall be permitted to shower upon assignment to a housing unit and at least every other day, or more often, if possible.

II. DEFINITIONS

A. Hygiene Kit – A hygiene kit will contain: toothbrush, dentifrice, soap, and a comb.

B. Hair Clippers - Hair cutting device that can be checked out by inmates for the purpose of cutting their hair.

C. Electric razor – Shaving device that can be checked out by inmates for the purpose of shaving.

III. PROCEDURE

A. HYGIENE KITS. Indigent inmates may receive one hygiene kit per week through the inmate commissary program.
1. Each inmate will receive a hygiene kit during the booking process.

2. Additional hygiene kits are available to inmates through commissary.

B. SHOWERS

1. Pursuant to Minimum Jail Standard 1266, deputies will provide shower availability for inmates as follows:

   a. Upon assignment to a housing unit.

   b. When confined to a housing unit, showers are available on a daily basis, during free-time.

   c. Inmates are required to shower a minimum of three times per week.

   d. Water temperature for showers will be thermostatically controlled and set not to exceed 105 degrees Fahrenheit to ensure the safety of inmates.

C. HAIR CARE EQUIPMENT

1. Hair care equipment is purchased using the Inmate Welfare Fund.

2. Each housing unit will be issued one (1) complete set of hair clippers. All hair care equipment will be kept in the storage areas of each housing unit. Housing Units at WCDF with inmate counts exceeding 100 may have two (2) complete sets of hair clippers.

3. At the start of each shift, module deputies will count the number of hair clippers and electric razors and place the count in the Module Notes.

4. All hair care equipment will be stored in the provided container, which will be maintained in a sanitary manner.

5. Hair care equipment will be controlled by the use of an inventory sheet.

   a. The module deputy will ensure that the inmate signs the inventory sheet upon being issued an electric razor or hair clipper. The deputy will also ensure that the inmate signs the inventory sheet upon returning the equipment.

   b. The inventory shall indicate the number and type of items present in the container and will be updated each time a change in container content occurs.

   c. Each time the items are issued, the deputy shall check the container to ensure the issued items are returned.

   d. The deputy will inspect the electric razor or hair clipper for damage or missing parts each time it is returned.
e. The inventory sheet shall be kept in the container until the equipment is issued. The sheet shall be kept in the deputy’s station until the equipment is returned.

f. In the event of a discrepancy in the inventory, the deputy shall notify their supervisor.

g. Any broken hair clippers, electric razors, or removable electric razor parts shall be forwarded to DSW Staff for disposal. All parts will be accounted for.

6. The housing unit deputy is responsible for contacting the Detention Service Worker Supervisor when new equipment is needed.

7. Inmates will be monitored when using hair care equipment.

8. Blatant misuse of hair care equipment by inmates will result in a disciplinary report.

9. The housing unit deputy will complete an appropriate report when equipment is destroyed.

D. HAIR CARE SERVICES

1. Hair Clippers and electric razors shall only be used during free time or prior to going to court. In instances where modules or inmates are locked down for the entire day (eliminating the possibility of free-time) housing unit deputies will allow electric razor use upon the request of inmates, unless inmates are considered to be a danger to themselves or others.

2. Hair cutting supplies will be disinfected after each use.

   a. First, remove foreign matter from the electrical instrument.

   b. Disinfect with an EPA-registered disinfectant with demonstrated bactericidal, fungicidal and virucidal activity used according to the manufacturer’s instructions.

   c. All disinfected electrical instruments will be stored in a clean covered place.

3. After each use, the inmate will clean the electric razor and head and will return the clean electric razor or hair clipper to the module deputy.

4. Bactericide and hair care implements will be secured by the housing unit deputy when not in use.

E. DISPOSABLE RAZORS AND NAIL CLIPPERS

1. Inmates may not possess more than three (3) disposable razors, which are
available for purchase through commissary.

2. Nail clippers are available for use through the housing unit deputy.

3. Administrative Segregation and inmates on observation logs may NOT purchase disposable razors. Electric razors are available for loan through the housing unit deputy.

4. Inmates housed on D, M and Q Modules at the MDF housing units will not be permitted to possess disposable razors.

F. SPECIAL HYGIENE ARTICLES

1. Special hygiene articles (i.e., special soaps, dentifrice, etc.) will be issued by medical staff.

2. Sanitary napkins and tampons for female inmates will be made available upon request.

G. ADMINISTRATIVE SEGREGATION AND DISCIPLINARY INMATES

1. Inmates housed in Administrative Segregation and Disciplinary will be afforded ten (10) minutes to shower and/or shave at least every other day. This time will be in addition to any regularly scheduled recreation time the inmate receives.

2. If requested by an inmate, the inmate shall be afforded reasonable opportunity and time to shave, on days in which they are not scheduled for recreation time, so long as it is in accordance with the operational needs of the facility.

3. Inmates in jury trial shall be afforded the opportunity to shower and shave daily so long as it does not jeopardize the safety and security and/or operations of the module.

## I. POLICY

A. The Custody Services Bureau shall ensure that all inmates with skin or soft tissue infections, or identified with Multiple Drug Resistant Organism colonization or infection shall clean their own cells, associated bedding and furniture on a daily basis.

## II. PROCEDURE

A. Deputies will provide all inmates with skin or soft tissue infections, or identified with Multiple Drug Resistant Organism colonization or infection on a daily basis.

B. Materials

1. Sanitizing Cleaning Agent

2. Disposable cleaning cloths are preferred, but available cleaning cloths within the facility are considered acceptable.
   a. All disposable cloths may be thrown away in a normal garbage receptacle.
   b. Used reusable cloths should be placed in an outgoing laundry container for cleaning.
   c. No cleaning material should be left lying on the housing unit or disinfected area.
   d. New cleaning cloths should be used every day.

C. Inmates will be responsible for applying the product and wiping down the following items within their assigned cell:

1. Bed frames
2. Sink
3. Door knobs
4. All handles
5. Cell Walls

D. Inmates will allow the product to air dry on all surfaces.
I. POLICY

A. The Custody Services Bureau recognizes inmates have certain rights relative to conditions of their confinement.

B. Inmates are recognized to have the following rights:

1. Supervised sleeping accommodations.
2. Clean and orderly surroundings.
3. Adequate toilet, bathing and laundering facilities.
4. Adequate lighting, heating and ventilation.
5. Compliance with federal, state and local fire safety laws and regulations.
6. Basic medical and dental services.
7. Properly prepared wholesome and nutritious diets.
8. Clean and seasonable clothing.
9. Recreation and exercise opportunities.
10. Access to clergy and legitimate religious practices.
   a. Limited only by facility order and security.
11. Visitation with family and friends
12. Confidential visitation with attorneys and representatives
   a. Limited only by facility order and security
13. Confidential correspondence with officials of the court, government authorities, and administrators of the confining authority without fear of reprisal or punitive action

14. Correspondence and telephone privileges

15. Propia Persona (Pro-Per) privileges as granted by local courts

16. Freedom from discrimination based on race, religion, national origin, sex, age, handicap or beliefs

17. Protection from personal abuse, corporal punishment, personal injury, disease, property damage and harassment

18. Protections under the Fourth Amendment of the Constitution of the United States of America when a new offense is suspected

19. To be treated with dignity and respect

20. Personal grooming choices
   a. Limited only by facility requirements for safety, security, identification and hygiene.

21. Access to approved and allowable supplies and services at the inmate’s expense.
   a. Reasonable supplies will be provided to inmates if they are considered indigent.

22. Voting in accordance with local, state and federal election codes.
   a. Inmates may request an absentee ballot registration form via inmate request form to C.A.S.

23. Written grievance procedure that includes at least one level of appeal
I. POLICY

A. Upon entering the facility, all inmates will be provided with a video inmate orientation pursuant to Minimum Jail Standard 1080, in either English or Spanish.

B. The Inmate Orientation video will be shown once per hour in the intake booking areas.

C. Deputies conducting final booking review will ensure that the inmate understands the information contained in the Inmate Orientation and that he/she has no other questions.

D. Inmates will sign for receipt of the orientation following the completion of their booking and prior to their assignment to a permanent housing unit.

E. Deputies will ensure that any inmate with impairments, or inmates who are not fluent in English or Spanish are familiar with the rules and regulations of the facility. Deputies will inform the Shift Supervisor of any inmate that failed to receive a proper orientation so proper arrangement can be made.

F. The following policies and information will be available to all inmates on the housing unit for review:

1. Correspondence, visiting and telephone usage rules
2. Disciplinary procedures
3. Inmate grievance procedures
4. Programs and activities available and method of application
5. Medical services
6. Classification and housing assignments
7. Court appearance information
G. Any information listed above that is not conspicuously posted will be available through the housing unit deputy.

H. All inmates will be responsible for knowing the facility rules and regulations. Violation of any rule may result in disciplinary action. Violation of any local, state, or federal law may result in criminal prosecution.

I. A copy of inmate disciplinary records may be sent to State Prison, parole, probation department, or any other agency upon inmate transfer from any Contra Costa County Sheriff’s facility.

J. Inmate rules are reviewed annually and updated as necessary.

II. DEFINITIONS

A. Contraband: Any item that is not issued by the facility in which the inmate is being housed, has been issued by the facility or purchased through commissary but is not being used for its intended purpose, is a threat to the security of the facility, is in excess, or is no longer in its original form.

III. PROCEDURE

A. INMATE FACILITY ORDERS

1. Inmates are required to:
   a. Obey all verbal and written orders.
   b. Maintain a clean appearance and remain free of offensive odors that are within personal control.

2. Inmates are not permitted to:
   a. Commit any criminal act(s)
   b. Possess contraband
   c. Participate in any action that will endanger the safety of a staff member, visitor, or another inmate
   d. Fight, mock fight, horseplay, or instruct or participate in activities related to martial arts or any other defensive or offensive tactics
   e. Violate the security or proper running of any facility, (includes courtrooms and court holding facilities.)
   f. Be loud or disruptive by yelling, pounding, singing, whistling, etc.
   g. Falsify, alter or remove facility issued identification
   h. Destroy, damage or deface any property not specifically belonging to the inmate
i. Smoke any product

j. Make, possess, drink or be under the influence of any narcotic, drug, intoxicant, non-prescribed medication or abused prescribed medication.

k. Gamble

l. Communicate with visitor unless authorized by the housing unit deputy

m. Communicate with any inmate on another housing unit

n. Litter

o. Speak when transported

p. Engage in sexual activity

q. Be disrespectful to any staff member assigned to or serving this facility

B. INMATE LIVING AREAS

1. Inmates are required to:

a. Follow the directions of the housing unit deputy.

b. Obey all posted “out of bounds” signs.

c. Account for all items in their room.

d. Make their bed and clean their room and living area prior to leaving their room each day.

e. Keep desks placed length-wise against the wall.

f. Report to their rooms and stand facing the inspecting deputy for all formal counts.

g. Store all property in a single drawer or bin provided.

- Items will not exceed the lip level of any drawer or bin.
- Items stored on the floor will be considered contraband.

2. Inmates are not permitted to:

a. Enter a room that is not assigned to them.

b. Change housing assignments without the housing unit deputy’s authorization.
c. Talk through doors during formal counts or any time after 2300 hours.

d. Have room lights on between 2300 and 0600 hours.

e. Create makeshift tables, chairs or shelves.

f. Cover their room lights at any time.

g. Write on, cover, adhere, stick, wedge or hang any item to doors, walls, windows, floors, ceilings, furniture, mirrors, fixtures, vents, or security grating.

- This includes items hanging from bunks that prevent the deputy’s view of the room occupant(s).

h. Place any item on or in room or door windows.

i. Display pictures revealing nudity or sexual acts.

j. Display or possess any gang related drawings, writings or photographs.

C. INMATE POSSESSIONS

1. Inmates may possess the following miscellaneous items in their room:

a. One (1) cup

b. One (1) hairbrush

c. One (1) comb

d. One (1) tube of toothpaste

e. One (1) toothbrush

f. One (1) Medic-Alert bracelet or necklace

g. One (1) address book

h. One (1) facility issued bag of chips (not permitted at MCDF)

i. One (1) piece of fruit (not permitted at MCDF)

j. One (1) facility issued bowl

k. One (1) plastic spoon

l. One (1) personal subscription newspaper

m. Seven (7) books and/or magazines including Bible and necessary schoolbooks. Books will be soft cover only.
1. **Exception**: One hardbound schoolbook per inmate is allowed provided the schoolbook is issued by Schools and is kept in the inmate’s room unless it is being used in a class with the teacher present.

2. No hardbound schoolbooks are allowed on D Module or M Module.

n. Ten (10) of one type of food commissary item
   - Example: 10 candy bars, 10 sodas, 10 bags of chips, etc.
   - Items that cannot be stored within the inmate’s single drawer or bin will be considered contraband.
   - Commissary items that exceed any other restriction within CSB policy (i.e. cups, hairbrushes, etc.) will be considered contraband.

o. Inmate property found to be in excess, damaged or used for any purpose other than its intended use is prohibited and will be confiscated and/or destroyed.

2. **INMATE BEDDING**

   a. Each inmate may possess:
      - One (1) mattress
      - Two (2) blankets
      - Two (2) sheets

3. **INMATE CLOTHING AND LINEN**

   1. Each inmate at MDF will be permitted to possess two (2) of each of the following items:
      a. Towels
      b. T-Shirts
      c. Underwear
      d. Socks
      e. Gold tops
      f. Gold bottoms

   2. Protective Custody (PC) inmates at WCDF will be permitted to possess two (2) of each of the following:
      a. Towel
b. T-Shirt

c. Underwear

d. Socks

e. Lime-green tops

f. Lime-green bottoms

3. Module workers at MDF and inmates at WCDF will be permitted to possess three (3) of each item of the following items:

a. Towels

b. T-Shirts

c. Underwear

b. Socks

e. Gold tops

f. Gold Bottoms

4. Module Workers at WCDF and MCDF will be permitted to possess the following clothing items:

a. Five (5) towels

b. Four (4) t-shirts

c. Four (4) pair of underwear

d. Four (4) pair of socks

e. Three (3) gold tops

f. Three (3) gold Bottoms

g. One (1) sweatshirt (seasonal)

h. One (1) pair Work Boots (MCDF Only)

a. Inmates are required to wear the following clothing while in the housing unit common areas:

- T-Shirt

- Underwear

- Pants
• Sandals/tennis shoes

b. Male inmates may remove their shirts while exercising in the courtyard but must be properly dressed when returning into the housing unit.

c. Inmates will not exit their rooms’ bare-chested or wearing only underwear or wrapped in a towel.

• This includes going to and from showers/restrooms.

d. Baggy clothing and clothing that is worn improperly will be considered contraband and could result in the loss of the particular item and disciplinary action.

• This includes:
  • Altered clothing
  • Clothing not used for its intended purpose
  • Clothing worn backwards or displayed in specific, non-uniform ways.

D. INMATE HOUSING UNIT SERVERY AREAS

1. Inmates may not access any items stored in the servery cabinets without the permission of the housing unit deputy.

2. Inmates not assigned as module workers will not use the facility microwave ovens.

3. Inmates may use and operate the smaller microwave ovens issued by commissary.

E. INMATE RECREATIONAL AREAS

1. Television areas
   a. Television areas will be kept clean or will be subject to removal for up to 24 hours.

2. Games
   a. Games at MDF may be checked out for use in rooms during lock down through the housing unit deputy.

   b. Inmates may not slap or slam dominoes/game pieces, etc., onto any surface.

3. Exercise
   a. Large coordinated group workouts are forbidden. Any coordinated
workouts shall consist of no more than 3 inmates. This does not include sport activities such as basketball, soccer and handball.

F. INMATE TRANSPORTATION and COURT APPEARANCES

1. Inmates are required to:
   a. Follow the directions of the transporting deputy.
   b. Be prepared for the transportation deputy upon their arrival.
      • Any delay of facility movements may result in disciplinary action.
   c. Walk with their hands in the small of their back when being transported.
   d. Face the back of the elevator when being transported between levels.
   e. Remain in a single file line while being transported.
   f. Wear the following clothing before leaving their assigned housing area for any reason:
      • T-Shirt
      • Shirt
      • Underwear
      • Pants
      • Socks
      • Sandals/tennis shoes

2. Inmates are not permitted to:
   a. Speak while being transported.
   b. Obstruct any access or hallway at any time.

3. Inmates are permitted to take the following items to court:
   a. One (1) paperback book
   b. Legal papers
   c. Prescription eyeglasses
   d. Authorized medication with medical blue slip

G. INMATE MEDICATION
1. Inmates will not possess any medication or pills without approval from medical staff.

2. Approval must be in writing on a blue slip.

3. The inmate must possess the blue slip if in possession of any medication.

ISSUE DATE: 01-13-04
REVISION DATE: 09-18-14
REVIEW DATE: 03-26-19
CLEARANCE: PUBLIC

CHAPTER: Inmate Rights, Rules and Discipline
SUBJECT: Inmate Incidents and Discipline

I. POLICY

A. The Sheriff is responsible for the safety, and well-being of all inmates held within the detention facilities operated by the Contra Costa County Sheriff’s Office. Discipline and inmate rules of conduct will be fairly and objectively enforced and shall not be capricious or retaliatory.

B. This policy and procedures in this directive shall apply to all inmates without regard to sex, race, religion or housing status within the Custody Services Bureau. It shall be universally applied and enforced.

C. All criminal acts that violate state or Federal Law will be investigated. Any criminal offenses committed by an inmate in or on jail property are subject to criminal prosecution as well as administrative disciplinary sanctions for violation(s) of facility rules. There is no double jeopardy pursuant to Minimum Jail Standard 1081.

D. Inmates will not be disciplined for circumstances beyond their control.

E. Inmate discipline will not involve the following:
   1. Cruel, corporal or unusual punishment
   2. Denial of health care
   3. Deprivation of clothing, bedding, necessary hygiene or nutritional food unless there are items which pose a direct threat to the safety of the inmate, other inmates, staff or the security of the facility
      a. Items withheld from an inmate must be approved in advance and reviewed every 24 hours by the Facility Commander or Designee.
      b. An incident report must be submitted detailing reasons for the action.
   4. Loss of correspondence privileges (unless violation pertains to correspondence)
5. Delegation of punishment to inmates
6. Placement in a safety cell for disciplinary action
7. Denial of access to Counsel
8. Placement into disciplinary segregation for more than 10 days without new charges and findings
9. Placement in disciplinary segregation for more than 30 consecutive days without the review and approval of the Facility Commander

F. Punitive action shall be directly related to the severity of the rule infraction and prior disciplinary history.

G. The Facility Commander or Designee will review all disciplinary hearing reports and may overturn imposed disciplinary actions if they determine due process was not afforded.

II. DEFINITIONS

A. FORMAL DISCIPLINE-A process that occurs in response to a written incident report and formal disciplinary hearing. Major rule violations and repetitive minor violations require formal discipline.

B. INFORMAL DISCIPLINE-An immediate, corrective action taken by Facility Staff to correct the inmate’s behavior without resulting in a loss of privileges to the inmate. Verbal counseling or reprimand, extra work detail, or removal from a work assignment without losing work credits are actions that can be taken without a written incident report. Single, minor rule violations may be handled through informal discipline.

C. MINOR VIOLATIONS-Rule violations that are not likely to affect the health or safety of other inmates, or staff, or affect the security of the facility.

D. MAJOR VIOLATIONS-Rule violations that are likely to affect the health or safety of other inmates or staff, or are likely to affect the security of the facility.

III. PROCEDURE

A. INFORMAL DISCIPLINE
   1. Deputies are encouraged to use informal discipline whenever a single, minor rule violation has been observed.
   2. Inmates will not be removed from the housing unit as any part of informal discipline.
   3. Deputies will document all informal discipline in the housing unit Redbook Notes and the inmate’s history.

B. FORMAL DISCIPLINE
   1. PRE-HEARING ACTIONS
a. Deputies will submit an incident report whenever major rule violations or repetitive minor violations have been observed.

b. Deputies will not remove an inmate from their assigned housing unless the inmate is disruptive or threatens the safety and security of other inmates or staff and with the approval of the Shift Supervisor.

c. If an inmate needs to be moved from their current housing assignment, the housing Deputy shall determine the following conditions are met:

- The inmate is a direct threat to the safety and security of other inmates, staff or the facility.
- The Sergeant is advised and approves of the housing change.
- The incident report is completed by the end of the reporting Deputy’s shift.
- If the move is solely for disciplinary purposes, the Sergeant must provide the inmate with a disciplinary hearing notification within 24 hours of the incident.

2. REPORTING REQUIREMENTS AND INVESTIGATION

a. Deputies will prepare and complete an incident report prior to the end of their shift in the following circumstances:

- Incidents involving possible criminal acts.
- Incidents requiring an inmate’s immediate inmate housing change prior to a disciplinary hearing.
- When the Reporting Deputy is not expected to return to work within the next 24 hours.

b. Deputies will prepare and submit all other incident reports to the Sergeant within 24 hours of the act being observed.

- This is to include discipline and non-discipline / informational reports of incidents that result in physical harm, or serious threat of physical harm to an employee, inmate or other person.
- Deputies shall not recommend disciplinary action in their report.

c. The Sergeant will begin conducting an appropriate investigation within 24 hours of the time the incident report has been submitted.

- Any exceptional circumstances delaying the investigation must be documented and forwarded to the Facility Commander for review and approval.
3. INMATE DISCIPLINARY HEARING NOTIFICATION

a. After taking the necessary time to complete any required investigation, the Sergeant will provide the inmate with a Disciplinary Hearing Report Form providing the inmate at least 24 hours advanced notice of the scheduled hearing.

   • The Sergeant will advise the inmate of the incident and the specific rules that were allegedly violated.
   • The Sergeant will provide the inmate with an opportunity to request that witnesses, evidence, or records be available at the time of their hearing.
   • The Sergeant providing the notification will be responsible for reviewing and/or collecting the relevant material prior to the inmate's hearing.
   • Relevant material (i.e. incident report) shall be given to the inmate for review, provided no compromise is made in confidentiality or security of any person(s) or the facility.
   • The Sergeant will advise the inmate of their hearing rights and schedule the inmate for a hearing.

b. Inmate Request for Assistance during the Disciplinary Hearing

   • The Sergeant will provide the inmate an opportunity to request assistance relating to the disciplinary hearing.

   • Hearing assistants may be staff members who are not directly related in the incident.
   • An inmate may refuse the offer of any assigned assistant one (1) time. A second refusal will result in no assistant being present.
   • Staff members serving as assistants shall inform the
inmate that all evidence and information developed in the disciplinary process may be used against them in court if the same violation is also being considered for criminal prosecution.

- Staff members serving as assistants shall have full investigative powers throughout the facility.
- An inmate may be used to assist in hearings requiring interpretive skills when no staff representative with similar skills can be arranged.

- The Sergeant should make the following considerations before granting or appointing an assistant:
  - Literacy of the inmate
  - Ability to speak English
  - Complexity of the issues combined with the inmate’s overall intelligence and mental/emotional status
  - Ability to articulate and present the case
  - Location of the inmate in relation to the location of the incident

c. Uncooperative or Non-participative Inmates

- If at any point during the pre-hearing and notification process the inmate refuses to participate by remaining silent or by refusing to sign the necessary paperwork, the Sergeant shall wait 24 hrs before proceeding with the disciplinary hearing.

4. DISCIPLINARY HEARING

a. The Shift Sergeant shall be responsible for conducting all hearings that are scheduled and/or occur on their shift.

b. Sworn staff member(s) who were involved in the incident being heard shall not take part in the hearing process.

c. The Sergeant will conduct an interview with the inmate prior to disciplinary action taking place.

- Inmates charged with rule violations have the right to be present at the hearing, unless they waive that right or the inmate’s presence is considered a threat to the security of the facility.

- Any action that does not permit the charged inmate to be present for the hearing must be documented on the disciplinary hearing report.
d. The Sergeant will explain to the inmate that the disciplinary hearing is an administrative, rather than a judicial process.

- Inmates do not have the right to be represented by a lawyer in an administrative process (*WOLFF V. MCDONNELL 418 U.S. 539, Ohio, Op. 2d 336 [1974]*).

- Formal rules of evidence will not govern the administrative hearing. The sergeant will be responsible for ruling on all issues of relevancy and evidence without formal restrictions.

e. The Sergeant will provide the inmate an opportunity to make a statement and present evidence at the time of the hearing.

f. The Sergeant, inmate, or inmate staff representative may produce any witness or material relevant to the incident at the time of the hearing.

- This request must be made by the inmate prior to the Sergeant scheduling the hearing (at the time of hearing notification).

- In the event that requested witnesses are not available, or in doing so would jeopardize the safety of other inmates, staff or the security of the facility, a written statement may be accepted in their behalf.

  - The Sergeant will document the reasons for the denial for a witness’ physical presence on the hearing report.

5. **DISCIPLINARY HEARING SANCTIONS**

a. The Sergeant, upon hearing all relevant information will make a determination of guilt or innocence and what sanctions, if any, are to be imposed.

b. The Sergeant should consider what sanctions, if any, the inmate may already be under due to previous incidents prior to determining what sanction to impose in the current violation(s).

c. The degree of punitive actions taken by the Sergeant shall be directly related to the severity of the violation.

d. The Sergeant will specify on the hearing form which privileges will be suspended.

e. Sanctions for singular minor violations handled through the formal disciplinary process are limited to the following restrictions per incident:

  - Loss of visiting privileges for up to seven (7) days
  - Loss of commissary ordering privileges for up to seven (7) days
• Loss of correspondence privileges for up to 72 hours if:
  • The incident involves a violation of correspondence rules
  • The Facility Commander may approve additional restrictions of correspondence beyond 72 hours.

• Removal from programs or activities that were scheduled at the time of the incident

• Lock-down for up to 48 hours

• Extra work detail

• Loss of social telephone use for up to seven (7) days

• Transfer from housing unit (with Classification Unit review)

f. Sanctions for major or repetitive minor violations handled through the formal disciplinary process are limited to the following restrictions per incident:

• Loss of visiting privileges for up to 21 days

• Loss of commissary ordering privileges for up to 21 days

• Loss of correspondence privileges for up to 72 hours if:
  • The incident involves a violation of correspondence rules
  • The Facility Commander may approve additional restrictions of correspondence beyond 72 hours.

• Removal from programs or activities that were scheduled at the time of the incident

• Removal from programs for the duration of disciplinary confinement

• Lock-down for up to 10 days
  • Lock-downs may be conducted on any housing unit for up to 10 days.
  • Inmates will receive one hour of free time every other day for any lockdowns which exceed a consecutive forty-eight (48) hour period.
  • Inmates shall be afforded reasonable opportunity to shave daily.

• Placement in disciplinary segregation for up to 10 days
- Loss of social telephone use for up to 14 days
- Loss of good time credits in accordance with PC 4019(c)
- Loss of work time credits in accordance with PC 4019(b)
  - The inmate must be sentenced
  - The offense must be work related
  - The Sergeant conducting the hearing must specifically recommend the action
- Loss of future good time or work time credits for un-sentenced inmates upon sentencing
- Loss of position as facility or housing unit worker for up to 30 days
- Transfer from the housing unit (with classification review)
- Restitution of damages

6. COMPLETION OF DISCIPLINARY HEARING AND FINAL DISPOSITION
   a. The Sergeant will conclude the hearing by completing and signing the disciplinary hearing section of the disciplinary hearing report form.
   b. Prior to imposing punishment or sanctions by the Hearing Officer (Sergeant), the disciplinary actions shall be reviewed and signed off by the Facility Commander or secondary Sergeant assigned to the same or subsequent shift.
   c. Upon completion of the disciplinary actions review, the inmate shall be notified of the disposition without delay, by receiving a copy of the completed disciplinary hearing report form.

7. POST-DISCIPLINARY HEARING
   a. The Sergeant will advise the Housing Unit Deputy of the disposition and sanctions (if any), and provide the Deputy with a copy of the disciplinary hearing report form to be placed on the housing unit log.
   b. The Housing Unit Deputy will update the housing unit log, JMS status board and JMS inmate history in detail.

       - The JMS history will include the following:
         - Incident number
         - Findings
- Sanctions
- Start and end dates of any sanctions
- If the sanctions are consecutive or concurrent to any other sanctions from previous incidents.

c. The Housing Unit Deputy will ensure that all inmates on disciplinary status have inmate history logs properly maintained in JMS.

d. The Sergeant will update the JMS incident report to reflect the final disposition of the hearing, any sanctions imposed and any other notes relevant to the hearing.
  - The Sergeant will approve the report and remove it from the JMS pending hearings status board.
  - The Sergeant will print a copy of the incident report for the lineup board if the incident is relevant to the safety and security of the facility.

e. The Sergeant will ensure copies of the completed disciplinary hearing report form are routed to the following:
  - Inmate booking folder as required by PC 4019.5
  - Housing Unit where inmate is housed
  - Inmate
  - Classification Unit
  - Facility Commander

8. APPEALS TO DISCIPLINARY HEARINGS

a. The inmate has the right to appeal any decision made by the investigating staff member.
  - Appeals procedures can be located in CSB section 2.16.05.
I. POLICY

A. Inmates are entitled to utilize the inmate grievance procedure to resolve disputes and receive a written response in a timely manner without fear of reprisal or punitive action.

B. Any action identified as directly affecting the inmate’s conditions of confinement, may be grievable. Grievance procedures will apply to questions concerning:
   1. Medical care
   2. Conditions of confinement
   3. General classification procedures
   4. General disciplinary procedures
   5. Inmate programs participation
   6. Telephone, mail and visiting procedures
   7. Food, clothing and bedding
   8. Religious preference

II. PROCEDURE

A. INFORMAL GRIEVANCES:
   1. Inmates will attempt to resolve any grievance informally with housing unit deputies or supervising staff prior to submitting a formal written grievance.

B. FORMAL GRIEVANCE GUIDELINES:
1. Inmate Grievances must be submitted within 48 hours of the date of the incident or condition.
   a. ICE Detainees will be allowed to submit inmate grievances within five days of the event that is precipitating the grievance.
2. Inmates will submit all grievances on facility issued Inmate Request Forms.
3. A grievance must be specific and pertain to a single subject matter.
4. Only one (1) grievance per incident per inmate will be allowed.
5. The grieving inmate must be personally involved by the incident/problem.
6. An inmate may not submit a group grievance that represent other inmates, or act as a spokesperson for other inmates.
7. Repetitive grievances on an issue which has already been addressed will not be processed.
8. Grievances that use profanity, threats, or abusive/demeaning language will be rejected.
9. A staff member’s response to a grievance may require more time than the listed time requirements. In such cases, this delay in response is not grounds for a new grievance by the inmate.

C. FORMAL GRIEVANCE PROCEDURE:

1. Inmates must fill out the Inmate Request Form in its entirety to ensure the grievance is handled in a timely manner.
2. Inmates must ensure the grievance is given to a deputy for signature and receipt.
3. Deputies will legibly sign their name and employee number and date all grievances upon receipt and return a receipt to the inmate.
4. Deputies receiving the Inmate Grievance will attempt to resolve the grievance prior to routing.
   a. If the deputy is unable to resolve the grievance within their shift assignment, the deputy will write a brief description of what attempts were made to resolve the issue.
   b. The deputy will forward the grievance to the most appropriate authority capable of resolving the grievance.
      ▪ The deputy will be responsible for routing grievances based on its nature and not whom the grievance is addressed to.
      ▪ The deputy will route all grievances to their shift supervisor in the event they are not able to determine proper routing.
The deputy will write the date and to whom the grievance was routed on the inmate grievance prior to forwarding.

c. A grievance alleging an emergency which threatens an inmate’s immediate health or safety will be responded to immediately by the first line staff member/supervisor who receives the grievance.

5. The staff member investigating the grievance will notify the inmate if it appears the investigation will take more than seven (7) days from the time of submission.

6. The staff member will provide a written response to the inmate stating the final disposition of the grievance.

a. Reasons must be provided if any grievance is denied.

b. Corrective action must be provided if any grievance has been validated.

c. Corrective actions taken against staff members named in any grievance will not be provided.

7. The staff member will place all remaining copies of the grievance into the inmate’s booking.

8. If the inmate is dissatisfied with the level one, line supervisor/first response disposition, the inmate may appeal within three (3) days (Refer to Inmate Appeals Process CSB section 2.16.05)

9. The Facility Commander or Administrative Lieutenant will be responsible for reviewing all grievances upon final disposition.

D. INMATE ABUSE OF THE GRIEVANCE SYSTEM

1. Except for grievances of a medical nature, the Facility Commander or Administrative Lieutenant or designee may restrict excessive, repetitive, and/or frivolous grievances.

a. Grievances filed by inmates for non-productive purposes, including but not limited to, excessive number and previously answered grievances, filed with the intent to overburden staff will be rejected.

b. The word “rejected” will be written on the inmate request slip with an explanation of cause. A copy will be returned to the inmate and a copy placed in the inmate booking folder.

2. Future grievances demonstrating a continued pattern of abuse will result in a memo to the inmate, issued by CAS restricting all grievances, except medical, to one grievance per week. The notice will contain specific reasons for the decision. This notice will not be subject to appeal.
I. POLICY

A. An inmate may appeal informal or formal disciplinary actions, or any grievance disposition.

II. PROCEDURE

A. If an inmate is dissatisfied with the level one, line supervisor/first response disposition of their grievance, the inmate may appeal as outlined below.

1. The inmate must submit the appeal on an inmate request form to the Facility Commander or designee within three (3) days of the disciplinary hearing or grievance disposition being completed.

2. The Facility Commander’s considerations will be based on the following:

   a. Disciplinary Actions
      - The disciplinary hearing process.
      - Evidence relevant to the incident and disciplinary hearing.
      - Proportionate sanctions to the offense(s).

   b. Grievance Dispositions
      - The grievance process.
      - Information and material related to the grievance.

3. The Facility Commander or designee will respond in writing within ten (10) days of the inmate appeal.

   a. Disciplinary sanctions during an appeal will not be stayed.
b. The response will either sustain or overrule the original decision in disciplinary actions.

- Additional sanctions are not permitted.
- In the event the disciplinary decision is overruled, the Facility Commander will determine what steps are reasonable to eliminate the effect of the sanctions.

4. The inmate shall have the right to appeal previous decisions until they have been satisfied or the detention division chain of command has been exhausted. Consecutive appeals for the same incident should be routed to the Division Captain for final review.

5. A copy of the appeal(s) and results will be forwarded to the Facility Commander and the inmate’s booking.

6. The Facility Captain will have final review of all appeals.
I. **POLICY**

A. Deputies will ensure that all inmate requests for service are processed properly and in a timely manner.

B. Inmates shall use an inmate request form to request or provide information or services for the following:

1. Custody status
2. Medical triage requests (in the absence of triage phones)
3. Housing assignments
4. Work assignments
5. Inmate programs and services
6. Legal materials
7. Correspondence discrepancies

II. **PROCEDURE**

A. **INMATE REQUESTS**

1. Inmates should attempt to have their request answered informally prior to submitting a written inmate request.

2. Inmates will submit all Inmate Request Forms to the housing unit deputy.
   
   a. Inmates must fill out the Inmate Request Form in its entirety to ensure the request is handled in a timely manner.

   • Deputies will not route incomplete Inmate Request Forms and
shall return it to the inmate for correction.

b. Inmates must ensure that the request is given to a deputy for signature and receipt.

3. Deputies will legibly sign their name and employee number and date all requests upon receipt and return a receipt to the inmate.

4. Deputies receiving the Inmate Request will attempt to answer the request prior to further routing.
   a. If the deputy is unable to answer the request within their shift assignment, the deputy will write a brief description of what attempts were made to complete the task.
   b. The deputy will forward the request to the most appropriate authority capable of answering it.

   • Housing unit deputies will answer all requests in which the information is available by JMS or through contact with operations staff.
   • The deputy will be responsible for routing requests based on its nature and not whom the request is addressed to.
     • This will prevent unnecessary delay in the inmate request process.
   • The deputy will route all requests to their shift supervisor in the event they are not able to determine proper routing.
   • The deputy will write the date and to whom the request was routed on the Inmate Request Form prior to forwarding.

5. The staff member answering the request will provide a written response to the inmate’s request within two (2) days.
   a. Reasons must be provided if any request is denied.

6. The staff member answering the request will place a copy of the inmate request response in the appropriate housing unit mailroom box. Remaining copies of the inmate request will be placed into the inmate’s booking.
I. POLICY

A. All inmate Habeas Corpus Writs shall be handled and routed to appropriate locations in an expeditious manner.

II. DEFINITION

A. HABEUS CORPUS WRIT: A type of action under California and federal constitutional and statutory law to obtain prior judicial release from illegal restraint or challenge conditions of confinement.

III. PROCEDURE

A. Writ Forms shall be supplied to all inmates, via the, Legal Research Associates (LRA), upon request.

B. Inmates can obtain writ forms by completing an Inmate Request Form and forwarding it to Custody Administrative Services (CAS).

C. Inmates may turn in completed writ forms to any staff member.

D. Staff receiving completed writ forms shall forward them to CAS for appropriate copying.

1. CAS will make three (3) copies and distribute as follows:
   a. One (1) copy will be returned to the inmate.
   b. One (1) copy will be forwarded to Operations for filing in the inmate’s booking file.
   c. One (1) copy will be retained in the CAS Office files.

2. CAS will forward the original writ to the appropriate court via court security inter-office mail.
I. POLICY

A. The Office of the Sheriff encourages correspondence between inmates and persons outside of its detention facilities. The privacy of correspondence between inmates and persons outside of facilities shall not be invaded except as may be necessary to prevent physical injury to persons and to maintain security of Sheriff's Facilities and the community. Mail will be delivered to inmates in an expeditious manner.

II. DEFINITIONS

A. PRIVILEGED CORRESPONDENCE: Mail between an inmate and attorneys, legal aid services, other agencies providing legal services to inmates, or para-professionals having a bona-fide association with such agencies; attorneys, judges, and clerks of federal, state and local courts; public officials and their authorized representatives acting in their official capacities; and the Facility Commander and higher ranking Sheriff's Office Officials.

B. SPECIAL CORRESPONDENCE: Written communications between a Federal Detainee and a private attorney and other legal representatives; government attorneys; judges; courts; embassies and consulates; the President and Vice President of the United States, members of congress, The Department of Justice (including ICE and the Office of Inspector General) the U.S. Health Department; administrators of grievance systems; and representatives of the news media.

C. FOREIGN NATIONAL: Any person not having United States citizenship.

D. DIPLOMATIC REPRESENTATIVE: An official representative of a government who conducts relations with another individual, official, or government.

E. SEXUALLY EXPLICIT MATERIAL: Material including, but not limited to, professional publications, personal photographs or drawings, that shows frontal nudity of either gender, including the exposed female breast(s) and/or the genitalia of either gender. (CCR 3006 (c) (17(a)).)

F. UNSOLICITED COMMERCIAL MAIL: Mail that is not addressed to a specific inmate.
G. MAIL WATCH. A process where a specific inmate's in-coming and out-going mail are inspected for contraband or illegal activity.

III. PROCEDURE

A. GENERAL MAIL PROCEDURES.

1. Policies and procedures governing inmate correspondence shall be made available to all inmates and staff, and shall be reviewed annually and updated as necessary.

2. All mail addressed to inmates will have the inmate's full first and last name (as given at the time of booking) and their booking number written clearly upon the face of the envelope. All received mail will have an identified return address listed upon the face of the envelope.

3. All out-going mail will have the inmate’s full first and last name (as given at the time of booking), their booking number and the address of the facility where they are housed in the return address area of the envelope. Out-going postage paid USPS letters may be sealed by the inmate for mailing.

4. All non-privileged mail for inmates will be routed through the United States Postal Service (USPS). Staff will not accept, nor deliver, mail for an inmate that is not processed by the USPS.

5. Mail that is not addressed to a specific inmate will be returned to the USPS.

6. Envelopes with drawings or markings other than the return address and the name of the addressee will not be accepted.

7. All non-privileged incoming packages and mail addressed to an inmate will be opened and inspected, without the presence of the inmate, before being delivered to an inmate. All non-privileged incoming mail is subject to being read in its’ entirety, or in part, by custody staff before it is delivered. Inmate mail will be inspected and read to locate the following:

   a. Contraband and other unauthorized materials, to include:

      1. Materials that are deemed to be a threat to legitimate penological interests.
      2. Electronic greeting cards;
      3. Padded cards;
      4. Polaroid and double sided photographs;
      5. Hair, body fluids and other biological materials;
      6. Sexually explicit, obscene or pornographic materials and information about where, how, or from whom these materials may be obtained. This includes images that depict frontal nudity
in personal photographs, drawings, magazines or other pictorial format (excluding educational, medical/scientific or artistic materials, including anatomical medical reference books, general practitioner reference books and/or guides, National Geographic magazine, or artistic reference material depicting historical, modern and/or post modern era art textbooks).

7. Small artifacts and items;

8. Plans for blackmail and extortion;

9. Plans to escape or assist in an escape;

10. Plans for activities, which violate the law, these regulations, or local procedures.

11. Coded messages;

12. A description of the making of any weapon, explosive, poison or destructive device.

13. Illustrations, explanations, and/or descriptions of how to sabotage or disrupt computers, communications or electronic devices.

14. Unsolicited commercial mailings such as catalogs, advertisements, brochures and materials whose primary purpose is to sell a product(s) or service(s) and when taken as a whole, lacks serious literary, artistic, political, educational, or scientific value.

15. Maps depicting any area within a ten-mile radius of any detention facility and court.

16. Gambling or lottery materials;

17. Any tobacco product or any tobacco cessation product that contains nicotine.

18. Cellular telephones or other communication devices;

19. Alcohol, prescription drugs, or controlled substances;

20. Items that advocate, encourage, depict, or otherwise condones violence, the use of weapons, gang related activities, or other conduct which jeopardizes jail security.

21. Items that advocate racial, religious, or national hatred or which otherwise contain matter of a character tending to incite murder, arson, riot or any other form of violence.

22. Writing materials, stamps, pens and pencils;
23. Is oversized and not likely to reasonably fit in an inmate’s personal storage drawer/bin.

24. Contain any writing/drawings in crayon, marker or colored pencils.

25. Contain any stains or unidentifiable marks;

26. Hardbound books;

27. Negotiable instruments and cash;

28. Food items.

8. Inmates may correspond, confidentially, with state and federal courts, any member of the State Bar or holder of public office, and the State Board of Corrections. This mail will be identified as privileged correspondence under this policy. Privileged correspondence may be opened only to inspect for contraband, and done so only in the presence of the addressed inmate. Staff may not read privileged correspondence, without permission from the Bureau Commander, who may not delegate this authority.

a. The inmates will write, “Legal mail”, on the front of the envelope signifying the envelope contains privileged correspondence.

b. Outgoing privilege correspondence will be delivered to the mailroom by housing unit staff.

9. Federal Detainees may correspond confidentially with the entities and individuals detailed in the definitions section of this policy. “Special Correspondence” may be opened only to inspect for contraband, and done so only in the presence of the addressed detainee. Staff may not read privileged correspondence, without permission from the Bureau Commander, who may not delegate this authority.

a. The detainees will write, “Special Correspondence” on the front of the envelope contains confidential correspondence.

b. Outgoing “Special Correspondence” will be delivered to the mailroom by housing unit staff.

10. Inmates may correspond, confidentially, with the facility manager. Such correspondence will not require postage, but should be marked "Confidential" on the exterior of the letter. These letters will not be inspected prior to delivery by staff.

11. All inmates are permitted to have unlimited correspondence with their attorney and the courts at their own expense. Indigent inmates will be provided unlimited privileged communications at county expense.
12. There is no limitation on the volume of mail that an inmate may send (at their own expense) or receive. There is no limitation to the number of pages that comprise a letter. Those inmates who are without funds shall be permitted at least two postage paid letters each week to permit correspondence with family members and friends, without limitation on the number of postage paid envelopes and sheets of paper to his or her attorney and to the courts.

13. Inmates may receive correspondence from any non-incarcerated person, in any language. However, the delivery of non-English in-coming mail may be delayed for up to forty-eight hours, until it can be screened by an interpreter.

14. Inmates may subscribe to newspapers, periodicals, and purchase softcover books. All publications shall be sent directly from the publisher or from a recognized internet-based book seller (Amazon.com, BarnesandNoble.com, etc.). Inmate possession of subscription materials are subject to storage restrictions within their housing units.

15. Inmates housed in disciplinary status may have their privileges of receiving magazines, newspapers and photographs suspended by order of the Facility Commander.

16. Inmates are not allowed to correspond with inmates in any other detention facility or prison without the written approval of the Facility Commander.

17. In-coming postage due mail will be refused or returned to the USPS. Inmate authored postage due mail will be returned to the inmate, after inspection, to ensure no contraband is contained in the returned letter.

18. No collect-on-delivery (COD) packages or letters of any kind will be accepted for any inmate.

19. Staff members will not have their personal mail delivered to a detention facility without the permission of the Facility Commander.

20. Authority for the destruction and disposal of mail addressed to a specific person rests with the United States Postal Service (USPS).

21. In-coming controlled mail (registered, certified, FEDEX, etc.) will be handled as standard in-coming mail. If a piece of any in-coming controlled mail is lost, or misplaced, or a problem occurs with a money order, it is the responsibility of the sender to initiate traces and follow-up actions with the USPS or private carrier. The sender is in the best position to initiate tracing activities because the sender paid the fees, completed the forms, and knows the mailing circumstances.

22. Housing unit staff will pick up out-going mail and deliver it to the mailroom at least once per day.

23. Use of inmate mail for business purposes shall be only with the prior written approval of the Facility Commander.

24. Inmates may obtain writing materials and stamps through commissary. Indigent inmates will be provided writing materials and envelopes.
25. All undeliverable mail will be returned to the USPS for forwarding/destruction.

26. All indigent mail will be forwarded to Sheriff’s Fiscal for accounting and postal metering.

27. Foreign nationals held in custody in Contra Costa County Sheriff’s Facilities may write the diplomatic representative of their country of origin, utilizing U.S. Mail. In the case of indigent foreign nationals, where regularly provided postage is insufficient to cover postage to a foreign country, Sheriff’s Fiscal will provide sufficient additional postage to cover the postal costs of such correspondence.

B. MAIL DELIVERY TO FACILITY

1. All mail will be delivered to the Operations Unit of each facility.

2. Facility Commanders are responsible for developing procedures for screening inmate mail at each facility. Only mail for inmates currently housed within any facility will be accepted and screened. Mail for inmates who have changed facilities will be forwarded to them. All mail will be screened following the procedures listed in section (A) above.

3. Mail for inmates who are no longer in custody will be returned to the USPS to return to the original sender.

4. Mail that is refused due to contraband (other than unlawful contraband) will be resealed, refused, and returned to the sender via USPS. The rejected envelope shall be accompanied with the Return of Unauthorized Correspondence Form. Mail that contains unlawful contraband will be given to the Custody Sergeant for reporting.

5. Processing funds received through incoming mail.
   a. Funds to inmates will only be accepted in the form of money orders, cashier’s checks, government checks, and traveler’s checks.
   b. Personal checks or cash will result in the envelope and all its contents being returned to the sender. The rejected envelope shall be accompanied with the Return of Unauthorized Correspondence Form.
   c. Money Orders must be made out to the Contra Costa County Sheriff’s Office and display the inmate’s name and booking number. Money orders that have only first initials instead of a first name will be accepted if there is a legible booking number on the money order.
   d. The account copy of the receipt shall be forwarded with the money to the accounting office, where the money will be credited to the inmate's account.

6. Privileged mail will not be opened or inspected. It will be routed sealed for delivery to the appropriate housing unit.
a. If privileged mail is accidentally opened the staff member will fill out a Write-It-Don’t-Say it form explaining why the mail was opened. A copy of the form will be placed in the inmate’s booking folder and another in the letter and the letter will be re-sealed.

b. The staff member will mark the outside of the privileged envelope with their initials, employee number and date and re-seal the envelope.

c. The third copy of the Write-It-Don’t-Say-It will be forwarded to the Facility Commander.

C. IN-COMING MAIL DELIVERY TO HOUSING UNIT

1. The housing unit deputy is responsible for picking up mail from the facility mailroom at the beginning of each shift

2. The housing unit deputy will distribute mail to all inmates as close to the beginning of the shift as practical.

3. The housing unit deputy will deliver mail to the addressee only and will verify the identity of the inmate prior to delivery.

4. In-coming privileged communications.

a. Housing unit deputies will ensure that privileged correspondence is received unopened from operations. The housing unit deputy will then open the privileged correspondence in front of the addressee.

b. Housing unit deputies will not read the material, but simply inspect the correspondence and it's container for the presence of contraband. If no contraband is found, the correspondence will be provided to the inmate. If, during inspection, contraband is located, both the correspondence and the contraband will be removed from the housing unit. The correspondence will be inspected by the on-duty facility manager who will determine if the correspondence and contraband will be held for further investigation. Privileged correspondence that is not held for evidentiary purposes will be returned to the addressed inmate without delay.

D. OUT-GOING MAIL FROM HOUSING UNITS

1. Housing unit deputies will ensure that all out-going mail meets the requirements of the "General Mail Rules" listed within this section. Housing unit deputies will ensure that all outgoing mail has the inmate’s full name, booking number, housing assignment and facility address affixed upon them. Mail that is not correctly return addressed will be returned to the inmate for correction.

2. Housing unit deputies will stamp all outgoing mail with the “Inmate Mail” stamp.

3. At least once per shift, housing unit deputies will collect and place all outgoing mail into the mail pick-up bin in the mailroom.
4. Out-going mail that is collected in the mailroom will be given to USPS workers each day.

E. MAIL WATCHES

1. A mail watch may be requested using the "Mail Watch Request Form", by the District Attorney's Office, or any Law Enforcement Agency.

2. Mail watches will be approved by the Facility Commander and managed by the Classification Unit.

3. Weekly, the Classification Unit will produce a "mail watch list" for review by all staff members.

4. As in-coming mail is received, and out-going mail processed, it will be forwarded to inmates who are on a mail watch. Identified mail will be forwarded to the Classification Unit.

5. As soon as possible, the mail will be returned to the normal delivery process.
I.  POLICY

A. The Office of the Sheriff recognizes the value of inmate visiting as a means of increasing safety in our facilities, ensuring inmates’ rights to counsel, maintaining family and community connections, and preparing inmates for successful release and rehabilitation. It is the intent of this policy to establish a visiting process that is conducted in as accommodating a manner as possible, subject to the need to maintain order, the safety of persons, the security of the facility, and required facility activities and operations. Visiting will be done in manner that accommodates as many visits and visitors as facility schedules, space, and number of personnel will allow.

B. Each inmate and visitor is responsible for his or her own conduct during visits. Any violation of laws, regulations, or procedures governing visits may result in termination, suspension, restriction, revocation, arrest, or denial of visiting with the person or persons involved. Visitors may be excluded from visiting activities by the Facility Commander because of prior misconduct.

C. Visitors are expected to dress appropriately and maintain a standard of conduct during visiting so that it is not offensive to others and is consistent with the goal of making visiting a safe, positive, and constructive time for families and staff.

D. All regulations pertaining to visiting shall be made available to all visitors, staff and inmates at the time of admission.

E. The privacy of inmates and their visitors shall be respected subject to the need to verify the identity of an inmate or visitor, enforce laws, regulations, and procedures, and/or ensure the safety of persons and facility security. Facility surveillance video-recording devices may be used in visiting areas, excluding areas where confidential attorney consultations occur.

F. Visiting privileges shall be suspended only by order of the Facility Commander or his/her designee, except where the suspension is imposed as part of a formal disciplinary proceeding. Inmates should not be denied access to visits with persons of their choice except when the Facility Commander or designee can present clear and convincing evidence that such visitation jeopardizes the safety and security of the facility or the
visitors. The Classification Unit will be notified of all visiting suspensions.

G. All visits by persons other than those defined as "Official Visitors" in policy section 2.17.09 (Official, Professional, and Program Visitors) will be conducted in non-contact visit rooms/areas, unless otherwise authorized by the Facility Commander.

H. All visitors, regardless of status or profession, are expected to adhere to the rules of conduct.

I. Inmates are eligible to receive at least one hour of visiting each week, not including visits by Professional Visitors, Official Visitors and Clergy Visitors.

II. DEFINITIONS

A. SERVICE ANIMALS: Any animal that is utilized for the purpose of aiding an individual with a disability.

B. EXTENDED VISIT. A visit that is in excess of the regular thirty-minute time allotment for regular visiting. Only the Facility Commander or his/her designee may authorize an extended visit.

C. SPECIAL VISITS: A visit that is requested on a non-scheduled visiting day, upon receipt of a court order, or is of unusual circumstances. Only the Facility Commander or his/her designee may authorize a Special Visit.

III. PROCEDURE

A. ELIGIBILITY

1. All inmates, regardless of classification, are eligible to schedule visits except for the following:

   a. Inmates in Disciplinary Isolation.

   b. Inmates on Disciplinary Loss of Privileges.

2. Inmates in these categories may still receive Official Visitors, other judicial and government visitors, and clergy visits as directed by the Facility Commander.

B. VISITING HOURS

1. Facility Commanders will post approved visiting hours for their facilities that accommodate as many visits and visitors as possible. This will include the days, hours, maximum number of visitors and special rules regarding visitation. Changes or modifications to published visiting hours must be approved by the Division Captain.

C. INTRA-JAIL VISITS

1. When married or immediate family members are housed in the same facility, they may be granted an Intra-jail visit by the Facility Commander. Intra-Jail visits may
be granted under the following circumstances:

a. Both parties are sentenced.
b. Both parties have been in custody for at least thirty days.
c. Neither party has served any disciplinary lockdown or loss of privileges within thirty days from the time of the request.
d. Neither party receives a disciplinary incident report from the time of request to the time of the scheduled visit.
e. At least one party has completed an Inmate Request asking for the visit to take place.
f. Both parties are housed at the same facility.
g. Both parties remain in custody.
h. The Facility Commander is satisfied that a distinct relationship exists between the two parties.
i. Inmates are not co-defendants in a criminal matter.

2. Inmates may be granted one thirty-minute intra-jail visit in a thirty day period. Such visits may (or may not) count toward the inmate’s one-hour eligibility for the week.

3. The visit will be conducted at a time and a location where staffing permits a supervised visit.

D. HOSPITAL VISITS

1. Bedside visits require the prior written approval from the Hospital Security Commander or designee at 370-5330, if the inmate has been admitted to the Contra Costa Regional Medical Center (CCRMC). When an inmate is admitted to a hospital other than CCRMC, the Facility Commander who is responsible for the custody of that inmate must give written approval prior to all visits. No social visitation shall be allowed unless the inmate has been admitted to the hospital.

a. Visits may only be approved during regular hospital visiting hours and follow all other visiting rules as per 2.17.02.
b. Visitors will be required to report to the hospital deputy prior to visiting or making contact with the inmate.

- Failure to contact the Hospital Deputy prior to making contact with the inmate will result in the immediate termination of the visit.
- The Hospital Deputy will verify all visitor identification by ensuring they possess a valid identification.
• Visitors without valid identification will not be permitted to visit with the inmate and will be asked to leave the hospital property.

• The Hospital Deputy will call the MDF Lobby Receptionist to log the visitors’ arrival to the hospital.

• The Hospital Deputy will escort the visitor(s) to the inmate’s location and observe the visit as closely as possible without compromising the security of other inmates in custody.

• Visitors may be searched for contraband including illegal drugs and weapons.

2. Terminal visiting
   a. The Facility Commander or his/her designee may (Providing facility security is not compromised) grant a terminal visit in instances where death is imminent. This is regardless of which hospital the inmate is admitted to, nor to other visiting procedures or rules.
   b. The Facility Commander or his/her designee shall contact the Hospital Security Services to alert them of the approved visit.

E. INMATE VISITORS LIST

1. Inmates may submit a list of up to six names for visiting if one of the following conditions apply:
   a. The inmate has never been previously housed in a Contra Costa County Detention Facility.
   b. The inmate is returning to a Contra Costa County Detention Facility from a non-custodial status.
   c. The inmate has not updated their visiting list in the last year.
   d. The Facility Commander approves a requested change.

2. The inmate will complete and submit an Inmate Visitor List (DET: 080) to the housing unit deputy.
   a. Official and Professional visitors to the inmate do not need to be included on the Inmate Visitor List, unless they are related to the inmate.
   b. Children under 18 do not need to be listed on the Inmate Visitor List; however, all children under 18 must be accompanied by a parent or legal guardian visitor who is listed on the Inmate Visitor List.
   c. All children under 18 must be listed on the inmate’s visit request slip when scheduling the social visits.
F. SCHEDULING VISITS

1. Inmates may request to schedule a visit under the following conditions:
   a. General population inmates are permitted two, thirty-minute visits each week (Monday to Sunday).
   b. Work Crew Inmates and Housing Unit Trustees are authorized three thirty-minute visits each week.
   c. Inmates may schedule their visits consecutively if they wish, however staff will be required to separately enter each 30-minute segment of the visit.
   d. Inmates must complete and submit an Inmate Request Form at least forty-eight hours, but not more than seven days in advance asking for the visit.
   e. Requested date and times will be listed upon the Inmate Request Form.
   f. Inmates who receive discipline that includes loss of privileges between the scheduling and receiving of their visit will have their visit cancelled.

2. Any violation of visiting rules may result in disciplinary action.

3. Inmates transferred to other housing units or facilities, or scheduled to appear in court during their scheduled visit may cause scheduled visiting to be cancelled.

G. EXTENDED AND SPECIAL VISITS

1. Requests for extended and special visits shall be submitted to the Facility Commander via the appropriate chain of command for approval.

2. The inmate’s name may be submitted to the Classification Section for review and recommendation prior to granting or denying the request.

3. Requests for extended and special visits will be reviewed on an individual basis and will take the following into account:
   a. Inmate’s background at the facility.
   b. Visitor’s relationship to the inmate.
   c. Visitor’s reason for the extended or special visit.
   d. Impact on the safety and security of the facility.
   e. Impact on staffing, visiting room availability and other scheduled inmate visits.

H. VISITING RULES - CONDUCT

1. Any violation of the visitation rules and regulations by an inmate may result in
disciplinary action.

2. Visitors are subject to search of their person and/or property. Inspections may include a search of the visitor's person (physical and/or electronic), personal property, and vehicle(s) when there is probable cause to believe the visitor is attempting to introduce or remove contraband or unauthorized items or substances into, or out of, a facility.

3. Visitors will not be forcibly searched unless the visitor is being detained for unlawful actions or activities.

4. All persons under 18 years of age must be accompanied by their parent or legal guardian. Accompanying adults shall ensure that minors remain under their constant control and supervision.

5. The maximum number of visitors permitted to visit an inmate at one time is determined by the individual facility.

6. Infants and toddlers that must be carried are not considered to be visitors.

7. Nursing mothers shall be discreet and covered when breastfeeding their child in the visiting area if necessary. Failure to do so shall result in termination of visiting for that day.

8. Visitors under the influence of alcohol or drugs will not be allowed to visit and may be subject to arrest.

9. It is prohibited or unlawful for social visitors to carry items such as cell phones, pagers, palm or laptop computers, cameras, tape or digital recorders, purses, bags, briefcases, or any other items into the visiting areas. Personal items should be left at home or locked in the visitor's vehicle. Items may also be locked in the public lockers located in the lobby area.

10. Possession of tobacco or tobacco products within the detention facilities is prohibited.

11. No food or drink is permitted in the visiting areas.

12. Visitors are required to proceed directly to their respective visiting areas and to remain there until their visit is completed. Upon completion of the scheduled visit, the visitors must leave the facility.

13. Visitors found visiting an inmate other than the one scheduled shall have their visiting privileges revoked and will be required to leave the facility.

14. There will be no physical contact between visitor and inmate.

15. Visitors may not give articles or gifts to the inmate. Visitors and inmates attempting to exchange or pass any item shall have their visit terminated immediately.

16. When a deputy announces that the visit is over, the visit will end immediately.
17. An inmate may refuse to see any visitor.

18. Inmates are required to submit to search at the request of a deputy.

19. Visitors are not permitted to loiter in or about vehicles in the parking lot. Visitors refusing to comply may be asked to leave and may be subject to arrest. Special consideration will be made to individuals in designated disabled parking spaces when the vehicle operator and/or passenger displays current disabled license plates and/or a disabled persons placard.

20. Any challenge or dispute of facility visiting rules and regulations will be directed to the immediate attention of the custody sergeant.

I. VISITING RULES – DRESS CODE

1. Visitors shall remain fully clothed at all times while in the facility.

2. Appropriate attire includes undergarments; a dress or blouse/bouse/shirt with skirt/pants/or shorts; and shoes or sandals.

3. Prohibited attire consists of:
   a. Clothing that resembles county-issued inmate clothing;
   b. Clothing that resembles law enforcement or military-type clothing, including rain gear;
   c. Clothing that resembles any uniform worn by any department in CSB.
   d. Clothing or garments that:
      • Expose the breast/chest area, genitals or buttocks;
      • By design or by the manner worn, excessively allows the anatomical detail of body parts or midriff to be clearly viewed;
      • Are sheer, transparent or excessively tight;
      • Expose more than two inches above the knee, including slits when standing.

4. Undergarments shall be worn beneath translucent clothing.

5. No clothing or accessories displaying obscene or offensive language, drawings or objects will be allowed inside the facility.

6. No gang related clothing, style of dress or items containing gang related symbols or markings will be allowed inside the facility.

7. No head coverings (except clear, see-through rain gear), and readily removable
wigs or hairpieces. The facility commander, or designee, may grant an exception for a visitor to wear gloves, head coverings, and/or readily removable hairpieces or wigs, based upon verification of need. Written approval for dress code exceptions shall be required prior to visiting and subject to staff inspection during any visit.

8. No gloves or scarves.
9. No coats or jackets.
10. No bathing suits.
11. No overalls or coveralls.
12. No exaggerated hairstyles.

J. VISITORS WITH DISABILITIES

1. Reasonable accommodations shall be afforded visitors and inmates with disabilities to facilitate their participation in the various visiting programs offered by the Office of the Sheriff.
2. Visitors with service animals will be allowed access to the facility and will not be denied the use of their service animal.
3. Visitors may be required to state the purpose of the service animal.
4. Any conflict regarding whether an animal is a service animal shall be resolved by the Facility Commander or his/her designee.
5. Visitors with disabilities, who require assistance, will be escorted to the proper visiting area. Wheelchair-bound visitors will receive priority consideration for the use of the non-contact lobby visiting rooms designated and identified for this purpose.

K. VISITOR REGISTRATION

1. All visitors shall arrive 30 minutes prior to their scheduled visit time.
2. Each adult visitor will complete a visitor form before approaching the Visitor Registration Desk. The registration must be complete, legible and include the following:
   a. Visitor’s name.
   b. Visitor’s address.
   c. Visitor’s date of birth.
   d. Driver’s license number.
e. Inmate name and Booking Number.

f. Visitor’s relationship to inmate.

3. Visitors will approach the Visitor Registration Desk with their completed visitor form and acceptable photo identification. The following are acceptable forms of photo identification:

a. Driver’s license with photo.

b. Department of Motor Vehicles identification card with photo.

c. Picture passport.

d. Armed forces identification card with photo.

e. Picture identification cards issued by the United States Department of Justice.

f. Picture identification cards issued by any foreign government agency that also includes physical descriptors and birth date.

g. Parents and/or guardians of minor children will be required to provide a birth certificate or proof of guardianship of minor children during processing of the initial visit.

- Upon receipt, the Visiting Aide will note the documentation of the birth certificate in the inmate’s visiting file and return the original documents to the visitor.

- The inmate will be responsible for advising the parent or guardian of this requirement prior to requesting the visit.

4. Visitors will return to the waiting area until called by the Visitor Registration Desk.

L. VISITOR CLEARANCE

1. The facility representative managing visitation will:

a. Verify there is a scheduled visit between the visitor and the inmate. If no visit has been scheduled, the visitor will be told so as soon as possible and asked to leave the facility.

b. Verify that the visitor is on the inmate’s visiting list.

c. Conduct a record check on the visitor.

2. The Facility Commander has the authority to approve or disapprove prospective visitors. Reasons for denying a prospective visitor may include (but are not
limited to):

a. The prospective visitor has outstanding arrests/warrants including a Department of Motor Vehicles Failure to Appear notice with no disposition from the court.

b. Prospective visitors who have served any amount of time in a state or federal prison may not visit without the prior written approval of the Facility Commander. Facility Commanders will deny prospective visitors who have any one conviction of the following types of offenses:

- Distributing a controlled substance into or out of a state prison, correctional institution/facility or jail.
- Transporting contraband (weapons, alcohol, escape and drug paraphernalia, etc.) in or out of a state prison, correctional institution/facility or jail.
- Aiding or attempting to aid in an escape or attempted escape from a state prison, correctional institution/facility or jail.

c. Visitors who have been confined in any Contra Costa County Detention Facility during the past six months will not be permitted to visit.

d. The prospective visitor is a co-offender of the incarcerated inmate.

e. The prospective visitor is a supervised parolee, probationer, or on civil addict outpatient status and has not received written permission of his or her case supervisor and the prior approval of the Facility Commander.

f. The identity of the prospective visitor or any information on the visiting questionnaire is omitted or falsified.

3. Once the visitor has been cleared, the facility person managing visitation will contact the housing unit where the inmate is located. The housing unit deputy will be informed of the visit and asked to have the inmate ready for the visit.

4. Visits will then be logged using the JMS System.

5. Once cleared to conduct the visit, at the approved visit time, the visitor will be recalled to the Visiting Desk for entrance to the facility.

M. VISITOR SCREENING

1. Searches of visitors and personal items may include inspection of a wheelchair, implant, prosthesis or assistive device, and use of metal detection devices prior to being allowed entry to visiting.

2. Visitors who refuse to submit to contraband screening will be denied entry.

3. Visitors who appear to be under the influence of a controlled substance,
intoxicated, or otherwise impaired who present a risk to facility security will be denied entry.

4. Visitors who are not appropriately dressed will be denied entry.

5. Visitors under the age of 18 who are not accompanied by an adult will be denied entry.

6. Visitors who have been screened will then be allowed to proceed into the facility for their visit.

N. VISITOR DEPARTURE

1. Visitors will check-out with the Visiting Desk as they depart the facility.

2. All visitors will be logged out from their visit as they depart the facility.
I. POLICY

A. The Office of the Sheriff supports the ability for all inmates confined within its’ facilities to maintain contact with friends, family, and legal representatives. Inmates are to have equal and adequate access to use inmate telephones. The use of the telephone is only one of the means that inmates have to communicate, along with family visitation, written correspondence, and visits with their attorney.

II. PROCEDURE

A. GENERAL TELEPHONE RULES

1. Inmates will not be allowed to use any facility telephone or public telephone on facility property.

2. It is unlawful for an inmate to possess a cellular telephone within any detention facility. (PC 4575)

3. Inmates shall not charge telephone calls to credit cards.

4. Inmates shall not ask the operator to make an emergency interruption of a call.

5. Inmates shall not call inmates at other detention facilities or prisons.

6. Inmates shall not call victims, peace officers, or other persons who have made an official request not to receive telephone calls.

7. Inmates shall not knowingly participate in a forwarded, transferred, or three party calls on an inmate telephone.

8. All calls made on inmate telephones are subject to monitoring and recording at any time. Signs will be posted to indicate this, as well as an announcement on the telephone prior to recording.

9. Restrictions on inmate telephone use may be imposed as a disciplinary sanction.
10. Inmates are responsible for any misuse of telephones.

B. TELEPHONE USE FOR NEWLY ARRESTED INDIVIDUALS

1. The Intake Deputy will ensure that newly arrested individuals are advised and have the opportunity to complete at least three (3) local or collect long distance phone calls during the booking process.

2. The Intake Deputies will ensure that at least two of the three phone call opportunities are provided within three (3) hours after the arrest.

3. Recently booked inmates that have been placed in holding cells shall be afforded the same opportunities to use the telephone.
   a. Exception: Violent arrestees will be permitted to make telephone calls only after it is determined that the individual is no longer a threat to other arrestees, inmates, staff or the security of the facility.
   b. The Intake Deputy will complete and submit an incident report for any delay in complying with this procedure.

C. TELEPHONE USE FOR INMATES ON HOUSING UNITS

1. Inmates on housing units may use the telephone during regular free time hours.

2. The housing unit deputy may limit an inmate’s telephone call to 10 minutes if other inmates are waiting.

3. Inmates will not be permitted to use the telephone immediately prior to any inmate movement from the housing unit.

D. TELEPHONE USE FOR INMATES WITH HEARING IMPAIRMENTS

1. Hearing impaired inmates will be given access to Telephone Devices for the Deaf (TDD) regardless of where the inmate is assigned. TDD phones are capable of working on any housing unit at the Pro-Per Phone Station.

2. TDD devices will be stored on F Module at the MDF and Building 4 at WCDF when not in use.

3. Inmates using a TDD will be provided additional time to use the telephone, as the TDD device slows communications.

E. PRO-PER TELEPHONE USE FOR INMATES

1. Inmates will only use the Pro-per telephone as detailed in CSB Policy 2.18.13, Pro-Per Inmates.
I. POLICY

A. The Office of the Sheriff recognizes the value of inmate visiting as a means of increasing safety in our facilities, ensuring inmates’ rights to counsel, maintaining family and community connections, and preparing inmates for successful release and rehabilitation. It is the intent of this policy to establish a visiting process that is conducted in as accommodating a manner as possible, subject to the need to maintain order, the safety of persons, the security of the facility, and required facility activities and operations. Visiting will be done in manner that accommodates as many visits and visitors as facility schedules, space, and number of personnel will allow.

B. All visits by persons other than those defined as "Official Visitors" will be conducted in non-contact visit rooms/areas, unless otherwise authorized by the Facility Commander.

C. Official, Professional, and Program visitors are not permitted to be social visitors unless they are granted approval from the facility commander.

D. All visitors, regardless of status or profession, are expected to adhere to the rules of conduct identified in this policy.

E. Each inmate and visitor is responsible for his or her own conduct during visits. Any violation of laws, regulations, or procedures governing visits may result in termination, suspension, restriction, revocation, arrest, or denial of visiting with the person or persons involved. Visitors may be excluded from visiting activities by the Facility Commander because of prior misconduct.

F. Visitors are expected to dress appropriately during visiting so that it is not offensive to others and is consistent with the goal of making visiting a safe, positive, and constructive time.
G. All regulations pertaining to visiting shall be made available to all visitors, staff and inmates at the time of admission.

H. The privacy of inmates and their visitors shall be respected and is subject to the need to verify the identity of an inmate or visitor, enforce laws, regulations, and procedures, and/or ensure the safety of persons and facility security. Facility surveillance video-recording devices may be used in visiting areas, excluding areas where confidential attorney consultations occur.

I. Visiting privileges shall be suspended only by order of the Facility Commander or his/her designee.

J. All personnel assigned or visiting the Custody Services Bureau as a condition of their professional duties will display an authorized CSB photo badge or CSB visitor badge prior to entering any secure area of the detention facility.

II. DEFINITIONS

A. CLERGY: Ordained person in a religion as a profession. Clergy members generally visit inmates at the request of a family member or inmate request and shall visit the inmate in the same manner as the general public during regular visiting hours. All Clergy visits are scheduled by the Facility Chaplain, and CAS will add details pertaining to the type of visit on the clearance list.

B. CHAPLAIN VOLUNTEER: Individuals who provide group religious studies or services in the facility and are not paid as a profession. These group sessions are scheduled by the Facility Chaplain and are conducted in a contact visit room. No individual contact visits are allowed between an inmate and a chaplain volunteer.

C. OFFICIAL VISITORS. Inmate visitors who are active law enforcement officers performing an investigation, active probation and parole agents performing their duties, California licensed medical doctors, psychiatrists, psychologists, attorney of record on an active criminal case, or California attorneys working in their official capacity (with court documentation), “Out of State” Attorneys practicing immigration law or Law Students identified on EIOR 27 or 28 being they provide a valid copy, may act as “Official Visitors.”

D. OUTSIDE LAW ENFORCEMENT AGENCY VISITOR. Law enforcement officers who are performing official investigations or are guests of CCCSO facility staff.

E. PROFESSIONAL. A person engaged in a specified activity as a paid occupation.

F. PROFESSIONAL VISITORS. Public Defender Investigators (Level I); Private Investigators; Legal Runners; Paralegals; Law Clerks; Professional Interpreters; Notaries; ICE Legal Assistants (without EIOR 27 or 28 documentation); and Agents working on behalf of the government or the court.

III. PROCEDURE

A. VISITING HOURS
1. Official Visitors shall be allowed to enter Contra Costa County Detention Facilities to meet with inmates at any time, unless an emergency situation exists in the facility.

2. An attorney on official business who is entitled to practice in the California Courts, who represents the inmate or who is considering the inmate’s representation, may at the request of an inmate or relative of an inmate, visit the inmate as soon as practical.

3. Professional visitors will be afforded non-contact visits during normal visiting hours upon approval of the Facility Commander or his/her designee. Normal visiting hours are posted in the lobby of each facility and outlined in CSB policy 2.17.02.

B. OFFICIAL AND PROFESSIONAL VISITORS

1. Official Visitors are afforded unscheduled contact visits with inmates any time to ensure privacy and confidentiality (dependent upon the emergency and/or operational needs of the facility).

2. Professional Visitors are afforded unscheduled non-contact visits during regular social visiting hours (Excluding Notaries).

3. Notaries must schedule an appointment during designated days/times 24 hours in advance through CAS. Refer to CSB Policy 2.18.12 Notary Public Services.

4. Subject to verification, Professional visitors may be permitted contact visits if they are accompanied by an Official visitor.

5. Official and Professional visitors must be escorted through any secure area of the facilities by Sheriff’s Office staff.

   a. Secure areas are identified as:

      • MDF – Inside of the building, excluding the lobby and 2nd floor hallway and visit areas.

      • WCDF – Inside the administration building (Bldg. 1) and inside of locked housing units (bldgs. 4-8).

      • MCDF – Anywhere inside the fenced perimeter of the facility.

6. Official and Professional visitors and ICE legal assistants (with approval) may remain in the facility regardless of facility mealtimes, facility counts, or non-emergency lockdowns.

   a. Any meals missed during Official and Professional visits shall be saved and served to the inmate as soon as possible after the visit, per CSB policy 2.08.44 (Inmate Meal Service).

      • If requested by the inmate, he or she may take his/her meal into the Legal/Professional visit.
7. Official and Professional visits may be suspended, and the visitor(s) asked to leave the facility due to an emergency situation, upon direction of the on-duty facility manager.

8. Official and Professional visitors may not give anything to an inmate without having the item first inspected by the housing unit deputy.

9. Official and Professional visitors are prohibited from bringing in any electronic or digital devices without prior approval of the Facility Commander or his/her designee.

10. The attorney of record, attorneys working in their official capacity (subject to verification), and Investigators (with court order and Facility Commander approval) will be permitted to bring electronic devices into the detention facilities for the sole purpose of viewing digital media directly related to the inmate’s current case.
    
    a. Electronic devices may be examined at the time of check in and at the request of any deputy sheriff at any time.
    
    b. The attorney will be informed that they are not permitted to use any electronic device to access the Internet while inside the detention facility, unless it is directly related to the inmate’s case.
    
    c. Inmates are not permitted to manipulate or possess any device brought in by Official or Professional visitors.
    
    d. Any violation of policy or misuse of an electronic device will be grounds to terminate the visit and revoke the attorney’s future privilege of bringing an electronic device into Contra Costa County detention facilities.

11. Official and Professional Visitors are subject to searches of their person and property. Papers clearly marked as “Legal” may be searched but not read by staff.

12. The Public Defenders Office may provide to CAS a list of pre-designated investigators in the job classification of “Public Defender Investigator II,” who will be afforded Official Visitor privileges. It is the duty of the Public Defenders Office to provide documentation as to the current grade level of their designated investigators.
    
    a. The list of pre-designated Public Defender Investigators (Level II) shall not exceed 12.
    
    b. Annually, the CAS Unit will contact the Public Defender's Office and request an updated listing of pre-designated "Public Defender Investigators (Level II)." The Public Defenders Office will submit a listing of those employees (maximum 12), on Department Letterhead, signed by the Public Defender.
c. Pre-designated Public Defender Investigators (Level II) are required to submit a clearance application and will be allowed visitation only after approval by the CAS Lieutenant or his/her designee.

d. It is the responsibility of the Public Defender's Office to provide any "out of cycle" additions or deletions to this listing in writing to the CAS Office.

13. The Conflict Resolution Panel/Alternate Defenders Office (ADO) may provide to CAS a list of pre-designated private contracted investigators who will be afforded Official Visitor privileges.

a. The list of pre-designated private investigators shall not exceed 12.

b. Annually, the CAS Unit will contact the ADO and request an updated listing of pre-designated private investigators. The ADO will submit a listing of those contractors (maximum 12), on Department Letterhead, signed by the ADO Director.

c. It is the responsibility of the ADO to provide any "out of cycle" additions or deletions to this listing in writing to the CAS Office.

14. Professional visitors and pre-designated ADO private investigators will be required to submit documentation identifying them as representing an attorney or government agency to provide services within any of the Contra Costa Detention Facilities.

a. Documentation must include the following:

   • Attorney or law firm letterhead.
   • Name of person providing services.
   • Title of person providing services.
   • Name of Inmate.
   • Case Number.
   • Purpose of visitation.
   • If visitation is related to an ADO case, the documentation must indicate so.

b. The document will be delivered to Custody Administrative Services office.

c. “Official Visitor” privileges for pre-designated ADO private investigators only apply to the case identified in the document received by CAS.

d. Professional visitors and pre-designated ADO private investigators are required to submit a clearance application and will be allowed visitation
only after approval by the CAS lieutenant or his/her designee.

C. CLERGY VISITS

1. Inmates will be allowed as many clergy visits as possible each week.

2. Only clergy members who appear on the Facility Clearance List will be granted admission to Contra Costa County Detention Facilities.

3. Clergy members designated as “Cleared for individual contact visits” on the clearance list will be allowed contact visits when scheduled by the Facility Chaplain.

4. Clergy members designated as “non-contact Clergy” on the clearance list will be allowed non-contact visits on an individual basis and contact visits in scheduled group meetings scheduled by the Facility Chaplain.

5. All Clergy visits are to be scheduled by the Facility Chaplain and updated on the clearance list by CAS.

6. Clergy members, who do not appear on the Facility Clearance List, will be referred to the Facility Chaplain and the Custody Administrative Services Office for clearance, prior to admission.

7. The Facility Chaplain is responsible for obtaining written permission from the Facility Commander for the conduct of group meetings that require the use of contact visit rooms. The Facility Chaplain will give a copy of the monthly program schedule to the Facility Commander, Inmate Services Director, Operations Sergeant, CAS and the Lobby Aides.

8. Clergy visitors may not give anything to an inmate without having the item first inspected by the housing unit deputy or the Facility Commander.

D. HOSPITAL VISITS

1. Professional and Official visits in any hospital may only be approved during regular hospital visiting hours and follow all other visiting rules as outlined in this policy (2.17.09).

2. Professional and Official Visitors will be required to report to the hospital deputy prior to visiting or making contact with the inmate.
   a. Failure to contact the Hospital Deputy prior to making contact with the inmate will result in the immediate termination of the visit.
   b. The Hospital Deputy will verify the identity of all visitors by ensuring they possess valid identification.
   c. Visitors without valid identification will not be permitted to visit with the inmate and will be asked to leave the hospital property.
   d. The Hospital Deputy will call the MDF Lobby Receptionist to verify the
visitor status (Professional or Official) and to log the visitors’ arrival to the hospital.

e. The Hospital Deputy will escort the visitors to the inmate’s location and observe the visit as closely as possible without compromising the security of other inmates in custody.

f. Visitors may be searched for contraband.

3. Terminal visiting

a. The Facility Commander or his/her designee shall (Providing facility security is not compromised) grant a terminal visit in instances where death is imminent. This is regardless of which hospital the inmate is admitted to, nor to other visiting procedures or rules.

b. The Facility Commander or his/her designee shall contact the Hospital Security Services to alert them of the approved visit.

E. MEDICAL, MENTAL HEALTH, MAINTENANCE, SCHOOLS, PROGRAMS VISITOR

1. These visitors must be escorted throughout the facility by the corresponding group staff assigned to the facility.

2. These visitors may access the facility unescorted with prior approval of the Facility Commander, and as designated by the facility clearance list.

3. These visitors must have permission from the housing unit deputy prior to accessing the housing unit.

4. These visitors must sign in and display the visitor badge issued to them visibly on the upper torso at all times while in the facility.

F. IN-CUSTODY DEATH VISITOR

1. These professional visitors must sign in and display the visitor badge issued to them visibly on the upper torso at all times while in the facility.

2. These professional visitors shall be given unrestricted access to the facility within the scope of their investigation duties.

G. VISITING RULES - CONDUCT

1. Any violation of the visitation rules and regulations by an inmate may result in disciplinary action.

2. Visitors are subject to search of their person and/or property. Inspections may include a search of the visitor's person (physical and/or electronic), personal property, and vehicle(s) when there is probable cause to believe the visitor is attempting to introduce or remove contraband or unauthorized items or substances into, or out of a facility.
3. Visitors will not be forcibly searched unless the visitor is being detained for unlawful actions or activities.

4. Searches of visitors and personal items may include inspection of a wheelchair, implant, prosthesis or assistive device, prior to being allowed to visit with an inmate.

5. Visitors under the influence of alcohol or drugs will not be allowed to visit and may be subject to arrest.

6. Unless authorized, it is prohibited or unlawful for visitors to carry items such as cell phones, pagers, tablet or laptop computers, cameras, tape or digital recorders, purses, bags, briefcases, or any other items into the visiting areas. Personal items should be left at home or locked in the visitor's vehicle. Items may also be locked in the public lockers located in the lobby area.

7. Possession of tobacco or tobacco products within the detention facilities is prohibited.

8. No food or drink is permitted in the visiting areas.

9. Visitors are required to proceed directly to their respective visiting areas and to remain there until their visit is completed.

10. Visitors found visiting an inmate other than the one scheduled shall have their visiting privileges revoked and will be required to leave the facility.

11. There will be no physical contact between visitor and inmate.

12. An inmate may refuse to see any visitor.

13. Any challenge or dispute of facility visiting rules and regulations will be directed to the immediate attention of the custody sergeant.

H. VISITING RULES – DRESS CODE

1. Visitors shall remain fully clothed at all times while in the facility.

2. Appropriate attire includes undergarments; a dress or blouse/shirt with skirt/pants/or shorts; and shoes or sandals.

3. Prohibited attire consists of:
   a. Clothing that resembles county-issued inmate clothing;
   b. Clothing or garments that:
      - Expose the breast/chest area, genitals or buttocks;
      - By design or by the manner worn, excessively allows the
anatomical detail of body parts or midriff to be clearly viewed;

- Are sheer, transparent or excessively tight;
- Expose more than two inches above the knee, including slits when standing.

4. Undergarments shall be worn beneath translucent clothing.

5. No clothing or accessories displaying obscene or offensive language, drawings or objects will be allowed inside the facility.

6. No gang related clothing, style of dress or items containing gang related symbols or markings will be allowed inside the facility.

7. No head coverings (except clear, see-through rain gear), and readily removable wigs or hairpieces. The facility commander, or designee, may grant an exception for a visitor to wear gloves, head coverings, and/or readily removable hairpieces or wigs, based upon verification of need. Written approval for dress code exceptions shall be required prior to visiting and subject to staff inspection during any visit.

8. No exaggerated hairstyles

I. VISITOR REGISTRATION

1. The registration must be complete, legible and include the following:

   a. Visitor’s name.
   b. Inmate name and Booking Number
   c. Purpose of visit

J. VISITOR DEPARTURE

1. Visitors will check-out with the Visiting Desk as they depart the facility to sign out and return the visitor badge.
I. POLICY

A. Revenue generated from inmate activities such as collect telephone calls, commissary purchases, etc., will be deposited in the Inmate Welfare Fund (IWF).

B. The Sheriff will expend IWF monies primarily for the benefit, education, and welfare of the inmates confined within Contra Costa County Detention facilities.

C. Funds determined by the Sheriff to be above that level may be expended for maintenance of facilities.

D. Maintenance includes, but is not limited to, the salary and benefits of personnel used in the programs primarily to benefit the inmates including such areas as education, drug and alcohol treatment, welfare, library, accounting, and other programs deemed appropriate by the Sheriff.

II. PROCEDURE

A. The Sheriff, with the recommendation and counsel of the IWF Committee, will administer all IWF activities.

B. The IWF Committee includes the Custody Services Bureau (CSB) Assistant Sheriff, and at-large public members. The public members shall serve terms of one year, commencing on January 1 and ending on December 31 of each year.

C. The Sheriff or his designee will automatically renew public member service terms unless a resignation has been received.

D. Voting members will include:

1. The chair – CSB Assistant Sheriff or designee

2. At-large public members

E. The Detention Division Captain responsible for IWF matters will either be a voting or
non-voting member depending upon the direction of the CSB Assistant Sheriff.

1. If he/she acts as a voting member, the CSB Assistant Sheriff will abstain from voting.

F. Non-voting members include:

1. Director of Inmate Services, and
2. Inmate Welfare's Administrative Assistant III

G. A majority of voting members of the IWF Committee will constitute a quorum necessary to transact business.

H. The IWF Committee will:

1. Hold quarterly meetings during the months of January, April, July, and October.
   a. Special meetings will be called when deemed necessary to deal with pressing or priority issues.
   b. All meetings will be announced in advance.
   c. An agenda will be prepared and Roberts Rules of Order will prevail. Summary notes will be recorded and distributed to IWF Committee members and the Sheriff.

2. Review and make recommendations to the Sheriff regarding, but not limited to, the following:
   a. Each February, a proposed IWF budget for the next fiscal year.
      • All programs are to present their requests at the January meeting, time permitting.
      • This budget will be submitted by the CSB Assistant Sheriff to the Sheriff for final approval.
   b. Commissary prices, the sale of commission or non-commission commissary items after approval by Facility Commanders, and weekly commissary spending limits (raw materials purchased for handicrafts are excluded from this limitation).
   c. The award of all contracts involving IWF
   d. Accounting practices and procedures
   e. Expenditures for non-mandated programs and purposes that benefit the inmates, or are for associated maintenance costs.
   f. Review and approve the annual IWF fixed asset inventory. Acknowledge the loss of any IWF tagged item and report such loss, in writing, to the
Sheriff.

I. The CSB Assistant Sheriff will:

1. Represent the Sheriff and approve all IWF expenditures
   a. This includes signing all purchase orders or work requests chargeable to the IWF.
   b. This may be delegated to the Detention Division Captain responsible for IWF matters.

2. Maintain the Sheriff’s Contingency Fund (organization number 2483) and approve all emergency and/or unfunded expenditures for the contingency fund.
   a. Such emergency and/or unfunded expenditures will be reported to the IWF Committee at its next regular meeting.

J. The Detention Division Captain responsible for IWF matters will:

1. Ensure IWF Committee meetings are held on a regular basis (quarterly) and emergency basis (when required)

2. Ensure agendas are prepared for all scheduled and emergency IWF Committee meetings

3. Ensure a quorum of IWF Committee is present prior to voting on any IWF related matters

K. The Director of Inmate Services will:

1. Act as the IWF Committee’s Executive Secretary

2. Notify IWF Committee members of all meetings, including regular quarterly and/or special meetings

3. Take and distribute IWF Committee meeting summary notes to all members of the committee

4. Maintain copies of all IWF Committee documents

5. Develop and manage all contracts chargeable to the IWF

6. Ensure program managers submit a proposed annual expenditure budget to the CSB Assistant Sheriff no later than December 15 of each year
   a. Budget input will include funds for operational expenses such as professional services, office supplies, books or periodicals, equipment rentals, travel, and for capital items (items costing $5,000 or more with a life of three years or more).
   b. Based upon this budget input, the Director of Inmate Services will prepare
and submit an annual budget for IWF Committee review.

- This will include recommendations to balance the proposed budget if expenditures exceed planned revenue.

7. Prepare and submit to the CSB Assistant Sheriff an annual projection of IWF revenue no later than December 15 of each year.
   a. Revenue is comprised of all monies and property generated from the following sources:
      - Inmate telephone commissions
      - Commissary sale commissions
      - Inmate industries
      - Inmate hobby-craft sale activities (when authorized)
      - Other miscellaneous activities such as recycling, and other activities authorized by the Sheriff.

8. Review, initial, and forward all IWF expenditure documents (i.e. demand forms, requisitions, TC-52’s, etc.) to the CSB Assistant Sheriff or his/her designee.

9. Ensure indigent inmates (as defined in CSB Policy 2.15.03) are provided, at time of release, with commercial land transportation tickets for transportation to their area of residence within the County, or, if they are residents of an adjacent County, to the closest BART or AC Transit station in that County.

10. Ensure the Senior Clerk responsible for Detention Division procurement maintains file copies of all purchase orders and similar documents chargeable to the IWF.

11. Conduct an annual physical inventory of all IWF fixed assets and maintain the IWF fixed asset inventory database.
   a. The results of the annual inventory including any missing items will be submitted to the IWF Committee for review.
   b. Capital items will be assigned a permanent IWF tag number and entered into the IWF inventory database.
   c. Capital items will be actively managed/tracked for their entire life cycle (i.e., until disposed).
   d. Non-capital items of a durable nature, with a value exceeding $500, will be assigned a permanent IWF tag number and entered into the IWF inventory database.
   e. Non-capital items will be actively managed/tracked for five years from date of acquisition.
f. Furniture will not be tagged; however, it will be entered into the IWF inventory database.
   - Furniture will be managed/tracked for its entire life cycle (if $5,000 or more), or for five years from date of acquisition if under $5,000.

12. Prepare and submit in January of each year an itemized report of all IWF revenue and expenditures of the previous fiscal year.
   a. This report will be submitted to the Sheriff via the chain-of-command for review, approval, and distribution to the Contra Costa County Board of Supervisors.
   b. Copies of this report will be provided to the IWF Committee.

13. Ensure the IWF is audited by the County Auditor-Controller on a bi-annual basis.

14. Ensure all revenue generated from inmate activities (exception is revenue generated by Inmate Industries at WCDF) is forwarded to the Sheriff’s Fiscal Officer located at 651 Pine Street, Martinez, CA.
   a. Vendor commission checks will be made payable to the Contra Costa County Sheriff’s Office – IWF.
   b. The assigned Account Clerk will process all revenue generated from Inmate Industries at WCDF.
      - This individual will prepare IWF deposit documentation for submission to the Sheriff’s Fiscal Officer.

15. Ensure program managers submit quarterly activity reports to the CSB Secretary
   a. The Director of Inmate Services will prepare and distribute a Quarterly Program Activity Report to the following individuals:
      - Sheriff
      - Undersheriff
      - CSB Assistant Sheriff
      - Detention Division Captains
      - Facility Commanders
      - Administrative Lieutenants
      - Program Managers
      - Inmate Welfare Fund Committee Members
I. POLICY

A. It is the policy of Custody Services Bureau to ensure that programs and services are available to inmates may include, but are not limited to, social services, religious services, library services, recreational and leisure time activities, educational services, and vocational training services.

B. Inmates will be afforded equal opportunity to participate in services and programs regardless of their race, religion, national origin, color, creed, sex, economic status, political belief, or disability.

II. PROCEDURE

A. The establishment, coordination, scheduling, and monitoring of inmate programs is the responsibility of the individual program managers with direction and coordination from the Director of Inmate Services.

1. Each staff member is expected to assist in this endeavor by forwarding both positive and negative comments about existing programs, suggestions for improvement, and ideas for additional programs to the CSB Assistant Sheriff who has final approval in all such matters.

B. The Director of Inmate Services will:

1. Establish, coordinate, schedule, and monitor inmate programs (except medical and mental health programs).

   a. Facility Commanders and Detention Division Captains are expected to assist in this effort by forwarding to the CSB Assistant Sheriff both positive and negative comments about existing programs, suggestions for improvements, and ideas for additional programs or services.

   b. Final authority for new programs rests with the CSB Assistant Sheriff after obtaining further recommendations from the IWF Committee.
2. Ensure a schedule of program activities is posted in each inmate housing unit and made available to staff as necessary.
   a. Information regarding new programs will also be made available to both staff and inmates as they are developed and implemented.
   b. Programs generally will be offered between 8:30 – 11:30 a.m. and 1:30 – 4:30 p.m. daily Monday – Friday.
      • Due to its transitory nature, the Intake area will normally not have programs offered.
      • The Chaplain will respond to Intake at the request of custody staff to handle specific outside problems that might affect an inmate’s adjustment to custody.
      • Inmates assigned to specialized Housing Units who are otherwise eligible to participate in general programs, will be offered an opportunity to do so, to the extent possible, on the Housing Units.

3. Ensure that all program volunteers adhere to Sheriff’s Office Policy and Procedure 2.17.09 regarding bringing any unauthorized item(s) into the facility.
   a. Exceptions will be clearly noted on the clearance list
   b. All necessary copies will be made for the program volunteers at no cost and will be placed in predesignated locations inside the facility.

C. Custody staff will:
   1. Limit or discontinue a specific program or volunteer if they present a threat to the security or safety of the facility, staff, inmates or themselves.
   2. Generate an incident report containing all pertinent information if a specific volunteer or volunteer program poses a threat to security.
      a. The report will be forwarded to the CSB Assistant Sheriff via chain of command, with a copy to the Director of Inmate Services for investigation and disposition of the incident.
      b. Facility Commanders maintain the right to curtail, postpone, or discontinue the services of a volunteer or volunteer organization at his/her discretion.
         • The Director of Inmate Services, Detention Division Captain and the CSB Assistant Sheriff will be notified in writing of any action taken.
   3. Forward all Inmate Request Forms to the appropriate program (i.e., request for educational class consideration would be forwarded to the Schools Program Director).

D. The Senior Librarian will:
1. Provide a variety of recreational reading material to meet the interests and needs of inmates.

2. Provide a variety of reference material for centralized use.

3. Provide informational services as it pertains to library resources or to locate facts needed.

4. Ensure recreational reading material is available on library shelving in each inmate Housing Unit at MDF and MCDF and that stock is rotated on a frequent basis.

5. Report security or safety issues directly to the applicable Facility Commander.

6. Coordinate other library issues with the Director of Inmate Services.

E. The Law Librarian will:

1. Provide access to a law library at WCDF and MDF.

2. Provide inmate pro-per privileges as outlined by Contra Costa County Superior Court. Refer to CSB Policy and Procedure 2.08.14, Pro Per Inmates.

3. Provide limited duplicating service at WCDF and MDF for inmates requesting legal assistance.

F. The Schools Director will:

1. Ensure all IWF-approved full-time and part-time instructors (Sheriff’s Office contract with the Contra Costa County Office of Education) are available to provide academic and vocational courses within the Detention Division.

2. Ensure the educational program reflects the needs of the inmates and will include, at a minimum, basic education courses, general education development courses, and basic survival courses.

3. Ensure academic and vocational instruction is provided to groups or individuals depending on inmate interests, class size, security considerations, etc.

   a. Dedicated classroom locations are available at WCDF and MCDF. Due to building configuration, the MDF is more suitable for independent study.

4. Establish eligibility for education services based on inmate needs and abilities, class size, length of sentence, security considerations, etc.

5. Ensure current class schedules are posted in all inmate Housing Units.

6. Arrange interviews for inmates expressing an interest in attending classes.

7. Remove inmates from class for non-excused absences or inappropriate behavior.
8. Report directly to the Contra Costa County Office of Education for supervision.

9. Report security or safety issues directly to the applicable Facility Commander.

10. Coordinate other school issues with the Director of Inmate Services.

G. The Senior Chaplain will:

1. Ensure all IWF-approved full-time and part-time staff (Sheriff’s Office contract with Bay Area Chaplains) is available to provide agreed counseling and chaplain services within Detention Division.

2. Arrange for the conducting of services and counseling by representatives of various organized religions that will meet the diverse spiritual needs of the inmates, subject to the security needs and schedules of the detention facilities.

3. Develop and supervise a volunteer program that will involve local clergy, laity, seminary students, and the community.

4. Make regular visitations throughout detention facility inmate housing units providing counseling to the inmates and their families, subject to the security needs and schedules of the facilities.

5. Respond to crisis and emergencies involving inmates and/or detention facility staff as needed.

6. Assist detention facility staff handle inmate request for religious diets in accordance with CSB Special Diets Policy.

H. The Inmate Industries Supervisor will:

1. Develop, implement, evaluate, supervise, and coordinate all inmate educational or vocational programs outside the auspices of the Office of Education.

   a. This includes the following:

      • WCDF Inmate Industries

2. Maximize the opportunity for offenders to participate in programs that reduce criminal behavior, enhance the offender’s reintegration into the community, and provide the tools to allow offenders to become productive members of society.

3. Ensure the following inmate industry objectives are met:

   a. Develop inmate general work habits or skills

   b. Enhance inmate opportunities for employment in a specific vocation

   c. Reduce inmate idleness, tension, and mischief

   d. Reduce costs for program customers by maintaining a pricing structure
that averages 50% less than the private sector

e. Generate IWF revenue.
   - The target market is governmental agencies in the Bay Area and non-profit organizations on a limited basis.
   - Sheriff’s Office employees are also authorized to purchase from inmate industries.

f. Provide positive publicity for Detention Division and the Sheriff’s Office.

4. Ensure the following procedures for the sale of inmate industry products or services to government and non-profit agencies are adhered to:

a. All products or services will be itemized on an approved Inmate Industries work order.
   - Product or service charges will be based on those contained in the applicable program brochure or quoted separately for those not listed.
   - Quantity discounts are available for certain products.

b. All completed work will be picked up by the customer or shipped via a mutually agreed source.
   - Shipping costs, if any, will be borne by the customer. Completed work orders will be forwarded to the appropriate accounting staff member.

c. For sales to Contra Costa County departments, ensure the appropriate accounting staff member prepares an Interdepartmental Transfer (T/C 62) charging County departments for services/products provided.
   - The total of each Inmate Industries work order (including sales tax) will be charged to the fund/organization number indicated by the department, sub-account 2340 or 2100 and credited to the IWF – Inmate Industries (fund/organization number 2484, sub-account 9945 or 5022 for Intrafund Transfers – sales to other IWF organization numbers).
   - A journal voucher (JV) will be used to post the total sales tax charged on a T/C 62.
   - The total amount of sales tax collected on a T/C 62 is credited to Sales Tax Payable (fund/organization number 100300, sub-account 0633) and debited to IWF-Inmate Industries (fund/organization 2484, sub-account 9945).
   - The explanation for the JV should be “to record sales tax collected on work orders (list all work order numbers included in
the transaction)."

- Once completed, the original T/C 62 and JV are forwarded to the Sheriff’s Fiscal Officer for further processing.

- Copies of Deposit Permits will be forwarded to Inmate Industries and retained for future reference.

- The Director of Inmate Services will forward copies of Inmate Industries expenditure detail reports and revenue detail reports to the appropriate accounting staff member to allow reconciliation of outstanding Deposit Permits.

d. Refunds or re-work will only be allowed within thirty (30) days of receipt of order.

e. For sales to non-county departments and non-profit agencies, ensure the appropriate accounting staff member prepares and sends invoices to applicable agencies.

- Invoice numbers will be provided to Inmate Industries for tracking purposes.

- Upon receipt of the payment check made payable to: Office of the Sheriff Contra Costa County – IWF, the Accounting Technician will prepare a Deposit Permit.

- Sales tax collected is posted when payment is deposited.

- When completing the Deposit Permit, the appropriate accounting staff member will post the amount of the sale to IWF-Inmate Industries (fund/organization number 2484, sub-account 9945.

- A journal voucher (JV) will be used to post the total sales tax charged on a T/C 62.

- The amount of the sales tax collected on the sale is posted to Sales Tax Payable (fund/organization number 100300, sub-account 0633).

- If payment for more than one invoice is included on a Deposit Permit, the total sales tax collected from all invoices may be posted as a single entry.

- Copies of Deposit Permits will be forwarded to Inmate Industries and retained for future reference.

- The Director of Inmate Services will forward copies of Inmate Industries expenditure detail reports and revenue detail reports to the appropriate accounting staff member to allow reconciliation of outstanding invoices and Deposit Permits.
Bank charges associated with bad checks (i.e., insufficient funds, closed accounts, etc.) will be the responsibility of the payer.

Refunds or re-work will only be allowed within thirty (30) days of receipt of order.

5. Ensure the following procedures are followed for sale of inmate industry products or services to Sheriff’s Office employees (active or retired):

a. All products or services will be itemized on a “yellow” Inmate Industries work order.
   - All work desired must be pre-approved by employee signature and date on the work order.
   - Product or service charges will be based on those contained in the applicable program brochure or quoted separately for those not listed (same prices charged to government or non-profit agencies).
   - Quantity discounts are available for certain products.

b. After itemization and pre-approval, the Inmate Industries Supervisor will place the original work order with the applicable check in a sealed envelope and submit the package to the appropriate accounting staff member for payment.
   - A copy of the work order will be provided to the employee.
   - Employees must pay by check or money order (cash payments or credit cards will not be accepted) made payable to: Office of the Sheriff Contra Costa County – IWF.
   - All orders must be paid in advance and in full.
   - The appropriate accounting staff member will accept payment and annotate the “yellow” work order with the check number, the payment date, and an accounting approval signature.
   - The appropriate accounting staff member will make a copy of the work order for record purposes.
   - The original “yellow” copy of the work order will be forwarded to Inmate Industries to allow commencement of work.
   - The appropriate accounting staff member will prepare a Deposit Permit.
   - The total of each work order (including sales tax) will be charged to the applicable Sheriff’s Office employee and credited to the IWF- Inmate Industries (fund/organization number 2484, sub-account 9945).
• The sales tax portion will be credited to Sales Tax Payable (fund/organization number 100300, sub-account 0633).

• Deposit Permits and checks will be forwarded to the Sheriff’s Fiscal Officer for further processing.

• Copies will be forwarded to Inmate Industries and retained for future reference.

• The employee must pick up all completed work at the WCDF Inmate Industries shop.

• The employee will indicate acceptance by signature and date on the “yellow” work order.

• Accepted work orders will be retained for five years.

• The Director of Inmate Services will forward copies of Inmate Industries expenditure detail reports and revenue detail reports to the appropriate accounting staff member to allow reconciliation of outstanding Deposit Permits.

• Bank charges associated with bad checks (i.e., insufficient funds, closed accounts, etc.) and the replacement of bad checks with a money order will be the responsibility of the payer.

c. Refunds or re-work will only be allowed within thirty (30) days of receipt of order.
I. POLICY

A. All inmates and Federal detainees shall be provided an Orientation Program.

B. The Orientation Program shall:

1. Assist the inmate in transitioning into the facility.

2. Explain facility rules, regulations, and disciplinary procedures.

3. Explain the Custody Services Bureau Zero Tolerance policy against sexual abuse and sexual harassment.

4. Explain the inmate’s options for PREA Reporting.

5. Describe the programs available and the application process.

6. Describe correspondence, visiting and telephone usage rules.

7. Describe the inmate grievance procedure.

8. Describe medical and mental health services.

9. Describe the classification/housing assignment process.

C. The Orientation Program shall be reviewed annually and updated if necessary.

II. PROCEDURE

A. The Facility Commander is responsible for implementing, managing and coordinating the program outlined in the policy section of this document.

B. Martinez Detention Facility and West County Detention Facility

1. An Inmate Orientation Video will be shown in the intake area prior to the
inmate/detainee being placed on a housing unit.

2. The Booking Deputy will be responsible for showing the Orientation Video to all new arrivals.

3. The Deputy reviewing the booking paperwork with the inmate shall:
   a. Ensure the inmate/detainee has an opportunity to view the Orientation Video.
   b. Answer questions the inmate/detainee has concerning PREA, inmate rights, rules or procedures.
   c. Ask the inmate the PREA questions on the back of the “Live Scan Verification” form.
      - If the inmate answers, “Yes” to any of the PREA questions the deputy shall follow the procedure outlined in 2.12.01.
      - It is the inmates right to refuse to answer the PREA question.

4. The Reviewing Deputy will ask the inmate to sign the Orientation Verification Form once both all conditions have been met.

5. In addition to the Orientation Video, inmates/detainees can access and review information regarding inmate rights, rules, PREA information, privileges, and disciplinary procedures on their designated housing units via module kiosks or through the Housing Unit Deputy.

C. Federal Detainees of the Immigration and Customs Enforcement (ICE) Service

1. Federal detainees in the custody of ICE will be processed for housing at the WCDF.

2. Detainees will be processed in the same manner as other inmates to be housed at WCDF.

3. Federal detainees will be provided the opportunity to view the “ICE Intake Video” and will be provided with the “ICE Detainee Handbook”.

4. The “ICE Intake Video” and the “ICE Detainee Handbook” will be offered in English and Spanish.

5. The WCDF Escort Deputy will be responsible for showing the “ICE Intake Video” to all new detainees.

6. Once the detainee has been assigned a housing unit, he / she will be provided a copy of the “ICE Detainee Handbook.”

7. The Housing Unit Deputy will note that the detainee was given a copy of the “ICE Detainee Handbook” and provided the opportunity to view the “ICE Detainee Video” in the Jail Management System.
I. POLICY

A. The Custody Services Bureau shall provide a contract commissary operation and procedure to allow inmates to purchase items authorized by the facility.

B. A bag-in order form process will be utilized and governed by strict accounting procedures.

C. Each new inmate shall receive certain personal care items.

D. Each indigent inmate shall be entitled to certain personal care items.

E. If the inmate is considered to be a danger to themselves, staff issuing personal care items will ensure that the inmate does not receive a disposable razor.

F. Hospital inmates are not eligible to receive commissary.

II. DEFINITIONS

A. COMMISSARY: Goods, articles and supplies purchased by inmates.

III. PROCEDURE

A. GENERAL COMMISSARY OPERATIONS

1. Commissary will be scheduled once a week.

2. Commissary order forms will be available on all Housing Units and will list available items and prices.

3. Inmates in Disciplinary Status for violation of Facility rules may lose their Commissary privilege for a specific time.

   a. Inmates who have lost Commissary may still purchase personal hygiene items, medications and stamps via the normal Commissary process.
4. Indigent inmates may request one (1) personal care kit each week, which includes basic hygiene items, a golf pencil and paper.

5. Inmates may have a maximum purchase order of $100.00 per week.

6. M Module inmates will not be permitted to order over-the-counter medications as designated by medical or mental health staff.

7. Commissary must be ordered at the kiosk or the forms must be turned in by inmates no later than the following days and times:
   a. MDF: Wednesday 2200 hours
   b. WCDF: Monday, 2200 hours
   c. MCDF: Monday, 1800-2300 hours

8. The housing unit deputy will:
   a. Check the form to insure it is filled out correctly and signed by the inmate.
   b. Check the accuracy of the inmate’s booking number.

9. Commissary forms will be ready for pick-up by:
   a. MDF: Thursday, 0700 hours
   b. WCDF: Tuesday, 0700 hours
   c. MCDF: Tuesday, 0600 hours

10. Completed forms will be delivered to:
    a. MDF: Taken from the food carts and given to DSW.
    b. WCDF: Taken from Housing Unit by Deputy and placed in the mail room slot marked “canteen”.
    c. MCDF: Housing Unit Deputy delivers to the office.

B. COMMISSARY VENDOR RESPONSIBILITIES

1. The vendor will pick up order forms accordingly:
   a. MDF: Collected from DSW
   b. WCDF: Collected from the mailroom, slot marked “canteen”.
   c. MCDF: Collected from Clerical in the office.

2. The vendor will check the shift change report to ensure that the inmate has
sufficient funds to pay for the items ordered on the Commissary Order form.

3. Check the booking number and correct the additions, extensions and totals, correcting any mistakes.

4. Note the total amounts of each inmate sale and total number of stamps purchased on the Master Weekly Commissary Shift Change Report.

5. Give the master weekly Commissary reports to the Account Clerk.

6. Delivering Commissary to the Housing Unit:
   a. Martinez Detention Facility
      • Vendors will enter the facility via the loading dock sally port and under staff escort.
      • Vendors will deliver housing unit commissary to the unit’s activity room, as designated by the deputy.
      • The housing unit vendor will prepare all bags in the inmate’s room order.
   
   b. West County Detention Facility
      • Vendors will enter the facility via the loading dock sally port and under staff escort.
      • Vendors will deliver housing unit commissary to the unit’s activity room, as designated by the deputy.
      • The housing unit vendor will prepare all bags in the inmate’s room order.

   c. Marsh Creek Detention Facility
      • Vendors will report to the Operations Office
      • Commissary will be delivered to each housing unit and Commissary distributed nearby the Deputy’s station.

7. Deliveries will be made to one inmate at a time.
   a. The vendor will ask the inmate their name and room/bunk number, and will use the inmate’s identification for verification.
   b. The vendor will show the contents of the bag and inventory the contents against the order form with the inmate.
   c. The vendor will remove any overages. If an item is missing, the vendor will write a note on the reverse side of the order form.
The Account Clerk will make adjustments to the inmate account.

d. Upon completion of this inventory, the inmate will officially receive his/her Commissary by signing the receipt portion of the Commissary order form.

e. The vendor will compare the signatures, i.e., the signature of the inmate requesting the order with the inmate’s signature on the receiving portion of the form.

- If they match, the inmate will be given the bag.

- If they do not match, the vendor will pull the sale and immediately notify the Module Deputy that the inmate is attempting to receive another inmate’s commissary.

f. Should the inmate be unavailable (i.e. out of the module, hospital, etc.), the vendor will deliver the Commissary to the Custody Sergeant who will sign for it, and arrange for its delivery to the inmate.

- This re-delivery may occur on swing shift Thursday or Friday.

g. If the inmate is on another module within the Facility, and can still have Commissary, the vendor will deliver the Commissary to the corrected module address.

8. All Commissary items that are not sold will be removed from the facility by the vendor.

9. Vendors will handle completed forms accordingly:

a. MDF: The vendor gives the completed forms to the DSW after deliveries are completed.

b. WCDF: The vendor will place all of the completed Commissary forms in the Account Clerk’s mail slot.

c. MCDF: The vendor will place all the completed Commissary forms in the office for the Account Clerk.

10. Departure from the facilities:

a. Vendors at all facilities will report to the Custody Sergeant after all housing unit deliveries are complete.

b. The Custody Sergeant will provide an escort for the vendor to exit the facility.

C. RELEASE CLERK RESPONSIBILITIES
1. Release Clerks must verify the Commissary transaction on Commissary delivery day BEFORE releasing inmates to make sure their Commissary sales were deducted from their account.

D. ACCOUNT CLERK RESPONSIBILITIES

1. Account Clerks will adhere to CSB Policy and Procedure 2.02.10, Commissary Funds.
I. POLICY

A. Inmates have a constitutional right to participate in practices of their religious faith that are deemed essential by the faith’s judicatory, limited only by documentation showing a threat to the safety of persons involved in such activity or that the activity itself disrupts order in the facility.

B. The Custody Services Bureau shall provide adequate space and equipment in order to conduct and administer facility religious programs.

C. Additionally, non-inmate clerical staff shall work in conjunction with the Religious Services Program to process confidential material.

II. DEFINITIONS

A. LEGITIMATE RELIGIOUS PRACTICES: Will be determined by the Chaplain after a review of the literature stating the religious principles that support the practices.

III. PROCEDURE

A. CHAPLAIN

1. The full-time Senior and Assistant Chaplains, in cooperation with the Facility Commander or designee and the Director of Inmate Services, shall plan, direct and supervise all aspects of the religious program, including approval and training of both lay and clergy volunteers from faiths represented by the inmate population.

   a. Chaplain staff shall have physical access to all areas of the facility in order to minister to inmates and staff.

   b. Chaplain staff will ensure that the various religious needs of the inmates are met and that services and counseling are made available on a voluntary basis.
c. Staff supervision of the Assistant Chaplain is the responsibility of the Senior Chaplain.

d. Staff coordination of the Senior Chaplain is the responsibility of the Director of Inmate Services.

e. Religious programs will not be based on race, national origin, color, creed, sex, economic status, or political belief.

2. Chaplain staff shall meet eligibility requirements as established.

a. A copy of the eligibility requirements is available in the chaplain staff office for review.

3. Chaplain staff will determine the religious needs of the inmates through announcements, interviews, sign-up sheets, request slips, etc., provide liaison with the various denominations as necessary, and supervise religious volunteers in providing services and counseling as needed.

4. Inmates who do not wish to participate in religious counseling or services will not be exposed to such activities.

5. Chaplain staff will maintain statistics as to the number of inmates that attend religious services each day.

6. Chaplain staff will be responsible for providing the Director of Inmate Services and the Bureau Administrative Services with an updated schedule of religious activities and approved visiting lists, which will be distributed to the custody staff as necessary.

7. All religions will be afforded equal status and protection. Provisions will be made for inmate access to appropriate facilities, clergy or spiritual advisors, publications and religious symbols, and other requirements of the various faiths, subject only to the limitations necessary to maintain order and security.

a. Any requests for special religious diets must be approved by the facility Chaplains, subject to review by the Facility Commander and CAS Lieutenant or designee.

   • Additionally, approved diets will be forwarded to the Director of Food Services.

b. Any items brought into any Contra Costa County Sheriff’s Detention Facility for the purpose of distribution to any inmate shall be provided to and approved by the Director of Inmate Services prior to its distribution. Once approved, the specific item(s) will be noted on the clearance list of the volunteer who has been approved to bring it in the facility.

8. Religious volunteers will be screened and trained to the same degree as all other volunteers and will wear the appropriate identifying badge while working in the facility.
9. Religious counseling/services will be held within the individual housing units, although the specific locations will vary depending on the number of inmates and classifications, and available space.
   a. Religious Services may also be conducted in the MCDF Chapel or Multipurpose/Program Room at WCDF.

10. Regular services, to meet the diverse spiritual needs of the inmates, will be provided. Community resources will be utilized to augment the delivery of appropriate religious services on special occasions or as needed. A number of volunteers will assist the Chaplain staff in providing services to the numerous religious denominations in the area.

11. When a religious leader of an inmate’s faith is not represented through the chaplaincy staff or volunteers, the Chaplain staff shall assist the inmate in contacting such a person. That person shall have the appropriate credentials from the faith judicatory and may minister to the inmate under the supervision of the Chaplain.

12. Many outside clergy also have professional counseling degrees in family problems, etc., and are willing to volunteer their services to inmates. The Chaplain will coordinate this one-on-one counseling program, which may require contact visiting subject to the Facility Commander or designees approval.

13. Reasonable space shall be available for congregate worship/religious services, individual counseling, group counseling and/or religious studies and chaplaincy offices. Equipment, office supplies and secretarial help shall be adequate to meet the needs of the religious program. Volunteers are acceptable as clerical support staff. Religious study classes will be provided on a regular basis. This program will depend on lay-volunteers to lead the discussions and will be held in contact visiting areas or multi-purpose areas, to be determined by the Facility Commander. Volunteers with housing unit access will be so designated on the schedule.

14. Special activities of a para-religious nature (for example: seminary student training, musical groups, recreational or entertainment programs, social activities, etc.) may be scheduled at times. The Chaplain staff, Director of Inmate Services and the Facility Commander will review these activities for approval.

15. The Chaplain staff will make arrangements to see most outside visitors in the non-secure areas of the facility with the exception of clergy, who may conduct their business in the Chaplain's office.
   a. The Chaplain staff shall be responsible for notifying the Facility Commander prior to escorting any non-clergy guests into the facility.
   b. The Chaplain staff shall be responsible for notifying any support services of special needs or requests as it relates to meetings, etc.
      • This includes requests for DSW services, Food Services, etc.

16. The Chaplain staff, in cooperation with the Facility Commander or designee, will
develop and maintain communications with faith based communities and approve donations of equipment or materials for use in religious programs.

B. VISITING CLERGY

1. The Chaplain staff shall be responsible for ensuring all visiting clergy members are familiar with facility rules and regulations pertaining to visiting and the provision of services to inmates prior to their entering the facility.

2. Clergy visiting policy can be located in CSB Policy and Procedure 2.17.09.

3. Clergy interested in providing services, instruction and/or counseling to inmates in the facility will be referred to the Chaplain staff.

4. Visiting clergy and regular religious volunteers will provide the facility Chaplains with the number of inmates that attended services for tracking purposes.
I. POLICY

A. The Custody Services Bureau will ensure that all entitled inmates have access to library services, including:

1. Current information on community services and resources

2. Educational and recreational reading material.

B. Legal Reference materials may be accessed in accordance with CSB Policy and Procedure 2.18.14, Legal Reference Services.

II. PROCEDURE

A. Selection of books, materials, and programs

1. Materials selected by staff shall serve the interests and needs of the inmates.

2. Reading levels of selections shall be consistent with inmate abilities.

3. Materials shall be selected on the basis of cultural, inspirational, or recreational values.

4. All library books, materials, etc. shall be clearly stamped indicating ownership by Contra Costa County Detention libraries.

   a. Sworn staff shall ensure library materials are returned to staff librarians and not allowed to leave the facility when inmates are transferred or released.

5. Library staff shall endeavor to obtain book or periodical donations from the County Library system, community bookstores, other community organizations, or citizens.

B. Access to reading materials:
1. All inmates may request library materials via the inmate request form.

   a. At MDF, the staff librarian shall fill inmate requests for books and provide service to the separate inmate modules.
      - An approved general service schedule for MDF inmates will be posted in each module.

   b. Full service libraries are available at WCDF and MCDF.
      - At these locations, inmates shall have specific visitation time frames identified. Library hours of operation will be posted in each inmate housing area.

   c. Reference books shall be available for review only.
      - MDF Requests shall be handled on a case-by-case basis
      - WCDF and MCDF Inmates may review reference material during their library period.

   d. Inmates may have a total of seven (7) books checked out at any time. Including magazines, schoolbooks and religious material.

   e. Inmates are responsible for all books checked out to them. Any inmate determined to have destroyed, damaged, injured, etc., any library materials or equipment is subject to criminal prosecution as well as disciplinary measures, including reimbursement for the replacement cost of any materials or equipment affected.

   f. Library staff may provide Internet research on a time-permitting, case-by-case basis for information not available in stock or that is out of date. Internet research shall be limited to:
      - Informational reference materials i.e., vocational/trade school, card game rules, farmers almanac, medical, telephone book information (i.e. yellow pages.com). No informational searches on individual persons will be conducted.
      - No historical, biographical, Newspaper article or periodical searches or otherwise deemed non-reference requests will be fulfilled.

   **Inmates are not allowed access to the Internet. Custody staff has final approval on all requests.**

   g. Library staff may provide up to three (3) photo copied pages of in-house reference materials not available for checkout from the library. (Not applicable to inmates with special status, i.e. Pro-per)
      - No copies will be completed of inmate personal pictures, drawings, stationary, reading material or personal paperwork etc.
• No inmate will be allowed to use the copy machine, except designated supervised workers.

h. All inmates must follow library rules and polices regarding conduct. Violation of library rules may result in disciplinary action.

2. Delivery of general library materials to inmate housing areas

a. At MDF, the staff librarian shall provide weekly service to all inmate modules for the purpose of filling previous inmate requests and to rotate module bookshelf stock. The exception is “D” module where a rolling book cart rather than a bookshelf shall be rotated weekly.

• Hardbound books are no longer provided at any facility.
  (Exception to rule is inmates enrolled in school may possess one (1) hardbound book only. The hardbound book must be issued by school services)

b. At WCDF, all requests will be handled during regularly scheduled library hours. The exception is “Building Four” where library staff shall rotate bookshelf stock weekly.

c. At MCDF, the staff librarian shall rotate bookshelf stock on inmate dorms weekly. All other requests will be handled during regularly scheduled library operating hours.

3. Any hardbound books received for an inmate from an outside source, will be modified (hard covered torn off) prior to issuance. Librarian will seek inmate approval prior to book modification. If inmate does not approve of the modification, or in the event the inmate does not respond to Librarian request within five (5) days, books will be returned to sender.

I. POLICY

A. Contra Costa County Sheriff’s Office shall contract with the Contra Costa County Office of Education to provide an accredited and comprehensive educational and/or vocational program to meet the needs of the inmate population.

B. These programs will be made available to inmates on a voluntary basis.

C. Eligibility will be based upon inmate behavior, motivation, and subject to security requirements. This shall include:
   1. Weekday and weekend educational programs to allow scheduling flexibility.
   2. Accurate records to reflect the inmate’s educational achievements toward relevant employment in the community.
   3. Formal recognition of an inmate’s educational accomplishments such as appropriate diplomas, certificates, and awards.

D. The Contra Costa County Sheriff’s Office shall provide adequate training equipment to support program needs. This shall include, at a minimum:
   1. Classroom and office space
   2. Tables
   3. Chairs
   4. Utilities
   5. Inter-site mail and delivery services
   6. Selected equipment
II. PROCEDURE

A. Educational Plan

1. Detention Adult School Program Administrator and staff shall develop an educational plan containing:

   a. Statement of purpose, goals, and objectives for each educational course that is reviewed annually and revised if necessary

   b. Course outlines for each educational course provided

   c. Classes in accordance with the California Education Code, and approved by the County Board of Education.

   d. Classes should include, but not be limited to, the following areas of instruction:
      
      • Orientation
      • Adult Basic Education (ABE)
      • GED preparation and testing
      • High school diploma preparation and testing
      • Computer literacy
      • Visual arts
      • Independent study
      • DEUCE (Deciding, Educating, Understanding, Counseling, and Evaluation) program
      • Parenting
      • Job development
      • Pre-release/transition program
      • Woodshop program
      • Custodial program

   e. Regular evaluation system for assessing the need of specific educational and/or vocational programs

   f. Schedule of educational and vocational classes

   g. System to obtain and maintain necessary educational/vocational
h. Method for maintaining academic records

i. Achievement recognition process

B. Accreditation

1. The Detention Adult School Program Administrator shall communicate with the officials of the State Department of Education and maintain up-to-date records required for accreditation purposes.

C. Record keeping and Achievement Recognition

1. The Detention Adult School Program Administrator shall ensure the following:

a. Maintenance of student records to include a file folder, legal attendance documents, transcripts, participation, progress, certificate copies, and diploma copies.

   • At the MDF, transcripts from all three Detention sites representing the last three years and other student records from the current year plus two years previous will be stored on site, within the school department areas.

   • At WCDF, records from the current school year plus two years previous will be stored on site in the school office.

   • At MCDF, records from the current school year plus two years previous will be stored on site in the school office.

b. Periodic teacher evaluation and objective measures of progress on each student.

c. Scheduling of quarterly award ceremonies to recognize educational accomplishments.

   • Representatives from the Sheriff’s Office, Department of Education, community, and inmate families will be invited to participate.

D. Delivery Methods

1. The Detention Adult School Program Administrator shall utilize the following methods to offer programs to inmates:

   a. Classroom instruction

   b. Individual instruction (one to one tutoring)

   c. Independent study
E. Provisions for Special Education

1. The Detention Adult School Program Administrator shall provide special education in accordance with Section 94-142 of Federal Public Law.

2. Inmates requesting special education are only eligible when:
   a. They are under the age of twenty-one (21)
   b. They are without a high school diploma
   c. They have an active Individualized Education Plan (IEP)
   d. The IEP has not lapsed within the last year
   e. They can supply their high school transcript or provide means of verification of active IEP

3. Inmates meeting the above criteria may apply for special education classes.
   a. Housing classification of the inmate will determine the method of instruction provided.

F. Application Process

1. The Detention Adult School Program Administrator shall ensure inmates are aware of school programs/classes by posting program announcements and weekly program activity schedules in each inmate housing area.
   a. It is anticipated that inmates will share “word of mouth” information regarding the availability and/or desirability of programs/classes.

2. Inmates must submit an Inmate Request form to Schools Department for class/program consideration.

3. School instructors will be responsible for interviewing inmates who express an interest in attending classes.

4. Court referrals and referrals from existing Detention programs will also be accepted.

5. Inmates will be required to attend the school program orientation class and submit to initial testing to establish a baseline for future progress prior to participating in one or more classes/programs.

G. Evaluation

1. The Detention Adult School Program Administrator will submit a quarterly progress report to the Director of Inmate Services.
a. This report should highlight contractual services provided, it should capture significant accomplishments such as number of students placed in jobs upon release, and it should note all statistical information that indicates program value.

2. The Detention Adult School Program Administrator shall provide an annual written report of both program and student outcomes.
   a. Criteria for the evaluation of the school program shall be established after consultation with the Director of Inmate Services.
   b. Performance measures shall be based upon established program and course goals and objectives.

3. This annual process will also include a survey of teachers, Detention facility staff, and inmates.
   a. The survey results will be utilized to help establish subsequent year annual goals and objectives, provided they fall within the guidelines of the State Education Code, County Office of Education Policy, budgetary constraints, and are reviewed and approved by the Director of Inmate Services.

H. School Rules

1. Inmates will be responsible for arriving on time to their scheduled classes.

2. All inmates will sign in on class roster at the beginning of their class.

3. Any appointments (i.e., medical, court, etc.) conflicting with classroom schedules will be verified by School Department staff prior to determining if the inmate’s absence is legitimate.

4. Three (3) unexcused absences will result in removal from the program.

5. Inmates will participate in class activities and discussions.

6. Inmates should make every effort to schedule their visits around their classroom schedule.

7. Requests or questions regarding school time credits shall be made on an Inmate Request form.
   a. Inmates will not approach teachers regarding this issue before, during, or after class.

8. Inmates must wear issued facility outer garments to class.
   a. Exception: inmates may be allowed to wear special clothing for a physical education class or work project class.

9. Inmates will not bring food or drinks to program areas.
10. Inmates will be removed from class (may also lose school time and/or be written up for a disciplinary rule violation) for:
   a. Non-excused absences
   b. Inappropriate/disruptive behavior

11. Inmates will be responsible for leaving their surrounding desk area clean and orderly.

12. Inmates will not be allowed to remain in the school’s area after their last assigned class unless conducting official school business.

13. In addition to the above rules, DEUCE participants must adhere to the following school rules:
   a. Expectations of Project DEUCE
   b. Attendance in an ABE Class should their CASAS reading test score fall below 214
   c. Compliance with breath and/or urine testing for the detection of alcohol and drug use when requested by staff
   d. Attendance in at least one AA or NA meeting each week.
      • Both groups are offered within the Detention facilities.
   e. Attendance in afternoon independent study class or an evening ABE/GED class.
      • Phase three participants may elect a computer applications class or ABE/GED class.

I. School Time Credits

1. Inmates may receive up to thirty (30) days of school credit toward their sentence they are currently incarcerated for.

2. For every fifteen (15) hours of class attendance, inmates will receive a one-day reduction in their sentence.
   a. Up to three (3) days each month may be credited toward the inmates sentence.
   b. Only one (1) day of school time can be earned each week.

3. An inmate may earn ten (10) days off their sentence for the following:
   a. Receiving a GED Certificate
b. Earning a high school diploma

c. Successful completion of the DUECE Program

4. The request to post school time must be on an Inmate Request Form and turned into the school office at least five school days before the inmate’s anticipated release date.

   a. School time credits may be posted only once.

   b. It is the inmate’s responsibility to request that school time be transferred from one facility to another.

5. Questions regarding school time must be submitted to the school office in writing.

   a. Inmates may not discuss school time issues with staff during class time.

6. Any inmate failing to meet any requirements of the Contra Costa Adult School Policy agreement may be subject to dismissal from the schools program.
I. POLICY

A. Vocational courses shall be available to all inmates incarcerated at WCDF and MCDF.

B. The programs will be designed to:
   1. Provide job-related skill training that is consistent with the needs of the inmate population.
   2. Provide apprenticeship training for certain skills.
   3. Prepare inmates for more advance training opportunities following release.

II. PROCEDURE

A. Program Eligibility
   1. Acceptance into a vocational program will be based on the following:
      a. Interest level
      b. Behavioral patterns
      c. Desire to learn
      d. Length of sentence

B. Types of Vocational Programs:
   a. Engraving
   b. Sign Making
   c. Sublimation
d. Vehicle Decaling

e. Viticulture

f. Landscaping

C. Enrollment

1. Inmates interested in enrolling in a vocational program may submit an Inmate Request form to the Inmate Industries Supervisor, the MCDF Viticulture Instructor (viticulture only), or the WCDF Landscape Instructor (landscape program only).

2. Each inmate submitting a request will be interviewed by the applicable program supervisor/instructor.

D. Record Keeping

1. The Inmate Services Supervisor or instructor designee will maintain progress records for each inmate enrolled in their vocational program.

2. Certificates of accomplishment will be issued to inmates when warranted.

   a. Copies will be placed in their program training file.

3. Inmate vocational training program records will be maintained on site for the current year and the previous two years.

4. If an inmate re-enters a vocational program after one (1) year, a new training file will be created.

E. Program Continuation

1. Upon Release

   a. At the request of an inmate, the Inmate Services Supervisor or instructor designee will attempt to coordinate the placement of a released inmate in a vocational training program and/or in an employment position.

2. Upon Re-Entry

   a. If an inmate is re-arrested within one (1) year, and sentenced to a Contra Costa County Detention Facility, he/she must re-apply in order to participate in the same program or any other.

   b. The Inmate Industry Supervisor or instructor designee will be responsible for determining what phase of the program the inmate will re-enter.

F. Evaluation

1. The Inmate Industry Supervisor or instructor designee will submit a quarterly progress report to the Director of Inmate Services.
a. This report should highlight services provided, it should capture significant accomplishments such as number of students placed in jobs upon release, and it should note all statistical information that indicates program value.

2. The Inmate Industry Supervisor instructor designee will conduct an annual evaluation of the vocational training program to ensure courses and curriculums are up to date and consistent with the needs of inmates.
I. POLICY

A. It shall be the policy of the Custody Services Bureau to ensure that all inmates have access to a variety of Social Service Programs while incarcerated in order to prepare for treatment, education, shelter, food, and employment upon release.

B. These programs are educationally focused and shall include, but not be limited to the following:

1. Substance abuse education programs for drug and alcohol addiction
2. Vocational education and preparation for employment
3. Pre-release resource information
4. Parenting

C. Community resources will be solicited to provide those services that cannot be provided by regular staff.

II. DEFINITIONS

A. Social Service Programs: Planned activities designed to promote the inmate's social adjustment and assist in resolving personal or interpersonal problems.

B. D.E.U.C.E. Program (Deciding, Educating, Understanding Counseling): A program providing focused education and group process activities which will prevent further substance abuse and criminal activity that supports addiction.

III. PROCEDURE

A. Requests for Services

1. Inmates may request an education program by submitting a request slip to the Director of Inmate Services.
2. Staff members may initiate a request for an inmate to receive educational services.

3. If a staff member is acting at the request of an inmate, the staff member shall utilize the message request slip procedure.

4. After receiving a request for an inmate to participate in program services, the Director of Inmate Services will refer the inmate request to a program that matches his/her specific eligibility.

B. Drug and Alcohol Services

1. Medical/mental health services personnel in addition to the Inmate Services Section, via the D.E.U.C.E Program, shall jointly provide drug and alcohol services.

2. Substance abuse programs for inmates with drug and alcohol addiction problems contain the following:
   a. Staff trained in drug and alcohol education programs will design and supervise the program
   b. Selection and training of former addicts and recovering alcoholics to serve as employees or volunteers in these programs
   c. Coordination with community substance abuse programs
   d. Make efforts to motivate addicts to seek help
   e. Set realistic goals for the education of inmates with substance abuse problems
   f. Have a variety of approaches to provide flexibility to meet the varying needs of different addictions

3. Services for drug and alcohol related problems are available through:
   a. Alcoholics Anonymous
   b. Narcotics Anonymous
   c. D.E.U.C.E. Program
   d. Community-based organizations.

C. Annual Evaluation of Social Service Programming: An annual assessment of the collective service needs of the inmate population is to be completed by the Director of Inmate Services. This evaluation will include a review of statistics retained concerning the previous years activity. Recommended changes for inmate programs will be submitted to the Inmate Welfare Committee. The following data sources will be used to determine the collective needs of the inmate population:
1. A review of randomly selected individual client plans and individual client evaluations/exit interviews.

2. Discussions with staff relating to social programming.
I. POLICY

A. The Custody Services Bureau shall provide a recreational and entertainment program that allows access to exercise, recreational and entertainment opportunities including games, sporting equipment and television to maintain the physical, social, and emotional well being of inmates.

B. Minimum jail standards require a minimum of three (3) hours of such activity distributed over a period of seven (7) days.

C. Inmates will be encouraged to participate in a program of physical activity.

II. PROCEDURE

A. Inmate recreational activities at MDF

1. Due to MDF being classified as a maximum-security facility, recreational opportunities available to inmates are more limited than at other Detention facilities.

2. All inmates will have access to the following recreational activities (not inclusive):

   a. Board games
   b. Courtyard/exercise area
   c. Television and movies
   d. Newspapers
   e. Special holiday musical programs.
   • Custody Staff will determine the availability of programming
3. Custody staff will determine inmate “free” time when recreational equipment or games may be checked out and when they must be returned.

B. Inmate recreational activities at WCDF

1. The WCDF is a medium-security facility.

2. All inmates will have access to the following recreational activities (not inclusive):
   a. Board games
   b. Courtyard/exercise area
   c. Television and movies
      • Custody Staff will determine the availability of programming
   d. Newspapers
   e. Special holiday musical programs

3. Custody staff will determine inmate “free” time when recreational equipment or games may be checked out and when they must be returned.

C. Inmate recreational activities at MCDF

1. The MCDF is a minimum-security facility.

2. All inmates will have access to the following recreational activities (not inclusive):
   a. Board games
   b. Courtyard/exercise area
   c. Television and movies
      • Custody Staff will determine the availability of programming
   d. Newspapers
   e. Special holiday musical programs.

3. Custody staff will determine inmate “free” time when recreational equipment or games may be checked out and when they must be returned.
I. POLICY

A. BART and bus tickets purchased with Inmate Welfare Funds will be available for all indigent inmates at time of release.

B. It shall be the responsibility of the Director of Inmate Services to ensure that adequate resources are available in order to allow an inmate to return to their location of arrest within the county area.

II. PROCEDURE

A. Issuance and Record keeping

1. Upon request for BART or bus tickets during the release process, the Processing Sergeant will verify an inmate’s indigent status.

2. Assuming the inmate’s final destination is serviced by BART, County Connection, AC Transit, or Tri Delta Transit, eligible inmates will be provided a BART ticket, a bus ticket, or any combination thereof to allow transportation to the inmate’s county of residence.

3. County Connection bus tickets are good for destinations within Central Contra Costa County. This includes:

   a. Martinez
   b. Pleasant Hill
   c. Walnut Creek
   d. Concord
   e. Clayton
   f. Danville
4. AC Transit bus tickets allow two adult rides and are good for destinations within West Contra Costa County. This includes:
   a. Richmond
   b. Pinole
   c. El Cerrito
   d. San Pablo
   e. El Sobrante
   f. Hercules
   g. Oakland
   h. Hayward
   i. Union City
   j. Fremont
   k. Menlo Park
   l. Palo Alto

5. Tri Delta bus tickets are good for destinations within East Contra Costa County. This includes:
   a. Bay Point
   b. Pittsburg
   c. Antioch
   d. Brentwood

6. All bus tickets allow bus transfers within their system (i.e., County Connection...
allows a transfer within their servicing area but does not allow a transfer to AC Transit bus nor to a Tri Delta bus).

7. BART tickets will allow transportation throughout Contra Costa County.

8. A working inventory of BART and bus tickets will be maintained in a locked drawer, cabinet, etc. until required.

   a. The Shift Supervisor will record the date, the inmate’s name and booking number, and the type and number of tickets issued in the Inmate Transportation Log.

   b. The inmate’s initials will also be obtained in the log.

B. Replenishment

1. The primary inventory of BART and bus tickets is maintained in the Martinez Detention Facility Accounting Office’s safe.

2. When a Detention facility needs to replenish its working inventory, the Facility Commander or designee should provide a written request to the MDF Accounting Office along with copies of the Inmate Transportation Log.

3. A designated MDF Accounting Office staff member will compare the request with the quantity of tickets issued as documented by the Inmate Transportation Log.

   a. If the request appears reasonable, the MDF Accounting Office will provide replenishment tickets from their safe and obtain a receipt signature from the requestor.

   b. If the request appears unreasonable (i.e., usage from Inmate Transportation Log does not support the request), the MDF Accounting Office will notify the applicable Facility Commander and the Director of Inmate Services so they may view the request.

4. On a weekly basis at MDF and WCDF, accounting staff will reconcile the existing ticket inventory to the Inmate Transportation Log and notify the Operations Sergeant of any discrepancies.
I. POLICY

A. It shall be the policy of the Custody Services Bureau to permit Notary Public Services to all inmates. Identifying and using available resources within the community will achieve this.

B. All fees and costs related to the Notary is the responsibility of the inmate.

C. Notary Publics are not authorized contact visits.

II. DEFINITIONS

A. NOTARY PUBLIC: A person legally empowered to witness and certify documents and to take affidavits and depositions.

III. PROCEDURE

A. All telephone calls/inquiries regarding Notary Public access will be referred to CAS.

1. Appointments are to be scheduled at least 24 hours in advance, Tuesday through Thursday, 1300-1500 hours.

2. Inmates wishing to get married are responsible for locating and making arrangements with a Notary to enter the facility with approval of the Facility Commander or designee through their fiancé, family members or friends. Refer to Inmate Visiting Policy 2.17.09, Section II C. “Special Visits”.

B. Prior to confirming the appointment, CAS will advise the Notary Public that the only identification available for the purpose of identifying any inmate signing a legal document, will be the armband worn by the inmate and bearing the inmate’s name and booking number.
C. Should confirmation of a Notary Public’s status be necessary, an individual Notary Public can be verified with the State of California through the following agency:
   a. Secretary of State
      Notary Public Division
      1500 11th Street, Fifth Floor
      Sacramento, CA 95814
      (916) 653-3595

D. Notary Public Division office hours are as follows:
   a. Monday through Friday
      • 8:00 a.m. - 4:00 p.m.

E. **Notaries will be permitted non-contact visit room privileges only.**
   1. Upon arrival to the designated housing unit, the deputy will retrieve and inspect the paperwork requiring notary service.
   2. The deputy will direct the notary into a non-contact visit room.
   3. The deputy will present the paperwork to the inmate in view of the notary to review and sign.
   4. The deputy will retrieve the paperwork from the inmate and return it to the notary for disposition.
I. POLICY

A. Inmate Pro Per privileges shall apply to active criminal cases only. Pro Per privileges will become effective upon Custody Administrative Services (CAS) receipt of the appropriate court order. Pro Per privileges will be terminated in accordance with the court order, or under conditions causing suspension, or once the case has been adjudicated.

B. Pro Per privileges shall be at the expense of the inmate unless the court has been satisfied as to the indigence of the inmate.

C. Pro Per privileges shall be honored at the reasonable convenience of the facility and shall be dependent on the security of the Pro Per inmates, other inmates, staff, and the needs and security of the facility.

II. DEFINITIONS

A. IN PROPRIA PERSONA (PRO PER): In one’s own person. For the purpose of this section, an inmate is in Propria Persona or Pro Se Status only if acknowledged by a court to be appearing in a specific criminal action without counsel.

B. LEGAL MAIL: Confidential correspondence between inmates and local, state, and federal courts, any member of the State Bar, or holder of public office and/or the State Board of Corrections.

C. SHERIFF’S REPRESENTATIVE: For purposes of this section, The Sheriff’s representative for all inquiries regarding the facility or the ability to carry out various court orders will be considered to be the Custody Administrative Services Lieutenant or his/her representative. Management of the Pro Per Inmate program is the responsibility of CAS. All inquiries from the Court regarding compliance with this agreement, management of the Pro Per Program, or the ability to carry out various court orders, will be made to CAS. Pro Per Inmates should direct their inquiries regarding compliance to CAS where the inmate is currently being housed.
III. PROCEDURE

A. Pro Per inmates will be housed according to their specific classification requirements.

B. Activation of Pro Per status

1. Pro Per Orders will be effective immediately upon receipt and review of the appropriate court order.

2. Operations clerks will be responsible for notifying CAS upon receipt of any court order.
   a. The Operations Clerk will contact CAS to advise them of the court order.
   b. The Operations Clerk will forward a copy of the court order to CAS.

3. CAS will maintain a current pro per list, which will be accessible by staff members at all workstations.

4. If an inmate believes they have been granted Pro Per status by the courts, the inmate may submit a request to CAS to investigate the inmate’s eligibility.
   a. CAS will review the inmate’s booking and contact the appropriate court if necessary to confirm any active Pro Per status order.
   b. The Inmate’s Pro Per status will be activated immediately upon receipt and review of the court order.
   c. The inmate’s Pro Per phone privileges will begin upon review of the court authorized phone list.

C. LEGAL RUNNER

1. A “Legal Runner” will be recognized for the function implied, specifically, to obtain and deliver legal materials. The purpose of the “Legal Runner” is to provide assistance to the Pro Per Inmate in furthering their legal argument. Typical duties of “Legal Runners” include:
   a. Conducting legal research.
   b. Filing court documents.
   c. Obtaining necessary forms and other legal supplies.
   d. Conducting other administrative support functions to include making telephone calls, contacting witnesses and taking statements, and performing routine photocopying of legal materials.

2. All materials delivered by the legal runner for the Pro Per Inmate will be subject to inspection for contraband. No materials will be transferred from the legal runner to the inmate without authorization of custody staff members.
3. Pro Per Inmates may be authorized one “legal runner” by order of the court only. The services and expenses incurred by the legal runner are the responsibility of the Pro Per Inmate, unless other provisions for payment to the individual is specified by the court.

4. The Pro Per Inmate has the responsibility to request authorization from the Court for whom their designated “Legal Runner” will be.
   
   a. Once authorized by court order, the “legal runner” shall be subject to security clearance by the Office of the Sheriff.
      
      • The Office of the Sheriff may refuse a clearance or deny admittance for the following reasons:
      
      • Any unacceptable or disruptive conduct.
      
      • The “legal runner” is determined to be a security risk or hazard.
      
      • The “legal runner” is an ex-felon per (PC 4571)
      
      • The “legal runner” was released from a Detention Facility within the previous twelve months.

   b. In the event a legal runner is denied access, the Office of the Sheriff will notify the court, and the Pro Per inmate immediately.

   c. A “Legal Runner” may not be a social visitor for any inmate housed at a Contra Costa County Detention Facility while designated as a “Legal Runner” without written approval by the CAS Lieutenant.

   d. A “Legal Runner” may not communicate with any inmate other than the Pro Per Inmate to which they are assigned without written approval by the CAS Lieutenant.

5. If it is necessary for the “Legal Runner” to speak to the Pro Per Inmate, a non-contact visit may be permitted during normal visiting hours. Visits are limited to a maximum of two thirty-minute visits per week, unless otherwise ordered by the court.

   a. These visits will not be recorded, but may be monitored for the purpose of ensuring safety and security.

   b. “Legal Runner” visits should take place following the procedures afforded for other professional visits within the facility.

6. A “Legal Runner” may only be authorized to assist one inmate at a time.

7. The failure of a Pro Per Inmate to designate a “Legal Runner” does not imply the duties commonly done by a “Legal Runner” will become the duties of the Office of the Sheriff or the Court.
D. COURT AUTHORIZED INVESTIGATORS

1. The Pro Per Inmate may be authorized, by Court Order, one investigator only, at his/her own expense (unless other provisions for payment are specified by the Court).

2. The services of a licensed investigator may be retained by the Pro Per Inmate.
   a. If the Court is satisfied as to the Pro Per Inmate’s indigence, the services of a licensed investigator may be provided by the Court.
   b. The investigator must be a California Licensed Investigator.
   c. Investigator designees and representatives will not be permitted.

3. The Pro Per Inmate has the responsibility to request authorization from the court for a Private Investigator.
   a. Court approved Investigators shall be subject to security clearance by CAS and may be refused a clearance, or denied admittance, upon the discretion of the Facility Commander or the CAS Lieutenant.
   b. In the event an investigator is denied clearance, the Office of the Sheriff will notify the court, and the Pro Per Inmate immediately.

E. DETERMINATION OF INDIGENCE

1. The court will order an indigence study to determine the inmate’s ability to pay for services at the time Pro Per privileges have been granted.
   a. Indigence will be presumed if the inmate was previously represented by the Public Defender or Alternate Defender’s Office.

F. MAIL PRIVILEGES

1. Pro Per Inmate “Legal Mail” will be handled in accordance with the standards identified within Title 15, Chapter 3, (Minimum Jail Standards) of the California Code of Regulations.

2. The inmate shall be allowed unlimited US Postal Service Privileges in his/her case at the inmate’s own expense.
   a. Outgoing “Legal Mail” may be sealed.
      • Incoming mail readily identified as “Legal Mail” will only be opened and searched for contraband in the presence of the Pro Per Inmate.
   b. Indigent Pro Per Inmates shall be provided a reasonable amount of postage to accommodate the defense of their case.
• Any postage granted by the Court will be controlled by the Sheriff’s Fiscal Services Unit for purposes of accountability.

• Pro Per inmates who exhaust their funds through the purchase of commissary will not be entitled to free postage for three weeks following the most recent commissary purchase.

3 Mail will be picked up using the same process as is currently used for outgoing US Mail within the Sheriff’s Detention Facilities.

4 Sheriff’s Office inter-office mail will not be used to deliver Pro Per legal documents to the court.
   a. Inmates will use their legal runners for this purpose
   b. This prevents allegations of interference by the Office of the Sheriff with the Inmate’s case.

G. LEGAL REFERENCE AND MATERIALS

1. Inmates shall have access to legal reference materials and research services in accordance with CSB Policy and Procedure 2.18.14, Legal Reference Services.

2. Legal material shall be made available to inmates who wish to gather legal information pertinent to their current charges. The following guidelines shall apply:
   a. Inmates will have access to legal research materials through the established Legal Research Associates (LRA) process.
   b. Inmates may be challenged or denied requests, subject to Court review, if it appears the law materials requested are not relevant to the inmate’s charges, or are deemed excessive.
   c. Pro Per Inmates shall have priority on the use of legal reference materials, and thereafter requests from other inmates will be considered.
   d. Inmates may order law materials by submitting a request through the LRA Process. These requests will be delivered by CAS as soon as possible via normal delivery process.

3. The Pro Per Inmate may receive legal journals, law reviews, softbound law books and other legal documents.
   a. Any additional reference or resource material will require a specific Order of the Court, and a means to obtain the reference sought.
   b. This legal material may be delivered to the inmate’s facility by the inmate’s designated “Legal Runner”, investigator, or using the other common procedures within the facility.
c. All materials will be inspected for contraband as described in CSB Policy 2.17.01.
   - Legal materials directly relating to the inmate’s case will not be read.

4. Pro Per Inmates may only be permitted to possess the number of books or journals regularly allowed in CSB Policy 2.16.02.

5. Excessive legal material will be stored in the inmate’s personal property until final release.

6. Limitations on legal material stored in Pro Per Inmate rooms will follow the guidance of the California State Fire Marshall and is essential to limit potential fire hazards.
   a. Pro Per inmates may be provided with one box without a lid to store legal material.
      - One box of legal material will be allowed to be stored in the Pro Per inmate’s cell.
      - Any material that cannot fit in the box will be removed and placed into the Pro Per inmate’s property.
         - Property may be released to someone outside the facility as described in CSB policy 2.11.21
      - Pro Per inmates will be responsible for inventorying all items being placed into storage.
   b. Inmates may make reasonable requests for access to legal materials stored in their property, provided they know which box they require.
   c. Facility Staff will process the request in a timely manner and as determined by the needs of the facility.

7. All legal materials are to be purchased by the Pro Per Inmate. Legal materials purchased by Pro Per Inmates are subject to inspection by Custody Staff for the presence of contraband.

8. Legal material not available through the LRA request process may be obtained through the use of a “Legal Runner” or by submission of a request to the County Law Library. Completed requests from Pro Per inmates for materials from the County Law Library will be retrieved by the designated Legal Runner or Private Investigator and provided to the inmate. These materials are subject to inspection by custody staff for the presence of contraband.

H. DIGITAL MEDIA

1. Digital Discovery may only be provided to a Pro Per inmate for the case in which the inmate has been granted Pro Per status.
2. Digital media may only be provided by the District Attorney or the Court in which the defendant is being heard. CAS may facilitate the exchange with the inmate.

   a. The types of digital media which will be accepted are:
      
      - CD
      - DVD
      - Small Flash “Thumb” Drive
        
        - Only one drive per inmate will be allowed in the facility at a time without written approval from the facility commander.

   b. All digital media will be clearly labeled with the following information:
      
      - Inmate name
      - Brief description of contents
      - If there are multiple discs being submitted on the same day, they must be numbered. (ex. 7/8/15 – 1 of 3)
      - The information must be labeled directly onto any DVD/CD.
      - An envelope must be provided to hold any flash drive and must be labeled with the required information and docket number.

3. Storage of Digital Media

   a. The Digital Medial will be turned over to a Legal Runner or Private Investigator once one is approved and ordered by the court.

   b. In the absence of a Court Ordered Legal Runner or Licensed Private Investigator, digital media will be stored in the CAS office at the facility where the inmate is being housed.

      - Once Pro Per status is removed, the Digital Media will be placed in the inmates’ shelf property.

4. Viewing Digital Discovery

   a. No Equipment will be provided by the Custody Services Bureau.

   b. Court Ordered Private Investigators will be permitted to bring in a laptop for viewing digital discovery with the inmate only after the Custody Services Bureau has received a court order specifying that he/she is authorized to facilitate the viewing of digital discovery.
• The approval of the facility commander or the CAS Lieutenant will also be required in complying with the court order for the viewing of digital discovery to ensure the safety and security of the facility.

• Before Digital Viewing visits are approved, the Investigator must have passed a security clearance performed by the CAS.

• Visits for the purpose of viewing media will be allowed during normal visiting hours and will not require a scheduled appointment. If there are no available visit rooms to view media, the Private investigator will be asked to return at another time.

• The inmate will be allowed to schedule a visit for the purpose of media viewing to ensure room availability.

• The laptop computers will be examined at the time of check in and at the request of any deputy sheriff at any time. The investigator will be informed that they are not permitted to use the Internet while in the detention facility. Internet usage shall not be allowed by any Investigator on any device within a Contra Costa County detention facility. Any violation of policy or misuse of a laptop computer will be grounds to terminate the visit and may result in the Investigator’s clearance being revoked.

• Laptop computers must be taken from the facility by the Private investigator after the visit has concluded.

• Laptop computers shall not be used to take photos or record any video or audio files, without prior written approval from the Facility Commander or the CAS Lieutenant.

I. COURT ORDERED TELEPHONE PRIVILEGES

1. Pro Per Inmate telephone calls will be made at the expense of the Pro Per Inmate, unless the Pro Per Inmate is designated as being indigent by the court.

2. No inmate may provide their Personal Identification Number (PIN) to any other inmate under any circumstances.
   a. Such attempts will be documented and forwarded to the court for review of the inmate’s pro per status.
   b. Pro Per Inmate telephone calls are not to be made on the behalf of other inmates.

3. Pro Per Inmate telephone privileges are restricted to outgoing telephone calls only.
   a. Pro Per Inmates shall not knowingly participate in a forwarded, transferred, or third-party calls per CSB policy 2.17.08.
4. Pro Per Inmates will be permitted a maximum of 280 minutes of telephone calls per week. (Sunday through Saturday)

   a. Pro Per Inmates may provide a list of up to three telephone numbers to be used as an “Allow List” on the pro per phone. The Allow List must be submitted to CAS within a reasonable amount of time after being approved by the court. The list of phone numbers will be limited to the following:

      - Court Ordered Legal Runner.
      - Court Ordered Licensed Private Investigator.
      - One additional number as approved by the court.
      - Any changes to the Allow List of phone numbers will require approval by the court.
      - Phone numbers will be added to the inmate’s “P.I.N.” once the number is verified by CAS as being a good working number for the person ordered by the court.

   b. Pro Per Inmates shall be allowed two phone calls daily.

      - It is the inmate’s responsibility to manage their 280 minutes per week.

   c. Calls may be made between 0800 and 2200 hours, providing the operation of the facility of the facility and its security are not compromised.

   d. Inmates may request to use the Pro Per phone at a specific time.

      - The inmate must establish the need for use at the specific time.
      - The inmate must provide at least 24 hours notice of the need.
      - Housing unit deputies will honor the request provided it does not interfere with the needs or security of the facility.

5. Housing unit deputies shall log all Pro Per activity into JMS.

J. SUPPLIES AND EQUIPMENT

1. CAS will provide a one-time issue of the following materials to the inmate upon receipt of the inmate’s Pro Per status Court order:

   a. One (1) expanding file folder

   b. Two (2) legal tablets

   c. Five (5) legal folders
d. Five (5) golf pencils

e. Twenty Five (25) legal size envelopes

2. Additional supplies shall be purchased from commissary at the inmate’s expense.

3. Indigent inmates may be provided additional supplies within reason and are limited to the supplies listed above (III, K, 1).

   a. The inmate’s fund balance will be verified before further materials are provided by CAS. Inmates who exhaust their account by purchasing commissary and fail to purchase stamps, supplies, etc., will not receive free postage or supplies for three (3) weeks.

4. Courts will accept legal documents in pencil from inmates.

5. Inmates assigned Pro Per status will purchase supplies available through commissary. All other requests will be made through CAS. Supplies not obtained through commissary must be approved by CAS after a security clearance examination.

6. Ink or ballpoint pens, staplers, staples, paperclips, binding clips or items to bind or maintain documents and/or materials that are otherwise deemed to be a security risk shall not be permitted. The Court will not order “ink” or “ballpoint” pens to be provided or made available to inmates.

7. Requests by Pro Per Inmates for any other supplies not available through commissary, may be made directly to CAS. Each request shall be reviewed on an individual, as needed basis, with CAS staff making the final decision.

K. SUBPOENAS

1. The court shall issue blank subpoena forms to each Pro Per inmate per PC 1326.

   a. Subpoenas may be reviewed by the court to ensure the subpoena process is not abused.

   b. Inmates abusing the subpoena process are subject to restriction or termination of their Pro Per privileges.

2. Subpoena of witnesses shall be at the inmate’s expense.

   a. In the event the prisoner is without funds, he/she will complete an In Pauperis form supplied by LRA.

   b. Inmates may send completed subpoena forms to the Office of the Sheriff Civil Unit for completion of service.

      • Inmate’s legitimately filing Fee Waiver “In Forma Pauperis” will have all filing fees waived.
L. PRE AND POST-TRIAL REQUESTS

1. Any pre-trial or post-trial requests for Pro Per privileges other than those specified regarding Pro Per privileges shall be heard only in the appropriate criminal calendar or pre-assigned criminal trial department.
   a. In-trial requests may be made and heard in the trial courts.
      • The Trial court judge will act in consultation with the appropriate criminal calendar department.

2. Pro Per inmates alleging violations of this policy shall be forwarded to the criminal calendar or criminal trial judge for hearing.
   a. The hearing will be limited to only the issue that was forwarded for review.

3. Pro Per inmates may report any alleged violations of Pro Per policy through the inmate appeals process.
   a. Refer to CSB Policy and Procedure 2.16.05, Inmate Appeals for additional information.
   b. No petition or motions concerning alleged policy violations will be considered by the court until the inmate first complies with administrative procedure via inmate appeal.
      • Exception: The court will consider unusual circumstances that indicate compelling reasons that this procedure would result in substantial prejudice to the inmate.
      • The court will additionally consider the appropriateness of any action taken by the facility administrator in response to this information.

M. SUSPENSION OF PRIVILEGES

1. The Office of the Sheriff may terminate the court-ordered privileges of any Pro Per inmate with appropriate cause.

2. Except in emergency circumstances, Pro Per privileges may not be restricted or terminated as a condition of either jail discipline or administrative segregation without complying with the following procedures:
   a. The Sheriff’s Office must provide the inmate with 24 hours advance notice of the intent to restrict or terminate the inmate’s privileges and that a hearing before the decision making body will take place.
   b. The inmate is provided with the opportunity to appeal the restriction/termination of privileges.
c. The inmate is provided with an opportunity to present witnesses and documentary evidence.

- Exception: If the presentation will not be unduly hazardous to the security of the facility.

d. The Sheriff’s Office must provide the inmate with a written statement of the evidence relied upon.

- This may be in the form of an Incident Report
- Specific reasons for the action taken may be included in the statement unless institutional safety and/or the security of the facility is in jeopardy.

e. The Office of the Sheriff shall notify the court before whom the inmate’s case is pending of the desire to restrict or terminate the Pro Per privileges of the inmate.

- The notification shall be made no later than two (2) days after the hearing.
- The notification shall include:
  - Copies of relevant incident reports.
  - Results of the disciplinary hearing committee’s recommendations.
- Unless emergency circumstances exist, the inmate’s Pro Per privileges should not be restricted or terminated until the court has the opportunity to modify the order granting Pro Per privileges.
- The court should hold a hearing to review the recommendations of the Sheriff’s Office and provide the inmate with an opportunity to appear and object to the decision.
  - The court will hold the hearing no more than three (3) days following the hearing.

3. In emergency situations, The Office of the Sheriff may immediately restrict the Pro Per privileges of an inmate prior to the court issuing a modified order.

a. The Sheriff’s Office shall provide the inmate with a written notification of such an action.
b. The Sheriff’s Office must ensure that the court has been notified of the revocation.

- The notification shall include:
  
  - Copies of relevant incident reports.
  
  - Results of the disciplinary hearing committee’s recommendations.

- The court will hold a hearing on the revocation no more than three (3) days following the revocation.

4. Pro Per inmates will be assigned housing according to Classification criteria.

5. An inmate’s Pro Per status shall be terminated upon notification from the court.

6. An inmate’s Pro Per status shall be terminated within seven (7) days of final sentencing.

7. The court may order a hearing at the inmate’s request to determine if any suspended Pro Per privilege should be restored, modified or permanently revoked.
I. POLICY

A. The facility shall provide access to legal materials and research services that meets the requirements of law, judicial mandates, accreditation standards, and Legal Assistance Program needs.

B. Pro-Per inmates shall be allowed access to these services.

C. Legal Research Associates shall provide legal reference materials and research services. Legal Research Associates shall be responsible for ensuring that all legal reference materials are current and meet required service levels.

II. DEFINITIONS

A. PRO-PER INMATES: Inmates who are appearing in a defined court action without counsel.

B. ACCESS- Access shall be considered to mean the ability to obtain information through the service provider, or as directed by the Facility Commander.

III. PROCEDURE

A. INMATE ACCESS

1. All inmates are allowed one (1) legal request per calendar month with up to five (5) items.

   a. Federal Detainees access to copies of legal documents will not be restricted.

   b. Federal Detainees will not normally be denied access to the law library. If access to the law library needs to be restricted, an Incident Report detailing the reasons will be generated and forwarded to Immigration and Customs Enforcement.
c. Federal Detainees housed in Administrative Segregation or Disciplinary Segregation units shall have the same law library access as the general population, unless compelling security concerns require limitations.

2. Requests for legal reference material and research services shall be made using the Legal Information Form. The form will be made available at each housing unit.

3. The inmate will complete the form and submit it to the Housing Unit Deputy.

B. PROCESSING

1. Deputies shall accept all Legal Information Request forms.
   a. Upon receiving a Legal Information Request from an inmate, the deputy shall note the request in the inmate’s JMS History.
   b. The deputy will forward the request to Custody Administrative Services by the end of his or her shift.

2. The CAS Specialist will retrieve all requests at the beginning of each normal Workday (Monday through Friday).
   a. An Inmate Legal Request Log will be maintained.
   b. Each request will be assigned a tracking number.
   c. Requests will be e-mailed each normal workday to Legal Research associates at LAWSEARCHASSOC@AOL.COM, or faxed to (510) 581-3748.

C. RECEIPT AND DISTRIBUTION OF LEGAL MATERIALS

1. Packages from Legal Research Associates will be shipped via private courier.
   a. A log of all packages received from Legal Research Associates will be maintained in Operations.
   b. The Operations Clerk receiving the package will make an entry in the log.
   c. The clerk will forward the package to the CAS Specialist.

2. The CAS Specialist, using the tracking numbers, will record the receipt of each completed request in the Inmate Legal Request Log.
   a. The CAS Specialist will deliver all materials in accordance with CSB Policy and Procedure 2.17.01, Inmate Correspondence and Mail Regulations.
I. POLICY

A. Chaplain staff assigned to the Detention Division will provide limited assistance in making arrangements for inmate marriages.

II. PROCEDURE

A. Scheduling Marriages

1. Marriages will only be allowed between 8:00 – 11:00 a.m. on Thursday at WCDF or between 1:30 – 4:00 p.m. on Thursday at MDF or MCDF.

2. The marriage ceremony will be conducted in a non-contact visiting room at the discretion of the Facility Commander or designee.

3. Only people eighteen or older may be married in County Detention.

B. Marriage Ceremony

1. Flowers and/or cameras are not allowed at the ceremony.

2. Media coverage will not be permitted.

3. An inmate bride or groom will wear jail clothing.

4. Inappropriate behavior (such as revealing the naked body) during the ceremony, or the visiting period thereafter, will be cause for termination of the ceremony and/or visiting period.

C. Inmate Marriage Responsibility

1. Inmates desiring to be married will submit an Inmate Request Form to the Facility Chaplain requesting the information packet on Detention marriages, “How to Get Married While in County Detention.”
a. The inmate will complete the Court Order Form and Confidential Marriage Application, both included in the information packet, and forward them to the intended spouse.

2. It is the inmate’s responsibility to convince a judge to sign the court order for marriage.
   a. The inmate may deal directly with the intended spouse, legal counsel, or a friend to obtain the signature of the judge.
   b. The Facility Chaplain is not responsible for obtaining the judge’s signature and the County Clerk will not issue a license for an inmate marriage without a court order.

3. The intended spouse must take the Court Order Form and the Confidential Marriage Application to the County Clerk’s Office and purchase the marriage license.
   a. If both parties to the proposed marriage are in custody, then both must obtain court orders authorizing their marriage.
      • In this case, a relative, friend, or legal counsel is responsible for obtaining a judge’s signature on both court orders and for purchasing the marriage license.
   b. Health certificates are not required

4. An inmate should not make application for marriage if already claiming to be married or if the intended spouse is listed as a family member in the inmate’s booking records.
   a. An inmate or intended spouse must arrange/schedule clergy to perform the marriage ceremony.

5. Following the marriage ceremony, the spouse (or designee if both spouses are in custody) will file the license at the County Clerk’s Office.
   a. Inmates desiring visits (non-contact only in Contra Costa County Detention Facilities) must ensure their spouse is included in their authorized visitor’s list.
   b. In the event an inmate has been reassigned to a state or federal facility, they must take a certified copy of their marriage license with them to prove marital status. Otherwise, family visits at these facilities will not be permitted.

6. Failure of inmates to comply with any and all requirements of this policy and procedure will result in the cancellation, postponement, and/or denial of the ceremony.

7. Same sex inmates whom are married to each other will not be housed together.
D. Facility Chaplain’s Responsibility

1. The Facility Chaplain will forward a copy of the information packet on Detention marriages when requested by an inmate.

2. All inmate marriages occurring in County Detention must be cleared through the Facility Commander or his/her designee and only by court order.
   a. Facility Chaplains do not perform Detention marriages; it is the responsibility of the inmate/intended spouse to schedule outside clergy to perform the wedding.

3. The Facility Chaplain will obtain the inmate’s signature on the Marriage license and hear the oath.
   a. The County Clerk will forward the marriage license to the Chaplain’s Office.
   b. Inmates at WCDF and MCDF need to allow two weeks processing time after purchasing the license.

4. The Facility Chaplain will provide the completed license to the applicable Detention receptionist.
   a. The Facility Chaplain will ensure the receptionist provides the spouse and their clergy with the completed license upon their arrival for the marriage ceremony.

5. In cases where the out of custody spouse is in need of money for the purchase of a license, the inmate may obtain approval from the Facility Commander (upon recommendation of the Facility Chaplain) for a cash release in the amount of the license to the spouse.

6. The Senior Chaplain will report the number of marriages performed at each Detention facility within their quarterly Program Activity Report.
I. POLICY

A. The Housing Unit Workers will be responsible for the cleanliness of the common area within each Housing Unit, activity rooms, showers, staff toilets, sally ports, courtyards and any other area when directed by the Housing Unit Deputy.

B. Inmates will be responsible for the cleanliness of their respective rooms.

C. All necessary cleaning material (disinfectant, cleanser, brooms, mops, etc.) will be stored in a locked closet within each Housing Unit.

II. PROCEDURE

A. DAILY HOUSING UNIT WORKER RESPONSIBILITIES

1. Clean all table tops in common area
2. Clean pantry and mop floor
3. Clean microwave ovens
4. Wipe down juice and coffee machines
5. Vacuum carpets in all common areas
6. Sweep activity rooms, courtyards and corridors and sally ports
7. Mop activity rooms and corridors
8. Spot clean all windows where needed
9. Wipe down telephones
10. Dust all TV’s, bookcases & furniture
11. Clean and disinfect inmate shower and bathrooms
12. Clean and disinfect staff restroom
13. Empty and wipe out waste containers
14. Clean sink and refill dispensers
15. Clean marks from doors and walls
16. Cleaning prior to and after meal service will be done daily in the following manner when applicable:
   a. The pantry area will be cleaned prior to serving meals
   b. Any juice or coffee spillage will be wiped up
   c. Microwave ovens will be checked to ensure they are clean
   d. All tables where eating will occur will be damp wiped off
   e. After meals have been served, the pantry and tables will be cleaned before recreation and social activities resume
   f. All excess food will be returned to the kitchen
   g. Food waste and scraps will be disposed of and removed from the housing unit
   h. Any spillage on the carpet or tile will be cleaned immediately.

B. WEEKLY HOUSING UNIT SERVICE

1. Common Area of the Housing Unit will be cleaned prior to the Weekly Inspection.
2. Spin clean carpet the night before inspection
3. Vacuum all carpets to include moving furniture and vacuum underneath
4. Spot clean soiled spots on carpet
5. Dust or wipe down all recreation equipment and furniture
6. Clean all table tops and wipe down pedestals
7. Clean all windows accessible from inside Housing Unit
8. Clean outside of windows from courtyard
9. Straighten books in bookshelves and dust
10. Dust window sills, over doors, stairs and railings

11. Mop and buff all tile floors

12. Pantry
   a. Clean pantry counter top, doors and shelves
   b. Straighten and dust inside of cabinets and drawers

13. Other Housing Unit Rooms (Visiting, storage, showers, etc.)
   a. Showers and staff toilets will be cleaned daily, however, once a week they will be dusted above doors and the walls wiped down.
   b. The Housing Unit storage room will be straightened, dusted and mopped.

C. HOUSING UNIT WORKER RESPONSIBILITIES - MCDF

1. Inmate Housing Areas
   a. Monday, Wednesday, Thursday, and Friday dorms are to be vacated from 0800 to 0845 of all inmates except dorm orderlies.
      • Exceptions may be made for ill inmates or inclement weather.
   b. Dorm orderlies will be responsible for the cleanliness of the common area within each dorm, inmate rest room, courtyard area adjacent to their respective dorm daily and other areas as directed by the Dorm Deputy.
   c. Each inmate will be responsible for the cleanliness of his respective bed area daily.
   d. The Dorm Deputy will ensure that the dorm orderlies perform weekly/daily housekeeping duties so as to maintain the acceptable level of cleanliness required, including a thorough cleaning of the dorm, mopping and waxing of the floor and other duties as to meet the requirements of the weekly inspection.
   e. All Dorm refuse is to be placed in trash containers that are located at accessible locations throughout living quarters in the facility. All receptacles and containers are to be emptied and cleaned daily.
I. POLICY

A. An inmate assigned to a landscaping project outside of the West County Detention Facility compound will be under the direct supervision of the Landscape Program Supervisor and/or Custody Staff.

B. The Landscape Program Supervisor and Custody Staff will be responsible for ensuring the safety and security of the facility, staff and public, maintaining a standard of control against the introduction of contraband and the prevention of inmate escape.

II. PROCEDURE

A. General operation of this program will be as follows:

1. Wednesday unless prior arrangements are made with MCDF staff

2. Hours: 0900-1500hrs

3. Any variation to the above schedule shall have prior approval by the Facility Commander or Designee.

B. All inmates must be cleared by the Classification Unit prior to being assigned to Landscape Crew.

C. The Landscape Program Supervisor and/or Custody Staff will notify Central Control when a Marsh Creek Detention Facility (MCDF) inmate landscaping crew has arrived at the West County Detention Facility and is working around the perimeter of West County Detention Facility compound.

1. Central Control will notify Shift Sergeant and the Perimeter Unit.

2. Central Control will provide a portable radio to the MCDF Custody Staff upon arrival.
D. The inmate landscape worker will be under direct supervision at all times by the Landscape Program Supervisor and/or Custody Staff.

1. If, for any reason, the Landscape Program Supervisor and/or Custody Staff must leave the area, they shall notify Central Control, and request a Sworn Staff Member respond and stay with the inmate landscape crew until the Program Supervisor and/or Custody Staff returns. Central Control will notify the Custody Sergeant who will assign a deputy to respond. The Program Supervisor and/or Sworn Staff will not leave the crew until the responding Deputy(s) arrive.

2. MCDF landscaping crew inmates will be dressed in the following attire:
   a. Blue Jeans
   b. Gray sweatshirt and/or white undershirt/T-shirt
   c. Work boots
   d. Optional rain gear/approved baseball caps

E. All tools and equipment needed for the landscaping project will be provided by the Landscape Program Supervisor unless prior arrangements are made.

F. MCDF landscaping crews will bring their own meals and beverages, so as to be self-sufficient.

G. In the event the assigned inmate worker(s) are not in the sight of the Landscape Program Supervisor and/or Custody Staff, Central Control and the Shift Supervisor will be notified immediately.

1. If the inmate(s) cannot be located and an escape has been verified, CBS Policy and Procedure 2.08.33, Escapes will be implemented by the West County Detention Facility Shift Supervisor.
I. POLICY

A. The MCDF Woodshop shall be funded through Inmate Welfare Funds (IWF) as well as Office of Education Adult School funds.

B. It shall be operated in a safe, efficient manner.

C. Toys and bicycles produced by inmates in the MCDF Woodshop Program shall be available for donation to qualifying organizations for distribution to underprivileged children residing in Contra Costa County.

II. PROCEDURE

A. The Director of Inmate Services shall:

1. Determine the acceptability of all organizations requesting donations from the MCDF Woodshop.

   a. Organizations must meet the following standards to be eligible for participation:

      • Provide IRS non-profit 501(c)(3) exempt status documentation.

      • Provide By-Laws or agency policy stating all donated toys or bicycles will be distributed to underprivileged children.

   b. A limited number of organizations may be approved to accept toy and/or bicycle donations to auction for the purpose of raising funds to benefit children. A maximum of 20% of all toys/bicycles produced annually will be designated for this purpose.

      • The same eligibility standards identified above must be met.

   c. In order to continue to receive MCDF Woodshop donations, organizations approved for participation must provide the following:
• A list of agencies or community groups that benefited from donated toys.

• A minimum of ten color photos of toy recipients.

B. The Woodshop Instructor shall:

1. Provide vocational training to eligible inmates.

2. Maintain all teaching and record keeping requirements and shall report to the Director of Inmate Services for all operational and administrative matters.
   a. During the period when employed by the Office of the Sheriff (up to 8 hours/week paid through IWF Funds)
   b. Information shall be provided directly to the MCDF Facility Commander in the Director of Inmates Services absence.

3. Continually stress and monitor safety standards regarding proper use of shop tools and equipment, safety equipment (i.e., goggles, gloves, etc.), and hazardous materials.

4. Ensure all hazardous materials are maintained and stored in OSHA approved storage cabinets.

5. Maintain all shop tools and equipment in good working order.

6. Maintain the cleanliness of the shop.

7. Order required supplies as per existing blanket purchase orders. Supplies, minor equipment, and equipment maintenance are properly charged to the IWF.
   a. Questions regarding authorized IWF budget amounts may be addressed to the Director of Inmate Services.
   b. Questions regarding authorized vendors can be addressed to MDF accounting staff.

8. Maintain an inventory of manufactured toys and refurbished bicycles.
   a. This information will be shared with the Office of Education Adult Schools Principal, the Director of Inmate Services, and the Volunteer Donation Coordinator and the MCDF Facility Commander.
   b. Wood toys shall be segregated by type and stored in designated areas.

9. Refer all organizations requesting donations to the Director of Inmate Services.

10. Coordinate the participation of all approved organizations.
11. Recommend the annual open house date and time to the Director of Inmate Services.
   a. The Director of Inmate Services shall coordinate this event with the Office of Education Adult Schools Principal, the CSB Assistant Sheriff, the Detention Captain, the MCDF Facility Commander, and the Sheriff.
   b. After this date has been approved, the Director of Inmate Services shall advise the Woodshop Instructor who in turn will inform all participating organizations.

12. During the open house, collect all requested donations and compare this list against available inventory.
   a. Agency needs will be accommodated as best as possible (all agencies shall receive a pro-rata share of available inventory if total demand exceeds total supply).
   b. All participating organizations shall be contacted and informed of their donation share.

13. He/she shall coordinate agency pick-up of toys and bicycles the first week of December.
   a. A list of participating agencies and their allotted toys and bicycles shall be provided the Director of Inmate Services after the pick-up phase has been completed.
I. Policy Statement
   A. The Forensic Services Division (FSD) exists to provide the public with the highest quality of service in the recognition, collection, preservation, scientific analysis, and interpretation of physical evidence, and its presentation in court. Towards this purpose we are dedicated to serving the interests of justice to the best of our ability. The Division is committed to continually improve the effectiveness of the management system and ongoing compliance with ISO/IEC 17025 and ANAB requirements.

II. Quality Management System
   A. A quality management system has been established to ensure the quality of service and to provide the criminal justice community with the continuing confidence that laboratory results are and remain accurate, impartial and relevant. The management system, with its checks and balances, allows management to have confidence in the staff’s work and assures that the work product is consistent and of superior quality.

      1. When changes are made to Division policies and procedure, the integrity of the management system is maintained by having the QA Coordinator, facility managers, and the Chief of Forensic Services review documents prior to being published. In addition, a manager reviews and approves all technical unit documents prior to being published. When changes are made to Division processes (typically as a result of a Quality Action), the integrity of the management system is maintained by having the QA Coordinator, facility manager, or the Chief of Forensic Services review and approve the proposed changes.

      2. All personnel involved in analysis shall familiarize themselves with the management system documentation and implement the policies and procedures in their work. Laboratory activities shall be carried out in such a way as to meet the requirements of Division and Unit policies and procedures, the laboratory's customers, regulatory authorities, and organizations providing accreditation. The management system covers all work performed by technical units within the laboratory facilities and at locations away from the facilities. The published versions of all Division Unit documents are available to staff at all locations where staff perform work through PowerDMS.

         a. PowerDMS is an on-line document management system.

         b. All staff have access to PowerDMS on their computers or mobile devices.

   B. Management Goals-The goals of the Forensic Services Division are:

      1. To provide highest quality of service in as timely a manner as possible.

      2. To satisfy the needs of its customers by performing accurate examinations of physical evidence using methods accepted within the forensic science community.

      3. To communicate the results of analyses and the opinions of examiners by means of intelligible written reports and competent testimony.

      4. To increase the staff that hold individual certifications.

   C. Management Objectives-The objectives of the Forensic Services Division are:

      1. To ensure initial and on-going competence of individuals authorized to perform forensic analysis through competency testing, proficiency testing and professional development.

      2. To ensure the validity of examination results by utilizing validated procedures, appropriate equipment and the technical and administrative review process.

      3. To preserve the integrity of evidence within the custody of the Division.

      4. To provide appropriate training to law enforcement officers.
5. To receive, analyze and consider customer feedback as part of the management review and take appropriate action when deemed necessary.

D. Accreditation

1. The laboratory only claims conformity to ISO 17025 and accreditation from ANAB for range of laboratory activities listed on our most current scope document from ANAB.

2. The range of activities covered by our accrediting body is available on the ANAB website (certificate and scope documents).

END OF DOCUMENT
I. POLICY  
The Forensic Services Division (FSD) is part of the Contra Costa County Office of the Sheriff. The FSD is divided into sections, then subdivided into units.

A. The Forensic Services Division is composed of the following sections with their associated units:

1. Criminalistics Section
   a. Biology Unit
   b. Comparative Evidence Unit
   c. Latent Print Unit
   d. Crime Scene Unit
   e. Digital Evidence
   f. Clerical Unit

2. Drugs, Alcohol and Toxicology Section
   a. Drug Unit
   b. Alcohol Unit
   c. Toxicology Unit
   d. Clerical Unit

3. Property and Evidence Services Section

B. Job Classifications

1. See FSD.03 for more information about job classifications and assignments.

2. Some job classifications within the FSD may be held by sworn or non-sworn staff (eg. Forensic Supervisors and Criminalists).
Contra Costa County
Office of the Sheriff
FORENSIC SERVICES DIVISION

REVISION DATE: 01/02/2019
NUMBER: FSD.03 - Personnel

RELATED ORDERS:

APPROVED BY: Pamela Hoßass

ANAB: 5.5, 5.6, 6.2

CHAPTER: Quality Management System

SUBJECT: Personnel

I. POLICY The laboratory shall have available the personnel and support services necessary to manage and perform its laboratory activities.

A. ALL FSD STAFF-All personnel of the laboratory, either internal or external, that could influence the laboratory activities shall:

1. Act impartially-see FSD.13 for expectations and requirements for impartiality.
   a. There are personnel within the Sheriff's Department that have an involvement in testing. These individuals may request expedited and/or additional analysis but cannot request violations of accreditation criteria. Their respective responsibilities are specified in the links below as well as Department Policy 1.03.02.
      i. Sheriff
      ii. Undersheriff
      iii. Assistant Sheriff

2. Work in accordance with the laboratory's management system-see FSD.01 for expectations and requirements for personnel working in accordance with the laboratory's management system.
   a. When contracted personnel are used by the laboratory, the contracted personnel will be supervised, competent to perform the contracted work, and will perform work in accordance with the laboratory's management system.

3. Be competent-the laboratory documents the competence requirements for each function influencing laboratory activities with job descriptions and task lists (if applicable).
   a. Job Descriptions-the County Human Resources Department, under the auspices of the Merit System, has prepared job descriptions for each job title within the County. A description of the minimum qualifications, including education and experience, and typical duties for each job title within the Division has been created. Job descriptions are essential for the hiring and promotion of qualified employees and for assuring that employees understand what tasks they are expected to perform. Division employees are expected to read and be familiar with the job description for their respective positions. Division employees should expect that they could be required to perform any of the duties described within the employee's job description regardless of current assignment. Additional duties can also be required which are not specifically stated within the job description but may be included as "other related work as required". The job descriptions serve two functions:
      i. They state the minimum qualifications, which an applicant must have to be considered for the described position. The minimum qualifications may include certain requirements for education, work experience, health, licenses, skills, and knowledge.
      ii. They describe the nature of the job and list many of the typical tasks, which may be required. The job descriptions will state whether a position includes supervisory responsibilities, the degree of independence that the employee will be expected to exhibit, and how a position differs from similar job categories.
      iii. Current copies can be obtained from the Human Resources Department web site. The following is a list of job titles within the Division:
         1. Chief of Forensic Services (Laboratory Director)
         2. Deputy Sheriff-Forensic Manager
         3. Forensic Manager
         4. Sheriff's Director of Property & Evidence
         5. Deputy Sheriff-Forensic Supervisor
6. Forensic Supervisor
7. Deputy Sheriff-Criminalist I, II & III
8. Criminalist I, II & III
9. Crime Scene Investigator I & II
10. Fingerprint Examiner I & II
11. Fingerprint Technician I & II
12. Forensic Analyst Project
13. Senior Clerk
14. Sheriff's Specialist
15. Sheriff's Aide
16. Student Intern I, II, III, IV & V

b. **Task Lists**-Supervisors or Managers may create task lists to document additional competence requirements.

B. **ALL TECHNICAL STAFF**-The laboratory documents the competence requirements for each function **influencing the results** of laboratory activities, including requirements for education, qualification, training, technical knowledge, skills and experience with job descriptions and training programs.

1. **Job Descriptions**-see above
2. **Training Programs**-see FSD.21 for expectations and requirements for training programs.

C. **ALL FSD STAFF**-The management of the laboratory communicates to personnel their duties, responsibilities and authorities through organizational charts, job descriptions, authorizations/task lists, assignments, and policy (if applicable).

1. **Organizational Charts**-see FSD.02.
2. **Job Descriptions**-see above
3. **Authorizations**-see FSD.21 for expectations and requirements for authorizations.
4. **Assignments**-employees may be given job assignments within the Division. Examples include:

a. **Technical Lead**-In addition to meeting the requirements of the job description, staff designated as Technical Lead will have a baccalaureate degree and at least three years of experience as an analyst performing comprehensive examinations of complex casework and experience as an expert witness. All individuals with technical responsibility are responsible for:

   i. implementation and improvement of the management system

   ii. identification of non-conformities from the management system or technical procedures and assessment of the severity of that deviation

   iii. initiation of actions to prevent or minimize such deviations (improvement opportunities and risk prevention actions)

   iv. addressing corrections and corrective actions

   v. reporting to laboratory management on the performance of the management system and any need for improvement

b. **QA Coordinator**- The QA Coordinator (along with Top Management) is responsible for the activities of the quality system including ensuring compliance with applicable accreditation requirements, implementation and maintenance of the management system, and ensuring the effectiveness of laboratory activities.

c. **Safety Coordinator**

d. **LIMS Administrator**

e. **CODIS Administrator**

5. **Division and Unit Policy**-see table below for personnel, their duties, and links to Division and Unit policy and procedure for responsibilities and authorities.
D. **ALL TECHNICAL STAFF**-The management of the laboratory specifies the responsibility, authorities and interrelationships of all personnel who manage, perform or verify work affecting the results of laboratory activities through organizational charts, job descriptions, authorizations/task lists, assignments, and policy (if applicable).

1. See details above.

</tbody>
</table>
E. **Records**-the laboratory shall retain records for:

1. Determining the competence requirements-see [FSD.21](#) for expectations and requirements for competence requirements.

2. Selection of personnel-Managers will maintain records for the selection of personnel. Records should include:
   a. Announcement
   b. Application
   c. Selection

3. Training of personnel-see [FSD.21](#) for expectations and requirements for training requirements.

4. Supervision of personnel-A number of policies and procedures address supervision of personnel. Policies are located in the Department Manual. Examples include:
   a. Command Control and Responsibility
   b. Performance Evaluations
   c. Personal Appearance
   d. Vacation Accrual and Use, Sick Leave
   e. Office of the Sheriff Propriety and Decorum, Courtesy and Bearing, and Unbecoming Conduct
   f. Corrective Counseling System
   g. Personnel Management and Employee Relations
   h. Personnel Files (documentation of evaluations, counseling, etc. are maintained in employee personnel files, access is subject to SO policy)

5. Authorization of personnel-see [FSD.21](#) for expectations and requirements for authorization requirements.

6. Monitoring competence of personnel-Monitoring of competence is accomplished in a variety of ways. Examples include:
   a. Proficiency testing-see [FSD.23](#).
   b. Technical review of casework-see [FSD.17](#).
   c. Court testimony review-see [FSD.26](#).
   d. Verification of results-see Technical Unit Manuals.
   e. Review of case files during internal audits-see [FSD.20](#).
   f. Direct observation of testing during internal audits-see [FSD.20](#).

END OF DOCUMENT
I. POLICY  The Chief of Forensic Services plans and manages all operations of the Forensic Services Division under general direction from the Office of the Sheriff.

A. The Chief reports directly to the Assistant Sheriff of the Support Services Bureau and is responsible for:

1. Carrying out the operations of the Forensic Services Division within policy guidelines set by the Sheriff.

B. The management responsibilities of the Chief include:

1. Planning and providing direction to both sworn and non-sworn staff in the collection, preservation, examination, analysis, and storage of physical evidence.

2. Developing and implementing operating policies of the Division and ensuring the laboratory's quality assurance policies are in accordance with the criteria of its accreditation body.

3. Monitoring implementation of policies and initiating corrective action as required.

5. Taking disciplinary actions as necessary.

6. Coordinating Forensic Division operations with other Divisions within the Office of the Sheriff, other County departments, and other law enforcement agencies.

7. Evaluating and making recommendations on personnel and equipment requirements.

8. Submitting an annual budget request for the operation of the Division.

9. Evaluating operating costs and assisting with the establishment of service fees.

10. Providing direction to staff to assure the quality of work conducted.

11. Coordinating the maintenance of assigned facilities and equipment.
12. Preparing detailed reports, correspondence, and statistical data related to activities of the Division.

END OF DOCUMENT
## I. POLICY

A section manager oversees the operations of several technical units within the Forensic Services Division. A section manager may have one or more technical unit supervisors as direct subordinates.

A. A section manager is responsible for effectively managing a complex technical organization including budget, facility, personnel, safety, and other resources for their respective section. Managers must use common sense and adopt quick, effective and responsible courses of action, giving due regard to the circumstances of each situation while working harmoniously with other Division and Departmental personnel, and representatives of other law enforcement agencies and the public. Managers must convey and share necessary information both up and down the chain of command in a timely manner and notify the Chief of any significant correspondence or issues. Managers are expected to be familiar with and follow Division, Department, and County policies and procedures as well as adhere to the ANAB Guiding Principles (also known as a code of ethics).

B. Typical tasks include but are not limited to:

1. Establishing, implementing and monitoring quality assurance policies and procedures for laboratory methodologies consistent with the criteria of the laboratory's accreditation body.
2. Evaluating and acquiring equipment.
3. Utilizing laboratory information management systems (LIMS) and related software.
4. Maintaining a safe working environment for personnel.
5. Assisting and advising the Chief of Forensic Services in personnel, budgetary and policy matters within the laboratory.
6. Preparing budgets, operational and statistical reports, and long range plans for the Chief of Forensic Services and user agencies using computer word processing, spreadsheets and graphics applications.
7. Applying for and managing grants.
8. Supervising and consulting with Forensic Supervisors regarding daily operations, staff productivity and performance.
10. Working closely with other Division managers to ensure consistent application of Division's policies and procedures.
11. Communicating clearly, concisely and effectively up and down the chain of command.

12. Ensuring the maintenance and security of section facilities.

13. Maintaining the coordination of evidence examination and security.

14. Delivering timely and cost effective services to clients.

C. The section manager is expected to have a working knowledge of and keep current in:

1. Basic principles involved in scientific methodology, current methods and techniques used in the forensic analysis of physical evidence.

2. Recent developments, literature and sources of information relative to forensic science.

4. Modern methods of classifying, indexing and filing and preserving laboratory records and evidence.

5. Quality assurance guidelines and the implementation of quality assurance procedures and monitoring.

6. Law enforcement principles and understanding of police terminology.

D. The section manager is also designated as the safety coordinator for their respective section.

END OF DOCUMENT
I. POLICY  Unit supervisors directly supervise technical and support personnel for the assigned forensic discipline within the Forensic Services Division.

A. A unit supervisor is responsible for effectively supervising their respective unit(s). Supervisors must use common sense and adopt quick, effective and responsible courses of action, giving due regard to the circumstances of each situation while working harmoniously with other Division and Departmental personnel, and representatives of other law enforcement agencies and the public. Supervisors must convey and share necessary information both up and down the chain of command in a timely manner and notify the Chief of any significant correspondence or issues. Supervisors are expected to be familiar with and follow Division and Department policies and procedures as well as adhere to the ANAB Guiding Principles (also known as a code of ethics).

B. Roles, Responsibilities, and Authorities:

1. Supervision
   a. Assigning duties to staff (e.g. casework, crime scene response, method development, training, etc.)
   b. Conducting performance evaluations of staff
   c. Coordinating staff coverage in a Unit
   d. Engaging in corrective counseling of staff

2. Oversight
   a. Providing technical supervision for the analysis of physical evidence or crime scene investigation activities
   b. Monitoring Unit quality assurance activities for conformance with Division policy and accreditation criteria
   c. Reviewing and updating technical unit procedures as needed
   d. Conducting, or coordinating, the technical review of casework and court testimony
   e. Identifying non-conforming work and determining the severity of the non-conformance and appropriate action to take
   f. Approving deviations from policy
g. Coordinating staff professional development (e.g. suggesting and reviewing training opportunities)

h. Recommending suspension or resumption of casework for an individual or for the Unit

i. Maintaining a safe working environment for staff

3. Problem-Solving

a. Determining general types of analytical tests to be performed on evidence submitted for examination

b. Assisting in technical problem solving

c. Assisting laboratory customers in the evaluation and interpretation of analytical findings

d. Communicating with laboratory customers to clarify their requests and provide relevant information about laboratory capabilities

e. Assisting staff if they feel any threat to their impartiality, resolving the issue, and taking steps to prevent recurrence

4. Improvements

a. Identifying opportunities for unit improvement and taking appropriate actions (e.g. proposing the acquisition of needed equipment and supplies)

b. Engaging in, or directing, research and validation to develop and improve analytical procedures

c. Evaluating and documenting the approval of all validations and methods, and approving new or modified procedures

d. Evaluating potentials for risk and taking appropriate actions

5. Training & Competency and Proficiency Testing

a. Supervising, or coordinating, the training of less experienced laboratory personnel and law enforcement officers in the methods of analysis used in the laboratory and the methods of collection and preserving physical evidence

b. Reviewing the training records for new hires and approve their qualifications prior to casework

c. Reviewing and approving training programs

d. Administering competency tests

e. Determining and documenting staff authorizations

f. Creating proficiency testing plans

g. Assigning and administering proficiency tests

h. Reviewing the results from proficiency testing and competency tests and determining satisfactory performance

C. The supervisor is expected to have a working knowledge of and keep current in:
1. The basic principles involved in scientific methodology
2. Current methods and techniques used in the laboratory analysis of physical evidence including microscopic techniques, comparative microscopy, spectro-chemical analysis, gas chromatography mass spectrometry and other scientific tests used in forensic casework
3. Accepted principles of supervising the work of others, including accepted principles of providing on-the-job training
4. Laboratory safety procedures
5. Recent developments, literature, and sources of information relative to forensic science
6. California laws of evidence, criminal procedure and crimes
7. Methods of classifying, indexing, filing and preserving laboratory records and evidence
8. Quality assurance guidelines and the implementation of quality assurance procedures and monitoring
9. Law enforcement principles and understanding of police terminology

D. Supervisors may also be involved with technical casework depending on the Unit's needs.

E. Supervisors may be assigned other tasks and duties (e.g. Quality Assurance Coordinator).

END OF DOCUMENT
I. POLICY The Quality Assurance Coordinator is responsible for coordinating the activities of the quality system including ensuring compliance with applicable accreditation requirements. The Quality Assurance Coordinator reports directly to the Chief in this job function and assists Section Managers and Technical Unit Supervisors with their roles in implementing and maintaining the quality assurance program.

A. The QA Coordinator's responsibilities, under the direction of the Chief, include:

1. Acting as a liaison to the laboratory's accrediting body, including but not limited to:
   a. Notifying the accrediting body of significant events of non-confirming work within 30 days of its occurrence.
   b. Preparing and submitting the Performance Declaration to the accrediting body with required elements.
   c. Coordinating the laboratory response to the Proficiency Review Committee (PRC) within the time frame specified by the accrediting body.

2. Coordinating the order of external proficiency tests, typically annually.

3. Maintaining and updating the quality management system policies and procedures in the Forensic Services Division Manual.

4. Implementing the document control polices and procedures for the laboratory.

5. Evaluating instrument calibration and maintenance records as part of internal audits and/or corrective actions.

6. Periodically assessing the adequacy of report review activities as part of internal audits and/or corrective actions.

7. Selecting and training internal auditors.

8. Proposing corrections and improvements in the quality system.

9. Monitoring Division practices to verify continuing compliance with policies and procedures and applicable accreditation requirements, typically as part of internal audits and/or corrective actions.

10. Scheduling and coordinating quality system audits.

11. Ensuring documented compliance with Division policy for required elements of a validation, typically by review of FSD.12.
12. Ensuring documented compliance with Division policy for required elements of a corrective action.
   a. This may include aiding in the investigation of technical problems and proposing remedial actions.
   b. The verification of implementation and evaluation of effectiveness of the corrective or remedial actions are typically assessed as part of an internal audit.

13. Recommending and coordinating training to improve the quality of Division staff.

B. The individual filling the QA Coordinator function may be selected from technical, supervisory, or management staff, depending on the staffing levels of the Division, the existing budget situation, and the needs of the Division.

1. The Chief may appoint a new QA Coordinator at any time depending on the needs of the Division; although the importance for stability at this position will be taken into consideration.

END OF DOCUMENT
I. POLICY  Each Section Manager is the Safety Coordinator for their section.

   A. The Safety Coordinator will be responsible for the regular monitoring their respective section's health and safety program. For more information regarding the responsibilities see SAF.02 (Roles and Responsibilities).

END OF DOCUMENT
I. POLICY  A Forensic Services Division employee will be designated as the LIMS Administrator to oversee the Division's LIMS system and as an interface with the Department's Technical Services

A. The LIMS Administrator will be responsible for the regular monitoring of the Division's LIMS program.

B. The LIMS Administrator may train Division staff as Assistant LIMS Administrators to assist in LIMS activities at the section or unit level. If needed, due to absence of the LIMS Administrator or under direction of the Chief, these Assistants may oversee LIMS at the Division Level.

C. The employee(s) assigned as the LIMS Administrator and Assistant LIMS Administrator will have access to confidential information within the database as a result of the necessary administrative clearance. The employee will abide by all policies, either Division, Department, or by statute, related to this confidential information.

1. The LIMS Administrator and Assistant LIMS Administrator will have administrator security clearance within LIMS.

2. The LIMS Administrator and Assistant LIMS Administrator will provide guidance to the Chief and Section Managers regarding the effective use of the software.

3. The LIMS Administrator will be responsible for current and future upgrades to the system.

4. The LIMS Administrator and Assistant LIMS Administrator will respond to requests from technical unit supervisors, section managers, the Chief, and the QA Coordinator regarding LIMS issues.

END OF DOCUMENT
I. POLICY The Forensic Services Division maintains a LIMS system to track: cases, evidence, training, QA Actions, courtroom testimony monitoring and proficiency and competency tests.

A. For GENERAL LIMS information and instructions, see:
   1. QAT.09-LIMS Training
   2. QAT.09.01 - LIMS DOs and DON'Ts

B. For information and instructions related to tracking cases, including requests for service, reports and discoveries, see:
   1. FSD.42 - Test Records
   2. FSD.42.01 - Diagrams, Photographs & Digital Images
   3. FSD.17 - Technical Review
   4. FSD.18 - Administrative Review
   5. FSD.43 - Test Reports
   6. QA.04 - Amending Reports
   7. QA.07 - Confidential Reports and Restricted Reports
   8. FSD.45 - Discovery Requests for Records
   9. FSD.35 - Evidence Handling

C. For information and instructions related to tracking evidence, see:
   1. FSD.35 - Evidence Handling
   2. FSD.38 - Evidence Itemization
   3. QA.09 - Adding, Itemizing and Transferring Evidence in LIMS
   4. QA.09.01 - LIMS Procedure for Correcting the Chain of Custody
   5. FSD.59-Evidence Recon Policy
   6. QA.17 - Evidence Recon

D. For information and instruction related to tracking training, including statement of qualifications, see:
1. **FSD.21 - Training Programs, Competency Testing, and Authorizations**
2. **QA.12 - LIMS Training Module Procedure**
3. **QA.19 - Safety Training Records Entered in LIMS**

**E.** For information and instruction related to **tracking QA Actions**, including corrective actions, validations, improvements and preventive actions, see:

1. **FSD.15 - QA Actions**
2. **QA.18 - Quality Assurance Action Request Procedure**
3. **QA.14 - LIMS Imaging Upload Procedure**

**F.** For information and instructions related to **tracking courtroom testimony monitoring**, see:

1. **FSD.26 - Court Testimony Review**
2. **QA.13 - LIMS Court critique procedure**

**G.** For information and instructions related to **tracking proficiency and competency tests**, see:

1. **FSD.21 - Training Programs, Competency Testing, and Authorizations**
2. **FSD.23 - Proficiency Testing**
3. **QA.10 - LIMS Proficiency and Competency test procedures**
4. **QA.11 - Archiving Proficiency/Competency Tests before 2008**

END OF DOCUMENT
I. POLICY: The Quality Assurance Coordinator will maintain all controlled Management System documents. The Management System is the organizational structure with responsibilities, procedures, processes, and resources for implementing the quality system; it includes all activities that directly or indirectly contribute to quality.

A. PowerDMS is the central repository for all active controlled documents.

1. The QA Coordinator is responsible for placing documents into PowerDMS or giving rights to staff to place documents in PowerDMS.

B. Control and Approval

1. Documents required for use are considered controlled documents. All documents required for use will be kept up to date and made readily available to staff. Controlled documents are tagged as “controlled” in PowerDMS.
   a. Documents that are not required for use are not controlled. Non-controlled documents may be placed in PowerDMS to make them readily available to staff; they are tagged as "non-controlled".

2. All controlled documents must be approved prior to their use. See Table below for approving authorities.

3. The approval date is defined as the date the final approving authority added their signature to the document in PowerDMS; this is the date the document is published. The effective date is denoted as the "Published Date" in PowerDMS.

4. The approval or control of external documents (eg. manufacturer or vendor instructions) can be performed by one of the following methods:
   a. By publishing the document in PowerDMS.
   b. By citing the external document within a controlled document; this may include referencing the title, date of publication, edition/volume and page numbers.

C. Documents

1. All controlled documents will be labeled with the a unique document identification, revision date, name of approving authority or authorities, name of document, the page number, and the total number of pages or a mark to signify the end of the document.

2. Each document will be numbered based on a numbering system. See table below.
   a. Sub-numbering can be done to insert closely related policies or procedures into the existing manuals. Example: FSD.42.01.
   b. Units may choose to have a group of documents further delineated by assigning additional numbers and/or letters as depicted in the Biology Technical Unit Manual.

D. Software

1. Software that is controlled will be identified according to FSD.34.

E. Forms

1. Controlled forms will have a footer containing a unique document identification, revision date, name of approving authority or authorities, and the page number.

F. Review
1. Documents may be reviewed and revised at any time to ensure continuing suitability and compliance with applicable requirements.
2. All controlled policy and procedure documents will be reviewed at least once every two years.
3. The periodic review will be documented.  The Review Workflow in PowerDMS is one mechanism of documenting the review (see QA.01).
4. The reviewer will determine if any changes are needed and request a workflow to be opened if necessary.

G. Revisions
1. Revisions to published documents or requests for new documents will be initiated by submitting a request to the QA Coordinator or a PowerDMS Administrator. See QA.01.
2. Changes to documents are made directly in PowerDMS and the changes are tracked within each document.
3. Non-substantive changes (eg. format, spelling or grammar) will be submitted to the QA Coordinator or PowerDMS Administrator and will be made directly to the published version.  They are not considered a new revision.  Staff are not required to re-sign a document when a non-substantive change is made.

H. Archived Documents
1. Active documents may be archived by submitting a request to the QA Coordinator or a PowerDMS Administrator.
2. Documents are automatically archived once a new revision is approved and published.
3. Archived documents are denoted within PowerDMS with a Blue "A" for Archive. See FSD.34 for the archiving of controlled software.

I. Release of Documents
1. See FSD.45 for information about releasing documents as part of a discovery request, subpoena or court order.
2. The Chief may authorize the release of documents when requested by outside entities (eg. city, county or state laboratory).
   a. The Document Receipt Form (FSDF.18) should be used to track the release of FSD documents.
   b. The QA Coordinator will maintain the completed Document Receipt Forms when they are returned by the requesting entity.

END OF DOCUMENT
I. **POLICY:** The laboratory's quality management system has been established to ensure a high quality of service and to provide the criminal justice community with the continuing confidence that laboratory results are accurate, impartial, and relevant.

A. Impartiality means that conflicts of interest do not exist, or are resolved so as not to adversely influence laboratory activities.

B. Laboratory activities shall be undertaken impartially.
   1. Staff will conduct laboratory activities independently, impartially, and objectively. All examinations will be approached with due diligence and an open mind.
   2. Staff will base their conclusions on the evidence and material relevant to the evidence, not on extraneous information, political pressure, or other outside influences.
   3. Staff will use sound scientific principles and not pressure another examiner or technician to arrive at conclusions not supported by data.

C. Laboratory management is committed to impartiality. This commitment is communicated to staff through:
   1. Incorporating impartiality into the FSD Policy Statement. See FSD.01
   2. Providing training on ethical codes that incorporate impartiality and emphasize the importance of objectivity in forensic science. See below.
   3. Providing direction to staff to safeguard impartiality.
   4. Incorporating training on bias, objectivity, and impartiality into training programs as appropriate. See LP.47 and CET.01.
   5. Requiring staff to follow policies and procedures to ensure that information in reports is accurate, clear, unambiguous, and objective, and that results, interpretations and opinion are supported by examination documentation. See FSD.43.

D. Laboratory activities are managed to safeguard impartiality, this includes:
   1. Requiring that all test methods that involve the comparison of an unknown to a known shall require the evaluation of the unknowns item(s) prior to comparison to one or more known item(s). See FSD.29.
   2. Requiring a technical review of results to ensure results, opinions, and interpretations are accurate, properly qualified, and supported by the technical
record. See FSD.17.

3. Requiring staff to disclose any personal relationships with named individuals in a case to their supervisor. In such cases, the supervisor, manager, or Chief may decide to reassign the case.

4. Requiring staff to disclose any personal relationships with vendors of services or supplies that affect laboratory activities. The manager responsible for approving the purchase or services and supplies will be made aware of any personal relationships staff have with vendors.

5. Addressing additional requirements for impartiality in technical unit manuals by limiting information provided to staff that may cause bias. For example:
   a. The Latent Technical Unit Manual addresses staff not reading police reports related to the case they are assigned. See LP.14.
   b. The Comparative Evidence Technical Unit Manual addresses not informing the verifier of the original examiner's conclusion prior to the verifier's examination. See CE.11.

6. Requiring staff to report any undue influence or pressure from customers (law enforcement or attorney) to interpret, report, or testify to results in a way that allows the report to be misinterpreted or misused by the customer or reader.

7. Requiring staff to report any requests from customers that would result in a violation of policies and procedures.

8. Requiring staff to report any unusual requests from customers (e.g., requesting blank copies of reports) that may compromise impartiality.

E. Training on Ethical Codes that Incorporate Impartiality & Being Unbiased

   a. The training will be documented on the orientation checklist (See FSDF.01).

2. Each calendar year, management will ensure that all FSD staff review the Guiding Principles of Professional Responsibility for Crime Laboratories and Forensic Personnel.
   a. The review will be documented.
   b. The section manager will be responsible for maintaining the documentation of annual review.

3. All Division staff are expected to abide by the Guiding Principles of Professional Responsibility for Crime Laboratories and Forensic Personnel and professional standards outlined in SO policy.
   a. Suspected ethical violations must be brought to the attention of the Chief.
   b. The Chief has the discretion to investigate suspected ethical violations through a QA Action and/or an Internal Affairs investigation.

F. Risks to Impartiality

1. The Forensic Services Division is part of the Office of the Sheriff, a law enforcement entity. The Office of the Sheriff executive team recognizes that
laboratory management and staff are under competing demands from multiple agencies to perform work in a timely manner.

2. Staff from the Office of the Sheriff may request expedited or additional services, but cannot request violations of accreditation criteria. At no time will the quality of work be sacrificed in order for more cases to be completed.

3. Any perceived risk of being part of a law enforcement entity is mitigated on an ongoing basis by having case prioritization protocols and requiring staff to report feelings of excessive pressure or influence to a supervisor or manager.

G. Case Prioritization

1. Cases will generally be prioritized on the basis of date of receipt. When necessary to meet critical judicial deadlines, investigative demands, or evidence preservation needs, cases will be given first priority whenever resources permit and when warranted by the seriousness of the case.

2. As the FSD is part of the Office of the Sheriff, it is recognized and acknowledged that there may be internal or external entities that request work on their cases to take priority. When warranted, the laboratory will adjust case priorities to address these demands.

3. Staff may ask their supervisor for assistance if they are pressured by clients to change work priority status of particular evidence. The supervisor, may, in turn, ask for assistance from his/her manager, another manager within the command structure, or the Chief until resolution is obtained.

4. Assignments of cases will be prioritized based on:
   a. Severity of the crime
   b. Court date
   c. Need for investigative leads
   d. Available manpower
   e. Client requests

5. Staff will prioritize work on evidence assigned to him/her based on one or more of the following:
   a. Compliance with prioritization guidelines listed in their Technical Unit Manual, if applicable
   b. Discussion with his/her supervisor or instructions received from his/her supervisor
   c. Conditions exist such that further any delay would lead to loss or deleterious change of the evidence
   d. Discussion with clients

6. Specific case priority criteria may be addressed in the Technical Unit manuals.

7. Staff may rely upon their supervisors and managers to assist with addressing client demands for additional work.
I. Top Management of the Forensic Services Division (FSD) is committed to good professional practice, to the quality of our testing, and serving our customers.

A. Commitment to Our Customers-As part of our commitment to customer service, FSD staff will:
   1. Be fair, unbiased, objective, impartial and courteous, performing our work with professionalism;
   2. Strive to identify and pursue ways to improve our programs and services;
   3. Listen to comments, suggestions, and concerns in an effort to improve our services and to meet customer needs;
   4. Cooperate with customers and their representatives to clarify their request, to provide them the information they need, and to deliver a quality work product;
   5. Respond to inquiries or complaints in accordance with established procedures;
   6. Maintain a high level of competence by committing to professional development and keeping abreast of new technologies and methods;
   7. Provide timely, accurate, and reliable forensic services in compliance with relevant statutory, regulatory and other legal requirements;
   8. Meet accreditation criteria and our quality standards.

B. Confidential Information
   1. The laboratory is responsible for the management of all information obtained or created during the performance of laboratory activities.
      a. The FSD protects the electronic storage of results by storing test data in a Laboratory Information Management System (LIMS) that is password protected on a limited access network.
      b. The LIMS administrator oversees user access and permissions.
   2. The laboratory shall inform the customer in advance, of the information it intends to place in the public domain. Except for information that the customer makes publicly available, or when agreed between the laboratory and the customer (e.g. for the purpose of responding to complaints), all other information is considered proprietary information and shall be regarded as confidential. When the laboratory is required by law or authorized by contractual arrangements to release confidential information, the customer or individual concerned shall, unless prohibited by law, be notified of the information provided.
      a. Disseminating reports and discovery information through ARIES is not considered placing information in a public domain.
      b. The FSD protects the electronic transmission of results by releasing reports via an Automated Regional Information Exchange System (ARIES) that is password protected on a limited access network.
      c. The ARIES administrator oversees user access and permissions.
   3. Laboratory personnel, including contractors, personnel of external bodies, or individuals acting on the laboratory's behalf, shall keep confidential all information obtained or created during the performance of laboratory activities, except as required by law.
      a. The FSD ensures the protection of its customers' confidential information by adhering to SO Policy 1.06.71 Dissemination of Law Enforcement Information and 1.06.74 Control of Office of the Sheriff Information.

C. Service Agreements or Contracts
   1. The Forensic Services Division maintains relationships with routine in-county customers via interagency agreements.
   2. These agreements are administered through Sheriff's Administration and undergo County Counsel approval prior to implementation. Agreements will be reviewed initially and prior to renewal and records of the reviews, including any significant changes, shall be maintained by Sheriff's Administration.
      a. Significant amendments to an interagency agreement (eg. cost of service) will undergo the same process as above.
      b. Minor amendments to an interagency agreement (eg. frequency of billing) will be communicated to the customer prior to implementation.
   3. The interagency agreements set forth the Forensic Services Division's obligation to the customer as well as the customer's obligations to the Division. "Agency" is defined as the customer or contract agency in the following language.

D. Forensic Services Division (FSD) Obligations-FSD has the following obligations:
   1. The FSD will provide forensic services when requested by the Agency.
      a. The FSD reserves the right to determine if the service will or can be provided, and the type of service needed based on a review of the evidence and case circumstances.
      b. The FSD reserves the right to modify, add, or stop the scope of forensic services that can be provided dependent upon resources and justice system need.
c. If the FSD will not or can not provide the service, Agency will be advised of the reason and be provided an alternate resource if the request is determined to be forensically legitimate. See FSD.43.
d. If the FSD subcontracts that service, Agency will be advised in the report. See FSD.31.
e. The FSD may decline to retest evidence for analysts on scheduled leave (eg. vacation or training) when the District Attorney's Office has been made aware of the absence (eg. subpoena returned). The District Attorney's Office or Agency may choose to have an item reanalyzed by another lab and any cost associated will be incurred.

2. The FSD will prioritize the requests received first based on severity of the crime and urgent public safety concerns, followed by trial deadlines.
   a. The FSD will endeavor to provide as timely a service possible based on resources available.
   b. Routine requests that do not have exigent public safety concerns or trial deadlines will be prioritized based on the date of request.
   c. If the FSD cannot meet Agency's timeline needs for a particular case, Agency may retrieve the evidence at any time to send to an outside forensic resource. Agency will not be charged for any administrative overhead under these circumstances. If examinations had occurred by the FSD prior to Agency withdrawing the evidence, Agency will be charged for the cost of the examinations conducted to date.

3. The FSD will provide witness and expert testimony for services rendered at no additional cost to Agency.
   a. The FSD will provide forensic consultation services to Agency at no charge to assist Agency in their investigation or to advise Agency as to what evidence should be submitted and what forensic services should be requested.
   b. Laboratory staff may not provide testimony for work not performed or reported by FSD.
   c. Laboratory staff will not provide toxicology interpretation testimony for drugs without a toxicology chemical test.

4. The FSD will maintain an on-call crime scene expert who will be available twenty-four (24) hours seven (7) days a week, to provide technical advice to Agency for homicide or other major felony scene processing involving complex evidence issues.
   a. Agency must have trained staff respond to scenes to handle the routine aspects of crime scene documentation or processing on cases involving call out of County staff.
   b. The FSD will, per Officer Involved Protocol, assume lead crime scene responsibility for Officer Involved Protocol cases.

5. The FSD through staff of the Sheriff's Fiscal Unit, will monthly invoice Agency for services rendered.
   a. The invoice will itemize the charges to include each request completed during the invoiced time period and the services provided for each request.

E. Agency Obligations - Agency has the following obligations when requesting service from the Forensic Services Division:
   1. Agency will abide by the FSD's requirements for evidence packaging and request for service procedures.
      a. The FSD may change packaging or request procedures and will notify Agency of such changes.
   2. Agency will notify the FSD of exigencies pertaining to the prioritization needs of the request such as public safety concerns, urgent investigative needs, and suspect flight risks.
   3. Agency will ensure a request for service is rescinded if the work is no longer needed.
      a. The FSD will not be responsible for work done on a request in cases where Agency failed to notify the FSD that the work was no longer needed.
   4. Agency will promptly notify the FSD of any requests that are considered confidential such as internal affairs inquiries.
   5. The cost for the service provided by the FSD will be based on the Board of Supervisor's approved Forensic Services Fee Schedule.

F. Submitting a Request for Service
   1. Requests for analysis are only accepted from law enforcement entities or the District Attorney's Office in connection with official investigations. Additional requests may also be accepted on a case-by-case basis upon approval by the Chief of Forensics.
   2. The regular request and evidence submission hours are: Monday through Friday (8:00 AM to 12:00 PM and 1:00 PM to 5:00 PM). The laboratory typically does not accept requests or evidence on weekends or holidays except under the following circumstances:
      a. Crime scene response
      b. If requested and approved by the Chief of Forensics or a Forensic Manager.
   3. There are two mechanisms to request service from the FSD:
      a. Evidence can be submitted and accompanied with the Criminalistics Request Form. The request form informs the customer: the Forensic Services Division reserve the right to select the appropriate service based on the review of the evidence and case circumstances including transferring evidence to another competent laboratory when necessary. The primary agency is financially responsible for the service(s) provided.
      b. Evidence can be submitted in a pre-printed package or "kit" that also serves as the request form. The submission of evidence using a "kit" serves as a request for service.

G. Customer Communication
   1. The FSD communicates with customers in a variety of ways. One mechanism of communication is providing information via an Automated Regional Information Exchange System (ARIES), information includes:
      a. Completed test reports. See FSD.43.
      b. Discovery information. See FSD.45.
c. The DAT Handbook which informs the customer of: services offered, methodology and equipment used, scope of analysis, and information pertaining to reporting and interpreting results of analysis

d. The Criminalistics Request Form with examples and instructions

e. Upcoming training

f. Instructions for best practices (evidence placards)
g. Drug Presumptive Testing (DPT) manual and forms

h. Customer Feedback Form

H. Customer Feedback

1. Management will actively solicit feedback (both positive and negative) from the customers using a variety of methods including customer satisfaction forms, online surveys, email correspondence, or telephonic communication. See FSDF.13 and QA.22.

2. All feedback from the customers will be used to continually improve the management system and service to our customer.

3. Receipt: Managers and QA will receive and review the feedback from the customers.

4. Review and Evaluation: Managers and QA will review and categorize the type of feedback received. Feedback may be categorized into three broad areas:

   a. Satisfactory or positive feedback (no observations or suggestions for improvement)
   b. Suggestions for improvement (feedback with observations, suggestions, or minor grievances)
   c. Complaints (significant unsatisfactory feedback or dissatisfaction)

5. Action

   a. For satisfactory feedback, no action is required.

   b. For feedback with suggestions for improvement, Managers will evaluate the feedback, determine if action is required, and ensure appropriate action is taken.
      i. Any action taken will be documented and maintained with the feedback and reviewed during the Management Review. See FSD.19.

   c. For complaints, the complaint process will be initiated.

6. Storage and Retention: Managers and QA will store the feedback in a central repository or as directed by the Chief.

   a. The feedback will minimally be retained through the current accreditation cycle.

I. Complaints

1. The FSD will respond to all complaints received from customers, laboratory staff, or other parties.

   a. A complaint is an expression of dissatisfaction made to the laboratory, related to laboratory activities that it is responsible for (testing, reporting, or testimony), or the complaints handling process itself, where a response or resolution is explicitly or implicitly expected.

   b. A description of the handling process for complaints shall be available to any interested party on request.

2. Receipt: a complaint shall be submitted in writing to the QA Coordinator, a Manager, or the Chief.

   a. Upon receipt of a complaint, the laboratory shall confirm whether the complaint relates to laboratory activities that it is responsible for. The laboratory shall be responsible for all decisions at all levels of the handling process for quality complaints related to laboratory activities.
      i. The QA Coordinator and Chief will be immediately notified for any quality-related issues.
      ii. The Chief will be immediately notified for any complaint of misconduct.

   b. Whenever possible, the laboratory shall acknowledge receipt of the complaint and provide the complainant with progress reports.

3. Review and Evaluation: QA, a Manager, or the Chief is responsible for validating a complaint.

   a. It is recognized that many "complaints" and issues of a minor nature can be addressed quickly and informally through supervisory action and verbal communication. These informal interactions are not considered complaints and do not require written documentation but should be monitored by laboratory management to ensure that the issue has been resolved.

   b. Interviews with the complaining party to gather additional facts may be necessary to validate the complaint before the investigation begins.

4. Investigation: the QA Coordinator, a Manager, or the Chief is responsible for investigating a complaint.

   a. The investigation may involve interviews with the parties involved, review of case files, review of LIMS reports, review of evidence, review of court transcripts, re-analysis of evidence, etc.

   b. The investigation will be as extensive as necessary to gather the information and data necessary to achieve a resolution.

   c. In general, the following resolutions will be used:
      i. "founded" means that the expression of dissatisfaction are true and action will be taken by the lab to resolve the issue.
      ii. "unfounded" means that expression of dissatisfaction are not true or found not to be legitimate.
      iii. "not resolved" means that the expression of dissatisfaction cannot be proven true or untrue at the conclusion of the investigation.

   d. The outcomes will be reviewed and approved by individual(s) not involved in the original laboratory activities in question.
e. If the complaint is handled by Internal Affairs, staff from SO Professional Standards will conduct the investigation.

5. **Action**: the QA Coordinator, a Manager, or the Chief will determine the appropriate action to be taken at the conclusion of the investigation.
   a. Actions to resolve a complaint may include changing laboratory processes or policies, providing additional training to staff, providing additional training to customers, changing report language, changing methods and mechanisms of communication.
   b. Whenever possible, the laboratory shall give formal notice of the end of the complaint handling to the complainant and communicate the outcome.

6. **Tracking and Recording**: In general, complaints will be recorded and tracked as a Corrective Action.
   a. Records of personnel issues and any actions taken will be maintained per the Sheriff's Department policy.

END OF DOCUMENT
I. POLICY  QA Actions are the central component for maintenance and improvement of the Quality Management System and are used to track quality related issues.

A. General Information

1. The FSD is committed to quality of our work and to the continuous improvement of laboratory operations. The FSD considers the risks and opportunities associated with the laboratory activities in order to:
   a. Give assurance that the management system achieves its intended results
   b. Enhance opportunities to achieve the purpose and objectives of the laboratory
   c. Prevent, or reduce, undesired impacts and potential failures in the laboratory activities
   d. Achieve improvement

2. QA Actions are a mechanism to document quality incidents, improvement opportunities, and risk prevention.

3. QA Actions do not address personnel issues and are not considered personnel actions.

4. The default due date for an Improvement Opportunity, Risk Prevention, or Corrective Actions is 90 days from the date of the assignment. An extension may be granted by the QA Coordinator or Chief, if necessary.

B. Types of QA Actions

<table>
<thead>
<tr>
<th>Type of QA Action</th>
<th>Description</th>
<th>Documentation in LIMS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Improvement Opportunity</td>
<td>An action taken based on a quality related observation or suggestion for improvement. Opportunities for improvement can be identified through the review of the operational procedures, the use of the policies, overall objectives, audit results, corrective actions, management review, suggestions from personnel, risk assessment, analysis of data, and proficiency testing results</td>
<td>FSDF.22</td>
</tr>
<tr>
<td>Risk Prevention</td>
<td>An action taken to address</td>
<td>FSDF.22</td>
</tr>
</tbody>
</table>

Related Orders: QA.18 - Quality Assurance Action Request Procedure
Options to address risks can include identifying and avoiding threats, taking risk in order to pursue an opportunity, eliminating the risk source, changing the likelihood or consequences, sharing the risk, or retaining risk by informed decision.

**Level 1-Corrective Action**
An action taken to correct significant non-conforming work that has already occurred.  
FSDF.06

**Level 2-Correction**
An action taken to correct a somewhat significant non-conforming event that has already occurred.  
FSDF.23

**Validation and Performance Verification**
An action taken to document the validation or performance verification of a new or modified method (procedure, equipment and/or software) to ensure it is fit for purpose. See FSD.27 for more information.  
FSDF.20 (plan)  
FSDF.12 (summary)

C. **Expectations**

1. All staff have an obligation to disclose quality incidents, non-conforming work, and quality concerns/suggestions to the appropriate personnel. The routine and recommended process for reporting a quality incident or raising a quality concern/suggestion is through discussions with an employee's immediate supervisor.

2. Staff are expected to have attempted to resolve quality concerns with their immediate supervisor. Unresolved quality concerns must be brought to the attention of the QA Coordinator. The complaint and investigation will be documented. See FSD.14 for more information.

3. The Chief and QA Coordinator must be notified of significant non-conforming work or quality concerns as soon as is practicable. Significant non-conforming events must be disclosed to ANAB.

D. **Nonconforming Work**

1. Non-conforming work refers to any aspect of the forensic unit’s work that do not conform to the forensic unit’s policies, procedures or the agreed requirements of the customer. Non-conforming work includes: unplanned and/or unintended occurrences, adverse events, errors, omissions, mistakes, as well as departures from policies or procedures.

2. All FSD staff are responsible for being able to identify non-conforming work.

3. FSD staff, along with their supervisors are responsible for evaluating the significance of the nonconforming work and associated risks, including an impact analysis on previous results. The QA Coordinator, Forensic Manager, and Chief may also be consulted to make a determination of significance. The following guidance is provided:

   a. **Level 1 (High-Risk Nonconformance)**: This type of nonconformity raises immediate concern regarding the reliability of test results. There is potential
that incorrect results were reported. Corrective action will be required, but it
is imperative to first address suspension of work and recall of test reports (if
applicable). Examples include:

i. A technical problem or error results in erroneous results or conclusions
   being reported in casework

ii. A technical problem or error results in an unsuccessful proficiency test

iii. Erroneous court testimony is identified

iv. Evidence is significantly compromised

v. A non-conformity is identified in an audit

b. **Level 2 (Medium-Risk Nonconformance):** This type of nonconformity does
   not cause immediate concern regarding the reliability of test results or the
   overall quality of the laboratory’s work product. The nonconformity may be
   of some significance but there is confidence that the non-conformity did not
   affect the validity and accuracy of the test result. This type of non-conformity
   is typically caught during the technical review process and corrected prior to
   the results being reported.

c. **Level 3 (Low-Risk Nonconformance-simple correction):** This type of
   nonconformity is readily apparent and can be corrected quickly. The
   nonconformance is considered the least severe, to have only a minimal effect
   or significance, is the least likely to reoccur, is not systemic and does not
   significantly affect the fundamental reliability of the laboratory’s work. These
   types of nonconformities may be remediated via simple correction or
   documentation in the case record. Possible examples include, but are not
   limited to: typographical or grammatical errors in records or logs caught
during the review process.

4. The laboratory shall retain records of the nature of the nonconformities, cause(s),
   and any subsequent actions taken, and the results of any corrective action. See below
   for more information on documentation.

5. Where the evaluation indicates that the nonconforming work could recur, or that
   there is doubt about the conformity of the laboratory's operations with its own
   management system, the laboratory shall implement corrective action.

E. **Documenting Level 1 Corrective Actions**

1. Level 1 Corrective Actions will be documented in LIMS on **FSDF.06.** The
   documentation will include:

   a. **Event Description**-a clear and concise description of the event.

   b. **Immediate Correction**-the action taken to control and correct the
      nonconformity. The immediate correction will include a brief description of
      any actions taken to immediately address or correct the problem (short-term
      solution).

      i. It may be necessary to temporarily suspend casework to allow for an
         evaluation of the significance and/or to prevent non-conforming work
         from being produced.

      ii. The Chief of Forensics, Manager, Supervisor, DNA Technical Lead or
          QA Coordinator have the ability to temporarily suspend and resume
c. **Risk Assessment**-the determination to halt and resume work will be made based on a risk assessment. The individuals responsible for halting and resuming casework will evaluate the circumstances (event description coupled with immediate correction) and determine if:

i. Casework can continue to be completed while the corrective action process is progressing with confidence that casework is accurate and reliable

ii. An individual(s) need to be temporarily suspended from performing casework while the corrective action process is progressing

iii. The unit needs to be halted from performing casework while the corrective action process is progressing

d. **Investigation**-the systematic research, review, and analysis of the event (a timeline is suggested). The investigation includes:

i. An evaluation of the significance of the non-conformity on casework

ii. An evaluation of the frequency of the non-conforming work (determining if similar nonconformities exist)

iii. A determination if the customer needs to be notified and work needs to be recalled/retested

e. **Root Cause Analysis**-the reason(s) the non-conformity occurred.

f. **Corrective Action**-the action(s) taken to prevent recurrence.

i. The laboratory shall select the action(s) that will most likely eliminate the non-conformity or prevent recurrence.

ii. Corrective actions shall be appropriate to the effects of the nonconformities encountered.

iii. The scope of the action will be assessed based on the risk and/or magnitude associated with the non-conformity.

iv. Based on the severity of the non-conformity, the laboratory may need to update risks and opportunities and make changes to the management system.

v. The DNA Technical Lead must approve the action(s) taken prior to the actions being implemented when the corrective action involves DNA casework.

g. **Monitor the Effectiveness of Action(s)**-the manner, time frame and responsibilities for monitoring the action(s), which may include but are not limited to:

i. Monitoring casework for a specified time period

ii. Using Crystal Reports in LIMS to monitor effectiveness

iii. Limited scope audits on the non-conformity

iv. Review during the annual internal audit
v. Review during the Management Review
vi. Proficiency testing

h. Close of the Corrective Action—the evaluation of monitoring techniques and the effectiveness of the action(s) taken to address the root cause of the non-conformity.

F. Documenting Level 2 Corrections

1. Level 2 corrections will be documented in LIMS on **FSDF.23**. The documentation will include:
   a. A brief summary of the event, dates of analysis, lab/batch #, equipment identifier, etc.
   b. Any trouble-shooting or investigation
   c. The actions taken to correct the non-conformity
   d. Any other pertinent information or follow-up required

G. Documenting Improvement Opportunities and Risk Prevention

1. Improvement Opportunities and Risk Prevention actions will be documented in LIMS on **FSDF.22**. The documentation will include:
   a. The evaluation of the opportunity or risk assessment
   b. The actions to address risks and opportunities
   c. How to integrate and implement the actions into its management system
   d. How to evaluate the effectiveness of these actions.

2. Actions taken to address risks and opportunities shall be proportional to the potential impact on the validity of laboratory results.

END OF DOCUMENT
I. POLICY  Technical review is an in-depth examination of analysis records and test reports to ensure that the reported conclusions are reasonable and supported by sufficient scientific data.

A. Responsibilities

1. The analyst completing the report is responsible for submitting a case file in compliance with unit and Division policy.
   a. An analyst may not technically review their own work.

2. The analyst and technical reviewer are both responsible for ensuring results, opinions, and interpretations are accurate, properly qualified and supported by the technical record.
   a. The technical review process does not shift responsibility for ensuring the accuracy of results and conclusions from the analyst to the reviewer. Both individuals share a responsibility to ensure the quality of the reported results.

3. The Supervisor or Manager is responsible for ensuring that staff performing technical review have been competency tested in the task(s) that the review is encompassing.

4. The Supervisor or Manager is responsible for authorizing individuals to perform technical review.
   a. See FSD.21 for more information on competency testing and authorizations.

5. The technical reviewer is responsible for completing and documenting a review of the case file following the method and process below.

B. Method of Review

1. As appropriate and applicable, the following elements will be reviewed:
   a. Technical language in the laboratory report is clear, accurate, unambiguous, complete, and in compliance with FSD.43
   b. All results, opinions, and interpretations are accurate
   c. All results, opinions, and interpretations are reasonable, supported by the documented data, and within the constraints of validated scientific knowledge
d. All results, opinions, interpretations, and associations are properly qualified in the test report

e. Tests and procedures used are appropriate

f. Analysis was performed in accordance to written policies and procedures

g. Blanks and controls are properly used and documented

h. Instrumental data meets the standards of quality outlined in the technical unit manual

i. Manual calculations are accurate

j. Required verifications are documented

k. Additional guidelines or requirements, as specified in the technical unit manual, are met

2. Depending on the technical unit procedures, technical review may be documented by:

   a. Marking the request as technically reviewed as a milestone in LIMS

   b. Documenting the request as technically reviewed with initials and date in the case file

   c. Specifying (in unit policy) that the LIMS administrative review milestone encompasses the technical review

C. General Process

1. All reports are technically reviewed prior to release unless a percentage of cases is specified in the unit manual.

2. The analyst gives the case file to a competent and authorized technical reviewer or places it in a designated location to await review.

3. The technical reviewer reviews the case file.

4. If the technical reviewer notes any technical issues or discrepancies then the file is returned to the analyst for action.

   a. A technical nonconformity must be brought to the attention of the Supervisor and documented per FSD.15.

   b. If the reviewer rejects a technical element (observation, data, or a test result), they must document the reason, the identity of the individual taking the actions and date in the technical record.

   c. The analyst makes any necessary changes.

   d. All changes made to technical records as a result of verification or technical review must be tracked.

5. The case file is submitted for administrative review.

D. Technical Disagreements

1. If the analyst and reviewer do not agree as to the need or extent of the recommended revisions, then the reviewer or analyst will bring the matter to the attention of the
next person in the chain of command. This third person will attempt to facilitate a resolution.

2. The resolution may involve changing report wording, performing additional analysis, or having the evidence analyzed by another laboratory.
   a. The third person may consult a technically competent individual, if necessary. Both internal and external experts may be used.
   b. In the DNA Unit, the DNA Technical Lead will be involved in the resolution of a disagreement.
   c. The QA Coordinator and Chief will be notified of significant technical disagreements.

3. An inconclusive result may be issued if the technical disagreement cannot be resolved.
   a. The reason for reporting an inconclusive result must be technically justified and included in the report.

END OF DOCUMENT
I. POLICY Administrative review is a procedure that checks the case file documentation and report for consistency with laboratory policy and for editorial correctness. Administrative review is intended to prevent data entry or grammatical errors from being reported; it also ensures compliance with ALL applicable Unit and Division policies for reporting and note-taking. All case files will undergo an administrative review before written technical results are released to an outside agency.

A. Responsibilities

1. The analyst(s) completing the report are responsible for submitting a report and notes package in compliance with unit and Division policy.

2. The Supervisor or Manager is responsible for authorizing individuals to perform administrative review.

3. The review will be conducted by an authorized administrative reviewer and by an individual other than the author(s) of the test report.

4. The administrative reviewer is responsible for ensuring:
   a. adherence to laboratory policy and procedure
   b. all key information is included
   c. the language in the report is clear, accurate, and complete
   d. accurate transfer of data and results from the notes to the report
   e. the technical review has been conducted and documented (eg. the initials and date of the technical reviewer)
   f. spelling & grammatical accuracy
   g. the correctness of the laboratory case number, agency, agency case number, requestor, request date and victim and/or suspect names
   h. the signature of the analyst and the date
   i. proper note correction technique (no obliterations). See FSD.42
   j. proper case number identifier, page numbering and analyst initials on all pages
   k. the check that the evidence items listed on the request form correspond to reported items
l. the correctness of the Chain of Custody

B. General Process

1. The administrative reviewer may also be the technical reviewer.

2. If corrections are needed, the reviewer's notes and any necessary corrections are returned to the analyst.

3. The corrected file is returned to the reviewer with the reviewer's original notes for verification of the corrections made. Any changes to the notes must be tracked see FSD.42 Case Record.

4. The report is signed, manually or electronically, by the administrative reviewer.

5. The report is released and the case is designated as Administratively Reviewed as a milestone in LIMS.

6. The case file is routed to the clerical staff for filing.

END OF DOCUMENT
I. POLICY  The Chief of Forensics, Managers, and QA Coordinator shall conduct a review of the laboratory's management system and testing activities once per calendar year.

A. Purpose

1. The Management Review is a planned and documented formal assessment of the quality management system (QMS) and Division’s overall operations. The review is conducted by the Chief, Section Managers, and the QA Coordinator. The purpose of the review is to evaluate the suitability, effectiveness and efficiency of FSD operations as well as determine future direction. The review of the past year’s activities should shape and guide future objectives, actions items, and recommendations for improvement. After the Management Review, "Action Items" for the following year are created.

B. Schedule

1. A management system review will be conducted annually and occur in the second half of the calendar year.

2. The Chief will be responsible for coordinating the management review.

C. Documentation

1. The Managers are responsible for providing the Chief with section-specific management review reports. These reports should be reviewed during the scheduled management review.

2. The QA Coordinator is responsible for providing the Chief and Managers with the Division management review report. This report will be reviewed during the scheduled management review.

3. The management review reports will be maintained by the QA Coordinator.

D. Division Management Review Inputs

1. The inputs to the Division management review report shall include the following:
   a. Changes in internal and external issues relevant to the laboratory
   b. Fulfillment of objectives. See management objectives FSD.01.
   c. The suitability of policies and procedures
   d. Status of actions from previous management review
e. The outcome of recent internal audits
g. Assessments by external bodies
h. Changes in the volume and type of the work
i. Customer and personnel feedback
j. Complaints
k. Effectiveness of any implemented improvements
l. Adequacy of resources
m. Results of risk identification
n. Outcomes of the assurance of the validity of results (may include proficiency test results, testimony reviews, etc.)
o. Other relevant factors, such as monitoring activities and staff training

E. Division Management Review Outputs

1. The outputs from the Division management review will be recorded as "Actions Items".

2. The system review findings or "Action Items" that are identified at the conclusion of the management review will be recorded and incorporated into the Division management review report.

3. The Chief, Managers and QA Coordinator are responsible for identifying and creating "Action Items" based on the management review and ensuing those items are addressed. All decisions and actions related to the following will be recorded:

   a. Actions needed to address the effectiveness of the management system and its processes
   b. Actions related to recommendations for improvement of the laboratory activities
   c. Actions involving provision of required resources
   d. Actions related to any identified need for change

4. "Action Items" will be addressed on an appropriate time scale.

5. An "Action Item" may be documented as a QA Action, see FSD.15.

END OF DOCUMENT
I. POLICY  Audits are conducted to assess the competence of individuals performing tests, compliance with the requirements of the management system, and the effectiveness of the operation.

A. General Information

1. An internal audit, inclusive of accredited technical units and the quality management system, will be conducted annually.

   a. Additional audits may be conducted if necessary.

2. The QA Coordinator may include specific areas of focus in addition to the scopes listed below. These areas of focus may be identified as a result of new procedural requirements, new accreditation requirements, on-going evaluation of effectiveness of corrective actions, or concerns brought to the attention of the QA coordinator.

3. See QA.16 for additional information on the audit process.

B. Scope of the Technical Unit Audit

</tbody>
</table>

D. Audit Findings

1. Findings of non-conformance may be made due to violations of external accreditation standards, internal policies and procedures, or other regulations.
   a. When audit findings of non-conformance cast doubt on the effectiveness of the operations, or the correctness/validity of the laboratory's test results, the laboratory shall take timely corrective action.
   b. The customer will be notified in writing if the investigation demonstrates the laboratory results were affected.
c. See FSD.15.

2. The audit findings will be recorded in an Audit Report.

E. Preventative Actions and Improvements

1. Observations will be provided to the appropriate unit in the form of improvement suggestions or preventative actions.

2. These are not considered findings of non-conformance and do not require a corrective action. However, failure to appropriately address preventative actions may result in future corrective actions.

F. Retention of Audit Documents

1. The Audit Report and all corrective actions will be kept according to FSD.44.

G. Training of Auditors

1. Audit team members shall be trained; the training may include:
   a. In-house training provided by the QA Coordinator.
   b. External training: Assessor Training, Internal Audit Training, or a similar course.

2. This training will be documented in LIMS. See FSD.21.

3. Auditors performing the DNA QAS Audit must meet the qualifications in the DNA Quality Assurance Manual BIO.5.QAQC.15.

END OF DOCUMENT
I. POLICY

The Forensic Services Division ensures the competence of technical personnel through a variety of measures including: hiring skilled and/or educated personnel (FSD.03), providing ethics training (FSD.13), utilizing appropriate training programs, administering suitable competency tests (FSD.21), offering access to literature resources (FSD.52), using an employee development program to provide ongoing training (FSD.21), and participating in proficiency testing (FSD.23).

A. Training Program Purpose

1. Each technical unit shall utilize training programs that develop individuals with sound scientific backgrounds into competent forensic examiners in designated categories of testing.

2. The training program will provide the necessary resources to ensure the analyst:
   a. Develops specific analytical skills to correctly perform laboratory activities for which they are responsible.
   b. Acquires the necessary knowledge to perform laboratory activities, accurately document the testing, and appropriately convey the results.
   c. Demonstrates their abilities with comprehensive understanding of the theory and applications of the method(s) used.
   d. Complies with associated Division and Unit policies and procedures.
   e. Achieves competence to perform laboratory activities for which they are responsible.
   f. Evaluates the significance of deviations.

B. Training Program Elements

1. Training programs shall include the following essential elements:
   a. The educational requirements
      i. Personnel who authorize results, opinions, and/or interpretations shall meet the minimum educational requirements set forth by ANAB.
   b. The goals or intent of the training program, including as appropriate:
      i. Technical knowledge, skills, and experience required for staff
      ii. A list of topics to be addressed
c. A description of the training process, including as appropriate:
   i. Literature review
   ii. Lectures/demonstrations
   iii. Practical exercises
   iv. Analysis of case-like materials
   v. Assessments
   vi. Mock court

d. A timeline for completion of the training program, including as appropriate:
   i. Approximate length of overall training
   ii. Approximate time spent on each module of training

e. A mechanism to document training, including as appropriate:
   i. Description of how required elements of the training program will be documented (eg. training binder, forms, checklists)
   ii. Documentation of dates of training and the individual(s) responsible for training (eg. form or checklist)
   iii. Staff shall maintain records of training in the LIMS training module. See QA.12.

f. The criteria for acceptable performance, including as appropriate:
   i. Expectations of the trainee
   ii. Description of how competency will be demonstrated
   iii. The criteria for successful completion

g. General knowledge of forensic science

h. The application of ethics in forensic science

i. Criminal law, civil law and testimony, including as appropriate:
   i. Legal procedure
   ii. Presentation of evidence in court

j. A mechanism to evaluate the effectiveness of initial training and actions to take if training is not effective, including as appropriate:
   i. Review of competency testing results
   ii. Oral or written feedback provided to a Supervisor regarding a training program
   iii. Annual performance evaluations to assess if training was effective to meet specified goals
   iv. See remedial training below
k. A mechanism to evaluate the effectiveness of on-going training and actions to take if training is not effective, including as appropriate:
   i. Review of proficiency testing results
   ii. Technical review of casework
   iii. Oral or written feedback provided to a Supervisor regarding a training class
   iv. Review of court critique feedback
   v. See remedial training below

2. Abbreviated Training Programs
   a. An abbreviated training program may be appropriate for newly-hired individuals with training and experience that was received prior to employment with the Forensic Services Division. The following must be documented:
      i. Assessment of the examiner’s prior knowledge and skills
      ii. Demonstration of competence as specified in the technical unit manual for required elements of a competency test

C. Competency Testing Purpose

1. Competency tests are challenging individual performance examinations designed to test an analyst's specialized knowledge, skills and abilities. A competency test shall encompass the scope and difficulty of expected casework assignments. The test is a demonstration of the analyst's ability to apply knowledge of the laboratory's policies and procedures while utilizing the technical skills and abilities gained during training. As competency tests are individual assessments of performance and capability, the results are not technically reviewed prior to being finalized.

2. The competency test shall include practical examination(s) that cover the spectrum of anticipated activities related to the test or calibration.

3. All personnel who influence the results of testing or calibration activities shall successfully complete a competency test prior to performing casework. The competency test intended results shall be achieved prior to performing the activity on evidence regardless of academic qualifications or past work experience.

4. A competency test may also be required for existing Forensic Services Division staff for new methodologies and/or equipment.

D. Competency Testing Elements

1. Analysts whose job responsibility includes performing testing or performing tasks that create items that could be used for testing must be given a competency test that minimally includes:
   a. A written or oral test of knowledge to demonstrate the individual's understanding and comprehension of the subject matter. It is recommended that the test of knowledge be provided and completed successfully prior to the analyst being assigned the unknowns.
b. Examination of sufficient unknown samples to cover the anticipated spectrum of assigned duties

c. A written report to demonstrate the individual's ability to properly convey results and/or conclusions and the significance of those results or conclusions, if applicable

d. A verbal practical examination of the individual's ability to provide testimony, if applicable

E. Competency Testing Responsibilities

1. It is the responsibility of the Supervisor or designee to:
   a. Evaluate staff readiness for competency testing
   b. Ensure the test is sufficiently rigorous to test the scope and difficulty of anticipated casework activities
   c. Create internal competency tests or obtain tests from external providers
   d. Ensure the quality of the test items prior to the analyst beginning the test
   e. Ensure that the analyst is not aware of the expected answers when a competency test is shared or reused
   f. Provide a due date for completion
   g. Determine and convey to the analyst the criteria for successful performance prior to beginning the test
   h. Provide any necessary instructions prior to the analyst beginning the test. Instructions from a Supervisor or any staff member cannot take the form of help, guidance, assistance or review of results prior to turning in the test. Instruct the analyst to complete the test on their own without any help, guidance, assistance or verification/review of results/data/conclusions/etc. prior to turning in the test.
   i. Determine satisfactory or unsatisfactory test performance based on the expected results in a timely manner
   j. Provide feedback to the analyst after the test has been finalized
   k. Solicit feedback from the analyst about the training program
   l. Notify the QA Coordinator of any unsatisfactory competency tests. Remedial training and/or an additional competency test may be necessary. If a technical error leads to an erroneous conclusion or incorrect result it may be documented per FSD.15.

2. The following must be documented in LIMS:
   a. The additional data field filled out completely and correctly for the sub-request. See QA.10 for instructions on completing the additional data field.
   b. The mechanism for evaluating the quality of the test prior to test being administered
   c. Criteria for successful performance communicated to the analyst prior to beginning the test
d. Due date

e. Test of knowledge. Note: the documentation must include the date and identity of the individual evaluating the results.

f. Test of unknowns. Note: the documentation must include the date and identity of the individual evaluating the results.

g. Practical exam for testimony. Note: the documentation must include the date and identity of the individual evaluating the results.

h. Report and notes

i. Feedback to/from the analyst regarding the training program

j. Completed/signed competency test summary report

k. Authorization form(s)

l. Training form(s)

F. Authorizations

1. Staff will not be authorized to perform tests, etc. until successful completion of a competency test is documented.

2. The laboratory shall authorize personnel to perform specific laboratory activities, including but not limited to, the following:

   a. Development, modification, verification and validation of methods.

   b. Perform tasks that create items that could be used for testing.

   c. Analysis of results, including statements of conformity or opinions and interpretations.

   e. Verify, review and authorization of results. Personnel who review and authorize results, an opinion or an interpretation or perform technical review of results or testimony, shall be competency tested in the task they are reviewing.

3. Authorizations may be made by staff with supervising authority, including Supervisors, Managers and the Chief or the Unit's Technical Lead.

   a. Authorization will be documented and include: the identity of the individual being authorized, the individual responsible for the authorization and the date.

   b. The Supervisor or Section Manager is responsible for maintaining the documentation.

   c. Additional authorization requirements or instructions may be specified in the technical unit manual.

G. Professional Development & Statement of Qualifications

1. Professional development is the process of improving and increasing capabilities of staff through access to education and training opportunities. The Forensic Services Division will provide training to develop the competency and maintain the
proficiency of analysts in their current assignment(s). The Division may provide opportunities for cross training when feasible.

2. The Chief of Forensics will approve training based on legal or regulatory requirements, available funding, and the professional development needs of the staff member.

3. Staff are encouraged to join and be involved in professional organizations within the forensic community that provide networking and training opportunities.

4. Staff are encouraged to seek and obtain individual certification(s) as appropriate to their assignment(s).

5. All technical training and professional development will be documented on the staff member’s statement of qualifications in the LIMS Training Module. Examples include:
   a. Formal Education (eg. college courses)
   b. Seminars or Courses (eg. Ron Smith course)
   c. Professional Meetings (eg. CAT or OSAC meeting)
   d. Study Groups (eg. CAC study group)
   e. On-Site Training
      i. FSD in-house training program (eg. controlled substance training program)
      ii. Webinars (eg. RTI or Agilent sponsored webinar)
      iii. On-site vendor supplied training (eg. Sorenson on-site training)
      iv. Courses taught by lab staff members (eg. CSI refresher)

6. The LIMS statement of qualifications will minimally contain:
   a. The name/title of the training
   b. The host entity or presenter/instructor
   c. The location of the training (physical location or indicate the training was a webinar/on-line)
   d. The date of the training, reflected as a month and year on the report
   e. The duration of training, reflected in hours on the report (must be at least one hour)

7. Staff members will keep their statement of qualifications current. Supervisors will conduct a review of staff’s statement of qualification at least annually. The statement of qualification may also be reviewed during an audit.

8. See QA.12 for examples of training entries and instructions for populating additional information (eg. job history, testimony, professional affiliations).

H. Remedial Training & Refresher/Retraining

1. Remedial Training
a. Remedial training is implemented when a technical issue is detected; remedial training is reactive.

b. The need for remedial training may be identified during competency testing, proficiency testing, technical and administrative review of casework, auditing or brought to the attention of a Supervisor or Manager. Remedial training will be implemented when it is determined that there is a need.

c. The trainer will document the skill abilities that are reviewed during the remedial training. This may be done through a Quality Action (Corrective Action, Risk Prevention, Opportunity for Improvement), see FSD.15.

d. At the conclusion of the remedial training a competency test may be given if deemed necessary by the Supervisor or Manager. The scope of the test may be limited to the area of remedial training but all elements of a competency tests must be completed.

2. Refresher/Retraining

a. Refresher training may be implemented at any time; refresher training is proactive.

b. Staff may be provided refresher training to maintain proficiency or refresh their skills prior to undertaking a task they have not performed for a period of time.

c. Refresher training may be documented as part of a proficiency test prior to the analyst resuming casework.

d. At the conclusion of the refresher training a proficiency test may be given if deemed necessary or dictated by policy, see FSD.23.

END OF DOCUMENT
I. POLICY The laboratory shall monitor its performance by comparison with results of other laboratories, where available and appropriate. This monitoring shall be planned and reviewed and shall include, but not be limited to participation in proficiency testing and participation in interlaboratory comparisons other than proficiency testing.

A. Definitions

1. **Interlaboratory comparison**-organization, performance and evaluation of measurements or tests on the same or similar items by **two or more laboratories** in accordance with predetermined conditions.
   
a. **Proficiency testing**-evaluation of participant performance against pre-established criteria by means of **interlaboratory comparisons**. This type of test is commonly referred to as an "external test".

2. **Intralaboratory comparison**-organization, performance and evaluation of measurements or tests on the same or similar items **within the same laboratory** in accordance with predetermined conditions. This type of test is commonly referred to as an "internal test".

B. Unit and Discipline Requirements

1. All personnel who perform testing shall successfully complete at least one intralaboratory comparison, interlaboratory comparison or proficiency test per calendar year in each discipline on the scope of accreditation in which the individual conducts work.
   
a. In the event that the preceding options are not available or appropriate, observation-based performance monitoring is acceptable.
   
b. Solely performing verifications or solely reviewing and authorizing results are considered to be testing and are subject to these requirements.

2. Each discipline in which accredited services are provided (see scope of accreditation) shall successfully complete at least one proficiency test per calendar year, with authorized release of the test results to ANAB from the test provider.

3. For proficiency tests taken at the end of one calendar year, evaluation of successful completion can occur in the subsequent calendar year.

C. Responsibilities for Obtaining Intralaboratory Comparisons, Interlaboratory Comparisons, and Proficiency Tests
1. The QA Coordinator is responsible for ordering, or coordinating the order, of proficiency tests based on the requests of the Section Manager or Technical Unit Supervisor.

   a. Where available and appropriate for the work conducted, the laboratory will use a proficiency test provider that is accredited to ISO/IEC 17043 by an accreditation body that is a signatory to the APLAC MRA or IAAC MLA5 and has the applicable proficiency test(s) on its scope of accreditation.

   b. Where not available or not appropriate for the work conducted, the laboratory will gain approval from ANAB for alternative means by which the laboratory’s performance can be assessed.

2. The Section Manager or Technical Unit Supervisor is responsible for initiating or creating intralaboratory (internal) comparisons.

D. Responsibilities for Scheduling Intralaboratory Comparisons, Interlaboratory Comparisons, and Proficiency Tests

1. The Section Manager or Technical Unit Supervisor will maintain a documented schedule for intralaboratory comparisons, interlaboratory comparisons, and proficiency tests.

   a. The plan must take into account past, current, and future casework assignments.

   b. The plan must take into account the **Unit and Discipline Requirements** above.

   c. The plan must ensure inclusion of a representative sample of the components/parameters and equipment/technologies within each discipline listed on the scope of accreditation.

2. Annual proficiency testing for a new discipline will begin the calendar year following the completion of the competency test.

3. Proficiency testing is required prior to returning to casework after an absence of greater than 12 months for Biology, Comparative Evidence and Latent Prints.

   a. Previously competent analysts in the following high volume casework assignments: Drugs, Alcohol and Toxicology may commence casework prior to a proficiency test even after an absence of more than 12 months if no significant changes to the procedure have occurred during the analyst's absence from performing this type of casework. Analysts must be proficiency tested within the calendar year.

   b. A **competency test** is required prior to conducting casework if NEW methodologies or equipment have been introduced since the analyst last performed casework. See FSD.21.

4. The Supervisor or Section Manager may initiate a intralaboratory comparison, interlaboratory comparison or proficiency test for any analyst in their section at any time.

5. The Chief may initiate a intralaboratory comparison, interlaboratory comparison or proficiency test for any analyst in the Division at any time.
E. Responsibilities for Assigning Intralaboratory Comparisons, Interlaboratory Comparisons, and Proficiency Tests

1. The Section Manager or Technical Unit Supervisor is responsible for:
   a. Ensuring intralaboratory comparisons, interlaboratory comparisons, or proficiency tests are received/created, assigned, and distributed for the various disciplines per the documented plan.
   b. Taking steps, when needed, to ensure that results are not known or readily available to the participant being monitored.
   c. Having a mechanism to ensure the quality of intralaboratory comparisons, interlaboratory comparisons and observation-based monitoring prior to the monitoring activity
   d. Establishing criteria for determining successful completion prior to the monitoring activity
   e. Ensuring submission of results to the proficiency test provider, if applicable, on or before the agreed upon due date

2. See QA.10 for information about using case samples, re-using tests and restricting tests.

F. Responsibilities for Analysts Taking Intralaboratory Comparisons, Interlaboratory Comparisons, and Proficiency Tests

1. The analyst is responsible for ensuring use of approved methods including:
   a. Completing the intralaboratory comparison, interlaboratory comparison or proficiency test like casework, including verification, technical review, and administrative review.
   b. Completing the intralaboratory comparison, interlaboratory comparison or proficiency test in accordance with the laboratory's analytical capabilities. Tests should not be subject to policies adopted by the laboratory for expediency or efficiency of casework.

G. Responsibilities for Determining Satisfactory or Unsatisfactory Test Performance

1. The Section Manager or Technical Unit Supervisor is responsible for:
   a. Determining satisfactory or unsatisfactory test performance based on the expected results
   b. Providing and documenting feedback on individual performance to the participant
   c. Notifying the QA Coordinator of discrepancies or unexpected results

2. See FSD.15 for information about documenting a technical error leading to an erroneous conclusion or incorrect result

H. Responsibilities for Documenting and Retaining Intralaboratory Comparisons, Interlaboratory Comparisons, and Proficiency Tests Records

1. The Section Manager or Technical Unit Supervisor is responsible for ensuring all intralaboratory comparison, interlaboratory comparison or proficiency test records
are entered in LIMS. See QA.10 and QA.14. At minimum the following records will be documented in LIMS:

a. The mechanism for evaluating the quality of the test prior to test being administered
   i. Proficiency tests from an approved provider are assumed to have been sufficiently evaluated. An evaluation of quality must be documented for all other comparisons/tests. Evaluation may consist of documentation of how the comparisons/tests was created or inclusion of results from previous analysis.

b. Criteria for successful performance communicated to the analyst prior to beginning the test
   i. Communicating the criteria for successful performance does not constitute giving the analyst the test answers. Communicating the criteria for successful performance means the analyst understands the expectations for completing the test (e.g. all controlled substances successfully identified).
   ii. Unless further clarified by the Unit, proficiency tests will be considered successfully completed if they are graded “successful” by the test provider.
   iii. All inconclusive results will be evaluated by the technically responsible individual to determine if they are consistent with FSD policies and procedures.

c. The test set identifier for all interlaboratory comparisons, or proficiency tests (e.g. CTS 18-123)

d. Due date

e. Report and notes

f. Communication to the vendor (including the transmission of results)

g. Communication from the vendor (e.g. manufacturer report, summary report, test results)

h. Evaluation of results
   a. Date and identity of the individual evaluating the results
   ii. Identification of any discrepancies
   iii. If discrepancies are identified, a reference to the QA Action

i. Completed/signed "Proficiency Test Summary Report" in LIMS

2. The QA Coordinator will review all completed intralaboratory comparisons, interlaboratory comparisons or proficiency tests and document the review in LIMS.

3. See QA.10 for instructions on completing the additional data field, use of casework, re-using tests and restricting tests.

4. Retention of records will be done according to FSD Policy on Control of Records (see FSD.44).
I. POLICY Analyst's court testimony will be technically reviewed by a competent individual in each discipline in which they have testified annually, when possible.

A. Purpose
   1. The purpose of the testimony review is to ensure that results, opinions, and interpretations are accurate, properly qualified and supported by the technical record.
   2. In addition, the review ensures the analyst demonstrates appropriate courtroom demeanor and attitude.

B. Requirements
   1. Each analyst providing testimony will be technically reviewed in each discipline in which that analyst has testified during the calendar year.
      a. The Manager or Supervisor may determine that additional reviews are needed.
   2. The individual performing the review must be technically competent in the task(s) the review is encompassing.
   3. If an analyst testified during the year but did not have their testimony reviewed, the Manager or Supervisor will request and review court transcripts of the analyst's testimony.
   4. If an analyst's only testimony was a juvenile hearing or Grand Jury then a technical review cannot be performed. This is not considered a non-conformance with policy. Transcripts are typically not available for a juvenile hearing or Grand Jury. In addition, witnesses are typically not allowed during testimony.

C. Responsibilities
   1. The Manager or Supervisor is responsible for ensuring that each analyst providing testimony is technically reviewed.
      a. The Manager or Supervisor may designate the task of performing the technical review.
   2. The testimony review consists of:
      a. An evaluation of technical correctness or "content review"
b. An evaluation of courtroom demeanor or "style review"

3. The Manager or Supervisor is responsible for assessing the feedback provided by the individual performing the review and determining if follow-up or additional action is required.
   a. Deficiencies in the technical content of an analyst's testimony will be addressed per FSD.15.
   b. Suggestions for improvement to the analyst's style will be addressed at the discretion of the Manager or Supervisor.

4. The Manager or Supervisor is responsible for providing feedback to the analyst who testified.

5. The Manager or Supervisor is responsible for documenting the court testimony review in LIMS.

6. If an analyst does not testify in a given year, the Manager or Supervisor is responsible for documenting that in LIMS.

D. Documentation
   1. Technical review is typically documented on the Internal Court Critique Form FSDF.02 according to the procedure outlined in QA.13.
   2. The Manager or Supervisor may solicit or request additional testimony review from attorneys, judges, court staff, or others. These reviews are not a substitute for a technical review of testimony. An external review is typically documented on the External Court Critique Form FSDF.03.

E. Retention of Records
   1. Records of court testimony reviews will be maintained electronically within Forensic Services Division according to FSD.44.

END OF DOCUMENT
I. POLICY Only approved methodology that is documented in the technical unit manuals should be used for casework analysis.

A. Method Selection

1. The laboratory shall use appropriate methods and procedures for all laboratory activities and, where appropriate, for evaluation of the measurement uncertainty as well as statistical techniques for analysis of data.

2. All methods, procedures and supporting documentation, such as instructions, standards, manuals and reference data relevant to the laboratory activities, shall be kept up to date and shall be made readily available to personnel. See FSD.12.
   a. The laboratory shall ensure that it uses the latest valid version of a method unless it is not appropriate or possible to do so. When necessary, the application of the method shall be supplemented with additional details to ensure consistent application.

3. When the customer does not specify the method to be used, the laboratory shall select an appropriate method and inform the customer of the method chosen through the report.
   a. Methods published either in international, regional or national standards, or by reputable technical organizations, or in relevant scientific texts or journals, or as specified by the manufacturer of the equipment, are recommended.
   b. Laboratory-developed or modified methods can also be used.

B. Responsibilities for Method Development, Validation, and Verification

1. The Manager or Technical Unit Supervisor is responsible for:
   a. Submitting the validation plan to the QA Coordinator. See FSD.F.20.
   b. Assigning a qualified and authorized individual.
      a. Support staff may be utilized as necessary to assist with the study under the direction of the qualified analyst.
   c. Providing sufficient resources to adequately complete the assigned task
   d. Ensuring effective communication to all personnel including updates during method development
e. Ensuring periodic review is carried out to confirm that the needs of the customer are still being fulfilled.
   a. Ensuring any modifications to the development plan are approved and authorized.

f. Ensuring the method validation or performance verification is fit for its intended use

g. Ensuring staff are appropriately trained, competency tested and authorized, if applicable. See FSD.21.

h. Ensuring that the method is written, approved, and published in PowerDMS, if applicable. See FSD.12.

i. Completing appropriate validation documentation including:
   i. Creating a summary of the validation/performance verification using FSD.12
   ii. Ensuring all documentation (electronic or hard-copy) is stored with the QA Action or in the technical unit. The documentation must be accessible for review by all staff.

2. The DNA Technical Lead is responsible for approving methods involving DNA analysis.

3. The QA Coordinator is responsible for:
   a. Reviewing validation plans prior to beginning a validation
   b. Reviewing validation documentation prior to implementation of new methods

C. **Method Development**

1. A method is the course of action or technique followed in conducting a specific analysis or comparison leading to an analytical result.

2. When method development is required, this shall be a planned activity and shall be assigned to competent personnel equipped with adequate resources.

3. The plan will be documented using FSD.20 and include:
   a. Description of the method/equipment/software/etc.
   b. Scope
   c. Type of samples to be tested and intended use in casework
   d. Time frame for validation and periodic review (when necessary)
   e. Personnel involved in and responsible for the validation
   f. Performance characteristics to be evaluated, for example:
      i. Demonstration of the expected result
      ii. Specificity
      iii. Accuracy
iv. Precision (repeatability or reproducibility)

v. Robustness

vi. Limit of detection or sensitivity

vii. Limit of quantification

viii. Range, linearity, carryover, or contamination

g. The criteria for acceptance

h. Limitations of the method and the impact on reported results, opinions, and interpretations

i. Under what conditions additional validation is required

j. Safety considerations

k. Data required to report a test result, opinion, or interpretation

l. The process for data interpretation

   i. All test methods that involve the comparison of an unknown to a known shall require the evaluation of the unknown item(s) to identify characteristics suitable for comparison and, if applicable, characteristics suitable for statistical rarity calculations, prior to comparison to one or more known item(s).

   ii. Characteristics include, but are not limited to, alleles in a DNA profile, friction ridge detail in a latent print, striation detail on a bullet, or criteria for evaluation of mass spectrometry fragments and ratios in a seized drug sample or a toxicology sample extract.

m. Assessment of training, competency, authorization, and policy updates

D. Method Validation

1. A validation is a documented process of performing a set of experiments which establish the efficacy and reliability of a technique or procedure or modification thereof. A validation must have a set of particular requirements specific for the intended use of the method and demonstrate through objective evidence that those requirements are fulfilled.

2. The laboratory shall validate non-standard methods, laboratory-developed methods, and standard methods used outside their intended scope or otherwise modified.

3. The validation shall be as extensive as is necessary to meet the needs of the given application or field of application and demonstrate fitness for purpose.

   a. Scientific Working Group (SWG) documents, Organization of Scientific Area Committees (OSAC) documents and ASTM standards are resources a Technical Unit unit may choose to rely on to determine the scope and extent of a validation.

4. The performance characteristics of validated methods, as assessed for the intended use, shall be relevant to the customers' needs and consistent with specified requirements.
5. The techniques used for method validation can be one of, or a combination of, the following:
   a. Comparison of results achieved with other validated methods
   b. Calibration or evaluation of accuracy and precision using reference standards or reference materials
   c. Evaluation using case-like materials
   d. Assessment of the factors influencing the result
   e. Evaluation of measurement uncertainty of the results

6. When changes are made to a validated method, the influence of such changes shall be determined and where they are found to affect the original validation, a new method validation shall be performed.
   a. The associated data interpretation is considered part of a validated method. When changes are made, the influence of such changes shall be determined and where they are found to affect the original validation, a new method validation shall be performed.
   b. A performance verification may be performed when minor modifications to an existing method, procedure, or software are made when those changes do not affect the original validation. The Manager or Technical Unit Supervisor is responsible in determining when the change is significant enough to require a full validation.

E. Performance Verification

1. A performance verification is a check of the reliability of a previously validated method, procedure, software, or equipment by demonstrating through objective evidence that the performance characteristics of the item have been met. Performance verifications, are typically less extensive than validations.

2. The laboratory shall verify that it can properly perform methods before introducing them by ensuring that it can achieve the required performance. Records of the verification shall be retained. If the method is revised by the issuing body, verification shall be repeated to the extent necessary.

3. A Performance Verification may be as extensive as necessary to document fitness for purpose and may include, but are not limited to:
   a. Comparison to other methods currently in use
   b. Demonstration that the method or equipment yields the expected result
   c. Assessment of factors influencing the result

F. Record Retention

1. The laboratory shall retain the following records:
   a. Validation procedure used;
   b. Specification of the requirements;
   c. Determination of the performance characteristics of the method;
d. Results obtained;
e. A statement on the validity of the method, detailing its fitness for the intended use.

G. Writing Method Procedures or Work Instructions

1. A new method will be incorporated into the technical unit manual. The following will be included as applicable:

a. Appropriate identification including name of methodology and/or equipment
b. Scope of analysis including parameters, quantities, or ranges to be tested
c. Limitations of the test method
d. Description of the item(s) to be tested including requirements for marking, handling, transporting, storing and preparation of evidence
e. Checks to be made before work is started
f. Equipment used, including technical performance requirements and checks that the equipment is working properly and where required, calibration of the equipment before use
g. Reference standards, reference materials, controls, or reagents required
h. The method of recording observations and results including criteria and/or requirements for approval/rejection of results
i. The method of data interpretation
j. Any safety measures to be observed
k. Environmental conditions required
l. The uncertainty or procedure for estimating the uncertainty
m. Training procedures

H. Deviations From an Approved Method

1. A deviation is an occasion when the documented test method cannot be followed exactly. This normally happens when evidence items are atypical and technical adaptations have to be made.

2. Any deviation from an approved test method shall occur only if the deviation has been:

a. documented in the case file. If relevant to the interpretation of the results, the deviation must appear on the report.
b. technically justified. The technical justification must be documented in the case file.
c. authorized by an individual with technical responsibility. See FSD.03 for individuals with technical responsibility.
d. accepted by the customer. Per FSD.14, the FSD will determine if a service will or can be provided, and the type of service needed based on a review of the evidence and case circumstances and the need for any deviations from an
approved test method. Notification to the customer regarding deviation will typically be accomplished through the report process. Any communications with the customer will be included in the case record per FSD.42.

3. Authorization for a deviation from an approved test method must be obtained PRIOR to undertaking the deviation. Deviations from an approved test method undertaken without authorization will be documented as a non-conformity. See FSD.15 for more information on classification of non-conformities.

END OF DOCUMENT
POLICY Laboratories shall identify the contributions to measurement uncertainty. When evaluating measurement uncertainty, all contributions that are of significance, including those arising from sampling, shall be taken into account using appropriate methods of analysis.

A. Uncertainty of Measurement: Technical use of the word "uncertainty" indicates a level of confidence in the result or the test being performed or the measurement. Estimated uncertainty of a measured value is an interval around that value such that any repetition of the measurement will produce a new result that lies within this interval with a stated level of confidence.

1. Measurement uncertainty shall be evaluated, or estimated when applicable, for all reported quantitative results.
   a. Where the test method precludes rigorous evaluation of measurement uncertainty, an estimation shall be made based on an understanding of the theoretical principles or practical experience of the performance of the method.
   b. An item descriptor that includes a number is not considered a result. This difference should be clear to the reader of the report.

2. Technical Units performing calibrations, including of their own equipment, shall evaluate the measurement uncertainty for all calibrations.

3. The Technical Units shall have a method of analysis for evaluation of measurement uncertainty and the method shall:
   a. Require the specific measuring device or instrument used for a reported result to have been included in or evaluated against the estimation of measurement uncertainty for that method;
   b. Include the process of rounding the expanded uncertainty;
   c. Require the coverage probability of the expanded uncertainty to be a minimum of 95.45% (often referred to as approximately 95%); and
   d. Specify the schedule to review and/or recalculate the measurement uncertainty.

4. The Technical Units shall maintain the following records for each evaluation and estimation of measurement uncertainty:
   a. Statement defining the measurand;
b. Statement of how traceability is established for the measurement;
c. The equipment (e.g., measuring device(s) or instrument(s)) used;
d. All uncertainty components considered;
e. All uncertainty components of significance and how they were evaluated;
f. Data used to estimate repeatability, intermediate precision, and/or reproducibility;
g. All calculations performed; and
h. The combined standard uncertainty, the coverage factor, the coverage probability, and the resulting expanded uncertainty

END OF DOCUMENT
I. POLICY The FSD is committed to assuring the accuracy and reliability of the tests performed. Where necessary, technical units will have procedures to assure the quality of test results.

A. General

1. Each Technical Unit Manual shall have a procedure for monitoring the validity of results.

2. The resulting data shall be recorded in such a way that trends are detectable and, where practicable, statistical techniques shall be applied to review the results.

3. This monitoring shall be planned and reviewed and shall include, where appropriate, but not be limited to:
   a. Use of reference materials or quality control materials;
   b. Use of alternative instrumentation that has been calibrated to provide traceable results;
   c. Functional check(s) of measuring and testing equipment
   d. Use of check or working standards with control charts, where applicable;
   e. Intermediate checks on measuring equipment;
   f. Replicate tests or calibrations using the same or different methods;
   g. Retesting of retained items;
   h. Correlation of results for different characteristics of an item;
   i. Review of reported results;
   j. Intralaboratory comparisons;
   k. Verification of results
   l. Technical and administrative review
   m. Testing of blind sample(s).
B.  Procedures and Test Methods

1. Technical units will have and use appropriate methods and procedures for all tests.

2. Technical units will have procedures for test data interpretation.

3. All methods, procedures, software or equipment must be validated or performance checked prior to use in casework. See FSD.27.

4. Technical units will have instructions on the use and operation of equipment (see FSD.33) and handling of evidence (see FSD.35).

5. Technical Units where sampling occurs will have procedures for sampling. See FSD.40.

6. All test methods that involve the comparison of an unknown to a known shall require the evaluation of the unknowns item(s) to identify characteristics suitable for comparison and, if applicable, characteristics suitable for statistical rarity calculations, prior to comparison to one or more known item(s).
   a. Characteristics include: alleles in a DNA profile, friction ridge detail in a latent print, criteria for evaluation of mass spectrometry fragments and ratios in a drug or toxicology sample extract

C.  Environmental Conditions

1. The facilities and environmental conditions shall be suitable for the laboratory activities and shall not adversely affect the validity of results. Influences that can adversely affect the validity of results can include, but are not limited to, microbial contamination, dust, electromagnetic disturbances, radiation, humidity, electrical supply, temperature, sound, and vibration.

2. Measures to control facilities shall be implemented, monitored, and periodically reviewed and shall include, but not be limited to:
   a. Access to and use of areas affecting laboratory activities. See FSD.32;
   b. Prevention of contamination, interference, or adverse influences on laboratory activities;
   c. Effective separation between areas with incompatible laboratory activities.
   d. Incorporating good housekeeping measures within the laboratory. See FSD.50.

3. Any technical requirements for facilities and environmental conditions necessary for the performance of the laboratory activities will be documented in the technical unit manual.
   a. The unit shall monitor, control, and record environmental conditions in accordance with relevant specifications, methods, or procedures or where they influence the validity of the results.

END OF DOCUMENT
I. POLICY  The Technical Units will have a system to select, assess, monitor, and reassess external providers. The FSD shall ensure that all purchased products and services fulfill our requirements.

A. Introduction-Supplies and services are designated into two broad categories:
   1. General supplies and services that do not affect the quality of tests, including office supplies.
   2. Supplies and services that affect testing and have an impact on the quality of tests.

B. General Information for Supplies and Services that Affect Testing-The Technical Units shall ensure that only suitable externally provided products and services are used, when such products and services are:
   1. Intended for incorporation into the laboratory's own activities (eg. equipment, chemicals, reagents, reference materials),
   2. Are used to support the operation of the laboratory (eg. calibration services, equipment maintenance services, or proficiency testing services),
   3. Are provided, in part or in full, directly to the customer by the laboratory, as received from the external provider (eg. subcontracting laboratory).

C. Procedure for Supplies and Services that Affect Testing-The Technical Units must have procedures and retain records for:
   1. Defining, reviewing, and approving the requirements for externally provided products and services. The requirements may include capability, suitability, or criteria to provide a service or supply. For example:
      a. Traceable reference materials obtained from an ISO 17034 provider
      b. Calibration services provided from an ISO 17025 vendor
      c. Proficiency tests purchased from an ISO 17043 supplier
      d. Sub-contracting services supplied by an ISO 17025 laboratory
      e. Consumables provided by the manufacturer of the equipment being used
   2. Defining the criteria for evaluation, selection, monitoring of performance, and re-evaluation of the external providers. The criteria may include ability to meet the the
Technical Unit's requirements for quality, ability to deliver the product/service within an acceptable time frame, access to technical support, accreditation status or review of scope documents. For example:

a. Checking a scope document to ensure the calibration being requested is within the scope of the vendor
b. Checking an accreditation certificate to ensure that accreditation has not lapsed
c. Checking that quality controls or standards meet the performance criteria of the equipment or method
d. Ensuring that methodology requiring consumables (e.g. kits) from a specific vendor are obtained
e. Ensuring that a certificate is checked after the expiration date before ordering additional supplies or services

3. Ensuring that externally provided products and services conform to the laboratory's established requirements, or ISO 17025:2017 before they are used or directly provided to the customer. The requirements may include competence of personnel or accreditation status. For example:

a. Checking a packing list to verify an order before using the supplies in casework
b. Checking the correct testing was provided from a sub-contracting laboratory before providing the report to the customer
c. On-going evaluation of quality control data

4. Taking any actions arising from evaluations, monitoring of performance, and re-evaluations of the external providers. Actions may include ensuring the correct services or supplies are received, issues are resolved, or monitoring that services and supplies meet the needs of the unit

D. Communication for Supplies and Services that Affect Testing-The Technical Units shall communicate its requirements to external providers for:

1. The products and services to be provided. The requirements may consist of specific products (equipment, software, consumables) or services (calibration or sub-contracting) needed. For example:

   a. In a purchase order or purchasing document
   b. The description of the item(s) or services ordered may include information such as: type, class, grade, precise identification, specifications, inspection instructions or other technical data. This description may also include a reference(s) to relevant analytical methods or procedures.

2. The acceptance criteria. The criteria may consist of equipment or method specifications, accreditation status, or catalog part #. For example:

   a. A letter sent with a piece of equipment outlining the accreditation requirements
   b. A email or phone call communicating the vendor part #
c. A purchase order or purchasing document outlining specific acceptance criteria

3. Competence, including any required qualification of personnel. The competence requirements may be individual certifications or accreditation status. For example:
   a. A letter sent with a piece of equipment outlining the calibration requirements

4. Activities that the laboratory intends to perform at the external provider's premises. The activities may include on-site audits or assessments at the provider's facility. For example:
   a. Scheduling an on-site QAS audit

E. Procedure for Ordering General Supplies and Services

1. Personnel in each of the technical units will forward a request that lists the supplies to be ordered to an aide, clerk, or individual ordering the supply. The following should be documented by either the requester or the person ordering the supplies:
   a. Vendor
   b. The quantity or amount required
   c. Catalog number
   d. A description of the supply or service

2. The aide, clerk, or individual placing the order of the supply will create an order sheet for supplies that includes:
   a. Cost
   b. Purchase order
   c. Org #, if needed

3. An individual with budget authority will review, approve and authorize the purchase of supplies and services. ONLY managers and individuals above a manager level are designated as having budget authority. The signature, or equivalent, of an individual at a manager level or above must be documented with an order.

4. After approval, the order is placed by the approver or the approved order sheet is forwarded to the aide, clerk, or individual who then orders the supply. The orders may be placed by using one of the following methods:
   a. Existing purchase order number for a vendor
   b. Requisition form
   c. County credit card held by the account clerk from Sheriff's Fiscal Section.

5. A record(s) will be maintained of the approved order to ensure the accuracy of the supply or service received.
   a. General laboratory supplies and services are generally ordered and received by an aide or clerk.
   b. Packing slips will be reviewed for accuracy, signed and dated. The original will be forwarded to Account Clerk at Sheriff's Fiscal.
END OF DOCUMENT
I. POLICY  Any subcontracted laboratory must be competent to perform work.

A. Definitions

1. A subcontractor or contract laboratory refers to an outside entity that the Forensic Services Division (FSD) contracts with to perform forensic analysis.

   a. Subcontracting occurs if the FSD first agrees ("contracts") to accept evidence to test, then subcontracts to perform the test.

   b. Reasons for subcontracting may include but are not limited to: limited resources, inability to provide the service, backlog reduction or unforeseen circumstances.

2. Externally Directed Analysis (e.g. referee analysis or court directed) is analysis that has been requested by an external agency. The request may be under the direction of the Court, Prosecution, Defense or Police Agency.

   a. No subcontracting agreement exists between the laboratory and the testing laboratory.

   b. The Laboratory is not responsible for the analysis and does not receive a report from the external laboratory.

B. Sub-Contracting

1. The customer should be notified in writing of the subcontracting arrangement. This may be accomplished by, but not limited to, inter-agency agreements, communication with the customer or the issuance of a laboratory report.

2. The laboratory will be responsible for the subcontractor's work. The subcontracting agency chosen for the testing must be competent in the work being contracted.

   a. This competence may be demonstrated by the subcontracting laboratory being accredited under ISO/IEC 17025:2005, equivalent accrediting standards or competence criteria specified in the technical unit manual. Documentation must be acquired and maintained that demonstrates competence. A list of competent contractors will be maintained.

3. The sub-contractor must provide their report in writing or electronically.

C. Externally Directed Analysis
1. The FSD will perform externally directed analysis when there is a need. Examples include, but are not limited to:
   a. Improper handling may jeopardize evidence integrity.
   b. There is a safety hazard for a non-trained individual.
   c. The evidence is of a high-value or high-theft nature.

2. The FSD will obtain authorization from a law enforcement agency, the District Attorney's Office or court order, before sending samples for externally directed analysis.
   a. FSD may obtain "blanket" authorization for sending out evidence for externally directed analysis. See the technical unit manuals for specific information about "blanket authorization".

3. FSD will use a postal carrier with the ability to adequately track the evidence package.

I. POLICY  The laboratory shall have access to equipment that is required for the correct performance of laboratory activities and that can influence the results.

A. Equipment (Applies to Measuring Instruments, Software, Measurement Standards, Reference Materials, Reference Data, Reagents, Consumables or Auxiliary Apparatus that can Influence the Results)

1. Procedures- The Technical Unit Manuals shall document its procedures to the extent necessary to ensure the consistent application of its laboratory activities and the validity of the results and include:

   a. Use

      i. The Technical Units shall have procedures to ensure proper functioning.

      ii. The Technical Units shall verify that equipment conforms to specified requirements before being placed or returned into service.

      iii. Only equipment that has been furnished by the lab and/or approved for use (through procedures, validations, etc.) should be used for testing.

      iv. Staff shall use equipment within the laboratory's permanent control. The Technical Unit shall check the function of equipment if it goes outside the permanent control of the laboratory and is used for testing to ensure satisfactory function before being returned to service..

   b. Planned Maintenance

      i. The Technical Units shall have a procedure for carrying out intermediate checks when necessary to maintain confidence in the performance of the equipment. When evaluating the need for intermediate checks, topics to consider include, but are not limited to: the calibration interval, the use of the equipment, the stability of the equipment, the method specifications, and risk associated with a failed check.

      b. The Technical Units shall require labeling, coding, or other identification of equipment requiring calibration or which has a defined period of validity (eg. expiration date) to allow the user of the equipment to readily identify the status of calibration or period of validity.
c. The Technical Units shall ensure the reference values and correction factors are updated and implemented when calibration and reference material data include reference values or correction factors.

c. Handling

i. The Technical Units shall have procedures to prevent contamination or deterioration

ii. The Technical Units shall take practicable measures to prevent unintended adjustments of equipment from invalidating results.

iii. The Technical Units shall ensure that equipment that has been subjected to overloading or mishandling, gives questionable results, or has been shown to be defective or outside specified requirements, is taken out of service. It shall be isolated to prevent its use or clearly labelled or marked as being out of service until it has been verified to perform correctly.

   1. The Technical Unit shall examine the effect of the defect or deviation from specified requirements and shall initiate the management of nonconforming work procedure. See FSD.15.

d. Storage

i. The Technical Units shall have a procedure for specific storage requirements, if applicable.

e. Transport

i. The Technical Units shall have a procedure for specific transport requirements, if applicable.

2. Records-The Technical Unit will retain records for equipment (measuring instruments, software, measurement standards, reference materials, reference data, reagents, consumables or auxiliary apparatus) which can influence laboratory activities. The records shall include the following, where applicable:

a. The identity of equipment, including software and firmware version;

b. The manufacturer's name, type identification, and serial number or other unique identification;

c. Evidence of verification that equipment conforms with specified requirements;

d. The current location;

e. Calibration dates, results of calibrations, adjustments, acceptance criteria, and the due date of the next calibration or the calibration interval;

f. Documentation of reference materials, results, acceptance criteria, relevant dates and the period of validity;

g. The maintenance plan and maintenance carried out to date, where relevant to the performance of the equipment;

h. Details of any damage, malfunction, modification to, or repair of, the equipment;
3. **Supplemental Reagent Requirements**
   a. The Technical Units will retain records identifying who made the reagent and the components used in preparation.
   b. Reagents prepared shall be labeled with, at a minimum the identity of the reagent and the date of preparation or lot number.

4. **Supplemental Reference Collection Requirements**
   a. The Technical Units will ensure reference collections of data or materials which are maintained for identification, comparison, or interpretation purposes (e.g., mass spectra, drug samples, bullets, cartridges, DNA profiles, laboratory developed population databases) shall
      i. Have each entry in the collection documented;
      ii. Uniquely identified and;
      iii. Handled properly to protect the characteristic(s) of interest.

B. **Calibration (Applies to Measuring Equipment)**
   1. The equipment used for measurement shall be capable of achieving the measurement accuracy and/or measurement uncertainty required to provide a valid result.
   2. **Measuring equipment** shall be calibrated when:
      a. The measurement accuracy or measurement uncertainty affects the validity of the reported results, and/or
      b. Calibration of the equipment is required to establish the metrological traceability of the reported results.
   3. The Technical Units shall establish a calibration program (where appropriate), which shall be reviewed and adjusted as necessary in order to maintain confidence in the status of calibration. The program for the calibration of equipment shall include:
      a. A list of the equipment requiring calibration;
      b. Specifications for the calibration laboratory;
      c. Specified requirements for the calibration, and;
      d. The interval of calibration.

   1. The laboratory shall establish and maintain metrological traceability of its measurement results by means of a documented unbroken chain of calibrations, each contributing to the measurement uncertainty, linking them to an appropriate reference.
      1. Metrological traceability is defined as the "property of a measurement result whereby the result can be related to a reference through a documented unbroken chain of calibrations, each contributing to the measurement uncertainty". 
2. A measurement result is defined as a set of quantity values being attributed to a measured quantity value together with a measurement uncertainty

2. The laboratory shall ensure that measurement results are traceable to the International System of Units (SI) through:

   a. Calibration provided by a competent laboratory (laboratories fulfilling the requirements of this document are considered to be competent); or

   b. Certified values of certified reference materials provided by a competent producer with stated metrological traceability to the SI (reference material producers fulfilling the requirements of ISO 17034 are considered to be competent); or

   c. Direct realization of the SI units ensured by comparison, directly or indirectly, with national or international standards.

3. If available, suppliers of external calibration services for measuring equipment and/or reference standards, and certified reference materials used to establish or maintain metrological traceability shall be either:

   a. A National Metrology Institute that is a signatory to the BIPM 1 - CIPM Mutual Recognition Arrangement with the calibration of measuring equipment and/or reference standard to be performed or the certified reference material listed to be purchased in Appendix C of the BIPM key comparison database (KCDB) 2; or

   b. A service supplier accredited to ISO/IEC 17025 by an accrediting body that is a signatory to the ILAC Mutual Recognition Arrangement, with the calibration of measuring equipment and/or reference standard to be performed listed in a scope of accreditation; or

   c. An accredited reference material producer that is accredited to ISO 17034 3,4 by an accrediting body that is a signatory to a mutual or multilateral recognition arrangement in an ILAC recognized regional accreditation cooperation or the ILAC Mutual Recognition Arrangement, with a scope of accreditation covering the certified reference material.

4. In situations where a supplier that meets the requirements above is not available, the competence, capability, and metrological traceability for the supplier and the external product or service being purchased shall be confirmed.

   a. Objective evidence of the confirmation shall be available for review.

5. When metrological traceability to the SI units is not technically possible, the laboratory shall demonstrate metrological traceability to an appropriate reference, e.g.:

   a. Certified values of certified reference materials provided by a competent producer;

   b. Results of reference measurement procedures, specified methods or consensus standards that are clearly described and accepted as providing measurement results fit for their intended use and ensured by suitable comparison.

6. If a certified reference material is changed in a way that alters the traceable measurement value, then the equipment used to alter the certified reference material
shall be evaluated for applicability of measurement traceability accreditation requirements.

END OF DOCUMENT
I. POLICY: The laboratory shall have access to the data and information needed to perform laboratory activities.

A. General Information

1. "Laboratory information management system(s)" includes the management of data and information. Examples include:
   a. JusticeTrax LIMS (including crystal reports)
   b. VeriPic
   c. Instrument software (including data-handling and reporting software)
   d. Lab-created software (including macros)
   e. Databases
   f. Excel spreadsheets

B. Verification and Validation

1. Technical Units shall ensure the laboratory information management system(s) used for the collection, processing, recording, reporting, storage, or retrieval of data are validated for functionality, including the proper functioning of interfaces within the laboratory information management system(s) by the laboratory before introduction.
   a. Whenever there are any changes, including laboratory software configuration or modifications to commercial off-the-shelf software, they shall be authorized, documented and validated before implementation.
   b. There shall be a plan for validation of computer software developed by the user and records of the validation shall be maintained. See FSD.27 and FSDF.20.

2. Commercial off-the-shelf software in general use within its designed application range can be considered to be sufficiently validated.
   a. Microsoft Word, Excel, Access, Adobe Reader, Adobe Acrobat, Adobe Photoshop, VeriPic, JusticeTrax (LIMS), JusticeTrax Indexer and PowerDMS are approved for use and considered sufficiently validated when used within its designed application range.
b. Some software may be approved for use, however the application of software may need to be validated and uniquely identified. For example, Excel is approved for use but the use of formulas that affect test results may require validation and approval. Depending upon the application, validation and approval may be required.

C. Operation

1. Technical Units or appropriate system administrator shall ensure laboratory information management system(s) will:
   a. Be protected from unauthorized access. This may be accomplished by having a user name and password, firewall protections, personal identification numbers (PINS), etc.
      i. Computer systems containing digital evidence will only be accessed by authorized staff that has a user name and password for that system.
      ii. JusticeTrax LIMS requires the use of a password, pin, and security levels be given to different users.
   b. Be safeguarded against tampering and loss. This may be accomplished by conducting periodic back-ups of data.
      i. Electronic data in JusticeTrax and VeriPic are regularly backed up by Technical Services Division.
   c. Be operated in an environment that complies with provider or laboratory specifications. This may be accomplished by using computerized equipment within manufacturer specifications in climate controlled facilities.
      i. The laboratory's environmental conditions are sufficient to ensure proper functioning of computers and automated equipment to maintain the integrity of test data.
   d. Be maintained in a manner that ensures the integrity of the data and information. This may be accomplished by having instructions on the use of the system and checking calculations and data transfers.
   e. Include recording system failures and the appropriate immediate and corrective actions. This information may be recorded within the system, created on a log, or obtained from an outside source (e.g., Information Technologies staff).

2. When a laboratory information management system is managed and maintained off-site (e.g., off-site servers) or through an external provider (e.g., cloud-based provider), the Technical Unit shall ensure that the provider or operator of the system complies with all applicable requirements selecting a suitable external provider. See FSD.30 for more information on external services.

D. Instructions for Use

1. Technical Units shall ensure that instructions, manuals, and reference data relevant to the laboratory information management system(s) are made readily available to personnel. See FSD.12 for more information on document control.

E. Calculations and Data Transfers
1. Calculations and data transfers shall be checked in an appropriate and systematic manner. Note: this requirement does not apply if the calculation or data transfer is secure and not subject to human error.

2. The technical record shall indicate the check was performed and who performed the check.

3. When possible, this check shall not be conducted by the person who performed the calculation(s) or the data transfers.

4. This check may be part of a technical review. See FSD.17 for more information on technical reviews.

END OF DOCUMENT
I. POLICY    Submissions and items are assigned a unique identifier; LIMS is the mechanism used to track all evidence within the Forensic Services Division.

A. Format of LIMS-generated evidence numbers:

001-01-A-01-a-01

- Level 1: 001 (Submission Level in LIMS)
- Level 2: 001-01
- Level 3: 001-01-A
- Level 4: 001-01-A-01
- Level 5: 001-01-A-01-a
- Level 6: 001-01-A-01-a-01

1. All preceding zeros are understood.
2. Dashes after Level 2 are optional. For example 001-01-A-01 can be written as 1-1A1.
3. Crime Scene Tracking Numbers, JusticeTrax evidence and outside agency identifiers will be entered into the Other ID field in LIMS.

B. Definitions and Terms

1. Submission: A package containing evidence. Submissions will not be deleted in LIMS. If a submission is created in error, the submission will be unrelated to any requests and transferred in LIMS to agency representative "Generated in error" under the Forensic Services Division agency.

2. Submission Number: A LIMS-generated designation for evidence at Level 1. It may be abbreviated as S# or Sub#. Each submission will be given its own Submission Number.

3. Add Evidence: The LIMS process for creating a Submission (Level 1). See QA.09 (Generating Submissions in LIMS) for more information on the procedure for creating submissions. See QA.09.01 for more information about editing the chain of custody for a submission.

4. Item: A unit of evidence. Items will not be deleted in LIMS. If an item is created in error, the item will be unrelated to any requests and transferred in LIMS to agency representative
"Generated in error" under the Forensic Services Division agency.

5. **Item Number**: A LIMS-generated designation for evidence. Item numbers are obtained through itemization except when there is only one level.

6. **Itemize Evidence**: The LIMS process for creating an Item at Level 2 or below. See [QA.09](#) (Itemizing Evidence) for more information on the procedure for itemizing evidence. See [QA.09.01](#) for more information about editing the chain of custody for an item.

7. **Primary Item**: The first level of evidence. Note: the container and inherit fields are blank at this level.

8. **Parent Item**: An item that has one or more child items.

9. **Child Item**: An item that is linked genealogically to a parent item. Upon original itemization, the child item will show the parent item in the "container" field. If the child item is containerized the "container" field will change. The original parent will always be shown in the "inherit" field (which cannot be changed).

10. **Tracking Number**: A designation given to evidence at the time of collection during field activities.

11. **Origin**: The source of the evidence. For example, origins may include a crime scene location or individuals.

12. **Containerize**: Containerization is grouping split LIMS items into a new or different package. When beginning an electronic chain of custody in LIMS an analyst will use the agency representative "Lab-Containerized" under the Forensic Services Division agency. See [QA.09](#) (Containerize Evidence) for more information on the procedure for containerizing and examples.

13. **Lab-Generated Evidence**: Evidence that has been created from laboratory analysis. When beginning an electronic chain of custody in LIMS an analyst will use the agency representative "Lab-Generated Evidence" under the Forensic Services Division agency. See [QA.09](#) (Lab-Generated Evidence) for more information and the procedure for creating lab-generated evidence.

14. **Split Chain of Custody**: Procedure by which a child item is removed from its parent item. The Container field will be set to blank. The split item no longer shares the chain of custody with the parent and will no longer be transferred automatically when the parent is transferred. Once split, the child has its own independent chain. See [QA.09](#) (Split Chain of Custody) for more information and the procedure for removing a child from a parent item.

C. **General Information**: Three general categories of evidence are encountered during normal laboratory operations: (1) submitted, (2) obtained from a crime scene and (3) lab-generated evidence.

1. **Submissions** received over the counter are generally entered into LIMS by clerical staff. It is the responsibility of the analyst to account for all evidence within a Submission, itemizing at level 2 and below in LIMS, to capture evidence information concisely.
   a. The analyst will use the number format defined in Section A to itemize all evidence in LIMS. See [QA.09](#) for information regarding unit specific requirements for shared evidence.
   b. Note: For swabs collected from guns ONLY, the analyst may use an itemization scheme that results in a deviation from the hierarchical relationship in LIMS (described in Section A). The description of the item MUST clearly describe the source of the swab.

2. **Crime scene evidence** is entered into LIMS by an analyst.
   a. It is the responsibility of the analyst to account for all evidence within a Submission, itemizing at level 2 and below in LIMS, to capture evidence information concisely for all evidence for which there is a known expectation for analysis by the FSD.
analyst will use the number format defined in Section A to itemize all evidence in LIMS. See QA.09 for information regarding unit specific requirements for shared evidence.

b. It is the responsibility of the analyst to appropriately group the evidence and ensure the accuracy of Submission information for evidence the lab cannot or will not examine.

3. **Lab-generated evidence** is entered into LIMS by technical staff.

4. The table below reflects relationships and the results of actions conducted during the process of Itemization in LIMS.

<table>
<thead>
<tr>
<th></th>
<th>Itemize</th>
<th>Split</th>
<th>Containerize</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Purpose</strong></td>
<td>create a child item at level 2 or below.</td>
<td>remove a child item from its parent</td>
<td>remove a child item from its parent and containerize in another submission</td>
</tr>
<tr>
<td><strong>Container Field</strong></td>
<td>no change (shows parent)</td>
<td>changed to blank</td>
<td>changed to new parent</td>
</tr>
<tr>
<td><strong>Inherit Field</strong></td>
<td>original parent</td>
<td>original parent</td>
<td>original parent</td>
</tr>

</table>

D. All Section Managers must be consulted prior to any alterations to this policy.

END OF DOCUMENT
I. Policy: Each Technical Unit where sampling occurs will document in their technical unit manual a sampling plan and method.

A. Definition:

1. **Sampling**: Selection of a sample for testing, according to a procedure. The approach to sampling can be either non-statistical or statistical. The intent of ISO/IEC 17025 is that the activity of sampling occurs prior to the item being submitted to the laboratory. A laboratory can choose to perform further sampling after receipt of the item, in which case the requirements for sampling are applicable.

B. Where sampling occurs, the Technical Unit shall have a sampling **plan** and **method** when it carries out sampling of substances, materials or products for subsequent testing.

   1. The **sampling plan and method** shall be available at the site where sampling is undertaken.
   2. Sampling plans shall, whenever reasonable, be based on appropriate statistical methods.

C. The sampling method shall:

   1. Describe the selection of samples
   2. Describe the sampling plan
   3. Describe the preparation and treatment of sample(s) from a substance, material, or product to yield the required item for subsequent testing
   4. Require statistical sampling at a stated level of confidence if an inference will be made to report on the whole population

D. The Technical Unit shall retain records of sampling data that forms part of the testing, and include:

   1. Reference to the sampling method used
   2. Date and time of sampling
   3. Data to identify and describe the sample (e.g. number, amount, name)
   4. Identification of the personnel performing sampling
   5. Identification of the equipment used
   6. Environmental or transport conditions
7. Diagrams or other equivalent means to identify the sampling location, when appropriate

8. Deviations, additions to or exclusions from the sampling method and sampling plan.

END OF DOCUMENT
I. POLICY  Diagrams and photographs may be used to document observations made by the analyst at a crime scene or during an evidence examination. Diagrams and photographs should accurately reflect their subject and be properly labeled when they appear in examination documentation. Photographs relied upon to form substantive conclusions in casework shall be treated as evidence and handled accordingly.

A. Definitions

1. A diagram is a plan, sketch, drawing, digital scan (by laser scanner), or outline designed to explain or demonstrate how something works or to clarify the relationship of the parts of a whole.
   a. A scale diagram is a drawing with dimensions at a specific ratio relative to the actual size of the object drawn. For crime scene plan-type diagrams, the notation "Not to Scale" should be included if the diagram is not drawn to scale. All other hand-drawn diagrams in examination notes should be considered not drawn to scale unless otherwise indicated.

2. A photograph is an image captured by a camera, either using emulsion-based film or digital media, that is intended to document the visual characteristics of a scene or object.

B. Inclusion of Diagrams and Photographs in Examination Notes

1. When placing a diagram in laboratory notes, the analyst should keep in mind the following guidelines:
   a. At a minimum, the diagram should be labeled with a title, orientation information (for example, a notation as to which direction is North or up), and scale, if necessary.
   b. The diagram should be made large enough to allow labels, measurements, and comments to be written alongside the appropriate parts of the diagram. Alternatively, a symbol system may be used with a legend or key identifying the items or parts of interest.

2. When placing a photograph in laboratory notes, the analyst should keep in mind the following guidelines:
   a. The subject of the photograph should be in focus, with sufficient exposure, depth of field, and proper lighting to show the features intended to be documented.
b. If a feature or observation of interest is not discernible in a particular photograph, then another image should be created under conditions that adequately depict the observation.

3. Retention and Representation
   a. The case file shall indicate where the archived photographs are stored.
   b. All retained photographs shall be represented in the case file so it is clear what photographs have been archived; this may be accomplished by:
      i. Including an inventory of all retained photographs, such as:
         1. A printout of the thumbnail images of the photographs with their respective file names.
         2. A photograph log, including a unique identifier and brief description for each photograph.
      ii. Embedding all of the retained photographs in the examination notes (for example, on a worksheet or other electronic note page).
      iii. Making a text-only reference to each retained photograph using a unique designation (for example, "Digital Image 1-1, IMG_0001, 14-123-1, dollar bill, ninhydrin").

C. Labeling
   1. Digital images used to document the basis for a conclusion shall be labeled with the filename or item number of the evidence item depicted.
   2. Digital images used for general documentation should be labeled with the filename, image reference number, or item number on the printed image in the examination notes.
   3. If not otherwise indicated in the case file, a brief description of what is being depicted in a particular printed photograph should accompany the image in the examination notes. An exception to this is when a series of thumbnail-sized images (for example, photo contact sheets) is printed for the purposes of providing a quick reference to the various digital images that may be associated with a particular case file. Handwritten or typed annotations should be added to an image in the examination notes to clarify what is being depicted or draw attention to a particular observation of interest, if appropriate.

D. Treating an Image as Evidence
   1. When printed photographs are used for comparison and relied upon as the basis for a reported conclusion regarding the identity or origin of an impression or object depicted in the photographs, the prints shall be treated as evidence from that point forward, to include proper labeling, packaging, and tracking via LIMS.
      a. When evidence suitable for comparison examinations (for example latent prints, impressions) cannot be collected or preserved using physical techniques (tape lifts, silicone casts), examination-quality digital images shall be taken and subsequently treated as evidence. Examination-quality photographs for comparison purposes are those that accurately record the maximum amount of detail present in an impression, with minimal optical distortion. These photographs shall include a scale for reference. Any digital
photographs (including the original electronic file and any processed or printed copies) used for comparison and relied upon as the basis for a reported conclusion regarding the identity or origin of an impression or object depicted in the photographs shall be handled as evidence.

2. Examination quality digital images should be captured using a lossless file format (for example, RAW or TIFF). If compressed image files (JPEG) are received into the laboratory for comparison examination purposes, copies should be made in a lossless file format prior to processing or examination to prevent progressive degradation of the original image.

3. If multiple images depicting the same item of evidence have been captured, the analyst may select the image or images that best represent the item for preservation as evidence.

E. Image Enhancements

1. The analyst shall use a working copy of the original file for image processing, including enhancement, restoration, or compression. After processing, the image shall be saved as a separate file. The original image file shall not be altered. Renaming an original image file from the filename designated by the camera at the time of image capture is acceptable.

2. A brief description of the processing applied to the final image file shall be recorded in the examination notes by the analyst. For example, "image cropped; brightness and contrast adjusted".

   a. If image enhancement techniques beyond basic cropping, brightness, or contrast adjustments have been applied to an image, the image processing program used, including the version, should be recorded.

3. The documentation of the image processing steps should be sufficient to permit a comparably trained individual to understand the techniques used and to achieve a comparable final image. Every change to every pixel value of an image does not need to be documented.

4. Exploratory processing operations not incorporated into the final saved or printed image do not need to be documented. Test prints and/or intermediate images resulting from a variety of techniques not incorporated into the final image may be discarded.

F. Storage and Retention

1. Non-evidentiary digital images:
   a. Files captured using cameras shall be archived by storing in VeriPic (see QA.21) or LIMS. Original and enhanced digital files shall be archived.
   b. Files captured using tablet computers for general documentation purposes are not required to be archived as they shall be retained by embedding in the case file.

2. Crime scene digital images:
   a. All crime scene digital images shall be archived.
   b. Memory cards from digital cameras containing photographs from a crime scene do not need to be retained as evidence. A memory card may be
reformatted for use after downloading the image files to a suitable medium (for example, hard drive or CD/DVD).

c. Poorly exposed, out of focus, or otherwise unusable images taken at a crime scene may be deleted from the final collection of archived images at the discretion of the analyst. If a photograph is rejected (deleted), the reason, the identity of the individual(s) taking the action, and date shall be recorded in the technical record. The sequence of file numbers associated with the entire collection of digital photographs from a particular case do not need to be consecutive.

3. Evidentiary digital images must be stored on archival-quality optical discs or other suitable media, properly packaged and labeled, and tracked in LIMS.

END OF DOCUMENT
I. POLICY  Technical Unit Manuals will have procedures that will specify what technical and administrative records will be contained within the test record and the location of any records not in the case file.

A. Definitions

1. Test Records are administrative records and technical records generated or received by a laboratory pertaining to testing performed, which may be stored in one or more locations.
   a. The Case File is a part of the test record that contains the report, and all or a portion of the technical records and the administrative records for a particular case. The case file at minimum will contain the report and technical documentation necessary to support the results.

2. Technical Records are accumulations of data and information which result from carrying out tests, they include:
   a. Original observations
   b. Tests conducted
   c. Reagents, standards, or controls used
   d. Results of examinations
   e. Photographs or diagrams
   f. Forms
   g. Instrumental data
   h. Worksheets

3. Administrative Records are records that do not constitute data or information resulting from testing, they include:
   a. Communication logs
   b. Evidence (test-item) receipts
   c. Chain of custody records
   d. Police or incident reports
e. Request forms

B. Technical Record Requirements

1. Technical records must be labeled with a unique test record identifier (laboratory number).

2. The technical records for each laboratory activity must contain the results, report, and sufficient information to facilitate, if possible, identification of factors affecting the measurement result and its associated measurement uncertainty and enable the repetition of the laboratory activity under conditions as close as possible to the original.

   a. "The overall requirement from a quality point of view is that data must be recorded at the time of observation and in such a way that there is a complete audit trail so that errors can be traced and work can be repeated in a manner as near to the original as possible. It must be possible to trace a result to the person who made the measurement and the equipment used and to identify precisely the method used. This means that the audit loop can be closed, making it possible to check that the work was done by a trained member of staff, using appropriate methods, on correctly functioning and calibrated equipment." (excerpt from: A practical guidebook for meeting the requirements of laboratory accreditation schemes based on ISO 17025:2005 or equivalent national standards, UNITED NATIONS INDUSTRIAL DEVELOPMENT ORGANIZATION, 2009)

3. The technical records shall include the date and the identity of personnel responsible for each laboratory testing task and for checking data and results.

4. Records shall be created or maintained in a permanent manner.
   
   a. For example, technical records originally captured in pencil (e.g., a rough sketch) can be maintained in a permanent manner by photocopying, scanning, or taking a photo.

5. The Technical Unit Manual must define the technical record(s) to be retained if all related technical records are not maintained.

6. Original observations, data, and calculations shall be recorded at the time they are made and shall be identifiable with the specific task.
   
   a. Options for recording observations include, but are not limited to: written notes, photography, drawing, photocopying, or scanning.

7. If an observation, data, or calculation is rejected (during testing, verification, or review), the reason, the identity of the individual(s) taking the action and the date shall be recorded in the technical record.

8. Where abbreviations or symbols specific to the forensic service provider are used, the meaning of the abbreviations or symbols shall be defined in the Technical Unit Manuals.

9. Technical records to support a report (including results, opinions, and interpretations) shall be such that, another reviewer possessing the relevant knowledge, skills, and abilities could evaluate what was done and interpret the data.

10. Amendments to technical records must be tracked to previous versions or to original observations. Both the original and amended data and files shall be retained.
including the date of alteration, an indication of the altered aspects, and the personnel responsible for the alterations.

a. Corrections or alterations to **handwritten records** must be made in such a way that the original version can be read. The approved method is to cross out the original with a single line and write in the corrected version as near to it as possible. All such alterations shall be initialed and dated by the person making the correction. The original version cannot be marked out; erased, made illegible or deleted.

b. Corrections or alterations to **electronic records created in LIMS** will be tracked electronically in LIMS.

c. Corrections or alterations to **electronic records created outside of LIMS** (worksheets, forms, etc.) will be tracked, with the exception of **contemporaneous revisions**. Contemporaneous revisions are not considered amendments. For the purposes of applying the requirement to track amendments to technical records, contemporaneous is defined as occurring in the **same period of time**. Corrections or alternations made to the technical record during the same period of time as each testing activity or task do not need to be tracked.

i. Example of tracking alterations: An analyst is working on a comparison case over a couple days. On day one the analyst records a result for item #1 that is an exclusion. On day three, that result is revised to an identification. The change to entries made on day three to work performed on day one is **not** contemporaneous; the changes occurred over different periods in time and the amendment would need to be tracked.

ii. Example of contemporaneous revision: An analyst is working on a ballistic imaging case over a period of a couple hours, and the analyst has the electronic worksheet open until the case is completed. While working on the case, the analyst makes a change in the worksheet. When the work is complete, the analyst saves the changes to the worksheet and draft completes the case. This is an example of an acceptable contemporaneous revision. The technical record was created when the analyst started working and all work occurred during one period of time.

11. Technical records must be paginated. Each page of the technical records will be numbered when there are multiple pages.

a. The first and last page of technical records must include the total number of pages.

b. If pages must be inserted into a set of previously numbered technical records, each inserted page shall be serially numbered using the number from the previous page, plus a letter suffix, for example, 21a, 21b, and 21c. The first and last page shall be updated with the new total number of pages and a notation including the pages inserted.

c. When a page of the technical record is to be disregarded, a single line is drawn diagonally across the page, including the analysts initials, date and a brief explanation about the change.

d. Double sided technical records are not allowed.
12. Verification will be conducted by an individual who is currently authorized to perform the testing.
   a. A record of the verification will be made and the record will identify who performed the verification, when it was performed, and the results of the verification.
   b. **Technical Unit Manuals** will have a procedure to address situations where the verification does not agree with the original test result.
   c. The resolution shall be recorded.

13. Discrepancies between the submitting agency description of items and the physical inventory of evidence will be noted in the test record. Minor terminology discrepancies may not require changing the LIMS evidence description. However, the evidence description in LIMS MUST reflect what is physically present even if different from the description provided by the submitting agency.
   a. It is the responsibility of the analyst opening and inventorying the evidence to ensure the LIMS evidence description is correct.
   b. Discrepancies observed for items that have high theft potential, such as controlled substances, money, jewelry or firearms, must be verified by another employee of the laboratory, as soon as practicable. The discrepancy will be documented in the test record.

C. **Administrative Records**

1. Administrative records shall be identifiable to a unique test record identifier (laboratory number).
   a. Administrative records received or generated by the laboratory for a specific case shall be identified with the laboratory number, initials, and date.
   b. Administrative Records that contain data from multiple cases must include all associated lab numbers.
   c. Multi-paged administrative records that are bound together only require the laboratory number, initials, and date on the first page.

2. Corrections or alterations to handwritten records must be made in such a way that the original version can be read. When corrections, alterations or insertions are made by Division staff, the approved method is to cross out the original with a single line and write in the corrected version as near to it as possible. All such alterations shall be initialed and dated by the person making the correction. The original version cannot be marked out; erased, made illegible or deleted.

D. **Release of Test Records**

1. For routine report distribution, see FSD.43.
2. For distribution of test records via discovery, subpoena, or court order, see FSD.45.
3. Test records may be released as indicated below:
   a. When requested by the investigating agency, crime scene photographs or photographs taken to document evidence before any testing or alteration may be released.
b. When requested by the investigating agency, the evidence inventory, crime scene sketches/diagrams, and processed or unprocessed scanner data may be released.

c. When requested by another forensic entity to complete testing that was initiated by the customer or lab, test records may be released.

d. When authorized by the Chief of Forensics, test records may be released to an outside entity.

4. The release will be documented in the test record and will include:

a. The records released

b. The individual or entity receiving the records

c. The date the records were released

END OF DOCUMENT
I. POLICY: The results of testing shall be provided accurately, clearly, unambiguously and objectively, in a report, and shall include all the information agreed with the customer and necessary for the interpretation of the results and all information required by the method used. All issued reports shall be retained as technical records. The results shall be provided in a written report or through electronic access.

A. The laboratory shall be responsible for all the information provided in the report, except when information is provided by the customer. Data provided by a customer shall be clearly identified. In addition, a disclaimer shall be put on the report when the information is supplied by the customer and can affect the validity of results.

B. The results shall be reviewed and authorized prior to release. The authorizer of results shall review the technical record and document the review. The individual DRAFT COMPLETING the report will review the technical record and document the review by placing their initials on each page of the notes in the case file.

C. The report header will contain:
   1. The LIMS (Laboratory Information Management System) generated laboratory number including request number
   2. A title such as "Report of Laboratory Examination"
   3. The case type
   4. The name and address of the laboratory
   5. The requesting agency name and case file number
   6. The requesting agent's name
   7. The request date
      a. The request date in LIMS will be the date the first submission of evidence associated with a request is received into the laboratory accompanied by a complete request for analysis, such that work can begin. The request date will not change for evidence that is shared between units.
      b. If the request cannot be logged-in or worked due to missing information, incomplete submissions, or any other reason, the request date may be changed to the date when all required information and/or submissions are present in
the laboratory. A note will be put into LIMS to reflect the reason the request date does not match the date the first submission was received.

8. The individuals or entities related to the case (Victims, Suspects, Subjects, or Police Officers).

D. The report body will contain:

1. The location of performance of the laboratory activities if it is different from the address of the laboratory

2. The page number and total number of pages which provide unique identification that all its components are recognized as a portion of a complete report and a clear identification of the end

3. The name and contact information of the customer

4. Identification of the method used. It must be clear to the reader of the report which method(s) were used for each item tested.

5. A description of, the condition of, and unambiguous identification of all items received (including those items tested and those items not tested), and items collected or created (that were tested or are preserved for future testing)

6. The disposition of all items received (including those items tested and those items not tested), and items collected or created (that were tested or are preserved for future testing)

7. The date of receipt of the test item(s), and the date of sampling, where this is critical to the validity and application of the results

8. The date(s) of performance of the testing. Date(s) may be reflected as a range of dates.

9. The date of issue of the report

10. Reference to the sampling plan and sampling method used by the laboratory or other bodies where these are relevant to the validity or application of the results

11. The test result for all items tested with units of measurement
   a. When relevant, a statement to indicate that the results relate only to the items tested
   b. When relevant, a statement to indicate an item was not tested or is being preserved for testing

12. When relevant, a statement on deviations or exclusions from or additions to the test method or the specific test. See FSD.27 for more information about deviations

13. Identification of the person(s) authorizing the report

14. Clear identification when results are from external providers

15. Where applicable, information on specific test conditions, such as environmental conditions

16. Where relevant, a statement of conformity with requirements or specifications (eg. Title 17)
17. Where applicable, the measurement uncertainty presented in the same unit as that of the measurand or in a term relative to the measurand (e.g. percent) when:
   a. It is relevant to the validity or application of the test results;
   b. A customer's instruction so requires, or
   c. The measurement uncertainty affects conformity to a specification limit;

18. Additional information that may be required by specific methods, authorities, customers or groups of customers.

E. When opinions and interpretations are reported, they will be clearly marked as such on the report. The technical unit will have a procedure to:
   1. Ensure opinions and interpretations expressed in reports are based on the results obtained from the tested item(s)
   2. Address how to document the basis upon which the opinions and interpretations have been made
   3. Ensure opinions and interpretations are accurate and properly qualified and supported by the technical record
   4. When opinions and interpretations are directly communicated by dialogue with the customer, a record of the dialogue shall be retained.

F. When associations are reported, they will be clearly communicated on the report. The technical unit will have a procedure to:
   1. Address the terms used to convey the strength of an association (e.g. "likely", "consistent with", "match", "common source")
   2. Address how to properly qualify the significance of associations, whether by a statistic or qualitative statement
   3. Ensure reported language for strength and significance is consistent with established laboratory interpretation standards

G. When no definitive conclusion can be reached (inconclusive result), the report shall clearly communicate the result. The technical unit will have a procedure to:
   1. Describe how to clearly communicate the reason(s) no definitive conclusions can be reached

H. When a database is searched (CODIS, AFIS, NIBIN), the extent of the search will be clearly communicated and updated as needed. The technical unit will have a procedure to:
   1. Require reporting of the initial database entry
   2. Require reporting of an association resulting from a database search
   3. Address how to communicate the scope of the search (local, regional, state, or national), the frequency of the search (continuous, once, periodically), and how long the sample will be searched (always in the database, circumstances under which the sample would be removed from the database).

I. When measurement uncertainty is reported, it will be clearly marked on the report. The technical unit will have a procedure to:
1. Require inclusion in the report or an annex to the report when it impacts the evaluation of a specification limit stated by a regulatory body, a statute, case law, or other legal requirement.

2. Include the measured quantity value, y, along with the associated expanded uncertainty, U, and the coverage probability.

3. Be in the format of y ± U.

4. Be limited to at most two significant digits, unless there is a documented rationale for reporting additional significant digits.

5. Be reported to the same level of significance (i.e., same number of decimal places or digits) as the measurement result.

J. When a statement of conformity to a specification or standard is provided, it will be clearly marked on the report. **The technical unit will have a procedure to:**

1. Document the decision rule employed, taking into account the level of risk (such as false accept and false reject and statistical assumptions) associated with the decision rule employed, and apply the decision rule. Where the decision rule is prescribed by the customer, regulations or normative documents, a further consideration of the level of risk is not necessary.

2. Ensure the statement clearly identifies:
   a. To which results the statement of conformity applies.
   b. Which specifications, standards or parts thereof are met or not met.
   c. The decision rule applied (unless it is inherent in the requested specification or standard).

K. When the results of sampling are reported it will be clearly marked on the report. **The technical unit will have a procedure to include the following, where necessary for the interpretation of results:**

1. The date of sampling.

2. Unique identification of the item or material sampled (including the name of the manufacturer, the model or type of designation and serial numbers, as appropriate).

3. The location of sampling, including any diagrams, sketches or photographs.

4. A reference to the sampling plan and sampling method.

5. If statistical sampling is used, the report shall contain the confidence level and corresponding inference regarding the population.

6. Details of any environmental conditions during sampling that affect the interpretation of the results.

7. Information required to evaluate measurement uncertainty for subsequent testing or calibration.

L. When there is an operational need, an analyst in one unit may be asked to perform analysis under another unit's request. An example is a Biology Unit staff member presumptively testing a substance on a gun being analyzed in the Comparative Evidence Unit to determine if it may be blood or a Latent Unit staff member being asked to evaluate a possible fingerprint on a knife being analyzed in the Biology Unit.
1. The results of the testing will be included in the final report, along with the identity of the individual conducting the analysis

2. The individual conducting the analysis will document the testing in the notes and indicate the language to be included in the final report. The notes will include the analyst's initials, or secure electronic equivalent, and the date.

3. The results will be technically reviewed of the analysis and report language by an authorized individual. The technical reviewer will document the review in the notes and will include the reviewer's initials, or secure electronic equivalent, and the date.

II. Releasing Results Prior to the Completion of a Test Report

A. A result can be provided to a customer entitled to the test report prior to the completion of the written test report.

1. If there is any doubt to the identity of the individual seeking the result, the result will not be released and the request will be referred to a supervisor for resolution

2. Sufficient work will be performed to obtain a result that is accurate and supported by the technical record.

3. If applicable, the result will be properly qualified when provided to the individual.

B. The result must be technically reviewed by an authorized individual prior to releasing the information.

C. The release of the result will be documented in the test record. The documentation will include:

1. What result was released
2. Who technically reviewed the result
3. Who released the result
4. When the result was released
5. Who the result was provided to

D. A written test report will be issued when all analysis is complete.

III. Distribution of Test Reports

A. Test reports will be routinely provided to:

1. The requesting or investigating (Primary) agency
2. Related investigating agencies
3. The District Attorney's Office
4. Other entities entitled to the report by statute, law, discovery, or court order
5. Other entities when authorized by the requesting agency or Chief of Forensics

B. Test reports are distributed via the Automated Regional Information Exchange System (ARIES). ARIES is a restricted access intranet site for secure transmission of test reports.

C. If a report has been finalized and is needed urgently (for court or investigative purposes), but is not yet able to be viewed in ARIES, the report may be provided to the customer. The
date and name of the agency receiving the report must be recorded in the test record.

D. For non-ARIES distribution (agencies or entities that do not have access to ARIES), the date and name of the agency receiving the report must be recorded in the test record.

IV. "No Work Done" Report, Partial Work Performed Report, and Canceled Requests

A. "No Work Done" Reports

1. When the laboratory determines that the requested work cannot or will not be performed, a report will be issued to the customer. The reason the requested work was not performed will be articulated in the report.

   a. The Forensic Services Division has the discretion to what extent the services requested will be performed. See FSD.14 for additional information.

2. When the agency cancels a request for service and no work has been performed, a report will be issued. The identity of the individual canceling the request will be included in the final report.

B. Partial Work Performed Reports

1. If work is halted for any reason, the results of any work performed (including partial testing) will be communicated to the customer through a written test report. The reason the work was halted will be included in the final report.

C. Canceled Requests

1. A request may be canceled by a Supervisor, Manager, or Chief of Forensics when the request has been created due to a data entry error (eg. duplication of the request). The reason for the cancelation will be recorded in the test record.

V. Amended Reports

A. Amended reports are not required when the submitting agency has provided the incorrect information. In these cases, it is at the discretion of a Supervisor, Manager, or Chief of Forensics to initiate an amended report.

B. An amended report will be issued when Division staff make an error in a report that has been released to a customer.

1. When an issued report needs to be changed, amended, or re-issued, any change of information shall be clearly identified and, where appropriate, the reason for the change included in the report.

2. Amendments to a report after issue shall be made only in the form of a further document which includes the statement "Amendment to Report" or an equivalent form of wording.

3. When it is necessary to issue a complete new report, this shall be uniquely identified and shall contain a reference to the original that it replaces.

4. The amendment may only be made if the laboratory has the original report.

C. See QA.04 for more information.

VI. Confidential and Restricted Reports

A. Confidential Reports
1. Confidential requests are designated by the submitting agency or when there is a legal need. Confidentiality may be necessary to:
   a. Protect the privacy of the individual under investigation
   b. Protect the integrity of an investigation
   c. Limit knowledge of information related to high profile cases

2. Laboratory employees may not discuss the results of confidential requests with others, except a Supervisor, Manager or Chief of Forensics, the requesting person, or as necessary to perform the requested examination(s).

3. See QA.07 for:
   a. Acceptance procedures
   b. Notification procedures
   c. Distribution procedures
   d. Storage procedures

B. Restricted Reports

1. Reports not intended for normal distribution via ARIES, but not truly confidential (eg. officer involved crime scene request), may be designated as restricted by the laboratory. See QA.07 for more information.

END OF DOCUMENT
I. POLICY: The laboratory will have controls for identification, storage, protections, backup, archival, retrieval, retention time, and disposal of records used to demonstrate fulfillment with accreditation standards.

   A. Technical Records

   1. Identification: Case Files contain administrative and technical records generated or received by a laboratory pertaining to a particular case and include test report, records of observations and test/examination results, instrumental data, photographs, conversation logs, evidence receipts, police reports. They are uniquely identified with a laboratory number and request number.

      a. As of 3/1/2013, the official test report is created, stored and retrieved in an electronic format (in JusticeTrax LIMS).

      b. Prior to 3/1/2013, the official report varied by unit (either hard copy or electronic).

      c. The official supporting technical records may be created, stored and retrieved in electronic, written, or hybrid format.

   2. Storage:

      a. Physical Storage of case files/reports will be in a secured location under the management of the Administrative Staff.

      b. Electronic laboratory reports and technical records will be maintained in LIMS or other data management systems.

   3. Protections

      a. Case files are stored in limited access facilities protected by a security system.

      b. The information contained within technical records will be restricted to those that have a need or a right to know.

      c. No original reports and/or notes should be removed from the laboratory except as a result of a court order.
i. In the event the Court orders the laboratory to produce the original report and/or notes, the staff member releasing the report shall place a photocopy of the court order, report and notes in the file with a note attached explaining the circumstances of the removal of the report, date and initials of the staff person.

d. Copies can be made for the purposes of technical and administrative review. No original copies will leave the Forensic Services Division.

4. **Back-up**

   a. Records are backed up by the Sheriff's Technical Services Division or as specified in the Technical Unit Manual.

5. **Archival**

   i. Several years (amount dependent on storage capacity) of paper reports and case notes are found in file cabinets in the office areas of the Muir and Summit facilities.

   ii. Older paper reports and case notes are stored at a secured off site facility pending electronic conversion.

6. **Retrieval**

   i. The clerical staff are responsible for the filing and maintenance of hard copy case files

   ii. Case files are typically filed in numerical order according to the Division's laboratory number

   iii. Electronic case files are indexed in LIMS by the Division's laboratory number

   iv. Records are readily retrievable in facilities that provide suitable environment to prevent damage or loss.

   v. Routine access to hard copy case files is limited to Clerical Staff, or those assigned in an acting equivalent role. If needed, the following individuals, or their designee, may access case files:

      i. Chief

      ii. Forensic Managers

      iii. Forensic Supervisors

   vi. FSD staff have access to case files stored electronically (unless restricted in LIMS-see QA.07).

7. **Retention time**

   a. Retention practices take into account legal requirements (statute of limitations).

   b. Homicide and sexual assault case files are retained indefinitely.

   c. Other than the exceptions above, case files will be retained in accordance with the Contra Costa County Records Department policy or minimally 7 years.

8. **Disposal**
a. The Section Manager is responsible for disposal of the hard copy technical records.

b. Once retention time frames are met, original laboratory reports, case notes, and photographs for offenses other than the exceptions can be discarded or returned to the primary agency.

c. Prior to discarding a case file, the documentation will be captured electronically.

B. Quality Records

1. **Identification:** Quality Records contain documentation related to the Quality Management System. The name of the record identifies the type, for example:
   a. Audits and assessments
   b. Management reviews
   c. QA Actions
   d. Competency and proficiency tests
   e. Statements of qualification
   f. Court testimony monitoring

2. **Storage:** Quality records may be created, stored and retrieved in electronic, written or hybrid format.
   a. Typically reports from internal audits and management reviews are stored electronically. [FSD.20], [QA.16] & [FSD.19]
   b. QA Actions, proficiency and competency records, staff SOQs, and court testimony monitoring are stored in LIMS. See [FSD.15], [FSD.27] & [QA.18]

3. **Protections**
   a. The information contained within Quality Records will be restricted to those that have a need or a right to know.

4. **Back-up:** Records stored electronically are backed up by the Sheriff's Technical Services Division.

5. **Archival:** Older paper or electronic records may be stored in limited access facilities protected by a security system.

6. **Retrieval:**
   a. The Quality Assurance Coordinator is responsible for ensuring the proper filing and maintenance of quality records. Quality Records are typically maintained in
      i. FSD Quality Assurance Folder (secure drive)
      ii. LIMS
   b. The following individuals have access to the files containing quality records:
      i. Chief
ii. Quality Assurance Coordinator

iii. Forensic Managers

iv. Forensic Supervisors

v. Individuals granted access by the Chief or Quality Assurance Coordinator

7. Retention Time

a. Electronic copies of audits and assessments, management reviews, QA Actions, competency and proficiency tests, statements of qualification, and court testimony monitoring will be kept for at least one accreditation cycle (4 years).

8. Disposal

a. The Quality Assurance Coordinator is responsible for disposal of the quality records

C. Purchasing Records

1. Identification: Records of purchases of external supplies or services that affect the quality of tests are identified as purchasing documents

2. Storage: Records may be created, stored and retrieved in electronic, written or hybrid format.

   a. Purchasing records are typically stored in a database (Muir) or binders (Summit)

3. Protections:

   a. The information contained within Purchasing Records will be restricted to those that have a need or a right to know.

   b. Hard-copy records are stored in limited access facilities protected by a security system

4. Back-up: Records stored electronically are backed up by the Sheriff's Technical Services Division.

5. Archival: Records may be archived at the Sheriff's Office Fiscal Dept.

6. Retrieval: Typically, the clerical, other support staff, or Section Manager is responsible for ensuring the proper filing and maintenance of purchasing records.

7. Retention Time: Purchasing records will be maintained for at least one year.

8. Disposal: The Section Manager is responsible for disposal

D. Selection of Personnel Records

1. See FSD.03 for more information on records maintained by the FSD

2. Sheriff's Office Human Resources also maintains records for selection of personnel.

E. Personnel Records
1. See SO Policy 1.05.82 for more information of employee personnel files.

END OF DOCUMENT
I. POLICY

Forensic Services Division staff will comply with all reasonable and legitimate discovery requests and will adhere to CCCSO Policy 1.06.71.

A. Discovery: refers to the pre-trial tools that can be used by one party to obtain facts and information about the case from the other party in order to assist the preparation for trial.

1. Discovery requests to produce case files and other case-related materials resulting from the analysis of evidence in criminal cases are handled in accordance with the discovery procedures below. The District Attorney's Office has access to completed laboratory reports via ARIES, see FSD.43. A request for any materials other than the report are considered a discovery request.

B. Criminal Discoveries

1. Receiving a Request

a. All Criminal discovery requests must be in writing and received via the District Attorney's office; the District Attorney is considered the requesting party.

b. The District Attorney's office should review discoveries for relevance before sending the request to the laboratory. If the discovery information sought appears to be unreasonable or irrelevant, a Supervisor or designee may contact the District Attorney's office for assistance in obtaining a modification to the discovery.

c. If a discovery request is received without a reasonable time period to meet the due date, the requesting party should be advised.

d. A Rush discovery request will be reviewed by a Supervisor so they may assess exigent circumstances.

e. A request by defense counsel for viewing the records in lieu of receiving the records may be honored following approval by the District Attorney’s office.

2. Generating & Tracking Discovery Requests

a. Discovery requests for each unit will be tracked via LIMS.

b. Discovery requests will be dated upon receipt and brought to clerical or support staff for processing and entry into LIMS.
c. The discovery request is logged into LIMS and a scanned image of the request is attached.

d. Discovery requests that ask for materials from multiple technical units may be coordinated by a **section manager** that has the preponderance of the materials under their domain.

e. Discoveries associated with a laboratory number will be logged in as a subsequent request under the existing laboratory number.

f. Discoveries not associated with a laboratory number, e.g. breath cases, are given a **new lab number**. See **CLER.DAT.12**.

g. At any time, a Supervisor/Manager may view the status of open or pending discovery requests using LIMS reports (e.g. **All Open Requests** or **Requests Awaiting Admin Review**).

3. **Assigning & Preparing Discovery Materials**

a. Discovery requests will be assigned to an appropriate technical unit staff member based on the nature and scope of the request.

b. **It is the responsibility of the assigned staff member to review the records being sought and determine what will (or will not) be released. If there are any questions about release of records, it is the responsibility of the Unit Supervisor or Section Manager to make a determination of what will (or will not) be released.**

   i. The laboratory will **ONLY** release Corrective Action documents, inclusive of Level 2 or Division Level Corrective Actions when supplied with a subpoena or Subpoena Duces Tecum (SDT) for the records.

c. **It is the responsibility of the assigned staff member to request records they cannot access themselves (see table below) and review the prepared records to ensure completeness and suitability prior to release.**

d. See below for a list of commonly requested records and who is typically responsible for **preparing** those materials:

<table>
<thead>
<tr>
<th>Record or Material Requested</th>
<th>Typically Prepared by:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Report, Notes and Chain of Custody</td>
<td>Clerical or Unit Staff</td>
</tr>
<tr>
<td>ASCLD/LAB Certificate (available on-line)</td>
<td>Unit Staff or Supervisor or QA Coordinator or QA Clerk</td>
</tr>
<tr>
<td>Proficiency or Competency Records</td>
<td>Unit Staff or Unit Supervisor</td>
</tr>
<tr>
<td>Training Records/Individual Certifications</td>
<td>Unit Staff or Unit Supervisor</td>
</tr>
<tr>
<td>Authorizations</td>
<td>Unit Staff or Unit Supervisor</td>
</tr>
<tr>
<td>Equipment/Reagent/Maintenance Logs</td>
<td>Unit Staff or Unit Supervisor</td>
</tr>
<tr>
<td>Raw Instrumental Data</td>
<td>Unit Staff or Unit Supervisor</td>
</tr>
</tbody>
</table>
e. When requesting policy and procedure from the QA Coordinator or QA Clerk, staff **MUST** include:
   i. the active date(s)
   ii. the name(s) of the document(s) being requested (eg. DRG.34 and DRG.60)
   iii. the name(s) of the technical unit manual(s) being requested (eg. Biology QA/QC Manual and CODIS Manual)

4. Completing a Discovery
   a. **Records may NOT be released until the Discovery Request is marked Administratively Reviewed in LIMS.**
   b. **It is the responsibility of the assigned staff member to ensure the discovery is completed.** A completed discovery is one that:
      i. Provides all the requested information or
      ii. Indicates what information the lab can and cannot provide or
      iii. Indicates what information the lab will and will not provide
   c. Discovery requests should be completed in a timely fashion to avoid unnecessary continuances or dismissals of the judicial proceedings.
   d. The discovery request, when completed, will be marked **Draft Complete** in LIMS by the assigned staff member.
   e. A Supervisor or designee will review the records to ensure the completeness and suitability of the discovery, as requested, and mark the request **Administratively Reviewed.**
   f. **If needed, it is the responsibility of the technical units to provide clarification or unit specific instructions or guidance in a technical unit manual policy or procedure.**
   g. Any associated charges for copying or preparation of records may be charged to the defense counsel per the CCCSO Policy 1.05.68.

5. Release of Discovery Records
a. For materials released outside of ARIES, a record of WHEN the materials were released and WHO the materials were released to must be retained.

b. The discovery records will ONLY be released to the District Attorney's office by one, or more, of the following methods (see below for exceptions):

   i. Posted to ARIES
      1. In the LIMS imaging module, under the discovery request, select the image(s) to be released and check “Send to iResults”. The images will be available on ARIES 24 hours after the administratively reviewed milestone is checked in LIMS.
      2. If desired, multiple pdf documents may be concatenated prior to release, see "Electronic Batch Documents" under TOX.10 for more information.

   ii. Email
       1. The staff member emailing the records must document the release in LIMS or in the case file with a notation that includes the date of release and who the records were sent to.

   iii. Paper copy or Hard Copy
        1. The staff member releasing the records must document the release in LIMS or the case file with a notation that includes the date of release and who the records were released to.

   iv. Compiled on CD, DVD or other electronic media
       1. Release via electronic media is appropriate when the requested records are not amenable to be uploaded as images (e.g. digital images, raw data, very large documents, etc.).
       2. Multiple copies of the electronic media may be provided.
       3. The staff member releasing the records must document the release in LIMS or the case file with a notation that includes the date of release and who the records were released to.

c. A former laboratory employee may be provided their CASE FILE for the purpose of testimony at a criminal trial at the discretion of a supervisor. The supervisor may request to be provided with the subpoena for testimony prior to providing the case file or request the individual utilize the discovery process indicated above. Any records, other than the case file, must be obtained through the discovery process indicated above for the purpose of tracking what records the laboratory is releasing.

d. The District Attorney's office may authorize the release of records to a member of the Sheriff's Department (e.g. Coroner's personnel for an inquest)

6. Documentation and Retention of What Was Released

   a. Regardless of the mechanism of release, the discovery materials or records of WHAT was released will be retained in one or more of the following ways:
i. filed electronically as images with the request in LIMS
ii. as a paper copy with the case file
iii. as a CD/DVD (or other electronic media) with the case file
iv. as a LIMS generated report

C. Civil Discoveries

1. For Civil discovery requests, if there is a pending lawsuit, County Counsel or the defense counsel needs to serve a Civil Subpoena/Discovery Request to the laboratory for production of the records.
   a. If the records have any confidential information or if unsure of what needs to be released, staff need to notify their Supervisor.
   b. If needed, the Supervisor will facilitate consultation with County Counsel before releasing the records.

2. A former laboratory employee requesting records in a civil case should be instructed to contact the Sheriff’s Office Records Unit.

3. The laboratory will follow the Criminal Discovery procedures (above) for:
   a. generating/tracking
   b. assigning/preparing
   c. completing
   d. documenting when the documents were released and to who (as it will be outside of ARIES)
   e. documenting/retaining what was released

D. Subpoena Duces Tecum (SDT)

1. Forensic Services Division staff will adhere to CCCSO Policy 1.05.68.
2. The Criminal SDT should be received via the Identification and Records Unit.
3. The original SDT will be date and time stamped and initialed by the person receiving it.
   a. Both FSD and Identification and Records Unit staff will review the SDT for validity based upon requirements within CCCSO 1.05.68.
   b. Identification and Records Unit staff will provide guidance and direction to FSD in the event of an invalid SDT.
4. Criminal SDT response time requires documents to be provided within 15 calendar days.
   a. If the laboratory cannot produce the records within the 15 calendar days the laboratory should seek an extension.
5. If the SDT is for court appearance, a minimum of 5 calendar days response time is required
6. Complete the Notification and Compliance Form and return to the Technical Services Records Unit Manager for recordation and audit/tracking.

7. Any fee associated for copying and preparation of records is handled by the Identification and Records Unit with the defense counsel.

8. **Admin Per Se SDTs** (typically received from DMV on Alcohol cases) require documents to be provided for DMV hearings.
   a. The records need to be produced in 15 calendar days.
   b. If the SDT is for court appearance a minimum of 5 calendar days is required.
   c. The laboratory staff review the records for validity of records sought.
   d. The Identification and Records Unit Clerical Supervisor or Manager shall be notified of the receipt of the SDT by fax or email.
   e. Documents requested by the SDT will be copied. Original material shall not be provided to the requester.
   f. The copies will be certified by stamping in red ink (or electronic equivalent) indicating they are a true copy of the originals. The stamp format is as follows:

   I hereby certify that the annexed instrument is a true and correct copy of the original on file in my office.
   Dated__________________
   By: ______________________________
   Forensic Services Division

   g. Complete a Notification and Compliance Form. See FSDF.10.
   h. PDF files can be created by JusticeTrax Imaging or other PDF generating programs such as PDFcreator and Adobe Acrobat Pro or equivalent. See TOX.10 for detailed procedures.
   i. Pages for the discovery record may be created separately and then combined into a single PDF file with an electronic signature page.
   j. If the official records are electronic, it is sufficient to create a secure electronic signature and display the signature and the date once for the entire electronic package. See BA.43 for creating a secure identity and electronic signature procedure.
   k. Scan the SDT, Notification and Compliance Form, and certified copies of provided documents and file electronically. See CLER.CRIM.11 and CLER.DAT.07 for more information.
   l. Forward the original SDT, Notification and Compliance Form, and Fee Document to the Records Unit for tracking and processing.
   m. The Records unit will handle collection of any fee associated with the compilation of the records.
   n. The laboratory will follow the Criminal Discovery procedures (above) for:
      a. generating/tracking
b. assigning/preparing

c. completing

d. documenting when the documents were released and to who (as it will be outside of ARIES)

e. documenting what was released

9. Retention of Completed SDTs:

a. Forensic Division personnel shall retain the electronic copies of the subpoena, the released material, correspondence, or other ancillary documents for a minimum period of three years from the scheduled production date. The file copy can be utilized for a court appearance should a request to testify to the documents arise.

E. Other Discovery Requests

1. Requests from official government/governing agencies, such as State Licensing Boards will be tracked through the discovery procedure. The laboratory will follow the Criminal Discovery procedures (above) for:

a. generating/tracking

b. assigning/preparing

c. completing

d. documenting when the documents were released and to who (as it will be outside of ARIES)

e. documenting/retaining what was released

END OF DOCUMENT
I. POLICY    Normal Forensic Services Division business hours are 8:00 a.m. to 12:00 noon and 1:00 p.m. to 5:00 p.m., Monday through Friday.

A. The Forensic Services Division is open for routine business 8:00 a.m. to 12:00 noon and 1:00 p.m. to 5:00 p.m., Monday through Friday. During these hours, clients may conduct routine business with Division staff members.

   1. Routine evidence submissions will be accepted during normal business hours except during the 12:00 p.m. to 1:00 p.m. hour.

      a. Urgent evidence submissions may still be accepted during the lunch break.

   2. Phone calls will be answered during normal business hours, including the lunch break.

      a. Phone calls may be forwarded from one facility to another during normal business hours.

      b. The Chief may authorize the cessation of reception services. See FSD.53 for more information.

END OF DOCUMENT
I. POLICY   New, assigned, contract, or volunteer employees will receive an orientation when they begin employment.

A. Overview
   1. This process takes place in the first few days to weeks of employment.
       a. Although the process may take several days to weeks to complete, orientation should begin on the employee's first day of employment.

   2. The purpose of orientation is to introduce a new employee to the County, the Sheriff's Department (SO), and the Forensic Services Division (FSD).

   3. Orientation should make a new employee feel welcomed and valued by the FSD, and help a new employee feel comfortable in their role.

B. Responsibilities
   1. It is the responsibility of the employee's supervisor to provide or arrange for the orientation and explain what's expected of new employees and provide a warm welcome to the FSD.

       a. The supervisor may assign other employees to assist in any portion of the orientation.

C. Employee Benefits
   1. See [New Hires for Contra Costa County](#) and [Instruction for New Hires](#)

D. The orientation should include, as applicable, an overview of the following:
   1. The organizational structure of the SO and FSD and the concept of Chain of Command

   2. An introduction to key personnel within the FSD

   3. Document control, including how SO and FSD policies and procedures are disseminated and accessed

   4. Key SO and FSD policies

   5. SO and FSD culture

   6. FSD facilities, including a tour highlighting building awareness and safety equipment at each facility
7. Job description and expectations, including work assignment and work space
8. Safety Program, including safety training
9. Key administrative policies
10. Computers and networks

E. Documentation

1. A checklist, FSDF.01, is available for the supervisors to ensure that the most important topics are covered during the orientation
2. Not all subjects in the checklist may be applicable to every new employee. A notation of N/A next to that subject may be used.
   a. The checklist may be imaged into the employees LIMS training module. See QA.12.
3. The completed checklist is retained by the Section Manager or designee.

END OF DOCUMENT
I. POLICY  Managers will ensure that SO and FSD policy is followed for an employee's separation from employment with the Sheriff's Department.

A. It is the responsibility of the employee's Manager or their designee to ensure SO policy is followed upon separation. See 1.05.76 for details. Some responsibilities include:

1. Arranging an exit interview
2. Providing the employee the Notice of Voluntary Termination of Employment Form
   a. Note: The Termination of Employment Form (AK219) is found on SPARKS under Personnel and Fiscal forms.
3. Collecting items listed in SO policy, as applicable

B. In addition to following SO policy for separation, it is the responsibility of the employee's Manager or their designee to ensure the following:

1. FSDF.04 (Exit Interview Questionnaire) is completed
2. FSDF.05 (Exit Checklist) is completed
   a. The purpose of the checklist is to aid management in ensuring that all items are completed prior to the employee leaving employment.
   b. The exit checklist should be started prior to the last day since it may take time to close cases, transfer evidence etc.
   c. Not all subjects in the checklist may be applicable to every employee. A notation of N/A next to that subject may be used.
   d. The completed checklist will be maintained.

END OF DOCUMENT
I. POLICY  Employees will be recognized and appreciated for meritorious performance.

A. A Forensic Services Division Employee of the Month may be selected if the employee's performance is deemed exceptional and department-wide recognition is appropriate. An Employee of the Month may not be selected each month.
   1. The Employee of the Month recommendation will be brought to the Chief's attention.
   2. The Chief will approve the selection of the employee as the FSD Employee of the Month.
   3. The section manager will generate a memo to the employee indicating the selection as the FSD Employee of the Month.
   4. The memo will be forwarded up the chain of command to the Support Services Bureau Assistant Sheriff for their review and comments.
   5. The memo will then be given to the employee and copied to the Sheriff's PIO and the employee's personnel file.
   6. The employee's Manager will arrange for a name plate from the Sheriff's sign shop to be added to the FSD Employee of the Month plaque.

B. Performance above and beyond normal expectations should be recognized with a letter of commendation (SO Policy 1.04.31).
   1. The letter of commendation may be issued by a technical unit supervisor, a section manager, or the Chief.
   2. The letter will be produced on the Sheriff's Office memo format and addressed to the employee.
   3. The letter will be forwarded up the chain of command to the Support Services Bureau Commander for his review and comments.
   4. The letter will then be given to the employee and copied to the Sheriff's PIO and the employee's personnel file.

C. Employees may be recognized for with a plaque, trophy or award for service (SO Policy 1.04.33).

D. Employees may be recognized in the annual Office of the Sheriff Employee of the Year ceremony (SO Policy 1.04.23).
I. POLICY   All Division employees are responsible for keeping Division facilities in good order and for reporting problems in the facilities that require maintenance.

   A. Each employee is responsible for keeping his/her work and/or desk area neat and clean by putting away supplies, tools, and evidence.
      1. Division staff are responsible for cleaning his/her work surfaces that are not cleaned by the custodial staff.

   B. The custodial staff are responsible for the routine cleaning of Division facilities.
      1. Special requests for custodial services can be made through a Supervisor/Manager.

   C. Any employee who notices a maintenance problem within a Division facility is responsible for promptly bringing it to the attention of his/her Supervisor/Manager.

END OF DOCUMENT
I. POLICY Libraries and their publications at the Summit and Muir facilities are available for use by all Division members.

A. Anytime a Division employee removes a publication from the library area of either laboratory, they should complete an out card and leave it in the place of the publication. All publications must be returned to the appropriate location as soon as the employee has finished with them.

II. POLICY New literature should be distributed to appropriate staff for review.

A. The distribution of literature may accomplished in a variety of ways, including electronic or hard-copy notifications.

1. An example of electronic distribution of literature is placing literature on a shared drive for staff to view or distributing to staff using PowerDMS.

2. An example of hard-copy distribution of literature is distributing the literature to the staff via a route slip or during a staff meeting.

I. Analysts will account for their time utilizing activity tracking in LIMS.

A. Scope

1. All analysts must track time spent at work in LIMS.
2. The Chief, Managers, Supervisors, and Clerical staff are not required to track their time but may choose to do so.
3. All testimony related activities (eg. testimony, 115s, business records, official records, depositions, etc.) must be tracked (regardless of title).

B. Responsibilities

1. Analysts will be responsible for populating activities into LIMS.
2. Supervisors will be responsible for reviewing analyst activities. The Chief and Managers may also review activities.

C. Examples of Activities

1. Casework analysis
   a. time spent performing analysis and preparation of report and notes
2. Casework related activities
   a. instrument maintenance and repair
   b. reagent, standard, calibrator, control, etc. preparation
   c. technical review
   d. administrative review
   e. verification
3. Court related activities
   a. consultation
   b. preparation
   c. 115s, or other phone testimony
d. testimony

4. Discovery related activities

5. Training
   a. internal & external training
   b. participation in training program

6. Teaching or lecture
   a. preparation
   b. teaching

7. Reading or research

8. Accreditation related activities
   a. participation in audits
   b. writing/reviewing standard operating procedures
   c. validation/performance verification

9. Meetings

D. Documentation

1. Case specific activities
   a. From the request tab, select Activities and add by selecting the green "+" button and add activities.

2. Non-case specific activities
   a. Click the clock icon and add activities.

END OF DOCUMENT
I. POLICY  
The Forensic Services Division strives to create an environment that encourages communication between laboratory employees and management.

A. The Chief, Manager or Supervisor can schedule meetings with their staff and the meetings should be held on a regular and routine basis.

1. Manager Meetings: The Chief and Forensic Managers meet periodically to discuss administrative, budget, policies and procedures dealing with the operation of the Division. These meetings will typically be held on a quarterly basis.
   a. The Chief and Forensic Managers also have the ability to communicate with each other and various other individuals from the Sheriff’s Administration Division via Avistar (video conference).

2. QA Meetings: The Chief, Forensic Managers, Quality Assurance Coordinator and other staff members can be called together to discuss various policies and procedures along with areas needed for improvement within the Forensic Services Division. Agenda and/or meeting minutes are stored in Power DMS. QA Meetings are typically held quarterly or when necessary.
   a. Communication is conducted via email or through the PowerDMS Workflows when drafting policies and procedures.

3. Manager & Supervisor Meetings: Each Manager may set up meetings with Supervisors to disseminate information in regards to the administration of the each Unit, Section, Division and Department when necessary.

4. Technical Unit & Section Meetings: Meetings may include discussion about the following: administrative announcements, policies and procedures, case management concerns, relevant technical issues, and training. These meetings provide an opportunity for the exchange of information up and down the chain of command. Unit Meetings will be held and documented at least every quarter. Section Meetings will be held at the discretion of the Forensic Manager.
   a. Information is also disseminated to and received from staff through email and PowerDMS.

END OF DOCUMENT
I. POLICY  Division vehicles will be used in accordance with Office of the Sheriff policy. Vehicles may only be used for work-related activities.

A. Checking Out a Vehicle
   1. To check out a vehicle, the staff member must fill out a Vehicle Usage Log.
   2. The vehicle keys are returned when the vehicle is returned.

B. Fuel
   1. The vehicle should be fueled at the County Fuel station when needed.
   2. A non-County fuel station should only be used in emergencies or when outside the County for an extended period.

C. FasTrak Transponder Usage
   1. The FasTrak Transponder may only be used in a County car.
   2. The FasTrak Transponder may not be used in a personal vehicle, even when conducting official business.

D. Vehicle Maintenance
   1. Emergency and routine maintenance is performed by Fleet Services.
      a. Fleet Services will notify the laboratory when vehicles are due for routine service.
   2. Notify a Supervisor or Manager of any mechanical or safety issues with a vehicle.

E. Accident Reporting
   1. Refer to Office of the Sheriff Policy 1.06.54 for vehicle accident reporting procedures.

END OF DOCUMENT
I. POLICY  Section managers will be responsible for the maintenance of the hazardous materials reporting requirements for their respective facilities.

A. The Section Managers will be responsible for reviewing and filing their respective annual Hazardous Materials Business Plan upon receipt of the Certified Unified Program Agency (CUPA) packet from the Contra Costa County Health Services Hazardous Materials Program.

1. An electronic copy of the business plan is forwarded to the Chief.
2. A Hazardous Materials Business Plan is only needed for the Muir and Summit facilities at the current time.

B. The Section Managers will be responsible for reviewing and returning the annual Hazardous Waste Verification Questionnaire and keeping the EPA ID number current.

C. The Section managers will maintain a file of the Uniform Hazardous Waste Manifests that are produced when the waste hauler picks up the hazardous waste from each facility.

1. Immediately after receipt, a copy of the Uniform Hazardous Waste Manifest must be mailed to:

   DTSC Generator Manifests
   Department of Toxic Substances Control
   PO Box 400
   Sacramento, CA  95812-0400

2. The Section Manager or designee will be responsible for comparing the final Designated Facility report with the original manifest for discrepancies.

   END OF DOCUMENT
I. POLICY  Employees will adhere to Department policy regarding personal appearance and dress.

A. Daily handling of caustic and corrosive chemicals, toxics, biohazards, along with the intimate interactions with evidence containing various forms of contaminants are recognized as ill suited activities for formal dress. As a result, the following exceptions are approved:

1. Division staff performing casework or casework-supporting duties are permitted to wear the Class E uniform.

2. Division staff involved in crime scene response, including response to the morgue, may wear the approved Crime Scene Uniform whether in the lab or out in the field.

3. Clerical staff and support staff involved with evidence sign in, evidence log in, evidence transport within or between facilities, and placing and retrieving evidence from storage may wear Class E.

4. Staff may "dress-down" for scheduled facility clean-up or other physically demanding activities when approved by a Supervisor, Manager or the Chief.

B. All staff will wear proper business attire when appearing in court.

END OF DOCUMENT
I. The purpose of Evidence Reconciliation or Recon is to ensure evidence within the Forensic Services Division is handled properly and tracked accurately in accordance with Division storage, handling and chain of custody policies. Each facility will perform an Evidence Recon utilizing Justice Trax biannually.

A. General Information
   1. During an Evidence Recon, all evidence storage locations used to house legitimate case evidence, as well as personnel will be evaluated.
   2. Follow procedures outlined in QA.17
   3. The recon activities and recon report should take no more than 30 days to complete.
   4. A recon report will be generated at the conclusion of the Recon.
      a. The report will include discrepancies, errors or inaccuracies encountered during the Recon.
      b. The report will include what, if any, steps were taken to remediate discrepancies, errors or inaccuracies.
      c. If staff or locations are not evaluated, they will be included in the report with an accompanying explanation of why they were not assessed (eg. Mary Smith on maternity leave, unable to evaluate evidence in her possession).
      d. The recon report will be evaluated by the section manager.
      e. The recon report will be maintained by the Quality Assurance Coordinator and may be reviewed during audits.

B. Responsibilities
   1. Each section manager is responsible for:
      a. Scheduling Evidence Recons
      b. Assigning an individual the task of performing a Recon
      c. Facilitating any necessary training to perform a Recon
      d. Facilitating any necessary steps to resolve pending evidence discrepancies, errors in inaccuracies
      e. Reviewing the Evidence Recon report
2. The individual assigned the recon is responsible for:
   a. Utilizing the LIMS recon scanner and LIMS correctly, including familiarity with QA.17
   b. Scanning all evidence storage locations
   c. Evaluating evidence within the personnel possession of analysts
   d. Completing a recon report with all discrepancies and/or errors and indicating the status (e.g. 15-1010-5 scanned in wrong location, Verified with analyst Joe Jones the correct location and physically moved the evidence to the location reflected in LIMS)
   e. Completing the Evidence Recon, including a recon report, within 30 days of commencing the Recon.

3. The QA Coordinator is responsible for:
   a. Evaluating the recon report to determine if any further action is needed
   b. Maintaining the recon reports for each facility

   END OF DOCUMENT
I. Policy: Laboratory numbers shall be assigned for each case submitted. The laboratory number with request number is the unique laboratory identifier.

A. Laboratory Number Format

<table>
<thead>
<tr>
<th>XX-</th>
<th>XXXXXX</th>
<th>-XXXX</th>
</tr>
</thead>
<tbody>
<tr>
<td>Last two digits of the year</td>
<td>Sequential numbers reset to 000001 at the beginning of each year</td>
<td>Request number</td>
</tr>
</tbody>
</table>

When printed or written, all preceding zeros are understood.

B. Generating Laboratory Numbers

1. Laboratory numbers are auto-generated and assigned by LIMS after a search on the agency case number yields no matches.
   a. If the agency case number exists in LIMS, each new request will receive a separate request number.

2. Clerical staff may manually assign laboratory numbers if LIMS is not functioning.

3. Clerical staff will manually assign laboratory numbers in LIMS with the pre-existing laboratory number for "pre-LIMS" cases.
   a. If the case occurred prior to approximately September, 1979, the old laboratory number designations relied on a sequential numbering scheme that did not utilize the last two digits of the year as a prefix (some of these old lab numbers will have "L" as a prefix). Clerical staff will add these cases into LIMS using the year the crime occurred as the prefix followed by the previously assigned sequential laboratory number. For example:
      i. 9101 that occurred in 1966 will become 66-9101 and
      ii. L9-7909 that occurred in 1979 will become 79-7909.
   b. Use only a dash "-". Do not use commas "," or other special characters in the lab number.

4. Multiple agency case file numbers may be added to a single laboratory number when a laboratory request is being investigated by different agencies or when multiple complainants are related to the same suspect(s).
a. A primary agency will be designated in LIMS.

5. **In unusual circumstances**, two laboratory numbers may be given to a single agency case file number.
   a. Notes regarding the circumstance **will** be documented in the case file and in LIMS Case Synopsis.
   b. Lab numbers should be cross-referenced on the pending laboratory reports **when multiple laboratory numbers exist for a single agency case file number**.
   c. The cross-referenced laboratory number will be entered in either of the following ways:
      i. under the *Related Agencies* field and preceded by the prefix LIMS on the report.
      ii. under the *Related Laboratory Cases* field under the Case Info tab.

END OF DOCUMENT
I. In most circumstances, it will only be necessary to indicate the nature of the error and the correction in the amended report. However, there may be unique circumstances that require reconstruction of the original report into an amended report when the error and correction cannot be clearly and succinctly summarized. An individual with supervisory authority must be consulted and grant approval prior to reconstructing the original report.

A. Generating an Amendment Request in JusticeTrax LIMS:

1. The clerical staff or an individual with supervisory authority will generate a new request or a sub-request depending on either of the following:
   a. If a request exists in JusticeTrax, a sub-request will be generated for the amended report by adding a related request; regardless of whether or not the report was created in JusticeTrax.
   b. If the report was created PRIOR to implementing JusticeTrax, a new laboratory request will be generated in JusticeTrax pursuant to QA.02.

2. Enter the following LIMS information:
   a. Select the appropriate "Unit" amendment service.
   b. Enter in the correct case control information. The requesting rep should be the same as the original request unless otherwise specified.

3. Evidence may be related to the amendment request at the discretion of the individual opening the request or completing the report.

B. Assigning the Amendment Request:

1. The clerical staff or an individual with supervisory authority will assign the request to the original analyst/author of the report.

2. If the original analyst is unavailable or no longer employed by the Forensic Services Division, then the amendment request will be assigned to the Technical Unit Supervisor from the unit that originally issued the report.

C. Creating the Amended Report in JusticeTrax LIMS:

1. The assigned staff will open "Edit Findings" for the amended request and select "Add Result". Under the result type select "Amended Report" for the report header. Set the font to Times New Roman and font size 12.
2. The analyst should minimally address:
   a. Why the amended report is being issued and what original report it pertains to.
   i. For example, "This report is being amended to reflect the correct agency case number for Laboratory Number 00-123-1."
   b. What was changed.
   i. For example, "The agency case number was inadvertently reported as 00-456. The correct agency case number is 00-654 per Officer Smith."
   c. If applicable, that the amendment does not affect the results of the examination.
   i. For example, "The amendment does not affect the examination results."

3. Additional information may be added in the notes of the report. Open "Edit Findings" for the amended request and select "Add Result". Under the result type select "Notes". Set the font to Times New Roman and font size 12.

4. The assigned staff will draft complete the report.

D. **Reviewing the Amended Report**

1. **Complete the technical review** of the amended report (if applicable). If the amendment encompasses a technical component, an authorized individual will perform a technical review.

2. The Supervisor, Manager, Chief of Forensics or designee will perform the **administrative review** and be responsible for ensuring the Amendment Notification Form is complete and the notification is sent to ARIES correctly.

3. **Complete** the Amendment Notification Form (FSDF.17) by filling-in the laboratory numbers of the original report and the new amended report.

4. **Image** the completed Amendment Notification Form to LIMS as a **PDF** (Portable Document Format). The PDF must be in color.

5. **Associate** the PDF form to the original (parent request) laboratory request being amended (NOT the amendment or sub-request). For instructions on how to use LIMS imaging, see **QA.14**.

6. **Name** the image "Amendment Notification".

7. **Send the image to ARIES** by right clicking on the image in the imaging module and selecting "Send to iResults". The notification will appear as a hyperlink in ARIES on the original request.

8. **Retain** the hard-copy of the completed Amendment Notification Form. The hard copy must be in color.

9. **Attach** the hard-copy of the Amendment Notification Form to the original report (the report being amended).

E. **Notifying the Customer**
1. The customer/client agency will be notified through ARIES that a new report has been issued through the release of an amended report.

2. The customer/client agency will also be notified through ARIES that the original report has been amended when the Amendment Notification Form is posted to ARIES.

3. Note: The posting of the Amendment Notification Form is only applicable when there is an original request that exists in JusticeTrax LIMS.

I. The following is the procedure for receiving, entering, tracking and documenting proficiency and competency test performance.

A. Procedure for Receiving Tests

1. A chain of custody sticker should be placed on the test by the individual who receives or issues the test. The chain of custody should indicate:
   a. Who received or created the test.
   b. When the test was received or created.
   c. The storage location of the test (eg. individual, log-in storage or other location).
2. The chain should follow the movement of the proficiency or competency test through the laboratory system.
3. When a test is received via mail, the individual who receives the test should notify the Supervisor over the section/unit that a proficiency/competency test has arrived.

B. Procedure for Logging Tests into LIMS

1. In LIMS, create a new case by clicking the New Case icon to open a request for the proficiency test/competency test.
   a. Under Agency Name enter "Proficiency Test" or "Competency Test". "Proficiency Test" or "Competency Test" should always be the Primary Agency.
   b. The Agency Case Number may be the lab number or other designation.
   c. The Service should be the service in which casework would normally be performed.
2. OFFENSE TAB
   a. Skip the Offense tab
3. INDIVIDUAL TAB
   a. If Proficiency/Competency Test is for Alcohol or Toxicology an individual must be associated with the request, otherwise this tab can be skipped.
4. EVIDENCE TAB
   a. The Agency will default to what was entered previously, "Proficiency Test" or "Competency Test".
   b. The Badge/Agency Representative will be "Internal" or "External" based on the origin of the proficiency/competency test.
   c. The Kit should be:
      i. Blood Alcohol: BA Kit
      ii. Urine Alcohol: UA
      iii. Blood Toxicology: BDRUG KIT
      iv. Urine Toxicology: UD
      v. Controlled Substance: PROFICIENCY DRUGS
5. REQUEST TAB
   a. Leave the Agency as "Proficiency Test" or "Competency Test".
   b. The Badge/Agency Representative will be "Internal" or "External" based on the origin of the proficiency or competency test.
   c. The Section/Unit and Service is based on the sample type received.
   d. The Analyst is the person to whom the test is assigned.
   e. The Request Date defaults to the date the request is entered.
   f. The Due Date is the date the test is due, if applicable.
   g. Requester Notes may be used for notes or information about the test.
   h. Assignor Notes may be used for notes or information about the test.
6. Chain of Custody
   a. The individual logging in the test will generate a barcode from LIMS and attach it to the test sample package or to the assignment notification sheet. If the test is a re-analysis of previously analyzed evidence then the previous barcode may be used; with the
exception of Alcohol cases where a new lab number and barcode need to be generated.

b. For re-analysis of evidence the original chain of custody for the case sample must be filled out and an explanation stating that the evidence was used as a proficiency or competency test should be recorded in the case record. If the case is still open, the analyst of the open case will indicate in their notes that a sample was retained for laboratory use.

7. Adding a Sub-request
   a. A sub-request is added to the proficiency or competency test by selecting the "parent" request and clicking Add Related Request.
   b. The Agency of the sub-request should be the same agency as the parent request.
   c. The Badge Rep will be "Internal" or "External" based on the origin of the proficiency/competency test.
   d. The Lab is Forensic Services Division.
   e. The Div Section/Unit is the Unit the proficiency or competency work is performed in.
   f. The Service of the sub-request is always Comp/Prof and the unit of the parent request (eg. Comp/Prof Test Latent).
   g. The sub-request is assigned to the Supervisor of the Unit by selecting them as the Analyst. The Supervisor may choose to reassign the sub-request.
   h. It is not necessary to relate any evidence in the sub-request.
   i. Select OK to add the related request.
   j. LIMS will automatically prompt a barcode to be printed, click OK.

C. Procedure for Populating Test Information in the Sub-Request

1. The Supervisor, or individual assigned the sub-request will populate the requisite information by clicking on the Additional Data field (under the Request Tab) to fill in the requisite information, including:
   a. Date Received (drop-down list, or type into the field). Enter the date the test was received or select "N/A"
   b. Date Assigned (type in field). A date must be filled into this field
   c. Due Date (drop-down list, or type into the field). Enter the due date for the test or select "N/A"
   d. Date Submitted (drop-down list, or type into the field). Enter the date the test was submitted to the provider or select "Not Applicable"
   e. Supplier (drop-down list, or type into the field), Select the supplier from the list
      i. Type in a supplier if not on the list, or select "Not Applicable"
   f. Type of Test (drop-down list). Select the type of test from the list based on the origin as well as if the results are being provided to our accrediting body
      i. A test is considered "External-ANAB" if it has come from an approved proficiency test provider and the results are submitted to the vendor prior to the manufacturer's due date and the results are released to our accrediting body.
      ii. A test is considered "External" meaning it has come from an outside test provider. This may not be an approved test provider.
      iii. A test is considered "Internal" if it is made in house or it is an external test that is being "re-used".
   g. Test Set Identifier (type in field). This field is used to capture the test provider’s assigned test number (eg. CTS 17-530).
   h. Other Information (type in field). This field may be used to identify additional information about the test (types of samples, new equipment, or new methodology).
      i. Internal Prep Person-For Internal Test Preparation ONLY (type in field). Type the name of person responsible for preparing the test
   j. Description-For Internal Test Preparation ONLY (drop-down list, or type into the field). Select the description of how test was prepared from the drop-down list or type into the field.
      i. If more space is needed, reference the location of the information. For example, see Assignor Notes or attached image in LIMS.
   k. Components/Parameters of Testing (drop-down list, or type into the field). There are (3) drop-down lists to utilize.
      i. The type of test is based on whether the test is a competency or proficiency as well as the scope of the test (see table below).
      ii. The lists allow the user to capture up to (3) types of testing within a single competency or proficiency test.
      iii. If the user needed to capture more than (3) types of testing, an additional sub-request should be opened to populate the information.

**l. Equipment/Technologies** (type in field). This field is used to identify the equipment or methodology used in the test. The language used should match the equipment/technology language from our current accreditation scope document on ANAB.org.

**m. For Competency Tests ONLY** (checkboxes). There are (4) checkboxes to document the test of sufficient unknowns, test of knowledge, generation of a written report, and a practical examination of testimony.

**n. Satisfactory (Yes)** (checkbox). Check the box to document satisfactory performance.

  - i. If the box is not checked, the performance will be documented as unsatisfactory on the Proficiency/Competency Test Data Summary Report form

**o. Date of Completion** (type in field). Type a date into the field

  - i. For a competency test, this is the date the analyst was granted competency and is authorized to perform casework. The date must match the date on the authorization paperwork.

  - ii. For a proficiency test, this is the date the test was reviewed and the results were determined to be satisfactory or unsatisfactory. This is the completion of the proficiency test; however further action may be taken through the Corrective Action process.

**p. Calendar Year** (type in the field). Type the calendar year the test will "count" in.

  - i. For a proficiency test, this is the calendar year that will be used to determine that the requirements of FSD.23 are met.

**q. QA Action #** (drop-down list, or type into the field)

  - i. If the analyst's performance was unsatisfactory or there is a technical error, reference the QA Action associated with the test.

**r. For DNA ONLY**

  - i. DNA extraction method (type in field)

  - ii. DNA amplification kit (type in field)

  - iii. Correct inclusions (type in field)

  - iv. Correct exclusions (type in field)

  - v. Correct genotypes (type in field)

  - vi. CODIS Notified Initials and Date (type in fields)- If the analyst's performance was unsatisfactory, document the notification to the CODIS administrator

---

**D. Procedure for Performing Tests**

1. Documentation is on the PARENT or ORIGINAL REQUEST.
2. The analyst retrieves or is provided the test and examines the test as they would normally perform casework.
3. This includes verification if applicable, technical review and administrative review.
4. Policies or procedures used for efficiency should not be followed when performing a proficiency test.

E. Procedure for Reviewing/Completing Tests

1. Documentation is on the SUB-REQUEST.
2. The Supervisor or designee must determine if the analyst’s performance was satisfactory or unsatisfactory.
   a. The criteria for successful performance must be communicated to the analyst prior to undertaking the test.
   b. If the analyst’s performance was unsatisfactory or there is a technical error, the Supervisor will notify the QA Coordinator.
3. The Supervisor documents their review of the test results by electronically signing the sub-request.
   a. Note: a "Finding" must be added to the request under Edit Findings prior to Draft Complete. This is the FIRST signature applied as DRAFT COMPLETE.
4. If the results were reviewed for technical correctness by an individual other than the Supervisor that individual electronically signs the sub-request. If needed, this is the SECOND signature applied as VERIFYING ANALYST.
   a. This must be after Draft Complete and prior to Administrative Review.
5. For DNA competency and proficiency tests, the DNA Technical Lead must also electronically sign the sub-request. If needed, this signature is applied as TECHNICAL REVIEW.
   a. This must be after Draft Complete and prior to Administrative Review.
6. The QA Coordinator documents their review of the completeness of information by electronically signing the sub-request. This is applied as VERIFYING ANALYST.
   a. This must be after Draft Complete and prior to Administrative Review.
7. The analyst documents their review of the test results with the Supervisor or designee by electronically signing the sub-request. This is the LAST signature applied as ADMINISTRATIVE REVIEW.

F. Information Captured in LIMS

1. See FSD.23 for the information that must be captured in LIMS for Proficiency Tests.
2. See FSD.21 for for the information that must be captured in LIMS for Competency Tests.

G. Procedure for Creating Internal Tests

1. Internal tests may be: created by lab staff (eg. spiked or prepared sampled), created by re-using external tests, or created from case samples.
2. Expected test results must not be known or readily available to the individual taking the test.
   a. When applicable, the mechanism for preventing staff from determining the correct answer will be documented as part of "how the samples were obtained or created". This may be accomplished by restricting a case in LIMS or taking adequate steps to prevent staff from determining the correct answer.
3. The quality of internal tests must be evaluated prior to providing the test to the analyst.
   a. The mechanism for evaluating quality and suitability will be documented as part of "how the samples were obtained or created".
4. When a sample from a case evidence is used for testing purposes, the analyst must:
   a. Document the use in the case file of the request related to the official analysis
   b. Mark the evidence container with their initials, date, and purpose of its use i.e. "Proficiency test"
   c. Complete the electronic Chain of Custody for that evidence. See FSD.42 & FSD.35 for more information.

H. Discarding Tests and Completing the Chain of Custody

1. Once the sub-request is administratively reviewed, the test samples will be transferred to "Proficiency-End Chain".
2. Controlled Substance proficiency samples must be transferred to the Unit Supervisor or Section Manager physically and in LIMS.

END OF DOCUMENT
Proficiency/Competency Test Cases

Creating proficiency test lab numbers

This is a suggested procedure for archiving Competency and Proficiency test records prior to 2008. All competencies for employees from January 1, 2008 to current will be added to LIMS. Proficiency Tests assigned from January 1, 2008 to current will be entered into LIMS and anything prior to 2008 may not be entered into LIMS. Do a search to make sure the test has not been previously entered into LIMS. You can search by agency Proficiency, Competency or Proficiency/Competency. Most competencies were previously entered into LIMS.

If not previously in LIMS then create a new case.

The agency is "Proficiency Test" or "Competency Test". The Agency Case Number is the identifying number of the test.

LIMS will search for the test and should not find any previous entries. Press "New Case".

NOTE: "Proficiency Test" or "Competency Test" should always be the primary agency.

Create a new request.

The agency is "Proficiency Test"

(a) The agency representative is the agency that created the test ("CTS" or "DOHS") or "internal" if made in the lab.
(b) The Div Section/Unit and Service should be the regular LIMS entries for the received sample type.

(c) The analyst is the person to whom the test is assigned.

(d) Requester or Assignor notes should include test information such as: Date received, Due Date, and any other information needed by the QA coordinator.

Create evidence items as normal. The evidence name should clearly state test set identifiers as given by the preparing agency.

Before admin reviewing: Enter "Reviewers Notes" to indicate whether the test was completed correctly and whether any corrective action was taken. Also add any DNA specific information about inclusions, exclusions, geno/phenotype and comments.

Uploading images and documentation into LIMS.

The following are general instructions of entering items for Proficiency and Competency Tests. Some discretion is given to the Managers and/or Supervisors of the unit on the organization and labeling of files. It also is good when starting a unit to meet with Manager/Supervisor so they can verify that the documents are being organized in the proper fashion.

Scan Data Summary Sheet as a TIFF file image and the image name should be Analysts initials lab number into your email. Note: It is easier if you create folders within your email to keep all of the scanned images in them. Example AJ_09-234567-1

Then scan the entire packet along with the Data Summary Sheet as a PDF document and with a file name as Analyst initials_month/year (doc. was created) _type of test_lab _. Example: AJ_0310_GSR Proficiency_09-25634.
Once all the documents have been scanned then save them onto the computer.

Open LIMS and open a case by entering the lab number.

Open the imaging module by clicking on the camera icon on the bottom left corner of the screen.

Click requests and then click on the appropriate request folder to upload the images too.

Click on add new image icon (looks like a picture frame) Retrieve the specified document from your computer and click open. LIMS will ask you if you would like to rename the document. Note: If you choose not to rename the document it will save the document as the original name you gave it.

Once you have entered a name click ok and in a few minutes LIMS will upload the image.

Repeat process until all images are in the LIMS.

If you accidentally place the image in the wrong folder, click the truck icon and move the image to the correct folder.

After a unit has been completed run the Crystal combined report by Unit. Review the entries to make sure all the tests are showing up correctly. Do a random spot check of the documents to make sure all images have been entered correctly. Have the analyst; Supervisor and Manager also review the report to make sure everything has been correctly entered.

The "Proficiency Test Data Summary Sheet" can be printed by going to Administration|Crystal Reports|Generate Reports under the category "Supervisor".

END OF DOCUMENT
I. The following procedures are for using and populating the LIMS Training Records Module.

A. **General Information**
   1. The analyst must be logged-into LIMS in order to edit their own training record.
   2. Supervisors can view and edit the training records of those employees assigned to them in LIMS.
   3. See FSD.21 for more information on:
      a. The types of training and professional development records that must be documented in the LIMS training module.
      b. The required elements that must be captured in the LIMS training module.
      c. The expectation for staff keeping the LIMS training module up-to-date.

B. **Starting the Module**
   (a) Select the Utilities | Training Records menu item.

C. **Populating the Module**
   1. To add a new training record press the green "+" button.
   2. To edit an existing record, right-click and choose "Edit".

D. **Data Entry**
(a) Each record requires the Dates (from and to) fields to be filled in.

(b) Each record requires the "Manager Approval" "By" field to be filled in.

E. **Training Section**

These records will appear under the Other Training section of the report. Add a training record of type "Training-[applicable section]."

**Topic:** Enter the name/title of the course, and the host entity or presenter/instructor, and location of the training in the Topic field. See examples below

- Emerging Trends in Synthetic Drugs Workshop hosted by NIST and DEA (On-line), C. C. Crime Lab
- Basics of Forensic Toxicology I, California Criminalistics Institute (CCI), Rancho Cordova, CA
- Palm Print Comparison Techniques, Ron Smith and Associates by James Bush, Glendale, AZ
- ASCLD Webinar Series: Firearms, Forensic Technology Center of Excellence presenter Timothy Scanlan (On-line RTI), C.C. Crime Lab

**Type:** Choose the type of training from the drop-down menu. "Training-[applicable section]"

**NOTE:** The following types of training may be entered into LIMS but should not appear on the printed SOQ
- Safety training (eg. respirator, bloodborne pathogen, chemical hygiene plan). Use the training type "Training-Safety".
- Human resource-type training (eg. sexual harassment, diversity, mandated child abuse reporter). Use the training type "Training-Human Resources".
- Annual ethics training. Use the training type "Training-Ethics".

**Dates:** Enter the dates of training in the Date From and To fields. The end date will display as a month and year on the report. LIMS also requires a begin date. The fields can be the same date if the training was a one-day course.

**Duration:** Will appear on the report. Enter the hours of training in the Duration field.

**NOTE:** The duration must be at least one hour.

**By [manager]:** Will not appear on report, but is necessary for LIMS. Fill in the default manager from the pull-down list.

Click the Apply button.

Staff may image training certificates or course syllabus.

F. **Disciplines Section**

To check the boxes at the top of the report that indicate the disciplines in which you are competent to do casework, add a training record of type "Discipline-…"

**Topic:** Will not appear on the report, but should be the same as the type for easy reference.

**Type:** Choose one of the disciplines labeled "Discipline-[your section]"

**Dates:** Will not appear on report, but are necessary for LIMS. Staff may enter both begin and end dates as the date that you started casework or were deemed competent to do casework in that section.

**Duration:** Not needed

**By [manager]:** Will not appear on report, but is necessary for LIMS. Fill in the default manager from the pull-down list.

Click the Apply button.
Staff may image(s) the completed authorization checklist(s) for the specific Discipline.

G. **Education Section**

These records will appear under the Education section of the report. Add a training record of type "Education".

**Topic:** Type the name of the degree followed by the name and location of the college.

**Type:** "Education"

**Dates:** End date will appear on the report and should list when the degree was obtained. LIMS also requires a begin date.

**Duration:** not needed

**By [manager]:** will not appear on report, but is necessary for LIMS. Fill in the default manager from the pull-down list.

Click the **Apply** button.

Staff may image degrees or transcripts.

H. **Courtroom Experience Section**

These records will appear under the Courtroom Experience section of the report.

Add a training record of type "Courtroom Experience" **Add a new record for each type of discipline that you have testified in.**

If you want to be more specific than just the discipline, then you will have to make an entry for each type of testimony you performed.

For example in drugs if you want to show that you testified 5 times on Heroin analysis and 6 times on Cocaine analysis. Each one would need to be entered as a new record.

**Topic:** Discipline in which you testified as an expert witness.

**Type:** "Courtroom Experience"

**Dates:** Will not appear on report, but are necessary for LIMS.

**Duration:** Not needed

**Notes:** Type "approximately" and then the "number" of times testified in the particular discipline. This will appear on the report

Example: Approximately 28

**By [manager]:** Will not appear on report, but is necessary for LIMS. Fill in the default manager from the pull-down list.

Click the **Apply** button.

I. **Professional Affiliations Section**

These records will appear under the Professional Affiliations section of the report. Add a training record of type "Professional Affiliation"

**Topic:** Type the name of the group to which you belong.

**Type:** "Professional Affiliation"

**Dates:** Start date or the earliest date will appear on the report and should list when membership was started. LIMS also requires a begin date.

**Duration:** Not needed

**By [manager]:** Will not appear on report, but is necessary for LIMS. Fill in the default manager from the pull-down list.

Click the **Apply** button.

J. **Employment History**

These records will appear under the Employment History section of the report. Add a training record of type "Employment History"

**Topic:** Type the job title and the employer.

**Type:** "Employment History"

**Dates:** Both begin and end dates will appear on the report. If a future date is put into the end date (12/31/2030), the report will print the end date as "Present"

**Duration:** Not needed
By [manager]: Will not appear on report, but is necessary for LIMS. Fill in the default manager from the pull-down list.

In the notes section record your job duties which will appear on the report under Principal duties.

Click the Apply button.

K. Other Qualifications Section

These records will appear under the Professional Affiliations section of the report. Add a training record of type "Other Professional"

Certifications or awards they have received or example. Anything can be listed that does not fall in the other categories but adds to their forensic qualifications.

Topic: Type the name of the publication or presentation.

Type: "Other Professional"

Dates: End date will appear on the report and should list. LIMS also requires a begin date.

Duration: Not needed

By [manager]: Will not appear on report, but is necessary for LIMS. Fill in the default manager from the pull-down list.

Click the Apply button.

L. Courses Taught

These records will appear under the Instructor Experience section of the report. Add a training record of type "Courses Taught"

Topic: Name of course

Type: "Courses Taught"

Dates: The end date will be listed on the report. LIMS also requires a begin date.

Duration: Not needed

By [manager]: Will not appear on report, but is necessary for LIMS. Fill in the default manager from the pull-down list.

Click the Apply button.

M. Publications

These records will appear under the Publications section of the report. Add a training record of type "Publications"

Publications are papers written by the analyst and published in a peer review journal, newsletter or book.

Topic: Type the Title of the paper, article, etc.

Type: "Publications"

Dates: End Date will appear on the report and should list the date of publication. LIMS still requires a begin date to be entered.

Duration: Not needed

By [manager]: Will not appear on report, but is necessary for LIMS. Fill in the default manager from the pull-down list.

Click the Apply button.

N. Presentations

These records will appear under the Presentations section of the report. Add a training record of type "Presentations"

Topic: Name of Presentation

Type: "Presentations"

Dates: End date will appear on the report. LIMS also requires a begin date.

Duration: Not needed

By [manager]: Will not appear on report, but is necessary for LIMS. Fill in the default manager from the pull-down list.

Click the Apply button.

O. Records not shown on Statement of Qualifications

These types will not print out on the Statement of Qualifications. They are included so that additional information may be stored
in LIMS, if desired.

Remember to fill in the date and the manager fields so that LIMS will accept it as a valid training record.

**Type**: "Reading List" Attach images or documents to this training record that show your current reading list.

**Type**: "Transcripts" Attach images or documents to this training record that show your educational transcripts.

**Type**: "Safety Training", "Ethics Training", "Human Resource Training" The entry can display on LIMS reports but not on the printed Statement of Qualifications.

**Type**: "Separation from Employment" Attach exit checklist and any other relevant documents. This will not be displayed on the Statement of Qualifications.

P. **Attaching Images**

After training records have been entered, images such as certificates or forms may be added to each record. Images are shown in the section below the training record list labeled "Training Attachments".

![Image of Training Attachments]

**NOTE**: When scanning new images, it is important to limit the size of image files. Use 200 dpi or less. Limit the colors to black and white, 8 bit color, or 8 bit gray scale (depending on the type of image to be scanned).

**Select Record**: Click the record that you want to add the image to.

**Add an Attachment**: Right-click the record. Choose "Add Attachment". Browse to where the image is stored. From the scanner: Cancel the file browsing dialog. Position the certificate on the scanner. Click the scanner button.

Q. **Re-naming Images**

1. Right-click the image name. Select "Rename". LIMS will prompt you for the name of the image. This name will appear beneath the training record.

R. **Reports**

1. **Statement of Qualifications**
   a. Open LIMS and click on the "Administration" menu.
   b. Choose "Crystal" and then "Generate Reports".
   c. Select the "ANAB Statement of Qualification" from the list of report options.
d. Right-click and choose "Print Report".

e. LIMS will prompt you to scan a barcode for the individual you want a Statement of Qualifications printed or enter the employee number.

   Make sure that you place your cursor in the box prior to scanning your barcode. If the cursor is not in the box a blank report will be printed.

f. Click the Printer button. Click the "Export" button.

2. **Training Module Records**
   a. The reports includes the training entries as well as thumbnails of the images placed in LIMS by the staff member.
      i. This Report is restricted to Chief, Managers, Supervisors, the QA Coordinator, and staff members assisting with the Quality Assurance Program.
   b. Open LIMS and click on the "Administration" menu.
   c. Choose "Crystal" and then "Generate Reports".
   d. Select Audit from the Report Category list
   e. Select "Training Module Records" Report
   f. Right-click and choose "Print report".

   END OF DOCUMENT
I. Policy: Court testimony review will be documented in LIMS. See FSD.26 for more information related to court testimony review.

A. General Procedure for Obtaining a Completed Testimony Review

1. Typically, the Supervisor assigns a competent and authorized individual who will observe the analyst's testimony.

2. The observer reviews the test record prior to going to court, if possible.

3. The observer records his/her observations and completes the Internal Court Critique form FSDF.02.

4. The form is given to the Supervisor for review.
   a. The Chief and QA Coordinator will be notified of any court testimony deficiencies per FSD.15.
   b. If an external court critique is initiated by a Supervisor, the External Court Critique Form FSDF.03 is used.

5. The Supervisor evaluates the documentation and seeks clarification from the observer if necessary.

6. The Supervisor reviews the form with the analyst.

7. The Supervisor and analyst sign and date the form where indicated.

B. Procedure for Documenting the Review in LIMS

1. The Supervisor is responsible for documenting the court review in LIMS or documenting that an analyst did not testify in a calendar year.

2. Open LIMS Case # Court 20XX (for the year the observation of testimony occurred).
   a. Remove the case mask when opening the case.

3. Create a New Request by right clicking and choosing Add Request.

4. Enter the required information in the request.
   a. The Agency is "Forensic Services Division".
b. The **Agency Representative** is the analyst whose testimony was observed.

c. The **Div Section/Unit** is "FSD Administration".

d. The **Service** is "Court Testimony Critique-General".

e. The request is **Assigned** to the Supervisor of the analyst.

5. Enter the required information in the additional data field by right clicking on the request and choosing Additional Data Field.

   a. The **Date of Testimony** is the date of observation.

   b. The **Reviewer** is the individual who performed for the testimony review.

   c. The **Discipline** (drop-down menu) is the forensic discipline.

   d. The **SubDiscipline** and **SubDiscipline2** (drop-down menus) are the specific types of testimony reviewed.

   e. If more types of testimony are needed, open a new request.

6. Image the documentation of the testimony review into LIMS.

C. **Procedure for Documenting Staff Did Not Testify During the Calendar Year**

   1. Supervisors will account for all staff that currently performed casework in the calendar year or are on a rotation (eg. crime scenes).

   2. Follow the procedures above to open a request.

   3. Enter the required information in the additional data field by right clicking on the request and choosing Additional Data Field.

      a. The **Discipline** (drop-down menu) is the forensic discipline.

      b. The **SubDiscipline** is Did Not Testify.

   4. Documentation should be obtained affirming the analyst did not testify during the calendar year. Image the documentation into LIMS.

D. **Procedure for Documenting Review Could Not Be Obtained (When Staff's ONLY Testimony was Grand Jury/Juvenile Hearing)**

   1. If staff's only testimony was a juvenile hearing or Grand Jury, then testimony review is typically not possible.

   2. Follow the procedures above to open a request.

   3. Enter the required information in the additional data field by right clicking on the request and choosing Additional Data Field.

      a. Type in **Grand Jury** or **Juvenile Hearing** for the **Reviewer**.

      b. The **Discipline** (drop-down menu) is the forensic discipline.

      c. The **SubDiscipline** and **SubDiscipline2** (drop-down menus) are the specific types of testimony provided.

   4. Image any associated documentation into LIMS.

END OF DOCUMENT
JusticeTrax Imaging Procedure

I. File types

A. Although any type of file can be attached to the JusticeTrax LIMS imaging module, only some picture file types will have thumbnails and can be viewed natively in the imaging module. Image files like .tif and .jpg can be attached and viewed within the module.

B. Non-image file types such as Adobe .pdf, Word .doc, or Excel .xls can be attached, but cannot be viewed in the imaging module. The client computer will have to have proper software installed that can view the file.

C. Crystal report templates can only use .tif or .jpg files to display images. If the image is to be included in a crystal report template (such as a final report or notes package), then only .tif or .jpg should be used. In order to display properly in a crystal template there may be further limitations of file size, scan size, bit depth, and compression type. Files in .tif format need to be a single page per file. Multi-page .tif files will not work in crystal templates.

D. The Indexer and Batch Indexer utilities require .tif images. If these utilities are to be used to upload image files, then only the .tif format should be used.

E. Keep the file size of attachments as low as possible. Use lower resolution (200 DPI), black and white (1 bit) color bit depth, and small scan sizes whenever possible. The .tif file format is not compressed and creates larger files than the compressed .jpg format.

II. JusticeTrax Imaging Printer Default Setup

NOTE: The "JusticeTrax Imaging" printer is not currently installed on the Remote Desktop Server.

A. This only needs to be done once per log-in on a computer:

Click Start. Click Printers and Faxes.
R-Click the "JusticeTrax Imaging" printer.
Select "Printer properties".
Click the "Printing Preferences" Button.

(a) Under the "Device Settings" tab, change the Resolution to "Low Resolution (200 x 200 DPI)"
Images in LIMS to be used on reports and notes should be in .tif or .jpg format. Indexer and Batch Indexer utilities require .tif format. The following settings are for .tif files to be used with Indexer or Batch Indexer with the smaller file sizes. Be careful when using larger DPI, color settings, or file formats.

Under the "File Formats" tab, change File Format to (a) "TIFF Packed". If black and white prints are acceptable choose (b) "1 bit" as the Color Depth. This will create a smaller file size. If color is needed set Color Depth to (b) "8 bits". Do not use "24 bits".
Under the Options section, check (c) "Save each page as a separate file".

For a .pdf file that will not be used in a crystal report: select (a) "PDF (*.pdf)" as the File Format and un-check (c) "Save each page as a separate file" under the Options section.
(a) Under the "Filename Generation" tab, change the output directory to "C:\temp" or some other easily accessible location on the local hard drive.
(a) If you plan to do only single images, change the "Filename Generation Method" to "Exact Filename" and "Enter the filename" to "JT Imaging.TIFF" (or some other recognizable name). If you plan on doing large groups of images at once, change the "Filename Generation Method" to "Use this prefix and extension" or "Use document name".
III. How to print and add an image:

A. Printing

NOTE: The "JusticeTrax Imaging" printer is not currently installed on the Remote Desktop Server.

1. Open up the software that you want to print from.

2. Print the document/email/web page to the JusticeTrax Imaging printer instead of the default printer. Printer settings can be changed from the above defaults at the time the print is made.

3. Explore to the location of the created image. Check the size of the file. Large images should not be uploaded to LIMS. Consider changing Resolution or Color Depth to create as small an image as possible.

B. Adding the image to a request

NOTE: This step can be done using the Remote Desktop. The location of the image file must be accessible to the Remote Desktop Server.

1. Open the case in LIMS
2. (a) Click the Camera button

3. Click on the request that you want to add the image to.
   a. To add an already printed or scanned image from a file:
      i. (a) Select "Image | Insert New Image" or click the "Add New Image" (picture frame) button.
ii. Browse to "C:\Temp" (or wherever you decided to put the image.

iii. Select the image file.

b. To add a new image from a scanner:

i. Make sure that "Scan | AutoFeed" is UN-checked.

ii. Select "Scan | Scan New Image" or click the "Scan New Image" (flat-bed scanner) button.

iii. Select the scanner TWAIN drivers.

iv. Scan the image.
4. **(a)** Name the image in LIMS. This name will appear beneath the image in your notes.

![Add New Images](image.png)

5. The images will sort by the name. If you want the images to appear in a certain order in your notes, prefix them with a sort number (ie "001-GC", "002-MS").
   
a. Some units use specific letter codes to group and sort images. See unit manuals for details.
6. LIMS will always append your title with ",_0". You can leave this as is, or remove the extra by renaming the image.
7. **(a)** Exit out of the imaging module.
I. JusticeTrax Indexer Procedure

A. Printer Setup

Default printers:

Click Start. Click Printers and Faxes.

(a) Make sure that the JusticeTrax Imaging printer is set as the default printer (it will have a check mark next to it).

If it is not the default printer, R-Click the "JusticeTrax Imaging" printer. "Select Set as Default Printer".

B. General Procedure

Adding Images to LIMS:

Make sure JusticeTrax Indexer is running. It can be minimized, but must be open in the background in order to work properly.
(a) If you have just started Indexer, you will have to log in.

If another analyst has used Indexer, log out. Then log back in using your own name and password. This ensures that the images in LIMS belong to you. You can rename and move your own images, but not those that "belong" to other analysts.

Print your results page as normal. Instead of printing through the physical printer, it will be caught by Indexer. The indexer program will blink of the taskbar, showing that it has an image ready to transfer.

(a) Maximize the indexer window. You should see a preview of your results page.
Enter that lab number in the yellow box. Indexer requires a 2 digit year followed by a dash followed by a six digit number to find the proper lab number. Add leading zeroes to pad the proper number of digits Lab #08-7454 should be entered as "08-007454"

(a) Press the "Locate" button underneath the lab number box. If it can find the Lab#, indexer will enable the next control. If this next section is grayed out, the lab # was probably entered wrong.

(a) Check the request box.

(b) Select the request from the dropdown list.
(a) Check the "Enter Image Name" box.

(b) Enter the image name. This will appear on your notes. The images will be sorted in alphanumerically order when printed. This name should include the image #, submission #, and item # so that they can be recognized and sorted in the JusticeTrax Imaging module.

Double check that all the information is entered correctly. Push the (a) "Save" button
The image will be stamped with the date and time, as well as the user's login name. If successfully sent to LIMS, the dialog box will show up.

REMEMBER: click "OK" before printing other images. Indexer will crash if another image is sent before the dialog box is cleared.

The images can now be renamed, viewed, or deleted within the JusticeTrax Imaging module.

C. **Indexer Troubleshooting**

**What do I do now?**

**Problem:** I sent the image to the wrong Lab # or Request #.

**Fix:** If you know where you sent it, open that Lab # in LIMS. Open the Imaging module. Find the misplaced image. Move the image using the move button (it looks like a moving truck). Change its location to the correct Lab # and Request #.

If you don't know where you sent it, contact your LIMS administrator immediately. You need to move that image before someone else prints it out in their notes.

**Problem:** I can't delete or rename my images in the Imaging module.

**Fix:** Someone else was logged in on Indexer when you sent your images. If possible, have that person delete them. Re-send the images with your log in.

**Problem:** I print my notes and the images are out of order.
**Fix:** The images are sorted by the image name.

Make sure the names are consistent: "Image" (note extra space) is different that "Image" (no space) is different that "Img".

When images are added directly to the imaging module, rather than using the indexer, LIMS tacks the date to the front of the name. You may have to remove the date from the name if you are using a mixture of direct and indexer images.

I recommend using 2 digit image numbers such as "Img01" not "Img1". If you don't, and you have more than 10 images, then strange things may happen (Img11 will appear before Img2).

**Problem:** I print my page, but nothing appears in Indexer.

**Fix:** Make sure Indexer is running before you print.

If indexer is running, and still does not "catch" the image, contact your LIMS administrator. There is a setting in the printer preferences that has to be changed.

END OF DOCUMENT
I. Audits are conducted to assess the competence of individuals performing tests, compliance with the requirements of the management system, and the effectiveness of the operation. The general process for performing an internal audit is below.

<table>
<thead>
<tr>
<th>Stage</th>
<th>Description</th>
<th>Time Frames (if applicable)</th>
</tr>
</thead>
</table>
| 1     | The QA Coordinator notifies the Chief, Managers & Supervisors of:  
(1) The proposed dates of the upcoming audit  
(2) The requested audit team members  
(3) The anticipated time span of the audit activities  
   The DNA Technical Lead is responsible for the DNA audit schedule, team assignment, and audit process.  
   Typically, at least 30 days prior to the planned audit.  |
| 2     | The Chief (or Managers) approves the dates and auditing team.  
Typically, at least 30 days prior to the planned audit.  |
| 3     | The QA Coordinator provides the team members an audit plan that includes:  
(1) The criteria being assessed  
(2) The planned daily schedule  
(3) The records that will be reviewed  
(4) The activities that will be undertaken during the audit  
   See FSD.20 for more information about scope of the technical unit audit and the quality audit, activities undertaken, and documents reviewed.  
   Typically, the internal audit assesses the last calendar year.  |
| 4     | The QA Coordinator informs the Managers and Supervisors what records they are responsible for providing. Examples include:  
(1) Case files  
(2) Ethics training records  
(3) Security key logs  
(4) Training and authorization records  
(5) Safety training records  
(6) Purchasing records  
   Typically, at least 15 days prior to the planned audit.  |
| 5     | The QA Coordinator provides records to the audit team members during the audit. Examples include:  
(1) Statement of qualifications (SOQ)  
(2) Competency records  
(3) Proficiency records  
(4) Court testimony monitoring records  
(5) QA Actions  
(6) Validation/Verification records  
(7) Previous audit findings  
(8) Most recent management review  
   The audit is performed and evidence is gathered. During this time, clarifications may be sought from the Manager, Supervisor, and staff within the unit. The Manager or  
   Typically, the internal audit is complete within 5-7 days.  |

| CHAPTER: Audits | SUBJECT: Evidence Recon |

[Table content]
I. The following is the procedure for initiating, creating, assigning and closing a Quality Assurance Action Request.

A. Types of QA Actions—See FSD.15 and FSD.27 for more information to determine the correct Case Number and Service to select.

<table>
<thead>
<tr>
<th>Case Number</th>
<th>Service Type</th>
<th>Due Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>QARO XXXX</td>
<td>QA Risk Prevention</td>
<td>90 days</td>
</tr>
<tr>
<td></td>
<td>QA Improvement Opportunity</td>
<td></td>
</tr>
<tr>
<td>QAV XXXX</td>
<td>QA Validation</td>
<td>N/A</td>
</tr>
<tr>
<td></td>
<td>QA Performance Verification</td>
<td></td>
</tr>
<tr>
<td>QAC XXXX</td>
<td>QA Corrective Action</td>
<td>90 days</td>
</tr>
<tr>
<td>LEVEL2 XXXX</td>
<td>Level 2 Quality Incident</td>
<td>N/A</td>
</tr>
</tbody>
</table>

B. Procedure for a Level 2 Correction

1. Any FSD staff member can add a Level 2 request in LIMS.
2. Open LIMS Case# Level2 XXXX.
   a. Remove the case mask when opening the case.
3. Create a New Request by right clicking and choosing Add Request.
4. Enter the required information in the request.
   a. The Agency is "Forensic Services Division".
   b. The Agency Representative is the individual completing the request.
   c. The Div Section/Unit is "FSD Administration".
   d. The Service is " Level 2 Quality Incident".
   e. The request is Assigned to the individual documenting the correction.
5. Enter the required information in the additional data field by right clicking on the request and choosing Additional Data Field.
   a. Date of Incident is the date the quality incident occurred or was identified.
   b. Unit
c. Type (drop-down menu) is a list of general types of quality issues.
d. Notes Field may be used to add related units or add a type of quality issue not listed in the drop-down menu.

6. Image FSDF.23 and any other documentation into LIMS.

C. Procedure for Corrective Actions, Risk Preventions, Improvement Opportunities, Validations, and Verifications

1. A request may be made by any staff member, although the routine and recommended process for initiating a request is through an employee’s immediate supervisor

2. It is the responsibility of the supervisor, or the staff member, to notify the QA Coordinator so that a request may be entered and tracked in LIMS.
   a. A brief description of the nature of the QA Action is required.

3. Upon notification, the QA Coordinator will add the appropriate request in LIMS. See table above.

4. The QA Coordinator will assign the QA Action to a staff member.
   a. Although multiple staff may be involved in completing the QA Action, the QA Action will be assigned to a Supervisor, Manager or the Chief.
   b. Typically the notification to the assigned individual will be made via email.
   c. The assigned individual can view their assignment(s) in LIMS by running the Open QA Action Report from LIMS Crystal Reports:
   d. The assigned individual will document the requisite information in LIMS.
   e. The laboratory shall retain records of the nature of nonconformities, cause(s), and any subsequent actions taken.
   f. For example, all the elements of a Corrective Action including the results of any Corrective Action must be documented in LIMS on FSDF.06. See FSD.15.
   g. Any required documentation is typically added by the person assigned the action but may be added by the QA Coordinator.

5. Once the assigned individual has completed the QA Action, the assigned individual will mark the request Draft Complete.

6. The assigned individual will inform the QA Coordinator that the QA Action has been completed.

7. The QA Coordinator or Chief will mark the request, if approved, technically reviewed in LIMS.
   a. The QA Coordinator or Chief may request further work or additional documentation prior to technically reviewing the QA Action.
   b. If the QA Action is assigned to the QA Coordinator, the QA Action is considered technically reviewed if marked Draft Complete.
c. Quality Actions involving DNA Analysis will be verified by the DNA Technical Lead.

8. Once the QA Coordinator or Chief has technically reviewed the QA Action, it will be administratively reviewed in LIMS. The Chief, Managers or QA Coordinator may administratively review QA Actions.
   a. The Chief typically administratively reviews section and Division level actions.
   b. The Managers typically administratively review unit level actions.

9. Documentation may be added after administrative review to demonstrate monitoring of actions and evaluation of the effectiveness of the action(s) taken.

10. When the monitoring period is over and the evaluation of the effectiveness of the actions taken is complete, the individual assigned the QA Action or the individual responsible for the monitoring will update the QA Action and add an activity in LIMS.
   a. In LIMS, choose the appropriate request
   b. Right click to add an activity and select Activity from the list
   c. **Lab** is Forensic Services Division
   d. **Dept** is FSD Administration
   e. **Service Name** Leave Blank
   f. **Activity** is QA Monitoring Complete

END OF DOCUMENT
I.  Procedure for uploading images into VeriPic:

A.  Open the VeriPic Digital Evidence Manager and log in using your Username and Password.
B.  Click the "Import" button on the left
C.  Use the Windows Explorer-style prompt to navigate to the location of the images you want to upload
D.  After locating the folder containing the images, use either Control-A to select all of the images or click on the first image, scroll to the last image, and then hold shift while clicking on the last image
E.  The next window allows the user to preview the selected files. If importing all of the images, click "Select All" then "Apply"
F. The next window asks if the user wants to add the images to an existing case or to add a new case. If adding a new case, enter the laboratory number using the YY-12345-1 format (i.e. 05-12813-1) and click "Add New Case". Use place holder zeros if the number is under five digits (e.g. 13-04269-1). The wizard will prompt re-enter the case number for accuracy.

G. If adding a new case, the next step is setting the case type, setting the case assignment, and setting the the security level. Set the security level to "Medium" unless otherwise instructed by a manager or supervisor. Enter a description if desired.
H. The next step will prompt for a title and notes for all media. Enter the lab number and a description of the activity (e.g. Autopsy, Death, Vehicle, etc). These fields can be edited later if needed.

I. Click "Finish" and the images selected will be uploaded.

II. Common menus encountered in VeriPic:

A. To find a case, log into the system and click the "View" button. This dialog box gives the user the option to either search for a case (type in the search box and click "Search") or to browse for a case by clicking the "Choose Case" button.
B. The remainder of the controls are based on the windows explorer interface and should be straightforward to follow.

III. Exporting images from VeriPic.

A. Login to VeriPic and locate the case with the images to be exported (View, Choose case, then select the appropriate case).

B. Select the images to be exported (Select All or by Ctrl-clicking) and then click Export Media
C. Choose the User Select option, do not check the box for Export with VeriPic serial number, and Export Original Photo(s) and click ok.

D. Use the dialog box to find or create an appropriate folder to export the images to.

E. Add any appropriate notes for export in the next dialog box (e.g. see discovery request with the lab number).

F. The images will export to the chosen folder and the user can burn the images to CD/DVD.

REVISION DATE:

NUMBER: QA.24 - QuarterMaster Instructions

RELATED ORDERS:

APPROVED BY: Pamela Hofsass

ANAB:

CHAPTER: Inventory

SUBJECT: QuarterMaster Instructions
I. Policy: Forensic alcohol analysis is performed on blood, urine and vitreous specimens utilizing an internally standardized gas chromatographic method coupled with flame ionization detection.

A. The method involves the analysis of blood and urine specimens that have been diluted with an internal standard, sampled by an automated heated headspace sampler, and analyzed by dual column gas chromatography.

1. The quantitation of ethanol is accomplished through calculation of the relative responses (peak areas) of the ethanol and internal standard by the gas chromatographic separation of ethanol from other volatile substances.

B. Forensic alcohol analysis is performed only by qualified Criminalists who have been authorized by the laboratory.

C. The title of the method for Alcohol Analysis by the Forensic Services Division, Office of the Sheriff Contra Costa County Blood Alcohol Operating Procedures is:

1. Forensic Alcohol Analysis by the Semi-automated Headspace Dual Column Gas Chromatography (viz., GC-Headspace) Method

   a. DCPE1 will be used to refer to Perkin Elmer Clarus 580 Dual Column Gas Chromatograph (DCGC1) with Perkin Elmer Turbo Matrix 110 Headspace Sampler (HS1), TotalChrom Software and Windows 7.

   b. DCPE2 will be used to refer to Perkin Elmer Clarus 580 Dual Column Gas Chromatograph (DCGC2) with Perkin Elmer Turbo Matrix 110 Headspace Sampler (HS2), TotalChrom Software and Windows 7.

   c. BAC1.MTH for DCPE1 and BAC2.MTH for DCPE2 are the instrumental parameters and BACa.MTH and BACb.MTH are the calibration parameters used for quantitative analysis of ethanol in casework for columns a & b, respectively.
2. Both DCPE1 and DCPE2 systems have the same hardware, software and method configurations.

D. The California State Department of Public Health (CDPH) regulates forensic blood alcohol analysis and forensic breath alcohol analysis according to the pertinent Code of Regulations listed below:

1. Title 17. Forensic Alcohol Analysis
   a. Group 8. Forensic Alcohol Analysis and Breath Alcohol Analysis
   b. Articles 1-8

2. The Laboratory must adhere to Title 17. Some of the requirements the laboratory must meet include:
   a. qualifications of the analysts
   b. quality control program
   c. proficiency testing
   d. collection and handling of samples
   e. standards of performance
   f. standards of procedure

3. A copy of Title 17 is located on PowerDMS.

4. The Blood Alcohol Technical Unit Manual is designed to supplement the Title 17 requirements.

5. Prior to April 1, 2017, the California State Department of Public Health (Title 17) qualified analysts working in a Forensic Alcohol Laboratory as one of the following: a Forensic Alcohol Supervisor (FAS), a Forensic Alcohol Analyst (FAA), or a Forensic Alcohol Analyst Trainee (FAAT). As of April 1, 2017, it is the responsibility of each Forensic Alcohol Laboratory to authorize their personnel to perform duties in accordance with qualifications outlined in Title 17.

E. Terminology

1. The verbs "shall", "must", and "will" indicate mandatory requirements, while "should" is used to denote compelling or recommended practices and "may" is used in the permissive sense.

F. Test Methods

1. The Alcohol Unit will use appropriate methods and procedures for all tests within its scope. (ISO/IEC 17025:2005 5.4.1) These include:
   a. Methods and procedures, see:
      i. Analysis of Samples by GC-FID ([BA.30])
   b. Sampling of items to be tested, see:
      i. Analysis of Samples by GC-FID ([BA.30])
   c. Handling of items to be tested, see:
i. General Evidence Handling (BA.08)
ii. Analysis of Samples by GC-FID (BA.30)
iii. Uniform Standards for Withdrawal (BA.09)

d. Storage of items to be tested, see:
   i. General Evidence Handling (BA.08)
   ii. Uniform Standards for Withdrawal (BA.09)

e. Preparation of items to be tested, see:
   i. General Evidence Handling (BA.08)
   ii. Analysis of Samples by GC-FID (BA.30)

f. Estimation of uncertainty and statistical techniques for analysis of test data, see:
   i. Uncertainty (BA.39)
   ii. Uncertainty Budget for Blood Alcohol (BA.40)

2. The Alcohol Unit shall have instructions on (ISO/IEC 17025:2005 5.4.1):
   a. Use and operation of all relevant equipment, see:
      i. Blood and Urine Training (BA.41)
      ii. Analysis of Samples by GC-FID (BA.30)
      iii. Care and Maintenance of Equipment and Environmental Conditions (BA.21)
      iv. Diluters, Dispensers and Pipettes (BA.26)
      v. Balances (BA.28)
      vi. Glassware and Thermometers (BA.27)
   b. Handling and preparation of items for testing, see:
      i. General Evidence Handling (BA.08)
      ii. Analysis of Samples by GC-FID (BA.30)

3. All instructions, standards, manuals and reference data relevant to the work of the Alcohol Unit shall be kept up to date and made readily available to personnel through the use of this Technical Unit Manual. (ISO/IEC 17025:2005 5.4.1)

4. All methods shall be documented and the documents readily available for review by laboratory personnel through PowerDMS. See FSD.12. (Supplemental 5.4.1.1)

5. Deviation from test methods shall occur only if the deviation has been documented, technically justified and authorized. See BA.10. (ISO/IEC 17025:2005 5.4.1)

6. A Drug Alcohol and Toxicology (DAT) Handbook has been placed on ARIES, for review by the clients. The handbook includes the services provided by the Alcohol Unit and the equipment and methodology utilized in sample analysis.
### I. Policy:

Laboratory personnel will follow procedures for the selection, monitoring, ordering, verification and storage of supplies and reassess external providers. See [FSD.30](#).

#### A. Introduction:

Supplies and services are designated into two broad categories:

1. General supplies and services that do not affect the quality of tests, including office supplies.
2. Supplies and services that affect testing and have an impact on the quality of tests.

#### B. Evaluation:

The Unit will evaluate vendors of externally provided products to ensure their suitability for use in testing. Reagents and supplies are selected based on one or more of the following criteria:

1. The vendor's product is specified by the technical procedure.
2. The vendor supplies a certificate of analysis specifying the grade.
3. The vendor providing consumables is the manufacturer of the instrumentation for which they are used.
4. The laboratory has a prior history of satisfactory service with the vendor product.

#### C. Requirements:

The Unit will define, annually review, and approve the requirements for externally provided products and services. The requirements may include capability, suitability, or criteria to provide a service or supply. For example:

1. Traceable reference materials obtained from an ISO 17034 provider - Certificate of Analysis needed from any ISO 17034 provider
2. Calibration services provided from an ISO 17025 vendor - Certificate of Calibration is needed for evaluation and documentation when calibration occurs
3. Proficiency tests purchased from an ISO 17043 supplier - Manufacturer's or vendor's summary and/or individual report is needed to evaluate the performance of an analyst in a proficiency test.
4. Sub-contracting services supplied by an ISO 17025 laboratory - Sub-contractor's accreditation scope document is needed for evaluation to ensure work provided is within the sub-contractor's scope.
5. Consumables provided by the manufacturer of the equipment being used - Manufacturer's consumables quality documentation is needed to ensure the quality of product is adequate for the testing being performed.

6. Once a product is evaluated and approved for use, for example through validation or as supplied for use with an instrument, it will be ready for use in casework and may be ordered as needed.

7. Evaluations of reagents and supplies are done by testing their performance during validation.

8. Reagents and supplies will be re-evaluated on an on-going basis through the use of controls and intermediate checks. Further information can be found in BA.13 and BA.15.

9. As needed to monitor a particular product, an initial control may be run when a new order is received. For example, a new lot of blood vials will be tested for its NaF content to ensure the correct % is present within that lot of vials/kits.

D. The Unit is responsible for the evaluation, selection and monitoring of performance, and annual re-evaluation of external providers.

1. Criteria for evaluation, selection, monitoring of performance, and re-evaluation of the external providers. For example:

   a. Checking a scope document to ensure the calibration being requested is within the scope of the vendor
   
   b. Checking an accreditation certificate to ensure that accreditation has not lapsed
   
   c. Checking that quality controls or standards meet the performance criteria of the equipment or method
   
   d. Ensuring that methodology requiring consumables (e.g. kits) from a specific vendor are obtained
   
   e. Ensuring that a certificate is checked after the expiration date before ordering additional supplies or service

E. Ordering:

1. General laboratory consumables and supplies may be placed on the order list by any member of the laboratory staff. These consumables and supplies do not affect the quality of the final result. The following are some examples of consumables that do not affect the quality of the test results:

   a. Gloves
   
   b. Glass or plastic transfer pipettes
   
   c. Vials and caps

2. Supplies which may affect the test result should be placed on the order list by personnel within the unit in which the supplies are to be used. The following is a list of supplies that may affect the quality of tests in Alcohol Unit:

   a. Chemicals used for Forensic Alcohol Analysis
b. The "type" or "grade" of chemicals used in forensic alcohol analysis is specified in the technical unit manual (BA.03). Only the grade of chemical specified should be ordered.

c. Parts for the GC-FID or other equipment. These may be ordered based on part information in the instrument manual(s) (BA.05).

3. The following is a list of supplies and services that can affect test results in Alcohol Unit. The suppliers of these supplies and services must be annually evaluated and the evaluation will be documented:

   a. NTRM (NIST Traceable Reference Material) purchased water/ethanol solutions of a known concentration
   
   b. Calibration services for diluters, dispensers, pipettes, balances, critical volumetric glassware, thermometers
   
   c. Calibration services for reference standards (check weights)

4. Supplies may be placed on the order list by any lab staff member or support staff so long as the person who actually requested the item to be placed on the list is indicated on the supply order list.

F. Defining the criteria for evaluation, selection, monitoring of performance, and re-evaluation of the external providers. The criteria may include ability to meet the Technical Unit's requirements for quality, ability to deliver the product/service within an acceptable time frame, access to technical support, accreditation status or review of scope documents. For example:

   1. Checking a scope document to ensure the calibration being requested is within the scope of the vendor
   
   2. Checking an accreditation certificate to ensure that accreditation has not lapsed
   
   3. Checking that quality controls or standards meet the performance criteria of the equipment or method
   
   4. Ensuring that methodology requiring consumables (e.g. kits) from a specific vendor are obtained
   
   5. Ensuring that a certificate is checked after the expiration date before ordering additional supplies or services

G. Ensuring that externally provided products and services conform to the laboratory's established requirements, or ISO 17025:2017 before they are used or directly provided to the customer. The requirements may include competence of personnel or accreditation status. For example:

   1. Checking a packing list to verify an order before using the supplies in casework
   
   2. Checking the correct testing was provided from a sub-contracting laboratory before providing the report to the customer
   
   3. On-going evaluation of quality control data
   
   4. Taking any actions arising from evaluations, monitoring of performance, and re-evaluations of the external providers. Actions may include ensuring the correct services or supplies are received, issues are resolved, or monitoring that services and supplies meet the needs of the unit
H. Approval of Orders
   1. Any lab staff member or support staff may order supplies from the vendor. The supplies on the "Supply Order List" are inputted into a computer database. The list(s) of supplies to be ordered is printed out.

   2. The list(s) of supplies to be ordered are then given to a Manager for approval.

I. Ordering Supplies from the Vendor
   1. After the list(s) of supplies to be ordered have been approved, any lab staff member or support staff may order supplies from the vendor by phone/e-mail. The orders maybe placed:
      a. using an existing open Purchase Order for vendors or
      b. using a requisition form by the Account Clerk or
      c. using the County credit card held by the Account Clerk.

J. Receiving Supplies
   1. Supplies that affect the quality of tests are not used until they have been inspected or verified as being the supply that was ordered.

   2. When the consumables or supplies are received by the laboratory, the supplies are unpacked and verified by:
      a. Using the database generated list of supplies to be ordered, or equivalent and checking against the supplies received by checking the labels on supplies.
      b. The supplies received are also checked against the shipping receipt or packing slip.

   3. The person checking the supplies against the shipping receipt will initial the shipping receipt. This paperwork goes to Account Clerk of the Sheriff's Department.

   4. The information from the database generated list of supplies to be ordered, or equivalent, is entered into the supply ordering database to ensure what was ordered matches what was received.

   5. The individual enters the date items were received/verified. The individual also enters his/her initials indicate when entering the information.

   6. The supplies are then put away in a storage location.

   7. General laboratory consumables and supplies are stored in the supply room or within the units of the laboratory. Any special storage requirements (refrigeration, storage in flammable or corrosive cabinets, etc.) will be adhered to.

   8. Supplies required for specific instrumentation, chemicals required for certain procedures or supplies that are specifically listed in the method or procedure being used should be given to the lab staff member who ordered that supply item.

   9. Reference materials are checked to ensure that the proper traceability paperwork accompanies the item or the traceability paperwork is retrieved from the vendor electronically. Reference materials (standards) are stored according to the storage recommendations on the package.
10. The traceability paperwork (Certificates of Analysis or other verification paperwork are maintained in the Alcohol Unit).

11. The received supplies are also entered electronically into the ordering database to verify that the supply that was ordered is the same as the supply that was received.

K. Discrepancies

1. If there is any discrepancy between the supply ordered and the supply received, the person ordering supplies will notify the vendor of the discrepancy and the supply will not be used by the laboratory. The supply will be returned and exchanged for the proper supply.

2. If there are any problems exchanging the supply for the correct item, the Forensic Manager or Supervisor will be made aware of the problem.

3. If the supply ordered is found to be defective or does not perform as expected it will not be used for casework.

4. Actions: Taking any actions arising from evaluations, monitoring of performance, and re-evaluations of the external providers. Actions may include ensuring the correct services or supplies are received, issues are resolved, or monitoring that services and supplies meet the needs of the unit.

END OF DOCUMENT
I. Policy: The following chemicals/reagents are used for the method (ISO/IEC 17025:2005 4.6.2).

A. Chemicals/Reagents

1. Distilled or de-ionized water, commercially prepared or filtered in-house.
2. Ethyl alcohol (ethanol), 200 Proof.
3. N-Propanol, reagent grade.
4. Acetone, reagent grade.
5. Methanol, reagent grade.
6. Isopropanol, reagent grade.
7. Formaldehyde, reagent grade.
8. Acetaldehyde, reagent grade.
9. Acetonitrile, reagent grade.
10. Acetic Acid, reagent grade.
11. Isobutyric Acid, reagent grade.
12. sec-Butanol, reagent grade.
13. n-Butyric Acid, reagent grade.
15. Ethyl Acetate, reagent grade.
16. Propionic Acid, reagent grade.
17. Isopentanol, reagent grade.
18. Toluene, reagent grade.
19. Sodium fluoride, powder, reagent grade.
20. Air, compressed, breathing quality.
22. Helium compressed gas, chromatography grade.
23. TISAB (Total Ionic Strength Adjustment Buffer).
24. Saturated Potassium Chloride Solution.

END OF DOCUMENT
I. Policy: The laboratory shall maintain the Forensic Alcohol Analysis records arranged and indexed as described below. (ref. Title 17, 1222.1, ISO/IEC 17025:2005 4.13.1.1)

A. All official Forensic Alcohol records shall be maintained and located in such a manner that they will be immediately available for audits.

B. The records shall be maintained for at least five years, as that is the span of time between accreditation cycles.

C. No Forensic Alcohol Analysis records, or copies thereof, shall be released to any unauthorized agency or person without a properly executed court order, or authorization of the prosecuting attorney, or on specific authorization from the Chief or Forensic Manager of the Laboratory.

D. The following records will be maintained for Forensic Alcohol Analysis

1. PERSONS QUALIFIED - All California Department of Public Health issued certifications of persons currently qualified to perform forensic alcohol analysis.

2. CODE OF REGULATIONS, TITLE 17 - A current copy of the California Code of Regulations, TITLE 17.

3. OPERATING PROCEDURES - A current and complete copy of the Forensic Alcohol Analysis Operating Procedures will be available for review to all analysts.

4. UNIFORM STANDARDS - SAMPLES - A copy of the Uniform Standards for Withdrawal, Handling and Preservation of Blood Samples for Alcohol Determination, a copy of Urine as a Sample for Alcohol Determination, and a policy statement regarding their use. See BA.09.

5. INSPECTION REPORTS - Audit reports by the California Department of Public Health (CDPH) will be maintained in the Alcohol Unit. ASCLD/LAB assessment reports will be maintained by the Quality Assurance Unit of the Forensic Services Division.

6. LAB PROFICIENCY TESTS - A complete original record of all Laboratory proficiencies and employee proficiencies will be maintained in the Alcohol Unit.

E. The following records will be maintained for Personnel: A file shall be maintained for each person certified to perform alcohol analysis and shall contain the following records.
(Records may be kept in electronic format):

1. APPLICATIONS - A copy of all applications, attachments, and correspondence, with the California Department of Public Health, regarding qualifications to perform forensic alcohol analysis.

2. ANALYSIS RESULTS - A handwritten or electronic copy of the results of all analyses performed as a Forensic Alcohol Analyst Trainee. Such records shall include the dated signature of the qualified person responsible for supervising the training of the Analyst Trainee.

3. PROFICIENCY TEST RESULTS - Result of individual proficiency test performed. This requirement is satisfied by a copy of the California Department of Public Health list of qualified persons in the lab or a copy of the letter from the California Department of Public Health indicating an individual has passed the proficiency test.

F. The following records will be maintained for Quality Control Data (Records may be kept in electronic format):

1. QUALITY CONTROL REFERENCE MATERIAL: A complete, original record of all Quality Control Reference Material analyzed. Minimum information to include: results, date, and initials of analysts performing the analyses.

2. LABORATORY DEMONSTRATION DATA FOR METHOD: A complete, original record of all data demonstrating the laboratory method. Minimum information to include a copy of all graphs generated, results, date and name of analyst performing the analyses and the method of analysis. See BA.20.

3. REAGENTS: A complete, original record of all reagents prepared for forensic alcohol analysis. Minimum information to include weights, volumes, quantities prepared, date, and initials of analyst(s) preparing reagents. The reagent preparation logs will contain the lot number for each bottle, any results, date performed, and initials of analyst

4. EQUIPMENT CALIBRATION: A complete, original record of all equipment maintenance and calibration checks. Minimum information to include type of check, the results, the date and name of the analyst(s) performing check.

G. The following records will be maintained for Analysis Results and Reports

1. Records of all samples analyzed are kept for a minimum of seven years in the laboratory case files. The records shall include the results and the identity of the person(s) performing the analyses.

END OF DOCUMENT
I. Policy: The following is a list of references applicable to forensic alcohol analysis.

A. The following is a reference to the locations of references available to analysts in the Alcohol Unit. Analysts may also rely on references obtained through outside training. (Supplemental 5.2.7)

1. Literature in Muir Library
2. Binder 1: "Blood and Urine Articles"
3. Binder 2: "Breath Section"
4. Binder 3: "Impairment Section"
5. Binder 4: "General and Coroner"

END OF DOCUMENT
I. Policy: The following are forms used in Forensic Alcohol Analysis. Forms may be controlled (required for use) or non-controlled (suggested for use but not required).

A. Controlled forms are located on PowerDMS and must be used.
   1. Calibration Check Variable Pipette (controlled) ALC.17
   2. Calibration Check Hamilton Diluter (controlled) ALC.19
   3. Alcohol Authorization Checklist (controlled) ALC.36

B. Non-controlled forms may be located on PowerDMS and the minimum information that must appear on the form is listed below.
   1. Calibration Check Bench Notes ALC.11
      a. Date
      b. Analyst
      c. Equipment Identification
      d. Thermometer serial # and reading
      e. Weights of water
   2. The Perkin Elmer System Maintenance Log: ALC.22
      The system is inclusive of the GC, headspace and computer hardware/software.
      a. Date
b. Analyst

c. Identify the component of the Perkin Elmer system undergoing maintenance
d. Problem encountered
e. Action taken to remedy the problem
f. Instrument ID

3. Balance Maintenance Log ALC.05
   a. Date
   b. Problem or symptom
   c. Action taken
d. Analyst

4. Balance Calibration Check Log ALC.06
   a. Date
   b. Analyst
c. Results of check

5. Diluter Maintenance Log ALC.34
   a. Date
   b. Analyst
   c. Problem or symptom
d. Action taken
e. Indication that monthly visual checks are being done

6. Pipette Maintenance Log ALC.24
   a. Date
   b. Problem or symptom
c. Action taken
d. Analyst

7. Thermometer Maintenance Log ALC.28
   a. Date
   b. Problem or symptom
c. Action taken
d. Analyst

8. Software Log ALC.04
   a. Date
b. Analyst

c. Unique identification of software (version # or date)

d. approval

9. Reagent Preparation Log: Internal Standard 0.0025% N-PROPANOL ALC.27

   a. Date prepared
   b. Analyst
   c. Volume prepared
   d. Solution Identification (lab assigned lot #)
   e. Volume of N-Propanol
   f. Lot # of N-Propanol
   g. Serial # of Pipette(s) used

10. Reagent Preparation Log: Resolution Check Solution ALC.12

   a. Solution Identification
   b. Date prepared
   c. Analyst
   d. Volume prepared
   e. Serial # of Pipette(s) used
   f. Lot #s of reagents used
   g. Target concentration

   a. Solution Identification
   b. Date prepared
   c. Analyst
   d. Volume prepared
   e. Instrument (DCPE1 or DCPE2)
   f. Date established
   g. Serial # of Pipette(s) used
   h. Lot #s of ethanol used
   i. Diluter used
   j. Date and results of instrumental analysis
   k. Passing criteria (acceptable range)

12. Alcohol Discovery/OLA Billing Sheet ALC.38
a. Charge and type of discovery
b. Charge for evidence transfer (OLA)
c. Subject's name
d. Lab # (if applicable)
e. Analyst
f. Date

13. Report Review Checklist **ALC.33**
   a. Components of the technical and administrative review policy

14. Quality Assurance Correction Form **ALC.37**
   a. Date
   b. Initiated by
c. Type of problem
d. Describe the quality issue
e. Describe the correction or action taken
f. Is there an impact on case results released?
g. Does a Corrective Action Procedure need to be implemented?
h. Evaluated by
   i. Date of Evaluation

15. Alcohol Electronic Signature Form
   a. Analyst signature/date and number of pages created
   b. Reviewer signature/date and number of pages reviewed

END OF DOCUMENT
I. Policy: The following is a list of abbreviations that may be used in the Alcohol Unit other than commonly used abbreviations. (Supplemental 4.13.2.13)

List of Abbreviations:

1. BAC  Blood Alcohol Concentration
2. VAC  Vitreous Alcohol Concentration
3. UAC  Urine Alcohol Concentration
4. UOM  Uncertainty of Measurement
5. MA   Measurement Assurance
6. IS   Internal Standard
7. R, RS Resolution Solution
8. Conc. Concentration
9. Dil. Diluter
10. For. Forwarded
11. Ret. Retention
12. STD Standard
13. QC Quality Control
14. TS Tape Sealed
15. EVTS Evidence Tape Sealed
16. V Vial
17. w/ with
18. %W/V Percent Weight per Volume (typically grams per 100 milliliters of blood)
19. BLK Blank
20. T17 Title 17 QC
22. U Urine
23. C, Cor Coroner
24. V, Vit Vitreous
25. N New QC
26. S, Sim Simulator Solution
27. O Other
28. WA Water
29. Seq Sequence
30. DC Dual Column
31. PE Perkin Elmer
32. GC Gas Chromatograph
33  FID    Flame Ionization Detector
34  GT     Gray Top

**ANAB:** None
I. Policy: The following are the standards for withdrawal, handling and preservation of blood samples for forensic alcohol analysis.

A. In accordance with Vehicle Code Section 23158(f), the Department of California Highway Patrol, in cooperation with the Department of Public Health and the Department of Justice, has adopted uniform standards for the withdrawal, handling and preservation of blood samples prior to analysis. The standards are outlined below (the text has been modified for use in Contra Costa County):

1. Blood samples collected from persons involved in traffic accidents or traffic violations shall be collected, handled and preserved as required by Sections 1219 and 1219.1 of Title 17 of the California Code of Regulations.

2. Blood samples are collected by venipuncture from living individuals as soon as feasible after the alleged offense, and only by persons authorized by Section 23158 of the California Vehicle Code (licensed physician or surgeon, registered nurse, licensed vocational nurse, duly licensed clinical laboratory technologist or clinical laboratory bioanalyst, phlebotomist, unlicensed laboratory personnel regulated pursuant to Sections 1242, 1242.5 and 1246 of the Business and Professions Code, or certified paramedic).

3. Alcohol or other volatile organic disinfectants are not used to clean the skin where a specimen is collected. Aqueous benzalkonium chloride (Zephiran), aqueous merthiolate, aqueous mercuric chloride or Povidine-Iodine (Betadine) disinfectants are suitable to disinfect the skin before venipuncture.

4. Sterile, dry hypodermic needles and syringes or clean, dry vacuum type containers with sterile needles are used. The blood sample is deposited into a clean, dry container (such as VACUTAINER or VENOJECT) which is closed with an inert stopper. Sample containers or reusable equipment are not reused. Tubes for collecting blood contain an anticoagulant (potassium oxalate) and a preservative (sodium fluoride). The minimum quantity of blood required to perform duplicate determinations by the laboratory and still provide sufficient quantity for referee analysis by the defendant is 3.0 mL.

5. All law enforcement agencies served are kept aware of the Uniform Standards for Withdrawal, Handling, and Preservation of Blood Samples for Forensic Alcohol Analysis (re: Section 23158(f) California Vehicle Code). Instructions are printed on the back of each submission envelope supplied by the Laboratory.

B. Procedures for Obtaining Blood Samples for Alcohol Determination

1. The requesting officer must witness the withdrawal of the sample. When the officer witnesses the actual withdrawal of the blood, it may not be necessary for the person drawing the blood to appear as a witness at the time of the trial.

2. The person drawing the blood shall fill out, initial the label, and affix it firmly to the tube or vial. The sample shall then be given to the officer, who, in turn, shall initial the label and place the sample in the prescribed envelope or other container. The officer shall immediately complete the required information on the envelope or other container label and seal container securely.

3. Appropriate steps to insure integrity of sample shall be taken.
   a. Once the envelope or other container is sealed by the agency, it should not be opened except for analysis in the laboratory.
      i. If it has been opened before analysis, the reason should be evident from documentation (a note) on the evidence.
   b. Each person having possession of the sealed sample shall record this electronically in the electronic chain of possession and may sign his/her name in the space provided on chain of possession on the envelope.
4. Any sample that is received not in compliance with these prescribed collecting and handling procedures shall be analyzed and the deficiency described in laboratory records.

C. Procedures for Obtaining Urine Samples for Alcohol Determination

1. In urine alcohol cases, a precaution is necessary that is not an element in blood cases. The urinary bladder must be emptied - then wait at least 20 minutes to collect a sample. It is important to carefully note the time when voiding is done in each instance.

2. When urine is submitted for alcohol analysis, the sample taken after the first voiding should be forwarded to the laboratory.

3. A member of the police agency, preferably the arresting officer or matron when appropriate, should supervise the collection of the sample so that there will be no question as to the source of the sample placed in the sample bottle.

4. Chemically clean bottles with tight fitting screw caps have been provided for collecting urine samples. A dry preservative has been added to the bottles. The preservative is sodium fluoride (250 milligrams per ounce of urine). CAUTION is urged since sodium fluoride is a hazardous chemical.

5. Sample bottles shall be secured tightly, properly labeled and sealed in a urine sample envelope in accordance with the procedures described under Uniform Standards for Withdrawal, Handling and Preservation of Blood Samples for Forensic Alcohol Analysis.
